The bill further provides that the interest income only is considered income and goes to the general fund each year with two exceptions. Losses on the sale of any securities are deducted from the income and gains from the sales of securities are left in the permanent fund. Further, the income of the fund which is transferred to the general fund is the lesser of the actual income of the fund or the five year average of income.

THE HOUSE also has passed a bill taking $900 million out of the general fund and transferring it into the permanent fund. If making the permanent fund larger than the constitution requires and investing substantially all of the money outside is aiding the residents, someone will have to point out some new logic.

At the same time the legislature dawdles in its consideration of any tax repeal. Since 10 percent of the recipients of the income tax repeal would be non-residents, the other 90 percent of us must continue to pay taxes even though everyone acknowledges the state treasury does not need our tax money. There is only one conclusion. The issue of resident or non-resident is a red herring. The governor and the legislature don't want to give up the power which is created by the retention and control of large sums of money.

Recently Sen. Sturguluski introduced a bill which is supposed to make state aid available to local government for capital improvement projects. That's not what the bill does. The bill makes state money available for capital improvement projects primarily in the areas of the state where there is no local government.

It would be quite simple to set up a local government capital improvement fund and allow each local government to draw on that fund based upon it's population. Sen. Sturguluski's bill, SB546, however, has an intricate formula of entitlement. It is safe to say that with Anchorage having nearly 50 percent of the population, it will only be able to draw about 5 percent of the money.

HER BILL DIVIDES half of the fund based on population plus a cost differential factor. The effect of the cost differential factor is that each Anchorage citizen is counted as one-fifth of a citizen or each remote area citizen is counted as five citizens. The other half of the fund is to be divided based upon area. Now what in the world does area have to do with capital improvements? Capital improvements are designed for the use of people. The size of the area is further bent by the application of the construction cost factor, which results in the urban areas being cut by five or the rural areas being multiplied by five.

Her bill provides that the state shall put $200 per citizen into the fund and under her complicated formulas, Anchorage will receive about $10 per citizen. The other $190 per citizen will go to the other areas of the state where there is not any local government. All of the urban areas of the state are dramatically penalized.

Our state government should be doing everything that it can to promote the rural areas of the state to form local governments. By forming local governments they can accept some of the tax burden of government and can assume the responsibility for providing the necessary local government services. This legislation is a disincentive to form a local government.

Also in Sen. Sturguluski's bill the urban area with the local government must assume the cost of maintenance and operation, which is appropriate. However, the vast areas of the state with little population can draw on the account for maintenance and operation.

Everyone, including a governor and a legislator, is entitled to his own opinion. However, our elected representatives ought not to tell us one thing while doing another.

We can still win, but it is now the fourth quarter and we, the Alaskans Citizens, are behind 49-7.

Tom Fink, an Anchorage insurance man, is a former speaker of the Alaska House of Representatives.

Program for pork

It wasn't long ago when Alaskan communities grubbed about in hot competition for a few million dollars a year in state budget appropriations. We cheered heartily when we got a new office building or a new highway out of the tight state budgets to boost our local economy.

Now the state is basking in new wealth, and we find our civic pork barrel specialists dressing their wish lists up like the nouveau riche strutting to their first society affair. It's no longer called "pork" or even "local capital improvements projects"—now it's a grand plan for remaking our cities in some future image.

Down in Anchorage the municipality is pressing the Legislature with a "Program for the 80s" to pour hundreds of millions of state dollars into civic centers, theaters and other projects. Many of the same projects are also advanced again under the cover of a world fair proposal in the "Expo 84" movement.

Up here we have the "Program for Progress," unveiled last week as a joint lobbying effort by the borough and the cities of Fairbanks and North Pole. The legislators who will get this pitch are all smart politicians who know the taste of pork even when it's cooked and served like veal. It's important, however, that the rest of us also understand this program for what it is before we get fooled into throwing a lot of popular support behind some local political hat trick.

First off, let's make it clear that there are some very valuable civic projects in the "Program for Progress" that do genuinely deserve our support. Most are relatively cheap, and they stand out like nuggets in the bottom of a pan:

- A long-overdue extension and rebuilding of the city's steam heat system;
- A community beautification program;
- A comprehensive geologic mapping of the Fairbanks area with a feasibility study of whether an ore processing plant should be built here;
- Renovation of the Fairbanks Recreation Center;
- A program of city utility system improvements; and
- Some modest capital projects from the University of Alaska added to give the grandiose "wish list" some credibility.

But the largest pieces of the local program deserve nothing but spirited opposition. Most are just examples of a government planner's dreams gone wild. They are things that would be added to our local government burden without even a vote of the people.

For instance, the proposal for a rebuilt downtown area notes that in the land ownership, "Many parcels are small and owned by different individuals, hindering consolidation of land for larger developments." Fairbanks's oldest families must be selfish individuals, one concludes, to let their lifetime investments stand in the way of a bureaucratic utopia.

The justifications for the big government projects are thin. For instance, four large public parking garages are proposed downtown at $10 million to $13 million each, because "traffic congestion and parking shortages are contributing to air quality problems." In truth, traffic is less congested, the air is cleaner and there are far more parking places downtown than was the case 10 years ago.

Other proposals are things that have been rejected by Fairbanks voters in the past. The Blue Line Club's hockey rink is back, with the cost up to $7.7 million. The major focus of public opposition in the old East Side Neighborhood urban renewal plan is also back in the form of a $2 million request for Third and Seventh avenue access roads from downtown to the Steese Expressway.

This last point was specifically rejected by voters in the urban renewal repeal initiative in 1972. It has cropped up several times since then but former city mayor Harold Gillam, who was elected in 1972 while running on the initiative platform, kept shooting it down. Now he's no longer mayor, and it's surfaced again. The proposal would require condemnation of homes and widening of two streets through our oldest neighborhood just to save busy drivers a fraction of a minute in zooming downtown on their urgent business. Of course the time saved would be lost by two new traffic signals on the "expressway."

As for the $13.4 million borough office building, even a Juneau waste basket is too good a place for that proposal.

While there are some good points added in the confusion, the "Program for Progress" is mainly a program for bankruptcy for local taxpayers.

Fink: Pay off state debts

By ROSEMARY SHINOHARA
Daily News reporter

A breeding ground for corruption and fraud would be created.

Alaska would have "social programs coming out our ears