STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE / POUCH B – JUNEAU 99811

February 7, 1977

The Honorable Joseph L. Orsini, Chairman
Senate Community and Regional Affairs
Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Re: Senior Citizen Property Tax Exemption.

In view of recent erroneous Associated Press releases, the following data is provided for your information.

Currently all senior citizens are eligible for 1977 property tax exemption up to an assessed value of $40,000 on their home under the formula limitation criteria.

Statutes now in effect provide total exemption to 75% of Alaska's senior citizen homeowners. It is estimated that less than 2 1/2% of those who applied will receive a tax bill of $500 or more in 1977.

Enclosed is a packet of data prepared by the Department of Community and Regional Affairs relative to current proposals affecting the program. You may be especially interested in the analysis of senior citizen properties valued at more than $40,000, this data was prepared as 'back up' material for the 'circuit breaker' proposal. Also, the analysis of senior citizen properties valued at over $100,000 may be valuable, this tabulation was provided with the fiscal note for SB 86.

Thank you for your attention.

Sincerely,

Lee McAnerney
Commissioner

S. Robert Dozier

APPENDIX B

SENIOR CITIZEN
PROPERTY TAX EXEMPTION
AS 29.53.020(e)-(i)

APPENDIX B

SENIOR CITIZEN PROPERTY TAX EXEMPTION
AS 29.53.020(e)-(i)

Effective January 1, 1973, the first Senior Citizen Property Tax Exemption Program was enacted. (ch 118 SLA 1972) Effective January 1, 1974, the $10,000 gross annual income limitation as a prerequisite to eligibility was deleted. (Sec. 1 ch 60 SLA 1974) Effective January 1, 1975, an extension of the filing date deadline for good cause shown was authorized. (Sec. 1 ch 65 SLA 1975) Effective January 1, 1977, a formula was adopted for determining an assessed value exemption limit each year. (Sec. 1 ch 217 SLA 1976)

> AS 29.53.020(e): "... the assessed value limit is the upper limit of the third quartile class in a frequency distribution of previous year assessed values in the state..."

The property tax exemption limit for the 1977 tax year has been determined to be the assessed value of the real property up to and including 40,000 in assessed value. The frequency distribution of assessed values approved for exemption in the 1976 program is illustrated in Table B-2.

In response to objections to the assessed value limit, a "circuit breaker" assistance amendment is proposed. The amendment is a favorable and acceptable measure intended to relieve disproportionate impact to senior citizen income affected by tax values over the exemption limit.

The property tax exemption application form 21-400 has been expanded to allow senior citizen homeowners to renew special assessment deferments, AS 29.63.065, on the same form; in order to avoid duplicate verification of qualifying criteria each year. (See Appendix C, Senior Citizen Special Assessment Exemption)

A breakdown of the 1976 program impact listed by participating municipalities, is illustrated in Table B-1.

A four-year performance summary of the property tax exemption program is outlined below:

Tax Year	Number of Applications Approved	Assessed Value Exempt	Total Revenue Reimbursement	Average Value Per Application	Average Tax Per Application
1973	911	12,960,993	$ 197,050	14,227	$216
[1]1974	1,887	40,842,657	631,891	21,644	335
[2]1975	2,426	59,918,061	930,915	24,698	384
1976	2,608	76,737,060	1,171,227	29,424	449

[1] *$10,000 income limit deleted*

ALASKA ADMINISTRATIVE CODE TITLE 19
DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

CHAPTER 40
SENIOR CITIZEN PROPERTY TAX EXEMPTION

19 AAC 40.010. METHOD OF APPLICATION. Applications for the senior citizen property tax exemption shall be on forms provided by the Department of Community and Regional Affairs. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.020. FORMS. Form 21-400 is hereby adopted by the department for use in the application for senior citizen property tax exemptions. (Eff. 1/28/73, Reg. 45; am 1/27/74, Reg. 48)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.030. OBTAINING FORMS. Application forms are available only from the office of the clerk or assessor of the municipality. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.040. SUBMISSION OF APPLICATION. Exemption applications filed after January 15 in accordance with AS 29.53.020 must be accompanied by written notice from the governing body of the municipality granting waiver of filing date for good cause shown. (Eff. 1/28/73, Reg. 45; am 3/31/76, Reg. 57; Eff. / / , Reg.)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.050. SUBMISSION OF AMENDED APPLICATION. Repealed. (Eff. 1/27/74, Reg. 48)

19 AAC 40.060. SUPPLEMENTARY INFORMATION. Repealed. (Eff. 1/27/74, Reg. 48)

19 AAC 40.070. CONFIDENTIALITY. Repealed (Eff. 1/27/74, Reg. 48) 48)

19 AAC 40.080. APPLICABILITY OF INCOME CRITERIA. (a) Repealed. (Eff. 1/27/74, Reg. 48)

(b) When an eligible person and his or her spouse occupy the same permanent place of abode, the exemption applies to the entire value of their property, regardless of whether the property is held in the name of the husband, wife, or both.

(c) When the standard of eligibility is met, the exemption is that portion of the tax equal to the percent of ownership of the eligible owner or owners. (Eff. 1/28/73, Reg. 45; am 1/27/74, Reg. 48)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.090. APPLICABILITY OF LIENS. Notwithstanding qualification or exemption under AS 29.53.020, property remains subject to the lien provisions of AS 29.53.200-29.53.390. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.100. PENALTY. Repealed. (Eff. 1/27/74, Reg. 48)

19 AAC 40.110. APPEAL. (a) An applicant aggrieved by any determination of the local assessor, except a decision as to the purpose of a transfer, may appeal under AS 29.53.130-29.53.135 to his local board of equalization.

(b) The determination of the Board of Equalization is appealable under AS 44.62.560-44.62.570. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.120. DEFINITIONS. In this chapter:

(1) repealed (Eff. 1/27/74, Reg. 48);

(2) "exemption year" means the calendar year for which the exemption is sought;

(3) "real property" includes, but is not limited to, mobile homes, whether classified as real or personal property for municipal tax purposes;

(4) "permanent place of abode" means a dwelling, or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to convenient use of the dwelling unit;

(5) "resident" includes applicants who have a fixed habitation in the State of Alaska, and, when absent, intend to return to the State of Alaska;

(6) "ownership" means that an applicant is possessed of an interest, other than a leasehold, in real property, including a mobile home, which interest is recorded in the office of the district recorder, or, if unrecorded, is attested by a contract, bill of sale, deed of trust, or other proof in a form satisfactory to the local assessor;

(7) "department" means the Department of Community and Regional Affairs;

(8) "senior citizen" means an applicant who is 65 years of age or older on January 1 of the exemption year. (Eff. 1/28/73, Reg. 45; am 4/18/73, Reg. 45; am 1/27/74, Reg. 48, am 3/31/76, Reg. 57)

Authority: AS 29.53.020(f)
AS 44.47.160

PROPOSED LEGISLATION

AN ACT

Relative to providing property tax relief in addition to exemption provided for senior citizens under AS 29.53.020(e)-(i).

Be it enacted by the legislature of the State of Alaska:

AS 29.73 is amended to read:

AS 29.73.070: Serior Citizen Property Tax Circuit Breaker Assistance.

(a) The owner of a dwelling unit that is exempt from payment of property taxes upon their dwelling unit for the assessment year under AS 29.53.020(e)-(i) and whose annual income from all sources does not exceed $20,000 may be entitled to a grant payment from the State through the Department of Community and Regional Affairs for a portion of property taxes paid by the applicant upon that dwelling unit which exceeds the exemption allowed by AS 29.53.020(e)-(i) as evidenced by a tax payment receipt in accordance with the following schedule:

Annual Modified Adjusted Gross Income	Percent of Nonexempt Property Tax Eligible for Assistance
Not over	
8,000	90%
9,500	80%
11,000	70%
12,500	60%
14,000	50%
15,500	40%
17,000	30%
18,500	20%
20,000	10%
over 20,000	-0-

(b) No exemption may be granted except upon written application for the grant payment on a form prescribed by the Department of Community and Regional Affairs. Application must be filed with the Department prior to the July 1 immediately following the assessment year for which the grant payment is sought. A separate application must be filed annually for each assessment year in which the grant payment is sought.

(c) "Modified Adjusted Gross Income of applicant and spouse" means the sum of "adjusted gross income" as defined in Section 62 of the Internal Revenue Code (26 U.S.C.62), alimony, support money, public assistance, and relief (not including relief granted under this section), cost of living allowance paid to federal employees, allowances received by dependents of servicemen, the gross amount of any pension or annuity (including railroad retirement benefits, all payments received under the Federal Social Security Act, the Alaska Longevity Bonus, and all benefits under the Veterans's Acts), nontaxable interest received from the state or federal government or any of its instrumentalities, workmen's compensation, the gross amount of "loss of time" insurance, and the amount of capital gains excluded from adjusted gross income. It does not include gifts from nongovernmental sources, or surplus food or other relief in-kind supplied by a governmental agency (property tax exemption under AS 29.53.020(e)-(i) is considered in-kind relief for purposes of this section).

Senior Citizen Property Tax Exemption

SB 86, 100,000 Assessed Value Limit

The attached analysis was prepared to illustrate the citizen impact of SB 86 which proposes raising the current formula limitation to a 100,000 assessed value limit.

Table I

Illustrates a comparison of alternative program totals:

The total reimbursement for the FY 77 unlimited program is approximately $1,171,227 for 2,608 applicants, stipulating an 8% increase in applicants and a 27% increase in total property tax, a FY 78 unlimited reimbursement would be about $1,487,458 for 2,817 applicants.

From Table II, the 100,000 limit would reduce an unlimited program by about $25,000, for a total reimbursement of $1,462,950 in FY 78.

The formula assessed value limit has been established to be 40,000 in FY 78 and it is estimated to require a $1,292,349 reimbursement, therefore, raising the assessed value limit from 40,000 to 100,000 will require about $170,500 in additional funds.

The FY 78 BRU grant for the formula limitation program is $1,375,000, SB 86 would increase the total grant requirement to $1,545,500.

Table II

Table II is a list of the 26, FY 77 applications showing a value over 100,000 and the corresponding total tax levy on those properties of $56,532.81. Also, a list of 22 applications showing a FY 77 value of over 85,000 has been compiled with a total tax levy on those properties of $28,355.09. These 22 properties are projected to reach or exceed 100,000 in FY 78. Stipulaton of a 27% increase in total tax levy projects a total FY 78 tax of $107,807.63 on the 48 properties listed. At an average rate of 17 mills, $83,300 of the total value would be exempt under SB 86. This leaves approximately $25,000 that would not be eligible for reimbursement.

TABLE I
TOTAL PROGRAM SUMMARY

SENIOR CITIZEN - PROPERTY TAX EXEMPTION - "CIRCUIT BREAKER" ASSISTANCE

The attached analysis of the FY 77 senior citizen property tax reimbursement has been prepared to illustrate the fiscal and citizen impact of the assessed value limit in effect for the FY 78 program and to show the probable scope of proposed 'circuit breaker' assistance legislation.

The 'circuit breaker' offers assistance in addition to the basic 'homestead' exemption. The additional assistance is based on proof of disproportionate property tax levy relative to income and assumes that any homeowner at whatever income level should support his property to the extent of a minimum of 10% above the basic 'homestead' exemption.

Based on Bureau of Labor Statistics, a moderately comfortable annual income for an Alaskan senior citizen household in FY 76 was $8,800 and a high income was placed at $12,500. The ' circuit breaker' allows 90% assistance for remaining property tax after the basic 40,000 value to all income levels up to $8,000. The exemption is reduced by 10% for each additional $1,500 in annual income. Annual income of over $20,000 would not be eligible for 'circuit breaker' assistance.

TABLE I:

Is a comparison of the actual reimbursement and the impact of a 40,000 value limit, if such had been in effect.

There were 2,508 senior citizens receiving full forgiveness of property tax in FY 77; had the limit been in effect, 2,006 (77%) would have continued to receive 100% exemption.

Of the $1,171,227 reimbursed to municipalities in FY 77, $1,017,598 (87%) would have been reimbursed, notwithstanding the 40,000 value limit.

Projections for the FY 78 program are based on an estimated increase of 8% in the number of applicants and an increase of 27% in total revenue reimbursed.

TABLE II:

Is an analysis of properties that would have been involved in the proposed 'circuit breaker' assistance legislation, had it been in effect.

There were 602 properties valued in excess of 40,000. The total tax on those properties was $515,782, of which $362,153 (70%) would have been reimbursed in full.

The tax on the value over 40,000 was $153,629 which would have been subject to 'circuit breaker' assistance income level criteria.

Individual properties would have had a minimum tax exemption of $200 in Sitka to a maximum exemption of $856 in Ketchikan.

TABLE III:

Is a comparison of the number of properties subject to a tax levy above the exempt limit by tax levy categories.

Of the 602 properties subject to additional taxes after the exemption limit, 220 would have been liable for less than $100 each and 5 for more than $2,000 each.

TABLE IV:

Is a comparison of the total revenue levied on values over 40,00 by tax levy category.

Approximately 50% ($76,658) of the total revenue that would effect the proposed 'circuit breaker' relief, involved 317 properties liable for less than $500 each or an average levy of $242 above the exempt value tax of between $200 to $856 .

Basic Homestead Exemption = 40,000

PROPOSED LEGISLATION - 40,000 limit is in operation now- Last year there was blanket exemption.

AN ACT

Relative to providing property tax relief in addition to exemption provided for senior citizens under AS 29.53.020(e)-(i).

Be it enacted by the legislature of the State of Alaska:

AS 29.73 is amended to read:

AS 29.73.070: Senior Citizen Property Tax Circuit Breaker Assistance.

(a) The owner of a dwelling unit that is exempt from payment of property taxes upon their dwelling unit for the assessment year under AS 29.53.020(e)-(i) and whose annual income from all sources does not exceed $20,000 may be entitled to a grant payment from the State through the Department of Community and Regional Affairs for a portion of property taxes paid by the applicant upon that dwelling unit which exceeds the exemption allowed by AS 29.53.020(e)-(i) as evidenced by a tax payment receipt in accordance with the following schedule:

The 1st 40,000 is exempt

Then this goes into effect.

Annual Modified Adjusted Gross Income	Percent of Nonexempt Property Tax Eligible for Assistance
Not over	
8,000	90%
9,500	80%
11,000	70%
12,500	60%
14,000	50%
15,500	40%
17,000	30%
18,500	20%
20,000	10%
over 20,000	-0-

only applies to those having assessed property over $40,000. So if the property owner paid a tax bill of $100 + his income was not over 8,0 then the state would pay $90 + the property owner would pay $10.

(b) No exemption may be granted except upon written application for the grant payment on a form prescribed by the Department of Community and Regional Affairs. Application must be filed with the Department prior to the July 1 immediately following the assessment year for which the grant payment is sought. A separate application must be filed annually for each assessment year in which the grant payment is sought.

602

SB6

RESOLUTION No. I

WHEREAS the last State Legislature passed an amendment to a bill which placed an assessed property valuation limitation on the tax forgiveness for senior citizens, and,

WHEREAS, this bill containing this amendment was signed into law by the Governor of Alaska, and

WHEREAS, this change in law does serious economic damage to the senior citizens of Alaska making it more difficult for them to maintain their residency in Alaska during their retirement years,

NOW, THEREFORE BE IT RESOLVED that this 60th Convention of the Grand Igloo of the Pioneers of Alaska, assembled here in Ketchikan, Alaska, this 9th day of October, 1976, go on record as requesting the next legislature to rescind that part of the law limiting the tax forgiveness on the homes of Alaska's Senior Citizens, and

That a copy of this resolution be forwarded to the Governor of Alaska and each State Legislator by the Grand Secretary.

Approved: /s/ E. G. BARBER, Chairman, RESOLUTION COMMITTEE

DEPARTMENT OF ADMINISTRATION

January 27, 1977

The Honorable Joseph L. Orsini, Chairman
Community and Regional Affairs Committee
The Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Subject: Senate Bill 6

As long as municipalities are fully reimbursed all revenues lost due to property tax exemptions, we do not object to such exemptions.

However, some means should be in effect to limit property tax exemptions. For example, if a senior citizen lives in a $500,000 residence on 160 acres, does the bill provide that the total value is exempt?

Very truly yours,

Wesley M. Howe

Wesley M. Howe
Borough Manager

PROPOSED LEGISLATION

AN ACT

Relative to providing property tax relief in addition to exemption provided for senior citizens under AS 29.53.020(e)-(i).

Be it enacted by the legislature of the State of Alaska:

AS 29.73 is amended to read:

AS 29.73.070: Senior Citizen Property Tax Circuit Breaker Assistance.

(a) The owner of a dwelling unit that is exempt from payment of property taxes upon their dwelling unit for the assessment year under AS 29.53.020(e)-(i) and whose annual income from all sources does not exceed $20,000 may be entitled to a grant payment from the State through the Department of Community and Regional Affairs for a portion of property taxes paid by the applicant upon that dwelling unit which exceeds the exemption allowed by AS 29.53.020(e)-(i) as evidenced by a tax payment receipt in accordance with the following schedule:

Annual Modified Adjusted Gross Income	Percent of Nonexempt Property Tax Eligible for Assistance
Not over	
8,000	90%
9,500	80%
11,000	70%
12,500	60%
14,000	50%
15,500	40%
17,000	30%
18,500	20%
20,000	10%
over 20,000	-0-

100
90
10

(b) No exemption may be granted except upon written application for the grant payment on a form prescribed by the Department of Community and Regional Affairs. Application must be filed with the Department prior to the July 1 immediately following the assessment year for which the grant payment is sought. A separate application must be filed annually for each assessment year in which the grant payment is sought.

Cost-of-Living			906,924
Prepayments to municipalities later determined ineligible			(654)
Total Disbursed to Participants			14,921,715

The objectives of this BRU are:

- To allocate State Revenue Sharing Funds to local governments in accordance with the provisions of AS 43.18.010-045
- To provide financial and budgeting assistance to 8 communities to assure that sound and fiscally attainable levels of municipal services can be provided.
- Encourage the organization of 5 volunteer fire departments outside municpalities.

Called Palmer + inquired about the funding data per your request. He said the CEA requested the amount of $19,527,300 as the total amount necessary to operate their program. The Governor (in his budget) pared this amount down to 90% of that figure which amounts to the $17,574.6 (underlined in red).

February 7, 1977

The Honorable Joseph L. Orsini, Chairman
Senate Community and Regional Affairs
Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Re: Senior Citizen Property Tax Exemption.

In view of recent erroneous Associated Press releases, the following data is provided for your information.

Currently all senior citizens are eligible for 1977 property tax exemption up to an assessed value of $40,000 on their home under the formula limitation criteria.

Statutes now in effect provide total exemption to 75% of Alaska's senior citizen homeowners. It is estimated that less than 2 1/2% of those who applied will receive a tax bill of $500 or more in 1977.

Enclosed is a packet of data prepared by the Department of Community and Regional Affairs relative to current proposals affecting the program. You may be especially interested in the analysis of senior citizen properties valued at more than $40,000, this data was prepared as 'back up' material for the 'circuit breaker' proposal. Also, the analysis of senior citizen properties valued at over $100,000 may be valuable, this tabulation was provided with the fiscal note for SB 86.

Thank you for your attention.

Sincerely,

Lee McAnerney
Commissioner

By: S. Robert Dozier
State Assessor

APPENDIX B

SENIOR CITIZEN
PROPERTY TAX EXEMPTION
AS 29.53.020(e)-(i)

APPENDIX B

SENIOR CITIZEN PROPERTY TAX EXEMPTION
AS 29.53.020(e)-(i)

Effective January 1, 1973, the first Senior Citizen Property Tax Exemption Program was enacted. (ch 118 SLA 1972) Effective January 1, 1974, the $10,000 gross annual income limitation as a prerequisite to eligibility was deleted. (Sec. 1 ch 60 SLA 1974) Effective January 1, 1975, an extension of the filing date deadline for good cause shown was authorized. (Sec. 1 ch 65 SLA 1975) Effective January 1, 1977, a formula was adopted for determining an assessed value exemption limit each year. (Sec. 1 ch 217 SLA 1976)

> AS 29.53.020(e): "... the assessed value limit is the upper limit of the third quartile class in a frequency distribution of previous year assessed values in the state..."

The property tax exemption limit for the 1977 tax year has been determined to be the assessed value of the real property up to and including 40,000 in assessed value. The frequency distribution of assessed values approved for exemption in the 1976 program is illustrated in Table B-2.

In response to objections to the assessed value limit, a "circuit breaker" assistance amendment is proposed. The amendment is a favorable and acceptable measure intended to relieve disproportionate impact to senior citizen income affected by tax values over the exemption limit.

The property tax exemption application form 21-400 has been expanded to allow senior citizen homeowners to renew special assessment deferments, AS 29.63.065, on the same form; in order to avoid duplicate verification of qualifying criteria each year. (See Appendix C, Senior Citizen Special Assessment Exemption)

A breakdown of the 1976 program impact listed by participating municipalities, is illustrated in Table B-1.

A four-year performance summary of the property tax exemption program is outlined below:

Tax Year	Number of Applications Approved	Assessed Value Exempt	Total Revenue Reimbursement	Average Value Per Application	Average Tax Per Application
[1]1973	911	12,960,993	$ 197,050	14,227	$216
[2]1974	1,887	40,842,657	631,891	21,644	335
1975	2,426	59,918,061	930,915	24,698	384
1976	2,608	76,737,060	1,171,227	29,424	449

[1] *$10,000 income limit deleted*

ALASKA ADMINISTRATIVE CODE TITLE 19
DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

CHAPTER 40
SENIOR CITIZEN PROPERTY TAX EXEMPTION

19 AAC 40.010. METHOD OF APPLICATION. Applications for the senior citizen property tax exemption shall be on forms provided by the Department of Community and Regional Affairs. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.020. FORMS. Form 21-400 is hereby adopted by the department for use in the application for senior citizen property tax exemptions. (Eff. 1/28/73, Reg. 45; am 1/27/74, Reg. 48)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.030. OBTAINING FORMS. Application forms are available only from the office of the clerk or assessor of the municipality. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.040. SUBMISSION OF APPLICATION. Exemption applications filed after January 15 in accordance with AS 29.53.020 must be accompanied by written notice from the governing body of the municipality granting waiver of filing date for good cause shown. (Eff. 1/28/73, Reg. 45; am 3/31/76, Reg. 57; Eff. / / , Reg.)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.050. SUBMISSION OF AMENDED APPLICATION. Repealed. (Eff. 1/27/74, Reg. 48)

19 AAC 40.060. SUPPLEMENTARY INFORMATION. Repealed. (Eff. 1/27/74, Reg. 48)

19 AAC 40.070. CONFIDENTIALITY. Repealed (Eff. 1/27/74, Reg. 48) 48)

19 AAC 40.080. APPLICABILITY OF INCOME CRITERIA. (a) Repealed. (Eff. 1/27/74, Reg. 48)

(b) When an eligible person and his or her spouse occupy the same permanent place of abode, the exemption applies to the entire value of their property, regardless of whether the property is held in the name of the husband, wife, or both.

(c) When the standard of eligibility is met, the exemption is that portion of the tax equal to the percent of ownership of the eligible owner or owners. (Eff. 1/28/73, Reg. 45; am 1/27/74, Reg. 48)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.090. APPLICABILITY OF LIENS. Notwithstanding qualification for exemption under AS 29.53.020, property remains subject to the lien provisions of AS 29.53.200-29.53.390. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.100. PENALTY. Repealed. (Eff. 1/27/74, Reg. 48)

19 AAC 40.110. APPEAL. (a) An applicant aggrieved by any determination of the local assessor, except a decision as to the purpose of a transfer, may appeal under AS 29.53.130-29.53.135 to his local board of equalization.

(b) The determination of the Board of Equalization is appealable under AS 44.62.560-44.62.570. (Eff. 1/28/73, Reg. 45)

Authority: AS 29.53.020(f)
AS 44.47.160

19 AAC 40.120. DEFINITIONS. In this chapter:

(1) repealed (Eff. 1/27/74, Reg. 48);

(2) "exemption year" means the calendar year for which the exemption is sought;

(3) "real property" includes, but is not limited to, mobile homes, whether classified as real or personal property for municipal tax purposes;

(4) "permanent place of abode" means a dwelling, or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to convenient use of the dwelling unit;

(5) "resident" includes applicants who have a fixed habitation in the State of Alaska, and, when absent, intend to return to the State of Alaska;

(6) "ownership" means that an applicant is possessed of an interest, other than a leasehold, in real property, including a mobile home, which interest is recorded in the office of the district recorder, or, if unrecorded, is attested by a contract, bill of sale, deed of trust, or other proof in a form satisfactory to the local assessor;

(7) "department" means the Department of Community and Regional Affairs;

(8) "senior citizen" means an applicant who is 65 years of age or older on January 1 of the exemption year. (Eff. 1/28/73, Reg. 45; am 4/18/73, Reg. 45; am 1/27/74, Reg. 48, am 3/31/76, Reg. 57)

Authority: AS 29.53.020(f)
AS 44.47.160

PROPOSED LEGISLATION

AN ACT

Relative to providing property tax relief in addition to exemption provided for senior citizens under AS 29.53.020(e)-(i).

Be it enacted by the legislature of the State of Alaska:

AS 29.73 is amended to read:

AS 29.73.070: Senior Citizen Property Tax Circuit Breaker Assistance.

(a) The owner of a dwelling unit that is exempt from payment of property taxes upon their dwelling unit for the assessment year under AS 29.53.020(e)-(i) and whose annual income from all sources does not exceed $20,000 may be entitled to a grant payment from the State through the Department of Community and Regional Affairs for a portion of property taxes paid by the applicant upon that dwelling unit which exceeds the exemption allowed by AS 29.53.020(e)-(i) as evidenced by a tax payment receipt in accordance with the following schedule:

Annual Modified Adjusted Gross Income	Percent of Nonexempt Property Tax Eligible for Assistance
Not over	
8,000	90%
9,500	80%
11,000	70%
12,500	60%
14,000	50%
15,500	40%
17,000	30%
18,500	20%
20,000	10%
over 20,000	-0-

(b) No exemption may be granted except upon written application for the grant payment on a form prescribed by the Department of Community and Regional Affairs. Application must be filed with the Department prior to the July 1 immediately following the assessment year for which the grant payment is sought. A separate application must be filed annually for each assessment year in which the grant payment is sought.

(c) "Modified Adjusted Gross Income of applicant and spouse" means the sum of "adjusted gross income" as defined in Section 62 of the Internal Revenue Code (26 U.S.C.62), alimony, support money, public assistance, and relief (not including relief granted under this section), cost of living allowance paid to federal employees, allowances received by dependents of servicemen, the gross amount of any pension or annuity (including railroad retirement benefits, all payments received under the Federal Social Security Act, the Alaska Longevity Bonus, and all benefits under the Veterans's Acts), nontaxable interest received from the state or federal government or any of its instrumentalities, workmen's compensation, the gross amount of "loss of time" insurance, and the amount of capital gains excluded from adjusted gross income. It does not include gifts from nongovernmental sources, or surplus food or other relief in-kind supplied by a governmental agency (property tax exemption under AS 29.53.020(e)-(i) is considered in-kind relief for purposes of this section).

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A final estimate of the grant fund requirement for the operation of the circuit breaker is based on the analysis of the current senior citizen property tax exemption program. To fully fund complete exemption would require $195,000 in addition to the formula established limitation. By the recommended graduated circuit breaker, approximately 50% of this amount, or $100,000 grant would fund the additional payments to eligible applicants. Operation of the program will require the addition of a full time clerk typist III position.

Funding Required for Administration of the Senior Citizen Circuit Breaker:

SENIOR CITIZEN - PROPERTY TAX EXEMPTION - "CIRCUIT BREAKER" ASSISTANCE

The attached analysis of the FY 77 senior citizen property tax reimbursement has been prepared to illustrate the fiscal and citizen impact of the assessed value limit in effect for the FY 78 program and to show the probable scope of proposed 'circuit breaker' assistance legislation.

The 'circuit breaker' offers assistance in addition to the basic 'homestead' exemption. The additional assistance is based on proof of disproportionate property tax levy relative to income and assumes that any homeowner at whatever income level should support his property to the extent of a minimum of 10% above the basic 'homestead' exemption.

Based on Bureau of Labor Statistics, a moderately comfortable annual income for an Alaskan senior citizen household in FY 76 was $8,800 and a high income was placed at $12,500. The ' circuit breaker' allows 90% assistance for remaining property tax after the basic 40,000 value to all income levels up to $8,000. The exemption is reduced by 10% for each additional $1,500 in annual income. Annual income of over $20,000 would not be eligible for 'circuit breaker' assistance.

TABLE I:

Is a comparison of the actual reimbursement and the impact of a 40,000 value limit, if such had been in effect.

There were 2,608 senior citizens receiving full forgiveness of property tax in FY 77; had the limit been in effect, 2,006 (77%) would have continued to receive 100% exemption.

Of the $1,171,227 reimbursed to municipalities in FY 77, $1,017,598 (87%) would have been reimbursed, notwithstanding the 40,000 value limit.

Projections for the FY 78 program are based on an estimated increase of 8% in the number of applicants and an increase of 27% in total revenue reimbursed.

TABLE II:

Is an analysis of properties that would have been involved in the proposed 'circuit breaker' assistance legislation, had it been in effect.

There were 602 properties valued in excess of 40,000. The total tax on those properties was $515,782, of which $362,153 (70%) would have been reimbursed in full.

The tax on the value over 40,000 was $153,629 which would have been subject to 'circuit breaker' assistance income level criteria.

Individual properties would have had a minimum tax exemption of $200 in Sitka to a maximum exemption of $856 in Ketchikan.

TABLE III:

Is a comparison of the number of properties subject to a tax levy above the exempt limit by tax levy categories.

Of the 602 properties subject to additional taxes after the exemption limit, 220 would have been liable for less than $100 each and 5 for more than $2,000 each.

TABLE IV:

Is a comparison of the total revenue levied on values over 40,00 by tax levy category.

Approximately 50% ($76,658) of the total revenue that would effect the proposed 'circuit breaker' relief, involved 317 properties liable for less than $500 each or an average levy of $242 above the exempt value tax of between $.00 to $856 .

Senior Citizen Property Tax Exemption

SB 86, 100,000 Assessed Value Limit

The attached analysis was prepared to illustrate the citizen impact of SB 86 which proposes raising the current formula limitation to a 100,000 assessed value limit.

Table I

Illustrates a comparison of alternative program totals:

The total reimbursement for the FY 77 unlimited program is approximately $1,171,227 for 2,608 applicants, stipulating an 8% increase in applicants and a 27% increase in total property tax, a FY 78 unlimited reimbursement would be about $1,487,458 for 2,817 applicants.

From Table II, the 100,000 limit would reduce an unlimited program by about $25,000, for a total reimbursement of $1,462,950 in FY 78.

The formula assessed value limit has been established to be 40,000 in FY 78 and it is estimated to require a $1,292,349 reimbursement, therefore, raising the assessed value limit from 40,000 to 100,000 will require about $170,500 in additional funds.

The FY 78 BRU grant for the formula limitation program is $1,375,000, SB 86 would increase the total grant requirement to $1,545,500.

Table II

Table II is a list of the 26, FY 77 applications showing a value over 100,000 and the corresponding total tax levy on those properties of $56,532.81. Als . a list of 22 applications showing a FY 77 valu.e of over 85,000 has been compiled with a total tax levy on those prop rti s of $28,355.09. These 22 properties are projected to reach or exceed 100,000 n FY 78. Stipulaton of a 27% increase in total tax levy projects a total FY 78 tax of $107,807.63 on the 48 properties listed. At an average rate of 17 mills, $83,300 of the total value would be exempt under SB 86. This leaves approximately $25,000 that would not be eligible for reimbursement.

SENIOR CITIZEN PROPERTY TAX EXEMPTION

Mr. Paul Conger
Community & Regional Affairs Committee
Pouch Y
Juneau, Alaska 99811

Dear Mr. Conger:

Enclosed please find the list of communities eligible for training under Law Enforcement Assistance Agency, Indian desk discretionary funding.

Those communities marked with asterisks have police officers trained by the Department of Public Safety under an LEAA grant.

Because only 45% of the native communities are eligible to benefit under the LEAA grant, the department submitted a CETA proposal as a test and trained 22 additional police officers without regard to LEAA eligibility. A feature of the CETA program was paying the students minimum wages for 12 weeks after graduation and requiring a commitment from the student's village or home city to agree to continue to pay at least the minimum wage for one year.

Communities which took part in this program are as follows: Kwethluk, Gambell, Buckland, Allakaket, Tyonek, Selawik, New Stuyahok, Tununak, Shishmaref, Savoonga, Wales, Stebbins, Kiana, Palmer, Haines and St. Michael.

If I can be of further assistance please contact me.

Sincerely,

Tom Williamson

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN, MAYOR

OFFICE OF THE MAYOR

February 25, 1977

Senator Joe Orsini
Pouch V
Juneau, Alaska 99811

Dear Joe:

Possibly the Department of Community and Regional Affairs may be correct in reference to their decision on the Port of Anchorage but it certainly can create additional problems if they are and possibly legislation should be introduced to correct it.

The Port of Anchorage has served the entire Municipality for many years. It was only after we unified in 1975 that I was able to implement the Port of Anchorage on an areawide basis. For many years before that, the City of Anchorage people supported the Port which benefited everyone. It seems unfair that we could not expand the power of the Port areawide and receive revenue sharing for same.

What bothers me additionally is that if we expand Police power to Muldoon, Sand Lake or even areawide, is the indication then that we would not receive revenue sharing? If this is the case I can assure you and Commissioner McAnerney there will not be any move to expand and enlarge any type of services if revenue sharing would not be available. It wouldn't make sense to! Additionally, if we went areawide with Police it would be a substantial help to the State of Alaska.

I would appreciate your review of this and if you feel as I do, introduction of legislation to correct what I consider to be a serious inequity. Many thanks for your past, present and future help.

Most sincerely,

George M. Sullivan
Mayor

February 2, 1977

CERTIFIED/RETURN RECEIPT REQUESTED

RECEIVED
FEB 7 1977
MAYOR'S OFFICE

The Honorable George M. Sullivan
Mayor, Municipality of Anchorage
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Sullivan:

RE: Appeal of The 1977 Entitlement
for State Aid to Local Government

Careful consideration has been given to your letter of appeal dated January 13, 1977 requesting that the Municipality of Anchorage be considered eligible to receive additional State Aid funds under the categories of transportation, health facilities, hospital construction aid, road maintenance and parks and recreation.

Under the category of transportation, your letter states that the notice of entitlement does not consider the Port of Anchorage which was made areawide as of July 1, 1976. However, the notice of entitlement does include the Port of Anchorage for a per capita population figure taken within the former boundaries for the City of Anchorage. Your letter further states that with the legislation passed, you were not aware that this particular service would be prohibited from expansion for additional areawide service.

Enclosed is a copy of Chapter 265 which repealed Alaska Statute 43.18.050 and became effective July 1, 1976. Chapter 265 states, in part, that the amount of Revenue Sharing to which a successor municipality is entitled shall be computed for the first year and each year thereafter as if the merger, consolidation or unification had not occurred, and the successor municipality shall receive not less than the amount so computed. The Municipality of Anchorage could not receive an amount greater than if the Greater Anchorage Area Borough and the City of Anchorage had not unified. The port facility would not be entitled to receive $5 per capita based on the boundaries of the former Greater Anchorage Area Borough since the Port of Anchorage was a transportation facility for the former City of Anchorage.

Under the category of health facilities, we have approved a total of 323 beds. The difference claimed by the Municipality of Anchorage is a reduction of 62 beds

disapproved by the Department of Health and Social Services, and consisted of the following facilities:

Health Facilities	Approved Beds	Disapproved Beds	Beds Requested
Booth Memorial Maternity Home	12 beds		12 beds
Booth Memorial Home	14 beds		14 beds
Hope Cottage	10 beds		10 beds
Sunrise Cottage	8 beds		8 beds
Hope Park	36 beds		36 beds
Karluk	8 beds		8 beds
Bering Program	10 beds	4 beds	14 beds
McKinnel Residence Home for Women	15 beds		15 beds
Social Development Center	53 beds		53 beds
Alaska Family House	25 beds	25 beds	50 beds
Future House	25 beds	7 beds	32 beds
Anchorage Halfway House	Disapproved	-0-	-0-
Phoenix House	15 beds		15 beds
Studio Club	25 beds	15 beds	40 beds
Jessee Lee Home	40 beds	5 beds	45 beds
Alaska Children Services Recovery Home	5 beds		5 beds
Alaska Baptist Family Services Center	12 beds	6 beds	18 beds
Alaska Children Services Youth Center	10 beds		10 beds
	323 beds	62 beds	385 beds

The Studio Club was initially disapproved pending an on-site visit by a staff person of the Department of Health and Social Services. Subsequent to your letter of appeal, the Studio Club was approved for 25 beds which is a reduction from your initial request for 40 beds.

Under the category of hospital construction aid, the total number of beds claimed on the summary application was 327 beds and the notice of entitlement dated December 31, 1976 allowed for 277 beds, a difference of 50 beds. The recap sheet for the Municipality of Anchorage showed 150 beds for the Alaska Hospital and Medical Center, Inc., which should have been 200 beds as supported by Attachments B and C. However, the Department of Health and Social Services is only able to approve for 197 beds. We would be able to approve a total of 324 beds based upon the supporting data on the initial application.

Under the category of road maintenance, the appeal is allowed for an additional 4.63 miles of road. The initial mileage figures approved by the Department of Highways did not include the fiscal 77 total road mileage information which was later mailed on November 24, 1976.

Under the category of parks and recreation, the computation error in the initial notice of entitlement should be corrected to read $822,100 as shown on the summary sheet of the application form submitted. The corrected computation is reflected in the final entitlement.

According to 19 Alaska Administrative Code 30.050(b), you are notified that the final entitlement for the Municipality of Anchorage under the State Aid to Local Government Municipal Revenue Sharing shall include the following entitlement:

Municipal Services	Rate	Basis	Amount
Police Protection	12 per capita	106,690 pop.	$1,280,280
Military	6 per capita	18,897 pop.	113,382
Fire Protection	7.50 per capita	175,189 pop.	1,313,918
Air/Water	2 per capita	175,603 pop.	351,206
Land Use Planning	2 per capita	175,603 pop.	351,206
Parks & Recreation	5 per capita	164,420 pop.	822,100
Military	1.25 per capita	18,897 pop.	23,621
Transportation	5 per capita	245,454 pop.	1,227,270
Military	2.50 per capita	37,794 pop.	94,485
Road Maintenance	1,500 per mile	359.48 mi.	539,220
Hospitals			
	2 per capita	175,603 pop.	351,206
	1,000 per bed	235 beds	235,000
Health Facilities			
	1,000 per bed	323 beds.	323,000
	4,000 per fac.	12 fac.	48,000
Construction Aid	2,500 per bed	324 beds	810,000
		Entitlement	$7,883,894
		Cost-of-Living @ -0-	-0-
		Total Entitlement	$7,883,894

The total entitlement for your municipality will be prorated. Proration is necessary when the value of all approved applications exceeds the appropriation of the program funded by the Legislature. The proration factor will be determined after each program participant has received its notice of entitlement and all appeals have been reviewed.

If you desire additional information, I welcome the opportunity to discuss this matter with you.

Sincerely,

Lee McAnerney
Commissioner

LAWS OF ALASKA

1976

Source

FCCS SCS CSHB 687

Chapter No.

265

AN ACT

Relating to municipal revenue sharing; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.18 is amended by adding a new section to read:

Sec. 43.18.045. UNIFICATION, MERGER OR CONSOLIDATION OF MUNICIPALITIES. If a borough and the cities within the borough merge, consolidate or unify in accordance with AS 29.68, the amount of revenue sharing to which the successor municipality is entitled shall be computed for the first year and each year thereafter as if the merger, consolidation or unification had not occurred, and the successor municipality shall receive not less than the amount so computed.

* Sec. 2. AS 43.18.010(h)(1), (2) and (4) are repealed and re-enacted to read:

(1) $2 per capita to a municipality which has the power to provide health facilities and services and in which a hospital is located;

(2) in addition to the payment made under (1) of this subsection

(A) the state shall make payments to a municipality which has the power to provide hospital facilities and services and which exercises the power on the basis of $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital, or $75,000 a hospital for those hospitals with 10 or more beds, or $25,000 a hospital for those

hospitals with less than 10 beds, as the municipality may elect; funds received under this subparagraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines;

(B) the state shall make payments on the basis set out in (A) of this paragraph to a municipality for nonprofit hospitals not operated by a municipality if the municipality first certifies to the department that the hospital is in compliance with all standards for hospitals which have been adopted by the municipality; in the absence of this certification the funds which would have gone to the hospital lapse into the state general fund; payments to the municipality shall be transferred to the hospital in accord with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(C) a hospital may not receive payment under both (A) and (B) of this paragraph;

(4) funds received by a municipality under (1) or (3) of this subsection shall be used for expenses of health services or operation and maintenance of facilities as the municipality determines;

* Sec. 3. AS 43.18.050 is repealed.

* Sec. 4. This Act takes effect July 1, 1976.

Approved by governor: June 28, 1976
Actual effective date: July 1, 1976

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MAYOR

January 13, 1977

Commissioner Lee McAnerney
State of Alaska
Department of Community & Regional Affairs
Pouch B
Juneau, Alaska 99811

Dear Commissioner McAnerney:

Re: State Revenue Sharing Grant Entitlement

Pursuant to State Revenue Sharing regulations, the Municipality of Anchorage is exercising the appeal procedure.

1. The December 30, 1976 letter from your Department will require updating in certain categories based on your January 4, 1977 Notification of Population. (copies attached)

2. Transportation:

   The entitlement provided does not consider the Port of Anchorage which has been made areawide as of 1/1/76. Although the legislature passed legislation to guarantee no loss of State Revenue Sharing because of unification in this category, we are not aware that this particular service was prohibited from expansion. Currently all residents of the Municipality of Anchorage pay taxes to support debt service on the Port, let alone its known value over and beyond the boundaries of Anchorage. The action does not appear to be an equitable one.

   The difference of computation means a possible loss of $528,760 to Anchorage for Transportation support.

3. Health Facilities: $1,000 per bed

   The Municipality's application was for 385 beds. The entitlement computation was for 298 or a difference of 87 beds for a total value of $87,000.

   The total reduction does not agree with the application:

Total beds outlined in the application	385
(1) Disallowance for Studio Club (1976)	-40
Disallowance for Native Halfway House (1976)	-0-
Total	345
Entitlement on December 30th letter	298
Difference	47

There is no justification or explanation for the reduction of the difference of 47. Could this be an error? The back-up was researched and does total 385.

(1) We believe that the Studio Club does fall within the definition of AS 43.18(H) (S) (2).

a. It is operated by a non-profit corporation.

b. It is a halfway house facility for recovering alcoholism. These types of facilities have been generally defined as falling within the definition and may well be considered "convalescent" centers.

c. They are licensed as a halfway house facility by the State of Alaska. There may be some confusion as the Studio Club moved from their former location at 146 E. 11th to 546 15th Avenue just prior to the close of the fiscal year. However, this should not infringe on the entitlement as the services and organization has not changed.

The Anchorage Native Halfway House is no longer in existense and no entitlement was claimed for FY 77 or 78.

4. Hospital Construction Aid:

The total beds claimed for Hospital Construction Aid was 327 and the December 30th letter allows 277 or a difference of 50 beds for a total difference in amount of $125,000.

The recap sheet in our application shows 150 beds for the Alaska Hospital and Medical Center, Inc., which should be 200 as supported by both Attachment B and Attachment C. The recap sheet must be a typographic error which we did not notice at the time of preparing the application. The amount of 327 beds is correct and the supporting data is part of our original application.

5. Road Maintenance:

The Municipality's application was for 359.48 miles while the letter of December 30th allowed 354.85 or a difference of 4.63 miles for a total amount difference of $6,945.

Initially we were contacted by CRA by telephone to provide Road miles which we would apply for in our application. We provided an initial amount of 354.85 miles. However, when we formally prepared our application we added 4.63 miles and provided all supporting documentation. The amount of 354.85 miles is as of July 1, 1975 not July 1, 1976. In effect we were not properly credited for additional miles allowable from 1975 and 1976. (see attachments)

6. Parks and Recreation:

The December 30th letter from CRA computes Parks and Recreation as follows:

Parks and Recreation - 5 per capita - 164,420 pop. $882,100

The above computation should be for $822,100 or a difference of $60,000.

Recapitulation

	Difference
Transportation	$ 528,760
Health Facilities	87,000
Construction Hospitals	125,000
Road Maintenance	6,945
Parks & Recreation	(60,000)
December 30th letter	7,794,449
Total Municipal Application	$8,482,154

We would appreciate your review of our appeal. If there is any further supporting documentation which is required, please do not hesitate to advise me at your earliest convenience.

Sincerely,

George M. Sullivan
Mayor

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini,

The North Slope Borough would like to go on record as supporting Senate Bills 19 and 32 which increase present revenue sharing entitlements and create a new category of entitlement, respectively.

Senate Bill 19 increases the present $12 per capita entitlement for police protection to $15 per capita. We welcome any such increase since we believe the present level of entitlement is unrealistic, at least as it relates to the cost of providing services and facilities in the Arctic. This same argument applies to all categories for which revenue sharing is provided and notwithstanding the fact that cost-of-living adjustments are made to the entitlements due certain municipalities of with the North Slope Borough is one.

Senate Bill 32 which provides $5 per capita for each transportation related service provided by a municipality is of vital interest to the borough. Currently we provide airport service at Anaktuvuk Pass, Nuiqsut, Atkasook, Wainwright, Point Hope, Point Lay and Kaktovik. Thus, the effect of passage of Senate Bill 32 would be to increase the borough's entitlement for transportation facilities seven-fold. The additional money will go a long way towards providing safer and more efficiently operating airports in the North Slope Borough. Additionally, the borough will, in the near future, begin operation of transit system. The additional revenue sharing will help ease the great financial burden of operating and maintenancing such a small-scale, yet greatly needed system in adverse climate conditions.

I would like to take this opportunity to request that entitlement for roads, currently at $1500 per mile, also be increased. A reasonable figure would be $2500 per mile. While this might, at first glance, appear to high, one must consider the very high labor costs in the Arctic, the adverse climate which makes roads maintenance difficult at best and akin to full-scale war at its worst and the heavy wear and tear on equipment which itself costs nearly twice what it does in Anchorage and Fairbanks.

Thank you for your consideration of our views.

Sincerely,

Eben Hopson (cm)

Eben Hopson, Mayor
North Slope Borough

INPUT ON POLICE TRAINING QUESTIONAIRE SB 19

5/4/77

QUESTIONNAIRE

The Village Police Training Program trains one person from your city to be a policeman for your city. This training program is paid for by the State.

1. Did you know that there was a Police Training Program for your city?
   YES X NO ___

2. Why did your city decide not to have a trained policeman?
   The City did not decide, there was no alternative at the time, the Policeman will be going for training at Academy as soon as it is offered -

3. Do you think paying the salary for a policeman is a problem for your city? YES ___ NO X

4. If the State paid part of the policeman's salary, do you think your city would then consider having a policeman? YES X NO ___

5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES X NO ___

6. Does your City Council handle unpleasant situations effectively?
   YES X NO ___

7. Additional Comments: the City has had financial difficulties for some time. If the State would pay the Police salary for a few yrs. am certain the City will be able to pick it up later with more ability (money source)

Your Name Della M. Cheney City Administrator

Name of your City City of Kake

QUESTIONNAIRE

1. When did you begin the Police Training Program in your city?

   there is no police department in our city - never has been one.

2. Does your city like having its own policeman? YES____ NO____

3. Does your village still have its policeman? YES____ NO____

4. If not, was paying the salary for a policeman a serious problem for your village? YES____ NO____
   What was the main reason you no longer have one?

5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES__X__ NO____

6. What changes would you like to make in the Police Training Program to make the program better?

   The City would like to have a police department of its own-----but do not know how to establish one...would appreciate any and all information on same.

7. What can the State do to help your city with the Police Training Program?

   The City would like to have the State Village Police Training Program train a policeman from our city, as your letter indicated we are eligible for this service....then we could establish a police dept.

8. Does your village policeman serve the needs of the people or are more police services needed? YES____ NO____

9. Does your City Council handle unpleasant situations effectively?
   YES____ NO____ could use help here....although the City Council does not deal with law enforcement.

10. Do you think that what your village policeman learned at Sitka was mainly for the village policeman rather than the big city policeman? In other words, do you think that he was adequately trained to handle problems in the rural areas? YES____ NO____

11. Are there any other comments you would like to make regarding your village police program?

    As above -------we are interested in establishing a police department... and need all the information we can obtain regarding same...as well as information regarding State and Federal Revenue Sharing monies in connection with same.

QUESTIONNAIRE

1. When did you begin the Police Training Program in your city?
   AROUND year 1971
2. Does your city like having its own policeman? YES ✓ NO___
3. Does your village still have its policeman? YES ✓ NO___
4. If not, was paying the salary for a policeman a serious problem for your village? YES ✓ NO___
   What was the main reason you no longer have one?
   We do have policeman here at least two at present. Their pay are very small as our Revenue money from the State is only around $12,000.00 a year.
5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES ✓ NO___
6. What changes would you like to make in the Police Training Program to make the program better?
   Some guys are interested in taking a police TRAINING but do not have High School Deploma. If they CAN be trained so they CAN at the same time be trained to obtain their High School Deploma this would greatly help.
7. What can the State do to help your city with the Police Training Program?
   After a trained has successfully completed the trainings the State should pay & help with the City's part ~~Salary~~ salaries at home!
8. Does your village policeman serve the needs of the people or are more police services needed? YES ✓ NO___
9. Does your City Council handle unpleasant situations effectively? YES ✓ NO___
10. Do you think that what your village policeman learned at Sitka was mainly for the village policeman rather than the big city policeman? In other words, do you think that he was adequately trained to handle problems in the rural areas? YES___ NO ✓
11. Are there any other comments you would like to make regarding your village police program?
    State of Alaska should help the villages with the salaries of each policeman to do AN effective job in the village, we CANNOT afford to pay a full time policeman.

QUESTIONNAIRE

The Village Police Training Program trains one person from your city to be a policeman for your city. This training program is paid for by the State.

1. Did you know that there was a Police Training Program for your city?
YES ✓ NO ____

2. Why did your city decide not to have a trained policeman? We submitted one policeman's name, and he hasn't been picked to go training as yet. We were informed also that our police has to go training.

3. Do you think paying the salary for a policeman is a problem for your city? YES ✓ NO ✓ [redacted], but if the Revenue Sharing is discontinued we will have a lot of problem, and yet Revenue Sharing is not enough
4. If the State paid part of the policeman's salary, do you think your city would then consider having a policeman? YES ✓ NO ____
We would have a policeman all year round.

5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES ✓ NO ____

6. Does your City Council handle unpleasant situations effectively?
YES ____ NO ✓
We usually need the help of the State Trooper from Kotzebue or the Magistrate also from Kotzebue
7. Additional Comments:

We are asking for a temporary holding facility which might help for us to get our own magistrate and it sure would help the policeman, because he doesn't even have an office presently. Our application was send in for LEAA grant.

QUESTIONNAIRE

1. When did you begin the Police Training Program in your city?
We have Few men who went to Training in Bethel but we do not know exact date.
2. Does your city like having its own policeman? YES ✓ NO___
3. Does your village still have its policeman? YES ✓ NO___
4. If not, was paying the salary for a policeman a serious problem for your village? YES___ NO___
What was the main reason you no longer have one?
We had move then two policeman, but we had not enough Funding For more people to serve as Policemens.
5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES ✓ NO___
6. What changes would you like to make in the Police Training Program to make the program better?
Many changes
7. What can the State do to help your city with the Police Training Program?
Having move Police Training Programs.
8. Does your village policeman serve the needs of the people or are more police services needed? YES ✓ NO___
9. Does your City Council handle unpleasant situations effectively? YES ✓ NO___
10. Do you think that what your village policeman learned at Sitka was mainly for the village policeman rather than the big city policeman? In other words, do you think that he was adequately trained to handle problems in the rural areas? YES___ NO___
We do not know who went to Sitka, but Our Policeman have attended Bethel Training
11. Are there any other comments you would like to make regarding your village police program?
How many policeman will be able to attend the Training

Your Name Sophie Kasayulie - Sec.

Name of your City Akiachak, Alaska 99551

QUESTIONNAIRE

The Village Police Training Program trains one person from your city to be a policeman for your city. This training program is paid for by the State.

1. Did you know that there was a Police Training Program for your city?
   YES / NO ___

2. Why did your city decide not to have a trained policeman?

3. Do you think paying the salary for a policeman is a problem for your city? YES ___ NO X

4. If the State paid part of the policeman's salary, do you think your city would then consider having a policeman? YES X NO ___

5. Do you think that the Alaska State Trooper is helpful when your city has problems? YES X NO ___

6. Does your City Council handle unpleasant situations effectively?
   YES X NO ___

May 13, 1977

SUBJECT: HCS for CS for SB 27(Rules) am H - Transportation Facilities to New Capital

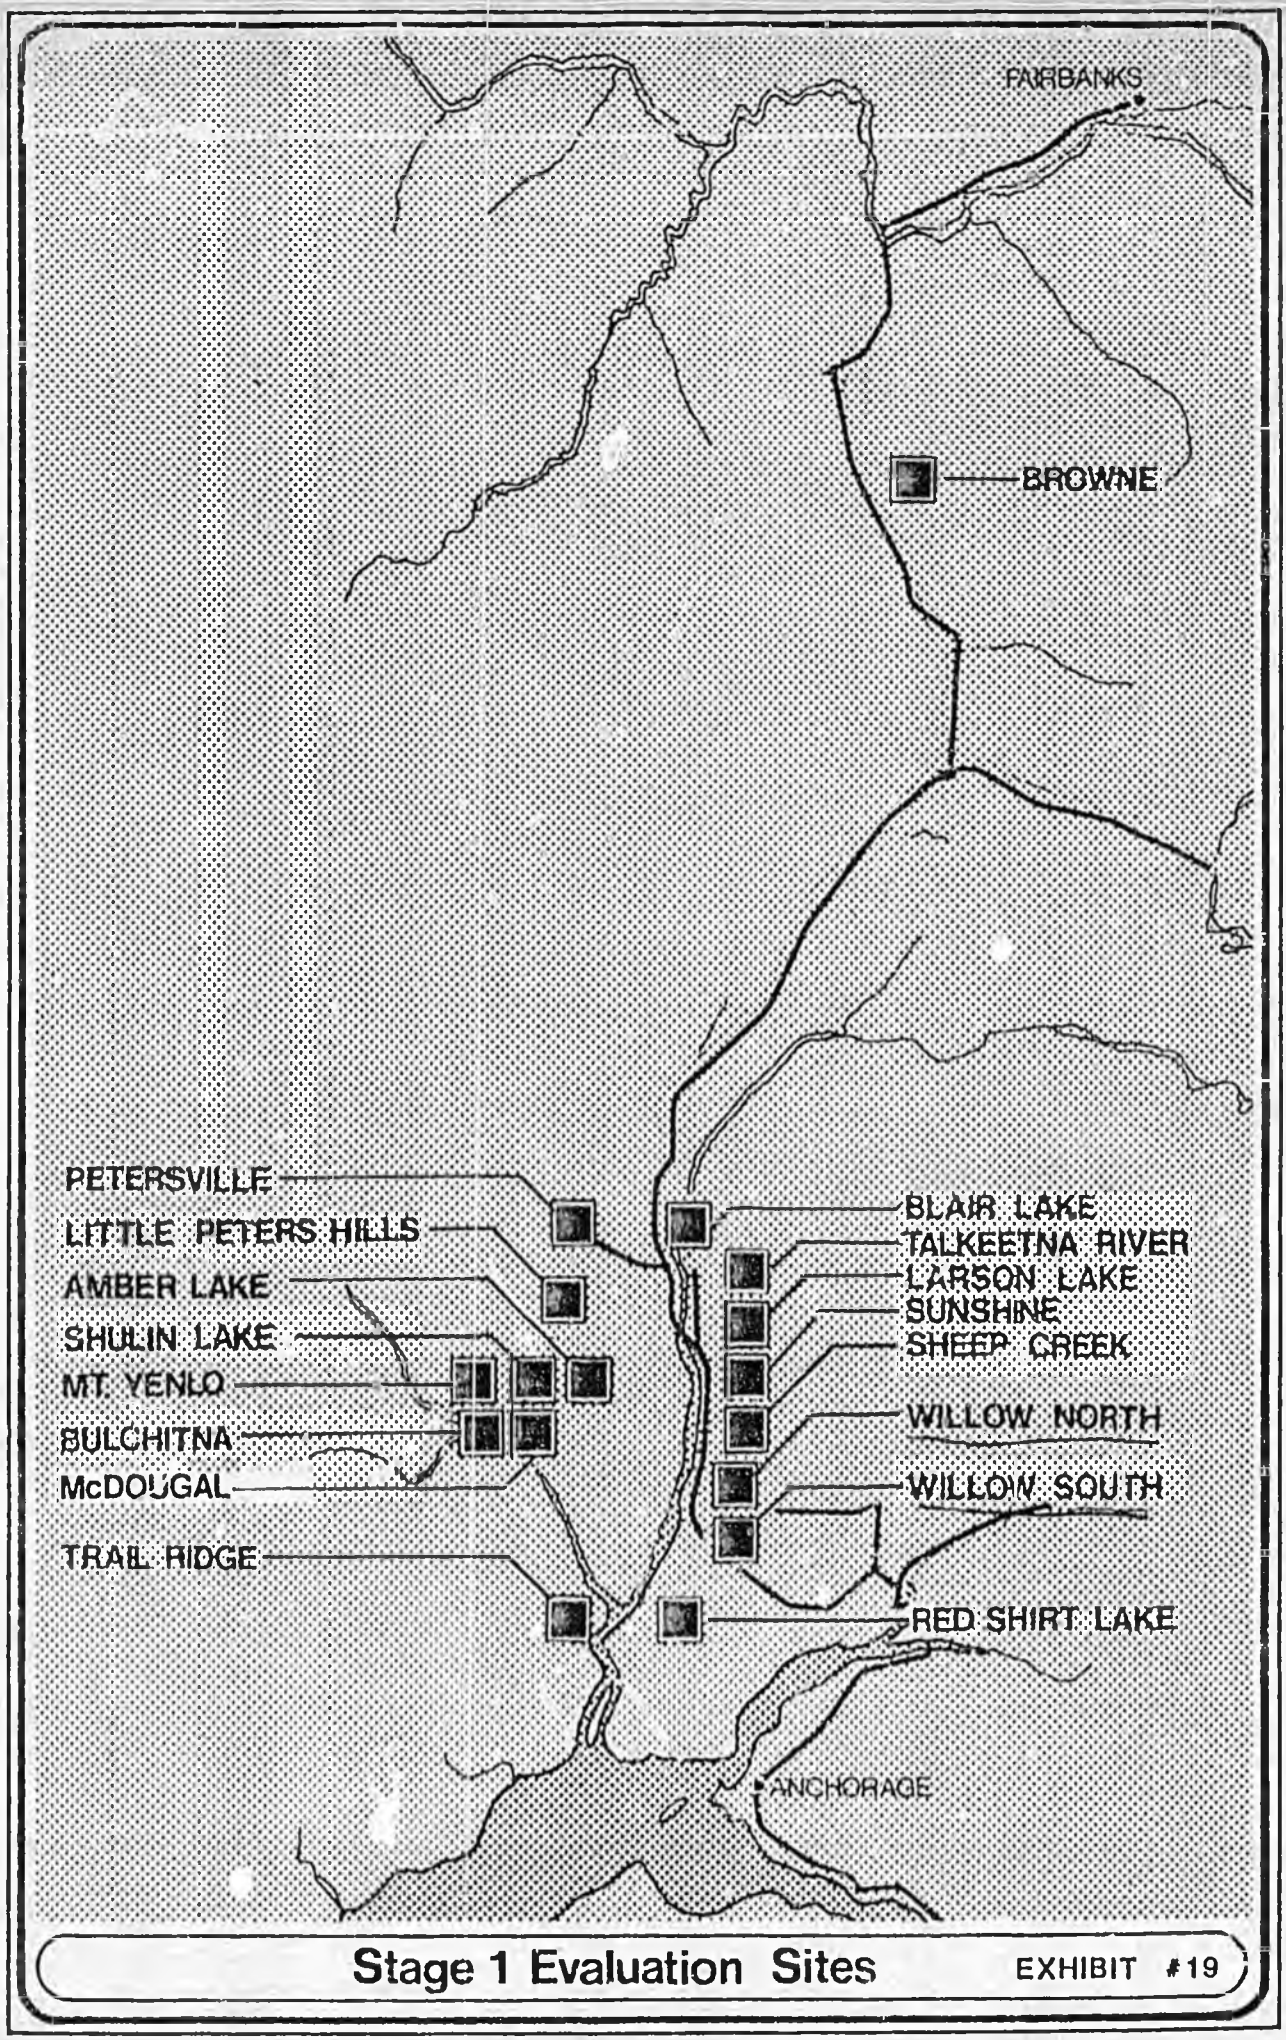
TO: Senator Joe Orsini

FROM: Ken Vassar, Staff Attorney KV

AS 44.06.130 required that the capital selection committee, created under AS 44.06.110, select three sites as potential capital sites It required that the committee give "due regard to its [the proposed capital site] accessibility by road, railroad, 24-hour airline service, and terrain necessary for airport construction." This section was binding on the committee but makes no reference to legislative planning once the ultimate capital site selection was made. The section which deals with legislative planning is AS 44.-06.160, and that section makes no mention of transportation facilities.

In light of this, my opinion is that there is no requirement that the Legislature provide for transportation facilities to the Willow area under AS 44.06.130 or any other section. Nevertheless, it should be noted that in Sec. 44.06.240(d), as proposed by the bill, the New Capital City Site Planning Commission would be required to include transportation as an element of its initial and final development plans, although transportation does not seem to be specifically included in the cost analysis required by Sec. 44.06.240(g) of the bill.

KV:lmk



Stage 1 Evaluation Sites EXHIBIT #19

HCS CSSB 27.

A. Good Planning Document (considering time frame) - Though not perfect

1. Two-tier process maximizes the time allowed - detailed initial plan but general "prospective" plan for "first stage"

2. Various planning elements are specified e.g. govt facilities, transportation, commercial development

3. Comparison of alternatives, between moving the capital & leaving it in Juneau

4. Telecommunications will be a central aspect of the planning process - get us into the electronic era

5. We will take a long overdue look at the concept of regionalization of state govt - to match the diversity of state interests & needs

6. Additional benefit of homesite land available in the North Willow site - a popular demand by citizens will be met

7. Mandated coordination & consultation with the local municipality - too often overlooked

B. Fair and Very Equitable treatment of Juneau Citizens

1. Intent - "to preclude unnecessary reduction of state employees in Juneau"

2. At worst only those Juneau employees "necessary for the operation of state government" will be transferred

3 State-funded economic diversification study for Juneau to determine its "viable future economic alternatives" -

4 Indemnification - not a part of this bill, but pending legislation will assure that no one will receive less for his home than he paid

* 5. 15 year projection of costs if the capital was left in Juneau

MSB

will not waive subdiv regs which require access ∴ if capital not moved have no money to build access

Homesite

no reference to "homesite" in either statute or regs. DNR will implement regs under ex rating law

$\frac{640 \times 15}{2.5} \cong 3000$ units

An Act

Relocating the capital of the State of Alaska and providing for selection, planning and construction at the new location.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF ALASKA:

Section 1. AS 44.06 is amended by adding new sections to read:

Article 2. CAPITAL RELOCATION.

Sec. 44.06.100. CAPITAL SITE. The capital site of the State of Alaska shall be selected and located west of the meridian 141° west longitude commonly known as Western Alaska, as provided in secs. 110—190 of this chapter.

Sec. 44.06.110. APPOINTMENT OF SITE SELECTION COMMITTEE. Within 60 days following December 11, 1974, the governor shall appoint a nine-member capital selection committee composed of one member from the northwest district, two members from the southeast district, two members from the central district and three members from the southcentral district, who shall be appointed on a non-partisan basis. The commissioner of natural resources shall be the ninth member of the committee. The members shall select a chairman from their membership. The legislature shall provide funding as required for the site selection committee.

Sec. 44.06.120. ASSISTANCE TO COMMITTEE. The capital selection committee shall utilize all the competent professional and technical services required to assist in the selection of alternate capital sites. The committee may choose the consultants which in its judgment are necessary to help in the site selections. The committee may also request any information on studies which it considers essential from any office or division of the state.

Sec. 44.06.130. SELECTION OF POTENTIAL SITES. The capital selection committee shall, within 12 months of December 11, 1974, select not more than three potential capital sites. None of these sites may be within a radius of 30 miles of the City of Anchorage or Fairbanks. Each site shall consist of not less than 100 square miles of land that is owned by or may be acquired by the state at no charge to the state. This land shall be contiguous but not necessarily in a rectangular block. Each location shall be immediately classified as "reserved use land" by the division of lands. Each location shall be selected with due regard to its accessibility by road, railroad, 24 hour airline service, and terrain necessary for airport construction.

Sec. 44.06.140. REPORTS AND HEARINGS. The capital selection committee shall prepare clear, concise, detailed reports concerning each of the capital sites selected for distribution to the citizens of Alaska. The committee shall hold public hearings in each judicial district within 18 months of December 11, 1974. The purpose of the hearings is to invite questions and present facts to the citizens concerning each of the sites.

Sec. 44.06.150. CHOICE OF SITE BY VOTERS. The qualified voters of Alaska are entitled to vote for any one of the alternate capital sites selected by the capital selection committee at the next general election after conclusion of the public hearings. The site receiving the greater number of votes shall be the site of the new capital city.

Sec. 44.06.160. PLANNING BY LEGISLATURE. The legislature at its next session following the selection of the new capital site, shall provide for the planning of subdivision of a new capital city and district within the bounds of the area selected, and for the construction of necessary state and public facilities and for their administration.

Sec. 44.06.170. NAME OF CAPITAL CITY. The name of the capital city shall be selected by the legislature.

Sec. 44.06.180. MOVEMENT TO NEW CAPITAL. The movement of the seat of government to the new capital city shall begin not later than October 1, 1980.

Sec. 44.06.190. STATE EMPLOYEES IN JUNEAU. The transfer of the state government to the new capital city shall be accomplished so as not to reduce unnecessarily the number of state employees employed by the state in Juneau.

Capital Planning

Intent on proving the adage that 'compromises' make bad law, the House Wednesday passed a capital move planning bill.

Described by the Anchorage delegation as a bill everyone can live with, it was none-the-less opposed by a great majority of Bush, Interior and Southeastern legislators.

As proposed the bill establishes a two-tier planning process. Plans for the 'initial move' involving the legislature, governor, lt. governor and attorney general must be completed by early next year and plans for final development must follow by early 1979.

Cost estimates must be ready in February, 1978.

The biggest problem with the House bill is the legislature's abdication of responsibility for outlining what they want the new capital to encompass. The nine-member planning commission must draft plans and estimate costs (with the cost estimate coming before final plans are completed) without benefit of legislative goals.

Under the bill passed by the House the commission could come back with a porta-potty city located in a mud field at the Willow site or a new capital, envisioned by the optimistic pro-movers, that reflects the splendor of our state.

The House bill does indeed tell the commission 'how' to plan but leaves to the discretion of the commission 'what' to plan for in Willow.

It is true that the legislature can either accept or reject, in whole or in part, the recommendations of the commission. But that is unrealistic. By waiting until this session the legislature is under the gun. If they do reject the commission plans, the legislature sets the timetable for the move beyond the initiative-mandated date of 1980.

cont'd

page 1

cont from page 1

There is another glaring deficiency in the bill that was pointed out by Fairbanks Rep. Steve Cowper, chairman of the House Finance Committee. The state's citizens, he said, will have to make up their minds once-and-for-all on the move because all bond costs for the move will be needed on the 1978 bond election.

If the legislature adopts a two-tier cost system with some bonds placed on the 1978 ballot and the rest of the bonds on the next bond ballot in 1980 (after the final plans are submitted in 1979) we run the risk of having part of the capital in Willow and the rest in Juneau.

This would happen, Cowper said, if the voters approved the first bonds but, discouraged by projected high costs for the second phase, did not approve the second bond issue.

Under the alternative bill that the Senate had adopted to plan for the capital move, the planning commission would simply sit down and plan the move based on projections from the Capital Site Selection Committee, the site selection group is the only commission which has come to grips with the magnitude of the move issue. The projections by the group are incorporated in the Senate bill so effort is not wasted duplicating studies.

The House bill for the most part ignores the site selection work and, furthermore, pushes off on the planning commission issues such as decentralization and regionalization that are more properly addressed by the legislature, not a group of citizens already burdened with developing a blueprint for a city not yet started.

After all the arguments advanced on the floors of both the House and Senate, the inescapable conclusion is that the House bill is indeed a compromise piece of legislation. It embodies a compromise between Frank Harris, the architect of the move initiative, and the House State Affairs committee, which consists of six Anchorage members and one bush member.

That kind of a compromise is not in the best interests of the state. When the Senate considers the House bill it is our hope that they will try and incorporate some of the views of Interior, Bush and Southeastern legislators.

If that happens the Senate will end up with a bill similar to the planning bill they have already passed, and not the Anchorage delegation-Frank Harris 'compromise' bill the House passed.

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini,

The North Slope Borough would like to go on record as supporting Senate Bills 19 and 32 which increase present revenue sharing entitlements and create a new category of entitlement, respectively.

Senate Bill 19 increases the present $12 per capita entitlement for police protection to $15 per capita. We welcome any such increase since we believe the present level of entitlement is unrealistic, at least as it relates to the cost of providing services and facilities in the Arctic. This same argument applies to all categories for which revenue sharing is provided and notwithstanding the fact that cost-of-living adjustments are made to the entitlements due certain municipalities of with the North Slope Borough is one.

Senate Bill 32 which provides $5 per capita for each transportation related service provided by a municipality is of vital interest to the borough. Currently we provide airport service at Anaktuvuk Pass, Nuiqsut, Atkasook, Wainwright, Point Hope, Point Lay and Kaktovik. Thus, the effect of passage of Senate Bill 32 would be to increase the borough's entitlement for transportation facilities seven-fold. The additional money will go a long way towards providing safer and more efficiently operating airports in the North Slope Borough. Additionally, the borough will, in the near future, begin operation of transit system. The additional revenue sharing will help ease the great financial burden of operating and maintenancing such a small-scale, yet greatly needed system in adverse climate conditions.

I would like to take this opportunity to request that entitlement for roads, currently at $1500 per mile, also be increased. A reasonable figure would be $2500 per mile. While this might, at first glance, appear to high, one must consider the very high labor costs in the Arctic, the adverse climate which makes roads maintenance difficult at best and akin to full-scale war at its worst and the heavy wear and tear on equipment which itself costs nearly twice what it does in Anchorage and Fairbanks.

Thank you for your consideration of our views.

Sincerely,

Eben Hopson (cm)

Eben Hopson, Mayor
North Slope Borough

Ted Berns — notice of for; mos for forc; forc; 1 yr redemp.

Sec 1 - adds considerable cost due to title search ($50-$60)
3000 parcels/yr in Anch go thru foreclosure; notice; request may be made for notice on the particular parcel
Possible soln - require request for notice be sent ~~to~~ when a person registers a lien - information provided about request

Sec 3 - problems as stated - no time limit as to when person can take back property. Put on time limit (puts it in limbo); or require ordinance, public notice, etc.

Sec 2 - great one more notice, not that big a deal

Sec 4 - time limit problem - how long should munic hold money? (bank foreclosure now = 2 yrs) - what if can't locate former owner how should munic inform former owner

Lee Sharp

Sec 1 - record search may not show address of security owner notice @ foreclosure; notice @ end of redemption

Sec 2 - time problem on period for which held in public use - could be 20 yrs or more

Sec 3 - time problem again; Fed funds for prop. improvement requires clear title by munic. Formal vs dedic. should end owners rights

Sec 4 - 6 mos time limit would be good
require recorder to give ~~a~~ notice to assessor's ofc of lien problems [15 3/4.10]

CSSB 37

Page 2, beginning at line 2 --

Add a new section 2 (renumber sections accordingly):

* Sec. 2. AS 29.53.350 is amended by adding a new subsection to read:

(b) Costs incurred in the determination of holders of mortgages and other liens of record and costs of publication of notice incurred by a municipality under (a) of this section are a lien on the property and may be recovered by the municipality from the record owner at the time of redemption.

Page 2, line 15 --

... that a public need does not exist [NO LONGER EXISTS].

Sec. 1

"procedural defect" if notice not actually rec'd

Dept CRA - supports Secs 2 → 5

opposes Sec 1 - much of property is "junk property" - not worth much (may than cost of search) $5.00 item

May have to have title insurance to cover cases of lack of notification

loss of security interest → injury → suit for damages

alt: Put a $10K or $20K min prop value for notice

Put the notices up in recorders ofc or title co. about right of notification

Sec 310 needs commensurate changing for

Sec 380 put ~~5a~~ 10 yr limit on requirement to ~~pay~~ pay difference

Anchorage

Ted Berns said last year approx 300 parcels of land would have been affected by AS 29.53.350

Juneau

275 foreclosure procedure (don't pay taxes)

95-100 into judgement

25-30 unredeemed @ end of year

RE: SSSB 37

TO: Senator Orsini DATE: March 3, 1977

FROM: Paul RE: SSSB37

The following correspondence was received regarding SSSB37. Matanuska-Susitna Borough and the City of Wrangell both are opposed to above referenced bill because of the title search requirement that will be imposed upon the local government.

PC/js

I feel you may be interested in the attached newspaper clippings which tell of people losing land to municipal tax foreclosures without adequate notice or protection.

Lands were taken and dedicated for park purposes. We are told that this action ends any chance we might have to redeem the land. Dedication action was taken without notice and without hearings. We are told that state law requires the municipality to pay only any state and federal liens. No provision is made for payment to other lien holders. I feel that all government agencies should be treated the same as anyone else, receiving the same percentage of proceeds as the rest of the lienholders. If value of land taken by municipalities for their own use exceed the liens, the owner of record should receive this amount, not the municipality.

Laws should require that all interested parties be notified 60 days after taxes become delinquent in order that they may take action to protect themselves. It would be reasonable that the interested parties stand the cost of these notices.

I would appreciate your help in seeing that something of this nature cannot happen again. Thank you.

DEPARTMENT OF ADMINISTRATION

January 27, 1977

The Honorable Joseph L. Orsini, Chairman
Community and Regional Affairs Committee
The Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Subject: Senate Bill 37

We appreciate your inviting comments on the subject bill. The proposed law would require the Borough to have a title search on each piece of property to be foreclosed to make sure that we became aware of all holders of mortgages or other liens of record. This would be an additional administrative expense which would be added to the foreclosure cost for each parcel and added on to the redemption cost to the property owner.

We question whether the additional red tape is necessary since all parties of interest are now notified by legal publications.

As a matter of practice, we already notify holders of liens of which we have been informed.

Very truly yours,

Wesley M. Howe

ADOPTED AUGUST 1972

February 1, 1977

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs
Committee
Pouch V
Juneau, Alaska 99811

Re: SENATE BILL NO. 37, SPONSOR SUBSTITUTE

Dear Sir:

The City of Wrangell wishes to go on record in opposition to SS for Senate Bill No. 37.

Sec. 29.53.350 of the proposed bill provides for notice of foreclosure to be mailed to each record owner of property against which a judgement of foreclosure has been taken and to all holders of mortgages or other liens of record on the property. The amendment would necessitate the taxing authority to determine all liens of record on property. In order to insure accuracy, it would be necessary to obtain a title search on each parcel of foreclosed property. The costs for a title search would be a minimum of $50.00 per parcel, increasing the costs considerably on foreclosure procedures.

We request that the amendments to Sec. 29.53.350 be revised to: and to all holders of mortgages or other liens who have provided notice of same to the taxing authority.

Your consideration will be appreciated.

Very truly yours,

James R. Eide
City Manager

March 1, 1977

Dear Sir:

The enclosed materials, pertaining to property which my wife and I feel we have a right to, are somewhat explanatory of the existing situation.

To say the least, we are extremely frustrated over the entire matter.

Apparently, final disposition of the property in question will be decided in the court of Judge Douglas William on March 14th.

We realize that, due to technicalities put forth by the Anchorage Municipality, we may lose this property, we do feel that we are morally correct and justified in thinking that it should be returned to us. We both worked awfully hard to get this land and feel that we should be able to enjoy whatever the land might produce for us.

I have listed my attorney's name and address and also the Judge that will be handling this. Anything that you might possibly do in our behalf will be greatly appreciated.

Sincerely Yours,

Russell V. Oberg

FILE NO.

SUBJECT: SSSB 37

The Honorable Joseph L. Orsini
Chairman
Senate Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The City and Borough of Juneau is opposed to SSSB 37 in its present form. The amendments which would be effected by section 1 would require that the municipality conduct an expensive and time consuming title search on all tax foreclosed property which it intends to sell in order to recover the taxes which the owner and security holders have, for at least two years, refused to pay or have not paid. The title search would be for the purpose of discovering persons holding security interests in the real property. The present law provides that a lien holder may request the clerk to send, by certified mail, a notice of the foreclosure list which contains any property specified by the lien holder. Thus, any person who takes a security interest in real property and has a concern with protecting their security interest from foreclosure for nonpayment of taxes may protect themselves by merely requesting they be notified of impending foreclosures. Presuming they have taken this simple step of requesting notification, it seems unnecessary to require the municipality to engage in an expensive and time consuming title search in order to determine whether there are security holders who would lose their security interest in a sale of foreclosed properties. Foreclosure notices are also published in local newspapers. Thus even the security holder who has not requested personal notice is given the opportunity to make himself aware of whether or not property in which he holds a security interest is being foreclosed by merely checking the foreclosure list which is published at least four times over a period of four weeks upon the filing of a foreclosure action. There is a second published notice at the end of the one year redemption period. It seems that when you weigh the burden on the security holder of simply writing a letter to the municipality requesting that he be notified or of merely checking the published foreclosure list against the burden placed on the municipality of running a title search on every property

which it intends to sell, the scale clearly tips in favor of the system as it stands at present. Section 1 should be deleted from the bill.

Section 2 requires the municipality to give notice to the former record owner of any tax foreclosed parcel which is being held for public purpose and which the municipality is considering selling. The law currently bends over backwards to accommodate the interests of the real property owner who refuses to pay his taxes on property which he owns. He is given notice of a foreclosure, he is given an opportunity to challenge the foreclosure in court, he is given one full year subsequent to the foreclosure to redeem the property, and after the redemption period he is given the right to repurchase the property if it is not held for a public purpose. This section would require that for property which the municipality has devoted to or reserved for a public purpose which it now wishes to abandon, the property owner be given specific notice of the municipal proceedings which are aimed at changing the public reservation. Please bear in mind that municipalities have devoted to public use much property which was acquired by tax foreclosure fifty or more years ago. To ask the municipality to search out and notify former record owners of such property which it now wishes to sell is not only placing an excessive burden upon the municipality but is also asking it to do an act which is probably useless. Considering the time and the number of occasions given the person who refuses to pay his tax, it would appear that section 2 is unnecessary. If it is felt that section 2 is absolutely essential, some limitations should be placed on it so that the municipality is not required to search out owners for property which it foreclosed on more than two or three years prior to the sale.

Section 3 would allow the former owner of tax foreclosed property to come in and repurchase such property even if it is held for a public purpose. Thus, if the municipality forecloses on property and, subsequent to the expiration of the redemption period, builds a public improvement on the property, the property would still be subject to repurchase for taxes and interest by the former record owner. Even if improvements had not been placed on the property, if the property has been reserved for a future public use, it has been placed into the capital improvements planning process and the municipality may very well be relying on its ownership of such property for future projects which would suffer a severe setback if the former owner exercises his right to come in at any time and repurchase the property. In addition,

this section would probably make it impossible for municipalities to use federal funds for the improvement of tax foreclosed property. Almost every federal program for assistance in capital improvements requires a satisfactory opinion on title. With this section on the books, all tax foreclosed property will have a sufficient cloud on it that a satisfactory title opinion cannot be given. Thus, the municipalities will no longer be able to use federal funds for the improvement of tax foreclosed properties. Section 3 of the bill should deleted.

While section 4 of the bill may express a fair and appropriate public policy relating to the disposition of the excess the municipality realizes in the sale of tax foreclosed property, the right of the former owner to this excess should not go on in perpetuity as it would under the proposed section 4. If such a right is to exist, it should be limited in time. Senate Bill 127 deals with this particular problem and would place a limit of six months upon the right of the former owner to recover the excess. If the committee feels that section 4 is necessary, we strongly recommend that a six months' limitation be placed on the time during which the former record owner may claim the excess.

Thank you for your consideration of the foregoing.

Very truly yours,

Lee Sharp

Senator Joseph L. Orsini
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Subject: Senate Bill No. 40 - by Kerttula

Dear Senator Orsini:

The subject bill provides basically that a municipality must keep extensive records regarding the hiring of other than Alaskan residents. This bill, if passed, will result in excessive record keeping and the filing of reports by the municipalities.

In the city of Valdez, with our present employment situation, the availability of Alaskan residents is highly uncertain. The City presently has a local requirement for local hire. The ordinance provides - "the following order of priority for all new hires:

1. residents of Valdez;
2. residents of the state of Alaska;
3. veterans (honorably discharged);
4. United States citizens."

These regulations have worked very well all during the pipeline impact period. In addition, with our "thirty day" residency provisions, the "Alaska resident" terminology of the bill is meaningless.

Under our existing provisions, anyone aggrieved by our hiring practices has the right of appeal all the way to the Superior Court of the State. It is unnecessary to require extensive record keeping as required by this bill.

I urge that you exert your best efforts to defeat Senate Bill No. 40.

Very truly yours,

Herbert W. Lehfeldt

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 47 — Croft
Prime Sponsor

_____ Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

At the present time, if a person makes improvements (painting, landscaping, fencing, etc., on their home the value goes up and they pay more taxes. This discourages some people from improving their property. The bill would impose a moratorium on such increases and encourage people to beautify their property.

2. Are there any other viable ways of accomplishing this same goal?

A system of grants or loans might be utilized, but this seems more cumbersome and probably more expensive.

3. Persons or groups you know of who are supporting the legislation.

I know of no organized support for the bill.

4. Persons or groups you know of who are opposing the legislation.

Municipalities have traditionally opposed this type of legislation but I do not know of any specific opposition to this bill.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

If not properly implemented by the Municipality, there might be problems.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

I would appreciate the Committee considering the bill the week of February 28.

February 10, 1977

The Honorable Joseph Orsini, Chmn.
Senate Community & Regional Affairs Committee
Alaska State Legislature
Juneau, Alaska 99811

Re: SB No. 47

Dear Senator Orsini:

I am writing you as a citizen of Douglas for the past 25 years, a property owner and as a member of the Project Pride Committee of the Juneau Borough.

For years, I have felt that the home-owner who takes pride in keeping his property in good repair and making exterior improvements that would enhance the appearance of the property is penalized by having to pay a greater tax assessment than the slob down the street who has a comparable piece of property but does nothing in the way of maintenance or beautification, and the home is usually surrounded by junk cars, abandoned trailers, etc.

Maybe I am wrong, but I have felt that perhaps the fear of having to pay increased taxes was the primary reason for the slob's life-style. With this bill and given wide publicity once it becomes law, I would hope all of Alaska will embark on a giant-size cleanup campaign with empassis on paint-up, fix-up.

My membership on the Project Pride Committee has been mainly directed toward pursuing the possibilities of a tax credit or rebate when the property owner makes exterior improvements, but without this type of enabling legislation, my efforts have been in vain.

With the passage of this bill, not only will the property owner benefit, but the neighborhood, the community, city and state as well. I urge your support of the bill---it has been long over due.

Sincerely yours,

Julie H. Isaac

February 16, 1977

Senator Joe Orsini
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The Haines Borough Assembly wishes to thank you for your letters and copies of proposed bills which may have an effect on our municipality.

Please accept this letter in support of Senate Bill No. 47 - "An Act allowing municipal property tax exemptions for certain improvements to real property." This bill was discussed at great length and the Assembly feels that if passed, this would be of a great advantage to the taxpayers in our area. We are constantly receiving comments concerning the increase of taxes due to improvements on their homes. Many of the residents of Haines feel that they should be given "a break" for trying to keep their homes nice looking which, when completed, would enhance the exterior appearance or quality of the land or structure.

Also, for your information, I am sending to you a copy of the minutes for a meeting held concerning the recent attorney general's opinion concerning third class borough powers and a copy of the newpaper article that was published by our local paper, the Chilkat Valley News. We would be interested in any comments you may have concerning our problem here in Haines.

Thank you for your time and concern.

Sincerely,

Kathy Dixon

Borough powers: for education only?

by Bill Hartmann

A large public turnout packed the main school band room last Tuesday night during a special Borough meeting called to discuss what should be done concerning the new State attorney general's opinion concerning third class borough powers.

What the attorney general's opinion said was that the powers of a third class borough are limited to ONLY education. No service districts, or no powers of planning, zoning or platting may be exercised. This was in direct contradiction to an earlier attorney general's opinion, and went against what many in the Haines Borough understood as being the powers of the third class borough, of which Haines is the only one in the State.

At the invitation of the Borough Assembly, Jesse Dodson, special assistant to the governor, and Bruce Arenson of the Department of Community and Regional Affairs were in Haines to discuss the matter and what action Haines Borough officials should take.

The major problems that the attorney general's opinion poses for the Haines Borough is the withholding of some revenue sharing funds and the forbidding of any possibility of the Borough establishing fire service districts outside the City limits.

It was Mrs. Dodson's opinion that if the area needed more powers, it would have to form another form of government. This advice sparked a heated round of questions asking if, in effect, the State was trying to force Haines to form a second class borough. Although this was emphatically denied by the State officials, it was presented as one alternate solution to the present conflict.

It was pointed out by Mayor Gail Wallace that the City is acting illegally by extending fire services outside the City, and that this problem could have disastrous effects at any time. Fire Chief Frank Wallace stated that the department had a test run to enable people outside the City to obtain better insurance rates, but they are now told that these people must be within a service area to qualify.

Some people felt the best answer was to opt for forming a second class borough, the only additional mandatory powers being those of planning, platting and zoning. This would also permit the borough to form any necessary service areas without problem. Only those residents in the area would be taxed for the added service. The major objection to the second class borough expressed by public comment was not wanting planning or zoning outside the City. However, it was pointed out that the State could come in and plan and zone the borough if it wanted to, because any powers not granted to a borough automatically rest with the State. The State would then plan and zone the area and the area would pay for it eventually in some form.

Several more alternatives were discussed. One was to ask the legislature to pass a bill clarifying the powers of the third class borough. Another was to ask the legislature to initiate a class-action suit to determine: a) if the third class borough is legal, and, b) if the attorney general's opinion on borough powers is correct. Still further, the local borough could exercise the questioned powers and take the State to court if challenged.

Although no definitive action was taken at the meeting, the borough assembly will investigate questions raised at the meeting and then call another public meeting later. The Tuesday night meeting was ably chaired by Borough Mayor David Black, who along with other members of the Assembly and City made up the panel. The others, in addition to Dodson and Aronson were Mayor Gail Wallace, City Administrator Dan Beckhorst, Councilmen Harold Hannon and Jon Hallivill, and Borough Assembly members Pat Jones, Erwin Hertz and Paul Swift.

City to select municipal building site

Haines High School attendance rules: tardiness a bummer

Because of an increase of skipping and unexcused tardiness to classes, the Haines High School is revising its attendance regulations. The following administrative regulations are beginning immediately:

Students are expected to be present and punctual to all classes throughout the year. Unexcused absences will result in an "F" grade for the days or periods missed. Both excused and unexcused absences or tardiness may result in lower grades if homework assignments are not made up promptly. A student's absence is to be explained by a note signed by one of his or her parents or guardians and presented to the pricipal's office when he or she returns.

The high school will operate under a policy of closed campus. Students are to remain in school from the time they arrive until they are dismissed to return with the exception of the lunch hour.

If a student must leave the school, he or she must obtain an "off campus pass" from the office. If the student needs to leave school during a class period, he or she must obtain an off campus pass before class begins and present the pass to the classroom teacher before he or she is permitted to leave. The pass must be signed by the person at the student's destination, and when the student returns, he or she must bring the signed pass to the office to obtain an admit slip to class.

Leaving the school grounds during the day without permission will be considered a truancy or skipping offense. Skipping will be handled in a number of ways:

1. Detention
2. Parent conference.
3. In-school suspension.
4. Suspension.

Detention may be given for the first offense; succeeding violations will be handled accordingly.

If for any reason a student is tardy, he or she must obtain a slip from the office before he or she is permitted into class. All unexcused tardy slips will carry a penalty of a half-hour detention. If a student is detained by a teacher, he or she must have a note from that teacher giving the date,

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 47 — Croft
Prime Sponsor

_____ Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

At the present time, if a person makes improvements (painting, landscaping, fencing, etc., on their home the value goes up and they pay more taxes. This discourages some people from improving their property. The bill would impose a moratorium on such increases and encourage people to beautify their property.

2. Are there any other viable ways of accomplishing this same goal?

A system of grants or loans might be utilized, but this seems more cumbersome and probably more expensive.

3. Persons or groups you know of who are supporting the legislation.

I know of no organized support for the bill.

4. Persons or groups you know of who are opposing the legislation.

Municipalities have traditionally opposed this type of legislation but I do not know of any specific opposition to this bill.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

If not properly implemented by the Municipality, there might be problems.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

I would appreciate the Committee considering the bill the week of February 28.

P. O. Box 223

February 10, 1977

The Honorable Joseph Orsini, Chmn.
Senate Community & Regional Affairs Committee
Alaska State Legislature
Juneau, Alaska 99811

Re: SB No. 47

Dear Senator Orsini:

I am writing you as a citizen of Douglas for the past 25 years, a property owner and as a member of the Project Pride Committee of the Juneau Borough.

For years, I have felt that the home-owner who takes pride in keeping his property in good repair and making exterior improvements that would enhance the appearance of the property is penalized by having to pay a greater tax assessment than the slob down the street who has a comparable piece of property but does nothing in the way of maintenance or beautification, and the home is usually surrounded by junk cars, abandoned trailers, etc.

Maybe I am wrong, but I have felt that perhaps the fear of having to pay increased taxes was the primary reason for the slob's life-style. With this bill and given wide publicity once it becomes law, I would hope all of Alaska will embark on a giant-size cleanup campaign with empassis on paint-up, fix-up.

My membership on the Project Pride Committee has been mainly directed toward pursuing the possibilities of a tax credit or rebate when the property owner makes exterior improvements, but without this type of enabling legislation, my efforts have been in vain.

With the passage of this bill, not only will the property owner benefit, but the neighborhood, the community, city and state as well. I urge your support of the bill---it has been long over due.

Sincerely yours,

Julie H. Isaac

If for any reason a student is tardy, he or she must obtain a slip from the office before he or she is permitted into class. All unexcused tardy slips will carry a penalty of a half-hour detention. If a student is detained by a teacher, he or she must have a note from that teacher giving the date, period and reason. This slip will entitle the

HAINES BOROUGH ASSEMBLY
February 8, 1977

Special Meeting No. 146: The meeting was called to order by Mayor David Black at 7:15 p.m. in the Activities Room of the Main School Building.

Roll Call: Present: David Black, Pat Jones, Paul Swift, Erwin Herts. Absent: Gary Saupe' (Excused). A list of visitors of this meeting are attached.

Purpose of this Meeting: This meeting was called to discuss with the Borough Assembly and a representative of the Dept. of Community and Regional Affairs and Governor Hammond's special assistant, Jessie Dodson, the new attorney general's opinion concerning third class borough powers.

David Black asked that the minutes show that Mayor Gail Wallace, Councilmen Harold Hannon and Jon Halliwill and City Administrator Dan Beckhorst were present.

David Black introduced Bruce Aronson of the Department of Community and Regional Affairs and Jessie Dodson, Special Assistant to the Governor.

David Black requested that comments be limited to about 5 minutes per person if possible.

It was stated that the new attorney general's opinion is to limit 3rd class borough powers to only education. No service districts, or no powers of planning, platting, and zoning may be exercised.

Mrs. Dodson stated that this opinion meant 3rd class boroughs powers must be confined to assessing and taxation and education only. She stated that if we feel that we need more powers, we will have to form another form of government.

Bruce Aronson stated that the Department of Community and Regional Affairs must stand by the new attorney general's opinion.

Mrs. Dodson stated that the Fairbanks North Star Borough is considering going into a third class borough and they feel this conflict of opinions should be a court decision.

Carl Heimiller asked what would happen if we went back to a Regional Educational District from our third class borough.

Bruce Aronson said that the City would not be responsible for the students outside of the City of Haines, but that they would be the responsibility of a Regional Educational Attendance area which is based in Angoon. He stated that elected representatives from outside the City of Haines would meet in Angoon. Mr. Aronson also said that since we have no powers of planning, platting, and zoning that the State can come in and do this outside the City of Haines. In other words, we are an unorganized borough as far as planning, platting, and zoning is concerned.

Dorothy Fossman read the powers of a third class borough from AS 29.41.010. She stated that in her opinion, the attorney general's opinion of 1/6/77 was stupid as we have areawide powers for education and that his opinion conflicts with Article 10 of the State Constitution and the State Statutes. She also stated that we can create special new services and that this should be proved in court as his opinion is in conflict, also, with what the legislature put through originally.

Bruce Aronson stated, that in his opinion, the Governor will not come in and stop new service areas, but someone here who is not willing to pay the tax levied for this service, may not hesitate to do something to try and stop us. He read AS 29.63.010 - Service Areas. He also stated that we are not defined as a "borough" under Title 29, but are a municipality.

Jessie Dodson stated that she thinks there was an opinion by the Attorney for the Legislative Affairs which stated that he thinks there are three completely equal interpretations of this opinion.

1. Just as Dorothy Fossman has pointed out.
2. Just as the new attorney general's opinion states.
3. That this was put in soley for the purpose of extending more third class borough powers by legislation.

Jessie Dodson also mentioned that until this opinion is challenged, the new attorney general's opinion will probably not change.

Bruce Aronson said that ALL state agencies will be guided by this new opinion of the attorney general.

Diane Benson said that she is satisfied with the way we are now and does not think we need a change of government.

Gail Wallace stated that the City is illegal by extending fire services outside the City.

Frank Wallace stated that they had an ISO Test done so that people outside the City could have better insurance rates, but they are now told that these people have to be within a service area to qualify.

Betty Heimiller suggested that for the benefit of some people here who are fairly new to the area that the different powers of the classes of boroughs should be explained.

Bruce Aronson showed what mandatory powers each class of borough has.

1st Class Borough	2nd Class Borough	3rd Class Borough
1. EDUCATION	1. EDUCATION	1. EDUCATION
2. PLANNING, PLATTING & ZONING.	2. PLANNING, PLAT-TING & ZONING.	2. TAXATION
3. TAXATION.	3. TAXATION.	

Carl Heinmiller stated that if the State comes in and zones, we will pay for it anyway.

Bruce Aronson stated that this is probably true as the State will most likely levy a tax for this.

Dorothy Fossman said she wants to know why we go through all the organization if the State legislature can be our Assembly. She said that she doesn't think that the State can come in and plan, plat, and zone our area.

Ray Smith said that we need to know what powers we really have. He said that in his opinion, we have the same powers as in the beginning, only a different opinion: there has never been amendment concerning this power. Ray stated that in his opinion, if the Board refuses to give the people of the area the power to vote in a fire district, they are in conflict with the State Statutes and their own Borough Code.

David Black said that this Board has never yet willingly, or knowingly not responded to public opinion. He stated that this is why this meeting has been called: to hear what the people want.

Dorothy Fossman said she wanted to know why we ever asked the State about setting up this fire district.

David Black said that we did not, that this was only coincidental.

Bruce Aronson said he would like to explain how this came up. He said that the Fairbanks North Star Borough was considering a petition to re-classify to a third class borough. They asked the State through the Department of Community and Regional Affairs if the 1966 attorney general's opinion was still valid. They received an answer that this opinion was overruled and that a third class borough can only provide education and taxes to support education. They then sent a copy of this opinion to us. He said that he then came up to our last Borough meeting to explain what that opinion really meant and a representative of his office was again requested to attend this public meeting.

Edna Hatch stated that it appears that most people involved in the proposed fire district area do want this set up.

Jack Morris stated that he doesn't want to see anymore government at this time. He said he doesn't see why we need service areas outside the City when we can contract with the municipality for fire protection.

Bruce Aronson said that this can be done and that Ketchikan has a self-sponsored fire department and only those supporting the department will be covered by this fire protection.

[illegible]

Carl Heinmiller said that he thinks we should find out if our third class borough is really legal, and if we really have a choice.

Jessie Dodson said that we do have a choice of organizing to another form of government or to become a part of the REAA.

Bruce Aronson stated that any 1st class city or borough can adopt a home rule charter, or cities and boroughs can unify.

Dorothy Fossman stated that we should go ahead and set up our service area and not ask the State.

Carl Heinmiller said that the Borough Assembly cannot set up the service area: the people do.

David Olerud suggested that the people outside the City set up their area and contract with the City fire department. He stated that as far as the taxpayer within the City is concerned, he would not at the present time, under the present interpretation of the law allow one truck to go out unless its covered to the maximum ability of the law, because in this day and age, the proper thing is to sue, and that is just what could happen.

Di Aukerman stated that he is building a house outside city limits which by insurance companies is classified as Code 10, outside city limits. He received an estimate of $1,000 to $1,500/year to insure his home, because of this, and where a person living within the city limits will pay about $240.00. He stated with a set up where a fire truck could go outside city limits then insurance rates would be more comparable with the city rates.

Valerie Truce said she doesn't understand why people don't want to change to a second class borough.

The public indicated that they do not want planning, platting, and zoning outside the city.

Robert Henderson stated that we should stay a third class borough, but have our legislature pass a bill clarifying these powers concerning service areas.

Dorothy Fossman made the motion we get up a petition to ask the legislature to clarify their intent on service areas.

Under the present revenue sharing program, Bruce Aronson stated that since they are bound by the new att rney generals opinion, if we set up a service area for fire protection, they would not be able to send us the $7.50 per capita for fire protection in that service area.

Buck Hess stated that probably 1/2 of the people here do not even know what a borough is and that this should be explained.

Carl Heinmiller stated that in a second class borough the only thing that is mandatory is that we establish planning, platting, and zoning, but it does not say that the borough MUST go out and zone and plan. We are just like the State.

Betty Heinmiller stated that people should be more open minded about this

and if our third class borough powers are so limited, maybe we should look into seeing what a second class borough could offer.

Carl Heinmiller asked Bruce if a third class borough will receive shared revenue per capita in our present status?

Bruce A. stated that he did not think we would. He read and explained area wide powers AS 29.33.250, non-area powers, and service areas AS 29.03.000.

Mary Manuell wanted to know why we are referred to as a municipality and not a borough and why the State can plan, plat and zone us?

Again, Bruce A. stated that since we donot have the powers of planning, platting, and zoning, the power rests in the hands of the state.

David Olerud stated that we must do something, as with the high taxes in this area, and the poor economy, we have nothing right now.

The meeting was recessed at 8:45 p.m.

The meeting reconvened at 9:05 p.m.

David Black stated that we need a government that we can control, not the State of Federal Governments. If we let them run our government, we are going to get just what's coming -- next to nothing. He stated that somehow we have to unify and work together.

Sue Bull asked what would be the chance if we did go into a second class borough.

Bruce Aronson stated that we would be the same, except we would have to support planning, platting, and zoning.

David Black said that it should be clear that these powers cannot be shoved down our throats. Unless we vote in an ordinance as the people. The planning and zoning is still left up to the people.

Carl Heinmiller said that he thinks the State will be forced to do planning and zoning because of the Division of Lands. He said that in the end, we will have to pay for this.

Pat Jones asked Gail Wallace if she had any idea of the impact these revenue sharing funds would have.

Gail Wallace stated that we will probably lose about $3,000 with this new opinion, and that the Borough could lose up to probably about $10,000.

Jessie Dodson stated that if the State did come and zone this area, we would lose some of our local control.

Pat Jones stated that she too would like to see us contact our legislators and have them come up with a bill clarifying their intent concerning these service areas.

Paul Swift said we should investigate to see how much planning, platting, and zoning would cost the Borough.

Dan Bockhorst stated that the City Planning Commission is all volunteer and that they are now drawing up a Comprehensive Plan.

David Black stated that he can see three alternatives:

1. Ask the Attorney General to make a determination as to whether a third class borough is legal.

2. Go to court.

3. Challenge the Attorney General's opinion.

Pat Jones stated that we may also lose $26,000 of Local Service Roads and Trails monies and $40,000 which was to go to hiring high school students through a Youth Conservation Camp with the Haines students only.

Sue Butz said she wanted to know why the State dislikes our third class borough.

Jessie Dodson said that they don't really care what class of borough we are.

David Black stated that the Assembly would like some time to investigate and look into these questions that have been brought up, and if necessary someone will go to Juneau and get answers. He stated that as soon as we know something we will then call another meeting to inform the public.

The meeting was adjourned at 10:10 p.m.

[illegible]
Deputy Borough Clerk

Attest:

Paul M Swift
Borough Clerk

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE: March 16, 1977

FILE NO. Legislature-1977

SUBJECT: Senate Bill 47

The Honorable Joseph L. Orsini
Chairman
Senate Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The City and Borough of Juneau supports the concept expressed in Senate Bill 47 but suggests that certain changes might make the bill more workable.

As we understand it, the intent of the bill is to allow the municipality to exempt from taxation that portion of an increase in assessed valuation which can be attributed to new maintenance, repair or renovation of an existing structure where such work enhances the exterior appearance. The first sentence of the exemption reads, however, that the exemption goes to "the assessed value of improvements to real property." As the "improvements to real property" include the entire existing structure, it appears that the bill would authorize the municipality to exempt the entire assessed value of the structure if recent maintenance, repair or renovation has caused the assessed value to increase. If it is the intent of the Legislature to exempt only the increase, and not the value of the entire structure, I would suggest that the first sentence be changed to read as follows:

> (F) Municipalities may by ordinance exempt from taxation all or any part of the increase in assessed value of improvements to real property if such increase in assessed value is directly attributable to alteration of the natural features of the land or new maintenance, repair or renovation of an existing structure and if the alteration, maintenance, repair or renovation, when completed, enhances the exterior appearance or esthetic quality of the land or structure.

The approach taken in the above suggested language involves three changes from the original. First, it would authorize the municipality to allow an exemption of part of the increase attributable to new maintenance, etc. rather than requiring that the municipality allow a full exemption or no exemption. The amount of the partial exemption would have to be set forth in the ordinance. The second change makes clear the fact that the exemption could not exceed the amount of the increase in assessed valuation which is directly attributable to the new maintenance, etc. The third change involves the implication in the existing language that an exemption may be given prior to the actual accomplishment of the alteration or maintenance. The proposed language indicates that an enhancement must have occurred before the exemption can be given.

The exceptions to the exemption which appear in the second sentence of the section are well thought out and should be retained.

We would suggest that municipalities be given a little more flexibility than is currently provided in the last sentence of the proposed section. As presently written, the section would require the municipality to give the exemption for a period of four years. We would suggest that rather than this all or nothing approach the municipalities be authorized to grant the exemptions for a period not exceeding four years. Also, requiring that the period run from the date the improvement is completed or the date of approval of an application, whichever is later, creates the problem whereby a property owner may come in three or four years after the improvement has been completed to make application. At this point it may be extremely difficult to determine the increase caused by the improvement. I would suggest that this part be deleted so that the municipalities may deal with that problem in the ordinance which authorizes the exemptions. Therefore, I suggest that the last sentence of the bill be changed to read as follows:

> An exemption provided under this subsection may continue for a period not to exceed four years from the day the improvement is completed.

If you have any questions, I would be happy to discuss them with you. I can be reached at 586-3300.

Very truly yours,

Gerald L. Sharp

SB 50
SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

February 15, 1977

Present: Chairman Orsini, Senators Willis, Ferguson, Hackney, and Sumner; Charles Thompson, Dept. of Highways; Bill Corbus, Alaska Utilities Association; and Ted Burns, Municipality of Anchorage

The hearing was begun at 3:00 with the testimony from Charles Thompson, Chief Utilities Engineer of the Department of Highways. Ketchikan Public Utilities had sent a letter stating their feelings about SB 50, and Mr. Thompson explained and clarified the terms of the letter.

Bill Corbus from the Alaska Utilities Association then stated that they were endorsing SB 50. He testified that by having the State reimburse the utilities for relocation, their rates to the consumer are stable.

Senator Sumner asked if the $100 penalty was necessary, that he did believe the general public should not have to pay this fine. He pointed out that there had been no testimony or support from anyone on this point.

Mr. Corbus stated that they had never, to his knowledge, had any problems with unauthorized encroachment.

Ted Burns, the Assistant Anchorage Municipal Attorney, stated that they were favor of SB 50. He said that utility rates were ever-increasing and the cost imposed by relocating lines were contributing to the high cost of usage. He explained the difference between underground and overhead lines in relation to relocation costs.

Chairman Orsini asked Mr. Thompson about the definition of an functionally equal facility, and Mr. Thompson explained that the State would provide the funds for a new relocated facility with the same capabilities as the old one. The utility then would assume the costs for any extra capability or improvements.

Chairman Orsini asked if there were any motions to amend SB 50, and Senator Sumner suggested that page 2, line 18-20 be deleted, beginning after the word chapter, and ending after the word exist. This motion was passed unanimously, and Senator Ferguson then moved to pass the Bill as amended and all the members voted "Do Pass" on SB 50.

The hearing was adjourned at 3:55 p.m.

TO: Senator Orsini DATE: Feb. 14, 1977

FROM: Paul Conger RE: SB50

I talked to Richard Svobodny, Attorney, Department of Law, Highway Section, and he said the background to SB50 is as follows:

The Feds, in 1958, passed the Highway Act of 1958, which in essence stated "whenever a State shall pay for the cost of relocation of utility facilities necessitated by the construc-- tion of a project on the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas, Federal funds may be used to reimburse the State for such cost in the same proportion as Federal funds are expended on the project; Provided, that Federal funds shall not be apportioned to the states under this section when the payment to the utility violates the law of the State or violates a legal contract between the utility and the State."

Prior to this, utilities were incurring a significant burden because they were paying the costs of relocating the utility whenever highway changes took place. The 1958 Highways Act attempted to relieve this burden.

Naturally, once the Fed Act was enacted it was befitting to the States to enact legislation that would be compatible with the Highway Act. Emanating from this, we have AS 19.25.020 which is under scrutiny at this time.

Our lawmakers, in devising this statute, established July 1, 1960 as the determining date to act as a guideline in establishing criteria as to who would receive reimbursement and who would not. Then using this date, they imposed additional criteria ~~which is affixed~~ as attachment #1, p.2., delineated in R. C. Preston's memo, dated 11/28/75,

"The question of determining who must bear the costs of utility relocation can arise from a number of factual situation. In certain instances, however, the answer is clear and an initial and often determinative question which aids in the answer is which was there first? If a utility facility is validly in place prior to the establishment of a right-of-way and construction of a highway, there is no question that the State must pay for the adjustment or relocation of the utility facilities. On the other hand, if a right-of-way exists first, and, after July 1, 1960 a utility desires to locate facilities within the right-of-way, the State will not be responsible for that utility's relocation costs if such is later necessitated by highway modification or construc- tion." (Unless the two parties enter into an agreement which stipulates different terms).

However, this seems to be where the simplified approach ceases, and many problems arise regarding reimbursement, which have been a consistent "thorn in the side" for the State. They hope a panacea to the problem will be SB50.

Specifically, the statute has presented problems for those utilities who were located in State rights-of-way at the time the law went into effect and had to relocate their utility to adjust to highway construction. This initial relocation isn't the problem, it's if the facility (one located in the states right-of-way prior to 1960) has to relocate a 2nd time to accomodate to modifications made in the highway, that has presented the problem. Should the utility be reimbursed for the 2nd relocation?

The Department of Law in its memo, affixed hereto as attachment 2, page 6, dated 10/27/76, is of the opinion that the utility should be entitled to reimbursement.

The underlying problem regarding reimbursement is not being generated by the State, but by the Feds. The Feds are contending that State law is not clear on this point, therefore they are reluctant to provide any funds because they will not be in harmony with State law as the Federal law requires. So what the State is doing by introducing this Bill is making it lucid in the statute that the State will reimburse the utility in no uncertain terms, for a "cost of change, relocation, or removal necessitated by highway construction." (see Sec. 19.25.020(c) of SB50.) Therefore, the enactment of this law will prohibit any dispute by the Feds and they will have to reimburse the State because our statute will now specify that we will reimburse the utility if requested to relocate by the Department of Highways.

In the rest of the bill, the State is simply making the definition of utility more refined.

Special note should be given the new language in the first section of the bill, (AS 19.05.130(4)) "the State will not pay for any improvements above the costs of a functionally equal facility". I think this term can be wide-open for interpretation, and I have been unable to attain from anyone why they want to amend the present language in the statute.

PC/js

MEMORANDUM State of Alaska

TO: The Honorable Walter B. Parker
Commissioner
Department of Highways

DATE: November 26, 1975

FILE NO:

TELEPHONE NO:

SUBJECT: Whether the State is Obligated to reimburse Utilities for second Relocations under AS 19.25.020

FROM: Avrum M. Gross
Attorney General
Department of Law

By
Ray C. Preston
Assistant Attorney General

This memorandum attempts to dispose of a recurring question of law involving highway construction and the relocation of utility facilities located within State rights-of-way. The question involves the application and interpretation of AS 19.25.020 in situations where a utility has first been required to adjust or relocate its facilities due to highway construction, relocates its facilities still within the right-of-way, and then at a later date, is again required to shift its facilities due to highway construction. The question is whether the State is obligated by the statute to pay the utility's costs in having to relocate its facilities the second time around. AS 19.25.020 provides:

> Relocation of utilities incident to federal-aid highway projects.
> (a) If, incident to the construction of a highway project on a federal-aid primary or secondary system, or the interstate system including its extensions in an urban area, the department determines and orders that a utility facility located in, over, along, or under a road right-of-way must be changed, relocated, or removed, the utility owning or in charge of the facility shall change, relocate, or remove it as soon as possible in accordance with the order.
> (b) The cost of change, relocation, or removal is a part of the cost of the highway construction to be paid from highway funds and the department shall, on behalf of the state, pay the costs of the change, relocation, or removal unless the utility facility was constructed and installed under a valid agreement entered into by the state and the utility after July 1, 1960, which requires the utility to change, relocate, or remove its facilities on demand at its own expense. A utility which locates its facilities on a state owned right-or-way after July 1, 1960, without a permit from the department shall not be reimbursed for the cost of the change, relocation, or removal of its facility.

The question of determining who must bear the costs of utility relocations under the statute can arise from a number of factual situations. In certain instances, however, the answer is clear and an initial and often determinative question which aids in the answer is which was there first? If a utility facility is validly in place prior to the establishment of a right-of-way and construction of a highway, there is no question that the State must pay for the adjustment or relocation of the utility facilities. On the other hand, if a right-of-way exists first, and, after July 1, 1980 a utility desires to locate facilities within the right-of-way, the State will not be responsible for that utility's relocation costs if such is later necessitated by highway modification or construction. This latter result, however, is dictated more by the terms of the standard utility permit issued to the utility than by the language of the statute. The terms of the permit are contemplated by the statute. The situations which have not been so clear, however, are those which involve the first set of facts at the outset, and where the utility has been allowed to relocate its facilities within the newly established right-of-way. In such a situation, is the State legally obligated for the costs of relocating the utility facilities when highway construction necessitates their relocation a second time. In our opinion, the answer to that question is yes. This result and resolution of the question is based upon an analysis which focuses upon and considers the language of the statute, its purposes, the legislative history of the statute, the legislative history of the federal statute which apparently precipitated the Alaska statute, consideration of the realities involved in situations when highways and utilities must meet and run together (which merges back into the purposes of the statute) and other factors which are tangental to the main question, including certain existing regulations in the Alaska Administrative Code and past practices of the Department of Highways in dealing with such cases. The language of the statute is considered first. AS 19.25.020(b) provides in part:

> The cost of change, relocation, or removal is a part of the cost of the highway construction. . . and the department shall. . . pay the costs. . . unless the utility was constructed and installed under a valid agreement entered into by the state and the utility after July 1, 1980, which requires the utility to change, relocate, or remove its facilities on demand at its own expense. . . . (emphasis added)

The mandate thus is clear that except for the proviso which begins with the word "unless . . . the State is obligated to bear the costs of relocation." The proviso, however, is not so clear. It can mean only those facilities which come into being in the first instance after the right-of-way is established. It can also be interpreted as mandating that if a utility is initially relocated and is relocated within the right-of-way,

that the first relocation only is subject to reimbursement; that the utility must at the time of initial relocation enter into an agreement by which it must bear its own costs thereafter, even if a subsequent relocation is necessitated solely by highway construction. Since the language is somewhat ambiguous, resort must shift to the underlying purposes and intent of the statute. See generally Sands, Sutherland Statutory Interpretation vol. 2A §45.09 et seq. (4th edit., 1973). Such a shift and analysis however requires a look first of all at the congressional action which apparently precipitated AS 19.25.020. In 1958, Congress, in passing the Highway Act of 1958 (P.L. 84-627) included the following in sec. 111 of the Act:

> -- Subject to the conditions contained in this section, whenever a State shall pay for the cost of relocation of utility facilities necessitated by the construction of a project on the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas, Federal funds may be used to reimburse the State for such cost in the same proportion as Federal funds are expended on the project: Provided, that Federal funds shall not be apportioned to the states under this section when the payment to the utility violates the law of the State or violates a legal contract between the utility and the State.

This new addition to the federal-aid highway scheme of things was explained somewhat by the conference report of the House and Senate conferees. 1/ that part of the conference report is set out in full:

> SECTION 111. RELOCATION OF UTILITY FACILITIES
>
> The House bill (sec. 113 and the Senate amendment (sec. 111) contained similar provisions which would have permitted Federal funds to be used to reimburse a State for utility relocation costs which the State had paid for under its own laws or practices. Both the House and Senate provisions would have denied apportionment of Federal funds for this purpose to any State when the payment to the utility violated the law of the State or a legal contract between the utility and the

1/ Conference Report No. 2438, 1958 U.S. Code Congressional and Administrative News p. 2889, 2899.

> State. The Senate amendment differed from the House bill, however, in that it provided that no more than 2 percent of any sum apportioned to any State for any fiscal year might be expended under the section. The House bill contained no such limitation.
>
> This 2-percent limitation would have resulted in administrative difficulties. It could have caused inequities particularly to small utilities and municipalities and in some instances resulted in failure to fully reimburse States which would otherwise have been reimbursed under the policy which the Bureau of Public Roads has followed of reimbursing States that pay relocation costs. Section 113 of the bill as passed by the House and recommended and accepted by the conferees recognizes the equity of reimbursing utilities for the cost of relocating facilities when required for Federal-aid highway projects. Further, this section makes it clear that it is the intention of the Federal Government to assume its proportionate share of utility relocation costs whenever a State allows such costs.
>
> Under the existing practice of the Bureau of Public Roads, Federal funds may participate in utility relocation costs to the same extent as other construction costs without any percentage limitation based on the State's apportionment.
>
> In adopting the House language, the conference agreement intends that the section will be applicable to the amount paid by the State.

Two years later, in 1958 the new provision was amended by adding a new provisio, viz. Section 11, P.L. 85-381; 72 Stat. 89. While this new addition didn't add much to the 1956 Act, a serious effort was made in the Senate to contract from what the 1956 Act had established. The Senate committee which had considered the bill reported it to the floor with amendments which would have, inter alia, placed a ceiling on how much federal reimbursement a state would receive if it did pay the costs of utility relocation. In an emphatic (and apparently successful) attack on this proposed contraction, Senators Edward Martin, W. Kerr Scott, Robert S. Kerr and Roman L. Hruska prepared a dissent to the proposed amendment which is set out in full as an appendix to this opinion. 2/

2/ Their dissent appears at p. 2398 of U.S. Code Congressional and Administrative News for 1958

Their dissent is interesting for present purposes because it develops in much more detail the background and reasons for the 1956 enactment. Again, their dissenting efforts were ultimately successful, for the 1956 language was basically retained and has been retained in the same basic form ever since. The language is presently codified at 23 U.S.C. §123. 3/

Following this activity of Congress, the several states promptly began passing statutes which required utilities to be reimbursed for their relocation costs (at least when their relocation was necessitated by Federal-aid highway construction). Then, almost as soon as that happened, litigation developed challenging the new laws, usually on the grounds that they constituted an appropriation of public funds for a non-public purpose. See e.g. State Highway Department v. Delaware Power & Light Co., 167 A.2d 27 (Del., 1961).

3/ 23 U.S.C. §123 provides:

§123. RELOCATION OF UTILITY FACILITIES

(a) When a State shall pay for the cost of relocation of utility facilities necessitated by the construction of a project on the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas, Federal funds may be used to reimburse the State for such cost in the same proportion as Federal funds are expended on the project. Federal funds shall not be used to reimburse the State under this section when the payment to the utility violates the law of the State or violates a legal contract between the utility and the State. Such reimbursement shall be made only after evidence satisfactory to the Secretary shall have been presented to him substantiating the fact that the State has paid such cost from its own funds with respect to Federal-aid highway projects for which Federal funds are obligated subsequent to April 16, 1958, for work, including relocation of utility facilities.

(b) The term "utility," for the purposes of this section, shall include publicly, privately, and cooperatively owned utilities.

(c) The term "cost of relocation," for the purposes of this section shall include the entire amount paid by such utility properly attributable to such relocation after deducting therefrom any increase in the value of the new facility and any salvage value derived from the old facility.
(Aug. 27, 1958, P.L. 85-767, §1, 72 Stat. 900.)

And, a number of states did strike down the new law. See e.g. Washington State Highway Commission v. Pacific N.W. Bell Tel. Co., 367 P2d 605 (Wash., 1961). The constitutionality of the Alaska version being considered here has never been challenged.

This review of the history and background of the Alaska statute as a product of Congressional action is particularly helpful for present purposes as there is a total lack of meaningful legislative history relating to the enactment of AS 19.25.020 (ch. 57 SLA 1961) by the Alaska legislature. The journals of both the House and Senate contain only references to the recommendations of committees having considered the bill (HB 172) and lack any formal report which could be used as a guide for answering the present question of statutory interpretation. Further, there are no other formal minutes or records available of committee action. HB 172 did not pass as introduced, but the differences of its amended version, House Committee Substitute for HB 172 (HCS 172) do not appear relevant to the present question. The primary change made was deletion of language which would have expressly endorsed relocation payments in cases in which the State had made agreements with utilities to reimburse for relocation expenses if legislation was passed which required such payments. In other words, agreements which would have given retroactive effect to the legislation.

Having completed the review of the general historical background, the question of what general purposes were involved and objects sought to be accomplished in enacting §20 can be addressed. First, it appears that in expanding the list of items which were reimbursable to the States, Congress recognized the basic inequity if the cost of utility relocation continued to be borne by the utilities themselves during this period of accelerated highway construction. Such a situation would mean in effect that the subscribers to a utility would be subsidizing highway construction. See the 1958 conference report (quoted above) at p. 2000. More enlightening however is the dissenting view expressed by Senator Martin et al. in 1958 (see appendix). Beginning with the 1956 Act, and continued in 1958 and subsequent years, the greatly accelerated pace of highway construction (especially federal-aid highway construction) entailed a commensurate amount of increased costs to utilities which, prior to the 1956 Act had had to pay the costs of utility relocation whenever highway changes took place. Generally speaking, a utility with facilities located within a right-of-way has historically, not ranked the highest in the hierarchy of legal rights, at least where highway authorities are concerned. See 4 Nichols on Eminent Domain, §15.22 (3d edit., 1975). Since utility lines generally follow highway lines, and the highway usually came into being first, utilities took their places at the pleasure of the highway authority. They were issued "permits" or granted "franchises" by which they were allowed to place facilities within the right-of-way but if the highway authority decided to modify the highway in a way which entailed relocation, then the utility almost invariably had to bear the costs, even though it would not be necessary except for the highway modification. From the strictly legal point of view this was only a natural result. If one person has a superior right and title to real property, and cannot be forced to yield any part of it, a decision to allow a specialized use over the property

by someone else will only be granted subject to the fee owner's own rights and options -- retaining the right e.g. to force the freeloader off at will -- somewhat analogous to a tenancy at will. In the case of utilities however, (and even though their initial location on the right-of-way was gratis) repeated dislocation meant that subscribers of the utility were actually subsidizing highway construction, and it is that fact which was recognized in the Highway Act of 1956. The accelerated pace of highway construction brought about inordinate expenditures for moving vast amounts of facilities at a great cost to the users of the utilities. Id at 2398.

Section 11 of the 1956 Act attempted to correct that. The ultimately successful dissent of Martin et al. in 1958 concluded with a summary of reasons which support the 1958 formulation:

> 1. Relocation costs are legitimate construction costs which should be treated as an integral part of the cost of constructing Federal-aid highways.
> 2. If utilities are required to pay relocation costs utility users would be unfairly burdened. They would have to pay for the cost of constructing highways -- once as a taxpayer and again as a part of the cost of each utility used. This despite the fact that utilities and their customers receive no special benefit from the new Federal highways.
> 3. In many areas smaller local utilities, public and private, which happen to be in the path of highway construction, would be heavily burdened and possibly forced out of business.
> 4. The new Federal-aid highway program because of its immense size and complexity would accentuate the burden on utility users of all services, electric, gas, water, sewer, and communications.
> 5. Public rights-of-way are not solely for transportation of vehicles but to provide the public with all needed services and commodities as roads have always done. The public and not just the motorist provides these rights-of-way.

If this formulation might be accepted for present purposes as a fairly accurate statement of the purposes and objects sought to be accomplished at the federal level, and if the subsequent enactments in the several states including Alaska can generally be described as a means of enabling the broadened federal action to take effect in those states, note should be taken that these same purposes and objects apply just as much in the case of a second relocation as in the first. Indeed, a basic Congressional decision that utility

relocation costs should be part of highway construction and action by the states to implement the decision would be frustrated by an interpretation which would effect a one-time-only policy.

Beside the acknowledgment that relocation costs due to highway construction are and should be a cost of highway construction, note should also be made of a second important premise which both underlies the 1958 Congressional action, and which supports the present interpretation, to wit: highways generally, and including federal-aid highways, simply are not designed nor intended solely for vehicular traffic; they are usually designed and intended for use by utilities in addition to the traffic function; use of the right-of-way by utilities is something which is intended at the outset. Therefore, viewing the several utility functions which usually follow highway lines, and which serve the same business and residences as the roads themselves and as functions of equal importance, it becomes somewhat incongruous if utilities are not granted legal rights which recognize their standing and function. This aspect was rather nicely focused upon and considered by the Minnesota Supreme Court in Minneapolis Gas Company v. Zimmerman, 91 N.W. 2d 642 (Minn., 1958). Zimmerman involved the question of whether the Minnesota statute, which was passed after the 1958 Highway Act, and which authorized the state to pay the cost of relocating utility facilities on Federal-aid highway projects, was constitutional under the state constitution. In upholding the constitutionality of the law, the Minnesota court stated (Id. at 648):

> The concept of the functional uses or purposes of a highway has constantly expanded with the advancement of civilization until today a highway no longer exists for the limited, though principal, purpose of vehicular travel or transportation of persons and property over its surface. . .

Quoting from a prior case, the court continued (Id. at 649):

> In our judgment, public highways, whether urban or rural, are designed as avenues of communication; and, if the original conception of a highway was limited to travel and transportation of property in movable vehicles, it was because these were the only modes of communication then known; that as civilization advances, and new and improved methods of communication and transportation were developed, these are all in aid of and within the general purpose for which highways are designed. (Emphasis theirs)

The Minnesota court then concludes:

> Clearly since the Cater decision in 1895, Minnesota has been definitely commited to the view that the use of rights-of-way by utilities for locating their facilities is one of the proper and primary purposes for which highways are designed even though their principal use is for travel and the transportation of persons and property. Furthermore, the import of that decision is a clear recognition that the use of highway rights-of-way for the transmission of public intelligence and public utility services confers important and direct benefits upon the public and that such use is not solely for the benefit and convenience of the utilities. The soundness of the view that the placing of utility facilities upon a right-of-way is one of the proper uses of a highway benefiting thepublic is emphasized by the fact that convenience and economy result therefrom to utility users, who are usually located near highways, and by the public welfare -- in the view of our ever-increasing population -- to make full and efficient use of the land surface occupied by public roads.

Thus, an interpretation other than which is here adopted would be inconsistent with this notion of plurality of function in highway design which must be recognized. Such an interpretation would encourage utilities not to relocate within rights-of-way, simply to preserve their rights for the future, and would frustrate the general object of accomodating utilities within the right-of-way.

Finally, connected with the issue addressed here is the effect both of the language employed in existing agreements between various utilities and the Department of Highways and certain existing administrative regulations relating to utility relocation. As to the first of these, the Federal Highway Administration has apparently questioned the authority of the state to enter into agreements with utilities whereby the state has agreed to reimburse the utility for future relocations. See (1.) of the memorandum dated April 25, 1975 from the Division Engineer to Walter B. Parker, Commissioner of Highways concerning project F-031-2(32). However, it should be clear from this opinion, that whether an agreement exists or not, the State is bound by statutory mandate to reimburse utilities for second relocations, if the utility was there first, and without regard to whether the utility existed before July 1, 1980. Even if an agreement states that the utility and not the state must bear the costs, the statutory duty still exists.

Next, mention will again be made 4/ of at least one existing administrative regulation which is in conflict with the mandate of the statute, and therefore invalid. Specifically 17 AAC 15.170(c)(1) conflicts with the statutory mandate of AS 19.25.020 and should be repealed or amended to render it consistent. Note is made, however, of the fact that a wholesale revision of the regulations is in progress.

In conclusion, it is our opinion that if a utility facilities must initially be relocated due to highway construction, and are relocated within the right-of-way, the State is obligated under AS 19.25.020 to reimburse the utility if the facilities must subsequently be relocated due to highway construction. This interpretation is supported by the language of the statute; its purposes and objects as gleaned from research into the legislative history and the evolution of Federal-aid highway acts. It is hoped that this memorandum resolves the question, which apparently exists in a significant number of projects in which federal participation in utility relocation has been placed in a deferred status, pending resolution of the legal question.

4/ See a prior memorandum dated March 18, 1975 to R.D. Shumway, Chief Design Engineer, Department of Highways from Ray C. Preston, Assistant Attorney General, relating to Project No. F-044-1(5); Tudor Road East.

Department of Law

SUBJECT: AS 19.25.020(b); Rights of Utilities located within a Right-of-way prior to July 1, 1960

This memorandum responds to a request of the Division Engineer of the Federal Highway Administration and Regional Counsel of the FHWA for additional legal analysis relative to the question of the State's legal obligation to reimburse utilities for second relocation expenses where the utility or its predecessor in interest was located within a highway right-of-way prior to July 1, 1960. That date is included in the language of AS 19.25.020(b) which reads:

> The cost of change, relocation, or removal is a part of the cost of the highway construction to be paid from highway funds and the department shall, on behalf of the state, pay the costs of the change, relocation, or removal unless the utility facility was constructed and installed under a valid agreement entered into by the state and the utility after July 1, 1960, which requires the utility to change, relocate, or remove its facilities on demand at its own expense. A utility which locates its facilities on a state owned right-of-way after July 1, 1960, without permit from the department shall not be reimbursed for the cost of the change, relocation, or removal of its facility.

This section has recently been the subject of analysis and interpretation in an opinion dated November 26, 1975 (attached). That opinion primarily addressed the relative rights of utilities and obligations of the State in instances where utilities are required to relocate a second time due to highway construction, where the utilities had been initially relocated after July 1, 1960, and in the process had become located within the newly established right-of-way. Noting particular changes made by Congress in enacting the Federal-Aid Highway Act of 1956, which appeared to precipitate the enactment of AS 19.25.020 in 1961, the November 26 opinion concluded that § 20 established a first-in-time rule with respect to utility facilities initially relocated after July 1, 1960. If the utility facilities were in place before the highway right-of-way was established, their right to reimbursement for relocation expenses due to highway construction is a vested right, conferred by statute, which is enjoyed by the utility for

subsequent relocations as well as the initial relocation. On the other hand, if the highway right-of-way is established first, (after July 1, 1960) and a utility subsequently desires location within the right-of-way, the statute contemplates an agreement by which, as a condition to establishing the facility within the right-of-way, the utility would agree to relocate its facilities at its own expense if relocation is necessitated by highway construction. What was not precisely addressed in that opinion was the situation where utility facilities were in existence within a highway right-of-way before July 1, 1960. In that situation, there appears to be no question that the utility is entitled under the statute to reimbursement for relocation expenses the first time that it is made necessary by highway construction. However, a question apparently does exist as to whether such facilities are also entitled by dint of the statute to reimbursement for relocation for any subsequent moves due to highway construction, if the facilities are relocated within the highway right-of-way at the time of the initial relocation. Posed another way, the question is whether the rights of such facilities are vested by dint of the statute in the same manner as utilities encountered by highway construction after July 1, 1960.

In addition to the statute itself, certain administrative regulations of the department which interpret and implement AS 19.25.020 must also be considered in the analysis, viz. 17 AAC 15.020(b), and 17 AAC 15.170. 1/ Those regulations are attached. However, as noted in the previous opinion, the validity of administrative regulations depends in part on whether the regulation is consistent with the statute which it is interpreting or implementing. AS 44.62.030 provides:

> Sec. 44.62.030. CONSISTENCY BETWEEN REGULATION AND STATUTE. If, by express or implied terms of a statute, a state agency has authority to adopt regulations to implement, interpret, make specific or otherwise carry out the provisions of the statute, no regulation adopted is valid or effective unless consistent with the statute and reasonably necessary to carry out the purpose of the statute.

1/ 17 AAC 15.170(c)(1) appears particulary relevant:

> (c) A utility facility which is wholly or partially relocated or adjusted, incident to a highway construction project, under the provisions of a utility agreement and at the expense of the department, the department will issue permits as follows:
>
> (1) Where the utility facility is adjusted or relocated to a new location or alignment within highway right-of-way, the department's standard permit will be issued to the extent of the relocation requiring that the permittee shall relocate said facility or facilities at no cost to the department when required by future highway improvements or construction.

With such as the background and context of the present analysis, the relevant part of § 20(b) is again presented:

> The cost of change, relocation, or removal is a part of the cost of . . . highway construction . . . and the department shall . . . pay the costs . . . unless the utility facility was constructed and installed under a valid agreement entered into by the state and the utility after July 1, 1960, which requires the utility to change, relocate, or remove its facilities on demand at its own expense. . . . (Emphasis added)

Here, notice may be taken first of all that the syntax of the section itself establishes only one circumstance in which utilities will not be entitled to reimbursement, viz. where the highway right-of-way is first-in-time after July 1, 1960. In all other cases the statute establishes a vested right to relocation expenses, e.g. utility facilities in existence, within a right-of-way prior to July 1, 1960. Thus, at least three categories of utilities can be identified from the language of the statute:

> (1) utility facilities in existence, not within a right-of-way, and encountered by highway construction after July 1, 1960;
>
> (2) utility facilities which came into existence within an existing right-of-way after July 1, 1960; and
>
> (3) utility facilities which were in existence within a right-of-way prior to July 1, 1960.

It is the first and third of these categories in which the syntax of the section is treating equally. Only where a highway or right-of-way is first-in-time after July 1, 1960 does the statute contemplate an agreement whereby the utility agrees to bear the cost of future relocation.

However, not only does the sentence structure and plain meaning of the words support this conclusion, but the same conclusion is reached by reference to the general and manifest purpose of the statute. The statute's general purpose was developed in the earlier, 1975 opinion chiefly by resort to the legislative history of the Federal-Aid Highway Act of 1956. That Act cleared the way for federal participation in utility relocations necessitated by highway construction. Following that action, it quite behooved each of the states to enact legislation to legitimize such payments. See particularly pages 5 and 6 of the 1975 opinion. In addition, however, it also appears that the same conclusion is entailed by an examination of the idea and rationale of a so-called "grandfather clause," as the use of the July 1, 1960 date in § 20 appears to be exactly that.

A "grandfather clause" is defined in Ballentines Law Dictionary (1969) as:

> A clause in a licensing statute which exempts persons already engaged in the regulated business or occupation . . . A provision in a statute requiring a certificate of public convenience and necessity which excepts carriers currently operating. . . .[citations omitted]

The idea of grandfather clauses is rather obvious and they are familiar provisions in many types of laws. The basic, underlying rationale may well rest as much upon notions of due process as anything else. One who has acted legitimately in the past in certain ways should not be penalized in the future for having done so when the governing body changes the rules of law which affect those same actions. The object of grandfather clauses in general is to confer upon those who had behaved legitimately in the past equality or parity with those who in the future must satisfy certain new requirements in order to be legitimate. One who has qualified for a particular right in the past will not be required to meet additional, often onerous, sometimes impossible qualifications in order to continue to enjoy that right in the future. To bring such an abstraction down to the concrete, see generally the annotation beginning at 4 ALR 2d 667 of cases construing and applying grandfather clauses with respect to businesses and professions. For a recent case in the area, see Bloom v. Texas State Board of Exam of Psychologists, 492 S. W. 2d 460 (Tex., 1973).

In the present situation, it appears not to be an unreasonable conclusion that the reason for insertion of the July 1, 1960 date sprang out of the same kind of reasons for the installation and use of grandfather clauses generally, and if that is so, the object and purpose may be stated as conferring upon utilities already in existence within rights-of-way, the same rights as was being conferred upon other utilities who, after July 1, 1960 found themselves in the path of highway construction. No doubt that in the early, developmental, "frontier" period of the State (which for present purposes includes the entire time prior to statehood) there simply was no consistency in the manner by which utilities came to be located within a right-of-way. Sometimes the utility facilities preceded an actual road, even if a right-of-way was established first. Sometimes, particularly where an actual road existed first, a permit, not unlike the one used even after the enactment of § 20, was used, which by its terms the utility would agree that future relocations necessitated by highway construction would be at no cost to the highway authority. See the attached sample permit approved on June 9, 1953 for utility facilities located in Juneau. Sometimes, it appears that the utility facilities would simply be located within a right-of-way without any formality whatsoever. Here, perhaps oral assent was at times granted by the highway authority, and perhaps not.

The case of certain facilities of Chugach Electric Association, designated as poles D1, D2, D3 and D4 which were relocated as part of project F-031-2(32) at the time of construction of the interchange of the New Seward Highway at Dowling Road, falls most closely into the latter category. See the attached memorandum from Monte Lyons to Charles E. Thompson, Chief Utilities Engineer dated March 25, 1976. Although it appears that CEA obtained an easement in 1952 from the adjoining landowner which covered these facilities, the easement was at the same time within the limits of the right-of-way which had been established in 1949. Thus, it appears that the easement was of no effect. Such a spotted pattern would be compounded whenever other utilities entered into joint use agreements with utilities with facilities already in place.

The existence of such an inconsistent factual pattern by which utilities became located within rights-of-way in Territorial days lends further credence to the conclusion that grandfather rights were conferred by the 1961 legislature. Although inconsistent in the manner by which the facilities came into being within the right-of-way, it can reasonably be assumed that their creation came about nevertheless by following existing practices and customs within the region or locality. Thus, it would be manifestly unfair to penalize such utilities in the prospective application of a rule which states that first-in-time entitles utilities to a vested right to relocation expenses. The underlying policy reasons for establishing the first-in-time rule exist with just as much force where utilities happen to be already in place at the time of establishing the rule. It also makes sense where confusion may have existed in many instances as to which did exist first, the utility facilities or the road. Thus, referring back to the syntax of the statute it appears that the words "constructed and installed . . . after July 1, 1960" refers to facilities which are constructed and installed in the first instance, after July 1, 1960. All facilities existing within rights-of-way prior to July 1, 1960 are to be treated as if they were there before the road was; that they therefore have a vested right to reimbursement expenses. This syntactical conclusion is further supported by the fact that "constructed and installed . . ." is used in conjunction with the words ". . . under a valid agreement . . . after July 1, 1960, . . ." (Emphasis added). Thus, instead of three categories, there are really only two categories of utilities under the statute, viz. those constructed and installed in the first instance within a pre-existing right-of-way, pursuant to an agreement with the Department of Highways, and all others. All others includes both utilities which are in existence before an initial relocation due to highway construction which takes place after July 1, 1960 and all utilities which came into place within a right-of-way, by any manner, before July 1, 1960. All utilities in the latter category have a vested right to reimbursement for their relocation expenses. This, of course, would include the Chugach facilities described above.

"

To summarize, three distinct factors all point to the same conclusion, viz. the syntax of the statute and plain meaning of the language employed, the manifest purpose and underlying rationale involved, and finally the rationale underlying the establishment and use of so-called "grandfather" clauses. All three indicate that facilities in place within a right-of-way prior to July 1, 1960 have a vested right to reimbursement just as much as utilities encountered by highway construction after that date. It follows as well that a regulation which is inconsistent with the statute is not valid. This includes existing 17 AAC 15.170(c)(1) and 17 AAC 15.020(h). This is not to say, of course, that these two regulations are invalid by dint of this opinion. It is only to say that it is the opinion of the author of this memorandum that the regulations are inconsistent with the statute, that they would not be enforceable in court, and that an action commenced by a utility to obtain payment for a second relocation would be successful.

STATE of ALASKA

MEMORANDUM

ALASKA PUBLIC UTILITIES COMMISSION
1100 MacKay Building - 338 Denali Street
Anchorage, Alaska 99501

TO: Frances A. Ulmer
Legislative Assistant
Office of the Governor
Pouch A, State Capitol
Juneau, Alaska 99811

DATE : January 12, 1977

FROM: Stuart C. Hall, Commissioner

SUBJECT: Legislation Relating to Utilities and State Rights Of Way

In our telephone conversation prior to the Christmas holidays, I indicated to you that the Commission continued to support legislation authored by the Governor relating to utilities and state rights of way. This was a bill introduced during the 1976 session as House Bill 557 and proposed for reintroduction at the 1977 session. I believe that it is C-16 among the administration's proposals if it doesn't already have a bill number for the current session. Your draft was submitted to our professional staff for further comment, and I am including herewith their observations and comments. (I would note, parenthetically, that the Commission continues to support the legislation.)

On page 1, line 15 I assume that someone has caught the typographical error in the word "subtracted." On page 1, lines 21 and 22 Chairman Zerbetz and Executive Director Jensen inquire whether it might not be appropriate to define the word "telecommunications" by referring to the definition contained in AS 42.05.701(8). They wish specifically to include cable television systems within the definition of telecommunications; and the definition of telecommunications as it appears in the Public Utilities Act at the section cited does include that type of utility system. Page 1, line 23 the word "waste" is employed, among others, to define the word "utility." We would note in passing that waste usually includes both solid and liquid waste; and the professional staff wants to make very certain that incorporated in that concept of waste "sewage" is included; it is the usual type of waste product transported by pipeline. The bill should perhaps be made more specific in this area. On page 2, line 2 the staff expressed some concern as to whether the phrase "along, over, under, or within a state right of way" also included the concept of the system adjacent to or parallel to a state right of way. The draftsman may want to consider that concept as well. On page 2, line 14 the draft employs the term "reasonable" to describe the time period for compliance. Some doubt is expressed as to what constitutes reasonableness, and the staff suggests that perhaps a period not less than 30 days might be employed.

With these suggestions and possible modifications we once again note our endorsement of this particular legislation. I regret very much that the staff comments have been delayed to this extent and hope that this does not inconvenience the Governor's office in any way in preparing the legislation for introduction. If you have any questions, please do not hesitate to contact me.

Enclosure

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to utilities and state rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.05.130(4) is amended to read:

(4) "cost of change, relocation, or removal" means the entire cost incurred by the utility properly attributed to the change, relocation, or removal of a facility, less any costs for improvements or upgrading over and above the cost of a functionally equal facility, if a facility is to be relocated and replaced with new equipment, there shall also be substracted from the entire cost [UTILITY AFTER DEDUCTING ANY INCREASE IN THE VALUE OF THE NEW FACILITY AND] any salvage value derived from the old facility;

* Sec. 2. AS 19.05.130(12) is amended to read:

(12) "utility" includes railroads and all publicly, privately, or [AND] cooperatively owned lines, facilities and systems for producing, transmitting or distributing communications, telecommunications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, and other similar commodities, including publicly owned fire and police signal systems, and street lighting systems [UTILITIES

* Sec. 3. AS 19.25.010 is amended to read:

Sec. 19.25.010. USE OF RIGHTS-OF-WAY FOR UTILITIES. A utility facility [AN ELECTRIC TRANSMISSION, TELEPHONE, OR TELEGRAPH LINE, POLE LINE, RAILWAY, DITCH, SEWER, WATER, HEAT, OR GAS MAIN, FLUME, OR OTHER

STRUCTURE WHICH BY LAW] may be constructed, placed, or maintained across, [OR] along, over, under or within a state right-of-way [A HIGHWAY BY A PERSON OR POLITICAL SUBDIVISION MAY BE MAINTAINED OR CONTRUCTED] only in accordance with regulations prescribed by the department and [. NO UTILITY PROJECT OF THIS NATURE MAY BE UNDERTAKEN UNTIL I IS] authorized by a written permit issued by the department.

* Sec. 4. AS 19.25.020 is repealed and re-enacted to read:

Sec. 19.25.020. RELOCATION OF UTILITIES INCIDENT TO HIGHWAY PROJECTS. (a) If, incident to the construction of a highway project, the department determines and orders that a utility facility located across along, over, under, or within a state right-of-way must be changed, relocated or removed, the utility owning or maintaining the facility shal change, relocate or remove it in accordance with the order. The order shall provide a reasonable time period for compliance.

(b) If the utility facility is not changed, relocated or removed in accordance with the order, the facility becomes an unauthorized encroachment and may be disposed of in accordance with secs. 240 - 250 of this chapter, and the owner of the facility is liable to the state in liquidated damages in the amount of $100 for each day the encroachment exists. In addition, the owner of the facility shall indemnify the sta for any amount for which the state may be liable to a contractor by reason of the encroachment.

(c) The cost of change, relocation, or removal necessitated by highway construction is a cost of highway construction to be paid by th state in accordance with AS 19.05.130(4), notwithstanding the terms or provisions of any existing permit, agreement regulation or statute to the contrary.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.070(c).

Senator Joe Orsini
Chairman, Community and Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The purpose of this letter is to express our interest and support in and for Senate Bill Number 50 relating to utility rights of way.

We feel that the bill merits favorable and timely action since it works to protect the various utility rate payers from the burden of highway project occasioned utility relocation expenses for which the rate payer receives no additional utility value. In effect these expenses become a part of the highway project which we feel is a proper allocation.

The measure passed the House of Representatives last year (HB-557), but failed to clear the Senate due to lack of time. I am not aware of any opposition to the measure. Your interest will be greatly appreciated.

Very truly yours,

Harold F. Schmidt
Senior Vice President

Senate Bill #50, relating to Utilities and State rights-of-way, was brought to our attention by Mr. Don Bowey, Assistant Utilities Manager for the City of Ketchikan.

Any legislation that will restrict or hinder the placement or installation of fire alarm boxes or transmission lines or legislation that would necessitate the issuance of permits to install, relocate or maintain such fire alarm equipment would be most undesirable to this Department. At present, there is no utility control on fire alarm devices in this area; it is the responsibility of the Fire Department to install, operate and maintain all emergency fire alarm equipment and we would like to see it remain under our control.

Very respectfully yours,
KETCHIKAN FIRE DEPARTMENT

REF: Senate Bill #50

Att: Senator J. Orsini

Dear Senator Orsini:

Matanuska Telephone Association desires to make the following comments regarding Senate Bill #50. We feel the proposed Bill is a milestone of legislation for Alaska utility consumers. In the past Title 19 has allowed utilities only limited participation in available Federal Relocation and Accomodation funds, causing burdensome costs to utility consumers. In passing the Federal Highway Act of 1956, 23 U.S.C.A. 162, Congress recognized that relocation of utility facilities is a necessary part of highway construction, and specifically authorized the use of Federal funds to reimburse states for amounts paid to utilities for nonbetterment cost of such relocation. Congress did provide, however, that such funds were not to be apportioned to any state where reimbursement of such costs would violate the law of the state. In a report of the Senate Committee on Public Works, reported as Senate Report #1407, 85th Congress 195 U.S. Congressional and Administrative News, Vol. 2, 1958 Legislative Histories Page 2399, the following appears:

"Public right-of-ways are not soley for transportation of vehicles, but to provide the public with all needed services and commodities as roads have always done."

Expenditures for reimbursement purposes serves a public purpose, because the public has an interest in receiving utility services. There is a public interest to be served by authorizing utility companies to use streets and highways to make such services available.

We respectfully request your support of Senate Bill #50. Further, we also desire your continued support of our intent to establish a more equitable basis from which utility organizations may extend services not only in our area, but throughout Alaska. Thanking you in advance for your consideration.

Very truly yours,

A. J. Moreland
Chief Engineer

The Honorable Joe Orsini
Alaska State Senate
Pouch V
Juneau, AK 99118

Dear Senator Orsini.

There is a bill of vital interest to the utilities which was pre-filed at the request of the Governor and is as I understand presently in the Community and Regional Affairs Committee.

Senate Bill No. 50 entitled, "An Act Relating to Utility and State Rights-of-Way: and providing for an effective date", is of vital interest to the utilities around the state. This bill could, under certain circumstances, vitally affect the utility consumer rates and its passage is being supported strongly by the Association and the individual utilities.

In the past, any utilities located in state highway rights-of-way were subject to the full cost of relocation in the event it was deemed necessary by the Department of Highways. Relocation generally came about because of reconstruction, widening, or new construction of state highways and affects such utilities as water, sewer, gas, telephone, and electric. All of these utilities normally, by virtue of their public service, must at various times be installed along or across state highways in order to interconnect service areas. Without these connecting lines adequate service to many areas would be impossible. We also feel that such joint use is the best use for a transportation corridor, which is essential for the movement of these vital commodities as well as vehicles.

As the law now stands, federal highway monies may not be used for reimbursement for the cost of relocation. Passage of legislation such as Senate Bill 50 will, however, clarify such expenses for participation and federal funding would enable that cost to be included in the total project cost as an area benefit where it belongs. Ninety-five percent participation by federal funds could then be applied to utility relocation costs as well as the cost of construction of the highway itself.

We feel that this is an extremely important piece of legislation, and is certainly worthy of your support. On behalf of the Utility Association and the thousands of people which we serve we ask your assistance in the passage of this bill.

Yours very truly,

Robert B. Smith
President

Senator Joe Orsini, Chairman
Community and Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Subject: Your letter of January 24, 1977,
re: Senate Bill No. 50

Dear Senator:

The City of Ketchikan d/b/a Ketchikan Public Utilities owns and operates three Utilities: Electric, Telephone, and Water. We are always most interested not only in legislation affecting utilities, but rules, regulations and administrative codes as well. Our observations on Senate Bill No. 50 are as follows:

Section 1. AS 19.05.130(4) - No adverse comment. Amending serves to clarify.

Section 2. AS 19.05.130(12) - No adverse comment through the word "STEAM".

We realize that (12) must be an attempt to clarify and identify what a Utility is and will be under the law.

The word "WASTE" has many meanings. If the Bill intends it should mean sewage, then it should be spelled out. Does it mean sanitary landfills? Waste land such as a desert?? I believe that the single word "waste" would eventually be the means whereby an agency of the State would place their own interpretation on the single word to the detriment of the Utilities and Public.

"Storm water not connected with Highway drainage,". We all know what "storm water" is. Do we interpret that any "storm water" that is not connected with Highway drainage is automatically a Utility. What about the storm drain systems of city streets and secondary roads? Does Senate Bill No. 50 mean that towns and cities street drainage systems are to be classified as Utilities?? Or, does it mean "storm waters" within the confines of a Highway R.O.W. only? If so, it should be stated.

"Publically owned Fire and Police signal systems." I have taken the liberty of submitting copies of your letter and Senate Bill No. 50 to the City of Ketchikan Public Works Director, Chief of Police, and Fire Chief. They express concern that Senate Bill No. 50 classifies them as a Utility. You will no doubt be addressed by them on an individual basis.

Section 3. AS 19.25.010 - No adverse comment. Amending tends to clarify if (12) is amended as set forth.

Section 4. AS 19.25.020 -

(a) (last line)- "The order shall provide a reasonable time period for compliance."

As existing, the statute reads that the Utility owning or in charge of the facility shall change, relocate, or remove it as soon as possible in accordance with the order.

There is a great difference. As existing, it requires mutual cooperation and understanding by the Utility and State. As proposed, it puts the Utility at the mercy of an arbitrary act.

We would suggest that if the word "reasonable" is desired that the wording be; "The order shall provide a reasonable time period for compliance. Such time period being mutually agreeable to the Utility and the State."

The State knows what they want accomplished, but only the Utility knows the problems a move, or relocation, creates for them and has the knowledge of the how, when and wherefore for compliance.

(b) We do not agree with the proposed version. It places more leverage and larger clubs in the hands of a State agency to use on a Utility. Neither do we agree on the merit of this clause in the existing statute.

The State of Alaska highway system can not be compared with those in older States. The State of Alaska acquired a great deal of todays highways upon Statehood in 1959. Many utility facilities were in existance.

It should matter not whether a facility was constructed prior to, or after July 1, 1960. If the Utility is occupying State Highway R.O.W. under a valid and legal agr-ement between the State and the Utility, and the State decides to perform highway work necessitating relocation, move, or whatever that would be a cost item to the Utility, then it should be the moral and legal responsibility of the State to participate in such cost with the Utility.

Speaking for our own Utilities, we have never failed to cooperate with the State and have had, and hope to continue to have excellent working relationship and cooperation with the Utility section of the State Highway Department.

As we have mentioned to the State before, even when we have had mutual participation in cost, there are times when we had to scrape the bottom of the barrel to raise our share and drop budgeted items to do so. What do you think will happen when the time comes, and it will, when we are told to move or relocate completely at our cost and we do not have the funds??

(c) AS 19.05.130(4) is associated with the costs to a Utility mentioned in item (b) above and we feel also has inequities.

Time does not permit to put in writing all the remarks which could, and perhaps should be made concerning the contents of proposed Senate Bill No. 50 in necessary detail.

I would close this letter with an observation that I would consider germane to the question.

Several years ago the State of Alaska Highway Department initiated meetings with Utilities. These meetings were held in Anchorage, Alaska, and the two meetings I attended seemed very well accepted by the Utilities. The meetings provided the opportunity for the State and Utilities to get to the nitty-gritty of matters and to expound each others problems, viewpoints, and gripes. Had such meetings continued to be held, it is possible that the proposed Senate Bill No. 50 would not have reached you in its present form.

I would strongly urge that you, as chairman, and the community and regional affairs committee, cause such meetings between the State of Alaska Highway Department in general and the Utilities section in particular, and affected Utilities, to be reinstated, if within your scope of authority.

Should you not be familiar with the aforementioned meetings, I would suggest that you or staff contact:

Mr. Charles E. Thompson
Chief Utilities Engineer
Alaska Department of Highways
P. O. Box 589
Douglas, Alaska 99824

who I believe is most knowledgeable on the matter.

I would also bring to your attention the State Highway Department's plan to completely revise the Alaska Administrative code, and most specifically the present Title 17, Chapter 15, Engineering Utility permits. Stated purpose to clear up ambiguities in the present law concerning Utility permits and reimbursements for Utility relocation.

The commissioner, H.D. Scougal, urges the Utilities to submit their written views and ideas as they relate to the regulations and that such written comments be in by January 20, 1977. This means that the Commissioner's staff will review, pass judgment, formulate the regulations, and not have to face up to a single Utility and defend their position.

I again say that true workshop, State-Utility meetings are the best answer. An eyeball to eyeball confrontation is always superior to one way communications in writing for resolving problems and having mutual understandings.

Senator, we thank you for your time and interest and the opportunity to put forth a portion of our views.

Very truly yours,

Donald D. Bowey

Referred: Community & Regional Affairs and Commerce

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 50

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to utilities and state rights-of-way; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.05.130(4) is amended to read:

(4) "cost of change, relocation, or removal" means the entire cost incurred by the utility properly attributed to the change, relocation, or removal of a facility, less any costs for improvements or upgrading over and above the cost of a functionally equal facility; if a facility is to be relocated and replaced with new equipment, there shall also be substracted from the entire cost [UTILITY AFTER DEDUCTING ANY INCREASE IN THE VALUE OF THE NEW FACILITY AND] any salvage value derived from the old facility;

* Sec. 2. AS 19.05.130(12) is amended to read:

(12) "utility" includes railroads and all publicly, privately, or [AND] cooperatively owned lines, facilities and systems for producing, transmitting or distributing communications, telecommunications, power, electricity, light, heat, gas, oil, crude products, water, steam, waste, storm water not connected with highway drainage, and other similar commodities, including publicly owned fire and police signal systems, and street lighting systems [UTILITIES];

* Sec. 3. AS 19.25.010 is amended to read:

Sec. 19.25.010. USE OF RIGHTS-OF-WAY FOR UTILITIES. A utility facility [AN ELECTRIC TRANSMISSION, TELEPHONE, OR TELEGRAPH LINE, POLE LINE, RAILWAY, DITCH, SEWER, WATER, HEAT, OR GAS MAIN, FLUME, OR OTHER

STRUCTURE WHICH BY LAW] may be constructed, placed, or maintained across, [OR] along, over, under or within a state right-of-way [A HIGHWAY BY A PERSON OR POLITICAL SUBDIVISION MAY BE MAINTAINED OR CONTRUCTED] only in accordance with regulations prescribed by the department and [. NO UTILITY PROJECT OF THIS NATURE MAY BE UNDERTAKEN UNTIL IT IS] authorized by a written permit issued by the department.

* Sec. 4. AS 19.25.020 is repealed and re-enacted to read:

Sec. 19.25.020. RELOCATION OF UTILITIES INCIDENT TO HIGHWAY PROJECTS. (a) If, incident to the construction of a highway project, the department determines and orders that a utility facility located across, along, over, under, or within a state right-of-way must be changed, relocated or removed, the utility owning or maintaining the facility shall change, relocate or remove it in accordance with the order. The order shall provide a reasonable time period for compliance.

(b) If the utility facility is not changed, relocated or removed in accordance with the order, the facility becomes an unauthorized encroachment and may be disposed of in accordance with secs. 240 - 250 of this chapter, and the owner of the facility is liable to the state in liquidated damages in the amount of $100 for each day the encroachment exists. In addition, the owner of the facility shall indemnify the state for any amount for which the state may be liable to a contractor by reason of the encroachment.

(c) The cost of change, relocation, or removal necessitated by highway construction is a cost of highway construction to be paid by the state in accordance with AS 19.05.130(4), notwithstanding the terms or provisions of any existing permit, agreement regulation or statute to the contrary.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Dear Mr. Byer:

Thank you so much for sending me background information on the Arctic-Alaska International Conference you are coordinating.

I find the concept of an International Mutual Exchange Conference a very attractive one and I hope that the Office of Public Liaison can be of some assistance to you in this endeavor.

I am forwarding information on the Conference to the Office of Energy Policy and Planning which is headed up by Dr. James Shlesinger, the President's top energy advisor.

I am sure that Dr. Schlesinger will find the Conference of interest. I will be more than happy to help in any way.

With warm personal regards.

Sincerely yours,

Jane Wales

Friend Joe..

I'm sorry it had to come to this but how long can a guy go on and on without any realized goal. After 2yrs, unending work the govm with his ifs andsbuts & don'ts and trying to hassel a measley 25 gs out of you people from one comm. to another everybody telling us how to do it and no one offering any help or means, hell man its time to throw in the towel. Alaska a natural has lost another great opportunity to c me into a leadership role. So thank you for your efforts and all I'm asking that some means is provided for me to recoup the money I spent. That I deserve. As you'll note back in 1966, I had a res. thru so I've been at this dream a long time and if anyone ever deserved a medal for trying but failing I sure as hell ought to get one...

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 21, 1977

The Honorable Chancy Croft
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Croft:

This is in response to your recent inquiry to my office regarding the State's position on the proposed Arctic-Alaska International Conference.

As I am sure you are aware, federal, state, and local governments, have received much correspondence recently from George Byer regarding potential interest to host and bear the cost of this proposal. Upon investigation, there seems to be a singular lack of enthusiasm expressed both at the federal and state level for hosting such an enterprise at this particular time. I want to make it clear I do not oppose the conference; what I do oppose is the state spending such a large amount of money for an Alaskan conference when many questions still remain unanswered regarding who will plan and coordinate the agenda and what are the public purposes which will be addressed by this gathering.

As I am sure you are aware, the State of Alaska is hosting the 1977 Western Governors' Conference, and also the Arctic Research Interest group is conducting a Siberia-Alaska Conference during this year in Alaska. Since there is little interest at the federal level for the Arctic-Alaska International Conference, it is clear that the burden of planning and coordinating this event will fall to the State and place a tremendous additional State expense in both monetary and personnel considerations. It is for this reason that I am not advocating the state host this conference. To express interest in serving as a host for a conference that we feel has an unenthusiastic response at both the state and federal level would be premature. Perhaps at a later date such a gathering could be most appropriately held in Alaska.

Sincerely,

Jay S. Hammond
Governor

NO ANSWER

March 16, 1977

Dear Jay...

President Carter has asked the governors to join the First Lady and him in their plans for a people exchange program. By 1978, he feels most states will be accomplishing this hope for better understanding above and beyond government. Alaska has already assumed this plan with the steady planning since late 1975 for the Arctic-Alaska Conference. Everything is in waiting for your assurance of full support and cooperation.

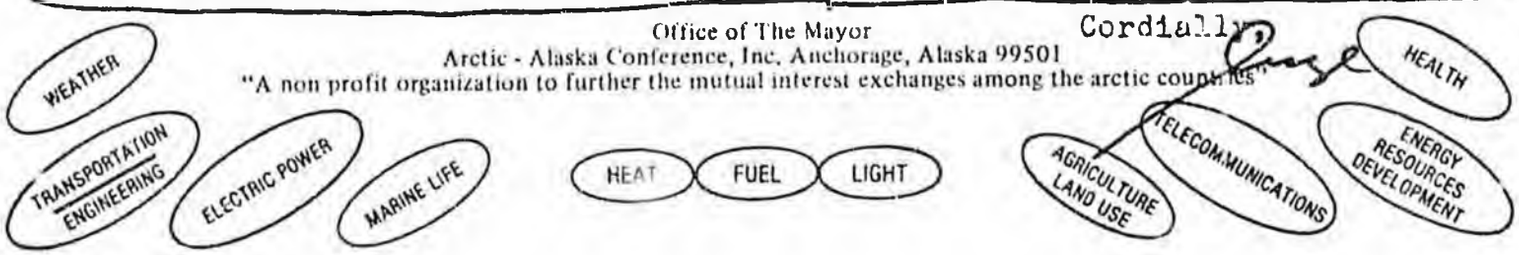
If there were no other interests but the Dept. of Commerce that in itself is ample proof of the great interest and willingness to assist in an "Idea whose time has come"...

But this is but only one of many...RCA, Oil Companies, U. of A Arctic Inst. and on and on and as mentioned the Minister of Finance for Norway who has been invited, could very well give interests and benefits to Alaska that would be worth the25,00 asked by the legislature and many times over.

Jay, we just can't let all this effort, time, work, planning and money (I've spent over $1600 myself)go up in smoke. Too much has been accomplished, too many people committed and far too much valuable work done over two years. So may we ask that you give it top priority assuring the legislature, Mayor Sullivan & Assembly, Mr. Sellin of the S. Dept. and a follow-up on invitations such as Sweden suggested to all Arctic country embassie To assure all possible time for the Exec. Dir. & program coordinator to carry on please give it your very earliest for time is important and assuring the Preside that you as governor of Alaska is fulfillin the people to people presentation.

Cordially,

Office of The Mayor
Arctic - Alaska Conference, Inc. Anchorage, Alaska 99501
"A non profit organization to further the mutual interest exchanges among the arctic countries"



COPY

MARCH 31, 1977

GOVERNOR JAY S. HAMMOND
JUNEAU, ALASKA 99811

ATTENTION: GOVERNOR HAMMOND

In your March 21/77 letter to Senator Croft relative to the States' position on the Arctic-Alaska Conference, you stated,"I do not oppose the conference--what I do oppose is the state spending such a large amount of money------"..

In response to your..."there seems to be a singular lack of enthusiasm expressed both at the federal and state level"... This statement is entirely without foundation and shows a complete lack of informed knowledge. For example, the 1/18/77 letter by the Assist. Secretary for the Dept. of Commerce to Senator Stevens indicates enthusiastic interest in these words..."see the conference as a good forum for discussion and cooperation between participating countries "subjects are of great interest within the department...will be glad to help publicize the conference and furnish advice on request"...

The State Department position is committal with the interest of the governor. Letters of praise and their 76 invitations to the Arctic countries were sent following the states' assured interest in your White House contacts and the wire to President Ford. The states' personnel position is the same, enthused only if the governor shows interest. And since the conf. was acceptable by you last year, your premature statement appears without reason or fact.

If you consider $25,000 as requested in Senator Crofts' bill, a big amount of money, then you have no valued judgement of the merits, interest or benefits which the conf. would create for Alaska. And to say" the event will fall to the state and place a tremendous additional state expense in both monetary and personnel consideration," again shows uninformed awareness. The U. of Ak both from Fairbanks and Anchorage, passed on to you, indicate their interest and support by offering top people to assist as has Norways' Dr. Sollie, Mr. Oelen, Minister of Finance, Dr. Untersteiner of the U. of Wash., Arctic Inst. of N. America, oil cos, RCA, Fed. of Natives, Chambers of Commerce, legislator among others. This offering of assistance indicates no tremendous expense or personnel by the state. All these responding letters you have to observe if any state personnel have been asked to serve other than they would in their regular line of duty. And as for the conferences' "public purposes", one only needs to read the 76 resolution passed,without contest,by Alaskas' Legislature and signed by you as to commitment and its purpose. "Who will plan and coordinate the agenda"... again shows the lack of communicative interest in learning more about the efforts, planning, coordination and direction taken since

the 76 resolution passed both by the state and city of Anchorage and endorsed by President Ford.Money that would be provided by the Croft bill, could then hire an exec. dir. and a program coordinator to follow-up and carry on the accomplishments that have been formulated to include the various people for assistant,committees for needs and functions.

I have kept you informed of all of this by any number of letters and asked that you call to further discuss matters but neither the letters or the calls were ever acknowledged. Your only letter to me dated April 30, 1976 so stated "Find a copy of the telegram I have recently sent President Ford urging action by the State Department in initiating this proposal... Please let us know if we can be of further assistance in this matter"...This assurance is the committal agreement by you to me to go forward with plans and since I have never had any other suggested direction from you, efforts toward the full conference realization became my responsibility as anyone from reading your mentioned letter would assume.

Over the many months since then foreign countries, embassies,diplomats, cabinet levels, federal agencies, legislators, educators as well as the private sector and among others have been contacted or in turn contacted me. A vast variety of interests and need for returned calls and letters which is by any ones' imagination a full time, dedicated and sincere endeavor.

And to allow me to continue on and on without the common courtesy or the expected propriety of a governor on a matter of this magnitude, without first consulting me or advising me of your changed attitude or reason to cancel, is unprecedented in matters as important as a state involving foreign delegates.

Certainly I am entitled to more than to learn second hand by Senator Crofts" letter of your proposed cancellation of the conference which has now placed me in a very embarrassing, humiliated and deformational position and disrespectful of my ability as a conference coordinator in the eyes of others. For of late, a letter to the First Lady with various planning letters to others, are apologies I do not intend to make on your behalf. And add to this no concern for the need to properly carry on, spending my own money, is in denying the conference, is depriving me of an appropriate opportunity to recover my just due me expenses.

This type of inconsiderate attitude toward my long, untiring and dedicated efforts on Alaskas' behalf, is not acceptable and I expect not only a prompt apology but a full repayment of monies spent, by me, on the needs and essentials relative to the conference.

Small and common place thinking has no place in the affairs of men with something as important for Alaska as the Arctic-Alaska Conference, and all matters affecting the others involved should be coordinated accordingly.

Alaska, unique in its Arctic international position, had the rare opportunity, in the noblest of a people to people endeavors, above and beyond any other state, to carry on, in the best tradition, President Carters' request to all the governors to join the First Lady and him in a people exchange program.

And to fulfill a leadership role eagerly anticipated and supported by the Arctic countries for an idea whose time has come and which has been rewardingly received and promised, for a new consensus of cooperation in the Arctic by the acceptance, for its perspective reason and purpose, by all except the Governor of Alaska....

Sincerely,

George H. Byer

Dear Mr. Byer,

Thank you for your kind letter. I appreciate your invitation very much. However, in the beginning of September I shall be busy preparing the National Budget for Norway. I would like to recommend to you my colleage Mr. Per Schreiner, Director General of the Planning Department of the Ministry of Finance. He ought to be well suited for the task. Recently he has been responsible for the preparation of a white paper on the Petroleumactivity in the Norwegian Society, and he is presently preparing the next long term economic program for Norway.

If you are going to contact him, it might be helpful for him to receive some information on travel-arrangements etc.

Sincerely yours

Arne Øien

The Assistant Secretary for Domestic
and International Business
Washington, D.C. 20230

JAN 18 1977

Honorable Ted Stevens
United States Senate
Washington, D.C. 20510

Dear Senator Stevens:

Since receiving your letter of last December 6 regarding an Arctic Alaska International Conference, we have received additional material from Mr. George Byer, the Conference Coordinator. We share Mr. Byer's enthusiasm as to the important position Alaska is attaining in both U.S. and world economic affairs and certainly see the conference as a good forum for discussion and cooperation between participating countries.

I am sorry that we do not have funds to support the endeavor. Provision was not made for it in our current budget and, even so, it does not appear to fit within those areas of activity for which the Department is authorized to provide funding support. (Please do not regard this as a lack of interest on our part.) Many of the discussion subjects under consideration are of great interest to the Office of Energy Programs as well as to other entities within the Department. Specifically, I have in mind the energy and marine topics.

We will be glad to help publicize the conference and furnish advice on request. I wish we could do more.

Sincerely,

L. S. Matthews

Dear George,

The Arctic-Alaska International Conference sounds like a great idea and I'm willing to work for an appropriation.

I wonder if you would work up a more detailed budget of what this money is to be used for. Also, do you intend to be the executive director, or who will continue to carry the ball?

I am enclosing SB 63, and plan to introduce one on the House side.

Cordially,

Clark

Rep. Clark Gruening

Dear George,

Many thanks for sending me the material on the Arctic-Alaska International Conference. It is a marvelous idea and I will certainly support the funding you seek.

Yours,

Lisa

Dear George:

You may recall that in your visit to Anchorage in August we discussed the matter of the Arctic Alaska International Conference and the possible involvement of the Anchorage Chamber of Commerce.

I think the idea of holding such a conference has received wide enthusiastic support and, providing that the schedules and details can be worked out, it would appear that such a meeting would be very successful.

I appreciated the opportunity to meet with you and to have had the opportunity to discuss the matter of the conference with you first hand.

Very truly yours,

Robert L. Hartig, President
Anchorage Chamber of Commerce

Anchorage Daily Times

Box 40, Anchorage, Alaska 99510

Dear George,

Congratulations on your latest step toward getting an Arctic-Alaska conference underway for September, 1977. Your determination and dedication are fantastic.

Yes, I will be glad to supervise the social program connected with such a conference and will get a group of women together who would be interested in helping with such a project.

Wishing you continued success in your efforts, I remain

Very sincerely,

TO: Senator Orsini DATE: Feb. 15, 1977

FROM: Paul Conger RE: SB63

I spoke to Bill Gordon, Governor's Office, to get some feedback regarding SB63.

In essence, Mr. Gordon stated that they are very unenthusiastic about this bill. They feel that the Conference is unique but that there's much work to be done before the conference can be a reality.

He said Mr. Byers wrote their office asking for support and as a courtesy they forwarded it to the State Department. However, on two occasions they have written Mr. Byers requesting that he not use the Governor's Office as an endorser of the Conference on his letterhead.

PC/js

TO: Senator Orsini DATE: Feb. 15, 1977

FROM: Paul Conger RE: SB63

I spoke with Phil Upton of the Arctic Institute of North America regarding SB63. He said that they had been contacted by George Byers and that they had okayed it that Byers could use their name as endorsing the Conference.

Upton mentioned that the Arctic Institute was going to have their own convention with East Siberia and felt this might tie in somehow with Byer's Conference. However, in checking into George's proposed Conference there didn't seem to be much support for it, so they decided to have their conference on their own.

He stated that George's conference seemed to be lacking in organization and there was alot of work to be done if he was ever going to have a conference this summer.

February 17, 1977

George Byer
P. O. Box 445
Hemet, California 92343

Dear George:

Thank you for the letters dated January 26, 1977 and February 9, 1977 indicating the work expended on your part to make the Arctic-Alaska International Conference a reality. You are to be commended for the time devoted in spearheading this Conference.

As Chairman of the Senate Community and Regional Affairs Committee, and in an effort to derive insight into the above referenced bill, I have made contact with the following people to receive input regarding the Arctic-Alaska International Conference:

Theodore Sellins, Polar Affairs Officer, State Department
Governor's Office
Mayor Sullivan's Office, Anchorage
Arctic Institute of North America

The feedback I received was overwhelmingly favorable to the prospect of an Arctic-Alaska Conference to promote relations between Arctic Nations. The theme behind this Conference was well entertained by all those concerned, and there didn't seem to be any dearth of support behind the basic proposal.

However, there do appear to be two concerns: That the spectrum of the Conference is too broad in scope and needs to be reduced to a format more specific in perspective; and, secondly, that the necessary steering committees, on both the pertinent Conference objects and the overall Conference organization, need to be formed. It surprises me that all this effort must be expended so early in the Conference timetable, but apparently that is the way these international Conferences are done.

In an effort to assist in this regard, might I suggest that you contact Senator Croft and attain assistance from his office in analyzing the stature of the Conference. I noticed in your letter, dated January 26, 1977, that you have a number of topics suggested as areas of discussion. Possibly two or three of these topics would be suitable as a theme on which to conduct the Conference.

Senator Croft's office would also, I am sure, be productive as a source in helping you establish and organize criteria for the Conference, suggesting individuals who may be interested in creating steering committees to assist in organizing and delineating the specific objectives of the Conference, and acquiring funds. As sponsor of the bill, he has indicated his interest in the subject, and his experience and scope of statewide contacts would certainly be of benefit in this regard.

When our committee addresses this bill, I am sure the members will be very supportive as to the spirit of the Conference and will anxiously await the opportunity to review the refined product.

Sincerely,

Joe Orsini

Mr. George H. Byer
Alaska Conference Coordinator
Office of the Mayor
Arctic-Alaska Conference, Inc.
Anchorage, Alaska 99501

Dear Mr. Byer:

Secretary Vance has asked me to reply to your letter of March 14, explaining your plans for the proposed Arctic-Alaska International Conference. We certainly agree that the State of Alaska is in a unique position to host a conference of Arctic countries for the purpose of exchanging ideas on pressing regional economic and other issues.

It is indeed gratifying to learn that you and other Alaska state officials share the concern of the Department of State for the need to strengthen patterns of international communication on a person-to-person level. As our world grows increasingly interdependent, it is important to recognize that support for constructive communication and mutual understanding is a universal responsibility. Your Conference would appear to provide an excellent forum for the promotion of cooperation and goodwill among this selected group of international participants.

I would like to take this opportunity to compliment you for the development of this important initiative in Arctic regional affairs, and offer my sincere best wishes for its successful implementation.

Sincerely,

William K. Hitchcock

The Honorable Mayor George Sullivan
Pouch 6-650
Anchorage, Alaska 99502

Dear Mayor Sullivan:

Enclosed is a copy of Senate Bill 63, by Senator Croft, requesting an appropriation to the Municipality of Anchorage of the Arctic-Alaska International Conference. While not a large sum of money, comparatively, those legislators who feel that "Anchorage gets everything" will undoubtedly challenge its appropriation, or worse yet, want special appropriations for their own communities.

In this regard, several questions should be answered:

1. What kind of organizational and manpower support will the Municipality of Anchorage give this proposal?

2. Specifically, what would the Municipality of Anchorage use this money for, if appropriated?

3. Will the Municipality of Anchorage provide any cash match?

These are not questions that can be answered in the perfunctory manner, but ones I am certain we will be asked as we support the bill. It is probably necessary, therefore, that we receive answers on these questions prior to taking action on the bill.

Sincerely,

Joe Orsini

Hi, Joe. How's your little girl?
Y

Municipality of Anchorage

MEMORANDUM

DATE: February 3, 1977

TO: George Byers

FROM: Mayor Sullivan

SUBJECT: Artic-Alaska National Conference, Inc.

Chancy Croft just introduced a Bill in the Senate for contributing $25,000 to the Municipality of Anchorage for the Artic-Alaska National Conference, Inc.

I have been led to believe though that the State may not wish to get involved in this conference. As I have told you before without the State sponsorship, I certainly don't intend to try to take it on for the Muncipality. It would be a complete flop. Additionally, we would not hear from nations, national leaders, international leaders or others on the basis of a Mayor or a single Municipality trying to put on such a conference.

Doug Weiford also contacted me in regards to a request for you for advance funding for travel. George, I am prohibited by every ordinance and regulation in the Municipality from doing such a thing and I have so advised Doug.

The key in my opinion still rests with the State government and official endorsement and official invitation coming from the Governor of Alaska. Until I hear something positive from that end, I am afraid I cannot do much more from here. I know this may sound a little discouraging to you, but I am sorry that I don't feel I am in the position to do anything differently.

Most Sincerely,

George M. Sullivan
Mayor

Senator Gravel
Representative Young

91 010 (4/76)

Office of the Gov

February 9, 1977

Mr. George Dyer
Box 445
Hemet, California 92343

Dear Mr. Dyer:

This is in reply to your letter of December 30, 1976.

Please be advised that with an additional year to study the merits of an Arctic Countries Mutual Interest Exchange Conference as being promoted by you, it is the decision of this office not to request funding for the conference through the State Legislature.

Likewise, in discussing the prospects for the conference with local and federal officials, they have indicated to me they do not plan to actively promote the conference. And, officials of the U. S. Department of State have expressed serious misgivings for the conference from the information available to them.

Mr. Dyer, I am well aware that you received statements last year expressing initial interest in the conference. However, I feel certain that prospective State involvement has been exaggerated, and I regret any communication that may have misled you to feel the State would support the formation of this conference. I also appreciate your enthusiasm, your devoted efforts and your good intentions. However, with the current financial situation of the State and the fiscal restraints the Governor has found necessary to impose, we cannot in good conscience support this conference. Since you are not physically residing in Alaska and therefore may not be completely familiar with the current State financial situation, I am enclosing a copy of the Governor's budget message to the Legislature for you.

I have a copy of a letter to you of July 19 from the Governor's Office and I am perplexed that after receiving that letter you would again have stationery printed listing the Governor as an international host without permission to do so. In addition, the Tenth State Legislature has convened and elected its officers; John Rader is now President of the Senate and Hugh Malone is the current Speaker of the House.

In order to touch all bases at once I want to tell you that it is my opinion that the Arctic Institute of North America, with its staff of experienced personnel, is in a much better position to coordinate an Arctic Countries Mutual Interest Exchange Conference. It is my understanding the Institute is planning for such a conference with Siberia. You may wish to offer your voluntary services to the Institute.

In closing I hope this letter has finally made clear the State's feelings in this matter; and that there will be no further misunderstandings about our position.

Sincerely,

Bill Gordon
Executive Assistant
to the Governor

BG/CM/ll/tdg

TO: Senator Orsini DATE: Feb. 7. 1977

FROM: Paul Conger RE: Artic-Alaska International Conference (SB63)

lack of organization

Today I spoke with Theodore Sellin, Polar Affairs Officer, State Department, Washington D.C., 101-202-632-8997. Since the proposed conference is of an international flavor, I inquired from Mr. Sellin the State Department's position regarding the above referenced conference. Mr. Sellin submitted the following. He informed me that he had been contacted by Mr. George Byers requesting federal funds for this undertaking, but since this was a "non-governmental" conference per se, despite the language incorporated into the material that has been distributed by Mr. Byer, no funds could be provided.

Mr. Sellin stated that the idea behind Mr. Byer's proposed conference was an attractive possibility, however, at this time he felt the proposal lacked sufficient preparation and organization, particularly for a projected conference of this magnitude. He commented that he had an opportunity to meet with Mr. Byer and suggested that Mr. Byer postpone the conference (it was originally scheduled to take place during the Bi-Centennial) permitting Byer to narrow the scope of the conference, because as it stood it was too broad in its makeup.

Mr. Byer commented that the approach taken by Mr. Byer in setting up this conference, is somewhat reverse of the method generally employed. Generally, extensive planning and organizing is conducted, at the same time acquiring funds for your conference. Once this is prepared, then the foreign ministries are approached soliciting their attendance at the conference, providing them with an itemized agenda depicting the events of the conference. Conversely, in this case, the countries were notified of the conference, and subsequent to that there was an attempt to acquire needed funds for the conference.

He suggested, because the idea behind the conference was good, that Mr. Byer should postpone the conference, permitting hime time to reduce the perspective of the conference, establish an organizational criteria for the conference, create a steering committee to assist in organizing and delineating the specific objectives of the conference, acquire the funds, and then when he has a finished product, approach the respective government bodies for support and endorsement.

Mr. Sellin commented that once this product was presented, and it was determined that there was enthusiasm behind this conference, then the State Department would consider extending invitations through our Embassies to the concerned foreign ministries to transmit to the interested parties.

PC/js

Joe —

I don't know how much of the enclosed I've sent you before now that the entire is so big, I can't keep up and see the true reason for the need of an experienced program Coordinator

Pres. Carter has asked the Governors to help the cause and it's almost like saying Alaska is already doing something about it—

So how best can you move things along and give us the support we need!

Love

Rosalynn Carter's Ambitious Plan for World Peace

By TOM SMITH

Rosalynn Carter, America's new First Lady, is busily laying the groundwork for an ambitious plan to promote world peace — a people-to-people exchange between the U.S. and other nations around the world.

Under this program, dubbed "Friendship Force," which is still in the early, formative stage, planeloads of people, ordinary citizens from every state in the union, would be shuttled to "sister states" around the globe.

These grass-roots goodwill ambassadors would then invite people from the other countries to pay a return visit to their homes in America.

Friends of Rosalynn say she's "very excited" by the prospect of bringing people of the world closer together through these no-red-tape exchanges — and they say President Jimmy Carter is solidly behind her plan.

Mrs. Carter has already held one meeting with the man who helped her organize a similar exchange program between the people of Georgia and their sister state in Brazil, Pernambuco, while Carter was governor.

"She and I have agreed we will work on this together," said the Rev. Wayne Smith of Decatur, Ga., who met with Mrs. Carter in September to discuss the Friendship Force program. "She is very interested in helping to promote world peace.

"She thought that these citizen exchanges might be a way — something without government involvement, but with its approval and encouragement.

NEW FIRST LADY Rosalynn Carter foresees planeloads of grass-roots ambassadors from the U.S.

It's not yet known who will pay for the Friendship Force, or how much it will cost. The visits between the people of Georgia and Brazil were paid for by those involved.

In Washington, Rosalynn's transition staff says the Friendship Force plan is one of her top three priorities.

"It's an idea that she is very interested in and wants to pursue as First Lady," said Kathy Cade, 29, transition projects coordinator. "She has said it is something she really wants to do."

A longtime close friend of the Carter family, John Pope, 56, of Americus, said Rosalynn had discussed her Friendship Force program with him and his wife in November.

"She said she was anxious to get it going internationally, and got very excited talking about it," Pope said. "I think it's her baby, but Jimmy is right behind it and very much in favor of it.

"I am sure you will find that she is going to play a bigger part in trying to achieve things on an international level than any other First Lady," Pope added.

"AN IDEA WHOSE TIME HAS ARRIVED"...

PRESIDENT CARTER HAS ASKED THE NATION'S GOVERNORS TO JOIN HIM IN A PEOPLE TO PEOPLE EXCHANGE PROGRAM. BY 1978, HE ANTICIPATES MOST OF THE 50 STATES WILL BE PARTICIPATING, ABOVE AND BEYOND GOVERNMENT, IN HELPING TO PROMOTE COMMON UNDERSTANDING. ALASKA, UNIQUE IN ITS WORLD LOCATION, HAS ALREADY ASSUMED THIS ROLE BY COMPLYING WITH THE ARCTIC ALASKA CONFERENCE FOR 77.

CARTER PROPOSES VISITOR EXCHANGE

WASHINGTON (AP)—President Carter asked the nation's governors Tuesday night to join him in creating a volunteer exchange program that would send Americans abroad and bring foreign citizens to the United States to promote common understanding.

"I think this is the kind of thing we can do that's a little above and beyond government, kind of nice, that perhaps you can help us with," he said at a White House dinner for the governors.

Carter said that as governor of Georgia, he and his wife, Rosalynn, worked on an exchange with a sister state in Brazil that led about 200 persons from each state to trade visits.

"We're going to try to do this on a nationwide basis," he said. The White House issued a statement dubbing the new project the "Friendship Force." It estimated that trips under the program would cost $300 to $400 a person for 10 days.

A staff for the project is being assembled and is to be based in Atlanta. The statement said Carter anticipated six or more exchanges this year, beginning May 4. By the end of 1978, the project envisions six or eight trips a year from most of the 50 states.

"Perhaps our own state this first year would like to take just one airplane, and we've asked the State Department to give us advice, and we would like to have maybe a couple hundred folks go from, say, Idaho, to perhaps Morocco, and let 200 Moroccans come back," Carter said.

"There won't be any public funds involved at the state or federal level and we're going to try to join in and raise enough money in private places to finance these trips."

Mrs. Carter has also written to the Partners of the Americas organization, which conducts similar people exchanges among Latin-American countries, asking for help in launching the Friendship Force, according to David Luria, associate director of the Partners organization.

Luria, who's based in Washington, D.C., told The ENQUIRER: "The Carters first got involved in the exchange program when Jimmy, as governor of Georgia, was honorary president for the Partners organization in Georgia. He and Rosalynn took deep interest in the Brazilian-Georgian partnership, both officially and unofficially."

MR. OEIEN, DIRECTOR OF ECONOMIC POLICY PLANNING, FINANCE MINISTRY, NORWAY

Booming Norway May Top Growth of All OECD States

CONFERENCE
MR. Oeien HAS BEEN INVITED!

BY DON COOK
Times Staff Writer

OSLO—While most countries of the industrial world are still teetering between recession and uncertain recovery, the oil-fired economic boom in Norway continues to run on a full head of steam.

After chalking up a 6% growth in gross domestic product during 1976, Norwegian authorities now are confidently forecasting that the country will continue to surge ahead in 1977 with a growth-rate of between 7% and 8%.

If they hit this figure, and there seems no reason why they cannot, the Norwegians probably will wind up the year with the highest growth rate of all 23 states belonging to the Organation for Economic Cooperation & Development, the major non-Communist industrial producers. They will be outstripping their Scandinavian neighbors.

Sweden is only targeting 2.25% growth this year, and Denmark expects only 1.75%.

During 1975, Norway, with a population of barely 4 million, passed the United States in per capita national income. With a continued upsurge in 1976 and 1977 the country may well end up this year as the wealthiest nation in the OECD on a per capita basis.

Moreover, although oil in the North Sea is giving Norway the margin which is pushing its growth rate from "solid" to "spectacular," even without oil the picture would still be healthy. Of the 7% to 8% rise forecast for 1977, well over half, an estimated 4.5% of this growth, will be in manufacturing, mining, construction and traditional economic activities. Around 3.5% will be in oil.

The gushing North Sea produced oil exports for Norway which totalled around $700 million in 1975, rose to $1.4 billion in 1976, and are figured to hit around $3 billion during 1977. Still, offshore oil activities accounted for only 3.1% of Norway's gross domestic product last year, and this figure is expected to rise to a mere 4.6% in 1976. Oil and all its related activities, in other words, are still only a small part of Norway's booming economy.

"Our main difficulty right now lies in our very high industrial wage rates," says Arne Oeien, director of economic policy planning at the Ministry of Finance. "We now have the highest wage rate per unit of production in the world except for Sweden, higher even than the United States. In shipbuilding, for example, our wage-rates are almost double those of Japan which, of course, is one of the reasons why our shipbuilding industry is now going into a slump, perhaps

It appears that Mr. Oeien should have plenty to say at the conferenc about Norway's oil-fired growth rate, its per capita national income greater than U.S. and its well below I% unemployment.
If for this alone, besides his economic planning and the N. Sea oil, could very well be worth, in interest and benefit to Alaska, the $25,000 asked of the legislature for the conference and many times over. For no country can come up with these kind of figures without some use and value worth listening too. And by reaching out the Arctic Conference becomes a consensus of exchangeable ideas and mutual suggestions that could have far reaching results,...

Booming Norway May Top Growth of All OECD States

Continued from 9th Page

even a permanent drop to smaller activity.

"We are anticipating in the coming years that about 10,000 workers will be moving out of our shipping and shipbuilding industries into other employment, either industrial or in our service industries which are growing."

Oeien said government planners believe that the key to the future lies in holding industrial wages close to present levels through trade union restraint in the next two years. Then, if the other industrial nations allow their wages to go on rising, Norway's competitive position will continue to be strong, which is critical since 40% of the Norwegian economy is export-based.

In addition to readjustments in shipping and shipbuilding, Oeien said there probably would be some cutbacks in the coming year in the textile and local clothing industry. High domestic costs are making it difficult for these industries to compete with cheaper imported products.

Despite these troubles, unemployment in Norway is now well below 1%, and the shifting of some 10,000 to 15,000 workers to different jobs is not regarded as a large social or economic problem.

"Our basic problems," says Oeien, "is to avoid getting in a situation of stagflation, such as Sweden, Denmark, Britain and other countries are going through—stagnation of growth coupled with continued inflation. We believe that we will be able to hold our inflation rate in 1977 down to 8%, which would put us under the OECD's probable average."

To keep its boom going while everybody else has fallen into recession, Norway has been borrowing heavily and deliberately overseas. The borrowing has been necessary to finance the heavy capital development requirements of North Sea oil, and because of the slump in world shipping which drove so many profitable Norwegian companies into the red. But the country is now carrying the heaviest overseas debt in OECD, measured on a per capita basis—well above $10 billion. Of this, approximately $5 billion is owed by the oil industry, and about $3.5 billion by the shipping industry.

But the pay-off of these borrowings will begin in earnest during 1977. With $3 billion a year this year in oil exports from the North Sea, and output rising steadily, Norway is a pretty good credit risk.

Dear Mr. Eyer:

Thank you very much for your letter of December 30, 1976, regarding the Arctic-Alaska International Conference, which was waiting for me when I returned from vacation.

Your renewed invitation to participate in this conference has been forwarded to the Swedish Ministry for Foreign Affairs in Stockholm and I will let you know of their reaction in due course.

Yours sincerely,

Eva Dieden

Eva Dieden
Press Assistant

SWEDISH EMBASSY

George H. Byer
P. O. Box 445
Hemet, California 92343

Dear Mr. Byer:

I am awfully sorry that we - by mistake - have not answered your letter to the Ambassador dated November 28th.

./. The Swedish participation in the U.S. Bicentennial celebrations includes various activities as you can see on the list of Swedish plans for the American Bicentennial year which is enclosed. The activities are to a large extent concentrated on Swedish-American relations None of them, however, deals with issues which are of mutual interest to arctic countries.

As we think that your idea of a meeting in Alaska is very interesting, we are looking forward to an invitation from the State of Alaska, and we would do our best to promote Swedish participation.

Yours sincerely,

Ove Svensson
Cultural Attaché

Dear Mr. Byer:

The University will assist in all possible ways in the planned symposium of September, 1977, so long as we know, well in advance, the specific intent and topics of your conference.

I have referred your letter to Dr. Hunsucker and Mr. Siegrist. You may also be interested in the Annual Report of the Geophysical Institute for 1974-75, a copy of which is enclosed.

Concerning the research of the University, the best persons to contact would be the directors of units, as follows:

Geophysical Institute	T. Neil Davis, Acting Director
Institute of Marine Science	John J. Goering, Acting Director
Institute of Water Resources	Robert F. Carlson, Director
Agricultural Experiment Station	James Drew, Director
Institute of Arctic Biology	George C. West, Acting Director
Institute of Social and Economic Research	E. Lee Gorsuch, Director
Center for Northern Educational Research	Frank Darnell, Director
Sea Grant Program	Donald H. Rosenberg, Director
Arctic Environmental Information and Data Center	David M. Hickok, Director
The Biome Center	George C. West, Director
Alaska Cooperative Wildlife Research Unit	David R. Klein, Leader
Mineral Industry Research Laboratory	Earl H. Beistline, Director
Forest Soils Laboratory	Keith Van Cleve, Director
WAMI Program	Wayne W. Myers, Director
Naval Arctic Research Laboratory	Gary A. Laursen, Acting Director

Conference, Inc.
Box 445
Hemet, California 92343

Senator John L. Rader

Dear George:

It was sure good to hear from you and know that you are actively pursuing the Conference. As you may have heard, our winter has been one of the mildest ever. I'm sure carrying the mail would be a bit easier than some of the winters in the past!

Senator Chancy Croft has introduced a bill (enclosed) that would appropriate money for the conference. The bill is presently in the Community and Regional Affairs Committee, chaired by Senator Orsini. The Finance Committee will then have an opportunity to review it. John Sackett is Chairman of Finance.

Rest assured, George, that I will keep my eye on the bill as it moves along.

Thank you for your kind thoughts and encouragement.

Sincerely,

John L. Rader, President
Alaska State Senate

Dear George:

Thank you for the letters dated January 26, 1977 and February 9, 1977 indicating the work expended on your part to make the Arctic-Alaska International Conference a reality. You are to be commended for the time devoted in spearheading this Conference.

As Chairman of the Senate Community and Regional Affairs Committee, and in an effort to derive insight into the above referenced bill, I have made contact with the following people to receive input regarding the Arctic-Alaska International Conference:

Theodore Sellins, Polar Affairs Officer, State Department
Governor's Office
Mayor Sullivan's Office, Anchorage
Arctic Institute of North America

The feedback I received was overwhelmingly favorable to the prospect of an Arctic-Alaska Conference to promote relations between Arctic Nations. The theme behind this Conference was well entertained by all those concerned, and there didn't seem to be any dearth of support behind the basic proposal

Dear George:

Have heard very little since your first letter regarding the Arctic-Alaska International Conference. It sounds like it would be most interesting and I'd like to take part in it.

Could you give me some more information?

Sincerely,

Clem

Clem Tillion
State Senate

Dear Mayor:

Thank you for your letter concerning the Arctic-Alaska International Conference.

Be assured that I will do what I can to promote support.

Sincerely,

Tim

Dear Mr. Byer:

Thank you for your February 11, 1977 letter in regards to the Arctic - Alaska International Conference.

I certainly will help.

Very truly yours,

Mike Beirne /p

Dr. Mike Beirne
State Representative

Dear George,

The Arctic-Alaska International Conference sounds like a great idea and I'm willing to work for an appropriation.

I wonder if you would work up a more detailed budget of what this money is to be used for. Also, do you intend to be the executive director, or who will continue to carry the ball?

I am enclosing SB 63, and plan to introduce one on the House side.

Cordially,

Clark

Rep. Clark Gruening

Dear George,

Many thanks for sending me the material on the Arctic-Alaska International Conference. It is a marvelous idea and I will certainly support the funding you seek.

Yours,

Lisa

MEMBERS of THE TENTH ALASKA STATE LEGISLATURE

Joe - we need your help - action important to us!

If the enclosed from Mayor Sullivan is true and let us assume that (it is not) for I have never and I repeat never had any indication from Governor Hammond other than the enclosed as copies expressing his good-will, cooperation and go ahead.

No one knowingly, over the months, would continue to spend all the time, endless effort and money to promote this very worthy event for Alaska if the governor had ever expressed his dislike or opposition too it. After it was canceled in 76 due to requests for more time to prepare, no word, letter or call was ever received by me, the mayor or anyone, by the governor, opposing the conference or discontinuation of it or the final for achieving it.

So naturally we have taken him at his original word as you or anyone would and we have continued to do all the many things it takes to prepare such an important international program.

Since the Arctic countries are most interested and look to Alaska as a leader as they seek some of the answers to the social, economic and environmental problems of the Arctic, the conference has assumed an even greater importance to them. Requests by Sweden and embassies are waiting for the official invitation from Alaska and have asked why it is not forthcoming.

Ford Adm. State Dept. Senators, Congressmen, Alaska Legislators, Foreigners of the Arctic, diplomats, businesses, colleges, schools & many others have congratulated and offered support. Why! They say the time is right for Alaska to assume its rightful place as a leader in the exchange of ordinary people to people. The program has gone to far now to not move on in commitments, interest and accomplishments, such as Texaco & ARCO on energy; RCA, CBS. NBC-Communications, medical specialists-health but a few besides working Comms., U. of Alaska-programing help, chambers, Fed. of Natives etc Two yrs. of dedicated work, unselfishly given by all so would I or you put our duty honor into a wasted effort & embarrassing position now by inviting the President of U.S. and write the first Lady on her people to people plan hopeful of bringing it into being with the conf. if we knew the governor had any opposition whatever and giving me in writing his assurance..."Please let us know if we can be of any further assistance in this matter"...Words of encouragement and words of support. The program deserves the cooperation & support of the governor & legislature just as the 76 resolution did and signed by the governor, giving Alaska the recognition it deserves, with this plan.

Municipality of Anchorage

MEMORANDUM

DATE: February 3, 1977

TO: George Byers

FROM: Mayor Sullivan

SUBJECT: Artic-Alaska National Conference, Inc.

Chancy Croft just introduced a Bill in the Senate for contributing $25,000 to the Municipality of Anchorage for the Artic-Alaska National Conference, Inc.

I have been led to believe though that the State may not wish to get involved in this conference. As I have told you before without the State sponsorship, I certainly don't intend to try to take it on for the Muncipality. It would be a complete flop. Additionally, we would not hear from nations, national leaders, international leaders or others on the basis of a Mayor or a single Municipality trying to put on such a conference.

Doug Weiford also contacted me in regards to a request for you for advance funding for travel. George, I am prohibited by every ordinance and regulation in the Municipality from doing such a thing and I have so advised Doug.

The key in my opinion still rests with the State government and official endorsement and official invitation coming from the Governor or Alaska. Until I hear something positive from that end, I am afraid I cannot do much more from here. I know this may sound a little discouraging to you, but I am sorry that I don't feel I am in the position to do anything differently.

Most Sincerely,

George

December 15, 1976

Mr. George H. Byer
Arctic-Alaska Conference, Inc.
Box 445
Hemet, California 92343

Dear Mr. Byer:

Thank you very much for your letter of November 22, 1976 to Dr. Rutford. He will be in Antarctica for the next several weeks and has asked me to reply to you in his absence.

We would be pleased to publicize the Arctic-Alaska International Conference in our publication Arctic Bulletin. The Arctic Bulletin is published for the U.S. Interagency Arctic Research Coordinating Committee by the National Science Foundation. We have a circulation of about 1800 to government officials, researchers in industry and universities, libraries, and other institutions. Just send your desired information release to Captain Jerry Stringer, Editor, Arctic Bulletin, Division of Polar Programs, NSF, Washington, D.C. 20550.

THESE OUTLETS HAVE BEEN NOTIFIED

Another possible vehicle for publicizing your conference is the journal Arctic, published by the Arctic Institute of North America. The address of the Editorial Office is 1020 Pine Avenue, W. Montreal, Quebec, Canada H3A 1A2.

I cannot speak for Dr. Rutford at this time concerning his participation in the conference. May I suggest that you call him sometime this spring to determine if his schedule would permit him to attend the conference in Anchorage.

Regarding your request for names of people to lead the open forums, the following names come to mind. If these individuals are unable to participate, I am sure that they will be able to suggest additional names:

Marine Life - Donald Hood, University of Alaska
Health - Philip Chen, National Institutes of Health, Department of Health, Education and Welfare
Agriculture - James Drew, University of Alaska
Fuel, Oil and Energy - George Gryc, U.S. Geological Survey, Menlo Park, California
Weather and Atmospheric Sciences - Bernhard Haurwitz, Colorado State University, Fort Collins, Colorado
Transportation - Charles Bates, U.S. Coast Guard
Earth Sciences - George Gryc, U.S. Geological Survey

Best wishes for a successful conference.

Sincerely yours,

Charles E. Myers

Charles E. Myers

DEPARTMENT OF STATE

Washington, D.C. 20520

1976

Dear Mr. Byer:

Your interest in furthering cultural exchange among the peoples of the Northern Hemisphere is indeed a constructive and worthwhile idea especially in this important year of our Nation's Bicentennial. As a center for your proposed program, Anchorage is obviously a city for which you feel much pride and in which you envision much promise for the future.

Mr. Robinson joins me in hoping that the promising beginnings which you have described will lead to a successful program that the people of Alaska and of neighboring countries can enjoy and from which they can benefit.

Sincerely,

John E. Reinhardt

John E. Reinhardt
Assistant Secretary
for Public Affairs

Robert J. McCloskey, Assistant Secretary
Congressional Relations
Department of State
Washington, D. C. 20520

Dear Mr. McCloskey:

To reiterate, Mr. Charles Robinson, Undersecretary of State for Economic Affairs, based his reasoning on this evaluation when at the global economic talks that convened in Paris this December 16th past "The United States views this preparatory conference as an essential step in search for a new global consensus based on cooperation. We accept the reality of economic interdependence and recognize that what diminishes the economic success of the developing nations, diminishes our own"...

In the birthday year of America, the State Department has, by experience from the global economic conference in Paris, the knowledge, functional facts and learned results to share some of these essential and to reshape some of the major importances a;;licable to the Arctic Conference. The findings of the Commission on Raw Materials and Industrial Development are of worthy economic value in furthering the prospects of the Arctic nations.

For it is better to have dreams such as Thomas Jefferson, Abe Lincoln and Martin Luther King, Jr did ----dreams of a better tomorrow. And perhaps the best we as Americans can do in our Bicentennial year is to dream of what we want to be able to celebrate five or ten years from now and to dedicate ourselves to fulfilling the necessary steps. By taking the initiative in Alaska, we are extending the horizon both at home and abroad.

Respectfully,

George H. Byer

George H. Byer

Dear Pat..

I'll answer your 24th letter by saying and its steering types of committees and not of the state process..."If you want a good idea killed, give it to a committee"..I'll go a step more by saying if you want something snafued, red-taped, bungled just give it to a fed. agency like the S. Dept. It is no wonder The First Lady said in her people to people exchange..."Something without government involvement but with its approval and encouragement. This we have from the S. Dept, Dept of Commerce etc. We had to do a little jaw-boning last yr. with a couple egotists in the S. Dept. but once we got them squared around no more problems. They are the greatest for thinking no one can do anything relative to foreign people but them. This is from the S. Dept.."Alaska is at liberty to sponsor an international conference on the subjects it proposes, on a scale it desires and at a time of its choosing"..."The Dept. would be prepared to transmit through its facilities abroad any invitations by the S. of Ak to intended participants in such a conference as Ak. decides to hold".."That's all very simple...They have nothing to do with iteneraries, steering comms, etc. You mentioned steering comms. What are they going to steer? After 2yrs of steady work, its all been done, contacts made etc. just waiting for the legislature to give us means and the governor to give his full support & cooperation. Pat, we don't need a lot of people telling us now to do it. We know how and I for one had I not felt like I knew how or what or when - do you think I'd assume such a responsibility. Ideas & suggestions are greatbut let us do the job we have worked 2yrs putting together.I've said this over & over for all we need are two top people...One an exec. dir. and this the best of experience etc. and a program coordinator and you'd be surprised how fast this can get into high gear and shape up. Why? because the work has been going on for 2 yrs.It is now merely to pull it together. No big deal. People who don't know has been my learning try to make things complicated, Big things are easy, its the little stuff that's hard. What we need in Juneau are champions who aren't afraid and are willing to be persittentto get up on the floor in the House & Senate and speak up for the Conf. and for an idea whose time has come and to give us who has labored, stayed with it, done the work over the 2yrs full support and let us do the job. We gladly accept the responsibility & we know what has to be done & how to do it but get too many cooks and what happens to the broth.In brief, the governor's full support & cooperation, the means, and you will be surprised what can shape up with 2 yrs. of work behind it.

Rosalynn Carter's Ambitious Plan for World Peace

By TOM SMITH

Rosalynn Carter, America's new First Lady, is busily laying the groundwork for an ambitious plan to promote world peace — a people-to-people exchange between the U.S. and other nations around the world.

Under this program, dubbed "Friendship Force," which is still in the early, formative stage, planeloads of people, ordinary citizens from every state in the union, would be shuttled to "sister states" around the globe.

These grass-roots goodwill ambassadors would then invite people from the other countries to pay a return visit to their homes in America.

Friends of Rosalynn say she's "very excited" by the prospect of bringing people of the world closer together through these people-to-people exchanges — and they say President Jimmy Carter is solidly behind her plan.

Mrs. Carter has already held one meeting with the man who helped her organize a similar exchange program between the people of Georgia and their sister state in Brazil, Pernambuco, while Carter was governor.

"She and I have agreed we will work on this together," said the Rev. Wayne Smith of Decatur, Ga., who met with Mrs. Carter in September to discuss the Friendship Force program. "She is very interested in helping to promote world peace.

"She thought that these citizen exchanges might be a way — something without govern-

NEW FIRST LADY Rosalynn Carter foresees planeloads of grass-roots ambassadors from the U.S.

ment involvement, but with its approval and encouragement."

It's not yet known who will pay for the Friendship Force, or how much it will cost. The visits between the people of Georgia and Brazil were paid for by those involved.

In Washington, Rosalynn's transition staff says the Friendship Force plan is one of her top three priorities.

"It's an idea that she is very interested in and wants to pursue as First Lady," said Kathy Cade, 29, transition projects coordinator. "She has said it is something she really wants to do."

Mrs. Carter has also written to the Partners of the Americas organization, which conducts similar people exchanges among Latin-American countries, asking for help in launching the Friendship Force, according to David Luria, associate director of the Partners organization.

Luria, who's based in Washington, D.C., told The ENQUIRER: "The Carters first got involved in the exchange program when Jimmy, as governor of Georgia, was honorary president for the Partners organization in Georgia. He and Rosalynn took deep interest in the Brazilian-Georgian partnership, both officially and unofficially."

A longtime close friend of the Carter family, John Pope, 56, of Americus, said Rosalynn had discussed her Friendship Force program with him and his wife in November.

"She said she was anxious to get it going internationally, and got very excited talking about it," Pope said. "I think it's her baby, but Jimmy is right behind it and very much in favor of it.

"I am sure you will find that she is going to play a bigger part in trying to achieve things on an international level than any other First Lady," Pope added.

Dear Mrs. Carter...

In prayer Sunday past, I asked that a new meaning and purpose be given the international conference for 77. Then today, almost like a revelation, I read of your "Friendship Force" and the people-to-people exchange.

It is of the same philosophy as the no-red-tape people to people presentation. This has been an Arctic dream of mine ever since the over-the-pole flights began, with a stop in Anchorage between Europe and the Far East, bringing ordinary people to Alaska from the arctic countries to join in a mutual exchange of ideas and suggestions that are common to all. A plan, by Alaskans, without government involvement but with its approval and encouragement.

So I can get excited about the many potentials and benefits of the "Friendship Force" and what an appropriate opportunity to incorporate it into the international program for 77 and bring your dream into reality.

I have already written Mr. Powell in Plains and Mr. Watson in D.C. hopeful of getting the President to Alaska, tour the energy field, pipe line and give international importance to Alaska's people-to-people program. And I wrote..."Jimmy will be one of the "greats"...Alaska will be one of the "greats" and they ought to meet. The First Lady is "great" also for her vision andplans for a better tomorrow. It would be a fulfilling realization, in the fall of 77, to all join in a common bond of dedication for what"the interest in others program" can do for the betterment cause.

Your visionary plans and the willingness to go forth with it has renewed my spirit. But like all worthwhile endeavors, it can use some added interest and encouragement for vision is not always understood nor is it something people are easily enthused about. After 25 years in Alaska as city councilman, borough assemblyman, mayor and candidate for governor, my roots are deep, my interest and efforts for this international purpose anxiously given as coordinator.

Plans for coming to D.C. are being coordinated and should your busy schedule permit a few moments in the common hope of international peace through the exchange of people, I would be delighted.

Respectfully...

Office of The Mayor
Arctic - Alaska Conference, Inc. Anchorage, Alaska 99501

The Arctic-Alaska International Conference sounds like a great idea and I'm willing to work for an appropriation.

I wonder if you would work up a more detailed budget of what this money is to be used for. Also, do you intend to be the executive director, or who will continue to carry the ball?

I am enclosing SB 63, and plan to introduce one on the House side.

George H. Byer

April 26, 1976

Note

NOTE... THE SUBJECTS HAVE BEEN REDUCED TO THE TOP PREFERENCE INTEREST OF ENERGY, THE MARINE LIFE & HEALTH. THE REST AS OUTLINED IN THE 76 RESOLUTION WILL BE CHOICES FOR OPEN ROUND TABLE DISCUSSIONS BUT THE TOP THEME OF ENERGY WILL HAVE THE BIGGEST & MOST PRODUCTIVE SPEAKERS, SEMINARS ETC.

Mr. George Byer
Post Office Box 445
Hemet
California 92343

Dear Mr. Byer:

I have been asked to reply to your letter of April 5 to Assistant Secretary Robert J. McCloskey regarding an Arctic Country Mutual Interest Exchange Conference in 1976 proposed in Joint Resolution 51 recently passed by the Alaska State Legislature.

The Assistant Secretary's letter of March 15 to Senator Stevens, a copy of which you have, conveys the considered opinion of the Department on the feasibility of a conference such as that described in the Resolution. Your letter of April 5 suggests a much more modest international gathering of a planning nature. A preparatory meeting that would deal with the realities of such a demanding and complicated undertaking as that outlined in the Resolution would seem to be an essential early step.

A

The State of Alaska is, of course, at liberty to sponsor an international conference on the subjects it proposes, on a scale it desires, and at a time of its choosing. For our part, it would be virtually impossible to do more than offer advice and encouragement. Given the nature of the federal budget cycle, and the obligations already incurred, possible funding by the Department of State for an Arctic Country Mutual Interest Exchange Conference could not have been anticipated for this or the next fiscal year. However, the Department would be prepared to transmit through its facilities abroad any invitations by the State of Alaska to intended participants in such a conference as Alaska decides to hold.

Sincerely,

Theodore Sellin

Dear George:

Thanks for your letter of February 8. I'm enclosing for your information a brochure on the Institute of Social and Economic Research. The various projects we are engaged in are generally described under the brochure and on the last two pages the institute's personnel and their training and interests are also listed. The various professional staff would potentially be available to participate in the conference, depending upon their individual work schedules and other commitments. Therefore, as the conference planning progresses and you identify topics for which you feel some of our professional staff would be qualified to address, I'll be happy to see if I can arrange for their participation in the conference.

With best regards

Sincerely,

Lee Gorsuch

Dear Mr. Byer,

Thank you very much for your rather flattering letter of December 31, 1976, regarding the Arctic Alaska Conference. For various reasons I have not been able to reply to your letter before now. The proposal for your conference does arouse my interest and I certainly look forward to receiving further information.

As to your suggestion that I might play a role in connection with the conference, this of course, will depend on what the organizors would want me to do and then on my ability to actually act accordingly.

Even before having such suggestions or proposals as might evolve, I must point out that September of 77 will be a rather busy month for me, and that participation on my part will depend on timing.

Wishing you every luck in your effort, I remain

Yours sincerely,

Dear Mr. Byer:

February 17, 1977

RCA Alascom has received your letter outlining your objectives for the Arctic-Alaska International Conference. We have also received a copy of your letter to Mr. H. R. Hawkins, RCA Communications, and have advised them of our willingness to participate in the conference.

RCA Alaska Communications, Inc., is an Alaska corporation and regulated public utility under the auspices of the Alaska Public Utility Commission. We provide long line communications services throughout this great state. Due to our regulated position, however, it is not possible for us to provide services at rates other than those specified in our public tariffs. However, there must be some other way in which RCA Alascom can assist with the conference. We will be happy to coordinate directly with you any possible assistance.

As your planning becomes more definite, please feel free to contact me concerning our possible participation.

Sincerely,

Ben Agee

Dear Mr. Byer:

Mr. Bradshaw has requested that I respond to your recent letters to him. He and I are gratified that you are now receiving encouragement from local, State and National government heads for an Arctic Countries Mutual Interest Exchange Conference. We hope that it will materialize as planned in September in Anchorage.

Our records indicate that last year we donated $500 to assist in the organization of the conference and sent it care of the Municipality of Anchorage. It was subsequently returned and upon inquiry we were advised that the conference would not be held. Governor Hammond's office advised us similarly.

We certainly will now want to reinstitute this commitment but before considering any increase we would appreciate receiving from you an indication of other support you have received from the private sector. Whereas we are pleased to be able to make a monetary contribution to the organization of the conference I regret that we will be unable to loan an executive for 6-8 months to help coordinate all phases of the project. The startup of the Prudhoe Bay Field and all of the attendent problems has already placed undue demands on the time of our capable people.

I look forward to your reply, meantime good luck with your project.

Very truly yours,

Howard A. Slack

February 17, 1977

George Byer
P. O. Box 445
Hemet, California 92343

Dear George:

Thank you for the letters dated January 26, 1977 and February 9, 1977 indicating the work expended on your part to make the Arctic-Alaska International Conference a reality. You are to be commended for the time devoted in spearheading this Conference.

As Chairman of the Senate Community and Regional Affairs Committee, and in an effort to derive insight into the above referenced bill, I have made contact with the following people to receive input regarding the Arctic-Alaska International Conference:

Theodore Sellins, Polar Affairs Officer, State Department
Governor's Office
Mayor Sullivan's Office, Anchorage
Arctic Institute of North America

The feedback I received was overwhelmingly favorable to the prospect of an Arctic-Alaska Conference to promote relations between Arctic Nations. The theme behind this conference was well entertained by all those concerned, and there didn't seem to be any dearther of support behind the basic proposal.

However, there do appear to be two concerns:
That the spectrum of the Conference is too broad in scope and needs to be reduced to a format more specific in perspective; and, secondly, that the necessary steering committees, on both the pertinent Conference subjects and the overall Conference organization, need to be formed. It surprises me that all this effort must be expended so early in the Conference timetable, but apparantly that is the way these international conferences are done.

In an effort to assist in this regard, might I suggest that you contact Senator Croft and attain assistance from his office in analyzing the stature of the Conference. I noticed in your letter, dated January 26, 1977, that you have a number of topics suggested as areas of discussion. Possibly two or three of these topics would be suitable as a theme on which to conduct the Conference.

Senator Croft's office would also, I am sure, be productive as a source in helping you establish and organize criteria for the Conference, suggesting individuals who may be interested in creating steering committees to assist in organizing and delineating the specific objectives of the Confernece, and acquiring funds. As sponsor of the bill he has indicated his interest in the subject, and his experience and scope of statewide contacts would certainly be of benefit in this regard.

When our committee addresses this bill, I am sure the members will be very supportive as to the spirit of the Conference and will anxiously await the opportunity to review the refined product.

Sincerely,

JOE ORSINI
Senator

Friend Joe...

I have had a rumor that the Governor is luke warm to the conference and not very enthused about the money bill for it. Well, if this is true and I have had no indication by him of anything other than what the enclosed letter by him says which I have continued to use in copies to all the important letters assuring people the governor and mayor are still in favor of this history making endeavor. The governor signed the resolution in 76 by the legislature so it should still maintain that commitment.

The Arctic Inst. of N. America are working on a field for icefield ranges a sort of Alaska-Siberian project which they said would in no way interfer with our conference if it was to be held in 77 or 78.

I began this effort in late 75 and have been at it ever since and too much has been accomplished to turn back, postpone or delay. I should be getting full support and especially from all you upstate and Anch. legislators. Joe, you are in the governor's confidence so why couldn't you get his ear and put some push behind this. I've asked him to write each of the embassies a personal invite to the conference for this is important now that we are already into the program planning with commitments. There is no yesterday left on this, its gone on now to only tomorrow. Joe, we ask your help and support as Lisa in the House has. I want to go to D.C. talk with the embassies, state dept, Carter people etc. but before I go I want the assurance I have the support from the governor & you people.

Washington, D.C. 20510

Dear Senator Stevens:

Since receiving your letter of last December 6 regarding an Arctic Alaska International Conference, we have received additional material from Mr. George Byer, the Conference Coordinator. We share Mr. Byer's enthusiasm as to the important position Alaska is attaining in both U.S. and world economic affairs and certainly see the conference as a good forum for discussion and cooperation between participating countries.

I am sorry that we do not have funds to support the endeavor. Provision was not made for it in our current budget and, even so, it does not appear to fit within those areas of activity for which the Department is authorized to provide funding support. Please do not regard this as a lack of interest on our part. Many of the discussion subjects under consideration are of great interest to the Office of Energy Programs as well as to other entities within the Department. Specifically, I have in mind the energy and marine topics.

We will be glad to help publicize the conference and furnish advice on request. I wish we could do more.

Sincerely,

December 28, 1976

Mr. Kimmo Pulkkinen, Second Secretary
Embassy of Finland
1900 - 24th Street, N.W.
Washington, D.C. 20008

COPY....
Same substance interest to each Embassy of the Arctic countries.

Dear Mr. Pulkkinen....

We were highly elated by Alaska's neighbors in the Arctic for their interest in our first proposed mutual exchange conference. Sweden conferred their interest by writing..."As we think your idea of a meeting in Alaska is very interesting, we are looking forward to an invitation from the State of Alaska."

So may we again invite all who are interested in helping to further the common bonds of the Arctic by an exchangeable program of mutual interests.

The delay of the conference until September of 77, has now allowed ample time to program the various workshops, seminars, demonstrations and speakers of Arctic experience and knowledge

While most expenses are the responsibility of those attending certain provisions will be provided for relative to airport transportation, tours, special conference related trips, social reception and Alaskan gift remembrances. To help defray the various expenses including the banquet, a $25.00 registration fee will be asseted each delegate. Those not wishing to attend the banquet are asseted a lesser fee. Let us suggest that those who have a preference subject, plan to bring your interests to share with others, and with appreciation to each and all, I am, sincerely, George H. Byer, Coordinator , Box - 445, Hemet, California 92343

ARCTIC ALASKA INTERNATIONAL CONFERENCE INVITATIONAL

September 7-8-9-10, 1977...the Arctic Alaska International Conference convenes in Anchorage, Alaska. The conference is dedicated to the betterment of the Arctic and its people.

By assembling delegates from each of the sovereign governments and by furthering the values of interdependence, the people to people concept will help to broaden the northern horizons.

And by contributing to this living betterment which when shared by the experience and knowledge of others, the mutual interest exchange program of suggestive ideas and beneficial solutions, is an essential step in bringing about a new and rewarding meaning of Arctic consensus based on cooperation.

To help accomplish these perspectives, some basic themes within the Arctic reality are to be considered for among them are-HEALTH-detainments and related subjects. WEATHER-forcastings, effects and related subjects. AGRICULTURE-arctic growths, vegetables and related subjects. LAND USE-soils, fertilizers and related subjects. MARINE LIFE-food values, depletion and related subjects. ENERGY RESOURCES DEVELOPMENT-fuel, heat, light and related subjects. ELECTRIC POWER-hydro, fusibility and related subjects. ENGINEERING-TRANSPORTATION-materials, construction, insulations and related subjects. TELECOMMUNICATIONS-electronic, radio and related subjects.

To the degree of interest in which of the above are choosen as preference subjects by the majority of the accepting countries will, in turn, help to decide as to what emphasis can be formulated toward making the conference more productive and informative.

With interest and efforts in the conference by all concerned, the Arctic will awaken the dreams and hopes of non-existence and bring into a welcome reception, the promises of a better tomorrow.

More information relative to the program, participation and desired results will be forthcoming as well as the official invitation by the U.S. Department of State

Further inquiries may be sent to George H. Byer - Alaska Conference Coordinator - P.O. Box - 445 - Hemet, California 92343...Telephone I-714-926-3104

Dear Joe...

I have both your letters of the I7th and let me ~~xshed~~ some light on your concern that the spectrum of the conference is too broad.
(I) the listed subjects are what the resolution mentioned however it never was the intention to carry out on each but rather on the ones of the most interest such as energy, marine life, health & agriculture with the others merely worked in on forums & group gatherings of their own.

Joe, we have been throuh all of this advisory committees etc. These are already and waiting for the governor to cooperate so it all depends on Jay and his willingness to fully support and help all concerned. That's all we need but that has to be assured. Wheres the leadership? And why can't you people help get him to see this. Hell, I'm not spending my time, effort, my own money for this very worthy program for Alaska without one dam benefit to me without having the governor come forth and show he is doing what is right toward the conference. So it is up to you rep. in a leadership role to set down with him, see the advantages of what this means to Alaska and let's get it back on the right track. An idea who time has come needs to be pursued.

As for your letter to the mayor I feel I can clarify it since George is away on vacation.

The mayor told me the city will take care of all transportation to & from the airport, tours, one large cocktail reception, programs and what added personnel need be. The money appropriated would be used for an exec. dir. — program coordinator, basic salaries and limited expenses such as luncheons etc. interpeters, decorations, flags, music, some entertainment etc and to bring in some top knowledgable people of arctic experience and knowledge like Dr. Untersteiner of U. Of Wash. Dr. Roots of Canada etc. Now the states contributionlast year was that the state dept. heads would be provided to lead the subject seminars etc.

As for someone to think its not a program that can be put together, they are merely looking at it from a novice point of view. I've done similar things before and know what needs to be done and how to do it or I would never have tackled it in the first place. Never doubt ones ability to perform unless they look at the ~~xxxx~~ record. All we need is the governor to get off his duff and cooperate...

Office of The Mayor

Dear Mr. Byer,

Thank you very much for your rather flattering letter of December 31, 1976, regarding the Arctic Alaska Conference. For various reasons I have not been able to reply to your letter before now. The proposal for your conference does arouse my interest and I certainly look forward to receiving further information.

As to your suggestion that I might play a role in connection with the conference, this of course, will depend on what the organizors would want me to do and then on my ability to actually act accordingly.

Even before having such suggestions or proposals as might evolve, I must point out that September of 77 will be a rather busy month for me, and that participation on my part will depend on timing.

Wishing you every luck in your effort, I remain

Yours sincerely,

Finn Sollie

Dear George:

Thanks for your letter of February 8. I'm enclosing for your information a brochure on the Institute of Social and Economic Research. The various projects we are engaged in are generally described under the brochure and on the last two pages the institute's personnel and their training and interests are also listed. The various professional staff would potentially be available to participate in the conference, depending upon their individual work schedules and other commitments. Therefore, as the conference planning progresses and you identify topics for which you feel some of our professional staff would be qualified to address, I'll be happy to see if I can arrange for their participation in the conference.

With best regards

Sincerely,

Lee Gorsuch

January 17, 1977

Mr. George H. Byer
Box 445
Hemet, California 92343

Dear Mr. Byer:

Mr. Bradshaw has requested that I respond to your recent letters to him. He and I are gratified that you are now receiving encouragement from local, State and National government heads for an Arctic Countries Mutual Interest Exchange Conference. We hope that it will materialize as planned in September in Anchorage.

Our records indicate that last year we donated $500 to assist in the organization of the conference and sent it care of the Municipality of Anchorage. It was subsequently returned and upon inquiry we were advised that the conference would not be held. Governor Hammond's office advised us similarly.

We certainly will now want to reinstitute this commitment but before considering any increase we would appreciate receiving from you an indication of other support you have received from the private sector. Whereas we are pleased to be able to make a monetary contribution to the organization of the conference I regret that we will be unable to loan an executive for 6-8 months to help coordinate all phases of the project. The startup of the Prudhoe Bay Field and all of the attendent problems has already placed undue demands on the time of our capable people.

I look forward to your reply, meantime good luck with your project.

Very truly yours,

Howard A. Slack

DEPARTMENT OF STATE

Washington, D.C.

BUREAU OF OCEANS AND INTERNATIONAL
ENVIRONMENTAL AND SCIENTIFIC AFFAIRS

April 26, 1976

Mr. George Byer
Post Office Box 445
Hemet
California 92343

Dear Mr. Byer:

I have been asked to reply to your letter of April 5 to Assistant Secretary Robert J. McCloskey regarding an Arctic Country Mutual Interest Exchange Conference in 1976 proposed in Joint Resolution 51 recently passed by the Alaska State Legislature.

The Assistant Secretary's letter of March 15 to Senator Stevens, a copy of which you have, conveys the considered opinion of the Department on the feasibility of a conference such as that described in the Resolution. Your letter of April 5 suggests a much more modest international gathering of a planning nature. A preparatory meeting that would deal with the realities of such a demanding and complicated undertaking as that outlined in the Resolution would seem to be an essential early step.

THIS HAS ALL BEEN CLARIFIED AND DETERMINED

A

The State of Alaska is, of course, at liberty to sponsor an international conference on the subjects it proposes, on a scale it desires, and at a time of its choosing. For our part, it would be virtually impossible to do more than offer advice and encouragement. Given the nature of the federal budget cycle, and the obligations already incurred, possible funding by the Department of State for an Arctic Country Mutual Interest Exchange Conference could not have been anticipated for this or the next fiscal year. However, the Department would be prepared to transmit through its facilities abroad any invitations by the State of Alaska to intended participants in such a conference as Alaska decides to hold.

Sincerely,

Theodore Sellin

Senate Bill No. 63 — Croft, Prime Sponsor

_____ Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

This funds an idea that George Byer, former Mayor of Anchorage, came up with. It would provide for a conference of Arctic nations - Russia, Canada, Finland, Greenland, Norway, Sweden, etc., be held in Anchorage.

2. Are there any other viable ways of accomplishing this same goal?

We're having enough trouble doing it this way that I don't know of any other way that might come as close.

3. Persons or groups you know of who are supporting the legislation.

George Byer, the Municipality of Anchorage, etc.

4. Persons or groups you know of who are opposing the legislation.

I understand that the Governor is unwilling to commit funds for this purpose.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

No. The purpose of the bill is to help Arctic countries solve problems.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

Week of February 28.

MEMBERS of THE TENTH ALASKA STATE LEGISLATURE

Joe - We need your help - action important now

If the enclosed from Mayor Sullivan is true and let us assume that (it is not) for I have never and I repeat never had any indication from Governor Hammond other than the enclosed as copies expressing his good-will, cooperation and go ahead.

No one knowingly, over the months, would continue to spend all the time, endless effor and money to promote this very worthy event for Alaska if the governor had ever expressed his dislike or opposition too it. After it was canceled in 76 due to requests for more time to prepare, no word, letter or call was ever received by me, the mayor or anyone, by the governor, opposing the conference or discontinuation of it or the final for achieving it.

So naturally we have taken him at his original word as you or anyone would and we have continued to do all the many things it takes to prepare such an important international program.

Since the Arctic countries are most interested and look to Alaska as a leader as they seek some of the answers to the social, economic and environmental problems of the Arctic, the conference has assumed an even greater importance to them Requests by Sweden and embassies are waiting for the official invitation from Alaska and have asked why it is not forthcoming.

Ford Adm. State Dept. Senators, Congressmen, Alaska Legislators, Foreigners of the Arctic, diplomats, businesses, colleges, schools & many others have congratulated and offered support. Why! They say the time is right for Alaska to assume its rightful place as a leader in the exchange of ordinary people to people. The program has gone to far now to not move on in commitments, interest and accomplishments, such as Texaco & ARCO on energy; RCA, CBS. NBC-Communications, medical specialists-health but a few besides working Comms., U. of Alaska-programing help, chambers, Fed. of Natives et Two yrs. of dedicated work, unselfishly given by all so would I or you put our dut honor into a wasted effort & embarrassing position now by inviting the President of U.S. and write the first Lady on her people to people plan hopeful of bringin it into being with the conf. if we knew the governor had any opposition whatever and giving me in writing his assurance..."Please let us know if we can be of any further assistance in this matter"...Words of encouragement and words of support. The program deserves the cooperation & support of the governor & legislature jus as the 76 resolution did and signed by the governor, giving Alaska the recognition it deserves, with this plan.

MAR 10 1977

Hugh -

I'm enclosing a copy of my letter to Pat Rodey which explains what time, effort, money & planning has gone into this program for Alaska.

Now that Pres. Carter has asked the Governors to join the effort, why wouldn't it be a good plan to come up with a short resolution bi-partisan in full support of the Pres. Plan and asking to Governors to follow them which is already a leadership role for Alaska in the 77 Conf.

We need some action

Hugh —

Plan for World Peace

Senator John L. Rader

Dear George:

It was sure good to hear from you and know that you are actively pursuing the Conference. As you may have heard, our winter has been one of the mildest ever. I'm sure carrying the mail would be a bit easier than some of the winters in the past!

Senator Chancy Croft has introduced a bill (enclosed) that would appropriate money for the conference. The bill is presently in the Community and Regional Affairs Committee, chaired by Senator Orsini. The Finance Committee will then have an opportunity to review it. John Sackett is Chairman of Finance.

Rest assured, George, that I will keep my eye on the bill as it moves along.

Thank you for your kind thoughts and encouragement.

Sincerely,

John L. Rader, President
Alaska State Senate

Dear George:

Thank you for the letters dated January 26, 1977 and February 9, 1977 indicating the work expended on your part to make the Arctic-Alaska International Conference a reality. You are to be commended for the time devoted in spearheading this Conference.

As Chairman of the Senate Community and Regional Affairs Committee, and in an effort to derive insight into the above referenced bill, I have made contact with the following people to receive input regarding the Arctic-Alaska International Conference:

Theodore Sellins, Polar Affairs Officer, State Department
Governor's Office
Mayor Sullivan's Office, Anchorage
Arctic Institute of North America

The feedback I received was overwhelmingly favorable to the prospect of an Arctic-Alaska Conference to promote relations between Arctic Nations. The theme behind this Conference was well entertained by all those concerned, and there didn't seem to be any dearth of support behind the basic proposal

February 14, 1977

Representative Lisa Rudd
Pouch V
Juneau, AK 99811

Dear Lisa:

I've just reviewed a copy of House Bill 116, which you sponsored entitled "An Act Relating to the Classification of State Land and Providing for an Effective Date". I understand from Gary Thurlow that this was an attempt to bring pressure on municipalities to accomplish recreational trail designation within their boundaries. I believe that the authority to classify State land already exists and that the purpose of the legislation would not be met by this bill, since it pertains to classification of State Lands only. I suggest that if this purpose really is to accelerate municipal action it might be better to look to AS41.20.355 which authorizes grants for the establishment of trails and footpaths. There is a requirement there for a comprehensive plan for the establishment of the trails. It might be appropriate to include some language that requires dedication by the municipality prior to the grant being made.

As a matter of information, the statutory authority for classifying lands is found in AS38.05.300 and regulations adopted thereunder.

Give me a call if you have any questions about this or any other matter I may be able to assist you with.

Yours truly,

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 80 — Croft
Prime Sponsor

_____ Resolution No. ____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

To provide a system of trails - that do not parallel existing transportation routes - in the Anchorage area. The bill would merely provide that the state should designate trails across its land within the borders of a municipality in conformity with the plan instituted by the municipality.

2. Are there any other viable ways of accomplishing this same goal?

Maybe, but I can't think of any.

3. Persons or groups you know of who are supporting the legislation.

Ron Crenshaw
Anchorage Trails Council, 1553 H St., Anchorage, AK 99501

4. Persons or groups you know of who are opposing the legislation.

None that I know of.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

None of much significance.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

Since the bill has a subsequent referral, I would appreciate it being considered the week of February 21, which is approximately one month after the bill was introduced.

In fiscal year '77, the state spent between $3.5 and $4.0 million on the non-Federal Highway System maintenance outside of municipalities. This is the type of maintenance that is done on local roads and paid for by municipal taxpayer when those roads are within municipalities.

Since state motor fuel tax pays about half of maintenance costs, this amounts to an annual state subsidy of almost $2 million to those areas outside of municipalities. Why should municipal residents pay for a service that non-municipal residents receive free?

There are over 4000 registered motor vehicles outside of municipalities. Assuming that these are taxed at an average rate equal to a 3 year old auto, this amendment would raise approximately $160,000; certainly not enough to completely pay for the subsidy, but at least it will help.

M E M O R A N D U M February 23, 1977

SUBJECT: CSSB 84, relating to the registration tax on motor vehicles

TO: Senator Orsini, Chairman
Senate Community and Regional Affairs

FROM: John B. Chenoweth
Legislative Counsel

To assure a return of a portion of the proceeds of the tax levied by AS 28.10 to a second class city within an organized borough, the following amendment should be considered:

Page 3, lines 6 and 7: amend to read

a city which levies property taxes under AS 29.53.400 or AS 29.53.410;

Though you have not asked, I question whether the redistribution provisions of AS 28.10.255(f), repealed and re-enacted in the legislation, are applicable to unified municipalities such as Anchorage and Juneau. The operative words (page 2, line 19) are "organized borough." Municipal officials may argue that, had the legislature intended the distribution provisions to operate within a unified municipality, the word "municipality" or the term "unified municipality" would have been used, the definition of the word "municipality" appearing elsewhere in the section.

JBC:hjd

2/28/77

Ted Berns called & said the amended change in the formula re: CSSB 84 won't work. (i.e. changing organized borough to municipality). Sam Cotton is coming in tomorrow to explain the whole situation to us.

FROM: Director, Property Appraisal Divison

SUBJECT: Motor Vehicle Registration Tax, Mr. Klug's Letter

As we mentioned in our telephone conversation, there are two addresses on the registration certificate, one is the registered owner's mailing address and the other is the residence address. If the residence address is the same as the mailing address only one shows on the registration.

In the Act itself, Section 28.10.255(e), it states: "The department shall refund money collected under this section less five percent as collection costs, to a municipality for which the money was collected, as determined by (1) the address of residence of an individual required to pay the tax, or (2) the situs of the vehicle if the vehicle is not owned by an individual; the tax situs is the location at which the motor vehicle is usually, normally, or regularly kept or used."

I would suggest that Mr. Klug in all cases use his Anchorage address as the mailing address and the residence address would be the area in which those automobiles are normally or regularly kept, i.e. Cordova, Fairbanks, etc. By doing this he will not have to pay the tax on those vehicles not normally kept here. They will be subject to tax in the other areas.

As I told you on the phone, I did talk with Mr. Klug last year, and this was covered. He has evidently forgotten our conversation.

I really don't think he will have any problem at all, as long as he prepares in advance. We will certainly be available to help him.

THE HONORABLE JOSEPH ORSINI
ALASKA STATE SENATE
POUCH "V"
JUNEAU, ALASKA 99811

DEAR SENATOR ORSINI:

DURING THE LAST LEGISLATIVE SESSION SENATE BILL 600 WAS PASSED. HOWEVER, UNDER SECTION 1, PARAGRAPH 1, IT PROVIDES THAT EACH MUNICIPALITY HAS TO ELECT TO HAVE THE STATE COLLECT THE MOTOR VEHICLE REGISTRATION TAX IN LIEU OF LOCAL AD VALOREM TAXES. WE THEREFORE, WOULD LIKE TO POINT OUT SOME OF THE SERIOUS SHORTCOMINGS IN THIS BILL AND ASK FOR YOUR ASSISTANCE.

1. SOME CORPORATIONS HAVE MANY VEHICLES LOCATED ALL OVER THE STATE. THESE VEHICLES DO NOT FALL UNDER THE TAX LEVY BECAUSE THE BOROUGH EITHER DID NOT HAVE THE TAX STRUCTURE BEFORE OR CHOSE NOT TO ACCEPT SENATE BILL 600. HOWEVER, IT COULD BE POSSIBLE THAT A VEHICLE WILL END UP OPERATING IN A BOROUGH WHICH SELECTED TO HAVE THE STATE COLLECT ITS TAXES. SINCE THE REGISTRATION WILL SHOW A DIFFERENT COST THAN THOSE LOCALLY COLLECTED, WILL WE AS THE OWNER BE HELD RESPONSIBLE TO PAY THE ADDITIONAL COST.

2. SINCE MOST LARGE CORPORATIONS CARRY AN ANCHORAGE ADDRESS ON THE VEHICLE REGISTRATION, HOW CAN THE STATE PROVIDE FOR ALLOCATING THE TAX TO THE DIFFERENT COMMUNITIES, WHO WOULD NORMALLY, BEFORE ACCEPTING SENATE BILL 600, GET THE TAX FOR THOSE VEHICLES OPERATED IN THAT COMMUNITY.

ALL CORPORATIONS OR PERSONS OPERATING FLEETS WILL HAVE THIS PROBLEM. WE FIND IT IS IMPERATIVE TO REGISTER ALL VEHICLES IN ONE LOCATION WHERE THE HEAD OFFICE IS AND ALL FINANCIAL AND ADMINISTRATIVE CONTROL CAN BE CENTERED. ON TAKING A DECEMBER 31ST INVENTORY STATEWIDE, WE FIND THAT EACH COMMUNITY RECEIVES ITS SHARE OF THE TAX. THIS WILL NOT BE POSSIBLE UNDER THE NEW SYSTEM. WE WOULD APPRECIATE IF YOU WOULD CONSIDER THESE COMMENTS AND RECONSIDER THE MERITS OF SENATE BILL 600.

YOURS VERY TRULY,

ROLF A. KLUG

M E M O R A N D U M February 23, 1977

SUBJECT: CSSB 84, relating to the registration tax on motor vehicles

TO: Senator Orsini, Chairman
Senate Community and Regional Affairs

FROM: John B. Chenoweth
Legislative Counsel

To assure a return of a portion of the proceeds of the tax levied by AS 28.10 to a second class city within an organized borough, the following amendment should be considered:

Page 3, lines 6 and 7: amend to read

a city which levies property taxes under AS 29.53.400 or AS 29.53.410;

Though you have not asked, I question whether the redistribution provisions of AS 28.10.255(f), repealed and re-enacted in the legislation, are applicable to unified municipalities such as Anchorage and Juneau. The operative words (page 2, line 19) are "organized borough." Municipal officials may argue that, had the legislature intended the distribution provisions to operate within a unified municipality, the word "municipality" or the term "unified municipality" would have been used, the definition of the word "municipality" appearing elsewhere in the section.

Hon. Joe Orsini, Chairman
Community & Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 9981.

Dear Senator Orsini:

I have just examined Senate Bill 86 which changes the senior citizen real property tax exemption to a flat $100,000.00.

I understand from the borough's Assessing Department that the predicted senior citizens' exemption limit for this year will be between $40,000.00 and $45,000.00. Thus, Senate Bill 86, if passed, would go far to ease the tax burden of many of our senior citizen taxpayers. You are no doubt aware that the cost of living in Alaska, and especially the Arctic, is extremely high. Senior citizens who have spent many years here building a family and home retire and must then live on relatively low fixed incomes. The net result is that in order to make ends meet many are forced to sell their homes in which they have invested so much of their lives. It is toward the prevention of such a dilemma that the senior citizen tax exemption is directed. I support the increase of the exemption as provided for in Senate Bill 86 and urge its passage in your committee and the full Senate.

Sincerely,

Eben Hopson, Mayor
NORTH SLOPE BOROUGH

Senior Citizen Property Tax Exemption

SB 86, 100,000 Assessed Value Limit

The attached analysis was prepared to illustrate the citizen impact of SB 86 which proposes raising the current formula limitation to a 100,000 assessed value limit.

Table I

Illustrates a comparison of alternative program totals:

The total reimbursement for the FY 77 unlimited program is approximately $1,171,227 for 2,608 applicants, stipulating an 8% increase in applicants and a 27% increase in total property tax, a FY 78 unlimited reimbursement would be about $1,487,458 for 2,817 applicants.

From Table II, the 100,000 limit would reduce an unlimited program by about $25,000, for a total reimbursement of $1,462,950 in FY 78.

The formula assessed value limit has been established to be 40,000 in FY 78 and it is estimated to require a $1,292,349 reimbursement, therefore, raising the assessed value limit from 40,000 to 100,000 will require about $170,500 in additional funds.

The FY 78 BRU grant for the formula limitation program is $1,375,000, SB 86 would increase the total grant requirement to $1,545,500.

Table II

Table II is a list of the 26, FY 77 applications showing a value over 100,000 and the corresponding total tax levy on those properties of $56,532.81. Also, a list of 22 applications showing a FY 77 value of over 85,000 has been compiled with a total tax levy on those properties of $28,355.09. These 22 properties are projected to reach or exceed 100,000 in FY 73. Stipulaton of a 27% increase in total tax levy projects a total FY 78 tax of $107,807.63 on the 48 properties listed. At an average rate of 17 mills, $83,300 of the total value would be exempt under SB 86. This leaves approximately $25,000 that would not be eligible for reimbursement.

STATE OFFICE BUILDING / POUCH SA – JUNEAU 99811

February 15, 1977

The Honorable Joseph L. Orsini
Chairman
Senate Community & Regional
Affairs Committee
Room 100 Assembly Apartments
Juneau, Alaska

Re: Senate Bill No. 111

Dear Senator Orsini:

Senate Bill No. 111, an Act repealing the Alaska Net Income Tax Act and the Alaska Business License Act was introduced in the Senate on February 1, 1977 and was referred to the Senate Community & Regional Affairs and Finance Committees.

For the consideration of the Senate Community & Regional Affairs Committee, I am enclosing Fiscal Notes prepared by Mr. Gary L. Jenkins, Director, Audit Division and Mr. P. A. Wall, Director, Administrative Services Division of the Department of Revenue concerning the proposed legislation.

Very truly yours,

R. D. Stevenson
Special Assistant

I. REQUEST
Bill/Resolution No. Senate Bill No. 111
Title An Act repealing the Alaska Net Income Tax Act and the Alaska Business License Act.
Requested by Senate Community and Regional Affairs Committee Date 2-10-77

II. FISCAL DETAIL
Agency Affected Revenue
Program Category Affected Fiscal Services
Budget Request Unit(s) Affected Audit and Enforcement

EXPENDITURES (Thousands of Dollars)

	FY 77	FY 78	FY 79	FY 80	FY 81	FY 82
100 PERSONAL SERVICES					(1,736.8)	(1,736.8)
200 TRAVEL					(87.0)	(87.0)
300 CONTRACTUAL					(263.2)	(263.2)
400 COMMODITIES					(22.3)	(22.3)
500 EQUIPMENT					(7.5)	(7.5)
600 LAND & STRUCTURES					(108.2)	(108.2)
700 GRANTS, CLAIMS, ETC.						
TOTAL					(2,225.0)	(2,225.0)

FUNDING (Thousands of Dollars)

GENERAL FUND					(2,225.0)	(2,225.0)
FEDERAL FUNDS						
OTHER (Specify)						

POSITIONS

FULL TIME					(75)	(75)
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III) This bill, when fully effective, would reduce the staffing in Audit and Enforcement Divisions by about 80 percent. The reduction would be gradual as the workload declined.

This bill would also mean a loss of revenue to the State General Fund of a minimum of the following amounts:

Individual Income Tax	$ 100 million
Fiduciary " "	60 "
Corporate " "	96 "
Business License "	9 "
Total	$ 265 million

It should be noted that this bill would go into effect when budgeted State revenues exceed appropriations by $100 million. However, the effect of the bill when enacted would be to reduce actual revenues to the General Fund from the particular tax type involved by a minimum of $265 million.

BOROUGH ASSEMBLY

Borough Mayor

March 16, 1977

Honorable Jalmar Kerttula
State Senate
Pouch V
Juneau, Alaska

Re: SB 112

Dear Jay,

To confirm a phone call to you today, the Borough Assembly wishes to go on record in opposition to SB 112. A copy of Mr. Howe's memo giving reasons for opposition is enclosed. With the growth in this area, you can well understand the problem that this bill would create.

We would appreciate any assistance you can give in opposing this bill in the Senate and/or House and, as always, we are sure we can rely on you to work on our behalf.

By copy of this letter, we are advising Mr. Ose and the Chairman of both the House and Senate Finance and Community and Regional Affairs Committees of our stand on this bill.

Yours respectfully,

Ronald L. Larson
Borough Mayor

MEMORANDUM

To: Mayor and Borough Assembly

From: Wesley M. Howe, Borough Manager

Subject: SB 112 An Act Relating to Municipal Taxation and Finance

This bill has several undesirable aspects:

1. In our Borough it would require that two values be placed on practically every parcel of property, since property values are increasing at more than 5% per year. We cannot estimate the administrative cost of this, but it would be substantial. There would also be administrative costs at the state level. Administrative regulations and court decisions would be needed creating red tape and confusion.

2. The Borough would not be fully reimbursed for revenues lost since we levy a property tax amounting to more than 10 mills. (See Section 43.18.070.)

3. Inequities would be created. Starting from a base of 100, property increasing in value at a slow rate, say 5%, would be appraised at 129 after five years and this would also be the "limited assessed value" for tax purposes.

Property in another part of the Borough increasing more rapidly, say 10%, would have a value of 161 after five years, but would only be taxed at the "limited assessed value" of 129 for tax purposes. Undoubtedly many unforeseen problems would arise. If this process were to go on for say 50 years the result would be ridiculous.

I recommend that the Assembly oppose SB 112.

Wesley M. Howe
Borough Manager

Mr. Jalmar Kerttula
Senate Majority Leader
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Kerttula:

I am writing you in support of SB 112. We have just (this week) completed closing on our new home here in Anchorage. It was really shocking to us to discover the taxes were half again what they were last year on this same house. I had been aware of your legislation, but before becoming a home owner had not felt affected by it one way or the other. Now, needless to say, I am very much in support of this bill.

Sincerely

Dera C. Doris

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

February 7, 1977

Senator Joe Orsini, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Please reference your letter of 3 February inviting comments on several proposed Senate Bills pending consideration by your committee. The City of Skagway has no objection to proposed Senate Bills Nos. 80 and 114; however, Bill No. 112 "An Act relating to municipal taxation and finance-----" is viewed with grave misgivings. There are several bases upon which to question the wisdom and practicability of this Bill:

Sec. 25.53.050 (a) The limitation of property tax to no more than one per cent of assessed valuation is unrealistic.

Sec. 25.53.050 (b) The limitation of annual increase in assessed valuation to five percent is unrealistic. For S.E. Alaska the annual average rate of appreciation of property values has been in the range of 8 to 10 per cent for the past three years. Adherence to this restriction could in a period of ten years produce a limited assessed value from 30 to 70 per cent under the full and true value of a property -e.g. in comparison to the base value of comparable property just coming on the tax rolls in the tenth year.

Sec. 43.18.070 Computation and Payment of State Assistance. This section is ambiguous.

Pending clarification of these questions, the City of Skagway is to be noted as opposing Senate Bill 112.

Sincerely,

G D Acker

G.D. Acker
City Manager

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 114 — Croft, Prime Sponsor

_____ Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

Correct a technical defect which exists in legislation passed in 1975.

2. Are there any other viable ways of accomplishing this same goal?

No.

3. Persons or groups you know of who are supporting the legislation.

The Municipality of Anchorage - see atrached .

4. Persons or groups you know of who are opposing the legislation.

None that I know of.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

No.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

Week of March 7.

PUBLIC WORKS/HIGHWAY PROJECTS--PLANNING

Current Law

AS 35.10.020, as amended by the Ninth Legislature, requires that the construction of a "public works" be commenced only after consultation with municipal planning and zoning authorities and compliance with local planning and zoning ordinances. However, this statute is ambiguous in terms of its affect on highway construction projects and the Department of Highways. The construction or modification of a state highway often poses serious problems for municipal planning programs and should therefore be commenced only after consultation with local planning authorities. Of course, if an overriding state interest in a highway project is demonstrated, a state agency should possess the ability to override local planning and zoning ordinances. This, however, does not detract from the need to incorporate local planning and zoning review into the design and construction of state highway projects.

Proposed Bill

The proposed legislation would clarify the scope of AS 35.10.020 to require consultation with municipal planning authorities and compliance with local planning and zoning ordinances prior to the construction of "any building,

Municipality of Anchorage

MEMORANDUM

DATE: February 7, 1977

TO: Ted Berns, Legal

FROM: Tom Nelson, Planning

SUBJECT: House Bill No. 147 & SB 114

This is just a brief outline of our concern over actions taken by the Alaska State Highway Department that do not comply with Municipal land use regulations such as the Zoning Ordinance and Subdivision Regulations which everyone else must and do comply with. Specific cases of Highway Department actions that have created problems and conflicts will be presented at a later date when more time is available to gather the information together.

The primary cause of most land use problems created by the Highway Department is the creation of non-conforming lots following land acquisition for additional right-of-way. In several instances the Highway Department acquired a portion of a lot or tract and left the owner with a relatively useless parcel. In doing so, resulting land use patterns are ignored. Thus, access problems develop; either normal access is shut off on the front of the lot and thence, alleys become thoroughfares, or every little non-conforming lot remaining has its own access onto the arterial being up-graded. The end result is additional traffic circulation and safety problems.

In several instances the Highway Department has split lots, but filed no plat, thus leaving no record after land was taken. Land is subdivided without filing a plat. The Highway Department may know better, but as long as they can ignore local land use regulations they'll try to get by with it.

These types of actions present problems to land owners and developers. Tax inequities result when owners are taxed for useless land, and Municipal government loses tax revenue when relief is given to the owner because of the non-conformity--all or most of which could have been prevented through adherence to local regulations. In addition, developers are severely limited by problems with access and setbacks for structures.

Another problem that has arisen in regard to highway projects is the Highway Department's source of gravel materials. They have had a practice to buy gravel from private landholders. The private landholder in that case is responsible for getting a Special Exception to extract gravel. However, the Highway Department may not always inform the landholder of that when entering an agreement for the gravel. If the Highway Department decides to extract gravel itself, it can presently do so, without any regulations on such operations. This may be a possibility in the Eagle River/Chugiak area where the Highway Department plans to utilize gravel resources for the construction of Minnesota Drive Extension. In such an instance there is no way the neighboring residents could be protected from noise, dust, traffic, or hazards from such activity.

The purpose of having Special Exceptions, platting procedures, along with all the other land use regulations is to "protect the health, safety and welfare of the public." This responsibility is entailed to the Anchorage Municipality, yet little protection can be offered from actions taken by the Highway Department.

These problems also create unnecessary and costly administration problems with requests for zone changes and variances, not to mention the litigation that has been leveled against the Municipality.

These problems will continue until the Highway Department is forced to abide by the same rules as everyone else. It is this department's firm belief that the Highway Department does not deserve to have any privilege status in regard to local land use regulations. As with other State agencies, if there is a clearly demonstrated over-riding State interest, a waiver from the local compliance requirements may be granted by the governor.

Dave Doris, a member of the Platting Board, is quite familiar with the practices of the Highway Department here in Alaska and similar problems in other states. I would suggest having him testify on this Bill. He would strongly support our stand and has indicated a willingness to help.

Dear Senator Orsini:

Hucksters from Alaska Petrochemical Company made their pitch in Fairbanks this past Thursday. They would have us believe a number of interesting things.

For one, they tried to explain why new refineries around the world are being built farther and farther from the traditional refining centers close to markets. "The reason is that more and more of the underdeveloped producing countries want to gain the value added by processing the crude oil at home," they said. "That's awfully nice of the companies to agree to do so," I thought. Then it came out that people who live in refining regions have had enough. The West Coast is so hostile to new refineries that firms don't even want to try to expand there despite projections that the West Coast glut will turn to a shortage in five to ten years. AlPetCo would have us believe that 30 million West Coast folks are foolish and that we can really put one over on them by approving the royalty oil contract fast.

For another, they did a fascinating dance on the question of employment. They wanted desperately to tell businessmen and the out-of-work boomers that a nice peak in construction employment would be followed by non-cycling refinery employment and a build up of satellite chemical plants, and that the multiplier effect (the economist's version of loaves and fishes) would cap everything with a juicy service-sector job picture. On the other hand they know a lot of Alaskans are none too happy with the idea of making room for 15-20,000 more people for one project-swarm, so they tried to say that

petrochemical industries are neat because it takes hardly anyone to push those little computer buttons. Somebody had better start giving some full and straight answers. Especially with the Governor saying that right now every newcomer costs twice as much in government services as he or she pays in taxes. And especially since the much-touted local hire provisions merely mean - at best - that a Texan has to wait a month before becoming a local hire.

Then there was the question how long AlPetCo expected to be around and where they would get their oil. Prudhoe Bay is supposed to last another 25 years or so. Production will peak in ten years or so, however, at about 200,000 barrels of royalty oil per day. AlPetCo can only get 85 per cent of the royalty amount, and it won't start using the oil until the field is 20 percent exhausted. Where else will it get oil? Not Pet 4 (NPRA). Not upper Cook Inlet, which is already on the decline. Are they staking everything on the unoffered leases in the unexplored Beaufort Sea?

And suppose they do get 150,000 barrels a day for 20 to 30 years? Suppose natural gas liquids, coal, and other goodies can be put together on our only - somewhat - crowded Kenai Peninsula to build a world scale everything complex? It sounds like building sandcastles in the top half of an hourglass. What will our children have left besides bills for empty schools and dirty rivers?

The problem with the royalty oil contract is that everybody is looking at the fine print.

We hope that as an Alaskan representing Alaskans you can look first at the screaming headlines: Is the petrochemical industry really what the North is all about?

It isn't as though we were going to be poor if we just took the royalty in value.

Sincerely yours,

ALASKA CONSERVATION SOCIETY

Croft
Prime Sponsor

_____ Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

Last year's budget appropriated money for this road. However, the only appropriation was Federal money, and Federal money is unavailable without a state match. This bill corrects that defect.

2. Are there any other viable ways of accomplishing this same goal?

We could insist on the municipality coming up with the money, but this provides access to a state park and it seems to be a state responsibility.

3. Persons or groups you know of who are supporting the legislation.

The Municipality of Anchorage.

4. Persons or groups you know of who are opposing the legislation.

None that I know of, even though the owner of the property to be condemned, Bertha Mae Tabbytite, might be opposed.

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

None of any substance.

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

I would be happy for the Committee to consider it at any time, but I would like for the Committee to pass it out next week since (over)

the bill also has a Finance referral and the C & RA Chairman is also a member of that Committee.

To: Senator Orsini DATE: Feb. 18, 1977

FROM: Paul Conger RE: SB 152

I spoke to Ted Berns this morning regarding SB 152. Ted commented that he was quite suprised that this bill had been introduced and requested that this Committee delay any action on this bill until he gets back to us.

The circumstances behind this bill are as follows: Ted stated that the road in question is an old road that leads up to the community called Glen Alps which is composed of approximately 15-20 families. In addition, this road feeds into Chugach Park and is used extensively by backpackers. There is another feature of this road which has stimulated the request by the city to condemn this road. The road runs across an Indian lady's property and the lady has initiated a trespass action against the city. The litigation is currently in Federal Court and the Federal Judge has not rendered a decision in this case. However, the judge has stated that whatever the outcome is, the City will have to condemn the property.

Ted states that the entire cost for facilitating the condemnation of the property will be around $80,000. He stated that what they are attempting to do is to get the Feds to provide matching funds in this case, therefore each level of government will share in the burden of the expense.

Ted states that an attempt was made last year to appropriate money for this condemnation procedure and it passed, both houses. However, the money was to be appropriated from "other funds" (which apparently meant Federal money) and for one reason or another the money never became available. So they are making another stab at getting the money.

Ted emphasized that he wants to request that action on this Bill be DELAYED because it has taken him completely by surprise and he did not realize that it was going to be introduced.

Re: $40,000 Appropriation to Reimburse the Municipality of Anchorage for Acquisition of Road Right-of-Way to the Glen Alps Entrance of Chugach State Park

Dear Joe:

The Municipality urgently requests that an appropriation in the amount of $40,000 be made to reimburse it for acquiring road right-of-way necessary to provide public access to the Glen Alps entrance to the Chugach State Park and to the former City of Glen Alps. According to statistics provided by the Division of Parks, the Glen Alps entrance is the most heavily used access point to Chugach State Park in the Anchorage hillside area. In addition, approximately twelve families live year-round in the area immediately south of the State Park entrance, in what is known as Glen Alps.

Since February, 1976, the right of the public to use the road to the park entrance and to Glen Alps has been in jeopardy as a consequence of a decision by the Ninth Circuit Court of Appeals in United States and Tabbytite v. Clark, an action which has been in litigation in the U.S. District Court in Anchorage since 1969. The Ninth Circuit ruled that no legal access existed for the road across Mrs. Tabbytite's land enroute to the park entrance. The history of the dispute is set forth fully in the letter of agreement which was signed on May 7, 1976, between Russ Cahill, Director of the Division of Parks, and me.

Since February, a year ago, I have been engaged in strenuous litigation to keep the United States Government and Mrs. Tabbytite from securing an injunction which would prohibit the Glen Alps road from being used. However, the Municipality and Division of Parks agree that it would be inequitable to require the twelve families who live in Glen Alps to bear the entire cost of right-of-way acquisition considering the extensive use which the Glen

Alps entrance to the park attracts. We sought an appropriation from the last Legislature in the amount of $40,000 to cover the cost of right-of-way acquisition and believed that such an appropriation had been made until we learned otherwise in December. Apparently, someone in the free conference committee goofed and made an appropriation for $40,000 of Federal matching highway funds; however, no state funds were provided.

The Municipality is a party to the lawsuit because, upon unification, it succeeded to all interests and liabilities of the former City of Glen Alps, which had been a party. The suit is rapidly evolving into one inverse condemnation and, if I am to prevent the road from being closed by Federal injunction, I will probably have to make a deposit in court of the estimated just compensation for the right-of-way. Between May, 1975, and February, 1976, more than 39,000 people used the hillside entrance to Chugach State Park. Over 44% of these used the Glen Alps entrance. Because of this heavy public use, it would be grossly unfair to require the twelve year-round residents in the service area of Glen Alps to bear the cost of procuring this right of way.

Therefore, I request that your committee recommend appropriation of $40,000 to reimburse the Municipality for whatever action may be necessary to procure a legal right-of-way from the switch backs on upper Huffman to the State Park entrance and Glen Alps. I believe that $40,000 should be adequate to do the job.

If you have any questions, Ted Berns of our office should be helpful. Also, feel free to call me at 264-4320. Many thanks for your help in this endeavor.

Would you have time to do some kayaking this summer?

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

May 7, 1976

The Honorable Helen Bierne
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Bierne:

On February 4, 1976, the Ninth Circuit Court of Appeals rendered a decision in United States and Tabbytite vs. Clark, No. 74-1659 which endangers all legal access to the former City of Glen Alps and to Glen Alps entrance to Chugach State Park. Several families live in the Glen Alps area year round. According to statistics of the State Division of Parks, more than 39,000 people used the hillside entrances to Chugach State Park between May, 1975 and February 1976. The Glen Alps entrance is the most heavily used entrance of the park in the hillside area around Anchorage. The use pattern is as follows:

Glen Alps - 44%
Prospect Heights - 30%
Upper O'Malley - 15%
Upper Huffman - 11%

The Ninth Circuit held that the only road providing access to the Glen Alps community and Glen Alps Park entrance illegally crosses certain Indian allotment lands held in trust by the United States for Bertha Mae Tabbytite. It remanded the case to the United States District Court in Alaska for issuance of an injunction against use of the road.

Undoubtedly, an injunction will be issued prohibiting any use of the road across Mrs. Tabbytite's land unless the Municipality of Anchorage, successor in interest to the former City of Glen Alps, or the State acquires right-of-way for the road through negotiation or condemnation.

The suit arose out of a dispute between two homesteaders, Mr. Clark and Mrs. Tabbytite. The Ninth Circuit described

the history of this dispute as follows:

> Tabbytite's 160 acres of land are located in the Chugach Mountains southeast of Anchorage, Alaska. In November, 1956, she filed a homestead application for the land with the Department of the Interior. A year and a half later, in June, 1958, Glen Clarke, the principal named defendant, applied for a homestead on an adjoining 80-acre parcel. To secure access to a public highway, Clark constructed a road across Tabbytite's land in the late summer of 1958. The district court held that his doing so and using the road was a continuing trespass, for which it awarded damages. It is undisputed that Clarke never obtained a grant of an easement from anyone.
>
> After securing his patent in 1961, Clarke subdivided his property into 40 parcels, most of which he sold before this suit commenced. Tabbytite was not as fortunate. Between 1958 and 1966, Clarke and his former wife filed three separate contests to Tabbytite's patent application. Clarke admitted at trial that he was aware of 43 U.S.C. § 185 which gives a successful contestant a preference to the cancelled homestead. Although Tabbytite prevailed in these contests, she could not get her patent while the contests were pending. Apparently despairing of ever securing the land via the homestead route, she elected to abandon her homestead application and take the land as an Indian trust allotment. However, there was no break in her possession.
>
> During this same period Tabbytite made several attempts to bar those whom she considered trespassers from crossing her property. She posted "no trespassing" signs, and once, in 1967, sought to block the road physically. On this occasion, Clarke told her that Alaska law prohibited the blocking of a public highway and warned that she would be arrested if she presisted. She did not, choosing instead to notify the Bureau of Indian Affairs in Anchorage of her problem. On the advice of the Bureau, the United States, which holds legal title to Tabbytite's trust allotment, filed this action in 1969.

The suit was brought against a class of defendants which included anyone using the road. The plaintiffs sought a permanent injunction against use of the road and damages for trepass. Judge von der Heydt of the District Court denied the injunction, finding that the defendants had an easement by necessity across Mrs. Tabbytite's land but awarded the plaintiffs $3,500 in compensatory damages -

$2,000 for past trespasses and $1,500 for future trespasses. The Ninth Circuit reversed, finding that no easement of necessity existed across Mrs. Tabbytite's land. It remanded the case to the District Court, strongly suggesting that the injunction be issued.

ALTERNATIVES

Acquisition of public right-of-ways over Indian allotment lands is allowed in either of two ways:

1. Through negotiations by either the Municipality or State and the Secretary of the Interior. (25 U.S.C.A. 311)

2. By exercise of eminent domain by the State or the Municipality. (25 U.S.C.A. 357)

Both the State and the Municipality, which succeeded to all interests of the former second class City of Glen Alps as a consequence of unification, can exercise the power of eminent domain. It would probably be more economical for the Municipality to do so since it has become a defendant in the existing suit as a consequence of unification. A key issue is who shold bear the cost of acquiring right-of-way for the road and road maintenance: 12 families who live year round in the Glen Alps area as residents of a Municipal service area or the State, which attracts thousands to the area with Chugach State Park?

The area encompassed in the existing roadway is between one and two acres in size. Probably the highest valuation for land in that area is $20,000 per acre. $40,000 would probably acquire the right-of-way necessary to provide legal access to Glen Alps and the State park entrance. Since the Tabbytite case was brought in Federal Court, the just compensation is determined by subtracting the value of the land with the road crossing it from the value of the land without the road crossing it.

AGREEMENT BETWEEN THE MUNICIPALITY OF ANCHORAGE AND THE STATE DIVISION OF PARKS STATE OF ALASKA

The Municipality and State Division of Parks agree that it is desirable to maintain legal access to the Glen Alps entrance to Chugach State Park and for the 12 families who reside in Glen Alps to go from and return to their homes. The twelve families who reside in Glen Alps are willing to pay for part of the cost of acquiring right-of-way across Mrs. Tabbytite's land as residents of a Municipal service area, but the service area's financial base is limited because there are only 12 or so families within it. Therefore, the Municipality and State Division of Parks requests that the

legislature appropriate $40,000 to cover the cost of acquiring legal road right-of-way across Mrs. Tabbytite's land. If the acquisition of costs is less than $40,000, the appropriated funds will not be spent.

The Division of Parks recognizes that the Glen Alps park entrance is the most heavily used entrance in the hillside portion of the park above Anchorage. It would like to have the right-of-way procured so that legal access is possible, but is unable to do so without an appropriation from the legislature.

The parties further recognize that the road in question is used daily by residents of Glen Alps and primarily on weekends by visitors to the State Park. For this reason, both the Municipality and the Division of Parks feel it equitable to divide the cost of routine road maintenance and snow removal.

If the property interest is acquired as proposed above the Municipality and the Division of Parks will enter into bonafide, good faith, negotiations to establish the portion of the cost of routine road maintenance and snow removal based upon present use of the road by residents of the service area of Glen Alps and non-residents of the service area. This amount will be requested as a specific priority item in future parks budgets. The Division of Parks agrees that it will use its best professional efforts to urge the legislature to appropriate this amount. If appropriated, this amount will be paid to the Municipality on a contractual basis to do this work. Maintenance shall be by the Municipality. If the road is relocated the Division of Parks shall not be responsible for any costs caused in such relocation.

The Municipality and Division of Parks further agree to renegotiate the share of routine road maintenance and snow removal costs which each is to bear if the proportionate use of the road between residents of Glen Alps service area and users of the Glen Alps entrance to the State park changes significantly from that which presently exists. A bona fide good faith effort to effect such renegotiations shall occur at least every 5 years.

SB 159 - HB 387

1. In 1976 the Division of Lands raised rentals to what was considered an onerous level. This level is such that there is serious doubt of the practibility of continuing the present use of the land.

2. Because of the uncertainity occasioned by the actions of the Division of Lands, both commercial and residential development of the leases became "non-bankable" in terms of loans because of no feasible upper limit of rent could be determined.

3. The proposed bill corrects this situation by:

    a. Extending the initial period to 25 years to provide stability in the development stage, and providing for three additional reappraisals instead of about eight.

    b. Allows the mortagor to assume the payments in the event of a late payment or default by the lessee.

    c. Protects the state's interest by increasing the precent of the rental fee to 10%. The original appraisal will have to be correctly done.

    d. Results in a definable upper limit of the sum of the rental payments over the life of the lessee. This amount in 9 1/2 times the original appraisal. For example, for each $1,000 of the original appraisal value, the lessee will pay $9,500 in rent over a 55 year period.

4. A word on the fiscal note prepared by the Division of Lands and which states that passage of the Bill will result in a "substantial less in revenue". At best, this is half truth, since the result is subject to manipulation. Under the argument given, if the Division should decide to raise the rentals to an even higher rate, the "substantial less" would be higher. Accumulation of revenue is not the chief function of a state agency. Balanced development is a valid function. To follow the unmodified policy of the Division of Lands in this matter is to be counter productive.

The major changes which the committee recommends, insofar as your legislation is concerned, is the establishment of fixed rent readjustment percentages in the lease document, and limitations on rent increases. Looking at the first issue, the committe found that leases in the private market use the figure of eight percent for properties leased recently. But the leases

do not say eight percent today and whatever the going rate is in five years. In other words, although eight may be the market today, and ten could be the market tomorrow, the lease would still charge only eight percent for the entire term of the lease. This is an important difference from the state lease form, which allows the percentage to be varied at each reappraisal period. The committee could find no examples of leases in the private market which used the states system. Hence, the committee recommendation is for a fixed percent in the lease document itself.

To put it simply, the committee will recommend this: All current leaseholders will be give a period of time to swap their old leases for the new ones. As a condition of the exchange, the leaseholders would have their properties reappraised, except for leases which had been reappraised within the last two years. The percentage of the appraised value of the lease would be the percent which represented the market at the time the lease was entered into. For example, a lease entered into around 1965 might have the rent readjusted to six percent of the appraised value of the land, while a lease entered into in 1974 might use the eight percent figure. Whichever figure was used would then be written into the lease. As mentioned earlier, leases would have ceilings on prospective rent increases of no more than 100 percent every five years during the lease term.

A suggestion was made to go back to the original beginning of each lease and apply the limits forward to current rents, but this was rejected by the committee. First of all, there was no evidence that current appraised values would create unfair hardships, if the fixed percentages and ceilings were applied as explained above. Second, and more important, the committee found persuasive evidence that it would be grossly unfair to the state's taxpayers if the ceilings were applied retroactively.

SB 159 is similiar to the Ad Hoc Committee's approach in many ways, but there are a few areas that should be examined. The bill establishes a figure of 8 per cent, as the maxium rate for readjusting rents. First of all, as previously stated, the terms of commerical and industrial leases might be substantially different than the terms of residential or agricultural leases. But more important, by using a figure which represents todays market of 8 per cent for most commercial leases, the act would lock the state into an inflexable system. 8 per cent may be alright today, but it might be considerably out of touch with market values in the future. Likewise, allthough 8 per cent may represent a market figure for Anchorage or Fairbanks, or other areas of long term sustained growth, the state might be better off using a figure of 10 to 14 per cent for leases in some area undergoing a short term boom. The higher rate might represent the market in an area that offers a short term economic life for the lease. Under the Committee's proposal, the rate would be fixed in the lease form itself, at the rate the market would bear at the time the lease was entered into.

RE: Committee Substitute for Senate Bill #159

Dear Senator Orsini:

I have reviewed a copy of the above-referenced bill which you sent to me. Basically, I consider it an improvement over the present leasing policy. It would appear that it will be easier to finance improvements on leases due to the fact that rents will be fixed with 10-year periods and that there will be less likelihood for small businessmen and homeowners leasing State land to be forced to abandon or sell their leases because of the ravages of inflation. Likewise, during periods in which cumulative inflation is less than 70% during any 10-year period, the State will be able to adjust the rents to Fair Market Values at the end of each lease period.

However, because of the longer periods between rental adjustments and the fact that maximum rental adjustments are provided for, in periods in which there is rapid inflation or rapid increases in land value, a Lessee could accumulate a sizeable leasehold interest which could be sold at a substantial profit. Since I am certain that it is your desire to make State land readily available to the citizens of the State of Alaska, but not allow them to speculate at the expense of other taxpayers, I would suggest that the following change be made to the bill: "In the event that a leaseholder sells or assigns his lease to another party, a re-determination of the annual rental shall be made pursuant to Paragraph 4E and the purchaser or assignee shall be obligated to pay that rental until the next rental adjustment period." I feel this amendment will allow the Lessee to have the advantages and protection provided for in this bill without allowing him to receive a windfall profit at the expense of the State and its other taxpayers.

In sub-paragraph J, where the term MAI Appraiser is used, a more proper definition would be "an appraiser who is a member of the American Institute of Real Estate Appraisers holding the MAI designation". Since there are now a number of Alaskan appraisers who have the MAI designation, it might be advisable to require that, in addition to holding the MAI designation, the appraiser also be a resident of and doing business in the State of Alaska.

It is my opinion that resident appraisers will be able to do a better appraisal at less cost. If this provision is not included in the bill, in some cases, Lessees may bring in non-resident appraisers (I am assuming that the State will uphold it's philosophy of local hire) who, because of their lack of familiarity with Alaskan conditions, will require a greater time to complete an accurate appraisal. Since the State will be paying half of the cost of such appraisals, I see no justification for the taxpayers of Alaska to pay the cost of travel and lodging for non-residents, plus the additional fee that will be required for a non-resident to familiarize himself with Alaskan conditions.

While I am sure that no bill can be written that will be 100% satisfactory to everyone, I feel that with the above-referenced changes, this bill will be a marked improvement over the present law. If I can provide you with any additional information, please feel free to call on me.

Sincerely,

REAL ESTATE SERVICES CORPORATION

Attention: Finance Committee

Re: Senate Bill No. 159

Gentlemen:

Why does the legislature want to make State leaseholders a favored class of citizens? State lands should be managed for the benefit of all taxpayers.

If you adopt a ten year initial period and limit rent increases to 50 percent, you are locking the State into a disadvantageous position.

Assume that land values go up only ten percent per year. This is much less than values have typically increased during the last ten years in all areas of Alaska.

Assuming the value at the beginning is $1.00 per square foot, then increases are compounded as follows:

Year	1	-	$1.00 per square foot		
"	2	-	1.00 x 1.10	=	$1.10
"	3	-	1.10 x 1.10	=	1.21
"	4	-	1.21 x 1.10	=	1.33
"	5	-	1.33 x 1.10	=	1.46
"	6	-	1.46 x 1.10	=	1.61
"	7	-	1.61 x 1.10	=	1.77
"	8	-	1.77 x 1.10	=	1.95
"	9	-	1.95 x 1.10	=	2.14
"	10	-	2.14 x 1.10	=	2.36
Review Yr.	11	-	2.36 x 1.10	=	2.59

However, rent could only be increased to $1.50 per square foot. The lessee has a leasehold interest of $1.09 per square foot. Assuming land values continue to increase at ten percent per year, the value at year 16, when the next review takes place, is as follows.

	Year	11	-	$2.59		
	"	12	-	2.59 x 1.10	=	$2.85
	"	13	-	2.85 x 1.10	=	3.14
	"	14	-	3.14 x 1.10	=	3.45
	"	15	-	3.45 x 1.10	=	3.80
Review	"	16	-	3.80 x 1.10	=	4.18

However, the rent can only be raised to $2.25 per square foot ($1.50 + .75). The leasehold interest has increased to $1.93 per square foot.

For succeeding years, the leasehold interest increase is as follows:

Year	Value	Rent	Leasehold Interest
21	$ 6.73	$ 3.38	$ 3.35
26	10.83	5.06	5.77
31	17.45	7.59	9.86
36	28.10	11.39	16.71
41	45.26	17.09	28.17
46	72.89	25.63	47.26
51	117.39	38.44	78.95
55 Lease Ends			

The only way that the taxpayer will get a fair return on his lands is if the rent reviews are based on Fair Market Value or Fair Market Rental without a limitation on rent increase.

Sincerely,

Paul P. Dirksen

TESTIMONY ON SENATE BILL #159

By Joe Wilhour

Ladies and Gentlemen:

First, I would like to thank you for your time and efforts in consideration of our "headache"; and second, I would like to request you "hang in there" -- we're improved, but not cured.

On my lot 7-A, Block 3, Alaska Industrial Subdivision, the proposed lease payments of Bill 159 would total over three million dollars. That's 45 times the 1975 valuation, or approximately 600 times the appraised value when first leased in 1958.

I contend that this is not a fair lease. Not to me, not to future leaseholders, and not to the State of Alaska. It will not encourage development; in all probability it will force the leaseholders to do unto others as the State of Alaska has done unto them; increase our tenants' rent, increase the price of our products and services to the extent they are not competitive, thereby forcing us out of business and to abandon our State leases. Within 10 to 15 years, Section 16 could easily be mistaken for a slum area.

I built a 12,500 foot warehouse for over $200,000.00, and have it leased to Mammoth Trucking for 35 cents per foot, which is a fair market value for the location. This is a gross annual income of $52,500.00. With annual expenses as follows:

Bank payments	$21,000.00
Utilities	4,274.59
Taxes, Insurance	6,311.14
Maintenance, Misc.	5,400.64
Land Lease	3,940.00
Total:	$40,926.37

This produces a net profit, before taxes, depreciation, inflation, vacancies, etc. of $11,573.63. Senate Bill #159 would allow me to hold the property for approximately 10 years, which would relieve my present situation and allow the leaseholders time to seek additional corrective legislation, but both my inability to obtain bank financing and my common sense would prohibit improvements or further development. Look at the statistics:

ALASKA INDUSTRIAL SUBDIVISION LEASEHOLDERS ASSOCIATION

EFFECT OF SENATE BILL #159 ON MY PROPERTY LOCATED BLOCK 3, LOT 7A, ALASKA INDUSTRIAL SUBDIVISION. LOT SIZE APPROXIMATELY 64,000 SQ. FT. APPRAISED AT $65,640.00 TO BE REAPPRAISED 1978.

TERM	% INC TERM	% ORIG VALUE	NEW APPRAISED VALUE	LEASE PAYMENTS	ACCUMULATED COST TO LEASEE

50-55	50%	3,844.38%	2,523,451.00	1,009,380.40	3,001,876.12

1. Above is MINIMUM
2. Rates are compounded
3. When lease finished, leasee will have paid 45.73 times value (3,001,876 ÷ 65,640)

What amount would I, or anyone, have to invest to make this land support a State lease under SB#159? And where and how could it be financed?

Regardless of the formula used, as I said before, whether it be a percentage of the reappraised value every five years, a comparison to private leases, the number of quills on a porcupine divided by pi, or the number of moose in the Mat-Su Valley times the square root, if the total monetary figure exceeds six times the appraised value of the land at the time of lease, it will not be a fair rental that will enhance development and be acceptable to future leasees.

This is but one example of many, so again I request your cooperation. Put your feet in my boots and walk a mile, and I'm confident we can pass a better law that will be fair to present leaseholders, more desirable to all future leaseholders and non-leaseholders, and beneficial to our State Government both now, and in the future.

THE FIRST NATIONAL BANK OF ANCHORAGE

February 22, 1977

Mrs. Kay Poland
Resource & Finance
Legislature of Alaska
Juneau, Alaska

Dear Mrs. Poland:

This concerns our bank's attitude in providing funds for the purpose of financing leasehold improvements on land leased from the State of Alaska.

Our loans on improved real estate are governed by certain regulations made by the Comptroller of the Currency, United States Treasury Department. Any leasehold, against which we are lending money, must have a firm lease extending at least ten (10) years beyond the term of our loan. In calculating the amount of the loan against a leasehold, we must project the expenses incident to the operation of the property. This includes lease payments that are subject to increases of an unknown amount. We are understandably reluctant to make such loans.

Our bank's policy is to loan against leaseholds for a term in which we are assured of a reasonable fixed payment. We will not make loans when we are not able to accurately forecast the lease payments during the term of our loan.

Sincerely,

David G. Freund
Vice President

DGF/er

IN SUPPORT OF THE LEASEHOLDERS BILL

In support of the 6% annual rental rate, I would like to request you re-read the Hearing Panel Proposed Decision and Recommendations, page 12, ¶4, which quite clearly defines our position.

The total lease rental for the 55 year period proposed in our bill would amount to $379,411.00. This is 5.78 times the 1975 appraised value, or 75.88 times the 1958 appraised value. Under SB#159, the total lease rental for the 55 yr. period would amount to over three million dollars. This is 45 times the 1975 appraised value, or approximately 600 times the 1958 appraised value.

In my opinion, our bill provides the maximum rental to be beneficial to all concerned; an excellent return to the State, a fair settlement to the existing State leaseholders, a fair opportunity for future leaseholders, as well as the maximum rental allowable to encourage development and bank financing. Whereas SB#159 is not beneficial to all concerned. It is a maximum return to the State from current leaseholders with existing improvements, from 10 to maybe 15 years when they will be forced to give up their leases, it is not a fair settlement to the existing leaseholders, it is not a fair opportunity to future leaseholders, it will not encourage development, and it is not acceptable to the banks for financing.

I would also suggest the elimination of the floating easement be added to SB#159, as recommended by the Hearing Panel on page 19, ¶5 of their report.

Joe Wilhour

Subject: State land Leases

The following comments, ipinions, and recommendations regarding State land leasing are offered to further acquaint you with the bill we are submitting this session.

I first leased property in Section 16 in 1958 in an advertised competitive bid sale. Mr. Chipperfield, Territorial Director of Lands at the time, told the group that we would pay no taxes on the land because we didn't own it. This is not true - the city of Anchorage came up with what they call lease-hold-interest, and we have paid taxes every year. Also, we were told that over the 55 year period we would be paying more than the land could sell for, but not having to pay taxes, it would be very little more. Many of the present leaseholders acquired their land at the original sale and were told that the State wanted to develop a tax base, and develop the land.

I was in my thirties in 1958, so a 55 year lease represented my life span. Either through stupidity or unwarranted faith in the integrity of the State, I have spent most of my, and my wifes, available time and money that was not absolutely necessary for a growing family, on the development of these leases. A lot of this time and money was spent improving the land itself; stripping the trees and tip soil, filling a large gully which ran from the road through the property and along the south side and adding gravel. I now lease these improvements back from the State.

Until recently the State has adjusted our rent every five years from approximately 40 to 100 percent, which is high, but workable. Now that the land has been developed and put to good use, forming a tax base by the investment of millions of dollars, and creating employment for over a thousand people, the State has adjusted our rent 850 percent to over 1000 percent.

Are we reverting back to a feudal system? Or State Land Baron vs sharecropper leasees? Or a con-game? One wonders, but with lease payments so high it's the equivalent of the State condeming the land! Through their reappraisal, the State has, in effect, condemed the leases.

Under the current policy the State has turned a 55 year lease into a 5 year lease. This year there has been less development in Section 16 than in any other part of town. It is impossible for the leaseholders to get financing, which has stopped development. See paper from the First National Bank of Anchorage attached. One questions whether it is advisable to repair a leaky roof.

My position is impossible. My annual rent increased from $3,940.00 to $32,800.00. I cannot increase my investment because the financing has been made impossible. I cannot raise my tenants rent and compete with fee-simple land rents. To raise my rents accordingly will only create vacancies and undermine my chances of making lease payments if and when the State does come up with a fair rental. And I cannot afford to just walk away from my 20 years investment of time and money, with only part of the money repaid to the bank.

At the 1975 rate of $3940.00 per year, I would pay the State, for my less than 2 acres, a lease rental for my remaining 37 years, $145,780.00 - nearly 15 times the original appraised value, plus what's already been paid the past 18 years.

At the current rate of $52,800.00 per year, and with no additional reappraisals but precariously assuming I could hold onto the property, I would pay the State for my less than 2 acres, a lease rental for my remaining 37 years, $1,213,600.00, plus what's already been paid the past 18 years.

If the State raises my rent the same 850 percent every 5 years, I would pay the State a lease rental of my less than 2 acres, for my remaining 37 years, $272,151,090,464.00, plus what's already been paid the past 18 years. Fantastic!

It appears the State not only wants their land back, but also my improvements! Who pays the bank? What amount would I have to invest to make it support a State lease? Few, if any of us, would not give up our leases if we could recover our investments.

In comparison to the Fishing land leases, the lease for set-net fishing, not to exceed 10 years, quote, "The Director shall establish a reasonable rental for the lease, equal to the Administration costs involved in processing the leasehold application." These leases, however, may produce large profits for the leasee with small, comparable investment, and cost less than $50.00 a year.

In comparison of individual tracts of land, Bob Penney and the Teamsters Union are leasing larger tracts, of greater value, for pennies where many are paying dollars. Mr. Penney averages about $750.00 per acre. The Teamsters Union averages about $3,500.00 per acre - with no reappraisal. My lease averages of $19,000.00 per acre! If I, and my banker, had chosen to be dishonest we could have arranged a similiar situation, but that is not justification for bias on the States behalf.

In comparison to housing, the State has passed a law of rent control whereby the leasor must justify any housing rent increase. No law exists for State leaseholders and rents may be unjustly raised. No law states we cannot just pass this increase on to our tenants, but there is no way we could still compete with fee-simple land rents so we will only create vacant land and buildings. Because, however, additional expenses must be commensurate with additional income if we are to survive financially, a large measure, or all, of such additional expense must be passed on to our tenants, or added to the cost of our product or services. The State should not be the leader increasing such inflation, but should take every action possible to hold it down.

In comparison to other land lease policies, the Mat-Su Borough pamphlet of June 26th states the lease amount is not subject to reappraisal. The highest bid establishes the annual rental for the 55 year term of the lease. With the capital move to Willow, how will the State lease land in the Willow area?

Some possible recommendations:

1. Level payments, similar to the recent Mat-Su Borough auction, not changed every time the administration is changed. Eliminate the State "open-end" policy. A stable lease enables the leasee to plan ahead and this ridiculour predicament won't happen again in the future.
2. Some arrangement should be made whereby a lease is bankable. A long term lease should be comparable and competitive in price at time of lease, with fee-simple sales.
3. Taxes, if any, on the land itself, should be at a percentage rate, on all state-owned lease land.
4. Consideration and lowering lease rate scale for value of improvements made, due to additional taxes incurred and as incentive to develop industry, and protect human rights.
5. Some method to renew a lease 15 to 20 years prior to its current expiration date, in order to secure financing and continue to develop the property.
6. Maximum return for State leased land should be a fair rental encouraging leasing and development of additional State land, and not exorbitant returns and the eventual forced voidance of the approximately one percent of state land now leased. Forced voidance of the present land leases, and continuance of the existing policy so no one will be dumb enough to lease additional lands, will surely not benefit the State, and just as surely will not benefit her residents.
7. The present blanket easement should be eliminated from the leases not only because it is not bankable, but also because if exercised, it would take all value out of the leasehold interest, and could ruin the leasee business without any compensation.

As I see it, the recommendations should result in a lease policy that make leases desirable to you as individuals, and all residents of the State. They shouldn't change every 5 years. They should be bankable and have a value, especially after payments have been made for some 20 years or more. They should, as the Constitution states, "enhance development". The State will get their maximum return by taxing the development and its income, and by being able to lease their millions of surplus lands. Reappraisal and any adjustment of increased values due to inflation should come at the end of the lease period. If this can't be done, the land should be sold, allowing credits for those who have for a long time paid lease rentals, paid to improve the land itself, and paid to develop the property into taxable use.

The State gets three shots at its leaseholders; (a) land lease rental payments, (b) taxes on improvements and (c) income tax. By taking an unfair advantage of the lease rental payments, the State will, or possibly has already, eliminated all three.

On Thursday morning, Dec. 16th, I attended the Governors Advisory Committee meeting wher two representatives of F.H.A. testified that the appraisal clause and other parts of the State leases would not be acceptable for F.H.A. commercial or residential loans.

Mr. Paul Troch, (344-4665) a constitutional lawyer and teaching professor testified he has clients who are going to bring suit if that is the only way to get the State to comply with the regulations

provided in its charter, which reads the State must provide a way to distribute its lands to the public for development.

Thursday afternoon I saw Mr. Richard Ullrich, Loan Examiner of the State Veterans Affairs. After explaining the terms of our State leases, he said the State Veterans would not, or could not, make a loan under the terms of our leases. Expecially the reappraisal clause which the State Division of Lands claims is a fair rental.

Also, Thursday, I visited the Alaska State Bank where I couldn't help but notice the pictures of Anchorage, taken about 1915, on the walls. And compare the Anchorage of today through the windows. I wondered what Anchorage would look like now if the Territory, or Federal Government, had used the present state land policy to develop the area.

There is no way the leaseholders can unreasonably increase the price of their rentals, products, or services, every five years to meet the increased rentals which the State Division of Lands claims are fair. Local competition in the town and the State, as well as State and Federal regulations, such as the trucking industry who must abide by ICC regulations, eliminate the possibility. Other businesses in town, grocery stores, department stores, banks, etc. do not raise the price of their products and services because of the appreciation of the land their businesses are occupying. They must compete too.

It would seem the State is in the same position with their excess lands as the banks are with their money. Both need people to manage it. The banks, thanks to competition and regulations, do not change their interest rates every five years on committed loans. The State should be forced by law to adopt the same policy and not be allowed to take advantage of their monoply of State land, or the few dumb tenants they have trapped.

I think that six percent annual rental of the original appraised value of the land for 55 years would be a fair rental which would enhance development. This would net the State over three hundred percent more income than could be derived from the sale of the lands, plus considerable savings in State administration and litigation costs, plus the return of the land to lease again or re-evaluation of the leases at their expiration, which would be acceptable to the citizens of the State, be they present of prospective leaseholders, or non-leaseholders who none-the-less derive benefits from the money collected.

The problem as I see it, is not the few leasees who now hold State leases. They are insignificant. It is restoring the credibility of the State as a monopolistic landlord, and creating a workable policy of developing and utilizing a portion of Alaskas millions of acres of land, whether by leasing or selling. The people of this State cannot afford, and will not allow this, or any other administration, to lock up their 100 million acres of land in a non-productive policy. A percentage of it must be made productive to support the parks, animal habitats, scenic lands, wild rivers, and so forth.

Senator Stevens newsletter is attached, informing us of an amendment

signed by President Ford with regard to Federal leasing in Alaska. The law will allow individuals to gain a right to and an interest in federal lands by actively working to develop and use the land productively. I intend to find out what their lease policy is.

The land policy of the State, if not changed or altered, has been and will be, more devastating to the State and its present leasees than the 1964 earthquake. High prices are caused by the scarcity of land, which is caused by the State.

I would like to present the paper I gave to Commissioner Martin showing the effects of a 5% annual increase in appraised value. It shows the State would collect over 13 times the value of the property in 55 years, plus the return of the land. The State would collect $131,967.00 for property valued at $10,000.00. Commissioner Martin said this was much too high and overvalued. I then asked him to visualize and calculate raises of 40%, 100%, and 850%, the raises we have been accessed, in lieu of the 25% as shown on the first three re-appraisals.

Th Commissioner said the State did not want our land back, but he did not explain the ridiculour increaase in our rentals.

I saw Mr. Whitehead, one of the Governors Aids, who among others, said there were those who did not believe in individuals owning land, though he didn't name any, and I have not net any who have admitted this belief. He said I was on the defensive- this I will admit. I asked him what other position I could take considering our past experience with the Division of Lands. Except for a few slips in our recent hearing, I have not heard of any evidence from any person in the administration making any effort to resolve some of the deficiencies in their land lease policy. Surely they have had many opportunities.

Possibly if we could have seen the Governor first, about six months ago like we requested, we would have had a solution long ago. I would like to make the sugestion this committee recommend that we see the Governor before he makes his final decision so that he can get our information first hand.

In support of our bill - first the proposed decisions and recommendations of the hearing we had with the Division of Lands. It appears that their decisions were almost entirely in our favor, though I don't feel they addressed the five year reappraisal fully. Many of the Legislators we contacted said the only solution would be for the State to sell the land, giving preference and some credit to the leaseholders who have paid rent, improved the land and developed the land for a long period of time. This would return to the State 100% of its value, but no return of the land.

Others said we should have a lease with l vel payments of 6% of the value for 55 years, which would return to the State 360% of the value plus return of the land.

Still others said they should use 8% with the above formula, which would return to the State 480% of the value, plus the return of the land.

These proposals were not submitted - not because we thought they were unfair to the Statem or the leaseholders, but because we did not think they would pass the Legislature and the Governor.

Our bill will return to the State almost 600% of the value, plus the return of the land. In our conference with John Radar, he asked us if we owned the land, would we lease it under the terms of our bill? I answered Definitely Yes! If I could collect about six times the value of the land over a 55 year period and still retain the title with no taxes, or expenses, and then pass it on to my children to release or sell at a new appraised value, it would be an excellent deal!

I also told him that I would have no problem lobbying our bill in the States behalf, except that I am not sure it would be acceptable and marketable to future potential leasees. Certainly it should be more acceptable than the States present lease policy, and return to the State a much greater amount of money.

Mr. Radar said we are dealing in future money with probable less value. The banks are dealing with future money with probable less value, and because of inflation also have a declining principal value. The State should be satisfied with future money in order to get present money. But in addition, they will get an accelerated principal in the return of their land. There is very little business anyone can conduct without committing themselves to accept future money.

Lease value is determined by the terms of the lease. Surely sophisticated bidders will bid up the price to where the State will get their maximum value. The State can set the minimum price, see if the leases will sell and adjust the price in future sales, up or down, according to the response of the buyers. But they should not wait until their leaseholders have devoted 20 years of their lives developing State leases, then raise lease rentals to the extent that they make unsolphisticated, negative state leaseholders out of trusting leaseholders. I think our recent hearing proved that we are negative leaseholders. The terms of the lease we now have are negative. Negative to the degree that it has reduced both the value of our leases and improvements to almost zero. Terms of the lease determine the value. Future sales will be to the highest bidder and should assure the State of maximum return for their land.

One State Senator stated he thought the State has destroyed their leasing program and their creditability beyond repair, regardless of their future policy.

The State claims our leases are undervalued. I would say they are wrong. I and others have paid in the past seventeen years several times the value of our leases, and will in the next 38 years pay for it 17 times more if our proposed bill is passed. Is that an undervalued lease?

In closing, I would like to state that I have been an Alaskan since 1941 with continual residence except for my years in service from 1943 to 1946. The last 20 years I've worked to improve this leased land and now have several substantial buildings, tho I owe the bank over $400,000.00 in personal guaranteed loans. I've worked hard. I've provided for increases such as inflation and taxes, but who of us can

afford 850 percent increases? We who have paid many times the original value, held it, and improved it, should be entitled to justice. It seems impossible that 20 years of work and investment can be wiped out with one stroke of a pen - in this country! Particularly so, when it does not appear beneficial to the State Government, or her resident Alaskans.

I ask again for you to give our bill your most considered deliberation and wish you well in coming to a fair decision. Thank you for your time.

Joe Wilhour
376-5601
Box 740, Wasilla, Alaska 99687

THE FIRST NATIONAL BANK OF ANCHORAGE

June 18, 1976

Mr. Joe Wilhour
Anchorage, Alaska

Dear Mr. Wilhour:

We have reviewed your informal request to consider financing a new building on Commercial Row, the loan to be secured by an assignment of the State land lease and the building placed on the lease.

At this time it is impossible for us to give you a commitment for construction until we can confirm what the future rental on the building will be. We have reviewed the other financing that we have done for you on your property and find that the quarterly rent has been raised from $996.00 to $8,200.00, an increase of 850%. A further review of the lease indicates that every five years it can be similarly raised.

Under these circumstances, it is impossible for us to guess what the future land rentals will be, and therefore, unless you are able to secure a lease of an equal term to the mortgage wherein the tenant agrees to pay the increased land rental, it will be impossible for us to advance the credit requested.

Sincerely,

D. H. CUDDY
President

35-40	5%	25%	596.06%	59,604.66	13,411.02	68,055.18
40-45	5%	25%	745.08%	74,505.83	16,763.77	84,818.95
45-50	5%	25%	931.35%	93,132.29	20,954.71	105,773.66
50-55	5%	25%	1,164.18%	116,415.36	26,193.39	131,967.05

At the end of a typical 55 year lease using a reasonable 5%/year increase in appraised value, the State of Alaska collects $131,967.25 for a parcel that cost $10,000.00 originally - still owns the land, and lease holder has no accrued equity, to compare this to fee simple title for appraisal is wrong and not good business on the part of the state.

If the parcel changes hands during a 55 year lease the state could place a reasonable tax on any net lease holder gain, for example 5%, this would leave incentive for investors, developers and not unfairly penalize individual lease holders who want to live on state lease land.

In view of the example above how can reappraisals amounting to increases of from several hundred to over one thousand percent in a 5 year period be justified?

RESPECTFULLY SUBMITTED

S-N Steve N's News Letter

TIONAL PARK -- Claudia Louis, a member of the Washington, D.C. staff, presents the ceremonial pen used by President Ford to sign S. 98, the Klondike Park bill, into law to Mayor John Edwards (right) of Skagway and Ward A. Hisman (left), Superintendent of the White Pass & Yukon Route Railway.

BLM Bill

President Ford has signed a bill which will allow Alaskans to continue to use public lands to build homes, farms, or trade or manufacturing concerns, under provisions added to the bill in the Senate by Senator Stevens.

The amendment allows the Secretary of the Interior to grant long-term leases for habitation, cultivation, trade or manufacturing on the lands.

The National Resource Lands Management Act, S. 507, also known as the BLM Organic Act, repeals homesteading in 10 years and this amendment was needed to enable individuals to continue to use and develop public lands, despite the repeal of homesteading laws.

The authority of the new law -- designed to provide for the management, protection and development of public domain lands not committed to other uses -- extends to the unreserved federal land in Alaska remaining after Alaska Native Claims Settlement Act and Statehood Act withdrawals are made.

It was pointed out that the passage of this law with this amendment will provide some type of incentive for people to come in and carve a livelihood out of the wilderness. The law will allow individuals to gain a right to and an interest in federal lands by actively working to develop and use the land productively.

The leases could be used to build new communities, farms, small sawmills and small manufacturing plants needed in isolated rural areas.

Mid-Decade Census Law

A bill which could mean substantially increased federal funding for Alaska from programs based on population has been signed into law by President Ford.

The bill, cosponsored by Senator Stevens, authorizes a national census and July 1, 1975, Alaska's population increased by 16.3 percent. An official census every five years would allow this rapid change to be reflected in federal funding and programs.

The Office of Management and Budget estimates that about $39 billion in federal funds are distributed every year to the states according to formulas based on population.

Wonder what their Lease policy is?

Alaska State Legislature

Senate

JUNEAU, ALASKA

Memorandum

TO: The Honorable Joe Orsini

DATE: March 18, 1977

RE: Senate Bill 159, which would change the State's leasing policies with regard to the methods of determining annual rents.

FROM: Vicki Cunningham vickie

This memorandum addresses various issues which have been raised in conjunction with recent rent increases on state leased lands and, as you requested, comments on points brought up by leaseholders protesting the readjustment of their rents on a variety of grounds. Only the area of surface leasing of state owned lands has been investigated.

In summary, it was found that the rent increases appear to be in compliance of current, applicable statutes. However, it was discovered that numerous irregularities and inconsistencies in the regulations which govern surface leasing of state lands. The various shortcomings and ambiguities of the regulations have contributed significantly to the leaseholder's perceptions that the increases are illegal or arbitrary.

Various sections of Title 38 direct that state lands shall be selected, sold, or leased to provide the maximum benefits to the people of the state. It's therefore difficult to find fault with the Division of Lands, in the absence of some other statutory definition, for attempting to maximize the monetary returns on state leased lands.

The Division of Lands admits that in the past the Appraising Section in the Division of Lands was viewed as a "poor relation", which accounts for the continuing low rents over the years in violation of the law which provides that "... no land may be sold or leased for less than the approved, appraised market value..." (38.05.310). The Division is now applying the law, thereby correcting past neglect which resulted in low rental rates on state leased lands, benefitting the individual leaseholders, but not necessarily the people of Alaska in general.

The statues provide that the initial rent shall be determined based on the "approved, appraised market value" (38.05.310), and that subsequent readjustments of the rents be based on a "reappraised annual rental value" (38.05.105)

Much controversy has arisen over the term "annual rental value". Protesting leaseholders claim that rental value cannot be pegged to the market value, that it is something less.

From the above it appears that rental value is established by market conditions. The problem which has and continues to exist in Alaska, though, is that in most instances the state (Division of Laneds) makes its own market. There is no private market to

speak of for agricultural, grazing, recreational and other classified lands. Therefore, the state historically has used a percentage rate of the fair market value instead of rental value to determine rents on leased lands. As mentioned earlier, where a private market exists the Division is charging market rental value.

Until 1968 this rate was five percent. There is nothing in writing which explains why the rate was set at five percent, but the five percent figure was a minimum amount derived from the Public and Charitable Use statute of the Alaska Land Act which stipulates that the rental shall be not less than five percent of the fair market value on school, university and mental health, or acquired lands (38.05.315(d)). Also, the rate of interest on the unpaid balance of contract sales of state lands was five percent at that time, and the reasoning, according to Division personnel, was to standardize the contract sale and contract rent rates. In 1968, then Commissioner of Natural Resources, Tom Kelly, raised the rate to six percent because he felt five percent was too low. Again, there is nothing in writing which would substantiate this. The Division of Lands now charges six percent of the fair market value when there is no private lease market and the lease is of a non-revenue producing nature. The Division charges up to eight and one-half percent (8 1/2%), or the market rental rate, when a private lease market exists and when the land is a potential revenue producer; i.e., land which is classified and/or zoned commercial, industrial, or residential.

The raising of the lease rental percentage rates, in some instances (such as the Alaska Industrial Subdivision), together with reqppraising the leases based on fair market value have been responsible for the steep increases. The Division of Lands is quite cognizant of the potential hardships such a policy creates for certain leaseholders, particularly for those individuals who hold non-income producing leases.

Much of the bad feeling that was generated over the rent increases probably could have been avoided if the Division of Lands had been more approachable and open in what it was doing. By not being advised of significant changes in policy, even when they are justifiable and defensible, and by being confused by or ignorant of appraisal terminology as used by the Division of Lands, it is not surprising that leaseholders feel that the Division has been acting arbitrarily and capriciously.

The charge has been made by several leaseholders in the Alaska Industrial Subdivision that their land has been reappraised improperly because improvements to the land have been taken into consideration, even though the lease states quite clearly that the land is to be reappraised in a state of improvement similar to that of the land described in the lease at the time the lease was issued.

("... in a state of improvement similar to that of the land described herein at the time this lease was entered into.").

The Division of Lands maintains that while leaseholders cannot be and, for that matter, have never been penalized for the improvements made to their leased lands, improvements which were made at public expense and which as a consequence raised the value of the area or the lands under lease should be reflected in the reappraisal. We are told that this practice is consistent and standard procedure in the reappraising business.

Investigations indicate that substantive and/or long term relief to the leaseholders regarding that periodic rent adjustment of their leaseholdings is probably not possible under the existing statutes. If it is believed that increases of rents should be limited in some way, or that rents be readjusted on a different basis than percentage of fair market value or fair market rental value as is the practice now, it will be necessary to legislate to that effect.

No new legislation will be necessary to require the Department of Natural Resources (Division of Lands) to bring their regulations into compliance with existing, applicable statues or to "clean them up" so that the ambiguities regarding meaning and the inconsistencies of the language and definitions used in the regulations are eliminated. While no new legislation is necessary for the revision and up-dating of the regulations, it is recommended that the applicable, authorizing statutes be revised as necessary to be consistent and clear throughout. They are not now, in some instances.

Several possible solutions have been recommended by the Alaska Land and Lease Owners Association. They are so follows:

1. Lands could be sold outright rather than leased.

2. Lands could be leased with an option to purchase at end of five years.

3. Rental could be:

    a. Fixed for the fifty-five year lease period with leasee charged a percentage of any gain realized.

    b. Increased annually at a fixed rate such as five percent.

    c. Increased at the inflation or recession rate reflected in the Consumer Price Index.

Because the rents were so low, potential leaseholders were willing to pay substantial bonuses to take over leases from previous leaseholders.

- use of M.A.I. expensive & not applicable around rest of state # 12 in AK.
- Calais in Arch. going at 7%
- the impressive figure analogy at 9½ times as used for state budget in 55 yrs. and it was # 33 billion
- 2 principles got ~~17~~ 00 acres of land S. of Willow a few months before & after cap. zone rate at #6-14 an acre/yr. (2400 total amnt at that time for that price)
- different terms in lease document for " types of lands
  - grazing
  - recreational
  - residential
  - industrial
  - commercial
- leases from private sector tailor made

- give lessee a credit for his improvements against his lease because ultimately will revert back to state

- lease from private sector (downtown anch): 11% max increase annually as fair lease rate auto 25% increase every 5 yrs. plus all taxes

- National Banking Act states that any leasehold, against which a bank loans money, must have a firm lease extending 10 yrs. beyond the term of the bank loan. HOWEVER, if the firm lease is for 15 yrs., the bank can and will make a loan for 5 yrs. ∴ 15 is min.

- the ~~banks~~ appraisals would go back to '70 figures

- banks want a ceiling, period. a COL clause that had a 10% max. annual ↑ is still a ceiling & acceptable to banks

MEMORANDUM State of Alaska

TO: The Honorable Guy R. Martin
Commissioner
Department of Natural Resources

DATE: June 4, 1976

FILE NO:

TELEPHONE NO:

FROM: AVRUM M. GROSS
ATTORNEY GENERAL

SUBJECT: Waiver of reappraisal and adjustment of rent

BY: Rodger W. Pegues
Assistant Attorney General

This is further to the opinion of June 1, 1976, by Assistant Attorney General Reeves on this subject. In that opinion, we advised that you were without authority under then existing law to grant a blanket waiver of all rental increases exceeding 100 percent which was requested by the Alaska Land & Lease Owner's Association. Since that opinion was written, new legislation was adopted which further restricts your authority to grant a waiver. FCCS SCSHB 139.

AS 38.05.105 has been amended to delete the language authorizing a waiver or extension of reappraisal "when development of the land is not otherwise possible due to special conditions" and to provide for an extension or waiver "only if residential development actually occurs, and only if it is necessary for obtaining primary long-term financing." As a result of the amendment, the Director of the Division of Lands may now grant a waiver or lengthen

HOUSE BILL NO. 387

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the leasing of state land other than for the extraction of natural resources; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.05.085 is repealed and re-enacted to read:

Sec. 38.05.085. TERM OF LEASE. (a) The lease shall provide that

(1) for the initial 25-year period of the lease, the lessee shall pay the state a fixed base annual rental to be agreed upon by the parties in compliance with the provisions of this chapter; however, this annual rental may not exceed 10 per cent of the fair market value of the property as determined in (b) of this section;

(2) the fixed base annual rental to be paid by the lessee shall be readjusted when the initial 25-year period of the lease has expired and, thereafter, every 10 years; and

(3) the readjusted annual rental shall not exceed 10 per cent of the fair market value of the property as determined in (b) of this section or 50 per cent more than the amount paid each year during the initial period or the preceding 10-year period, whichever is lower.

(b) When it becomes necessary to determine the fair market value of property as required by (a) of this section, the lessee shall appoint an M.A.I. appraiser and the state shall appoint an M.A.I. appraiser. The two appraisers so appointed shall, within a specified period of time agreed upon by the parties, make their appraisals of the property in

question. If the two appraisers agree upon the fair market value, the determination is absolutely binding on the parties. In the event the two appraisers are unable to agree, they shall together appoint a third M.A.I. appraiser who shall then make his appraisal of the property in question. When the third appraisal is completed, the two of the three appraisals which are nearest each other in their determination of the fair market value shall be averaged and the resultant sum shall be the fair market value of the matter in question and absolutely binding on the parties. All costs incurred in making the appraisals provided for in this subsection shall be borne by the state and the lessee equally.

(c) The lessee shall make advance payments of the annual rent or portion of it as the director, with the approval of the commissioner, may require.

(d) A preference right lessee of grazing or forest land may follow the payment schedule established in his cancelled federal lease or grazing permit if he so desires.

(e) Notice of all actions by the department affecting the rights of a lease or lessee shall be given to the lessee.

(f) A violation of a provision of this chapter or of a term or provision of a lease subjects the lessee to appropriate legal action, including, but not limited to, a forfeiture of the lease.

* Sec. 2. AS 38.05 is amended by adding a new section to read:

Sec. 38.05.103. RIGHTS OF HOLDER OF SECURITY INTEREST. (a) If there is a breach or default of a term of a lease or of the provisions of this chapter relating to a lease, the division shall provide written notice of the breach or default by personal service or by registered or certified mail to the lessee and to any holder of record having a security interest in the leased property. The notice shall also make demand upon the lessee to cure or remedy the breach or default within 60

days from the date of receipt of the notice and demand. If a lessee fails to cure or remedy the breach or default within 60 days, or within the additional time which the division may allow for good cause, the state may, subject to (b) of this section, exercise any right which it may have at law or as set out in the lease.

(b) If a lessee fails to cure or remedy a breach or default within the time allowed in (a) of this section, a holder of a security interest who has received notice under (a) of this section may cure or remedy the breach or default if the breach or default can be cured by the payment of money or, if this cannot be done, by performing or undertaking in writing to perform the terms, convenants, restrictions and conditions of the lease capable of performance by the holder. The holder shall act within 60 days from the date of receipt of notice under (a) of this section, or within an additional period as the director may allow for good cause.

* Sec. 3. AS 38.05.105 is repealed and re-enacted to read:

Sec. 38.05.105. PERIODIC RENTAL ADJUSTMENTS. (a) Each lease shall stipulate that at the conclusion of the initial 25-year period of the lease and at intervals of 10 years thereafter the annual rental payment is subject to adjustment. Charges or adjustments shall be based ~~primarily~~ on a reappraised annual rental value. However, if the director of the division of lands determines that residential development is the best use of the land, the reappraisal period may be lengthened or the readjustment waived in accordance with regulations adopted by the department. Before a waiver of rental adjustment is issued, the land shall have a current reappraisal. A waiver is valid only if residential development actually occurs, and only if necessary for obtaining primary long-term financing. The regulations adopted under this section shall ensure that the state receives a fair return from the land. impossible if land is limited by 50% ceiling

(b) The provisions of sec. 85(b) of this chapter are applicable to reappraisals of leases required by this section.

* Sec. 4. The provisions of this Act are applicable to state leases which are in existence on or before the effective date of this Act if a lessee under a lease elects, in writing, to be bound by this Act. When a lessee elects to be bound by the provisions of this Act, the state shall enter into a new lease with the lessee for a term equal to the full period of the original lease which is being terminated that is consistent with the provisions of this Act. However, for purposes of determining the annual rent by the state, the fair market value of the property which is used to establish the fixed base annual rental for the initial period of the lease may not exceed the fair market value as it was last appraised on or before January 1, 1975, or, if the lease was entered into after January 1, 1975, on the basis of the fair market value at the time the lease was entered into.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

DIVISION OF LANDS / 323 E. 4TH AVENUE – ANCHORAGE 99501

April 19, 1977

Governor Jay S. Hammond
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

The Governor's Ad Hoc Advisory Committee on State Land Practices and Procedures is pleased to present its final report and recommendations on state land practices and procedures. The Committee has met for 93 hours over a six-month period (including two evening work sessions and two evening public hearings), as well as spending a considerable amount of individual time in arriving at the material in this document. Along with stating general concerns, the Committee has made recommendations to effect the following: extensive improvement in the leasing system, including a recommended new lease form; provide predictability in appraisals and reappraisals; improve accounting and administrative procedures; provide flexibility and simplicity in disposal transactions; establish a system for land appeals/protests; and improve trust land management.

Perhaps the principal achievement of the Committee is the idea of a new leasing program for the State. The attached lease form, recommended for adoption, and a majority of the recommendations and statute and regulation changes contained in this report, would be instrumental in implementing a new program beneficial to both State and lessee, and are directed to that end.

We, the undersigned, submit this report as being in the best interests of the State and its clients. This report represents a consensus of the majority of the panel. Qualifying statements from those individuals who differ with specific portions of this report are attached.

The Committee appreciated the opportunity to serve on this panel.

April 15, 1977

The Honorable Jay S. Hammond
Governor, State of Alaska
Pouch "A"
Juneau, Alaska 99811

Dear Governor:

As a member of the Ad Hoc Advisory Committee on State Land Practices and Procedures, I wish to make the following comment on our final report of April 1977.

I do agree with the committee's report and stand behind it with one reservation. I do not pretend to have an answer but only concern. I feel that the lease rental increases being left open with a possible increase every five years to 100 percent is too much of a hardship on an individual leasing lands. I would think by having an open ended increase it would put an extraordinary heavy burden on the lessor for the purpose of financing any one project for the simple reason the banks would never know what the lessor would ultimately have to pay for the lease. Again, I state to you that I have no answer for the best possible solution, but only a great concern that I hope is given much more consideration before a final bill is passed through the legislator.

I appreciate the opportunity you have given me in serving with this committee.

Sincerely,

Carl H. Marrs
Land Manager

cc:
Representative Alvin Osterback
House Resources Committee

Theodore G. Smith, Co-Chairman

15 April 1977

The Hon Jay S Hammond
Governor, State of Alaska
Juneau, Alaska 99801

Dear Governor Hammond

It is with regret that I am obliged to file a minority report which substantially disagrees with that of some members of the Ad Hoc Advisory Committee on State Land Practices that you established in October.

My humble opinion is that the more vocal members overly involved themselves with minute administrative details while trying, as they said, to "maximize the monetary return" to the State. As a result they completely failed to recognize that unimproved land by itself will never provide the State with a substantial return. On the other hand, development of the land is the established vehicle by which jobs are provided and tax revenue accrue to both the State and local governments. This is why the State initially entered the land lease business.

As proposed by the Committee, the lease procedures are cumbersome and the lease forms restrictive. They do not reflect land lease practices in the private sector in that they are patterned after leases for improved property. The differences, of course, is that an individual who improves land cannot remove his warehouse, residence, cabin, or roads if the land lease rates are increased excessively as has been done. On the other hand, furniture and fixtures by themselves can be relocated with little loss.

I believe that the statutory provisions proposed by the administration and based on the Committee's interim report will effectively end the State's lease program as far as new leases are concerned. The Act definitely rules out H.U.D. financing and makes conventional financing questionable to individuals who cannot back up a loan with a substantial balance sheet.

A second point, and most important, is the fact that the committee has completely failed to offer you methods whereby you can offer relief to the many lease holders who have been subjected to unreasonably high land lease rate increases during, incidentally, a period when most private landlords were restricted by rent controls.

Please note Section 38.05.106 of the proposed act (H.B. No. 383). This provides for an individual to convert an existing lease to terms in a new document but Catch 22 is in paragraph c. This says "annaul rental value at conversion shall be based on the most recent reappraisal." This, of course, if adopted would mean no relief from the 1000% plus

increases that are now forcing many Alaskans off their improved and unimproved State lease land.

ADL officials will tell you that the proposed Board of Land Appeals is the source of relief. This may or may not be the case.

Governor Hammond, it is my hope that your schedule will allow you to personally look into this problem which requires a solution before this legislative session ends.

I urge you to withdraw the administration House Bill No. 383 and look toward other proposed legislation such as Senate Bill 159 for your solutions.

Respectfully submitted

William M. Mack

WILLIAM M. MACK

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

DIVISION OF LANDS / 323 E. 4TH AVENUE – ANCHORAGE 99501

April 19, 1977

Governor Jay S. Hammond
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

I concur with the attached report with one exception. The committee recommends on page 14 that the various trusts be free to contract with private individuals for management of trust lands. I do not believe that such a fragmentation of land management responsibilities is desirable. I fear that rather than making the management more effective, it would merely become more costly.

I concur that improvements in the trust land management program are needed and feel that the recommendations contained in the balance of this report will do a great deal to achieve such improvements.

Yours truly,

Theodore G. Smith, Director
Land and Water Management

FINAL REPORT AND RECOMMENDATIONS

April, 1977

THE GOVERNOR'S AD HOC ADVISORY COMMITTEE ON STATE LAND PRACTICES AND PROCEDURES

TABLE OF CONTENTS

)

I. SUMMARY OF THE COMMITTEE'S FORMATION, MISSION, AND ACCOMPLISHMENTS

On October 8, 1976 the Governor's Ad Hoc Advisory Committee on State Land Practices and Procedures met for the first time. The mission of the committee was outlined by Guy Martin, Commissioner of the Department of Natural Resources. He said that the Governor desired a small, precise, and efficient panel to find new ways to improve state land practices and procedures, not to set policy but to address the legal and technical aspects of disposal and other contractual relationships. Judgments, criticisms, and new recommendations were to be effected. Michael C. T. Smith, Director of the Division of Lands, clarified the mission further by adding that the committee should:

1) consider primarily revenue production, as opposed to social benefits, in its analysis;

2) make no assumptions as to state policy regarding the number, size, and location of land sales or other disposals; and

3) recommend changes that will be applicable to any likely state land policy.

The committee made a dedicated attempt to accomplish its mission. The tasks of studying existing statutes, regulations, and practices, and examining them in light of current land disposal and contractual relationships was formidable, but many members worked successfully to this end. Uncovering and identifying disposal and contractual problems involved considerable time and effort. Correct identification of a particular problem of this nature is a major step toward solving it. Perhaps the greatest success of the committee was discerning from Division of Lands personnel and state lessees the exact nature of their problems and concisely defining them. This action will have a lasting effect on Division of Lands personnel who are charged with formulating policy and procedures for land disposals and contractual relationships. The committee did make significant recommendations to effect changes in statutes, regulations, and Division procedures and policy. The lease form used by the State was revised to include terms and conditions that would offer benefits to both the State and the lessee. The recommendations of the committee in general give the State more flexibility to respond to client needs. Both client and State will benefit greatly if the committee's recommendations are carried out. The mission of the committee has been accomplished with admirable success in this regard.

Selected areas were covered, specifically those of sales and leasing. The committee states that this report is not meant, by any means, to be all-inclusive.

II. THE INDIVIDUALS ON THE COMMITTEE

The individuals who served on the committee volunteered considerable time and effort. Each member was selected on the basis of having specialized knowledge and expertise. The following list of members and their qualifications shows considerable diversity.

Mike Colletta - State Senator.

Hugh Gellert - President of Bear Fritz, Inc., a land development company with interests in Anchorage and the Kenai Peninsula.

Grant Giesler - Vice President of Alaska Mutual Savings Bank (resigned 1/5/77).

Herb Lang - President of Anchorage Sand and Gravel (joined the committee 1/6/77).

Jamie Love - Director of the Alaska Public Interest Research Group (AkPIRG).

David McCabe - Private Appraisor.

William Mack - Chairman of the Alaska Land and Lease Holders Association.

Carl Marrs - Land Manager for Cook Inlet Region, Inc.

John Norman - Attorney specializing in the area of corporate and natural resources law.

Lidia Selkregg - Anchorage Assemblywoman; Professor of Regional Planning at the Arctic Environmental Information and Data Center in Anchorage.

Theodore G. Smith - Former State Representative; present Director of the State Division of Land and Water Management.

III. COMMITTEE WORK PROCESS

The committee worked in a series of sessions, all of which were open to the public. Meetings were held weekly from October 8, 1976 to March 30, 1977 with the exception of 12/17/76 -1/5/77, when the committee recessed for the holidays. Two additional evening work sessions were held, and two evening meetings to hear public comments took place on 12/1/76 and 3/3/77. The meetings were loosely structured to accommodate those attending and to provide time for public comment.

The committee addressed the area of sales in its first sessions and proceeded to the area of leases in the later sessions. There was considerable public input from concerned individuals, and organizations, and many persons with specialized knowledge were invited. A great deal of support was provided by many state agencies, particularly by the State Division of Lands and the Department of Law. Considerable time was spent in information gathering. The Division often was requested to provide information on current procedures. Considerable information on Division activities was compiled. The changes recommended were made cautiously and are well supported by the information gathered. The committee's recommendations were made in the form of motions which were voted on by majority vote at the meetings. Recommendations were made freely as each subject area was explored.

Many meetings, including the two evening public comment sessions, were advertised in two newspapers. Press releases and newspaper articles appeared locally. Mass mailouts provided general information and announced upcoming meetings; lists of meeting dates were avilable at all sessions. The interested public was encouraged to contact the Division of Lands with any verbal or written questions and comments. Copies of materials used by the committee were available to the public and public comment was specifically taken on the committee's interim recommendations and draft bill to the Governor.

Almost all sessions were tape recorded in their entirety. Written minutes of meetings were time-keyed to the tapes to allow verification. The public is welcome to listen to or make copies of these tapes by contacting the Division of Lands.

IV. FINDINGS AND RECOMMENDATIONS OF THE COMMITTEE

The findings of the committee were numerous but can be grouped into major categories:

1) State lessees are dissatisfied with the state interpretation of lease contract terms, especially those relating to appraisal. Many lessees testified before the committee as to their grievances.

2) The Division's regulations covering sales and leases are often outdated and conflicting with statutes in some cases.

3) The State's lease contract form is not in line with commercial contracts and has many ambiguities in it.

4) Some state statutes in Title 38.05 are vague and unclear.

5) Payment methods for state sales contracts do not match those used in the private sector and may contribute to ballooning land values.

These findings outline the basis for the committee's recommendations which follow.

The recommendations of the committee concern statute, policy, and regulation changes, and can be grouped by topic.

The following five items are of <u>general concern</u>:

1. The committee wishes to note that in the course of public testimony it was apparent that Division of Aviation lessees had significant problems with their current leases. This subject was not within the scope of the committee's deliberations and, therefore, not addressed.

2. To comply with new statutes the committee recommends a major overhaul of Division of Lands regulations. The committee has found many of the regulations now in effect to be outdated and superseded by statutes.

3. The committee recommends that the Legislature apply the provisions found in Title 38 to those in Title 3, Title 19, and Title 35. The rationale would be to make land laws uniform among the Division of Aviation, Department of Highways, and Division of Lands.

4. Looking to the future, when the Division appraisal workload gets even heavier, the committee recommends that all (or all significant) appraisals be done by contract appraisers, with the Division appraisers functioning as review appraisers.

5. The committee stands opposed to Senate Bill 234, since the needs as outlined in this bill are covered by present legislation; the committee finds SB 234 not in the best interests of the State or the land management of the State.

In order to provide predictability in appraisals and reappraisals, for the benefit of the State and the public, the committee recommends the following:

1. At present many lessees are suffering hardship due to rent increases of several hundred percent. To provide for this relief and as a curative for such future increases the statutory provisions found in section nine of the attached bill are recommended. Provision for optional conversion of present leases to ones that will place a ceiling of 100% on rental increases every five years will largely prevent future hardship cases and resolve satisfactorily the present cases. With a rent ceiling, lease rental increases will be more predictable resulting in more financial stability for the lessee. (The Alaska Industrial Subdivision hearing panel recommends insuring predictability by placing some control over the size of the rental increase through utilization of a ceiling on the size of the increase in rental every five years.)

   Sections 8 and 9 of the attached bill will accomplish the above recommendations.

2. The committee recommends that land offered over the counter be reviewed at 90 to 120 day intervals to determine if an increase in value has occurred. This review is desired so that parcels are not undervalued by progressive changes in the market.

   Section 10 of the attached bill would accomplish this.

3. Since public notice is covered in AS 38.05.345 the change to "appraisal" for AS 38.05.310 is warranted by its present content. The committee recommends that land may be appraised 120 days in advance of a sale or lease. The change from 90 to 120 days would be desirable in that minimum bid information could be given to the public well in advance of the actual sale or lease auction. In addition 11 AAC 54.140 should be repealed.

   Section 10 of the attached bill will accomplish this.

4. In order to provide a workable solution to the problems of confidentiality of appraisal data, the committee recommends that the Director of the Division of Lands refrain from including confidential information in any appraisal prepared for the Division of Lands use.

5. The committee believes that the word "primarily" may imply special consideration to some lessees. In order to treat all lessees fairly and equitably the committee recommends that the word "primarily" be stricken. Deleting "primarily" would clarify the basis for reappraisal. (This was also recommended by the Alaska Industrial Subdivision hearing panel.)

   Section 8 of the attached bill will accomplish this.

To improve accounting policies and administrative procedures, and to protect the State, the purchaser and the lessee, the following are recommended:

1. The committee recommends that the Division of Lands have the option of requiring all sales contracts over $400.00 per year to be paid in quarterly installments instead of annual installments. It is the committee's belief that this would ease the financial strain on the buyer and yet not add significantly to the State's administrative costs. To provide quarterly payments would require a change in AS 38.05.065 with the present annual payments deleted and the quarterly payment provision adopted in its place.

   Section 3 of the attached bill would accomplish this.

2. The committee recommends that a $10.00 fee charge to cover administrative costs be given to those who make sale or lease payments with checks that are returned. It is a standard business practice to provide for such charges and is recommended to protect the State's interests.

3. The committee recommends instituting default charges for late sale or lease payments. At present, there exists no penalty and many payments are late. The form of penalty recommended is notification charges to all delinquent payments and penalty charges to payments delinquent more than 30 days. The notification charge would be $5.00 for the first notice, $20.00 for the second notice and a penalty charge of 6 percent of the payment.

It is suggested that the fee charges be adopted as a regulation under authority of AS 38.05.035(4)(5) as follows:

11 AAC 54.365. Delinquent Payments.

In the event of a delinquent payment, the following charges will apply:

1. A $10.00 penalty for payment with a check that is returned.

2. A $5.00 penalty for notification of payments over thirty-five days late.

3. A $20.00 penalty for a second notification of payments more than fifty days late.

4. A penalty of 6 percent of the rental or sale payment for payments delinquent by more than thirty days.

4. The committee recommends adding the following to the end of 11 AAC 54.190: Upon execution of the contract of sale the director shall cause the original copy of the contract to be recorded in the recording district wherein the property is located.

5. The committee recommends that 11 AAC 58.490 have a section .495 added: Upon execution of the lease the director shall cause the original copy of the lease to be recorded in the recording district wherein the property is located.

6. The committee recommends adding in 11 AAC 58.830 Recordation of Assignments, Modifications, Changes in Rental or Cancellations: Upon any assignment, modification, change in rental or cancellation, the director shall cause to be recorded an original document which recites the changes made in the recording district in which the property is located.

7. The committee recommends that somewhere in 11 AAC 58 a section be added: Fees for Recordation. The Division of Lands shall absorb any expense of recording all existing contracts of sale, leases, assignments, modifications, changes in rent; the director shall collect the necessary fee for recording any contract of sale, lease, or change of application hereunto from the contract purchaser or lessee at the time of execution.

8. The committee recommends that the Attorney General draft for introduction to the next session of the Legislature a statute which will require all state agencies dealing in lands to record any such transaction (including any transaction dealing with plats and subdivisions) and further stating that failure to so record does not impose any liability on the State.

In order to achieve more flexibility and simplicity in handling land disposal transactions, the following are recommended:

1. The committee recommends that the State charge a market rate of interest in its sales contracts. The interest rate, at present 6%, is below market levels and may have contributed to inflated prices at state land sales. By setting interest rates at market levels, the State would help prevent inflated land prices and at the same time return more income to the State. To provide for a market rate of interest in sales contracts, no change in AS 38.05.065 would be required. The addition of a statement of market rate in this statute would be desirable, however.

   Section 3 of the attached bill would accomplish this.

2. The committee recommends that the State adopt a system of level payments in place of declining payments in its sale contracts. The system of level payments is in common use in the business world, and the payment figures are easily set forth in a contract. The disadvantage of the present method is that interest must be recalculated every year and the payments decrease each year. From both the State's and the buyers' viewpoints, the level payment method would be preferred. The State would receive slightly more in interest payments over the contract terms and the buyer would not have to make as high initial payments. To provide level payments would require a change in AS 38.05.065 with the present system deleted and the level payment system adopted in its place.

Sections 2 and 3 of the attached bill would accomplish this.

3. The committee recommends that in Title 38.05 the term "fair market value" be used in place of "fair appraised market value" and "market value." The meaning is felt to be the same in all cases. The committee would like to see one standard term used to avoid confusion and misunderstanding.

Sections 4, 5, 7, and 13 of the attached bill would accomplish this.

4. The current procedures for informing the public of state lands transactions are covered in AS 38.05.305 and AS 38.05.345. The two procedures do not mesh in a clear manner. The committee recommends that the procedures be clarified in a manner that will be flexible enough to inform the public fully and yet not require multiple advertising for minor negotiated transactions.

Section 11 of the attached bill will accomplish this.

5. The committee recommends that the Director be given the authority to set the payment period from one to twenty years. This type of flexibility would allow the State and buyers greater market possibilities. To provide for this would require that the installment clause in AS 38.05.065 be deleted and replaced by the one to twenty year provision.

Section 3 of the attached bill would accomplish this.

6. The committee recommends that the State be given more flexibility to resolve contract of sale violations. This is necessary to prevent foreclosures as the only remedy for minor contract violations.

Section 3 of the attached bill would accomplish this.

To institute improvements in the <u>leasing system</u>, the following are recommended:

1. To implement the new lease provisions recommended by this committee new lease forms for various types of leases will be required. It is the committee's recommendation that the Division draft new lease forms to comply with the statutes adopted, and that the new forms be reviewed by this committee.

The recommended lease form and attachments in Appendix C accomplish this.

2. The committee recommends that all state leases to other public agencies be at the normal fair market value rate of payment.

   This reflects a regulation change.

3. The committee recommends that state government agencies get out of residential leasing.

   This reflects a policy change.

4. To provide the lessee insurance against a land boom or unexpected increase the committee recommends that rental increases at the five year reappraisal periods not exceed 100 percent of the prior existing annual rental rate. This action would increase the predictability of the lessee's payments. The stability thus created would add significant borrowing power for the lessee to finance improvements on the leased ground.

   Section 8 of the attached bill would accomplish this.

5. The duration of a lease and the economic life of substantial improvements, such as stores or factories, may not coincide. In order to see that state leased land is used in a rational, economically productive manner the committee recommends that lessees of long-term leases be given a renewal option for up to fifteen years. This type of option would grant the lessee more flexibility in maximizing his investment returns, especially during the final years or his lease. It would also increase the lessee's planning possibilities for use of the leased ground. This action would also soften the impact of termination of the lease. Specifically, this would permit a lessee to make substantial repairs to a building when the remaining term of the lease would not otherwise justify it.

   Section 6 of the attached bill would accomplish this.

6. The committee agrees that a lease should be converted at its present classification, and the leaseholder should then have the option to change classification subject to Division of Lands approval.

This is made possible under the attached lease document so that a conversion (assuming passage of HB 383) to a new lease form would permit the leaseholder to change classification at his option.

7. The committee recommends that a level term for recreational leases not be provided.

8. The Alaska Industrial Subdivision hearing panel recommends that in accord with the provisions of the lease, lessees should be encouraged to record expenses incurred in site preparation so that the "original condition" can be more adequately ascertained.

   The Ad Hoc committee concurs. This recommendation is handled in the attached lease document.

9. The Alaska Industrial Subdivision hearing panel recommends that lease language should be clarified to remove any possible inconsistencies with 11 AAC 58.520 (Adjustment of Rental).

   The Ad Hoc committee concurs.

10. The Alaska Industrial Subdivision hearing panel recommends eliminating the floating easement. The State could exercise the right of eminent domain to condemn. The condemnation would probably result in greater compensation for damages to the lessee, especially in view of the Supreme Court decision in State v. Hammer, 550 P.2d 830, thus the lease would be more attractive to the leasing market. Additionally, the language in the current lease is ambiguous as to damages compensable. This ambiguity only encourages litigation.

    The Ad Hoc committee concurs. This has been accomplished in the attached lease form.

11. The Alaska Industrial Subdivision hearing panel states that, if its recommendations are adopted, the State would be assured a competitive position in the lease market. The recommendations would encourage development of the leaseholds consistent with the intent of the leasing regulations and would be equitable to the lessee. The hearing panel also believes the State should be able to obtain a good return on its land. Accordingly, the rental rate should be changed to reflect the removal of the undesirable aspects of the state lease.

The Ad Hoc committee concurs. Continuing to include rate as an appraisal element will accomplish this objective.

This change is found in the attached lease form.

12. In order to set a fixed rental rate on a lease, the committee recommends an addition to A.S.38.05.085:

> amend to add the following sentence after ". . . to protect the interests of the state. The lease rental rate shall remain fixed for the term of the lease and any permitted extensions thereof, unless the leased premises or a portion thereof is reclassified pursuant to provisions of this chapter. A violation of any provision of this chapter . . . ."

To provide a vehicle for arbitrating protests and appeals involving land transactions, the following is recommended:

1. The Division of Lands has had many protests from private parties over the past few years leading the committee to believe that a board of appeals is highly desirable and needed at this time. At present there exists no arbitration board or board of appeals to handle appeals allowed by Division of Lands regulations. The creation of a board of appeals would effect a responsive mechanism for solving most problem cases arising from Division of Lands transactions that affect private parties. The board of appeals would be faster and less costly to private parties than legal recourse, which would still be available. The board is structured to maintain adequate expertise while attempting to eliminate bias in favor of the Division of Lands. This binding appeals board would substitute for the Commissioner in the present appeal process. (The Alaska Industrial Subdivision hearing panel also recommends such an appeal process.)

   Section 14 of the attached bill would accomplish this.

The committee recommends the following to improve trust land management:

1. The committee believes that state trust lands (school, mental health, and university) are now and have been managed at low intensity. These lands may be returning only a fraction of their potential value that could be

realized by a small, full-time management staff. The Division manages these lands at no charge to the various trust funds and receives no reimbursement for its services. Therefore, it has traditionally placed low priority on management of these lands. This committee recommends that the State Legislature authorize each trust board the authority to freely contract with any agency or private firm for the management of its lands for revenue production in accordance with the State's land act.

Section 1 of the attached bill would accomplish this.

2. In order to provide a uniform 55-year limit for all long-term leases the committee recommends deletion of the 99-year provision found in A.S.38.05.070(c) for school lands.

Section 6 of the attached bill would accomplish this.

V. APPENDIX A

LIST OF PUBLIC GIVING COMMENTS AT AD HOC MEETINGS

GRAHAM, Joe

AKERS, Merle (Anchorage International Airport Pilots' Association)

FORD, R. G. (Anchorage Camper Center--Alaska Industrial Subdivision)

DAVIS, Ken (Alaska Industrial Subdivision--school land lessee)

RICHARDSON, Phil (Talkeetna lessee)

MORRIS, Lloyd

IN THE

BY RULES COMMITTEE BY REQUEST OF THE GOVERNOR

BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to state lands and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.05.030 is amended by adding a new subsection to read:

Section 38.05.030 (f). Notwithstanding the provisions of (a) and (e) above and 38.05.035 (a)(13), the trustees of state trust lands may manage or contract with any agency, public or private, for the management of trust lands pursuant to the provisions of this chapter. Costs of such management shall be borne by the respective trusts.

* Section 2. AS 38.05.055 is amended to read:

Section 38.05.055. SALE PROCEDURES. Except as provided in Section 315(d) of this chapter, the sale shall be made at public auction to the highest qualified bidder as determined by the director. An aggrieved bidder may appeal to the commissioner within five days after the sale for a review of the director's determination. The sale shall be conducted by the director or his representative, and at the time of sale the successful bidder shall deposit an amount determined by the director but not less than 5% (EQUAL TO ONE-TENTH) of the purchase price. The director or his representative shall immediatley issue a receipt containing a description of the land or property purchased, the price bid, and the terms of sale, which receipt shall be acknowledged in writing by the bidder. A contract of sale on a form approved by the attorney general shall be signed by the purchaser and, after approval of the commissioner, the contract shall also be signed by the director on behalf of the state.

* Section 3. AS 38.05.065 is amended to read:

Section 38.05.065. TERMS OF CONTRACT OF SALE. The contract of sale shall require the remainder of the purchase price to be paid over a period

of not more than 20 years, which shall be set for each sale by the director. Installment payments plus interest will be set on the level payment basis over the payment period. The interest rate charged on installment payments shall be the prevailing rate on similar land transactions at the time the contract is signed, as determined by the director, but in no case shall it be below 5% per year or above the current usury rate as set by AS 45.45.010(b) and (d). (IN ANNUAL INSTALLMENTS OF NOT LESS THAN 10 PER CENT OF THE PURCHASE PRICE, WITH INTEREST AT THE RATE OF NOT LESS THAN FIVE PER CENT A YEAR.) The director, with the consent of the commissioner, may also impose conditions, limitations, and terms which he considers necessary and proper to protect the interest of the state. Violations of any provision of this chapter or the terms of the contract of sale subject the purchaser to appropriate administrative and legal action, including but not limited to specific performance, foreclosure, ejectment, or other legal remedies in accordance with applicable state law. (LEGAL ACTION, INCLUDING A FORECLOSURE ACTION IN ACCORDANCE WITH APPLICABLE STATE LAW.)

* Section 4. AS 38.05.067(b) is amended to read:

Section 38.05.067(b). The director shall not sell the lands under this section at less than their fair (APPRAISED) market value. The director shall make regulations necessary to ensure that lands sold under this section are for bona fide residential use and not for speculation.

* Section 5. AS 38.05.068(a) is amended to read:

Section 38.05.068(a). FOREST SERVICE PERMITTEES' SALES PREFERENCE. Before offering to the public any land which is subject to a valid existing United States Forest Service permit in effect in a state-selected area at the time the area was patented to the state, or which is subject to a lease issued under Section 87 of this chapter, the director shall offer the land for sale to the permittee or his successor in title, if he can be found, at not less than its fair (APPRAISED) market value before offering to the general public.

* Section 6. AS 38.05.070(c) is amended to read:

Section 38.05.070(c). A lease may be issued for a period of up to 55 years, if it appears to be in the best interest of the state and if the commissioner approves. A lease for a period in excess of 25 years shall grant the lessee an option entitling him to extend the term of the lease for up to 3 consecutive five year periods in addition to the original term. If the Commissioner determines that the land or a part of it which is the subject of a grazing

lease is not being used for the purpose issued, the lease may be declared void. (HOWEVER, A NONRENEWABLE LEASE FOR SCHOOL LANDS MAY BE ISSUED FOR A PERIOD NOT TO EXCEED 99 YEARS.)

* Section 7. AS 38.05.087(a) is amended to read:

Section 38.05.087(a). FOREST SERVICE PERMITTEES' LEASING PREFERENCE. Before offering to the public any land for lease which is subject to a valid existing United States Forest Service permit in effect in a state-selected area at the time the area was patented to the state, the director shall offer the land for leasing to the permittee at not less than its fair (APPRAISED) market value before offering it to the general public.

* Section 8. AS 38.05.105 is amended to read:

Section 38.05.105. Each lease shall stipulate that the annual rental payment is subject to adjustment at five year intervals and shall be based (PRIMARILY) on a reappraised annual rental value. Any increase due to reappraisal may not exceed 100% of the annual rental for the preceding 5 year period. However, if the director of the division of lands determines that residential development is the best use for the land, the reappraisal period may be lengthened or the readjustment waived in accordance with regulations adopted by the commissioner. Before a waiver of rental readjustment is issued, the land shall have a current reappraisal. A waiver is valid only if residential development actually occurs, and only if it is necessary for obtaining primary long-term financing. The regulations adopted under this section shall ensure that the state receives a fair return from the land.

* Section 9. AS 38.05 is amended by adding a new paragraph to read:

Section 38.05.106. CONVERSION OF LEASES. (a) Any person holding a valid lease as lessee of lands from the State under provisions of AS 38.05.070 - .105, or as an approved assignee of such lessee under the terms of such lease, may, at his option, convert his lease so as to obtain certain benefits, enumerated in subparagraph (b) below, which were not available to him at the date his lease was originally entered, if the lessee at the time of conversion makes all payments due under the conversion rate and is not in violation of any other lease provision.

(b) Those lease benefits which shall be made available to a lessee qualifying under subsection (a) of this section shall be all of those lease provisions authorized or made applicable by this act to new leases entered into by the State after the effective date of such statutes.

(c) The effective annual rental value at conversion shall be based on the most recent reappraisal provided that such reappraisal was within 2 years of the effective date of this act. In all other cases, the conversion shall be based on the next reappraisal.

(d) Any conversion as to trust lands shall be effective only if approved by the appropriate board of trustees.

(e) Applications for conversion must be made within 3 years of the effective date of this act.

* Section 10. AS 38.05.310 is amended to read:

Section 38.05.310 (NOTICE AND) APPRAISAL. (a) No land may be sold or leased, or a renewal lease issued (WITHOUT PUBLIC NOTICE) except in the case of an oil or gas or mineral lease, unless it has been appraised within 120 (90) days before the date of (FIXED FOR THE) sale or lease. (WHEN LAND IS OFFERED AT PUBLIC SALE BUT IS NOT SOLD AND IS AVAILABLE)For over the counter sale (AT THE PRIVATE SALE, NO) an (RE)appraisal is required unless the director finds (CONSIDERS) that a change in value of the lands has not (MAY HAVE) occurred. A grazing lease may be granted to a lessee of federal grazing lands without prior appraisal, if his federal lease was cancelled to allow the state to select the lands under lease. No land may be sold or leased for less than fair (THE APPROVED, APPRAISED) market value, except as provided in .315 and .320 of this chapter and .75 - .85 of this chapter. No land or interest in land may be sold, leased, or otherwise disposed of without public notice.

(b) When land is offered at public sale but is not sold, it may be available for sale over the counter. The director shall review the list

of lands available on a quarterly basis and shall certify that there has been no change in value since the last reappraisal. If an increase in value occurs in any parcel, the director shall withdraw that parcel from sale over the counter.

* Section 11. AS 38.05.345(a) is amended to read:

Section 38.05.345(a). Public notice of an auction sale (LEASE OR OTHER DISPOSAL) of land or interest in it shall be substantially as follows.

* Section 12. AS 38.05.345(e) is amended by adding a new subparagraph to read:

Section 38.05.345(e) Public notice of an action other than as specified in paragraph (a) above shall conform to the requirements of AS 38.05.305 and this paragraph. Such notice shall, when given pursuant to AS 38.05.305(c), be published at least once in a newspaper of general circulation in the vicinity in which the land affected by the proposed activities is located.

* Section 13. AS 38.05.365 is amended by adding a new subparagraph to read:

Section 38.05.365. "Market Value" or "Fair Market Value" means the highest prices, estimated in terms of money, which the property would bring if exposed for a sale for a reasonable time in the open market, with a seller, willing but not forced to sell, and a buyer, willing but not forced to buy, both being fully informed of all the purposes for which the property is best adapted or could be used.

* Section 14. AS 38.05 is amended by adding a new paragraph to read:

Section 38.05.380. STATE BOARD OF LAND APPEALS. (a) The State Board of Land Appeals shall consist of five members, one of whom shall be the Commissioner of Natural Resources or his designated representative. The other members of the board shall be appointed by the governor from the general public, with due regard for the desirability of prior legal, natural resource or real estate training and experience as criteria for selection of public members. All board members are subject to confirmation by a majority of the members of the legislature in joint session.

(b) The director of the division of lands shall provide administrative support for the board.

(c) The governor shall appoint the public members of the board for terms of three years each, except that the initial terms of one of the members first appointed under this chapter shall be for one year and one member for two years. The public members are entitled to compensation

in the amount of $50.00 per day for each day or portion of a day spent in actual meeting or on authorized official business incident to their duties, and to all other transportation and per diem expenses as provided by law.

(d) Jurisdiction of the board shall extend to all matters arising under the Alaska Land Act (AS 38.05) and the Water Act (AS 46.15) from which an appeal may be taken under statute or regulation to the commissioner from a decision of the director, division of lands. The board in all appeals filed after the effective date of this chapter, shall have the appellate authority formally vested in the commissioner by provisions of the Alaska Land Act. An appeal from a decision of the board, if taken, shall be to the Superior Court.

(e) Three members of the board shall constitute a quorum. A majority of a quorum shall be able to render a decision. The board shall adopt regulations governing its procedures, and may adopt other regulations which may be necessary or convenient in carrying out the purposes of this chapter.

V. APPENDIX C

DEPARTMENT OF NATURAL RESOURCES
DIVISION OF LANDS
323 East Fourth Avenue
Anchorage, Alaska 99501

ADL NO._____

LEASE AGREEMENT

THIS Lease agreement made and entered into this _____ day of _____, 19___, by and between the State of Alaska, through the Director of the Division of Lands, with the consent and approval of the Commissioner of the Department of Natural Resources, acting for and on its behalf under and pursuant to AS 38.05, as amended, and the regulations promulgated thereunder, as amended or hereafter amended, hereinafter referred to as the LESSOR; and _____ of _____ hereinafter referred to as the LESSEE:

WHEREAS, the Lessor has caused the lands herein demised to be appraised and such appraisal was made and approved on or after _____, 19_____; and

WHEREAS, the Lessor has caused a notice of intent to lease the lands herein demised to be published as required by law or caused notices of intent to lease to be posted as required by law; and

WHEREAS, an auction of the herein demised property was held at the time and place designated by notice and said sale was approved by the Director of the Division of Lands, Department of Natural Resources, State of Alaska:

NOW THEREFOR, the Lessor has agreed to let and does hereby let and demise to the Lessee, and the Lessee has agreed to take and does hereby take from the Lessor the surface estate of all that lot, piece, or parcel of land more particularly bounded and described, as follows:

_____
_____
_____
_____
_____
Located in the _____ Recording District, State of Alaska.

TO HAVE AND TO HOLD the said demised premises for a term of _____ ( ) years commencing on the _____ day of _____, 19_____, and ending at 12 o'clock midnight on the _____ day of _____, _____, a period of fifty-five years unless sooner terminated as hereinafter provided.

The Lessee shall be granted the option to extend the term of his lease for no more than three consecutive five-year periods beyond the original term of the lease, provided that Lessee notifies Lessor of his intention to exercise one or more such options no later than 6 months prior to expiration of the original lease term or the first or second extension terms, as applicable.

The Lessee shall pay to the Lessor rental as follows: Equal _____ payments, in advance, on or before the _____ day of _____ of every year during

said term at the rate of _____ Dollars ($_____) per _____; such payments to be subject to adjustment as hereinafter required from the effective date hereof, as provided herein.

The annual rental as hereinafter provided for shall not during any rental period increase more than one hundred percent of the immediately preceeding annual rental.

It is agreed that each of the covenants, terms and agreements herein contained shall be binding upon the parties and upon their respective successors and assigns.

1. Appurtenances, and Encumbrances-- Lessor leases and grants to Lessee all easements, parking and loading rights, rights of ingress and egress, fixtures and appurtenances now or hereafter belonging or pertaining to said premises. The described premises are leased, subject to patent restrictions, easements, rights-of-way, if any, zoning and building restrictions and statutes and governmental regulations now in effect or hereafter adopted by any governmental authority.

2. Payment of Taxes and Assessments-- Lessee agrees to pay to the public authorities charged with collection thereof, promptly as the same may become due and payable, all taxes, permit, inspection and license fees and other public charges, whether of a like or different nature, except for general and special assessments lawfully levied upon the leasehold estate and any buildings, structures, fixtures, improvements or leasehold interest now or hereafter located thereon, or arising in respect of the occupancy, use or possession of the leased Premises, and which are charged against and are, or may become, a lien during the term of this lease; and Lessee agrees to exhibit to Lessor, on demand receipts evidencing payment of all taxes, fees and other similar public charges so payable by Lessee. Lessee shall also pay all charges of water, sewer, gas, electricity, power or other public utility services rendered on or to the Premises during the term of this lease as such charges become due.

3. Documentation of Improvements-- Lessee must within 90 days of completion of any site improvements, including but not limited to clearing, leveling, excavation, and backfill, and exclusive of any structures, file with the lessor adequate and reasonable documentation of such improvements including any applicable costs and quantities. Such documentation is intended to aid in future determinations of the original condition of the Premises.

4. Notification and Late Payment Charge-- In the event lessee becomes 30 days delinquent in payments due, a late payment charge of 6% of such amount due shall be levied against the lease. Additionally, a charge for notification for payments 30 days late shall be made at the rate of $5.00 for the first notice and $20.00 for the second notice.

5. Permitted Uses-- (a) The Lessee shall use the leased Premises for uses and purposes consistent with those cited in Attachment 1, and in conformance with applicable local zoning ordinances. At any time Lessee may request a change in permitted uses, provided that Lessee's existing or proposed use of the Premises is consistent with existing zoning. If the Lessor concurs with such change of permitted use, then this lease shall terminate, and a new lease, upon a form and containing terms, appraisal and rental rate applicable to the changed classification; shall be executed for the balance of the unexpired lease term, or renewal term if applicable, then remaining.

b. Lessee may request that part of the leased Premises be severed

from the Premises for purposes of changing of that part for a use or uses not permitted under the then existing permitted uses of the Premises. If the Lessor concurs, then this lease shall terminate as to the part so severed, and a new lease, upon a form and containing terms, appraisal and rental rate applicable to the changed permitted uses; shall be executed for the balance of the unexpired lease term, or renewal term if applicable, then remaining. The annual rentals applicable to the original leased Premises shall be adjusted to reflect the effect of severance of the part permitted by this paragraph for the balance of the original lease term or the renewal term, if applicable. If severance of a portion of the Premises is permitted, Lessee shall comply with all state and local laws and ordinances regarding the subdivision of real property, and shall bear the expenses and costs attributable to survey, recording and other compliance with said laws and ordinances.

6. Compliance with Laws' Ordinance and Regulations-- Lessee shall comply with all applicable laws, ordinances and regulations of duly constituted public authorities now or hereafter in existence which in any manner affect the leased Premises or the sidewalks, alleys, streets, and ways adjacent thereto, or any buildings, structures, fixtures or improvements or the use thereof. Lessee further agrees that it will not permit any unlawful occupation, business or trade to be conducted on the Premises, or any use to be made thereof contrary to any law, ordinance or regulation applicable thereto.

The lessee, at its own cost and expense, shall keep the leased Premises and all improvements which at any time during the term of this lease may be situated thereon, in good maintenance, condition and repair during the entire term of this lease, and hereby expressly waives any right to make repairs to the Premises at the expense of Lessor which may be allowed by any statute or law in effect at the time of the execution of this lease or any amendment thereof, or by any other statute or law which may be hereafter passed during the term of this lease. The Lessee's rights under this Lease may be terminated by the Director, in whole or in part, if the leased Premises are used for a purpose unlawful under Federal or State law or regulation, or local Government ordinance as applicable.

7. Lessee's Rights of Occupancy and Use-- Lessee, when not in default of performance of any of its obligations hereunder, shall have the following rights, during the term of this Lease, from time to time and in such manner, and to such extent, as Lessee may in its sole judgment deem advisable, except where any of said rights is conditioned upon prior approval of Lessor: (a) The right to demolish, remove or otherwise dispose of any improvements presently or subsequently situated upon the leased Premises; (b) The right to erect, place, or install upon the leased Premises buildings, structures, and improvements as from time to time it shall deem advisable; (c) The right to make such alterations, additions and repairs to the leased Premises as it may desire.

8. Disposition of Improvements Upon Termination-- (a) All buildings, structures and permanent improvements, including any signs which are installed, placed or attached in or about the leased Premises by Lessee, shall remain the property of Lessee at the expiration or termination of this lease, or of any renewal term thereof. The lessee shall within 60 days after termination or expiration of the lease remove all improvements located on the leased Premises, provided that such removal will not cause injury or damage to the leased Premises; and further provided that the Lessor may extend the time for removing such improvements in a case where hardship is demonstrated. Following removal Lessee shall leave Premises in a safe and natural condition. The retiring Lessee may, with the consent of the Lessor,

sell its improvements to the succeeding lessee.

(b) If any improvements and/or chattels having an appraised value in excess of $10,000.00, as determined by the Lessor, are not removed within the time allowed, such improvements and/or chattels shall, upon due notice to the Lessee, be sold at public sale under the direction of the Lessor. The proceeds of sale shall inure to the Lessee who placed such improvements and/or chattels on the lands after payment to the Lessor of all rents due and owing and expenses incurred in holding such sale. In case there are no other bidders at any such sale, the Lessor is authorized to bid on such improvements and/or chattels. The Lessor shall acquire all rights, both legal and equitable, that any other purchaser could acquire by reason of said sale and purchase.

(c) If any improvements and/or chattels having an appraised value of $10,000.00 or less, as determined by the Lessor, are not removed within the time allowed, such improvements and/or chattels shall revert to, and absolute title shall vest in, the Lessor.

9. Freedom From Liens-- Lessee will not permit any mechanics', laborers', or materialmens' liens to stand against the leased Premises or improvements for any labor or materials furnished to Lessee, or claimed to have been furnished to Lessee or to Lessee's agents, contractors, or sublessees, in connection with work of any character performed on said Premises or improvements by or at the direction or sufferance of Lessee; provided, however, that Lessee shall have the right to contest the validity or amount of any such lien or claimed lien. In the event of such contest, Lessee shall give to Lessor such reasonable security as may be demanded by Lessor to insure payment thereof and to prevent any purported sale, foreclosure or forfeiture of the premises or improvements by reason of such non-payment. Such security need not exceed one and one-half times the amount of such lien or such claim of lien. Lessee shall record such bond as contemplated by Section 34.35.072, Alaska Statutes upon Lessor's demand. Lessee shall immediately pay any judgment rendered on any proven claim of lien, together with all proper costs and charges, and shall have such lien released or judgment satisfied at Lessee's own expense. The State may file such notices of non-responsibility as it may deem necessary, pursuant to A.S. 34.35.065.

10. Lawful Use of Premises-- The Lessee may use and occupy the leased Premises for any lawful purpose provided such purpose is allowed under Attachment 1 of this Lease.

11. Indemnity to Lessor-- Lessee will indemnify and hold Lessor harmless from and against all claims and demands for loss or damage, including property damage, personal injury or wrongful death, arising out of or in connection with the use or occupancy of the Premises by Lessee or any other person under Lessee, and from any accident or fire on the Premises and from any nuisance made or suffered thereon, and from any failure by Lessee to keep the Premises in a safe condition, and Lessee will reimburse Lessor for all its costs and expenses, including reasonable attorneys' fees, incurred in the defense of any such claims; and Lessee will hold all goods, materials, furniture, fixtures equipment, machinery and other property whatsoever on the Premises at the sole risk of Lessee, and will save Lessor harmless from any claim of loss or damage thereto by any cause whatsoever. If all or part of the improvements placed by Lessee on the demised premises are destroyed by fire, earthquake or other cause, Lessee shall remove the debris and clean up the affected area within 60 days of the occurrence of such destruction, and may surrender to Lessor this lease, together with any interest of Lessee and of any mortgagee in

the resulting insurance proceeds and Lessee may thereby be relieved of any further obligation hereunder.

12. Default-- If Lessee at any time during the term or renewal term of this lease (and regardless of the pendency of any bankruptcy, reorganization, receivership, insolvency or other proceedings, in law, in equity or before any administrative tribunal, which has or might have the effect of preventing Lessee from complying with the terms of this lease) (a) shall fail to make payment of any installment of rent or of any other sum herein specified to be paid by Lessee, or (b) shall fail to observe or perform any of Lessee's other covenants, agreements or obligations hereunder, and if any such default shall not be cured as to (a) within ten days after Lessor shall have given Lessee written notice of such failure to make payment, or as to (b) within thirty (30) days after Lessor shall have given to Lessee written notice specifying such default or defaults, Lessee shall not have commenced diligently to cure such default; or if Lessee has filed a voluntary petition or has become subject to an involuntary petition under any provision of the Bankruptcy Act, 11 U.S.C. 701 et. seq; or if Lessee finally and without further possibility of appeal or review is adjudicated a bankrupt or insolvent; or if Lessee has a receiver or a Trustee appointed for all or substantially all of its business or assets on the ground of Lessee's insolvency; or if Lessee has itself appointed as debtor-in-possession in a proceeding for a reorganization or an arrangement; or if Lessee shall make an assignment for the benefit of its creditors, then in any such event Lessor shall have the right, at its election, then or at any time thereafter, and while such default, defaults or events shall continue, to give Lessee written notice of Lessor's intention to terminate this lease and all of Lessee's rights hereunder, on the date specified in such notice, which date shall not be less than thirty (30) days after the date of giving of such notice; and on the date specified in such notice this lease and all rights granted Lessee hereunder shall terminate as fully as if the lease had then expired by its own terms; and Lessee hereby covenants to peaceably and quietly surrender to Lessor said leased Premises and all structures, buildings improvements and equipment located thereon, subject to paragraph 7 (a) above and to execute and deliver to Lessor such instrument or instruments which may be required by Lessor to properly evidence termination of Lessee's rights and interest hereunder.

In the event of termination of this lease as provided in this paragraph 12, Lessor shall have the right to repossess the leased Premises and such structures, buildings, improvements and equipment, thereon and subject to paragraph 5 above either with process of law or through any form of suit or proceeding, as well as the right to sue for and recover all rents and other sums accrued up to the time of such termination, and damages arising out of any breach on the part of Lessee, including damages for rent for the balance of the lease term not then accrued. Lessor shall also have the right, without taking possession of the premises or terminating this lease, to sue for and recover all rents and other sums, including damages, at any time and from time to time which may accrue hereunder as a result of any default of Lessee.

13. Condemnation-- If the whole or any part of the demised premises shall be taken for any public or quasi-public use, under any statute or by right of eminent domain or private purchase in lieu thereof, by any public or quasi-public body vested with the power of eminent domain, then when possession shall be taken thereunder of the leased Premises, or any part thereof, the following provisions shall control:

a. Taking of All Premises-- If all of the Premises are taken by condemnation; the term of this lease and all rights of the Lessee hereunder shall immediately terminate, and the rent shall be adjusted as of the time of such termination so that Lessee shall have paid rent only up to the time of such taking. Lessor shall

be entitled to the full condemnation proceeds, except that portion thereof attributable to the value of the buildings or improvements placed on the Premises by Lessee.

b. Taking of Substantial Part of Premises-- If the taking by condemnation reduces the ground area of the leased Premises by at least thirty percent (30%), or materially affects the use being made by the Lessee of the demised premises, Lessee shall have the right, by written notice to Lessor made not later than one hundred eighty (180) days after possession shall be taken, to elect to terminate or to not terminate this lease under the provisions set forth herein. If the election to terminate is made the provisions of (a) of this paragraph relating to the taking of the whole Premises shall govern. If the election not to terminate is made the lease shall continue and Lessor shall be entitled to the full condemnation proceeds except the portion thereof attributable to the value of the buildings or structural improvements placed on the Premises by Lessee; and rent at the existing rate and amount shall be adjusted as of the date of the taking of possession, and the rent for the balance of the term, except as modified from time to time under paragraph 1 of attachment 1 hereof, shall be reduced so that the new rent shall be that part of the former rent (before condemnation) which the unimproved value of the untaken Premises (appraised after the taking) bears to the unimproved value of the entire Premises immediately before the taking. Any dispute, controversy or claim arising out of or relating to the fixing of the new rent shall be settled by arbitration as provided herein.

c. Taking of Insubstantial Part of Premises-- If the taking is of such an insubstantial portion of the ground area that the use being made by Lessee of the leased premises is not materially affected, the provisions of this paragraph regarding Lessee's election not to terminate shall govern.

14. Quiet Enjoyment-- Provided Lessee is not in default hereunder, Lessor covenants that Lessee shall have peaceful and quiet enjoyment of the leased Premises without let or hindrance on the part of Lessor, and Lessor will warrant and defend Lessee in the peaceful and quiet enjoyment of the leased Premises.

15. Notices-- All notices required or permitted under this agreement shall be made by certified or registered mail, postage prepaid, to the parties at the following addresses.

To The Lessor: _____

To The Lessee: _____

16. Rights or Remedies-- Except as may be inconsistent with or contrary to any provision of this lease, no right or remedy herein conferred upon or reserved to Lessor shall be exclusive of any other right or remedy, and each and every right or remedy shall be cumulative and in addition to any other right or remedy given hereunder, or now or hereafter existing at law or in equity or by statute.

17. Waiver or Forebearance-- The receipt of rent by the Lessor, with or without knowledge of any breach of the lease by the Lessee, or of any default on the part of the Lessee in the observance or performance of any of the conditions or covenants of this lease, shall not be deemed to be a waiver of any provision of this lease. No failure on the part of the Lessor to enforce any covenant or provision herein contained, nor any waiver of any right hereunder by the Lessor, unless in writing, shall discharge or invalidate such term or covenant; nor shall any forebearance or

written waiver affect the right of the Lessor to enforce any term or covenant in the event of any subsequent breach or default. The receipt by Lessor of rent or any other sum of money or the termination, in any manner, of the lease term or the giving by Lessor of any notice hereunder to effect such termination, shall not reinstate, continue, or extend any term herein leased, or destroy, or in any manner impair the validity of any such notice of termination as may have been given hereunder by the Lessor to the Lessee prior to the receipt of any such sum of money or other consideration, unless the contrary effect shall be expressed in writing and signed by the Lessor.

18. Inspection-- Lessor shall, at all reasonable times have access to the Premises for the purpose of inspection.

19. Successors in Interest-- This Lease shall be binding upon and inure to the benefit of the respective heirs, successors in interest and assigns of the parties hereto.

20. Assignment or Subletting-- Lessee shall not sublet or assign the leased premises or any part thereof, without the prior written consent of Lessor to such subletting or assignment, which consent shall not be unreasonably withheld, subject to use provisions of this lease. However, Lessee, without prior authorization may assign this Lease, or any part thereof, to a duly licensed and authorized lending institution for loan security purposes, provided that this right to assign shall not operate as a subordination of Lessor's rights hereunder, nor a subordination of its fee. Lessor agrees that upon receipt of application for assignment by Lessee, it will consent to or deny a proposed subletting or assignment by Lessee. No assignment or subletting of the Premises or any portion thereof by Lessee shall void Lessee's obligation to pay the rent herein reserved for the full term of this sublease or any extensions thereof. Anything contrary in the foregoing notwithstanding, Lessee shall have the right to sublease all or any portion of the enclosed space in any building which Lessee may construct upon the leased Premises without prior written approval of Lessor.

21. Soil Conditions and Water Drainage-- Lessor makes no warranty and assumes no liability regarding the soil conditions or water drainage upon the leased premises.

22. Mineral Reservation-- The Lessor hereby expressly saves, excepts and reserves out of the grant hereby made, unto itself, its lessees, successors, and assigns forever, all oils, gases, coal, ores, minerals, fissionable materials, and fossils of every name, kind or description, and which may be in or upon said lands above-described, or any part thereof, and the right to explore the same for such oils, gases, coal, ores, minerals, fissionable materials and fossils. All coal, oil, gas and other minerals and all deposits of stone or gravel valuable for extraction or utilization, are excepted from the operation of a surface lease. Specifically, the lessee of the surface rights shall not sell or remove for use elsewhere any timber, stone, gravel, topsoil, or any other material valuable for building or commercial purposes; provided, however, that material required for the development of the leasehold may be used. It also hereby expressly saves and reserves out of the grant hereby made, unto itself, its lessee, successors, and assigns forever, the right to enter by itself, its or their agents, attorneys, and servants upon said lands, or any part or parts thereof, at any and all times, for the purpose of opening, developing, drilling and working mines or wells on these or other lands and taking out and removing

therefrom all such oils, gases, coal, ores, minerals, fissionable materials and fossils; and to that end it further expressly reserves out of the grant hereby made, unto itself, its lessees, successors, and assigns forever, the right by its or their agents, servants and attorneys at any and all times to erect, construct, maintain, and use all such buildings, machinery, roads, pipelines, powerlines, and railroads, sink such shafts, drill such wells, remove such soil, and to remain on said lands or any part thereof for the foregoing purposes and to occupy as much of said lands as may be necessary or convenient for such purposes, hereby expressly reserving to itself, its lessees, successors, and assigns, as aforesaid, generally all rights and power in, to and over said land, whether herein expressed or not, reasonably necessary or convenient to render beneficial and efficient the complete enjoyment of the property and rights hereby expressly reserved.

Provided, however, no rights shall be exercised by the Lessor or its mineral lessees, until provision has been made by the Lessor or its mineral lessees to pay to the Lessee of the land, upon which the rights herein reserved to the Lessor or its mineral lessees, are sought to be exercised, full payment for all damages sustained by said Lessee, by reason of entering upon said land; and provided that if said Lessee for any cause whatever refuses or neglects to settle said damages, the Lessor or its mineral lessees, or any applicant for a mineral lease or contract from the Lessor or its lessees for the purpose of prospecting for valuable minerals, or option contract or lease for mining coal or lease for extracting petroleum or natural gas, shall have the right, after posting a surety bond with the Director issued by a corporation qualified to do business in Alaska and licensed to sell insurance in Alaska, or a bond executed by one or more individual sureties approved by the Director, after due notice and opportunity to be heard, to be sufficient in amount and security to secure the said Lessee full payment for all such damages, to enter upon the land in the exercise of said reserved rights, and shall have the right to institute such legal proceedings in a court of competent jurisdiction wherein the land is situated, as may be necessary to determine the damages which the surface lessee of such lands may suffer.

23. Mortgage of Leasehold Interest of Tenant— A leasehold mortgagee, a beneficiary of a deed of trust, or a security assignee shall have and be subrogated to any and all rights of Lessee with respect to the curing of any default hereunder by Lessee. If the holder of any such mortgage, the beneficiary of any such deed of trust, or the security assignee shall give Lessor, before any default shall have occurred in the Lease, a written notice containing the name and post office address of such holder, Lessor shall thereafter give to such holder a copy of each notice of default by Lessee at the same time as any notice of default shall be given by Lessor to Lessee; and Lessor will not thereafter enter into any modification of this Lease without the prior written consent of such mortgagee, beneficiary or security assignee. If by reason of any default of Lessee, either this Lease or any renewal thereof shall be terminated at the election of Lessor prior to the stated expiration thereof, Lessor shall enter into a new Lease with the leasehold mortgagee, the beneficiary of a deed of trust, or the security assignee, for the unexpired portion of the lease term, effective as of the date of such termination, at the rent and on the terms herein contained, subject to the following conditions.

Mortgagees, beneficiary or security assignee shall do the following:

a. Make written request to Lessor for a new lease within forty (40) days after the date of such termination; and such written request shall

be accompanied by payment to Lessor of all sums then due Lessor under this lease as if termination had not occurred but with such costs as are permitted under this Lease.

b. pay to Lessor, at the time of the execution and delivery of such new Lease, any and all sums due thereunder, in addition to those which would at the time of the execution and delivery thereof be due under this Lease but for such termination, and in addition thereto, any reasonable expenses, including legal and attorneys' fees to which Lessor shall have been subjected by reason of such default.

c. on or before the execution and delivery of such new Lease, perform all other conditions required to be performed by Lessee, to the extent that Lessee shall have failed to perform such conditions.

24. Arbitration-- Any dispute between the parties arising under this lease or through the performance or non-performance of any term of this lease shall be first subject to resolution by arbitration, under the authority and procedures contained in Alaska Statutes 09.43. Appointment of an arbitrator shall be made by agreement between the parties. If no agreement can be reached, each party shall appoint an arbitrator, who shall by agreement between themselves appoint a third arbitrator. If any State Board of Land Appeals is later created which shall have jurisdiction over disputes which may arise under this lease, such Board shall assume jurisdiction and no requirement for arbitration shall thereafter be imposed during the pendency of such jurisdiction.

25. Integration and Modification-- This document including attachments which by reference are made a part hereof, contains the entire agreement of the parties hereto. All negotiations, statements, representations, warranties, and assurances, whether oral or written, which are in any way related to the subject matter of this lease, and the performance by either party hereto, are merged and integrated into the terms of this document.

This Lease may not be modified nor amended except by a writing signed by both parties hereto, and any purported amendment or modification is without effect until reduced to a writing signed by both parties hereto.

IN WITNESS WHEREOF the State of Alaska, Lessor, acting through the Director of the Division of Lands of the Department of Natural Resources, lawfully authorized thereunto, has caused these presents to be executed at Anchorage, Alaska, in duplicate, and the said Lessee has hereunto set his hand, agreeing to keep, observe and perform the rules and regulations promulgated under AS 38.05, as amended, the terms, conditions and provisions herein contained, on the Lessee's part to be kept, observed and performed.

Deputy Attorney General

Attachment No. 1 Commercial-Industrial Lease

ADL NO. _____

The following clauses are hereby included in and by reference made a part of the attached lease document.

1. Modified Rentals

(a) Beginning with the lease year and continuing at five-year intervals thereafter, the annual rental shall be modified so as to equal _____ percent of the fair market value of the premises at such appraisal dates, as determined by appraisal as hereinafter specified; provided, however that the premises shall be valued and appraised at the date of the rental modification, as unimproved land as defined herein. For purposes of rental modification, unimproved land shall mean the leased land in its original condition at the commencement date of the Lease, disregarding all building or structural improvements above or below grade, excavation or backfill, and disregarding all landscaping, paving, leases or encumbrances placed on the property by the Lessee. The foregoing notwithstanding, any improvements above or below grade placed on or made available to the property by the Lessor or at the expense of the

Lessor shall not be disregarded. The unimproved land, as above defined, shall be appraised at its highest and best use regardless of its actual use, but subject to existing use restrictions and zoning.

2. Special Assessments--In the event any general or special assessment is levied on the Premises for a part of the cost of any public work or improvement assessed according to benefit found by levying authority to accrue therefrom to the demised Premises, Lessor shall pay for the same.

3. Permitted Uses--The lands described herein are intended to permit uses common to industrial development areas. Such uses may include but are not limited to light manufacturing, processing, storage, wholesaling, and distribution operations as well as limited commercial uses.

4. Liability Insurance--Lessee will at its own expense obtain and maintain during the term of this Lease and any renewal term thereof comprehensive general liability insurance with respect to the leased Premises, naming Lessor as additional assured, from an insurance company authorized to do business in Alaska, with minimum

limits of not less than $200,000 for injury to one person and not less than $1,000,000 for injury to more than one person in any one accident or occurrence, and insurance in a sum not less than $200,000 against claims for property damage, or such higher limits as Lessor may from time to time determine, with due regard to then prevailing prudent business practice in the State of Alaska, as reasonably adequate for it's protection, and Lessee will from time to time upon receipt thereof deposit promptly with Lessor upon demand current certificates of such insurance.

Attachment No. 1 Residential Lease

ADL No. _____

The following clauses are hereby included in and by reference made a part of the attached lease document.

1. The annual rent in the sum of _____ payable by Lessee each year beginning with the lease year and modified at five-year intervals thereafter as provided for under paragraph 2(a) excepting waivers of rental as provided for in paragraph 2(b). This lease shall continue until the _____ day of _____, _____ a period of fifty-five years, and shall be payable in _____ installments.

2. (a) The annual rental shall be modified so as to equal _____ percent of the fair market value of the premises, at such appraisal dates as determined by appraisal in a manner as hereinafter specified; provided, however, that the premises shall be valued and appraised at the date of the rental modification as unimproved land as defined herein. For the purposes of rental modification, unimproved land shall mean the leased land in its original condition at the commencement date of the lease, disregarding all building or structural improvements above or below grade, excavating or backfill, and disregarding all landscaping, paving, leases

or encumbrances placed on the property by the Lessee. The foregoing notwithstanding, any improvements above or below grade placed on or made available to the property by the Lessor or at the expense of the Lessor shall not be disregarded. The unimproved land, as above defined, shall be appraised at its highest and best use regardless of its actual use, but subject to existing classification, zoning, and lease use restrictions.

(b) If a waiver of rent adjustments is necessary for obtaining long-term financing of residential development which has occurred or in actuality will occur on the leased premises, then upon approval of Lessee's application for waiver of rent adjustments, the annual rent for the thirty years next succeeding, or for the remainder of the lease term, whichever is less, shall from the date of approval of such waiver be determined by appraisal as hereinbefore provided, upon approval of such appraisal by the Lessor. Lessee shall pay all expenses of such appraisal. Approval or rejection of such appraisal shall be given by the Lessor within two weeks after its submission to the Lessor, which approval shall not be unreasonably withheld. Such appraisal, upon approval, shall be

used to determine the rental under the waiver of rent adjustments if the effective date of the appraisal is not earlier than one year prior to the date of application for the waiver. Upon termination of such waiver, rental shall be adjusted upon the anniversary date of the next ensuing five-year interval from the lease commencement date.

(c) If an appraisal as provided for in paragraph (a) has been performed, and is applicable to the portion for which the waiver is granted such appraisal may be used to determine the rental under said waiver as long as the effective date o the appraisal is not earlier than one year prior to the date of the application for waiver.

(d) Anything to the contrary notwithstanding, upon approval of sublease, the Lessor shall have the right to readjust the rental of all parcels subleased at that time. Such parcels so adjusted and subject to waiver shall be leased at the new rental for the duration of such waiver. Any portion of those lands legally described herein which are not subject to sublease shall be reduced

in rental in proportion to the amount of land subleased at that time. Upon such adjustment the annual rental shall be the cumulative amount of annual rental for each portion and shall be based on the methods and rate stated in paragraph (a) of this clause.

3. Special Assessments--In the event any general or special assessment is levied on the premises for a part of the cost of any public work or improvement assessed according to the benefit found by levying authority to accrue therefrom to the demised premises, Lessee shall pay for the same.

4. Permitted Uses--The lands described herein are intended for residential use.

Attachment No. 1 Utility Lease

ADL No. _____

The following clauses are hereby included in and by reference made a part of the attached lease document:

1. Modified Rentals--(a) Beginning with the lease year and continuing at five-year intervals thereafter, the annual rental shall be modified so as to equal _____ percent of the fair market value of the premises at such appraisal dates, as determined by appraisal as hereinafter specified; provided, however that the premises shall be valued and appraised at the date of the rental modification as unimproved land as defined herein. For purposes of rental modification, unimproved land shall mean the leased land in its original condition at the commencement date of the Lease, disregarding all building or structural improvements above or below grade, excavation or backfill, and disregarding all landscaping, paving, or encumbrances placed on the property by the Lessee. The foregoing notwithstanding, any improvements above or below grade placed on or made available to the property by the Lessor or at the expense of the Lessor shall not be disregarded. The unimproved land, as above defined, shall be appraised at its highest and best use regardless of its actual use, but subject to existing classification and zoning.

2. Special Assessments--In the event any general or special assessment is levied on the Premises for a part of the cost of any public work or improvement assessed according to benefit found by levying authority to accrue therefrom to the demised Premises, Lessee shall pay for the same.

3. Permitted Uses--The lands described herein are intended to permit any use which is consistent with zoning and building restrictions and statutes and governmental regulations now in effect or hereafter adopted by any governmental authority.

4. Liability Insurance--In the event of uses other than residential or agricultural, Lessor may require that Lessee will at his own expense obtain and maintain during the term of this Lease and any renewal term thereof comprehensive general liability insurance with respect to the leased Premises, naming Lessor as additional assured, from an insurance company authorized to do business in Alaska, with minimum limits of not less than $200,000 for injury to one person and not less than $1,000,000 for injury to more than one person in any one accident or occurrence, and insurance in a sum not less than $200,000 against claims for property damage, or such higher limits as Lessor may from time

to time determine, with due regard to then prevailing prudent business practice in the State of Alaska, as reasonably adequate for its protection, and Lessee will from time to time upon receipt thereof deposit promptly with Lessor upon demand current certificates of such insurance.

Attachment No. 1 Recreational Lease

ADL No. _____

The following clauses are hereby included in and by reference made a part of the attached lease document:

1. Modified Rentals--(a) Beginning with the lease year and continuing at five-year intervals thereafter, the annual rental shall be modified so as to equal _____ percent of the fair market value of the premises at such appraisal dates, as determined by appraisal as hereinafter specified; provided, however, that the premises shall be valued at the date of the rental modification as unimproved land as defined herein. For purposes of rental modification, unimproved land shall mean the leased land in its original condition at the commencement date of the Lease, disregarding all building or structural improvements above or below grade, excavation or backfill, and disregarding all landscaping, paving, leases or encumbrances placed on the property by the Lessee. The foregoing not withstanding, any improvements above or below grade placed on or made available to the property by the Lessor or at the expense of the lessor shall not be disregarded. The unimproved land, as defined above, shall be appraised at its highest and best use regardless of its actual use, but subject to existing use restrictions and zoning.

2. Special Assessments--In the event any general or special assessment is levied on the premises for a part of the cost of any public work or improvement assessed according to benefit found by levying authority to accrue therefrom to the demised premises, Lessee shall pay for the same.

3. Permitted Uses--Whereas the lands described herein are intended for recreational use they shall under the terms of this lease have a maximum use density of one recreational dwelling or structure and accessory building or structure which are reasonably necessary for the use and enjoyment of and are in keeping with the nature of the recreational lease.

Attachment No. 1 Agricultural Lease

ADL No. _____

The following clauses are hereby included in and by reference made a part of the attached lease document:

1. Modified Rentals--(a) Beginning with the lease year and continuing at five-year intervals thereafter, the annual rental shall be modified so as to equal _____ percent of the fair market value of the premises at such appraisal dates, as determined by appraisal as hereinafter specified; provided however that the premises shall be valued at the date of the rental modification as unimproved land as defined herein. For purposes of rental modification, unimproved land shall mean the leased land in its original condition at the commencement date of the Lease, disregarding all building or structural improvements above or below grade, excavation or backfill, and disregarding all landscaping, paving, leases or encumbrances placed on the property by the Lessee. The foregoing notwithstanding, any improvements above or below grade placed on or made available to the property by the Lessor or at the expense of the Lessor shall not be disregarded. The unimproved land, as above defined, shall be appraised at its highest and best use regardless of its actual use, but subject to existing use restrictions and zoning.

2. Special Assessments--In the event any general or special assessment is levied on the premises for a part of the cost of any public work or improvement assessed according to benefit found by levying authority to accrue therefrom to the demised premises, Lessee shall pay for the same.

3. Permitted Uses--Whereas the lands described herein are permitted agricultural uses, they shall, under the terms of this lease, shall be limited to the following rights of use:

(a) The right to develop one single family dwelling and accessory buildings or structures for the family's use.

(b) The right to develop and utilize the property for agricultural purposes that include grazing of livestock, cultivation of crops or forage, and storage of crops, feed, animals, and agricultural equipment and supplies.

(c) The right to construct fences, structures, and buildings reasonably required for agricultural production on the property.

(d) The right to harvest timber only as needed to clear fields, pastures, and roadways.

Committee Opts For Ceiling On Increase Of Land Leases

A governor's committee on land disposal policies has decided to keep a ceiling on the amount leases on state-owned land can be increased after each five-year appraisal.

At a public hearing earlier this month, leaseholders objected to the 100 per cent increase in the ceiling, saying this would mean they could be paying millions of dollars in annual rent by the end of the 55 year leases, as well as experience great difficulty in getting financing for capital improvements on the land.

There is no ceiling limit on current lease last year some leaseholders experienced rent increases of as much as 1,000 per cent.

The committee has decided to leave the ceiling provision in its recommendations which have been presented to Gov. Jay Hammond and his administration, Ted Smith, director of the state division of land and water management, said today. Smith co-chaired the special land policy committee.

Smith said the group did decide, however, that current leaseholders would have the option of converting to new leases which would contain committee recommendations.

Those who choose not to convert their leases wouldn't be subject to the 100 per cent increase ceiling. New leaseholders wouldn't have this option.

An administration bill incorporating the 18 recommendations for changes in state policies concerning sale and lease of state lands should be introduced in the state legislature this week, Smith said.

He said he had hoped to get the recommended changes incorporated into a Senate Resources Committee substitute bill of a Senate bill also recommending changes in the lease law but the committee failed to do this. "Now it means we'll have to get a governor's bill introduced."

RE: Committee Substitute for Senate Bill #159

Dear Senator Orsini:

I have reviewed a copy of the above-referenced bill which you sent to me. Basically, I consider it an improvement over the present leasing policy. It would appear that it will be easier to finance improvements on leases due to the fact that rents will be fixed with 10-year periods and that there will be less likelihood for small businessmen and homeowners leasing State land to be forced to abandon or sell their leases because of the ravages of inflation. Likewise, during periods in which cumulative inflation is less than 70% during any 10-year period, the State will be able to adjust the rents to Fair Market Values at the end of each lease period.

However, because of the longer periods between rental adjustments and the fact that maximum rental adjustments are provided for, in periods in which there is rapid inflation or rapid increases in land value, a Lessee could accumulate a sizeable leasehold interest which could be sold at a substantial profit. Since I am certain that it is your desire to make State land readily available to the citizens of the State of Alaska, but not allow them to speculate at the expense of other taxpayers, I would suggest that the following change be made to the bill: "In the event that a leaseholder sells or assigns his lease to another party, a re-determination of the annual rental shall be made pursuant to Paragraph 4E and the purchaser or assignee shall be obligated to pay that rental until the next rental adjustment period." I feel this amendment will allow the Lessee to have the advantages and protection provided for in this bill without allowing him to receive a windfall profit at the expense of the State and its other taxpayers.

In sub-paragraph J, where the term MAI Appraiser is used, a more proper definition would be "an appraiser who is a member of the American Institute of Real Estate Appraisers holding the MAI designation". Since there are now a number of Alaskan appraisers who have the MAI designation, it might be advisable to require that, in addition to holding the MAI designation, the appraiser also be a resident of and doing business in the State of Alaska.

It is my opinion that resident appraisers will be able to do a better appraisal at less cost. If this provision is not included in the bill, in some cases, Lessees may bring in non-resident appraisers (I am assuming that the State will uphold it's philosophy of local hire) who, because of their lack of familiarity with Alaskan conditions, will require a greater time to complete an accurate appraisal. Since the State will be paying half of the cost of such appraisals, I see no justification for the taxpayers of Alaska to pay the cost of travel and lodging non-residents, plus the additional fee that will be required for a non-resident to familiarize himself with Alaskan conditions.

While I am sure that no bill can be written that will be 100% satisfactory to everyone, I feel that with the above-referenced changes, this bill will be a marked improvement over the present law. If I can provide you with any additional information, please feel free to call on me.

Sincerely,

REAL ESTATE SERVICES CORPORATION

SB 159 Leasing of State Land

A. Areas of agreement
1. Present leasing policy must be changed – but how much?
2. Some lessees will be financially injured, even with moderate changes – but it may be a result of bad decisions
3. Certain ~~~~ fundamental aspects of state leases (e.g. no "lease-purchase") make state leases less attractive than private leases – but how much?
4. Some sort of ceiling on ~~~~ rental increases must be imposed – but how much?

B. Two fundamental differences in philosophies of state leases
1. Leases should be made at the "market rate" ~~~~ thus maximizing long term income to the state. (or to the trust benficiary) (trustor)
2. Leases should be made at a nominal less-than-market rate, the main objective being to derive some income while still retaining ownership of the land and encouraging development

C. Two different types of land being leased
1. Land in trust for mental health, schools & U of A
2. Unrestricted state-owned land

3. Approximately 80% of the state leases are for trust land

D 159 (Finance) expresses both philosophies
1. Low ceiling and appraisal restrictions
2. "Market rate" definition for annual rental rate

E. Problems with the bill
1. no acknowledgement of two different types of land to be leased
2. ~~Ineffective~~ Administrative problems will result from certain aspects e.g. only 11 MAI appraisers in the state
3. See 38.05.105 (6)(2) page 4 - to what are attributable the "general" increase in land valuation - public actions or private actions?

1976 SURVEY OF THE ANCHORAGE REAL ESTATE MARKET AND ANCHORAGE REAL ESTATE BUSINESS

The following survey is the fourth annual survey of the Anchorage real estate market and Anchorage real estate businesses by Real Estate Services Corporation. The survey is conducted by distributing questionnaires to Anchorage Realtors. The first survey was conducted in September of 1973, and this survey was conducted during September of 1976. This year's survey is based upon the compilation of replies from 91 participating Realtors. While this number only constitutes approximately 10% of all the active Realtors in the Anchorage market, it is felt to be a large enough sample for statistical purposes.

The theory and reasoning behind the survey is that it is difficult, time consuming, and very expensive to obtain all information contained in this survey if it were to be determined by factual analysis. However, it is our opinion that the cumulative opinions of a large number of informed Realtors, when analyzed on a statistical basis, can be a reliable indicator. Nevertheless, caution must be excercised in utilizing the results of this survey because they are based merely on averaged opinion and not necessarily provable facts.

Classification of Present Real Estate Market: In response to the question, "How would you generally classify the real estate market at present?"

65.5% indicated that it was a Buyer's Market.

28.9% indicated that it was a Balanced Market.

5.6% indicated that it was a Seller's Market.

It is obvious that as of September it was the feeling of the majority of Realtors that buyers had the upper hand in the market place with only a small minority feeling that sellers had the advantage. This is a complete reversal of last years survey in which only 13.6% indicated it was a buyer's market and 55.5% indicated it was a sellers market.

Anticipation of Next Year's Interest Rates. In response to the question, "How do you expect interest rates to be in the next year?"

38.0% expect interest rates to be higher.

17.2% expect interest rates to be lower.

44.8% expect no change in interest rates.

It is interesting to note that this year only 38.0% expect interest rates to be higher, whereas last year 62.5% expected interest rates to be higher. Last year 31.9% expected no change in interest rates, whereas this year 44.8% expect no change.

The Real Estate Business During the Past Year: In response to the question, "How has your business done in the period September 1975 through August 1976 as compared with the period September 1974 through August 1975?"

62.8% indicated that their business had been better.

24.3% indicated that their business had been about the same.

12.9% indicated that their business had been poorer.

This is the first year in which our survey has indicated any decrease in the real estate business. In past years, the response indicating that business had been better had always been in the high 70% range, but this year only 62.8% indicated that their business had been better. There was an increase this year from 16.7% to 24.3% for those who said their business had been about the same, and an increase from 5.5% to 12.9% who indicated that their business had been poorer.

Expectations for Real Estate Business next Year: In response to the question, "How do you expect your business to do next year as compared to the past year?"

67.8% expect their business to be better.

27.8% expect their business to be about the same.

4.4% expect their business to be poorer.

It is interesting to note that the response to this question parallels the question on how real estate business has been during the past year. Last year almost 80% of the respondents felt business would be better. This year, only 67.8% feel that their business will be better. There has also been an increase from 20.3% last year, to 27.8% this year of those who feel their business will be about the same next year and an increase from 0% last year to 4.4% this year, of those who expect business to be poorer.

CAPITAL MOVE QUESTIONS

Because the capital move issue was a major election issue this year, we asked several questions pertaining to the capital move.

Will the capital move justify the cost: In response to the question, "Do you feel that moving the capital will provide sufficient benefits to justify its costs?"

85.2% indicated yes

14.8% indicated no

It, therefore, appears there is extremely strong support for the capital relocation amongst Anchorage Realtors.

Capital Location Preference: In response to the question, "This November voters will have the opportunity to select one of the first three capital locations listed below. If the choices were expanded to the five listed below, which would you prefer?"

55.1% indicated a preference for the Willow Site.

5.6% indicated a preference for the Mt. Yenlo Site.

2.2% indicated a preference for the Larson Lake Site.

31.5% indicated a preference for Anchorage.

5.6% indicated a preference for Juneau.

Impact of Capital Relocation on Real Estate Investments: In response to the question, "If the capital is moved to a location in the Matanuska-Susitna Borough, which area do you feel will offer the best return on investments in real estate?"

50.6% indicated they felt the Matanuska-Susitna Borough would offer the best return.

49.4% indicated they felt the Municipality of Anchorage would offer the best return.

Confidence Rating of Agencies, Organizations, and Professions: In an effort to determine the confidence that local Realtors have in various agencies, organizations, and professions, we asked them to indicate their opinion of a number of these agencies, organizations, and professions by indicating a rating of 5 for very good, a rating of 4 for good, a rating of 3 for fair, a rating of 2 for poor, and a rating of 1 for very poor. This is a listing of the agencies in order of their confidence ratings for this year. The numerical rating figure and last years rank and numerical rating follow.

Order of Rank	Agency, Organization, or Profession	Numerical Rating	Last Year's Rating Order Of Rank	Last Year's Rating Numerical Rating
1	Alaska Housing Finance Corp.	4.06	2	3.61
2	Title Companies	3.61	1	3.89
3	Local Fee Appraisers	3.35	3	3.54
4	State Division of Veterans	3.15	7	2.93
5	Local Banks	3.08	5	3.10
6	Federal Veterans Admin.	2.92	8	2.89
7	Local Attorneys	2.90	6	3.03
8	Municipality of Anchorage	2.61	*	*
9	State of Alaska	2.60	9	2.77
10	Federal Housing Administration	2.45	11	2.29

* Last year the Municipality did not exist. In last year's study the City of Anchorage rated #4 with a rating of 3.35 and the Greater Anchorage Area Borough rated #10 with a rating of 2.29. Thus, the Municipality is rated poorer than the old City of Anchorage, but better than the old Borough.

Analysis of Local Rental Market: In an effort to determine what the supply and demand situation is in the local rental market for various types of space, we asked the question, "What is your opinion of the rental market for the following types of space?" The following are the replies for this year and replies to the identical question last year, indicated as a percentage of the total response.

Type of Space	Oversupply of Vacant Space 1975	1976	Supply and Demand in Balance 1975	1976	Shortage of Available Space 1975	1977
Office	65.2%	71.6%	30.3%	27.2%	4.5%	1.2%
Retail	14.5%	14.1%	62.9%	64.1%	22.6%	21.8%
Apartments	-0-	19.3%	12.9%	61.4%	87.1%	19.3%
Warehouses	21.9%	27.4%	50.0%	41.1%	28.1%	31.5%

As can be seen this year's replies closely parallel those of last year except for the apartment rental market in which there has been a marked change. Last year no one felt there was an oversupply, but this year 19.3% felt that there was an oversupply of vacant space. Last year 87.1% felt there was a shortage of available space and only 19.3% felt that way this year. Overall, the majority of 61.4% felt that the apartment market is now in balance rather than a shortage as was evident last year. This year, as in the past year, an overwhelming majority of 71.6% felt that there is an oversupply of vacant office space. An analysis indicates that there is essentially a balanced market for retail and warehouse space which closely parallels the results of last year's survey.

Investment Preferences: In an effort to determine the preferences of local Realtors for investments, we asked them to list, in order of their preference, their choices for the best investment potential over the next five years. They were to indicate their choice by number, i.e., (1) is first choice, etc. In order of preference with the numerical rating following are the various types of property. Also, included are last year's results to the identical question.

Order	Type of Property	Numerical Rating	1975 Order	1975 Rating
1	Vacant Land - Zoned Commercial	3.11	2	3.48
2	Vacant Land - Zoned Apartment	3.74	1	3.15
3	Commercial Buildings	3.95	7*	4.71
4	Vacant Land - Zoned Residential	4.17	3	3.71
5	Vacant Land - Zoned Industrial	4.38	5	4.61
6	Apartment Buildings	4.44	4	3.79
7	Industrial Buildings	4.70	8	5.71
8	Single Family Houses	4.99	6*	4.71

In analyzing the responses, it is interesting to note the relationship between the investment preferences and the opinions concerning the supply and demand balance in the rental market. For example, last year most Realtors felt there was a shortage of available apartments for rent and this year felt that the market was balanced. Accordingly, apartment buildings dropped

* Indicates a tie in preference

in preference from #3 last year to #6 this year. Also, vacant land zoned for apartments dropped from #1 in preference last year to #2 this year. The interesting change in this year's survey is the almost meteoric rise in preference for commercial buildings. Last year commercial buildings rated #7, but this year have moved up to #3 and commercial zoned land moved from second place to first place. However, most Realtors still feel that there is an oversupply of vacant office space and a balance in the market for retail space, which are the two types of spaces comprising commercial buildings. Assuming that there is a relationship between vacant rental space and the value of such rental property, it would appear that most Realtors must feel that the vacancy in office space has peaked and will begin declining in the near future.

Where Do Realtors Earn Their Income: This year we included a new question to find out from which activities Realtors earn the majority of their income. In response to the question, "From which of the following activities do you derive 50% or more of your earned income (Do not count rents, interest, and other investment income)?"

51.8% indicated the majority of their income came from commissions from the sale of houses.

12.6% indicated the majority of the income came from commisions from sale of vacant land.

16.1% indicated the majority of their income came from commissions from sale of improved commercial and investment property.

3.4% indicated the majority of their income came from fees from real estate services such as appraising, property management and counseling.

9.2% indicated the majority of their income came from salaries, fees or business profit from administration of a real estate business in a position such as broker or sales manager.

6.9% indicated the majority of their income came from non-real estate income from another job.

Growth in Value of Real Estate: In the next series of questions we asked local Realtors by what percentage they felt the values of various types of real estate had increased in the past year. (September 1975 through August 1976) We have combined these results in a chart with the results of the surveys for the past three years. Therefore, this chart shows the increase from September of 1972 through August of 1976. We also asked participants to make projections of their estimate of what the increases will be from September of 1976 through August of 1977 and these results are also included in the chart, but not in the following graphs. (Results for industrial buildings and industrial zoned land are not shown for 1973 because they were first included in the 1974 survey).

As stated earlier in this report, there is no method of accurately predicting future values, but it is our opinion that the cumulative opinion of a large number of Realtors, when analyzed on a statistical basis, is as reliable guide as any. Nevertheless, caution must be exercised in utilizing these figures because they are based merely on average opinion and not provable facts. It should also be remembered that the percentages shown are merely the arithmetic mean, and in several cases the standard deviation can be fairly large. Utilizing a plus and minus of one standard deviation, the most probable indicated range of value increases is shown on the following chart. The average increase (arthimetic mean) in both dollars and percentage is graphically shown on the following graphs, utilizing as a base of comparison an assumed typically priced property in September of 1972.

GROWTH IN VALUE OF ANCHORAGE REAL ESTATE

INDUSTRIAL BUILDINGS - $ 100,000 - 1973

GROWTH IN VALUE IN TERMS OF "INFLATION FREE OR CONSTANT DOLLARS"

The percentage rates of growth for various types of real estate as shown on the preceding chart and graphs are expressed in straight percentages without adjustment for decreasing value of the dollar. This is the same method used to indicate the percentage return for competing investments. However, since it is common practice for real estate appraisers and real estate investment analysts to make future projections in terms of constant dollars, without regard to inflation, we have included the following table.

The following table shows the cumulative percentage increase for the various types of properties during the period September 1972 through August 1976, and also shows the average rate of increase based on annual compounding. Next is reflected the cumulative increase in the cost of living index from October 1972 through September 1976 (the nearest dates surveyed) as developed by the Bureau of Statistics of the US Department of Labor, which is considered the authoritative source on increases in cost of living and therefore the rate of inflation. In the column following the cumulative increase in the cost of living is shown the average annual increase in value expressed in terms of constant dollars and assuming annual compounding.

However, since such a table, utilizing constant dollars as a method of comparison, would tend to make it appear that the rate of return is less on a real estate than on other investments, which seldom make constant dollar comparisons, we have included typical yields on competing investments, analyzed in the same manner for the same period of time. The rate utilized for bond yields is based on the average September 1972 figures indicated in the American Institute of Real Estate Appraisers publication, "The Appraiser". The rates for certificates of deposits and savings accounts are the highest rates generally available to average investors during the past four years. All investments assume annual compounding except for the savings accounts and certificates of deposits which assume quarterly compounding. The common stocks are based on indicated average prices during the same period. The comparisons are all made without consideration of income tax consequences, and do not make allowances for dividends on common stocks, nor profit from rentals or mortgage amortization, paid for by tenants, in income producing real estate. Likewise, comparisons do not account for leveraging through mortgages, which in most cases will drastically increase the equity return in real estate investments. The comparison assumes 100% cash purchases for all investments.

Type of Investment	Cumulative Return	Cumulative Return	Cumulative Inflation	Average Constant Dollar Return
Single Family Residences	59.66%	12.41%	43.37%	3.85%
Apartment Buildings	55.00%	11.58%	43.37%	2.79%

Representative Hugh Malone
Pouch V
Juneau, Alaska 99811

Dear Hugh:

Enclosed are some calculations for hypothetical examples of leasing state land. They are based on 10 year reappraisal periods, 10% maximum rental rate, and 170% maximum allowable rental increase from one period to the next. Case #1 is probably the most "typical" case, where 6% rental rate is used (the rate charged for the last 10 years) and an increase in property valuation of 100% in 10 years (the "historic" pre-pipeline rate).

This concept is the one I presented to the Senate Finance Committee, and I think is a compromise between the proposal in CSSB 159 (which a prominent banker said was a "ripoff" from the state) and the current situation (which a prominent legislator said was a "ripoff" by the state).

If I can be of any help, let me know.

Sincerely,

Joe

JOE ORSINI
Senator

JO:gd

Case # 1

Rental rate = 6% ; assessed value increases 100% every ten years; $10,000 initial value

$10,000
× .06
$600/yr

IN THE SENATE BY THE FINANCE COMMITTEE

CS FOR SENATE BILL NO. 159 (Finance) am

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating ~~to the leasing of~~ to state lands ~~other than for the extraction of natural resources,~~ and providing for an effective date." (amendment No. 6)

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.05.085 is repealed and re-enacted to read:

Sec. 38.05.085. TERM OF LEASE. (a) The lease shall provide that

(1) for the initial 25-year period of the lease, the lessee shall pay the state a fixed base annual rent to be agreed upon by the parties in compliance with the provisions of this chapter; however, this annual rent may not exceed 10 per cent of the fair market value of the property as determined in (b) of this section;

(2) the fixed base annual rent to be paid by the lessee shall be readjusted when the initial 25-year period of the lease has expired and, thereafter, every 10 years; and

(3) the readjusted annual rent may not exceed 10 per cent of the value of the property as determined in (b) of this section or 50 per cent more than the amount paid each year during the initial period or the preceding 10-year period, whichever is lower.

(b) When it becomes necessary to determine the fair market value of property as required by (a) of this section, the lessee shall appoint an M.A.I. appraiser and the state shall appoint an M.A.I. appraiser. The two appraisers so appointed shall, within a specified period of time agreed upon by the parties, make their appraisals of the property in question. If the two appraisers agree upon the fair market value, the

determination is absolutely binding on the parties. In the event the two appraisers are unable to agree, they shall together appoint a third M.A.I. appraiser who shall then make his appraisal of the property in question. When the third appraisal is completed, the two of the three appraisals which are nearest each other in their determination of the fair market value shall be averaged and the resultant sum shall be the fair market value of the matter in question and absolutely binding on the parties. All costs incurred in making the appraisals provided for in this subsection shall be borne by the state and the lessee equally.

Amendment No. 2

(c) The lessee shall make advance payments of the annual rent or portion of it as the director, with the approval of the commissioner, may require.

(d) A preference right lessee of grazing or forest land may follow the payment schedule established in his cancelled federal lease or grazing permit if he so desires.

(e) Notice of all actions by the department affecting the rights of a lease or lessee shall be given to the lessee.

(f) A violation of a provision of this chapter or of a term or provision of a lease subjects the lessee to appropriate legal action, including, but not limited to, a forfeiture of the lease.

(g) In this section,

(1) "annual rent" means the amount of rent paid annually determined by multiplying the fair market value by the rental rate computed at the time of the initial 25-year period of the lease or of each subsequent 10-year period of the lease;

(2) "rental rate" means the rate, expressed as a percentage of fair market value, which a comparable class of privately owned property would bring in the open market with the same conditions of lease as offered by the state.

* Sec. 2. AS 38.05 is amended by adding a new section to read:

Sec. 38.05.103. RIGHTS OF HOLDER OF SECURITY INTEREST. (a) If there is a breach or default of a term of a lease or of the provisions of this chapter relating to a lease, the division shall provide written notice of the breach or default by personal service or by registered or certified mail to the lessee and to any holder of record having a security interest in the leased property. The notice shall also make demand upon the lessee to cure or remedy the breach or default within 60 days from the date of receipt of the notice and demand. If a lessee fails to cure or remedy the breach or default within 60 days, or within the additional time which the division may allow for good cause, the state may, subject to (b) of this section, exercise any right which it may have at law or as set out in the lease.

(b) If a lessee fails to cure or remedy a breach or default within the time allowed in (a) of this section, a holder of a security interest who has received notice under (a) of this section may cure or remedy the breach or default if the breach or default can be cured by the payment of money or, if this cannot be done, by performing or undertaking in writing to perform the terms, convenants, restrictions and conditions of the lease capable of performance by the holder. The holder shall act within 60 days from the date of receipt of notice under (a) of this section, or within an additional period as the director may allow for good cause.

* Sec. 3. AS 38.05.105 is repealed and re-enacted to read:

Sec. 38.05.105. PERIODIC RENT ADJUSTMENTS. (a) Each lease shall stipulate that at the conclusion of the initial 25-year period of the lease and at intervals of 10 years thereafter the annual rent payment is subject to adjustment. Charges or adjustments shall be based primarily on an adjusted fair market value. However, if the director of

the division of lands determines that single-family residential development is the best use of the land, the reappraisal period may be lengthened or the readjustment waived in accordance with regulations adopted by the department. Before a waiver of rent adjustment is issued, the land shall have a current reappraisal. A waiver is valid only if single-family residential development actually occurs. The regulations adopted under this section shall ensure that the state receives a fair return from the land.

(b) The provisions of sec. 85(b) of this chapter are applicable to reappraisals of leases required by this section, except that, in determining an adjusted market value

(1) changes in property value due to governmental actions, including zoning reclassifications, shall be included; and

(2) changes in property value due to private improvements made to the property since originally entering into the lease shall be excluded.

* Sec. 4. The provisions of this Act are applicable to state leases which are in existence on or before the effective date of this Act if a lessee under a lease elects, in writing, to be bound by this Act. When a lessee elects to be bound by the provisions of this Act, the state shall enter into a new lease with the lessee for a term equal to the remaining period of the original lease which is being terminated that is consistent with the provisions of this Act. However, for purposes of determining the annual rent by the state, the fair market value of the property which is used to establish the fixed base annual rent for the initial period of the lease may not exceed the fair market value as it was last appraised on or before January 1, 1975, brought forward to January 1, 1976, at the rate of 10 per cent per year, or, if the lease was entered into after January 1, 1975, on the basis of the fair market value at the time the lease was entered into.

Amendment No. 1

* Sec. 5. The provisions of sec. 4 of this Act expire on January 1, 1979.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Amendment #1

IN THE HOUSE BY THE JUDICIARY COMMITTEE

CS FOR HOUSE BILL NO. 2 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act authorizing state land to be made available as homesites."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE OF ACT. The longstanding policy of the state, declared in the Constitution of the State of Alaska (art. VIII, sec. 1) and the Alaska Land Act (AS 38.05.350), has been to encourage the settlement of the state's land and the development of its resources by making them available for maximum use consistent with the public interest. In authorizing the classification of land for settlement as homesites, this Act is intended to further that policy explicitly, by recognizing that the immediate production of revenues to the state through the auction of land to the highest bidder, virtually the only method by which state land has been made available to the public for residential use, is secondary in importance to the primary, and ultimately more beneficial and productive, goal of providing land for Alaskans to settle at a cost reasonably within their means, and that the highest and best use of some land may clearly be for habitation.

* Sec. 2. AS 38 is amended by adding a new chapter to read:

CHAPTER 8. HOMESITES.

Sec. 38.08.010. CLASSIFICATION OF LAND FOR HOMESITE ENTRY. (a) The director shall classify, survey, and plat for homesite entry state land which is otherwise vacant, unappropriated and unreserved and is suitable for erection of residential dwellings to use as a permanent abode.

(b) Land classified as homesite entry land shall be divided into

parcels not exceeding two and one-half acres, in reasonably compact form, with boundaries conforming as nearly as practicable to natural geologic and topographic features.

(c) Nothing in this section shall be construed to mean that the director must classify all vacant, unappropriated or unreserved state land as homesite entry land.

Sec. 38.08.020. OFFERING OF LAND FOR HOMESITE ENTRY. Following classification of land for homesite entry, offerings of homesite entry land shall be made on a rotating basis from among the four judicial districts of the state. The director shall publish notice of the availability of the land for at least three consecutive weeks through the electronic media and in at least three newspapers of general circulation in the state, at least one of which, if possible, shall be a newspaper of general circulation in the vicinity of the available land.

Sec. 38.08.030. APPLICATIONS FOR HOMESITE ENTRY; FEES. (a) To qualify for a homesite entry permit, an applicant shall

(1) at the time of application have attained the age of 18;

(2) submit proof acceptable to the commissioner that he is a resident of the state at the time of application, and that he has been a resident of the state for not less than three years immediately preceding the date his application was submitted, or that he has been a resident for 20 years cumulatively;

(3) agree to comply with the requirements for obtaining a patent to land set out under sec. 60 of this chapter.

(b) Fees for filing an application may not exceed $10.

Sec. 38.08.040. ISSUANCE OF ENTRY PERMIT. (a) An applicant meeting the qualifications for homesite entry under sec. 30 of this chapter shall be issued a revocable permit to occupy and improve the homesite in order to qualify for issuance of patent as provided in this

chapter. The application fee is the sole rent chargeable on the permit for its duration.

(b) If the number of applicants qualified for homesite entry exceeds the number of available homesites offered, or if several applicants apply and qualify for the same homesite, priority in award of an entry permit shall be accorded to that applicant showing proof of the longest residency in the state.

(c) The permit may not be assigned, conveyed or otherwise transferred, but rights under the permit may devolve by testate or intestate succession. An attempt to assign, convey, or to otherwise transfer the permit, is void and constitutes a substantial breach.

(d) An applicant may apply for more than one available homesite. No person holding a homesite patent may apply for a homesite entry permit, no person may simultaneously hold more than one homesite entry permit, and no person who is a member of the homesite entry permit holder's household may be issued a homesite entry permit while a member of the homesite entry permit holder's household.

Sec. 38.08.050. REVOCATION OF ENTRY PERMIT. (a) The entry permit may only be revoked for failure to erect a dwelling as required under sec. 60 of this chapter, or for other substantial breach of the terms and conditions of the homesite entry permit.

(b) Upon revocation and termination of a permit, improvements or chattels upon the homesite shall be managed, and subsequent issuance of a permit for entry on the homesite shall be conditioned, in the same manner as provided in AS 38.05.090 for removal or reversion of improvements upon termination of leases of state land.

Sec. 38.08.060. ISSUANCE OF PATENT. (a) A person who enters upon homesite entry land under a permit issued by the director shall be issued a patent to the land conveying an unencumbered title if that

person

(1) occupies the land for a cumulative total of 21 months within the three-year period following issuance of the homesite entry permit;

(2) erects a habitable, permanent, single-family dwelling on the homesite, which meets all applicable state and local regulations, within three years of the date of issuance of the homesite entry permit; for the purposes of this paragraph, mobile homes are not considered to be permanent dwellings unless they are placed on a permanent foundation;

(3) reimburses the state for the survey and platting undertaken in accordance with this chapter. The director shall provide by regulation for installment payments of this reimbursement.

(b) Nothing in this chapter shall be construed to prohibit a person issued a homesite entry permit from residing in a temporary habitable dwelling on the homesite until revocation of the homesite entry permit or issuance of a patent to the homesite.

(c) No person may be issued more than one patent during his lifetime, nor may any person who is a member of a patent holder's household be issued a patent while a member of the patent holder's household.

(d) If a dwelling is found to have been substantially completed under sec. 100 of this chapter, patent shall be issued upon completion of the dwelling, notwithstanding (a)(2) of this section.

Sec. 38.08.070. LAND LOCATED WITHIN MUNICIPALITIES. No state land which is located within the boundaries of an organized borough or city may be classified for homesite entry under this chapter until the proposed use of the land has been studied and approved jointly by the director and the local planning authority. Nothing in this section or AS 29.18.190 prevents the director from selecting and classifying for homesite entry land which would otherwise be available for borough or

city selection under AS 29.18.190. If classified for homesite entry, the land shall not be available for city or borough selection.

Sec. 38.08.080. REQUIRED ZONING. No state land which is located within the boundaries of a municipality which exercises planning and zoning authority under AS 29 may be offered by the director for homesite entry under this chapter until the land has been zoned by the governing body of the municipality for residential use only. No state land which is located within a municipality which does not exercise planning and zoning authority, or which is located in the unorganized borough, may be offered by the director for homesite entry under this chapter unless the division of lands has adopted zoning regulations under AS 38.05.037 to restrict the use of the land to residential purposes.

Sec. 38.08.090. DISCLAIMER OF INTENT TO PROVIDE SERVICES. Nothing in this chapter obligates the state to provide services to lands which are the subject of homesite entry and patent.

Sec. 38.08.100. SUBSTANTIAL COMPLETION OF DWELLING. An entry permit may not be revoked for failure to erect a dwelling in the time required under sec. 60(a)(2) of this chapter if the director finds that erection of the dwelling has been substantially completed and progress toward completion is being made at the expiration of the time required.

Sec. 38.08.110. REGULATIONS. The commissioner shall adopt regulations in accordance with AS 44.62.180 - 44.62.290 to carry out the purposes of this chapter.

Sec. 38.08.120. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of natural resources;

(2) "habitable dwelling" means a dwelling of a permanent nature, together with fixtures and facilities, including sanitary facilities, required or customary in the vicinity of the land made

available for homesite entry.

(3) "resident" means a person who is not claiming residence in another state and shows by all attending circumstances that his intent is to make this state his permanent residence.

* Sec. 3. AS 29.33.090 is amended by adding a new subsection to read:

(c) The assembly shall regulate and restrict the use of state land within the borough which is vacant, unappropriated and unreserved and which is found suitable for classification and disposal for homesite entry under AS 38.05.327. Compliance with the provisions of this subsection is a prerequisite to issuance of homesite entry permits for land within the borough.

* Sec. 4. AS 29.13.100 is amended by adding a new paragraph to read:

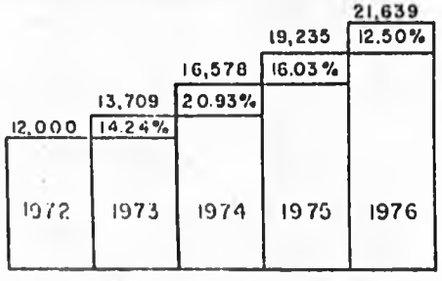
(37) AS 29.33.090(c) (zoning of state land for homesite entry)

Amendment No. 2

(c) If the director determines that private recreational or residential development is the best use of the land, the reappraisal period provided in this section may be lengthened, the initial rate may be ad-

justed, or the rent adjustment may be waived in accordance with regulations adopted by the commissioner. Before action is taken under this subsection, the director shall prepare a written finding that the extension, rental rate adjustment, or waiver of rent adjustment is in conformity with this section and is in the best interests of the state. Notwithstanding the provisions of AS 38.05.315(d), if the rental rate is adjusted, the adjusted rent may not exceed four per cent of the fair market value of the property. An extension, rent adjustment, or waiver is valid only if private recreational or residential development actually occurs.

GROWTH IN VALUE OF VACANT REAL ESTATE



LAND ZONED FOR SINGLE FAMILY USE

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

DIVISION OF LANDS / 323 E. 4TH AVENUE – ANCHORAGE 99501

April 1, 1977

Senator Joseph Orsini
Pouch V
Juneau, Alaska 99811

Dear Joe:

Confirming our conversation this afternoon, the following are my recommendations for amendments for your proposed Finance Committee Susbtitute for Senate Bill 159.

1. On page 3, lines 13-17, delete all after the word "determined" and substitute the following:

   "high bid at public auction, except as provided in Section 70(b) of this chapter".

   This is to conform with the requirement in AS 38.05.075 that the initial offering of the lease be by public auction. There is really no other method possible besides negotiation since at the first offering there is no existing lessee with which to enter the process contemplated in the original SB 159.

2. On page 3, Subsection 85(j), delete the reference to "M.A.I." preceding the word "appraiser" where it appears. There are presently only 11 M.A.I. appraisers in the State and there are a number of competant appraisers who are not Institute members.

3. Also in Subparagraph 85(j) on page 3, provide an alternative method of resolving disputes. After the word "lessee" on the third line of subparagraph (j) insert "may elect to follow either of the following two procedures (1) the lessee". This sentence now reads "The lessee may elect to follow either of two procedures: (1) the lessee shall appoint an appraiser and the state shall appoint..." After the last word in this subparagraph "equally", add "or (2) the lessee may appeal to the Commissioner who may establish an Ad Hoc Hearing Panel to recommend resolution of the dispute."

I am also enclosing the lease method comparisons for your new bill. As I indicated to you on the phone, in my opinion, this bill establishes too much of a negotiable leasehold interest with the lessee when it should properly remain with the trust lands.

Sincerely,

Ted

THEODORE G. SMITH, Director
Land and Water Management

LEASE AGREEMENT

THIS AGREEMENT, made and entered into as of this day of September, 1975, by and between [redacted], hereinafter called the Lessor and [redacted], an Alaskan corporation of Anchorage, Alaska, hereinafter referred to as Lessee, WITNESSETH:

1. The Lessor, for and in consideration of the rents, covenants and agreements hereinafter mentioned, and reserved and contained on behalf of the Lessee to be kept, paid and performed, do by these presents grant, demise and let unto the said Lessee all of that certain property situated in the Anchorage Recording District, Third Judicial District, State of Alaska, and more particularly described on the attached Schedule "A" which is by reference incorporated as a part hereof.

Together with all and singular, the tenements, hereditaments and appurtenances thereunto belonging or in anywise appertaining, subject to the rights and reservations in patent to said land, exisiting easements for roads, power, lights and other utilities and restrictions of record, and to encroachment ascertainable by physical inspection of the property.

2. The term of the lease shall be the period of fifty-five (55) years, commencing on the 1st day of September, 1975 and ending midnight, the last day of August, 2030.

3. Lessee shall pay Lessor monthly rentals during the term of this lease of [redacted] each month. The rent shall be paid to Lessor in advance on or before the 1st day of each and every month during the term of this lease. The rental shall be paid to Lessor by mailing to Lessor, at his address following the execution of this agreement or such other address as Lessor shall hereinafter in writing direct. Commencing on the 1st day of September, 1980, and upon the 1st day of September of each five (5) year anniversay date thereafter, the rent shall be adjusted upward or downward to reflect the increase or decrease in the consumer price index, prepared by the United States Bureau of Labor Statistics. The rental is based upon the Index number (153.8) for the month of, July 1975, which appears in the line "All Items" in the column for the "United States", the Consumer Price Index--U.S. (1967 = 100)--New Series, (reflecting the change in prices of goods and services purchased by city wage earners and clerical worker families to maintian their level of living) published by the Bureau of Labor Statistics, United States Department of Labor. A copy of said index for the month of July, 1975, is attached hereto as Schedule "B" and by reference made a part hereof. Subject to the provisions hereinafter set forth, the monthly rental for the five (5) year period, commencing September 1, 1980 and for each month of each five (5) year period thereafter, shall be arrived at by multiplying the rental set forth above by a fraction, the numerator of which shall be the index figure for the month of July of the year preceeding the date of such successive five (5) year adjustment and the denominator shall be the index figure for the month of July, 1975, which is 153.8. If the Bureau of Labor Statistics changes the form or basis of calculating the Consumer Price Index, the parties agree to request the Bureau to make available for the period of this lease, a monthly consumer price index for

55 YEARS FROM

the month of July of the year preceeding the date of each successive five (5) year adjustment and in its present form and calculated on the same basis as the index for July, 1975. However, it is expressly provided that the minimum rental regardless of changes in the Consumer Price Index, shall not be less than the sum of [redacted] per month for the entire term of this lease.

4. Except as hereinafter provided, it is intended by the parties hereto that Lessee shall pay all expenses with respect to the property and any improvements placed upon the property, and Lessor shall receive the rental payments free and clear of any and all expenses of the property. Accordingly, Lessee agrees that Lessee will pay all charges for electricity, water, gas, telephone, sewer, and all other utility services used on the leased premises, all taxes and assessments upon the lease premises which are payable during the lease term, and all other expenses of whatsoever nature incurred in connection with the leased premises. Taxes for the first year of the lease and for the last year of the lease shall be prorated as between Lessee and Lessor, based on the number of months of such year which the lease is to cover.

It is intended by the parties hereto that Lessor at Lessors sole cost and expense shall bring sewer and water to the property leased hereunder and shall backfill said property so as to provide a sufficient foundation for a two story building provided further that such foundation shall be sufficient and proper to support any adjacent property areas.

Lessor owns the adjacent property north of the leased premises and it is further agreed that no improvements above ground level shall be constructed on Lessor's adjacent property within twenty (20) feet of the north property line of the leased premises without the prior written consent of Lessee.

5. Both parties shall have the right of assignment at any time, provided, however, that such assignment shall not release Lessee of any obligations for the performance of each and every obligation contained herein. Lessee may sub-lease a part or all of the premises, and such sub-lease shall be subject to each and every provisions of this lease agreement, and such sub-lease shall not release the Lessee from the obligations of this lease, but Lessee shall remain liable to Lessor for the payment of the rental and the performance of all obligations of this lease.

6. Lessee shall not make or suffer any use or occupancy of the premises contrary to any law or ordinance now or hereafter enforced.

7. Lessee agrees to protect, indemnify and save harmless the Lessor from and against all claims asserted against the Lessor by reason of Lessee's use of the premises.

8. (a) If Lessee fails to pay the rent upon the day when the same shall become due and such failure continues for ten (10) days, after Lessor's or written notice to Lessee of such failure and demand for payment of creditors, or then Lessee shall be in default in the performance of this lease.

(b) If Lessee shall fail to perform any of the other provisions, conditions or covenants of this lease and Lessee shall have failed to perform, correct or cure any such non-performance within thirty (30) days after the date of mailing of written notice by Lessor to Lessee of such non-performance, then the Lessee shall be in default, provided the Lessee shall not be in default if within said thirty (30) day period the Lessee shall have commenced all actions reasonably necessary to perform, correct or cure such non-performance and thereafter continue diligently to prosecute such action to conclusion so as to perform, correct or cure any such non-performance. A copy of any such notice of default from Lessor to Lessee shall be mailed to any financial institution holding a deed of trust or other security interest in the property.

(c) In the event of default in the performance of this lease by Lessee, Lessor may re-enter the premises, either in person or by agent, and re-let the premises as the agent of Lessee and receive the rent therefrom applying the same first to the payment of such expenses as Lessor may be put to in re-entering and re-leting and then to the payment of rents accruing hereunder, the balance, if any, to be paid to Lessee who shall remain liable for any deficiency, or Lessor, at Lessor's option, may terminate this lease and all rights of Lessee hereunder, and in such event all rentals paid in advance by the Lessee may be retained by the Lessors as liquidated damages for the breach of this agreement and as additional rental for the use of the property.

9. Lessor does hereby covenant and agree that Lessee, paying said rent in the manner aforesaid and performing Lessee's obligations to be kept and performed, may and shall have the right at all times during the term of this lease to quietly hold, possess, use, occupy and enjoy the said leased premises and property, and all improvements which may from time to time be placed thereon under and by virtue of this lease. It is agreed that Lessor, or his agent, shall have the right at all reasonable times to enter upon the premises and inspect the same.

10. Lessee, at Lessee's sole cost and expense may construct buildings or other improvements upon the premises, provided, however, that Lessee shall not at any time permit or allow any liens or other encumbrances to be placed against the above-described property or any part thereof, except as hereinafter provided by subordination agreement and that Lessee will at all times hold Lessor and the premises harmless against any expenses or charges arising out of any construction or improvements commenced or carried out at the request of Lessee. Prior to the commencement of any construction or improvements of a total cost which will exceed TEN THOUSAND DOLLARS ($10,000.00), Lessee shall purchase a bond with a reputable insurance company authorized to do business in the State of Alaska, which will be of an amount at least equal to the total cost of such construction or improvements and shall be conditioned for the indemnity of the Lessor, to keep the property free and clear of all labor, material and mechanic's liens and other liens which may arise or be created in the erection of a building or improvements and that when completed, the said building, improvements and premises shall be free of all such liens, excluding those of financial institutions to which Lessor have subordinated the property. A copy of such bond

shall be furnished Lessor prior to commencement of any construction, or improvements costing in excess of TEN THOUSAND DOLLARS ($10,000.00). The Lessor may post a notice of non-responsibility as to all liens in accordance with the Alaska Statutes, Sec. 34.34.065 or other applicable law. Upon termination of the lease or expiration of the lease term, all improvements placed upon the premises shall become the property of Lessor.

11. Lessee, may at any time, mortgage or convey by deed of trust in the nature of a mortgage, its estate in the premises and any building or improvement then or thereafter situated thereon; provided that Lessee shall not be in default in any of the agreements herein contained, to be kept, observed and performed by Lessee and shall have paid all rents, taxes and assessments and all other charges of every kind which shall have accrued hereunder; and provided further that no mortgagee or trustee or beneficiary, under such mortgage or deed of trust shall, by virtue thereof, acquire any greater rights in the premises and any buildings or improvements thereon, than Lessee then has under this lease unless Lessor shall have subordinated Lessor's interest in the property as hereinafter provided.

12. Lessor agrees that Lessor will consent to subordinate Lessor's interest in the property to a deed of trust or to deeds of trust, mortgages, or other security instruments necessary to finance the construction of improvements upon the premises which may hereafter be executed by Lessee and given to a financial institution, mortgage company, insurance company or other financier as security for a loan or loans the proceeds of which are used, directly or indirectly, for construction of improvements upon the premises. Lessor agrees to execute any instruments required to accomplish such subordination. Lessee agrees that Lessee will pay any deed of trust or deeds of trust, mortgage, or other security instrument given as security for construction of improvements upon the premises according to the terms thereof. If Lessee defaults under the terms of any such deed of trust, mortgage, or other security instrument, the proceeds of which were used for the construction of improvements on said real property in accordance with the terms of said instrument, such default shall consititute a default under the provisions of this lease agreement. It is agreed that damages would not be sufficient in the event Lessor fails to execute, upon request, such subordination agreement and Lessee may obtain specific performance of this subordination provisions. It is agreed that Lessee shall prepare any and all documents required for Lessor's signatures and shall pay the reasonable cost of attorney's fees by Lessor in reviewing the legal documents. Lessee agrees that it will carry insurance for protection of improvements against loss by fire or other casualty at least equal in amount to the amount of any mortgage or lien created by Lessee for construction of improvements upon the property.

13. In consideration of the execution of this lease, the undersigned Lessor, hereby grants to Lessee the option to purchase the above-described property covered by this lease at any time after the 1st day of September, 2020, but prior to the 1st day of September, 2035, for an amount equal to the then fair market value of the property, exclusive of any improvements, at the time said option is exercised to be determined by agreement of the parties or by an appraisal as hereinafter set forth. The

Lessee may exercise this option by (1) mailing to the Lessors written notice by registered or certified mail on or before said date of the Lessee's intention to exercise this option and, if the parties have not previously agreed in writing upon the fair market value of the property, (2) setting forth in such written notice the name of the appraiser who shall represent the Lessee in the determination of the fair market value. Within thirty (30) days of receipt of such notice of election to exercise this option, if the parties have not agreed in writing upon the fair market value to be used for the purchase price, the Lessors shall send to the Lessee notice of the appointment of an appraiser to represent the Lessor setting forth the name of such appraiser. The two appraisers so selected shall on or before ten (10) days after the mailing of the notice of the appointment of the appraiser to represent the Lessor, appoint a third appraiser who shall act as chairman of the group. The appraisers shall be disinterested persons not related to either of the parties by consanguinity or affinity. Said appraisers shall then immediately proceed to appraise the market value of the land (exclusive of buildings or improvements) as of the date of the mailing of the notice by Lessee of the Lessee's election to exercise this option and shall report the same in writing to the parties hereto, on or before the thirtieth (30th) day following the selection of the third appraiser. Such report, whether unanimous or by majority, shall be final and binding upon the parties thereto, as to the market value of said premises to be paid by the Lessee to the Lessor for the purchase of the property pursuant to this option. Promptly after the execution of this agreement, the Lessor shall have a warranty deed prepared and execute the same conveying the property to the Lessee free and clear of any and all encumbrances, except those encumbrances arising by acts of the Lessee or persons acting under them, but subject to existing easements for roads, power, lights and other utilities and restrictions of record, as of the date of such conveyance, and subject to any encumbrances placed against the property by reason or improvements constructed on the premises by the Lessee. Said warranty deed shall be placed in the Trust Department of [redacted] at Anchorage or such other bank or financial institution as the parties may hereinafter agree with written instructions signed by the Lessee and the Lessor providing for the delivery of said deed to the Alaska Title Guaranty Company, or any title guaranty company succeeding to the business of said company, to be recorded simultaneously with the deed of trust to be given by the Lessee for payment of the purchase price of the land as determined by the appraisers for the parties. The instructions to the Trust Department shall provide for the delivery of the deed to the title company for recording when the Trustee shall have received the report of value from the appraisers appointed by the parties or upon an agreement for the delivery of the same executed by the parties, their successors assigns or heirs. Upon the conveyance of said property, this lease shall terminate. Promptly and within ten (10) days from the date that said warranty deed has been delivered to the title insurance company, the Lessee shall pay to the Lessor twenty percent (20%) of the purchase price of the property, said purchase price being the fair market value determined by agreement or appraisal as hereinabove set forth. The balance of the purchase price shall be secured by a deed of trust upon the property and payable in equal monthly installments over a period of one hundred twenty (120) months together with interest at the rate of eight percent (8%) upon the unpaid balance of the purchase price.

It is intended that if the Lessee desires to purchase the property, it must exercise the option by the date set forth herein and in the manner set forth and if it fails to do so that Lessee shall have no right to purchase the property during the remaining term of this lease, and extention thereof, or any time thereafter. If this lease is terminated by reason of the default of the Lessee prior to the exercise of this option then this option to purchase shall terminate and thereafter shall be null and void. The instructions to the Trust Department holding the deed shall contain provisions for the redelivery of the deed to the Lessor after the date within which the option is not so exercised, or in the event that this lease is terminated.

If prior to the beginning of the option period provided for herein, the Lessor proposes to sell said property to a bona fide purchaser, the Lessee shall first be afforded an opportunity to purchase the property under the terms herein provided at the same price as offered by the bona fide buyer or at the then determined fair market value, whichever is lower, said fair market value to be determined in accordance with provisions heretofore set out in this paragraph with date of fair market value to be the date Lessor notifies Lessee of Lessors intent to sell the property.

14. The provisions of this lease and all questions arising concerning this lease shall be determined and resolved in accordance with the laws of the State of Alaska.

15. Failure of the Lessor to insist on the strict performance of the terms, conditions and agreements herein contained or any of them, shall not constitute or be construed as a waiver or relinquishment of Lessor's rights to thereafter enforce any such terms, agreements or conditions, but the same shall continue in full force and effect.

16. The provisions of this lease shall extend to and include the heirs, executors, administrators, successors and assigns of the parties hereto.

17. Any notice required to be given by the terms of this lease may be mailed to the address of the person as hereinafter set forth following the signature of each party to this lease or such other address as a party may hereafter in writing direct.

IN WITNESS WHEREOF, the parties have hereunto set their hands as of the date first hereinabove written.

Lease Agreement

[redacted]

Schedule "A"

The description of the leased property is:

2

LEASE AGREEMENT

THIS INDENTURE OF LEASE is made this 22nd day of July, 1976, by and between [redacted], a domestic corporation, of Anchorage, Alaska, hereinafter called Landlord, and [redacted], hereinafter called Tenant.

W I T N E S S E T H :

1. Premises.-- Landlord, for and in consideration of the rents, covenants and conditions hereinafter specified to be paid, performed and observed by Tenant, does hereby let, lease and demise to Tenant the vacant, unimproved real estate located in the Anchorage Recording District, Third Judicial District, State of Alaska, more particularly described as follows:

[redacted]

2. Appurtenances, Etc.-- Landlord cedes and grants to Tenant all easements, parking and loading rights, right of ingress and egress, fixtures and appurtenances now or hereafter belonging or appertaining to said premises.

3. Encumbrances.-- The described premises are leased, subject to deed restrictions, easements, rights-of-way, if any; zoning and building restrictions and governmental regulations now in effect or hereafter adopted by any governmental authority.

4. Term.-- The term of this Lease shall be fifty-five (55) years, commencing December 1, 1975, through and including November 30, 2030, unless sooner terminated as hereinafter provided, and subject to Tenant's option to extend the term of this Lease for two successive five (5) year periods commencing on December 1, 2030, and December 1, 2035.

In order to exercise the respective successive options to extend, Tenant must give Landlord written notice of its election to extend not less than six (6) months prior to the beginning of each such extended period or such options terminate and become null and void.

5. Rental.-- Tenant agrees to pay, quarterly in advance, on or before December 1, March 1, June 1, and September 1, of every year, during the entire term hereof, a quarterly rental of [redacted], except as rental is hereinafter modified. Provided, that rental shall commence as of June 1, 1976, and additional rent under provision 7 hereof shall commence as of January 1, 1976.

6. Prior Lease Cancelled.-- The Lease Agreement dated November 14, 1975, between Landlord and [redacted] and [redacted] has been cancelled by mutual consent. The sum of [redacted] ([redacted]) paid on execution of the cancelled Lease shall be applied to the quarterly rent due June 1, 1976, under this Lease Agreement.

7. Taxes and Other Charges.-- As additional rent, Tenant agrees to pay to the public authorities charged with collection thereof, promptly as the same become due and payable, all taxes, assessments, general and special, permits, inspection and license fees and other public charges, whether of a like or different nature, levied upon or assessed against the leased premises and any buildings, structures, fixtures or improvements now or hereafter located thereon, or arising in respect of the occupancy, use or possession of the demised premises, and which are assessed and are, or become, a lien during the term of this lease, and Tenant agrees to exhibit to Landlord, on demand, receipts evidencing payment of all taxes, assessments and public charges so payable by Tenant. All real estate taxes for the first and last years of the term hereof shall be equitably prorated between the parties.

It is expressly agreed, however, that Tenant shall not be obligated to pay any income tax, profits tax, excise tax, or other tax or charge that may be payable by or chargeable to Landlord, under any present or future law of the United States or any political or taxing subdivision thereof, or any other governmental agency, upon or with respect to the rent received by Landlord under this lease; provided, however, that in any case where an income tax may be levied, assessed or imposed by the State or any political subdivision thereof upon the income arising from the rents provided hereunder, for the use and occupancy of said demised premises in lieu of or as a substitute for a tax upon said real estate or premises, Tenant, and not Landlord, shall be required, and hereby agrees to pay the same; and provided further, that in no event shall Tenant be obligated to pay for any year any greater amount by way of such substitute income tax had the rentals upon which such tax was imposed been the sole taxable income of Landlord for the year in question. Nor shall Tenant be obligated to pay any inheritance, transfer, estate, succession or similar tax or charge that may be payable under any present or future law of the United States or the said State, or imposed by any political or taxing subdivision thereof, or by any other governmental agency, by reason of the devolution, succession, transfer passing by inheritance, devise, acquisition, or becoming effective of the right to possession and enjoyment of all or any part of the estate of Landlord in said premises, whether by descent, deed, testamentary provision, trust deed, gift, mortgage, or otherwise.

In the event any special assessment is levied on the premises for a part of the cost of any public work or improvement assessed according to benefit found by the levying authority to accrue therefrom to the demised premises and the option is given to pay such assessment in installments, Tenant may elect to pay the same in installments and in that case shall become liable only for such installments as shall accrue during the term of this Lease and during any term or terms for which this Lease shall be extended. In the event that any assessment or installment of assessment coming due and payable during the term of this Lease has added to it any interest or service charge, Tenant shall pay such interest or service charge even though such charge relates back to a date prior to the execution of this Lease. A mortgage or other lien granted by Landlord for special benefits in lieu of a special assessment shall be considered a special assessment hereunder, whether such mortgage exists at the time of the execution of this Lease or is granted hereafter by Landlord and Tenant.

Notwithstanding any of the foregoing provisions, in the event the City of Anchorage or the State of Alaska or any governmental subdivision thereof, shall impose a sales tax on the yearly rentals paid hereunder, Tenant shall reimburse Landlord in the amount of such sales tax.

Tenant shall also pay all charges for water, gas, electri power or other public utility services rendered during term of this Lease as such charges become due.

If the demised premises are not assessed for taxes as a separate parcel, Tenant shall pay taxes on the demised premises based on the valuation of the demised premises as arrived at for that purpose, using the records and methods of the tax assessor, multiplied by the appropriate mill rate.

If the Greater Anchorage Area Borough, or other public authority having jurisdiction requires that the leased premises be platted, Tenant agrees to pay all costs of such platting, including, without limitation, survey costs, filing fees and the like. Tenant agrees to pay all costs of road improvements imposed by public authorities, or desired by Tenant, for roads adjacent to or within the boundaries of the leased premises.

8. Modified Rental.-- Beginning with the lease year commencing December 1, 1985, and continuing at five-year intervals thereafter, the annual rental of [redacted] per year shall be modified so as to equal seven percent (7%) of the fair market value of the premises; as determined by mutual agreement of the parties, or, in case of their inability to agree, by appraisal as hereinafter specified; provided, however, that the premises shall be valued and appraised at the date of the rental modification as unimproved land as defined herein. For purposes of the rental modification, unimproved land shall mean the demised land in its existing condition at the date of valuation or appraisal, disregarding all building or structural improvements above or below grade (building or structural improvements do not include excavation or backfill) and disregarding all landscaping, paving, leases and encumbrances. The unimproved land, as above defined, shall be valued or appraised at its highest and best use regardless of its actual use.

If the Landlord and Tenant are unable to agree on a modified rental as above provided on or before September 1, of the year in which the rent shall be modified, the Landlord and Tenant shall jointly select an appraiser from the regular Alaska membership of the Society of Real Estate Appraisers or the American Institute of Real Estate Appraisers, or the successor body of either group who has been properly designated M.A.I. or S.R.E.A., or S.R.P.A., or any future similar designation which denotes proficiency in the appraisal of commercial property and which is recognized as such by either of the above two groups or their successor bodies. The written report of the above selected appraiser on the appraised fair market value of the demised premises (using the aforesaid definitions and methods) shall be conclusive and binding upon the Landlord and Tenant for the purpose of adjusting the rental, unless either Landlord or Tenant object to such appraised value. The cost of the appraisal report shall be shared equally by the Landlord and Tenant, even if objected to by either party.

If the Landlord and Tenant cannot agree on one appraiser as above provided, or either objects to the written report of the appraiser as above provided, the Landlord and Tenant shall each select an appraiser from either of the above groups who holds any of the above-required designations. Either party may select the appraiser who was jointly selected as above provided and whose report was rejected. Those two appraisers shall select a third appraiser from either of the above groups and who holds any of the required designations. The appraised fair market value agreed upon in writing by two of these appraisers, or upon failure of any two to agree, the average value of the two appraisals closest to each other, shall be conclusive and binding upon Landlord and Tenant for the purposes of adjusting the rental. Each party shall pay the fee of its selected appraiser and one-half the fee of the third appraiser.

Anything in the foregoing paragraph to the contrary notwithstanding, the minimum quarterly rental shall never be less than the quarterly rental for the initial ten (10) year period of the term of this Lease. Nor shall the quarterly rental during the eleventh (11th) through the fifteenth (15th) years increase more than one hundred percent (100%) of the initial quarterly rental; nor the quarterly rental during the sixteenth (16th) through the twentieth (20th) year increase more than fifty percent (50%) of the immediately preceding quarterly rental; nor the quarterly rental during the twenty-first (21st) through the twenty-fifth (25th) year increase more than fifty percent (50%) of the immediately preceding quarterly rental. (By way of example, if the initial quarterly rental were $100, then the maximum quarterly rental during the eleventh (11th) through the fifteenth (15th) years would be $200; the maximum for the sixteenth (16th) through the twentieth (20th) years would be $300; and the maximum for the twenty-first (21st) through the twenty-fifth (25th) years would be $450.) After the twenty-fifth (25th) year, the above maximums shall not apply as limitations on the rental modification provisions of this paragraph 8.

9. Compliance with Laws and Care of Premises.-- Tenant shall comply with all applicable laws, ordinances and regulations of duly constituted public authorities now or hereafter in any manner affecting the demised premises or the sidewalks, alleys, streets, and way adjacent thereto or any buildings, structures, fixtures and improvements or the use thereof, whether or not any such laws, ordinances or regulations which may be hereafter enacted involve a change of policy on the part of the governmental body enacting the same. Tenant agrees to hold Landlord financially harmless (a) from the consequences of any violation of such laws, ordinances and/or regulations, and (b) from all claims for damages on account of injuries, death or property damage resulting from such violation. Tenant further agrees that it will not permit any unlawful occupation, business or trade to be conducted on said premises or any use to be made thereof contrary to any law, ordinance or regulation as aforesaid with respect thereto.

Tenant, at its own cost and expense, shall keep the leased premises and all improvements which at any time during the term of this lease may be situated thereon, in good condition and repair during the entire term of this lease, hereby expressly waiving the right to make repairs at the expense of Landlord as provided for in any statute or law in effect at the time of the

execution of this lease or any amendment thereof, or any other statute or law which may be hereafter passed during the term of this lease.

10. Tenant's Right, Etc.-- Tenant, when not in default of performance of any of its obligations hereunder shall have the following rights, during the term of this Lease, from time to time, in such manner, and to such extent as Tenant may in its sole judgment deem advisable, except where said rights are conditioned upon prior approval of Landlord:

(a) To demolish, remove or otherwise dispose of any improvements presently or subsequently situated upon the demised premises.

(b) To erect, place, or install upon the leased premises, buildings, structures, and improvements as from time to time it shall deem advisable.

(c) To make such alterations, additions and repairs to the leased premises as it may desire.

(d) Anything in the foregoing to the contrary notwithstanding, Tenant must, prior to the commencement of construction of a building or other structure, deliver to Landlord for approval two (2) complete sets of construction plans and specifications for the exterior of said improvements, prepared by a licensed architect or licensed engineer, a plot plan showing the proposed location of said improvements, all utilities and service connections and all places of ingress and egress to public streets and roads and plans for outdoor signs, lighting and landscaping. If approved, such approval shall be endorsed by Landlord upon said plans, specifications and plot plan within thirty (30) days from the receipt thereof, one (1) set of which shall be retained by Landlord. If Landlord does not approve of such plans and specifications, Landlord shall, within thirty (30) days from the receipt thereof, notify Tenant of its reasons for not approving said plans and specifications. Landlord agrees that it will not unreasonably withhold approval of such plans and specifications, and that the Landlord's failure to respond as herein provided within thirty (30) days of receipt of such plans and specifications shall be deemed an approval of same.

(e) No structure or other improvement, including, but not limited to, storage and/or display structures separate from the main structure, the plans, specifications and proposed location of which have not first received the written approval of Landlord, or which does not comply with such approved plans, specifications and locations, shall be constructed or maintained on the leased land. No material addition to or alteration of any building or structure erected on the leased land shall be commenced until plans and specifications covering the exterior of the proposed addition or alteration have been first submitted to and approved by Landlord in the manner above described. Any improvements constructed shall comply with all public laws, ordinances and regulations applicable thereto and shall be completed at the sole cost and expense of Tenant and without any cost, expense or liability of Landlord whatsoever.

(f) The approval by Landlord of any plans and specifications refers only to the conformity of such plans and

specifications to the general architectural plan for the leased land and neighboring land of the Landlord; such plans and specifications are not approved for architectural or engineering design and by approving such plans and specifications, Landlord assumes no liability or responsibility therefor, or for any defect in any structure constructed from such plans or specifications.

(g) All buildings, structures and permanent improvements, including signs which have been or may be installed, placed or attached in or about the leased premises by Tenant, shall remain the property of Tenant until the termination of the Lease. At the expiration or termination of the term of the Lease, or any extended term thereof, Landlord shall become the owner of all improvements located on the demised premises.

(h) Upon termination by expiration of time or otherwise of this Lease, or of any renewal thereof, or at any prior time, Tenant shall have the right, if it is not in default, to remove all trade fixtures and other movable items of personalty, provided that any damage caused to the leased premises by reason of such removal shall be paid by Tenant. Any trade fixtures and other movable items of personalty not so removed by Tenant shall become the property of Landlord. Tenant may, as part of a rebuilding or expansion program, demolish any part or all of the buildings, structures or improvements to be located on the leased premises.

11. Bond for Construction of Improvements.-- Before commencing the construction or installation of improvements on the demised premises, where the contract price or cost of such improvements exceeds the sum of $25,000, Tenant must furnish to Landlord a corporate surety bond in the amount of the cost or contract price of such improvements and the condition of said bond being the payment of all claims for labor and materials used in the construction or installation of such improvements.

12. Liens.-- Tenant will not permit any mechanics', laborers' or materialmen's liens to stand against the leased premises or improvements for any labor or materials furnished to Tenant or claimed to have been furnished to Tenant or to Tenant's agents, contractors, or sublessees, in connection with work of any character performed or claimed to have been performed on said premises or improvements by or at the direction or sufferance of Tenant; provided, however, that Tenant shall have the right to contest the validity or amount of any such lien or claimed lien. In the event of such contest, Tenant shall give to Landlord reasonable security as may be demanded by Landlord to insure payment thereof and prevent any sale, foreclosure or forfeiture of the premises or improvements by reason of such nonpayment. Such security need not exceed one and one-half times the amount of such lien or such claim of lien or Tenant may record the bond contemplated by Section 34.35.072, Alaska Statutes. Tenant will immediately pay any judgment rendered with all proper costs and charges and shall have such lien released or judgment satisfied at Tenant's own expense.

13. Use of Premises.-- The Tenant may use and occupy the demised premises for any lawful purpose.

14. Indemnification.-- Tenant agrees to protect,

defend, indemnify and save harmless Landlord from and against any and all claims, demands and causes of action and of any nature whatsoever, and any expenses incident to defense of and by Landlord therefrom, for any injury to or death of persons or loss of or damage to property occurring on the demised premises, or in any manner arising out of Tenant's use and occupation of said premises, or the condition thereof, during the term of this lease. Tenant shall procure and maintain public liability insurance coverage, naming Landlord as an insured, which coverage, pertaining to the demised premises, shall not be less than (1) $200,000 per person, $500,000 in the aggregate per accident, and $100,000 property damage; or (2) amounts which the Landlord reasonably requires to adequately cover the risks involved, whichever is greater. Tenant agrees to furnish copies of certificates evidencing insurance coverage of the demised premises to Landlord. The term "Tenant" shall not include a leasehold mortgagee unless the mortgagee has taken possession of the leasehold premises or acquires title pursuant to a foreclosure proceeding.

15. Condemnation.-- If the whole or any part of the demised premises shall be taken for any public or quasi-public use, under any statute or by right of eminent domain or private purchase in lieu thereof by a public body vested with the power of eminent domain, then, when possession shall be taken thereunder of the demised premises, or any part thereof, the following provisions shall be operative:

(a) Taking of All Premises.-- The term herein demised and all rights of Tenant hereunder shall immediately cease and terminate, and the rent shall be adjusted as of the time of such termination so that Tenant shall have paid rent up to the time of taking only. Landlord shall be entitled to the full condemnation proceeds, except the portion thereof attributable to the value of the buildings or improvements put up by Tenant.

(b) Taking of Substantial Part of Premises.-- If the taking reduces the ground area of the demised premises by at least thirty percent (30%) or materially affects the use being made by the Tenant of the demised premises, Tenant shall have the right, by written notice to Landlord effected not later than thirty (30) days after possession shall be taken, to elect to terminate this lease.

(1) If the election to terminate be made--

The provisions of (a) of this section relating to the taking of the whole shall govern; or

(2) If the election not be made--

(a) The lease shall continue;

(b) Landlord shall be entitled to the full condemnation proceeds except the portion thereof attributable to the value of the buildings or improvements put up by Tenant; and,

(c) Rent at the old rate shall be adjusted as of the date of taking of possession, and the rent for the balance of the term, except as modified from time to time under provision 8 hereof, shall be reduced so that the new rent shall

be that part of the former rent (before condemnation) which the unimproved value of the untaken premises (appraised after the taking) bears to the unimproved value of the entire premises demised immediately before the taking. Any dispute, controversy or claim arising out of or relating to the fixing of the new rent shall be settled by arbitration held in Anchorage, Alaska, in accordance with the Rule of the American Arbitration Association, and judgment upon any award rendered in such proceedings may be entered in any court having jurisdiction as provided by law.

(c) Taking of Insubstantial Part of Premises.-- If the taking is of such an insubstantial portion of the ground area that the use being made by Tenant of the leased premises is not materially affected, the provisions of (b)(2) above of this section (where election not made) shall govern.

16. Quiet Enjoyment.-- Provided Tenant is not in default hereunder, Landlord covenants that Tenant shall have peaceful and quiet enjoyment of the leased premises without let or hindrance on the part of Landlord, and that Landlord will warrant and defend Tenant in the peaceful and quiet enjoyment of the demised premises.

17. Notices.-- Any and all notices required or permitted under this lease, unless otherwise specified in writing by the party whose address is changed, shall be as follows:

Landlord: [redacted]

Tenant: [redacted]

18. Default.-- If Tenant at any time during the term of this lease (and regardless of the pendency of any bankruptcy, reorganization, receivership, insolvency or other proceedings, in law, in equity or before any administrative tribunal, which have or might have the effect of preventing Tenant from complying with the terms of this lease) shall (a) fail to make payment of any installment of rent or of any other sum herein specified to be paid by Tenant, or (b) fail to observe or perform any of Tenant's other covenants, agreements or obligations hereunder, and if any such default shall not be cured as to (a) within ten (10) days after Landlord shall have given Tenant written notice of such failure to make payment, or as to (b) within thirty (30) days after Landlord shall have given to Tenant written notice specifying such default or defaults, Tenant shall not have commenced to cure such default and proceed diligently to cure the same, or

(1) if Tenant has filed a Petition for an Arrangement under Chapter 11 of the Bankruptcy Act, 11 U.S.C. 701 et. seq.;

(2) or a voluntary petition under any other provision of said Bankruptcy Act; or

(3) if Tenant finally and without further possibility of appeal or review is adjudicated a bankrupt or insolvent; or

(4) has a receiver or a Trustee appointed for all

or substantially all of its business or assets on the ground of Tenant's insolvency; or

(5) has itself appointed as debtor-in-possession in a proceeding for a reorganization or an arrangement; or

(6) files a petition seeking any relief under the Bankruptcy Act of the United States, or any other act of the United States or any state having the same general purposes; or

(7) a petition is filed against Tenant seeking the relief under (6) above, which petition Tenant fails to oppose within twenty-one (21) days after service of said petition, provided, nevertheless, Landlord may terminate this Lease, even though Tenant opposes said petition against it if said petition is not dismissed within thirty (30) days after the date of opposition by Tenant to said petition; or

(8) if Tenant shall make an assignment for the benefit of its creditors,

then in any such event Landlord shall have the right at its election, then or at any time thereafter, and while such default, defaults or events shall continue, to give Tenant notice of Landlord's intention to terminate this lease and all Tenant's rights hereunder, on a date specified in such notice, which date shall not be less than thirty (30) days after the date of giving of such notice, and on the date specified in such notice, the term of this lease and all rights granted Tenant hereunder shall come to an end as fully as if the lease then expired by its own terms, and Tenant hereby covenants peaceably and quietly to yield up and surrender to Landlord said leased premises and all structures, buildings, improvements and equipment located thereon, and to execute and deliver to Landlord such instrument or instruments as shall be required by Landlord as will properly evidence termination of Tenant's rights hereunder or its interest therein.

In the event of termination of this lease as in this paragraph above provided, Landlord shall have the right to repossess the leased premises and such structures, buildings, improvements and equipment, either with process of law or through any form of suit or proceeding, as well as the right to sue for and recover all rents and other sums accrued up to the time of such termination, and damages arising out of any breach on the part of Tenant, including damages for rent not then accrued. Landlord shall also have the right, without resuming possession of the premises or terminating this lease, to sue for and recover all rents and other sums, including damages, at any time and from time to time accruing hereunder.

19. Costs Upon Default.-- In the event either party shall be in default in the performance of any of its obligations under this lease and an action shall be brought for the enforcement thereof, the defaulting party shall pay to the other all the expenses incurred therefor, including a reasonable attorney's fee.

In th event either party shall without fault on its part be made a party to any litigation commenced by or against the other, then such other party shall pay all costs and reasonable attorney's fees incurred or paid by such party in connection with such litigation.

20. Rights or Remedies.-- Except insofar as this is inconsistent with or contrary to any provision of this lease, no right or remedy herein conferred upon or reserved to Landlord is intended to be exclusive of any other right or remedy, and each and every right and remedy shall be cumulative and in addition to any other right or remedy given hereunder, or now or hereafter existing at law or in equity or by statute.

21. Waiver and Forebearance.-- Except to the extent that Landlord may have otherwise agreed in writing, no waiver by Landlord of any breach by Tenant of any of its obligations, agreements or covenants hereunder shall be deemed to be a waiver of any subsequent breach of the same or any other covenant, agreement or obligation. Nor shall any forebearance by Landlord to seek a remedy for any breach of Tenant be deemed a waiver by Landlord of its rights or remedies with respect to such breach.

22. Inspection.-- Landlord shall at all reasonable times during Tenant's business hours have access to the premises for the purpose of inspection.

23. Successors in Interest.-- This Lease shall be binding upon and inure to the benefit of the respective heirs, successors and assigns of the parties hereto.

24. Assignment or Subletting.-- Tenant must not sublet the demised premises, or any part thereof, or assign this Lease, or any part thereof, without the prior written consent of Landlord to such subletting or assignment, provided that Tenant may assign this Lease, or any part thereof, to a lending institution, for loan security purposes, and provided that this right to assign shall not be construed as a subordination of Landlord's rights hereunder, nor a subordination of its fee. Anything contrary in the foregoing notwithstanding, Tenant shall have the right to sublease all or any portion of space in any building which Tenant constructs upon the demised premises. Landlord agrees that it will not unreasonably withhold consent to a proposed subletting or assignment by Tenant.

25. Underground Conditions and Water Drainage.--

(a) Tenant has made, or prior to the construction of any building will make, its own soil tests and this lease is made subject to and without liability because of or resulting from any fill or any subsurface or soil condition upon the leased land.

(b) Tenant shall not drain or discharge water from the leased land on to adjoining land; the leased land shall be graded and drained to cause the discharge of all water on the street adjoining the leased land or into an established drainage easement, if any, on the leased land.

26. Mineral Reservation Clause.-- Landlord expressly reserves unto itself, its successors and assigns, all oil, gas, associated hydro-carbons and minerals and the right to prospect for, mine and remove said oil, gas, hydro-carbons and minerals, provided that such reserved estate and the rights incident thereto are limited to a depth more than five hundred feet (500') below the surface of the real estate conveyed, or more than five hundred feet (500') below any surface use of said real estate, whichever depth is the greater. In any event, the Tenant's use

of the surface and such portion of subsurface as is necessary for effective use of the surface shall not be disturbed or impaired by this mineral reservation or the exercise of any rights pertaining thereto.

27. Underground Utilities.-- Tenant agrees that all utilities within and serving the demised premises shall be installed underground, except the existing above-ground utilities located on the East ten feet (10') of said demised premises, provided that service connections to said existing above-ground utilities shall be installed underground.

28. Destruction of Improvements on Demised Premises.-- If all or part of the improvements placed by Tenant on the demised premises are destroyed by fire, earthquake or other cause, Tenant shall remove the debris and clean up the affected area within 120 days of the occurrence of such destruction.

29. No Dedication.-- Landlord shall have the right to close, from time to time, any or all portions of the parking area or areas to such extent as may, in the opinion of Landlord's counsel, be legally sufficient to prevent a dedication thereof or the accrual of any rights therein to any person or to the public.

30. Screening of Garbage Storage Area.-- Tenant must provide a screened or fenced area for the temporary storage of garbage, trash or snow pending removal of such material. Plans for such screening or fencing are subject to Provision 10 hereof.

31. Holding Over.-- In the event that the Tenant holds over at or after the end of the term, or any extended term, the tenancy shall be deemed a month-to-month tenancy commencing on the first day of the holding over period.

32. Mortgage of Leasehold Interest of Tenant.--

(a) Tenant shall have the unrestricted right to encumber, by mortgage, deed of trust, assignment or other appropriate instrument, Tenant's interest in part or in whole to the leased premises and in and to this Lease.

(b) A leasehold mortgagee, a beneficiary of a deed of trust, or a security assignee shall have and be subrogated to any and all rights of Tenant with respect to the curing of any default hereunder by Tenant.

(c) If the holder of any such mortgage, the beneficiary of any such deed of trust, or the security assignee shall give Landlord, before any default shall have occurred in the Lease, a written notice containing the name and post office address of such holder, Landlord shall thereafter give to such holder a copy of each notice of default by Tenant at the same time as any notice of default shall be given by Landlord to Tenant; and Landlord will not thereafter enter into any modification of this Lease without the prior written consent of the holder of any first mortgage, beneficial interest under a first deed of trust, or security assignment in this Lease.

(d) If by reason of any default of Tenant, either this Lease or any extension thereof shall be terminated at the election of Landlord prior to the stated expiration therefor,

Landlord will enter into a new Lease with the leasehold mortgagee, the beneficiary of a deed of trust, or the security assignee, for the remainder of the term, effective as of the date of such termination, at the rent and additional rent and on the terms herein contained, subject to the following conditions:

1. Such mortgagee, beneficiary or security assignee shall make written request to Landlord for a new Lease within forty (40) days after the date of such termination; and such written request shall be accompanied by a payment to Landlord of all sums then due Landlord under this Lease, as if termination had not occurred, but with such costs as are permitted under provision 19 of this Lease.

2. Such mortgagee, beneficiary, or security assignee shall pay to Landlord, at the time of the execution and delivery of such new Lease, any and all sums due thereunder, in addition to those which would at the time of the execution and delivery thereof be due under this Lease but for such termination, and in addition thereto, any reasonable expenses, including legal and attorneys' fees to which Landlord shall have been subjected by reason of such default.

3. Such mortgagee, beneficiary or security assignee shall, on or before the execution and delivery of such new Lease, perform all the other conditions required to be performed by Tenant to the extent that Tenant shall have failed to perform such conditions.

(c) If the leased premises are rendered unfit for further use for office building purposes by earthquake, ground conditions or other natural disaster, or if a taking of the whole or any part of the demised premises for public or quasi-public use by right of eminent domain or purchase in lieu thereof results in the leased premises no longer being an economically feasible location for an office building financed by a lending institution, the leasehold mortgagee or the Tenant, with the consent of the leasehold mortgagee, may remove all improvements from the leased premises regardless of any provisions to the contrary in this Lease. However, this provision shall not terminate the Lease nor the obligations of Tenant under the Lease.

33. Short Form Acknowledgement of Lease.-- Tenant agrees that it will not record this agreement at full length, but will record a short form acknowledgement of lease in lieu thereof, in the form of Exhibit A attached hereto, unless recording of a short form adversely affects the ability of Tenant to finance improvements on the demised premises, in which event Tenant must request in writing that it be relieved of the provisions hereof.

34. Integration and Modification.-- This document contains the entire agreement of the parties hereto. All negotiations, statements, representations, warranties, and assurances, whether oral or written, which are in any way related to the subject matter of this lease and the performance of either party hereto are merged and integrated into the terms of this document.

This Lease may not be modified nor amended except by a writing signed by both parties hereto, and any purported amendment or modification is without effect until reduced to a writing signed by both parties hereto.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands and seals the day and year first hereinabove written.

GROUND LEASE

LESSOR:

LESSEE:

INITIATION DATE: October 2, 1975

TERM : 55 years

RENTAL: Rent to be 8% of the agreed upon Fair Market Value of $255,000. or $ 20,400. per year until January 2, 1977.

January 2, 1977 to January 1, 1979 rent to remain at $20,400. per year.

January 1, 1979 and beyond the rent is to be established at 8% of Fair Market Value as determined by mutual agreement or an appraisal.

After 1979 rent adjustment, the next reappraisal is not to occur before January 1, 1981 and no rental thereafter shall be made more frequently than once every 5 years.

OPTION TO PURCHASE: Option to purchase for a 6 month period following the expiration of 5 years from the beginning of the term, that is for the 6 month period between January 1, 1981 and June 30, 1981.

Minimum purchase price to be $350,000. and any rental paid during 1981 to be credited against the purchase price.

Purchase price will be the same as agreed upon for the 1981 rental.

DETERMINATION OF FAIR MARKET VALUE

Parties may initiate negotiations to determine the Fair Market Value at any time within the year immediately preceeding the effective date of such determination. If agreement is not reached within 90 days prior to the effective date then either party may institute proceedure for appraisal. In this case each party shall select an appraiser and if they do not agree on Fair Market Value or are not within 5% of one another then they shall appoint a third appraiser. If the two appraisers are within 5% of one another then the Fair Market Value shall be determined as the mid point between these two values.

NET LEASE: Lessee is to pay all taxes, assessments, and utility charges.

SUBORDINATION: Lessee may incumber the lessor's interest with a mortgage.

REVERSION: Upon termination of the lease the improvements shall revert to the lessor without cost to the lessor.

9

LESSOR: on.

LESSEE:

LOCATION:

LEGAL DESCRIPTION:

SIZE:

ZONING: B - 3

COMMENCEMENT DATE: April 1, 1973

TERM: 75 years (April 1, 1973 thru March 31, 2048)

TERMS: Lease entirely net. Rent to be $27,000. per year for the first 5 years until 1978. This figure was based on the land value of $300,000. and the lessors expected date of return of 9%.

The rent is to be adjusted in accordance with the Consumer Price Index and is to be based on the month of March, 1973. - ADJ. THRU EVERY 5 YR'S.

Option to Purchase:

The lessee has the option to purchase the land any time after the first five years of the lease. Purchase price to be based on an appraisal of the land.

Reversion:

Improvements to revert to the lessor upon lease termination.

Subordination:

Lessor to subordinate it's interest to aid the lessee in securing financing of improvements.

DRAFT FINANCE CS for CS SB 159...

(1) Where reference is to a "fixed base annual rental" or "annual rental" throughout the document, the better term would appear to be "annual rent" or just "rent."

(2) Page 1, line 25: for each subsequent five year period until the termination of the lease...

(3) Page 2, line 9 [reference subsection (d) of AS 38.05.085] Are you talking about an annual rental rate or isn't it, in fact, a fixed rate applicable to the determination of the rent due and payable during each year of the particular period (10-year or 5-year) in which the lessee finds himself??

(4) Page 2, line 12: I don't understand the reference to "with the same lease conditions as offered by the state."

(5) Page 2, line 13 [reference to subsection (e)] Wouldn't it be simpler to draw the clear distinction between improvements benefitting the property by their construction by a party who is not the lessee (includable within the determination of the reappraised market value) and those improvements made to the property by the lessee himself or at his direction (exempted from determination of reappraised value).

(6) Page 3, line 1 [fifth line after the start of (j)] It appears that a part of the sentence has been left out following "by the parties,". Perhaps you need only insert the word "submit."

(7) Page 4, line 13: Delete "reappraised annual rental value" and insert "fair market value."

(8) Page 4, line 8 and lines 20 and 21: What is meant by "a single family residential development"? One home?? A subdivision full of only single-family homes??

*

I guess my only serious question is this: On page 2, in subsection (c) of sec. 85, if it is your intent that "fair market value" be redetermined at the commencement of each rental period specified -- 10-year period or 5-year period -- you ought to specify this. As (c) is now written, while I think this is what you mean, the reference only to an appraisal "in its original condition at the time of first entering into the lease" gives pause. Perhaps this could be done by amending to read

> (c) For the purposes of leasing under this section, "market value" or "fair market value" means the price, estimated in terms of money at the commencement of each 10- or 5-year lease period, which the property...

*

I have drafted some language which, I believe, accurately reflects what you have tried to do in the first section of the bill but which may be a little more straight-forward. It is attached...

* Section 1. AS 38.05.085 is repealed and re-enacted to read:

Sec. 38.05.085. TERM OF LEASE. (a) The lease shall provide that

(1) for the initial 10-year period of the lease, the lessee shall pay the state an annual rent which may not exceed 10 per cent of the fair market value of the property

(2) for each of two additional 10-year periods, the lessee shall pay an adjusted annual rent which may not exceed the lower of

(A) 10 per cent of the adjusted fair market value of the property as determined by a reappraisal at the beginning of each of the two 10-year periods; or

(B) 170 per cent of the annual rent paid during the preceding 10-year period;

(3) for each subsequent 5-year period until the expiration of the lease, the lessee shall pay an adjusted annual rent.

(b) In the event of dispute over the fair market value, the adjusted fair market value, or the rental rate applicable to any period under (a) of this section, the lessee shall appoint an M.A.I. appraiser and the state shall appoint an M.A.I. appraiser. The two appraisers so appointed shall, within a specified period of time agreed upon by the parties, make their appraisals of the property in question. If the two appraisers agree upon the appraisals of the property or the annual rental rate, their determination is absolutely binding upon the parties. In the event the two appraisers are unable to agree, they shall together appoint a third M.A.I. appraiser who shall then make his appraisal of the fair market value or the determination of the annual rental rate of the property in question. When the third appraisal or determination is completed, the two of the three appraisals or determinations which are nearest each other in their determination shall be averaged and the resultant sum shall be the fair market value or adjusted fair market value or rental rate of the property in question and absolutely binding on the parties. All costs incurred in making the appraisals or determinations provided for in this subsection shall be borne by the state and the lessee equally.

(c) subsection (f) of your draft

(d) subsection (g) of your draft

(e) subsection (h) of your draft

(f) subsection (i) of your draft

(g) In this section,

(1) "market value" or "fair market value" means the price, estimated in terms of money, which the property, in its condition at the time of first entering into the lease, would bring if offered for sale in the market between a willing seller and a willing buyer, both being fully informed of all the purposes for which the property is best adapted and for which it could be used;

(2) "adjusted market value" means the market value of the property inclusive of any change in its value attributable to improvements or changes made and affecting the property by a party who is not the lessee, including but not limited to zoning reclassifications, but exclusive of any change in its value attributable to improvements or changes made and affecting the property by the lessee since the lease agreement was entered into;

(3) "rental rate" means the rate, expressed as a percentage of fair market value, which a comparable class of privately-owned property would bring in the open market with the same conditions of lease as offered by the state;

(4) "annual rent" means the amount of rent paid annually determined by multiplying the fair market value by the rental rate at the time of commencement of the lease;

(5) "adjusted annual rent" means the amount of rent paid annually determined by multiplying the adjusted fair market value by the rental rate at the time of commencement of each rental period.

Draft 3/23/77

FINAL REPORT AND RECOMMENDATIONS

April, 1977

THE GOVERNOR'S AD HOC ADVISORY COMMITTEE ON STATE LAND PRACTICES AND PROCEDURES

B. Recommended Bill Presented to the Legislature

C. Recommended Standard Lease Form with Attachments

I. SUMMARY OF THE COMMITTEE'S FORMATION, MISSION, AND ACCOMPLISHMENTS

On October 8, 1976 the Governor's Ad Hoc Advisory Committee on State Land Practices and Procedures met for the first time. The mission of the committee was outlined by Guy Martin, Commissioner of the Department of Natural Resources. He said that the Governor desired a small, precise, and efficient panel to find new ways to improve state land practices and procedures, not to set policy but to address the legal and technical aspects of disposal and other contractual relationships. Judgments, criticisms, and new recommendations were to be effected. Michael C. T. Smith, Director of the Division of Lands, clarified the mission further by adding that the committee should:

1) consider primarily revenue production, as opposed to social benefits, in its analysis;

2) make no assumptions as to state policy regarding the number, size, and location of land sales or other disposals; and

3) recommend changes that will be applicable to any likely state land policy.

The committee made a dedicated attempt to accomplish its mission. The tasks of studying existing statutes, regulations, and practices, and examining them in light of current land disposal and contractual relationships was formidable, but many members worked successfully to this end. Uncovering and identifying disposal and contractual problems involved considerable time and effort. Correct identification of a particular problem of this nature is a major step toward solving it. Perhaps the greatest success of the committee was discerning from Division of Lands personnel and state lessees the exact nature of their problems and concisely defining them. This action will have a lasting effect on Division of Lands personnel who are charged with formulating policy and procedures for land disposals and contractual relationships. The committee did make significant recommendations to effect changes in statutes, regulations, and Division procedures and policy. The lease form used by the State was revised to include terms and conditions that would offer benefits to both the State and the lessee. The recommendations of the committee in general give the State more flexibility to respond to client needs. Both client and State will benefit greatly if the committee's recommendations are carried out. The mission of the committee has been accomplished with admirable success in this regard.

Selected areas were covered, specifically those of sales and leasing. The committee states that this report is not meant, by any means, to be all-inclusive.

II. THE INDIVIDUALS ON THE COMMITTEE

The individuals who served on the committee volunteered considerable time and effort. Each member was selected on the basis of having specialized knowledge and expertise. The following list of present members and their qualifications shows considerable diversity.

Mike Colletta - State Senator

Hugh Gellert - President of Bear Fritz, Inc., a land development company with interests in Anchorage and the Kenai Peninsula.

Herb Lang - President of Anchorage Sand and Gravel.

Jamie Love - Director of the Alaska Public Interest Research Group (AkPIRG).

David McCabe - Private Appraisor.

William Mack - Chairman of the Alaska Land and Lease Holders Association.

Carl Marrs - Land Manager for Cook Inlet Region, Inc.

John Norman - Attorney specializing in the area of corporate and natural resources law.

Lidia Selkregg - Anchorage Assemblywoman; Professor of Regional Planning at the Arctic Environmental Information and Data Center in Anchorage.

Theodore G. Smith - Former State Representative; present Director of the State Division of Land and Water Management.

III. COMMITTEE WORK PROCESS

The committee worked in a series of sessions which were all open to the public. Meetings were held weekly from October 8, 1976 to March 30, 1977 with the exception of 12/17/76 - 1/5/77, when the committee recessed for the holidays. Two additional evening work sessions were held, and two evening meetings to hear public comments took place on 12/1/76 and 3/3/77. The meetings were loosely structured to accomodate those attending and to provide time for public comment.

The committee addressed the area of sales in its first sessions and proceeded to the area of leases in the later sessions. There was considerable public input from concerned individuals, and organizations, and many persons with specialized knowledge were invited. A great deal of support was provided by many state agencies, particularly by the State Division of Lands and the Department of Law. Considerable time was spent in information gathering. The Division often was requested to provide information on current procedures. Considerable information on Division activities was compiled. The changes recommended were made cautiously and are well supported by the information gathered. The committee's recommendations were made in the form of motions which were voted on by majority vote at the meetings. Recommendations were made freely as each subject area was explored.

Many meetings, including the two evening public comment sessions, were advertised in two newspapers. Press releases and newspaper articles appeared locally. Mass mailouts provided general information and announced upcoming meetings; lists of meeting dates were available at all sessions. The interested public was encouraged to contact the Division of Lands with any verbal or written questions and comments. Copies of materials used by the committee were available to the public and public comment was specifically taken on the committee's interim recommendations and draft bill to the Governor.

Almost all sessions were tape recorded in their entirety. Written minutes of meetings were time-keyed to the tapes to allow verification. The public is welcome to listen to or make copies of these tapes by contacting the Division of Lands.

IV. FINDINGS AND RECOMMENDATIONS OF THE COMMITTEE

The findings of the committee were numerous but can be grouped into major categories:

1) State lessees are dissatisfied with the state interpretation of lease contract terms, especially those relating to appraisal. Many lessees testified before the committee as to their grievances.

2) The Division's regulations covering sales and leases are often outdated and conflicting with statutes in some cases.

3) The State's lease contract form is not in line with commercial contracts and has many ambiguities in it.

4) Some state statutes in Title 38.05 are vague and unclear.

5) Payment methods for state sales contracts do not match those used in the private sector and may contribute to ballooning land values.

These findings outline the basis for the committee's recommendations which follow.

The recommendations of the committee concern statute, policy, and regulation changes, and can be grouped by topic.

The following three items are of general concern:

1. The committee wishes to note that in the course of public testimony it was apparent that Division of Aviation lessees had significant problems with their current leases. This subject was not within the scope of the committee's deliberations and, therefore, not addressed.

2. To comply with new statutes the committee recommends a major overhaul of Division of Lands regulations. The committee has found many of the regulations now in effect to be outdated and superceded by statutes.

3. The committee recommends that the Legislature apply the provisions found in Title 38 to those in Title 3, Title 19, and Title 35. The rationale would be to make land laws uniform among the Division of Aviation, Department of Highways, and Division of Lands.

In order to provide predictability in appraisals and reappraisals, for the benefit of the State and the public, the committee recommends the following:

1. At present many lessees are suffering hardship due to rent increases of several hundred percent. To provide for this relief and as a curative for such future increases the statutory provisions found in section nine of the attached bill are recommended. Provision for optional conversion of present leases to ones that will place a ceiling of 100% on rental increases every five years will largely prevent future hardship cases and resolve satisfactorily the present cases. With a rent ceiling, lease rental increases will be more predictable resulting in more financial stability for the lessee. (The Alaska Industrial Subdivision hearing panel recommends insuring predictability by placing some control over the size of the rental increase through utilization of a ceiling on the size of the increase in rental every five years.)

   Sections 8 and 9 of the attached bill will accomplish the above recommendations.

2. The committee recommends that land offered over the counter be reviewed at 90 to 120 day intervals to determine if an increase in value has occurred. This

review is desired so that parcels are not undervalued by progressive changes in the market.

Section 10 of the attached bill would accomplish this.

3. Since public notice is covered in AS 38.05.345 the change to "appraisal" for AS 38.05.310 is warranted by its present content. The committee recommends that land may be appraised 120 days in advance of a sale or lease. The change from 90 to 120 days would be desirable in that minimum bid information could be given to the public well in advance of the actual sale or lease auction. In addition 11 AAC 54.140 should be repealed.

Section 10 of the attached bill will accomplish this.

4. In order to provide a workable solution to the problems of confidentially of appraisal data, the committee recommends that the Director of the Division of Lands refrain from including confidential information in any appraisal prepared for the Division of Lands use. The committee recommends adoption of the following policy statement:

The director may make confidential those portions of appraisals and supporting data which contain information provided the appraiser in confidence. Such appraisals shall be subject to review by the local chapter of the American Institute of Real Estate Appraisers or the Society of Real Estate Appraisers to determine if the appraisal is acceptable under the professional practices and guidelines of the reviewing organization.

5. The committee believes that the word "primarily" may imply special consideration to some lessees. In order to treat all lessees fairly and equitably the committee recommends that the word "primarily" be stricken. Deleting "primarily" would clarify the basis for reappraisal. (This was also recommended by the Alaska Industrial Subdivision hearing panel.)

Section 8 of the attached bill will accomplish this.

To improve <u>accounting policies</u>, the following are recommended:

1. The committee recommends that all sales contracts over $400.00 per year have the option of paying in quarterly installments instead of annual installments. It is the committee's belief that this would ease the financial

strain on the buyer and yet not add significantly to the State's administrative costs. To provide quarterly payments would require a change in AS 38.05.065 with the present annual payments deleted and the quarterly payment provision adopted in its place.

Section 3 of the attached bill would accomplish this.

2. The committee recommends that a $10.00 fee charge to cover administrative costs be given to those who make sale or lease payments with checks that are returned. It is a standard business practice to provide for such charges and is recommended to protect the State's interests.

3. The committee recommends instituting default charges for late sale or lease payments. At present, there exists no penalty and many payments are late. The form of penalty recommended is notification charges to all delinquent payments and penalty charges to payments delinquent more than 30 days. The notification charge would be $5.00 for the first notice, $20.00 for the second notice and a penalty charge of 6 percent of the payment.

It is suggested that the fee charges be adopted as a regulation under authority of AS 38.05.035 (4)(5) as follows:

11 AAC 54.365. Delinquent Payments.

In the event of a delinquent payment, the following charges will apply:

1. A $10.00 penalty for payment with a check that is returned.

2. A $5.00 penalty for notification of payments over thirty-five days late.

3. A $20.00 penalty for a second notification of payments more than fifty days late.

4. A penalty of 6 percent of the rental or sale payment for payments delinquent by more than thir / days.

(Eff. ___ ___ Register _____)Authority AS 38.05.035.

In order to achieve more flexibility and simplicity in handling land disposal transactions, the following are recommended:

1. The committee recommends that the State charge a market rate of interest in its sales contracts. The interest rate, at present 6%, is below market levels and may have contributed to inflated prices at state land sales. By setting interest rates at market levels, the State would help prevent inflated land prices and at the same time return more income to the State. To provide for a market rate of interest in sales contracts, no change in AS 38.05.065 would be required. The addition of a statement of market rate in this statute would be desirable, however.

Section 3 of the attached bill would accomplish this.

2. The committee recommends that the State adopt a system of level payments in place of declining payments in its sale contracts. The system of level payments is in common use in the business world, and the payment figures are easily set forth in a contract. The disadvantage of the present method is that interest must be recalculated every year and the payments decrease each year. From both the State's and the buyers' viewpoints, the level payment method would be preferred. The State would receive slightly more in interest payments over the contract terms and the buyer would not have to make as high initial payments. To provide

level payments would require a change in AS 38.05.065 with the present system deleted and the level payment system adopted in its place.

Sections 2 and 3 of the attached bill would accomplish this.

3. The committee recommends that in Title 38.05 the term "fair market value" be used in place of "fair appraised market value" and "market value." The meaning is felt to be the same in all cases. The committee would like to see one standard term used to avoid confusion and misunderstanding.

Sections 4, 5, 7, and 13 of the attached bill would accomplish this.

4. The current procedures for informing the public of state lands transactions are covered in AS 38.05.305 and AS 38.05.345. The two procedures do not mesh in a clear manner. The committee recommends that the procedures be clarified in a manner that will be flexible enough to inform the public fully and yet not require multiple advertising for minor negotiated transactions.

Section 11 of the attached bill will accomplish this.

5. The committee recommends that the Director be given the authority to set the payment period from one to twenty years. This type of flexibility would allow the State and buyers greater market possibilities. To provide for this would require that the installment clause in AS 38.05.065 be deleted and replaced by the one to twenty year provision.

Section 3 of the attached bill would accomplish this.

6. The committee recommends that the State be given more flexibility to resolve contract of sale violations. This is necessary to prevent foreclosure as the only remedy for minor contract violations.

Section 3 of the attached bill would accomplish this.

To institute improvements in the leasing system, the following are recommended:

1. To implement the new lease provisions recommended by this committee new lease forms for various types of leases will be required. It is the committee's recommendation that the Division draft new lease forms to comply with the statutes adopted, and that the new forms be reviewed by this committee.

The attachments to the standard lease in Appendix C accomplish this.

2. The committee recommends that all state leases to other public agencies be at the normal fair market value rate of payment.

This reflects a regulation change.

3. The committee recommends that state government agencies get out of residential leasing.

This would reflect a policy change.

4. To provide the lessee insurance against a land boom or unexpected increase the committee recommends that rental increases at the five year reappraisal periods not exceed 100 percent of the prior existing annual rental rate. This action would increase the predictability of the lessee's payments. The stability thus created would add significant borrowing power for the lessee to finance improvements on the leased ground.

Section 8 of the attached bill would accomplish this.

5. The duration of a lease and the economic life of substantial improvements, such as stores or factories, may not coincide. In order to see that state leased land is used in a rational, economically productive manner the committee recommends that lessees of long-term leases be given a renewal option for up to fifteen years. This type of option would grant the lessee more flexibility in maximizing his investment returns, especially during the final years of his lease. It would also increase the lessee's planning possibilities for use of the leased ground. This action would also soften the impact of termination of the lease. Specifically, this would permit a lessee to make substantial repairs to a building when the remaining term of the lease would not otherwise justify it.

Section 6 of the attached bill would accomplish this.

6. The committee agrees that a lease should be converted at its present classification, and the leaseholder should then have the option to change classification subject to Division of Lands approval.

This reflects an implementation recommendation in the event that House Bill 383 passes.

7. The committee recommends that a level term for recreational leases not be provided.

8. The Alaska Industrial Subdivision hearing panel recommends that in accord with the provisions of the lease, lessees should be encouraged to record expenses incurred in site preparation so that the "original condition" can be more adequately ascertained.

The Ad Hoc committee concurs. This recommendation is handled in the attached lease document.

9. The Alaska Industrial Subdivision hearing panel recommends that lease language should be clarified to remove any possible inconsistencies with 11 AAC 58.520 (Adjustment of Rental).

The Ad Hoc committee concurs.

10. The Alaska Industrial Subdivision hearing panel recommends eliminating the floating easement. The State could exercise the right of eminent domain to condemn. The condemnation would probably result in greater compensation for damages to the lessee, especially in view of the Supreme Court decision in State v. Hammer,

550 P.2d 830, thus the lease would be more attractive to the leasing market. Additionally, the language in the current lease is ambiguous as to damages compensable. This ambiguity only encourages litigation.

The Ad Hoc committee concurs. This has been accomplished in the attached lease form.

11. The Alaska Industrial Subdivision hearing panel states that, if its recommendations are adopted, the State would be assured a competitive position in the lease market, would encourage development of the leaseholds consistent with the intent of the leasing regulations, and would be equitable to the lessee. The hearing panel also believes the State should be able to obtain a good return on its land. Accordingly, the rental rate should be changed to reflect the removal of the undesirable aspects of the state lease.

The Ad Hoc committee concurs. Continuing to include rate as an appraisal element will accomplish this objective. This change is found in the attached lease form.

To provide a vehicle for arbitrating protests and appeals involving land transactions, the following is recommended:

1. The Division of Lands has had many protests from private parties over the past few years leading the committee to believe that a board of appeals is highly desirable and needed at this time. At present there exists no arbitration board or board of appeals to handle appeals allowed by Division of Lands regulations. The creation of a board of appeals would effect a responsive mechanism for solving most problem cases arising out of Division of Lands transactions that affect private parties. The board of appeals would be faster and less costly to private parties than legal recourse, which would still be available. The board is structured to maintain adequate expertise while attempting to eliminate bias in favor of the Division of Lands. The appeal board would substitute for the Commissioner in the present appeal process. (The Alaska Industrial Subdivision hearing panel also recommends such an appeal process.)

   Section 9 of the attached bill would accomplish this.

The committee recommends the following to improve trust land management:

1. The committee believes that state trust lands (school, mental health, and university) are now and have been managed at low intensity. These lands may be returning only a fraction of their potential value that could be realized by a small, full-time management staff. The Division manages these lands at no charge to the various trust funds and receives no reimbursement for its services. Therefore, it has traditionally placed low priority on management of these lands. This committee recommends that the State Legislature authorize each trust board the authority to freely contract with any agency or private firm for the management of its lands for revenue production in accordance with the State's land act.

2. In order to provide a uniform 55 year limit for all long-term leases the committee recommends deletion of the 99 year provision found in 38.05.070(c) for school lands.

Section 6 of the attached bill would accomplish this.

V. APPENDIX A

LIST OF PUBLIC GIVING COMMENTS AT AD HOC MEETINGS

GRAHAM, Joe

AKERS, Merle (Anchorage International Airport Pilots' Association)

FORD, R. G. (Anchorage Camper Center--Alaska Industrial Subdivision)

DAVIS, Ken (Alaska Industrial Subdivision--school land lessee)

RICHARDSON, Phil (Talkeetna lessee)

V. APPENDIX B.

Introduced: 3/22/77
Referred: Resources

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 383

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to state land; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.05.030 is amended by adding a new subsection to read:

(f) Each trust for which the director exercises land management functions shall be assessed the cost of that management which shall be negotiated annually between the division and the respective trust boards.

* Sec. 2. AS 38.05.055 is amended to read:

Sec. 38.05.055. SALE PROCEDURES. Except as provided in sec. 315(d) of this chapter, the sale shall be made at public auction to the highest qualified bidder as determined by the director. An aggrieved bidder may appeal to the commissioner within five days after the sale for a review of the d rector's determination. The sale shall be conducted by the director or his representative, and at the time of sale the successful bidder shall deposit an amount <u>determined by the director but not less than five per cent</u> [EQUAL TO ONETENTH] of the purchase price. The director or his representative shall immediately issue a receipt containing a description of the land or property purchased, the price bid, and the terms of sale, which receipt shall be acknowledged in writing by the bidder. A contract of sale on a form approved by the attorney general shall be signed by the purchaser and, after approval of the commissioner, the contract shall also be

signed by the director on behalf of the state.

* Sec. 3. AS 38.05.065 is amended to read:

Sec. 38.05.065. TERMS OF CONTRACT OF SALE. The contract of sale shall require the remainder of the purchase price to be paid over a period of not more than 20 years, to be set for each sale by the director. Installment payments plus interest must be set on the level-payment basis. The interest rate to be charged on installment payments is the prevailing rate on similar land transactions at the time the contract is signed, as determined by the director, but in no case may it be below five per cent per year or above the current usury rate as set by AS 45.45.010(b) and (d) [IN ANNUAL INSTALLMENTS OF NOT LESS THAN 10 PER CENT OF THE PURCHASE PRICE, WITH INTEREST AT THE RATE OF NOT LESS THAN FIVE PER CENT A YEAR]. The director, with the consent of the commissioner, may also impose conditions, limitations and terms which he considers necessary and proper to protect the interest of the state. Violations of any provision of this chapter or the terms of the contract of sale subject the purchaser to appropriate administrative and legal action, including but not limited to specific performance, foreclosure, ejectment, or other legal remedies in accordance with applicable state law [LEGAL ACTION, INCLUDING A FORECLOSURE ACTION IN ACCORDANCE WITH APPLICABLE STATE LAW].

* Sec. 4. AS 38.05.067(b) is amended to read:

(b) The director shall not sell the lands under this section at less than their fair [APPRAISED] market value. The director shall make regulations necessary to ensure that lands sold under this section are for bona fide residential use and not for speculation.

* Sec. 5. AS 38.05.068(a) is amended to read:

(a) Before offering to the public any land which is subject to a valid existing United States Forest Service permit in effect in a

state-selected area at the time the area was patented to the state, or which is subject to a lease issued under sec. 87 of this chapter, the director shall offer the land for sale to the permittee or his successor in title, if he can be found, at not less than its fair [APPRAISED] market value before offering to the general public.

* Sec. 6. AS 38.05.070(c) is amended to read:

(c) A lease may be issued for a period up to 55 years, if it appears to be in the best interest of the state and if the commissioner approves. A lease for a period in excess of 25 years must grant the lessee an option entitling him to extend the term of the lease for up to three consecutive five-year periods in addition to the original term. If the commissioner determines that the land or a part of it which is the subject of a grazing lease is not being used for the purpose issued, the lease may be declared void. [HOWEVER, A NON-RENEWABLE LEASE FOR SCHOOL LANDS MAY BE ISSUED FOR A PERIOD NOT TO EXCEED 99 YEARS.]

* Sec. 7. AS 38.05.087(a) is amended to read:

(a) Before offering to the public any land for lease which is subject to a valid existing United States Forest Service permit in effect in a state-selected area at the time the area was patented to the state, the director shall offer the land for leasing to the permittee at not less than its fair [APPRAISED] market value before offering it to the general public.

* Sec. 8. AS 38.05.105 is amended to read:

Sec. 38.05.105. PERIODIC RENTAL ADJUSTMENTS. (a) Each lease shall stipulate that the annual rental payment is subject to adjustment at five-year intervals and changes or adjustments shall be based [PRIMARILY] on a reappraised annual rental value. Any increase due to reappraisal may not exceed 100 per cent of the annual rental for the

preceding five-year period. However, if the director of the division of lands determines that residential development is the best use for the land, the reappraisal period may be lengthened or the readjustment waived in accordance with regulations adopted by the commissioner. Before a waiver of rental readjustment is issued, the land shall have a current reappraisal. A waiver is valid only if residential development actually occurs, and only if it is necessary for obtaining primary long-term financing. The regulations adopted under this section shall ensure that the state receives a fair return from the land.

(b) The 100 per cent limit on increases in annual rental applies only to leases executed after the effective date of this Act and to leases converted under sec. 106 of this chapter.

* Sec. 9. AS 38.05 is amended by adding new sections to article 3 to read:

Sec. 38.05.106. CONVERSION OF LEASES. (a) Any person holding a valid lease under secs. 70 - 106 of this chapter, or who is an approved assignee of such a lessee under the terms of the lease, may convert his lease to obtain the benefits described in (b) of this section, which were not available to him at the time his lease was originally entered, if he makes all payments due under the lease as computed according to this section and is not in violation of any other lease provision.

(b) Those lease benefits which must be made available to a lessee qualifying under (a) of this section are all of those lease provisions authorized to be included in new leases executed by the state after the effective date of this Act.

(c) The effective annual rental value at conversion shall be based on the most recent reappraisal if reappraisal was within two years after the effective date of this Act. In all other cases, the

annual rental value at conversion shall be based on the next reappraisal after conversion.

(d) The rate which is applied to the fair market value of lease property to compute annual rental value shall be the current market rate except the director may reduce it to not less than six per cent.

(e) Any lease conversion as to trust lands is effective only if approved by the appropriate board of trustees.

(f) Applications for conversion must be made within three years after the effective date of this Act.

Sec. 38.05.108. STATE BOARD OF LAND APPEALS; REGULATIONS. (a) There is created in the department a Board of Land Lease Appeals of five members, one of whom is the commissioner or his designated representative. The other members of the board are to be appointed by the governo from the general public, after consideration of the desirability of legal, natural resource, or real estate training and experience as criteria.

(b) The director shall provide administrative support for the board.

(c) The terms of the public members are three years each, except that the initial terms of one of the members first appointed under this chapter shall be for one year and one member for two years. The public members are entitled to compensation in the amount of $50 a day for each day or portion of a day spent in actual meeting or on authorized official business incident to their duties, and to all transportation and per diem allowances authorized by AS 39.20.180.

(d) Jurisdiction of the board extends to matters arising under secs. 70 - 106 of this chapter related to the leasing of state land other than for the extraction of natural resources from which an appeal may be taken under statute or regulation to the commissioner

from a decision of the director. The board in all those appeals filed after the effective date of this Act has the authority to hear evidence and recommend decisions to the commissioner when the director's decision is appealed to the commissioner. The commissioner,, after consultation with the board, shall adopt regulations governing the procedures of the board.

* Sec. 10. AS 38.05.310 is amended to read:

Sec. 38.05.310. NOTICE AND APPRAISAL. (a) No land may be sold or leased, or a renewal lease issued [WITHOUT PUBLIC NOTICE,] except in the case of an oil or gas or mineral lease, unless it has been appraised within 120 [90] days before the date of [FIXED FOR THE] sale or lease. For over-the-counter sale under (b) of this section, an appraisal [WHEN LAND IS OFFERED AT PUBLIC SALE BUT IS NOT SOLD AND IS AVAILABLE AT PRIVATE SALE, NO REAPPRAISAL] is required unless the director finds [CONSIDERS] that a change in value of the lands has not [MAY HAVE] occurred. A grazing lease may be granted to a lessee of federal grazing lands without prior appraisal, if his federal lease was cancelled to allow the state to select the lands under lease. No land may be sold or leased for less than fair [THE APPROVED, APPRAISED] market value, except as provided in secs. 315 and 320 of this chapter and secs. 75 - 85 of this chapter. No land or interest in land may be sold, leased, or otherwise disposed of without public notice.

(b) When land is offered at public sale but is not sold, it may be available for sale over the counter. The director shall review the list of parcels of land available on a quarterly basis and shall certify that there has been no change in value since the last reappraisal. If an increase in value occurs in any parcel, the director shall withdraw that parcel from sale over the counter.

* Sec. 11. AS 38.05.345(a) is amended to read:

(a) Public notice of an auction sale [, LEASE OR OTHER DISPOSAL] of land or interest in it shall be substantially as follows.

* Sec. 12. AS 38.05.345 is amended by adding a new subsection to read:

(e) Public notice of a sale, lease, or other disposal of land or an interest in it other than by auction, or notice of a classification or other action concerning land, shall conform to the requirements of sec. 305 of this chapter and of this subsection. That notice must comply with the provisions of (b) and (d) of this section, except that the disposal may be made more than five weeks following the last appearance of the published notice.

* Sec. 13. AS 38.05.365 is amended by adding a new paragraph to read:

(24) "market value" or "fair market value" means the price, estimated in terms of money, which the property would bring if exposed for a sale for a reasonable time in the open market, with a seller, willing but not forced to sell, and a buyer, willing but not forced to buy, both being fully informed of all the purposes for which the property is best adapted or could be used.

REVISED 3/23/77

V. APPENDIX C

DEPARTMENT OF NATURAL RESOURCES

DIVISION OF LANDS

323 East Fourth Avenue

Anchorage, Alaska 99501

ADL NO._____

LEASE AGREEMENT

THIS Lease agreement made and entered into this _____ day of _____, 19___, by and between the State of Alaska, through the Director of the Division of Lands, with the consent and approval of the Commissioner of the Department of Natural Resources, acting for and on its behalf under and pursuant to AS 38.05, as amended, and the regulations promulgated thereunder, as amended or hereafter amended, hereinafter referred to as the LESSOR; and _____ _____ of _____ hereinafter referred to as the LESSEE:

WHEREAS, the Lessor has caused the lands herein demised to be appraised and such appraisal was made and approved on or after _____, 19_____; and

WHEREAS, the Lessor has caused a notice of intent to lease the lands herein demised to be published as required by law or caused notices of intent to lease to be posted as required by law; and

WHEREAS, an auction of the herein demised property was held at the time and place designated by notice and said sale was approved by the Director of the Division of Lands, Department of Natural Resources, State of Alaska:

NOW THEREFOR, the Lessor has agreed to let and does hereby let and demise to the Lessee, and the Lessee has agreed to take and does hereby take from the Lessor the surface estate of all that lot, piece, or parcel of land more particularly bounded and described, as follows:

_____

_____

_____

_____

_____

Located in the _____ Recording District, State of Alaska.

TO HAVE AND TO HOLD the said demised premises for a term of _____ ( ) years commencing on the _____ day of _____, 19_____, and ending at 12 o'clock midnight on the _____day of _____, _____, unless sooner terminated as hereinafter provided.

The Lessee shall pay to the Lessor rental as follows: Equal _____ payments, in advance, on or before the _____ day of _____ of every year during said term at the rate of _____ Dollars ($_____) per _____; such payments to be subject to adjustment as hereinafter required from the effective date hereof, as provided herein.

It is agreed that each of the covenants, terms and agreements herein contained shall be binding upon the parties and upon their respective successors and assigns.

1. Appurtenances, and Encumbrances-- Lessor leases and grants to Lessee all easements, parking and loading rights, rights of ingress and egress, fixtures and appurtenances now or hereafter belonging or pertaining to said premises. The des-

cribed premises are leased, subject to patent restrictions, easements, rights-of-way, if any, zoning and building restrictions and statutes and governmental regulations now in effect or hereafter adopted by any governmental authority.

2. Payment of Taxes and Assessments-- Lessee agrees to pay to the public authorities charged with collection thereof, promptly as the same may become due and payable, all taxes, permit, inspection and license fees and other public charges, whether of a like or different nature, except for general and special assessments lawfully levied upon the leasehold estate and any buildings, structures, fixtures, improvements or leasehold interest now or hereafter located thereon, or arising in respect of the occupancy, use or possession of the leased Premises, and which are charged against and are, or may become, a lien during the term of this lease; and Lessee agrees to exhibit to Lessor, on demand receipts evidencing payment of all taxes, fees and other similar public charges so payable by Lessee. Lessee shall also pay all charges of water, sewer, gas, electricity, power or other public utility services rendered on or to the Premises during the term of this lease as such charges become due.

3. Documentation of Improvements-- Lessee must within 90 days of completion of any site improvements, including but not limited to clearing, leveling, excavation, and backfill, and exclusive of any structures, file with the lessor adequate and reasonable documentation of such improvements including any applicable costs and quantities. Such documentation is intended to aid in future determinations of the original condition of the Premises.

4. Notification and Late Payment Charge-- In the event lessee becomes 30 days delinquent in payments due, a late payment charge of 6% of such amount due shall be levied against the lease. Additionally, a charge for notification for payments 30 days late shall be made at the rate of $5.00 for the first notice and $20.00

for the second notice.

5. Permitted Uses— (a) The Lessee shall use the leased Premises for uses and purposes consistent with those cited in Attachment 1, and in conformance with applicable local zoning ordinances. At any time Lessee may request a change in permitted uses, provided that Lessee's existing or proposed use of the Premises is consistent with existing zoning. If the Lessor concurs with such change of permitted use, then this lease shall terminate, and a new lease, upon a form and containing terms, appraisal and rental rate applicable to the changed classification; shall be executed for the balance of the unexpired lease term, or renewal term if applicable, then remaining.

b. Lessee may request that part of the leased Premises be severed from the Premises for purposes of changing of that part for a use or uses not permitted under the then existing permitted uses of the Premises. If the Lessor concurs, then this lease shall terminate as to the part so severed, and a new lease, upon a form and containing terms, appraisal and rental rate applicable to the changed permitted uses; shall be executed for the balance of the unexpired lease term, or renewal term if applicable, then remaining. The annual rentals applicable to the original leased Premises shall be adjusted to reflect the effect of severance of the part permitted by this paragraph for the balance of the original lease term or the renewal term, if applicable. If severance of a portion of the Premises is permitted, Lessee shall comply with all state and local laws and ordinances regarding the subdivision of real property, and shall bear the expenses and costs attributable to survey, recording and other compliance with said laws and ordinances.

6. Compliance with Laws' Ordinance and Regulations— Lessee shall comply with all applicable laws, ordinances and regulations of duly constituted public au-

thorities now or hereafter in existence which in any manner affect the leased Premises or the sidewalks, alleys, streets, and ways adjacent thereto, or any buildings, structures, fixtures or improvements or the use thereof. Lessee further agrees that it will not permit any unlawful occupation, business or trade to be conducted on the Premises, or any use to be made thereof contrary to any law, ordinance or regulation applicable thereto.

The lessee, at its own cost and expense, shall keep the leased Premises and all improvements which at any time during the term of this lease may be situated thereon, in good maintenance, condition and repair during he entire term of this lease, and hereby expressly waives any right to make repairs to the Premises at the expense of Lessor which may be allowed by any statute or law in effect at the time of the execution of this lease or any amendment thereof, or by any other statute or law which may be hereafter passed during the term of this lease. The Lessee's rights under this Lease may be terminated by the Director, in whole or in part, if the leased Premises are used for a purpose unlawful under Federal or State law or regulation, or local Government ordinance as applicable.

7. Lessee's Rights of Occupancy and Use-- Lessee, when not in default of performance of any of its obligations hereunder, shall have the following rights, during the term of this Lease, from time to time and in such manner, and to such extent, as Lessee may in its sole judgment deem advisable, except where any of said rights is conditioned upon prior approval of Lessor: (a) The right to demolish, remove or otherwise dispose of any improvements presently or subsequently situated upon the leased Premises; (b) The right to erect, place, or install upon the leased Premises buildings, structures, and improvements as from time to time it shall deem advisable; (c) The right to make such alterations, additions and repairs to the leased Premises as it may desire.

8. Disposition of Improvements Upon Termination— (a) All buildings, structures and permanent improvements, including any signs which are installed, placed or attached in or about the leased Premises by Lessee, shall remain the property of Lessee at the expiration or termination of this lease, or of any renewal term thereof. The lessee shall within 60 days after termination or expiration of the lease remove all improvements located on the leased Premises, provided that such removal will not cause injury or damage to the leased Premises; and further provided that the Lessor may extend the time for removing such improvements in a case where hardship is demonstrated. Following removal Lessee shall leave Premises in a safe and natural condition. The retiring lessee may, with the consent of the Lessor, sell his improvements to the succeeding lessee.

(b) If any improvements and/or chattels having an appraised value in excess of $10,000.00, as determined by the Lessor, are not removed within the time allowed, such improvements and/or chattels shall, upon due notice to the Lessee, be sold at public sale under the direction of the Lessor. The proceeds of sale shall inure to the Lessee who placed such improvements and/or chattels on the lands after payment to the Lessor of all rents due and owing and expenses incurred in holding such sale. In case there are no other bidders at any such sale, the Lessor is authorized to bid on such improvements and/or chattels. The Lessor shall acquire all rights, both legal and equitable, that any other purchaser could acquire by reason of said sale and purchase.

(c) If any improvements and/or chattels having an appraised value of $10,000.00 or less, as determined by the Lessor, are not removed within the time allowed, such improvements and/or chattels shall revert to, and absolute title shall vest in, the Lessor.

9. Freedom From Liens— Lessee will not permit any mechanics', laborers', or

materialmens' liens to stand against the leased Premises or improvements for any labor or materials furnished to Lessee, or claimed to have been furnished to Lessee or to Lessee's agents, contractors, or sublessees, in connection with work of any character performed on said Premises or improvements by or at the direction or sufferance of Lessee; provided, however, that Lessee shall have the right to contest the validity or amount of any such lien or claimed lien. In the event of such contest, Lessee shall give to Lessor such reasonable security as may be demanded by Lessor to insure payment thereof and to prevent any purported sale, foreclosure or forfeiture of the premises or improvements by reason of such non-payment. Such security need not exceed one and one-half times the amount of such lien or such claim of lien. Lessee shall record such bond as contemplated by Section 34.35.072, Alaska Statutes upon Lessor's demand. Lessee shall immediately pay any judgment rendered on any proven claim of lien, together with all proper costs and charges, and shall have such lien released or judgment satisfied at Lessee's own expense. The State may file such notices of non-responsibility as it may deem necessary, pursuant to A.S. 34.35.065.

10. Lawful Use of Premises— The Lessee may use and occupy the leased Premises for any lawful purpose provided such purpose is allowed under Attachment 1 of this Lease.

11. Indemnity to Lessor— Lessee will indemnify and hold Lessor harmless from and against all claims and demands for loss or damage, including property damage, personal injury or wrongful death, arising out of or in connection with the use or occupancy of the Premises by Lessee or any other person under Lessee, and from any accident or fire on the Premises and from any nuisance made or suffered thereon, and from any failure by Lessee to keep the Premises in a safe condition, and Lessee will reimburse Lessor for all its costs and expenses, including reasonable attorneys' fees, incurred in the defense of any such claims; and Lessee will hold all goods,

materials, furniture, fixtures equipment, machinery and other property whatsoever on the Premises at the sole risk of Lessee, and will save Lessor harmless from any claim of loss or damage thereto by any cause whatsoever. If all or part of the improvements placed by Lessee on the demised premises are destroyed by fire, earthquake or other cause, Lessee shall remove the debris and clean up the affected area within 60 days of the occurrence of such destruction, and may surrender to Lessor this lease, together with any interest of Lessee and of any mortgagee in the remaining insurance proceeds and Lessee may thereby be relieved of any further obligation hereunder.

12. Default— If Lessee at any time during the term or renewal term of this lease (and regardless of the pendency of any bankruptcy, reorganization, receivership, insolvency or other proceedings, in law, in equity or before any administrative tribunal, which has or might have the effect of preventing Lessee from complying with the terms of this lease) (a) shall fail to make payment of any installment of rent or of any other sum herein specified to be paid by Lessee, or (b) shall fail to observe or perform any of Lessee's other covenants, agreements or obligations hereunder, and if any such default shall not be cured as to (a) within ten days after Lessor shall have given Lessee written notice of such failure to make payment, or as to (b) within thirty (30) days after Lessor shall have given to Lessee written notice specifying such default or defaults, Lessee shall not have commenced diligently to cure such default; or if Lessee has filed a voluntary petition or has become subject to an involuntary petition under any provision of the Bankruptcy Act, 11 U.S.C. 701 et. seg; or if Lessee finally and without further possibility of appeal or review is adjudicated a bankrupt or insolvent; or if Lessee has a receiver or a Trustee appointed for all or substantially all of its business or assets on the ground of Lessee's insolvency; or if Lessee has itself appointed as debtor-in-possession in a proceeding for a reorganization or an arrangement; or if Lessee shall make an assignment for the benefit of its creditors, then in any such event Lessor shall have the right,

at its election, then or at any time thereafter, and while such default, defaults or events shall continue, to give Lessee written notice of Lessor's intention to terminate this lease and all of Lessee's rights hereunder, on the date specified in such notice, which date shall not be less than thirty (30) days after the date of giving of such notice; and on the date specified in such notice this lease and all rights granted Lessee hereunder shall terminate as fully as if the lease had then expired by its own terms; and Lessee hereby covenants to peaceably and quietly surrender to Lessor said leased Premises and all structures, buildings improvements and equipment located thereon, subject to paragraph 7 (a) above and to execute and deliver to Lessor such instrument or instruments which may be required by Lessor to properly evidence termination of Lessee's rights and interest hereunder.

In the event of termination of this lease as provided in this paragraph 12, Lessor shall have the right to repossess the leased Premises and such structures, buildings, improvements and equipment, thereon and subject to paragraph 5 above either with process of law or through any form of suit or proceeding, as well as the right to sue for and recover all rents and other sums accrued up to the time of such termination, and damages arising out of any breach on the part of Lessee, including damages for rent for the balance of the lease term not then accrued. Lessor shall also have the right, without taking possession of the premises or terminating this lease, to sue for and recover all rents and other sums, including damages, at any time and from time to time which may accrue hereunder as a result of any default of Lessee.

13. Condemnation-- If the whole or any part of the demised premises shall be taken for any public or quasi-public use, under any statute or by right of eminent domain or private purchase in lieu thereof, by any public or quasi-public body vested with the power of eminent domain, then when possession shall be taken thereunder of the leased Premises, or any part thereof, the following provisions

shall control:

a. Taking of All Premises-- If all of the Premises are taken by condemnation the term of this lease and all rights of the Lessee hereunder shall immediately terminate, and the rent shall be adjusted as of the time of such termination so that Lessee shall have paid rent only up to the time of such taking. Lessor shall be entitled to the full condemnation proceeds, except that portion thereof attributable to the value of the buildings or improvements placed on the Premises by Lessee.

b. Taking of Substantial Part of Premises-- If the taking by condemnation reduces the ground area of the leased Premises by at least thirty percent (30%), or materially affects the use being made by the Lessee of the demised premises, Lessee shall have the right, by written notice to Lessor made not later than one hundred eighty (180) days after possession shall be taken, to elect to terminate or to not terminate this lease under the provisions set forth herein. If the election to terminate is made the provisions of (a) of this paragraph relating to the taking of the whole Premises shall govern. If the election not to terminate is made the lease shall continue and Lessor shall be entitled to the full condemnation proceeds except the portion thereof attributable to the value of the buildings or structural improvements placed on the Premises by Lessee; and rent at the existing rate and amount shall be adjusted as of the date of the taking of possession, and the rent for the balance of the term, except as modified from time to time under paragraph 1 of attachment 1 hereof, shall be reduced so that the new rent shall be that part of the former rent (before condemnation) which the unimproved value of the untaken Premises (appraised after the taking) bears to the unimproved value of the entire Premises immediately before the taking. Any dispute, controversy or claim arising out of or relating to the fixing of the new rent shall be settled by arbitration as provided herein.

c. Taking of Insubstantial Part of Premises— If the taking is of such an insubstantial portion of the ground area that the use being made by Lessee of the leased premises is not materially affected, the provisions of this paragraph regarding Lessee's election not to terminate shall govern.

14. Quiet Enjoyment— Provided Lessee is not in default hereunder, Lessor covenants that Lessee shall have peaceful and quiet enjoyment of the leased Premises without let or hindrance on the part of Lessor, and Lessor will warrant and defend Lessee in the peaceful and quiet enjoyment of the leased Premises.

15. Notices— All notices required or permitted under this agreement shall be made by certified or registered mail, postage prepaid, to the parties at the following addresses.

To The Lessor: _____

To The Lessee: _____

16. Rights or Remedies— Except as may be inconsistent with or contrary to any provision of this lease, no right or remedy herein conferred upon or reserved to Lessor shall be exclusive of any other right or remedy, and each and every right or remedy shall be cumulative and in addition to any other right or reme given hereunder. or now or hereafter existing at law or in equity or by statute.

17. Waiver or Forebearance— The receipt of rent by the Lessor, with or without knowledge of any breach of the lease by the Lessee, or of any default on the part of the Lessee in the observance or performance of any of the conditions or covenants of this lease, shall nct be deemed to be a waiver of any provision of this lease. No failure on the part of the Lessor to enforce any covenant or provision herein

contained, nor any waiver of any right hereunder by the Lessor, unless in writing, shall discharge or invalidate such term or covenant; nor shall any forebearance or written waiver affect the right of the Lessor to enforce any term or covenant in the event of any subsequent breach or default. The receipt by Lessor of rent or any other sum of money or the termination, in any manner, of the lease term or the giving by Lessor of any notice hereunder to effect such termination, shall not reinstate, continue, or extend any term herein leased, or destroy, or in any manner impair the validity of any such notice of termination as may have been given hereunder by the Lessor to the Lessee prior to the receipt of any such sum of money or other consideration, unless the contrary effect shall be expressed in writing and signed by the Lessor.

18. Inspection— Lessor shall, at all reasonable times have access to the Premises for the purpose of inspection.

19. Successors in Interest-- This Lease shall be binding upon and inure to the benefit of the respective heirs, successors in interest and assigns of the parties hereto.

20. Assignment or Subletting— Lessee shall not sublet or assign the leased premises or any part thereof, without the prior written consent of Lessor to such subletting or assignment, which consent shall not be unreasonably withheld, subject to use provisions of this lease. However, Lessee, without prior authorization may assign thi ase, or any part thereof, to a duly licensed and authorized lending institution for loan security purposes, provided that this right to assign shall not operate as a subordination of Lessor's rights hereunder, nor a subordination of its fee. Lessor agrees that upon receipt of application for assignment by Lessee, it will consent to or deny a proposed subletting or assignment by Lessee. No assignme or subletting of the Premises or any portion thereof by Lessee shall void Lessee's

obligation to pay the rent herein reserved for the full term of this sublease or any extensions thereof. Anything contrary in the foregoing notwithstanding, Lessee shall have the right to sublease all or any portion of the enclosed space in any building which Lessee may construct upon the leased Premises without prior written approval of Lessor.

21. Soil Conditions and Water Drainage-- Lessor makes no warranty and assumes no liability regarding the soil conditions or water drainage upon the leased premises.

22. Mineral Reservation-- The Lessor hereby expressly saves, excepts and reserves out of the grant hereby made, unto itself, its lessees, successors, and assigns forever, all oils, gases, coal, ores, minerals, fissionable materials, and fossils of every name, kind or description, and which may be in or upon said lands above-described, or any part thereof, and the right to explore the same for such oils, gases, coal, ores, minerals, fissionable materials and fossils. All coal, oil, gas and other minerals and all deposits of stone or gravel valuable for extraction or utilization, are excepted from the operation of a surface lease. Specifically, the lessee of the surface rights shall not sell or remove for use elsewhere any timber, stone, gravel, topsoil, or any other material valuable for building or commercial purposes; provided, however, that material required for the development of the leasehold may be used. It also hereby expressly saves and reserves out of the grant hereby made, unto itself, its lessee, successors, and assigns forever, the right to enter by itself, its or their agents, attorneys, and servants upon said lands, or any part or parts thereof, at any and all times, for the purpose of opening, developing, drilling and working mines or wells on these or other lands and taking out and removing therefrom all such oils, gases, coal, ores, minerals, fissionable materials and fossils; and to that end it further expressly reserves out of the grant hereby made, unto itself, its lessees, successors, and assigns forever, the right by

its or their agents, servants and attorneys at any and all times to erect, construct, maintain, and use all such buildings, machinery, roads, pipelines, powerlines, and railroads, sink such shafts, drill such wells, remove such soil, and to remain on said lands or any part thereof for the foregoing purposes and to occupy as much of said lands as may be necessary or convenient for such purposes, hereby expressly reserving to itself, its lessees, successors, and assigns, as aforesaid, generally all rights and power in, to and over said land, whether herein expressed or not, reasonably necessary or convenient to render beneficial and efficient the complete enjoyment of the property and rights hereby expressly reserved.

Provided, however, no rights shall be exercised by the Lessor or its mineral lessees, until provision has been made by the Lessor or its mineral lessees to pay to the Lessee of the land, upon which the rights herein reserved to the Lessor or its mineral lessees, are sought to be exercised, full payment for all damages sustained by said Lessee, by reason of entering upon said land; and provided that if said Lessee for any cause whatever refuses or neglects to settle said damages, the Lessor or its mineral lessees, or any applicant for a mineral lease or contract from the Lessor or its lessees for the purpose of prospecting for valuable minerals, or option contract or lease for mining coal or lease for extracting petroleum or natural gas, shall have the right, after posting a surety bond with the Director issued by a corporation qualified to do business in Alaska and licensed to sell insurance in Alaska, or a bond executed by one or more individual sureties approved by the Director, after due notice and opportunity to be heard, to be sufficient in amount and security to secure the said Lessee full payment for all such damages, to enter upon the land in the exercise of said reserved rights, and shall have the right to institute such legal proceedings in a court of competent jurisdiction wherein the land is situated, as may be necessary to determine the damages which the surface lessee of such lands may suffer.

23. Mortgage of Leasehold Interest of Tenant— A leasehold mortgagee, a beneficiary of a deed of trust, or a security assignee shall have and be subrogated to any and all rights of Lessee with respect to the curing of any default hereunder by Lessee. If the holder of any such mortgage, the beneficiary of any such deed of trust, or the security assignee shall give Lessor, before any default shall have occurred in the Lease, a written notice containing the name and post office address of such holder, Lessor shall thereafter give to such holder a copy of each notice of default by Lessee at the same time as any notice of default shall be given by Lessor to Lessee; and Lessor will not thereafter enter into any modification of this Lease without the prior written consent of such mortgagee, beneficiary or security assignee. If by reason of any default of Lessee, either this Lease or any renewal thereof shall be terminated at the election of Lessor prior to the stated expiration thereof, Lessor shall enter into a new Lease with the leasehold mortgagee, the beneficiary of a deed of trust, or the security assignee, for the unexpired portion of the lease term, effective as of the date of such termination, at the rent and on the terms herein contained, subject to the following conditions.

Mortgagees, beneficiary or security assignee shall do the following:

a. make written request to Lessor for a new lease within forty (40) days after the date of such termination; and such written request shall be accompanied by payment to Lessor of all sums then due Lessor under this lease as if termination had not occurred but with such costs as are permitted under this Lease.

b. pay to Lessor, at the time of the execution and delivery of such new Lease, any and all sums due thereunder, in addition to those which would at the time of the execution and delivery thereof be

due under this Lease but for such termination, and in addition thereto, any reasonable expenses, including legal and attorneys' fees to which Lessor shall have been subjected by reason of such default.

c. on or before the execution and delivery of such new Lease, perform all other conditions required to be performed by Lessee, to the extent that Lessee shall have failed to perform such conditions.

24. Arbitration— Any dispute between the parties arising under this lease or through the performance or non-performance of any term of this lease shall be first subject to resolution by arbitration, under the authority and procedures contained in Alaska Statutes 09.43. Appointment of an arbitrator shall be made by agreement between the parties. If no agreement can be reached, each party shall appoint an arbitrator, who shall by agreement between themselves appoint a third arbitrator. If any State Board of Land Appeals is later created which shall have jurisdiction over disputes which may arise under this lease, such Board shall assume jurisdiction and no requirement for arbitration shall thereafter be imposed during the pendency of such jurisdiction.

25. Integration and Modification— This document including attachments which by reference are made a part hereof, contains the entire agreement of the parties hereto. All negotiations, statements, representations, warranties, and assurances, whether oral or written, which are in any way related to the subject matter of this lease, and the performance by either party hereto, are merged and integrated into the terms of this document.

This Lease may not be modified nor amended except by a writing signed by both parties hereto, and any purported amendment or modification is without

effect until reduced to a writing signed by both parties hereto.

IN WITNESS WHEREOF the State of Alaska, Lessor, acting through the Director of the Division of Lands of the Department of Natural Resources, lawfully authorized thereunto, has caused these presents to be executed at Anchorage, Alaska, in duplicate, and the said Lessee has hereunto set his hand, agreeing to keep, observe and perform the rules and regulations promulgated under AS 38.05, as amended, the terms, conditions and provisions herein contained, on the Lessee's part to be kept, observed and performed.

COMPOUND INTEREST AND ANNUITY TABLE

5.00 % ANNUAL

YR		Amount Of 1 What a single $1 deposit grows to in the future. The deposit is made at the beginning of the first period. $S=(1+i)^n$	Amount Of 1 Per Period What a series of $1 deposits grow to in the future. A deposit is made at the end of each period. $Sa=\frac{(1+i)^n-1}{i}$	Sinking Fund Payment The amount to be deposited at the end of each period that grows to $1 in the future. $\frac{1}{Sa}=\frac{i}{(1+i)^n-1}$	Present Worth Of 1 What $1 to be paid in the future is worth today. Value today of a single payment tomorrow. $V^n=\frac{1}{(1+i)^n}$	Present Worth Of 1 Per Period What $1 to be paid at the end of each period is worth today. Value today of a series of payments tomorrow. $Aa=\frac{1-V^n}{i}$	Periodic Payment To Amortize 1 The mortgage payment to amortize a loan of $1. An annuity certain, payable at the end of each period, worth $1 today. $\frac{1}{Aa}=\frac{i}{1-V^n}$	Constant Annual Percent The annual payment, including interest and principal, to amortize completely a loan of $100.	Total Interest The total interest paid over the term on a loan of $1. The loan is amortized by regular periodic payments.	Annual Add-on Rate The average annual interest rate on a loan that is completely amortized by regular periodic payments.	YR

YR		Amount Of 1	Amount Of 1 Per Period	Sinking Fund Payment	Present Worth Of 1	Present Worth Of 1 Per Period	Periodic Payment To Amortize 1	Constant Annual Percent	Total Interest	Annual Add-on Rate	YR
		What a single $1 deposit grows to in the future. The deposit is made at the beginning of the first period.	What a series of $1 deposits grow to in the future. A deposit is made at the end of each period.	The amount to be deposited at the end of each period that grows to $1 in the future.	What $1 to be paid in the future is worth today. Value today of a single payment tomorrow.	What $1 to be paid at the end of each period is worth today. Value today of a series of payments tomorrow.	The mortgage payment to amortize a loan of $1. An annuity certain, payable at the end of each period, worth $1 today.	The annual payment, including interest and principal, to amortize completely a loan of $100.	The total interest paid over the term on a loan of $1. The loan is amortized by regular periodic payments.	The average annual interest rate on a loan that is completely amortized by regular periodic payments.	
		$S=(1+i)^n$	$S_{\overline{n}}=\frac{(1+i)^n-1}{i}$	$\frac{1}{S_{\overline{n}}}=\frac{i}{(1+i)^n-1}$	$V^n=\frac{1}{(1+i)^n}$	$A_{\overline{n}}=\frac{1-V^n}{i}$	$\frac{1}{A_{\overline{n}}}=\frac{i}{1-V^n}$

182

February 24, 1977

The Honorable John L. Rader
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18 of the Alaska Constitution, and in accordance with AS 24.30.060(b) and the Uniform Rules of the Alaska State Legislature, I am transmitting a bill which would expand the authority of general law municipalities in imposing taxes on liquor.

This bill has been requested by the Interdepartmental Coordinating Committee on Alcoholism to give incorporated communities greater flexibility in using a sales tax to generate revenues needed to pay some of the costs created by the use of alcohol. Section 1 would amend AS 04.15.070(a) by removing its present prohibition against putting a tax on intoxicating liquor when other commodities are not taxed. Section 2 would amend AS 29.53.415(a) to authorize the taxing of a single class of commodity, and expressly permit a higher rate on intoxicating liquor. It also permits the setting of various rates within the ceiling on different classes of commodities.

Sincerely,

Jay S. Hammond
Governor

Re: Senate Bill 182

Dear Senator Coletta:

In our final draft of this measure for the Governor's Office, we inadvertently failed to make a change in the title, necessitated by a late alteration in the body of the bill. We, therefore, would request your committee to make the following amendment:

Page 1, line 6:

Delete "sales"

Thank you for your consideration.

March 28, 1978

Representative Joe Orsin
Chairman, Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alasaka 99811

RE: Senate Bill No. 182, and House Bill No. 232, "AN ACT RELATING TO MUNICIPAL SALES TAX.

Dear Representative Orsin:

At the regular Bethel City Council Meeting of March 13, 1978, the Council passed Resolution No. 227, endorsing Senate Bill No. 182, and House Bill No. 232, "AN ACT RELATING TO MUNICIPAL SALES TAX." and encourages the State Legislature to pass and approve this legislation.

Although the City of Bethel has voted not to have the sale of intoxicating liquor under the local option this proposed legislation would give a municipality another option in administrating the necessary problems of alcohol. Since there exists such a variation in the size of communities in Alaska ranging from under 25, to a population of over 50,000, it seems quite difficult for the Alcohol Beverage Control Board to regulate each individual community. It is because of the varied sizes of communities in Alaska and the vast area in Alaska I believe that any legislation giving more local or regional control to the people that must inevitably live with the problems is the direction that the State must look at.

Going back to the two bills by giving a community the option to levy a higher sales tax on intoxicating liquor this could give each Community a revenue source that could eliminate many of the increased problems that arise from any community that does sell intoxicating liquor such as increased activity at the alcohol treatment centers, increased traffic problems, and increase social problems at home.

Sincerely,

Lyman Hoffman

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 213 — Croft
Prime Sponsor

_____ Resolution No. _____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

   The present $20,000 limit is too restrictive to cover a lot of needed projects.

2. Are there any other viable ways of accomplishing this same goal?

   None as thorough and effective as this

3. Persons or groups you know of who are supporting the legislation.

   Rural Community Action Program

4. Persons or groups you know of who are opposing the legislation.

   None

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

   No

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

   Week of March 21

SB 220

COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

LETTER OF INTENT

The Community and Regional Affairs Committee wishes to emphasize that it is our intent to see that maximum funds derived for this program be granted to communities to assist them in establishing and maintaining their Coastal Zone Management Program, and that the state act primarily as a vehicle in relaying this money to the communities.

The fiscal note that accompanies this bill reflects that the State intends to absorb a significant amount of funding at the State program level, contrary to the intent of this Committee. The Committee, therefore, recommends that before this Act be implemented, that it be demonstrated that the communities will be the recipients of the greatest share of these funds, and that the necessity of existing utilization of Alaska Coastal Management Program funding by state agencies be re-examined with the view toward a redistribution of these funds to the Coastal Zone Management district level.

The Committee does not intend, in approving this bill, to encourage the continued planning and development of the unorganized boroughs solely at State expense. The Committee believes that the day is not too far off when areas of the unorganized borough will be expected to implement local systems of deriving revenue to help support locally controlled

municipal services, such as education and planning, within their respective areas

The Community and Regional Affairs Committee also wishes to complement the Senate Resources Committee in their diligent and competent efforts at drafting this legislation and promoting the concept that the planning of the Coastal Zone Management Program be borne by the affected municipalities and not by a state resource agency.

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE: March 30, 1977

FILE NO: SB 220/HB 342

SUBJECT: House Bill 342, Management of the Coastal Resources of the State

The Honorable Lisa Rudd, Chair
House Community and Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Rudd:

The Legislative Committee of the City and Borough of Juneau has reviewed and considered HB 342 and supports the general approach taken in the bill to management of our coastal resources. The committee supports maximum local participation in the policy making and enforcement aspects of coastal resource management and to that end requests that minor changes be considered which would help maximize local government input, participation and response under the bill.

The membership of the Alaska Coastal Policy Council is made up of seven state department or division heads who have been appointed to their position by the governor or one of his appointees. In addition, the governor appoints eight persons of his choosing from various regions who are elected local government officials. Thus, the governor appoints all fifteen of the council members. The appointment of the eight elected local government officials is made without the advice and consent of either the legislature or the local municipalities. In order to insure that the viewpoint of local government is represented by local government members who reflect the policies of the local governments involved, the appointing power as to the public members should be shifted to the local governments involved. It could be completely shifted to the local governments if the language between lines 28 and 29 on page 2 and lines 1 and 2 on page 3 is deleted and replaced by the following language:

> (1) eight public members, who shall be the mayor or member of the assembly or council of a municipality shall be appointed. One public member shall be appointed from each of the following general regions:

Following line 24 on page 3, add the following language which would be a continuation of (1):

initially, and upon a vacancy or upon or prior to the expiration of the term of an incumbent, public members shall be appointed for the term or unexpired term in the following manner:

(A) Upon notification to municipalities in a general region by the governor or the council of a vacancy or a prospective vacancy in the seat representing the general region, the assembly or council of each municipality therein may, by motion or resolution, nominate its mayor or a member of its assembly or council to fill the vacancy. Upon making such a nomination, the municipality shall notify the governor and each of the other municipalities within the region of its nomination. If, subsequent to the making of such nominations, a majority of the municipalities within the general region adopt resolutions selecting one of the nominees as the region representative, such person shall be deemed appointed to the council.

(B) The person appointed shall notify the governor, the council, and each municipality in the region of the appointment. The person selected shall include with such notice a copy of each of the resolutions selecting that person as the representative of the general region.

(C) If the governor has not received notification of an appointment under (A) and (B) within 90 days of the last date upon which notice to a municipality was sent by the council or the governor, the governor shall appoint a public member for that general region from among the nominations supplied him under (A).

The procedure suggested above could be altered, however, the two elements which are essential to this procedure are:

1. That the representative for the general region should be appointed by the municipalities which will be the front line for enforcement of the coastal resources management program, and

2. That in the event the municipalities are not able to agree, the governor be limited in his appointments to the public member seats to persons who have been nominated by municipalities.

Other references to the appointment of public members by the governor which appear in the bill should be deleted or changed to conform to the change proposed above. Lines 1 and 2 of page 5 should be changed to read as follows:

> (a)(1) of this section, the alternate designated under (d) shall serve until a replacement who shall serve for the unexpired portion of the term has been appointed in accordance with the procedures set forth in (a)(1) of this section.

Municipalities are the key to the implementation of the Alaska coastal management program. By providing municipalities with an opportunity to select their representatives for the council, the state will be taking a step in the direction of creating greater credibility of the state program, encouraging the fullest possible local input to and cooperation with the council and providing an environment in which local enforcement of the district coastal management program can be expected to be the most vigorous. In addition, allowing municipalities to select their representative in each general region will probably help insure a better balance on the council between those who represent state interests and those who most accurately reflect local needs and interest.

While the municipality has not taken a position relative to the following points I believe they are points which might be appropriate for committee discussion.

1. There appears to be a conscious effort not to specify which agency or body has the responsibility for developing the Alaska coastal management program. While it is the council which initially approves the program, it does not clearly appear that the council has any responsibility for developing or assembling the program. It develops guidelines for the preparation of the program; it reviews the program, and it approves the program in part or in whole. Section 46.35.010 on page 6 clearly gives the council the power to review the program but merely provides that the program be revised when appropriate without noting what body or agency has the revisory power. Subsection (c)(1) of subject section provides that the council add newly approved district management coastal programs to the Alaska coastal management program.

2. Proposed sections 60 and 70 set forth the procedure for council approval of district coastal management programs. Proposed section 80 provides that the Alaska coastal management program adopted by the council takes effect upon its approval by the state legislature. Thus, it would appear that district coastal management programs would, by their incorporation in the Alaska coastal management program, be subject to legislative approval. Section 90, however, indicates that council approval is all that is needed for the district coastal management program of a district which exercises zoning or other resource control. Thus, while it is not really clear in the proposed legislation, it does appear that if the state is to be responsible for implementation of a district coastal management program, that program must be approved by both the council and the legislature while council approval is all that is necessary for a district which exercises zoning or other resource controls. If the foregoing reading is accurate as to legislative intent, then changes should be made to the language in section 10(c)(1) which appears to provide for the incorporation of approved district programs into the Alaska program which then receives legislative approval. In addition, the language at lines 12 and 13 on page 13 should be changed so that after the word "programs" in line 12 it would read "which have received final approval by the council or the legislature, as required, and are in effect." Language of this nature would help remove the ambiguity of whether or not both council and legislative approval are required for both state enforced and locally enforced programs. If, on the other hand, it is the intent of the legislature that district programs which are to be implemented through local zoning and other resource controls should be fixed in concrete through the mechanism of legislative approval, section 100 should be redrafted to remove the very strong implication that legislative approval is not needed except where state implementation is contemplated.

3. Returning to page 7, it does not appear in the list of objectives that the interests of the region or district are to be considered. If these are deemed appropriate for consideration, the addition of the phrase ", the region and the district" at the end of the sentance ending on line 18 on page 7 would incorporate such standards.

4. It would appear from reading section 30 starting on page 8, and in particular subsections (5) and (6), that implementation of the district coastal management program is contemplated through a mechanism which is

similar to conditional use procedures in conventional zoning programs. If it is contemplated that each use of land or water regulated under the district program is to be regulated as a conditional use, this aspect of the legislation could be subject to attack as many courts do not hesitate to overturn ordinances which purport to be zoning ordinances but under which all or almost all land uses are subject to the conditional use procedure. Such courts seem to balk at the idea that the legislative or regulatory body can decide on a case-by-case basis whether each or most uses under a general zoning will be allowed. Such an approach can be likened to spot zoning for each use. Of course, if there are sufficient standards that there is little discretion as to whether or not an application for a particular use is to be granted, such procedures are less vulnerable to attack.

5. At pages 10 and 11, the bill contemplates a mediation process which is to be utilized as to those district programs or parts thereof which are not approved by the council. The committee may want to consider whether it would be more appropriate to give the coastal resource district an opportunity to revise all or certain parts of its plan to bring it into compliance with council requirements before forcing the district into mediation. While the conventional concept of mediation involves a neutral third party who attempts to obtain agreement between the disputants, it appears that section 60(b) contemplates that the council itself acts as mediator. This appears to be something more akin to negotiation than mediation. However, it appears that in either event the coastal resource district is not in much of a position to resist changes requested by the council as the council has the ultimate authority to order the program amended. It must be admitted, however, that this is a commendable effort to provide a vehicle for the resolution of disputes between inferior and superior agencies prior to the superior agency invoking its power of a final and formal disapproval.

In closing, the municipality encourages the committee to increase or strengthen the authority and role of municipalities in the coastal resource management scheme.

Very truly yours,

Gerald L. Sharp
City/Borough Attorney

Main Points; SB 220/HB 342

"Management of Coastal Resources"

1. The bill specifies the uses and areas which should be addressed within the coastal management program. It explains that coastal management is not regulation of everything that is happening along Alaska's shores and coasts. Many citizens and local government officials have had the impression that coastal management means regulation of any kind of use or activity, no matter how minor or local.

2. The bill establishes policies, or guidelines if you wish to call them that, in law which explain the State's interest in regulating the major uses and areas defined in the legislation.

3. The bill would establish the tie between state regulation and local planning and zoning. The guidelines for coastal areas and activities would become the basis for completing and reviewing local (municipal) coastal programs. Local governments would have a role in planning for uses and areas along the coast, in close cooperation with state agencies.

4. The bill provides a mechanism for resolving conflicts between the state and local governments.

5. The bill provides means for residents of the unorganized borough to participate in the coastal management program.

One question that could be raised here relates to federal approval of the State's coastal management program. That is, will this bill make the State's program approvable under the terms of the Coastal Zone Management Act of 1972?

The State can seek approval on the basis of state authorities alone, or on the basis of a partnership between the State and local governments. Every state which is actively involved in coastal management has chosen to involve local governments in a significant way. The bill would allow the State to use local planning and zoning authorities as an important part of the management program.

The coastal management process described in the bill is based on the existing local and state agencies. The only "new" feature is the Alaska Coastal Policy Council. This group, composed of 8 local government officials and 7 Commissioners, provides guidance for the program and resolves disputes between the State and local governments.

MEMORANDUM

TO: Recipients of Fiscal Note for
SB 220/HB 342

DATE : April 11, 1977

FROM: Murray R. Walsh
Deputy Coordinator
Alaska Coastal Management Program
Office of the Governor

SUBJECT: Additions to Fiscal Note

We were asked to define some of the budgetary terms used in the Fiscal Note for SB 220/HB 342, and I have added pages 5 and 6 to do that. Attached is a complete copy of the expanded note.

There may yet be other questions or uncertainties about this note and we will be happy to answer any inquiries or supplement the note even further.

Murray

THE LEGISLATURE OF THE STATE OF ALASKA
TENTH LEGISLATURE

FISCAL NOTE

I. REQUEST
Bill/Resolution No. SB 220 / HB 342
Title "An Act relating to the management of coastal resources of the state"
Requested by The Senate Rules Committee by request of the joint Administration-Legislative Committee on coastal management Date 3/7/77

II. FISCAL DETAIL
Agency Affected Office of the Governor (DPDP) and Dept. of Comm. & Reg. Affai
Program Category Affected Coastal Zone Management
Budget Request Unit(s) Affected 01-47-6-02-00-00

EXPENDITURES (Thousands of Dollars)

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A. Assumptions.

1. Passage of the bill will make federal approval under section 306 of the Coastal Zone Management Act of 1972, and award of additional funding under that section, possible; and this should occur in June of 1978.
2. No increase in state cash appropriations will be needed to match the incoming federal grants. The larger federal grants can be matched with local participation and state agency in-kind services.
3. Only four new positions in state government (3 in CRA, 1 in DPDP) should be needed to implement the bill. Almost all of the bill's provisions can be met with the existing personnel now in place in various state agencies as a result of the existing Alaska Coastal Management Program(ACMP). The new positions will be needed because of the substantial new role of local governments and the needs of the new council.

III. Analysis, Continued

B. Program Summary.

The purpose of a fiscal note is usually to show what increases in state staff or expenditures can be expected as a result of legislation. In this case, SB 220/HB 342 would become the centerpiece of an existing program which began in the summer of 1974. The program, which is called the Alaska Coastal Management Program (ACMP) just as in the bill, has changed in many respects since it began, but the overall goal of wise use and protection of the coastal resources has never changed nor has the programmatic goal of federal approval under section 306 of the Coastal Zone Management Act of 1972 changed.

Analysis by the ACMP staff in the Office of the Governor, the Dept. of Law, and the federal Office of Coastal Zone Management shows that the proposed bill should make it possible for ACMP to be federally approved with little difficulty if the bill is enthusiastically administered. This approval would permit larger federal CZM grants to be made to the state. So, while the face sheet of this note is filled out according to the instructions for fiscal notes, we provide a more thorough look at the ACMP budget on the following charts. Grant application and BRU data, as well as ACMP staff experience and expectation have been melded to form general budget charts for fiscal years 1977, 78, and 79. The figures are reliable insofar as general allocations and magnitude; but they are not exact since there are many unknowns. The figures for FY 77 are also rough since they are drawn from two separate grant applications and a possible supplemental application.

The first chart might be thought of as the "pre-bill situation." Since FY 77 will end just after passage of the bill, there will be little of the bill reflected in the FY 77 chart. This is not awkward, since many of the bill's provisions were anticipated. The major difference from FY 77 to FY 78 and beyond will be the amount of local government involvement, which was only voluntary and rather novel at the start of FY 77.

The second chart, for FY 78, is a projection of program development expenditures as the implementation of the bill begins. There is much to do: Local governments must be provided with enough funds to get their programs underway, and the Council will have quite a job in getting organized and establishing its guidelines and procedures. Additionally, the ACMP office will be pursuing approval of the program by the end of the fiscal year, and this will involve substantial time and money.

The third chart can be thought of as the first year of "regular" program administration. By this time the larger Sec. 306 grants will be available and local programs should be well underway. Also, some local governments may be done with developing their programs, and thus be eligible for administration grants with which to maintain their programs. This last topic

is not addressed in the proposed legislation, but making grants of CZM 306 funds for regular municipal and borough administration of local coastal programs is certainly permitted and encouraged in the national CZM program.

The first and second charts will be largely unchanged whether or not SB 220/HB 342 passes or not, except that the funds for local grants in the second (FY 78) chart might be less because the local demand would probably not be as high without the existence of a bill like SB 220/HB 342.

The third chart (FY 79) may not be valid at all if the bill does not pass because there is considerable uncertainty over whether ACMP could be federally approved without the help of SB 220/HB 342, or something similar.

Chart One-Fiscal Year 77.

Approximate ACMP Receipts:*

Federal:	$1,200,000
State Cash Appropriation:	250,000
TOTAL	$1,450,000

Approximate ACMP Expenditures:

ACMP Office Use...	
Public Participation	$ 200,000
Program Elements	100,000
Grant and Contract Adm.	50,000
Grants to Local Gov'ts	350,000
Assistance to Local Gov't	225,000
State Agency Projects	525,000
	$1,450,000

Chart Two-Fiscal Year 78

Approximate ACMP Receipts:*

Federal:	$1,200,000
State Appropriation:	250,000
TOTAL	$1,450,000

Approximate ACMP Expenditures:

ACMP Office Use...	
Public Participation	$ 225,000
Program Elements	75,000
Grant and Contract Adm.	50,000
Grants to Local Gov'ts	625,000
Assistance to Local Gov't	75,000
State Agency Projects	400,000
TOTAL	$1,450,000

Chart Three-Fiscal Year 79 (If approval under Sec. 306 of the Coastal Zone Management Act has been achieved, and the federal funding is thereby available.)

Approximate ACMP Receipts:*

Federal:	$2,000,000
State Appropriation:	250,000
TOTAL	$2,250,000

Approximate ACMP Expenditures:

ACMP Office Use:	
Public Participation:	$200,000
Program Elements:	75,000
Grant and Contract Adm:	75,000
Program Development Grants to local government:	700,000
Program Administration Grants to local gov't:	600,000
Assistance to Local gov't:	100,000
State Agency Projects:	500,000
TOTAL	$2,250,000

* The receipts shown here are those monies under ACMP Office control only. The federal grants do require state matching shares, of which the annual ACMP appropriation is a part. The rest of the match is made up from local and state agency in-kind contributions to the program. Grants to local governments usually require that the local government contribute some value to its own program in cash or in kind, and this contribution is used as part of the overall match for the federal funds. The match ratio now is 4 federal dollars for every 1 state dollar. The state ususally has no trouble finding enough matching share, and this is why we do not expect to ask for any larger annual appropriation than $250,000 per year.

C. Personnel.

SB 220/HB 342 will cause a dramatic increase in local involvement in ACMP. Thus, we see the need of at least three mid-range planners in addition to the existing CRA staff to handle the increased demand for grants and services. All other aspects of SB 220/HB 342 have been forseen except the Alaska Coastal Policy Council, and the ACMP office will need a para-proffessional administrator to attend to the needs of the Council. All these people can easily be paid from the present program revenue.

D. Budgetary Terms Defined

The terms used in the three budget charts for the Program Summary in (B) above may not be familiar to everyone, so descriptions are provided below for better understanding of the Alaska Coastal Management Program activities and expenditures.

"ACMP Office Use" means the funds expended directly from the Alaska Coastal Management Program Office within the Division of Policy Development and Planning in the Office of the Governor. The other funds are spent by other state agencies or passed through to local governments. The ACMP Office applies for the entire amount and arranges contracts with the other state agencies. The next three terms are more specific activities undertaken by the ACMP staff.

"Public Paticipation" There are basically two objectives of public participation: The first and current effort is to learn as much as possible from the public about Alaskan coastal affairs, and in return to acquaint the public as much as possible with the nature of ACMP. The second objective, which will begin soon, is to enable thorough public review, understanding, and comment on the policies and other more specific details about the program, which have only now begun to solidify. Both objectives are pursued with a community workshop series, a monthly newsletter, a group of special interest representatives, an array of slide programs, brochures, films, etc, and by staff visits to communities and group meetings. There are presently two staff people working on public participation, with help from others. Much of the work is done by contractors. People from other state agencies assist as well.

"Program Elements" This refers to a series of tasks whose purpose is to lead to approval of ACMP under Section 306 of the federal Coastal Zone Management Act. Many of the duties that the Council would perform with passage of SB 220/HB 342 are complemented by ongoing program elements, which include assembling a unified policy base, defining land and water uses of state concern, listing and defining special areas in the coast which need extra attention in management, coordinating the array of state authorities, organizing the array of state procedures for better management, coordinating and consulting with federal agencies, and eventually producing a program document which unifies and describes all these elements. This work is done by two and a half staff people with some contracted assistance.

"Grant and Contract Administration" This is the task of applying for and managing the large sums of money that flow into the program. Grant applications require forcasting the often uncertain program needs over a year or more in the future, and balancing the many demands for the use of the funds. Then, a number of contracts with agencies and consultants must be consummated, coordinated, kept track of, reported on, and eventually audited. One and one-half staff people do this work. The grants are audited every year.

"Grants to Local Governments" The ACMP Office contracts with the Dept. of Community and Regional Affairs to provide funds for local planning efforts. Some of this activity is specifically related to planning for OCS development impacts on the communities, and the rest is for general coastal management planning. If the bill passes, this same mechanism would be used to support the local planning effort called for in the bill. A matching share is usually required of the local governments in return for grants, but this is only 20% of the value of the project and can be in-kind services as well as cash. When the ACMP is approved under section 306, we will be able to provide funds for administration of local programs as well as for the planning.

"Assistance to Local Governments" In addition to the direct grants, CRA assists local governments by providing individual and general staff and consultant assistance. Often, a local government will need help for a project, but the size of the project does not warrant hiring a local planner. The job may only take three months. In cases like this, CRA will provide professional staff assistance to the local government. In other cases, several local governments may be faced with the same kind of problem, and help can be provided to all with a CRA staff project or a consultant project. The product or report is then given to the local governments which need it. Whatever the situation, this form of assistance is basically just support to local planning by means other than direct grants. A final example is a project by two or local governments want to work together on a project, and CRA can relieve both of paperwork difficulties if a contractor is to be used.

"State Agency Projects" These are tasks undertaken by state agencies at the request of ACMP or at the agency's own initiative. In the former case, ACMP needed information on the biophysical relationship of the marine waters to the specific uplands of Alaska. The Dept. of Fish and Game was contracted for this work. The result will assure adequate program coverage of the important processes of nature. In other cases, an agency may look ahead to its duties related to ACMP and ask for funds to conduct a study or inventory. In all cases, the ACMP Office assures that the project will be of value to ACMP and in most cases, also of value to local governments.

"Program Development Grants to Local Government" and " Program Administration Grants to local government" are both terms that are subsumed under "Grants to Local Government."

MEMORANDUM

TO: Senator Poland
Senator Orsini
Representative Rudd
Jack Chenoweth
Ron Lind
Fran Ulmer

DATE : March 25, 1977

FROM:

SUBJECT: SB 220/HB 342: Fiscal Note

Murray Walsh
Alaska Coastal Management Program
Division of Policy Development and Planning
Office of the Governor

We have prepared a fiscal note for SB 220/HB 342. Since the bill will complement and augment an existing program, we have tried to present a basic understanding of the present and near future financial expectations of the Alaska Coastal Management Program, rather than just showing the expected increases that would result from passage and implementation of SB 220/HB 342.

We hope this information is useful and instructive to you, and please call on us for further explanation or clarification of the fiscal or any other aspects of the coastal program.

III. Analysis, Continued

B. Program Summary.

The purpose of a fiscal note is usually to show what increases in state staff or expenditures can be expected as a result of legislation. In this case, SB 220/HB 342 would become the centerpiece of an existing program which began in the summer of 1974. The program, which is called the Alaska Coastal Management Program (ACMP) just as in the bill, has changed in many respects since it began, but the overall goal of wise use and protection of the coastal resources has never changed nor has the programmatic goal of federal approval under section 306 of the Coastal Zone Management Act of 1972 changed.

Analysis by the ACMP staff in the Office of the Governor, the Dept. of Law, and the federal Office of Coastal Zone Management shows that the proposed bill should make it possible for ACMP to be federally approved with little difficulty if the bill is enthusiastically administered. This approval would permit larger federal CZM grants to be made to the state. So, while the face sheet of this note is filled out according to the instructions for fiscal notes, we provide a more thorough look at the ACMP budget on the following charts. Grant application and BRU data, as well as ACMP staff experience and expectation have been melded to form general budget charts for fiscal years 1977, 78, and 79. The figures are reliable insofar as general allocations and magnitude; but they are not exact since there are many unknowns. The figures for FY 77 are also rough since they are drawn from separate grant applications and a possible supplemental application.

The first chart might be thought of as the "pre-bill situation Since FY 77 will end just after passage of the bill, there will be little of the bill reflected in the FY 77 chart. This is not awkward, since many of the bill's provisions were anticipated. The major difference from FY 77 to FY 78 and beyond will be the amount of local government involvement, which was only voluntary, and rather novel at the start of FY 77.

The second chart, for FY 78, is a projection of program development expenditures as the implementation of the bill begins. There is much to do: Local governments must be provided with enough funds to get their programs underway, and the Council will have quite a job in getting organized and establishing its guidelines and procedures. Additionally, the ACMP office will be pursuing approval of the program by the end of the fiscal year, and this will involve substantial time and money.

The third chart can be thought of as the first year of "regular" program administration. By this time the larger Sec. 306 grants will be available and local programs should be well underway. Also, some local governments may be done with developing their programs, and thus be eligble for administration grants with which to maintain their programs. This last topic

is not addressed in the proposed legislation, but making grants of CZM 306 funds for regular municipal and borough administration of local coastal programs is certainly permitted and encouraged in the national CZM program.

The first and second charts will be largely unchanged whether or not SB 220/HB 342 passes or not, except that the funds for local grants in the second (FY 78) chart might be less because the local demand would probably not be as high without the existence of a bill like SB 220/HB 342.

The third chart (FY 79) may not be valid at all if the bill does not pass because there is considerable uncertainty over whether ACMP could be federally approved without the help of SB 220/HB 342, or something similar.

Chart One-Fiscal Year 77.

Approximate ACMP Receipts:*

State Appropriation:	250,000
TOTAL	$2,250,000

Approximate ACMP Expenditures:

ACMP Office Use:	
Public Participation:	$200,000
Program Elements:	75,000
Grant and Contract Adm:	75,000
Program Development Grants to local government·	700,000
Program Administration Grants to local gov't:	600,000
Assistance to Local gov't:	100,000
State Agency Projects:	500,000
TOTAL	$2,250,000

* The receipts shown here are those monies under ACMP Office control only. The federal grants do require state matching shares, of which the annual ACMP appropriation is a part. The rest of the match is made up from local and state agency in-kind contributions to the program. Grants to local governments usually require that the local government contribute some value to its own program in cash or in kind, and this contribution is used as part of the overall match for the federal funds. The match ratio now is 4 federal dollars for every 1 state dollar. The state ususally has no trouble finding enough matching share, and this is why we do not expect to ask for any larger annual appropriation than $250,000 per year.

C. Personnel.

SB 220/HB 342 will cause a dramatic increase in local involvement in ACMP. Thus, we see the need of at least three mid-range planners in addition to the existing CRA staff to handle the increased demand for grants and services. All other aspects of SB 220/HB 342 have been forseen except the Alaska Coastal Policy Council, and the ACMP office will need a para-proffessional administrator to attend to the needs of the Council. All these people can easily be paid from the present program revenue.

OCS CONFERENCE DISCUSSES 'The MANAGEMENT of CHANGE'

(Reprint from the ANF Management Report)

In meetings, over coffee and in group discussions, they said again and again how much it reminded them of "the old days during the land claims struggle": Then it was the land. And a land freeze kept the situation in abeyance until a final decision could be made. Now there is talk of a new freeze, a "sea freeze," to not allow any oil development until a final decision is made on who controls the subsistence resources of offshore areas.

With powers provided through ANCSA, Alaska's coastal residents have a chance at succeeding with this new cause. Managing the changes inherent in the planned development of Alaska's extensive Outer Continental Shelf petroleum reserves.

Representatives from 61 village corporations, 120 people in all, gathered at Anchorage's Ramada Inn, February 4-6, for a conference on OCS, sponsored by the Alaska Native Foundation with assistance from the Kellogg Project of the University of Alaska, the Department of Community and Regional Affairs, the Governor's Coastal Zone Management Office and the Bureau of Indian Affairs.

The conference, entitled the "Management of Change," focused on three major topics:

1) What changes can villages expect with OCS development?
2) What are the legal rights with regard to development which affects a community or region?
3) How can villages best use all resources to plan for and manage the change to the benefit for local residents?

Questionnaires filled out by conference participants before the meetings began indicated that people in about half the coastal communities were talking about OCS; while the other half felt a vague uneasiness about the subject, they didn't know enough to discuss it. Several villagers had been to other meetings on OCS, few representatives of either state or federal governments, oil companies or other organizations had visited communities to talk about the subject.

Much of the conference looked specifically at how communities already impacted by OCS have dealt with it. Most affected so far is Yakutat, and many sessions were chaired by representatives from that area, namely Byron Mallott, Sam Demmert, Attorney Dave Wolf, and Vern Wiggins and Bob Sharp, from Tryck, Nyman and Hayes, land planners for Yakutat. Also prominent were Kodiak and English Bay representatives, because these three communities together form specific role models for villages not yet hit by OCS: English Bay has chosen no development at all; Kodiak wants the economic benefits of development, and has formed a partnership with its villages and the borough, and like Yakutat, is trying for the two: to minimize the impact on its life style and culture, and gaining financially.

Kay Poland, State Senator from Kodiak, outlined important legislation which would emphasize the importance of local and subregional control over OCS development. *(Cont. Page Four)*

VILLAGERS EXCHANGE VIEWS, INFORMATION

Wilbur Pavilla from Bristol Bay, left, and Nelson Frank from Sitka exchanged ideas and information at the OCS Awareness Seminar in Anchorage, Feb. 4-6. Representatives of 61 coastal communities attended the meetings, listening to speakers, watching slide and film presentations and discussing issues. Many villagers said the most useful feature of the conference was meeting new people and exchanging information about culture, life styles and possible effects of OCS development.

KEEPING BUSY

Roger Lang, above, former president of AFN and chairman of Alaska Native Human Resource Development, originated the idea of the conference. Over 120 people attended the large group meetings, left. Concentrating on writing down information, below, is Herman Rexford of Kaktovik.

LEGISLATURE LOOKS AT OFFSHORE BILLS

—The House has approved funding for the repurchase of oil and gas leases in Kachemak Bay, after the Hammond Administration negotiated the deal with Standard Oil of California. The leases were sold to Standard in 1973 by the former administration of Governor William Egan without public hearing. The Senate is expected to okay the $24 million deal, too, but more opposition is expected there than in the House where the vote was 30-10. The $24 million includes not only the $12 million the oil companies paid for the leases but interest on the leases and oil industry expenses as well.

—The House is expected to approve without much controversy an administration-sponsored proposal to impose a maximum $50-a-gallon penalty on those responsible for oil spills. Presently, there is a $100,000 civil liability limit for oil spills. In the case of a disaster involving a 165,000-to- supertanker the measure could result in a fine of up to $42 million. "That sure would build a lot of fish hatcheries," remarked Rep. Dick Eliason of Sitka. The bill would extend liability to those operators in a position to control the situation, e.g., operators of an offshore drilling platform would be liable for spills by tankers serving the rig.

—A bill is presently before the House which would provide reimbursement to municipalities for expenses in preparing for OCS impact. The bill follows a complicated formula for establishing a system of permit fees, for which oil companies would have to apply if they want to build onshore facilities to support offshore drilling. The amount of the fee would vary with each location and type of facility the oil companies want to build.

—A bill which would give local regions control and input into coastal management decisions has been introduced in the Senate and is now before the Senate Resources Committee. The extensive legislation is sponsored by the Senate Rules Committee by request of the Joint Administration-Legislative Committee on Coastal Management. Basically, the bill would create a statewide Resources Commission, and local committees which would determine priorities and concerns for their particular areas. Right now, the regional divisions follow the REAA school district lines, but as Senator Kay Poland, Chairperson of the Resources Committee, says, "Those are only borders to start with. If there are better ways to divide the state, then we'll be glad to change." The bill would require that monies go directly to the local committees for preplanning and organizing planning groups. The bill may meet with a lot of resistance from some state agencies who wouldn't like to see their power disbursed to the local regions. If you would like a copy of the bill, or would like to comment on it, write Sen. Kay Poland, Alaska State Senate, Juneau, Alaska 99811.

LEGISLATORS LOOK AT OCS
Rep. Al Osterbach, standing, and Sen. Kay Poland, left, addressed one dinner session of the seminar, focusing on current and pending legislation related to OCS. Michael DeMan, right, heads ANF's Village Management Assistance program.

Hopson Calls For 'Sea Freeze'

"The OCS program is the first of many in which the world will have to go to the land beneath the sea for the means to survive," Eben Hopson, Sr. forecast in his banquet speech during the ANF OCS Conference in Anchorage, February 6th.

Hopson, Mayor of the North Slope Borough and former candidate for Congress, stressed the importance of protecting "our environmental security," forwarding the idea of a "sea freeze," which would disallow any petroleum development offshore until the question of "aboriginal offshore jurisdiction" is settled.

While he admitted the idea of "offshore rights" is a new one, Hopson said the Inupiat (Eskimo for "the people") along the Arctic Coast---Alaska, Canada and Greenland---"have a good opportunity to advance our jurisdictional claims through the negotiation of an international Beaufort Sea coastal zone management agreement. We are organizing a strong Inupiat circumpolar community so that we can become a party to these negotiations... This is the way I see the doctrine of aboriginal offshore jurisdiction developing as a recognized and respected concept," Hopson continued.

"But until our rights to offshore jurisdiction are recognized in the courts and by our governments, we will have to work with the tools at hand," he said.

The major tool available to coastal communities is local government, according to the mayor. Through this method, the North Slope Borough, Yakutat, Kodiak and other towns have used their powers to determine how the development shall take place.

Just as the new network of regional school districts emphasizes greater local control, so may OCS "contribute to the organization of local government," he said.

"Home rule" or local control, is essential to all coastal communities to work effectively with the state in determining policy for OCS development," Hopson continued.

"There is a great deal riding on our efforts to deal with the OCS program effectively," said Mayor Hopson. "The OCS program is a question of justice."

WELCOME

(Cont. from Page One)

companies; and what they want the future to hold for their towns.

The Alaska Native Foundation takes no editorial position other than that of the Public Need to Know. It needs to know what's going on with a complicated issue that may change whole cultures and life styles. The public needs to know, we believe, what to expect from OCS development, what the rights of citizens are and what other communities are doing with regard to OCS coastal zone issues. And legislation in this field will be taking positions, and defining directions for this development. And *Review* will try to cover all sides of a particular subject; we'll solicit input from the oil companies as well as environmental groups. But information, not opinion, is our goal. Call us, write us, discuss with us -- but most of all, READ US. (Then pass us along to your friends!)

SEC. ANDRUS SAYS ENVIRONMENT COMES FIRST

He's pro-environment by his own description, and views his primary responsibility as "the public lands."

The new Secretary of the Interior, Cecil Andrus testified before a House Subcommittee this week, and left most committee members gasping for breath at his sweeping new policies.

Andrus said he is committed to an energy program which will provide maximum environmental protection to coastal states and to promote greater competition within the oil industry.

Among his points were that there must be: 1) greater consultation between the government and coastal states and communities to be affected on offshore oil issues; 2) a balance between protection of the environment and the achievement of economic benefits of oil and gas production; and perhaps, most startling, 3) laws which will require companies that spill oil while drilling offshore should pay for clean-up costs and damages.

That last point caused Rep. Gerry Studds from Massachusettes to remark, "This is the first time in my experience on this committee that an interior secretary has given us a statement that could not have been written by the oil industry."

Other proposals made by the Secretary include creating legislation to:

- Modify or disapprove plans submitted by oil companies for offshore drilling.
- Cancel leases if it becomes clear that continued drilling would cause serious harm to the environment.
- Explore oil reserves before selling leases to companies.

While Andrus said he feels the Atlantic sale should be held, he has not yet made up his mind on the Lower Cook Inlet Sale.

Andrus also shook up the natural gas industry by issuing a warning that he will not renew five-year offshore leases unless the companies involved agree to begin gas production as fast as possible. He told a petroleum company March 3 to start pumping gas from newly-discovered reserves or else give up its federal offshore lease.

ALASKA OCS REVIEW

kellogg project co-op extension

the alaska native foundation

WELCOME

This newsletter on OCS and related activities will be coming to you on a semi-regular basis, from the Alaska Native Foundation offices in Anchorage. The information contained in *Alaska OCS Review* will come from a variety of sources. Official ones include state and federal government agencies, local municipalities and the oil industry; informal sources will be village corporations and councils, individuals, newsletters and other publications from various organizations and governments, and whatever else the editors hear or you send us.

As of now, no other publication in Alaska addresses solely the OCS issue as a whole. Several excellent and comprehensive newsletters cover parts of the question. We hope to have their input and cooperation in publishing *Alaska OCS Review*.

The potential impact of OCS petroleum development on Alaska as a whole and on coastal communities in particular is staggering. This is especially the case for many of Alaska's smaller villages, which have little or no planning expertise, sparse community infrastructure, and scanty information on the subject. *Alaska OCS Review* will endeavor to increase the knowledge level; more information will help lead to greater planning ability, and from there, communities can choose their own course of action: whether to encourage OCS development in their area; how to deal with the oil

(Cont. Page Three)

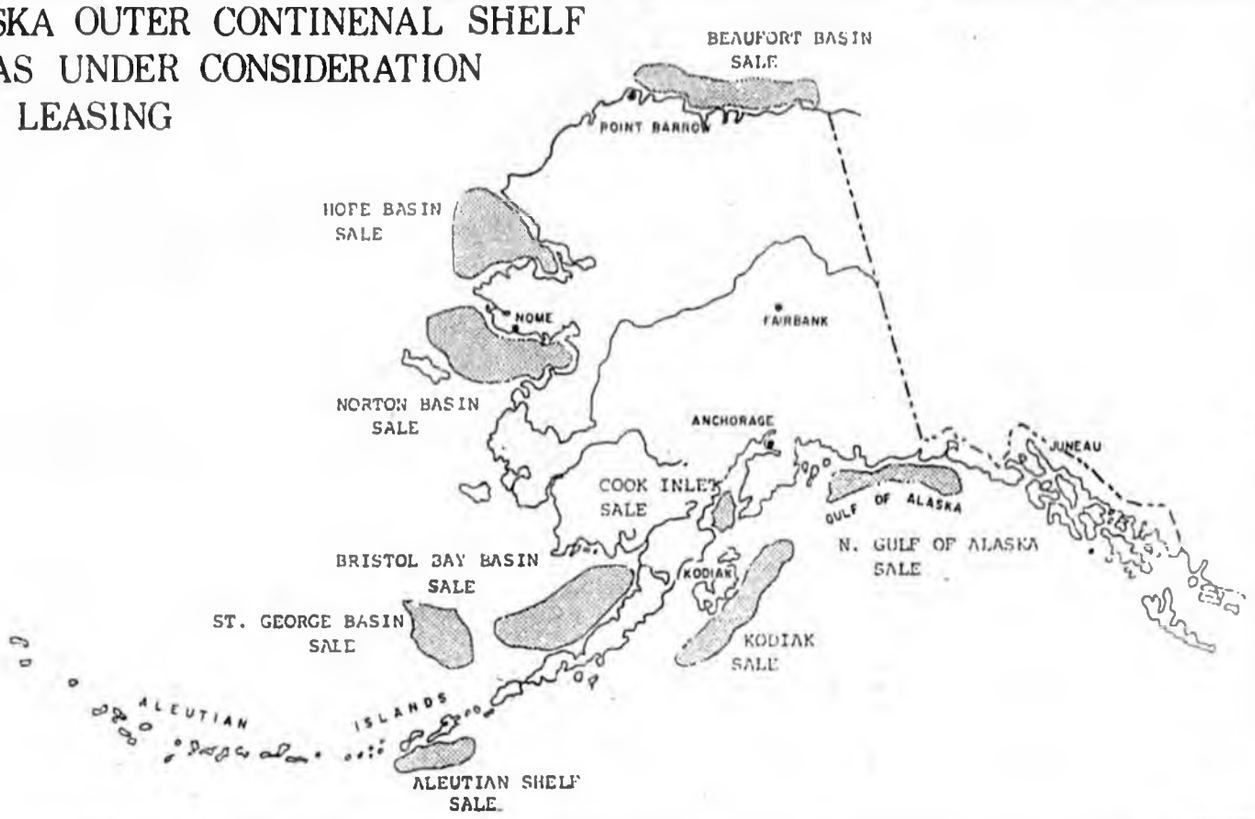
Coming: Next Issue

Later this month, Alaska OCS Review will feature a Do-It-Yourself plan for organizing a village, community, or several towns together, to plan for OCS and study the issue. We'll also take a look at the whole federal and state government structure which governs OCS activities. The Outer Continental Shelf Environmental Assessment Program has been researching the physical and biological scientific aspects of constal development; we'll bring you up to date on that. Also, the BIA may have some money for villages to start planning activities for OCS -- a look at that subject. All this -- and more! In the next issue of Alaska OCS Review.

CULTURE DISCUSSED

Anthony Vaska from Upper Kalskag talked about the cultural impact of OCS at the recent conference. (See complete story Page Two.) Vaska, who teaches at Kuskokwim Community College, is studying for his Ph.D. in anthropology.

ALASKA OUTER CONTINENAL SHELF AREAS UNDER CONSIDERATION FOR LEASING



Local Organizations Study Oil, OCS-Related Issues

Several local organizations are presently tackling the OCS issue, planning and preparing for its impact. Some are concentrating on getting people talking about OCS and giving out information; others are more prodevelopment and are trying to attract OCS development to their areas. But all are aware that a lot of public education needs to take place before the oil companies pull into their harbors, in order for local interests to manage the changes inherent in OCS onshore impact.

If you know of, or are involved with, other such organizations, please drop us a note, telling us who's involved, where they can be reached and the types of activities being pursued.

If you're interested in getting information or assistance in setting up your own local OCS Awareness Group should contact one of the following, or ANF-OCS Information, 615 D Street, Anchorage, Alaska 99501.

Box 505
Nome, Alaska 99762

OCS Committee — Chamber of Commerce
c/o Darrell Hargraves
Nome Public Schools
Nome, Alaska 99762

Gerald Trigg of the Nome Eskimo community, who also serves on the Chamber's OCS committee, says both groups are working on getting people aware that OCS is coming. Through the Eskimo community, Trigg says information emphasizes "both sides" of possible development, while the Chamber is focusing on making businesses and local landowners aware of potential methods of doing business with the oil industry. Jack Carpenter of the OCS committee said, "We're trying to make sure no local person gets ripped off -- we may want development, but on our terms."

The Nome OCS committee last month sponsored a public meeting at which Keith Arnold of the Alaska Oil and Gas Association, and a representative of Gulf Oil spoke. About 125 persons attended the meeting. This month, Pat Dobey from the Department of Natural Resources will be in Nome, talking OCS to people.

Nunam Kitlutsisti
Box 267
Bethel, Alaska 99559

Nunam Kitlutsisti, Yupik Eskimo for "protector of the land," was founded in 1973 by the Association of Village Council Presidents to represent the viewpoints of the 56-member villages on subsistence and and policy matters. It has been working toward postponement of the Bering Sea and Norton Sound lease sales to give local people more time to prepare for OCS impact, and "get recognition from the state and federal governments of the importance of subsistence life styles" to the people of that region.

• • •

Stu Dunslow
OCS Activities
Kodiak Island Borough
Kodiak, Alaska

Kodiak's local OCS organization is perhaps the most all-inclusive, highly developed group going for areas not yet hit by onshore impact. It has a planning mechanism called the Kodiak Island Forum, which includes the OCS Commission of the Kodiak Borough, the Planning and Zoning Commission, the Overall Economic Development Plan committee and the entire Borough Assembly. Karl Armstrong of Koniag, Inc., and a member of the Forum, called the effort "enormously successful in dispelling the initial nervousness -- the distrust -- between the different interests." He went on to say that OCS to Kodiak isn't only spelled O-I-L, but F-I-S-H as well, since the present economy is based on the fisheries industry. "We don't want to see that go under for the sake of oil," Armstrong said, so the Forum is trying to incorporate every interest in the community into the approach to OCS.

FREE FILMS FOCUS ON OCS

Prior to the recent conference on OCS, ANF previewed a number of films, slide shows and videotapes on OCS and related issues. These will be listed, along with addresses where they may be obtained, in this and following issues. If you have or know of any media programs on OCS, let us know, and we'll pass the information along to our readers. The following programs were done under the auspices of the Alaska Coastal Management Program and are free.

--Uncertain Summer, a documentary focusing on the reactions of Alaskans to the leasing of the Northeast Gulf; deals mainly with Yakutat, Cordova and the Kenai Peninsula. 28 minutes, color, film or video cassette. Write:

Alaska State Film Libraries
650 International Airport Road

Bethel, Alaska 99559

--Kachemak Bay — A Problem of Progress, a narrative about the quality of life and social costs and benefits of progress; focuses on proposed OCS development of Kachemak Bay. 28 minutes, color, film or video cassette. Same address as above.

--The Value of Things, a slide and tape overview of OCS development and the decisions which must be made by local communities to deal with the issue. 22 minutes, color slides, sync sound. Address for this and the following shows is:

Alaska Coastal Management Program
Office of the Governor
Pouch AD
Juneau, Alaska 99811

--Planning for OCS Development, slide and tape program focusing on Kuskokwim and Bristol Bay area, Yupik narration available. 20 minutes, color slides.

--Interview on OCS, an interview with major state agency figures on OCS, coastal zone and related subjects. 30 minutes, color, video cassette.

CONFERENCE

(Cont. from Page Two)

Saturday featured representatives from the state, federal government and oil industry. Ed Hoffmann, head of BLM's OCS office in Anchorage, said that new procedures may be on the way with the Carter Administration, with greater emphasis on public hearings in the affected regions.

State Speakers, Commissioner Guy Martin, Sandy Sagalkin, Glenn Akins, Kevin Waring, and Jim Wiedeman, discussed various roles of their agencies, passing on a good deal of information. But the villagers, through their questions at the sessions and in their questionnaires after the conference, had a message for the state, too. Few thought available monies should go to the state for planning for OCS (it should go to the regions and villages, they thought), and by a four-to-one margin, villagers thought the state hasn't done enough to assist local areas with OCS information and planning.

Somewhat skeptical (a few downright unfriendly) participants kept oil industry representatives Jim Hart of ARCO, Joe Homer from Exxon, and Waco Shelley of Mobil, busy answering questions on all facets of their companies' activities, from the technical end of OCS development to overall policy decisions and philosophy.

Speaking more directly to the questions of cultural impact and subsistence life styles were Anthony Vaska from KCC in Bethel, Linda Ellanna from Anchorage Community College and Pat Wennekens from the Arctic Environmental Information and Data Center.

Two viewpoints on planning came during the banquet speeches: Eben Hopson, Sr., mayor of the North Slope Borough, urged closer planning and international legislation for peoples along the Arctic coasts, so they can control what happens off their shorelines. John Hope, from the Juneau BIA office, outlined funding available through the Indian Self-Determination Act to villages for OCS planning.

During the three days, special "closed" sessions allowed only those people from affected areas to sit down together and discuss in depth specific information and ask questions about planning for their individual villages or areas. Nearly all participants found this to be an extremely effective method of dealing with the complicated and often-emotional OCS issue.

The questionnaires at the meetings' end showed villagers felt their communities were not ready to make any decisions on OCS, yet needing more information before deciding on any course of action. And they want to know more about OCS: It was unanimous that follow-up activities are needed, such as meetings and workshops in the villages and/or regions; additional funding for local areas to plan together and then develop the resources to carry out those plans. The goal is to manage -- successfully -- the changes that OCS development means for the life styles and futures of coastal village residents.

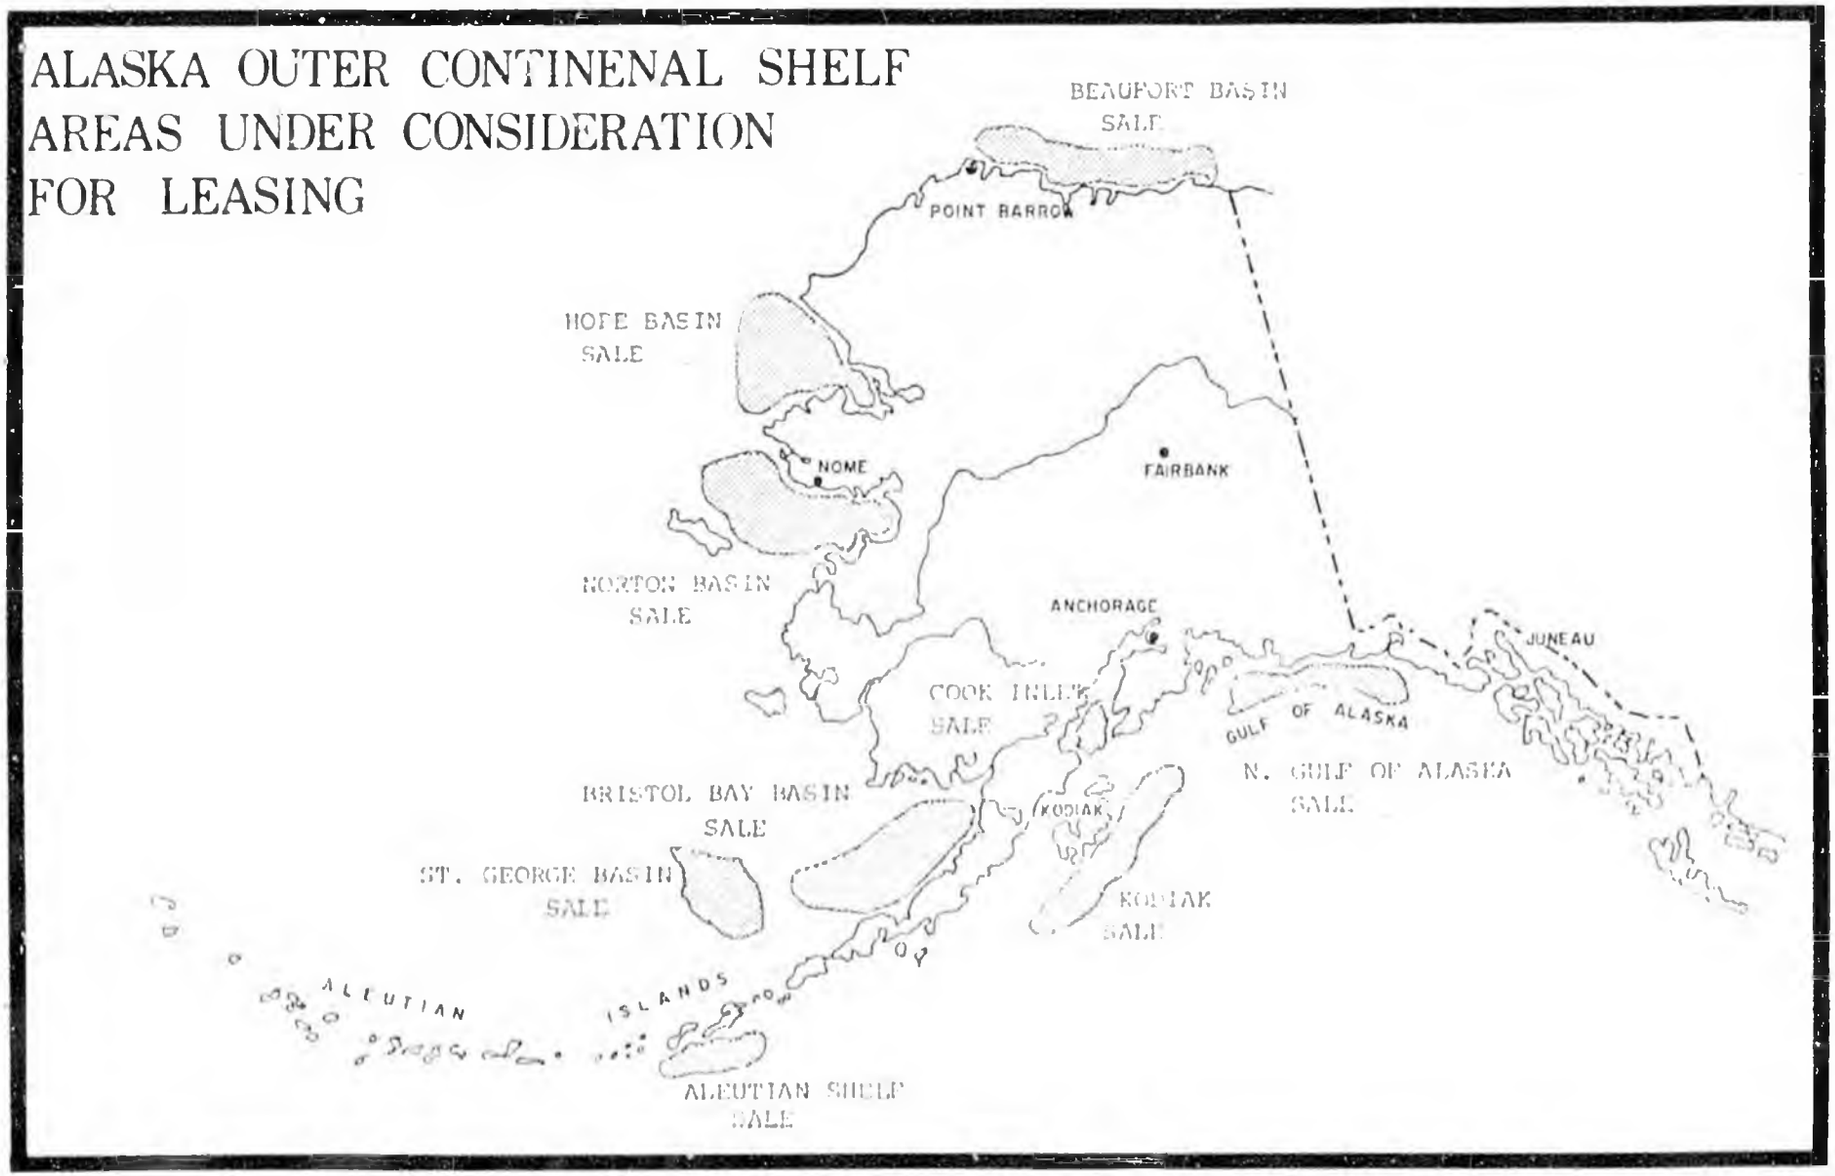
CULTURE DISCUSSED

Anthony Vaska from Upper Kalskag talked about the cultural impact of OCS at the recent conference. (See complete story Page Two.) Vaska, who teaches at Kuskokwim Community College, is studying for his Ph.D. in anthropology.



LEGISLATURE LOOKS AT OFFSHORE BILLS

--The House has approved funding for the repurchase of oil and gas leases in Kachemak Bay, after the Hammond Administration negotiated the deal with Standard Oil of California. The leases were sold to Standard in 1973 by the former administration of Governor William Egan without public hearing. The Senate is expected to okay the $24 million deal, too, but more opposition is expected there than in the House where the vote was 30-10. The $24 million includes not only the $12 million the oil companies paid for the leases but interest on the leases and oil industry expenses as well.

--The House is expected to approve without much controversy an administration-sponsored proposal to impose a maximum $50-a-gallon penalty on those responsible for oil spills. Presently, there is a $100,000 civil liability limit for oil spills. In the case of a disaster involving a 165,000-ton supertanker the measure could result in a fine of up to $42 million. "That sure would build a lot of fish hatcheries," remarked Rep. Dick Eliason of Sitka. The bill would extend liability to those operators in a position to control the situation, e.g., operators of an offshore drilling platform would be liable for spills by tankers serving the rig.

--A bill is presently before the House which would provide reimbursement to municipalities for expenses in preparing for OCS impact. The bill follows a complicated formula for establishing a system of permit fees, for which oil companies would have to apply if they want to build onshore facilities to support offshore drilling. The amount of the fee would vary with each location and type of facility the oil companies want to build.

--A bill which would give local regions control and input into coastal management decisions has been introduced in the Senate and is now before the Senate Resources Committee. The extensive legislation is sponsored by the Senate Rules Committee by request of the Joint Administration-Legislative Committee on Coastal Management. Basically, the bill would create a statewide Resources Commission, and local committees which would determine priorities and concerns for their particular areas. Right now, the regional divisions follow the REAA school district lines, but as Senator Kay Poland, Chairperson of the Resources Committee, says, "Those are only borders to start with. If there are better ways to divide the state, then we'll be glad to change." The bill would require that monies go directly to the local committees for preplanning and organizing planning groups. The bill may meet with a lot of

Hopson Calls For 'Sea Freeze'

"The OCS program is the first of many in which the world will have to go to the land beneath the sea for the means to survive," Eben Hopson, Sr. forecast in his banquet speech during the ANF OCS Conference in Anchorage, February 6th.

Hopson, Mayor of the North Slope Borough and former candidate for Congress, stressed the importance of protectin "our environmental security," forwarding the idea of a "sea freeze," which would disallow any petroleum development offshore until the question of "aboriginal offshore jurisdiction" is settled.

While he admitted the idea of "offshore rights" is a new one, Hopson said the Inupiat (Eskimo for "the people") along the Arctic Coast---Alaska, Canada and Greenland---"have a good opportunity to advance our jurisdictional claims through the negotiation of an international Beaufort Sea coastal zone management agreement. We are organizing a strong Inupiat circumpolar community so that we can become a party to these negotiations... This is the way I see the doctrine of aboriginal offshore jurisdiction developing as a recognized and respected concept," Hopson continued.

"But until our rights to offshore jurisdiction are recognized in the courts and by our governments, we will have to work with the tools at hand," he said.

The major tool available to coastal communities is local government, according to the mayor. Through this method, the North Slope Borough, Yakutat, Kodiak and other towns have used their powers to determine how the development shall take place.

resistance from some state agencies who wouldn't like to see their power disbursed to the local regions. If you would like a copy of the bill, or would like to comment on it, write Sen. Kay Poland, Alaska State Senate, Juneau, Alaska 99811.

Just as the new network of regional school districts emphasizes greater local control, so may OCS "contribute to the organization of local government," he said.

"Home rule" or local control, is essential to all coastal communities to work effectively with the state in determining policy for OCS development," Hopson continued.

"There is a great deal riding on our efforts to deal with the OCS program effectively," said Mayor Hopson. "The OCS program is a question of justice."

committee members gasping for breath at his sweeping new policies.

Andrus said he is committed to an energy program which will provide maximum environmental protection to coastal states and to promote greater competition within the oil industry.

Among his points were that there must be: 1) greater consultation between the government and coastal states and communities to be affected on offshore oil issues; 2) a balance between protection of the environment and the achievement of economic benefits of oil and gas production; and perhaps, most startling, 3) laws which will require companies that spill oil while drilling offshore should pay for clean-up costs and damages.

That last point caused Rep. Gerry Studds from Massachusettes to remark, "This is the first time in my experience on this committee that an interior secretary has given us a statement that could not have been written by the oil industry."

Other proposals made by the Secretary include creating legislation to:

- --- Modify or disapprove plans submitted by oil companies for offshore drilling.
- --- Cancel leases if it becomes clear that continued drilling would cause serious harm to the environment.
- --- Explore oil reserves before selling leases to companies.

While Andrus said he feels the Atlantic sale should be held, he has not yet made up his mind on the Lower Cook Inlet Sale.

Andrus also shook up the natural gas industry by issuing a warning that he will not renew five-year offshore leases unless the companies involved agree to begin gas production as fast as possible. He told a petroleum company March 3 to start pumping gas from newly-discovered reserves or else give up its federal offshore lease.

OCS CONFERENCE DISCUSSES 'The MANAGEMENT of CHANGE'

(Reprint from the ANF Management Report)

In meetings, over coffee and in group discussions, they said again and again how much it reminded them of "the old days during the land claims struggle": Then it was the land. And a land freeze kept the situation in abeyance until a final decision could be made. Now there is talk of a new freeze, a "sea freeze," to not allow any oil development until a final decision is made on who controls the subsistence resources of offshore areas.

With powers provided through ANCSA, Alaska's coastal residents have a chance at succeeding with this new cause. Managing the changes inherent in the planned development of Alaska's extensive Outer Continental Shelf petroleum reserves.

Representatives from 61 village corporations, 120 people in all, gathered at Anchorage's Ramada Inn, February 4-6, for a conference on OCS, sponsored by the Alaska Native Foundation with assistance from the Kellogg Project of the University of Alaska, the Department of Community and Regional Affairs, the Governor's Coastal Zone Management Office and the Bureau of Indian Affairs.

The conference, entitled the "Management of Change," focused on three major topics:

1) What changes can villages expect with OCS development?
2) What are the legal rights with regard to development which affects a

VILLAGERS EXCHANGE VIEWS, INFORMATION

Wilbur Pavilla from Bristol Bay, left, and Nelson Frank from Sitka exchanged ideas and information at the OCS Awareness Seminar in Anchorage, Feb. 4-6. Representatives of 61 coastal communities attended the meetings, listening to speakers, watching slide and film presentations and discussing issues. Many villagers said the most useful feature of the conference was meeting new people and exchanging information about culture, life styles and possible effects of OCS development.

community or region?

3) How can villages best use all resources to plan for and manage the change to the benefit for local residents?

Questionnaires filled cut by conference pa: icipants before the meetings began indicated that people in about half the coastal communities were talking about OCS; while the other half felt a vague uneasiness about the subject, they didn't know enough to discuss it. Several villagers had been to other meetings on OCS, few representatives of either state or federal governments, oil companies or other organizations had visited communities to talk about the subject.

Much of the conference looked specifically at how communities already impacted by OCS have dealt with it. Most affected so far is Yakutat, and many sessions were chaired by representatives from that area, namely Byron Mallott, Sam Demmert, Attorney Dave Wolf, and Vern Wiggins and Bob Sharp, from Tryck, Nyman and Hayes, land planners for Yakutat. Also prominent were Kodiak and English Bay representatives, because these three communities together form specific role models for villages not yet hit by OCS: English Bay has chosen no development at all; Kodiak wants the economic benefits of development, and has formed a partnership with its villages and the borough, and like Yakutat, is trying for the two: to minimize the impact on its life style and culture, and gaining financially.

Kay Poland, State Senator from Kodiak, outlined important legislation which would emphasize the importance of local and subregional control over OCS development. *(Cont. Page Four)*

KEEPING BUSY

Roger Lang, above, former president of AFN and chairman of Alaska Native Human Resource Development, originated the idea of the conference. Over 120 people attended the large group meetings, left. Concentrating on writing down information, below, is Herman Rexford of Kaktovik.

Local Organizations Study Oil, OCS-Related Issues

Several local organizations are presently tackling the OCS issue, planning and preparing for its impact. Some are concentrating on getting people talking about OCS and giving out information; others are more prodevelopment and are trying to attract OCS development to their areas. But all are aware that a lot of public education needs to take place before the oil companies pull into their harbors, in order for local interests to manage the changes inherent in OCS onshore impact.

If you know of, or are involved with, other such organizations, please drop us a note, telling us who's involved, where they can be reached and the types of activities being pursued.

If you're interested in getting information or assistance in setting up your own local OCS Awareness Group should contact one of the following, or ANF-OCS Information, 510 D Street, Anchorage, Alaska 99501.

The questionnaires at the meetings' end showed villagers felt their communities were not ready to make any decisions on OCS yet, needing more information before deciding on any course of action. And they want to know more about OCS: It was unanimous that follow-up activities are needed, such as meetings and workshops in the villages and/or regions; additional funding for local areas to plan together and then develop the resources to carry out those plans. The goal is to manage -- successfully -- the changes that OCS development means for the life styles and futures of coastal village residents.

OCS Legislation Emerges From Senate Committee

By CHUCK KLEESCHULTE
Empire Staff Reporter

After nearly a year of review, a Senate lawmaker has unveiled legislation which would direct planning for use of the state's coastal areas.

The bill, submitted last week by Sen. Kay Poland, D-Kodiak, chairman of a special joint administrative-legislative coastal zone management committee, will require local communities and regions to develop land-use plans to help prevent improper development and lessen the impact of OCS development on existing communities.

The 25-page bill, which would establish the Alaska Coastal Policy Council, is aimed at drawing together all the plans submitted by the local areas into a unified blueprint for development. It is markedly different than the coastal zone bill prepared by Gov. Jay Hammond in 1975. The Hammond proposal died in Senate committee precipitating the appointment of the joint review committee last year—a committee co-chaired by outgoing Commissioner of National Resources Guy Martin.

"In this bill the planning function is left at the level of the local community. If it proves totally inadequate or bars development vital to the state's interests. then its plan can be changed. But basically the bill gives the local people the main voice in determining their destinies," Poland said earlier this week.

The bill divides the state into eight coastal regional zones. Juneau is in the northern Southeast zone with Sitka. All eight of the regions will be represented on the main council by a representative appointed by the governor. The representative must be a borough or city assembly official.

The eight public members will then be joined by seven governmental members, mostly heads of state agencies.

The council, a necessary ingredient for the state to continue to receive federal coastal zone planning funds, will be responsible for setting up district councils which will formulate initial policy plans in conjunction with coastal communities. The local district groups must be established and have identified major problems facing their areas within six months after the act goes into effect.

The districts then have 30 months to hold hearings and complete plans outlining what type of development should be allowed in given areas, what areas should be closed to development and the time schedules for development. The districts can also make recommendations for other uses of the land.

After the district plans are drafted, the statewide council will review them and if they are found undesirable, differences in the plans will be mediated between the two councils. If agreement can't be reached, the state council, meeting as a court, can then select the plans it wishes to impose on the local communities.

The final plan is then sent to the state legislature which would have to approve the entire package before it goes into effect.

Once the plan is approved by the legislature, state agencies are barred from refusing permits and development permission for projects unless they are barred from development in a given area by the plan. Under the initial administration proposal, the state's council would have had the power to deny or grant construction permits regardless of the wishes of local communities.

"Under the old bill all that would have happened is that an onerous layer of government would have been added. The state would have centralized the power and local communities would have been in trouble," Poland, chairman of Senate Resources Committee, said.

The bill does give the state council the power to override local community wishes when statewide interests are involved and gives the council the power to head to state Superior Courts to gain judicial enforcement for its edicts.

Poland, however, stressed that the bill calls basically for land-use planning as the main goal.

Committee hearings on the bill are slated for March 30. The bill then needs to move through the Senate Community and Regional Affairs and the Finance Committee before hitting the Senate floor and then the House. The lengthy committee referrals on the bill makes it improbable it will gain approval this session.

Poland, however, would like to see the bill approved this year to implement the process prior to proposed oil lease sales, the first of which are now slated for the Beaufort Sea in late 1978.

House leaders agree that the bill is needed this session, but express pessimism that the bill will be approved before late spring adjournment. "We certainly need this type of planning, but we needed it five years ago. One more year might not be critical," said Rep. Mike Miller, D-Juneau, House majority leader.

Poland said that if the bill isn't passed this year, she would hope the state administration would begin to implement some of the ideas in the bill on its own. "A lot of the practices can be put into effect without the bill having to become law," Poland said.

Rational Approach To Land Decisions

By Joe Josephson

IT'S NOT HARD to understand why Sen. Mike Gravel parted company with Gov. Hammond, Sen. Ted Stevens and Rep. Don Young over an Alaska position on the D2 land issue in Congress.

Gravel charged the other day that the "consensus" reached by his Republican peers was not "realistic" — code language meaning that their proposals wouldn't derail the legislative engines that are pulling D2 measures forward in Congress.

As the lone Democrat in the congressional delegation, serving in a heavily Democratic Congress under a Democratic president, Sen. Gravel has to assert a position that he feels is realistic and has a credible chance of winning on the House and Senate floor.

After all, if Alaska's Republican leaders assume a position that Congress will never buy, it's the Democratic party that will be portrayed as having rejected an Alaska-made consensus. That's one reason why Mr. Gravel would have preferred a consensus that reflects the old saw that "politics is the art of the possible."

REP. DON YOUNG, on the other hand, has said that the congressional mood is shifting and that the legislation which he, Sen. Stevens and Gov. Hammond are developing might hold the right ideas at the right instant. Of course time will tell, and there's no reason to question the good faith of any of our statewide office holders. But at least it's possible that the Republican leaders understand that if they "propose," a Democratic Congress will "dispose." If their consensus proposition fails, the sored by a joint administration and legislative committee on coastal management, and it's far better than its 1975 and 1976 predecessors.

THE NEW BILL has well stated and balanced objectives. It includes a strong effort to involve local governments in decisions about the coastal areas. At present, regulation of activities in the coastal area is a potpourri of work of a variety of agencies. The result is not good for conservation and not good for development. At times, one state agency isn't aware of what another is doing in the same place.

In at least one instance, a state agency complained to the Corps of Engineers about a dock permit application, on the grounds that piecemeal development shouldn't be allowed in the coastal zone without an environmental impact statement, while another state agency had issued mineral prospecting permits for the submerged lands at the same place.

But if the coastal zone program reflects the benefit of lengthy study and public comment the governor's forestry practices act should be sent back to the drawing board. It would give the commissioner of Natural Resources major responsibilities and a lot of unbridled discreton to determine what can happen in privately-owned forests. For example, the commissioner could bar timber harvesting on private lands, in an area he believes to have potential value for recreation and tourism if kept in a natural state, if he finds that harvesting would impair the "scenic and aesthetic" quality of the private lands.

there's no reason to question the good faith of any of our statewide office holders. But at least it's possible that the Republican leaders understand that if they "propose," a Democratic Congress will "dispose." If their consensus proposition fails, the responsibility, they may say, will not be theirs.

My view on the legislative substance — somewhat safer ground for opinion than is the political motivation of others — has always been that the degree and character of federal controls over state and private lands is the "cutting edge" of the D2 proposals. Pending bills would permit and direct federal officials supervising the proposed expanded parks and refuges to exert a large say-so over state and native land use.

All over the country, of course, government controls over private lands use are becoming stronger. In some cases, it's the private interests themselves that welcome government controls, for effective government regulations of one's neighbor can help protect private property values and landowner objectives. Properly administered, local zoning ordinances are a very traditional case in point.

BUT IN OTHER cases, government regulations can frustrate initiative and complicate unduly the life of the private entrepreneur. In the Alaska context, where officials in Washington can make critical decisions about far-away lands, and even do it anonymously, there's plenty of room for honest concern about federal administrative rules and standards.

But it's not just Uncle Sam that's asking for or taking more and more regulatory power over what happens on the lands of others. The State of Alaska has some proposals, too.

A good drafting job is reflected by SB 220, the new 1977 model coastal management bill. It's spon-

he believes to have potential valu for recreation and tourism if kept a natural state, if he finds that ha vesting would impair the "scen and aesthetic" quality of the privat lands.

NO MATTER whether the pr vate landowner wants to encourag recreation of tourism, and no matte that the timber harvest would occu under sustained yield manageme principles. The aesthetic judgme of the commissioner — and beauty in the eyes of the beholder — wou prevail over the landowner's ow wishes.

In the forestry practices bill cri cal terms, like the "scenic and ae thetic" phrase I've mentione aren't even defined.

No wonder then that private la downers look askance at the for stry practices bill. They ask for e dence that state government h more expertise, more interest, mo incentive and more time and ma power than they do themselves develop and maintain sound forest planning.

We live in an age in which gove nment's role in land use and la planning decisions will grow. F most of us, that's sometimes a ha pill to swallow, imbued as we a with the individualistic, frontie psychology of Alaska and the West

But some of us who complain t most are also the first to call on go ernment for help to protect our la values, to curtail erosion, to furni public services or to irrigate o lands or maintain air quality.

THE CRITICAL questions of t moment aren't really this D2 prope al or that, or this or that bill in J neau. The critical questions of t moment arise from the need to d fine the respective jurisdictions government, on the one hand, a people, on the other. If we can co up with wise answers to those qu tions, the legislative issues will f into place.

In this age, a time of increas resource scarcity, populati growth in Alaska and national c cern about a wilderness and pa and wildlife heritage for the futu government monitoring and cont over land use is sure to increase.

Our goal ought to be that gove ment activity be rational, und standable, predictable, appealab balanced, competent and resp sive.

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

POUCH B – JUNEAU 99811

April 20, 1977

Dear Coastal Mayors and Managers:

This is to bring you up-to-date on the recent Coastal Energy Impact Program (CEIP) workshops held in Juneau and Anchorage on April 11, 12 and 13. For those who attended the workshops, we trust this summary accurately reflects the proceedings. For those who were unable to attend, we hope it helps keep you informed and encourages your continued participation in CEIP.

As you may recall from our previous letters, this series of CEIP workshops were conducted at the request of the Federal Office of Coastal Zone Management, which is the agency responsible for administering CEIP within the U.S. Department of Commerce and is part of the National Oceanographic and Atmospheric Administration (NOAA). A five person delegation represented OCZM, lead by Joellyn Murphy, Acting Director of National Programs. Ms. Murphy has visited with us before, and as always, led thorough and informative workshop sessions.

The Monday workshop in Juneau was mainly attended by State officials, although some local representation was present. On Tuesday in Anchorage, local representation was emphasized. At both, the same basic four topics were disucssed, as follows:

1. Inter-state (federal to state) allotment of CEIP assistance;

2. Application forms and procedures for participation in CEIP;

3. Intra-state (within state) allocation of CEIP assistance to State agencies and local goverrments; and

4. Consistency requirements of section 307 of the Coastal Zone Management Act as amended in 1976.

The Wednesday workshop was narrowly reserved for a state-local discussion of the intra-state allocation of CEIP assistance. As you may recall, the development of a process for distributing CEIP assistance among State agencies and eligible units of local government is an absolute pre-requisite to participation in CEIP. Therefore, before any local government can receive assistance, the "intrastate allocation process" must be in place. This requirement is contained in 308 (g)(2) of the Coastal Zone Management Act amended in 1976 and has become known as the "g-2" process, for ease of reference.

The obvious importance of developing a satisfactory "g-2" process mandates immediate action. In preparation for Wednesday's workshop, we contracted with Scott Goldsmith of ISER who prepared a discussion paper on a possible "g-2" process. This paper was distributed at the Wednesday workshop and acted as the springboard for a lively dialogue. We still have a few copies of the paper and would be pleased to send one to any interested persons unable to attend the workshop. If you would like a copy, please give a call or write.

The "g-2" process discussion pointed up several things, not the least of which is the difficulty in designing a system for equitably and efficiently allocating CEIP assistance. At the workshop, however, we made good progress. General goals were agreed upon, including effective local participation, minimization of Administrative burden and costs. It was decided that the planning assistance would be distributed directly to local governments authorized to perform planning functions, with the State acting as the planning agency for the unorganized borough as provided by law. Credit assistance and Environmental and Recreational grants would be available to all potentionally impacted local governments.

Toward the close of the Wednesday workshop, it was decided that a committee composed of the following members would meet in early June to draft a proposed final "g-2" process:

Local:

Johnny Johnston	City Manager-City of Seward
Stuart Denslow	Borough Planner/Manager-Kodiak Island Borough
Tom Nelson	OCS/CZM Planner-Municipality of Anchorage

State

Palmer McCarter	Director-Local Government Assistance
Kevin Waring	Director-Community Planning
Glen Akins	Coordinator-Office of Coastal Zone

Your comments and suggestions are encouraged. We will be notifying you as to further developments. In the meantime, if you would like to prepare written comments to be reviewed by the "g-2" committee at it's June meeting, you may contact any committee member or send them directly to us.

After the "g-2" committee has prepared the final proposed "g-2" guidelines, they will be distributed to all local governments and state agencies with a 45 day "review and comment" period before becoming effective.

We look forward to hearing from you.

Sincerely,
Chuck Cohen

By: Palmer McCarter
Director

P.S. The Division of Local Government Assistance is currently recruiting for a CEIP Coordinator whose primary responsibility will be to assist local governments in preparing applications for loan and grant assistance. If you know of anyone who you feel to be qualified and interested, please let me know. Thanks. PJM

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF COMMUNITY PLANNING / POUCH B – JUNEAU 99811

April 18, 1977

Ms. Joellyn Murphy
Director, Office of Federal Programs
Office of Coastal Zone Management
U.S. Department of Commerce
3300 Whitehaven Street, N.W.
Washington, D.C.

Dear Joellyn

Following our recent meetings in Juneau, I note that you and your collegues offered to calculate the Credit Allotment that the State of Alaska would receive under the alternative formula we suggested to you. This would enable us to compare it with the allotment from your original model.

You also asked my staff to set out in detail their comments on your proposals to allocate planning grants. These are laid out below.

On page 5 of the document, the Federal Coastal Zone Office shows a formula which outlines the planning need factor for each facility. It shows that the planning grant money allocated to any state will depend on the population increase resulting from the construction of each project, modified by three factors. These are environment, safety and population density. I have no quarrel with the first of these two, but the use of population density as a factor in this equation could be very unfair. What this formula proposes is that states with high population densities around new energy facilities will receive large grants while those states with relatively small populations in the coastal zone will receive only 1/3 as much. As all coastal areas of Alaska are sparsely populated, this means that the grants received will be very low. I would suggest that the planning difficulties involved are in fact much greater when population is small than when it is large. I would, therefore, propose that this factor should be inverted and that instead of giving the value of three to high density areas and one, to low density areas, the process should be reversed and a value of three given to areas with a small number of people such as Alaska, and one, to built-up areas. The rationale for this is as follows:

A. Alaska and all its coastal communities are very sensitive, much more so than say Texas, Louisiana or California. The need for planning is therefore that much greater.

B. Given the very small population in most Alaskan coastal communities, any change of a given size will have much greater impact than it would in a populous state such as California. For example, our calculations for the Kodiak shelf OCS Sale No. 46 show that population increase expected should be around 7,000 people. This would be perfectly easily to absorb in an area like southern California with many millions of people, but in an area like Kodiak which has only 9,000, the impact will be enormous. The doubling of population would mean virtually all public services would have to be completely replanned. In contrast, in California some spare capacity exists in public facilities and there would be no problem in absorbing population change of this magnitude.

C. Not only does Alaska consist of small communities very sensitive to impact, there are also additional problems which do not occur anywhere else in America. The most obvious is the problems of coping with extreme cold when building. In areas such as Nome, Kotzebue and Barrow, buildings have to be raised off the ground on pilings in order to prevent them sinking into the permafrost. This obviously means that the planning effort for any given increase in population has to be much greater in arctic Alaska than it does in areas such as Louisiana and Texas.

The State of Alaska feels very strongly that planning need is proportionately greater in small communities than large ones, and the population density factor in the formula should reflect this. However, we realise that other states may dissent from this view and we would accept as a compromise, the complete removal of this factor from the calculations.

As we indicated at the meeting, we are very concerned at the use of employment estimates from the Environmental Impact Statements. BLM itself discounts the validity of the EIS estimates for planning purposes. The EIS estimates have proven conservative compared to actual events in the Gulf of Alaska and BLM's estimates are invariably substantially below our own calculations. In the tables below, we show the estimate prepared by Bureau of Land Management of the number of direct jobs created by OCS Sale #39 in the Northern Gulf of Alaska. On the following pages, we show the estimates prepared by my staff. It is clear that employment impact is directly related to the success of exploration. As this factor is unknown at the moment, Community and Regional Affairs have adopted a multiple scenario approach and analysed five (5) different levels of development. These are as follows:

B.L.M. Estimates - NORTHERN GULF OF ALASKA

Total Direct Employment--All Activities: The total direct employment to result from oil and gas activities resulting from this sale is tabulated below.

TABLE 67

Total Direct Employment--All Activities

Year	Exploration	Development	Construction	LGN Facility Operation	Total
1975					
1976	296				296
1977	888				888
1978	1,184		100		1,284
1979	1,184		100		1,284
1980	888	438	300		1,626

1989				630	852	1482	430	852	1282	1305	1582	2887	2160	2556	4716
1990				575	730	1305	375	730	1105	1210	1326	2536	1985	2044	4029

Case 1 - U.S.G.S. low estimate 0.1 billion barrels of oil found

Case 2a - Moderate success 1.5 billion barrels of oil found. Developed with marine terminal and pipeline

Case 2b - Moderate success 1.5 billion barrels of oil found. Fields developed with S.B.M.s.

Case 3 - U.S.G.S. high estimate 2.8 billion barrels of oil found. 6 trillion ft. of gas. This is the reserve estimated used in the EIS.

Case 4 - Bonanza 5 billion barrels of oil found. 9 trillion ft. of gas

You will note that even case 2a, which involves discovery of oil reserves approximately half of those used in the BLM study, and has no gas development, still produces a higher employment figure than the impact statement. You may or may not be aware that U.S.G.S.'s estimates of offshore resource potential are widely regarded as very conservative by the oil industry. Indeed, one senior company geologist indicated to us that reserves in the Northern Gulf could conceivably turn out to be as high as 10 billion barrels, which is a far cry from U.S.G.S.'s maximum of 2.8 billion. Accordingly, we thought it wise to calculate the employment impact for a bonanza scenario with 5 billion barrels of oil discovered and 9 trillion cubic feet of gas. This produces a maximum employment level of 10,600 - 41/2 times the BLM peak.

Concern was also expressed at the meeting, that the cost of planning factor in Alaska was regarded as similar to that in California. We have obtained salary scales from the State of California and these are compared with Alaska in the section below. Table 1 shows the job descriptions for both states and the minimum qualifications required in each case. As you can see, the three grades studied appear to be identical. In Table 2, the salary scales are compared and a differential worked out.

Table 1

Minimum Qualifications	California	Alaska
Bachelors Degree and four (4) years experience	Senior Staff Intergovernmental Program Analyst	Planning Supervisor
Bachelors Degree and three (3) years experience	Staff Intergovernmental Program Analyst	Senior Planner
Bachelors Degree and two (2) years experience	Associate Intergovernmental Program Analyst	Associate Planner

Job Titles from Office of Planning and Research State of California

Table 2

Grade	California Salary[1]	Alaska Salary[2] [4]	Ratio Alaska[3] / California
1	$1705	$2474	145.1
2	$1555	$2136	137.6
3	$1453	$1842	126.8

Average ratio of California salary to Alaska salary, when California = 100 is 136.5.

Alaska planning salaries are 36.5% higher on average than California.

Notes:

1/ Source: State of California, Governor's Office, Office of Planning Research

2/ Source: State of Alaska, Department of Administration

3/ California = 100

4/ The old table of salary scales for Alaska is attached as evidence. These have been increased by 5% w.e.f. 1.1.77 and so the figures in Table 2 have been calculated accordingly.

(14)

RANGE 28, STEP F DOES NOT APPLY TO EMPLOYEES IN THE GENERAL GOVERNMENT, SUPERVISORY AND CONFIDENTIAL BARGAINING UNITS.

As you can see, salaries in Alaska appear to be 36.5% higher than California. Given California's cost of planning index of 1.17, that for Alaska should be 1.365 X 1.17 = 1.60.

The Salary levels shown above are those paid by the State in Juneau and Anchorage. In other parts of Alaska, especially the North and West, salaries are very much higher. One such area of the state which should be impacted by OCS developments in the near future is the North Slope Borough, where a joint Federal/State lease sale has been tentatively scheduled for 1978. A comparison between salaries paid by the state in Juneau and Barrow has been made and this is shown in Table 3. This is relevant as pay for planners in local government in Alaska is generally based on local state salary scales.

Position	Juneau Salary	Barrow Salary	Barrow / Juneau X
Planning Supervisor	$2474	$3281	139.2
Senior Planner	2136	2973	139.2
Associate Planner	1842	2567	139.4

The average differential between Barrow and Juneau is 139.2 - Barrow salaries are 39.2% above those in Juneau.

The salary scales paid by the State in Barrow are attached.

In FY 1978, it seems reasonable to suppose that the North Slope Borough might engage in 10% of the Coastal Energy planning, in view of the upcoming lease-sale in the Beaufort Sea. Our original cost of planning factor for Alaska, 1.60, would therefore have to be modified in the following manner.

1.60 X 1 + (0.392 X 10%)

= 1.60 X 1.0392

= 1.66

Therefore, for the State of Alaska and impacted local governments together, the cost of planning factor is 1.66.

In addition to higher salaries, there are many other costs of planning which are higher in Alaska. These concern the very large distances which planners have to travel in order to work. The round trip distance between Juneau and Barrow, for example, is 3,000 miles. The air fare is

$360. A great deal of time is also lost in traveling. For example, in order to go to a meeting in Nome, planners would have to leave Juneau at around 9 or 10 A.M. the previous day, thus losing an entire day's work. None of these problems are faced by professionals in other states and it seems quite clear that costs for Alaska should be revised upwards quite radically to allow for this.

At the end of the document, a number of details are given about some of the energy facilities in Alaska, chiefly the trans-Alaska pipeline and the proposed gas pipelines. My main quarrel with these is that the employment figures given are absurdly low. For example, for the trans-Alaska pipeline, they show peak construction employment at 400. I am not quite sure where they get this figure from, but my information is that the work force on the pipeline itself came to 19,000 at the peak. There were another 4,500 workers working on the terminal at Valdez and another 4,500 on the field itself at Prudhoe. Quite how this 28,000 or so was reduced to 400 I am not quite sure!

If you study these comments, I am sure that you will be able to revise your formula in such a way that it produces a level of planning grants more appropriate for the State of Alaska and its local governments. In order to expedite resolution of any disagreements we may have about the planning and credit assistance allotment formulae and data, Mr. Niall Trimble, a petroleum economist on our staff, is prepared to meet with you or appropriate members of your staff when he is in Washington, D.C. during the week of May 2, 1977. He will contact you to arrange an appointment.

Finally, it is not absolutely clear to me what the ground rules and dealines are for comment upon the allotment formulae, as described in the two technical papers, and upon the employment data assumed for the formulae. Can you please clarify the significant deadlines and ground rules for me.

Lastly and mostly, I want to extend thanks to you and your staff, on behalf of local officials as well as the State, for the exceptional efforts and pace you are maintaining in order to get the CEIP operational as early as possible. From Palmer McCarter's account, the Anchorage workshop was worthwhile and appriciated by the local officials attending.

I will plan to drop in to check up on progress when I am in D.C. on April 28-29.

Sincerely,

Kevin W.

249

EXPLANATION OF HB 354 AND SB 249
RELATING TO SUITS AGAINST LOCAL GOVERNMENTS

The Bill revises AS 09.65.070 in its entirety with nominal amendment of subsections (a) and (b), clarification of subsection (c), and primarily adding subsection (d) to amend the present statute which makes municipalities liable for all of their acts without regard to whether the act was discretionary or ministerial or was related to a governmental as opposed to a proprietary function. Definitional subsection (e) is added to clarify its application to municipalities and villages.

Subsection (d) prescribes limited exceptions to municipal liability. The municipality will not be subject to suit for acts falling within the exceptions. Employees and officers, while acting as such, will not be subject to suit for acts which are expected.

The first exception, which is in subparagraph (d)(a)(A)-(C) is similar, in part, to the language in SB 151 which would create an additional exception to the liability of the state pertaining to inspections. This exception is needed by the state's political subdivisions as well as the state itself. It would remove the threat of suit against the municipality

and its officers and employees for their failure to inspect property, their failure to discover violations or hazards and their failure to adequately abate violations and hazards discovered.

This exception is needed to limit the liability of municipalities which

1. adopt various safety and health codes (fire, building, health, sanitation, vehicle, etc.) which they are unable to vigorously enforce 100% of the time, or
2. conduct inspections for the purpose of enforcing safety and health codes, or
3. do not enforce safety and health codes

The alternative to having such statutory reassurance is the withdrawal of municipalities from the safety and health enforcement fields. The State of Alaska has already partially withdrawn from the fire inspection field as a result of the Adams and Jennings cases which imposed liability for failure to discover hazards and failure to abate discovered hazards. More injury will be done to the public by such a withdrawal than by granting the exception and allowing municipalities to proceed on a best efforts basis. The property owner, contractor, or other person responsible for an injury will be and remains liable to the injured person in either situation so the injured person is not without remedy under this exception.

The second exception, which appears in subparagraph (d)(2), confers to municipalities the same exception which the state already has under AS 09.50.250(1). Discretionary acts cover those acts which are essentially policy or planning in nature. They include such things as decisions to initiate or terminate a program, to stop maintenance of a road during the winter, to fund a program at a certain level, to concentrate on the enforcement of certain codes, etc. Municipalities do not now have the statutory protection the state has in this area and could be held liable for the exercise of their discretion in a situation where the state could not under identical circumstances. Municipalities, like the state, must be able to perform discretionary acts without fear of suit. This is not to say, however, that once the municipality has exercised its discretion to, say, build or maintain a road, it may build or maintain it in a negligent manner. It may not. Municipalities will, subject to the limitations of this section, remain liable for their ministerial torts.

The third exception, which appears in subparagraph (d)(3), covers an area in which municipalities are occasionally sued for damages. The threat of suit for damages should not play any part in the decision of a municipal official or body to issue, deny or suspend a permit or privilege of any nature. Also, this section would remove the possibility of liability

which is based on the theory that the issuance of a permit is a warranty that the plans, proposal, etc., upon which the permit was based met all applicable codes, ordinances, laws and constituted a reasonable method or proposal. The person responsible for the plans, etc., upon which the permit, etc is issued will still be liable for his work. This section would not limit the applicant's or permittee's right to go to court to force the issuance, grant, etc., if it is one to which the person is entitled.

The fourth exception, which appears in subparagraph (d)(4), is copied from the exception for the state which appears in AS 09.50.250(3) with the change here that the misrepresentation exception would be for only negligent misrepresentation, not all misrepresentation as in the case for the state. The municipality would be excepted from liability for the causes of action listed in the subparagraph. Officers and employees would be protected when the act complained of was done in the exercise of one of the actor's duties and was an act which was within his authority as an officer or employee. Thus, the zoning administrator could be held liable for falsely arresting someone while a policeman usually could not. The zoning administrator does not have the authority to arrest in the discharge of his duties so such an act would constitute an act outside his employment status, often known

in law as a frolic, and he would be personally liable. On the other hand, the policeman is not hired to administer the zoning code and could not, as a municipal official, make any statement to a citizen regarding the zoning of a particular parcel of land. The policeman would be personally liable for any misrepresentation in the course of making such a statement. The zoning administrator, and through him, the municipality would be liable for a misrepresentation if the misrepresentation was intentional. Again, this subparagraph extends to municipalities and its employees and officers most of what the state already has.

The fifth exception, which appears in subparagraph (d)(5), represents an application of the Good Samaritan principle to insulate the municipality from liability where it gratuitously responds to a need outside its limits. For example, a municipality could not be held liable for its acts in fighting a fire outside its limits. A municipality having no contractual duty to respond beyond its jurisdictional limits fears the consequences of liability and adverse insurance costs and is induced to abstain. It simply is not worth the added liability exposure. Yet, as with the inspection problem discussed above, even an occasional negligent response is more than likely far more beneficial than an across the board policy of non-response.

The sixth exception, which appears in subparagraph (d)(6), is needed for reasons which are basically the same as those relating to extra-territorial service exception

discussed immediately above. Commonly occuring examples are local police called to respond in the temporary absence of the Trooper, and mutual aid agreements respecting assistance at state airports.

In conclusion, municipal non-immunity will remain the rule. Judicially-recognized municipal liability respecting certain functions coupled with increasing difficulty in obtaining insurance to cover the risk compel local governments to re-examine and diminish the scope of their activities rather than suffer liability exposure and inability to respond in damages. This legislation is intended to afford limited liability with a view toward non-curtailment of certain traditional functions predicated on public policy favoring the municipalities to proceed on a best efforts basis.

City May Have To Shoulder Fire Liability

By SUSAN GILMORE
Empire Staff Reporter

Juneau could find itself on the expensive end of a liability lawsuit as a result of recent action taken by the state firemarshal's office disavowing responsibility for conducting fire inspections.

Last month the state notified Juneau and several other Alaskan cities that "responsibilities for fire prevention and inspection and enforcement of state fire safety regulations... is deferred to your local jurisdiction."

The order reportedly was precipitated by a recent Alaska Supreme Court action holding the state partially liable for a hotel fire in Anchorage.

In this case, according to city attorney Lee Sharp, state fire officials inspected the Gold Rush Hotel and discovered fire hazards. He said the state failed to take immediate action to abate the hazard, even though the hotel owner was notified of the danger. The Supreme Court held the failure of the state to remedy the hazard may have contributed to injuries suffered by the guests.

The state has now backed off of any local fire inspections, unless the inspection involves a state-owned building or the inspection is needed for licensing, as a day care center.

"The reaction in most municipalities seems to be 'thanks, but no thanks,'" Sharp said. He said under the supreme court decision, Juneau could be held liable for injuries suffered in a fire if local inspectors failed to abate a hazard, failed to locate a hazard, or even fail to inspect a building.

To counter the state's action deferring jurisdiction, Sharp has drafted an ordinance which will be considered by the Assembly in April.

This ordinance disavows any intent by the city and borough of Juneau to conduct inspections "for the purpose of enforcing codes, regulations or laws of the State of Alaska."

While this ordinance may be a bandaid on a potential liability suit, several statewide municipal officials have convinced lawmakers to introduce legislation giving municipalities immunity from such lawsuits.

Already adopted by the Senate, the bill would give cities protection where they inspected property and either didn't discover a hazard, failed to take action against a hazard or failed to inspect the property at all.

According to Sharp, the legislation would allow municipalities the same umbrella of law the state has enjoyed for years—the umbrella that the state can't be held liable for not conducting an inspection, only for failing to find or abate a hazard once an inspection is made.

"This bill picks up the language giving the state immunity in discretionary acts," Sharp said: "We are asking the veil of state law be extended to municipalities."

According to state fire officials, the laissez-faire edict was prompted by the Anchorage fire and by a work overload involving new construction and increased arson investigation.

"This doesn't mean if there is local political pressure we wouldn't assist," said one official. "Once a hazard is called to our attention we can't sit on it –we have to act."

"This still doesn't let us off the hook if a hazard hasn't been corrected," he added. "We still get calls, but refer them to the city."

Buildings inspected include public buildings, stores, apartment buildings, hotels, schools, hospitals and other facilities required by state law to pass safety tests. Some are inspected annually, others monthly.

According to assistant Juneau fire chief Sev Swanson, inspections include heating equipment, wiring, exits, general housekeeping and storage.

He said inspections are still being conducted on a local level, but the city is now limited on how many inspections can be made and how often follow-up probes are conducted.

A direct affect the fire inspection decision could have on property owners is a boost in fire insurance rates.

The Fire Rating Bureau, which sets the standards for insurance rates, has rated Juneau a weak five on a scale of one to 10. A 10 is an unprotected district. The scale is derived by beginning at a base figure and crediting fire districts for certain aspects of fire protection—as fire hydrants, number of firemen, and inspections.

Sharp said if fire inspections are ceased, Juneau's rating will probably rise to a six and fire insurance premiums could increase 10 per cent.

Sharp also said that the threat the city could be named in a liability suit evolving from a fire inspection could also hike city-borough insurance rates. "Even if we win (a suit)," he said, "the defense is expensive."

Senator Joseph L. Orsini
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Subject: HB 354 and SB 249

Dear Senator Orsini:

The subject bills provide tort liability protection for municipalities. We urge you to support these bills.

Because of two recent court decisions, i.e. the Gold Rush fire and Nordale Hotel fire, municipalities are now confronted with liability they never had before. As a result, the municipalities are confronted with two major problems. One, the cities are finding they can no longer obtain insurance; or, if they are fortunate enough to get insurance, the premium costs are prohibitive.

With the constant increase in the cost of providing even minimal services, the addition of this type of liability and its attendant costs is rapidly forcing many communities to the brink of bankruptcy.

When government becomes so expensive that no one can afford it, our whole system will break down. It is vital that municipalities be held responsible for only those acts which are willful, negligent or malicious.

Very truly yours,

Herbert W. Lehfeldt
City Manager

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

A CASE FOR LIMITED MUNICIPAL TORT IMMUNITY IN ALASKA

Municipal tort immunity refers to the legal doctrine by which a state legislature, as a matter of public policy, has defined specific types of municipal activities for which municipalities may not be held liable for damages. At the outset, it is important to state that no one would argue for total immunity from suit for local governments in Alaska. If a municipal vehicle injures a pedestrian or if a city fails to correct a dangerous condition on publicly owned property the local government should be held liable to pay damages to injured parties. However, for many other activities undertaken by municipalities, it is less clear whether government should be under the threat of multi-million dollar damage judgments which could devastate the operation of both large and small municipalities in Alaska.

The case for limited municipal tort immunity in Alaska is perhaps best illustrated by the so-called "Good Samaritan" doctrine. As an example of this principle, consider a physician who, returning home from his office, comes upon a man lying severely injured at the side of the road. At early common law, the physician had no legal duty to stop and attempt to aid the injured man. Moreover, if the doctor did attempt to aid the victim and, because he did not have the necessary medicines, equipment, etc., accidentally caused some additional injury, the physician could find himself the defendant in a lawsuit brought by the very person he had attempted to aid.

To avoid the undesirable consequences described above, states began to offer statutory protection from lawsuits to physicians and other health care providers who voluntarily rendered aid to persons in need of medical attention. In Alaska, the Legislature has adopted AS 09.65.090 which provides that persons attempting to administer aid in certain emergency circumstances need not fear the threat of a lawsuit if, in the course of their efforts, an accident

(76)

occurs. The public policy supporting limited tort immunity for persons rendering emergency aid is the belief that it is important to encourage such voluntary actions as essentially a public service. This is to say that we, the people, want the assurance that physicians and other persons will voluntarily attempt to render aid to those in need and that we are willing to provide a limited measure of tort immunity to encourage such actions.

Municipal governments, in undertaking many of their activities, are often acting essentially as "good samaritans". No rule of law states that a community must provide, for example, a fire inspection program designed to reduce threats to the health and safety of its citizens. Municipalities do not conduct such programs for pecuniary gain or other financial benefit. Rather, the people have in many cases decided to voluntarily provide this service to individual property owners for the common good.

No one contends that municipal officers or employees are perfectly efficient or that mistakes and accidents in the operation of, for example, fire inspection programs will not occur. If the operation of local fire inspection programs is threatened by the possibility of huge damage judgments, the people, and in turn their elected legislators, are faced with circumstances similar to the "good samaritan" situation discussed above. The uncomfortable choice for many local governments in Alaska is between maintaining, for example, the best possible fire inspection program at the risk of devastating lawsuits should a mistake be made, and simply eliminating any inspection program at the risk of allowing serious health and safety hazards to exist in the community. Faced with this untenable situation, Alaskan municipalities are asking the Tenth Legislature to provide a limited measure of tort immunity to cover situations in which local governments voluntarily undertake programs designed to protect the health and safety of their citizens.

The danger that Alaska's local governments will be forced to discontinue or severely limit programs such as building code inspections, enforcement of housing codes, fire inspections, planning and zoning functions, and various public health programs is imminent. In all of the activities listed above, municipalities are, in essence, acting as volunteers or "good samaritans" by extending services to their citizens for the protection of the public health, safety and general welfare. In the case of fire inspection activities, recent decisions by the Alaska Supreme Court indicate that if a municipality undertakes an inspection program it may be held liable for (posssibly) millions of dollars in damages in the event that a mistake is made. See,

for example, Adams v. State, 555 P.2d 235 (Alas. 1976), and City of Fairbanks v. Nordale Hotel, Inc., 555 P.2d 248 (Alas. 1976).

In response to these cases, some local governments in Alaska have already considered the possibility of discontinuing fire inspection activities. In addition, it appears that the reasoning advanced by the Supreme Court in the Adams and Nordale cases could be expanded to cover building, housing, and public health inspection programs and, perhaps, damages allegedly caused by the issuance of various permits which are later discovered to contain error. For example, the Supreme Court of Wasnington has upheld a $2.8 million dollar judgment against the City of Seattle based on the allegedly negligent issuance of a building permit. See, Haslund v. City of Seattle, 547 P.2d 1221.

In conclusion, it is important to stress that the goal of local governments is not to leave injured parties without a remedy in the event of an accident. As noted above, the proposed legislation does not relieve municipalities from liability based on actions that are proprietary in nature such as the operation of municipal vehicles or the maintenance and operation of municipal property. In most other situations, a municipality will be only one of several possible defendants. For example, if a building in a municipality is destroyed by fire, the injured party may have an action against (1) the person or persons directly responsible for the blaze, (2) the person's employer (and his insurance company), and (3) possibly against the manufacturer of any materials and equipment which are discovered to have been negligently constructed or improperly installed. However, given the absence of any municipal immunity, any plaintiff's attorney will also join the municipality as a defendant if it can be alleged that there has been any failure to properly inspect or certify the building or equipment as part of a municipal fire inspection program.

By extending a limited degree of tort immunity to municipalities to cover activities such as fire inspection programs, the injured party in a situation such as the one described above is not left without a remedy. Rather, the burden of liability is merely shifted from municipalities to others who, in most cases, are more directly responsible for the accident. Viewed in another light, the choice for the individual property owner is to (1) look to his private insurance carrier or to other responsible parties, not including a municipality, in the event of, for example, a fire and be assured that he will have the benefit of a local fire inspection program or (2) risk the loss of local fire prevention/inspection services due to the threat of tort

liability. Faced with such a choice, municipalities in Alaska have turned to their state legislators to ask for limited tort immunity to ensure the continuation of essential local services, such as fire, building and health programs, at a cost which is within the reach of local government taxpayers.

CITY OF KENAI

RESOLUTION NO. 77-35

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA, PETITIONING THE KENAI PENINSULA LEGISLATIVE DELEGATION TO SPONSOR AND ENACT LEGISLATION TO LIMIT TORT LIABILITY OF THE MUNICIPALITIES.

WHEREAS, recent State Supreme Court decisions have held municipalities liable for failure to fully exercise and implement inspection procedures, and

WHEREAS, there is no acknowledgement of a good faith effort, and

WHEREAS, the now presumed legal liability threatens the very existence of a municipality.

NOW, THEREFORE BE IT RESOLVED by the Council of the City of Kenai, Alaska, that the Honorable Clem Tillion, Leo Rhode, Hugh Malone are hereby petitioned to seek legislative action to limit the tort liability of those municipalities engaged in inspection activities.

PASSED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, this 16th day of March, 1977.

Sue C. Peter, City Clerk

Re: SB 249 From: Sen. Ray and Sen. Ziegler

The Premiums On City Life

Liberalized negligence laws and generous juries have made municipal liability insurance hard and expensive to get. Who pays? The taxpayers, of course.

By LAWRENCE MINARD

On a clear, dry night in 1974, 20-year-old Thomas J. Garchar cruised down a straightaway on Broward County's (Fla.) University Drive and smashed his car headlong into a 560-pound decorative limestone boulder lying on the road's median. Paralyzed from the neck down as a result of his accident, Garchar sued the retirement town of Tamarac (population: 31,000), essentially on the grounds that Tamarac's city fathers knew that the boulder was there, but had not removed it.

In court Garchar admitted to having been up 18 hours straight and to having downed three drinks just prior to the accident. Yet last November, a local jury found Tamarac guilty of negligence and awarded Garchar and his wife $4.7 million in damages. (Broward County, responsible for maintaining the road, and a real estate developer, responsible for placing the boulder on the median, settled out of court for another $1.15 million.) The town is appealing the case, and $1 million of the judgment is covered by liability insurance, but meanwhile, Tamarac faces the prospect of raising taxes to pay the award.

Cases like this are making a nightmarish quagmire of what once was thought to be an insurance underwriter's gold mine: municipal liability. When it comes to buying liability insurance, only doctors have been harder hit than state, county and city governments. Some can no longer buy liability coverage at any price. For those that can, premiums have soared.

Take California, where the problem is (naturally) especially severe. In Sacramento, full liability coverage premiums increased 193% in three years. General liability premiums for 20 cities in Southern California's Orange County climbed an average of 117% between 1974 and 1976. Santa Ana paid $309,000 last year for "first-dollar" coverage, under which all claims—regardless of the amount—are insured. This year, Santa Ana's underwriter refused to renew the policy. Had it been available, said the city's broker, the premium would have been nearly $1 million.

In Florida, according to a recent study, cities with populations of between 20,000 and 50,000 have been socked with average premium increases of 126%. Pompano Beach paid $61,024 for its general liability coverage in 1974. In 1976 the town paid $242,642!—despite the fact that claims in Pompano Beach have declined by one half since 1974. In Boulder, Colo. property and liability premiums were $1 per resident in 1975. By 1976 the rate had climbed to $2.60, with one policy's premiums soaring from $8,500 to $61,000.

Politicians like to blame—who else?—the insurance companies. But the fact is, many companies have dropped a bundle underwriting government liability. Vice President J. Creighton White of American Express Co.'s Fireman's Fund estimates that from 1971 to 1975 his company paid out some $120 for every $100 of municipal liability premiums written. To arrest losses on its municipal liability coverage in California, the Gulf Insurance Group's Insurance Co. of the Pacific figured it had to increase premiums by around 200%. Instead it pulled out of the market in 1975.

Underwriters don't separate their municipal risks from their general liability experience, so no one really knows the aggregate losses. ("Insufficient statistics is one of the reasons we're in this crisis," concedes one executive.) The only feel for a trend insurance men get is from their "miscellaneous liability" experience. Some trend! In 1966 the industry earned $38 million on premiums of $1.2 billion. In 1975 it lost $631 million on premiums of $3.8 billion. Actuaries say last year was probably somewhat better, but not much.

Companies don't really know how much they have dropped on the public-entity business for another reason—the delay in settling claims. "I'm still bleeding to death on all that municipal business we wrote during the

1960s and early 1970s," wails Dunning Lenihan, head of Chubb Corp.'s Pacific Indemnity's San Francisco operations. Lenihan cites the example of a 1973 claim for which his company reserved $10,000. Today, with the claim still inching toward trial, the reserve has been upped to $50,000.

For decades municipal liability was easy—and cheap—to get. For one thing, public entities were protected by sovereign immunity laws, based on the medieval theory that kings can do no wrong. Probably most important, society's litigation mania was but a gleam in trial lawyers' eyes. So eagerly did Pacific Indemnity go after public-entity insurance that by 1974 it had some 70% of the California market. The Insurance Co. of the Pacific had most of the rest.

But sovereign immunity laws were struck down with increasing frequency throughout the 1960s. Even the few immunities that have survived have been narrowed drastically in the courts by such plaintiff superstars as Melvin Belli.

widow is suing, for negligence, the manufacturer of the model, the utility that owns the power lines, the town on whose property the lines are, and the county that issued a construction permit for the lines.

- A gang of motorcyclists tanked up on beer back in 1974 and roared off up a highway in Sonoma, Calif. One fellow drove his bike off the road. He is suing Sonoma for a poorly designed highway.

Under increasingly generous interpretations of "comparative negligence," both the widow and the motorcyclist have good chances of collecting. Comparative negligence says plaintiffs can collect if they are able to persuade juries that the defendants had at least *something* to do with an accident. Thus, in Garchar's suit against Tamarac, the jury found that Garchar's drinking and fatigue prior to his accident contributed 30% to his smashing into the boulder. So Garchar's initial award of $6.75 million was cut by 30%.

"The problem isn't just municipal liability," says Chubb & Son Senior Vice President Robert C. Reiss. "It's really the whole third-party liability field, including medical malpractice and product liability." Each of those lines is being hit by a developing ethos that says, in effect, that society at large is responsible for the unfortunate few.

In some ways municipal liability is even harder to write than product or malpractice coverage. For one thing, politicians like to spend their tax revenues on highly visible items—police and firemen, for example. So they scrimp on expenses like insurance. In practice, this has meant letting a municipality's liability coverage to competitive bidding by the companies, usually every one, two or three years. "This continual bidding situation means we cannot establish long-term relationships," complains Jeremiah Mulhall, vice president of Home Insurance Co. "You can't recoup your losses over one or three years."

Moreover, the actuarial mind boggles at the sheer number of things that can go wrong. One company executive tells of a tree limb falling onto a convertible passing underneath. The driver was paralyzed, and is suing the local town for faulty road maintenance. "Maybe God can predict limbs falling off trees, and rocks rolling down hills, but my company can't," says the underwriter. "So maybe He can underwrite the public-entity liability insurance."

The question now is: What can the governments do? Some are going the way companies went years ago—hiring risk and safety managers, people with responsibility for determining, say, whether a state park can afford to run the liability risk of allowing hang-gliding from cliffs.

Others are going to self-insurance. Reno, Nev., for example, paid $248,000 in premiums in 1975 for first-dollar liability insurance. Its underwriter, International Telephone & Telegraph's Hartford Fire, wanted $900,000 to renew the policy. Instead, Reno now self-insures for individual claims up to $100,000; it carries excess coverage for claims of $101,000 to $5 million. Cost: $158,000 in premiums for the excess coverage, plus a $200,000 reserve fund established from tax revenues.

Across the country, self-insurance is catching on. Los Angeles County self-insures. So do Miami, Minneapolis and St. Louis. But the trend worries some observers. "New York can't pay its policemen or its interest," says one underwriter. "Do you really think they'll spend money to establish reserves?" If governments do *not* have reserves adequate to meet settlement costs, then taxpayers could pay even more than if their managers purchased insurance.

Where *will* it end? Long range, the best hope seems to be a thorough overhaul of the nation's staggeringly costly tort system. Insurance men enviously eye the Canadian system, which they say requires trial lawyers to pay a tax on the difference between what they ask a jury to award, and what the jury actually awards.

"Tort law today has become theater," says a trial lawyer who recently won a multimillion-dollar award from a city. "Applause is measured by the amount of money the juries award. The solution is to reform the tort system by putting limits on general types of damages allowed."

Perhaps tort *reform will* come, as taxpayers—like consumers—find taxes and prices escalating to pay for drunk motorcyclists and inept model airplane flyers. In the meantime, municipalities will be stuck with greater and greater premiums, if not higher taxes to pay off insured damages.

It's a funny thing. No one likes such anachronisms as "Kings can do no wrong." On the other hand, no one likes to pay the cost of putting kings on an equal footing with the masses. ■

"... 'Maybe God can predict limbs falling off trees, and rocks rolling down hills, but my company can't,' says the underwriter. 'So maybe He can underwrite the public-entity liability insurance' ..."

On top of it all, "Sue the bastard!" has become something of a national mind-set, hitting governments as well as companies and individuals.* According to a recent survey of California cities, general liability claims nearly doubled between 1973 and 1975, to an average of 132 claims per city. Settlement costs nearly tripled over the same period, to an average $87,121 per city.

"You wouldn't *believe* what people now sue us for," says an exasperated official in a small town city manager's office. "If they trip on the curb, they sue. If they hit a pothole, they sue. It has become outlandish!"

If some claims are reasonable, others are, well ... preposterous. Items:

- In 1975, a grown man flew his string controlled model airplane into some overhead high-tension power lines and electrocuted himself. His

*A Forbes *reporter recently rode a Manhattan subway. When the car lurched, the reporter, thrown off balance, put his hand through a window. Three elderly citizens rushed over. With handkerchiefs? Condolences? Hardly. They congratulated him on the great settlement he was sure to get from the city. The reporter's hand, as it happened, was bruised but not cut. He did not sue.*

SB 249

Ted here

Does not apply to fact properties in nature e.g. driving a truck
" " " " public property

Does affect fact of num which are regulatory in nature (not reviewing)
Bldg, fire safety are not regd, but are done for public benefit

Dave Rose

Attorneys prob not happy w/249

See d(4) is different from other portions of bill, in that it addresses a course of action rather than inaction.
May want to qualify (4) in some way - dollar limit?
Individual community not affected by bill
Most suits do not go thru for settlement

L.B. Jacobson - Representing several small cities in SE
Ak. Sup Ct. has abrogated sovereign immunity for muni
↳ Nadale vs Gold Rush Hotel was final straw
↳ premise was that high settlements would not force state out of fire insp business - it did!
Insurance rates are being raised. - a number of reasons
Petersburg
Bell vs Peters. Sup Ct - wrongful arrest won, but cost $5K
Rose vs Peters Sup Ct - doctor submitted qual. credentials - requested further documen - sued for defam of char - settled for $4.5K + 2K cost
Mayasha vs Peters - bldg insp case (bldg fell over onto another)
- not ~~adm~~ resolved yet
e.g. will not go in w/state for emer. fire response outside of city limits - nothing but gotten headaches.
Rake - advised not to adopt bldg/fire codes because of liab

(2)

Craig - no coop in fire safety be cause of ~~no coop~~ liability

Skagway - zoning problems

Yakutat - repealed fire prevention code due to Jennings case - also have no police

Summary - Many could comply w/ stds set by Sup Ct, but only - at great expense

Jim Arlin, Ft Yukon

11/74 - 1/76 out of Ct settled 5 cases of ~~police~~ false arrest, etc

How much respon. should govt take for allowing pvt business activities to take place?

Ren-Ker - None - Many dogs Pres

Climate too good for suit - superabundance of capable attys - oppose elim of (4)

Jim Elson - Kenai

Insurance cos. looking @ Alaskans + AK many Fur mism. rate lowered by, insp - if this makes many liable, then rates raised again - dropping insp would go from Class 7 to Class 9, cost ± $\frac{1}{2}$ MM

Sharp - Juneau

Juneau downtown vs Ct 5, drop insp would go to Cl 6 - cause a 10% premium increase - cost = ? $60 K

Insurers are pulling out of mkt - largely due to Sup Ct decisions in these cases.

Where there is authority + should have known of problem then are liable - expenses to defend

AK has limited liab for discretionary powers

Potential for Supt Ct to deny repeal of ordinances, or cessation of other discretionary govt fnct

In Sec(4) - may want to limit by type (degree) of physical activity.

Out-of-court settlements can hurt employee morale

TO: ANCHORAGE MUNICIPAL ASSEMBLY
FROM: RICHARD E. HANGER, PRESIDENT
AUTOMATED COMMUNICATIONS, INC.

SUBJ: UTILITY REGULATION

As I indicated at your meeting of March 8, 1977, our expertise is only in the area of ATU.

The purpose of this letter is to objectively give each of you what we consider facts in favor and against both methods of regulating the Utilities.

Assembly Regulation of the Utilities

Pro

1. More citizens attend and participate in Assembly meetings than attend PUC hearings. ACI has been the only participants and formal parties at the ATU hearings throughout the past 15 months, at the PUC.

2. Assemblymen are elected officials and are directly accountable to the people.

3. The Assembly may have fewer legal restrictions affecting their judgement and decisions.

Con

1. Tariffs are complex and difficult to understand. In order for the Assembly to effectively "judge", it will necessitate many hours of "homework".

2. Being elected could make it difficult to make good business decisions if decisions would be unpopular politically.

3. The Assembly would have to add additional staff with expertise in tariffs, legal, and accounting. No citizen's committee could spend the time necessary to handle this job.

4. The Municipality would be subject to far more legal suits, -- class action, individual, and special interest groups.

5. Must contend with the morality of the "Board of Directors" regulating their own company, which is a legal monopoly.

6. ATU is tied to a state-wide network, as well as to the "south 48". This automatically involves regulations of the FCC and PUC for inter and intra state activities. The Assembly would have to inter-relate with those agencies.

PUC Regulation of the Facility

Pro

1. Appointed officials are normally less likely to be influenced politically or by special interest groups.

2. Specializes in utility tariffs.

3. Required by law to:

   a. Protect the financial viability of the Utility.
   b. Assure them a fair rate of return.
   c. And determine that tariffs are fair, just, non-discriminatory, non-preferential, and compensatory.

4. Already have a staff, on the Public payroll, who specialize in Utility matters.

5. Have access and experience with the other Utilities throughout Alaska, National Trade Associations (NARUC) etc., to compare requests and filings.

Con

1. Are required by law to adhere to "Due Process" which necessitates formal hearings and notice to the Public.

Miscellaneous "Grey Areas"

1. ATU spent over $400,000 on rate cases in the past 15 months. Some of that was attributable to deficient filings and questionable appeals, and some was attributable to the PUC being excessively lenient with ATU. If filings were better prepared and the regulating body were firmer, there would definitely be savings. Question -- Would the Assembly be more decisive than the PUC, thereby shortening the process?

2. With Assembly control -- They and the Mayor would have direct control over the cash, profits, charges, and where the money was used. Is this good or bad?

3. Would the taxpayers be paying for a second level of government staff, or would the PUC reduce their staff in proportion to that added to the Assembly?

3. Would the taxpayers be paying for a second level of government staff, or would the PUC reduce their staff in proportion to that added to the Assembly?

4. The major motivations for the pending Resolution and changes to AS 77-59 Utilities seem to be:

   a. the excessive costs of recent rate cases.
   b. the over-ruling by the PUC of the Municipal Ordinance which would have returned 100% of the profits to the original City Service Area.
   c. the dismissal of a rate structure that would have increased cash flow and income in initial years, but left expenses and costs to be absorbed by future rate payers.
   d. the refund of 1.2 million that is pending per PUC and Court Order, and which is being contested by ATU.

   Are these valid motivations, and would they have arisen if ATU had been regulated by the Assembly rather than the PUC is a question which should be addressed.

5. Chairman Rose and Assemblyperson Sturgulewski have suggested amendments which would allow the Assembly to monitor and prejudge filings before they go to the PUC. This would seem to be a "safe" way to arrive at some of the answers to the above questions.

ACI, as the only formal participant from the private sector in the past 15 months of hearings, feels qualified and willing to answer any questions of either side.

ACI, being in the telephone business and regulated by the free enterprise system and competition, rather than a regulatory body, feels we should abstain from taking sides. On behalf of our 200 business subscribers, we would need to poll them prior to speaking for them.

Sincerely,

Mr. Dave Rose, Chairman
Anchorage Municipal Assembly
4326 East 5th Avenue
Anchorage, Alaska 99504

Dear Mr. Rose:

At the regular meeting of the Water Utility Advisory Commission on Monday, March 14, the Water Utility Advisory Commission went on record opposing any move to remove the Water Utility and other non-competitive utilities from the jurisdiction of the Alaska Public Utilities Commission until such time as a firm plan for properly handling the utilities' financial and regulatory matters has been formulated and approved.

Sincerely,

N. F. Kaelber

Norman Kaelber

ANCHORAGE, ALASKA
AR NO. 77-7

A RESOLUTION RELATING TO EXEMPTION OF ANCHORAGE MUNICIPAL UTILITIES FROM STATE REGULATION.

WHEREAS, electric, telephone, water and sewer utilities owned by the Municipality of Anchorage are now subject to regulation of all phases of their activities by the Alaska Public Utilities Commission; and

WHERAS, no other municipally-owned utilities in the State of Alaska are subject to such regulation; and

WHEREAS, only the electric utility is engaged in competition with a private utility, and this competition will be eliminated by final certification of service areas; and

WHEREAS, policy reasons which may have existed for regulation of utilities owned by the City of Anchorage have disappeared with unification of the former City and Borough; and

WHEREAS, compliance with expensive, complex, and often inconsistent and unnecessary requirements of the Alaska Public Utilities Commission imposes a substantial and unwarranted burden on the Anchorage municipal ratepayer; and

WHEREAS, the Anchorage Assembly, as elected representative of all citizens in the Municipality of Anchorage, including all municipal utility ratepayers, is fully competent to provide for regulation of its utilities in the same manner as other municipalities;

NOW, THEREFORE, be it resolved that the Assembly of Anchorage

B. Resolution No. AR 77-7, a resolution relating to Exemption of Anchorage Municipal Utilities from State Regulation.

UTILITIES
AR 77-7
Exemption of
Anch. Mun.
Utilities from
State Regulati

Mr. Besser moved, seconded by Mr. Brannon	to adopt AR 77-7.

Mayor Sullivan stated that they have hashed it over and there are feelings pro and con. He said there was an article in the Alaska Industry magazine mentioning how few people turnout at public hearings. We continually talk about home rule, he said, and he thinks this is one of the things that relates to home rule. Most home rule cities are not regulated in other states, he noted, and the finance people indicate this, and he thinks this may cause higher rates for Anchorage. He said that he would like to sit down with the Assembly and to work this out, if this is passed. He said there might be an effective date of July 1st or September 1st.

Chairman Rose handed the gavel to Vice-Chairman Brannon.

Mr. Rose said that he has a letter from Pete Argetsinger, Assistant Municipal Attorney, which goes into depth as to a scheme and pattern for this. He talks of Title 29 and what he himself is proposing is an ordinance that spells out how they will still self-regulate. Mr. Rose asked for a more orderly approach then what the Mayor has recommended. He would like to do two things, he said; one, do not vote it down; two, table it with specific recommendations that the Administration bring back an ordinance and bring it back on the table after the ordinance is introduced.

Mayor Sullivan asked if they would be willing to consider it as an emergency ordinance, and Mr. Rose replied he had no problem with that.

Mrs. Sturgulewski said that she felt nationally there have been developed some suspicion of monopolies and that is why these regulatory commissions are necessary. To request deregulation at this time, she said, is like letting the fox loose with the chickens, while Farmer John is on vacation. She mentioned the Charter Commission and its difficulty in getting information on finance from the utilities, and she felt they had better take a good look at this. She felt that there was a great deal of expertise involved and until they get the whole financial picture straightened out, they should move very slowly.

Mrs. Selkregg said that she supported Arliss' statement and that she would like to vote against it and study the issue for a longer period. She felt there should be a better informed public before making such a decision.

Mr. Walsh moved, but it died for lack of a second,	to postpone action for a period of one month.
Mr. Rose moved, seconded by Mr. Besser	to postpone AR 77-7, pending action by the Administration to draw an ordinance for introduction and hearing, which would basically impose those checks and balances contained in Title 29, applying to a home rule charter, with specific times and dates for hearings.

Mr. Rose said that then on the night of adoption, this resolution could come back before the Assembly.

Mr. Chiei said he would like to abstain from voting because they are under conflict because of the PUC.

NAYS: Walsh, Selkregg, Knowles, Sturgulewski.
ABSTAIN: Chiei.

Mr. Rose moved, seconded by Mr. Besser — to table AR 77-7.

Mrs. Selkregg requested PIO to prepare information for the public as to what the PUC does as an educational process.

Mr. Rose asked if the Administration would assent, they would like to try to rough out an ordinance and flesh it out and make it available to the Assembly.

Vice-Chairman Brannon called for the vote to table, and it passed:

AYES: Walsh, Marsh, Selkregg, Besser, Rose, Baer.
NAYS: Brannon, Knowles, Sturgulewski.
ABSTAIN: Chiei.

C. Ordinance No. AO 77-59, an ordinance Adopting Title 26 of the Anchorage Code to be Entitled "Utilities".
   1. Assembly Memorandum No. AM 142-77, regarding same.
   2. Assembly Memorandum No. AM 142-77A, regarding same.

Chairman Rose again had the gavel and said that he would like to put this aside temporarily and take it up at the later meeting, if there was no objection; there was no objection.

D. Ordinance No. AO 77-23, an ordinance Adopting a Title 24 of the Anchorage Municipal Code to be entitled "Streets and Rights-of-Way".
   1. Assembly Memorandum No. AM 59-77, regarding same.
   2. Resolution No. AR 77-24, a resolution establishing a Schedule of Permit Fees as provided in Section 24.30.090 D of the Municipal Code of Ordinances.
      a. Assembly Memorandum No. AM 59-77B, regarding same.

Mrs. Sturgulewski moved, seconded by Mr. Brannon — to approve AO 77-23.

Mrs. Sturgulewski suggested that the amendments included in AR 77-24 be approved, and Mr. Swing pointed out that AM 9-77B included all the amendments.

Mrs. Sturgulewski moved, seconded by Mr. Walsh — to amend by approving AM 59-77B, which contained all the amendments.

AYES: Chiei, Walsh, Marsh, Selkregg, Besser, Rose, Brannon, Knowles, Sturgulewski, Baer.
NAYS: None.

Chairman Rose then asked for the vote on AO 77-23 as amended, and it passed:

AYES: Chiei, Walsh, Marsh, Selkregg, Besser, Rose, Brannon, Knowles, Sturgulewski, Baer.
NAYS: None.

Mr. Walsh moved, seconded by Mr. Besser — to approve AR 77-24.

Chairman Rose asked if there were any problems with this, and Mr. Swing said that Mr. Bollinger would be able to respond.

Mr. Bollinger said that there will be no fee unless what is proposed endangers the right-of-way, then a fee of $2.50 would be charged.

There was further discussion of planting of trees, retaining walls and rock gardens in this area, and Mr. Bollinger said that if someone was going to put a large boulder on top of a gas line, then there might be a problem, but other than that, he did not foresee any.

seconded by Mr. Smith, and it was passed without objection,

floor until after the public hearing on the next item.

11. Resolution No. AR 77-7, a resolution relating to exemption of Anchorage Municipal Utilities from State Regulation.

UTILITIES AR 77-7

The public hearing on Resolution No. AR 77-7 was opened.

RUTH MOEN stated that she would like the Assembly to not take action on removing non-competitive utilities from under APUC regulation. She does not believe, she said, that the cost to her from the utility would go down were they not regulated by APUC and she views APUC as a sort of guard against the fact that rates could be raised indiscriminately. She lives in an outlying area, she said, and receives no benefit from the profits of the utilities, only pays into them.

RICHARD HANGER stated that he is in business putting in private PBX systems in Anchorage. A legal monopoly is the best reason for regulation, he said. Any changes of tariffs or other provisions, he said, must meet basic rules to stand a test in court, no matter who regulates them. Mr. Hanger noted that the APUC has a budget of $1.3 million and a staff of 31 people. A staff will be required by whoever does the regulating, he said, and he estimated a bare minimum of 3 if the Assembly regulates municipal utilities. He distributed to the Assembly an article on the APUC and a handout relative to typical charges from ATU to an Anchorage business firm.

LLOYD MORRIS of Communications Engineering stated that his firm holds a certificate of convenience and necessity from the APUC to provide radio-telephone service in Anchorage. He has a problem, he said, understanding how ATU is non-competitive, since it does have a certificate to provide the same service as his company, although, it does not at this time to do so. If ATU did provide this service for which it is certified, he said, it would definitely be competing with Communications Engineering, which would place ATU in the identical position of the electric utility competing with CAU. For this reason, Mr. Morris stated, he feels that ATU should be withdrawn from the resolution before the Assembly.

BOB JOHNSON stated that for the past three years he has been on the Water Commission, working with the Anchorage Water Utility. He recommended approval of the resolution before the Assembly. When AWU was placed under the APUC regulation, he recalled, it was placed there because their service extended beyond their jurisdiction and there were excesses practiced on the people outside of their jurisdiction but which received the services. This condition, he said, no longer exists. APUC regulation impacts their growth, he continued; it takes 9 to 18 months to get a case through the Commission because the Commission must weigh that case against all others in the state. But meanwhile, he said the utility cannot sell bonds because there is no revenue coming in to justify bonds. The Water Commission was satisfied, he said, with the work of the APUC. Mr. Johnson recommended that the Administration hire the expertise necessary and take it under Municipal control so that the utilities can move at the speed they need to move. He continued with recommendation that the Municipality establish these utilities as public corporations under one head and that the utilities pay taxes or contributions in lieu of taxes and operate in a business like manner and the Assembly would approve or disapprove any rates. He would envision the Assembly sitting as an appellate body, he continued, rather than a hearing body on rate cases.

PAT REDMOND, speaking as a consumer, stated at first glance she does not want her public utilities taken out from under APUC regulation. Some of the things she considered were the cost of Municipal regulation, the time and the politics. Most utilities are regulated, she said, and she would like for Anchorage's to be regulated, and by APUC.

owned by the former City, she said, go to the former City; and those who live outside need the protection of APUC. If a utility is not competing with others, she continued, that means it is a monopoly and that means it should be regulated. The Assembly should consider, she pointed out, that the APUC has a great deal of expertise; and should be a body that the Municipality works with, rather than against. Were this the case, she said, she doubted that the bills for rate cases would have been as high as they have been. Mrs. Frohne noted that Fairbanks is looking at asking to be regulated by APUC; and in closing she stated that deregulation from APUC and Municipal regulation indeed require a vote of the people under the provisions of the Charter.

JEFF LOWENFELS, a private citizen, noted that he was speaking as such, although in the past he has represented APUC, since he works in the Attorney General's Office. He stressed that he was speaking as a private citizen. Generally, he stated, the rule is that rate case expenses are passed to the subscribers. In the $400,000 Municipal case, he said $150,000 was disallowed by APUC and the rest will be passed on. Speaking to comments in favor of self regulation, Mr. Lowenfels stated that he would hate to think of the quality that would be sacrificed by removal from APUC jurisdiction. The Commission and its staff spend an incredible amount of time, he said, working on the cases that go before them; and he does not feel the Assembly has the time nor the guts to handle a hot rate case. He continued that he did not feel it would be fair to the rate-payers to have the issue of quality, and cost of service kicked around as a political football. In regard to the previous statement that there were no longer any problems of discriminatory rates, Mr. Lowenfels noted that ATU attempted to set up 5 rate zones- the further from the center of town one lived, the higher the rates they would pay.

IKE WALDROP, business manager for IBEW, stated that he favors the resolution, feeling that it could result in substantial savings to the utilities. The consumers would be protected and better served, he continued, because the Assembly is more responsive, being an elected body, elected by the rate-payers.

BERT AYER, representing HALO, stated that his organization is opposed to passage of this resolution. Members of the Hillside feel the need for a disinterested party, he said, which is not a party of the body politic, to regulate their telephone and electric utilities. They do not feel, he continued, that the time has come for Municipal regulations. They were also very upset, Mr. Ayers said, about the condition of the Anchorage Water Utility. They also feel, he said, that ATU would be in better condition if it did not support the general fund as much as it does.

AL PISTORIUS of ATU stated that he felt sure the Assembly could do just as good a job as the APUC and probably with less money. Relative to complaints, Mr. Pistorius said he felt sure the utility was responsive at this time, no matter who was calling with the complaints. If people really looked at the cost of providing the service, in the more outlying areas, he said, the subsidy is really in reverse, with the urbanized area supporting or contributing to service in the outlying areas. Speaking to the telephone systems, Mr. Pistorius noted that last year Anchorage ranked 16th in the nation size-wise among private companies. Speaking to the municipal systems, Mr. Pistorius noted that Alaska has four municipal utility systems and the only other one in the United States is in Montana.

TOM STAHR of the electric utility stated that Seattle City Light is regulated by the municipal government. They provide excellent service, he said, and have the lowest rates in the nation. The State regulates utilities in an adjacent area, he continued, at a much higher cost. Mr. Stahr stated that he felt regulation should be done by the Assembly. Seattle, he noted, does have a rate department and it goes from that rate department to the city council.

he does not look forward to [illegible] said, one before the Assembly and one before the APUC. Mr. Merrell said he had no objection to letting the Assembly know what they are going to do and going to take before the APUC; but he definitely does not want two hearings. Mr. Merrell pointed out to the Assembly that the Anchorage Water Utility started a rate case in late 1974 which went on through all of 1975; an interim rate was granted in 1976 and they just had the final hearings now, in 1977. That's an awfully long time to wait to get a rate established, he said; and he feels the Assembly would be more responsive.

There being no one else who wished to be heard, the hearing was closed.

Mr. Marsh moved, seconded by Mr. Smith, to approve Resolution No. AR 77-7.

Mayor Sullivan noted that the Administration was only asking for non-competitive utilities to be taken out from under the jurisdiction of APUC. This was generally the intent of the statute passed by the Legislature some years ago, he said. The Municipality suffers on its bond sale rates, he continued, because we are regulated by the State. There is delay upon delay with the APUC, he said, because of additional material they request or changes in their rules; and these delays amount to months and months. Some decisions take well over a year, he said. He cited the telephone rate case as an example, it started in 1975, at which time the only figures available were for 1974, then in May of 1976, Mayor Sullivan continued, the Commission directed the Municipality to forget the '74 figures and to work on '75, so that all of the work done and time spent had to be dropped in order for the work on '75 figures to begin. In the meantime, the Mayor said, the Municipality had been negotiating with RCA and was successful in reaching a substantial settlement, which increased the toll revenues. That was what the Municipality needed and along with the settlement the need for cash dropped. If the rate increase had been granted prior to the favorable settlement with RCA, he pointed out, the Municipality would have had to go back to APUC for a rate increase. It was not the APUC action, he said, but the settlement with RCA which improved their case position for ATU.

Mr. Marsh stated that he had served on City Council when the Council managed the utilities; and he felt that they were responsive and effective in their job.

Mrs. Sturgulewski stated that she could not support the motion, feeling that more needed to be known about staffing, time commitment, cost, etc. This is a very sensitive issue, she said, and the Assembly has an extra ordinary responsibility, particularly to the people outside the City Service Area, on the issue. She has not seen enough, she said, in the Municipality proving itself to be able to say that now is the time that it can regulate its own utilities.

Mr. Brannon moved, seconded by Mr. Marsh, to postpone action on Ordinance No. AO 77-59 and Resolution No. AR 77-7 for two weeks; these items to be scheduled as a Special Order of Business at that meeting.

Mr. Chiei asked to be allowed to abstain from voting, noting that he was now involved in a hearing before the APUC.

Question on the motion to postpone was called and it was passed.

AYES: Walsh, Marsh, Rose, Brannon, Smith, Baer

NAYS: Knowles, Sturgulewski

ABSTAINING: Chiei

veto message on Ordinance No. AO 77-32, noting, [illegible] record, the Assembly's official receipt of the veto.

GLEN HEATHERLY came forward and asked why the residents of the area had not heard more about the Ridgeview Manor matter; and Mr. Walsh asked if this item could be taken up as a Special Order of Business next week.

There was no indication from the Assembly that they wished to discuss the matter further.

Mr. Rose noted that with the veto of Ordinance No. AO 77-32 next week's meeting would begin at 6 o'clock and would be under the old Assembly rules of procedure.

There being no further business to come before the Assembly, the meeting was adjourned at midnight.

SUBJECT: CS for SB 259

TO: Guy Van Doren, Administrative Assistant
Senate Rules Committee

FROM: Jack Chenoweth, Legislative Counsel

CS for SB 259, offered by the Senate Community and Regional Affairs Committee, terminates the exemption from regulation by the Alaska Public Utilities Commission of regional electrical authorities. I have been asked to redraft CS for SB 259 to restore regional electrical authorities the exempt status they now enjoy.

The restoration of the exemption can be accomplished by amendment of the Committee Substitute --

Page 1, following line 26: Add a subsection (h) to read:

(h) The provisions of this chapter, other than secs. 221 - 281 of this chapter, do not apply to a public utility owned and operated by a regional electrical authority organized under AS 18.57 unless the owner and operator elects to be subject to the provisions of this chapter.

Utility bill support defeated

By SUZAN NIGHTINGALE
Daily News Staff Writer

The Anchorage Assembly Tuesday angrily defeated a motion to support legislation providing for the deregulation of municipal utilities.

Action on the resolution had been postponed three times previously by the group, which is divided on the need to support deregulation legislation at this time.

LAST WEEK, the assembly voted to postpone action once more on the resolution, pending a comprehensive meeting on municipal utilities. However, a petition circulated by the administration Tuesday changed the assembly's mind.

Titled "Anchorage Assembly Statement of Support for CSSB259," the petition said, "The press of time and the pending absence of several assemblymen makes it impractical for the assembly to act at a regular meeting" to support the legislation. The measure was signed by Ben Marsh, Paul Baer, Don Smith, Fred Chiei, Ernie Brannon and Dave Walsh. Mayor George Sullivan signed for Bill Besser after securing the Hawaii - vacationing Besser's permission over the telephone.

However, at Tuesday's meeting three assembly members — Arliss Sturgulewski, Lidia Selkregg and Tony Knowles — said they had not even seen the petition or had been asked if they wanted to sign it. Municipal attorney Rick Garnett denied that the document had been selectively circulated, but several assembly members were unconvinced.

"THAT'S LUDICROUS," Dave Rose said, referring to the circulation pattern of the petition. "You don't call people in Hawaii if

R-Anchorage, signed the committee report "do not pass."

The resolution would implement most of the recommendations of the Alaska Salary Commission. Under the legislation, the governor would be paid $52,992. The lieutenant governor's salary of $47,304 would also be the new salary level for department commissioners.

Longevity pay increases of 3.75 per cent of the annual salary for each two years of continuous service — starting this year — are included for most state officials except legislators.

State officials received pay raises from the legislature in 197 but the raises were repealed by state voters last August. The legislative raises granted by the resolution are smaller than the $15,000 salaries legislators gave themselves in the 1975 raises.

you aren't going to make a reasonable effort to contact people here."

Selkregg called the petition, which gives the impression the majority of the assembly supports the legislation," despite the fact the body had not taken official action, "a devious approach."

Brannon, who signed the petition, expressed surprise that some assembly members had not seen it. After determining that three members had not seen the document, Brannon said, "If all assemblymen did not have the option to see the petition, I'm going to vote no."

ASSEMBLY MEMBERS Walsh and Chiei, who had signed the petition, said they would change their votes, too, swinging the official vote against the deregulation legislation.

The final vote was 7-2 not to support the utility legislation. Assembl members Rose, Knowles, Walsh Brannon, Sturgulewski, Selkreg and Chiei voted not to support th legislation. Smith and Baer voted i favor of it. Marsh and Besser, wh support the deregulation legislatio were absent.

In other business Tuesday, th assembly:

— Approved a $106 million budge for the Anchorage School District fo 1977-78;

— Adopted a resolution opposin legislation requested by Rep. Mik Beirne which relates to revenu sharing for hospital construction and

— Adopted a resolution supportin Rep. Mike Miller's returnabl beverage container bill. Smit attempted to substitute Sen. Mik Colletta's bill for support instead but his motion died for the lack of second.

'APUC hurts'

Dear Editor:

Contrary to your editorial of April 21, Anchorage ratepayers are hurt, not helped, by APUC regulation of municipally - owned utilities. The direct costs of regulation in terms of staff time, attorney's fees and the cost of rate studies is very high, in the vicinity of $800,000 for the current rate cases. Much more important however are the indirect effects of regulation on the power of the utilities to raise capital.

Bond counsel for the Municipality recently testified in favor of Senate Bill 259. Counsel pointed out that Alaska is one of very few states in which municipally - owned utilities are subject to regulation as to rates by an appointed state board. Because the Municipality does not have power to control rates, it cannot unequivocally guarantee to bond purchasers that the rates will be sufficient to meet payments on bonds. This being so, the bond buyer is motivated to purchase municipals from a state where no such problem exists. At the very least, the market will demand higher interest, which means more cost to the ratepayer.

Construction of ML&P's waste heat generator has been held up nearly two years because of the PUC's delay in authorizing rate increases sufficient to enable the utility to raise capital for the project. As a result, the taxpayers of Anchorage have lost millions of dollars in wasted fuel consumption and in increased project costs. The Municipality was forced to go to the Supreme Court for an Order requiring the PUC to set rates high enough to meet outstanding bond covenants. Without that Order, the project would still be stalled.

Another example of the inefficiency of the APUC is that in April of 1975 we filed for approval of a standard pass - thru provision allowing the Municipality to increase electric rates by the amount necessary to pay any increased gas fuel costs ordered by the APUC. The commission finally acted on this in January of 1977 and gave a partial favorable ruling. The problem with that ruling is that we have to practically put on a new rate case again before APUC every time they order a gas cost increase to ML&P. In their Order they tend to treat Anchorage differently than the other utilities in Alaska. The other utilities, as I understand it, are more or less allowed automatic fule rate adjustments without having to appear again before APUC and plead the adjustment.

The main difficulties with PUC regulation have been (1) delay, and (2) lack of understanding by the PUC of municipal utilities and their financial operations — all of which are unfavorable to Anchorage rate users.

In recent proposed regulations dealing with utility bond sales, the PUC required 60 days prior notice of the interest rate. However, the interest rate on bonds cannot be known until the day of the sale. Therefore, the proposed rule would stop all utility bond sales. Proposals of this sort simply illustrate the PUC's lack of sensitivity to the realities of running municipal utilities.

Your assertion that without PUC regulation utility rates would be higher than they are is completely unfounded. Your assumption seems to be that local elected officials, responsible to the people, would set higher rates than state level bureaucrats. Such an assumption flies in the face of all logic about the behavior of elected officials and has no support in the experience of other areas which do regulate utility rates locally.

Your bare recitation of numbers and percentages, of course, has no meaning without reference to the wildly increased costs of fuel and labor with which the utilities have been stricken in recent years.

Finally, it should be emphasized that SB 259 does nothing more than give the Anchorage Assembly the option to withdraw from PUC regulation if it believes that such a course is warranted. Obviously, the matter would be fully explored in terms of how to secure the necessary expertise and what administrative structure is most appropriate before any action was taken to deregulate.

It seems inconceivable that persons genuinely committed to local decision - making would reject local option on a matter as important to the community as utility regulation. It also seems odd that the Assembly can approve a $80,000,000 utility budget, but not feel qualified to deal with utility rates.

George M. Sullivan
Mayor

SB 259

Rick Garnett -

PUC is overburdened now ; don't have any public outcry for munic util reg by PUC

Anch utils are regulated because MCP & Chugach are in compet.

Other non-compet munic utils are not regulated

Original hassle btwn Kenai + Homer Elec - one of jurisdiction of territory → PUC in defining service areas

Fbks - boundaries regulated by APUC?

Anch Telephone served areas outside of city → APUC regulation

Unified Anch ended many of these conflict areas

Anch taxpayers & ratepayers pay a cost

Costs:

- delay 1½ → 2 yrs Dec 75 → Feb 77+ of rate increases

e.g. waste heat reclaiming, delay → cost of fuel + incr constr cost

-- prep for APUC (requires heavy burden of proof) $800K so far

Have appointed board supervising elected officials - who know the affected people better

- PUC could use more staffing

Meyer - Seattle - finan consultant to Anch since 1939 - market Anch bonds

Dec 74 began having trouble marketing bonds $7M (MCP) due to insufficient revenues. Public finan again began 7/76

'75 - Fed regs require "full disclosure" - require expanded info., incl sup. ct. decisions, need for short term finan, etc

'77 - $10M elec + $9M Phone. Due to problems of reg → fewer bids, including past bidders - extra cost of $132K for phone $179K for elec. Several underwriters + investors will not buy bonds unless munic. has complete control

Wash, Ore do not have reg of munic util by public util comm.

"Many other" states don't have this

Beligratis (Chicago) - munic bond underwriter - (buys munic bonds for resale to investors)

Auth munic being regulated could → other Ak. munic bonds rates going up

If situation gets sufficiently bad, access to market may be denied

Support concept of munic consol responsibility

Very few states have munic util reg by PUC

Sharp diversity exists in PUC's expertise nationwide

Holman (Seattle) - bond consul (20 yrs) - legal opinion approvals

Could think of no benefits to Auth by reg. by APUC

APUC cannot seem to separate out financing of util from public util financing - don't seem to understand differences.

taxpayers are ratepayers; "gouging" goes to util operation or into gen'l fund.

Elected officials tend to be later authorizing rate increases rather than early

lower cost borrowing gives pub util the advantage over put util more than the savings in not going before PUC

"never seen problem of min overcharging"

Sound operating proced sometimes requires advance rate increases - PUC problem since a base increases on historic data

APUC wanted to regulate rates without regard to existing covenants -

Anch has consistently had reduced rates as greater experience

Killeen - Chm of Pub Util Bd

oppose coming under APUC - well enough regulated now

Mikell - member Pub Util Bd

could foresee problems with timing for

APUC should be an arbitration fact

Zerbetz - APUC Chm - been with them for 6 yrs

not in public interest to change existing law

no change in workload?

Pomp Increase costs due to "tremendous task" of comingling - ?

Net result would be a decrease in APUC costs

Believe would be more costly to Anch public

rate structure (who pays what rates); rate level; consumer complaints

"consumer-oriented commission"

quality of svc

"APUC better able to protect public than are elected officials"

better educated by education (in-house) + OJT

AK. is one of few states with any requirements of PUC members
Commissioners have generated experience due to conducting own
hearings - don't think more ~~exp~~ background is necessary
Full time AG acts as counsel to APUC
APUC approval of bonds would enhance their marketability --
testimony of Meyers before APUC
Rate case expense is heavily spent on consultants -

Markley - ~~Electric~~ Mgr Environ Sys - Chugach Elec Co-op
45,000 customers - largest in state
oppose SB259 - support PUC concept - want to be regulated
- support Comm Sub. (all should be reg by APUC)
Co-op has to be responsible to its members
APUC less subject to polit pressures - is best
APUC should have more $ to reduce regulatory lag.
Coop funding largely thru Fed loans/guarantees (7%)

Berry - Muni League
Policy statement - oppose muni reg by APUC

Bamfield - representing port intil
1970 bill changed existing law to put munis under reg. —
port intil wanted munis utl to be regulated - munis
were willing to accept geographic defn. of area of regulation
but intent was to eliminate compet by dividing it

In FCC on bill they put in that all util would be regulated.

Separation of util fact is not that difficult

Munis should be completely exempt - much more difficult to sell bonds now ~~now~~

Meter reader in Juneau - $19/hr

$135K → $740K for diesel generator

Sharp - Juneau

Local control of util

Have to build the facil, then see how much it would cost

OUTLINE OF MUNICIPALITY OF ANCHORAGE

TESTIMONY TO THE SENATE CRA COMMITTEE RE: SB 259

INTRODUCTION

Appreciate opportunity to be heard. Hope committee will review situation carefully in light of the facts and testimony presented. Will show that the present regulation is unsound in theory, harmful in practice, and likely to become more harmful in the future. Problem is systemic rather than personal in nature.

A. Status quo. Under the present statutory scheme all Anchorage municipallly-owned utilities are regulated by the PUC because one of those utilities, ML&P, is "in competition." No other municipally-owned utilities in the entire state are subject to regulation except on a voluntary basis.

B. How the status quo evolved.

a) PUC regulation was extended to municipal utilities primarily because of service area disputes between those utilities and private utilities. In two well known Supreme Court cases, Homer Electric v. Kenai, and Chugach v. Anchorage, the Supreme Court requested the Legislature to deal with the service area problem.

b) With respect to one municipal utility, ATU, there may have been some rationale for rate regulation because ATU served customers outside the boundaries of its owner, the City of Anchorage.

C. Changed Circumstances. Since unification rate payers and taxpayers are virtually the same. Service area delineation has occured. SB 259 does not effect the PUC's service area jurisdiction.

D. Historical Arguments. It is asserted that the City of Anchorage impaired the capital of its utilities. But

a) payments in lieu of taxes, allowed by Commission, exceeds payments made to City (Exhibit A).

b) There was no harm to consumer. City error, if any, was not seeking rate increase sooner.

E. Past and Present Harm From Regulations.

a) Substantial delays have occurred in securing needed rate increases (Exhibit B). These delays increased the cost of capital improvements to the detriment of rate payers. See, generally, Stahr memo (Exhibit C).

b) Direct costs are large. Rate studies required to meet the "burden of proof" imposed by the Commission are very expensive (Exhibit D).

c) Litigation over PUC decisions has been extensive. Power has a tendency to expand, especially bureaucratic regulatory power. Municipality has prevailed in many cases. Refer to APUC v. GAAB, Carlson interfund decision, ML&P bond case, rate suspension case. Litigation is very costly in terms of attorney's fees (Exhibit E) and delays. There is a close analogy to City-Borough conflicts which spurred unification. Costs will be a particular problem if the ATU order disallowing costs of litigation stands (Exhibit F).

F. Indirect And Potential Harm Based On Bond Market Reactions. Very few municipal utilities are regulated as to rates (Exhibit G). Of those which are regulated, most do not raise capital primarily by sale of revenue bonds. Testimony of bond counsel and financial advisors Beligratis, Holman.

G. Capability of PUC. PUC is substantially overburdened and this factor accounts for much of the delay and hasty consideration of issues. Anchorage matters are a substantial factor in the PUC's work load (Exhibit H). (b) The APUC has no particular expertise in local government affairs, particularly financing of local utilities. Consistnetly attempts to force municipal utilities into m-old of private utilities. See Sterling Gallagher testimony (Exhibit I).

H. General Policies - There Is A Double Anomaly in the Status Quo.

The present regulatory scheme asserts implicityly that the Anchorage Assembly is unable and unwilling to protect its taxpayers and ratepayers by responsible management of its utilities. Only Anchorage stands under this implied indictment. Concerns about due process are groundless. Title 29.48 setting out procedures for local utility regulation apply to home rule municipalities (Exhibit J), and establish the basis for regulation at the present time in most municipalities in the state. Commissioner Hall gave an excellent account of these providions in his THREA Decision. Additionally, the work of the Anchorage Interim Utilities Commission should be considered. This commission was established in the Charter to focus on the best approach to utility management and regulation. Its final report has just been submitted for Assembly consideration (Exhibit K).

I. This Matter Is Not Of Interest To Anchorage Alone. Testimony from Commissioner Sterling Gallagher showed the statewide effect of PUC encroachments on the decision-making prerogatives of municipal utilities. PUC recently proposed regulations giving the Commission the veto power over issuance of revenue bonds by municipal utilities. Upon being informed of this development, other municipalities responded in no uncertain terms as to their attitude toward even the possibility of PUC regulation of their affairs (Exhibit L). It should be noted that the PUC has drafted legislation with substantially the same effect and that the comments of other Alaska municipalities remain relevant (Exhibit M).

CONCLUSION

PUC regulation of Anchorage utilities alone is fundamentally unfair. This regulation has caused frustration and waste. Continued regulation will damage the standing of Anchorage and all other Alaska utilities in the bond market. We ask the Legislature to resolve the problem by enacting SB 259.

Restricted 1/2 year per U-76-6(6)

* At 18.63 mills

** 40% payout of return on actual equity allowed by APUC U-76-6(12). Assumes fully authorized rate of return is actually earned by ATU.

EXHIBIT "A"

STATUS OF RATE CASES

Remainder of 1977

Anchorage Telephone Utility

Assuming toll settlement negotiations with RCA are relatively successful, additional increases to local subscriber revenue will not be necessary this year. In-depth reviews of revenue requirements should be made at least every six (6) months, immediately after the audit is available and prior to year-end.

Municipal Light and Power

Although a request for rate adjustment is not planned for this year, there are two (2) factors that could make one necessary:

1. Any substantial increase to natural gas costs.

2. A substantial drop in power sales resulting from the warm winter. Since revenue reports have not been available this year, the impact can not be projected.

A rate restructuring hearing, that will not have an impact on revenue, is scheduled for April 25, 1977.

Anchorage Water Utility

As soon as the 1976 audit is complete, a detail review must be made, with the possibility that new rate revisions may have to be filed this year. An interim request may be required following labor settlements.

Anchorage Sewer Utility - Eagle River

An interim increase of about 11% across-the-board will be filed on March 15, 1977. Permanent rate restructuring and revenue requirement will be completed as soon as accounting records become available.

STATUS OF RATE CASES
Remainder of 1977

Anchorage Sewer Utility - SA 40

As soon as the 1976 audit is available, a complete revenue requirement and cost of service study must be initiated. A filing with the APUC should be made by August.

Anchorage Sewer Utility - Girdwood

The rate filing is scheduled for August.

BMN
3/4/77

RATE CASE HISTORY

Municipal Light and Power

Prior to July, 1975, Municipal Light and Power had never applied for a rate increase from either the APUC or the City Council. There had, however, been certain rate reductions implemented several years ago.

1975

June 24	The first interim increase of 15.75% was requested for increased natural gas and labor costs.
July 8	The APUC granted the 15.75% increase.
October 13	A request was filed for an interim increase to 29.72%.
October 21	At a APUC hearing, an oral request was made to increase the interim request from 29.72% to 31.1%.
October 23	The APUC granted a 29.72% increase over original rates.
October 23	A request was filed for an overall increase of 51.75%.

1976

January 19	The APUC denied the 51.75% request, however, a 31.1% overall increase was granted. The difference reflected the amount required for bond coverage.
February 25	ML&P petitioned for reconsideration of 51.75% rate denial. The APUC failed to act on the petition.
March 12	ML&P filed for a Permanent Injunction in the Superior Court for 51.75% rate.
April 20	The Superior Court granted permanent injunction.

May 11	The APUC appealed to the Supreme Court
May 21	ML&P filed permanent rate request for $5,258,437 or an overall 64.45%.
June 11	The Supreme Court affirmed in part and reversed in part the Superior Court decision.
August 5	The APUC set a revenue requirement hearing for September 20, 1976, and a rate restructuring hearing for January 17, 1977.
September 3	The APUC denied staff request to reject ML&P filing.
September 20	A public hearing was held on Permanent 64.45% rate.
October 25	The APUC granted 52.39% Permanent Increase. The reduction from requested 64.45% was primarily due to the APUC revision to depreciation rates and an assumed equity of 70/30 rather than 60/40. The denied portion amounted to approximately $1,000,000.
December 22	ML&P requested, and was granted a continuance on the rate restructuring hearing from January 17, 1977, to April 25, 1977.

RATE CASE HISTORY

Anchorage Water Utility

Prior to 1976, the Anchorage Water Utility had received an increase from the City Council of approximately 20% in 1970.

1976

February 10	An interim rate request was filed using a September 30, 1975 Test Year. The revenue requirement was $1,156,922 (excluding $331,000 fire protection) or 35.91%.
March 26	The APUC allowed $32,214 (excluding $331,000 fire protection) or about 1% increase. Interfunds totaling $554,250 were excluded.
April 7	AWU filed petition for reconsideration
April 23	APUC allowed interfunds of $554,250, bringing interim increase to 15.96%.
May 7	APUC allowed additional revenue of $140,037 for bond coverage requirements. The total interim revenue at this point was $726,501 or about 22%.
July 15	A permanent rate increase of 73% was filed, using a 1975 test year. Approximate revenue requirement of $2,474,600.
October 20	At prehearing conference, APUC allowed increase in interim rate to 54.6%.

1977

January 15	A hearing was held on permanent rate of 73%.

March 1 — A Permanent rate increase of 51.4% was allowed, resulting in increased revenue of $1,742,451. Reasons for decrease:

* APUC did not allow CIP in rate base
* APUC did not allow depreciation on contributed plant
* APUC allowed 70/30, rather than 65/35

RATE CASE HISTORY

Anchorage Telephone Utility

Other than certain selective rate revisions, ATU had not received a general rate increase since 1961.

1975

December 4	Filed a Permanent and Interim rate increase showing a $3,901,693 deficiency (approximately 30% over 1974 subscriber revenue) based on a 1974 Test Year. APUC suspended the permanent request as being incomplete.

1976

March 15	APUC granted an interim increase of $1,127,032 (approximately 9%), but disallowed all interfund charges totaling $1,290,088.
March 30	ATU appealed to the Superior Court that APUC acted unreasonably. The Superior Court granted the appeal.
April 9	APUC allowed inclusion of interfunds in interim rate. The total revenue increase allowed was $2,417,120.
May 17	Permanent rate was filed using a 1975 Test Year. Request Revenue Requirement of $2,107,724.
July 14	A Revenue Requirement of $1,036,853 or 6.88% was conditionally granted (later corrected to 6.93%).

1977

February 17	The APUC reduced Revenue Requirement to $1,012,756 or 6.55%. The reduction included recalculation of MJSA and disallowance of certain rate case expenses. ATU will ask for reconsideration of reduction, citing increased FICA (Ret.) benefits and non-represented five percent (5%) salary increases.

TO: The Honorable Joseph Orsini, Chairman
Senate Community & Regional Affairs Committee

FROM: Thomas R. Stahr, Municipal Light & Power Manager

SUBJECT: Summary of Report on Cost Impact of APUC Regulation On ML&P Consumers

The attached report details the costs and savings to ML&P customers which are engendered by APUC regulation. Primarily it deals with the cost impact of delays in the construction of our waste heat generating plant. These delays were caused by our inability to sell revenue bonds until rates and regulatory rulings would permit revenue bond sales. The salient points of the report are as follows;

Regulatory delay in increasing rates resulted in direct savings to consumers of $1,790,490.

Financing delays related to rates and APUC rulings have delayed the on line date for waste heat utilization two years. This will increase natural gas consumption 4.5 billion cubic feet and increase fuel costs $2,992,950.

The gas lost because of regulatory delays would have been sufficient to heat nearly all Anchorage homes for one year.

The construction delays will result in increased plant costs of $5,000,000 principally due to price escalation and capitalized interest. This cost increase will require $8,950,000 additional in principal and interest payments over the life of the plant.

For every dollar our customers saved because of delayed rate increases, they will have to pay $6.65 in the future to pay for natural gas wasted and material cost escalations caused by the same delay.

If one considers the likely future cost of replacing the extra natural gas consumed each dollar saving because of delayed rate increases will ultimately cost our customers $19.18.

There is considerable cause for concern that APUC regulatory principles will force the acceptance of future energy generation options which have high life cycle costs and are wasteful of nonrenewable resources.

Respectfully submitted,

Thomas R. Stahr, Manager
Municipal Light & Power
Municipality of Anchorage

INCREASED COSTS TO ML&P CUSTOMERS BECAUSE OF REGULATION BY APUC

INTRODUCTION

The direct costs of regulation such as rate case expenses, costs of special studies and costs incurred by the regulatory agency are in general only the minor part of the total costs the consumers must bear because of regulation by the Alaska Public Utilities Commission. Like an iceberg, the bulk of the problem is submerged and not ascertained by casual scrutiny.

ML&P has, in my opinion, been quite successful in minimizing direct regulatory costs, but despite our best efforts and substantial help from the former City of Anchorage, we have been unable to prevent multimillion dollar cost increases, which our customers must ultimately bear, and the utility has been forced to waste substantial amounts of natural gas which can never be replaced and must be paid for by our customers. Both of these problems are directly due to being regulated by the APUC.

BACKGROUND

In 1973, the City Council of the former City of Anchorage determined it would be in the best public interest to construct a combined cycle power plant (i.e., utilize waste heat for power generation) and utilize the low level waste heat (i.e., approximately 80°F) from this plant to heat the municipal water supply as required to prevent freezing problems. Certainly the emerging energy crisis has demonstrated the wisdom of this decision. Financing limitations precluded the award of a turnkey contract which would require front end funding. Thus procurement on a piecemeal basis was the next best alternative. The first gas turbine was ordered in 1973 and the waste heat turbine-generator and boiler were ordered in early 1974, and scheduled completion (first waste heat generation) was for mid 1976.

In December of 1974, a bond sale was held to obtain an additional $6,000,000, primarily for continuing this project. Due to the impending New York default extremely high interest rates were bid, additionally, we were advised that substantial increases in the cost of natural gas fuel would occur the following year. Based on these factors, it was not prudent to increase our debt until we could be reasonably certain of sufficient income to repay it and meet the bond covenants. At this time, the exact amount of the fuel increase was not known so it was not possible to meet the regulatory test of "known and measurable," nevertheless, not to include a reasonable estimate of the effect of the anticipated fuel increase in the projected income available for bond debt service would be highly improper. Thus, we were effectively in a regulatory "Catch 22" position where we could not sell bonds without a rate increase or some assurance increased fuel costs would not errode the already minimal amounts available for debt service coverage and we could not request a rate increase based on cost increases which were not "known and measurable." On April 20, 1975, we filed for a fuel adjustment clause because having such a clause in our tariff would allow us to sell enough bonds to keep the waste heat project on schedule. This move was unsuccessful because validated tariff sheets incorporating a fuel adjustment clause were not issued by the APUC until December 27, 1976.

On July 16, 1975, we obtained some interim rate relief though it was not sufficient to sell bonds. To help keep the waste heat

project going (not on schedule though) and provide funds for much needed system reinforcements the City of Anchorage made 4.5 million dollars available to ML&P by means of short term loans. This was done only after we had been able to obtain only $600,000 in short term bank financing. In the latter part of 1975 additional interim increases granted were sufficient for a bond sale but the order contained language to the effect that the APUC was not compelled to honor our bond covenants. This prevented municipal revenue bond sales by any regulated municipal utility. This problem was, of course, rectified by the courts, but by this time the waste heat generating project was irrevocably delayed. Additionally, ML&P suffered a loss of $73,569 for 1975 and was in technical default because our actual debt service coverage was below the required 1.4.

On July 1, 1976, ML&P sold 10 million in revenue bonds. This allowed us to repay the 5.1 million in short term notes, finance the current years distribution system improvements and issue a few more contracts on the waste heat project. By this time escalation had begun to seriously impact on the waste heat project and cost estimates had to be revised upwards. It was also necessary to pay for the distribution material which had to be ordered for the 1977 construction season so there were not sufficient funds available to complete the waste heat plant. The permanent rate increases granted on October 26, 1976, provided sufficient coverage so that on February 22, 1977 an additional 9 million in bonds could be sold. This does provide sufficient funds to cover the now escalated cost of this project.

Direct Cost To Consumers Due To Delay.

The waste heat generating plant will significantly reduce the amount of fuel which must be consumed to generate electric energy. Originally the first phase of this project was scheduled to be on line in mid 1976. Without financing delays this date could have been achieved. It now appears that mid 1978 is the earliest on line date possible, thus it has been delayed two years. The initial phase of the project will save 1,500,000 MCF of gas each year, without the plant this additional gas must be burnt to supply existing load. Thus the two year delay means 3,000,000 MCF of gas will be consumed which could have been saved by the waste heat plant.

Additionally, the second phase of the plant which will increase the gas saving potential up to 3,000,000 MCF per year will be consequentially delayed at least one year. This latter factor will result in another 1,500,000 MCF saving being lost. Thus, the total gas wasted will be four and one-half billion cubic feet. It is interesting to note that this is 97% of the total amount of gas used to heat Anchorage homes during 1974. ML&P rate payers will currently pay for this gas in their rates and at our present cost of gas, this will amount to $2,992,950. Thus the immediate cost of the delays engendered by the APUC will have an immediate cost impact to Anchorage consumers of approximately three million dollars. One can only speculate what the additional cost to all gas consumers will be in the mid 1980's when the four and one-half billion cubic feet of lost reserves must be replaced at the then current price.

Long Term Cost To Consumers Due To Delay.

Originally the waste heat recovery plant was estimated to cost 7.5 million dollars plus engineering. To date costs have exceeded estimates by 6% over all, but the overrun trend is rapidly accelerating. On the first three bids actual costs were 5% below estimate, on

the next eight cost exceeded estimates by 33% and on the last two items bid costs exceeded estimates by 48%. Additionally, the delays have increased capitalized interest, and engineering costs have increased several hundred thousand dollars. Overall cost increases due to delays will be in the order of three million dollars.

The second phase of the project has escalated even more. The first gas turbine and waste heat boiler cost approximately 5.5 million installed, the second units are now estimated at 10 million installed. While the original schedule would have allowed for some delay in installing the second phase of this project, there is no question but that at least two million additional cost has been engendered by APUC related delays. Thus, considering financing costs, our consumers will pay approximately 9 million dollars more over the life of this plant for cost escalation.

Future Costs From Regulation.

It is becoming increasingly clear that future power sources must be from hydro or coal. Economic studies we have made show that areas which rely on coal as their principal energy source have retail rates approximately twice as high as areas which rely principally on hydro. Hydro plants are generally at least twice as expensive as coal burning plants on a first cost basis. Even coal burning plants cost four to five times the cost of simple cycle gas turbine plants. Therefore, it is clear that future investments for power generation will be five to ten times higher than the current cost of gas turbines. Under rate of return regulation currently in vogue at the APUC, it will be impossible for any major Alaskan utility to fund the required projects because even minimal bond coverage on the debt would imply an excessive return on equity. Unless this regulatory stumbling block can be removed, Alaskans will be condemned to every increasing energy costs because regulatory constraints will preclude the selection of the lowest life cycle cost alternatives. This will also place us in opposition to national energy conservation programs. One bill currently before Congress proposes a penalty to increase the cost of natural gas used for power generation to $3.00 per MCF.

Immediate Consumer Savings Due To Regulatory Delay.

To offset the increased fuel and long term costs, our consumers must bear, it is only proper to consider the immediate savings they realized from regulatory delay. Had the APUC not been involved, rates would have been set to provide the required debt service coverage. For 1978 this would have been the required coverage on existing debt plus the additional 6 million bonds not sold in late 1974. For 1976 the required amount would be for the then existing debt plus that required for an additional 10 million early in the year. For 1977, the funds required would have been less due to the savings made by timely construction. Thus, no additional rate increases in 1977 would have been required to meet the original construction schedule.

To have maintained a minimum coverage of 1.6 times debt service and sold bonds as previously noted would have required an additional revenue of $1,217,573 in 1975 and $572,917 in 1976. This would correspond to a 14.6% increase in 1975 and 4.8% in 1976 above that actually received. In 1977 current rates would suffice. Thus, the total amount saved the rate payers was $1,790,490.

CONCLUSIONS

To summarize the overall cost impact of the delays imposed by the APUC, we have the following:

Increased natural gas consumption 4,500,000 MCF at $0.6651 =	$2,992,950
Increased debt service to cover escalations $5,000,000 principal and 3,950,000 interest* =	8,950,000
Cost to replace 4.5 BCF gas reserves in 1985 at ?/MCF =	
Immediate savings to consumers due to delayed rate increases =	1,795,490
Net Cost to Consumers =	$10,147,460

Or in terms of cost benefit ratio;

$$\frac{\text{Cost to consumers}}{\text{Benefit to Consumers}} - \frac{\$11,942,950}{\$1,795,490} = 6.65$$

Thus for every dollar of immediate savings ML&P customers received due to delayed rate increases, they will pay an additional $6.65 in the future.

If we take into account the future cost of replacing the natural gas reserves consumed because of the delays imposed on the waste heat generation project, and use the frequently quoted $5.00/MCF price estimate for 1985, Anchorage consumers will pay up to $19.18 for each $1.00 of immediate savings they received.

When one also takes into account the limitations on future energy production alternatives regulation may impose, it becomes clear that Alaskan consumers should not be required to bear such excessive costs.

MEMORANDUM

DATE: April 1, 1977

TO: Richard W. Garnett III, Municipal Attorney

FROM: Philip J. Cucurull, Administrative Officer

SUBJECT: Survey of Legal Costs for Regulatory Matters
October 1976 through March 1977

The following costs for legal services in APUC related matters can be fairly well documented:

Amount expended for legal services - 6 months : $ 78,233

Amount expended for legal services Order 19 appeal in Supreme Court - 6 months : $ 12,222

Cost of legal services and technical advice ATU rate case over 3 year period : $490,037

PJC:ljc

EXHIBIT "E"

which the utility has labeled an estimate. Legal expenses should not be included in the costs borne by the ratepayers, when the amounts have not been adequately supported to establish that they are reasonable charges.

There have been three court actions in this Docket. In the first case the Superior Court found that the Commission had acted unreasonably in excluding interfund expenses from the interim rate increase granted to ATU. Second, the Commission sought and received a court-ordered temporary restraining order (TRO) and subsequent injunction to prevent ATU from implementing its proposed rate design without Commission approval. The third litigation action was ATU's appeal of Order No. 6 to the Superior Court, which is still pending. Legal fees for these court cases were $2,375.25; $3,503.50; and $643.50 respectively.

The ratepayers of a utility should not bear the expense of frivolous and unnecessary court litigation. The legal fees associated with the TRO and injunction actions are patently unacceptable to the Commission. Allowance of this expense would tacitly condone the utility's attempted circumvention of the authority of the Commission. Similarly, the Commission must be circumspect in permitting legal expenses for appeals of its decisions. The cost of unsubstantiated, retaliative litigation should not be ratified by the Commission. In this instance the Court has not rendered a decision on which to base a determination of the reasonableness of the appeal. Additionally, the utility has testified that adoption of the ML&P payout formula would be probable grounds for recommending dismissal of the suit. It is apparent to the Commission that the legal expense of this

call Mr. Sterling Gallagher to the stand.

(Oath administered)

MR. GALLAGHER: I do.

THE CLERK: Please be seated. Clip the microphone to your lapel.

JOHN STERLING GALLAGHER

called as a witness on behalf of the plaintiff, testified as follows on:

DIRECT EXAMINATION

THE CLERK: For the record, please state your full name?

A John Sterling Gallagher.

THE CLERK: Sterling?

A Sterling. S-t-e-r-l-i-n-g. G-a-l-l-a-g-h-e-r.

THE CLERK: Your address?

A Rural Route 4, Box 4691, Juneau, Alaska.

THE CLERK: Occupation?

A Commissioner of revenue, state of Alaska; secretary to the state bond committee; vice-chairman of the Alaska municipal bond bank.

THE CLERK: Thank you.

BY MR. KEMPPEL:

Q Mr. Gallagher, maybe you could state for us briefly some of your past experience in the bond market and present experience in the bond market?

A I'll first start off with my education. I got a BS

tice. It -- it would -- it would be -- you could sell the bonds on the market I'm saying, but you would force out other activities that are socially acceptable.

Q What approach, going back to order number 7, what approach is it your understanding that the Public Utilities Commission is using in setting the rates for a municipally owned utility?

A Could you rephrase the question? I'm not sure that their present one.....

Q What approach in setting the rates of a municipal owned utility does the Public Utilities Commission propose to use?

A They are proposing a reasonable rate of return basis based on a stock ownership basis instead of a coverage test which is normally associated with municipal utilities.

Q Are you aware of utility projects which are financed 100 percent with debt?

A Yes.

Q Can you give me an example of one of those?

A I am taking part in the writing of the new authority for the State government, that's called a power authority. One of the things we intended to finance was the Devils Canyon Dam and we do not plan to put in 3 to 400 million dollars in order to finance it. We in fact intended to finance it all with revenue bonds and having sufficient coverage to

attract investors to that. There will occur equity in that over a period of time, but not at the outset.

Q Do you consider that an unreasonable rate of return for that project for it to receive rates sufficient to cover debt service and -- your testimony is that that project initially will have no equity, it will be 100 percent debt financed. If you sell revenue bonds at 1.4 times coverage will that be an unreasonable rate of return to that project?

A No.

Q Why not?

A Because that is the amount necessary to attract investors to do the project.

Q Could you tell us one of the traditional aspects to a reasonable rate of return, or your understanding of it.

A Well, there is really 2 basis. There is the municipal utility and there's the stock owned company. One requires a -- the elementary difference is one doesn't have the ability to go on the market and raise equity capital, and the other one does. That's why one has a reasonable rate of return with -- where you pay out dividends, the other one is not requiring paying out of dividends. In fact its equity can be built up over a period of years.

Q So I take it that you see no conflict between 42 05 381 which says that the municipality is entitled to include a reasonable rate of return and 42 05 431 which says the

municipality may covenant with bond purchasers regarding the rates of municipal owned utilities?

A I don't see any difference, no.

Q Will the -- you testified as to the effect upon the market for the Municipality of Anchorage revenue bonds, will that effect on that market have any effect upon the State bonds?

A Yes. I've so stated that in the past. There is a chain reaction -- because of the close connection between our subsidiaries and the State itself, there is a reflection.

Q So you see the harm resulting from this order as being State wide in nature?

A Yes, I do. We also have other municipal utilities that it affects.

Q Thank you, Mr. Gallagher. I have no further questions.

JOHN STERLING GALLAGHER

testified as follows on:

CROSS EXAMINATION

BY MR. LOWENFELS:

Q Mr. Gallagher, isn't it true that the commission is absolutely correct when it says that it has the authority to establish rates irrespective of municipal bond revenue bond coverage, provided that said bond coverage is prospective?

A I'm not sure that it does. I believe the statute here -- as I -- a municipality may covenant with bond purchasers regarding rates of a municipally owned utility and the

proper condition, it has no right to impose a tax for revenue purposes except such as it is expressly authorized to levy and collect by the legislative power creating it. Town of Seward v. Seward Water & Power Co., 5 Alaska 52 (1914).

Am. Jur., ALR and C.J.S. references.—37 Am. Jur., Municipal Corporations, § 46 et seq.

nance as to franchise as affecting validity thereof, 32 ALR 1525.

Forfeiture of street railway franchise for breach of condition, 34 ALR 1420.

64 C.J.S. Municipal Corporations § 1726.

Sec. 29.48.060. Public utilities rates. The assembly acting for the area outside cities and the council acting for the area within a city may regulate, fix, establish and change, as it considers proper, the rates and charges imposed for utilities services given to the municipality or its inhabitants by a public service association, corporation, or individual not regulated under AS. 42.05 and may regulate and provide what is a reasonable deposit for meters and security for service to be given, provided that interest be paid on the deposit. All rates, charges and regulations shall be reasonable and shall permit a fair and reasonable return on invested capital. (§ 2 ch 118 SLA 1972)

This section was intended to refer, not only to franchises thereafter to be granted, but to franchises then in existence. Alaska Elec. Light & Power Co. v. City of Juneau, 294 F. 864 (9th Cir.), cert. denied, 266 U.S. 601, 45 S. Ct. 90, 69 L. Ed. 462 (1924); Town of Cordova v. Alaska Pub. Util., 9 Alaska 196 (1937).

City may not contract away power to fix rates of utilities.—A city may not contract away its power to fix, and from time to time change, the rates to be charged by private organizations engaged in furnishing public services. Such action is prohibited by this section and by AS 29.10.147 and 29.10.150 (now 29.48.070 and 29.48.080). Femmer v. City of Juneau, 9 Alaska 315, 97 F.2d 649 (9th Cir. 1938).

But may contract as to rates for its own services.—This section and AS 29.10.147 and 29.10.150 (now 29.48.070 and 29.48.080) have no effect upon the power of a city to fix contractually the rates to be charged a user of a municipally owned public utility. Femmer v. City of Juneau, 9 Alaska 315, 97 F.2d 649 (9th Cir. 1938).

Rates may not be irrevocably fixed. —There is not necessarily included in the power of a municipality to provide lights for a city, the power to enter into a binding contract whereby the rates to be charged by a public utility corporation shall be irrevocably fixed. Alaska Elec. Light & Power Co. v. City of Juneau, 294 F. 864, (9th Cir.), cert. denied, 266 U.S. 601, 45 S. Ct. 90, 69 L. Ed. 462 (1924).

All the operator of a public utility is entitled to is a reasonable return on his net capital investment, represented by property actually used and useful in the public service, and then only provided that his operation is efficient and economical. Pichotta v. City of Skagway, 12 Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

But rates fixed too low are confiscation of property. — Where the rates prescribed are not sufficient to meet operating expenses, there is not merely an incidental diminution in the value of plaintiff's property, such as would be unavoidable upon any exertion of the police power to fix rates which diminished income, but a confiscation in the constitutional sense, and the enforcement of the ordinance should be enjoined, without prejudice, however, to the right of the city to take such further proceedings as it may deem necessary in connection with the amendment of its ordinance.

Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

Meaning of "invested capital". — "Invested capital," as used in this section, means the initial investment, regardless of subsequent changes in ownership, plus capital additions and minus accrued depreciation. Pichotta v. City of Skagway, 12 Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

The term "invested capital" should not be construed to mean fair value, nor is the utility entitled to the benefit of any appreciation in value, nor should the term be construed to mean that which is paid for a utility by the last purchaser.

Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

Fact investment was made before section was adopted is irrelevant.— In determining the reasonableness of a rate base fixed by a city under this section, the circumstance that the investment was made or cost incurred before this section, authorizing regulation, went into effect in 1923, would seem to be wholly irrelevant. Pichotta v. City of Skagway, 12 Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

C.J.S. references. — 62 C.J.S. Municipal Corporations § 292; 63 C.J.S. Municipal Corporations § 979.

Sec. 29.48.070. Hearing for regulation of utilities rates. If the assembly or council considers it advisable to regulate, change, or fix the rates to be charged by a public service corporation or association or individual not regulated under AS 42.05, it shall order a hearing to be held before the governing body at a time and place specified. Notice of the hearing shall be given by at least one publication in a newspaper of general circulation distributed within the municipality or, if no newspaper of general circulation is distributed within the municipality, notice shall be given by posting a notice in three public places within the city or borough area outside cities receiving the utilities services and by serving written notice upon the corporations, associations and individuals whose rates are to be regulated, fixed, or changed in the same manner that summonses are served. The notices shall be published or posted and served at least 15 days before the hearing. (§ 2 ch 118 SLA 1972)

Am. Jur. and ALR references.—43 Am. Jur., Public Officers, §§ 86, 201 et seq.

Regulation of municipal utility rates, 76 ALR 852; 127 ALR 94.

Sec. 29.48.080. Right to participate and compel testimony. At a hearing held under § 70 of this chapter, all public service corporations, associations, or individuals affected by or interested in the matters to be heard may be present and may be represented by counsel. The municipality and all interested parties may produce witnesses and examine them and introduce evidence to prove or disprove the facts in issue or matters to be established or inquired into at the hearing. All parties may compel the attendance of witnesses, and subpoenas requiring attendance shall be issued by the municipal clerk under his hand and the seal of the municipality. Subpoenas duces tecum requiring the production of books and papers shall be issued in like manner upon request. If a person fails to obey a subpoena, the party at whose request the subpoena

issued may petition the superior court for an order compelling the attendance of the disobedient witness or the production of the books or papers referred to in a subpoena duces tecum. The superior court shall order the witness to appear and testify or compel the production of the books or papers. A violation of the order of the court is a contempt of court. If a witness appears and refuses to testify concerning a matter material to the facts inquired about at the hearing and to establish or determine which the hearing was had, an application may be made to the superior court to compel the witness to testify and answer questions put to him concerning the matters inquired about, and the court shall make an order compelling the witness to testify. Violation of the order is contempt of court. (§ 2 ch 118 SLA 1972)

There is no provision requiring the common council to adduce testimony. Graff v. Town of Seward, 20 F.2d 816 (9th Cir. 1927).

Sec. 29.48.090. Further proceedings. A hearing under § 70 of this chapter shall begin at the time stated in the notice but may be continued from time to time. At least a quorum of the assembly or council shall be present at the hearing. At the conclusion of the hearing the parties interested may make such arguments before the assembly or council, either in person or by attorney, as they consider proper, touching the matters at issue, and thereafter the assembly or council shall proceed to regulate and fix the rates by ordinance. The date upon which the rates fixed or regulated take effect shall be stated in the ordinance and shall be at least 10 days after passage and approval of the ordinance. (§ 2 ch 118 SLA 1972)

Courts may review rate orders. — There is no statutory provision for appeals from rate orders, but it appears to be settled that, where a constitutional right is involved, the court may determine the issue upon its own record and the evidence adduced before it, even though it had not been presented to the regulatory body. Pichotta v. City of Skagway, 12 Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

And the courts are not bound by the findings of the city. Pichotta v. City of Skagway, 12 Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

Rules governing review by court.— In its consideration of the mass of evidence produced in appeals from rate orders, the court is aided by well-settled rules governing litigation of this kind, namely: (1) That the orders of a regulatory body are presumptively valid, reasonable and correct; (2) that the burden of proof on the issue of confiscation is on the one raising it, and that nothing less than clear and convincing proof will justify judicial interference; (3) that the court cannot substitute its judgment for that of the authority whose action is under review upon a question as to which there is room for a difference of intelligent opinion. Pichotta v. City of Skagway, 12 Alaska 42, 78 F. Supp. 999 (D. Alas. 1948).

There is a strong presumption in favor of the rates found by the council. Graff v. Town of Seward, 20 F.2d 816 (9th Cir. 1927).

Sec. 29.48.100. Application. (a) In the case of conflict between the provisions of §§ 50—70 of this chapter and the provisions of

AS 42.05 as to the regulation of rates of a utility, the provisions of AS 42.05 shall prevail.

(b) Sections 50—100 of this chapter apply to home rule and general law municipalities. (§ 2 ch 118 SLA 1972)

Article 3. Municipal Enactments.

Section
130. Acts required to be by ordinance
140. Form of ordinances
150. Ordinance procedure
160. Emergency ordinances
170. Codes of regulations
180. Codification
190. Budget and capital program
200. Penalties
210. Expenditure of borough revenues
220. Post audit

Sec. 29.48.130. Acts required to be by ordinance. (a) In addition to other actions which this title requires to be by ordinance, the assembly or council of a municipality shall use ordinances to

(1) establish, alter or abolish municipal departments; —

(2) fix the compensation of members of the assembly or council;

(3) provide for a fine or other penalty, or establish rules or regulations for violation of which a fine or other penalty is imposed;

(4) provide for the levying of taxes;

(5) make appropriations and supplemental appropriations or transfer appropriations;

(6) grant, renew, or extend a franchise;

(7) regulate the rate charged by a public utility;

(8) adopt, modify or repeal the comprehensive plan, zoning and subdivision ordinances, building and housing codes, and the official map;

(9) approve the transfer of a power to a borough from a city;

(10) designate the borough seat.

(b) This section grants no authority but requires the assembly or council to use ordinances in exercising certain of its powers. (§ 2 ch 118 SLA 1972)

Revisor's note (1972).—In ch. 118, SLA 1972, AS 29.48.130(a)(3) read in part ". . . other penalty for establishing rules . . . ." To make sense and to conform to former AS 07.20.080-(a)(3) and earlier versions of the Municipal Code revision, this typographical error has been corrected to read ". . . other penalty, or establish rules . . . ."

Taxes must be levied by ordinance.—The borough assembly may levy taxes only by means of an ordinance enacted under the terms of this section. 1963 Op. Att'y Gen., No. 25.

Borough department illegally established.—Where a proposed incorporation petition provided that public health services should be administered not by the borough assembly but by a board of health which was to be appointed by the borough assembly, but otherwise to operate autonomously in making rules and regulations with the force of law, such rules and regulations would be illegal ordinances since they would be pro-

Subject: Letter of Transmittal
Interim Utility Commission's Final Report

Dear Assembly Members:

Transmitted herewith for your review and consideration is the final report of the Interim Utilities Commission. You will note as part of this transmittal I have submitted an individual letter to the Assembly from each Commission member, including one containing my own comments. This report is the end product of a great deal of work and compromise of all Commission members. I hope that you, as members of the Assembly, will take the time to review and give it due consideration.

It is our understanding that the individuals who drafted the Municipal Charter, and those who voted for the adoption of the Charter, did so with the clear feeling that efforts would be made to develop a program wherein the enterprise activities of the Municipal could be operated in an optimum manner. The Interim Utility Commission, as a body, believes that they have formulated just such a plan. We recognize that a great deal of detail will be required to activate our recommendations, however, we feel that there is sufficient information in our report to clearly define the outcome of the reorganization we suggest.

I wish to express the appreciation of our Commission to the Assembly members for their assistance and indulgence during the development of this report. With the submittal of this report to the Assembly, this Commission is herewith dissolved.

Very truly yours,

INTERIM UTILITIES COMMISSION

Business-Financial

Prospects Appear Slim For Utilities Exemption

Times Juneau Bureau

JUNEAU — Mayor George Sullivan's bill to exempt Anchorage's non-competitive municipal utilities from regulation by the Alaska Public Utilities Commission isn't likely to pass the legislature this year because it was introduced too late in the session, Anchorage state senators say.

The bill, which Sullivan has said is his most important piece of legislation, was introduced last week and is headed for a hearing March 31 in the Senate Community and Regional Affairs Committee.

"It's very doubtful it will go anywhere this year," said committee member Sen. Bill Sumner, R-Anchorage. "It's not on any priority list I've seen."

The bill is aimed at reducing the cost of settling rate cases by giving the municipal assembly the state utility commission's authority to set utility rates for Anchorage.

Since mid-1975 the city's water, electric and telephone utilities have spent $824,000 bringing rate cases before the commission, according to Sullivan. That expense is passed on to consumers and taxpayers.

"We're the only city in the state regulated by them and its costing ratepayers thousands of dollars," Sullivan has said.

Even if the bill had been introduced earlier, it would face the critical reception it is expected to receive from legislators. The state lawmakers are wondering why Anchorage should go unregulated.

"The basic problem is that municipal taxpayers and ratepayers don't have any confidence that unregulated utilities will deliver their services at a fair price," Sen. Pat Rodey, D-Anchorage said. "People can't understand why rates keep going up. And frankly, I can't either."

Rodey doubts that the Anchorage Municipal Assembly — which would regulate its own utilities under the Sullivan plan — would be any more responsive or fair to the consumer than the commission is, he said.

He also said the figure Sullivan cited as the cost of bringing a case before the commission is inflated, including expenses for consultants and office time spent preparing the case.

"A lot of us feel the costs of rate cases are too high but nobody is for turning Anchorage loose without some sort of internal checks and balances," Sumner said. Approval of the bill will depend on the assembly convincing the legislature it has adequate regulatory checks built in to its system, he said.

Legislators recognize that while the bill is of prime concern to Sullivan, the Anchorage Municipal Assembly is split on the issue. Legislators say they are looking for some proposal by the assembly establishing an alternate mechanism for setting rates and they want some assurance the assembly can do the job.

March 18, 1977

SB 259

Mr. Dave Rose, Chairman
Anchorage Municipal Assembly
4326 East 5th Avenue
Anchorage, Alaska 99504

Dear Mr. Rose:

At the regular meeting of the Water Utility Advisory Commission on Monday, March 14, the Water Utility Advisory Commission went on record opposing any move to remove the Water Utility and other non-competitive utilities from the jurisdiction of the Alaska Public Utilities Commission until such time as a firm plan for properly handling the utilities' financial and regulatory matters has been formulated and approved.

Sincerely,

N. F. Kaelber

Norman Kaelber

ANCHORAGE, ALASKA
AR NO. 77-7

A RESOLUTION RELATING TO EXEMPTION OF ANCHORAGE MUNICIPAL UTILITIES FROM STATE REGULATION.

WHEREAS, electric, telephone, water and sewer utilities owned by the Municipality of Anchorage are now subject to regulation of all phases of their activities by the Alaska Public Utilities Commission; and

WHERAS, no other municipally-owned utilities in the State of Alaska are subject to such regulation; and

WHEREAS, only the electric utility is engaged in competition with a private utility, and this competition will be eliminated by final certification of service areas; and

WHEREAS, policy reasons which may have existed for regulation of utilities owned by the City of Anchorage have disappeared with unification of the former City and Borough; and

WHEREAS, compliance with expensive, complex, and often inconsistent and unnecessary requirements of the Alaska Public Utilities Commission imposes a substantial and unwarranted burden on the Anchorage municipal ratepayer; and

WHEREAS, the Anchorage Assembly, as elected representative of all citizens in the Municipality of Anchorage, including all municipal utility ratepayers, is fully competent to provide for regulation of its utilities in the same manner as other municipalities;

NOW, THEREFORE, be it resolved that the Assembly of Anchorage

UTILITIES
AR 77-7
Exemption of
Anch. Mun.
Utilities from
State Regulatio

B. Resolution No. AR 77-7, a resolution relating to Exemption of Anchorage Municipal Utilities from State Regulation.

Mr. Besser moved, seconded by Mr. Brannon — to adopt AR 77-7.

Mayor Sullivan stated that they have hashed it over and there are feelings pro and con. He said there was an article in the Alaska Industry magazine mentioning how few people turnout at public hearings. We continually talk about home rule, he said, and he thinks this is one of the things that relates to home rule. Most home rule cities are not regulated in other states, he noted, and the finance people indicate this, and he thinks this may cause higher rates for Anchorage. He said that he would like to sit down with the Assembly and to work this out, if this is passed. He said there might be an effective date of July 1st or September 1st.

Chairman Rose handed the gavel to Vice-Chairman Brannon.

Mr. Rose said that he has a letter from Pete Argetsinger, Assistant Municipal Attorney, which goes into depth as to a scheme and pattern for this. He talks of Title 29 and what he himself is proposing is an ordinance that spells out how they will still self-regulate. Mr. Rose asked for a more orderly approach then what the Mayor has recommended. He would like to do two things, he said; one, do not vote it down; two, table it with specific recommendations that the Administration bring back an ordinance and bring it back on the table after the ordinance is introduced.

Mayor Sullivan asked if they would be willing to consider it as an emergency ordinance, and Mr. Rose replied he had no problem with that.

Mrs. Sturgulewski said that she felt nationally there have been developed some suspicion of monopolies and that is why these regulatory commissions are necessary. To request deregulation at this time, she said, is like letting the fox loose with the chickens, while Farmer John is on vacation. She mentioned the Charter Commission and its difficulty in getting information on finance from the utilities, and she felt they had better take a good look at this. She felt that there was a great deal of expertise involved and until they get the whole financial picture straightened out, they should move very slowly.

Mrs. Selkregg said that she supported Arliss' statement and that she would like to vote against it and study the issue for a longer period. She felt there should be a better informed public before making such a decision.

Mr. Walsh moved, but it died for lack of a second, — to postpone action for a period of one month.

Mr. Rose moved, seconded by Mr. Besser — to postpone AR 77-7, pending action by the Administration to draw an ordinance for introduction and hearing, which would basically impose those checks and balances contained in Title 29, applying to a home rule charter, with specific times and dates for hearings.

Mr. Rose said that then on the night of adoption, this resolution could come back before the Assembly.

Mr. Chiei said he would like to abstain from voting because they are under conflict because of the PUC.

NAYS: Walsh, Selkregg, Knowles, Sturgulewski.
ABSTAIN: Chiei.

Mr. Rose moved, seconded by Mr. Besser — to table AR 77-7.

Mrs. Selkregg requested PIO to prepare information for the public as to what the PUC does as an educational process.

Mr. Rose asked if the Administration would assent, they would like to try to rough out an ordinance and flesh it out and make it available to the Assembly.

Vice-Chairman Brannon called for the vote to table, and it passed:

AYES: Walsh, Marsh, Selkregg, Besser, Rose, Baer.
NAYS: Brannon, Knowles, Sturgulewski.
ABSTAIN: Chiei.

C. Ordinance No. AO 77-59, an ordinance Adopting Title 26 of the Anchorage Code to be Entitled "Utilities".
   1. Assembly Memorandum No. AM 142-77, regarding same.
   2. Assembly Memorandum No. AM 142-77A, regarding same.

Chairman Rose again had the gavel and said that he would like to put this aside temporarily and take it up at the later meeting, if there was no objection; there was no objection.

D. Ordinance No. AO 77-23, an ordinance Adopting a Title 24 of the Anchorage Municipal Code to be entitled "Streets and Rights-of-Way".
   1. Assembly Memorandum No. AM 59-77, regarding same.
   2. Resolution No. AR 77-24, a resolution establishing a Schedule of Permit Fees as provided in Section 24.30.090 D of the Municipal Code of Ordinances.
      a. Assembly Memorandum No. AM 59-77B, regarding same.

Mrs. Sturgulewski moved, seconded by Mr. Brannon — to approve AO 77-23.

Mrs. Sturgulewski suggested that the amendments included in AR 77-24 be approved, and Mr. Swing pointed out that AM 59-77B included all the amendments.

Mrs. Sturgulewski moved, seconded by Mr. Walsh — to amend by approving AM 59-77B, which contained all the amendments.

AYES: Chiei, Walsh, Marsh, Selkregg, Besser, Rose, Brannon, Knowles, Sturgulewski, Baer.
NAYS: None.

Chairman Rose then asked for the vote on AO 77-23 as amended, and it passed:

AYES: Chiei, Walsh, Marsh, Selkregg, Besser, Rose, Brannon, Knowles, Sturgulewski, Baer.
NAYS: None.

Mr. Walsh moved, seconded by Mr. Besser — to approve AR 77-24.

Chairman Rose asked if there were any problems with this, and Mr. Swing said that Mr. Bollinger would be able to respond.

Mr. Bollinger said that there will be no fee unless what is proposed endangers the right-of-way, then a fee of $2.50 would be charged.

There was further discussion of planting of trees, retaining walls and rock gardens in this area, and Mr. Bollinger said that if someone was going to put a large boulder on top of a gas line, then there might be a problem, but other than that, he did not foresee any.

seconded by Mr. Smith, and it was passed without objection, floor until after the public hearing on the next item.

H. Resolution No. AR 77-7, a resolution relating to exemption of Anchorage Municipal Utilities from State Regulation. UTILITIES AR 77-7

The public hearing on Resolution No. AR 77-7 was opened.

RUTH MOEN stated that she would like the Assembly to not take action on removing non-competitive utilities from under APUC regulation. She does not believe, she said, that the cost to her from the utility would go down were they not regulated by APUC and she views APUC as a sort of guard against the fact that rates could be raised indiscriminately. She lives in an outlying area, she said, and receives no benefit from the profits of the utilities, only pays into them.

RICHARD HANGER stated that he is in business putting in private PBX systems in Anchorage. A legal monopoly is the best reason for regulation, he said. Any changes of tariffs or other provisions, he said, must meet basic rules to stand a test in court, no matter who regulates them. Mr. Hanger noted that the APUC has a budget of $1.3 million and a staff of 31 people. A staff will be required by whoever does the regulating, he said, and he estimated a bare minimum of 3 if the Assembly regulates municipal utilities. He distributed to the Assembly an article on the APUC and a handout relative to typical charges from ATU to an Anchorage business firm.

LLOYD MORRIS of Communications Engineering stated that his firm holds a certificate of convenience and necessity from the APUC to provide radio-telephone service in Anchorage. He has a problem, he said, understanding how ATU is non-competitive, since it does have a certificate to provide the same service as his company, although, it does not at this time to do so. If ATU did provide this service for which it is certified, he said, it would definitely be competing with Communications Engineering, which would place ATU in the identical position of the electric utility competing with CAU. For this reason, Mr. Morris stated, he feels that ATU should be withdrawn from the resolution before the Assembly.

BOB JOHNSON stated that for the past three years he has been on the Water Commission, working with the Anchorage Water Utility. He recommended approval of the resolution before the Assembly. When AWU was placed under the APUC regulation, he recalled, it was placed there because their service extended beyond their jurisdiction and there were excesses practiced on the people outside of their jurisdiction but which received the services. This condition, he said, no longer exists. APUC regulation impacts their growth, he continued; it takes 9 to 18 months to get a case through the Commission because the Commission must weigh that case against all others in the state. But meanwhile, he said the utility cannot sell bonds because there is no revenue coming in to justify bonds. The Water Commission was satisfied, he said, with the work of the APUC. Mr. Johnson recommended that the Administration hire the expertise necessary and take it under Municipal control so that the utilities can move at the speed they need to move. He continued with recommendation that the Municipality establish these utilities as public corporations under one head and that the utilities pay taxes or contributions in lieu of taxes and operate in a business like manner and the Assembly would approve or disapprove any rates. He would envision the Assembly sitting as an appellate body, he continued, rather than a hearing body on rate cases.

PAT REDMOND, speaking as a consumer, stated at first glance she does not want her public utilities taken out from under APUC regulation. Some of the things she considered were the cost of Municipal regulation, the time and the politics. Most utilities are regulated, she said, and she would like for Anchorage's to be regulated, and by APUC.

owned by the former City, she said, go to the former City; and those who live outside need the protection of APUC. If a utility is not competing with others, she continued, that means it is a monopoly and that means it should be regulated. The Assembly should consider, she pointed out, that the APUC has a great deal of expertise; and should be a body that the Municipality works with, rather than against. Were this the case, she said, she doubted that the bills for rate cases would have been as high as they have been. Mrs. Frohne noted that Fairbanks is looking at asking to be regulated by APUC; and in closing she stated that deregulation from APUC and Municipal regulation indeed require a vote of the people under the provisions of the Charter.

JEFF LOWENFELS, a private citizen, noted that he was speaking as such, although in the past he has represented APUC, since he works in the Attorney General's Office. He stressed that he was speaking as a private citizen. Generally, he stated, the rule is that rate case expenses are passed to the subscribers. In the $400,000 Municipal case, he said $150,000 was disallowed by APUC and the rest will be passed on. Speaking to comments in favor of self regulation, Mr. Lowenfels stated that he would hate to think of the quality that would be sacrificed by removal from APUC jurisdiction. The Commission and its staff spend an incredible amount of time, he said, working on the cases that go before them; and he does not feel the Assembly has the time nor the guts to handle a hot rate case. He continued that he did not feel it would be fair to the rate-payers to have the issue of quality, and cost of service kicked around as a political football. In regard to the previous statement that there were no longer any problems of discriminatory rates, Mr. Lowenfels noted that ATU attempted to set up 5 rate zones- the further from the center of town one lived, the higher the rates they would pay.

IKE WALDROP, business manager for IBEW, stated that he favors the resolution, feeling that it could result in substantial savings to the utilities. The consumers would be protected and better served, he continued, because the Assembly is more responsive, being an elected body, elected by the rate-payers.

BERT AYER, representing HALO, stated that his organization is opposed to passage of this resolution. Members of the Hillside feel the need for a disinterested party, he said, which is not a party of the body politic, to regulate their telephone and electric utilities. They do not feel, he continued, that the time has come for Municipal regulations. They were also very upset, Mr. Ayers said, about the condition of the Anchorage Water Utility. They also feel, he said, that ATU would be in better condition if it did not support the general fund as much as it does.

AL PISTORIUS of ATU stated that he felt sure the Assembly could do just as good a job as the APUC and probably with less money. Relative to complaints, Mr. Pistorius said he felt sure the utility was responsive at this time, no matter who was calling with the complaints. If people really looked at the cost of providing the service, in the more outlying areas, he said, the subsidy is really in reverse, with the urbanized area supporting or contributing to service in the outlying areas. Speaking to the telephone systems, Mr. Pistorius noted that last year Anchorage ranked 16th in the nation size-wise among private companies. Speaking to the municipal systems, Mr. Pistorius noted that Alaska has four municipal utility systems and the only other one in the United States is in Montana.

TOM STAHR of the electric utility stated that Seattle City Light is regulated by the municipal government. They provide excellent service, he said, and have the lowest rates in the nation. The State regulates utilities in an adjacent area, he continued, at a much higher cost. Mr. Stahr stated that he felt regulation should be done by the Assembly. Seattle, he noted, does have a rate department and it goes from that rate department to the city council.

he does not look forward to [illegible] hearings, he said, one before the Assembly and one before the APUC. Mr. Merrell said he had no objection to letting the Assembly know what they are going to do and going to take before the APUC; but he definitely does not want two hearings. Mr. Merrell pointed out to the Assembly that the Anchorage Water Utility started a rate case in late 1974 which went on through all of 1975; an interim rate was granted in 1976 and they just had the final hearings now, in 1977. That's an awfully long time to wait to get a rate established, he said; and he feels the Assembly would be more responsive.

There being no one else who wished to be heard, the hearing was closed.

Mr. Marsh moved, seconded by Mr. Smith, to approve Resolution No. AR 77-7.

Mayor Sullivan noted that the Administration was only asking for non-competitive utilities to be taken out from under the jurisdiction of APUC. This was generally the intent of the statute passed by the Legislature some years ago, he said. The Municipality suffers on its bond sale rates, he continued, because we are regulated by the State. There is delay upon delay with the APUC, he said, because of additional material they request or changes in their rules; and these delays amount to months and months. Some decisions take well over a year, he said. He cited the telephone rate case as an example, it started in 1975, at which time the only figures available were for 1974, then in May of 1976, Mayor Sullivan continued, the Commission directed the Municipality to forget the '74 figures and to work on '75, so that all of the work done and time spent had to be dropped in order for the work on '75 figures to begin. In the meantime, the Mayor said, the Municipality had been negotiating with RCA and was successful in reaching a substantial settlement, which increased the toll revenues. That was what the Municipality needed and along with the settlement the need for cash dropped. If the rate increase had been granted prior to the favorable settlement with RCA, he pointed out, the Municipality would have had to go back to APUC for a rate increase. It was not the APUC action, he said, but the settlement with RCA which improved their case position for ATU.

Mr. Marsh stated that he had served on City Council when the Council managed the utilities; and he felt that they were responsive and effective in their job.

Mrs. Sturgulewski stated that she could not support the motion, feeling that more needed to be known about staffing, time commitment, cost, etc. This is a very sensitive issue, she said, and the Assembly has an extra ordinary responsibility, particularly to the people outside the City Service Area, on the issue. She has not seen enough, she said, in the Municipality proving itself to be able to say that now is the time that it can regulate its own utilities.

Mr. Brannon moved, seconded by Mr. Marsh, to postpone action on Ordinance No. AO 77-59 and Resolution No. AR 77-7 for two weeks; these items to be scheduled as a Special Order of Business at that meeting.

Mr. Chiei asked to be allowed to abstain from voting, noting that he was now involved in a hearing before the APUC.

Question on the motion to postpone was called and it was passed.

AYES: Walsh, Marsh, Rose, Brannon, Smith, Baer

NAYS: Knowles, Sturgulewski

ABSTAINING: Chiei

veto message on Ordinance No. AO 77-32, noting, for the record, the Assembly's official receipt of the veto.

GLEN HEATHERLY came forward and asked why the residents of the area had not heard more about the Ridgeview Manor matter; and Mr. Walsh asked if this item could be taken up as a Special Order of Business next week.

There was no indication from the Assembly that they wished to discuss the matter further.

Mr. Rose noted that with the veto of Ordinance No. AO 77-32 next week's meeting would begin at 6 o'clock and would be under the old Assembly rules of procedure.

There being no further business to come before the Assembly, the meeting was adjourned at midnight.

To the file

Rick Garnett: SB 259 has been talked about as de-regulating the Anchorage Utilities but is much more limited than that.

This bill deals only with utilities in competition with other utilities.

It is not the goal of the Municipality of Anchorage to be under the APUC.

If the regulating of utilities is a beneficial and desirable thing, then why is it that other municipalities have not sought such regulation. What is seen here is a dramatic response to the suggestion of putting utilities under regulation.

We have pursuant to the formula in the Administrative Statutes, regulations of all the Anchorage Municipal utilities other than garbage at this period. By reason of the competition that exists with AEL&P and Chugach Electric, it is only as to those utilities that there is any allegation of competition. Only Anchorage is in that category. There are many municipalities in the state who do own all their own utilities and regulate them pursuant to Title 29 and are not subject to this type of regulation.

A brief history of the situation is that the AEL&P and Chugach Electric were in competition and a legal battle

ensued as to who had rights to service an area, basically a territorial type of argument. The Supreme Court invited the Legislature to do something about the situation. The APUC took over the function, and delineated the boundaries and therefore solved the problem.

Senator Orsini: The APUC delineated the boundaries but they don't regulate the municipal utilities in Fairbanks?

Rick Garnett: Yes. There is a need for some rationale for regulations, and a need to prevent the owner area from taking undo advantage of the non-owner area. Today there is not long an "in city" or "out city" conflict.

Not critical of APUC, and this is not a personality or political problem. Apart from the financial aspects, there are basic legal-governmental considerations. It is illogical to have a board supervising a decision of elected officials with regards to matters of direct interest only to constituents of those elected officials. It is a strange anomoly to assume that those elected officials are unwilling or uncapable of protecting the utility or making decisions in that regard.

Senator Willis: Has the Anchorage Assembly finalized a recommendation?

Rick Garnett: They are acting tonight.

Senator Sumner: In regards to rate increases, the first increase requested was 15%, the second 29% and then 31%, please explain.

Rick Garnett: The old city let their utilities go for too long a time without needed rate increases. When they did make their increase, it was dramatic. When you talk about percentages of rate increases, it is deceptive because part of the problem has been dealing with rate matters analogous to private utilities. A municipal utility operates by selling revenue bonds.

Senator Orsini: To what do you attribute the difference in the rate increases between a municipal utility and the APUC utilities?

Rick Garnett: Much of it is the time delay. It takes up to 6 months through the APUC. Some feelings are that a municipal utility should not make a profit and should only be concerned with the consumer, but the consumer needs the utility to be in good shape.

The municipal utility probably has more resistance to the regulations because the elected officials feel that they have the right to make decisions instead of butting against another entity which feels they can make the decisions.

Donald Meyer: In 1975 it became evident that the municipal utility needed a diffenent source of revenue because it wasn't meeting the requirements under the indenture in which the bonds had been issued.

Nuveen is in a position of the investor and has about millions of dollars of tax exempt bond funds outstanding. They are like mutual funds except we deal only with muncipal bonds. As sponsor and seller of these bond funds, we have criteria that we look to in selecting municipal bonds to put into these portfolios and amoung these criteria is the rating. We don't buy bonds that are "under a cloud", like New York city bonds, for examply. This could happen to Anchorage or Fairbanks if they must come under the APUC regulations.

Senator Orsinsi: If Anchorage or other municipalities were regulated, investors would be nervous and therefore the bondability would be passed off?

Belegratis: Yes. Because Alaska is a small place, it has gone a long way down the road in respect to acceptability. It has pulled the municipalities along with it.

It's not just a question of dollars and cents. It's access to the market. If an issuer cannot meet a bond covenant, the door in effect is shut to that issuant. The alternative is to sell subordinate bonds.

Margins of safety have been built into these bond issuances, both in terms of a test for the issuance of additional parity bonds and also in terms of maintaining rates sufficient to do business to produce a sufficient cash flow. These covenants are there for a reason. They are to safeguard the investor.

Nuveen will pick up bonds with rather stringent requirements. They look to the marketability of the bonds, the acceptability of Anchorage. The constant adversity between the issuer and APUC, the cost and doubt, will affect the marketability. We share the feelings already expressed that the municipal officials are required and must answer to their constituents, and if the assembly or city council didn't keep their constituents happy, they would be out of a job.

Senator Orsini: To your knowledge, are there other states that have a public utility commission that regulates the municipalities?

Belegratis: Very few. It is an exeption rather than the rule.

The people that buy bonds are not necessarily people like you and me. We are at Nuveen, an "institutional house". We deal with Allstate Insurance, which annually buys millions of dollars of municipal bonds. Bankers and insurance companies who are sophistocated are smart and are being careful when buying bonds and watching things very carefully. We know they are critical and we as underwriters must be aware of what's going on with the APUC in Alaska.

Senator Orsini: Is it a factor that the Commission does not require qualifications of it's members?

Belegratis: No, I don't think the market place has any care about that.

Senator Sumner: I am concerned. I would rather put the decisions into the hands of experienced people rather than the public. If the legislature felt a need for the APUC, it should therefore regulate the utility as it was set up to do. It is beyond me to believe that the APUC would not grant a rate increase symetric with the needs. If t that is the problem we might look deeper into that aspect of it.

Belegratis: Anchorage has a convenant, which is 1.4 times net revenues. This figure was developed in the past and is what the marketplace demands. The .4 is the margin of safety which the marketplace demands in order to buy this paper.

Holman: The best argument for de-regulation is the history of the regulations. One of the basic problems is that they have been totally unable to separate municipal financing from private financing, although they are totally different. Municipalities don't have any equity when starting out

The purpose of regulation is to present a guideline for higher returns to the investor. With the municipal system

you don't have an investor.

Senator Sumner: If private enterprise is in competition with the municipal utility ther the municipality can charge lower prices and the private enterprise is forced out of business.

Holman: It is difficult to get a rate increase through the APUC and also takes a long time. If the bonds are not marketable, then he cannot approve them.

Frank Killeen: As chairman of the public utilities board in Fairbanks, we do not wish to be put under the authority of the APUC.

The only problem we've had with serving the people is giving all of them the service they want.

Max Mikell: Most has already been stated. Basically if we ever did have to operate under the APUC, I don't think it would allow us to act in the timely fashion as far as bonding and funding. We are behind now just having to go through the City Council for these things. If we had to go through the City Council and then the APUC we would have to stop operating.

I would suggest that the APUC is a necessary body in arbitration but not in regulation. I don't feel that we need to be regulated and it's the honest way to treat the voters.

Zerbetz: The fiscal impact of this bill would be 0.

There are several aspects of regulation:

1) Rate structure/determined by the classes of people.

2) quality of service provided

3) handling and processing of consumer complaints.

The rationale for regulations in the first place was that the Commission would act as a substitution for the market-place, where there isn't any establishment of rates. Poor service which otherwise, in a competitive market, is taken care of by the APUC.

It is our observation that there is a separation between privately owned and municipally owned utilities, and that is the ownership and control of the utility.

Our staff can better protect the public due to the education of the APUC members.

APUC have developed a certain amount of expertise due to the fact that they conduct their own hearings and see the consumer "eyeball to eyeball".

Low rates are not always the answer. If utilities are not charging enough to keep a business running well, your'e not going to give the public a good service.

Senator Sumner: Alaska's one of the few places that regulates the municipalities, right?

Zerbetz: Yes. The type of ownership of utilities vary from state to state. Most utilities are privately owned so it is hard to compare utilities between states as some are municipally owned and some are private.

Larry Markley: Chugach Electric Company has about 45,000 customers. We oppose SB 259 and support the APUC. We would support CSSB 259. For the best intersts of everyone we feel it is the most equitable treatment. APUC is skilled and we want someone with "higher authority" applying the regulations.

It is our understanding that the APUC was established with the intent that it should be on a statewide service. It would be a uniform application of regulatory function, and we feel that that function is best carried out by one qualified, independent agency. Let the APUC have more money to hire more people and attempt to reduce the regulatory lag that we're hearing so much about.

We are funded by governmental loans, guaranteed loans and insured loans and the rate of these loans is 7-7 1/2 %.

We are expanding very rapidly and expect to go to the bonding market too.

Don Berry: We are opposed to SB 259. We think the APUC is an unnecessary infringement on local government powers.

Norman Banfield: The first law was written because it was becoming evident that the municipalities were insensitive to the peoples needs. The Anchorage utility was taking large amounts of money out of the utility and putting it into the general fund. On the whole, it wasn't a case of the municipal utility's structure, it was the Chugach Electric Company, because they had to compete. It was my position that no damage would result from regulating the muncipal utility but insisted that the regulations delineate the serviec areas.

Financing a utility is difficult. The municipality has to go to the voters, and time is a great factor. Now, they have to get public approval for a rate increase. If the APUC is involved, it will just take too long. The City Council can do it in a timely manner.

Lee Sharp: There's no sense to why a utility owner would ever go to the APUC rather than their own representative. They should have local control of the utilities. This is good incentive to keep the rates down, and we don't see any rationale in regulating non-competitive utilities.

TO: House of Representatives HHSS Committee
FROM: Dr. JOHN C GARVIN,
Re: Fiscal Note on ~~HB 432~~ SB 271
Date: April 21, 1977

Based on DHSS Cost of Care figures for the first six months of FY 1976-77 (7/1/76 - 12/31/76)

Total Child Care days of service provided	45,427
Average # Children in care per day for 184 days	247
Total Reimbursable Expenses (6 months)	2,020,240
Average daily rate per child	44.47
Total Child Care Salaries (6 months)	1,218,806
Average cost for salaries per child care day	26.83

Assuming salary increases of 37.5% required to bring salary level up to state entry level of 1100-800.

Average cost for salaries per child care day would be	36.89
Total projected child care salaries 36.89 x 365 x 247	3,325,818
minus projected salaries w/out cost setting	2,418,857
net increase projected	906,961
Assuming depreciations based on 20 years @ 3.00 per unit	270,465
Total annual increase with cost setting and depreciation included	1,177,426

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

Senator Joe Orsini
Chairman

Senate Bill No. 312 — Croft, Prime Sponsor

Resolution No. ____

This Bill is currently in the Senate Community and Regional Affairs Committee for consideration. Your response, as prime sponsor, to the following questions will serve to hasten Committee action on this Bill.

1. What is the need for your proposed legislation; what is the goal you are trying to accomplish?

11 communities in Alaska have united in the interest of getting a bond issue before the voters in '78; representatives of the participating communities are raising funds to hire coordinator and to promote the proposition, etc.

2. Are there any other viable ways of accomplishing this same goal?

The amount requested of the State is only part of the needed amount; the rest will be raised locally (in the communities) from corporations, etc.

3. Persons or groups you know of who are supporting the legislation.

Representatives/persons interested in development of cultural arts and centers in: Anchorage, Cordova, Dillingham, Juneau, Haines, Angoon, Ketchikan, Naknek, Petersburg, Sitka, and Skagway.

4. Persons or groups you know of who are opposing the legislation.

NONE

5. Can you foresee any new problems that might be caused as a result of enactment of your bill?

NO

6. What is the earliest time you would like the Senate Community and Regional Affairs Committee to consider your bill?

SOONEST - won't be pertinent if delayed a year -

JO/tb

Enclosure: As stated

TO: Senator Orsini DATE: April 25, 1977

FROM: Paul Conger RE: SB 316

I checked with Billy Berrier to see if I could made some sense out of this bill. He provided the following fact situation to clarify the intent of the bill.

Apparently, there is an individual in Anchorage who is leasing some state land at one of the airports and using it for a tie-down for his plane. Since this is a state airport, the state provides fire and police protection for the area. At the same time, this area is located in the Spenard Service Area where the municipality, supposedly, is providing the same service. Therefore, this guy feels that being taxed by the municipality (special service area), as well as the state, (in conjunction with the leasing of the land) is being subjected to a duplicate tax and is unjust.

This bill is designed to eliminate the tax imposed by the municipality because the individual is already being taxed by the state for the fire and police service.

I checked with Palmer to see what the Department's position is regarding this matter and he said he didn't completely understand the bill but felt they would probably oppose it.

SB
318

COMMENTS OF THE ALASKA PUBLIC UTILITIES COMMISSION REGARDING SENATE BILL 318

The proposed amendments to AS 42.05.381(a) is the result of a series of recommendations by the consultant employed by the Legislative Affairs Agency to review the existing statute of the Alaska Public Utilities Commission. It should be noted that the consultants did not have either formal or informal contact with any of the Commissioners or the Commission staff.

The policy of the Commission regarding costs of advertising which has been allowed for rate-making purposes is that which is found in the new language proposed by this legislation. If the Legislature desires to formalize by statute the policy of the APUC, we would suggest that on line 21(D) the word "shareholders and" be inserted after "informing"; therefore, (D) would read: "informing shareholders and members of a cooperative of meetings of the utility and encouraging attendance; or".

The proposed statutory addition delineating the instances when a surcharge may be included in a utility's rates is also the policy of the Commission and is reflected in procedures established by the Commission. The most recent allowance of a surcharge is described in the order granting a certificate of public convenience and necessity to Wakefield Seafoods, Inc. (a copy of which is attached).

In summary, the additional language contained in this legislation reiterates Commission policy. If the legislature believes it to be in the public interest to include this policy through statutory language, the Commission has no objections to the proposed legislation.

In the Matter of the Application of WAKEFIELD SEAFOODS, INC., for a Certificate of Public Convenience and Necessity to Operate an Electric Utility at Sand Poin Alaska	U-76-5 ORDER NO. 1
In the Matter of the Inclusion of a Fuel Cost Rate Adjustment Clause in the Electric Utility Tariff of WAKEFIELD SEAFOODS, INC.	U-77-24 ORDER NO. 1

ORDER GRANTING CERTIFICATE AND CONDITIONALLY APPROVING FUEL COST RATE ADJUSTMENT CLAUSE

On June 24, 1975, WAKEFIELD SEAFOODS, INC. (WSI), applied for a temporary certificate of public convenience and necessity to continue furnishing electric utility service at Sand Point, Alaska. On July 15, 1975, a temporary certificate was granted conditionally and WSI was ordered to file an application for permanent certification not later than December 31, 1975.

An application for permanent certification was received by the Alaska Public Utilities Commission on December 31, 1975. Following staff review and subsequent WSI submittals the application was noticed to the public on December 21, 1976. No statements in favor of, or in opposition to, the application were received by the Commission.

ALASKA PUBLIC UTILITIES COMMISSION
1105 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 272-1481

The proposed tariff contains three rate schedules. In Schedule A, which applies to farm and home customers, the first 200 kilowatt hours per month cost the consumer 15¢ per KWH and the balance (over 200) cost 13¢/KWH with a $7.50/month minimum charge where 5 KVA or less transformer capacity is required. In Rate Schedule B, applicable generally to commercial customers, the first 100 KWH per month will cost the consumer 13¢ per KWH, the next 100 KWH will cost 11¢ per KWH, and all over 200 KWH/month will cost 7¢ per KWH, with a $3.00 per KW per month demand charge for demand in excess of 10 KW and a $7.50/month minimum charge where 5 KVA or less transformer capacity is required. Both the residential and the commercial rate schedules have fuel cost rate adjustment clauses whereby increases in the cost of fuel are flowed through to the consumers on the basis of KWH used. Additionally, the tariff contains a yard lighting schedule. Special fees and charges are a $10.00 connect charge, a $25.00 fee for unauthorized breaking of meter seal, a $5.00 handling fee for dishonored checks, and a meter deposit in the amount of the customer's estimated two-month usage.

On July 1, 1976, the Commission received notice that Amfac Foods, Incorporated, 5600 Southwest Hampton Street, P. O. Box 23564, Portland, Oregon 97223 had acquired 100% ownership of WSI. This ownership change did not alter the previous filing, however.

The Commission is aware that the cost of fuel to the utility is continually changing and while the Commission is not averse to a fuel cost rate adjustment provision it

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 272-7487

believes this is a matter that must be monitored on a continual basis. The fuel cost rate adjustment surcharge will be accepted subject to conditions in the ordering paragraphs to follow. A separate docket will be opened for purposes of monitoring the results of this provision so long as it remains a part of WSI's tariff.

THE COMMISSION FURTHER FINDS AND CONCLUDES:

1. WSI is a public utility as defined by AS 42.05.701 and is subject to the Commission's regulatory jurisdiction.

2. It will not be contrary to the public interest to grant WSI a permanent certificate of public convenience and necessity.

ORDER

THE COMMISSION ORDERS:

1. The conditional temporary grant of operating authority to Wakefield Seafoods, Inc., on July 15, 1975, in Docket U-75-49 is hereby withdrawn and Wakefield Seafoods, Inc., is granted without time limitation or other special conditions a certificate of public convenience and necessity to furnish electric utility services at Sand Point, Alaska.

2. The tariff which Wakefield Seafoods, Inc., filed with the Commission on December 31, 1975, is approved.

3. The fuel cost rate adjustment clause filed by Wakefield Seafoods, Inc., is approved subject to the conditions in paragraphs 4 through 11 below.

4. Wakefield Seafoods, Inc., shall notify the Commission in writing as expeditiously as possible whenever

1168 MACKAY BUILDING
310 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 272-1463

a fuel cost rate adjustment is to be placed in effect in accordance with the clause approved herein. Notification to the Commission shall include:

(a) The amount and effective date of each rate adjustment and the period of service to which the adjustment is applicable; provided, however, that a fuel cost rate adjustment shall not be put into effect during a billing period if the fuel cost changes which gave rise to the adjustment pertain only to fuel purchases consumated after the 15th day of that billing period.

(b) Copies of actual bills received by the utility for fuel purchased at the latest cost and for the two most recent purchases preceeding that fuel cost change.

(c) A notarized statement by a principal officer of the utility setting forth the fuel inventories of the utility at the times of the purchases designated in (b) above; and the quantities of fuel consumed and the kilowatt hours sold during each of the 12 months preceeding the month in which the adjustment was placed in effect.

(d) A signed tariff sheet showing the computation of, and the effective date of, the surcharge.

1500 MALNAT BUILDING
328 D STREET
ANCHORAGE, ALASKA 99501
PHONE 272-1481

(e) Any other data and information which may assist the Commission to verify the reasonableness and propriety of the rate adjustmen..

5. Wakefield Seafoods, Inc., may place an adjustment into effect in conformance with the effective date of a tariff sheet as submitted but the revenues collected thereunder are subject to refund as provided in (7) below.

6. Wakefield Seafoods, Inc., shall expeditiously furnish any supplementary information which the Commission may request in connection with the tariff revision and subsequent fuel cost rate adjustments under that revision, and the burden of proof of the propriety of the fuel cost rate adjustments shall remain on Wakefield Seafoods, Inc.

7. Wakefield Seafoods, Inc., shall maintain accurate records of its fuel costs, and of the billing adjustments based on those fuel costs, and shall, if so directed by the Commission after investigation and hearing, promptly make to its customers such refunds or credits of the revenues resulting from fuel cost rate adjustment as the Commission may direct by written order. If so directed by the Commission pending investigation and hearing, Wakefield Seafoods, Inc., shall place in escrow, in a financial institution approved by the Commission, the additional revenues received by Wakefield Seafoods, Inc., under any fuel cost rate adjustment which it has instituted.

8. The fuel cost rate adjustment shall be shown as a surcharge on each customer's bill for electric service

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 272-1481

and may take into account only the amount by which the cost of fuel purchased after the effective date of this order exceeds the base cost of fuel which was used to compute revenue requirements in this proceeding or any other base cost which the Commission subsequently approves.

9. If, under the provisions of the fuel cost rate adjustment clause approved herein, Wakefield Seafoods, Inc., begins assessing surcharges to its customers to reflect increases in its cost of fuel used to generate electrical energy, it shall likewise make timely and appropriate reductions in the surcharges to reflect decreases in its cost of fuel.

10. Except as otherwise provided by the Commission in writing, within 45 days after the end of each quarter of the calendar year following the quarter in which any fuel cost rate adjustment is made, Wakefield Seafoods, Inc., shall furnish to the Commission, on forms furnished by the Commission, an interim report of the earnings of the utility for the quarter period then ended.

11. At the request of the Commission, Wakefield Seafoods, Inc., shall promptly prepare and file with the Commission an up-to-date revenue requirements study for the purpose of verifying that it is not earning an unreasonably high rate of return on its original cost rate base of utility plant used or useful in furnishing services for the convenience and necessity of the public.

DATED AND EFFECTIVE at Anchorage, Alaska, this 19th day of April, 1977.

BY DIRECTION OF THE COMMISSION
(Commissioner Susan M. Knowles not participating)

Re: SB No. 319, An act relating to the debt of public utilities

Dear Senator Orsini:

Upon reviewing the provisions of this bill, I find that although the bill may be well intended--to assure that the utility is not incurring debt at unreasonable rates of interest, or that the debt is reasonably required by the utility, it is unrealistic.

As small utilities can testify (some large ones, too), utility financing in Alaska is very difficult. The utilities, for the most part, are small entities, relatively new, and most have expansion requirements almost unheard of "outside". The Alaska lending institutions are unsophisticated in making utility loans. They expect a utility which oftentimes acquires assets with 20 to 50 year lives to be able to pay the loan in 5 to 7 years. Again, most of our utilities are too small to be of interest to the sophisticated money markets "outside".

The Alaska utilities have to (as in any business) obtain the best terms and conditions for their borrowing. To add a third element--approval by the APUC after a public hearing, further delays the obtaining of financing, quite possibly to the point where such proposed financing "dries up" and is no longer available.

The APUC reviews the fiscal operation of a utility as part of its determination if a proposed rate increase is in the public interest. As part of this review, the APUC would disallow excessive interest being paid on loans, or interest and debt service on loans not necessary for the present and prospective obligations to provide service. I believe this present method is an effective means of protecting the public.

Now, however, if you are seriously trying to assist the general public by doing whatever is possible to lower utility rates, why not use a portion of the "Permanent Fund" to create a revolving loan fund for Alaska utilities?

If you offered funds available at a reasonable rate of interest (say 8%) for necessary projects, then I could see the state having an interest in the borrowings of utilities, and possibly requiring APUC consent to borrow elsewhere.

SB 319 offers the public nothing except a delay in the installation of necessary additions or improvements, and the increased cost of government to impose this additional intervention.

If you desire further information, please contact me.

Very truly yours,

Re: SB #319, An act relating
to the debt of public utilities

Dear Senator Orsini:

The Alaska Public Utilities Commission currently has almost life and death control over all utilities in the State of Alaska. We have proceedings in a rate matter that have been going on for approximately 1½ years. The final resolution and outcome is still in dispute and doubt.

If the Alaska Public Utilities Commission is given control over loans, debts, and financial obligations of utilities to include the possibilities of public hearings, and involvement by the many departments of the Alaska Public Utilities Commission it is doubtful whether any utility shall ever again be able to borrow money in the State of Alaska. We believe that the adoption of this bill would be disasterous to the utilities of this state.

Sincerely,

GEORGE E. GORDON
President

COMMENTS OF THE ALASKA PUBLIC UTILITIES COMMISSION REGARDING SENATE BILL 320

The fiscal note contains monies for three additional staff for the Alaska Public Utilities Commission (APUC). (An attorney at the same range as the existing staff attorney, a Utility Financial Analyst III and a Secretary I.) The additional support staff for this proposed legislation would

(1) draft regulations implementing the provision for reasonable compensation for attorney's fees, expert witnesses and other costs of participating in proceedings before the APUC;

(2) analyze the applications from those individuals who contend that their interests would not be adequately represented in an APUC proceeding and determine those who are unable to effectively participate in a proceeding. Because of the costs involved and the payment of those costs from public finds, it is incumbent upon staff to examine these applications more rigorously than that currently given for petitions to intervene in proceedings;

(3) participate in preliminary proceedings to determine the eligibility of an applicant in the event a staff decision was appealed to the Commission.

(4) participate in proceedings before a court which could result from Commission determinations under this legislation.

In addition, the commission estimates based on 1976 actual hearing days (153), assuming eight hours of hearing time per day, that the attorney for a third party funded at $80 per hour would requie an appropriation of $97,920 on an annualized basis. The Commission has made the assumption that expert witness fees including other costs of participation in a proceeding would be for on half of the 1976 hearing days (76) at a rate of $350 a day for consultant fees. This total is $266,000. In addition, we have included $5,000 for travel by the proposed support staff of the APUC to implement this legislation.

Enclosure: As stated

April 4, 1978

The Honorable Al Ose
House of Representatives
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Ose:

IN RE: Senior Citizens Property Tax Exemption, AS 29.53.020

FY 78	Assessed Value	Exemption
Current Operation:	103,992,129	$1,512,800
Legislative Proposal:	138,309,532	2,057,379
Difference:	34,317,403	$ 554,600

FY 79		
Current Operation:	117,344,450	$1,919,025
Legislative Proposal:	154,894,674	2,515,220
Difference:	37,550,224	$ 596,195

The preliminary data outlined above is in response to the request for the probable impact of redefining "permanent place of abode" to exempt the senior citizen homeowner "total tract".

This information has been obtained largely by telephone from only those municipalities most likely to be heavily impacted by such a redefinition. No attempt was made to project the impact, should a more liberal program influence additional applications, it should be noted that this could be an important factor.

The estimates should not in any way be considered as other than assumptions for projection basis. A computer analysis of the FY 78 program is

being prepared by the Division of Data Processing. It is predicted that a detailed report will be available from Department of Administration Data Processing Division within a few days.

Sincerely,

LEE MCANERNEY

(3) PROGRAM EFFECTS OF BILL

Allows a blanket exemption of the land unit, regardless of area, on which the dwelling of the 65 years or older owner/occupant is situated.

(4) FISCAL IMPACT: ☐ NONE ☒ FISCAL ANALYSIS ATTACHED

(5) AMENDMENTS PROPOSED:

(6) COMMENTS:

Current administrative procedures allow sufficient land area for convenient use of the residential structure as a dwelling unit plus the residence as qualifying for exemption.

That part of the real property owned and occupied as the permanent place of abode is so defined. Sufficient land is limited to one acre if urban and five acres if rural.

The allowance of a blanket exemption would increase the amount reimbursed to municipalities by approximately 33 1/3%.

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

January 24, 1978

Present: Chairman Orsini, Senators Willis, Ferguson and Hackney; Bruce Aronson, C/RA; Marilyn Miller, Alaska Municipal League; Roger Allington, Alaska Coastal Policy Development and Planning; Glen Akins, DPDP; Annette Smith, HC&RA; Steve Mizera, Republican Caucus; Jack Chenowith, Legislative Affairs; Steve J. Kettlekamp, Exxon; Keith Arnold, Alaska Oil & Gas Association; Oren Pomeroy, C/RA; and Tim Bradner of BP-Sohio.

Absent: Senator Bill Sumner

SENATE BILL 388

The meeting was called to order at 3:15 by Chairman Orsini who announced the formation of a subcommittee to deal with village land reconveyances occuring under paragraph 14 (c) of the Alaska Native Claims Settlement Act. Senator Ferguson was appointed Chairman. Senators Hackney and Orsini were appointed members. Senator Ferguson agreed that the subcommittee would be able to make a report to the committee within a month.

The committee first took-up CSSB 388. The two Co-chairman of the Alaska Coastal Policy Council, Frances Ulmer and Roger Allington, had been invited to present their views of the effects of CSSB 388 on the functioning of the council.

Council Co-chairman Allington referred his letter of January 23, 1978, to Senator Orsini, in which he supported SB 388's provision for the selection by the Governor of alternative members to fill unexpected vacancies in the council.

Co-chairman Ulmer concurred with Allington's assessment and noted that the question of the appointment of alternate members had been heatedly debated in the council without achieving a clear concensus.

She also cautioned against too great an attempt to restrict the number of alternates available for the governor's selection, but she believed that CSSB 388 would clarify the question of the alternate's qualifications. She suggested that assistant, as well as deputy commissioners be designated as acceptable substitutes for State commissioners in the council.

Marilyn Miller, representing the Alaska Municipal League, testified on CSSB 388. She stated that the League would prefer to see public members on the council appoint their own alternates in order to maintain a continuity of view point.

This completed public testimony on CSSB 388. Senator Ferguson moved that CSSB 388 as drafted be passed out of committee with individual recommendations. The committee vote was 2 Do Pass, 1 Do Not Pass Without Amendment and No Recommendations.

DISCUSSION OF ALASKA COASTAL MANAGEMENT PROGRAM

Chairman Orsini recalled Alaska Coastal Policy Co-chairman Frances Ulmer and Roger Allington to discuss the work of the council regarding the submission of its standard and guidelines to the Legislature. He pointed out the importance of the Legislature receiving these regulations in sufficient time this session to give them adequate consideration. He stated the intention of the committee to work with the unofficial draft regulations during the public hearing process in order to become as familiar as possible with the proposed regulations before their submission to the Legislature in April.

Council Co-chairman Ulmer told the committee that the council had recently completed a new draft of its regulations, copies of which had been made available to legislators. A sixty day hearing process would be underway shortly with public meetings throughout the state. The council believed that the regulations would be ready for submission to the Legislature in early April, following a final council meeting on the regulations in Juneau, March 24 and 25.

Ulmer stressed the need for legislative action on the Coastal Management Program this session in order to allow the state program to receive federal approval by December of 1978. She indicated that there had been some question within the council whether the regulations constituted a part of the program and also required legislative approval, the consensus of the council was that the regulations also required legislative action to accept them.

Glen Akins, Director of the Office of Coastal Management, outlined for the committee the situation in Washington State and Oregon where federal approval for these states' coastal management programs was given before all the local programs were completed. He noted, however, that court challenges against this practice are underway.

He also pointed out that the role of the federal government in funding state coastal programs is significant. So far approximately $3 million in federal funds have been used in Alaska to finance state and local efforts. Approximately $250,000 in state funds have been allocated to this purpose. Without federal approval next year, Akins believed that this financial obligation would have to be borne completely by the State.

In response to Chairman Orsini's question on the concept of federal consistency, Akins replied that Federal agencies have observed state coastal policy when public groups, local governments and the state government united behind one position. Ultimately, however, the Secretary of Commerce would be the arbiter in any dispute between a state and federal agency over federal consistency provisions.

SENATE BILL 372

The committee voted unanimously to pass SB 372 out of committee following the explanation of Senator Willis that the bill was intended to rectify a drafting error regarding a reference citation of Senate Bill 37 to the Alaska Statutes. There was no public testimony.

SB 372

Municipality of Anchorage

GEORGE M SULLIVAN,
MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

August 26, 1977

Senator Edward C. Willis
Box 402
Eagle River, Alaska 99577

Re: Senate Bill No. 37/Chapter 48 SLA 77.

Dear Senator Willis:

During the First Session of the Tenth Legislature, you co-sponsored Senate Bill No. 37 entitled "An Act Relating to the Sale, Repurchase and Disposition of the Proceeds of the Sale of Tax Foreclosed Real Property". This bill was subsequently enacted by the Legislature as Chapter 48 SLA 77. As you remember, your bill amended various portions of AS 29.53 dealing with foreclosure procedures by local government. Specifically, the bill was intended to prevent the loss of valuable interests in real property through inadequate notice or the inadvertent actions of local government. I believe you are familiar, for example, with the situation involving property originally owned by Mr. Russell Oberg in the Chugiak/Eagle River area.

In studying provisions of Title 29 concerning tax foreclosure, I have recently discovered that several of the sections in AS 29.53 are omitted from the list of sections applicable to home-rule municipalities under AS 29.13.100. As you can see from the attached copy, the provisions of AS 29.53 that are applicable to home-rule municipalities in Alaska end with Section 350. It is therefore apparent that the portions of your bill (SB 37) amending Sections 370-380 of AS 29.53 could be construed to be inapplicable to the Municipality of Anchorage as a home-rule local government. However, I want to assure you that it has been the Municipality's policy to follow the provisions of AS 29.53 in the foreclosure, sale or dedication of real property.

I was very happy for the opportunity to provide you with input in Juneau concerning the Municipality's interests in SB 37 and appreciated your concern in developing a bill that adequately protects both the interests of local governments and affected property owners in tax foreclosure proceedings. I therefore felt that you should be advised of my findings concerning the problems with applying this measure, as presently written, to home-rule municipalities. You may wish to consider submitting a brief amendment to AS 29.13.100 that would apply all of the sections of AS 29.53 included in SB 37 to home-rule municipalities. Since there will not be another round of tax foreclosure proceedings until next year, present questions concerning the applicability of SB 37 to the Municipality of Anchorage should not cause any problems in the near future. If I can be of any further assistance in this matter, please feel free to call me at 264-4349.

Sincerely yours,

Theodore D. Berns
Assistant Municipal Attorney

Dear Senator Orsini:

This letter is to comment upon SB 373. At its regular meeting on January 19, 1978, the Southeast Island School District Board went on record against the bill.

The public is informed of the results of negotiations in the Southeast Island School District, and has the opportunity to express its opinions to Board members directly as well as through the electoral process.

Also, it was felt that the bill would needlessly prolong the negotiations process in school districts such as ours.

Sincerely yours,

Richard Madden

Dear Senator Orsini:

I feel that Senate Bill No. 373 is excellent in that it would give the public a say in how their funds are negotiated away. I also feel that this bill would get the people more involved in their schools.

Thank you.

Sincerely,

Mike Dean, President
Petersburg School Board

Dear Senator Orsini:

Thank you for permitting us the opportunity to comment on several bills before your committee.

Our comments are as follows:

Senate Bill 373 - No Comment

Senate Bill 374 - We would have no objection to this bill provided we can continue to apply for and receive leases to tidelands under the present methods, however, if this would infringe upon that right, we raise strong objections to any interference with our right to obtain tide or submerged lands.

Senate Bill 388 - We support this bill.

Senate Bill 375 - We support this concept for loans to municipalities as defined for construction or renovation of capital facilities.

Thanks again for the opportunity to comment.

Very truly yours,

Perry D. Lovett
City Manager

Dear Senator Orsini:

Accepting Senate Bill 373 on face value, it appears to be a sound proposal. The Skagway City School Board would be delighted to make all aspects of negotiations public. In fact, this topic is discussed each year in our preliminary meetings.

Although after a careful examination of this proposal, one can see that it would be a cumbersome and time consuming process. Negotiations are unwieldy at best, and with this additional time factor built in, it would create an impossible situation.

Sincerely yours,

Gordon C. Tope

Dear Joe:

The Municipality of Anchorage has opted out of the State Labor Relations Act, so SB 373 will not affect us at this time.

I did have the bill reviewed by our Labor Director and he does find some fault with the Legislation. Feel free to contact him if you wish. His name is Fred Jones and he can be reached at 264-4424.

Best personal regards,

George

February 3, 1978

The Honorable Joe Orsini
Senator, Alaska State Senate
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

Thank you for your letter of February 1, 1978. We have given some consideration to SB 373 and would offer the following comments and suggestions.

Section A. Public Notice. This section's intent is commendable. The realities of public sector bargaining provide a situation which could place governmental units at a distinct disadvantage if only the governmental proposal were made public. To remedy this possibility, I would suggest that both sides be required simultaneously to release their proposals at the first meeting between the bargaining teams.

Section B. I agree with the intent of this section. To expedite negotiations, I would suggest limiting the amount of time which elapses between the release of the documents and the beginning of bargaining sessions. Two weeks might be appropriate.

Section C. This section poses a possible syntax ambiguity in possible interpretations of the word "proposal" in sections B, C, and D. This section requires public review of only the public employer's proposal. I believe the public meeting should be held to review both parties' proposals. Then action could be taken by both parties prior to convening negotiations.

Section D. It should be made clear that the disclosure provisions of this section would apply equally to proposals of both parties.

We would offer the following ideas for further consideration.

Section A. Initial proposals of both public employer and employee organizations must be made a part of the public record at a public meeting of the parties.

Section B. Negotiations between the employer and the employee group may not resume until a public hearing on both proposals has been held under the sponsorship of the public employer or by a mutually acceptable third party.

NOTE: It might not be necessary for the public body to adopt its initial posture since, by inference, they would have already done so in making an offer. The public hearing would allow them to modify their position prior to resuming negotiations.

Section C. Comprehensive reports to the public on the progress and scope of negotiations, including full disclosure of signed articles between negotiating teams, should be made at least weekly. This would allow necessary give and take to occur between negotiating teams without excluding public comment.

Public knowledge of, and participation in, the activities of employee groups and public employers is a worthwhile goal and one which merits our support.

Sincerely,

John B. Peper

John Pugh, President
5017 Seton Circle
Anchorage, Alaska 99504

Dear Mr. Pugh:

I have enclosed for your review a copy of Senate Bill no. 501 ("An Act relating to municipal labor relations"), which concerns procedures for binding arbitration in matters involving local public employees, both municipal and school district.

I would very much appreciate your comments and assessment of this proposed legislation so that the Senate Community and Regional Affairs Committee will be able to benefit from your views when it takes up the measure later during the session.

I would like to point out that SB 501 is designed to allow local government or the appropriate administrative body the option adopting either or neither of these means of settling local public collective bargaining disputes. It is not my intent for the legislation in any way to mandate these forms of arbitration to the local governing body, but to permit it to select the most flexible course of action possible and locally desirable.

In this respect, I would also appreciate any suggestions you may have on ways in which SB 501 might be refined or made more responsive to local requirements.

Sincerely,

Joe Orsini

M E M O R A N D U M March 17, 1978

SUBJECT: SB 373; collective bargaining

TO: Senator Joseph L. Orsini

FROM: Richard A. Bradley, Legislative Counsel

After the hearing on SB 373 recently, you asked me to comment on one question.

The testimony offered on SB 373 suggested that some municipalities and school districts had provisions in their collective bargaining agreements stipulating that negotiations under the agreement would be undertaken in private.

Your question to me was whether in the context of such a provision, the municipality or school district retained the authority to adopt an ordinance which would mandate collective bargaining in the public's view.

In my opinion, a municipality or school district retains the right to determine the public policy of the community it speaks for. Therefore, a municipality or a school district may adopt an ordinance or resolution articulating such a policy.

In areas such as the protection of civil rights, restraints inconsistent with that goal may be expected to yield and the fact that the restraints are located in contracts has not been found significant. Southern Illinois Builders Assn. v. Ogilvie, 327 F. Supp. 1154 (S.D. Ill. 1971) and Contractors Assn. of Eastern Pa. v. Sec. of Labor, 442 F. 2d 159 (3rd Cir.) cert. den., 404 U.S. 854 (1971), aff'g. 311 F. Supp. 1002 (E.D. Pa. 1970). See also Federal Housing Authority v. Darlington 358 U.S. 84, 91 (1958); Fleming v. Rhodes, 331 U.S. 100, 107 (1947).

In my opinion, the strong public policy in favor of the public's right to know what government is doing militates toward a similar conclusion. In any consideration of such a move, a municipality or school district presently operating under such a contractual provision could move to an open policy in stages by either declining to negotiate such a provision in renewals of agreements or providing by ordinance for open negotiations in all future agreements.

TO: Senator Joseph L. Orsini

FROM: Richard A. Bradley RB
Legislative Counsel

The committee substitute requested is enclosed.

I believe it is straightforward and responsive to your request.

Note one feature of collective bargaining at the present time in Alaska:

(1) AS 23.40 applies to the executive branch of the state government, the University of Alaska, and municipalities except as to "teachers or noncertificated employees of school districts." AS 23.40.250(5).

(2) AS 14.20.550 et seq. applies to certificated employees of school districts, including REAAs.

(3) No law governs the collective bargaining by noncertificated employees of school districts or REAAs.

Accordingly, the bill addresses only those parts of the collective bargaining process presently authorized by statute.

Dear Dr. Peper:

Thank you for your letter of March 21 commenting on House Bills 681, 853 and 489. I know that you and your staff are fully occupied with immediate school district matters, so I do appreciate your taking the time to write on pending legislation.

Your earlier comments on the first draft of SB 373 were particularly useful to the Committee and they served as the basis for a proposed committee substitute. I have enclosed a copy of the redraft for your information and also for any further assessment you may wish to make.

I also hope that the Anchorage School District might be able to participate on March 30 in the video-broadcast hearings this Committee will hold on SB 501 (relating to the resolution by the public of public collective bargaining impasses) and, as time permits, on CSSB 373 as well.

You have my sympathy and full understanding regarding the deluge of regulations and new legislation affecting education. Hopefully, the flood can be brought under control or at least kept to measures truly benefiting municipalities and school districts.

Sincerely,

Joe Orsini

Re: Senate Bill No. 373 - Public Notice of Negotiations.

Dear Senator Orsini and members of the committee:

I would like to make comments on Senate Bill No. 373 that proposes to take negotiations for public employees out of their normal business like closed sessions and place the negotiations into a public arena. Throughout history we have witnessed the removal of certain functions from their normal environments and placed in public arenas. One that comes to mind was the removal of the trial of Christians from the Roman Empire courts and placed in townsquares and coliseums. That blood bath was slowed to a trickle when the trial of these people was removed from the public arena and returned to the court rooms.

Justice for the blacks of the south was at one time determined by public gatherings of whitehood "saints" using emotions not reason and law. The only hope of justice for the southern black is in the courts with appeals processes that extend north. I have used what some may call rediculous examples of taking a function out of its proper arena but they nevertheless graphically portray the thought that not all processes should be made public.

Black's Law Dictionary defines negotiate as "that which passes between parties or their agents in the course of or incident to the making of a contract..."

and defines negotiation as "the act of settling or arranging the terms and conditions of a bargain, sale, or other business transaction."

I doubt that free enterprise, international relations or courtship and marriage proposals could survive in an arena of public disclosure of all proposals made. Labor negotiations is a closed businesslike process of proposals and counter proposals, give and take and compromise. The finished product seldom resembles the original proposals but what emerges is a workable document reflecting the ideas and needs of both sides.

To suggest that private enterprise conduct all negotiations as per the concept of Senate Bill 373 would be met with contempt and scorn from both management and labor. I cannot belive that the best interest of municipalities and municipal employees will be met by removing their negotiations from a businesslike private arena to a public arena where emotions and irrationality often run wild. This piece of legislation appears to be a cure that will end up killing the patient. I suggest that you look again at the ailment to see if a cure is needed and if it does then look at the alternate cures. The cure should not have bad side effects that are worse than the original ailment.

Sincerely,

CARPENTERS LOCAL UNION 1281

March 30, 1978

Alaska State Senate
Community and Regional Affairs Committee
Joseph L. Orsini, Chairman
Pouch V
Juneau, Ak. 99811

Dear Senators, Senator Orsini

The following is the testimony I verbally gave today via the Teleconference Hearing on SB 501 and CSSB 373:

Mr. Chairman and Senators, I'm Sue Linford speaking as a private Alaskan citizen of 24 years and former member and President of the Anchorage School Board. Currently, I am Chairman of the Anchorage Chamber of Commerce Education Committee and Representative from Alaska PTA to the Ruralcap Board of Directors. (*)

As a preface to my remarks, the concept presented in both 501 and 373 is an ideal and as an ideal it is presented as the perfect solution to impasse resolution in collective bargaining. Unfortunately, when dealing with fallible imperfect humans and human behavior, perfection is impossible. I oppose both pieces of legislation for one overall reason - they limit local control. Both pieces further narrow local governments' authority and ability to discover their own imperfect solutions to the perfect problem i.e. impasse resolution. The State would be better advised to spend the taxpayers' money on on-going training of employee groups and elected officials around the state in various techniques which will help insure fair collective bargaining, that is to better learn the rules of the game as it currently exists.

Regarding specifics of the bills - In speaking to both bills, my particular point of view is their effect on school personnel. I don't have to tell you that there is a vast difference between public and private sector negotiations; I also do not have to convince you, or you wouldn't be serving, of the greatness of the democratic institution of representative government. Put these two points together and you have the voters' elected representatives with the fiduciary responsibility for the public funds under their direct control. Further, this representative responsibility can not be fragmented or our checks and balance system will no longer work. I'm referring specifically to SB 501 Sec. 1, g, (1) - First of all, the panel suggested duplicates already existing elected bodies which have the OVERALL governing responsibility within their particular jurisdiction and areas of expertise. To add another layer, further insulates government from the direct voice of the people. If we were to deal with all local government problems in this manner, we would have taxpayer dollars spent for elections of ALL kinds and for ALL manners of panels. The result being - no ONE person or body where the BUCK actually stops. Also the politics of electing the panel suggested is lethal!

It is open to special interest manipulation not to mention the built-in invitation once elected for influence-buying and corruption. In other words, the bill suggests developing a democratic Frankenstein which is NOT responsible to or for the overall day-to-day governing of its public but rather a very narrow, specialized area called arbitration.

In Sec. 1, g, (2) - At a time when public sector bargaining is just barely being understood, this bill suggests submission of issues in dispute to an election of the voters, thereby changing entirely the rules of collective bargaining!

In conclusion, I'm reminded of a poker game in which heavy betting has taken place on specific hands; finally, when all bets are placed and a winner is about to be determined, a passerby comes to the table, picks up the hands, shifts some of the cards around, throws down one hand, points to a person and declares both the hand and the person the winner - then he turns and disappears into the sunset. . .

Regarding CSSB 373 - This substitute is much better than the original bill eliminating much of the poor wording and loop holes and seems fairly innocuous, however, I'm still opposed for the reason previously mentioned - limits local control. Additionally, I do question the wording in paragraph (b) - How do you envision the public "expressing itself?" and in paragraph (c) - What is meant by "the labor relations agency?"

Thank you.

Sincerely,

Sue Linford

(*) All of these organizations have taken a position opposing binding arbitration even Ruralcap, indirectly, through its co-sponsorship with the State of the Citizens Participation Conference at which the delegates from the rural areas of the State took the position against it.

MEMORANDUM TO: Community and Regional Affairs Committee

Subject: Governor's appointments

The President referred the following appointees to your committee for hearings, report and recommendation in accordance with AS 39.05.080:

MUNICIPAL BOND BANK BOARD

Lance Anderson, Kotzebue, term expiring July 15, 1981

Secretary of the Senate

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

March 7, 1978

Present: Chairman Orsini, Senators Willis, Hackney, Ferguson and Sumner; Cherie Shelley, APEA: Marilyn Miller, Alaska Municipal League; Guy Stringham, District Council of Laborers; Bob Van Houte, NEA-Alaska; Bruce Aronson, Department of Community and Regional Affairs; Sharon K. Young, Alaska Association of School Boards; John Coffee, Alaska Association of School Boards; Bob Greene, Alaska Association of School Boards; Bob Cooksey, NEA-Alaska; Caroline Wohlforth, Anchorage School Board, John V. Voor; Pat L. Hunt, Administration.

SENATE BILL 373

Chairman Orsini said that it was his intent in introducing SB 373 to provide the means whereby the public would be informed of the initial negotiating position of both sides at the onset of collective bargaining in the public sector. He said he also wished to have any new positions developed or proposed during the course of negotiations also brought to the public, but that it was not his intention in the legislation to open the negotiating process itself to public scrutiny. He then opened the hearing to public testimony.

Cherie Shelley of the Alaska Public Employees Associations (APEA) said that her organization opposed the bill as drafted although she found the language of the proposed committee substitute better than the original bill. She was concerned that the publication of the two sides' initial positions would lock the negotiating teams into inflexible positions from which the negotiators would feel they could not retreat. Such a situation would inhibit the course of true negotiations and easily result in rapidly deadlocked talks. In response to a Committee member's question, she said she was not aware of instances in other states where such procedures were practiced.

Patrick Hunt, Director of Labor Relations, said that he supported the concept of the bill, particularly in the proposed committee substitute version. He questioned, however, the need for paragraph (c) and instead suggested that periodic status reports might be required to keep the public abreast of the negotiation's progress. He pointed out there was a great deal of give and take during the talks with numerous informal and tentative suggestions made. It would be difficult to determine under paragraph (c) whether those suggestions would be classified as "new subjects". He believed that the flexibility and informality of the present talks assisted materially in reaching innovative agreements.

Guy Stringham, Vice President of the Alaska District Council of Laboroers, expressed his organization's concern that the publication of the two sides' initial bargaining position would lock them into those positions through the negotiations. He believed that negotiators would fear that any compromise reached during negotiations would be regarded as a form of betrayal by the more extreme elements of the two sides' respective constituencies and stressed that the publication

of the initial positions cuts away the middle ground from the negotiation process. Since the public at large is not conversant with the negotiation process, its members would tend to react emotionally and that would damage the prospects of a satisfactory settlement.

In response to a Committee member's question, Mr. Stringham said that the Laborers Union represented 11,000 members in Alaska of whom 3,000 were public employees.

Caroline Wohlforth, representing the Anchorage School Board, said she found SB 373 an extremely positive piece of legislation and especially like the provisions of paragraph (d) of the proposed Committee Substitute. She said that she continued to support the concept of some confidentiality in the negotiation process, but the public, through its tax support of local government, was too important for it not to have greater involvement. In regard to paragraph (c), she said she believed either the provisions of the paragraph or the periodic report suggested by Mr. Hunt would be satisfactory. She did note, however, that the ground rules of negotiations she was familiar with did not allow new subjects to be raised following the presentation of the initial bargaining position. She noted that school boards frequently did not participate directly in the contract negotiations but used negotiators to whom the board gave explicit and on-going instructions.

Robert Greene, representing the Alaska Association of School Boards, said that school boards in Alaska have historically been reluctant to enter the public arena regarding contract negotiations. Recently, however, that point of view has begun to change and boards are considering new approached. He noted that one district (Kodiak) had negotiated in public recently without difficulty, although most unions preferred confidential negotiations. He believed that paragraph (c) of the proposed committee substitute was unnecessary since, as pointed out by Caroline Wohlforth, new subjects were not accepted during negotiations once the initial bargaining position had been presented. He said that as the boards gained more experience with more open negotiations that the process envisioned in SB 373 would speed up contract talks and would assist in reaching settlements.

Robert Van Houte, representing NEA-Alaska, said that the teachers organization would have no general problem with the public presentation of initial proposals, although he would prefer "made available to the public" rather than "presentation". Regarding paragraph (b) of the proposed committee substitute, he believed a specific time should be inserted instead of "reasonable time". Regarding paragraph (c), he said that status reports would be acceptable in the unlikely event that new directions were undertaken during the course of negotiations. Regarding paragraph (d), he said that procedures already existed to cover these needs and that he feared the "full -page ad syndrome" might otherwise occur.

Marilyn Miller, representing the Alaska Municipal League, said that the League had not adopted a position on this issue and asked whether municipalities could not presently establish similar collective bargaining procedures by ordinance if they so wished. If such was the case, then would legislation at the state level be necessary? Mr. Green commented that previous agreement which many municipalities have made with labor organizations have precluded them from exercising this option.

In the concluding discussion with Committee members, Mr. Hunt pointed out the teachers were exempted from the provisions of AS 23.40 and expressed the hope that the proposed legislation would not be modified as a result of their expressed views. He also asked that consideration be given to authorizing the State Labor Relations Agency to carry out the provisions of paragraph (d) of the proposed committee substitute. Mr. Greene noted that there was pending legislation which would bring teachers under AS 23.40.

This concluded public testimony on SB 373, and Chairman Orsini adjourned the meeting at 4:30.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

March 23, 1978

Present: Senators Orsini, Willis, Hackney and Sumner, Kenneth Kareen, Department of Administration; Sandra Withers, Department of Administration; Lee Sharp, City and Borough of Juneau; Doug Griffin, Department of Community and Regional Affairs; Dave Klemmer, Department of Revenue; Jim Rolle, Alaska Municipal League.

Absent: Senator Ferguson

SENATE BILL 430

The meeting was called to order by Chairman Orsini. The Committee had before it a proposed committee substitute based on the draft submitted by the Alaska Municipal Bond Bank Authority with one amendment recommended by the City and Borough of Juneau to clarify the legal obligations of municipalities.

Dave Klemmer, Department of Revenue, testified that Commissioner of Revenue Sterling Gallagher had recommended a $75 million ceiling be placed on the sale of revenue bonds. He pointed out that the State of Alaska was initiating a new concept with the revenue bonds authority and that the $75 million ceiling would provide a 1:3 ratio marketing ratio for the combined general obligation bonds ($150 million) and revenue bonds ($75 million).

Jim Rolle, Alaska Municipal League, opposed the placing of a ceiling on revenue bond sales since the needs of municipalities in this area could quickly exceed $75 million.

Chairman Orsini asked Mr. Klemmer to put his Department's views in writing for the Committee.

SENATE BILL 373

Sandra Withers and Kenneth Kareen, Department of Administration, asked about the implementation of the bill. In particular, Ms. Withers asked what penalties were involved for failure to adhere to the bill provisions and Mr. Kareen questioned the inclusion of the Labor Relations Agency in adopting regulations under Sec. 14.20.565(c) since school teachers were not presently affected by the statutes. However, he stated that the Department of Administration supports the committee substitute for SB 373.

Chairman Orsini noted that the provision for issue progress reports, found in the original draft of the bill, had been deleted in the proposed committee substitute because earlier testimony had indicated that it was not likely to be productive. Senator Hackney asked that the comments of APEA and NEA-Alaska be obtained when this bill was brought up in committee again. Chairman Orsini announced that the C&RA committee meeting on March 30th would be a video-conference hearing on Senate Bills 501 and 373, held in the Governor's Conference Room. The meeting was adjourned at 3:55.

TESTIMONY FROM VIDEO-CONFERENCE
C&RA COMMITTEE MEETING ON SB 501 & 373

March 30, 1978

Present: Senators Orsini, Hackney, Ferguson and Sumner

Absent: Senator Willis

Chairman Orsini called the meeting to order and explained that the meeting was on a video-conferencing network tied into Nome, Bethel, Fairbanks, Anchorage and Ketchikan.

Senate Bill 501, relating to municipal labor relations and Senate Bill 373, relating to public information regarding collective bargaining by public employees were the bills before the committee.

Gary Akerman - Fairbanks - Public, Labor Union Member - Stated that negotiations were a matter between the employer and employee. Felt that these are the two people involved and they can best negotiate something out between themselves. Stated that he felt the same way about SB 373.

Walt Bonnet - Anchorage Chamber of Commerce - Public - Stated that he was opposed to any act which brings about binding arbitration in the form of impasse resolution and labor disputes with any public employees - consistent with this is opposition to the concept of submission of dispute directly to the voters. Stated that public employees salaries, benefits and terms of employment are a most significant aspect of municipal government. The function of management of public employees is historically and ideally vested in the elected offices of the Mayor, Assembly and School Board. Third party panel will never create substantial public awareness and what is worse will never resolve the question of whether one of the parties was being irresponsible in the role of negotiating. It reduces public awareness of negotiation proposals and settlements and reduces public scrutiny in the roles played by the principals charged with the negotiation functions. This dissolving of direct accountability to the elected official or representative of a bargaining unit is the single most negative facet of the binding arbitration.

Caroline Wohlforth - Anchorage - President of Anchorage School Board- Stated that SB 501 strikes at the core of elected officials. The policies and relations between employers and employees are most effectively dealt with by their own elected officials who have that responsibility to the public. She also stated that if government was run by referendum there would be no need for government. She stated that on the same basis they questioned the use of binding arbitration as a means of settling a dispute which arise in negotiations. She went on that under our system, management and labor have certain perogatives during negotiations, binding arbitration would deny both parties of this perogative and result in governmental policy making outside of government.

Sharon Walker - Ketchikan - Ketchikan Gateway Board of Education - It is the opinion of the Ketchikan Gateway Board of Education that

binding arbitration in any form in municipal labor relations deletes the authority and the responsibility of the duly elected local official. If a local municipality attempts to exempt itself by the election of an arbitration panel then that panel itself becomes another level of government and the election of those members become paramount on any issue of labor relations. If an election is held on the issue of impasse then the management unit of local government must spend local tax dollars in an effort to inform the voters as to the background and reasonings behind their offer. She stated that it was the Board's opinion that either method is unsatisfactory and cannot support either of the bills.

John Carlson - Fairbanks - Mayor, North Star Borough - Comments basically on SB 373. Opposed to any effort from the State Legislature to further direct local government in collective bargaining procedure. He stated that the procedures and policies implemented in collective bargaining can best be addressed at the local level. Strongly opposed to binding arbitration from an outside arbitrator. Felt that it was in the best interest of the local municipality to determine their own labor relations policy. He brought out in testimony on the 3 member arbitration panel that there should be some indication of how to replace a person that has been elected to the board.

Millett Keller - Anchorage - V.P, Anchorage School Board - Stated that he has strong feelings about the philosophical implications on our entire form of government that binding arbitration in the public sector brings to the front. He stated that collective bargaining has served the Alaska public employees quite well. Binding arbitration is where he has to draw the line. He stated that with binding arbitration we are taking the most powerful force we give our government: the ability to tax and giving it to someone who doesn't account to the voters. He stated that the voters want and demand that their elected officials face up to all the tough issues and represent the public by making these decisions. He stated that the Anchorage School Board does not support SB 501. He stated that he was in favor of revealing to the public what collective bargaining offers are, in favor of SB 373.

Bob Collins - Ketchikan - APEA of Ketchikan - Supports SB 373 and opposes SB 501. Stated that SB 501 is fatally flawed in several respects. Arbitration panel elected by the voters is a poor idea. Elected arbitrators in smaller communities would be inexperienced in collective bargaining and labor law and procedure, municipal finance, personnel management and other matters pertaining to collective bargaining. Stated that elected arbitration panel would achieve improperly arbitrated decisions on collective bargaining disputes; these in turn would lead to extensive litigation. Submitted disputes to the voters is also a poor idea. Voters are largely uninformed about collective bargaining issues. That being the case if the issue is submitted to them it becomes a media battle.

Rosemary Porter - Bethel - Public - She stated that on SB 501 the amendment may be necessary because it does give municipalities options and anything that gives municipalities options has got to be a good thing. She stated concern on the 3 member elected arbitration panel because it tends to put arbitration in a political form.

Robert Johnson - Anchorage - Teamsters, Local 959, opposed to SB 501, consider it both irresponsible and dangerous to free collective bargaining. He stated that it has the potential of destroying collective bargaining even though it pretends to follow the ultimate in democratic process. He also stated that it is for better or worse the duty of an elected official within local cities to carry out both the legislative and executive functions. He stated that collective bargaining was one of those executive functions. The delegation of this function is called forth within this bill. He went on to say that the people in the local union did not see any need for this legislation.

Bob Garza - Ketchikan - Ketchikan Central Labor Council & IBEW, Local 1547 - He stated that these two organizations were opposed to SB 501. He said that there are enough problems with the public employees relations now without adding further confusion and additional costly elections to elect people who are perhaps unqualified in labor disputes.

John Alexander - Anchorage - IBEW, Local 1547 - Oppose both pieces of legislation. He stated that it further complicates collective bargaining. Does not see any need for this legislation. Also stated opposition to personalities when it came to voting on a 3 member arbitration panel. He said that this would probably prolong the bargaining process. Stated that he had gone through impasse in past and has been able to work out their differences on their own with any outside arbitrator.

George Pearson - Anchorage - President of Alaska State Council of Carpenters - Is opposed to SB 501. He said the reason state confusion and poor labor relations exist because of continual adoption of new labor relations legislation or employee regulations. Continually adding options and revising these is not helpful stability within the state.

Diane Carpenter - Bethel - Public - Is oppoed to SB 501. She stated that one concern was with the public being the deciding factor. She thought that it was very difficult for the general public to be well informed on the complex issues that are involved in negotiations to be able to make a good determination on those issues. She also stated concern about the 3 member arbitration panel. She felt that it would be the place of the two parties involved to select who should be on the panel. On SB 3737 she stated that initial proposals should be kept confidential and should be negotiated in private. If there was an impasse she felt that the public has a right to know what the issues are that are at impasse and at this point each parties should be willing to make their positions known to the public so that they can through the political process influence the final outcome.

Allen Winterstein - Chairman, Lower Kuskokwim Pace Committee - opposed to SB 501. He stated that this bill puts items of impasse between the public employees and employers before the voters to determine. He stated that this would be detrimental for several reasons. People generally vote no on that which they do not understand and on items that cost money. This bill would destroy the current negotiations procedure.

Ben Clayton - Anchorage - Fire Fighters, Local 1264 - He testified

on SB 373 and said that his remarks also apply to SB 501. He felt that if collective bargaining impasse was brought to the public for a decision, there would be emotionalism involved and it would also lose the compromising technique. If the public voted they would have to vote one way or the other - no compromise.

Sue Lindford - Anchorage - Public - Opposed to both bills basically for one reason -- they limit local control. Both pieces further narrow local government authority and ability to discover their own inperfect solution to the perfect problem - impasse resolution. She went on to say that the State would be better advised to spend the tax payers money on on-going training of employee groups and elected officials around the state and various techniques which will help to insure a fair collective bargaining.

Mason West - Anchorage - President of the Alaska Community Colleges Federation of Teachers - Stated they fully oppose SB 501. He stated that it improperly addresses the need of labor or management in the process of collective bargaining. He believed that both parties should be the deciding parties. He stated that with an elected panel of arbitrators you would be subjected to corruption, inability and influence which would make it to political.

Senator Hackney adjourned the meeting after completion of State-wide testimony on SB 501 and 373.

SENATE COMMUNITY & REGIONAL AFFAIRS
COMMITTEE MEETING

April 18, 1978

Present: Senators Orsini, Willis, Hackney and Sumner; Cherie Shelly, APEA; Jon Scribner, Department of Environmental Conservation; Lowell Swartz, Department of Health, Education and Social Services; Richard Peter; Robert L. Cole, Department of HESS; Robert L. Stewart; Greg Mackyowsky, Code Revision Commission; Bob Van Houte, NEA-Alaska; Richard Holden, Department of Transportation and Public Facilities; Janice Gates, Department of HESS.

Absent: Senator Ferguson

Senate Bill 373, relating to public information regarding collective bargaining by public employees; Senate Bill 533, relating to planning of public facilities for municipalities; Senate Bill 183, relating to alcoholic beverages and House Bill 795, appropriations for Fairbanks Town and Village Assoc., for Development, Inc., were the bills before the Committee.

SENATE BILL 373

Chairman Orsini stated that there was a committee substitute for this bill which covered most of the testimony that was heard on the bill. Senator Hackney moved that the Committee pass out SB 373 with individual recommendations.

HOUSE BILL 795

Senator Hackney moved that the Committee pass out HB 795 with individual recommendations.

SENATE BILL 533

Jack Chenoweth, Legislative Affairs Agency, explained the committee substitute draft to the Committee members. Section 1 is from the original bill. Section 2 derived from draft provided by Richard Holden, DOT, requiring that there be a state-wide comprehensive facility procurement plan done by the Commissioner. He also explained that he had defined "public facility", which was of some concern to the Committee last meeting. Section 3 expands upon the public responsibility of the Department of Community and Regional Affairs in this process.

Chairman Orsini stated that he would like to pin down the concepts and make the initial changes in the bill Thursday.

Janice Gates, Department of HESS, called attention to the Committee that on Page 2, Sec. (d) dealing with health care facilities that "in communities without such facilities", was confusing and unnecessary. The Committee discussed the rest of the items on that page and it was brought out that there was other language that was not particularly necessary. The language would be revised for Committee consideration on Thursday.

Richard Holden, DOT, stated that a repealer, which states that highways and ferries are not a "public facility" was left out of the work draft.

Senator Sumner expressed concern regarding the health care and social services facilities in private finance facilities. He stated that there were serious questions regarding the "certificate of need" and whether that is not some sort of self-regulating opportunity. He also stated that he wanted to make sure that if "certificate of need" and planning were not tied together in this bill that they are not tied together in practice as well.

Jon Scribner, Department of Environmental Conservation, with regard to the water and sewer system section of the bill, stated that DEC has a program in which it works with local communities and the communities themselves set the priorities on their water and sewer systems. In that regard, he stated, the Department was unsure of how this kind of program fits in with this particular bill. He went on to explain that the Department has an Advisory Committee, which the Legislature set up last year that sets money priorities for villages in this program. Mr. Holden stated that there was a solution to this problem, because most of the agencies have some sort of peculiarity with e.g. source of federal funds. He stated that in one of the earlier committee meetings Senator Sumner suggested that a clause go in the bill that Administrative regulation draft to implement this legislation be developed by each program agency for that particular programing and approved by them before promulgating it.

Chairman Orsini stated that he would like to have a new draft drawn up incorporating some of the concerns expressed and again stated that the final adjustments would be made Thursday.

SENATE BILL 183

The Committee had a draft committee substitute drawn up and Jack Chenoweth, Legislative Affairs Agency, pointed out some of the differences in the proposed draft and the original bill. He stated that he generally went throughout the bill and cleaned up where the references were. He explained that he added language, at the Committee's request, giving municipalities greater authority with respect to the renewal or new applications for a liquor license. Chairman Orsini suggested that there should be some requirement to prevent the ABC Board from taking action on applications in that 30-day period. Mr. Chenoweth stated that the only way a municipality can disapprove an application would be with a local ordinance. He stressed the validity of that ordinance as it could be subject to a law suit.

Mr. Chenoweth stated that he tried to shorten and simplify the language of the referendum ballot language that is actually put before the public to determine liquor sales within a community or municipality.

He explained section 04.15.438 which would give a municipality the option of staying wet but with the sale of non-distilled alcoholic beverages only, such as beer and wine.

In reference to penalties, Mr. Chenoweth stated that on Page 16, line 2 "may" was changed to "shall". This was done so that on a third violation there would be no question, the license would be revoked and the operation would be closed. Mr. Robert Cole, Department of HESS, pointed out that in changing "may" to "shall" that it should also be done on Page 15, line 28 referring that the board, council or assembly "shall" revoke a license upon the direction of the majority of its members upon the first and second violations.

Senator Hackney added that "consective" terms for violations should be put into the language.

The Committee also instructed Mr. Chenoweth to prepare a separate bill, to be introduced by the Committee, containing Section 9 and the Section on Limitation of Sales from the CS of SB 183. The resulting new legislation would deal only with municipal authority, in the CSSB 183.

Governor's Arbitration Proposal Has Merit

By Joe La Rocca

Gov. Jay Hammond's recent suggestion that Alaska's voters assume the role of final arbiter when negotiations between state administrators and organized state employes break down—though flawed—has some merit, notwithstanding the knee-jerk and typically uniformed reactions of editorialists for two of the state's principal daily newspapers.

Both the Juneau Empire and the Anchorage Times betrayed their ignorance of the fundamental mechanics of the state's collective bargaining process when they asserted recently that the governor's suggestion, if implemented, would constitute an "abdication" of executive responsibility.

State law already provides for binding arbitration when collective bargaining negotiations between the administration and affected government employe bargaining units reach an impasse. In that case a stalemate exists precisely because the executive branch has exercised its responsibility to refuse to make any further concessions which it believes are not in the public interest.

At that point both the employe bargaining unit and the administration have expressly exhausted their negotiating potential, thus setting the stage, under law, for the final step in the collective bargaining process—binding arbitration.

Existing law establishes step-by-step procedures for selecting an independent third party—usually a professional practitioner from outside the state—to serve as arbiter.

Typically, such an arbiter steps into the picture cold-turkey, a feature of the arbitration process which is calculated to endow it with the presumed virtue of objectivity, irrespective of peripheral but crucial considerations, such as the financial condition of the state treasury and pre-existing levels of employe benefits and salaries vis-a-vis those of non-government workers.

The governor's proposal would simply displace the

--Continued on page 10

do and accomplish many tasks better than the state might.

However, the state laws against discrimination permit every citizen to file complaints of discrimination with this agency. We do not have discretion over accepting complaints. For this reason, we will continue to receive complaints of discrimination from citizens in Fairbanks concerning any matter which is jurisdictional under the Human Rights law. We still believe that an effective commission can implement necessary human rights goals in Fairbanks, and the effect of a local commission may be to diminish the number of complaints which are filed with us.

It is also possible to enter into cooperative agreements with local commissions, if their authority includes the power to receive and investigate complaints. Under such an agreement, we can refrain from investigating to see if the local group can resolve the matter consistent with state law. However, since the present ordinance provides for a study and community relations-oriented type of commission, such an agreement is not likely at present. Therefore, our responsibility under state law will continue to obligate us to address those problems which come to our attention in the form of complaints.

I hope this information satisfactorily answers your question.

Sincerely,
Neil Thomas
Executive Director

Loan Man Here

A representative from the state Division of Business Loans will be in Fairbanks Tuesday, Nov. 22. Persons seeking information on the program or wishing to apply for a loan are invited to stop by the Governor's Conference Room in the State Office Building.

Perspective . . .

disinterested arbiter with the state's voters, who have a profound interest in—and certainly a better grasp of—the economic environment in which they live than a dispassionate and uninvolved outsider. Hammond's suggestion would democratize a process whose title aptly characterizes it as arbitrary.

The problem with the governor's proposal to convert the electorate into a collective arbiter is not, as the Empire and Times have suggested, that he seeks to abdicate his executive responsibility; but that like too many of his notions, it's half-baked, thereby needlessly exposing it to valid objections which could have been foreseen and avoided, without undermining its basic integrity.

The governor first floated this limp trial balloon two weeks ago in an address to the annual meeting of the Alaska Municipal League here, then reviewed it last week in a speech to the annual meeting of the Alaska Association of School Boards, both of them relatively sympathetic audiences. Its vulnerability was compounded by the governor's unfortunate tendency to shoot from the lip and glibly respond to questions whose answers he clearly does not know.

One perceptive school board member, for example, asked whether the capability of the state's well-organized public employes to overwhelm the voters with massive media campaigns could be minimized by establishing limits on campaign expenditures.

Without blinking, the governor said he could see no reason why expenditures could not be limited in order to equalize the struggle for votes between well-heeled employe groups and less affluent school boards, particularly in rural areas.

Hammond's uniformed response to that key question ignored the fact that the U.S. Supreme Court last year outlawed arbitrary ceilings on election campaign expenditures, a far-reaching ruling which forced this and other states, as well as the federal government, to scrap their laws imposing limitations on campaign expenditures because they placed unconstitutional restraints on free speech.

Thus burdened by the bumbling advocacy of its principal champion, the idea of bringing certain disputes over public employes' contracts before the voters—though basically a good one—is not likely to get the consideration it deserves.

Tax Fraud Case Clear The Court

The United States Attorney's Office has announced that Jerry F. Young of Anchorage was fined $4,000 and sentenced to six months in prison for failing to pay over to the Internal Revenue Service certain withheld employment taxes on employee's salaries.

The Hon. U.S. District Judge James M. Fitzgerald suspended the six months' prison term and placed Young on probation for a period of one year.

Jerry Young is a partner in Young Brothers Company and president of Young Brothers Construction. These two companies have been active in various sewer and excavation projects around Fairbanks and Anchorage during the last three years.

Jerry Young pled guilty to two counts of failing to pay over to the IRS withheld employment taxes in the amount of $6,295. Under federal law, Young must now pay any employment taxes withheld and not previously paid over to the IRS plus civil penalties and interest.

The investigation resulting in this conviction was conducted by Special Agents of the Internal Revenue Service Intelligence Division.

In a related case, Dale M. Robertson, also known as Willard Storms, age 45, Douglas, Alaska, was sentenced Nov. 10 to three years imprisonment on each of three separate counts of aiding and abetting and making false claims for tax refund ch

The Voters' Choice

LAST FALL Gov. Jay Hammond proposed a startling change in Alaska's method of settling disputes over wages and benefits for public employees. Instead of binding arbitration, the governor said the voters should be given the choice between the state's and the union's last contract offer.

The proposal — offered in a November speech to the Alaska Municipal League — received a chorus of criticism. Opponents, including this newspaper, said such a system would amount to pawning off on the voters politically unsavory duties which should be handled by the executive branch.

But perhaps it is time to take a second look at the governor's idea.

UNDOUBTEDLY IT would be cumbersome to place on the ballot the complex provisions of a union contract for public employees. Offers from both sides would have to be boiled down to their essentials and translated from bureaucratese into English.

However, given the usual circumstance — agreement by state and union negotiators on all but a few major issues — this could be done. And an independent economic assessment could point out to voters what the two ballot choices mean in tax dollars.

On election day the people of Alaska, who pay the salaries and benefits provided in the contract at issue, would make their choice, and the government and the union would be bound to honor it.

UNDER THE PRESENT system, negotiators from both sides meet in private to hammer out a contract. When they reach a stalemate, the alternatives are limited: arbitration or a strike.

Last year's experience with ferry system employees was a case in point. The state wouldn't budge from its final offer, and neither would the Inlandboatmen's Union. The union went on strike, and the ferry system — vital to transportation in roadless Southeast Alaska — ground to a halt.

The Hammond administration could have stopped the strike by seeking a court injunction. But the union would have countered with a request for binding arbitration, which the court probably would have granted as part of any order forcing strikers back to work. The governor, reluctant to place state salary decisions in the hands someone not responsible to the people, figured the strike was preferable.

The strike lasted 20 days, and the settlement reached July 25 will cost Alaska taxpayers $1.5 million in increased wages and benefits over the two-year contract period.

Had an election system been in effect, the strike could have been avoided and the people would have been content that the final decision was theirs, not that of a few negotiators meeting behind closed doors.

SUCH A SYSTEM also would ease one uncomfortable situation Alaska now has in union negotiations: The people who negotiate for the state are themselves state employees. While the officials who do the negotiating are not members of the bargaining unit, their salaries often go up later to reflect increases granted to union employees.

Under a contract election system, the same people would negotiate for the state, but voters would have the final say. Perhaps that knowledge would strengthen state resistance to costly demands by the unions, and perhaps it would ease the unions' penchant for bringing a hearty appetite to the public table.

Maybe after consideration the idea would be rejected as unworkable.

But until the governor's proposal is dusted off and offered for legislative consideration, it can't be rejected out of hand.

POLITICS TODAY

Brown-Car Battle Is Lik

By Jack W. Germon
And Jules Witcove

WASHINGTON — One of California's most astute political professionals was speculating the other day about the possibility of Gov. Gerry Brown challenging Jimmy Carter for the Democratic presidential nomination in 1980. "What I'm worried about," he said. "Is that by that time, Jerry won't be able to avoid running."

What he meant, in the political shorthand as it is fleshed out, is that the matchmakers already are so hard at work on a Carter-Brown fight that it may well be inevitable.

The matchmakers include the staffs and supporters of the two, other politicians with an interest in such a fight and, of course, the press, which has a weakness for discovering confrontations behind every tree. Nor are the disclaimers of the two principals taken at face value. Instead, they are universally viewed as only predictable denials for form's sake.

NOTE FOR SB 375 FILE- ANCHORAGE COMMENTS

Ted Burns, Anchorage municipal attorney, called 2-21-78 and conveyed the Municipality's concern about the wording of SB 375. He said he had a memorandum from Tom Dowling in which Dowling raised the possibility that if SB 375 were passed its language, which was designed to restrict the bill's action only to the Skagway situation, would then prohibit any other municipality in Alaska from ever receiving tide lands....since they could never qualify under the restrictive language of 375.

I told Burns we appreciated his comments and requested that the Municipality put its concerns in writing for the Committee to have on hand when it reviewed the bill.

2. SB-374

COMMENTS BY TED SMITH (DIVISION OF LANDS) REGARDING SB 374

Smith said that the Department of Natural Resources had no official position on the bill. He said the Department was aware that it was specifically designed to allow the City of Skagway to obtain a block of tidal lands after having missed the deadline (June, 1964) previously set for such land transfers.

Smith noted that as a result the language was the bill was especially restrictive and limited to achieve its one purpose. He was not aware of any other areas of Alaska which would also fit the criteria of the bill, but suggested contacting Andy Pekovitch (2417) for detailed information.

While DNR has no problem per se with SB 374, it does not like the principle of the bill and the prededent it sets of overturning the 1964 deadline, as well as possibly opening up the issue for other municipalities to do the same.

Smith said that he would be in Juneau next Monday, Jan. 23, for the week and would be happy to discuss the question.

The Honorable Avrum Gross
Attorney General, etc.

Dear Mr. Attorney General,

I am writing in reference to Senate Bill no. 374 ("An Act relating to transferral of tide and submerged lands; and providing for an effective date.") which has been referred to this committee for review.

The question has been raised ~~with me~~ that the enactment of this legislation could conceivably set a precedent for allowing coastal communities in general, rather than the one or ones specifically meeting the conditions of the proposed bill, to initiate action for further transfer of tide lands to municipalities.

I would appreciate receiving your opinion in this regard as well as any assessment you might wish to make on other aspects of the proposed legislation.

Sincerely,

Joe Orsini,
Chairman, etc.

Dear Mr. Smith: Ted

I am writing in regard to Senate Bill 374 ("An Act relating to transferral of tide and submerged lands") which would convey State-owned tide lands to the City of Skagway.

I would appreciate your assessment of the effects of this bill and the precedents it could set, particularly in other communities and in other parts of the state. I would also be interested in knowing if there are other uses to which the State might wish to put the land or whether the State had no other plans for its use or disposition.

Your comments of SB 374 will be highly useful for the Committee's deliberations on the measure.

Enclosure: SB 374

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

January 23, 1978

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

This is in response to your letter of 13 January 1978 concerning Senate Bills No. 374, No. 375 and No. 388. These proposed pieces of legislation have been reviewed by the City Council. The position of the City of Skagway on each bill is as follows:

Bill No. 374: The City of Skagway strongly supports the enactment of this bill. This legislation will enable the City to obtain title to tide and submerged lands adjacent to City Park lands which were conveyed to the City by the Federal Government on 30 November 1931. Ownership of these tide lands will facilitate future development of the Park by the City. A copy of the Federal patent transferring the Park lands is enclosed for your information.

Bill No. 375: The City of Skagway supports passage of this bill. It is considered to be in the best interests of the State of Alaska and the Alaskan municipalities that a portion of the permanent fund principal and income be made available for development of municipal capital facilities.

Bill No. 388: The City of Skagway concurs in the goals and objectives of the Alaska Coastal Management Act and, therefore, supports changes which will facilitate the work of the Coastal Policy Council. The City Council, however, does have reservations with regard to the wording of Section 1.(d) of the proposed regulation. To explain:

Although the need for alternates to the public members is justified, the method proposed for their selection is considered to be inadequate. It is suggested that, rather than having the principals select their alternates, the Assembly or Councils of the regions nominate alternates and that the Governor make the selections- in other words, alternates for public members be designated in the same manner as the principals.

There is one other point: Under the proposed legislation, it would be possible that alternates might constitute all or a majority of

the public participants in coastal policy actions. It is suggested that of the public members acting on coastal policy matters at least a majority be regular members.

Sincerely,

G.D. Acker
City Manager

---(P A T E N T)---

ANCHORAGE 06432, 4-1040

THE UNITED STATES OF AMERICA,

TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING:

WHEREAS, There has been deposited in the General Land Office of the United States, a Certificate of the Register of the Land Office at Anchorage, Alaska, whereby it appears that full payment has been made by the City of Skagway, in the Territory of Alaska, according to the provisions of the Act of Congress of March, 4, 1923, (42 Stat, 1500) entitled, "An Act to grant certain lands to the City of Skagway, Alaska, for a public Park" for the land embraced in U.S. Survey No, 1499, situate near Skagway, on the West side of Skagway River, Anchorage Land District, Alaska, containing Eighty-seven Acres and two hundredths of an Acre, according to the official Plat of the Survey of the said land on file in the General Land Office.

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, and in conformity with the said Act of Congress of March, 4, 1923, HAS GIVEN AND GRANTED, and by these presents DOES GIVE AND GRANT, unto the said City of Skagway, Territory of Alaska, and to its successors the Tract of Land above described; TO HAVE AND TO HOLD the same for a public park, for the use and benefit of the said City of Skagway, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature thereunto belonging, unto the said City of Skagway and to its successors forever;

subject to any vested and accrued water rights for mining, agricultural, manufacturing or other purposes and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws and decisions of Courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States.

As provided in said Act, this Patent is issued subject to all legal rights heretofore acquired by any person or persons in or to the above-described premises or any part thereof and now existing under and by virtue of the laws of the United States; and there is reserved to the United States all coal, oil, or other mineral deposits that may be found in the lands so granted and all necessary use of the lands for extracting the same; and, PROVIDED FURTHER, That the land herein granted, and all portions thereof, shall be held and used by or for the said City of Skagway, for a public park, and if the lands shall cease to be so used for a period of three years at any one time, they shall revert to the United States, and there is also reserved to the United States a right-of-way for the construction of Railroad, Telegraph and Telephone lines, in accordance with the Act of March,12, 1914 (38 Stat, 305).

IN TESTIMONY WHEREOF, I, Herbert.Hoover, President of the United States of America, have caused these letters to be made Patent, and the Seal of the General Land Office to be hereto affixed.

GIVEN under my hand at the City of Washington, the Thirtieth day of November, in the year of our Lord One Thousand Nine Hundred and Thirty-one, and the Independence of the United States the One Hundred and Fifty-sixth.

Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for permitting us the opportunity to comment on several bills before your committee.

Our comments are as follows:

Senate Bill 373 - No Comment

Senate Bill 374 - We would have no objection to this bill provided we can continue to apply for and receive leases to tidelands under the present methods, however, if this would infringe upon that right, we raise strong objections to any interference with our right to obtain tide or submerged lands.

Senate Bill 388 - We support this bill.

Senate Bill 375 - We support this concept for loans to municipalities as defined for construction or renovation of capital facilities.

Thanks again for the opportunity to comment.

Very truly yours,

Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Joe:

Thank you for your letter of January 17, 1978, concerning SB 374 relating to transfer of tidelands and submerged lands. As you probably noticed, since your letter, an identical bill has also been introduced in the House (HB 657).

I share the concern that enactment of this legislation would set an undesirable precedent for allowing any other coastal city to seek similar legislation authorizing conveyance of additional tidelands and submerged lands from the state. For this reason and that discussed below, I believe that close examination and careful consideration should be given to SB 374 and its companion.

These bills are drawn narrowly and would authorize application for further conveyance only of tidelands and submerged lands contiguous to land which has been used as a public park for at least 45 years, and which has been granted to a city for park purposes by the United States. This specificity appears to be directed at a particular parcel of land in northern Southeastern Alaska, though I do not know where. Therefore, it is likely that the bills would constitute a "local and special act" in violation of Article II, Section 19 of the Alaska Constitution.

This constitutional provision was discussed and applied by the Alaska Supreme Court in the "Cook Inlet Land Trade Case," State v. Lewis, 559 P.2d 630, 642-4, (Ak. 1977). The court stated that the test to be applied is whether the legislation examined bears a fair and substantial relationship to legitimate state purposes. In that case the court found that the land trade legislation was valid because it was designed to facilitate statewide land

us management and to resolve a host of pressing legal issued arising in the context of ANCSA." It is doubtful that purposes of such statewide concern exist for SB 374 and HB 657.

I hope these coments are of some help to your consideration of SB 374. Please contact me if you have any further questions.

Sincerely,

AVRUM M. GROSS

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

LAND AND WATER MANAGEMENT 323 E. 4TH AVENUE – ANCHORAGE 99501

February 21, 1978

Senator Joe Orsini
Chairman
Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Joe:

Sorry to be so slow in answering your letter of January 23 regarding SB 374.

After some research we have determined that the bill was intended to apply to USS 1499. Enclosed is a copy of a portion of our status plat covering that survey. Note that the Skagway corporate boundary runs through the middle of the parcel, and that the City of Skagway has obtained patent to the tidelands within that corporate boundary north to the boundary between USS 1499 and USS 5107A. I am also enclosing a copy of the patent received by the City of Skagway to the land with the reservation clause included.

We have some reluctance to totally endorse the bill because of the precedent it would set in making lands fronting municipalities available after the expiration of the statutory application period. We would, however, note that something of a precedent in this regard has been set by the passage in 1974 of AS 38.05.323.

We have been unable to determine if there are any additional lands that would be affected by the passage of SB 374. At present we have no plans for other uses of the tidelands which would be transferred under this bill.

Please note that these lands are available for lease under the classification of Resource Management. The City of Skagway has not submitted an application to lease such lands from the State.

If I can be of any further assistance, please do not hesitate to contact me.

Yours truly,

Theodore G. Smith

Anchorage 05432. 4—1040-B

The United States of America.

To all to whom these presents shall come, Greeting:

WHEREAS, There has been deposited in the General Land Office of the United States a Certificate of the Register of the Land Office at Anchorage, Alaska, whereby it appears that full payment has been made by the City of Skagway, in the Territory of Alaska, according to the provisions of the Act of Congress of March 4, 1923 (42 Stat. 1500), entitled, "An Act To grant certain lands to the city of Skagway, Alaska, for a public park", for the land embraced in U. S. Survey No. 1699, situate near Skagway, on the west side of Skagway River, Anchorage Land District, Alaska, containing eighty-seven acres and two hundredths of an acre, according to the Official Plat of the Survey of the said Land on file in the General Land Office:

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, and in conformity with the said Act of Congress of March 4, 1923, HAS GIVEN AND GRANTED, and by these presents DOES GIVE AND GRANT, unto the said City of Skagway, Territory of Alaska, and to its successors, the tract of land above described; TO HAVE AND TO HOLD the same for a public park, for the use and benefit of the said City of Skagway, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature thereunto belonging, unto the said City of Skagway and to its successors forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing or other purposes and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws and decisions of courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States.

As provided in said Act, this patent is issued subject to all legal rights heretofore acquired by any person or persons in or to the above-described premises or any part thereof and now existing under and by virtue of the laws of the United States; and there is reserved to the United States all coal, oil, or other mineral deposits that may be found in the lands so granted and all necessary use of the lands for extracting the same; and, PROVIDED FURTHER, That the land herein granted, and all portions thereof, shall be held and used by or for the said City of Skagway for a public park, and if the lands shall cease to be so used for a period of three years at any one time, they shall revert to the United States. And there is also reserved to the United States a right of way for the construction of railroad, telegraph and telephone lines, in accordance with the Act of March 12, 1914 (38 Stat. 305).

IN TESTIMONY WHEREOF, I, Herbert Hoover,

President of the United States of America, have caused these Letters to be made Patent, and the Seal of the General Land Office to be hereunto affixed.

Legislative Affairs Agency

FROM: Joe Orsini JO
Chairman,
Senate Community and Regional Affairs Committee

RE: Municipal Jurisdiction Over Tide Lands

In regard to Senate Bill 374 relating to the transfer of tide lands to the City of Skagway, I would appreciate your opinion of the legal jurisdication which a municipality would exercise, through its planning and zoning or other authority, in the following circumstances:

1) For a private individual operating on privately-owned tide land.

2) For a state agency operating on state tide land

3) For a private individual operating on state tide land with a state permit or a state lease.

Theodore G. Smith
Director
Division of Land and Water
Management, DNR
323 East 4th Avenue
Anchorage, Alaska 99501

Dear Ted:

As we discussed today by telephone, I would appreciate your comments regarding some additional aspects of Senate Bill 374 relating to the transfer of tide lands to the City of Skagway.

Since this bill was introduced, a number of other municipalities have also expressed an interest in obtaining title to tide lands in their area if the Legislature approves the transfer of the lands designated in SB 374 to Skagway.

In this regard, it would be useful for the Committee to know whether the Department of Natural Resources would object to: (1) legislation allowing other municipalities in Alaska to select tide land adjacent to recreational and park areas at the Federal, state and local level; and (2) if you would object to legislation conveying to interested municipalities all tide lands lying within municipal boundaries.

Your response to these points will be helpful to the Committee in clarifying some of the constitutional and technical questions raised by the bill.

Sincerely,

Joe Orsini

POUCH M – JUNEAU 99811

April 24, 1978

The Honorable Joe Orsini
Chairman, Community and
Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

I am replying to your letter to Director Ted Smith who referred your questions to me because they involve matters of substantial department policy.

Your first question asks if the Department would object to legislation allowing other municipalities to select tidelands adjacent to recreational and park areas at the federal state and local level. My preference is that transfer of such tidelands be by state lease pursuant to AS 38.05.315 which can be made for a public purpose. I would note, however, that some precendent for transfer of such lands can be found in AS 38.05.323 which allows the grant of tidelands adjacent to P.L. 507 sites acquired by homerule or general law municipalities.

You also asked if the Department would object to legislation conveying to interested municipalities all tidelands lying within municipal boundaries? I must indicate that the Department would object strenuously to such legislation. Substantial valuable tidelands are owned by the State adjacent to municipalities and I believe it would be totally inappropriate to convey such lands to municipalities.

Sincerely,

Robert E. LeResche

Dear Commissioner LeResche:

I am writing further in regard to SB 374 which would transfer tide lands currently owned by the State into the ownership of the City of Skagway.

Representative Mike Miller has recently suggested that SB 374/HB 657 might be redrafted to avoid raising the constitutional questions which the Attorney General believes are contained in the legislation.

I have enclosed a copy of his suggested committee substitute and I would appreciate your comments regarding the effects of this legislation on your Department.

Sincerely,

Joe Orsini

TO: Senator Joe Orsini
FROM: Mike Milden

Joe--

You will recall that you've been hesitant to bring up House Bill 657--relating to tidelands near Skagway--because of adverse ruling from the Attorney General. I've taken the liberty of having the bill redrafted as a suggested committee substitute. The Attorney General himself assures me that the redrafted legislation no longer has Constitutional problems. Your consideration of this legislation would be greatly appreciated.

IN THE HOUSE

SENATE CS FOR HOUSE BILL NO. 657

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to transferral of tide and submerged lands; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. A home rule city or city of the first class may apply for a conveyance of all tide and submerged land contiguous to land owned by the city if the land owned by the city is used as a public park and it was granted to the city by the United States for the purpose of use as a public park. Applications made within one year after the effective date of this Act shall be processed by the director of the division of lands of the Department of Natural Resources or his designee. The director shall convey the tide and submerged land to the city. The city shall use the land in a manner which is compatible with the use of the contiguous land as a public park. The director shall prescribe the manner for filing applications and may promulgate regulations to implement this Act.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Dear Senator Orsini:

I am writing in reply to your letter of May 8, 1978, concerning SB 374.

Generally, I believe it sufficient that the State convey tidelands by long term lease rather than fee title. However, if there are specific circumstances which require fee conveyance, I believe the revised work draft (SCSHB 657) is satisfactorily limited to prevent a wholesale run by municipalities on State owned tidelands.

Sincerely,

Robert E. LeResche
Commissioner

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"

P. O. BOX 415 SKAGWAY, ALASKA 99840

F: SB-374

June 20, 1977

Senator Bill Ray
165 Beherends Avenue
Juneau, Alaska 99801

Dear Senator Ray:

The purpose here is to request your consideration and assistance in obtaining for the City of Skagway title to the Tidelands and Submerged Lands contiguous to City Park Lands - U.S.S. 1499. Background in explanation of this request:

The land embraced in U.S. Survey 1499 was granted to the City for use as a public park in 1931. (Encl.1,2,&3) and has been used for that purpose subsequently. In conformity with State policy in Disposal of Occupied Tide and Submerged Lands (Encl.4) and under the provision of Alaska Statutes Title 38 Sec. 38.05.320 and Sec. 35.10.010, the City applied for and was granted title to the tidelands and submerged lands encompassed by the municipal boundaries on 30 December 1960 - ATS No.4 (Encl.5). Through an oversight the City failed to apply in 1959 for the tidelands and submerged lands adjacent to the public park. It is the City's understanding that the acquisition of these lands under the preference rights provisions of the aforementioned policy and Statutes is no longer possible and that title can be conveyed to the City only by means of legislative enactment.

Accordingly, it is respectfully requested that you introduce a bill in the next session of the State Legislature providing for the granting to the City of Skagway of title to the tidelands and submerged lands contiguous to the shoreline of the City Park - U.S.S. 1499 - for a distance of 1000 feet to seaward of the mean low tide line.

Sincerely,

G.D. Acker

THE UNITED STATES OF AMERICA,
To all to whom these presents shall come, Greeting:

WHEREAS, There has been deposited in the General Land Office of the United States a Certificate of the Register of the Land Office at Anchorage Alaska, whereby it appears that full payment has been made by the City of Skagway, in the Territory of Alaska according to the provisions of the Act of Congress of March 4, 1923 (42 Stat. 1500), entitled "an Act to grant certain lands to the city of Skagway, Alaska, for a public park" for the land embraced in U.S. Survey No. 1499, situate near Skagway on the west side of Skagway River, Anchorage Land District, Alaska, containing eighty-seven acres and two hundredths of an acre, according to the Official Plat of the Survey of the said Land on file in the General Land Office:

NOW KNOW IT. That the UNITED STATES OF AMERICA, in consideration of the premises, and in conformity with the said Act of Congress of March 4, 1923, HAS GIVEN AND GRANTED, and by these presents DOES GIVE AND GRANT, unto the said City of Skagway, Territory of Alaska, and to its successors the Tract of land above described; TO HAVE AND TO HOLD the same for a public park, for the use and benefit of the said City of Skagway, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature thereunto belonging, unto the said City of Skagway and to its successors forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing or other purposes and rights to ditches and reservoirs used in connection with such water rights, and may be recognized and acknowledged by the local customs, laws and decisions of courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States.

As provided in said Act, this patent is issued subject to all legal rights heretofore acquired by any person or persons, in or to the above-described premises or any part thereof and now existing under and by virtue of the laws of the United States; and there is reserved to the United States all coal, oil or other mineral deposits that may be found in the lands so granted and all necessary use of the lands for extracting the same; and, PROVIDED FURTHER, that the land herein granted, and all portions thereof, shall be held and used by or for the said City of Skagway for a public park, and if the lands shall cease to be so used for a period of three years at any one time, they shall revert to the United States. And there is also reserved to the United States a right of way for the construction of railroad, telegraph and telephone lines, in accordance with the Act of March 12, 1914 (38 Stat. 305).

IN TESTIMONY WHEREOF, I, Herbert Hoover, President of the United States of America, have caused these letters to be made Patent, and the Seal of the General Land Office to be hereunto affixed.
Given under my hand, at the City of Washington, the THIRTIETH day of NOVEMBER in the year of our Lord one thousand nine hundred and THIRTY-ONE and of the Independence of the United States the one hundred and fifty-

STATE POLICY IN DISPOSAL OF OCCUPIED TIDE AND SUBMERGED LANDS

It is the policy of the State to allow preference rights for the acquisition of tidelands and submerged lands occupied or developed for municipal, business, residential, or other beneficial purposes on and prior to the date of admission of Alaska into the Union. An occupant is defined as a person who actually occupied for any business, residential, or other beneficial purpose tidelands, or tidelands and contiguous submerged lands, within the State on and prior to January 3, 1959 with substantial permanent improvements. The holder of a Corps of Engineers permit, which is a clearance in respect to navigation, or of a special use permit from some other government agency will not qualify as an occupant unless such entry on the land had resulted in actual occupancy and substantial permanent improvements.

The Alaska Land Act lists several types of entries on tidelands which are not considered as occupancy. No person shall be considered an occupant by reason of having, (1) placed a fish trap in position for operation or upon the tide or submerged land for storage, (2) placed a setnet or piling therefor, or any other device or facility for taking fish, (3) placed piling or dolphins for log storage or other moorage, (4) placed floats or similar structures upon the tide or submerged land, (5) placed telephone, power, or other transmission lines, roads, trails, or other improvements not requiring exclusive use or possession of the tide or submerged lands, or (6) claimed the land by virtue of some form of constructive occupancy. The use of the definition "constructive occupancy" is to indicate that the mere staking or segregation of tracts of tide or submerged lands by the driving of piles or construction of breakwaters does not constitute beneficial occupancy. "Occupancy", actual use, occupancy, and control of tideland or submerged land by the establishment of substantial permanent improvements.

A preference right means the right of an occupant to acquire by lease, purchase, or other disposal at the election of the occupant, any tract of tideland, or tideland and contiguous submerged land, occupied or developed by such occupant on and prior to January 3, 1959, subject to certain [illegible] preference right. A Class I preference right entitles an occupant to acquire the occupied lands for a consideration [illegible] method of appraising, [illegible] the land. [illegible]

ENCL. 4

STATE OF ALASKA Book 15 Page 5
Skagway Recording District

TIDELANDS PATENT NO. 1

NOW ALL MEN BY THESE PRESENTS that the State of Alaska, pursuant to Article III, Section 5(3)(a), Chapter 160, SLA 1959, as amended, does grant to Skagway, a municipal corporation of the State of Alaska, from whom after or before January 3, 1959, all the real property, situated in the Skagway Recording District, State of Alaska, described as follows:

All of that parcel of land containing 193.5 acres lying between the line of mean high tide and a line known as the Directors Line, all of which is seaward of the City of Skagway as designated on the official plat thereof, known as Alaska Tidelands Survey No. 4, (ATS 593) on file and of record at the office of the Deputy Magistrate at Skagway, Alaska, and also on file and of record at the office of the State Division of Lands, Anchorage, Alaska, said property being located in Township 28 South, Range 59 East, Copper River Meridian, Alaska.

Article III, Section 5, Chapter 160 SLA 1959 as amended, and pertinent acts of Congress, particularly Public Law 85-303 (72 Stat. 623) are applicable to the lands conveyed herein.

Alaska hereby expressly saves, excepts, and reserves out of the granted lands, unto itself, its lessees, successors, and assigns all [illegible] oil, gas, coal, [illegible], and all other minerals in the lands granted, or in any of them, and which may be found to exist thereon, or any part thereof, and the right to explore for, develop, mine, and remove the same, upon, through, and from the granted lands or any part thereof, and to occupy and use so much of the surface thereof as may be required for all purposes reasonably incident to the exploration, development, mining, and removal of the minerals, and to construct and maintain thereon, or under, all works, buildings, plants, waterways, roads, communication facilities, and equipment required for the full enjoyment of the rights hereby reserved. Alaska, its lessees, successors, and assigns, shall pay the grantee, its successors, or assigns, the reasonable value of the surface of the granted lands injured or destroyed by the exercise of the rights reserved herein. Alaska, its lessees, successors, and assigns, shall have the right to enter upon the granted lands, or any part thereof, at any time for the purpose of exploring, developing, mining, and removing the minerals therefrom, and to make such use of the granted lands as may be necessary or convenient for the purposes aforesaid, hereby expressly releasing and waiving all claims for damages that may occur to the granted lands caused by the exercise of the rights reserved herein. Alaska, its lessees, successors, and assigns, shall not be liable for damages caused to any improvements now or hereafter constructed upon the granted lands except when such improvements are owned jointly by the grantee and Alaska, its lessees, successors, or assigns. In the event that any improvements now or hereafter constructed upon the granted lands shall interfere with the use of or access to or from any of the reserved lands by Alaska, its lessees, successors, or assigns, for the purposes hereinbefore set forth, Alaska, its lessees, successors, or assigns, shall have the right to enter upon the granted lands and remove such improvements, making reasonable compensation to the grantee for the value of the improvements so removed, but not for the value of the granted lands occupied thereby, or for any loss or damage which may result to the grantee from the removal of the improvements or from the loss of occupancy of the granted lands occasioned thereby or incident thereto.

SUBJECT: Conveyance of land to Skagway
Work Order No. 4243

TO: Senator Bill Ray

FROM: Kenneth E. Vassar KEV
Staff Attorney

In response to your request for a bill to convey tide and submerged lands contiguous to City Park in Skagway to the City of Skagway, I have enclosed two versions of a rough draft of the bill. I have labeled them version one and version two. As you can see, version one provides a narrow extension of the provisions of AS 38.05.320 to cities meeting certain requirements; probably Skagway is the only city to meet such requirements. Version two, on the other hand, is an outright conveyance to Skagway.

I believe that version one is preferable primarily because of two weaknesses in version two. Version two is more susceptible to objection as constituting "local legislation" prohibited by Article II, Section 19 of the Alaska Constitution. Also, version two cannot be completed until the city provided a metes and bounds description of the land conducted by a surveyor. Passage of version one, on the other hand, would be less likely to raise questions of local legislation; and it would provide the city one year to submit its application describing the land it wants.

Please let me know which, if either, version you prefer; and we will proceed accordingly. If you have any other questions, please contact me.

IN THE SENATE BY RAY

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to transferral of tide and submerged lands; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Applications by home rule cities and cities of the first class for conveyances of tide and submerged lands under AS 38.05.320 may be made up to one year after the effective date of this Act if the requirements of sec. 2 of this Act are met. Applications made within one year after the effective date of this Act shall be processed by the director of the division of lands of the Department of Natural Resources or his designee and are otherwise subject to the requirements of AS 38.05.320.

* Sec. 2. No home rule city or city of the first class may apply for a conveyance under this Act unless:

(1) the city seeks conveyance of tide and submerged lands contiguous to land which has been used as a public park for at least 45 years; and

(2) the land used as a park was granted to the city by the United States for the purpose of use as a public park.

* Sec. 3. This Act takes effect July 1, 1977.

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MAYOR

March 8, 1978

Senator Joe Orsini, Chairman
Community & Regional Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Senator Orsini:

Following are comments from the Municipality of Anchorage on proposed legislation:

S.B. 375 - relating to investment of permanent fund money in community capital facilities.

It is felt that the apparent intent of this bill is very good; however, as presently written, its provisions are so general that specific comment is difficult. Some specifics that need action are: Will money be in the form of grants or loans? If loans, what will be interest percentages? How much of permanent fund would be made available under S.B. 375? What would be the criteria for obtaining grants/ loans?

S.B. 388 - membership of Alaska Coastal Policy Council

Anchorage would have no problem with this legislation since our representative, Lidia Selkregg, has appointed Mat-Su Borough Mayor Don Larson as her permanent alternate. It is assumed that the bill aims to preserve a geographic and state-local balance on the Council.

Sincerely,

Doug Wenzel for

Thank you for your letter of February 7 regarding Senate Bill 375 and Senate Bill 430.

The Department is currently involved in analyzing the two aforementioned bills and as part of our normal legislative liaison with the Governor's Office will be forwarding our comments to Keith Specking.

The Department would very much like to be informed when you schedule a hearing on these bills. At that time a decision will be made as to whether our opinion is of sufficient importance and magnitude to warrant testimony before your committee.

Thanks again for the thoughtful notification in your February 7 letter.

Sincerely,

Carl M. Gonder, Jr.
Deputy Commissioner

CMG: thw

21-P2LH

√ 1 Joe
2. F: SB 375

PERMANENT FUND COMMITTEES' COMMENTS ON SB 375

Senator Hohman (Senate Permanent Fund) 2-21-78- SB 375 is similar to if not identical to SB 429 which is the permanent fund omnibus bill being worked up, in the section dealing with the funding of capital improvement projects at the local level. Therefore the passage or non-passage of SB 375 would not materially affect the work of the Senate Permanent Fund Committee since the enactment of SB 429 would repeal all previous legislation for permanent fund money. (Note: SB 429 places a population ceiling of 5,000 on communities and municipalities eligible for loans. SB 375 places no population ceiling on loan eligibility. bfh)

Mike Dugan (House Permanent Fund AA) 2-22-78- No serious problem with SB 375 since it is so similar in part to SB 429 omnibus. However interim legislation, of which SB 375 would be a part, was specifically designed to curtain strongly the commissioner's discretionary powers to spend permanent fund monies. This concept is absent from SB 375 and provides an open range for investments. Although SB 429 would supercede SB 375 upon the passage of the first it may be a long time before SB 429 actually gets legislative approval. The enactment of SB 375 in the meantime could therefore lead to widespread use of the fund money contrary to the intent of the interim permanent fund legislation. In this situation, passage of SB 375 "would not be welcomed" by the House Permanent Fund Committee.

Dugan said that Rep. Gruening would like to be notified whenever SB 375 comes up before SC/RA Committee action.

Ben Harding

Joe-

Given the constitutional problems which the AG has raised regarding SB 375, are you interested in incoporating Chenoweth's attached language into the bill, or could it go as a separate measure entirely? (by deleting Sec. 3).

Ben

POUCH SB
JUNEAU, ALASKA 99811

February 24, 1978

The Honorable Joe Orsini
Chairman, Senate Community & Regional
Affairs Committee
State Capitol
Juneau, Alaska 99811

Dear Senator Orsini:

Re: Senate Bill 430 and Senate Bill 375

The Department of Revenue agrees in principal with both bills but disagrees in the existing procedure. The Department of Revenue is submitting amendments to the Alaska Municipal Bond Bank Authority statute concerning the Authority's ability to issue revenue bonds and placing certain limitations on the amount of revenue bonds which may be issued. These amendments, if adopted, represent the Department's concern.

Attached is a copy of a draft bill that is currently in the Department of Law and will be introduced shortly. This draft amends the limitations as to the amounts of either general obligation or revenue bonds that may be outstanding at one time. It also proposes a short title which will allow for easier identification and ultimately better marketability of the Alaska Municipal Bond Bank bonds.

Senate Bill 375 amends the interim management statute (AS 37.10.065) for the investment of the Alaska Permanent Fund. AS 37.10.065 provides for a caretaker investment function, and it never was the legislative intent that this statute should become the definitive legislation for the permanent fund. The proposed investment activity to be included for the interim management statute would change the intent of the interim management statute which was to invest the Alaska Permanent Fund principal in low risk securities and not to invest the principal within Alaska. The Administration bill on the Alaska Permanent Fund, House Bill 298, provides for in-state investments of the kind described in Senate Bill 375.

The Department of Revenue does not wish to see the interim management statute turned into the permanent enabling legislation on the Alaska Permanent Fund. For these reasons the Department does not support either Senate Bill 430 or Senate Bill 375.

I will be very happy to discuss these bills with you at your convenience.

Sincerely,

Jim Edenso

Jim Edenso
Deputy Commissioner

Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Joe:

Thank you for inviting the Committee's comments on SB 375. While I cannot speak for any other member of the Committee, I can give you what is and has been the consensus of the Committee in developing its approach to enabling legislation for the permanent fund. The approach of the Committee is contained in HB 595, HB 596 and HB 682 (dealing with the Renewable Resources Development Fund).

The concept of using the permanent fund to assist in meeting the financing needs of municipalities is included in HB 595 and HB 596. The approach contained in these bills, however, differs from that taken in SB 375. As you know, SB 375 is what appears to be a minor amendment to the permanent fund interim management bill (HB 210) we passed last session. This amendment would authorize the commissioner of revenue, at his absolute discretion, to use all or any part of the principal of the permanent fund to make loans (at any rate of interest the commissioner deems proper) to municipalities. SB 375 apparently also authorizes the commissioner of revenue to make loans or grants of the income or earnings of the permanent fund to municipalities. The last sentence of the permanent fund amendment provides "all income from the permanent fund shall be deposited in the general fund unless otherwise provided by law". There is some question in my mind, at least, as to whether SB 375 is a specific enough designation by law to meet the constitutional requirement. Moreover, as a matter of policy, a legislator may question the wisdom of allowing the commissioner of revenue the apparent authority to dole out what may be over 100 million dollars in earnings each year.

The approach of the House has been to put some limit on the amount of total permanent fund principal the managing authority could place in direct loans to municipalities. In HB 596, the entity most likely to make direct loans or guarantees to municipalities is the Alaska Enterprise Investment Corporation, which is authorized to use half of its available assets to meet community development needs on a loan or guarantee basis. In addition HB 595 uses the earnings from the permanent fund investments to leverage private financing for power projects. The earnings from the permanent fund would be the basis of guarantees to pay any default on interest or principal payments on bonds. Once the municipality or agency issuing the bonds makes these payments, the portion of the permanent fund earnings used as the guarantee would be freed and could flow to the permanent fund or the general fund for other uses.

In summary, while I believe the Committee is in favor of the concept of financial assistance to municipalities, the conclusion, based on public testimony and the advice of consultants, has been to give the permanent fund management an existence separate from the commissioner of revenue and to apply a logical and complete set of criteria for investments rather than simply establishing the commissioner of revenue as the sole arbitor over a smorgasbord of possible investment areas.

If you have any further questions after reading the attached House Bills 595 and 596 please don't hesitate to contact me.

Cordially,

Clark Gruening

Dear Rep. Gruening:

I have enclosed a copy of Senate Bill no. 375 ("An act relating to the investment of permanent fund money in community capital facilities") for your information and comment.

SB no. 375 has been referred to the Senate Community and Regional Affairs Committee for action, and I would appreciate your committee's assessment of the concept of using permanent fund monies to finance community capital facilities. I would also be interested in your views regarding the effect that the enactment of such legislation would have on the projected operations of the permanent fund, and whether this possibility was considered as a desirable use for fund monies during the extensive hearings which your committee held on the organization of the fund.

Sincerely,

Joe Orsini

Dear Commissioner McAnerney:

Senate Bill 375 ("An Act relating to the investment of permanent fund money in community capital facilities") and Senate Bill 430 ("An Act extending the authority of the Alaska Municipal Bond Bank") have been referred to the Senate Community and Regional Affairs Committee for review.

I would appreciate your comments and assessment of these proposed bills, particularly in regard to any impact SB 375 might have on your Department's planning for permanent fund monies. The Committee would also be interested in any effect which, in your view, the enactment of these measures could have on other areas of your Department's operations.

Sincerely,

Joe

The Honorable Joe Orsini, Chairman
Senate Community and Regional
Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for permitting us the opportunity to comment on several bills before your committee.

Our comments are as follows:

Senate Bill 373 - No Comment

Senate Bill 374 - We would have no objection to this bill provided we can continue to apply for and receive leases to tidelands under the present methods, however, if this would infringe upon that right, we raise strong objections to any interference with our right to obtain tide or submerged lands.

Senate Bill 388 - We support this bill.

Senate Bill 375 - We support this concept for loans to municipalities as defined for construction or renovation of capital facilities.

Thanks again for the opportunity to comment.

Very truly yours,

Perry D. Lovett

Subject: Your letter of January 13, 1978
re: Senate Bill No. 375.

Dear Senator Orsini:

We thank you for your letter and copies of the subject Bills and the opportunity to comment and recommend.

Senate Bill No. 375:

The City of Ketchikan (City) dba Ketchikan Public Utilities (KPU) is extremely interested in, and heartily approves the concepts contained in Senate Bill No. 375. However, we do question the word "grants". We believe that this abrogates the intent of the Publics desires when they voted that a permanent fund be set up. We believe that the word "GRANTS" should not appear in any legislation for the Permanent Fund, but should rather be involved with the General Fund which will receive 75% of total revenue from the mineral resources and also be under direct control of the Legislature on a year to year basis.

Electric power Utilities such as our City/KPU are vitally concerned as regards hydroelectric generation. There are many viable hydroelectric sites in our State. The original cost of constructing those hydroelectric projects places them beyond the ability of Alaskan utilities to construct, which in our case will take approximately 5-6 years, and yet continue to use high cost fossil fuel means for gereration (diesel) during the interim period of years during construction. It is impossible for the Alaskan consumer public to bear both the burden of high cost diesel fuel generation and the added burden of paying interest on the funds necessary to construct hydroelectric plants until such plants can be brought "on line", thus permitting the high cost diesel generation to be relegated to emergency and stand-by status and thereby releasing the funds, with proper rate structuring that will permit pay back to the State of Alaska the "up front" money extended thru loans via the Permanent Fund. In short, adequate funding with deferred payment of interest and principal.

This is not a give away. This is an opportunity for the State of Alaska to truly invest in the well being of its citizens and assure that they will have the advantages of the lowest possible electric rates for decades to come, enhance the economic stability of communities, and provide this for the people of the State by eliminating or reducing the use of fossil fuels, a non-renewable resource, and provide our people with a necessity of life thru the use of a renewable resource.

To provide such for the Ketchikan-Metlakatla area, we would set forth the following to illustrate what the term "adequate funding" would be for the City/KPU Swan Lake hydroelectric project we presently have underway in the engineering phase.

Fiscal Year	Estimated Funds Required
1978-79	$ 1,100,000
1979-80	1,600,000
1980-81	13,500,000
1981-82	23,800,000
1982-83	21,300,000
1983-84	6,500,000
	$67,800,000

For your further information, we are enclosing a copy of a Resolution formulated by a "Concerned Alaska Electric Power Utilities Committee" (CAEPUC).

Enclosure: CAEPUC Resolution

RESOLUTION

WHEREAS, the State of Alaska has growing energy problems and energy shortages which are of deep concern to Alaskan Electric Power utilities, and the Citizens of Alaska; and

WHEREAS, the State of Alaska has abundant undeveloped hydroelectric resources that may be developed to satisfy many of these energy problems and energy shortages; and

WHEREAS, the State of Alaska has the financial resources in the form of the Permanent Fund and its earnings, the Renewable Resources Development Fund, and the General Fund; and

WHEREAS, financial assistance is needed by Alaskan utilities to build hydroelectric projects.

NOW, THEREFORE, BE IT RESOLVED that we, the undersigned, urge the Alaska State Legislature and the Executive branch to provide the financial means and support from the Permanent Fund through the Alaska Power Authority, Water Resources Revolving Loan Fund or other existing government agencies to develop the hydroelectric resources of the State of Alaska.

BE IT FURTHER RESOLVED that the agency designated shall evaluate every means to provide long-term capital on sufficient terms to permit the Citizens of Alaska the advantages of hydro-electric power development.

DATED this 13th day of January, 1978 in Juneau, Alaska.

Respectfully submitted by: Concerned Alaska Electric Power Utilities Committee (CAEPUC).

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

January 23, 1978

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

This is in response to your letter of 13 January 1978 concerning Senate Bills No. 374, No. 375 and No. 388. These proposed pieces of legislation have been reviewed by the City Council. The position of the City of Skagway on each bill is as follows:

Bill No. 374: The City of Skagway strongly supports the enactment of this bill. This legislation will enable the City to obtain title to tide and submerged lands adjacent to City Park lands which were conveyed to the City by the Federal Government on 30 November 1931. Ownership of these tide lands will facilitate future development of the Park by the City. A copy of the Federal patent transferring the Park lands is enclosed for your information.

Bill No. 375: The City of Skagway supports passage of this bill. It is considered to be in the best interests of the State of Alaska and the Alaskan municipalities that a portion of the permanent fund principal and income be made available for development of municipal capital facilities.

Bill No. 388: The City of Skagway concurs in the goals and objectives of the Alaska Coastal Management Act and, therefore, supports changes which will facilitate the work of the Coastal Policy Council. The City Council, however, does have reservations with regard to the wording of Section 1.(d) of the proposed regulation. To explain:

Although the need for alternates to the public members is justified, the method proposed for their selection is considered to be inadequate. It is suggested that, rather than having the principals select their alternates, the Assembly or Councils of the regions nominate alternates and that the Governor make the selections- in other words, alternates for public members be designated in the same manner as the principals.

There is one other point: Under the proposed legislation, it would be possible that alternates might constitute all or a majority of

the public participants in coastal policy actions. It is suggested that of the public members acting on coastal policy matters at least a majority be regular members.

Sincerely,

G.D. Acker

What else?

COMMENTS BY MIKE DOOGAN (GRUENING AA) ON SB 375 (1-12-78)

Doogan said that the Permanent Fund people expected the INterim Management bill to be repealed shortly and therefore were not too concerned about SB 375 which amended it. The interim management bill, however, was carefully designed to limited the Commissioner of REvenue's ability to invest the permanent fund monies until final procedures for the fund were adopted. In this respect, SB 375 is contrary to the intention of the interim management bill which attempted to keep the permenent funds as liquid as possible. Under 375, the commissioner's authority to invest would be greatly expanded (except provisions freeing the money up for use in the capital move were carefully excluded).

Doogan concluded that his initial reaction was that the bill was not a good idea and that the permanent fund committee would be "reluctant" to see it passed.

388

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

January 24, 1978

Present: Chairman Orsini, Senators Willis, Ferguson and Hackney; Bruce Aronson, C/RA; Marilyn Miller, Alaska Municipal League; Roger Allington, Alaska Coastal Policy Development and Planning; Glen Akins, DPDP; Annette Smith, HC&RA; Steve Mizera, Republican Caucus; Jack Chenowith, Legislative Affairs; Steve J. Kettlekamp, Exxon; Keith Arnold, Alaska Oil & Gas Association; Oren Pomeroy, C/RA; and Tim Bradner of BP-Sohio.

Absent: Senator Bill Sumner

SENATE BILL 388

The meeting was called to order at 3:15 by Chairman Orsini who announced the formation of a subcommittee to deal with village land reconveyances occuring under paragraph 14 (c) of the Alaska Native Claims Settlement Act. Senator Ferguson was appointed Chairman. Senators Hackney and Orsini were appointed members. Senator Ferguson agreed that the subcommittee would be able to make a report to the committee within a month.

The committee first took-up CSSB 388. The two Co-chairman of the Alaska Coastal Policy Council, Frances Ulmer and Roger Allington, had been invited to present their views of the effects of CSSB 388 on the functioning of the council.

Council Co-chairman Allington referred his letter of January 23, 1978, to Senator Orsini, in which he supported SB 388's provision for the selection by the Governor of alternative members to fill unexpected vacancies in the council.

Co-chairman Ulmer concurred with Allington's assessment and noted that the question of the appointment of alternate members had been heatedly debated in the council without achieving a clear concensus.

She also cautioned against too great an attempt to restrict the number of alternates available for the governor's selection, but she believed that CSSB 388 would clarify the question of the alternate's qualifications. She suggested that assistant, as well as deputy commissioners be designated as acceptable substitutes for State commissioners in the council.

Marilyn Miller, representing the Alaska Municipal League, testified on CSSB 388. She stated that the League would prefer to see public members on the council appoint their own alternates in order to maintain a continuity of view point.

This completed public testimony on CSSB 388. Senator Ferguson moved that CSSB 388 as drafted be passed out of committee with individual recommendations. The committee vote was 2 Do Pass, 1 Do Not Pass Without Amendment and No Recommendations.

DISCUSSION OF ALASKA COASTAL MANAGEMENT PROGRAM

Chairman Orsini recalled Alaska Coastal Policy Co-chairman Frances Ulmer and Roger Allington to discuss the work of the council regarding the submission of its standard and guidelines to the Legislature. He pointed out the importance of the Legislature receiving these regulations in sufficient time this session to give them adequate consideration. He stated the intention of the committee to work with the unofficial draft regulations during the public hearing process in order to become as familiar as possible with the proposed regulations before their submission to the Legislature in April.

Council Co-chairman Ulmer told the committee that the council had recently completed a new draft of its regulations, copies of which had been made available to legislators. A sixty day hearing process would be underway shortly with public meetings throughout the state. The council believed that the regulations would be ready for submission to the Legislature in early April, following a final council meeting on the regulations in Juneau, March 24 and 25.

Ulmer stressed the need for legislative action on the Coastal Management Program this session in order to allow the state program to receive federal approval by December of 1978. She indicated that there had been some question within the council whether the regulations constituted a part of the program and also required legislative approval, the consensus of the council was that the regulations also required legislative action to accept them.

Glen Akins, Director of the Office of Coastal Management, outlined for the committee the situation in Washington State and Oregon where federal approval for these states' coastal management programs was given before all the local programs were completed. He noted, however, that court challenges against this practice are underway.

He also pointed out that the role of the federal government in funding state coastal programs is significant. So far approximately $3 million in federal funds have been used in Alaska to finance state and local efforts. Approximately $250,000 in state funds have been allocated to this purpose. Without federal approval next year, Akins believed that this financial obligation would have to be borne completely by the State.

In response to Chairman Orsini's question on the concept of federal consistency, Akins replied that Federal agencies have observed state coastal policy when public groups, local governments and the state government united behind one position. Ultimately, however, the Secretary of Commerce would be the arbiter in any dispute between a state and federal agency over federal consistency provisions.

SENATE BILL 372

The committee voted unanimously to pass SB 372 out of committee following the explanation of Senator Willis that the bill was intended to rectify a drafting error regarding a reference citation of Senate Bill 37 to the Alaska Statutes. There was no public testimony.

IN THE SENATE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 388

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the membership of the Alaska Coastal Policy Council."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.19.891(d) is repealed and re-enacted to read:

(d) Each member of the council shall select one person to serve as a permanent alternate at meetings of the council. If a member of the council is unable to attend, he shall advise the alternate who may attend and act in the place of the member. The alternate for a public member appointed under (a)(1) of this section shall, at the time of his designation and throughout the period of his service as a permanent alternate, be [the mayor or member of the assembly or council of a municipality within] a resident of the region from which the permanent member is appointed. The alternate for a designated member serving under (a)(2) of this section shall be a deputy commissioner of the department or the director of a division in the department. The names of alternates shall be filed with the council.

* Sec. 2. AS 44.19.891(g) is repealed and re-enacted to read:

(g) If an incumbent public member ceases to meet the qualifications prescribed in (a)(1) of this section for nomination to the council or if a vacancy exists among the public members for any other reason except for a vacancy due to the expiration of the term of a public member, the governor shall, within 30 days of the establishment of the vacancy by lack of qualification or other reason, make an appointment, to be immediately effective, for the unexpired portion of the term. An

appointment by the governor made under this subsection to fill an unexpired term of a public member shall comply with the requirements of (a)(1) of this section; however, the governor may appoint from qualified persons without soliciting from municipalities nominations of persons to fill the unexpired portion of the term.

For an Act entitled: "An Act relating to the state's coastal management program; and providing for an effective date."

* Section 1. AS 46.40.040(1) is amended to read:

(1) by regulation, adopt under the provisions of the Administrative Procedure Act (AS 44.62), not later than April 15, 1978 [WITHIN SIX MONTHS OF THE EFFECTIVE DATE OF THIS ACT], for the use of and application by coastal resource districts and state agencies for carrying out their responsibilities under this chapter, guidelines and standards for

(A) identifying the boundaries of the coastal area subject to the district coastal management program;

(B) determining the land and water uses and activities subject to the district coastal management program;

(C) developing policies applicable to the land and water uses subject to the district coastal management program;

(D) developing regulations applicable to the land and water uses subject to the district coastal management program;

(E) developing policies and procedures to determine whether specific proposals for the land and water uses or activities subject to the district coastal management program shall be allowed;

(F) designating and developing policies for the use of areas of the coast which merit special attention; and

(G) measuring the progress of a coastal resource district in meeting its responsibilities under this chapter;

* Sec. 2. AS 46.40.120(c) is amended to read:

(c) A determination under (b) of this section shall be made before organization of the coastal resource service area [AND NO LATER THAN SIX MONTHS FROM THE EFFECTIVE DATE OF THIS ACT].

* Sec. 3. AS 46.40.210(6)(C) is amended to read:

(C) the siting of major energy facilities, activities pursuant to a state oil and gas lease, or large-scale industrial or commercial development activities which are dependent on a coastal location and which, because of their magnitude or the magnitude of their effect on the economy of the state or the surrounding area, are reasonably likely to present issues of more than local significance;

* Sec. 4. AS 44.19.891(g) is repealed and re-enacted to read:

(g) If an incumbent public member ceases to meet the qualifications prescribed in (a)(1) of this section for nomination to the council or if a vacancy exists among the public members for any other reason except for a vacancy due to the expiration of the term of a public member, the governor shall, within 30 days of the establishment of the vacancy by lack of qualification or other reason, make an appointment, to be immediately effective, for the unexpired portion of the term. An appointment by the governor made under this subsection to fill an unexpired term of a public member shall comply with the requirements of (a)(1) of this section; however, the governor may appoint from qualified persons without soliciting from municipalities nominations of persons to fill the unexpired portion of the term.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"

P. O. BOX 415 SKAGWAY, ALASKA 99840

F: SB 388

January 23, 1978

Senator Joe Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

This is in response to your letter of 13 January 1978 concerning Senate Bills No. 374, No. 375 and No. 388. These proposed pieces of legislation have been reviewed by the City Council. The position of the City of Skagway on each bill is as follows:

Bill No. 374: The City of Skagway strongly supports the enactment of this bill. This legislation will enable the City to obtain title to tide and submerged lands adjacent to City Park lands which were conveyed to the City by the Federal Government on 30 November 1931. Ownership of these tide lands will facilitate future development of the Park by the City. A copy of the Federal patent transferring the Park lands is enclosed for your information.

Bill No. 375: The City of Skagway supports passage of this bill. It is considered to be in the best interests of the State of Alaska and the Alaskan municipalities that a portion of the permanent fund principal and income be made available for development of municipal capital facilities.

Bill No. 388: The City of Skagway concurs in the goals and objectives of the Alaska Coastal Management Act and, therefore, supports changes which will facilitate the work of the Coastal Policy Council. The City Council, however, does have reservations with regard to the wording of Section 1.(d) of the proposed regulation. To explain:

Although the need for alternates to the public members is justified, the method proposed for their selection is considered to be inadequate. It is suggested that, rather than having the principals select their alternates, the Assembly or Councils of the regions nominate alternates and that the Governor make the selections- in other words, alternates for public members be designated in the same manner as the principals.

There is one other point: Under the proposed legislation, it would be possible that alternates might constitute all or a majority of

the public participants in coastal policy actions. It is suggested that of the public members acting on coastal policy matters at least a majority be regular members.

Sincerely,

G.D. Acker
City Manager

GEORGE M. SULLIVAN, MAYOR

OFFICE OF THE MAYOR

March 8, 1978

Senator Joe Orsini, Chairman
Community & Regional Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Senator Orsini:

Following are comments from the Municipality of Anchorage on proposed legislation:

S.B. 375 - relating to investment of permanent fund money in community capital facilities.

It is felt that the apparent intent of this bill is very good; however, as presently written, its provisions are so general that specific comment is difficult. Some specifics that need action are: Will money be in the form of grants or loans? If loans, what will be interest percentages? How much of permanent fund would be made available under S.B. 375? What would be the criteria for obtaining grants/ loans?

S.B. 388 - membership of Alaska Coastal Policy Council

Anchorage would have no problem with this legislation since our representative, Lidia Selkregg, has appointed Mat-Su Borough Mayor Don Larson as her permanent alternate. It is assumed that the bill aims to preserve a geographic and state-local balance on the Council.

Sincerely,

Doug Wenford for

Dear Senator Orsini:

Thank you for permitting us the opportunity to comment on several bills before your committee.

Our comments are as follows:

Senate Bill 373 - No Comment

Senate Bill 374 - We would have no objection to this bill provided we can continue to apply for and receive leases to tidelands under the present methods, however, if this would infringe upon that right, we raise strong objections to any interference with our right to obtain tide or submerged lands.

Senate Bill 388 - We support this bill.

Senate Bill 375 - We support this concept for loans to municipalities as defined for construction or renovation of capital facilities.

Thanks again for the opportunity to comment.

Very truly yours,

Perry D. Lovett
City Manager

members present and voting.

(f) Members of the council or their alternates are entitled to per diem and travel expenses authorized by law for members of boards and commissions.

(g) If there is a vacancy among the public members appointed under (a)(1) of this section, the governor shall make an appointment to become immediately effective for the unexpired portion of the term.

Sec. 44.19.892. POWERS OF THE COUNCIL. The council may

(1) apply for and accept grants, contributions, and appropriations, including application for and acceptance of federal funds which may become available for coastal planning and management;

(2) contract for necessary services;

(3) consult and cooperate with

(A) persons, organizations, and groups, public or private, interested in, affected by, or concerned with coastal area planning and management;

(B) agents and officials of the coastal resource districts of the state, and federal and state agencies concerned with or having jurisdiction over coastal planning and management;

(4) take any reasonable action necessary to carry out the provisions of secs. 891 - 894 of this chapter.

Sec. 44.19.893. DUTIES OF THE COUNCIL. In conformity with the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.), the council shall

(1) through the public hearing process and the recording of the minutes of the hearings, develop guidelines and standards for the preparation of, and approve, in accordance with AS 46.35, the Alaska coastal management program;

(2) establish continuing coordination among state agencies to facilitate the development and implementation of the Alaska coastal management program; in carrying out its duties under this paragraph, the council shall initiate an interagency program of comprehensive coastal resource planning for each geographic region described in sec. 891-(a)(1) of this chapter;

(3) assure continued provision of data and information to coastal resource districts to carry out their planning and management functions under the program;

(4) submit annually to the legislature, not later than the 10th day of each regular session, the portion of the coastal management program approved or amended by the council during the preceding year.

Sec. 44.19.894. COUNCIL STAFF. The council shall

utilize the staff of the office of coastal management within the division of policy development and planning in discharging its powers and duties. The coordinator of the office, with the concurrence of the council, may contract with or employ personnel or consultants he considers necessary to carry out the powers and duties of the council.

* Sec. 4. AS 46 is amended by adding a new chapter to read:

CHAPTER 35. THE ALASKA COASTAL MANAGEMENT PROGRAM.

ARTICLE 1. DEVELOPMENT OF ALASKA COASTAL MANAGEMENT PROGRAM.

Sec. 46.35.010. DEVELOPMENT OF ALASKA COASTAL MANAGEMENT PROGRAM. (a) The Alaska Coastal Policy Council established in AS 44.19.891 sh ll approve, in accordance with secs. 10 - 210 of this chapter, the Alaska coastal management program.

(b) The council may approve the Alaska coastal management program for a portion or portions of the coastal area before approving the complete program under (a) of this section. Portions of the program approved under this subsection shall be incorporated into the Alaska coastal management program.

(c) The Alaska coastal management program shall be reviewed by the council and, when appropriate, revised to

(1) add newly approved district coastal management programs, or revisions and amendments to the Alaska coastal management program;

(2) integrate newly approved district coastal management programs, or revisions and amendments of district coastal management programs, with existing approved programs and with plans developed by state agencies;

(3) add new or revised state statutes, policies, regulations or other appropriate material;

(4) review the effectiveness of implementation of district coastal management programs; and

(5) consider new information acquired by the state and coastal resource districts.

(d) All reviews and revisions shall be in accordance with the guidelines and standards adopted by the council under sec. 40 of this chapter.

Sec. 46.35.020. OBJECTIVES. The Alaska coastal management program shall be consistent with the following objectives:

(1) the use, management, restoration and enhancement of the overall quality of the coastal environment;

(2) the development of industrial or commercial enterprises which are consistent with the social, cultural, historic, economic and environmental interests of the people of the state;

(1) preserve, protect, develop, use, and, where necessary, restore or enhance the coastal resources of the state for this and succeeding generations;

(2) encourage coordinated planning and decision making in the coastal area among levels of government and citizens engaging in or affected by activities involving the coastal resources of the state;

(3) develop a management program which sets out policies, objectives, standards and procedures to guide and resolve conflicts among public and private activities involving the use of resources which have a direct and significant impact upon the coastal land and water of the state;

(4) assure the participation of the public, local governments, and agencies of the state and federal governments in the development and implementation of a coastal management program;

(5) utilize existing governmental structures and authorities, to the maximum extent feasible, to achieve the policies set out in this section; and

(6) authorize and require state agencies to carry out their planning duties, powers and responsibilities and take actions authorized by law with respect to programs affecting the use of the resources of the coastal area in accordance with the policies set out in this section and the guidelines and standards adopted by the Alaska Coastal Policy Council under AS 46.35.

* Sec. 3. AS 44.19 is amended by adding new sections to read:

ARTICLE 11A. ALASKA COASTAL POLICY COUNCIL.

Sec. 44.19.891. ALASKA COASTAL POLICY COUNCIL. (a) There is created in the Office of the Governor the Alaska Coastal Policy Council. The council consists of the following:

(1) nine public members appointed by the governor from a list comprised of at least three names from each region, nominated by the municipalities of each region; the nominees shall be the mayor or member of the assembly or council of a municipality; one public member shall be appointed from each of the following general regions:

(A) northwest Alaska, including, generally, the area of the North Slope Borough and the Northwest Arctic regional educational attendance area;

(B) Bering Straits, including, generally, the area of the Bering Straits regional educational attendance area;

(C) southwest Alaska, including, generally, the area within the Lower Yukon, Lower Kuskokwim, Southwest, and Lake-Peninsula regional educational attendance areas and the Bristol Bay Borough;

(D) Kodiak-Aleutians, including the area of the Kodiak Island Borough and the Aleutian, Adak and Pribilof regional educational attendance areas;

(E) Upper Cook Inlet, including the Municipality of Anchorage and the Matanuska-Susitna Borough;

(F) Lower Cook Inlet, including, generally, the area within the Kenai Peninsula Borough;

(G) Prince William Sound, including, generally, the area east of the Kenai Peninsula Borough to 141° W. longitude;

(H) northern Southeast Alaska, including the area southeast of 141° W. longitude and north of 57° N. latitude, including the entirety of the City and Borough of Sitka; and

(I) southern Southeast Alaska, including that portion of southeastern Alaska not contained within the area described in (H) of this paragraph;

(2) each of the following:

(A) the director of the division of policy development and planning;

(B) the commissioner of the Department of Commerce and Economic Development;

(C) the commissioner of the Department of Community and Regional Affairs;

(D) the commissioner of the Department of Environmental Conservation;

(E) the commissioner of the Department of Fish and Game;

(F) the commissioner of the Department of Natural Resources; and

(G) the commissioner of the Department of Public Works.

(b) Each public member appointed by the governor under (a)(1) of this section serves a term of two years and until his successor is appointed and qualified, except that the term of office of a public member first appointed under (a)(1)(A), (a)(1)(C), (a)(1)(E) and (a)(1)(G) of this section shall be one year. A public member may be reappointed.

(c) The council shall designate co-chairmen, one of whom shall be selected from among the public members appointed under (a)(1) of this section and one from among the members designated in (a)(2) of this section.

(d) Members appointed under (a) of this section may select one person to serve as a permanent alternate at meetings of the council. If the member appointed is unable to attend, the alternate may act in his place.

(e) Four public members and three designated members of the council constitute a quorum, but one or more of the members designated by the council may hold hearings. All decisions of the council shall be by a majority vote of the

SENATE RESOURCE COMMITTEE VIEWS ON CCSB 388

I talked to Reed Stoops (Senator Poland's Resource Committee AA) this morning regarding CSSB 388.

Stoops said that the Resouce Committee was looking at adding language to the bill in two areas:

1) To provide for an April 15 submission date for the program parallelling Lisa Rudd's bill.

2) To add clarifying language to state that the Legislature must approve all regulations as well as the Coastal Management Program. (Stoops said that this was understood but that the present language is somewhat ambiguous and Sen. Poland wishes to avoid any court challenges on this point).

Once the program is officially submitted to the Legislature in April, Stoops said that it was Sen. Poland's view that the legislators would have to adopt or reject the program in toto, that there could be no revision of the program either in committee or on the floor.

He did believe, however, that the legislative oversight of administrative regulations would later provide an avenue whereby the Legislature could exercise control over the regulatory policy of the Coastal Management Program (provided of course that such legislative oversight is not overturned in court).

Stoops said that Sen. Poland was in strong agreement with the need to insure that public members of the Council remain in fact local elected officials.

The Honorable John Rader
President of the Senate
Senate
State Capitol
Pouch V
Juneau, Alaska 99811

Dear Senator Rader:

Attached are the final Guidelines and Standards of the Alaska Coastal Policy Council, as approved by the Attorney General. The Guidelines and Standards are now in the Lieutenant Governor's Office and will be held there pending final action by the Legislature.

In order to facilitate review of the Guidelines and Standards by the Legislature, the results of the Council's action at its March 30-31 meeting were sent to you and the Attorney General as early as possible in April. Thus, the Attorney General's review, which is required by law before any regulation is formally adopted, began at the same time as the Legislature's.

The Attorney General found no substantive problems with the Guidelines and Standards, but did make a number of grammatical and textual changes which are now embodied in the attached document. We consider the changes to be non-substantive and technical in nature. If you have any questions, we are available to discuss them at your convenience.

Sincerely,

Frances A. Ulmer, Co-Chairman
Alaska Coastal Policy Council

Roger Allington, Co-Chairman

SENATE COMMUNITY AND REGIONAL
AFFAIRS COMMITTEE MEETING

March 28, 1978

Present: Senators Orsini, Ferguson, Willis and Hackney. Lynn Wegener, Department of Community and Regional Affairs; Oren Pomeroy, Department of Community and Regional Affairs; Tom Hanna, Department of Environmental Conservation; Jerry Reinwand, Department of Environmental Conservation.

Absent: Senator Sumner

SENATE BILL 430

The proposed draft for SB 430 was discussed in last week's committee meeting. Chairman Orsini stated the only difference in the proposed draft is that it puts a $150 million ceiling on the revenue bonds which is the same as the ceiling on the general obligation bonds. Chairman Orsini stated that the Committee was acting conservatively by putting a ceiling on revenue bonds. He explained that the reason was to see how the program works with respect to revenue bonds for which the state and municipalities had no prior experience. Senator Ferguson moved that the committee adopt the CS for SB 430. There was no objection. Senator Ferguson then moved that the committee move out SB 430 with a DO PASS recommendation. There was no objection.

SENATE BILL 426

Lynn Wegener, Administrative Director for the Department of Community and Regional Affairs, explained the necessity of the bill. He stated that the bill takes funds from the FY 78 senior citizens renters program and puts it to cover short-falls in the senior citizens property tax exemption program, the senior citizens special assessment program and the National Forest receipts. At that time, the committee questioned whether the action by the Department in seeking an appropriation adjustment was the proper procedure and asked instead if a Revised Program request would not have been more appropriate. Mr. Wegener replied that his department had been advised by the Office of Budget and Management to seek the transfer of funds to the senior citizens tax exemption program by means of an appropriation adjustment. It was also brought out in testimony that the transfer of $25,000 to the agricultural land exemption account was no longer necessary and that Section 4 of the bill should therefore be deleted. This action would accordingly reduce the general fund figure in Section 7 from $42,661,500 to $42,636,500. Senator Ferguson moved that the committee pass the bill out with a NO RECOMMENDATION. Chairman Orsini suggested the committee send a letter to the Judiciary committee advising them of the facts brought out by the testimony and suggest the amendments to the language of the bill. There was no objection.

CS for HOUSE BILL 190

Chairman Orsini stated that the intent was to have a discussion on the

bill before the committee passed it out because of the confusing developments regarding this bill.

Jerry Reinwand, Deputy Commissioner of the Department of Environmental Conservation and Tom Hanna, also from the Department of Environmental Conservation, presented testimony. Mr. Reinwand commented on some potential problems that may be caused by the bill. He noted that the basic reason behind the bill was that Cook Inlet Air Resource Management District wanted to get rid of overlapping programs and duplication of authority. The CIARMD would like to have the authority to issue prevention of significant deterioration permits instead of the state issuing them. Mr. Reinwant stated that there probably would not be any problem authorizing the permit program to be transferred to them. He also stated that the reason it had not been done to date was because the Department had not received an application from the CIARMD requesting this. Mr. Reinwand stated that the Department did have some drawbacks about doing this. He stated that if the CIARMD was to issue a permit that would violate the state's regulations, EPA could impose sanctions taking away all planning money and cutting off program grant money. He explained that the state has an interest to make sure that in a situation such as this there should be some kind of state oversight responsibility. The Department had submitted some rough draft amendments for the bill to provide for state oversight.

Chairman Orsini asked if Mr. Reinwand would review the bill and get his comments back to the committee by Monday, April 3, 1978. Chairman Orsini suggested that the committee would have those comments incorporated into a draft bill before another committee hearing. He also said that a letter be sent to Cook Inlet Board explaining to them that under existing law they may be able to apply for the authority to issue permits and encouraging them to pursue this possibility.

The meeting was adjourned at 3:30 p.m.

Alaska State Senate

Dear Senator Hohman:

This is to inform you that the supplemental appropriation adjustment, in the sum of $25,000 included in SB 426, for the Department of Community and Regional Affairs, State Assessor's Office, Agriculture Lands Exemption component, is no longer required. The FY 78 Agricultural Land Exemption appropriation was $125,000 and now after all applications have been reviewed and eligible payments approved, the total funding need amounts to only $118,613.50. The supplemental adjustment for the Agriculture Program was based upon the assumption that more applications would be received than has been the actual case.

STATE of ALASKA

MEMORANDUM

DEPARTMENT OF COMMUNITY & REGIONAL AFFAIRS

RECEIVED
JAN 24 1978
BUDGET & MANAGEMENT

TO: Ron Lind, Director
Division of Budget & Management
Office of the Governor

DATE: January 20, 1978

FILE NO:

TELEPHONE NO

FROM: Lynn A. Wegener
Administrative Director

SUBJECT: FY '78 Supplemental

As requested, the following is an update of my October 28, 1977 memo detailing the need for supplemental appropriations to fund anticipated shortfalls in the Fiscal Year 1978 Senior Citizens' Property Tax Exemption Program and the Senior Citizens' Special Assessment Program components of the Senior Citizens' Tax Exemption BRU and the Agricultural Lands Exemption Component of the State Assessor BRU.

Senior Citizens' Property Tax Exemption Program - $114,400

FY '78 Appropriation	$1,487,400
Applications received to date	1,525,520
Schedule attached	$(38,120)
Maximum estimated contingency for late filed applications	-76,276
	$(114,396)

Current Statutes allow Senior Citizens to file application to their municipality for tax exemption through December 31 for that calendar year's taxes. The State Assessor's Office has received the majority of the exemptions due, however, has not received all late filed applications. The outstanding exemptions due will be received from the municipalities through June 30.

Senior Citizens' Special Assessment Program - $77,300

FY '78 Appropriation	$ 168,000
Applications paid to date	
Anchorage	- 6,513
City of Cordova	- 7,680
	$ 153,807
Application estimate	
City of Fairbanks	$ - 193,500
Contingency for underestimation	- 37,607
	$ (77,300)

The original FY '78 budget estimate was based on the assumption that only the City and Borough of Juneau and the City of Cordova would apply for special assessments during the fiscal year. The Assessor has since been notified that the City of Fairbanks will be participating in the current year program for approximately $193,500. The City of Fairbanks currently anticipates a February levy date with a 90-day application and will bill the State for reimbursement in April 1978. The contingency is requested as the tax rolls at this point are not complete and the number of applicants is uncertain. The $193,500 represents the City of Fairbanks' current estimated requirement under this program. The City and Borough of Juneau has notified the State Assessor that their levy date has been adjusted from January 1, 1978 to January 1, 1979.

It should be noted that the dollars expended under this program represent a lien on the property and if sold to a non-qualified buyer, the amount of the assessment paid is reimbursed to the State.

Agricultural Land Use Assessment - $25,000

FY '78 Appropriation	$125,000
Municipality of Anchorage	-12,763
Fairbanks North Star Borough	- 4,054
Kenai Peninsula Borough	- 4,836
Matanuska-Susitna Borough	-111,416
	($ 8,070)
Contingency for underestimation	-16,929
	($ 25,000)

Under this program, owners of farm land must apply to the appropriate municipality by February 1 to qualify for the Farm Land Assessment Rate for that tax year; therefore, the estimates provided by the Municipality should approximate actual costs of the program.

The primary reason for the shortfall is the increase in the full and true value assessment and a relatively stable farm use value assessment; thus, increasing the deferred assessment value and the corresponding deferred taxes paid by the State under AS 29.53.035.

State legislation has mandated that these three groups of taxpayers are exempt from payment in the appropriate category and indicates that the State will reimburse the Municipality for revenue lost through the operation of these programs. Payment of less than 100% of the municipal claims will result in lost revenue to the municipality.

If you need additional information, please contact us.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

March 16, 1978

Present: Senators Willis, Ferguson, Hackney and Sumner. Palmer McCarter, Department of Community and Regional Affairs; Lee Sharp, Attorney for the City and Borough of Juneau; Jim Rolle, Alaska Municipal League; Doug Griffin, Department of Community and Regional Affairs; David Rose, Exec. Director for the Alaska Municipal Bond Bank; Lance Anderson, Alaska Municipal Bond Bank; Dave Gray.

Absent: Senator Orsini

Senator Willis called the meeting to order at 3:15 p.m. Senator Willis asked Jack Chenoweth, from the Legislative Affairs Agency to explain what the bill will do.

Jack Chenoweth stated that the bill would add to the Bond Bank Authority the opportunity to sell or purchase revenue bonds for local governments. Right now the statutes require that the Bond Bank Authority limit itself to dealing with just the general obligation issue. This would extend the Bank's authority to the field of revenue bonds.

Senator Hackney asked if this practice was unusual.

David Rose, Executive Director of the Alaska Municipal Bond Bank told the Committee members that the Bank would not sell the cities' bonds on their behalf, but would buy the municipal bonds and then issue its own bonds on the financial market. In return for placing its assets to back smaller municipalities in Alaska, the Bond Bank would require some degree of security from the cities. Some of the procedures included the dedication by municipal authorities of some portion of their regular revenues to the bonds bought by the Bond Bank. He also gave the following background on his organization: The Bond Bank was created in 1975 to assist small cities in marketing their general obligation debt in cases where they were unknown or had no finanical track record. The Bond Bank in May of 1976 issued its first debt on behalf of cities. The Bond Bank has since sold and purchased $1.2 million bonds for sewers in the City of Seward; Kodiak $1.8 million for roads and drainage and fire equipment; Matanuska-Susitna Borough $6.9 million for schools; City of Homer $410,000 for a public safety building and communications building; for the City of Nome $350,000 for a library extention and the construction of a new fire station; City of Soldotna $300,000 for sewer construction; Juneau $431 ~~million~~ THOUSAND for the construction of fire stations; Ketchikan $375,000 for port construction. Mr. Rose said that a good example of the bond bank would be the Bethel project which borrowed money to build a municipal building-court house combination. If it had not been for the bond bank the only other money Bethel could get was at 10% interest, which is an extremely high percentage rate. The Bond Bank refinanced the Bethel project at 4.72% on an interim basis and secured them their long range money at 5.87%. Mr. Rose went on to say that Bethel is probably the cardinal example of a small city not very well known financially trying to require funds

for needed capital improvements. He noted that the Bond Bank felt that it would not engage in revenue sharing bond debt financing until it had established a fairly good track record with the bond bank, its officers feel that they have the market acceptance and the knowledge and the expertise to continue to assist cities on this other half of their infrastructual problems. Principally they would be helping cities in the utiltiy area; they would also expect to see activity in the area of ports, and possibly in the airport area. Mr. Rose stated that the Bond Bank would like to urge the passing out of a Committee Substitute. Mr. Rose explained that the Bank found that when it markets general obligation bonds and uses the name of the Alaska Municipal Bond Bank Authority it has some difficulty because the word "authority" denotes a degree of risk. It may be therefore paying a fractional amount higher interest for the bonds. They would plan to sue the short title then, Alaska Municipal Bond Bank in marketing general obligation debt and continue to use Alaska Municipal Bond Bank Authority when they began marketing revenue debt because the word authority denotes risk and in marketing revenue bonds that would be more fitting. He noted that the Board of Directors met in January of 1978 and the vote was 4-0 in support of the bill, with Sterling Gallagher absent as the fifth member of the board.

Lance Anderson, representing the Board of Directors of the Alaska Municipal Bond Bank, stated that with the additional authority authorized by the legislation the bank can assist the municipalitites in ways that they have not been able to up to date. He went on to explain that many of the needs of the small municipalities are in the revenue area. He felt the bank could be of substantial assistance to the municipalities.

Lee Sharp, City Attorney for the City and Borough of Juneau, asked that the committee amend the bill to take care of an additional problem which has caused the City and Borough of Juneau some trouble. He explained that the statutes state that you can pledge to levy taxes without limitation on greater amount for the purpose of securing and paying debt. In order for the Municipal Bond Bank to buy Juneau bonds the city has to promise to levy taxes without limitation on greater amount. He stated that Judge Kalamarides of Fairbanks declared that you cannot make that promise. As a result, the bond bank cannot buy the city's bonds because it has no authority too. There is a Supreme Court ruling pending on this decision to date but Mr. Sharp felt that to overcome this problem that a minor amendment be made and was sent forth in a letter to the committee on March 16, 1978. The amendment would be in that section of the law which is already in the bill on line 16 right after the word "generally" add the phrase "to the extent permitted by law". This would then allow the city to make whatever pledge as the court determines the law to be. He stated that the bond bank would then have the authority to buy the city's bonds or the bonds of any other municipality that is caught in the same similar bind. He added that he had talked with Eric Wohlforth, who is the council for the bond bank, and he agreed that this type of language would overcome

this current difficulty.

David Rose commented that with respect to the City and Borough of Juneau's request for amendment that deals with the section that is in the proposed committee substitute it would be very easy to add those words.

Jim Rolle, Alaska Municipal League, stated that the League has made this a project of theirs. He further stated that the Alaska Municipal League supported both the amendments by the City and Borough of Juneau and the proposed committee substitute, as Mr. Rose submitted.

Dave Gray, the Capital Site Planning Commission currently proposed legislation for a Capital Development Corporation. He asked if the Corporation could sell revenue bonds to the Municipal Bond Bank under this proposed amendment. Mr. Rose stated that it would be his opinion that it could not. The only bonds that the bond bank can buy would be from an organized municipality, in case of the capital, the bank may be able to buy the revenue bonds issued by the municipality at some later date to refund the debt of the capital development corporation. He stated that they could not buy any debt unless it was an established on-going real city, not some corporation.

Palmer McCarter, Department of Community and Regional Affairs, stated that the Department strongly supports the proposed committee substitute to Sb 430. He went on to say that with respect to the Cith and Borough of Juneau that their proposed amendment seemed like a very reasonable and legitimate suggestion as an additional amendment to the committee substitute and from his own divisional interest it would seem very appropriate; he could not, however, specifically support the amendment by the City and Borough without more authority from the Department.

Senator Ferguson stated that he appreciated C&RA coming out with their support and went on to say that the Department of Revenue was opposed to SB 430, and thought so without unjustifiable reasons. It was stated that the Department of Revenue had been notified of the hearing and had stated that they would like to have someone testify on their behalf but had a problem of a number of people being out of town.

After hearing all the testimony on SB 430, Acting Chairman Willis suggested that a committee substittue be drawn up along the lines that have been proposed with the Juneau amendment included and when Chairman Orsini is back again, he can re-schedule this bill for the committee's consideration at that time. He also suggested that the Department of Revenue be notified so that it could testify. Senator Ferguson asked unanimous consent for this action, there was no objection.

The committe then discussed with Mr. Lance Anderson his reconfirmation with the Alaska Municipal Bond Bank. Mr. Anderson outlined his back-ground and went on to give his opinion of what it has been like to work with the Municipal Bond Bank and opinions on the Bond Bank itself. The committee members stated that they endorsed Mr. Anderson's re-appointment to the Alaska Municipal Bond Bank.

The meeting was adjourned at 4:15 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

March 23, 1978

Present: Senators Orsini, Willis, Hackney and Sumner, Kenneth Kareen, Department of Administration; Sandra Withers, Department of Administration; Lee Sharp, City and Borough of Juneau; Doug Griffin, Department of Community and Regional Affairs; Dave Klemmer, Department of Revenue; Jim Rolle, Alaska Municipal League.

Absent: Senator Ferguson

SENATE BILL 430

The meeting was called to order by Chairman Orsini. The Committee had before it a proposed committee substitute based on the draft submitted by the Alaska Municipal Bond Bank Authority with one amendment recommended by the City and Borough of Juneau to clarify the legal obligations of municipalities.

Dave Klemmer, Department of Revenue, testified that Commissioner of Revenue Sterling Gallagher had recommended a $75 million ceiling be placed on the sale of revenue bonds. He pointed out that the State of Alaska was initiating a new concept with the revenue bonds authority and that the $75 million ceiling would provide a 1:3 ratio marketing ratio for the combined general obligation bonds ($150 million) and revenue bonds ($75 million).

Jim Rolle, Alaska Municipal League, opposed the placing of a ceiling on revenue bond sales since the needs of municipalities in this area could quickly exceed $75 million.

Chairman Orsini asked Mr. Klemmer to put his Department's views in writing for the Committee.

SENATE BILL 373

Sandra Withers and Kenneth Kareen, Department of Administration, asked about the implementation of the bill. In particular, Ms. Withers asked what penalties were involved for failure to adhere to the bill provisions and Mr. Kareen questioned the inclusion of the Labor Relations Agency in adopting regulations under Sec. 14.20.565(c) since school teachers were not presently affected by the statutes. However, he stated that the Department of Administration supports the committee substitute for SB 373.

Chairman Orsini noted that the provision for issue progress reports, found in the original draft of the bill, had been deleted in the proposed committee substitute because earlier testimony had indicated that it was not likely to be productive. Senator Hackney asked that the comments of APEA and NEA-Alaska be obtained when this bill was brought up in committee again. Chairman Orsini announced that the C&RA committee meeting on March 30th would be a video-conference hearing on Senate Bills 501 and 373, held in the Governor's Conference Room. The meeting was adjourned at 3:55.

SENATE COMMUNITY AND REGIONAL
AFFAIRS COMMITTEE MEETING

March 28, 1978

Present: Senators Orsini, Ferguson, Willis and Hackney. Lynn Wegener, Department of Community and Regional Affairs; Oren Pomeroy, Department of Community and Regional Affairs; Tom Hanna, Department of Environmental Conservation; Jerry Reinwand, Department of Environmental Conservation.

Absent: Senator Sumner

SENATE BILL 430

The proposed draft for SB 430 was discussed in last week's committee meeting. Chairman Orsini stated the only difference in the proposed draft is that it puts a $150 million ceiling on the revenue bonds which is the same as the ceiling on the general obligation bonds. Chairman Orsini stated that the Committee was acting conservatively by putting a ceiling on revenue bonds. He explained that the reason was to see how the program works with respect to revenue bonds for which the state and municipalities had no prior experience. Senator Ferguson moved that the committee adopt the CS for SB 430. There was no objection. Senator Ferguson then moved that the committee move out SB 430 with a DO PASS recommendation. There was no objection.

SENATE BILL 426

Lynn Wegener, Administrative Director for the Department of Community and Regional Affairs, explained the necessity of the bill. He stated that the bill takes funds from the FY 78 senior citizens renters program and puts it to cover short-falls in the senior citizens property tax exemption program, the senior citizens special assessment program and the National Forest receipts. At that time, the committee questioned whether the action by the Department in seeking an appropriation adjustment was the proper procedure and asked instead if a Revised Program request would not have been more appropriate. Mr. Wegener replied that his department had been advised by the Office of Budget and Management to seek the transfer of funds to the senior citizens tax exemption program by means of an appropriation adjustment. It was also brought out in testimony that the transfer of $25,000 to the agricultural land exemption account was no longer necessary and that Section 4 of the bill should therefore be deleted. This action would accordingly reduce the general fund figure in Section 7 from $42,661,500 to $42,636,500. Senator Ferguson moved that the committee pass the bill out with a NO RECOMMENDATION. Chairman Orsini suggested the committee send a letter to the Judiciary committee advising them of the facts brought out by the testimony and suggest the amendments to the language of the bill. There was no objection.

CS for HOUSE BILL 190

Chairman Orsini stated that the intent was to have a discussion on the

bill before the committee passed it out because of the confusing developments regarding this bill.

Jerry Reinwand, Deputy Commissioner of the Department of Environmental Conservation and Tom Hanna, also from the Department of Environmental Conservation, presented testimony. Mr. Reinwand commented on some potential problems that may be caused by the bill. He noted that the basic reason behind the bill was that Cook Inlet Air Resource Management District wanted to get rid of overlapping programs and duplication of authority. The CIARMD would like to have the authority to issue prevention of significant deterioration permits instead of the state issuing them. Mr. Reinwant stated that there probably would not be any problem authorizing the permit program to be transferred to them. He also stated that the reason it had not been done to date was because the Department had not received an application from the CIARMD requesting this. Mr. Reinwand stated that the Department did have some drawbacks about doing this. He stated that if the CIARMD was to issue a permit that would violate the state's regulations, EPA could impose sanctions taking away all planning money and cutting off program grant money. He explained that the state has an interest to make sure that in a situation such as this there should be some kind of state oversight responsibility. The Department had submitted some rough draft amendments for the bill to provide for state oversight.

Chairman Orsini asked if Mr. Reinwand would review the bill and get his comments back to the committee by Monday, April 3, 1978. Chairman Orsini suggested that the committee would have those comments incorporated into a draft bill before another committee hearing. He also said that a letter be sent to Cook Inlet Board explaining to them that under existing law they may be able to apply for the authority to issue permits and encouraging them to pursue this possibility.

The meeting was adjourned at 3:30 p.m.

CHENOWETH COMMENTS RE SB 430 - 3-27-78

Chenoweth noted this morning that the prime interest of the Alaska Municipal Bond Bank Authority in having its authority extended to revenue bonds concerns its desire to become involved in a major way in the bonding of coastal development energy projects. Information to that effect is attached. He believes that both the CRA Department and Rose were prepared to discuss this topic but the question was never raised by the Committee.

Regarding the Department of Revenue's proposed ceiling of $75 million on the revenue bond sales, Chenoweth remarked that in three years the AMBBA has sold about $20 million of its $150 million ceiling for general obligation bonds. However, discussions with CRA have led him to believe that, given the scope of the AMBBA's interest in coastal energy projects, a $75 million revenue bond ceiling would be exhausted within several years. He also believes that CRA may have more precise data on this since their observer at the Committee hearings on 430 happened to be the Department's CEIP man.

Ben Harding

Mr. Anderson

Original G.O. Bonds - wanted good track record here first. Have experience, & expertise now.

Wants CS.

Now
1) - Bond BANK has Authority to size. only GO bond.
Shouldn't subject city on Revenue bonds

Lee Sharp - Bond BANK Rate or Amount - Kalmakidas, decision Bond

- Juneau wants to use Bond Bank
- Delmar McCarter - OK
- Jim Bell - Municipal League

SUMMARY OF QUALIFICATIONS

Nature of Background:

Over 12 years of progressive assignments in private and public accounting sectors.

Capabilities:

Highlights of experience and qualifications:

...Budgets and forecasts...Accounting & Business Systems Development...Accounting Control...Management Reports & Advisory Services...Consolidations...Tax Preparation... Credit & Collection Management...Personnel Supervision... Data Processing Applications...Cost Accounting...Cash Flow Control...Financial Statements...Financial Planning... Commercial Real Estate Management and Development...

Personal Characteristics:

Ability to effectively plan and direct the work of support personnel, communicate effectively with management at all levels and establish well-structured financial and business controls to assure profit return.

Employment Experience:

Property Manager and Trust C.P.A. for Alaska Electrical Trust Funds 1977-1978. Presently employed with Alaska Electrical Trust Funds, the Taft Hartley multiemployer pension, health and welfare, legal aid and apprenticeship programs jointly sponsored and managed by IBEW Local 1547 and National Electrical Contractors Association.
Responsible for management of Real Estate ventures of Pension Trust including 40,000 square foot office building and proposed 125,000 square foot office building. Also responsible for supervision of accounting and financial activities.

Vice-President-Finance for NANA Corporation 1974-1977. Recently resigned as Vice-President, Finance of Corporation with over $30,000,000 in assets and revenues of approximately $30,000,000. Corporation was profitable during all three years of employment.

Responsible for total supervision of all accounting activities and procedures. During period of employment centralized all accounting functions and substantially converted them to a real-time computerized system. Company revenues during this period of time grew from approximately $700,000 to the current

$30,000,000 plus and accounting staff which grew from four to twenty-five.

Collateral activities included establishment of financial policies, determination of investment objectives, development of banking and auditing relationships and providing counseling to key executives regarding new commercial ventures.

Manager-Tax Department- Peat, Marwick, Mitchell & Co.
1971-1974

Employed three years in the tax department of Peat, Marwick, Mitchell & Co. in Anchorage. Entered tax department under PMM accelerated tax training program. Responsibilities included account tax supervision for many accounts including:

Alaska International Industries, Inc.
Reeve Aleutian Airways, Inc.
Alaska Mutual Savings Bank
Yukon Office Supply, Inc.

Other activities included responsibility for Kodiak practice of PM&M, estate tax returns, and in-house tax training program.

Supervisor-Audit Department- Peat, Marwick, Mitchell & Co.
1965-1971

Joined PM&M in August of 1965 and was promoted to supervisor in July, 1968. Responsibilities included management supervision of audit clients including direct responsibility for field work. Audit client responsibilities included the following clients:

Alaska Mutual Savings Bank
Alaska State Bank
First National Bank of Fairbanks
B&B Fisheries, Inc.
Automotive Parts and Equipment, Inc.
Alaska Federation of Natives

Also participated in management group activities including business development, staff evaluation and long-range planning.

Education: Graduate of West Anchorage High School in 1962 and the University of Washington in 1965 with a major in accounting and a minor in finance. Attended numerous PM&M training courses as well as courses offered by the Alaska Society of CPA's several of which I also taught. Awarded a CPA certificate in 1967 and am a member of the Alaska Society of CPA's and the American Institute of CPA's.

Personal Data: Age: 34; Married, three children - ages 6, 10 and 13. Lifelong resident of Anchorage.

ALASKA MUNICIPAL BOND BANK AUTHORITY

February 6, 1978

Senator Joe Orsini
Chairman, Community and Regional Affairs Committee
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Joe:

Thank you for your recent letter requesting my comments on SB 430 which will be reviewed by your committee.

The Board of Directors, by resolution, fully supports the Bill provided a new Section is added as follows:

"*Sec 2. AS 44.58.420 is amended to read:

Section 44.58.420. SHORT TITLE. This chapter may be cited as the Alaska Municipal Bond Bank Authority Act or the Alaska Municipal Bond Bank Act. The Alaska Municipal Bond Bank Authority created by this chapter may be referred to as the Alaska Municipal Bond Bank with the same legal effect as if the reference were to Alaska Municipal Bond Bank Authority;"

The above change will allow us to market bonds without the word "Authority" appearing in our name. We are advised that the word "Authority" infers that the bond is more of a revenue issue rather than general obligation. Also, some housing authorities and port authorities have recently fallen into market disfavor. If this amendment to title is passed, we plan to drop the word "Authority" on general obligation issues but would probably retain it for revenue issues. Dropping the word may provide market savings of as much as 20 basis points on G.O. issues.

Section 1 of SB 430 will enable us to meet the needs of smaller cities wishing to accomplish projects not properly classified as general obligation. These include utilities, docks, ports, etc. This change is extremely important if we are to be in a position to assist communities impacted by offshore energy exploration and development.

Hope you can schedule early action on the Bill. I'll be pleased to meet with the committee.

Sincerely,

David A. Rose, Executive Director

February 24, 1978

The Honorable Joe Orsini
Chairman, Senate Community & Regional
Affairs Committee
State Capitol
Juneau, Alaska 99811

Dear Senator Orsini:

Re: Senate Bill 430 and Senate Bill 375

The Department of Revenue agrees in principal with both bills but disagrees in the existing procedure. The Department of Revenue is submitting amendments to the Alaska Municipal Bond Bank Authority statute concerning the Authority's ability to issue revenue bonds and placing certain limitations on the amount of revenue bonds which may be issued. These amendments, if adopted, represent the Department's concern.

Attached is a copy of a draft bill that is currently in the Department of Law and will be introduced shortly. This draft amends the limitations as to the amounts of either general obligation or revenue bonds that may be outstanding at one time. It also proposes a short title which will allow for easier identification and ultimately better marketability of the Alaska Municipal Bond Bank bonds.

Senate Bill 375 amends the interim management statute (AS 37.10.065) for the investment of the Alaska Permanent Fund. AS 37.10.065 provides for a caretaker investment function, and it never was the legislative intent that this statute should become the definitive legislation for the permanent fund. The proposed investment activity to be included for the interim management statute would change the intent of the interim management statute which was to invest the Alaska Permanent Fund principal in low risk securities and not to invest the principal within Alaska. The Administration bill on the Alaska Permanent Fund, House Bill 298, provides for in-state investments of the kind described in Senate Bill 375.

The Department of Revenue does not wish to see the interim management statute turned into the permanent enabling legislation on the Alaska Permanent Fund. For these reasons the Department does not support either Senate Bill 430 or Senate Bill 375.

I will be very happy to discuss these bills with you at your convenience.

Sincerely,

Jim Edenso
Deputy Commissioner

ALASKA MUNICIPAL BOND BANK AUTHORITY

March 10, 1978

Senator Joe Orsini, Chairman
Community & Regional Affairs Committee
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

Your scheduling of hearings concerning both confirmation of Mr. Lance Anderson as a board member re-appointee and Senate Bill 430 for Thursday, March 16, 1978 is sincerely appreciated.

Mr. Anderson has served as a director of the Bond Bank since its inception in 1975. During that period, his professional expertise in the areas of finance and accounting has been invaluable. His ability to demand factual presentation and his capacity to assimilate and analyze the information provided, has materially assisted other Board members in making correct decisions in both the loan making process and in marketing bonds. Mr. Anderson is a Certified Public Accountant formerly with NANA Regional Native Corporation and with the firm of Peat, Marwick, Mitchell & Company. He is currently serving as building manager for the Pension Trust of Local 1547 of the International Brotherhood of Electrical Workers. The other board members and I strongly recommend confirmation of his reappointment.

Senate Bill 430 as proposed by Senator Croft is excellent as proposed. We do, however, need two additional sections and hope these additions can be made in Committee. The revised bill is attached as an enclosure.

Section 2 expands the authority of the Bank so that it will be able to purchase municipal revenue bonds as well as general obligation bonds. Now that the bond bank is established in bond markets and is relatively widely understood in the financial arena, it can safely begin to introduce revenue debt. Revenue debt was not included in the original bill because without a "track record" to rely on, such marketing would not have had market acceptance. The broadening of the definition of municipal bonds will permit us to assist smaller cities in utility and port development and will enable us to utilize CEIP Federal money to leverage debt rather than State funds. Section 2 on the enclosure is identical to Section 1 of SB 430.

Section 3 will allow us to market general obligation debt without the stigma of the word "Authority" which frequently has the connotation of risk. Use of the short title could possibly have a positive effect worth 20 to 25 basis points.

Section 1 retains the payover condition for general obligation bonds but removes it for revenue bonds. Since revenue bonds are more risk oriented than G.O., and garner higher interest rates, it is appropriate that payover not apply.

Section 4 calls for an immediate effective date so that we can assist cities during this construction season. Section 4 is identical to Section 2 of SB 430.

There is no State fiscal implication this year in these amendments. We expect that reserve funds for revenue debt will come primarily from the Federal CEIP rather than the State. Capital appropriations may be required in subsequent years dependent upon the level of demand and the State's ability to react to the demand.

We look forward to meeting with you and the Committee on March 16th.

Sincerely,

Norman J. Levesque

Norman J. Levesque

ALASKA MUNICIPAL BOND BANK AUTHORITY

February 3, 1978

Mr. James Robey
Coastal Energy Impact Program
3300 Whitehaven Street
Washington, D.C. 20035

Dear Mr. Robey:

The purpose of this letter is to support an application by the State of Alaska for Coastal Energy Impact Program loan funds. Additionally, it outlines concepts and procedures currently being considered which will establish mechanisms for the implementation of the program in Alaska.

Upon approval of the State application, it is contemplated that your organization will enter into a loan agreement with the Alaska Municipal Bond Bank Authority. Under the terms of this agreement, the Bond Bank will borrow funds from you and utilize them as a funded reserve, at the 100% level, to support the issuance of Bond Bank bonds. Upon the sale of Bond Bank bonds, proceeds will be used to purchase the bonds issued by coastal impact communities. In this manner, your loan to the Bond Bank will directly assist these communities. This approach and the loan agreement is designed to accomplish the following: 1.) Assist coastal cities by purchasing debt so that they may proceed with needed energy impact capital improvements; 2.) provide for the issuance of coastal cities debt at low interest rates (the funded reserve will permit the Bank to receive an extremely beneficial rate which will be passed through to the coastal cities); 3.) establish the reserve in such a manner as to make available for conversion to grant in the event a city project should fail and default occur or theaten; 4.) provide for investment of funds borrowed by the Bond Bank in such a manner that they earn the current Federal rate; 5.) safeguard said funds through proper placement with a trustee designated by the Bond Bank and acceptable to you; 6.) provide for periodic payment of interest due you from the proceeds of invested funds in accordance with instructions issued to the trustee; 7.) provide that before funds are committed for the purpose of funding a reserve, a tri-party agreement is executed between you, the Bank and the city involved which sets forth the terms and conditions under which the reserve is provided, the impact assumptions which are expected to obtain, and specific language which indicates the circumstances which must occur if the loan is to be converted to a grant.

Other technical procedures and mechanisms will also be contained in the loan agreement between you and the Bond Bank.

It is anticipated that a draft loan agreement will be available for your review in Washington D.C. prior to February 23rd and 24th. On those dates the undersigned, the Bank bond counsel, and State lead agency representatives, will meet with you in Washington D.C. to discuss the proposed loan agreement and refine language in a manner which is mutually acceptable. Following agreement on language, the loan agreement will be presented to the Board of Directors of the Bond Bank for its approval by resolution.

In addition to discussion of the draft loan agreement, we will also provide a draft contract which the Bond Bank will enter into with a fund custodian-trustee. Since this contract will specify the manner in which funds borrowed from you will be invested and how interest due you will be paid, it is essential that there be mutual concurrence in this document as well.

If we can be of further assistance to you prior to our meeting on the 23rd and 24th of February, please do not hesitate to contact me or Mr. Wohlforth.

Sincerely,

David A. Rose

GEORGE M. SULLIVAN, MAYOR

OFFICE OF THE MAYOR

March 16, 1978

The Honorable Joe Orsini, Chairman
Community and Regional Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Joe:

I want to thank you for the legislation that you have sent to me for review. It has been a great help to me, and a good deal of it I have forwarded to my various department heads to look over and comment. I've been out of the state for approximately the last three weeks and find my desk piled too high to see over; but I did want you to know that I appreciate the bills you are sending for me to look at, and also to tell you that I may be getting down there in the next week or two. I hope that while I'm there we can get together to discuss some of the proposed legislation that affects Anchorage.

With specific reference to a Bill you recently sent me, SB 430, an Act extending the authority of the Alaska Municipal Bond Bank; I can easily support this bill, although it will have little or no effect on Bond Funding for our own utilities.

I look forward to seeing you real soon in Juneau.

Sincerely,

George M. Sullivan
Mayor

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE: March 16, 1978

FILE NO. Legislature - 1978 Session

SUBJECT: SB 430, AMBBA Authority

Honorable Joe Orsini, Chairman
Senate Community and Affairs Committee
Pouch "V"
Juneau, Alaska 99811

Dear Senator Orsini,

As you and the committee are no doubt aware, litigation involving the oil companies and the North Slope Borough have cast doubts on the meaning of sections of Title 29 which relate to the extent of the authority of municipalities to pledge taxes to secure debt. The decision in the Superior Court placed certain limitations on the language which municipalities and bond counsel had not previously believed existed. The definition of "municipal bond" as it appears in the Alaska Municipal Bond Bank Act reflects the commonly held view that there was no limitation on the authority of the municipality to levy taxes for the purposes of securing and paying debt and interest. The bond bank is authorized by the Act to buy only muniicipal bonds which are defined as bonds which have an unlimited tax pledge. Unfortunately, the decision in the North Slope case prohibits the municipality from making an unlimited pledge of taxes. Therein lies the problem. The AMBBA is authorized by law to buy bonds which boroughs, first class and home rule municipalities are unable to issue under the North Slope decision. To overcome this dilemma, we suggest that the following amendment be made to Senate Bill 430:

> In line 16, after the word "generally" add the phrase "to the extent permitted by law".

This amendment would authorize the AMBBA to purchase municipal bonds where the municipality had made a pledge of its taxes to the extent authorized by law. The law being what the court says it is (until the legislature changes it), this amendment would authorize the purchase by the AMBBA of municipal bonds which it cannot now purchase under the North Slope ruling.

I believe that the proposed amendment is in keeping with the original purpose of defining a municipal bond in the

manner it presently appears; that is, that the bond be backed by the maximum full faith and credit pledge which the municipality could lawfully make.

Today, I discussed this proposed amendment with Eric Wolforth, who is bond counsel for the AMBBA. He concurred that the proposed amendment would alleviate the problem created by the North Slope decision as it relates to the authority of the bond bank to purchase bonds.

We urge the committee to include the proposed language in a committee substitute for Senate Bill 430.

Very truly yours,

Gerald L. Sharp
City/Borough Attorney

STATE OF ALASKA
THE LEGISLATURE
LEGISLATIVE AFFAIRS AGENCY

POUCH Y STATE CAPITOL
JUNEAU ALASKA 99811
907 465 3800

MEMORANDUM March 17, 1978

SUBJECT: SB 373; collective bargaining

TO: Senator Joseph L. Orsini

FROM: Richard A. Bradley, Legislative Counsel

After the hearing on SB 373 recently, you asked me to comment on one question.

The testimony offered on SB 373 suggested that some municipalities and school districts had provisions in their collective bargaining agreements stipulating that negotiations under the agreement would be undertaken in private.

Your question to me was whether in the context of such a provision, the municipality or school district retained the authority to adopt an ordinance which would mandate collective bargaining in the public's view.

In my opinion, a municipality or school district retains the right to determine the public policy of the community it speaks for. Therefore, a municipality or a school district may adopt an ordinance or resolution articulating such a policy.

In areas such as the protection of civil rights, restraints inconsistent with that goal may be expected to yield and the fact that the restraints are located in contracts has not been found significant. Southern Illinois Builders Assn. v. Ogilvie, 327 F. Supp. 1154 (S.D. Ill. 1971) and Contractors Assn. of Eastern Pa. v. Sec. of Labor, 442 F. 2d 159 (3rd Cir.) cert. den., 404 U.S. 854 (1971), aff'g. 311 F. Supp. 1002 (E.D. Pa. 1970). See also Federal Housing Authority v. Darlington 358 U.S. 84, 91 (1958); Fleming v. Rhodes, 331 U.S. 100, 107 (1947).

In my opinion, the strong public policy in favor of the public's right to know what government is doing militates toward a similar conclusion. In any consideration of such a move, a municipality or school district presently operating under such a contractual provision could move to an open policy in stages by either declining to negotiate such a provision in renewals of agreements or providing by ordinance for open negotiations in all future agreements.

SUMMARY OF QUALIFICATIONS

Nature of Background: Over 12 years of progressive assignments in private and public accounting sectors.

Capabilities: Highlights of experience and qualifications:

...Budgets and forecasts...Accounting & Business Systems Development...Accounting Control...Management Reports & Advisory Services...Consolidations...Tax Preparation... Credit & Collection Management...Personnel Supervision... Data Processing Applications...Cost Accounting...Cash Flow Control...Financial Statements...Financial Planning... Commercial Real Estate Management and Development...

Personal Characteristics: Ability to effectively plan and direct the work of support personnel, communicate effectively with management at all levels and establish well-structured financial and business controls to assure profit return.

Employment Experience: Property Manager and Trust C.P.A. for Alaska Electrical Trust Funds 1977-1978. Presently employed with Alaska Electrical Trust Funds, the Taft Hartley multiemployer pension, health and welfare, legal aid and apprenticeship programs jointly sponsored and managed by IBEW Local 1547 and National Electrical Contractors Association.
Responsible for management of Real Estate ventures of Pension Trust including 40,000 square foot office building and proposed 125,000 square foot office building. Also responsible for supervision of accounting and financial activities.

Vice-President-Finance for NANA Corporation 1974-1977. Recently resigned as Vice-President, Finance of Corporation with over $30,000,000 in assets and revenues of approximately $30,000,000. Corporation was profitable during all three years of employment.

Responsible for total supervision of all accounting activities and procedures. During period of employment centralized all accounting functions and substantially converted them to a real-time computerized system. Company revenues during this period of time grew from approximately $700,000 to the current

$30,000,000 plus and accounting staff which grew from four to twenty-five.

Collateral activities included establishment of financial policies, determination of investment objectives, development of banking and auditing relationships and providing counseling to key executives regarding new commercial ventures.

Manager-Tax Department- Peat, Marwick, Mitchell & Co.
1971-1974

Employed three years in the tax department of Peat, Marwick, Mitchell & Co. in Anchorage. Entered tax department under PMM accelerated tax training program. Responsibilities included account tax supervision for many accounts including:

Alaska International Industries, Inc.
Reeve Aleutian Airways, Inc.
Alaska Mutual Savings Bank
Yukon Office Supply, Inc.

Other activities included responsibility for Kodiak practice of PM&M, estate tax returns, and in-house tax training program.

Supervisor-Audit Department- Peat, Marwick, Mitchell & Co.
1965-1971

Joined PM&M in August of 1965 and was promoted to supervisor in July, 1968. Responsibilities included management supervision of audit clients including direct responsibility for field work. Audit client responsibilities included the following clients:

Alaska Mutual Savings Bank
Alaska State Bank
First National Bank of Fairbanks
B&B Fisheries, Inc.
Automotive Parts and Equipment, Inc.
Alaska Federation of Natives

Also participated in management group activities including business development, staff evaluation and long-range planning.

Education: Graduate of West Anchorage High School in 1962 and the University of Washington in 1965 with a major in accounting and a minor in finance. Attended numerous PM&M training courses as well as courses offered by the Alaska Society of CPA's several of which I also taught. Awarded a CPA certificate in 1967 and am a member of the Alaska Society of CPA's and the American Institute of CPA's.

Personal Data: Age: 34; Married, three children - ages 6, 10 and 13. Lifelong resident of Anchorage.

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF THE MUNICIPAL ATTORNEY

January 23, 1978

Howard DeVore
Alaska State Volunteer Services
338 Denali St., Mackay Bldg. 7th
Anchorage, Alaska 99501

Re: Proposed Senate Bill on Volunteer Services

Dear Mr. DeVore:

You have asked for a response to the above-captioned bill concerning volunteer services from the Municipality of Anchorage. The Municipality of Anchorage would not be in favor of the measure as it is presently drafted. It is our view that the potential legal problems created by the use of volunteers will be magnified by the proposed legislation and would be more effectively addressed by local legislation tailored to meet specific community needs.

The legislation which deems volunteers employees for the purpose of tort liability apparently is intended to decrease governmental liability in this area. However, the activities of volunteers will not necessarily fall within the state statute immunizing local governments from tort actions for certain acts of their employees. Absent this immunization, the proposed bill could actually have the effect of increasing exposure to liability under tort doctrine applied to the employment relationship. This in turn would discourage local governments from sponsoring volunteer programs and activities.

Extension of workman's compensation to volunteers also poses significant problems. First, from a legal standpoint, volunteers are not presently covered under workman's compensation laws and the present bill does not indicate how this will be accomplished. As the bill is presently drafted potential abuse of workman's compensation benefits exists in that volunteers are not subject to usual personnel management which safeguards against unfounded claims. Finally, the bill does not set forth a plan for the administration of volunteer coverage under workmen's compensation

including the difficult task of setting terms of coverage. Volunteer workers are an important community resource but problems created by their use can best be solved at a local level.

Please contact this office if you have any questions.

Very truly yours,

THEODORE D. BERNS

TO: Senate State Affairs Committee
ATTN: Barney Eberhardt, A.A.

FROM: Kenneth E. Vassar
Legislative Counsel

You have requested that I draft a committee substitute for Senate Bill 454 which will (1) provide that volunteers are state employees for the purposes of confidentiality statutes relating to state employees, and (2) provide a mechanism for the inclusion of volunteers under the Alaska Workmen's Compensation Act (AS 23.30.005 - 23.30.270). In connection with the latter, your instructions provided that I should contact Senator Huber for details.

You will note that the attached draft includes a new clause at the end of section 220(a) of the bill which provides that volunteers are state employees for the purposes of AS 39.51.-010. This, I believe, is the section you had in mind; and it basically prohibits misuse of confidential information by a person who is or has been an employee of the state.

In addition, a new section, which is incorporated as section 2, has been added to the bill. This section would amend the Alaska Workmen's Compensation Act by adding a new section which provides a method of determining a volunteer's average weekly wage for the purposes of that act. If a volunteer has income from outside employment or self-employment, that will be used in accordance with the normal procedure under the act to determine his average weekly wage. If a volunteer is unemployed or retired, his average weekly wage will be considered to be the greater of 75 percent of the Alaska average weekly wage or his average weekly wage for his last period of employment. The "75 percent" figure has been used only for discussion purposes and has no other particular significance.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MEETING

June 1, 1978

Present: Senators Orsini, Hackney and Sumner; Ann Mawn, Lt. Governor's office; Don M. Berry, Municipality of Anchorage; Steve Hole, DOE; Bob Cooksey, NEA-Alaska.

Absent: Senators Willis and Ferguson

The meeting was called to order at 3:10 p.m. and the bills before the Committee were SB 454 and HB 934 am.

SENATE BILL 454

Chairman Orsini stated that the Committee had a committee substitute for the bill. He stated that it took out all references to municipalities. There was no public testimony given at this time.

Senator Sumner moved that SB 454 pass out of committee with "INDIVIDUAL RECOMMENDATIONS".

HOUSE BILL 934 am

Chairman Orsini stated that this bill came of HESS committee with a "DO PASS" recommendation.

Bob Cooksey, NEA-Alaska, stated that they had no objections to the bill.

Steve Hole, Department of Education, stated that the Department was in favor of HB 934 am

Senator Sumner moved that HB 934 am pass out of committee with "INDIVIDUAL RECOMMENDATIONS".

The meeting was adjourned at 3:30 p.m.

Dear Ben;

In response to your request for a position on CSSB 454, I offer you the following:

Should this bill come up, we would testify against the "municipal opt-in" clause. We would do this for two reasons. First, I would suspect that we already can, if we chose, cover any of our volunteers. The second reason is that, while we might want to cover some, we would not necessarily wish to cover all. I would fear though, that if there were a law on the books, there would be pressure for the municipality to opt in regardless of need. Thus, our insurance rates would really increase. Consider the methods by which the Workmen's Compensation Board would consider the wages of a volunteer if they had not earned wages in the last three years. It would appear that the low would be $1,967 per month with a high of $4,110. These kinds of dollars could encourage abuse.

I think that pretty well describes our feelings.

DS PASSED 5/18/90

IN THE SENATE BY THE STATE AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 454

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to volunteer service."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.05 is amended by adding new sections to read:

ARTICLE 5. VOLUNTEER SERVICE.

Sec. 39.05.200. AUTHORIZATION; OFFICE OF VOLUNTEER SERVICES. (a) All state agencies are authorized to recruit, train, and accept without regard to personnel laws, rules, or regulations, including the Public Employment Relations Act (AS 23.-40.070 - 23.40.260), the services of individuals without compensation as volunteers for or in aid of their functions. (b) There is created in the office of the lieutenant governor the Office of Volunteer Services.

Sec. 39.05.210. INCIDENTAL EXPENSES. All state agencies are authorized, within appropriation limits, to provide for incidental expenses, such as transportation, lodging, subsistence, and uniforms or special clothing required for the volunteers.

Sec. 39.05.220. EMPLOYMENT STATUS. (a) Except as otherwise provided in this section, a volunteer is not a state official or employee and is not subject to the provisions of law relating to state employment, including those related to hours of work, rates of compensation, leave, unemployment compensation, employee benefits, and employee labor relations; however, a volunteer is a state employee for the purposes of AS 39.51.010.

Issue of liability limitation

(b) For the purposes of tort claims against the state, a volunteer is a state employee.

(c) For the purposes of the Alaska Workmen's Compensation Act (AS 23.30.005 - 23.30.270), a volunteer is a state employee as provided in

AS 23.30.244.

Sec. 39.05.230. LIMITATION. Volunteers may be used to supplement existing salaried employees or service contracts but may not be used to supplant them.

Sec. 39.05.240. APPLICATION. (a) A person applies to be a volunteer on a form prescribed by the lieutenant governor and made available at any state agency which uses volunteers. The forms may vary among agencies in accordance with their respective needs. An agency may refuse to accept any application for volunteer service if it believes it cannot reasonably utilize the service.

(b) A person who performs volunteer service without first applying as provided by (a) of this section and without having his application accepted is not a volunteer for the purposes of secs. 200 - 250 of this chapter.

Sec. 39.05.250. LOCAL OPTION. (a) A municipality may provide, by resolution or ordinance, for volunteer service under this chapter for that municipality.

(b) A municipality which provides for volunteer service shall notify the lieutenant governor and request application forms prescribed by him for municipalities.

(c) The provisions of secs. 200 - 240 of this chapter apply to any municipality which provides for volunteer service; however,

(1) volunteers are considered to be municipal employees for the purposes of tort claims only if the municipality has approved that classification by resolution or ordinance;

(2) volunteers are considered to be municipal employees for the purposes of workmen's compensation only if the municipality has approved that classification by resolution or ordinance.

(d) Nothing in this section affects the performance of public

service for municipalities on a voluntary basis, such as but not limited to, spring clean-ups, municipal celebrations, Fourth of July activities, volunteer fire departments, police reserves, ski patrols, and other forms of voluntary public service which are performed under municipal auspices; however, the municipality may include these services, in whole or in part, under the coverage of secs. 200 - 240 of this chapter as provided by this section.

* Sec. 2. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.244. VOLUNTEERS. (a) Volunteers whose services are utilized by state agencies [or municipalities] under the provisions of AS 39.05.200 - 39.05.250 are considered employees under this chapter only while actually traveling or working as volunteers of state agencies or municipalities. The average weekly wage of the volunteer, for the purpose of computing compensation, shall be determined in accordance with sec. 220 of this chapter; however, if the volunteer is unemployed or retired and has received no wages for the three calendar years immediately preceding the injury, his average weekly wage shall be considered to be the greater of

(1) 75 per cent of the Alaska average weekly wage as determined under sec. 175 of this chapter, or

(2) the volunteer's average weekly wage determined in accordance with sec. 220 of this chapter for his most recent period of employment.

(b) Annual appropriations to fund the coverage provided for in (a) of this section for volunteers whose services are utilized by state agencies shall be provided for in the budget of the Office of the Governor.

* Sec. 3. AS 44.19.030 is amended by adding a new paragraph to read:

(3) coordinate, promote, and adopt regulations for the pro-

gram for full-time and part-time volunteer service authorized by AS 39.05.200 - 39.05.230.

Sec 23.30.244(a)(after) Received no wages—
Hunters

AMENDMENT TO CS FOR SENATE BILL NO 454

SEC. 39.05.220. EMPLOYMENT STATUS

(c) For the purposes of the Workmen's Compensation Act(~~230.005-230.27~~) a volunteer is a state employee. (ADD) "The Workmen's Compensation Board may fix the wage-earning capacity of volunteers in state agencies at no less than Range 20, Step A and no higher than the top of classified service."

FOR IMMEDIATE RELEASE

SENATE COMMITTEE HEARINGS ON PUBLIC COLLECTIVE BARGAINING BILL TO BE VIDEO-BROADCAST TO ALASKAN COMMUNITIES

Video-broadcast hearings will be held by the Senate Community and Regional Affairs Committee on March 30 to explore new concepts in resolving deadlocked public employee contract negotiations, either by a direct vote of the people or through the election of a local arbitration panel.

These procedures are outlined in Senate Bill 501, introduced by Senator Joe Orsini (R-Anchorage). The bill was drawn up to allow local government or the appropriate administrative body the option of adopting either, or neither, of these procedures as a means of resolving local public collective bargaining impasses. It was not intended for the bill to mandate either of these forms of arbitration to local government bodies, but to permit the selection of the most responsive approach to the needs of the local situation.

-continued-

The adoption by local communities of such procedures, Senator Orsini said, "would put more of the decision-making authroity for the arbitration of collective bargaining disputes into the hands of the local public, whose tax-dollars, after all, fund the settlements."

Because of the increasing interest by the public in public sector collective bargaining, a wide range of groups and organizations have been invited to testify at the March 30 hearings. The video-conference will be broadcast from Juneau to the communities of Ketchikan, Anchorage, Fairbanks, Bethel and Nome at 12:30 p.m. (Juneau time). The recently installed two-way video-broadcast facilities will allow persons from these communities to present testimony to the Senate committee and to follow the course of the committee hearings without leaving their local communities.

News directors in the electronic media who may be interested in obtaining portions of the hearings on video-tape for later use in newscasts should contact Mr. Peter Fromuth, Legislative Affairs Agency in Juneau, at 465-4980, or conference moderators located in the other communities. (See attached list for names and telephone numbers)

The members of the Senate Community and Regional Affairs Committee are: Joe Orsini (R-Anchorage), Chairman; Ed Willis (D-Eagle River), Vice Chairman; Frank Ferguson (D-Kotzebue), Glenn Hackney (R-Fairbanks) and Bill Sumner (R-Anchorage).

Note: Rates were in effect in early 1977 and may change; they are provided as a guide.

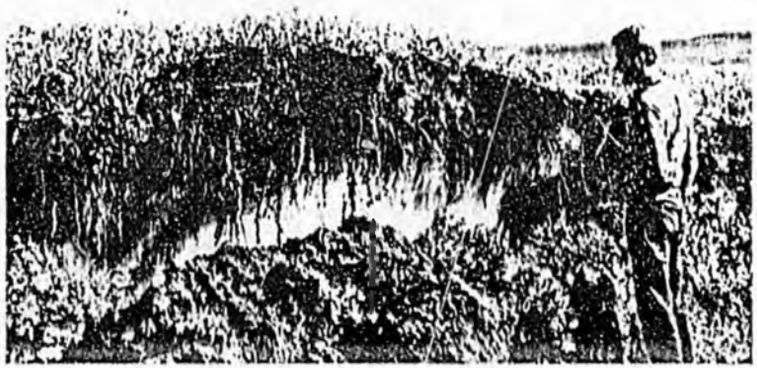
Permafrost

Permanently frozen subsoil, continuous in polar regions. It underlies the entire arctic region to depths reported to reach 2,000 feet. Permafrost limits construction in the Arctic because building on it causes thawing and therefore heaving of the melted ground.

Much of the interior and some of Southcentral are also underlain by permafrost. Trees growing over it can be spotted by their tilting at various angles, caused by freezing and thawing of the topsoil layer.

Permafrost prevents significant flow of ground water into streams and rivers in much of the interior and all of the Arctic, resulting in a nearly complete freezing of the rivers in winter. It is also responsible for thousands of lakes dotting the arctic tundra because ground water is held on the surface.

RICK FURNISS



An ice lens pushes up tundra near Galbraith Lake in the Brooks Range.

Populations and Zip Codes

Total Alaska population at the time of the 1970 census was 302,361. An Alaska Northwest Publishing Company estimate in late 1976 showed more than 400,000. The following list of communities show those places recorded in the 1970 census as having more than 25 people, plus additional Zip-coded localities. (A second list shows a sampling of 1976 estimates.) Because of seasonal variations in populations and census district variances, census figures are not exact. Figures are sometimes not available on the percentage of the population that is Native. In such circumstances the list shows NA. Under any circumstance readers must realize the population totals below are in many cases much greater today.

(See also *Natives*.)

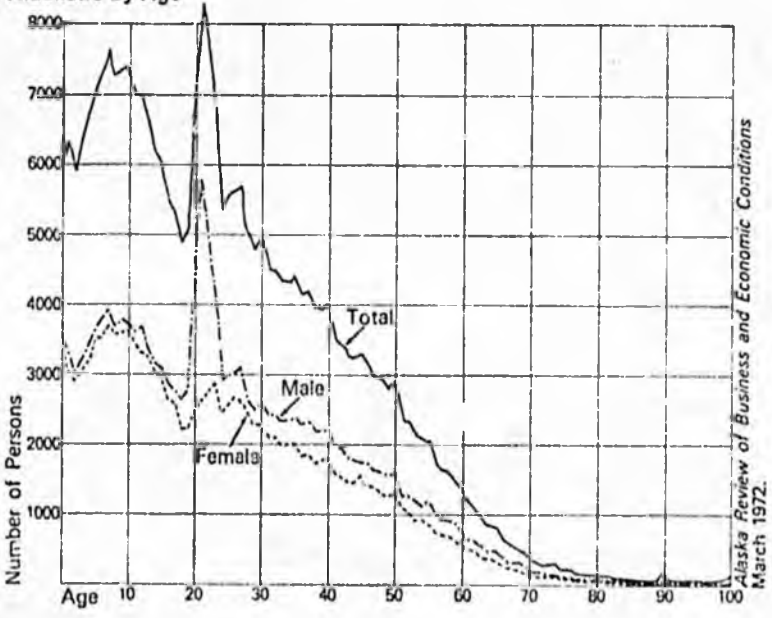
Alaskans by Age



Age and Gender of Alaskans

Median age about 22

Men: 54.35% of population

Women: 45.64% of population

Natives: 16.9% of population

Of people age 14 or over, Bureau of the Census showed:

Men: 113,657; 33.8% single; 60.7% married; 5.4% widowed or divorced.

Women: 89,907; 20.6% single; 71.5% married; 8.0% widowed or divorced.

Births and Deaths

The Alaska Department of Health and Social Services shows the following figures for 1975:

Births	Deaths
White 5,287	White 1,027
Native 1,745	Native 441
Total, including others 7,470	Total, including others 1,522

Marriage and Divorce

In 1975, there were 4,735 marriages and 2,865 divorces in Alaska. This was 32.7% more marriages and 16.8% more divorces than in 1974.

Marriage regulations: Without parental consent at age 18 or older, or if a member of the U.S. armed services on active duty. With parental consent at age 16, or at age 14 with permission of a superior court judge following a hearing. Blood test required; out-of-state blood test by a licensed physician within 30 days accepted. Three-day wait for a license; no wait after getting a license.

Divorce regulations: Grounds are cruelty, desertion, alcoholism, conviction of a felony, failure to consummate, drug addiction, incompatibility, 18 months of insanity, indignities. Presence in the state with intent to reside is required; no wait between interlocutory and final decrees. The shortest time in which a divorce can be obtained is 30 days from the date of filing. Alaska is not a community property state.

Railroads

The Alaska Railroad, operated by the Federal Railroad Administration of the U.S. Department of Transportation, provides passenger and freight service between Anchorage and Fairbanks. Passenger service is daily from May 26 through September 8, less often in winter.

For information, contact the Alaska Railroad, Pouch 7-2111, Anchorage 99510; phone 265-2683 for the Anchorage Passenger Agent or 265-2494 for the Traffic Division. In Fairbanks call 456-4155.

The White Pass & Yukon Route, privately owned, is a narrow-gauge link between Skagway, Alaska, and Whitehorse, Yukon Territory. At the time it was built—1898 to 1900—it was the farthest north any railroad had operated in North America. It has one of the steepest railroad grades in North America, climbing to 2,885 feet at White Pass in only 20 miles of track.

For information, contact the White Pass depot in either Skagway or Whitehorse; or write White Pass & Yukon Route, Box 2147, Seattle, Washington 98111.

Regions

Alaska's regions are quite varied in character. The following paragraphs and accompanying map provide a quick outline. Other information is available under such headings as *Climate, Highways, Economy* and *Wildlife*, for example.

Southeastern

From the southern tip of Prince of Wales Island, Southeastern Alaska stretches 500 miles north to the far edge of the Malaspina Glacier on the western side of Yakutat Bay. This is a country of glacier-ridden mountains, 1,000 named islands and numerous unnamed islets and reefs. The region is heavily forested with spruce, hemlock and cedar.

Temperature ranges from an average of 50° to 60° in July to an average of 20° to 40° in January. Average annual precipitation varies from 80 to more than 200 inches. The area receives from 30 to 200 inches of snow in the primary populated sections and more than 400 inches in the high mountains.

Fishing, timber and tourism are the major industries. Except for the Haines Cutoff, which connects to the Alaska Highway, there are only local roads. Transportation is by air and by the Alaska Marine Highway System. Juneau is the state capital; Sitka is site of the historical capital of Russian America.

Southcentral

About 55% of the state's people live in the arc between the Gulf of Alaska on the south and the Alaska Range on the north, in the region commonly called Southcentral Alaska. The Chugach and Kenai Mountains follow the coast from Prince William Sound down the eastern Kenai Peninsula. The Matanuska and Susitna valleys are to the north of Anchorage.

The irregular plain of the Copper River lowland to the east has a colder climate than the other major valley areas, with January temperatures hitting -16° compared to average lows of 0° in the Susitna Valley. July temperatures average 50° to 60°.

Vegetation ranges from spruce-hemlock forests of Prince William Sound to spruce and birch forests of the Susitna drainage and the tundra-type highlands of the Copper River-Nelchina Basin.

Alaskan agriculture historically has been developed most thoroughly in the Matanuska and Susitna valleys. The state's dairy industry is

centered there. Vegetable truck farming also is prominent. The approximately 17 inches of annual precipitation often is barely adequate for cultivation, and supplemental irrigation is common. Some nonagricultural parts of Southcentral receive up to 80 inches of precipitation a year. From 40 to 100 inches of snow has been recorded for populated areas, and up to 800 inches a year for the coastal mountains. Winter winds disturb the snow cover, making winter survival of perennials extremely difficult.

Anchorage, the primary business center of the state, is the major port and head of the Alaska Railroad. Valdez is the terminus and port for oil

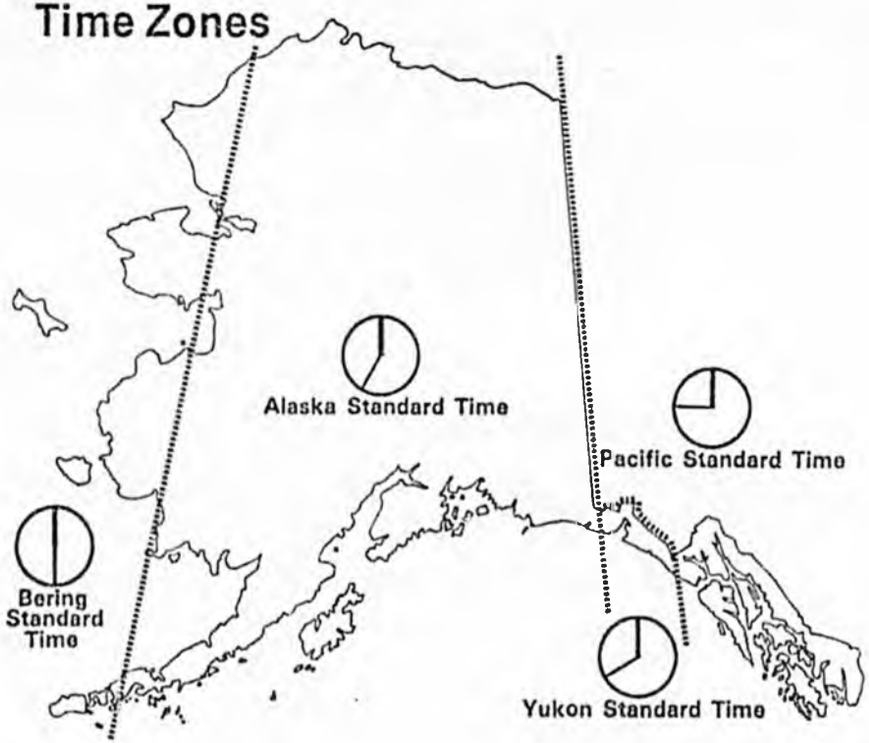
Time Zones



Trans-Alaska Pipeline

The pipeline designer, builder and operator is the Alyeska Pipeline Service Company, a consortium of eight oil companies.

Alyeska Pipeline Service Company Consortium	
Sohio Pipe Line Company	33.34%
ARCO Pipe Line Company	21.00%
Exxon Pipeline Company	20.00%
BP Pipelines Inc.	15.84%
Mobil Alaska Pipeline Company	5.00%
Union Alaska Pipeline Company	1.66%
Phillips Petroleum Company	1.66%
Amerada Hess Pipeline Corporation	1.50%

Pipeline length: 800 miles, about half buried, the remander on 78,000 above-ground supports.
Pipe size: 48 inches in diameter, in lengths of 40 feet and 60 feet and thickness of 0.462 inch and 0.562 inch.
Right-of-way width for pipeline: 54 feet.
Pipeline capacity: 1.2 million barrels a day initially; can be increased with additional pumping stations and terminal facilities to 2 million barrels a day.
Estimated crude oil reserves recoverable on the North Slope: 9.6 billion barrels.

BACKGROUND ON THE ALASKA PUBLIC EMPLOYMENT RELATIONS ACT

AS 23.40.070-260, otherwise known as the Alaska Public Employment Act or PERA, provides for collective bargaining and binding arbitration for public employees at the state level.

It groups public employees into three categories: 1) employees whose services may not be interrupted for even a short period of time, 2) employees whose services may be interrupted for limited periods of time and 3) employees whose services may be interrupted for indefinite periods of time without the public suffering irreparable harm.

All political subdivisions of the state -- boroughs and cities -- were originally included under PERA. However, Section 4, chapter 133, SLA 1972, significantly modified PERA's application to local government by providing for political subdivisions to opt out of the regulations either by ordinance or by resolution.

Most of the major subdivisions of the state have in fact opted out of PERA with the exception of the Fairbanks North Star Borough and the Ketchikan Gateway Borough. (See attached list)

The reasons for this action by municipalities was that they could thereby fashion their own labor ordinances, tailored to local conditions and needs. In some cases, such as the City and Borough of Juneau and the Municipality of Anchorage, complete and parallel systems of collective bargaining agreements and arbitration have been adopted.

Under AS 23.40.250(5), public school employees were specifically exempted from PERA by excluding them from the definition of "public employees".

In this respect, the language of the Act is somewhat confusing and ambiguous, since in previous parts of the legislation direct reference is made to school teachers as public employees whose "services may be interrupted for a limited period but not for an indefinite period of time" (AS 23.40.200 paragraph "c"). However, despite the ambiguity of language, it has been understood as the legislative intent of the Act to exempt teachers and they have been excluded accordingly.

AS 23.40.190 provides for the appointment by the Labor Relations Agency of a mediator if a deadlock exists between a public employer and a labor organization.

AS 09.43.200, also known as the Uniform Arbitration Act, provides for the court to appoint an arbitrator or arbitrators if the parties agree to binding arbitration and if no written agreement exists for the appointment of arbitration. It also outlines specific procedures for implementing arbitration.

Senate Bill 501 would not modify or affect existing arbitration ordinances or procedures adopted locally by municipalities. The bill would, however, give greater flexibility to those municipalities which have elected to remain under the provisions of the State Public Employees Relations Act by providing them with additional options if they chose to use them.

PUBLIC EMPLOYMENT RELATIONS ACT- AS 23.40.070-260

(Section 4, ch. 133, SLA 1972, provides: "This Act is applicable to organized boroughs and political subdivisions of the state, home rule or otherwise, unless the legislative body of the political subdivision by ordinance or resolution, rejects having its provisions apply.")

The following municipalities have opted out of the Public Employment Relations Act*:

City and Borough of Juneau	Resolution 150
Municipality of Anchorage	Resolution 49-R-72
Matanuska-Susitna Borough	Resolution 72-48
City of Wrangell	
City of Homer	
Kenai Peninsula Borough	Resolution 72-17R
City of Ketchikan	Resolution 954
City of Fairbanks	
City and Borough of Sitka	
City of Petersburg	
City of Soldotna	Resolution 72-17
City of Palmer	Resolution 255
City of Kodiak	Resolution 16-72

Ketchikan Gateway Borough opted out, but later rescinded its action

Fairbanks North Star Borough joined APEA

OPEN NEGOTIATIONS AND PUBLIC PARTICIPATION FOR PUBLIC SECTOR COLLECTIVE BARGAINING

Englewood, Colorado (public referendum)

Aurora, Colorado (public referendum)

Pueblo, Colorado (public referendum)

San Francisco, California (public referendum)

Kansas City, Missouri (bargaining in public)

State of Tennessee (bargaining in public)

State of Florida (bargaining in public)

State of California (public disclosure of initial bargaining positions for school negotiations)

State of Wisconsin (public disclosure of initial bargaining positions)

State of Massachusetts (13-member fact-finding review panel)

SB 501

Mediation Procedures AS 23.40.190. "If, after a reasonable period of negotiation over the terms of a collective bargaining agreement a deadlock exists between a public employer and an organization, the Labor Relations Agency may appoint a competent, impartial, disinterested person to act as mediator in any dispute either on its own initiative or on the request of one of the parties to the dispute. The parties may also select a mediator by agreement or mutual consent." However, neither the mediator nor the Labor Relations Agency has any power of compulsion in mediation proceedings.

Arbitration Procedures AS 43.020-220 (Uniform Arbitration Act)

Unless the arbitration agreement provides a method of appointing arbitration, the superior court may appoint one or more arbitrators. The arbitrator(s) shall proceed in the following manner:

1. Set a time and a place for the hearing and notify the parties at least five days in advance.
2. Allow the parties to present evidence in the hearing and to cross examine witnesses.
3. Render a final decision by a majority, if more than two arbitrators have been appointed.
4. May issue subpoenas and administer oaths.

Appeals to the actions of arbitrators in either

1. Denying or compelling arbitration
2. Confirming or denying an award for settlement
3. Modifying or correcting an award.
4. Voiding an award without a rehearing.
5. Any judgement or decree issued under the Uniform Arbitration Act.

All appeals are handled as civil actions.

TESTIMONY FROM VIDEO-CONFERENCE
C&RA COMMITTEE MEETING ON SB 501 & 373

March 30, 1978

Present: Senators Orsini, Hackney, Ferguson and Sumner

Absent: Senator Willis

Chairman Orsini called the meeting to order and explained that the meeting was on a video-conferencing network tied into Nome, Bethel, Fairbanks, Anchorage and Ketchikan.

Senate Bill 501, relating to municipal labor relations and Senate Bill 373, relating to public information regarding collective bargaining by public employees were the bills before the committee.

Gary Akerman - Fairbanks - Public, Labor Union Member - Stated that negotiations were a matter between the employer and employee. Felt that these are the two people involved and they can best negotiate something out between themselves. Stated that he felt the same way about SB 373.

Walt Bonnet - Anchorage Chamber of Commerce - Public - Stated that he was opposed to any act which brings about binding arbitration in the form of impasse resolution and labor disputes with any public employees - consistent with this is opposition to the concept of submission of dispute directly to the voters. Stated that public employees salaries, benefits and terms of employment are a most significant aspect of municipal government. The function of management of public employees is historically and ideally vested in the elected offices of the Mayor, Assembly and School Board. Third party panel will never create substantial public awareness and what is worse will never resolve the question of whether one of the parties was being irresponsible in the role of negotiating. It reduces public awareness of negotiation proposals and settlements and reduces public scrutiny in the roles played by the principals charged with the negotiation functions. This dissolving of direct accountability to the elected official or representative of a bargaining unit is the single most negative facet of the binding arbitration.

Caroline Wohlforth - Anchorage - President of Anchorage School Board- Stated that SB 501 strikes at the core of elected officials. The policies and relations between employers and employees are most effectively dealt with by their own elected officials who have that responsibility to the public. She also stated that if government was run by referendum there would be no need for government. She stated that on the same basis they questioned the use of binding arbitration as a means of settling a dispute which arise in negotiations. She went on that under our system, management and labor have certain perogatives during negotiations, binding arbitration would deny both parties of this perogative and result in governmental policy making outside of government.

Sharon Walker - Ketchikan - Ketchikan Gateway Board of Education - It is the opinion of the Ketchikan Gateway Board of Education that

binding arbitration in any form in municipal labor relations deletes the authority and the responsibility of the duly elected local official. If a local municipality attempts to exempt itself by the election of an arbitration panel then that panel itself becomes another level of government and the election of those members become paramount on any issue of labor relations. If an election is held on the issue of impasse then the management unit of local government must spend local tax dollars in an effort to inform the voters as to the background and reasonings behind their offer. She stated that it was the Board's opinion that either method is unsatisfactory and cannot support either of the bills.

John Carlson - Fairbanks - Mayor, North Star Borough - Comments basically on SB 373. Opposed to any effort from the State Legislature to further direct local government in collective bargaining procedure. He stated that the procedures and policies implemented in collective bargaining can best be addressed at the local level. Strongly opposed to binding arbitration from an outside arbitrator. Felt that it was in the best interest of the local municipality to determine their own labor relations policy. He brought out in testimony on the 3 member arbitration panel that there should be some indication of how to replace a person that has been elected to the board.

Millett Keller - Anchorage - V.P, Anchorage School Board - Stated that he has strong feelings about the philosophical implications on our entire form of government that binding arbitration in the public sector brings to the front. He stated that collective bargaining has served the Alaska public employees quite well. Binding arbitration is where he has to draw the line. He stated that with binding arbitration we are taking the most powerful force we give our government: the ability to tax and giving it to someone who doesn't account to the voters. He stated that the voters want and demand that their elected officials face up to all the tough issues and represent the public by making these decisions. He stated that the Anchorage School Board does not support SB 501. He stated that he was in favor of revealing to the public what collective bargaining offers are, in favor of SB 373.

Bob Collins - Ketchikan - APEA of Ketchikan - Supports SB 373 and opposes SB 501. Stated that SB 501 is fatally flawed in several respects. Arbitration panel elected by the voters is a poor idea. Elected arbitrators in smaller communities would be inexperienced in collective bargaining and labor law and procedure, municipal finance, personnel management and other matters pertaining to collective bargaining. Stated that elected arbitration panel would achieve improperly arbitrated decisions on collective bargaining disputes; these in turn would lead to extensive litigation. Submitted disputes to the voters is also a poor idea. Voters are largely uninformed about collective bargaining issues. That being the case if the issue is submitted to them it becomes a media battle.

Rosemary Porter - Bethel - Public - She stated that on SB 501 the amendment may be necessary because it does give municipalities options and anything that gives municipalities options has got to be a good thing. She stated concern on the 3 member elected arbitration panel because it tends to put arbitration in a political form.

Robert Johnson - Anchorage - Teamsters, Local 959, opposed to SB 501, consider it both irresponsible and dangerous to free collective bargaining. He stated that it has the potential of destroying collective bargaining even though it pretends to follow the ultimate in democratic process. He also stated that it is for better or worse the duty of an elected official within local cities to carry out both the legislative and executive functions. He stated that collective bargaining was one of those executive functions. The delegation of this function is called forth within this bill. He went on to say that the people in the local union did not see any need for this legislation.

Bob Garza - Ketchikan - Ketchikan Central Labor Council & IBEW, Local 1547 - He stated that these two organizations were opposed to SB 501. He said that there are enough problems with the public employees relations now without adding further confusion and additional costly elections to elect people who are perhaps unqualified in labor disputes.

John Alexander - Anchorage - IBEW, Local 1547 - Oppose both pieces of legislation. He stated that it further complicates collective bargaining. Does not see any need for this legislation. Also stated opposition to personalities when it came to voting on a 3 member arbitration panel. He said that this would probably prolong the bargaining process. Stated that he had gone through impasse in past and has been able to work out their differences on their own with any outside arbitrator.

George Pearson - Anchorage - President of Alaska State Council of Carpenters - Is opposed to SB 501. He said the reason state confusion and poor labor relations exist because of continual adoption of new labor relations legislation or employee regulations. Continually adding options and revising these is not helpful stability within the state.

Diane Carpenter - Bethel - Public - Is oppoed to SB 501. She stated that one concern was with the public being the deciding factor. She thought that it was very difficult for the general public to be well informed on the complex issues that are involved in negotiations to be able to make a good determination on those issues. She also stated concern about the 3 member arbitration panel. She felt that it would be the place of the two parties involved to select who should be on the panel. On SB 3737 she stated that initial proposals should be kept confidential and should be negotiated in private. If there was an impasse she felt that the public has a right to know what the issues are that are at impasse and at this point each parties should be willing to make their positions known to the public so that they can through the political process influence the final outcome.

Allen Winterstein - Chairman, Lower Kuskokwim Pace Committee - opposed to SB 501. He stated that this bill puts items of impasse between the public employees and employers before the voters to determine. He stated that this would be detrimental for several reasons. People generally vote no on that which they do not understand and on items that cost money. This bill would destroy the current negotiations procedure.

Ben Clayton - Anchorage - Fire Fighters, Local 1264 - He testified

on SB 373 and said that his remarks also apply to SB 501. He felt that if collective bargaining impasse was brought to the public for a decision, there would be emotionalism involved and it would also lose the compromising technique. If the public voted they would have to vote one way or the other - no compromise.

Sue Lindford - Anchorage - Public - Opposed to both bills basically for one reason -- they limit local control. Both pieces further narrow local government authority and ability to discover their own inperfect solution to the perfect problem - impasse resolution. She went on to say that the State would be better advised to spend the tax payers money on on-going training of employee groups and elected officials around the state and various techniques which will help to insure a fair collective bargaining.

Mason West - Anchorage - President of the Alaska Community Colleges Federation of Teachers - Stated they fully oppose SB 501. He stated that it improperly addresses the need of labor or management in the process of collective bargaining. He believed that both parties should be the deciding parties. He stated that with an elected panel of arbitrators you would be subjected to corruption, inability and influence which would make it to political.

Senator Hackney adjourned the meeting after completion of State-wide testimony on SB 501 and 373.

THE FOLLOWING PAGES WERE TREATED AS

Re- "Alternatives to the Strike in Public Labor Relations"

The article sent over by APE. is a discussion by Merton Bernstein, a professor of law at Ohio Sta[illegible] University, of unionization in the public sector, the prohibition of the right to strike among public employees, collective bargaining, and binding arbitration.

Bernstein believes that collective bargaining has worked well for both public employer and employee. He is dubious of the effects of binding arbitration on the collective bargaining process and flatly dislikes the idea of strikes in the public sector.

To work himself out of the bind resulting from his rejection of both binding arbitration and the right to strike, he has proposed two complementary alternatives: the "non-stoppage" strike and the graduated strike.

The non-stoppage strike is one where employees keep on working but give up a portion (Bernstein recommends initially 10 percent) of their income to a special fund. The employers matches this contribution to the fund. If the strike continues, the union can opt to increase the amount of money its employees pay into the fund. Bernstein acknowledges that he doesn't know what the fund would be used for, but he argues that the non-stoppage strike would be a reasonable alternative to an all out strike.

The graduated strike is one where employees strike only on agreed upon days (Tuesdays, for example; or Mondays, Wednesdays, and Fridays). Their pay would be correspondingly reduced.

Bernstein says that the non-stoppage strike was proposed several decades ago in the private sector but was never taken up. The graduated strike, he believes, is original with him.

My reaction is that the non-stoppage strike is discriminatory towards the employee and that the graduated strike might be so unnoticeable that the public would prefer to continue it on a permanent basis.

ALTERNATIVES TO THE STRIKE IN PUBLIC LABOR RELATIONS

Merton C. Bernstein *

Professor Bernstein analyzes the difficulties inherent in the regulation of collective bargaining in the public sector and examines the currently existing and proposed systems of regulation. He concludes that new arrangements are necessary and suggests use of the nonstoppage strike and the graduated strike.

FOR four decades collective bargaining has been the central feature of public regulation of private labor-management relations,[1] and the right to strike, while occasionally curtailed,[2] has been thought essential to making it work.[3] And it has worked reasonably well. Manhours lost in strikes constitute an infinitesimal fraction of all hours worked.[4] In the public sector, however, strikes have been prohibited. Strikes by public employees may cause intense disruption in community life, as when transit systems cease operation or schools close. Yet, there has been developed no other effective mechanism for resolving the inherent conflicts between public employers and their employees. This essay proposes, in the context of public employment at the local level,[5] two new methods of accomplishing the desirable functions

* Professor of Law, Ohio State University. B.A. Oberlin, 1943; LL.B. Columbia, 1948.

[1] Section 7 of the National Labor Relations Act [hereinafter cited as NLRA] declares:

> Employees shall have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining . . . .

29 U.S.C. § 157 (1970). Several states have similar laws. *See, e.g.*, State Labor Relations Law § 3, MASS. GEN. LAWS ANN. ch. 150A, § 3 (1971); N.Y. LABOR LAW § 703 (McKinney 1965).

[2] For example, secondary boycotts are illegal. NLRA § 8(b)(4), 29 U.S.C. § 158(b)(4) (1970).

[3] Section 13 of the NLRA supplements Section 7:

> Nothing in this subchapter, except as specifically provided for herein, shall be construed so as either to interfere with or impede or diminish in any way the right to strike, or to affect the limitations or qualifications of that right.

29 U.S.C. § 163 (1970).

[4] In 1968 the 5,045 work stoppages accounted for .28% of total working time. U.S. BUREAU OF LABOR STATISTICS, DEP'T OF LABOR, BULL. NO. 1646, ANALYSIS OF WORK STOPPAGES, 1968, at 13 (1970).

[5] In all but two of the eleven years 1958–1968, strikes by local government employees accounted for more than 90% of all government stoppages. TWENTIETH CENTURY FUND TASK FORCE ON LABOR DISPUTES, PICKETS AT CITY HALL 32 (1970). Consequently, while much of the analysis and all of the proposals here presented could be applied to higher levels of government, my focus is on local units.

of strikes without the illegality and disruption that are their present hallmarks.[6]

I. Patterns of Public Labor Relations

A. History

Until fairly recently unionization at all levels of government was slight. Public employees pursued their group interests through associations and leagues, and occasionally unions, whose typical operation was to lobby for favorable civil service laws, pay scales, fringe benefits, and administrative regulations. Before the surge of unionization in the private sector brought on by the New Deal and World War II, many public employees enjoyed job security, benefits, and status that few private employees could match. However, by the late 1940's unions represented a major segment of the privately employed and won protection and economic gains which appeared to outdistance the progress of nonunionized and public employees. Large numbers of semiskilled and skilled workers entered the ranks of the middle class, formerly the preserve of professionals and white collar workers. "Plumber" and "teamster" came to imply, not grubby and poorly paid work, but short hours and high pay, while "civil servant" came to be associated with drab routine and shabby gentility. For instance, to teach required a strong feeling of vocation and, some thought, a vow of poverty. In addition, in the 1960's the apparent success of the militant stands taken by civil rights groups emboldened government employees to use collective action and direct confrontation to obtain more security and better compensation. Consequently, in the last decade unionization grew more rapidly in the public sector than in the private.

Often in the early stage of union activity, public employers — especially the federal government — took the position that while employees' unions might be consulted about employee concerns, recognition of a union, let alone bargaining, could not be reconciled with the sovereignty of the state or the benign role of the nonprofit employer. Whatever its merits, that official posture began to break down soon after the election of President Kennedy, who had received heavy support from organized labor. A committee he appointed to study the role of employee organization, dominated by Secretary of Labor Goldberg, Undersecretary Willard Wirtz, and Theodore Sorenson, all firm believers in

[6] The existing literature is massive, and no attempt will be made here to summarize it. For an excellent symposium on public employee labor relations, see *Symposium: Labor Relations in the Public Sector*, 67 Mich. L. Rev. 881 (1969).

collective bargaining, could hardly have decided against recommending a representative role for public employee unions. The resulting executive order[7] provided for limited representative status to unions. President Nixon has continued this trend, making exclusive recognition even more central to the federal government's relations with its employees.[8]

Meanwhile, public employee unions at the state and local level grew, demanded to be recognized as bargaining agents, and agitated for significant pay raises, fringe benefits, and increased job security. Put to the test by illegal strikes and sometimes illegal "sanctions," and weakened by the example of the federal government, the "consultation without recognition" model was routed here, too, probably forever.[9] At the same time, public employees drew from their private counterparts' credo and habits. As a result, the pattern of at least the short term future will probably consist of union representation, where chosen by a majority of employees in appropriate units,[10] and negotiation of signed agreements covering at least some of the subjects traditionally bargained over in the private sector.

B. Recognition and Bargaining — Without Strikes

Modern public labor relations statutes provide machinery for unit determination, elections, certification of the successful con-

---

[7] Exec. Order No. 10,988, 3 C.F.R. [1959-1963 Comp.] 521 (1964).

[8] Exec. Order No. 11,491, 3 C.F.R. 510 (1971).

[9] The philosophy that public employees do not even have the right to join unions has finally become outmoded. *See* Smith, *State and Local Advisory Reports on Public Employee Labor Legislation: A Comparative Analysis*, 67 MICH. L. REV. 891, 892 (1969). A fine summary of the transitional changes from ban to permission of union organization, bargaining, collective agreement execution, and arbitration is found in Smith & Clark, *Reappraisal of the Role of the States in Shaping Labor Relations Law*, 1965 WIS. L. REV. 411, 421-31.

[10] The regularization of procedures for the selection of employee representatives is indispensable to public employee labor relations. Continued resistance to unionization may be expected for some time because so much unionization takes place at the local government level, particularly among teachers. Small community school boards, inexperienced in labor relations, frequently influenced by persons with an anti-union bias, and already beset by intractable problems, often seem incapable of dealing reasonably with unions. Stoppages caused by the combination of such reluctance with the absence of legally prescribed procedures for ascertaining bargaining units and determining employee desires are wasteful indulgences of attitudes whose time has passed. *See* GOVERNOR'S COMM'N TO REVISE THE PUBLIC EMPLOYEE LAW OF PENNSYLVANIA, REPORT AND RECOMMENDATIONS 6, 9 (1968).

Professor Charles Rehmus sets forth a useful catalogue of other measures to remove unnecessary sources of friction in *Constraints on Local Governments in Public Employee Bargaining*, 67 MICH. L. REV. 919 (1969).

tender (if there is one), and bargaining. However, all but two states ban strikes by public employees.

Various philosophical justifications have been offered for this ban: strikes against the sovereign state are intolerable; public employers are not motivated by profit;[12] public services are essential; and public employee unions with both political influence and coercive power through strikes would have an undue opportunity to distort the normal political process.[13] As a practical matter, the strike ban is the result of a different chain of reasoning. Because the state now provides protection for union activities, machinery for union representation, and procedures for the promotion of bargaining such as mediation and factfinding with recommendations, unions and their members should count themselves lucky to receive the new dispensation and work within the system.[14]

Perhaps they should, but they have not; unions have resisted these arguments from the outset. There are a number of reasons for their attitude. Many leaders of public employee unions come from the ranks of organized labor in the private sector, where the strike is a legally protected, central tactic of bargaining and a means of enhancing organizational spirit and loyalty. Perhaps more important, strikes have been the weapon for transforming public employer intransigence into union recognition, better bargains, and even legislation for protecting union activities. Thus, while statutes have banned strikes as a matter of law, even those with the most draconian sanctions have failed to prevent them as a matter of fact when bargaining deadlocks occur. Indeed, the imposition of sanctions may be counterproductive, for both union and government officials may benefit from such occasions for demonstrating personal intrepidity without dealing with the

[11] HAWAII REV. STAT. § 89-12 (Supp. 1970); PA. STAT. ANN. tit. 43, § 1101.1001 (Supp. 1971). A Vermont statute prohibits strikes by local government employees if they "will endanger the health, safety or welfare of the public." VT. STAT. ANN. tit. 21, § 1704 (Supp. 1971). The range of permissible strikes is unclear.

[12] The logical consequence of this is hard to fathom. Presumably, nonprofit employers will act more fairly. However, employers motivated by profit may actively seek employee goodwill and bargain responsively because of the serious financial consequences of a stoppage; public employers, especially at the local level, have become motivated chiefly by a desire to make ends meet.

[13] *See* Taylor, *Public Employment: Strikes or Procedures?*, 20 IND. & LAB. REL. REV. 617, 626-27 (1967); Wellington & Winter, *The Limits of Collective Bargaining in Public Employment*, 78 YALE L.J. 1107, 1123-25 (1969). However, unions in the private sector have long enjoyed such dual methods of influence. *See* International Ass'n of Machinists v. Street, 367 U.S. 740, 800 (1961) (Frankfurter, J., dissenting) ("It would be pedantic heavily to document this familiar truth of industrial history and commonplace of trade-union life.").

hard problems of settling the underlying dispute. Russell Smith observes that we perhaps accord

> a kind of de facto recognition to conduct officially declared illegal . . . [a] state of affairs scarcely desirable in any society which purports to order its human relations according to the processes of law.[15]

His colleague, Professor St. Antoine, agrees:

> It is folly . . . [to outlaw] absolutely a form of conduct that is sure to be engaged in, under certain conditions, by respectable persons in the thousands.[16]

These observations have the ring of wisdom.

II. The Strike Weapon

Assessment of the strike weapon requires fresh recognition of its differing settings, tactics, and impacts.[17] So many arguments for and against allowing the strike in public labor relations derive from its role in private labor relations that the analysis properly begins with the private sector.

A. In the Private Sector

While potentially very destructive weapons, strikes are seldom employed;[18] their salutary persuasive effect results from the mere existence of the possibility of a strike. What damages strikes cause are, arguably, the relatively small price paid to make collective bargaining work.

The classic model of the private strike is that of a group of employees which withholds its labor from an employer in order to gain recognition or bargaining concessions. The employees forego their wages and the employer loses the revenue derived from the sale of the goods or services they would otherwise produce. The beauty of the strike is that while a potent weapon, it also inflicts damage on the wielder, so that even the threat of its use induces in both sides the degree of reasonableness essential to realistic bargaining.[19] When the strike operates in this manner, it clearly merits legal protection.

However, it must be recognized, especially by those who counsel legalization of strikes in the public sector, that even in the private sector strikes do not always perform their hoped-for function. In some private sector strikes, the contending parties suffer little or no loss while others bear the brunt of the stoppage. For example, in the extended New York City newspaper strike several years ago, the printers had full employment opportunities and the publishers actually saved money by not printing during low-advertising periods; it was the other newspaper employees, the retailers, and the retailers' employees who suffered serious loss. Moreover, economists have long been aware that some major strikes disrupt the economy so seriously as to put in doubt their classical justification.[20] In addition, employer mutual aid pacts and strike insurance[21] — and, probably to a lesser degree, union strike benefits[22] — operate to eliminate or reduce significantly the disciplining power of the strike weapon. In short, while often a salutary device, the private strike sometimes fails to operate as advertised.

B. In the Public Sector

So far as public employees are concerned, strikes have the same fairly direct effect that they have in the private sector: current income stops. However, when we compare private and public employers, we find differences that preclude reliance on the classical model of the private strike.

As noted above, the private employer is motivated by loss of sales — an occurrence which is direct, measurable, and predictable. However, in most public employee strikes, the government's revenues continue; only its wage payments stop. What creates pressure on the governmental employer to bargain are expressions by its citizens of their need for the public services.[23] Such

[20] *See, e.g.*, Marceau & Musgrave, *Strikes in Essential Industries: A Way Out*, 27 HARV. BUS. REV. 286 (1949).

Indeed, in 1947 Congress sought to curtail strikes capable of threatening the national health and safety by national emergency dispute provisions. *See* Labor-Management Relations Act (Taft-Hartley Act) §§ 205-08, 29 U.S.C. §§ 175-78 (1970).

expressions are rarely clear, however, for the citizenry is composed of many groups with overlapping interests in getting services, differing abilities to pay taxes, and varying degrees of political punch.[24] Moreover, citizens are rarely aware of the precise relation between costs and services. On innumerable occasions in the last decade rejections in referenda of taxes to support schools have led to subsequent school shutdowns; I suggest that the votes might well have been different had the shutdowns occurred before or during the time that the voters were registering their preferences. Unfortunately, the precision of citizen perception may not be significantly increased even by strikes, because the choice for citizens then seems to be, not how much of a public service to have, but whether or not to have it at all.

A second crucial difference between private and public employers is that the former are, so far as labor relations are concerned, relatively closely knit organizations. Top management often participates in collective bargaining, and when it does not, the company negotiators generally report directly back to it. In addition, management has had, at least until Phases I and II of President Nixon's game plan, the ability to set prices and make similar policy decisions without interference. This concentration of power makes possible reasonably rapid and decisive resolution of disagreements with unions.

Government employers, however, are characterized by diffusion of responsibility. Typically, one set of officials is involved in the negotiation process and another in the appropriations process; and occasionally even the citizens may speak directly through referenda. For local governments this problem is exacerbated, for not only are there executive and legislative officials at the local level, but also significant portions of local budgets are determined by the state legislature and the governor, and, indeed, by Congress and the President.[25] Therefore, those officials who

See 1969 LAB. REL. YEARBOOK 305. An experienced nonacademic labor relations expert shares this analysis. Simons, *Discussion: The American City and Its Public Employee Unions*, in INDUSTRIAL RELATIONS RESEARCH ASS'N, COLLECTIVE BARGAINING IN THE PUBLIC SERVICE: PROCEEDINGS OF THE 1966 ANNUAL SPRING MEETING 104, 107 (G. Somers ed. 1966).

[24] The rash of rejections of school bonds and levies indicates that the dominant instructions from citizens are to economize. *But see* Wellington & Winter, *Structuring Collective Bargaining in Public Employment*, 79 YALE L.J. 805, 849 (1970), which, remarkably, posits public pressure "for settlements without much regard for the costs . . . ."

[25] In 1969 local government expenditures totalled about $80 billion, of which $48 billion came from their own sources. U.S. BUREAU OF THE CENSUS, 1971 STATISTICAL ABSTRACT OF THE UNITED STATES 400 (1971). The state governments contributed $22 billion. COUNCIL OF STATE GOVERNMENTS, THE BOOK OF THE

participate in negotiations often cannot make binding decisions; at most they can pledge to seek requisite funds or legislation. And, as a corollary, those who allot funds have great difficulty in predicting how much each type of service will cost and thus in allocating resources among services. The result of all this is that the decisionmaking process takes much time.[26]

In order to perform their functions in collective bargaining, public officials usually need the citizen pressure generated by strikes, but they need it in a form that gives them more time than the traditional strike permits. In Pennsylvania, the early months under a statute allowing strikes [27] have been marked by numerous stoppages, possibly beyond the number anticipated.[28] This might be a temporary phase which will not be repeated as public employers and unions learn how to use the law.[29] I suspect, though, that the strike weapon is too drastic for the peculiarities of public labor relations. And in any event, the implacable opposition in most states to traditional strikes by public employees places the legalization of such strikes beyond debate for the foreseeable future.

III. Compulsory Arbitration — A Dubious Alternative

Compulsory arbitration is often proposed as a peaceful means of settling the differences between public employers and employees.[30] There are, however, serious objections to the use of this device in either the private or public sector. Successful

States 1970–71, at 281 (1970). Together, local and state governments derived $19 billion from the federal government, U.S. Bureau of the Census, 1971 Statistical Abstract of the United States 403 (1971), much of it reach... the localities via the state governments.

[26] "Frequently many months are needed to reach agreement . . . ." New York City Office of Collective Bargaining, 1969 Annual Report 7 (1970).

[27] Pa. Stat. Ann. tit. 43, § 1101.1003 (Supp. 1971).

[28] I was so informed by one member of the Governor's Commission to Revise the Public Employee Law of Pennsylvania. Others with operating responsibility, I am told, feel that strike activity has been slight and at the level generally expected.

[29] On both sides, but especially on the employer's, one can expect lack of experience in labor relations frequently compounded by amateurism. The regular duties of district and county attorneys do not equip them to deal with unions. Clearly, an important element of state labor relations policy is to supply education to public officials, preferably before they are confronted with a union challenge. And after the union is on the scene as bargaining representative, the state should furnish to local officials experienced lawyers and economists to familiarize them with the legal and practical intricacies of their unaccustomed situation and provide advice as to the peaceful alternatives available.

[30] *See, e.g.*, N.Y. Times, Oct. 31, 1971, § 1, at ., col. 1.

bargaining requires that each side determine which issues it feels most strongly about, estimate the other side's priorities, determination, and strength, and then trade concessions with the other side in an effort to reach a mutually acceptable "deal." In arbitration, however, all arguments are supposedly based on logic — even though it has long been recognized that reasoned criteria, especially for setting wages, are illusory.[31] Consequently, compulsory arbitration undermines good faith bargaining, for the weaker party has little to gain from bargaining.[32] Furthermore, since arbitrators may treat the best disclosed offers as the permissible limits of the award, it pays for each side not to disclose how far it is really willing to go on each issue. As a result, the availability of arbitration saps the efficacy of factfinding; and, at the arbitration stage, the stated issues and arguments may so obscure the parties' true needs and desires that the resultant award may easily miss a satisfactory resolution of the dispute.

A further difficulty arises from use of compulsory arbitration of disputes in the public sector — the preemption of public officials from deciding policy issues. Viewed mechanically, the arbitration process does not seem to allocate public resources: arbitrators fix equitable salaries for employees, and officials determine, given these cost figures, how much public service should be purchased. As a practical matter, however, employers rarely contemplate and unions would rarely permit curtailment of services and employment. Thus, the wage decision and the resource allocation decision are inevitably linked. Also, professional employees often bargain over programs. For example, teachers' unions may demand certain kinds of educational offerings or limits on class size. Even if arbitrators were capable of dealing with the complexities of budgeting and choosing programs, elected officials should not delegate the duty they owe the electorate to settle these questions. Deciding policy issues is the vocation of officials, not of arbitrators. Furthermore, when decisions lack an adequate electoral base, they will be short-lived, as the drastic retrenchments of Medicaid demonstrate.

[32] *See* H. NORTHRUP, COMPULSORY ARBITRATION AND GOVERNMENT INTERVENTION IN LABOR DISPUTES: AN ANALYSIS OF EXPERIENCE 207 (1966); W. WIRTZ, LABOR AND THE PUBLIC INTEREST 52 (1964) ("Experience, particularly the War Labor Board experience during the forties, confirms that a statutory requirement . . . [for] arbitration has a narcotic effect on private bargainers . . . ."); Kheel, *Strikes and Public Employment*, 67 MICH. L. REV. 931, 936–40 (1969). *But see* Finkelman, *When Bargaining Fails*, in COLLECTIVE BARGAINING IN THE PUBLIC SERVICE 116, 125–26 (K. Warner ed. 1967).

Compulsory arbitration in the public sector would also face a problem more mechanical, but no less important, than that of inappropriate delegation. Typically, the employment contracts of public employees are staggered, so that only one or a few groups will be negotiating new contracts at any one time. In such a context the frequent disputes over the relative pay scales of the various groups of public employees create nearly insoluble perplexities, with each group demanding higher pay scales than the previous group received. I suggest that the bargaining process offers a possible way off this treadmill: a compensation package can be negotiated with each group of employees which, while intrinsically satisfying to the group, defies comparison with those of other groups. It is dubious, however, that the traditional arbitration format can produce stable arrangements. Even if the arbitrators possess the abilities necessary to determination of the appropriate pay relationships — and they may not, since the basic problem requires policy resolution — they would not, in the course of arbitrating one group's contract dispute, have all the competing groups before them. Nor would some new scheme to allow all competing groups to present the merits of their claims be feasible, for it would incur the risk of a simultaneous strike by all those groups dissatisfied with the award.

I would also like to point out what would be a significant transitional problem were compulsory arbitration to be widely adopted in the public sector. Few potential neutrals now possess sophistication in public finance. While expertise might be developed, several years of factfinding in public labor disputes which involved budgeting issues seem to have produced little confidence among arbitrators that they are equipped to deal with such problems.

"Either-or" arbitration, having been specially proposed,[33] deserves special mention. Under this arrangement the arbitrators decide which side's final offer is more "reasonable" and take it as their award; they cannot choose any point between the parties' offers. While such a system is said to encourage reasonableness by both parties, it is actually gimmickry which encourages poker playing. Sweetly reasonable and unpalatably sour proposals may often be intermixed in each party's offer, but the arbitrators are powerless to select only the reasonable elements. Furthermore,

[33] President Nixon has proposed such a plan for resolving emergency disputes in the railroads. *See* 1971 U.S. CODE CONG. & AD. NEWS 42. Neil Chamberlain reports that this type of arbitration "was tried briefly and without much success under the German Weimar Republic . . . ." N. CHAMBERLAIN, THE LABOR SECTOR 640 (1965). For a seasoned observer's low opinion of "either-or" arbitration in public employment, consult Wildman, *Representing the Teachers' Interests*, in INDUSTRIAL RELATIONS RESEARCH ASS'N, *supra* note 23, at 113, 119.

even if under such a system it may be said that the parties deserve what they get, the ultimate award carries with it little promise of stability. Anyone with labor relations experience knows that whenever a winner and a loser may be identified, the leadership of the loser is likely, if only to regain face, to cause trouble.

In conclusion, since neither the union nor the local government may have agreed to the process of arbitration, to the selection of the arbitrators, or to the ultimate award, the resolution of disputes by this method is inherently unstable. Coercion is not only unattractive; it also works quite poorly.

IV. Proposed Alternatives: The Nonstoppage Strike and the Graduated Strike

It is reasonably clear that in public employment, the strike ban does not work; yet in most jurisdictions legalization of the strike is not a real possibility. And, I submit, the strike as it is known in the private sector would not function in the same way in the public sector and does not fit the peculiarities of public collective bargaining — diffuse responsibility and the consequent need for longer periods of time to reach settlements than in the private sector. Compulsory arbitration has serious drawbacks, not the least of which are its unacceptability to large segments of public management and unions and the likely instability of its results.

Therefore I suggest [34] that we explore the possibilities of two other arrangements which have never been considered in the public sector [35] but which, I suggest, fit the needs of *all* the parties

[34] I want to emphasize that the proposed procedures should be part of a comprehensive public labor relations scheme which provides protection of employees against reprisal for collective activity, procedures for ascertaining appropriate bargaining units, elections to determine employee preferences, recognition and mandatory bargaining, sanctions against improper union activity, mediation procedures for bargaining disputes, and factfinding with recommendations in the case of bargaining deadlock. Such procedures are necessary conditions to the proper functioning of the nonstoppage and graduated strikes. Happily, it is also the case that these procedures will work more effectively if the pressure devices I propose are available.

[35] Several proposals for "nonstoppage" or "statutory" (because imposed by statute) strikes were made for the private sector starting in the late 1940's. They were, in chronological order, Marceau & Musgrave, *Strikes in Essential Industries: A Way Out*, 27 Harv. Bus. Rev. 287 (1949); Goble, *The Non-Stoppage Strike*, 2 Lab. L.J. 105 (1951); N. Chamberlain & J. Schilling, Social Responsibility and Strikes 279–86 (1952); Gregory, *Injunctions, Seizure and Compulsory Arbitration*, 26 Temp. L.Q. 397, 402 (1953). The major variations are summarized and assessed in McCalmont, *The Semi-Strike*, 15 Ind. & Lab. Rel. Rev. 191 (1962); Marshall & Marshall, *Nonstoppage Strike Proposals — A Critique*, 7 Lab. L.J. 299 (1956).

All of these proposals envisioned that employees continue at work and that the

more adequately than either present practices or the currently proposed alternatives.

It will help to give a rough sketch of the functioning of these two arrangements before I go into them in detail. In a nonstoppage strike, operations would continue as usual, but both the employees and the employer would pay to a special fund an amount equal to a specified percentage of total cash wages. Thus, while both parties would be under pressure to settle, there would be no disruption of service. In a graduated strike, employees would stop working during portions of their usual workweek and would suffer comparable reductions of wages. Here, there would be pressure not only on employees and employer but also on the community; however, the decrease in public service would not be as sudden or complete as in the conventional strike. I believe that these two new types of strike substitutes would work best in tandem.

A. The Nonstoppage Strike

Under my proposal, a public employee union would be free to declare a nonstoppage strike after all other bargaining procedures failed to produce a settlement. Employees would be obliged to continue to work full time but would forego a portion of their take-home pay. I suggest that, initially, ten percent would suffice. This money would be paid by the public employer directly into a special fund (more fully discussed below). In addition to paying the equivalent of regular wages, the employer would also put into the fund an extra amount equal to what the employees have given up; this latter sum would constitute a loss to the employer. The union would have the option periodically to increase the amount of the foregone wages and employer payment, perhaps by increments of ten percent every two weeks. The public employer would have the option to require the union to switch to a graduated strike. If the employer did this, the employees would continue to lose the same rate of pay, but the employer would forego services rather than pay out additional funds.

I believe that exercise of the option to initiate the nonstoppage strike and increase the percentage can be limited to the union. The union has little other leverage, since the conventional strike would still be prohibited. Also, were the public employer able to initiate a procedure under which employees would work without

employer lose some income; and most involved a reduction of pay between declaration of the nonstoppage and settlement. All were limited to the private sector. The proposal I make here is the first to suggest application to the public sector and differs in several respects from each of the earlier versions.

The graduated strike is, to the best of my knowledge, original with me.

pay, questions of involuntary servitude might arise. In any event, the employer would still have the strategic bargaining advantage of instituting, after a deadlock in negotiations, certain changes in pay or other terms of employment which have been offered to the union and rejected.

The nonstoppage strike would accommodate the peculiarities of public labor relations. It would attract the attention of and put pressure on both the public officials who deal directly with the union involved and other members of the executive branch whose own budgets might be affected, the local legislature, and state officials. And while a nonstoppage strike would not precipitate a crisis, its pressure would be steady and increasable. Thus, it may provide the necessary incentive for the various bodies of government to act, while allowing them the time they need to do so effectively. Moreover, it does not disturb consideration of the merits of the dispute with the hysteria and histrionics now typical of illegal strikes.

While nonstoppage strikes would create additional expense for public employers — many of whom are hard pressed as it is — they should also put an end to the present practice of paying the employees at overtime rates when a strike ends to reduce the backlog of work accumulated during the strike. Also, hopefully, the expense should be only temporary, and, as will be explained below, the money will not go to waste. In any event, the price does not seem too high to pay for a substantially improved process of bargaining.

Nonstoppage strikes offer significant advantages to employees, perhaps even more than would legalization of conventional strikes. In the first place, their rate of loss of pay would be lower at any given time than if there were an all-out strike. For employees with mortgage and other installment obligations to meet, this continuity of income is highly desirable. And, to the extent that the nonstoppage strike encourages more responsive bargaining without any stoppages, the total loss of pay may be less. In addition, in a full-scale strike, especially one of long duration, the employer is not liable for fringe benefit payments. Thus, life insurance policies may lapse or require payments by employees at a time when their income is interrupted, and group medical care insurance may have to be kept in force at the higher-cost individual rates. In a nonstoppage strike these benefits should continue.

Second, in actual strikes employees run the risk of losing their jobs. A common sanction in illegal strikes is to fire strikers. In the private strike, too, replacement of economic strikers has long been permitted, and while I have seen no data on public

employer activity of this sort, I think it highly probable that permanent, nondiscriminatory replacement of strikers will become a feature of the legal public employee strike. In nonstoppage strikes, of course, jobs would be secure. Moreover, the absence of even temporary replacements would eliminate a traditionally potent source of violence, which everyone has a stake in averting.

Third, long-run employee and union interests are best served by a method that is legal and discomfits the community as little as possible. As union leadership knows from its post-World War II experience, unpopular strikes lead to distasteful legislation. And, by the same token, strikers, even if they feel their conduct justified, often must incur the disapproval of friends, neighbors, and others in the community. A peaceful method of pursuing demands seems clearly preferable.

The public employer would need some means of assuring union and employee compliance with the ground rules. Obviously, working full time for less than full pay might encourage some employees to slow down or "call in sick" — a favored device in strike-ban jurisdictions. Two procedures would minimize violations. First, the unions must see that it is to their advantage to persuade members that it is to *their* advantage to abide by the rules. That is, all must be made aware that the "struck" employer is indeed under strike-like pressure. Second, the statute should provide for an expedited (and I mean quick) unfair labor practice procedure to hear and determine charges of slowdown or improper absence. However, these areas are so sensitive and have such a potential for emotional overreaction that employer discipline of employees should be limited to those cases where impartial hearing officers make a finding that the improper action has taken place.

One serious problem with the nonstoppage strike is finding a suitable use for the special fund to which the public employer and employees have contributed. In order to insure that the loss will actually discipline the parties' conduct in bargaining, the fund would have to be placed effectively beyond their recapture.[38] I recommend that the fund be put at the disposal of a tripartite Public Purposes Committee in which respected community figures outnumber the total number of union and government members. This committee would be charged with the task of applying the money to publicly desirable, preferably short term projects

[38] It might, however, be worthwhile to experiment with partial recapture as an incentive to rapid settlement. Thus, the amounts lost by the parties in the week in which they reach a settlement might be returned to them. *Cf.* Goble, *supra* note 35, at 106.

that are not currently in the public budget — creation of scholarships or construction of public recreation facilities, for example. Certainly public employees would get little direct advantage from such a use of the money. Moreover, since these projects would not be currently funded, the committee's action would not discharge any of the government's present obligations; and since such contributions would occur irregularly, the government could not count on being relieved of any future burdens. Consequently, given public officialdom's abhorrence of losing control over money, this use of the funds should also provide an incentive for public employers to bargain.

Finally, I would like to dispel what may perhaps be a lingering doubt about nonstoppage strikes. Although they were initially proposed for use in the private sector more than two decades ago, they have had little acceptance by private parties. There are a number of reasons for this. First, although strikes have been the subject of some academic disapproval and periodic editorial dismay, they remain an acceptable device in the private sector. There has been, therefore, little real pressure for a substitute. Second, for a nonstoppage strike in the private sector to be as effective as the conventional strike, the contributions of the employer to the fund must be geared to the amount of profits it is spared from losing. Because of the obvious difficulty of calculating this figure, achieving a formula for employer contribution which is satisfactory to both parties could easily be more formidable an obstacle than resolving their basic economic differences. Third, any statutory imposition of a nonstoppage plan would, while solving in a crude way the complexities of computing the formula, raise the claim by employers of deprivation of property without due process and the analogous employee claim of involuntary servitude.

Clearly the first reason does not apply in the public sector, for strikes are not currently acceptable. Nor does the second carry much weight. There is no need in the public sector to base a formula on profits because there are no profits; what should be required by the employees is that there be sufficient pressure on the public employer, and I believe my proposal provides that. The third, too, is inapplicable. Government may of course impose conditions on itself; and since it is constitutional totally to deprive public employees of the right to strike,[37] it should be permissible to provide them with a halfway measure, especially when it is the union which voluntarily initiates its use. In short,

[37] United Fed'n of Postal Clerks v. Blount, 325 F. Supp. 879 (D.D.C. 1971), *aff'd*, 92 S. Ct. 80 (1971).

no significant barriers to adoption of nonstoppage strikes exist in the public sector.

B. The Graduated Strike

A nonstoppage strike may be insufficient to induce responsive bargaining. More direct pressure may be required, and the graduated strike would provide it.

In a graduated strike the union would call work to a halt in stages. During the first week or two of the strike the employees would not work for half a day; during the next period, if the union so chose, they would not work for one full day per week; and so on, until they reached some floor short of total stoppage. Employees' take-home pay would be cut proportionately.

The effect of a graduated strike would be to give the public a taste of reduced service without the shock of immediate and total deprivation. This would start in motion the political machinery I described earlier,[38] but would not overload it. Citizens would make complaints about their inconvenience known to their elected representatives. Local officials, both executive and legislative, would thus be under pressure to *do* something, but would nevertheless be able to consult with each other and with the officials at higher levels of government. They would therefore be able to negotiate with the union in a reasonably coordinated and authoritative manner. Free of resentment and of posturing over illegality, the complicated political process of sorting out preferences between higher costs and fewer services and among competing demands could then work itself out.

To insure that employees really suffer proportionate loss of wages would require, first, that they be unable, after the strike, to reduce backlogs at overtime rates. This could probably be accomplished simply by a limitation on overtime pay for some period following the strike. It does not seem necessary to do more: to the extent the employees ultimately recoup their lost wages, the public will have the lost service restored; and in any case it is unlikely that either side's losses will ever be totally recovered. Second, it would be necessary that the shutdown not exceed the announced level. While enforcement of this requirement would not be easy, it would probably be satisfactory for an impartial body with an expedited hearing procedure to determine the actual extent of the employee stoppage and to mete out appropriate penalties, including reduction of wages. In addition, there would be another strong inducement to proper observance of the ground rules: union and employee recognition that

[38] *See* pp. 464–66 *supra*.

they have an effective, fair, and acceptable weapon to encourage good faith bargaining.

As I stated before, I think that the graduated strike and nonstoppage strike would work best in tandem. Because a nonstoppage strike would cause the public less disruption, we should perhaps require that unions try it for at least four weeks; they would then have the option of instituting a graduated strike. However, since both types of strikes are certain to put pressure on the public employer, I think we should give the employer some limited options. If it feels itself financially hard pressed, it can select the graduated strike, which would result in no additional expense. If it believed that the service performed by the employees was so essential to the public that cessation could not be tolerated — for example, fire and police protection — it should have the opportunity to persuade an impartial, preferably expert, tribunal that the services are in reality so indispensable. If successful, it could limit the union to the ever-more-expensive nonstoppage strike.

V. Conclusion

A blanket ban on strikes by public employees does not work. Illegal strikes are bad for labor relations and even worse for the rule of law. However, conventional strikes, if legalized, would be ill adapted to the complex procedures of public labor relations. Yet the public must accord its employees reasonable procedures that produce responsible bargaining. Under my proposals, bargaining could perform its salutary function, but without the disruption caused by the conventional strike and in ways adapted to the peculiarities of the public's needs and the government's intricate procedures for allocating resources.

Our federal system is complex and often awkward, but it enables us to experiment with various means of regulating public labor-management relations so that neither the public nor public employees are victimized. We should test the nonstoppage strike, the graduated strike, and indeed any other promising arrangement as we grope in this old field mined with so many new problems.

Wash. DC.

COMMENTS BY SAM ZAGORIA (U.S. MUNICIPAL LEAGUE) RE SB 501

I spoke to Zagoria 3-20-78 on the recommendation of Ron Garzini (Fairbanks North Star Borough) and Fred Jones (Labor Relations, Municipality of Anchorage) regarding national experience in new approaches to final arbitration or local public sector collective bargaining impasses.

Zagoria said he was familiar with the situation in Alaska, having talked with Mayor Sullivan a number of times. He pointed out two areas of possible action:

1) Bargaining in public. Zagoria said that last week the state of Tennessee had signed into law public bargaining for teachers. He also said that the state of Florida had had this provision for a number of years and that the results were considered good. He noted that, by bargaining in public, both sides felt the pressure of public opinion to negotiate moderately and without taking extreme stands.

2) Public referendums. He believed that the referendum method had the greatest potential for development and thought that it was closer philosophically to the true intent of public collective bargaining, i.e. where public authorities were acting as agents for the public itself.

In regard to public referendums, Zagoria said that the Colorado town of Englewood, just outside Denver, has had a public referendum system in effect for the past five years. The interesting aspect of the arrangement is that no referendum has ever been held. The process (in theory) is as follows: (a) impasse occurs, (b) mediation takes place, (c) upon the failure of mediation a fact-finding board investigates the situation and makes a recommendation to both sides, (d) both sides have 30 days to accept or reject the recommendation, (e) the recommendation of the fact-finding board, plus the last best offers of the two deadlocked sides are put on the ballot for a public vote.

Zagoria said that twice-- once with policemen and another time with firemen-- the labor groups waited until the evening of the 29th day. Then they called a special meeting and accepted the fact-finders' recommendation. In Zagoria's view, they waited until they determined that the public was not with them before they accepted the compromise. Last November 2, two more Colorado towns adopted this procedure.

The City Manager of Englewood is Andy McCown (303-761-1140), City Hall 3400 S. Elati Street, Englewood, Colorado 80110. Zagoria will send us material on the public bargaining system as well as Englewood's system.

Ben Harding

SB 501

Officials Oppose Union Cont

Local labor leaders and school board members yesterday joined in opposing Senate legislation that could give final arbitration of government-labor union disputes to the voters.

A series of witnesses testifying during a teleconference hookup with the Legislature in Juneau also opposed binding arbitration by Outside arbitrators called in when both sides reach an impasse.

Settling a labor dispute between governmental agencies and a union by means of either voter referendum or by submission to a three-member elected panel would amount to "a cop-out" by the government, said school board member Caroline Wohlforth.

Millett Keller, also a board member, said settling such disputes is the responsibility of the two parties involved. "We elect you to make the decisions and set the policies."

Setting up an elected panel to settle disputes would only "create another layer of government . . . further insulating the body that decides what can be spent from the body that decides what can be taxed," he said.

John Alexander, representing the International Brotherhood of Electrical Workers local 1547 said taking labor disputes to the voters would only "further complicate the process of bargaining."

Representatives of the Teamsters, carpenters, International Association of Firefighters local 1264, AFL-CIO, and other unions all said they opposed both binding arbitration by an outside arbitrator and voter intervention as well as a proposal to open up negotiations to the public with announcements of offers and counter-offers by both sides.

However, both school board members said they believe making negotiations open to the public might be helpful in ending disputes.

One union representative, however, likened such a move to "conducting courtship in public."

Labor representative Robert W. Johnson said that would be "an unwanted intrusion . . . like taking your mother in law along on your honeymoon."

He said he likes to see bargaining "carried out to its ultimate end."

Keller said collective bargaining in Alaska "has certainly served the public employees well" resulting in low turnover, good wages, excellent benefits including liberal holidays and good retirement, plus "outstanding job security."

Teleconference witnesses picked up in Fairbanks, Ketchikan and Bethel generally echoed sentiments voiced locally.

The Juneau end of the conference was chaired by Sen. Bill Sumner, R-Anchorage.

Senate bills under discussion were No. 373, relating to public information regarding collective bargaining by public employees, and No. 501, which would allow cities the additional options of settling impasse disputes by means of submission to an elected panel, or by direct vote at

tract Settlements By Voters

the first upcoming general municipal election.

These would apply only to those cities electing to handle negotiations under provisions of the labor relations legislation already in effect, Sumner said. Both bills were introduced by Sen. Joe Orsini, R-Anchorage.

Anchorage Daily News April 27, 1978 SB 501

Mediator reports on deadlock

By SUZAN NIGHTINGALE
Daily News Staff Writer

Personality conflicts between negotiators and skepticism on the part of municipal employees have been cited as two of the reasons why deadlocked negotiations between the Anchorage Municipal Employees Association and the administration aren't proceeding.

In a report released Wednesday by the Municipal Employee Relations Board, mediator-fact finder Joe Keenan recommends that the negotiations be re-opened with "pre-established and enforceable guidelines" and possibly even a change in the composition in the negotiation committees themselves.

KEENAN ALSO offered to continue his role as mediator, a suggestion expected to be ruled on today by the Employee Relations Board.

The Anchorage Municpal Employees Association, which represents more than 500 general classified employees, has been without a contract since June, 1976, and has been in negotiations with the administration since June, 1977. In March, Keenan was appointed to act as a mediator-fact finder, after talks bogged down. While Keenan was acting as mediator, from March 29 to April 18, about half the items being negotiated were agreed on, according to sources. But on April 19, the AMEA negotiating team gave formal notice of an impasse, indicating they believed meaningful progress was no longer being made.

Wednesday, however, Mark Sollenberger of the AMEA negotiating committee said that group would be willing to reconvene negotiations with Keenan again acting as mediator.

IN HIS REPORT, Keenan cites "such a complete lack of confidence on the part of the employees with the city representatives that any proposal . . . immediately gave rise to such a degree of skepticism as to compel the employees to immediately assume a defensive posture, obviously saying to themselves, 'We heard what you said, but what do you really mean?' "

Keenan added that a "ghost from the past" was also evident during negotiations as employees "continually dwelt on past experiences in connection with their relations with the city."

Sent to:

Also sent to: School Dist Pres. & REAA's

All Boroughs
All Home Rule Cities
All First Class Cities
and . . . Bethel, Fairbanks

I have enclosed for your review a copy of Senate Bill no. 501 ("An Act relating to municipal labor relations"), which concerns procedures for binding arbitration in matters involving local public employees, both municipal and school district.

I would very much appreciate your comments and assessment of this proposed legislation so that the Senate Community and Regional Affairs Committee will be able to benefit from your views when it takes up the measure later during the session.

I would like to point out that SB 501 is designed to allow local government or the appropriate administrative body the option adopting either or neither of these means of settling local public collective bargaining disputes. It is not my intent for the legislation in any way to mandate these forms of arbitration to the local governing body, but to permit it to select the most flexible course of action possible and locally desirable.

In this respect, I would also appreciate any suggestions you may have on ways in which SB 501 might be refined or made more responsive to local requirements.

Sincerely,

Joe Orsini
Chairman
Community and Regional
Affairs Committee

February 20, 1978

The Honorable Joseph L. Orsini
Senator
State of Alaska
Juneau, Alaska 99801

Sir:

First, let me express my appreciation to you for requesting our Board's input into Senate Bill 501.

This "binding arbitration" problem is one of our major concerns and we can appreciate the legislature and its dilemna in attempting to reach a satisfactory solution. Unfortunately, there is probably no complete satisfactory answer. Please let me make a few points that may be important in consideration of such a bill:

1. Teachers have been dealt with more than fairly in this State as all salary schedules, etc., will point out.

2. The public is responsive to school board actions and would react in cases of unfairness as well as they react when they feel the boards are too liberal.

3. The law seems to be silent on the right to strike by these employees.

4. School boards are elected by the people and have the responsibility to respect their wishes and desires.

5. The school boards represent a much larger body of voters in this State even though the National Education Association is able to make more noise because of their organization.

With these thoughts in mind, our Board's stand is that the Legislature allow the authority to remain in the hands of the people through their elected representatives. Give the public employees, teachers, etc., the right to strike. How else can the people be more aware of what is happening and respond?

Senate Bill 501 provides for an elected board to have "binding arbitration" powers. Why do we elect another board to do the job that we are responsible for in the first place? The problem of going to the voters with the last best offer may not be to either party's benefit when trying to educate the public in all of the ramifications. Otherwise, it's very expensive and to what success?

I guess what I am saying is that our present system is working. Our employees are well paid with good benefits. The boards are responsible to the public and their status is dependent upon their being responsive. The Supreme Court has said the boards do not have the right to give away their responsibilities to arbitration unless you change the law. This is the way it should be.

Again, thank you, for requesting our input. Feel free to call on Bill Overstreet's office as Mr. Overstreet and his staff represent our views as well as having immediate contact with all the boards in the State and can be very responsive when help or information is needed.

Very truly yours,

MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT

Feb. 22, 1978

Senator Joseph Orsini, Chairman
Committee on Community and Regional Affairs
Pouch V-State Capitol
Juneau, Alaska 99811

Dear Senator Orsini:

The St. Mary's School Board discussed Senate Bill no. 501 at it's meeting last evening.

The members of the Board feel that this particular bill would seriously erode it's legal responsibilities, powers and duties. It would also definitely impede the responsibility the board has under Alaska statutes to manage and control the St. Mary's City School District.

The members of the St. Mary's School Board are opposed to binding arbitration in any form. Consequently, they do not feel that any legislation should be introduced which furthers the cause of binding arbitration.

I wish to thank you for the opportunity you provided us to review Senate Bill No. 501.

Sincerely,

Flora Paukan

Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for the opportunity to comment on Seate Bill 501. It is not clear that if a City has opted out regarding unions whether it has to comply with this or not. If there are no unions allowed in a municipality, it would seem that this would be superfluous.

I feel that by your allowing the local government to adopt either or neither of these means is a good way to go. By allowing local option, we are given more opportunities to resolve labor relations problems.

Very truly yours,

The Honorable Joseph L. Orsini
Alaska State Senate
Pouch V - State Capitol Building
Juneau, Alaska 99811

Dear Senator Orsini:

We appreciate your interest in our suggestions and evaluation of Senate Bill No. 501 a copy of which was forwarded to me and the other Board of Education members.

Obviously much thought and study has gone into your attempt to facilitate bargaining between municipal authorities and their labor forces. However, we should be mindful that the negotiations procedure originated in private industry and bringing the public sector into it has raised problems as public bargaining lacks much of the leverage on both sides that private labor and industry utilize.

I honestly feel that Senate Bill No. 501, though well intentioned, would result in creating more problems than it may solve. The answer to labor relations, I believe, lays in trust, respect and communications throughout the year - not just at negotiations time. The negotiations process can work in its present form and has worked for us on the Kenai Peninsula thus far. We have completed a set of teacher negotiations and feel the process will continue to work here.

Sincerely,

(Mrs) Carolyn Cannava

Dear Billy:

The Senate Community and Regional Affairs Committee will be holding hearings on Senate Bill 501 ("An Act relating to municipal labor relations") which explores new concepts and approaches in the field of collective bargaining at the municipal level. These hearings will be video-broadcast from Juneau to the communities of Ketchikan, Anchorage, Bethel, Fairbanks and Nome on March 30th.

For your background information, I have enclosed a copy of the letter sent by the Committee to mayors and interested parties in those communities notifying them of the video-hearings and providing details of the arrangements.

If you are interested in following the public testimony on new directions in resolving public collective bargaining impasse disputes, I would like to invite you or members of your staff to attend these hearings.

Sincerely,

Joe

March 10, 1978

Leo Rasmussen, Mayor
City of Nome
P. O. Box 281
Nome, Alaska 99762

Dear Mayor Rasmussen:

The Senate Community and Regional Affairs Committee has scheduled a video-conference hearing on March 30th for Senate Bill 501 ("An Act relating to municipal labor relations") which is intended to explore new concepts and approaches in the field of collective bargaining at the municipal level.

SB 501 was drawn up to allow local government or the appropriate administrative body the option of adopting either, or neither, of the procedures outlined in the attached legislation as a means of resolving local public collective bargaining impasses. It was not my intent to mandate any of these forms of arbitration to local government bodies, but to permit them to select the most flexible and most responsive approach to the needs of the local situation.

Because of the increasing public interest in collective bargaining in the public sector, I would like to invite representatives from your organization to present your views on the proposed legislation at the hearing. The video-conference will be broadcast from Juneau to the communities of Ketchikan, Anchorage, Fairbanks, Bethel and Nome at 12:30 p.m. (Juneau time) on March 30th. Persons are welcome to attend the meeting in Juneau, but I would ask that only participants in the other communities testify. If time permits and all the participants outside Juneau who wish have testified, Juneau participants may present testimony. If there is inadequate time to hear all those desiring to testify, further hearings may be scheduled.

Mr. Peter Fromuth of the Legislative Affairs Agency in Juneau will be handling the technical and organizational arrangements for the video-conference. Either he or video-conference moderators in communities outside Juneau may be contacted for details involving these matters. (names attached)

In order to provide the Committee with a better idea of the extent of possible testimony, I would appreciate your informing me if you or your representatives wish to speak at the March 30th hearing.

Sincerely,

Joe Orsini

Frank Benson, Mayor
City of Galena
Box 149
Galena, Alaska 99741

Dear Mayor Benson:

I am writing further to my letter of February 15, 1978, in which I asked your assessment of Senate Bill 501 regarding collective bargaining for municipal employees.

A number of local government bodies have expressed their concern to me that SB 501 could force binding arbitration on municipal governments and school districts. As such, they stated that they opposed this kind of legislation which, in a case of school boards in particular, would remove a significant portion of the authority of legally constituted governing bodies to carry out their responsibilities.

It was not my intent or that of the legislation to create such a situation. I am concerned, however, that local governments may find themselves compelled in the future to accept binding arbitration from an outside arbitrator. The purpose of SB 501 was to allow local governments the option of selecting other forms of collective bargaining. Such options included taking the last best offer from both sides of a deadlocked negotiation process to a vote of the people, the election of local arbitrators who would be part of the community and, at election time, answerable to it, as well as a suggestion made recently from Anchorage that the municipal assembly sit as final arbitrator.

I believe conditions in the Legislature and elsewhere are such that major efforts will soon be made to extend binding arbitration throughout local government in Alaska. I would hope that SB 501 could serve as a conceptual framework to develop new approaches and new ideas so that the initiative, direction and accountability in collective bargaining can be maintained and enhanced at the local level.

In this respect, it is my hope that you will be able to use SB 501 as a vehicle to work out new concepts, and that you will feel free to provide me with your thinking on how it can be shaped to meet local needs.

Sincerely,

Joe Orsini

M E M O R A N D U M

March 22, 1978

SUBJECT: SB 501

TO: Senator Joseph L. Orsini

FROM: Richard A. Bradley, Legislative Counsel

Ben Harding asked that I review SB 501 to determine whether a bill was necessary to achieve the results sought in the bill.

SB 501 amends AS 23.40.200, a section establishing the "arbitration" procedures in the Public Employees Relations Act, (AS 23.40.070 - 23.40.260). AS 23.40.250(6) includes a municipality within the definition of the term public employer and accordingly the act applies to municipalities unless they have exercised their option under sec. 4, ch. 13, SLA 1972 to reject its application. State v. City of Petersburg, 538 P.2d 263 (Alaska 1975).

The provisions of SB 501 provide that a municipality, by ordinance, may exempt itself from AS 23.40.200(a) to (f) if it adopts a procedure authorized under §200(g)(1) or (g)(2).

While municipalities possess substantial rights of legislation under Art. X, sec. 11 of the Constitution, it has been determined that the provisions of PERA apply to municipalities and control their actions. State v. City of Petersburg, supra.

In my view, therefore, in the absence of SB 501, a municipality may not exempt itself from the provisions of §200.

Matanuska-Susitna Borough, Inc.

BOX B, PALMER, ALASKA 99645 • PHONE 745-3246
DEPARTMENT OF ADMINISTRATION

March 22, 1978

The Honorable Joseph L. Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Subject: SB 501 Municipal Labor Relations

In response to your letter to Mayor Ron Larson we wish to point out that under Chapter 113, SLA 1972, the Matanuska-Susitna Borough has exempted itself from the State Public Employment Relations Act. Thus, this Borough would not be affected by SB 501.

However, assuming that this Borough might come under the Public Employment Relations Act at a later date, we favor the system of binding arbitration as set forth in our Borough Code. Please note MSB 2.54.070 a copy of which is attached. It provides for the selection of arbitrators in the normal manner, not for their election.

In brief, the collective bargaining options offered by SB 501 are not adequate.

Very truly yours,

Wesley M. Howe
Borough Manager

WMH:er

Enclosure

2. The Board shall meet to consider the issue, render its determination and instruct the parties as to its determination. (Ord. 76-25 §8, 1976).

2.54.070 Mediation and fact finding. A. If, after a reasonable period of negotiation over the terms of a collective bargaining agreement, a deadlock exists between the management and an organization, the Board may, either on its own initiative or at the request of one of the parties to the dispute, take steps to see that the following procedures are used in the order indicated:

1. Mediation;
2. Fact finding with recommendations;
3. Binding arbitration.

B. In the case of mediation or fact finding, the mediator or fact-finder shall be appointed by the Mayor or his representative and the employees' representative. If the two parties cannot agree on an appointment, the appointment shall be made by the Board.

C. In the case of binding arbitration, an arbitration panel of three persons shall be established; one shall be chosen by the employee organization and one shall be chosen by the Mayor or his representative; these two shall select the third panel member. The employee organization and management shall each submit a proposed contract to the panel, together with explanations and justifications for their proposed contracts. The panel shall consider the proposed contracts, and may consult with the employee organization and management jointly or separately. Following such consideration, the panel shall endorse one of the proposed contracts: the endorsed contract shall be binding on the parties. (Ord. 76-25 §9, 1976).

2.54.080 Work stoppages. Work stoppages, including strikes by employees, individually or collectively, except absences authorized by personnel-related ordinances or regulations, are prohibited. (Ord. 76-25 §10, 1976).

2.54.090 Ratification of agreement. Upon completion of negotiations between the Borough and the bargaining representative, the terms and conditions shall be reduced to writing in agreement form. The agreement shall then be presented to the employee organization for ratification and to the Assembly for ratification separately. Upon ratification of an agreement the Assembly shall enact all resolutions and ordinances necessary to carry out the terms of such agreement. (Ord. 76-25 §11, 1976).

2.54.100 Unfair labor practices. A. The Borough or its agents may not:

1. Interfere, restrain or coerce an employee or employee organization in the exercise of its rights guaranteed in this chapter;

City and Borough of Sitka

March 22, 1978

Senator Joseph Orsini, Chairman
Senate Community & Regional Affairs
Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The City and Borough of Sitka opposes Senate Bill No. 501 which we consider to be a further intrusion upon the powers of local government. The proposed legislation runs contrary to our Home Rule Charter, and enactment of SB 501 would ursurp powers given our Assembly by the local electorate.

Over the past few years the legislature has chipped away at the powers of local government to the point that Home Rule is fast becoming a misnomer. We find it difficult to understand why the Legislature would object in continuing to allow each political subdivision to make its own decisions on local labor matters. Local government decisions on this matter are, and would continue to be made with full knowledge of the needs and desires of each locality, and would not be a scattergun approach as contained in SB 501. Your vote against SB 501 will be a vote of confidence for local government.

Very truly yours,

Fermin Gutierrez

Dear Senator Orsini,

Thank you for inviting NEA-Alaska to testify at the March 30 hearings on Senate Bill 501.

As the bill does not cover teachers, we will not be taking any organizational position at those hearings. However, as citizens, we are in opposition to any form of impasse resolution which has the effect of weakening the integrity of the bargaining process itself. Viewed from this light, the proposals in SB 501 which require submitting articles at impasse to a popularly elected arbitration panel or directly to the voters would have just such a deleterious effect.

It is in the best interests of all Alaskans to provide for fair, equitable, and speedy resolution of any breakdown in any negotations. It would seem apparent from past history, both in Alaska and in the country at large, that binding arbitration by a professional neutral consistenly serves the best interests of employer, employee, and therefore the public as a whole.

Again, thank you for your letter. As I will not become president of NEA-Alaska until July of this year, if you wish to discuss this legislation or any other issue with us, please contact Carolyn Doggett, or our Executive Secretary, Bob Van Houte.

Sincerely,

Susan Stitham

Re: Senate Bill No. 501 - Municipal Labor Relations

Dear Senator Orsini:

I have been involved in municipal negotiations and became frustrated with the length of time some negotiations had taken but I cannot believe that S.B. 501 is the solution. For example, lets suppose that a municipality by ordinance was to set up an arbitration panel and then the unions and working people of the community were effective in getting all three arbitrators elected. Is this what you desired to achieve in S.B. 501?

Arbitration is serious business and arbitrators should be serious, impartial and knowledgeable. The selection of an arbitrator likewise is serious business and should not be religated to an elective process where popularity, goodlooks and the ability to fund a campaign can be the deciding factors. Should a municipality by ordinance establish a general election to decide collective bargaining impasses as you propose in S.B. 501, I can see nothing but abuses. For example, if the average wage for a municipality's employees was $10.00 and the employees were asking for $12.00 the municipality could counter with $6.00 which you can be sure would be rejected, the municipality could refuse to budge, declare an impasse and have a general election.

Your bill forces the employees into an expensive campaign to plead and campaign for decent wages against a campaign expounding that "the best government is the cheapest government" and "a vote for $12.00 wages is a vote for greater taxes." I ask you, would you like to operate a business where the customers voted to decide what prices you could charge them? Perhaps you should have a bill introduced to let the voters decide whether Alaska Senators salaries will be $11,750.00 a year or $5,750.00 a year and whether they shall receive $50.00 or $25.00 per day per diem and if annual expenses will be $4,000.00 or $2,000.00. Wages and prices should be established in their respective market places and this bill would effectively remove negotiations from its market place and put negotiations into arenas of absurdity.

This piece of proposed legislation rather than solve existing problems will create a multitude of additional problems, make a mockery of the negotiation process and no doubt set presidence where at some future date the elector may decide the wages of their elected representatives.

Sincerely,

CARPENTERS LOCAL UNION 1281

George Pearson

F: SB-501
CSSB-373

745 West 13th
Anchorage, Ak.
99501
March 30, 1978

Alaska State Senate
Community and Regional Affairs Committee
Joseph L. Orsini, Chairman
Pouch V
Juneau, Ak. 99811

Dear Senators, Senator Orsini

The following is the testimony I verbally gave today via the Teleconference Hearing on SB 501 and CSSB 373:

Mr. Chairman and Senators, I'm Sue Linford speaking as a private Alaskan citizen of 24 years and former member and President of the Anchorage School Board. Currently, I am Chairman of the Anchorage Chamber of Commerce Education Committee and Representative from Alaska PTA to the Ruralcap Board of Directors. (*)

As a preface to my remarks, the concept presented in both 501 and 373 is an ideal and as an ideal it is presented as the perfect solution to impasse resolution in collective bargaining. Unfortunately, when dealing with fallible imperfect humans and human behavior, perfection is impossible. I oppose both pieces of legislation for one overall reason - they limit local control. Both pieces further narrow local governments' authority and ability to discover their own imperfect solutions to the perfect problem i.e. impasse resolution. The State would be better advised to spend the taxpayers' money on on-going training of employee groups and elected officials around the state in various techniques which will help insure fair collective bargaining, that is to better learn the rules of the game as it currently exists.

Regarding specifics of the bills - In speaking to both bills, my particular point of view is their effect on school personnel. I don't have to tell you that there is a vast difference between public and private sector negotiations; I also do not have to convince you, or you wouldn't be serving, of the greatness of the democratic institution of representative government. Put these two points together and you have the voters' elected representatives with the fiduciary responsibility for the public funds under their direct control. Further, this representative responsibility can not be fragmented or our checks and balance system will no longer work. I'm referring specifically to SB 501 Sec. 1, g, (1) - First of all, the panel suggested duplicates already existing elected bodies which have the OVERALL governing responsibility within their particular jurisdiction and areas of expertise. To add another layer, further insulates government from the direct voice of the people. If we were to deal with all local government problems in this manner, we would have taxpayer dollars spent for elections of ALL kinds and for ALL manners of panels. The result being - no ONE person or body where the BUCK actually stops. Also the politics of electing the panel suggested is lethal!

It is open to special interest manipulation not to mention the built-in invitation once elected for influence-buying and corruption. In other words, the bill suggests developing a democratic Frankenstein which is NOT responsible to or for the overall day-to-day governing of its public but rather a very narrow, specialized area called arbitration.

In Sec. 1, g, (2) - At a time when public sector bargaining is just barely being understood, this bill suggests submission of issues in dispute to an election of the voters, thereby changing entirely the rules of collective bargaining!

In conclusion, I'm reminded of a poker game in which heavy betting has taken place on specific hands; finally, when all bets are placed and a winner is about to be determined, a passerby comes to the table, picks up the hands, snifts some of the cards around, throws down one hand, points to a person and declares both the hand and the person the winner - then he turns and disappears into the sunset. . .

Regarding CSSB 373 - This substitute is much better than the original bill eliminating much of the poor wording and loop holes and seems fairly innocuous, however, I'm still opposed for the reason previously mentioned - limits local control. Additionally, I do question the wording in paragraph (b) - How do you envision the public "expressing itself?" and in paragraph (c) - What is meant by "the labor relations agency?"

Thank you.

Sincerely,

Sue Linford

(*) All of these organizations have taken a position opposing binding arbitration even Ruralcap, indirectly, through its co-sponsorship with the State of the Citizens Participation Conference at which the delegates from the rural areas of the State took the position against it.

FROM: Caroline Wohlforth, President
Anchorage School Board

SUBJECT: Testimony Regarding SB 501 & SB 373
Municipal Labor Relations

DATE: March 30, 1978

I am speaking to you as an elected official, one whom fellow citizens chose to represent them, and, with their implied consent, to make decisions for them and to exercise certain authority on their behalf.

SB 501 strikes at the core of this philosophy by forcing elected officials to abdicate their duties as decision makers.

One of the most important functions of government in Alaska is as an employer. Since that is a condition of our times, we must recognize, on an equal basis, the importance of government relations with its employees.

The policies and decisions which are an everyday function of employer and employee relations are most effectively within the domain of leaders who are chosen by the electorate to make those decisions.

If government were to be run by referendum, then there would be no need for "government" -- there would be only a need for administrators who decide what to place on ballots and other administrators who manage elections.

On the same basis, we question the use of binding arbitration as a means of settling the disputes which arise in negotiations. Under our system, management and labor have certain prerogatives during negotiations. Binding arbitration would deny both parties those prerogatives and put governmental policy making outside of government.

We need only think back to the arbitrated settlement of the Anchorage Community College teacher's strike to see the illustration.

If an arbitrator has to leave orders that his findings can't be revealed for at least a week after he leaves town, doesn't it seem as though there might be a question of fairness involved for the taxpayer? The alternatives offered in 501 are also impractical.

The election of a three-member panel of arbitrators would further politicize the settlement of negotiations; furthermore, in rural areas especially, but also in cities it could be very difficult to find three people with both the technical expertise to fully understand the implications of contract language and salary schedules and the time and willingness to run for what should be a thankless job. I have already mentioned the philosophic problems elected officials have with government by referendum; the chief practical one I see refers again to the complexity of negotiated agreements and the all-or-nothing gamble inherent in last-best-offer arbitration. To sum up our objections, referring resolution of negotiations to any kind of arbitrator or to the public is a cop-out for government.

This is not what Alaskans expect of their government. On this basis, we oppose the adoption of SB 501.

Regarding SB 373 -- We support this proposal as we have had some experience with it on a local level and found that experience to be helpful. Last year, the Anchorage School District and the Anchorage Education Association publicly released their initial bargaining proposals. The release touched off a good deal of public debate and constructive comment on our relationship as a public body with our employees. We welcome this breath of fresh air into the critical arena of public employment policy.

We believe it is vital that our constituents be informed of the policies and decisions of their elected officials on a systematic basis, just as we believe it is their duty of elected officials to set policy and make thoughtful decisions sensitive to the best interests of that electorate.

Caroline Wohlforth

AREA CODE 907-333-9561

TO: Alaska Senate Community & Regional Affairs Committee, Honorable Joe Orsini, Chairman

FROM: Millett F. Keller, Vice President
Anchorage School Board

SUBJECT: Testimony Regarding SB 501
Municipal Labor Relations

DATE: March 30, 1978

Whenever the question of binding arbitration of disputes with public employees comes up, I always reflect on how the collective bargaining process has worked so far in Alaska. Collective bargaining has served Alaska's public employees quite well. Let's look at the record; our public employees are:

1. among the highest paid employees in the State,

2. have a low turnover,

3. have achieved excellent benefits, including vacation and medical plans that exceed most offered by private industry, an outstanding retirement system, and liberal holiday schedules,

4. and have job security.

With all these gains, why is there concern about the need for binding arbitration. Is management asking for help? Are the public employees being aggrieved and asking for your help? Is the public being subjected to crippling strikes? No. The need for binding arbitration in the public sector has not been demonstrated. In fact, quite the contrary is true.

When our nation's founders formed our government, they had a deep distrust and dislike for government. In fact, the movement from Europe to America was in large part a flight from a tyrannical government which imposed taxes without the consent of the public.

Our nation was formed on the principles of a republic, that is we would elect our representatives and they would be responsible for setting policy and guiding the government.

The Democratic process would be used to elect the representatives and thus ensure that the public would have the ultimate power to elect, remove or replace an elected official who was not satisfactory.

Our Federal Constitution and our State Constitution both reaffirm the principles of a representative democratic republic. This form of government has served our nation well and has withstood the test of time.

The introduction of collective bargaining into our local governments brought a new dimension of conflict into our goverment.

Previously, the Constitution had been a document which protected the public from the government. Now, the collective bargaining agreement has become the document which protects the government from the public.

In spite of all the problems we have managed to accommodate our government to the rigors of collective bargaining. The government employees have done quite well and local governments have paid the price both for bargaining agreements made at the local table and settlements which the unions have been able to make at the legislative table.

But binding arbitration is where we draw the line. Binding arbitration is a repudiation of our representative form of government. We are taking the most powerful force we give our government, the ability to tax, and we are giving it to someone who does not account to the voters for tax levies.

Some say that SB 501, by providing for an elected arbitration panel, retains voter control of the public treasury. Senators, all this bill would do is create another layer of government which would insulate the body which decides how much we spend from the body that decides how much we tax.

In the case of Juneau, Sitka, and Anchorage, we have unified our governments so that we could hold one set of legislators accountable for our local taxes. In the case of other organized boroughs, the elected arbitration panel would impose a third or fourth layer of government on boroughs and cities that are already smothered by government.

But an even more sinister threat to our representative government is posed by the second option, the submission of collective bargaining dispute to the voters. Senators, I submit that the voters want and indeed demand that their elected officials step up to all the tough issues and represent the public by making decisions. Furthermore, voter outrage and disgust at our governmental institutions will surely be increased when the public is continuously called upon to settle the collective bargaining nitpicking disputes between elected officials and union negotiators.

However, if you believe that our representative form of government cannot function in the collective bargaining arena, then I think we ought to consider changing the Constitution rather than the laws.

Why wouldn't the same logic prevail in the Legislature. Think of all the time and hassle that could be saved if we let the people vote on the state budget rather than the Legislators. And think about the possibilities of eliminating the free-conference committee and submitting those disagreements to final and binding arbitration by a body completely immune from the Legislature or the Governor. To make sure that equity prevailed we could have an election to see if we would elect the public interest free conference committee or have an annual state referendum on free conference committee issues.

Senators, when we talk about binding arbitration, we are talking about overthrowing our representative form of government.

I for one do not support such a move and sincerely hope that you will resist the beguiling arguments of the sirens, and oppose binding arbitration of public employee disputes.

Thank you very much.

Millett Keller

BACKGROUND ON THE ALASKA PUBLIC EMPLOYMENT RELATIONS ACT

AS 23.40.070-260, otherwise known as the Alaska Public Employment Act or PERA, provides for collective bargaining and binding arbitration for public employees at the state level.

It groups public employees into three categories: 1) employees whose services may not be interrupted for even a short period of time, 2) employees whose services may be interrupted for limited periods of time and 3) employees whose services may be interrupted for indefinite periods of time without the public suffering irreparable harm.

All political subdivisions of the state -- boroughs and cities -- were originally included under PERA. However, Section 4, chapter 133, SLA 1972, significantly modified PERA's application to local government by providing for political subdivisions to opt out of the regulations either by ordinance or by resolution.

Most of the major subdivisions of the state have in fact opted out of PERA with the exception of the Fairbanks North Star Borough and the Ketchikan Gateway Borough. (See attached list)

The reasons for this action by municipalities was that they could thereby fashion their own labor ordinances, tailored to local conditions and needs. In some cases, such as the City and Borough of Juneau and the Municipality of Anchorage, complete and parallel systems of collective bargaining agreements and arbitration have been adopted.

Under AS 23.40.250(5), public school employees were specifically exempted from PERA by excluding them from the definition of "public employees".

In this respect, the language of the Act is somewhat confusing and ambiguous, since in previous parts of the legislation direct reference is made to school teachers as public employees whose "services may be interrupted for a limited period but not for an indefinite period of time" (AS 23.40.200 paragraph "c"). However, despite the ambiguity of language, it has been understood as the legislative intent of the Act to exempt teachers and they have been excluded accordingly.

AS 23.40.190 provides for the appointment by the Labor Relations Agency of a mediator if a deadlock exists between a public employer and a labor organization.

AS 09.43.200, also known as the Uniform Arbitration Act, provides for the court to appoint an arbitrator or arbitrators if the parties agree to binding arbitration and if no written agreement exists for the appointment of arbitration. It also outlines specific procedures for implementing arbitration.

Senate Bill 501 would not modify or affect existing arbitration ordinances or procedures adopted locally by municipalities. The bill would, however, give greater flexibility to those municipalities which have elected to remain under the provisions of the State Public Employees Relations Act by providing them with additional options if they chose to use them.

PUBLIC EMPLOYMENT RELATIONS ACT- AS 23.40.070-260

(Section 4, ch. 133, SLA 1972, provides: "This Act is applicable to organized boroughs and political subdivisions of the state, home rule or otherwise, unless the legislative body of the political subdivision by ordinance or resolution, rejects having its provisions apply.")

The following municipalities have opted out of the Public Employment Relations Act*:

City and Borough of Juneau	Resolution 150
Municipality of Anchorage	Resolution 49-R-72
Matanuska-Susitna Borough	Resolution 72-48
City of Wrangell	
City of Homer	
Kenai Peninsula Borough	Resolution 72-17R
City of Ketchikan	Resolution 954
City of Fairbanks	
City and Borough of Sitka	
City of Petersburg	
City of Soldotna	Resolution 72-17
City of Palmer	Resolution 255
City of Kodiak	Resolution 16-72

Ketchikan Gateway Borough opted out, but later rescinded its action

Fairbanks North Star Borough joined APEA

Anchorage, Alaska 99504

Dear Dr. Peper:

Thank you for your letter of March 21 commenting on House Bills 681, 853 and 489. I know that you and your staff are fully occupied with immediate school district matters, so I do appreciate your taking the time to write on pending legislation.

Your earlier comments on the first draft of SB 373 were particularly useful to the Committee and they served as the basis for a proposed committee substitute. I have enclosed a copy of the redraft for your information and also for any further assessment you may wish to make.

I also hope that the Anchorage School District might be able to participate on March 30 in the video-broadcast hearings this Committee will hold on SB 501 (relating to the resolution by the public of public collective bargaining impasses) and, as time permits, on CSSB 373 as well.

You have my sympathy and full understanding regarding the deluge of regulations and new legislation affecting education. Hopefully, the flood can be brought under control or at least kept to measures truly benefiting municipalities and school districts.

Sincerely,

Joe Orsini

COMMENTS BY SAM ZAGORIA (U.S. MUNICIPAL LEAGUE) RE SB 501

I spoke to Zagoria 3-20-78 on the recommendation of Ron Garzini (Fairbanks North Star Borough) and Fred Jones (Labor Relations, Municipality of Anchorage) regarding national experience in new approaches to final arbitration for local public sector collective bargaining impasses.

Zagoria said he was familiar with the situation in Alaska, having talked with Mayor Sullivan a number of times. He pointed out two areas of possible action:

1) Bargaining in public. Zagoria said that last week the state of Tennessee had signed into law public bargaining for teachers. He also said that the state of Florida had had this provision for a number of years and that the results were considered good. He noted that, by bargaining in public, both sides felt the pressure of public opinion to negotiate moderately and without taking extreme stands.

2) Public referendums. He believed that the referendum method had the greatest potential for development and thought that it was closer philosophically to the true intent of public collective bargaining, i.e. where public authorities were acting as agents for the public itself.

In regard to public referendums, Zagoria said that the Colorado town of Englewood, just outside Denver, has had a public referendum system in effect for the past five years. The interesting aspect of the arrangement is that no referendum has ever been held. The process (in theory) is as follows: (a) impasse occurs, (b) mediation takes place, (c) upon the failure of mediation a fact-finding board investigates the situation and makes a recommendation to both sides, (d) both sides have 30 days to accept or reject the recommendation, (e) the recommendation of the fact-finding board, plus the last best offers of the two deadlocked sides are put on the ballot for a public vote.

Zagoria said that twice-- once with policemen and another time with firemen-- the labor groups waited until the evening of the 29th day. Then they called a special meeting and accepted the fact-finders' recommendation. In Zagoria's view, they waited until they determined that the public was not with them before they accepted the compromise. Last November 2, two more Colorado towns adopted this procedure.

The City Manager of Englewood is Andy McCown (303-761-1140), City Hall, 3400 S. Elati Street, Englewood, Colorado 80110. Zagoria will send us material on the public bargaining system as well as Englewood's system.

M E M O R A N D U M

March 22, 1978

SUBJECT: SB 501

TO: Senator Joseph L. Orsini

FROM: Richard A. Bradley, Legislative Counsel

Ben Harding asked that I review SB 501 to determine whether a bill was necessary to achieve the results sought in the bill.

SB 501 amends AS 23.40.200, a section establishing the "arbitration" procedure in the Public Employees Relations Act, (AS 23.40.070 - 23.40.260). AS 23.40.250(6) includes a municipality within the definition of the term public employer and accordingly the act applies to municipalities unless they have exercised their option under sec. 4, ch. 13, SLA 1972 to reject its application. State v. City of Petersburg, 538 P.2d 263 (Alaska 1975).

The provisions of SB 501 provide that a municipality, by ordinance, may exempt itself from AS 23.40.200(a) to (f) if it adopts a procedure authorized under §200(g)(1) or (g)(2).

While municipalities possess substantial rights of legislation under Art. X, sec. 11 of the Constitution, it has been determined that the provisions of PERA apply to municipalities and control their actions. State v. City of Petersburg, supra.

In my view, therefore, in the absence of SB 501, a municipality may not exempt itself from the provisions of §200.

RE: Final Text of State Bill for Municipal Capital Improvements

DATE: February 7, 1978

Some final clarifications have been made in the text of Section 2. On Max Hodel's approval, the new Section 2 has already been transmitted to Chat Chatterton in the State Legislature.

In your communications with legislators and others concerning our bill, be sure to use this current version only. For identification purposes, I have inserted the revision date (1/30/78) at the top of page 2.

AN ACT RELATING TO COMMUNITY
DEVELOPMENT AND STATE FINANCIAL
ASSISTANCE FOR MUNICIPAL CAPITAL IMPROVEMENTS

SECTION 1. (a) During each fiscal year, and in accordance with agreements entered into by the State and the municipality, the State shall allocate to every incorporated municipality in the State of Alaska an amount equal to fifty percent (50%) of the annual principal and interest owing by the municipality on general obligation bonded indebtedness for capital improvements incurred by the municipality after 1977, or, if monies are available, make a grant to the municipality of fifty percent (50%) of the costs of the capital improvement which the municipality seeks to construct or acquire.

No monies under this act shall be applied to principal and interest which was due and owing before 1979 or for general obligation bond issues authorized before 1978.

(b) The Department of Community and Regional Affairs shall express its financial commitment to each municipality, concerning each capital improvement project to receive State monies under this act, in a written agreement, before the project is begun, binding the State to its share of the funding of the project; provided, however, that no State monies shall be committed to nor expended for construction

cost overruns or other costs in excess of the original project estimated cost, set forth in the agreement.

(c) State monies shall not be expended under this act for capital improvement projects for which the federal and State actual funding level, under other programs, equals or exceeds the 50% share established by this act for State participation in municipal capital improvements.

SECTION 2. Any municipality may, for any proposed municipal capital improvement eligible for State assistance under this act, obtain from the State a grant for the capital improvement in an amount equal to fifty percent (50%) of the cost of the project to the extent that monies are available for this purpose. The municipal share of the funding of the capital improvement may be obtained by the municipality from any source lawfully available to it for such use, including but not limited to the sale of general obligation bonds.

SECTION 3. No more in grants or for principal shall be allocated to any municipality under this act than:

$3,000 general obligation bond indebtedness per capita or $3,000 in cash per capita on the first 1,000 population;

$2,000 general obligation bond indebtedness per capita or $2,000 in cash per capita on population over 1,000 but less than 10,000;

$1,000 general obligation bond indebtedness per capita or $1,000 in cash per capita on population of 10,000 and more.

SECTION 4. Every municipality obtaining monies under this act shall, by accepting such monies, be solely responsible for the maintenance and operation of the capital improvement. Nothing in this act shall obligate the State to participate in or contribute to the cost of operation and maintenance of such capital improvements.

SECTION 5. (a) No monies shall be made available under this Act unless the municipality submits to the State of Alaska Department of Regional and Community Affairs a five-year capital improvement plan showing the capital improvements planned for the municipality during the next five years, and the planned sources of revenues to pay for the capital and

operational costs of the capital improvements; provided that the Department of Community and Regional Affairs shall make no determinations based upon its evaluation of the desirability or priority of a project.

(b) No monies shall be paid as 50% of the cost of a capital improvement or as 50% of the annual principal and interest cost of a capital improvement unless the municipality has first obtained a written confirmation from the Department of Regional and Community Affairs that the municipal capital improvement is eligible for matching by the State in cash or by paying 50% of the principal and interest upon general obligation bonds authorized by the voters of the municipality or to be submitted to the voters for authorization after 1977. The Department of Community and Regional Affairs shall have the sole discretion as to whether 50% of a capital improvement shall be funded in cash as opposed to the State paying 50% of the principal and interest upon a general obligation bond issue for a capital improvement, but shall, in any event, advise the municipality promptly whether the proposed capital improvement, or portions of it, will qualify for State participation under this act, whether the State participation will be in cash or by the State paying 50% of principal and interest on the general obligation bond for capital improvements, and the approximate date upon which any payments by the State in cash or toward the principal and interest shall be paid.

SECTION 6. (a) The municipality shall provide the following notice to the voters in any general obligation bond election, both in the required notice of election and the ballot, regarding State participation in the principal and interest costs of the capital improvements:

Proposition (set forth bonding proposition)

(The State of Alaska may pay 50% of the principal and interest on the bonded indebtedness)

$_____

No bond notice, ballot or bond approval shall be invalid because of failure to set forth the above notice. The sole remedy of any aggrieved person, including the State of Alaska, under this section is an action for mandamus in the courts of Alaska to require inclusion of the notice or postponement of the election until the notice is included.

(b) In addition, the municipality shall furnish a notice with tax statements mailed for the fiscal year for which State aid for general obligation bonded indebtedness or cash grants for capital improvements are received under this act setting forth the amount made available by the State to the municipality for that fiscal year. This information shall be incorporated in any notice to the taxpayer required under AS 43.18.030 in connection with State aid to local governments.

SECTION 7. No monies shall be made available for principal and interest under this act until January 1, 1979. Should general obligation bonds be sold before January 1, 1979 and should principal or interest payments become owing upon such bonds before January 1, 1979, any monies owing by the municipality upon such bonds before January 1, 1979 shall not be eligible for matching under this act; provided that nothing in this act shall be construed as prohibiting a municipality from borrowing for planning, engineering, drawings, design, specifications and bid documents in 1978 with repayment from a State grant under this act, from proceeds of any authorized bond issue or from municipal revenues as provided by law.

SECTION 8. (a) The State of Alaska Department of Community and Regional Affairs shall promulgate regulations to implement this act, including, but not limited to form of applications, standards for determining eligibility of capital improvements, determination of population, financial capacity, proof of actual application of monies by municipalities to general obligation bonded indebtedness, calculation of amounts to be allocated to a municipality and time of payments.

(b) In no event, however, shall the Department of Community and Regional Affairs or any State official promulgate regulations, review applications from municipalities or otherwise administer this act in such a manner as to diminish the authority of municipalities, in their sole discretion,

to determine what types of capital improvements, or priorities therefor, or design thereof, are appropriate for their communities. No State judgment as to the appropriateness of a particular capital improvement in a particular community shall become a factor in determining eligibility of capital improvements for funding under this act.

SECTION 9. This act is effective immediately upon passage.

James A. Poor, Mayor
City of Cordova
P. O. Box 1210
Cordova, Alaska 99574

Dear Mayor Poor:

Senate Bill 507 ("An Act authorizing state aid to municipalities for the construction and development of cultural facilities") and Senate Bill 508 ("An Act providing for the issuance of general obligation bonds...for the purpose of paying the cost of cultural facilities") have been referred to this Committee for review and action.

In order to provide the background needed by Committee members for their consideration of this legislation, I would appreciate it if you could make the following information available on the projects proposed for your community:

1) What specifically would be the use of the facility and what kinds of functions would be undertaken there which could not be accommodated by existing facilities?

2) What is the total cost of the fa[illegible]ity? How much would be locally funded?

3) What do you anticipate the annual operation costs of the facility (maintenance, lights, heat, etc.) to be? How will funds be obtained to meet these costs?

4) Do you have a specific site located for this facility? What is the land value of this site? Who currently owns the site? If not municipally owned, how will the site be obtained?

5) Is this facility included in the community development plan adopted by your community? Is this facility included in your community's adopted capital improvements program?

6) What additional infrastructure support will be required (roads, sewers, power, etc.) for the site? How much will this additional infrastructure cost for construction be? How will funds be obtained for these costs?

I would also hope that you can inform me of any additional needs and projections which you believe may develop in your community for cultural facilities over the next decade.

Sincerely,

JOE ORSINI

The Honorable Charles H. Parr
House of Representatives
Pouch V, Mail Stop #3100
Juneau, Alaska 99811

Dear Representative Parr:

The Sitka Community Action Group went on record March 13, 1978, as supporting your House Bill 768 and that of Senator Rodey as to Senate Bill 508. We feel it is important to get this bond issue out to the voters and also feel that the quality of life is highly important in all of our Alaska communities. I want to add my personal support for these bills as well. I have seen what the summer arts camp here at Sheldon Jackson has done for my children and feel the cultural facilities would provide an even greater emphasis on this line, one which is badly needed not only in Sitka, but in other communities as well.

Concerning Senate Bill 507 and House Bill 769, I must say that I much prefer Senate Bill 507 and also feel that the land itself should be considered as part of the the contribution. Land is extremely valuable in Sitka as in most Alaskan cities and certainly represents a very valuable and significant part of the total cost.

Very truly yours,

Warren C. Christianson
Chairman
Sitka Community Action Group

March 16, 1978

The Honorable Joe Orsini
Chairman, Senate Community
and Regional Affairs Committee
Pouch V
Juneau, AK 99811

Dear Senator Orsini:

In response to your letter of March 9, 1978 regarding Senate Bills 507 and 508, the following background information is provided concerning the City of Dillingham's proposed Regional Cultural Center:

1) The specific use would include an auditorium/theater seating 350 with two classrooms which could be opened up to increase seating to 500; a museum area; classrooms for the University of Alaska Extension Center; day care center; office space for Bristol Bay Regional Resource Center, Bristol Bay Native Association and Bristol Bay Area Health Corporation. The theater would be used by the school for music and drama presentations and rehearsals, for Beaver Roundup Activities, concerts and performances sponsored by the Dillingham Arts Council, and would have projection equipment for showing movies. There is presently no facility of this kind in Dillingham or in the region. Also included in the plan is a multi-purpose room which could be used for banquets, making the facility a logical conference center. At present the only building which meets any of these needs is the school gymnasium which is already heavily scheduled for school activities. The school has no space for the music or drama classes. Music classes are presently held in an old armory which has no restroom facilities, very poor heating system, and is scheduled to be moved or torn down this coming year.

2) The total projected cost is $9 million based on an estimated building and equipment cost of $200/sq. foot. We would attempt to meet the 10% local funding by including land value and first year operating costs, as well as the several thousand that have been spent and time donated during the planning that has gone on in the past four years toward this project.

3) Annual operation costs, including a manager for the facility, janitor, and utilities is roughly $150,000. This amount would be increased by from $50,000 to $90,000 a year depending on insurance coverage. The cost of maintenance is to be met by rental of available office space (see attachments).

4) The city has several possible sites but has not designated a specific site for two reasons. The most desirable location is close to the high school and there is a possibility that land presently owned by Alaska Department of Fish and Game which is adjacent to the school may become available to the City. Also, more land will be received from the Village Corporation when their land is conveyed. If either of these land possibilities present a more desirable site than those presently owned by the city, we wish to utilize them. However, the City Council has, by resolution, agreed to provide a site for the facility. Land value in the townsite area is $30,000/acre and the facility would require an acre or more.

5) The facility is included in the Community Project Matrix submitted to the Division of Economic Enterprise. We have no adopted capital improvements program.

6) The location of the facility will be tied closely to existing or planned buildings. A planned low-income housing project of 35 homes will be built this fall, bringing improved water and sewer, roads, and power to one potential site. A new judicial building would bring the same infrastructure support to another potential site. It would be expected that the total estimated figure of $9 million would cover the cultural centers cost of hookups to existing utilities.

This center has been discussed at many City Council meetings and the council has gone on record as supporting the plan and agreeing to accept and administer the monies for building it if they are received. The council recognizes the problem of providing maintenance for the building and many questionaires and contacts have been made to determine whether the space rental available would be utilized and indeed provide the revenue necessary. Each organization contacted has asked for more space than when they were first contacted. If the money becomes available, a definite committment will be requested from the agencies requesting space before the building is begun. It is expected that the planned facilities would meet our needs for many years to come.

This center would do a great deal toward meeting some of the presently unmet needs in the Bristol Bay Region and it has regional support. We would, however, encourage your committee to support House Bills 781 and 782 rather than Senate Bills 507 and 508 because communities such as ours will surely need to include land value in order to provide matching funds.

Thank you for giving us the opportunity to provide input into this matter.

Sincerely,

Gordon W. Ryan

CITY OF DILLINGHAM

RESOLUTION NO. 77-6 - Regarding Proposed Regional Cultural Center

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF DILLINGHAM THAT SAID CITY IS A MUNICIPALITY DULY ORGANIZED AND EXISTING UNDER THE LAWS OF THE STATE OF ALASKA AND FULLY AUTHORIZED TO ENTER INTO THE FOLLOWING RESOLUTION:

WHEREAS, a preliminary plan for a Regional Cultural Center has been prepared as a result of an assessment of community needs, and

WHEREAS, several Alaska communities are proposing a State Bond issue in 1978 to secure funding for facilities of this kind, and

WHEREAS, in order to be included in the State Bond Proposal the local project must have the approval of the municipal authority, and

WHEREAS, the City Council recognizes that the need for such a facility exists in Dillingham and the Bristol Bay Region,

NOW, THEREFORE, BE IT RESOLVED:

1. That the City Council approves including the Dillingham Regional Cultural Center on the proposed State Bond Issue Ballot in 1978.

2. That the City of Dillingham agrees to accept the monies from such a bond issue and to arrange for construction of the building.

3. That the proposed plan may be modified to meet the needs of the area as they exist and will include a theater facility.

4. That the City will work toward choosing a building site for the facility.

5. That the City will be responsible for the operation and maintenance of the facility once it is built.

6. That the project will be built 3 or more years away and the City reserves the right to review the feasibility of this Regional Cultural Center and act accordingly.

APPROVED AND ADOPTED this 2 day of February, 1977.

Barbara S. Lowy
Acting Mayor

SEAL:

ATTEST:

Lou L Hermanson
City Clerk

PROPOSED REGIONAL CULTURAL CENTER

Rental Space Available in Plan "B" (Including that designated for library and day care center)	14,942 sq.ft.	Rental @ .85 sq.ft.	$152,408
Rental Space Available (Excluding library and day care center)	8,496 sq.ft.	Rental @ .85 sq.ft.	86,659
Estimate of need given by potential lessees (Does not include space needs of school)	20,950	Rental @ .85 sq.ft.	$213,690

Other potential users and uses:

Chamber of Commerce - Beaver Roundup Activities

Dillingham Arts Council - Concerts, workshops, craft sales.

Films - Projection equipment part of plan, good revenue source.

Local Drama Group - Talent shows, plays. Good alternative to alcoholism due to boredom.

Library - Possible school library here if placed close to school.

School Superintendent - Has suggested his office here, present space for classrooms.

Museum

Workshop areas- Could be utilized by native groups, school, Univ. of Alaska. This might also be a good alternative activity for community needs.

Convention Center - Could include handling of meals with kitchen facilities.

Local Potlaches and Banquets - Do not need elaborate kitchen, just essential things plus space for seating.

CITY OF DILLINGHAM

P.O. BOX 191 DILLINGHAM, ALASKA 99576

TELEPHONE (907) 842-5211 or 842-5212

BASIS FOR COST ESTIMATES

DILLINGHAM REGIONAL CULTURAL CENTER

SPACE ALLOCATIONS:		SQUARE FEET
Stage/Auditorium/Classrooms		7,665
Museum and Craft Rooms		2,399
Day Care Center		1,761
Rental Space		
Bristol Bay Area Health Corporation	4,000	
Bristol Bay Native Association	6,000	
University Extension Program	5,600	
Regional Resource Center	2,000	17,600
General and Miscellaneous		
Kitchen	207	
Conference/Banquet Room	1,540	
Boiler Room	1,216	
Mechanical Equipment	1,026	
Stairs and Elevator	464	
Corridors	6,600	
Toilet Area	540	11,593
TOTAL USEABLE SPACE		41,018
TOTAL AREA PER OUTSIDE DIMENSIONS		45,000

COST ESTIMATE FOR PLAN "B" (45,000 sq/ft @ $200/sq.ft) is $9,000,000.00

Current building costs in Dillingham vary but the recent school gymnasium which included no restroom facilities and minimum equipment cost $150/sq.ft. to build and equip. The estimate of $200/sq.ft. for the Cultural Center is intended to include all equipment.

The preliminary plan is subject to change of use areas to be determined by needs which may arise, but the major areas have remained unchanged since the original plan was drawn in 1975. The primary intent is to allocate enough space to meet community and regional needs and still allow enough rental space to provide income for maintenance of the building.

Gordon W. Ryan

GORDON W. RYAN
City Manager

REGIONAL CENTER INFORMATION

MAINTENANCE COST ESTIMATES:

Based on High School Maintenance costs for comparable space:

Electricity	$ 36,748.
Fuel	16,808
Custodial (2 @ $13,000)	30,000
Contracted Maintenance	16,562
Supplies	17,000
Manager	30,000
*Total	$ 147,118

*Does not include insurance. High school is currently paying $68,000/yr. Liability insurance would be needed if no other.

Comparison with Anchorage Historical & Fine Arts Museum:

They have 25,000 sq. ft. compared to our plan of 45,900 sq. ft.

1 Janitor @ $7.81/hr - $16,000+/yr.

All utilities including telephone - Pay a flat fee of $53,000/yr. to the Anchorage municipality since they are owned by the municipality.

Insurance - Part of overall municipality policy so did not know how much for this one building. Do have a fine arts floater @ $6,000 and Gen. Liability @ $6,700.

They hire 15 full time people plus a manager.

INSURANCE INFORMATION FROM DAWSON & COMPANY:

Their only rough estimate was $1 per $100 valuation or $90,000/yr but this could vary depending on what kind of sprinkler system, method of construction, etc. by at least as much as .25 per $1. This is also based on a $9 million value.

RENTAL RATES IN DILLINGHAM AT PRESENT:

BBNA is paying roughly .75/sq.ft. Regional Resource Center .65/sq.ft. Health Corporation is interested in 5,000/sq.ft. and did not feel .85/sq.ft. out of line for rent. Choggiung is not planning to include office rental space in their proposed building other than to the state.

SPACE RENTAL ESTIMATE OF PROCEEDS:

15,000 sq.ft @ .85 = $153,000/yr @ .75 = $135,000/yr @ .65 = $117,000/yr.

According to survey done, user groups would like more than the 15,000 sq.ft. presently allowed for rental space.

F: SB 507
2 SB 507-508

City and Borough of Sitka

P.O. BOX 79 · SITKA, ALASKA · 99835

March 16, 1978

Senator Joseph Orsini
Chairman, Senate Community and
Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

In reply to your letter of March 9, 1978, addressed to Mayor Grussendorf regarding Senate Bill 507 and 508, first we wish to advise you that we endorse HB 781 and 782 which provide two specific items not contained in SB 507 and 508. The House Bills allow for land to be used as part (or all if the land is valuable enough) of the cash match. We respond to the questions contained in your letter as follows:

1. The intercultural Arts Center would serve all the arts organizations and programs in the community. It would provide spaces for concerts, theater performances, dance companies (touring groups in modern dance, folk dance and ballet as well as our own New Archangel Dancers), choral concerts, school bands and choruses, local dance recitals, musicals, operettas, and the like. It would also provide a high security art exhibit room for both local and traveling exhibits. It would provide workshop and classroom space for people in the visual arts. Depending on its location, it would have daytime use by the colleges or public schools in the community and after school, evening, and weekend use by the community at large.

   Briefly stated, it would provide a home for the performing and visual arts programs in our community.

In the existing facilities, the only place where we can perform now is the Centennial Building. It is a convention center with a flat-floored auditorium and a "stage" 40 x 11. Speaker's platform is a better term. Although we have local productions and touring programs there, it is inadequate. There is no proper access to the stage; there are no dressing rooms or make-up rooms; there is no wing space. There is a room for art exhibits, but it is not high security, nor humidity controlled. Consequently, we can not have touring exhibits of any arts that are of any value. We can not have a full-sized symphony perform. We can not have a full performance by a ballet company. We can not have a professional theater company. Locally, we can not perform plays or musicals that require set changes of any involvement. The full high school band can not fit on the stage, so those performances are held in the high school gym where they can not be heard.

2. The total cost of the facility, if built by 1980 including site preparation etc., and 1% for Art In Public Places is $9,500,000. We would fund 10% of the costs providing Representative Duncan's bills are enacted.

3. The cost of operating the facility is estimated to be approximately $200,000 to $225,000 per year. The building income would come from regular users from the community (art groups and individual artists that might want to use the building on a regular basis), groups that want to use the building on an irregular basis (for example, for one dance recital a year or one performance by the Community Chorus), the schools that will use the building, convention groups that can not be accomodated by the Centennial Building, fund raising efforts for the building by the arts groups, grants from the State Arts Council, the National Endowment for the Arts, and private foundations, and municipal support.

4. We have two sites under consideration. The first site is comprised of two acres of land adjacent to Sitka High School and is owned by the municipality. The other site is comprised of 3½ acres of land on Sheldon Jackson College Campus. The Sheldon Jackson College site is available through a long-term lease.

5. The proposed facility is not listed in our community development plan, or capital improvements program. The question of whether or not to construct the proposed building will be put to the local electorate.

6. The road, sewer, water and power lines are already installed in the areas adjacent to the sites under consideration.

We are of the opinion that the proposed facility for Sitka will meet all the arts needs for the community (in terms of housing) not only for the next decade, but for years beyond that. The proposed building for Sitka may appear large now, but the needs of the future have been taken into consideration.

Very truly yours,

Fermin Gutierrez
Administrator

E: HB 507

Lynn Canal Community Players, Inc.

HAINES, ALASKA 99827

March 17, 1978

Joe Orsini, Chairman
Senate Committee on
Community & Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

The Lynn Canal Community Players, Inc. is one of the oldest little theatre groups in Southeast Alaska, having given its first production in 1957. By using one of the large unused buildings at old Ft. Wm. H. Seward, this group was instrumental in initially establishing a cultural facility in the Haines area during the Centennial year. However, this building is in sad need of renovation. The Alaska State Drama Festival takes place here every other year (1979 will be next) and present facilities are woefully inadequate.

We wholeheartedly support the proposed bond issue which will make facilities available to many other communities. Let us not let this opportunity slip by! These centers will have multiple uses, such as meeting rooms, convention centers, dinners, art shows and displays, and adequate facilities for visiting artists, both in the performing and visual arts fields. Alaska is attracting tourism--now a major industry. How much more could be done for the visitor were such centers in operation.

We support SB 507 as a good bill and urge your committee to give it a "do pass". However, we would urge an amendment to allow for local land match. This would go a long way toward making this proposal workable. We would also like to ask for the addition of an advisory committee, feeling that this is a necessary function to determine what communities are ready. We ask for your assistance on this proposal.

Sincerely,

LYNN CANAL COMMUNITY PLAYERS, INC.

Mimi G. Gregg

Mimi G. Gregg
Secretary

F: 52508

HAINES BOROUGH

P.O. BOX H
HAINES, ALASKA 99827

March 21, 1978

Joe Orsini, Chairman
Senate Community and Regional Affairs Committee
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Senator Orsini;

The Haines Borough is please to respond to your letter concerning SB 507 and 508, "An act authorizing state aid to municipalities for the construction and development of cultural facilities," and "An act providing for the issuance of general obligation bonds for the purpose of paying the cost of cultural facilities."

You are no doubt aware that 12 communities around the state have been involved for several years planning cultural facilities projects which could qualify under this legislation. These communities have an overall project coordinator, Mrs. Shirley Rediger, who has an office in Juneau. Her address is: Shirley Rediger, Coordinator, Cultural Facilities Development Committee, 127 South Franklin Street, Juneau, Alaska 99801. Telephone 586-6806

Mrs. Rediger will be glad to provide your committee detailed pre-hearing information on the Haines project, as well as all other projects currently active with the Cultural Facilities Development Committee. She has detailed site, use, cost, operating costs, and infrastructure support information on each project where planning has achieved this level of sophistication.

The Haines Borough, and the Cultural Facilities Development Committee are supporting HB 781 and 782 sponsored by Representative Duncan and others. These bills reflect the years of study which have gone into the project. Currently HB 768 and 769, submitted by Representative Parr are also under consideration. These bills do not reflect, on several critical points, the planning which has gone into this project.

It is most important to the participating communities that the value of real property put up by the sponsoring municipal government be usable as a match on the state grant funds which would be available. The matching percentage formula in SB 507 appears to be a good one. SB 507 fails to mention an Advisory Committee to the Department of Commerce and Economic Development which HB 781 does provide for. The reasoning in favor of the advisory committee will be presented to your committee during your hearings on the bill.

We are pleased that Senator Rodey's bill will be before your committee and we look forward to the hearings on the bill; our representative will be there to provide testimony.

Sincerely,

Raymond R. Menaker

Raymond Menaker, Mayor
HAINES BOROUGH

F: SB. 507
SB 508

KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

March 22, 1978

Chairman
Alaska State Senate
Community & Regional
Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Orsini:

Your letter to Mayor William Moran has been referred to the Ketchikan Gateway Borough Planning Department. Under City Resolution No. 1086 of December 15, 1977, the Community Center Steering Committee is the designated policy advisory Committee to the City Council on matters pertaining to the proposed Community Center. The Planning Department is providing technical assistance to the Community Center Steering Committee.

1) What specifically would be the use of the facility and what kinds of functions would be undertaken there which could not be accommodated by existing facilities?

The proposed facility will meet the theatre needs of the Arts Council, the gallery needs of the community-at-large, and special needs related to the arts. The theatre will be used for:

drama	by	First City Players and other groups
dance	"	Ketchikan Theatre Ballet and other groups
music	"	musical organizations and groups
meetings	"	community groups, visitors
lectures	"	community groups, visitors
education	"	Community College, school district, and other groups
films	"	Community College, film groups

Ketchikan does not have a theatre devoted to the performing arts and the Ketchikan Arts Council does not have priority use of any alternative spaces. The First City Players have used the High School auditorium, various taverns and miscellaneous structures for their performances. These facilities do not provide adequate opportunity for rehearsal, and they lack many basic theatre amenities. The High School

does not have a set shop, set storage area, or light grid. It seats 1,200 and cannot be subdivided for smaller crowds and personal performances. The largest tavern can provide seating for 200, but it lacks proper theatre amenities.

The Ketchikan Theatre Ballet has used the High School auditorium and the Totem Bight Council House for performances. The Council House stands 150 and lacks seating.

Despite the lack of facilities the First City Players and the Theatre Ballet maintain very active schedules. A typical year will contain 140 performances. Full documentation has been provided to the State Cultural Facilities Development Committee.

The gallery will meet a large variety of community needs. It can be used for: dinner theatre or theatre-in-the-round, active recreation, conventions, banquets, exhibits, and festivals.

Ketchikan does not have a large indoor multi-use space devoted to the public. There are four gymnasiums in the community: 2 public school gyms @ an average size of 8,850 sq. ft., (2 small multi-purpose rooms in primary schools), a small Coast Guard gym @ 3,000 sq. ft. and an Armory @ 7,500 sq. ft. There is no secured exhibit space available on a temporary basis. There are several medium size meeting rooms connected with service clubs, hotels and restaurants. The maximum seating capacity of any one meeting room is between 150 to 200 people. However, no adequate and efficient space for conventions and meetings of over 100 - 150 people is available.

The Armory has been used by the Arts Council for the annual art show and ball. The National Guard has jurisdiction over the facility and it has an increasingly limited availability to the public.

The Community Center will be designed to meet special needs of the community. There are no public or non-profit facilities in the community which adequately meet the demands of special interest arts, crafts, and recreational groups.

2) What is the total cost of the facility? How much would be locally funded?

The estimated cost of the facility is six million six hundred thousand dollars. $6,600,000. The City of Ketchikan has traditionally financed its share of public improvements. City of Ketchikan participation will probably depend, in part, on pending State legislation and we would support subsection f, page 3, of Senate Bill No. 507.

3) What do you anticipate the annual operation costs of the facility (maintenance, lights, heat, etc.) to be? How will funds be obtained to

meet these costs?

Operations Cost:

Director, receptionist, overhead	$50,000
Maintenance	20,000
Custodians (contractual)	15,000
Supplies	5,000
Insurance	10,000
Electricity	10,000
Heat (oil)	25,000
	$135,000/yr.

Revenue:

Performance Center	$10,000	Less than 50% of operations: income special summer tourism productions
Open Space	31,500	Less than 50% of operations: income from charges to private groups and athletic teams
Radio Station	5,000	Rent
Snack Bar/Lounge	15,000	Concession fees
Meeting Rooms and Special Use Rooms	26,000	Less than 50% of operations: charge to private groups Less that 50% operations: charge to classes
SUBTOTAL	$67,500	

Remainder - approximately $67,500 to be divided as follows:

Tax support	$22,500	City of Ketchikan (Parks & Recreation Department)
Subscriptions	22,500	Community-at-large, special interest groups
Bed Tax	22,500	Visitor Industry Levy
TOTAL	$135,000	

4) Do you have a specific site located for this facility? What is the land value of this site? Who currently owns the site? If not municipally owned, how will the site be obtained?

The first choice site is owned by Cape Fox Native Corporation. The land value is being negotiated between the City and the Corporation. Current appraisal is low but will rise when access and utilities are provided by the Corporation.

The second choice site is in mixed public/private ownership. The appraised value of the private property is $446,670. The site would be purchased by the City.

5) Is this facility included in the community development plan adopted by your community? Is this facility included in your community's adopted capital improvement program?

The 1977 O.E.D.P. Annual Report and Program Projection lists the community center as the number two development priority from a list of 12 priorities. There is no capital improvements program. These needs are met by the Comprehensive Plan and the Overall Economic Development Program report.

6) What additional infrastructure support will be required (roads, sewers, power, etc.) for the site? How much will this additional infrastructure cost for construction be? How will funds be obtained for these costs?

The first choice site is located on an undeveloped plateau close to the downtown business district. As part of the purchase agreement with Cape Fox Native Corporation, access will be constructed without cost to the City. The City might pay for the capital cost of installed utility equipment, but not for the installation. Part of these costs will be reflected in the negotiated purchase price.

The second choice site is located in the downtown area. The estimated cost for sewer and water lines is $3,350.

Over the next decade it is possible that the community center will be expanded. Detailed information about the community center including; needs documentation, site selection, public presentations, fund raising and preliminary specifications, have been filed with the State Cultural Facilities Development Committee. This information is also available from the KGB Planning Department. If you have any additional data needs, please contact me or Ron Wendte.

Sincerely,

Ira Winograd

KODIAK, ALASKA 99615

March 22, 1978

Senator Jo Orsini, Chairman
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Thank you for the opportunity to comment on Senate Bills 507 and 508. Listed below are the answers to questions in your March 9, letter.

1. A needs assessment was done by the Kodiak Chamber of Commerce to see what kinds of activities could be utilized if a facility were built. The primary activity is a 500 seat theater. At the present time, the city's only facilities for cultural activities and large group gatherings for public purposes are the Elk's Club, High School and Jr. High School gymansiums, as well as the Borough Assembly Meeting Room. None of these are considered adequate for meetings of 100 people or more.

The Kodiak Russian Dancers and other similar cultural groups find it very difficult to utilize any of the above mentioned facilities. With a 500 seat theater we would be able to attract many new cultural and civic activities into the community, as well as better serve the public with the types of activities that are now occurring.

In relation to the Community College, this new facility would provide classrooms for art instruction and drama. This is a current need for the Kodiak Community College. And is one of the reasons they are looking at giving us a piece of land.

2. The total cost of the facility is in the neighborhood of four million dollars. We have approached the University of Alaska regents to obtain a piece of land at the Community College campus, which is located in the City limits. At the present time, we are looking at about six acres which includes parking. Local funding is questionable, depending on the requirements of the legislation and the operation and maintenance costs. The City of Kodiak does not have any funds currently available in which to provide a local match.

3. The annual operating costs of the facility are approximately one hundred thousand dollars. These funds can be raised in several different ways. One, of course, is to charge for the use of the facilities. This would include conventions

and others from inside and outside the community. Another way would be to charge a hotel tax, that revenue could be earmarked specifically for the cultural facility maintenance fund. This tax would be collected by the City of Kodiak.

4. As mentioned above, the specific site we are now looking at is located at the Community College. We do not have the current value of this site, however, this information will be provided as soon as it is available. The site is now owned by the State of Alaska and we are trying obtain it from the Regents. In preliminary discussions with the University, they are quite interested in the land donation, as this facility would be utilized by the college as well. The last we heard this request will be taken up by the regents at their next meeting in the early part of April in Juneau.

5. The Community Development Plan is now being revised by the Kodiak Island Borough planning commission. This facility will be in that plan. For the 1978 fiscal year, the City of Kodiak will have the cultural facility in its capital improvements program. In addition, this type of facility has been mentioned as a priority item in the City's overall economic development program.

6. Depending on the specific location of the facility, we should have sewer, roads and water to the site provided by the City of Kodiak. If funds were not available from the project, the City of Kodiak would consider providing the necessary infrastructure, however it depends on where the ultimate site is.

If you require any additional information, please feel free to call on me at your convenience.

Very truly yours,

KODIAK AREA CHAMBER OF COMMERCE

KACC

SENATOR JOE ORSINI, CHAIRMAN
COMMUNITY AND REGIONAL AFFAIRS COMMITTEE
POUCH V
JUNEAU, AK.
99811

March 22, 1978

Dear Senator Orsini:

As a member of the Kodiak Cultural Facilities Committee, the Chamber sent questionaires to thirty organizations in Kodiak. These questions were as follows:

1. Would you use a center?
   Answer: Yes

2. How often?
   Answer: As often as we have meetings.

3. How often do you hold meetings?
   Answer: From six to twenty per year.

4. What type of organization?
   Answer: School, church, fisheries, canneries, Borough, City, Coast Guard, etc.,

Senator, the entire community of Kodiak is behind this project and the need is of a desparate nature.

Kodiak does not at this time have a place to hold meetings and functions. The use for a cultural facility in Kodiak is endless.

We now have the Elks Lodge and the Junior High School Gymnasium, neither of these are adequate.

Kodiak is a very rapidly growing community and a cultural facility is a very needed addition to support that growth.

I could continue with the need, however, in the interest of not be laboring the point, let me say that words are not adequate to express the true need for a Kodiak Cultural facility, therefore we respectfully request your able support.

Sincerely yours,

The Honorable Joe Orsini, Senator
Chairman, Senate
Community & Regional Affairs Committee
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Joe:

I am responding to your letter to Mayor DeVaney regarding Senate Bills 507 and 508. We certainly see the merit of these bills and enthusiastically support them. We definitely would wish to be included and named in the bill's roster of proposed recipients.

Our needs at the moment would be minimal, indeed, in comparison to the requests of other communities, but no less important or redeeming.

As you might be aware from your involvement in our community planning we have been attempting to restore the old bishop's rectory in Unalaska, which was built in 1882 for Bishop Nestor and partially destroyed by fire in 1957. It is the community's intent to utilize this very important site of community heritage as a museum and repository of Aleut culture not only for the Unalaska area, but the entire Aleut Native region.

This edifice served as the residence of Orthodox Bishops, priests, and teachers for several decades. It became the center of Russian school activities at Unalaska and prior to its devastation by fire, was contiguous to the rectory. A major portion of the rectory was saved. The house is built of California redwood and contains the fine lines and beauty of 19th century homes. It is our intent to restore the building as closely as possible to its original architecture.

We have proceeded as far as our meager funds would allow and at least have it weatherproofed now. It is our estimate that to complete its restoration, landscaping, and furnishing the building for museum purposes with repository containers and fire safety mechanisms would require $100,000.

Again we support Senate Bills 507 and 508 and request our inclusion in the amount of $100,000. at its inception. I wish to personally thank you, Joe, for thinking of our community and enlightening us on this worthwhile piece of legislation.

Most sincerely,
City of Unalaska

Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

Mayor Poor has asked me to repond to your letter regarding Senate Bills 507 and 508. I have answered point by point.

1. Be used for all school and community gathering including school assemblies, theatre productions, school and community concerts, medium size conventions (350 seats) and art display area.

2. It is estimated to be $3.4 million based on 1980 costs. At present time the community has agreed to provide the real estate for the facility. The plans have been paid for and funds are available for completion of schematic drawings.

3. It is estimated that the maintenance costs will vary between $22-28,000 annually depending on use. Funds would have to be generated from use of hall and the school district.

4. Yes. $12,000, The City of Cordova.

5. No, however, the comprehensive plan was published February 1976 and the cultural center plan was not developed until November 1976. It is not in the Capital Improvement Program.

6. Parking lot would help but available space other than the school parking lot and adjacent on street parking is all that would be available without condenmation and removal of existing structures. No price tag for this is available at this time.

The Arts and Pagents, Inc. Board feels that this facility would provide adequate home for visual and performing arts for the next decade.

We appreciate the opportunity to respond to your inquiry.

Very truly yours,

Perry D. Lovett
City Manager

OFFICE OF THE CLERK

March 30, 1978

Honorable John L. Rader
President of the Alaska State
Senate
Pouch V
Juneau, Alaska 99811

Dear John:

This is to inform you that the Ancherage Municipal Assembly, following review, formally endorsed and encourages support of the following legislation:

CS for SB 471 - an Act relating to Annual Motor Vehicle Registration

HB 781 - an Act authorizing state aid to Municipalities for the construction and development of Cultural Facilities

HB 782 - an Act providing for the Issuance of General Obligation Bonds in the amount of $30,106,900 for the purpose of paying the cost of Cultural Facilities; and providing for an effective date

The Assembly formally voted its support of this legislation on Tuesday, March 28, 1978.

It would be greatly appreciated if you would inform all members of the Senate of this action.

Sincerely,

Phyllis Ellen Banks

CITY OF HOMER

HOMER, ALASKA 99603

March 30, 1978

Senator Joe Orsini, Chairman
Community & Regional Affairs Committee
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Senator Orsini;

I am in receipt of your letter of March 14, concerning Senate Bills 507 and 508 and my response is contained herein.

The City of Homer is presently planning a Community Center Complex, a total design concept which is desperately needed and applicable, in part, to the intent of these Senate Bills.

The Center will include such facilities as a Performing Arts Theater and the Homer Museum. Certainly these facilities are very much culturally oriented, and as such would be eligable for participation in the cultural facilities program.

Preliminary planning indicates that the Performing Arts Theater (which would also function as City Council Chambers) should be a minimum of five hundred seating capacity, and being of sufficient design to accomodate future expansion. A seating capacity of this size is expected to require a 7,500 square foot facility. Estimating costs of $100.00 per square foot reflects total costs of $750,000.00 for this proposed facility.

The existing Homer Museum comprises some 4,800 square feet. Last year some 22,000 visitors enjoyed the exhibits there, and this type of public facility can only be expected to increase in use. However, this existing facility can not be expanded due to the limitations of the property dimensions without costly appropriation of funds to purchase adjacent property. Additionally, the total "community use" concept of a Community Center dictates that this type of facility be included within the Center. It is anticipated that 5,000 square feet, with appropriate facility design to accomodate future expansion, will be sufficient. At an estimated cost of $ 100.00 per square foot, total costs of $500,000.00 are realized.

Hence, participation by Homer for this cultural facilities program would be $1.25 million.

I appreciate your concern for our community and thank you for the opportunity to express our needs for cultural facilities.

Sincerely,

Gary Williams

Senator Orsini:

We received a phone call from Nome today, from Lynn Chambers and Leo Rasmussen, asking us to pass on the message to you that, in answer to your letter to Mayor Rasmussen, yes, they do want to be included in the Cultural Facilities monies.

They want 5.63 million for a Cultural Center in Nome for the Northwest Alaska Region.

Leo Rasmussen is following up this message with a letter to you.

Dear Senator Orsini:

The council took action on R-78-4-3 in regard to SB 507 and 508.

We are requesting that we be included in these bills for an amount of 5.63 million dollars to provide for construction and development of a cultural facility for the City of Nome. I appreciate your letter noticing us of this legislation and I hope that we can be included in the final makeup of this bill.

Also included is R-78-4-6 speaking to Representative Nakak's HB 260 to provide for a port facility. I would appreciate your consideration when it comes to the floor.

Sincerely,

Leo B. Rasmussen

Dear Mayor Rasmussen:

Senate Bills 507 and 508 authorizing state aid to municipalities for the construction and development of cultural facilities have been referred to this Committee for review and consideration. (Copies of the bills are attached for your information).

At this time, the Committee is aware of twelve Alaskan communities which have proposed slightly over $72 million in cultural projects under the provisions of this legislation introduced by Senator Pat Rodey. They include Dillingham ($9 million), Cordova ($3.4 million), and Petersburg ($3.5 million). Since your community was not one of those listing plans for cultural facilities, I would appreciate your reviewing the attached bills and notifying the Committee if your community would wish to participate in the cultural facilities program, assuming it is approved by the Legislature.

I would also appreciate any other comments or suggestions you might have on the proposed legislation.

Sincerely,

JOE ORSINI

R-78-4-3

A RESOLUTION SUPPORTING AUTHORIZATION BY THE STATE OF ALASKA FOR THE CONSTRUCTION AND DEVELOPMENT OF A CULTURAL FACILITY PROGRAM FOR THE CITY OF NOME IN THE APPROXIMATE AMOUNT OF $5,630,000

WHEREAS, the Alaska State Legislature is currently seeking input from Alaska communities concerning Senate Bills 507 and 508, and

WHEREAS, these Senate Bills are concerned with establishing within the Department of Commerce and Economic Development a cultural facilities development fund for the purpose of providing state assistance in the construction and development of cultural facilities within those municipalities which actively provide support to the arts and humanities,

NOW THEREFORE BE IT HEREBY RESOLVED BY THE COMMON COUNCIL OF NOME, ALASKA that the City of Nome support the authorization by the State of Alaska for the construction and development of a cultural facility program in the approximate amount of $5,630,000.

SIGNED and DATED this 10th day of April, 1978, at Nome, Alaska.

Leo B Rasmussen

Leo B. Rasmussen, Mayor

ATTEST:

Jean E. Hardy

Jean E. Hardy, City Clerk

NOME REGIONAL CULTURAL CENTER*

In response to a letter from Joe Orsini, attached, the following rough plan was put together by Lynn Chambers, of the Nome Eskimo Community, with planning assistance from:

Caleb Pungowiyi, BSNA
Tom Ellanna, Kawerak
Jerry Trigg, Sitnasuak
John Pollock, King Island Native Corporation
Charles Kokuluk, King Island IRA Council
Ray Penetac, King Island IRA Council
Jeanette Morton, Nome Museum/Library Committee
Caroline Reader, Nome Historical Society

The purposes of the cultural center will include:

1. To research, record and revive the regional Eskimo Cultures.
2. To foster Eskimo visual & performing arts.
3. To foster contemporary visual & performing arts.
4. To collect, house & display artifacts of the region.
5. To research & record the gold mining history of the region.
6. To research & record the western whaling activities of the area.
7. To research, record, and promote the City of Nome's history.

The space requirements are approximately:

Auditorium (includes stage, back-stage)	6000 sq. ft.
Museum display area	3500 sq. ft.
Museum workshop/storage	2000 sq. ft.
Visual Arts Workshops	2000 sq. ft.
Sled & boat building	1000 sq. ft.
Kitchen - Eskimo food preparation & recipe writing	500 sq. ft.
Antro/Historical Research	800 sq. ft.
Conference room	300 sq. ft.
Office space	1000 sq. ft.
	17,100 sq. ft.

Calculating construction costs at $300 per sq. ft. (approx. school construction costs of $250 plus $50 to include furnishing) the cost of construction of the cultural center would be approximately $5,130,000., plus an acquisitions budget of $500,000, for a total of $5,630,000.

Funding for future acquisitions, the cities 10% of construction costs, maintenance and operation of the facility, could be handled by a non-profit corporation now in the organization stages, under the direction of Lynn Chambers and the planners involved in this report. The non-profit corporation is planning to apply for a

*needs a name

planning grant, most likely from the Rockerfeller Foundation. Those funds would be used to hire a fund raiser for the Center, to work full-time raising funds. Application to the Rockerfeller Foundation will be made as soon as Articles of Incorporation are filed with the State and the IRS 501 (c3) exemption status is granted.

CULTURAL CENTER

What the Center will include:

- activity centers for
  - story telling, reading & writing
  - traditional arts workshop
  - contemporary arts workshop
  - food preparation & recipe writing
  - anthropological studies
  - historical studies
  - preforming arts
  - dog team, sled building, harness making
  - boat building
  - eskimo medicine
  -
  -
  -
  -
  -
- old style houses from different areas on Seward Peninsula
- Kazghi, to use as story telling center
- Arts & Crafts sales shop
- collect artifacts
- auditorium
- mounted animals displayed
- collect present day tools, cloths, equipment
- museum to include past & present
- develop media programs
-
-
-
-
-

What the Center will do:

- collect stories, legends, history
- sponsor exhibits of
  - traditional arts
  - artifacts
  - sponsor carnivals especially at Christams
  -
  -
  -
  -
  -
  -
- sponsor special art classes
- sponsor contests
- reproduce artifacts (making replicas) for sale
- artists - in - residence
- revive old ways - including medicine man
- classes scheduled in each activity center
- sponsor special demonstrations by visitors from out of town & residents
- sponsor tourist attraction programs
-
-
-
-

How the Center will do these things:

- provide space
- hire staff to include
  - director/curator
  - anthropagist
  - historian
  - arts-in-residence
  - lay-instructors
  - clerical staff
  - grant writer
  - co-ordinator-of-activities
  - security
  -
  -
  -
  -
  -
- locate funding for special activities
- volunteers
- CETA
-
-
-
-
-

Cordova, Alaska 99574

Dear Mayor Poor:

House Bill 781 ("An Act authorizing state aid to municipalities for the construction and development of cultural facilities") has been referred to this Committee for review and action. A copy of the bill is attached for your information and review.

House Bill 781 is the House version of Senate Bill 507, in which we have had previous correspondence with your office. HB 781 has been amended by the House Finance Committee, with additions not previously included in the other proposed legislation.

In the Committee Substitute version, two additions have drawn our attention:

(1) Page 6, lines 10 and 11: "for purposes of this section, a cultural facility may be considered an educational facility"
This inclusion of educational facilities appears to greatly broaden the scope of the legislation. Your input and proposals concerning educational facilities to be included would be appreciated.

(2) Page 6, lines 22 through 29; and page 7, lines 1 through 20: establishing an Advisory Commission on Cultural Facilities, membership as recommended by the State Council on the Arts.
This new commission would assume design and financing responsibility and authority. Because of the range of responsibilities of the proposed commission, this Committee would very much appreciate your comments.

Due to this late date in which the legislation has been referred to this Committee, it is very necessary that we receive your input and comments quickly. There is great interest in passing the legislation out of Committee, but we are also concerned that your community's needs are met.

We would also appreciate any other comments or suggestions you might have on the proposed legislation.

Sincerely,

Joe Orsini

DATE: June 7, 1978

FILE NO. HB 781

SUBJECT:

Honorable Joseph Orsini, Chairman
Senate Community Regional Affairs Committee
Pouch V - Capitol Building
Juneau, Alaska 99811

Dear Senator Orsini,

Your letter of June 5, 1977 to Mayor Overstreet has been referred to my office for a response. The municipality is pleased that your committee still has CSHB 781 (Fin.) under active consideration. We offer the following comments in response to the two questions you raise in your letter.

First, as to the addition of the language relating to the facility being considered an educational facility, it is my understanding based on a conversation with the prime sponsor that this language was added to insure that the Haines Borough would be able to construct a cultural facility under its limited third class borough powers. This purpose could be clarified by inserting the phrase "in a third class borough" before the semi-colon in line 11 on page 6 of the bill.

As I read the section relating to the Advisory Commission on Cultural Facilities, the State Council on the Arts would merely provide a list of candidates to the Governor, and it is the Governor who would actually appoint the members. Also, the committee is strictly advisory and has no responsibility or authority for design or financing. It is there to assist the community in conducting its needs assessment and to review and comment on local proposals, if the community requests such assistance. In addition, the committee would advise the commissioner on construction assistance requests. Design and financing responsibility and authority would remain with the muncipality but be subject to approval by the commissioner. We have no objection to the creation of an Advisory Commission such as the one proposed in CSHB 781 (Fin.). It is substantively the same commission as was proposed in the bill as introduced with the addition by House CRA Committee of the duty to assist those municipalities requesting assistance.

We urge the committee to hold a hearing on the bill at the earliest possible date and to refer this bill and an appropriate bonding measure out of committee with a favorable report.

Very truly yours,

Gerald L. Sharp
City/Borough Attorney

BACKGROUND:

A state wide hearing conducted by the Alaska State Arts Council in 1974 revealed a crucial needs for cultural facilities in most Alaskan communities.

A direct resultant of this hearing was the formation of a state committee. This committee developed the concepts and found funding for a Theater Development Project, a unique experiment in a community arts planning. An appropriation of 68,000 from the Alaska Legislation, 10,000 grant from the National Endowment For The Arts, and 5,000 from each participating municipality was secured. This funding allowed communities to hire consultants and technicians to implement the planning process. For the most part, communities used the services of Eldon Elder Associates, Inc., 27 West 67 Street, New York, New York 10023.

The plans developed for each community are available under separate cover. A typical report of the planning and research in each community includes the following:

History of the Project
Community Characteristics
Plan Development
Cost of Project
Site Selection
Recommendations for Future Action

At the present time the Cultural Facilities Development Committee has engaged a part time executive to assist the committee is compiling the data necessary to promote and implement a bond issue which will provide the funds necessary to build these Cultural Facilities.

This is a brief outline of the Cultural Facilities Development for your initial review.

However, detailed data available by November 1st on these facilities will include:

1. Comprehensive report from Eldon Elder Associates or other theater consultants. (see sample book attached)

2. Summary statement of the facility: purposes for which it will be used; why it is needed; what benefits will accrue the community; how maintenance staffing and programming for the facility will be financed.

3. Summary of physical layout: space allocations, dimensions and schematic drawings, if possible.

4. Site acquisition: a copy of written agreements where applicable.

5. Cost breakdown: architect's and engineer's fees, equipment, parking, inflation (1979-80 construction target dates) 1% construction cost for art works.

6. Official letter or resolution from municipality to show municipality's willingness to administer funds for construction and management of facility (if appropriate).

COMMUNITIES INVOLVED IN THEATER DEVELOPMENT PROJECT

~~Eleven~~ Twelve communities have been involved in planning for a cultural facility. The communities are as follows:

Anchorage	Naknek
Angoon	Petersburg
Cordova	Sitka
Dillingham	Skagway
Haines	Juneau
Ketchikan	Kodiak

BRIEF SUMMARY DESCRIPTION OF EACH FACILITY

ANGOON: Contact Person

Maxine Thompson
City Clerk
P. O. Box 189
Angoon, AK

This cultural facility will be called the Living Museum. Its primary purpose will be to serve as a museum for the artifacts owned by the community.

The building will be fireproof which will maximize the security of the art objects. Local clans and individuals may deposit their artifacts in this facility for safe keeping and may check them out to use for dancing, pay-off parties or other Indian activities. Another facet of the proposed facility will be space and equipment which can be used for cultural arts activities, particularly, Tlingit dancing, movies, speakers, lectures and so on. It is felt that this building will be great asset in developing tourism.

The building is 2,000 square feet of space and will cost $500,000. City land will be used and the City will own the facility.

Phone 278-1558

Anchorage's cultural facility will be part of the Anchorage Center, a complex for cultural, recreational, community and convention activities. The need for an Arts facility has been defined by the Mayor's Advisory Committee. 138 groups performed in Anchorage in 1975 and an estimated 250 groups performed in 1976. The existing facilities cannot accommodate the demand for space. It is felt that an arts facility would greatly enhance the ability of the local groups, such as the Civic Ballet, Civic Opera, Symphony, Community Chorus and Community Theater to offer more and better quality performance to Anchorage residents.

The Cultural Facilities Development Committee has budgeted 25 million for this facility.

CORDOVA: Contact Person

Chris Putnam
P. O. Box 518
Cordova, AK
Phone 424-7369

The proposed building in Cordova -- The Cordova Arts and Humanities Center, is conceived as a facility available for use by schools, the community, and outside groups for performances and other purposes. The primary use of the building will be for a 350 seat theater with a secondary use as an Arts and Crafts school and show area. Cost of facility $3,420,000.

DILLINGHAM: Contact Person

Dorothy Anderson
P. O. Box 234
Dillingham, AK
Phone 842-5302

A multi-purpose cultural facility is being planned for Dillingham. This building will have many functions including performing arts, day care center, community education, radio broadcasting and university extension courses.

Dillingham is the center of a 10 village community and this facility will serve the entire regior as well as the village of Dillingham. The cost of the facility is 9 million. The city of Dillingham agrees to own the facility. A site is available for this building.

HAINES: Contact Person

David Y. Nanney
General Delivery
Haines, AK 99827
Phone 766-2763

The city of Haines is renovating and expanding the Chilkat Center for the Arts. The Chilkat Center for the Arts is an historical building renovated in 1967. The proposed renovation and improvement program will provide much needed equipment and space to insure that a complete facility which will meet the needs of the community will exist in Haines. This will include renovation of heating and plumbing systems, improved building insulation and fire protection, renovation of second floor space to a multippurpose social center and rehearsal room, expanded lobby and display space, construction of a new wing to house shops, dressing rooms, storage areas, and new mechanical equipment and improvements to lighting and sound equipment. Cost of project is $1,474,614.00

KETCHIKAN: Contact Person

John W. "Jack" Shay Jr.
P.O. Box 3159
Ketchikan, AK 99901

Ketchikan is developing a plan for a multi-purpose cultural facility that will implement furthering both the performing and the visual arts in a manner that will enhance the artist and his work, the cultural opportunities of the local community and the interests and needs of visitors to Ketchikan. A 400 seat theater is planned. Basic structure will be approximately 15,320 aquare feet. Total cost of project is $6 million.

JUNEAU: Contact Person

Jane Stewart
925 Calhoun
Juneau, AK 99801
Phone 586-1220

Juneau will be building a Performing Arts Center. This proposed new center will contain 5900 square feet of floor space. A medium size theater capable of holding 700 to 750 people and a smaller flat floor "forum" with retractable theater seating capable of holding 20 to 250 persons for meetings and cultural presentations. The building also would contain a scenery workshop, costume workshop, a crafts shop for local artists, dressing rooms, rehearsal halls, a performer waiting room (green room), besides office space and radio and future television operations. Projected cost of this facility is $12.3 million.

KODIAK: Contact Person

Gerald C. Wilson
P.O. Box 1792
Kodiak, AK

The Kodiak Community Center will be a round type construction quite similar to the center in Fairbanks. It will be used by every people-oriented organization in Kodiak for art, dance, craft, theater workshops, meetings, crab festivals, state activities, conventions, meetings, education, fisheries oriented businesses, U.S. Coast Guard functions. Kodiak growth makes the Community Center essential to the community's survival. Projected cost is $4 million.

NAKNEK: Contact Person

Anita Erickson
Box 136
Naknek, AK 99633

A community cultural center museum is proposed in Naknek. This will be a single story 8 room building with 2,152 total square feet. This facility will provide a focal point for local cultural programs. Artists could arrange displays and instruction sessions using the facilities. By viewing museum exhibits, visitors to the area could obtain an idea and an appreciation of the transition in life styles that has ocurred locally in recent time. At the present time the oral history program and the collection of historical objects are stored in a Bristol Bay Borough school building.

The shortage of storage space in the school may force these accumulated historical materials to be stored in private homes.

The cost of this building will be ~~$500,000~~. 400,388.

PETERSBURG: Contact Person

Syd Wright
Petersburg High School
P. O. Box 289
Petersburg, AK 99833

The proposed Petersburg Fine Arts Center has a 350 seat theater with supporting rooms, a lobby arts and crafts display area, an arts and crafts room and space for the local FM radio station. This theater will be built on school property. The proposed facility will be a community center and open to use by everyone. The maintenance, staffing and programming will be carried out under the existing school administration structure with the possible addition of a part time technical theater person. The cost of proposed project is $3,549,910.

SITKA: Contact Person

Jan Craddick
P. O. Box 678
Sitka, AK 99835
Phone 747-8581

The proposed Intercultural Arts Center in Sitka is a 68,000 square foot arts center which has been designed to house both the performing and visual arts. The center spaces will include a 750 seat procenium theater, 250 seat arena where productions can be staged in-the-round, a high security art exhibit area, two low security areas for art displays, a community crafts workshop, scene and costume shops, a green room and office spaces. Most if not all of these spaces can be used for a variety of functions. The theater can be used for dramatic and musical productions, for conventions and for public meetings. The arena can also house conventions, and when its bleacher seating is folded back can serve from a caterer's kitchen, 200 in a banquet setting.

The projected construction and equipment cost for the facility is$9.5million (if the building is completed in 1980) as opposed to $7 million if it were built today.

SKAGWAY: Contact Person

Diana Cates
President, Skagway Arts Council
P. O. Box 116
Skagway, AK 99840

The initial plans for performing arts facility in Skagway were to renovate the old railroad depot. The railroad building would be remodeled to accommodate a theater/auditorium, office/exhibition center. Since this building is owned by the U.S. Department of Interior National Park Service, a cooperative joint effort with the city has been attempted. However, at this point in time, the National Park Service has taken the position that the plans conceived by the theater consultant, Eldon Elder are too ambitious and may be in conflict with the National Historical Preservation Act (Section 106)

Since the Skagway community and the Park Service are in an apparent "stalemate" position at this time, the Skagway Performing Arts Center will not be included in the bond package, unless the difficulties are resolved in the next 30 days.

THE AMERICAN LEGION - DEPARTMENT OF ALASKA

P. O. BOX 250 JUNEAU, ALASKA 99802

January 21, 1978

Resolution passed by the Department Executive Committee
at Haines, Alaska

RESOLUTION NO. 78-3

WHEREAS, It is recognized that the existence of adequate cultural facilities in Alaskan communities is of direct benefit to the economy and quality of life in such communities; and

WHEREAS, The educational and cultural programs made possible by such facilities have been proven to be a determent to crime and social deviance; and

WHEREAS, Legislation is now being proposed to provide state matching funds for the construction of such facilities; now, therefore, be it

RESOLVED, That The American Legion, Department of Alaska, in Executive Committee Meeting assembled in Haines, Alaska on January 21, 1978, supports in concept the proposed legislation to implement, by law, State of Alaska matching grant funds to communities which qualify for justified cultural facilities and projects; and be it further

RESOLVED, That The American Legion urges the Legislature of the State of Alaska and the Governor to act favorably on the legislation so that a bond issue for first increment funding can go before the voters of the State in November of 1978; and be it further

RESOLVED, That copies of this resolution be sent to each member of the Alaska Legislature and to the Governor of Alaska.

Assumptions:

1. Personnel Services

   One Professional person, a Capital Improvement Project Coordinator (range 20) will be required. This position will:

   a) establish an inclusive application process
   b) work closely with each community which applies for cultural facility funds
   c) administer the grant program
   d) oversee the engineering and architectural work and;
   e) prepare the financial package to go to bid.

   (Salary $2,296 per month, plus benefits of $567 per month.) $34,356

   In addition, one clerical person working half-time will be required. Clerk Typist III (range 8) for correspondence, filing, etc.

   (Salary $546 per month plus benefits of $169 per month.) $8,580

2. Travel requirements are estimated at 12 trips @ $300 per trip (per diem included in estimate). These trips will be required during the application process, to meet with the cultural coordinating committees over architectural designs and engineering estimates and during the early stages of construction. $3,600

3. Contractual

A.	Rent - 250 feet^2 @ $1.25 per feet^2/month	$3,700
B.	Telephone, communications	1,000
C.	Postage, etc	300
D.	Printing and advertising	1,000
E.	Professional fees and services..	1,200

4. Commodities

   Office supplies..... 300

5. Equipment

   Desk, chair, file cabinet, calculator..... 1,500

After FY '79 - Inflation estimated @ 6% per year

Equipment and advertising - larger expenditures required first year.

Total $53,356.00

SUGGESTED AMENDMENT TO HB886, TO PROVIDE EQUAL-POPULATION OF BOROUGH (IN COMPUTING LIMITATION ON STATE FUNDS) IN CASES WHERE ORGANIZED BOROUGHS CONTAIN ONE OR MORE CITIES WHICH QUALIFY AS MUNICIPALITIES.

INSERT THIS NEW PARAGRAPH AT THE END OF SECTION AS.17.20.010(A), AS PART OF SUBSECTION (A)

OUTER BOROUGH, HOWEVER, EQUAL-POPULATION OF ANY POPULATION GROUP IS PROHIBITED. IN CASES WHERE AN ORGANIZED BOROUGH CONTAINS ONE OR MORE CITIES WHICH QUALIFY AS MUNICIPALITIES, THE LIMITATION ON TOTAL GRANTS FROM THE BOROUGH AND TO THE CITIES THEREIN SHALL BE COMPUTED BASED ON THE TOTAL POPULATION WITHIN THE BOROUGH, SO THAT PERSONS RESIDING BOTH IN THE BOROUGH AND IN A CITY THEREIN SHALL BE COUNTED ONLY ONCE. THE TOTAL AMOUNT DISTRIBUTED THUS OBTAINED SHALL BE APPORTIONED AMONG THE BOROUGH AND THE CITIES WITHIN IT, FOR ANY CALENDAR YEAR, IN THAT PROPORTION WHICH THE ANNUAL OPERATING BUDGET FOR THE MUNICIPALITY (EXCLUSIVE FUNDS FOR EDUCATION PURPOSES) BEARS TO THE TOTAL OF THE OPERATING BUDGETS FOR ALL OF THE MUNICIPALITIES IN THE BOROUGH (EXCLUSIVE THE BOROUGH ITSELF (EXCLUDING FUNDS FOR EDUCATION PURPOSES) FOR THE SAID CALENDAR YEAR. REPORTS

[illegible]

SB 507
SB 508

SB 781: AN ACT AUTHORIZING STATE AID TO MUNICIPALITIES FOR THE CONSTRUCTION AND DEVELOPMENT OF CULTURAL FACILITIES, and
SB 782: AN ACT PROVIDING FOR THE ISSUANCE OF GENERAL OBLIGATION BONDS IN THE AMOUNT OF $30,106,000 FOR THE PURPOSE OF PAYING THE COST OF CULTURAL FACILITIES; AND PROVIDING FOR AN EFFECTIVE DATE.

These two bills would authorize the State to assist municipalities in the development and construction of cultural facilities through grants from a proposed "1978 Municipal Cultural Facility Fund". Because of the obvious need for cultural facilities in Anchorage, the Municipality of Anchorage supports this bill.

Sydney Laurence Auditorium and West High School Auditorium with respective seating capacities of 650 and 2,000 are the two primary performing arts facilities in Anchorage, and the Visual Arts Center is the only primary visual arts facility in Anchorage.

All three of these primary arts facilities are overused during the peak use period between January and April. Five different performing groups will want to reserve the same date for a performance at Sydney Laurence Auditorium or West High School Auditorium. Because the number of rehersals exceed performances by a 7 to 1 ratio over actual performances, the usage problem for performing arts facilities is critical. Those performing groups fortunate enough to reserve a date at the primary facilities must often reherse at cramped and wholly inadequate secondary facilities, and the performing groups not so fortunate must both perform and reherse at such secondary facilities. The fact that the Visual Arts Center is overused is obvious because it is used daily-Sunday through Saturday-52 weeks a year.

All three primary arts facilities are also inadequately equipped. Sydney Laurence Auditorium has inadequate lobby and box office and dressing room space. It has no shop and storage space and its audience floor is not sufficiently raked; therefore, sight lines are obscured. The stage, backstage, and storage space at West High Auditorium are all too small. It has no shower facility. The acoustics there are a problem, and the lighting and sound equipment is dated. Because the Visual Arts Center was originally designed as the Alaska Centennial Building, it is even more inadequately equipped than the other two primary arts facilities. It is overcrowded.

It lacks adequate lighting in the gallery and professional studios. It lacks adequate heating, and it has no special storage areas with technical consideration for art collection, unpacking shows, stone and other bulk materials.

Anchorage has become a remarkably prolific town for community artistic activities. It is much more active in this regard than other cities of identical size throughout the United States. Such interest deserves attention; the Municipality therefore urges action on HB 781 and HB 782 consistent with our needs.

March 7, 1978, Anchorage Times

Downtown Group Explores Proposals Of Breakthrough

A multi-million dollar improvement package for Anchorage was explained by Breakthrough officials and explored by the Downtown Anchorage Association last night.

Breakthrough, a volunteer citizens' group, developed the recommendations for improvements in community facilities, roads, mass transit, parks and other areas over a year of study. The improvement package totals about $750 million in projects over the next five to seven years, the group's chairman said last night.

The group hopes to fund the local share of that package through a $126 million bond election tentatively planned for May 23.

Chairman Max Hodel said Breakthrough representatives will appear at as many community and organization meetings as possible over the next few weeks to air the improvement recommendations.

Also on hand for the meeting at the Anchorage Westward Hilton Hotel last night were Anchorage Assembly members Dave Rose, Arliss Sturgulewski and Tony Knowles and Municipal Manager Doug Weiford.

Breakthrough anticipates that most of that $750 million improvement package will be footed by state and federal sources, with the local share, after grants, to be about $250 million. The group hopes to cut that figure in half with a bill to be introduced in the Legislature calling for 50 percent state support of municipal capital improvement projects in cities across the state.

The group has proposed a special bond election May 23 on nine propositions totaling about $126 million — the figure Breakthrough says needs to be funded by local bonds. That issue is now before the Anchorage Municipal Assembly, which has scheduled a work session at 5 p.m. today to dig deeper into the Breakthrough package.

Following two public hearings, tentatively planned for April 11 and April 18, the assembly must approve motions to place each proposition on the ballot.

Among the Breakthrough recommendations:

— Creation of a one-way grid street system in the downtown core to handle traffic more efficiently.

— The addition of about 2,200 parking spaces in the central business district.

— Construction of a $63 million complex, composed of two separate buildings, one to house a convention-sports center and the other for a performing and visual arts center.

— A $30 million municipal office complex to consolidate offices now spread over several locations throughout the municipality.

— A new headquarters library on the existing Denali School site.

— A massive road improvement package totaling about $180 million over the next five years.

— A $4.9 million local commitment to mass transit, to be used as the local match for federal grants to purchase buses for the municipality's People Mover system.

— Creation of a development corporation to spur a new retail complex in the central business district, with hopes of attracting a third major department store to "anchor" the downtown business area.

— Improvements and expansion of the Anchorage Historical and Fine Arts Museum.

The package got a mixed reception last night from the Downtown Anchorage Association, a group of downtown merchants.

The recommended parking improvements got perhaps the warmest reception from the merchants, many of whom have long complained of inadequate parking in the central business district.

Dan Stewart criticized the one-way grid recommendation. "I have been very annoyed by these grids," Stewart said, noting that a wrong turn may take eight blocks of travel to correct.

Other merchants criticized other facets of the package.

Several, however, applauded the Breakthrough effort.

"I really think these people have really worked hard," said Sewell Faulkner. "They've recommended a lot of things that can really help us downtown."

Budd Parsell, president of the association, termed the Breakthrough package one that "really has something for everyone" and cited a "need to appeal to as many of the voters as possible" before the planned May bond election.

Weiford, the municipal manager, announced the administration's support for the proposal.

"The recommendations of Breakthrough are mind boggling," he said.

"I dare say you couldn't find a single person who would agree with everything" in the package, Weiford said. But "what I think is true (is that) here we have had a truly remarkable, distinctive, different kind of citizen involvement in this community."

Rose applauded the plan, terming it a "comprehensive" approach to solving Anchorage problems rather than "a piecemeal approach."

Rose said he hopes differences of opinion about the plan can be resolved "so we have a pretty good consensus on where we want to go before we get to the ballot box."

F: SB 507

Breakthrough's final report

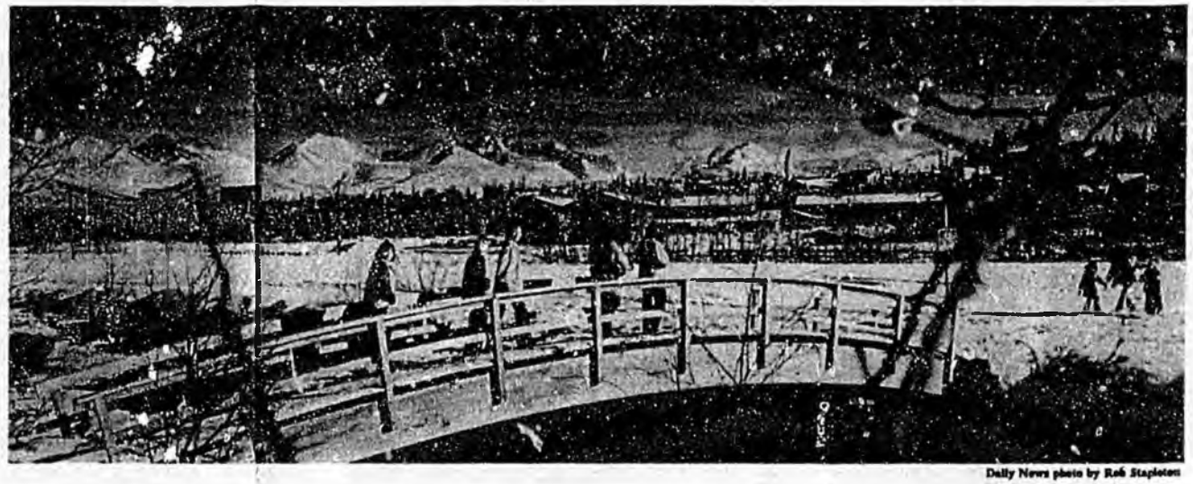
Anchorage is the third fastest growing city in the United States today. The area changes almost daily as new subdivisions, commercial buildings and centers spring up outside the city core. It can rapidly become one of the worst communities in the United States; but most decidedly it has the potential for becoming one of the best.

Breakthrough is a citizens' effort to realize that potential in a way that will preserve and enhance the friendliness, livability, beauty and economic soundness of our unique city.

Anchorage's population is now in excess of 186,000, and Breakthrough estimates that by 1986, the population will have risen to 314,000, and that by 1996, Anchorage's population will be 487,000. This accelerated growth places upon us an extra demand to decide now what kind of city we want Anchorage to become in the next decade. The growth is certain. It is important, however, that it happen according to action plans prepared, officially adopted and fully supported by all segments of the population.

Breakthrough is people. Nearly 300 of them who have worked for more than a year to do the studies and make the recommendations necessary to helping shape Anchorage's tomorrow today. This action plan is based on reports of Task Forces on Community Facilities, the Central Business District, Transportation, Parks and Recreation, Public Utilities, Crime and Financial Resources. It was not meant to gather dust; rather it is a plan of action with which we can strive together to do what we know can be done.

The time to start is now.



Daily News photo by Rob Stapleton

Community facilities/CBD

Anchorage is headstrong and tough, familiar with adversity and proud to be alive.

Anchorage's heart and character have suffered, though, from the rapid growth, and now the city needs nurturing attention from the people it has tried so hard to please.

Where is the uniqueness that could make Anchorage the most striking city in the Pacific Northwest? Where might a visitor sense the pride of Anchorage's heritage? Where, indeed, is the essence of Anchorage and Alaska in our city?

It is hidden, lost to the eyes of its seekers by snarling traffic so there is no reason to try to walk, by drab streets and sidewalks so there is no reason to pause and look, by asphalt and concrete so there is no space for grass and trees and flowers. Ugliness abounds where beauty ought to flourish. It doesn't have to be that way. We can change it.

Let's start by giving people more reason for coming downtown. Breakthrough has contacted several national firms who have expressed an interest in the

The Performing and Visual Arts Center will consist of a Concert Hall, a Drama Theater, a Visual Arts Center, a total cultural facility.

The Convention Center will include an arena which could be used for some sports events, and have provision for adding more seats; meeting rooms, kitchen facilities, administrative offices and a 50,000 to 90,000 square foot exhibit hall. With this splendid facility, Anchorage could attract lucrative conventions from all over the world and add substantially to the economic effect of the tourism industry in the entire state. The facility also will accommodate spectator sports events such as basketball, hockey, rodeos, ice shows, boxing and wrestling.

With both facilities at the downtown location, Anchorage residents will have convenient access, convention delegates will be near all the major hotels, and the various facilities would be in proximity to allow maximum usage because each facility has some areas of compatibility with the others. Undoubtedly, the pedestrian mall, complete with public art and lots of greenery.

Both for beautification and convenience, we'll construct a striking Municipal Center on land now occupied by the old City Hall Annex (formerly a school building) and the City Gymnasium (the area between Fifth and Sixth Avenues and F and G Streets). Sydney Laurence Auditorium will be retained just as it is. The Municipal Center will be a 10-12 story structure which will consolidate the multitude of Municipal offices into a central location and will complement the downtown City Hall, a landmark which must be preserved.

This new structure will provide 250,000-300,000 square feet of space and provide Anchorage residents with a beautiful and convenient center in which to do business with the Municipality of Anchorage. Recreational facilities, such as those now enjoyed by so many at the City Gym, will be available in the new center, too, and will be vastly improved.

A new Headquarters Library is a necessity for Anchorage, too, and it will be constructed at the reference service. The time has come, however, to eliminate the parking lot behind the Z.J. Loussac Library and the picturesque City Hall. The area will be converted to park space with public facilities to provide a green space in the heart of the downtown. Anchorage residents made it clear years ago they wanted a park there, and now is the time to make it happen.

Anchorage's Historical and Fine Arts Museum must be expanded to include an educational activity center, a dual use theater and planetarium, a natural history gallery, and the display area for painting and sculpture will be doubled. With the addition of 2,000 or 3,000 square feet, the facility can provide a museum of science and industry with emphasis on Arctic problems and solutions. There also will be a reading room, library, cafeteria, and a glassed-in sculpture courtyard on the Sixth Avenue side of the museum, which is located at the corner of Sixth Avenue and A Street.

As a matter of policy,

Public utilities

Needs for utility services in Anchorage and Southcentral Alaska are going to increase dramatically over the next two decades, and clearly there is a need for long-range planning to assure that all reasonable alternatives are investigated to guarantee that adequate, reliable and environmentally-sound utility services are available when needed.

Utility planning is highly complex and technical, requiring extensive, specialized study and evaluation of massive amounts of data. Breakthrough looked at four major utility areas:

Power: Demands for power throughout Southcentral Alaska are going to increase in the next few years, but there is no way to quantify the rate of growth at this time because there are too many variable factors. There is, however, agreement on two points:

—The cost of power to the consumer is going to increase no matter what happens.

—Some way must be found to reduce excessive costs and delays attendant to proceedings before the Alaska Public Utilities Commission (APUC).

Clearly, there is a need for long-range planning, and Breakthrough considers it mandatory that the Alaska Power Authority be charged with the responsibility of directing a coordinated effort to develop a long-range planning process and a policy designed to assure adequate power for all of southwest Alaska.

Telephone: There is an immediate need to explore alternate methods of financing operations of the Anchorage Telephone Utility, and to reduce excessive costs and delays attendant to proceedings before the Alaska Public Utilities Commission.

Solid Waste: Breakthrough endorses the Municipality's plan for installation of a Solid Waste Shredding Facility.

Water/Wastewater: Water-providing systems must be integrated, both to assure maximum ability to meet increasing demands and for master planning purposes. To best accomplish the integration of the systems, the existing Water Utility Advisory

activities, and serve to bring people back into the downtown area for convenient shopping.

A Downtown Development Corporation financed by public and private funds will be formed to implement the retail development of the downtown area, and continue as an influential factor in keeping the downtown area alive in years to come.

For years Anchorage residents have talked of a Performing and Visual Arts Center and a Convention Center. It's time to build them. The facilities are to be constructed on property between Fourth and Sixth Avenues between A and C Streets, close to the retail development, a cultural-convention complex that will be the envy of every city on the West Coast.

On the North-South streets that don't cross the Park Strip, let's create space for people. We'll drop the speed limit to five miles an hour, switch to angle parking which will slightly increase the number of parking spaces available, and develop malls with large and small sculptures, fountains, trees and planters and imaginative lights.

Immediately, let's eliminate parking on Fourth Avenue between C and F Streets, extend the sidewalks on both sides, install trees and benches and otherwise beautify to create a pleasant area in the heart of downtown. Once the East-West Corridor-Tidewater Parkway (see Transportation) is completed, let's convert Fourth Avenue from A to L Streets into a specializing in business and construction.

Crime

Crime in the Anchorage area costs you and the head of every other household about $500 a year. That's assuming you haven't been hit over the head, robbed or otherwise affected personally by the rising crime rate. And that $500 doesn't include the cost of crime in the toll it takes in human misery and destruction of life and property.

Upon hearing of a criminal incident, many of us are still prone to say, "I never would have thought that could happen in Anchorage."

But it does. Every day. And we're getting more and more used to it. Just as our physical bodies adjust and eventually tolerate germs and even deadly poisons in less-than-fatal amounts, so there is a tendency for citizens to tolerate crime in ever-increasing doses and assume there is nothing they can do. It is easier not to become involved. Easier, but fatal.

The crime rate continues to rise, posing innumerable problems to which there are no simple, short range solutions.

There are many groups, agencies and individuals involved in the effort to combat crime, but it appears that they do not communicate on a regular basis with each other. There is no unity of action or purpose. Crime appears to be organized, even at the local level, but municipal, state and citizen efforts to combat it are not organized.

Without an organized effort to combat crime, the situation is not going to improve. Public facilities are not keeping up with the needs, so competition for the available tax dollars will further complicate the obtaining and maintaining of an adequate criminal justice system.

There is something we can do. The general public must become involved, and Breakthrough intends to accomplish that involvement through the creation of a Citizens Crime Commission. Such commissions have been influential in reducing crime rates in other cities, and it can happen here.

The Citizens Crime Commission will be organized as a nonprofit corporation under the guidelines recommended by the National Association of Citizen Crime Commissions, and it is important that it be an organization of citizens, from all sectors of the community, who, with the assistance of a limited staff, would make policy and direct the activities of the commission. The organization should be non-profit and non-political and will not play the role of any law enforcement agency.

The commission's principal weapon will be the knowledge that comes through research and investigation, information that is prepared in clear, understandable form, and the power of public opinion which is translated into action by the dissemination of information.

Parks and recreation

Located as it is between the mountains and the sea Anchorage is a great place to live, work and play. But we can make it even greater, offering virtually unlimited recreational opportunities to residents and visitors alike.

Implementation of these action plans will provide a comprehensive, balanced system of parks, multi-use trails, and organized play facilities, both indoor and outdoor.

More neighborhood and community parks need to be created, to provide a minimum of five acres of parks per 1,000 population, a nationally accepted standard. Now, there are 11 neighborhood parks, 37 vest pocket parks under five acres in size and eight community parks. To meet today's population needs, Anchorage should have 93 neighborhood parks and 23 community parks.

To expedite acquisition and development, we will establish a Public Lands Conservancy Foundation to solicit private monies for acquiring public interest lands to be held in trust or developed as required. The foundation also will solicit private monies for park development and maintenance; develop guidelines and provide assistance to neighborhoods in regard to special assessment acquisition and park development; serve as a coordinating agency for parks and recreation acquisition, development and maintenance by area service organizations.

Somewhere in the downtown area, perhaps on the Ninth Avenue Park Strip, there will be built a major botanical display garden and aboretum for the exhibit of all the plants that can be used in Anchorage gardens.

A new recreation "teen center" will be built in both the Muldoon and Sand Lake areas.

Breakthrough recommends that an interpretive program be instituted at all public school levels, possibly combined with field trips and visual aids, to encourage proper use of and appreciate for parks and discourage littering, vandalism and fires. A vital part of this program would be the establishment of a Parks Youth Corps, composed of young Alaskans dedicated to the proper use and maintenance of parks within the municipality. The corps' activities would include on-the-job training whereby members would be employed by the municipality for work in the parks. This program not only would enhance public education, but also provide jobs for young people at the minimum wage level, which would be economical for the municipality.

To vastly increase the opportunities for enjoying the outdoors for everyone, there will be developed a balanced system of trails for winter and summer use by motorized and non-motorized vehicles. According to season, trails would be designated for snowmachinces, bicycles, dirt bikes skiing, walking, horseback riding, dog sledding, with specialized trails for physical fitness and the handicapped.

Overall, land use in the Anchorage area should be more closely coordinated, and Breakthrough recommends the formation of a joint planning and management body to facilitate such coordination. The unit would be composed of representatives of all Municipal, State and Federal agencies controlling public use lands in the area.

Breakthrough strongly supports the development of the Far North Bicentennial Park according to the master plan adopted by the Greater Anchorage Area Borough in September 1974.

Transportation

Anchorage's transportation system is woefully inadequate now, and will only deteriorate more if positive action is not taken soon. Our population is now about 186,000 and Breakthrough estimates that by 1986 the population of Anchorage will have risen to 314,000. Transportation demand is a straight line function of population, and with these projections, our transportation system will be virtually nonfunctional if we don't do something about it now.

Implementation of the action plans in this report will provide the Anchorage area with a comprehensive, modern and efficient transportation system. It will be an integrated highway and mass transit system which will accommodate our needs for the next decade and beyond and ensure orderly land use to protect and maintain the environment while allowing people the flexibility to move around easily and comfortably.

Five-year action plan: The five-year action plan projects consist primarily of local improvements and minor road extensions which must be completed within the next five years if we are to have a livable transportation system. Thirty short-range projects are scheduled for action on a priority basis. Top priority projects which are to be completed within two years include: construction of a multi-lane urban arterial on Northern Lights from Lake Otis to Muldoon; expand the Old Seward Highway to four lanes from 36th to Dimond; convert C and A to one-way streets north of 36th; rebuild Dimond to four lanes from Sand Lake to New Seward Highway, reconstruction on Birch and Huffman roads; construct Bragaw extension between Northern Lights and UAA; enlarge Fireweed to four lanes between Seward Highway and Spenard Road; and expand New Seward Highway to four lanes from Dimond to Potter Marsh.

Long-range action plan: Long-range action plans include nine major projects. Those which must begin in the immediate future include: extension of Minnesota south and to the New Seward Highway; reconstruction of Seward Highway from south of 36th Avenue to the East-West Corridor (Tidewater Parkway) at Ship Creek; upgrade Northern Lights Boulevard west of Lois Drive to connect with Anchorage International Airport access; construct route from Abbott Loop from O'Malley to Boniface at Tudor Road to provide direct access between southeast and northeast portions of Anchorage; construct East Loop from south of Rabbit Creek to the East-West Corridor (Tidewater Parkway); extend Dowling Road east to Abbott Loop Road.

Knik Arm Crossing and Turnagain Arm Crossing are projects that are also needed, but first, we need to do whatever it takes to drive safely and conveniently.

Buses: Anchorage needs a dependable and reliable bus system in order for it to be a practical and attractive alternative to the automobile. To provide faster and more direct service, more routes are needed. More routes mean more buses. Anchorage needs a People Mover bus fleet of 100 buses by 1980. Now we have 36.

Light-rail: The Alaska Railroad offers a backbone for rail use. The light-rail transit system for Anchorage would follow the proposed Tidewater Parkway from downtown Anchorage to the International Airport. It would then travel along Minnesota Bypass from International Airport to the intersection of Minnesota Bypass (proposed extension) and the Alaska Railroad at O'Malley. Several parking areas have been tentatively identified for users of light-rail.

Rail to new capital and other communities: The Anchorage Metropolitan Area Transportation Study should undertake a study into the feasibility of using the existing Alaska Railroad, with a spur to the new capital city, for mass transit from Anchorage to the new capital and to other railbelt communities. The Capital Planning Committee should include in its planning for a capital site a light-rail spur to the heart of the new capital. At the very beginning of capital site planning, the Planning Committee should identify the required right-of-way at the Willow end, and make arrangements for acquiring and setting aside the right-of-way. This planning would be for purposes of making possible rapid transit by rail between Anchorage International Airport, downtown Anchorage, Eagle River - Chugiak, Wasilla and the new capital.

S.E. Alaska Empire Mon. April 17, 1978

Culture Facility Funds Backed

Representatives from communities throughout the state returned to Juneau today to push for passage of a $30 million bond issue for cultural facilities.

The House Finance Committee heard testimony from members of the Cultural Facilities Development Committee, which represents 12 cities including a number in Southeast Alaska.

Among proposals presented was a $12.3 million performing arts center for Juneau. It would include a theater to seat 700, a "forum" to seat 20 to 250 and scenery and costume workshops, dressing rooms and rehearsal halls as well as space for a television studio.

Other communities seeking funding for facilities under the bond package are Angoon, Haines, Skagway, Ketchikan, Sitka, Petersburg, Anchorage, Cordova, Dillingham, Naknek and Kodiak. Hydaburg recently has requested assistance from the committee as well, a spokeswoman for the group said.

Most representatives testified their communities have insufficient space or no place to perform.

"We have nothing in Skagway," a spokeswoman for that community said. "Skagway has no arts program in the school because there is no facility for it."

"We've had programs at 10 o'clock at night to try and work around a basketball game," the Cordova spokeswoman said. That community is forced to perform in the high school gym, she said.

"A cultural arts program cannot be developed in a gymnasium," the spokesman for Petersburg echoed.

Proposals for the 12 cities would cost $80 million. However, the committee decided to break down the bonding to smaller pieces beginning with the $30 million bond issue currently requested.

The committee is recommending communities receive money "on a first come, first serve basis," Allan Gregg, chairman of the group said.

Anchorage Times March 23, 1978

State Aid Bill 'Too Costly,' Says Sponsor

JUNEAU (AP) — Recently introduced legislation sponsored by an Anchorage booster group for state aid to municipal improvement projects around the state would cost taxpayers up to $400 million, the chairman of the House Community and Regional Affairs Committee says.

Rep. Lisa Rudd, D-Anchorage, said she agreed to introduce the bill at the request of Operation Breakthrough, a volunteer organization which is trying to revitalize Anchorage, but warned the civic group that the measure stood little chance of passage.

"I promised to give them a hearing but I also told them I didn't think it would pass," Ms. Rudd said. "They said they wanted to lobby for it anyway."

Ms. Rudd said, however, that the legislation was too open-ended and loosely worded and also was in direct competition with a popular bi" by Rep. Jim Duncan, D-Juneau, for state aid to communities for cultural projects.

A companion bill by Duncan would authorize a $30 million bond issue to kick off funding for the cultural facilities aid program.

"There's a tremendous amount of support for the cultural bill and the Legislature is unlikely to do both," Ms. Rudd said. "There's an incredible amount of support for the Dun-

(See Page 2, Col. 3)

Breakthrough Bill Said 'Too Costly'

(Continued From Page 1)

can proposal throughout the state."

Ms. Rudd said Duncan's legislation probably would be approved by her committee next Monday.

In addition to political obstacles, Ms. Rudd said the Operation Breakthrough proposal also faces substantive problems.

"It is a much broader concept, and would have to be tightened substantially before I could support it," she said.

The proposal would allow the state to assume 50 percent of the cost of municipal capital improvement projects with a ceiling of $3,000 per capita on the first 1,000 population, $2,000 per capita on populations between 1,000 and 10,000 and $1,000 per capita on populations of more than 10,000.

Ms. Rudd said, however, the legislation should include a definition of the kinds of projects eligible for state aid and a more clear ceiling on the state's financial liability.

"It says capital improvements can be anything the municipality wants," Ms. Rudd said. "And at an estimated $400 million, it's just too costly."

She said her House committee would conduct a hearing on the bill sometime next week, but held out little hope for action this session.

SB
508

SB 507
HB 508

HB 781: AN ACT AUTHORIZING STATE AID TO MUNICIPALITIES FOR THE CONSTRUCTION AND DEVELOPMENT OF CULTURAL FACILITIES, and
HB 782: AN ACT PROVIDING FOR THE ISSUANCE OF GENERAL OBLIGATION BONDS IN THE AMOUNT OF $30,106,000 FOR THE PURPOSE OF PAYING THE COST OF CULTURAL FACILITIES; AND PROVIDING FOR AN EFFECTIVE DATE.

These two bills would authorize the State to assist municipalities in the development and construction of cultural facilities through grants from a proposed "1978 Municipal Cultural Facility Fund". Because of the obvious need for cultural facilities in Anchorage, the Municipality of Anchorage supports this bill.

Sydney Laurence Auditorium and West High School Auditorium with respective seating capacities of 650 and 2,000 are the two primary performing arts facilities in Anchorage, and the Visual Arts Center is the only primary visual arts facility in Anchorage.

All three of these primary arts facilities are overused during the peak use period between January and April. Five different performing groups will want to reserve the same date for a performance at Sydney Laurence Auditorium or West High School Auditorium. Because the number of rehersals exceed performances by a 7 to 1 ratio over actual performances, the usage problem for performing arts facilities is critical. Those performing groups fortunate enough to reserve a date at the primary facilities must often reherse at cramped and wholly inadequate secondary facilities, and the performing groups not so fortunate must both perform and reherse at such secondary facilities. The fact that the Visual Arts Center is overused is obvious because it is used daily-Sunday through Saturday-52 weeks a year.

All three primary arts facilities are also inadequately equipped. Sydney Laurence Auditorium has inadequate lobby and box office and dressing room space. It has no shop and storage space and its audience floor is not sufficiently raked; therefore, sight lines are obscured. The stage, backstage, and storage space at West High Auditorium are all too small. It has no shower facility. The acoustics there are a problem, and the lighting and sound equipment is dated. Because the Visual Arts Center was originally designed as the Alaska Centennial Building, it is even more inadequately equipped than the other two primary arts facilities. It is overcrowded.

It lacks adequate lighting in the gallery and professional studios. It lacks adequate heating, and it has no special storage areas with technical consideration for art collection, unpacking shows, stone and other bulk materials.

Anchorage has become a remarkably prolific town for community artistic activities. It is much more active in this regard than other cities of identical size throughout the United States. Such interest deserves attention; the Municipality therefore urges action on HB 781 and HB 782 consistent with our needs.

Dear Senator Rodey:

The Sitka Community Action Group went on record March 13, 1978, as supporting your Senate Bill 508 and that of Representative Parr as to House Bill 768. We feel it is important to get this bond issue out to the voters and also feel that the quality of life is highly important in all of our Alaska communities. I want to add my personal support for these bills as well. I have seen what the summer arts camp here at Sheldon Jackson has done for my children and feel the cultural facilities would provide an even greater emphasis on this l one which is badly needed not only in Sitka, but in other ommunities as well.

Concerning Senate Bill 507 and House Bill 769, I must say that I much prefer Senate Bill 507 and also feel that the land itself should be considered as part of the the contribution. Land is extremely valuable in Sitka as in most Alaskan cities and certainly represents a very valuable and significant part of the total cost.

Very truly yours,

Downtown Group Explores Proposals Of Breakthrough

A multi-million dollar improvement package for Anchorage was explained by Breakthrough officials and explored by the Downtown Anchorage Association last night.

Breakthrough, a volunteer citizens' group, developed the recommendations for improvements in community facilities, roads, mass transit, parks and other areas over a year of study. The improvement package totals about $750 million in projects over the next five to seven years, the group's chairman said last night.

The group hopes to fund the local share of that package through a $126 million bond election tentatively planned for May 23.

Chairman Max Hodel said Breakthrough representatives will appear at as many community and organization meetings as possible over the next few weeks to air the improvement recommendations.

Also on hand for the meeting at the Anchorage Westward Hilton Hotel last night were Anchorage Assembly members Dave Rose, Arliss Sturgulewski and Tony Knowles and Municipal Manager Doug Welford.

Breakthrough anticipates that most of that $750 million improvement package will be footed by state and federal sources, with the local share, after grants, to be about $250 million. The group hopes to cut that figure in half with a bill to be introduced in the Legislature calling for 50 percent state support of municipal capital improvement projects in cities across the state.

The group has proposed a special bond election May 23 on nine propositions totaling about $126 million — the figure Breakthrough says needs to be funded by local bonds. That issue is now before the Anchorage Municipal Assembly, which has scheduled a work session at 5 p.m. today to dig deeper into the Breakthrough package.

Following two public hearings, tentatively planned for April 11 and April 18, the assembly must approve motions to place each proposition on the ballot.

Among the Breakthrough recommendations:

— Creation of a one-way grid street system in the downtown core to handle traffic more efficiently.

— The addition of about 2,200 parking spaces in the central business district.

— Construction of a $63 million complex, composed of two separate buildings, one to house a convention-sports center and the other for a performing and visual arts center.

— A $30 million municipal office complex to consolidate offices now spread over several locations throughout the municipality.

— A new headquarters library on the existing Denali School site.

— A massive road improvement package totaling about $180 million over the next five years.

— A $4.9 million local commitment to mass transit, to be used as the local match for federal grants to purchase buses for the municipality's People Mover system.

— Creation of a development corporation to spur a new retail complex in the central business district, with hopes of attracting a third major department store to "anchor" the downtown business area.

— Improvements and expansion of the Anchorage Historical and Fine Arts Museum.

The package got a mixed reception last night from the Downtown Anchorage Association, a group of downtown merchants.

The recommended parking improvements got perhaps the warmest reception from the merchants, many of whom have long complained of inadequate parking in the central business district.

Dan Stewart criticized the one-way grid recommendation. "I have been very annoyed by these grids," Stewart said, noting that a wrong turn may take eight blocks of travel to correct.

Other merchants criticized other facets of the package.

Several, however, applauded the Breakthrough effort.

"I really think these people have really worked hard," said Sewell Faulkner. "They've recommended a lot of things that can really help us downtown."

Budd Parsell, president of the association, termed the Breakthrough package one that "really has something for everyone" and cited a "need to appeal to as many of the voters as possible" before the planned May bond election.

Welford, the municipal manager, announced the administration's support for the proposal.

"The recommendations of Breakthrough are mind boggling," he said.

"I dare say you couldn't find a single person who would agree with everything" in the package, Welford said. But "what I think is true (is that) here we have had a truly remarkable, distinctive, different kind of citizen involvement in this community."

Rose applauded the plan, terming it a "comprehensive" approach to solving Anchorage problems rather than "a piecemeal approach."

Rose said he hopes differences of opinion about the plan can be resolved "so we have a pretty good consensus on where we want to go before we get to the ballot box."

Dear Mayor Solomon:

Senate Bills 507 and 508 authorizing state aid to municipalities for the construction and development of cultural facilities have been referred to this Committee for review and consideration. (Copies of the bills are attached for your information).

At this time, the Committee is aware of twelve Alaskan communities which have proposed slightly over $72 million in cultural projects under the provisions of this legislation introduced by Senator Pat Rodey. They include Dillingham ($9 million), Cordova ($3.4 million), and Petersburg ($3.5 million). Since your community was not one of those listing plans for cultural facilities, I would appreciate your reviewing the attached bills and notifying the Committee if your community would wish to participate in the cultural facilities program, assuming it is approved by the Legislature.

I would also appreciate any other comments or suggestions you might have on the proposed legislation.

Sincerely,

Joe Orsini

The Skagway cultural facility plan has been updated and revised to create a new multi-purpose cultural building. The updated plans include theatre, museum, archives, court space, city government offices, and day care. The building will provide a civic center for a growing population and for the 100,000+ tourists who visit Skagway each year. For this new facility projected cost is 4.7 million

Dear Legislator:

The informational packet you received concerning 12 communities' projected Cultural Facilities did not include this update on Skagway's plan. Please include this in your information about the Cultural Facilities Development Committee.

If additional information is needed at this time, please call the CFDC Coordinator, Shirley Rediger, at 586-6806.

Re: Senate Bill No. 508

Dear Senator Orsini:

Senate Bill No. 508, an Act providing for the issuance of general obligation bonds in the amount of $30,106,000 for the purpose of paying the cost of cultural facilities, was introduced in the Senate on February 14, 1978 and was referred to the Senate Community and Regional Affairs and Finance Committees.

The State's Bond Counsel, Mr. C. Richard Walker of Orrick, Herrington, Rowley and Sutcliffe ahs advised that general obligations bonds of the State and nearly all other state and local government bonds are issued in the denomination of $5,000, the standard unit.

Using Senate Bill No. 508 as an example, according to Mr. Walker, this would result in issuing one odd bond in the denomination of $1,000 along with 6,021 bonds in the usual denomination of $5,000.

Issuing a bond in an odd denomination requires extra time and expense in connection with the preparation of the resolution, notice of sale, official statement and other documents relating to the bonds and the printing of the one odd bond with all its special coupons.

Consequently, it is respectfully recommended that the proposed legislation be amended to allow for rounding off the principal amount of the proposed bond issue to the nearest $5,000 by making the principal amount in the bill to read $30,105,000.

Very truly yours,

CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

DATE June 6, 1978

FILE NO. Legislature - 1978 Session
HB 781

SUBJECT: Support for Cultural Facilities Legislation

Honorable Joseph Orsini, Chairman
Senate Community Regional Affairs Committee
Pouch V - Capitol Building
Juneau, Alaska 99811

Dear Senator Orsini,

An article in last night's Southeast Alaska Empire indicates that you or your committee believe that there is inadequate interest in the cultural facilities bills which are in your committee to bring them up for a hearing. Prior experience with the Empire has led me to conclude that it more often than not sacrifices accuracy for dramatic impact. For that reason I presume that neither you nor the committee has taken as firm a position on the cultural facilities bills as the Empire article indicates.

The City and Borough of Juneau fully supports the approach expressed in House Bill 781 for state assistance to municipalities for the construction of cultural facilities. This bill is now in your committee and we urge you to schedule it for hearing at the earliest possible date and to refer the bill out so that the entire Senate may be given an opportunity to express its position on state aid for cultural facilities.

Ms. Shirley Rediger of the statewide Cultural Facilities Development Committee has provided your committee with material which consists of fairly detailed proposals for each of the major communities, including Juneau, which are interested in constructing cultural facilities. These proposals deal with most of the information which your committee had requested earlier this year. On the chance that the committee-provided information was inadequate, our public works department is now preparing a response to the specific request for information. I have been informed that both Ms. Jane Stewart of the Juneau Cultural Facilities Development Committee and the various potential users of a local cultural facility have written to your committee expressing theirs and the community's support for the cultural facilities bills. The assembly has designated Ms. Stewart and the Juneau committee to represent it on the state committee. We support both the local and the state committee efforts to

have legislation such as House Bill 781 passed. We again urge you to schedule this bill and one or more of the companion bond bills for a hearing and urge you to pass them out of committee. Only by doing so will the communities in Alaska have any hope of acquiring facilities adequate to meet their needs for facilities which can be utilized to support and perpetuate the cultural arts and local culture.

Very truly yours,

Gerald L. Sharp

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

March 14, 1978

Present: Chairman Orsini, Senators Willis and Hackney and Ferguson; Rob Kocsis, Senator Hohman's Office; Vern Metcalf, Department of Transportation; Jack Chenoweth, Legislative Affairs Agency; Kathy Brown, Senator Ferguson's Office; Deborah Fink, Senator Hohman's Office; Bruce Aronson, Department of Community and Regional Affairs; Marilyn Miller, Alaska Municipal League.

Absent: Senator Sumner

SENATE BILL 533

Chairman Orsini explained that SB 533 had been drawn from Section 8 of SB 510 which was a permanent fund legislative package and which had only a Senate Finance Committee referral. He said that the intent of SB 533 was to address the issue of coordinating the requirement for the Department of Transportation to draw up inventories of municipal capital facilities with the municipalities own planning functions and activites.

Rob Kocsis, Senate Interim Permanent Fund Staff, said that the rationale for Section 8 in Sb 510 was to provide a data base of existing capital facilities so that an accurate six-year schedule for the investment of 30 percent of the permanent fund monies into capital improvements could be drawn up. He said that the requirements for DOT to prepare the inventory for communities with less than 12,000 people was to avoid imposing too great a burden on less populated areas.

Chairman Orsini asked how, under this bill, was the State to coordinate its planning with municipalities in light of the fact that state law called for the State to attempt to keep its local activities consistent with local municipal objectives Also, he wished to know how municipal wishes and capital planning was going to be reflected in the state-generated capital inventory which in turn was to be used to determine a six year statewide capital investment program under the permanent fund.

Kocsis responded that there was no intention to by-pass the municipalities in this function and that it was intended for the State to draw up the inventories based on the information supplied by the municipalities themselves. In response to a question from Chairman Orsini, Bruce Aronson, Department of Community and Regional Affairs, replied that to his knowledge very little of HUD 701 funds were being used by municipalities for capital improvement planning and that the money was being primarily for land use planning.

Vern Metcalf, Department of Transportation, expressed concern at the scope of responsibilities which SB 533/510 would place on his department. He pointed out that the resources of the DOT were currently strained merely by the requirement to prepare a statewide survey of state-owned facilities. He did not believe it was possible to add a municipal

facility inventory on top of that without DOT first receiving additional personnel and funds for the program. Senator Hackney questioned whether rented facilities would also be taken into account in the proposed inventory and expressed some skepticism about the extent to which state administrations would carry out six year schedules set by preceding administrations. He also asked that a fiscal note be prepared for SB 533. (To be prepared by DOT, per Metcalf)

ANCSA 14(c)(3) Village Land Reconveyance Status Report

In response to a request by Chairman Orsini, Senator Ferguson had his Administrative Assistent Kathy Brown prepare a status report on the 14(c)(3) village land conveyance situation. (see attached report). During a general Committee discussion following Ms. Brown's presentation, Senator Ferguson noted that the possibilities for friction between village corporations and municipalities was far greater than most of the parties involved, especially in western Alaska, presently realized. He pointed out that in his own area the groundwork for later confrontation was already being laid and that he expected considerable legal challenges to be made on this issue throughout the state.

Senator Willis questioned the ambiguities and omissions which existed in state statutes regarding the municipal entities which could legally receive the conveyances from villages within their area. Jack Chenoweth, Legislative Affairs Agency, pointed out that Congress, when it passed the Alaska Native Claims Settlement Act, was not informed as to the exact divisions of local government in Alaska. As a result, in his opinion, Congress left it up to the State Legislature to define through its statutes what kinds of municipalities were designated recipients of the reconveyances. This, he noted, was done by the Legislature two years ago when it excluded first and second class boroughs from the definition of "municipal corporations" in the Act.

Chairman Orsini said that he wished to schedule further discussions on the 14(c)(3) situation, dealing with the drawing up of regulations, and taking testimony from persons such as Byron Mallot, President of the Alaska Federation of Natives, who are directly involved in the issue.

F: SB 535

S/HESS 4/6/78
Minutes

Representative Chatterton speaking to proposed amendment. Appearing befo~e you in support of SB 556 because very simply it offers a very beautiful that I would hope you and your committee would consider saddling with my amendment. Background -- this particular section of title 47 of chapter 7 seems to get bandaids added The situation is this, in Anchorage we have a nonprofit outpaitient surgical care clinic. That nonprofit corporation is referred to the surgery center its business manager or executive director is a Horris Sue Evering. In existant for a year and a quarter.

To date this well licensed existing outpatient surgical care clinic has run about 1,500 patients through it everything from tonsillectimate to removing warts. These are patients that are not the normal types of peple that would be receiving mdeical funds. In fact they cannot taken any medical patients at the present time. The beauty of it a tonsell would cost about 600 where at a hospital it would cost about 1,200. It was brought to my attention that there would be a savings in tax payers moneies of people eleigble for medicaid and medicare funds could aso availa themselves of this ervice. Have discussed matter with Dave Davidson and under present state statue they cannnot so qualify. With this two things would be necessary for this surgery center to qualify for medicaid or madicare funds. 1. The state would have to amend its legislation and 2. whatever it is, they would have to complete what is know as an 11.22 review. As a result of this to take to be permissive for the surgery center to accept people nnedy people in need of medical services I've suggested this amendment.

Motion by Senator Rodey to pass out with DP reces no objections so ordered.

SB 535 -- exit Senator Rodey -- Thomas Scott, Division of Health and Social Services. Department supports SB 535 look at it as a housekeeping document to allow for ambulanse sevices to respond outside municipal boundaries. currently Alaska law 29.48.030 delineates which service are home or local government can provide. AS 29.048.037 delineates those services that can be provided outside the boundaries of a municipality. This bill would make emergency medical services a service that a home or local government can provide within its boundaries and allow it to be provided outside its boundaries. Right now all the ambulanse services in the state except in the Matsu borough in the anchorag municip provide service respond outside their municipal boundaries because there is no one else outside to respond.

When they do that they lose their insurance coverage and so forth that they have. They become liable for, they are actually breaking the law when they do that. This bill would extend the authority to respond outside at the same time it wouldn't allow them any revenue sharing or any more allow them to tax for their services. The City of Petersburg actually stopped serving outside the boundaries here last year becuase on the recommendation of their insurance company and the city council did two things -- they extended the boundaries a little bit and then put the rest to provide services outside and worry about liability later on.

Senator Willis move that it pass from committee with a dp rec. no objs so ordered

SB 487 -- Paul Arnoldt, Director of the Division of Retirement and Benefits SB 487 At first we weren't quite sure what was intended here but we've been able to determine that primarily this bill would affect one individual and what is happening is this individual served at service with the territory between 1931 and 1943 of which no contribution had been made to any kind of retirement program and no credit was received and no benefit was being payed. Since then he went to work with the U of A for one month to come under the teachers retirement system which the prior years service was credited for a total of9.6 years and he had .1 years at the University so a total of 9.7 years. We are currently paying him a benefit on this service that amounts to including COLA and PRP that was just issues last year comes to $36.27 a month. What this bill would do would make that a minimum 9f $20 for each year of service and bring his benefit to about ¶200 per month So far we have payed this individual abut $1,200 and he has contribu4d 100 for the system. The bill was put to one side until Mr. Arnoldt could determine whether this individual was receiving any other retirement benefits from the state -- resulted from a question by senator ziegler

SB 512 -- Is identifcal to two house bills -- 818 and 823. This has been heard before the legislative board of retirement benefits and they recommended this bill shold not pass. I concur with them in that recommendation for two reasons. This would allow services for former employes of the Alaska State Housing authority under either the Teachers retirement system or the The concept of having hte state pick up past service liabilities for former or for some other entity this would the first time this has ever happened. Any time an entitty joins the system they have the opportunity to bring in past service. In other words they can elect to bring no past service, past service under certain conditions, all past service. The Alaska State Housing Authority , the Attorney general has already ruled that they are eligible to joing the PERS system. I've also received a letter from Mr. Perry Goldbar that was addressed to Commissioner Allen which states that the and part of it says that the Alaska State Housing Authority is at this tme making preparations to a' :empt to terminate our private employee retirement plan and we would like to become a memeber of the PERS on July 1 1978 if possible. Thank you for your assistant. This seems to me that if the Alaska State Housing Authority does joing at that point in time they cuold pick up past service for their employees and would be responsible for the liability of that service and would be consistent with the practices udner the other 68 employers within the system.

Senator Ziegler -- assuming the changeover does not come about and we still have this agreived individual who he could resubmit this bill through a friend next year otherwise it moght be takne care of automatically in the

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 6, 1978

Present: Senators Orsini, Willis, Hackney and Ferguson; Reed Stoops, Senate Resources; Jack Chenoweth, Legislative Affairs Agency; Richard Holden, Department of Transportation and Public Facilities; Jim Rolle, Alaska Municipal League; Peter Froehlich, Attorney General's Office; Bob Waldrop, Department of Natural Resources; Veronica Clark, Department of Community and Regional Affairs; Robert Cole, Department of Health, Education and Social Services; Janice Gates, Department of Health, Education and Social Services.

Absent: Senator Sumner

The bills before the Committee today were SB 562, SB 533 and SB 183.

Chairman Orsini called the meeting to order at 3:05.

SENATE BILL 562

Pat Conheady and Bob Waldrop, Department of Natural Resources, stated that the bill responds to three basic needs: 1) Stability 2) land policy management and 3) guidance from the Administration and Legislature, the latter providing the kind of stability that the Department needs to transcend the Administrative whims of various governors and their cabinets. They stated that it was a reflection of the experience brought to them by the Land Use Planning Commission, Senator Poland and various land administrators around the state. They went on to highlight the needs of the bill. Basically it is a two part bill: 1) Establishes land resources inventory and 2) mandates that the Administration dispose of 50,000 acres of land in the first year and thereafter whatever the budgetary constraints are and whatever the wishes of the legislature are. Stated that this was so that the Department wouldn't run into the problem of needing the land but not having the money to make the land available. Bob Waldrop explained that the 50,000 acres was derived from an estimate that they decided the Department could enact this year if thye got sufficient assistance from the budgetary process. Pat Conheady stated that the State currently had patent to 36 million acres and presented a chart which illustrated the categories in which the land could be used. Bob Waldrop stated, however, that only approximately 1.4 million acres of State land was suitable for intensive habitation and agriculture.

They stated that the Department feels that if this bill and SB 568 were enacted into law it would give the voters an alternative at the ballot box come November on the Beirne initiative. The enactment of this legislation, they concluded, would provide a legislative umbrella for the implimentation of land policies, such as the municipal land selection bill.

SENATE BILL 183

Robert Cole, Department of Health, Education and Social Services stated

that this bill was really designed to place greater amounts of power in the hands of local voters in election districts in making decisions on how alcohol was to be sold, used and utilized within each community. He stated that this bill would do the following: election would be held which would allow voters to chose several options of how alcohol is to be sold and used in their communities. One of the options would be to completely restrict the sale of beverage alcohol. It would further empower through that same process citizens to restrict sell, plus ban shipment through mail orders or telephone orders in restricted areas. He stated that this bill would also allow communities that had voted to go dry to decide to open a community liquor store by referendum vote. He stated that another provision has to do with compensating communities in rural Alaska which voted to close liquor stores since they would lose a lot of local sales taxes. The proposal that the Department made was that if they chose to vote themselves dry the state would be willing to pay them a credit based upon a 10% per capita for lost sales tax revenue. The Committee and Mr. Cole went over the penalties for bootlegging and possession laws in the provisions of this bill. He stated that there was a provisions that retailers state-wide would receive a list of the communities that went dry and would be prohibited by law to receive any order from those communities. The Committee also discussed additional alternatives to going completely dry, such as permitting beer and wine but no hard liquor.

Jim Rolle, Alaska Municipal League, suggested that some consideration for local municipalities to protest to licensing of liquor sales on the local level should be made.

Chairman Orsini stated that this bill would be held in committee for further discussion.

SENATE BILL 533

Richard Holden, Deputy Commissioner of the Department of Transportation and Public Facilities and Keith Dick, Department of Transportation and Public Facilities. Mr. Holden stated that the Department had prepared a fiscal note and had some amendments for the bill.

Mr. Holden pointed out that currently there is no coordinated planning for capital facilities in rural Alaska. Consequently many expensive mistakes are made and inefficient projects are undertaken to provide, for example, schools were there are inadequate water supplies or sewer facilities. He continued that frequently small communities receive over-complicated facilities without the means of funding their operation, since one area of state government is not required to coordinate its activities with another.

The proposed Committee Substitute for SB 533, in Holden's view, would provide DOT with the authority to coordinate the numerous agency programs in rural areas.

Veronica Clark, Department of Community and Regional Affairs stated that she and Larry Kimball also from the Department of C&RA had worked closely

with Mr. Holden on the amendments and two of the things that they were interested in having changed from the original bill was 1) make very clear the responsibilities of the other agencies and 2) expand the scope of the bill beyond municipalities and to include unincorporated areas. These were the two things the Department of Community and Regional Affairs wanted covered in this bill.

Mr. Holden discussed the problem of the state inventory of state owned buildings. He also stated that DOT was not funded to do this inventory and has to have the cooperation with other departments to be able to do this. He explained that the Department would approach it directly through the technical assistance program. He stated that they would not change the approach in rendering assistance it would still have to be at the request of local communities as opposed to automatically doing it.

Jime Rolle, stated that the Alaska Municipal League supports this bill.

Chairman Orsini stated that this bill would be brought before the committee again next week for further discussion.

Chairman Orsini adjourned the meeting at 5:00.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 11, 1978

Present: All Committee Members, Jay Moor, DPDP; Richard Holden, DOT; Reed Stoops, Senate Resources; Jack Chenoweth, Legislative Affairs; and Jim Rolle, Alaska Municipal League.

Senate Bill 533 and Senate Bill 562 were the bills before the Committee.

SENATE BILL 533

Richard Holden, Department of Transportation and Public Facilities, stated that the Department had drawn up an amended fiscal note and also some proposed amendments to the bill. He stated that both of these had been finalized with the Department of Community and Regional Affairs, Division of Policy, Development and Planning, Department of Health, Education and Social Services and Jim Rolle of the Alaska Municipal League. He said that the basic proposal of the bill was to achieve the coordination between agencies and municipalities by requiring state oversight of municipal and local activities which state agencies either fund or operate.

Mr. Holden explained that current statutes require DPDP to coordinate state capital improvement activities.

Jay Moor, DPDP, stated that his division had requested the inclusion of subsections 14 and 15 into the proposed committee substitute to insure DPDP's coordination role. He explained that subsection 14 stated that DPDP must maintain a comprehensive development plan and subsection 15 stated that planning agencies use coordinating projections.

Senator Sumner expressed his concern that DPDP's involvement with state agencies seemed more and more like a management role than that of a coordinating role. He was disturbed that he would be referred to DPDP for information by certain Departments when, in fact, he wanted the information from that Department first hand.

Mr. Moor explained that, in the case of two agencies disagreeing over planning policy, the dispute would be settled by the Governor's office. In such a situation, the Governor's office might request DPDP to prepare a staff study recommending one or another course of action.

In response to Committee questions, Mr. Holden acknowledged that a state agency desiring to construct a facility in a municipality would first be required to obtain local planning and zoning approval before work could begin. The existence of legislation along the lines of SB 533, he affirmed, would not remove municipal oversight on state activities within municipal boundaries.

Chairman Orsini stated that this bill would be brought up again Thursday, April 13, 1978, for further testimony.

SENATE BILL 562

Chairman Orsini asked the committee members if they wanted to work on the bill themselves or send it on to Senate Resources where they would be sure to change it. He suggested three possible changes in the bill, one of which would be an increase in acreage, dealing with the state trust lands and the concept of residential credits which, he stated, was not in the bill but would fit into it. The Committee members felt that it should go on through the process and Senator Ferguson moved that the Committee pass the bill out with individual recommendations.

The meeting was adjourned at 4:30 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 13, 1978

Present: All Committee Members; Tom Scott, HESS; Larry Kimball, Department of C&RA; Dick Holden, Department of Transportation; Charlie Smith, Department of Public Safety; Bruce Aronson, Department of C&RA.

Senate Bill 535 and Senate Bill 533 were the bills before the committee.

SENATE BILL 535

Tom Scott, Department of Health, Education and Social Services and Charlie Smith, Department of Public Safety, testified that their Departments support the bill.

In response to Chairman Orsini's inquiry, Bruce Aronson, Department of Community and Regional Affairs, stated that his department also supported the legislation.

Senator Hackney recommended SB 535 be passed out of Committee with a DO PASS recommendation. There was no objection.

SENATE BILL 533

Larry Kimball, Department of Community and Regional Affairs, explained that his department is mandated to assist communities on a request basis. SB 533 would not change any of the authority C&RA already possesses.

Under Section 2 of the proposed committee substitute, Kimball stated that C&RA would analyze and inform the Department of Transportation and Public Works, and appropriate program agencies, of the effects the proposed capital improvements would have on land use planning and municipal facility procurement plans.

Chairman Orsini noted that the bill's language would need tightening to insure that C&RA was not mandated to plan for municipalities, but would only become involved in planning upon request by a municipality.

Kimball stated that 12 to 15 community development plans had gone through his department since 1973. The department has never prepared in-house plans since this would require a diversified staff numerous planners which the department could not support on an on-going basis. Kimball stated that C&RA has concentrated on the larger communities, most of which now have comprehensive plans. Additionally, he stated, C&RA has funded 3 or 4 capital improvement elements in the comprehensive plans.

Kimball explained that C&RA's involvement in the fiscal note would be the development of information that DOT and other agencies would need. At present, C&RA does not have the budget or staff to do this. He noted that after three years C&RA's fiscal involvement would disappear with the completion of the projects.

Richard Holden, Department of Transportation and Public Works, testified that the original bill requires DOT to budget on behalf of other agencies for capital improvements, which in his view was not a proper function for his department. He stated that DOT's job should be to help them coordinate both the capital needs required by their programs and the capital needs that are generated which inter-agency coordination would require.

Chairman Orsini questioned why DOT would not prepare facilities inventories for municipalities with populations greater than 12,000. Holden explained that DOT would grant them the funds to do their own inventory since these municipalities would have adequate expertise to do the job with their own personnel.

The Committee discussed the definition of "public facilities" in the legislation and expressed concern that the committee substitute might include any facilities which had in any degree received state funding or administrative support. Examples included fisheries, new farm enterprises, medical facilities, clinics and home finances with state veterans loans.

Chairman Orsini stated that SB 533 would be taken up for further Committee discussion on Tuesday, April 18, 1978.

The meeting was adjourned at 4:20 p.m.

SENATE COMMUNITY & REGIONAL AFFAIRS
COMMITTEE MEETING

April 18, 1978

Present: Senators Orsini, Willis, Hackney and Sumner; Cherie Shelly, APEA; Jon Scribner, Department of Environmental Conservation; Lowell Swartz, Department of Health, Education and Social Services; Richard Peter; Robert L. Cole, Department of HESS; Robert L. Stewart; Greg Mackyowsky, Code Revision Commission; Bob Van Houte, NEA-Alaska; Richard Holden, Department of Transportation and Public Facilities; Janice Gates, Department of HESS.

Absent: Senator Ferguson

Senate Bill 373, relating to public information regarding collective bargaining by public employees; Senate Bill 533, relating to planning of public facilities for municipalities; Senate Bill 183, relating to alcoholic beverages and House Bill 795, appropriations for Fairbanks Town and Village Assoc., for Development, Inc., were the bills before the Committee.

SENATE BILL 373

Chairman Orsini stated that there was a committee substitute for this bill which covered most of the testimony that was heard on the bill. Senator Hackney moved that the Committee pass out SB 373 with individual recommendations.

HOUSE BILL 795

Senator Hackney moved that the Committee pass out HB 795 with individual recommendations.

SENATE BILL 533

Jack Chenoweth, Legislative Affairs Agency, explained the committee substitute draft to the Committee members. Section 1 is from the original bill. Section 2 derived from draft provided by Richard Holden, DOT, requiring that there be a state-wide comprehensive facility procurement plan done by the Commissioner. He also explained that he had defined "public facility", which was of some concern to the Committee last meeting. Section 3 expands upon the public responsibility of the Department of Community and Regional Affairs in this process.

Chairman Orsini stated that he would like to pin down the concepts and make the initial changes in the bill Thursday

Janice Gates, Department of HESS, called attention to the Committee that on Page 2, Sec. (d) dealing with health care facilities that "in communities without such facilities", was confusing and unnecessary. The Committee discussed the rest of the items on that page and it was brought out that there was other language that was not particularly necessary. The language would be revised for Committee consideration on Thursday.

Richard Holden, DOT, stated that a repealer, which states that highways and ferries are not a "public facility" was left out of the work draft.

Senator Sumner expressed concern regarding the health care and social services facilities in private finance facilities. He stated that there were serious questions regarding the "certificate of need" and whether that is not some sort of self-regulating opportunity. He also stated that he wanted to make sure that if "certificate of need" and planning were not tied together in this bill that they are not tied together in practice as well.

Jon Scribner, Department of Environmental Conservation, with regard to the water and sewer system section of the bill, stated that DEC has a program in which it works with local communities and the communities themselves set the priorities on their water and sewer systems. In that regard, he stated, the Department was unsure of how this kind of program fits in with this particular bill. He went on to explain that the Department has an Advisory Committee, which the Legislature set up last year that sets money priorities for villages in this program. Mr. Holden stated that there was a solution to this problem, because most of the agencies have some sort of peculiarity with e.g. source of federal funds. He stated that in one of the earlier committee meetings Senator Sumner suggested that a clause go in the bill that Administrative regulation draft to implement this legislation be developed by each program agency for that particular programing and approved by them before promulgating it.

Chairman Orsini stated that he would like to have a new draft drawn up incorporating some of the concerns expressed and again stated that the final adjustments would be made Thursday.

SENATE BILL 183

The Committee had a draft committee substitute drawn up and Jack Chenoweth, Legislative Affairs Agency, pointed out some of the differences in the proposed draft and the original bill. He stated that he generally went throughout the bill and cleaned up where the references were. He explained that he added language, at the Committee's request, giving municipalities greater authority with respect to the renewal or new applications for a liquor license. Chairman Orsini suggested that there should be some requirement to prevent the ABC Board from taking action on applications in that 30-day period. Mr. Chenoweth stated that the only way a municipality can disapprove an application would be with a local ordinance. He stressed the validity of that ordinance as it could be subject to a law suit.

Mr. Chenoweth stated that he tried to shorten and simplify the language of the referendum ballot language that is actually put before the public to determine liquor sales within a community or municipality.

He explained section 04.15.438 which would give a municipality the option of staying wet but with the sale of non-distilled alcoholic beverages only, such as beer and wine.

In reference to penalties, Mr. Chenoweth stated that on Page 16, line 2 "may" was changed to "shall". This was done so that on a third violation there would be no question, the license would be revoked and the operation would be closed. Mr. Robert Cole, Department of HESS, pointed out that in changing "may" to "shall" that it should also be done on Page 15, line 28 referring that the board, council or assembly "shall" revoke a license upon the direction of the majority of its members upon the first and second violations.

Senator Hackney added that "consective" terms for violations should be put into the language.

The Committee also instructed Mr. Chenoweth to prepare a separate bill, to be introduced by the Committee, containing Section 9 and the Section on Limitation of Sales from the CS of SB 183. The resulting new legislation would deal only with municipal authority, in the CSSB 183.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 20, 1978

Present: Senators Orsini, Willis, Hackney and Ferguson, Lee Sharp, Attorney for the City and Borough of Juneau; Jim Rolle, Alaska Municipal League; Larry Kimball, C&RA; Dick Holden, DOT; Vivian Hegg, League of Women Voters; Lowell Swartz, Dept. of HESS; Kathy Brown, Senator Ferguson's staff; Veronica Clark, Dept. of C&RA; Jack Chenoweth, Legislative Affairs Agency; Murray Walsh, Alaska Coastal Policy Council.

Absent: Senator Sumner

Senate Bill 533 and the Alaska Coastal Management Regulations were before the Committee today.

SENATE BILL 533

Dick Holden, DOT, testified that he had no problem with the present draft of the bill.

Chairman Orsini stated that on Page 2, delete Section (G) and on Section (E) "school" should be changed to "education". Chairman Orsini also questioned if there was any particular reason why "sanitation facilities and recreation facilities" were not included in the bill. Mr. Holden replied that it was an oversight. It was decided that "sanitation facilities" should be addressed in the bill but there was question on whether "recreation facilities" was too open-ended. In response, Dick Holden suggested that if DOT finds facilities that are state-funded under the definition of "public facility" that should be included DOT can always recommend including them at a later date.

Chairman Orsini stated that on Page 3, Line 20, that if the language "exceed 50%" was used it would be excluding schools, which is currently 50% and then suggested using "50% or more". Also on Page 3, Line 14, Chairman Orsini suggested deleting "by the state".

Chairman Orsini stated that the capital improvements aspect of planning had basically been taken care of but questioned the comprehensive planning stage. Dick Holden stated that C&RA would take care of that with the monies provided for in the fiscal note.

Larry Kimball, Dept. of C&RA, gave an outline of the communities throughout the state that already had comprehensive plans. He stated that the estimated monies for 220 community profiles should be revised to reflect 105 and the other 115 should have about $15,000 to $30,000 cost involved and the larger 17 regional centers should have one closer to $50,000. He also suggested that the 17 regional centers be done in context of the comprehensive plan and the remainder given the composition of those villages.

Chairman Orsini requested that the fiscal note be updated by an additional $3 million. The bill containing these revisions would be taken up again on April 25.

COASTAL MANAGEMENT GUIDELINES AND STANDARDS

Chairman Orsini stated that the legislature had passed a bill last session which was thought to have made clear that the legislature would have to approve the Coastal Policy Council's regulations. A legal opinion from Jack Chenoweth, Legislative Affairs Attorney, in a letter of March 28 pointed out, however, that the Council's regulations were not defined -- the Alaska Coastal Management Act on requiring Legislative approval.

Murray Walsh, Alaska Coastal Policy Council, stated the Council's entire guideline effort was conducted with the assumption that the Legislature would take some sort of affirmative action. The Council would feel more secure having guidelines which also received Legislative endorsement. He also stated that the Council intends to examine the guidelines on an annual basis to correct whatever flaws which the actual operations of the Coastal program might uncover.

Jim Relle, Alaska Municipal League, stated that he had a meeting scheduled the next day in Anchorage with members from different communities. He stated that he would be looking for specific input from those members that have participated frequestnly on the Council and also from communities that had no participants. He wanted to see if they were satisified with the regulations.

Vivian Hegg, stated that the League of Women Voters supported the process and the product.

Senator Hackney suggested that the Committee introduce a resolution similar to the one the House C&RA introduced and proceed from there.

The meeting was adjourned at 3:40.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 25, 1978

Present: Senators Orsini, Sumner, Willis and Ferguson; Roger Allington, Co-Chairman of the Alaska Coastal Management Council; Murray Walsh, Office of Coastal Management; Bruce Aronson, Department of C&RA; Pat Sharrock, ABC Board; Jim Rolle, Alaska Municipal League.

Absent: Senator Hackney came latter part of meeting.

The meeting was called to order at 3:10.

SB 533, SB 208, SB 599 and SCR 103 were the bills before the Committee.

SENATE BILL 533

Senator Sumner moved and asked unanimous consent that the Committee pass out CSSB 533 with individual recommendations.

SENATE BILL 208

Bruce Aronson, Dept. of C&RA, testified that the Department supports SB 208. Senator Sumner moved and asked unanimous consent that the Committee pass out SB 208 with individual recommendations.

SENATE BILL 599

Chairman Orsini stated that SB 599 is an outgrowth from discussions on SB 183, which is part of the Governor's Alcohol package. The bill does essentially two things -- first, it allows a municipality to adopt ordinances by which either new, renewel or transferred liquor licenses could be rejected by a municipality. If a municipality does not act to reject the license request within 30 days the application is automatically placed before the ABC Board.

Senator Sumner questioned the need to transfer a state level function, such as liquor licensing, to the local government level.

Chairman Orsini stated that Section 1 and 2 both deal with municipalities but were separate from each other. Section 2 gives an intermediate means of municipal alcoholic control if the municipality votes to do this. It would limit sales to nondistilled alcoholic beverages, such as beer and wine.

Chairman Orsini stated that he had spoken with CHAR Lobbyist, Dorothea MacDonald, and she initially had no objection to the bill but stated that the CHAR executive committee later decided to oppose it.

Pat Sharrock, Director of the Alcohol Beverage Control Board, stated that one provision of the bill that he does like is the requirement for a municipality to place a license application on its agenda for a public hearing. He stated that one are of the bill seemed to be a conflict or a duplication, which is where the applicant and the ABC

Board both would be required to send a copy of the application to the governing body involved. In regards to the 30 day waiting period provided for a municipality to disapprove an application he asked that it be specified when the 30 day count-down would begin.

Mr. Sharrock had no comments on Section 2 of the bill.

Jim Rolle, Alaska Municipal League, in response to the concern that the municipalities may be given too much power by being able to reject applications, stated that now the only protest to the ABC Board is generally in the area of health and zoning. He stated that this bill would give municipalities an option. Then if they chose not to adopt appropriate ordinances the ABC Board would continue to make the decisions. He stated that the municipal officials are, in his opinion, as effective as the ABC Board in judging what is good for their community and what isn't.

He also stated that he agreed with Mr. Sharrock that the 30 day period is confusing. He also had no comment on Section 2.

COASTAL MANAGEMENT GUIDELINES AND STANDARDS

Chairman Orsini stated that the Committee now has SCR 103 before the Committee approving the regulations.

Roger Allington, Co-Chairman of the Alaska Coastal Policy Council, stated that the Coastal Management regulations are slightly different from other regulations. For one, he pointed out that they are being promulgated by a specially-organized body, the Alaska Coastal Policy Council, composed of government and public members. He also noted that the intent of the regulations was to establish broad policy principles and allow local municipalities and district to draw up their own management programs essentially on a zoning basis. Furthermore, the areas themselves would draw their own boundaries for coastal management jurisdiction, providing certain criteria were met.

Although the Council extensively revised the final version of the regulations, Allingtion stated that on the last part of Section 85, concerning council review, was new. He also stated that there was a major change in the Timber Harvest Section of the regulations which was requested by the timber industry. There was also work done on the subsistence section. The question was raised of what would happen if local or state agency regulations conflicted with the Coastal Regulations. Mr. Allington replied that the agencies or local governments must bring their regulations into conformity with the coastal management program.

Murray Walsh, Coastal Zone Management Office, stated that the critical time would be the next six or seven months which would bring out the flaws and problems of the regulations. He also stated that the Legislature should consider an increase in state funding of this program just to give the coastal management more flexibility and eliminate some of that federal dependence.

The meeting was adjourned at 4:35.

JUNEAU, ALASKA 99801

Mr. Chairman:

We would like to go on record in support of SB 533 with the requested amendments by the Department of Transportation. I might add that we were participants in the meeting from which the amendments came.

Mr. Chairman, we view this as an opportunity for municipalities to do what they have wanted to do in the past, but lacked resources in time, money and expertise. We feel that SB 533 will fill that gap.

It is our understanding of the bill that the effort will be cooperative between the municipalities and the Department of Transportation and the Department of Community and Regional Affairs. We find this refreshing as we hope their participation would give them a better idea of the needs of the municipalities in the future, and that a cooperative effort by all state agencies will provide a better growth pattern in the municipalities where facilities are being contemplated.

Thank you for the opportunity to support this bill.

SENATE BILL NO. 533 - "AN ACT RELATING TO PLANNING FOR PUBLIC FACILITIES"

Section 1. AS 44.42.020(a) is amended by adding new paragraphs to read:

(13) Maintain a current inventory of Public Facilities for municipalities and unincorporated villages with populations of less than 12,000 and on a cooperative basis with larger municipalities. The inventory shall include a record of the condition of the facilities and the capability of expansion or addition.

(14) The Department shall request and receive on an annual basis from all program agencies, prior to the initiation of a Facility Procurement Plan, a projection of the anticipated facility needs for the next annual Capital Improvement Program, including:

(a) Justification of the level of service anticipated by the program agency.

(b) The geographic location to be served, and all relevant data concerning that agency's existing public facilities in that location.

(c) The date by which the anticipated services must be delivered.

(d) Alternative program methods for delivering the anticipated services.

(e) Other pertinent data requested by the Department in accordance with procedures developed under AS 35.10.180.

(15) Develop specific facility procurement plans.

(a) For projects in the following catagories:

(i) sewage transmisstion and treatment systems in communities without a central system;

(ii) water transmission and treatment systems in communities without a central system;

(iii) electrical generation and distribution systems;

(iv) health care facilities in communities without such facilities, unless those facilities can be provided in conjuction with school facilities;

(v) school facilities which will provide adequate recreational, physical fitness, public library, health care, and other related activities;

(vi) transportation facilities which will provide all-weather access for supplies and transportation to employment centers on a reliable and consistent basis;

(vii) community development projects which will provide local employment opportunities;

(viii) public safety and justice facilities;

(b) To accomodate the various levels of service specified in paragraph (14) above including:

(i) recommendations on current and future facility needs; '(14)(B)(iii)

(ii) space standards and design guidelines for the appropriate facility types;

(iii) maintenance and operations standards and guidelines for the appropriate facility types;

(iv) recommendations on construction techniques and contracting methods.

(v) facility project budget requirements.

(16) Following development of specific Facility Procurement plans, the Department shall submit its findings and recommendations to the appropriate program agency to facilitate the development of program agency capital improvement budget requests.

(17) Coordinate the specific Facility Procurement Plans of various program agencies in order to:

(a) Make technical recommendations on the total Capital Improvement Program;

(b) Identify common facility need among the various user agencies.

Section 2. AS 44.47.080 shall be amended by adding new paragraphs to read:

(C+RA)

(2) The Department shall make recommendations to the Department of Transportation and Public Facilities and the appropriate program agencies concerning the effects upon the land use planning of the appropriate municipalities of facility procurement plans developed under AS 44.42.020 a(15)

(C+RA)

(3) The Department shall coordinate with and obtain approval from the Municipalities effected by Facility Procurement plans developed under AS 44.42.020 a(15).

Section 3. Definitions

Program Agency - program agency means the state agencies responsible for delivery of services delineated in Section 1 paragraph 15(A) above.

Public Facility - public facility means a physical facility funded all or in part by the State for the purposes delineated in Section 1 paragraph 15(A) above.

Section 4 AS 35.10.200 (3) is repealed. (DEFINITIONS - "life cycle", "policies", "public facilities" - excluding highways + services)

2nd Proposed CS 4/11/78 L. Kimbell

SENATE BILL NO. 533 - "AN ACT RELATING TO PLANNING FOR PUBLIC FACILITIES"

Section 1. AS 44.42.020(a) is amended by adding new paragraphs to read:

(13) Maintain a current inventory of Public Facilities for municipalities and unincorporated villages with populations of less than 12,000 and on a cooperative basis with larger municipalities. The inventory shall include a record of the condition of the facilities and the capability of expansion or addition.

(14) The Department shall develop specific facility procurement plans based on criteria developed by program agencies under paragraph (15) and in accordance with policies promolgated under the State Comprehensive Development Plan per AS 44.19.880 (2). – DPDP

(15) The Department shall request and receive on an annual basis from all program agencies, prior to the initiation of a Facility Procurement Plan, a projection of the anticipated facility needs for the next annual Capital Improvement Program, including:

(a) Justification of the level of service anticipated by the program agency utilizing population projections and estimates approved by the Governor.

(b) The geographic location to be served, and all relevant data concerning the agency's existing public facilities in that location.

(c) The date by which the anticipated services must be delivered.

(d) Alternative program methods for delivering the anticipated services.

(e) Other pertinent data requested by the Department in accordance with procedures developed under AS 35.10.180. ~ ? Physical facil procurement & planning policies

(16) Develop specific facility procurement plans.

(a) For projects in the following catagories:

(i) sewage transmission and treatment systems in communities;

(ii) water transmission and treatment systems in communities

(iii) electrical generation and distribution systems;

(iv) health care and social service facilities in communities;

(v) school facilities in communities;

(vi) transportation facilities to or in communities;

(vii) community development projects which will provide local employment opportunities;

(viii) public safety and justice facilities;

(ix) renewable resource facilities;

(x) communication facilities;

(xi) other public facilities;

(b) To include recommendations to accomodate the various levels of service specified in paragraph (15) above including:

(i) current and future facility needs;

(ii) space standards and design guidelines for the appropriate facility types;

(iii) maintenance and operations standards and guidelines for the appropriate facility types;

(iv) construction techniques and contracting methods;

(v) facility project budget requirements.

(vi) relative costs of identified alternatives (Life Cycle Cost Analysis)

(17) Following development of specific Facility Procurement plans, the Department shall submit its findings and recommendations to the appropriate program agency to facilitate the development of program agency capital improvement budget requests.

(18) Coordinate the specific Facility Procurement Plans of various program agencies in order to:

(a) make technical recommendations on the total Capital Improvement Program to the program agencies and to the Divisions of Policy Development and Planning and Budget and Management.

(b) Identify common facility need among the various user agencies.

Section 2. AS 44.47.080 shall be amended by adding new paragraphs to read:

(2) The Department of Community and Regional Affairs shall make recommendations to the Department of Transportation and Public Facilities and the appropriate program agencies concerning the effects upon the land use planning of the appropriate municipalities of facility procurement plans developed under AS 44.42.020 a(15).

Section 3. AS 44.42.900 is amended by the addition of the following definitions:

(4) Program Agency - program agency means the state agency responsible for the approval of or delivery of public facilities delineated in Section 1 paragraph 15(A) above.

(5) Public Facility - public facility means a physical facility funded all or in part by the State or operated all or in part by the State for the purposes delineated in Section 1 paragraph 15(A) above.

Section 4 AS 35.10.200 (3) is repealed.

Section 5 AS 44.19.880 shall be amended to read:

(2) The Division of Policy Development and Planning shall prepare and maintain a State Comprehensive Development Plan which shall include policies for the coordination of state agencies.

(12) Review all proposals for the location of capital improvements by all state agencies including facility procurement plans developed under AS 44.42.020 and advise and make recommendations concerning location of these capital improvements.

	$970,000	$900,000

POSITION PAPER/Department of Health and Social Services

Senate Bill No. 533

Senate Bill No. 533 proposes to add specific duties to the Department of Transportation and Public Facilities which relate to the maintenance of:

1. an inventory of public facilities,
2. an evaluation of future service ability of these facilities and
3. providing the Governor with a prioritized list of replacement facilities and proposed new facilities in areas where none currently exist.

One category of facilities to be included in the prioritized list to be submitted to the Governor is that of health care facilities. This inclusion appears to be a duplication of responsibilities. Existing statutes provide for the Department of Health and Social Services to perform these activities concerning health care facilities. These duties are referenced in AS 44.29.020, AS 18.20.140-220, AS 18.25.010-120 and AS 18.07.011-111.

The latter citation addresses the functions of the State Health Planning and Development Agency which are guided by P.L. 93-641. One function of this agency is outlined in Sections 1602-1603 of P.L. 93-641 (attached) and relates specifically to requirements of medical facilities planning as prerequisites to the receipt of federal funding allocations for medical facility construction.

Historically and under the existing Statute, planning for construction of health facilities has been one in which not just public facilities are considered but other non-profit and proprietary facilities as well. In the funding of new construction, non-profit and public facilities have both been eligible under various programs. The current trend, both nationally and in Alaska favors tying facilities planning even more directly to the planning for health services in general.

The Department of Health and Social Services therefore questions the apparent dual authority being proposed concerning health care facilities planning and secondly questions whether planning for health care facilities could appropriately be done without consideration of and full involvement in the planning for health services.

Without commenting as to the inadequacy of the proposed criteria for prioritization in relation to other types of facilities, these criteria would be considered by this Department to be inadequate as related to health care facilities. In administering its medical facility planning function, the Department takes into consideration such factors as the comprehensive provision of health care services, the financial resources of the community, etc.

The Department recommends that SB 533 be amended to permit the Department of Transportation to draw upon the medical facilities planning capability of the Department of Health and Social Services in maintaining a current inventory of public facilities and in prioritizing future health facility construction needs.

1. 4 AAC 06 .030 SCHOOL CONSTRUCTION. Repealed / / .

2. 4 AAC is amended by adding a new chapter to read:

CHAPTER 31. SCHOOL FACILITY PLANNING AND CONSTRUCTION.

Section

10. Educational specifications
20. Guides for planning educational facilities
30. Review of school construction plans
40. Approval of school construction plans
50. Approval of purchase of non-school facilities
60. State aid for school construction
90. Definitions

4 AAC 31.010 EDUCATIONAL SPECIFICATIONS. The chief school administrator, under the direction of the school board, is responsible for the preparation of educational specifications for all new public elementary and secondary schools, additions, and major rehabilitation of existing facilities. These educational specifications must include, as a minimum, the following:

(1) the current and four year projected elementary and secondary enrollments to be served by the attendance center;

(2) a statement of educational philosophy and goals for the proposed facility;

(3) the curriculum to be housed by the facility;

(4) the activities that will be conducted in the facility;

(5) the anticipated community uses of the facility;

(6) the specific architectural characteristics desired;

(7) the spaces needed, their equipment requirements, and their space relationship to other facility elements; and

(8) the size, use, and condition of existing school spaces in the attendance center. (Eff. / / , Register)

Authority: AS 14.07.020(1) & (7)
AS 14.07.060
AS 43.18.100(b)

4 AAC 31.020 GUIDES FOR PLANNING EDUCATIONAL FACILITIES. The following are the basic guides for state educational facility planning:

(1) The Guide for Planning Educational Facilities as published by the Council of Educational Facilities Planners, International, 1976 edition;

(2) A Guide to the Development of Program Statements and Educational Specifications for Small Secondary Schools as published by the Alaska State Department of Education, 1977 edition;

(3) Alaska Small High School Program and Space Guidelines as published by the Alaska State Department of Education, 1977 edition;

(4) Alaska Small Elementary School Program and Space Guidelines as published by the Alaska State Department of Education, 1977 edition;

(5) Department of Education Guidelines for School Equipment Purchases as published by the Alaska Department of Education, 1977 edition; and

(6) Alaska's Program Planning and Facilities Procurement Process: Educational Facilities as published by the Alaska Department of Transportation and Public Facilities, 1977 edition. (Eff. / / , Register)

Authority: AS 14.07.020(1),(7)
AS 14.07.060
AS 43.18.100(b)

4 AAC 31.030 REVIEW OF SCHOOL CONSTRUCTION PLANS. (a) The elements of a plan for new school construction, additions, or rehabilitation to be undertaken by a school district must be submitted to the commissioner for his review and recommendations as they are developed and before any construction activity is initiated.

(b) The commissioner shall waive, upon prior request, submission of those elements of a plan which are not applicable, as determined by him, to a proposed addition or rehabilitation project.

(c) For purposes of this section, "plan" includes the following:

(1) educational specifications;

(2) schematic design documents;

(3) final construction contract documents:

(4) estimated cost and proposed means of financing the project;

(5) proposed method of construction; and

(6) estimated completion date of the project. (Eff. / / , Register)

Authority: AS 14.07.020(1),(7)
AS 14.07.060
AS 14.08.101(6),(7)
AS 43.18.100(b)

4 AAC 31.040 APPROVAL OF SCHOOL CONSTRUCTION PLANS. (a) Before they may commence construction activity, regional educational attendance areas undertaking new school construction, additions, or rehabilitation with funds granted to them under AS 14.08.161(d) and cities or boroughs which are school districts undertaking such construction projects for which state aid will be sought under AS 43.18.100 must secure the approval of the commissioner of the final working documents for the project as follows:

(1) if construction contract bids are to be invited for the project, the final working documents must be submitted to the commissioner at least 15 working days before the bid invitation is made; and

(2) if the project will not be advertised for bids, the final working documents must be submitted to the commissioner no later than ~~ten~~ 10 working days after the final working documents for each construction phase are available.

(b) The commissioner's approval under (a) of this section is void after two years unless construction on the project has been initiated within that time. (Eff. / / , Register)

Authority: AS 14.07.020(1),(7)
AS 14.07.060
AS 14.08.101(6),(7)
AS 43.18.100(b)

4 AAC 31.050 APPROVAL OF PURCHASE OF NON-SCHOOL FACILITIES. Regional educational attendance areas proposing to purchase an existing facility for use as an elementary or secondary school with funds granted to them under AS 14.08.161 and cities and boroughs which are school districts proposing to make such a purchase for which state aid under AS 43.18.100 will be sought must secure the approval of the commissioner before acquisition of the facility. (Eff. / / , Register)

Authority: AS 14.07.020(1),(7)
AS 14.07.060
AS 14.08.101(6),(7)
AS 43.18.100(b)

4 AAC 31.060 STATE AID FOR SCHOOL CONSTRUCTION. (a) This section applies to claims by cities and boroughs which are school districts for state aid for school construction costs under AS 43.18.100.

(b) Claims must be made on forms prescribed by the commissioner and, with respect to construction projects commenced or existing facilities purchased after July 1, 1978, must have been approved by the commissioner under sec. 40 or sec. 50 of this chapter, respectively.

(c) All claims for expenditures must be supported by a certified audit report of the school district prepared in accordance with the requirements of 4 AAC 06.120 and by a certified audit report of all school construction accounts or funds used by the city or borough. If the audit reports are not prepared in sufficient detail to clearly identify school construction costs as opposed to other construction and maintenance costs, or debt service costs of school construction as opposed to other debt service costs, detailed expenditure schedules that reconcile to audit report figures must be prepared and submitted with the claims.

(d) Only actual disbursements may be included as expenditures. Transfers into bond redemption funds or capital project funds are not eligible for reimbursement under AS 43.18.100.

(e) Only cash disbursements from locally generated revenues are eligible for reimbursement under AS 43.18.100(a)(1) and (3).

(f) Unless a claim is supported by financial schedules and prior year audit reports identifying the original source of revenue, only disbursements from revenues generated in the year for which the claim is made are eligible for reimbursement. (Eff. / / , Register)

Authority: AS 14.07.020(1),(7)
AS 14.07.060
AS 43.18.100(b)

4 AAC 31.090 DEFINITIONS. As used in this chapter and AS 43.18.100, unless the context requires otherwise:

(1) "additions" means providing space for expanded educational p[illegible]ms, new program spaces or replacement of substandard or destroyed s[illegible]; by connection to an existing school facility and includes capital e[illegible]ment;

(2) "capital equipment" means built-in and movable equipment used to furnish a newly constructed or rehabilitated space; It includes first-time purchase of library books, reference material and media to furnish a new or renovated library; It does not include supply items such as textbooks and expendable commodities; The term is further defined in the Department of Education Guidelines for School Equipment Purchases, 19[illegible] edition;

(3) "commissioner" means the commissioner of the department of education;

(4) "elementary and secondary schools" means buildings which have been built or converted predominently for instruction of elementary and secondary students as defined in Alaska Small Elementary Program and Space Guidelines, 1977 edition, and Alaska Small High School Program and Space Guidelines, 1977 edition, or, for schools designed to house in excess of 100 students, not more than 100 gross square feet per student in kindergarten through the eighth grade and not more than 150 gross square feet per student in the ninth through twelfth grade, and buildings for the support of that instruction;

(5) "locally generated revenues" means revenue derived from sales or property taxes levied by the city or borough, revenue in-lieu-of taxes received by the school district under PL 81-874 and AS 14.17.215, and funds received under AS 43.18.100 and AS 43.50.140;

(6) "new school construction" means providing space for educational programs which have not been previously offered, replacing a substandard or destroyed school building or providing space for an expanded enrollment in the attendance center by construction or reconstruction of a detached school facility of any size, with related capital equipment;

(7) "rehabilitation" means adapting an existing facility to improve the opportunity to provide a contemporary educational program. It includes major remodeling, repair, renovation and modernization, with related capital equipment; These projects generally exceed 25% of the current cost of replacement of the facility or $100,000, whichever is less;

(8) "school construction costs" means the costs of construction, as well as consultant services relating to planning, design, administration, review, cost control, construction inspection, and legal services, along with the direct costs of site acquisition, capital equipment purchase, and related expenses of district employees whose main function is to work on the construction project; Projects eligible for state aid under AS 43.18.100 include public elementary and secondary school new construction, additions, and rehabilitation, and may include other site improvements and facilities as approved by the commissioner, but do not include employee or student housing; Municipal and state offices, health clinics, community libraries, and other spaces may be built jointly with a school if approved by the commissioner as to compatibility and separation of funds; The commissioner has final authority to determine the proration of space and costs between school space and other space in such a jointly built project. (Eff. / / , Register)

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 13, 1978

Present: All Committee Members; Tom Scott, HESS; Larry Kimball, Department of C&RA; Dick Holden, Department of Transportation; Charlie Smith, Department of Public Safety; Bruce Aronson, Department of C&RA.

Senate Bill 535 and Senate Bill 533 were the bills before the committee.

SENATE BILL 535

Tom Scott, Department of Health, Education and Social Services and Charlie Smith, Department of Public Safety, testified that their Departments support the bill.

In response to Chairman Orsini's inquiry, Bruce Aronson, Department of Community and Regional Affairs, stated that his department also supported the legislation.

Senator Hackney recommended SB 535 be passed out of Committee with a DO PASS recommendation. There was no objection.

SENATE BILL 533

Larry Kimball, Department of Community and Regional Affairs, explained that his department is mandated to assist communities on a request basis. SB 533 would not change any of the authority C&RA already possesses.

Under Section 2 of the proposed committee substitute, Kimball stated that C&RA would analyze and inform the Department of Transportation and Public Works, and appropriate program agencies, of the effects the proposed capital improvements would have on land use planning and municipal facility procurement plans.

Chairman Orsini noted that the bill's language would need tightening to insure that C&RA was not mandated to plan for municipalities, but would only become involved in planning upon request by a municipality.

Kimball stated that 12 to 15 community development plans had gone through his department since 1973. The department has never prepared in-house plans since this would require a diversified staff numerous planners which the department could not support on an on-going basis. Kimball stated that C&RA has concentrated on the larger communities, most of which now have comprehensive plans. Additionally, he stated, C&RA has funded 3 or 4 capital improvement elements in the comprehensive plans.

Kimball explained that C&RA's involvement in the fiscal note would be the development of information that DOT and other agencies would need. At present, C&RA does not have the budget or staff to do this. He noted that after three years C&RA's fiscal involvement would disappear with the completion of the projects.

Richard Holden, Department of Transportation and Public Works, testified that the original bill requires DOT to budget on behalf of other agencies for capital improvements, which in his view was not a proper function for his department. He stated that DOT's job should be to help them coordinate both the capital needs required by their programs and the capital needs that are generated which inter-agency coordination would require.

Chairman Orsini questioned why DOT would not prepare facilities inventories for municipalities with populations greater than 12,000. Holden explained that DOT would grant them the funds to do their own inventory since these municipalities would have adequate expertise to do the job with their own personnel.

The Committee discussed the definition of "public facilities" in the legislation and expressed concern that the committee substitute might include any facilities which had in any degree received state funding or administrative support. Examples included fisheries, new farm enterprises, medical facilities, clinics and home finances with state veterans loans.

Chairman Orsini stated that SB 533 would be taken up for further Committee discussion on Tuesday, April 18, 1978.

The meeting was adjourned at 4:20 p.m.

F: SB 535

SENATE BILL NO. 535

"An Act authorizing emergency medical services by municipalities inside and outside the corporate limits of municipalities."

The Department of Health and Social Services supports Senate Bill 535 as consistent with the program objectives of the Department.

Alaska law (AS 29.48.030) delineates which services home rule local government may provide within its municipal boundaries. Those services may not be provided outside of the boundaries unless specifically authorized by AS 29.048.037.

The purpose of Senate Bill 535 is to allow municipally operated ambulances to respond beyond the boundaries of the municipality. Presently, ambulances do respond beyond the boundaries of the municipality regardless of the law because human life is at stake. However, when the ambulance does leave the city limits any insurance the city may carry, including liability and workmen's compensation, does not cover the extraterritorial incident.

The City of Petersburg recently faced this problem. Ambulance and fire protection was not provided to those citizens living outside the boundaries of the City because of lack of insurance. The problem was solved when the city council determined that even though residents outside the boundaries do not pay city property tax that the city would provide the ambulance services first and then worry about liability.

This attitude is prevalent in Alaska. The law needs to be changed so that our cities are not penalized for providing vital services that no one else is providing or is able to provide.

The Department understands that this provision will not increase the cost to the State in revenue sharing or other obligations, nor will it allow the cities to tax extraterritorially for the services.

SENATE COMMUNITY AND REGIONAL
AFFAIRS COMMITTEE MINUTES

April 4, 1978

Present: Senators Orsini, Hackney, Sumner and Willis; Janet McCabe, Federal-State Land Use Planning Commission; Rynnieva Wescott, Fairbanks Town & Village Assoc.; Pat Conheady, Department of Natural Resources; Walt Parker, Federal-State Land Use Planning Commission; John Katz, Federal-State Land Use Planning Commission.

Absent: Senator Ferguson

Senate Bill 562 and House Bill 795 were the bills before the committee.

Chairman Orsini called the meeting to order at 3:02.

HOUSE BILL 795

Rynnieva Wescott, Fairbanks Town and Village Association for Development, Inc. stated that there were four basic goals of the program: 1) To develop a comprehensive program for public works projects in their region 2) to establish a closer multi-agency communications and coordination within communities 3) to create provisions for reduction in construction leave time and cost of public facilities and 4) to insure the capital improvements budgeting reflects the economic development goals of local decision makers and residents. She also stated that the Rural Capital Improvements Program was involved in long range economic development planning in an area consisting of 240,000 square miles with 45 small communities in the area. There are 32 organized municipalities and the rest are run by traditional village councils. She stated that the Rural Capital Improvements Program was basically funded by state money though it has a planning grant from EDA that includes the entire district. It also receives planning money from the borough for planning within the borough.

Chairman Orsini asked whether state money was being used to plan development of private enterprises. Ms. Wescott replied that Town and Village Assoc. works with village corporations to assist in planning and helps in finding funding for the corporations' projects.

Chairman Orsini stated that this bill would come before the committee again for further discussion.

SENATE BILL 562

Janet McCabe, Federal-State Land Use Planning Commission, stated that the Commission had assisted the Senate Resources Committee and the Administration in preparing this bill for the disposal of approximately 50,000 acres of state lands annually into private ownership. She stated that the Commission supports SB 562. She

gave a background of state land use up until the present. She also went over the three main sections of the bill and outlined the intent of each section. The Committee members, Ms. McCabe, Mr. Walt Parker, Commission Co-Chairman and Mr. John Katz, Commission Attorney discussed the municipal land selections, wilderness permits and the means by which Stated trust lands could be used for income producing purposes.

Chairman Orsini stated that this bill would also be held in committee for further discussion. The meeting was adjourned at 4:10 p.m.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 6, 1978

Present: Senators Orsini, Willis, Hackney and Ferguson; Reed Stoops, Senate Resources; Jack Chenoweth, Legislative Affairs Agency; Richard Holden, Department of Transportation and Public Facilities; Jim Rolle, Alaska Municipal League; Peter Froehlich, Attorney General's Office; Bob Waldrop, Department of Natural Resources; Veronica Clark, Department of Community and Regional Affairs; Robert Cole, Department of Health, Education and Social Services; Janice Gates, Department of Health, Education and Social Services.

Absent: Senator Sumner

The bills before the Committee today were SB 562, SB 533 and SB 183.

Chairman Orsini called the meeting to order at 3:05.

SENATE BILL 562

Pat Conheady and Bob Waldrop, Department of Natural Resources, stated that the bill responds to three basic needs: 1) Stability 2) land policy management and 3) guidance from the Administration and Legislature, the latter providing the kind of stability that the Department needs to transcend the Administrative whims of various governors and their cabinets. They stated that it was a reflection of the experience brought to them by the Land Use Planning Commission, Senator Poland and various land administrators around the state. They went on to highlight the needs of the bill. Basically it is a two part bill: 1) Establishes land resources inventory and 2) mandates that the Administration dispose of 50,000 acres of land in the first year and thereafter whatever the budgetary constraints are and whatever the wishes of the legislature are. Stated that this was so that the Department wouldn't run into the problem of needing the land but not having the money to make the land available. Bob Waldrop explained that the 50,000 acres was derived from an estimate that they decided the Department could enact this year if thye got sufficient assistance from the budgetary process. Pat Conheady stated that the State currently had patent to 36 million acres and presented a chart which illustrated the categories in which the land could be used. Bob Waldrop stated, however, that only approximately 1.4 million acres of State land was suitable for intensive habitation and agriculture.

They stated that the Department feels that if this bill and SB 568 were enacted into law it would give the voters an alternative at the ballot box come November on the Beirne initiative. The enactment of this legislation, they concluded, would provide a legislative umbrella for the implimentation of land policies, such as the municipal land selection bill.

SENATE BILL 183

Robert Cole, Department of Health, Education and Social Services stated

that this bill was really designed to place greater amounts of power in the hands of local voters in election districts in making decisions on how alcohol was to be sold, used and utilized within each community. He stated that this bill would do the following: election would be held which would allow voters to chose several options of how alcohol is to be sold and used in their communities. One of the options would be to completely restrict the sale of beverage alcohol. It would further empower through that same process citizens to restrict sell, plus ban shipment through mail orders or telephone orders in restricted areas. He stated that this bill would also allow communities that had voted to go dry to decide to open a community liquor store by referendum vote. He stated that another provision has to do with compensating communities in rural Alaska which voted to close liquor stores since they would lose a lot of local sales taxes. The proposal that the Department made was that if they chose to vote themselves dry the state would be willing to pay them a credit based upon a 10% per capita for lost sales tax revenue. The Committee and Mr. Cole went over the penalties for bootlegging and possession laws in the provisions of this bill. He stated that there was a provisions that retailers state-wide would receive a list of the communities that went dry and would be prohibited by law to receive any order from those communities. The Committee also discussed additional alternatives to going completely dry, such as permitting beer and wine but no hard liquor.

Jim Rolle, Alaska Municipal League, suggested that some consideration for local municipalities to protest to licensing of liquor sales on the local level should be made.

Chairman Orsini stated that this bill would be held in committee for further discussion.

SENATE BILL 533

Richard Holden, Deputy Commissioner of the Department of Transportation and Public Facilities and Keith Dick, Department of Transportation and Public Facilities. Mr. Holden stated that the Department had prepared a fiscal note and had some amendments for the bill.

Mr. Holden pointed out that currently there is no coordinated planning for capital facilities in rural Alaska. Consequently many expensive mistakes are made and inefficient projects are undertaken to provide, for example, schools were there are inadequate water supplies or sewer facilities. He continued that frequently small communities receive over-complicated facilities without the means of funding their operation, since one area of state government is not required to coordinate its activities with another.

The proposed Committee Substitute for SB 533, in Holden's view, would provide DOT with the authority to coordinate the numerous agency programs in rural areas.

Veronica Clark, Department of Community and Regional Affairs stated that she and Larry Kimball also from the Department of C&RA had worked closely

with Mr. Holden on the amendments and two of the things that they were interested in having changed from the original bill was 1) make very clear the responsibilities of the other agencies and 2) expand the scope of the bill beyond municipalities and to include unincorporated areas. These were the two things the Department of Community and Regional Affairs wanted covered in this bill.

Mr. Holden discussed the problem of the state inventory of state owned buildings. He also stated that DOT was not funded to do this inventory and has to have the cooperation with other departments to be able to do this. He explained that the Department would approach it directly through the technical assistance program. He stated that they would not change the approach in rendering assistance it would still have to be at the request of local communities as opposed to automatically doing it.

Jime Rolle, stated that the Alaska Municipal League supports this bill.

Chairman Orsini stated that this bill would be brought before the committee again next week for further discussion.

Chairman Orsini adjourned the meeting at 5:00.

SENATE COMMUNITY AND REGIONAL AFFAIRS
COMMITTEE MINUTES

April 11, 1978

Present: All Committee Members, Jay Moor, DPDP; Richard Holden, DOT; Reed Stoops, Senate Resources; Jack Chenoweth, Legislative Affairs; and Jim Rolle, Alaska Municipal League.

Senate Bill 533 and Senate Bill 562 were the bills before the Committee.

SENATE BILL 533

Richard Holden, Department of Transportation and Public Facilities, stated that the Department had drawn up an amended fiscal note and also some proposed amendments to the bill. He stated that both of these had been finalized with the Department of Community and Regional Affairs, Division of Policy, Development and Planning, Department of Health, Education and Social Services and Jim Rolle of the Alaska Municipal League. He said that the basic proposal of the bill was to achieve the coordination between agencies and municipalities by requiring state oversight of municipal and local activities which state agencies either fund or operate.

Mr. Holden explained that current statutes require DPDP to coordinate state capital improvement activities.

Jay Moor, DPDP, stated that his division had requested the inclusion of subsections 14 and 15 into the proposed committee substitute to insure DPDP's coordination role. He explained that subsection 14 stated that DPDP must maintain a comprehensive development plan and subsection 15 stated that planning agencies use coordinating projections.

Senator Sumner expressed his concern that DPDP's involvement with state agencies seemed more and more like a management role than that of a coordinating role. He was disturbed that he would be referred to DPDP for information by certain Departments when, in fact, he wanted the information from that Department first hand.

Mr. Moor explained that, in the case of two agencies disagreeing over planning policy, the dispute would be settled by the Governor's office. In such a situation, the Governor's office might request DPDP to prepare a staff study recommending one or another course of action.

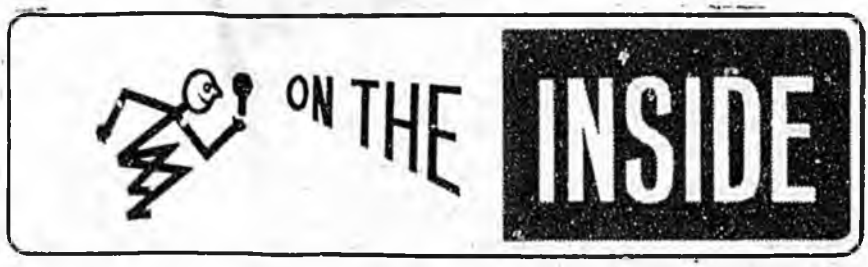
In response to Committee questions, Mr. Holden acknowledged that a state agency desiring to construct a facility in a municipality would first be required to obtain local planning and zoning approval before work could begin. The existence of legislation along the lines of SB 533, he affirmed, would not remove municipal oversight on state activities within municipal boundaries.

Chairman Orsini stated that this bill would be brought up again Thursday, April 13, 1978, for further testimony.

SENATE BILL 562

Chairman Orsini asked the committee members if they wanted to work on the bill themselves or send it on to Senate Resources where they would be sure to change it. He suggested three possible changes in the bill, one of which would be an increase in acreage, dealing with the state trust lands and the concept of residential credits which, he stated, was not in the bill but would fit into it. The Committee members felt that it should go on through the process and Senator Ferguson moved that the Committee pass the bill out with individual recommendations.

The meeting was adjourned at 4:30 p.m.



NO HIPPIES—While walking around town today the Insider heard several young people complaining that the land opened for public selection under the "Hippy Homestead" bill passed last year was being taken by older folks who had been in Alaska 35 or 40 years, and no hippies were getting the land. Evidently we've called the bill by its nickname so long that some folks think that's the official title and intent. It's not. The designation came from an earlier version sponsored by Rep. Oral Freeman, D-Ketchikan, which legislators said would give land only to the types of people losing out on the residency-based land selection program now.

To: Alaska House of Representatives
Alaska State Senate

Senator Joseph Orsini:

C.S.S.B. 562 "An act relating to Alaska land policy" should be rescinded by the Senate and stopped in the House. It is a deceptive measure which disenfranchises the people of Alaska from their State land. It is passed off as a conveyance of land into private hands but actually it is a massive lock up of state land patterned after the BLM Organic Act. It can be used to create an instant wilderness devoid of private human use.

The land is the foundation of our economy, our livelihoods, our liberty. Please read the following notes on CSSB 562.

Chapter 4 Title is deceptive because it addresses state land surface whereas the bill addresses both surface and subsurface.

Section 38.04.065 has sections lifted verbatim from the BLM Organic Act which have already proved unworkable. This section effectively removes all the basic rights of citizens on the land and places the land in the hands of total bureaucratic control.

Subsection (e) can be used to prevent any private activity on the land for an indefinite period pending classification. This means hunting, fishing, guiding, mining, logging, every conceivable private use.

The entire section gives total discretion over our lives to the Commissioner.

What does subsection (b)(3) mean? In whose judgement are these decisions to be made?

Subsection (b)(8) can easily be used to close all state lands to mining and oil exploration and development.

Section 38.04.070 creates new systems for reserves, parks, wild and scenic rivers. Do we not have enough of this from the Feds already?

This bill completes the process of economic suicide of Alaska's resource industries that was begun with 17d-2 and HR-39 (even potentially including tourism through application of Section 38.04.065 (e)). Yet it is being hailed as an aid to private ownership. It is a monstrous deception.

My outfit has hoped to employ over 100 Alaskans this year, which generates about 40 jobs with subcontractors. But if you people pass anything like CSSB 562 into law, the predictable consequence of the regulations which will be promulgated is that the resource industries will be drowned in bureaucracy and these potential jobs will be lost. The task of raising risk capital for exploration will become insurmountable.

I implore you not to disenfranchise us from our land. At the least, please give us a chance to testify at public hearings. Our livelihoods are at stake.

Respectfully,

Jeff Knaebel

F: SB 562

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2325

GEORGE M. SULLIVAN
MAYOR

OFFICE OF THE MAYOR

April 17, 1978

The Honorable Kay Polland
Alaska State Senator
Pouch V
Juneau, Alaska 99811

Dear Senator Polland:

Senate Bill No. 562 will come before the Natural Resources Committee on Monday, April 17, 1978. There are three sections of this Bill which may adversely affect the Municipality of Anchorage. We would like to share our concerns with you regarding these sections before the Bill is heard by your committee.

Proposed section 38.04.045 (b) deals with the survey and subdivision of State land to be conveyed to private ownership. This section mandates compliance with local planning and platting ordinances. However, this section exempts from these ordinances land made available through mineral sales or a cabin permit system.

We object to the exemption provision for two reasons. First, it would be detrimental to the Municipality's planning program because under it large segments of land within the Municipality would not be subject to our planning and platting ordinances. If certain segments of land are not subject to the Municipality's planning and platting ordinances, then the ordinances become ineffective because they are designed to regulate <u>all</u> the land within the Municipality.

Second, the exemption provision conflicts with the policy contained in A.S. 09.55.275 which requires that any agency of the State must comply with local platting regulations in the same manner as private land owners when the State seeks to acquire property. This policy logically applies to the converse, i.e. when the State seeks to dispose of property. Providing for a partial exemption when the State seeks to dispose of property appears to serve no purpose. For the foregoing reasons, we suggest that the exemption provision be deleted.

Proposed section 38.04.065 deals with State Land Use Planning and Classification. Subsection (g) requires that State land use plans be consistent with local plans only to the extent that the Commissioner determines the local plan to be consistent with State interests.

We object to this subsection because is seems to conflict with A.S. 35.10.020 entitled "Consultation with Municipal Planning and Zoning Commissions". This section requires the State to comply with all local planning and zoning ordinances in the same manner as private land owners unless a State agency can "clearly demonstrate an overriding State interest". When a State agency makes such a showing, a specific waiver must be granted by the Governor.

We suggest that subsection (g) be made consistent with the language in A.S. 35.10.020 by amending the latter to require State land use plans to be consistent with Municipal plans unless a gubernatorial waiver is granted upon a "clear showing of an overriding State interest".

Proposed Section 38.04.065 would involve the State in regional land use planning in areas which now have local planning. The Municipality of Anchorage has actively engaged in a land use planning program and intends to maintain this effort. Until the degree of State involvement in local land use management is clarified, we cannot support this proposed section.

Sincerely,

George M. Sullivan
Mayor

Michael J. Meehan
Director of Planning

/sw

SENATE BILL 562 "An Act relating to Alaska land policy"

Background

SB 562 was introduced by the Senate Resources Committee, chaired by Senator Poland. The bill's counterpart in the House is HB 904, introduced by the Governor. According to Senator Poland's AA, the basic data for SB 562 was prepared by the Land Use Planning Commission. Senator Poland, who had been interested in this subject, used the LUPC material and, in conjunction with the Governor, got the two bills introduced, one in the House and the other in the Senate. (SB 568, introduced by Senate Rulles at the Governor's request, allows a state resident a land credit of $1,000 for each year's continuous residence in Alaska. SB 568 has not been referred to Senate Community and Regional Affairs)

Purpose (Sec. 38.04.020)

In FY 79, the director of lands would make available to the public not less than 50,000 acres. Not more than ten percent of this figure could be used for leasing. For each year thereafter, the director will present three options to the Legislature: 1) an increased-level land dispoal program, 2) a current-level program and 3) a reduced-level program. One of these options must include at least 50,000 acres.

Criteria (Sec. 38.04.035)

1) To cover costs to public, the land must be conveyed to private ownership at fair market value.

2) Land readily accessible to community centers or where it has a high commercial value should be either leased or sold to private owners.

3) Lease programs should be used:

   a) for special public needs to control specific land use
   b) when intended use is temporary
   c) in commercial or industrial uses where leases would generate high cash flow
   d) unique location with special public values
   e) where public demand use is high, such as waterfront recreation

4) Limited or conditional title to the land where the state determines this to be in the public interest (e.g. agriculture).

Policy (Sec. 38.04.005)

1) Choice of lands to be conveyed shall be determined through the inventory, planning and classification process of the bill.

2) The director of lands shall make adequate provision for public open spaces accessible to communities for public recreation.

3) The requirement for future generations must be considered and adequate state land retained for their needs.

4) Involvement of municipalities and local residents is essential in determining conveyance of state land to private ownership.

Other

In addition to the disposal of land, the bill also calls for the director of lands to develop, maintain and revise land use plans for state-owned land, according to a set of criteria. (Sec. 38.04.065)

The bill also sets up (Sec. 38.04.070) a series of Management Systems for state lands retained in public ownership. They include: State Public Reserve System, State Park System, State Trails System, Wild and Scenic River Systems and State Public Domain.

In addition it outlines criteria for the retention of state land (Sec. 38.04.015)

Senate Community and Regional
Affairs Committee Staff

April 4, 1978

SB150

Senate Bill 562

"An Act relating to Alaska Land Policy"

This bill, based on the recommendations of the Federal-State Land Use Policy Commission, seeks to provide a comprehensive land use policy for state land which will implement broad constitutional goals for both public and private purposes. These policies are to be sufficiently detailed to guide administration decision making. The legislature must approve annually, the Administration's state land disposal program.

The bill contains three major elements:

1) Policy for Use and Classification of State land and Surface. Article VIII of the Alaska Constitution mandates that the state provide for a balanced combination of public and private land use and to allocate suitable land for such use.

   Local involvement in land classification prior to disposal is provided for in order to balance public use against private which may be especially important in lands adjacent to communities.

2) Land Availability for Private Use. This section mandates that state land be made available to individuals on an annual basis in locations and parcel sizes that best meet differing needs in different parts of the state. A minimum of 50,000 acres shall be made available during the first year after enactment, no more than 10% of which shall be for leases. Thereafter, the Administration shall present to the legislature annually for its approval, three options for land disposal programs. These options will be a) an increased level program, b) a current level program, and c) a reduced level program. At least one option must include at least 50,000 acres.

3) Inventory, Planning and Classification. The bill requires the timely completion of an inventory of the resource values of all state lands. Through use of the inventory, land needs may be met with the best possible lands designated for the purpose intended. The designation of land use shall be accomplished in cooperation with local governments and the public.

In addition to existing state land management systems (State parks, trail systems, wild and scenic river systems, etc) a new classification called the State Public Reserve System is established for lands to be designated for multiple uses. The legislature would retain its existing authority to approve any designation of more than 640 acres which would close land to multiple use.

Further provisions establish guidelines for surveys and subdivision, public access and easements.

WRITTEN BY PETE FROELICH IN THE AG'S OFFICE

Introduced: 3/22/78
Referred: Community & Regional Affairs, Resources and Finance

IN THE SENATE BY THE RESOURCES COMMITTEE

SENATE BILL NO. 562

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to Alaska land policy; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. Alaska's Constitution directs that the state "encourage the settlement of its land and the development of its resources by making them available for maximum use consistent with the public interest" (art. VIII, sec. 1), and to "provide for the utilization, development, and conservation of all natural resources belonging to the State, including land and water for the maximum benefit of its people" (art. VIII, sec. 2). The constitution also directs that "Fish, forests, wildlife, grasslands, and all other replenishable resources belonging to the State shall be utilized, developed, and maintained on the sustained yield principle, subject to preferences among beneficial uses" (art. VIII, sec. 4). The purpose of this Act is to implement these broad constitutional goals through establishment of policies for use of state land surface and to express these policies in sufficient detail to guide the administrative decisions which govern the use and management of state-owned land.

* Sec. 2. AS 38 is amended by adding a new chapter to read:

CHAPTER 4. POLICY FOR USE AND CLASSIFICATION OF STATE LAND SURFACE.

ARTICLE 1. PUBLIC AND PRIVATE LAND USE.

Sec. 38.04.005. POLICY. (a) In order to provide for maximum use of state land consistent with the public interest, it is the policy of the State of Alaska to plan and manage state-owned land to

establish a balanced combination of land available for both public and private purposes. The choice of land best suited for public and private use shall be determined through the inventory, planning, and classification processes set out in secs. 60 and 70 of this chapter.

(b) In classifying state land for private use and settlement purposes, the director shall make adequate provision for public open space which is accessible to communities so that natural areas are easily reached from all communities and settled areas. The amount of such land must be sufficient to meet existing and projected needs for accessible public recreation land. Special care shall be taken to preserve public access to public water and to retain state ownership of sufficient land which combine high value for recreation and other public purposes with accessibility to settled areas. This classification for public purposes does not constitute dedication to open space, but the division's management of land so classified shall be in a manner to preserve the identified values.

(c) In allocating land for private use and public retention, the requirements of future generations must be considered. To this end, a supply of state land of a variety of types and locations must be reserved to provide an opportunity for future decisions.

(d) Private land use rights are integral to the material well-being of the people of Alaska and our society.

(e) Involvement of municipalities and local residents is essential in the decision making process which leads to making state land available for private use.

Sec. 38.04.010. PUBLIC INTEREST IN MAKING LAND AVAILABLE FOR PRIVATE USE. (a) The primary public interest in conveying rights to state land surface to private parties is to make them available to individuals and other persons for direct use in areas classified as

suitable for these purposes. In making state land available for private use, the director shall seek to guide year-round settlement to areas where public services already exist, or can be extended with reasonable economy, or where development of a viable economic base is probable.

(b) State land which is located beyond the range of existing schools and other necessary public services, or which is located where development of sources of employment is improbable, may be made available for seasonal recreational purposes or for low density settlement, with sufficient separation between residences so that public services will not be necessary or expected.

Sec. 38.04.015. PUBLIC INTEREST IN RETAINING STATE LAND IN PUBLIC OWNERSHIP. The primary public interests in retaining areas of state land surface in public ownership are:

(1) to make them available on a sustained yield basis for a variety of beneficial uses including subsistence, forestry, grazing, sport hunting and fishing, hiking, snowmobiling, skiing, and other activities of a type which can generally be made available to more people and conducted more successfully if the land is in public rather than private ownership;

(2) to facilitate mining and mineral leasing by managing appropriate public land for surface uses which are compatible with subsurface uses;

(3) to protect critical wildlife habitat and areas of special scenic, recreational, scientific, or other environmental concern;

(4) to restrict development in floodplains, avalanche zones, and other hazardous locations; and

(5) to guide the location of settlement and development to

SUBSISTENCE AMENDMENTS COULD be plogged in here

minimize public costs and maximize social and economic benefits.

ARTICLE 2. LAND AVAILABILITY FOR PRIVATE USE.

Sec. 38.04.020. TIMING AND AMOUNT. On a continuing or annual basis, the director shall make available for private use an array of state land suitable for a variety of uses. During fiscal year 1979, the director shall make available a minimum of 50,000 acres, not more than 10 per cent of which may be made available for leasing. Annually thereafter, the following three options for the state land availability program must be submitted to the legislature along with the administration's budget: an increased-level program, a current-level program, and a reduced-level program. At least one option must include at least 50,000 acres.

Sec. 38.04.025. VARIETY OF USES. In making state land available for private use, the director shall endeavor to accommodate persons with a current need and anticipated use for the land. To this end, the director shall assess the nature of the supply and demand for state land in different regions and locations of the state, taking into account the supply of available land under other ownership, and shall make land available in locations and other programs suited to the differing needs of prospective users throughout the state.

Sec. 38.04.030. LAND AVAILABILITY PROGRAMS. Programs which may be used by the director to make the state's land surface available for private use under this section include sale of whole or partial rights to the fee simple estate, including conveyance of agricultural use rights; leasing; open-to-entry; homesiting; homesteading; permitting for construction and occupation of cabins in isolated locations on land retained in state ownership; and other methods as provided by law.

Sec. 38.04.035. CRITERIA FOR PROGRAM SELECTION. In determining

which land availability program is appropriate for state lands in different locations, the director shall be guided by the following criteria:

(1) To cover public costs associated with private land use and to provide the public with a fair return for publicly owned property, conveyance of state land to private parties should be at fair market value except where otherwise authorized by statute or by administrative regulation.

(2) Sale or lease programs should be employed where land is readily accessible to a major community center or where, because of a prime location on waterfront or a transportation route or some other location characteristic, land has relatively high real estate value.

(3) Lease programs should be employed

(A) where special land use controls are required and there is a high public interest in having certain types of land used for particular purposes;

(B) when the intended use is a temporary one;

(C) in commercial or industrial situations when a leasehold can provide cash flow advantages to the lessee;

(D) when a unique location with special public values is involved, as in a deep water port; and

(E) where current demand for private use is high, but projections suggest that, in the future, the land may be more valuable for public use, as in accessible waterfront recreation areas.

(4) For enabling isolated cabin development in remote locations where survey and conveyance is impractical, a system for cabin permits on public land should be used.

(5) Limited or conditional title may be granted when the

state's best interest so dictates. Among other things, title limitations may include grants of agricultural interest only, retention of development rights, and retention of scenic or other easements. A conditional title may be tied to a development schedule or other standards of performance.

Sec. 38.04.040. AVAILABILITY OF MENTAL HEALTH LAND, SCHOOL LAND, AND UNIVERSITY LAND. Mental health land, school land, and university land may be made available at fair market value for private use under the purposes of this chapter; however, any such action must be in accordance with statutes pertaining to these lands and the authority of the mental health land board, the Board of Education, and the Board of Regents of the University of Alaska.

Sec. 38.04.045. SURVEY AND SUBDIVISION. (a) State land to be conveyed in fee simple or less than fee simple estate must be subdivided so that lots and tracts are of a size which fits the requirements of individual users and reflects the physical characteristics of the land, except that in locations where there is an inadequate margin between the demand for and the supply of vacant land, the state may make land available for private acquisition in parcels that are larger than required for individual use.

(b) Before the conveyance of surface rights to state land, an official cadastral survey must be accomplished, unless a comparable, acceptable survey exists that has been conducted by the Federal Bureau of Land Management. The rectangular survey section corner positions must be monumented and shown on a cadastral survey plat approved by the state. However, for those areas where the state may wish to convey surface estate outside of an Official Cadastral Survey grid, the director may waive monumentation of all individual section corner positions and substitute an official control survey with control

points being monumented at approximately two-mile intervals and shown on control survey plats approved by the state. No portion of land to be conveyed may be located more than two suitable miles from such a survey control monument. The lots and tracts in state subdivisions must be monumented and the cadastral survey and plats for the subdivision must be approved by the state. Where land is located within a municipality with planning, platting, and zoning powers, plats for state subdivisions must comply with local ordinances and regulations in the same manner and to the same extent as plats for subdivisions by other landowners. State subdivisions must be filed in the district recorder's office. The requirements of this section do not apply to land made available through material sales or a cabin permit system, or under short-term leases.

Sec. 38.04.050. ACCESS TO PRIVATE USE AREAS. Wherever state land is surveyed for purposes of private use, adequate rights-of-way and easements must be reserved as necessary for access and, where appropriate, for power and telephone service to each parcel of land. Where necessary and appropriate for the use intended, the director shall arrange for the development of surface access as part of the land availability program. The direct cost of local access development must be borne by the recipient of the land unless otherwise provided by state statutes or regulations.

Sec. 38.04.055. ACCESS THROUGH PRIVATE USE AREAS. The director shall reserve easements and rights-of-way on and across land which is made available for private use as necessary to reach or use public water and public and private land.

ARTICLE 3. INVENTORY, PLANNING, AND CLASSIFICATION.

Sec. 38.04.060. INVENTORY. (a) The commissioner shall prepare and maintain on a continuing basis an inventory of all state land and

water and their resource and other values, giving priority to areas of potential settlement and of critical environmental concern. This inventory must be kept current so as to reflect changes in conditions and to identify new and emerging resource and other values.

(b) The commissioner's inventory must include land and water under interagency assignment of land management authority and land and water proposed for such an assignment. That land and water must be reviewed at regular intervals to analyze current and proposed uses as these uses relate to alternative uses for all or part of the land and to determine the uses which best provide for the public interest.

(c) As funds and manpower are made available, the commissioner shall provide local and federal governments and major private landowners with data from the inventory for the purpose of planning and managing the uses of land in proximity to state land.

Sec. 38.04.065. LAND USE PLANNING AND CLASSIFICATION. (a) The commissioner shall, with local governmental and public involvement, develop, maintain and, when appropriate, revise land use plans which provide, by regions or areas, for the use of the state-owned land.

(b) In the development and revision of land use plans, the commissioner shall:

(1) use and observe the principles of multiple use and sustained yield;

(2) use a systematic interdisciplinary approach to achieve integrated consideration of physical, economic, and social factors affecting the region or area;

(3) give priority to planning and classification in areas of potential settlement and critical environmental concern;

(4) rely, to the extent that it is available, on the inventory of the state land, its resources, and other values;

(5) consider present and potential uses of state land;

(6) consider the supply, resources, and present and potential use of land under other ownership within the area or region of concern;

(7) weigh long-term benefits to the public against short-term benefits;

(8) plan for compatible surface and mineral land use classifications; and

(9) provide for meaningful participation in the planning process by affected local governments, state and federal agencies, adjacent landowners, and the general public.

(c) As a basis for more detailed land use planning and classification, the commissioner shall develop regional land use plans for the use of all state land. These regional plans must identify and delineate (1) areas of settlement and settlement impact, where land must be classified for various private uses and for public recreation, open space, and other public uses desirable in and around settlement; and (2) areas which must be retained in state ownership and planned and classified for various uses and purposes in accordance with sec. 15 of this chapter.

(d) Official regional or area plans and subsequent amendments adopted by the commissioner after public and local governmental participation must be signed and dated by the commissioner. Land classifications must be made in accordance with these official plans.

(e) Land must be classified before being made available for private use or included in the management systems described in sec. 70 of this chapter.

(f) Decisions about the location of easements and rights-of-way, other than for minor access, must be integrated with land use planning

and classification for the appropriate area or region.

(g) Land use plans adopted by the commissioner under this section must be consistent with local governmental land use plans to the maximum extent he determines to be consistent with the state interests and the purposes of this chapter.

Sec. 38.04.070. MANAGEMENT SYSTEMS. (a) State land classified for uses and purposes involving retention in public ownership may be included in the following management systems:

(1) State Public Reserve System: areas of public land to be managed for a wide variety of compatible uses and purposes in accordance with the principles of multiple use and sustained yield; land designated to this system may include, but need not be limited to, state forest reserves and state wildlife reserves as well as land classified for public purposes within settlement impact areas;

(2) State Park System: areas with special recreational, scenic, cultural, historical, wilderness, or similar values, to be managed primarily for the public use and enjoyment of these values;

(3) State Trail System: a system of public historic or recreational trails;

(4) Wild and Scenic River Systems: a system of rivers with special natural, scenic, and recreational values designated by the state to be managed as part of the national system of wild and scenic rivers in accordance with the federal Wild and Scenic Rivers Act (82 Stat. 906; 16 U.S.C. 1271 et seq.);

(5) State Public Domain: land within areas designated on regional plans as settlement and settlement impact which are not part of the management systems listed in (1) -- (4) of this subsection; through classification, this land may be made available for private use, settlement, and development as well as for public uses associated

with settlement and development.

(b) State land classified in accordance with sec. 65 of this chapter may be included in the State Public Reserve System by proclamation of the governor.

(c) State land classified in accordance with sec. 65 of this chapter may be included in the State Park System, State Trail System or the Wild and Scenic River System by proclamation of the governor. However, no state land, water, or combination of land and water may, except by Act of the state legislature, be closed to multiple purpose use, if the area involved contains more than 640 acres.

ARTICLE 4. GENERAL PROVISIONS.

Sec. 38.04.900. REGULATIONS. The commissioner may adopt under the Administrative Procedure Act (AS 44.62) regulations he believes are necessary to carry out the purposes of this chapter. Within 120 days after the effective date of this Act, the director shall submit to the commissioner draft regulations implementing this chapter and revising regulations in effect on the effective date of this Act pertaining to planning, classification, management, and disposal of the state's surface estate in land. New and revised regulations must be integrated in a single comprehensive draft compatible with the structure of the Alaska Administrative Code. In preparing this draft, the director shall seek to simplify and clarify regulations governing land planning, classification, management, and disposal.

Sec. 38.04.910. DEFINITIONS. In this chapter, unless the context otherwise requires,

(1) "commissioner" means the commissioner of the Department of Natural Resources;

(2) "director" means the director of the division of lands of the Department of Natural Resources;

(3) "fair market value" means the price at which a willing seller and a willing buyer will trade;

(4) "multiple use" means the management of state land and its various resource values so that it is used in the combination that will best meet the present and future needs of the people of Alaska, making the most judicious use of the land for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; it includes (A) the use of some land for less than all of the resources, and (B) a combination of balanced and diverse resource uses that takes into account the short-term and long-term needs of present and future generations for renewable and nonrenewable resources, including, but not limited to, recreation, range, timber, minerals, watershed, wildlife and fish, and natural scenic, scientific, and historic values;

(5) "official cadastral survey" means a United States public land survey or a survey executed under survey instructions issued by the division for the purpose of preparing a cadastral survey plat, and approved and accepted by the division for the state's official records;

(6) "official control survey" means a position marked on the ground by triangulation or traverse stations established in conformity with standards adopted by United States Coastal and Geodetic Survey for first, second and third order work, whose geodetic positions have been rigidly adjusted on the North American datum of 1927 and approved by the division;

(7) "short-term lease" means a lease for a term of five years or less;

(8) "state park" means an area of state land designated by

proclamation of the governor or by statute to be managed for public use and enjoyment of recreational, scenic, cultural, historical, wilderness, and similar values, including but not limited to areas designated under (A) AS 41.20.050 - 41.20.060, roadside rests and recreational beaches; (B) AS 41.20.130 - 41.20.160, 41.20.330 - 41.20.345, ch. 61 SLA 1966, and ch. 26 SLA 1967, state recreation areas, (C) AS 41.20.170 - 41.20.320, state parks; and (D) AS 41.35.030, state monuments and historic sites;

(9) "state trail" means an area designated by proclamation of the governor or by statute to be managed as a public historic or recreational trail including but not limited to (A) trails designated under AS 41.20.070 - 41.20.120, wilderness trails and campsites; and (B) trails and footpaths designated under AS 41.20.355 - 41.20.375;

(10) "state wild and scenic river" means any free-flowing river or stream so designated by the state in accordance with the criteria set forth in the Federal Wild and Scenic Rivers Act (82 Stat. 906; 16 U.S.C, 1271-1287);

(11) "sustained yield" means the achievement and maintenance in perpetuity of a high level annual or regular periodic output of the various renewable resources of the state lands consistent with multiple use.

* Sec. 3. AS 38.05.300 is repealed.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Alaska State Legislature

Senate

Committee on Resources

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

MARCH 21, 1978

THE HONORABLE JOHN RADER
PRESIDENT OF THE SENATE
ALASKA STATE LEGISLATURE
JUNEAU, ALASKA 99811

DEAR MR. PRESIDENT:

THE PURPOSE FOR INTRODUCTION BY THE RESOURCES COMMITTEE OF "AN ACT RELATING TO ALASKA LAND POLICY" IS TO IMPLEMENT BROAD CONSTITUTIONAL GOALS FOR THE USE OF STATE LANDS FOR BOTH PRIVATE AND PUBLIC PURPOSES. THE APPROACH SUGGESTED IS THE ESTABLISHMENT OF LAND POLICIES SUFFICIENTLY DETAILED TO GUIDE ADMINISTRATIVE DECISION MAKING AND THROUGH ANNUAL LEGISLATIVE APPROVAL OF A STATE LAND DISPOSAL PROGRAM. CURRENTLY, IN SPITE OF IMPENDING LAND TRANSFERS TO THE STATE, A COMPREHENSIVE POLICY FOR THE USE OF STATE LANDS DOES NOT EXIST.

THE ACT IS BASED UPON RECOMMENDATIONS DEVELOPED AFTER LONG TERM STUDY BY THE FEDERAL-STATE LAND USE PLANNING COMMISSION AND REFINED THROUGH DISCUSSIONS WITH THE ADMINISTRATION. IT IS A JOINT EFFORT TO SET FORTH A RATIONAL PLAN FOR LAND DISPOSAL AND RETENTION, IN WHICH A NEED OF ALASKA'S RESIDENTS MAY BE SATISFIED IN A RESPONSIBLE MANNER.

THE BILL CONTAINS THREE MAJOR ELEMENTS:

(1) POLICY FOR USE AND CLASSIFICATION OF STATE LAND SURFACE. THIS INSURES THAT THE STATE'S LAND POLICY AS CONSTITUTIONALY MANDATED IN ARTICLE VIII IS TO PROVIDE FOR A BALANCED COMBINATION OF PRIVATE AND PUBLIC LAND USE AND TO ALLOCATE SUITABLE LAND FOR SUCH USE.

AS BALANCED LAND USE IS ESPECIALLY IMPORTANT IN LANDS ADJACENT TO COMMUNITIES, SPECIAL EMPHASIS IS PROVIDED INCLUDING A REQUIREMENT FOR LOCAL INVOLVEMENT IN LAND CLASSIFICATION PRIOR TO DISPOSAL.

(2) LAND AVAILABILITY FOR PRIVATE USE. THIS SECTION MANDATES THAT STATE LAND BE MADE AVAILABLE TO INDIVIDUALS ON AN ANNUAL BASIS IN LOCATIONS AND PARCEL SIZES THAT BEST MEET DIFFERING NEEDS IN DIFFERENT PARTS OF THE STATE. A MINIMUM OF 50,000 ACRES SHALL BE MADE AVAILABLE DURING THE FIRST YEAR AFTER ENACTMENT, NO MORE THAN 10% OF WHICH SHALL BE FOR LEASES. THEREAFTER, THE ADMINISTRATION SHALL PRESENT TO THE LEGISLATURE ANNUALLY FOR ITS APPROVAL, THREE OPTIONS FOR LAND DISPOSAL PROGRAMS.

THE OPTIONS MAY INCLUDE FEE SIMPLE TRANSFER, CONVEYANCE OF AGRICULTURAL RIGHTS, LEASING, OPEN-TO-ENTRY; HOMESITING, HOMESTEADING, AND REMOTE CABIN PERMITS.

FURTHER PROVISIONS ESTABLISH GUIDELINES FOR SURVEY AND SUBDIVISION, PUBLIC ACCESS, AND EASEMENTS.

(3) INVENTORY, PLANNING, AND CLASSIFICATION. THE BILL REQUIRES THE TIMELY COMPLETION OF AN INVENTORY OF THE RESOURCE VALUES OF ALL STATE LANDS. THROUGH USE OF THE INVENTORY, LAND NEEDS MAY BE MET WITH THE BEST POSSIBLE LANDS DESIGNATED FOR THE PURPOSE INTENDED. THE DESIGNATION OF LAND USE SHALL BE ACCOMPLISHED IN COOPERATION WITH LOCAL GOVERNMENTS AND THE PUBLIC.

IN ADDITION TO EXISTING STATE LAND MANAGEMENT SYSTEMS, A NEW CLASSIFICATION CALLED THE STATE PUBLIC RESERVE SYSTEM IS ESTABLISHED FOR LANDS TO BE DESIGNATED FOR MULTIPLE USES. THE LEGISLATURE WOULD RETAIN ITS EXISTING AUTHORITY TO APPROVE ANY DESIGNATION OF MORE THAN 640 ACRES WHICH WOULD CLOSE LAND TO MULTIPLE USE.

IT IS NOT THE INTENT OF THIS LEGISLATION TO OFFER A SIMILAR LAND DISPOSAL PROGRAM AS PROPOSED BY THE HOMESTEAD INITIATIVE. IT IS NOT A FREE LAND PROGRAM; IT WOULD NOT DISPOSE OF LAND IN SUCH VAST QUANTITY AS PROPOSED BY THE INITIATIVE; AND IT IS NOT INTENDED TO ENCOURAGE SPECULATION.

IT IS, HOWEVER, A RESPONSIBLE LAND DISPOSAL METHOD WHICH SHOULD BE CONSIDERED IRRESPECTIVE OF THE HOMESTEAD INITIATIVE.

SINCERELY,

Kay Poland

KAY POLAND, CHAIRMAN
SENATE RESOURCES COMMITTEE

KP:SS

The Honorable Hugh Malone
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of Article III, Section 18 of the Alaska Constitution, and in accordance with AS 24.30.060(b) and the Uniform Rules of the Alaska State Legislature, I am transmitting two bills related to the disposal of land. This legislation, in conjunction with existing law, will constitute a comprehensive long-term state land management policy and will mandate a rational process to make state land available for private ownership and use.

The first bill, called the Alaska Land Credit Act, will establish a new program by which state land would be made available at a minimal cost. The second measure, the Alaska Land Plicy Act, clarifies and supplements the broad multiple land use mandates set out in Article VIII of the Alaska Constitution.

We who live in this state should be able to secure land for private use. Twenty-two thousand people have underscored that desire for land by signing the Beirne/Kerttula initiative. But that initiative has real problems. It would require that up to thirty million acres be made available on a first-come, first-served basis. Each three-year resident would be entitled to stake 40 acres of public land wherever vacant state land exists. Land would be issued, free, to the first claimant without regard to their needs or public needs. No improvement or residence on the land would be required to gain title.

This is no plan to give people needed sites for cabins or other use. It is, plainly and simply, a vast land give-away which could create an Oklahoma land rush in Alaska.

Although many Alaskans recognize the problems of this approach, they support it because there is no permanent

policy established in the law to get even needed public lands into private ownership. An alternative method must be provided which creates a land policy that is reasonable, consistent, useable and stable.

I am introducing two bills into the Legislature today to provide that alternative. The bills accomplish the following:

Land Credit Bill - SB 568

1. Make a minimum 50,000 acres of land available to the public in the first year, in addition to that already being conveyed. Thereafter the amount made available each year is determined by the Legislature, but more land might be opened each year.

2. Establish a Land Credit of $1,000 for each year of residency. These credits may be used for up to 90% of the purchase or rental price of public land.

3. Land credits may be applied to all means of land disposal: Open to Entry, direct sales, lease sale of agricultural rights, and homesite programs.

Land Policy Bill SB 562

1. Establish a land and resource inventory program for analyzing the value and use potential of state land.

2. Establish a clear legislative statement of land disposal policy.

3. Establish a means for balancing private and public land uses and allocating lands for each purpose.

4. Establish a logical system to ensure useable and safe land is conveyed to the public.

These bills, I believe, meet the legitimate needs of the people of Alaska for land, but do so in a responsible manner. The bills accept the basic concept of the land disposal from the Beirne/Kerttula initiative but take it several logical steps further. I feel these bills are wider in application and more far-sighted in that they

provide for a continuation of desirable public uses on public lands while making land available to the citizens of Alaska for their needs.

Sincerely,

Jay S. Hammond
Governor

		HAMMOND	BIERNE[redacted]
ACREAGE AVAILABLE		Set annually by Legislature new lands must be made available each year.	30 million up to 160 acres per applicant. Best land claimed in first program year.
LIKELY LOCATION OF LAND		Determined by need and availability. A mixture of remote, community and commercial.	Generally remote.
PURPOSE FOR WHICH LAND CAN BE USED		According to owner's desires.	Due to remoteness, most likely is homesteading.
ACQUISITION METHOD		Use of land credits to purchase or lease or through normal methods. No land rush.	On-the-ground staking and filing of claim.
ELIGIBILITY		All over 18 years. Credits accrue according to length of residency.	All over 18 years and who have lived in Alaska more than 3 years.
COST	To applicant:	Determined by length of residency and location and size of parcel.	Free to first qualified applicant.
	To State:	Cost of government administration minimal.	Large additional administrative costs and personnel.

Juneau, Alaska 99811

Re: Public Notice and Review
under SB 562 (Land Policy)

Dear Joe:

I am writing to clarify any confusion I may have created by a misstatement I made before your committee at yesterday's hearing on SB 562 (relating to land policy).

In response to your question about public notice and review in the land planning and classification process established by the bill, Pat Conheady mentioned that AS 38.05.345 requiring notice of land disposals would still apply. I added that, likewise, AS 38.05.300 requiring notice of land disposals and classifications to, and consultation with, municipalities and regional corporations would also still apply. It was then pointed out that AS 38.05.300 would be repealed by SB 562. My mistake was that the statutory provision I had in mind is AS 38.05.305. This provision would not be repealed by the bill and would therefore, of course, still be applicable.

In addition, SB 562 requires local governmental and public involvement in the state land use planning and classification process. (See sec. 38.04.065(a) and (d) on pp. 8 and 9 of the bill).

I hope this explanation eliminates any confusion my misstatement of the citation to AS 38.05.305 might have caused. If I can provide any further assistance to your consideration of this bill, please let me know.

Sincerely,

AVRUM M. GROSS
ATTORNEY GENERAL

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

April 4, 1978

Senator Kay Poland, Chairman
Senate Resource Committee
Pouch V Mail Stop 3100
Juneau, Alaska 99811

Dear Senator Poland:

The subjects here are proposed legislation concerning selection and transfer of State land to municipalities - S.B. No. 241 and C.S. for H.B. No. 133 - and H.B. No. 886 - State Aid for Municipal Capitol Improvements. The Common Council of the City of Skagway submits for consideration the following comments and recommendations on these pieces of legislation:

S.B. No. 241, Sec. 29.18.202 states " ---For purposes of determination of entitlement, the boundaries of each municipality are those which existed on the initial date of eligibility under former Secs. 190 - 220."

The boundaries of the City of Skagway on the "initial date of eligibility" were established early in the century and do not encompass any significant amount of vacant, unappropriated, unreserved general grant land, 10% of which might be transferred to the City. Although the City has recently extended its boundaries through annexation, the new municipal limits include very little land that is suitable for development by the City. Even if transfer were permitted, there is a dearth of developable land in the Skagway area. There are some State and Federal lands, tentatively allocated for State selection, adjacent to the City which, subject to future annexation, could be selected by and transferred to the City and, subsequently, developed by the City or sold or leased to private enterprise. It is the City's view that this course of action offers the most practicable means of resolving the land shortage problem yet it appears that S.B. 241 will preclude this approach.

The C.S. for H.B. 133 contains much of the same material and, more specifically, limits the land entitlements or payments in lieu thereof to several boroughs and the Municipality of Anchorage. Is the omission of consideration of the land needs of other municipalities, such as Skagway for example, an oversight or is it the intent of the legislation?

H.B. No. 886: The City Council supports this legislation.

It is suggested that, as presently drafted, S.B. 241 and C.S. for H.B. 133 do not fulfill their Statements of Purpose and it is recommended that these two pieces of legislation be reviewed and revised so as to include equitable consideration of the needs for land or in lieu payments for all of the municipalities in Alaska.

Sincerely,

G.D. Acker
City Manager

April 7, 1978

Joe Orsini, Chairman
Senate Committee on Community
and Regional Affairs
ALASKA STATE LEGISLATURE
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Joe:

I am writing you as President of the Salamatoff Native Association, Inc., relative to the Alaska Coastal Zone Management Act, and we might just as well include the Act that relates to Wet-Lands, since it is doing the same thing.

First, there is no way you can discuss, intelligently, coastal zone until you define the zone. It is absolutely inconceivable to us that the coastal zone extends thirty or more miles inland. A zone 1,000 feet wide above higher high tide is more than adequate.

Second, the C.Z.M.A., should regulate those things that are detrimental to marine life or navigation, not the kind of structure or business placed on shore. We already have organizations that protect the public from the environment, watch out for their health and safety, and in general, take care of us from the cradle to the grave.

Third, C.Z.M.A., unless it repeals already existing regulations, only adds another layer of bureaucracy to a system that already over-regulates the public.

Fourth, the staff that will be required to police the proposed regulations staggers the imagination. How many people will be required to see that everyone who builds a two-holer, thirty miles inland from the coast, gets a permit? Who is going to diaper the moose and caribou that roam the area like the loggers had to do with their horses and mules in Oregon?

Rikia Murphy, Honorary Chief — *Wm Segura, President* — *Emery Shawalter, Sr., Vice President* — *Marjorie Jordan, Secretary & Treasurer* — *Toni Lindgren, Executive Sec.& Bkkper.*

Harry Mann, Director — *R. Andy Johnson, Director* — *Dan Johnson, Director* — *Mattie Bartos, Director*

Fifth, and probably most important, the State of Alaska, under the home rule concept, should never allow itself to be blackmailed by the Federal government into making bad laws under threat of having other Federal monies withheld. Alaska has enough resources and qualified people to survive without having to be told what to do by someone who has no conception of what our country or people are like.

Anything you can do to limit coastal zone to the coast -- Having all laws and government documents written in English without fine print so that anyone with a high school education can understand them will be appreciated.

Sincerely yours,

R. Andy Johnson
President

RAJ:cp

The system also provides for credit for service outside of Alaska, for disability, medical and death benefits, for survivors' allowances, and for the refund of member contributions and interest when a teacher leaves membership service.

The Teachers Retirement Fund is a specifically invested fund. All cash and securities are held in the name of that fund. Surplus cash may be invested in the same kinds of securities as authorized for the Public Employees' Retirement Fund.

Revenues consist of teachers' contributions, employer contributions, state contributions and investment income. Expenditures consist of benefits paid to members, refunds of contributions on withdrawal from membership service and the costs of administering the system.

An actuarial valuation of the fund is required at intervals of not more than five years. The valuation includes an expression of opinion as to the adequacy of contributions to provide benefits to which teachers are entitled.

AS 14.25.020 provides that administrative expenditures for operation of the system must be included in the Governor's budget for each fiscal year and are subject to appropriation by the legislature. There is no comparable requirement for benefits paid to members and refunds of contributions. These amounts are not included in the Governor's budget and are not appropriated at annual sessions of the legislature. Sections of the Act that authorize these expenditures -- Sections 120, 140, 150, 160 and 162 -- constitute continuing appropriations of the fund for these purposes.

The Public School Permanent Fund was established in 1931. Section 2 of Chapter 55, Session Laws of Alaska 1931 provides that, "All monies received for any school property of any kind under the provisions of this Act shall be covered into the Treasury of the Territory for the credit of the permanent school fund". The fund receives revenues produced by sections 16 and 36 of each township within the State. These monies are invested and the interest earned is used for the public schools of the State.

Additions to the fund consist of cash received from: land lease rentals, mineral lease rentals, sale of state land, sale of state resources, bonus mineral leases, and royalties on minerals. Fund cash is invested in U.S. Treasury Bonds and notes and the interest received is credited to the General Fund. It is appropriated from the General Fund for the exclusive use and benefit of the public schools of Alaska.

The University of Alaska Permanent Fund is the University equivalent of the Public School Permanent Fund. AS 14.40.400 provides that: "The Department of Revenue shall establish a separate fund in which all money derived from the sale or lease of the lands granted under the Act of Congress approved January 21, 1929 shall be held in trust. The trust fund shall be invested in

interest bearing securities as approved by the Governor. The income from the trust fund shall be used exclusively for the Agricultural College and School of Mines. . .The Department of Administration shall disburse the income from the trust fund upon vouchers approved by the president and treasurer of the university specifying the purpose for which the money is to be used and showing it is to be used in conformity with this section". The principal of this fund is a non-expendable trust.

Receipts of the fund include: land lease rentals, mineral lease rentals, sale of state lands, sale of state resources, bonus mineral leases, and royalties on minerals. Disbursements are made for the purchase of investments and accrued interest on investments.

It is noted in a footnote to AS 14.40.400 that a standard of trust investment has not been established in Alaska case law. The sole limitation on investment of the permanent fund is contained in the Federal Act, which states: "The Territorial Treasurer shall keep all such money invested in safe interest-bearing securities, which securities, shall be approved by the Governor and the Secretary of State of the Territory". The fund is invested in U.S. Treasury obligations.

This fund is also an interim holding fund for income realized on investments. All income is used exclusively for the University of Alaska.

The Mortgage Insurance Fund is a trust fund that is used to self insure mortgages financed by bonds issued by the Alaska Housing Finance Corporation. Fund resources are provided by a state appropriation and by a matching fee charged for mortgage committments. The amount required for each mortgage varies from 2% to 6% of the principal amount depending on the loan-to-value ratio at the time of the application.

The Unemployment Compensation Fund derives its revenue from a payroll tax on employers and employees, interest and penalties assessed against delinquent employers, interest earned on funds on deposit with the federal government and federal grants for certain benefit payments. Revenues are deposited in a federal trust fund from which amounts required to pay benefits are requisitioned as needed. This fund is used exclusively for benefit payments according to law, to the eligible unemployed. Administrative expenses of the State Employment Service and the Unemployment Insurance Program of the Alaska Department of Labor are financed from federal grants for that purpose.
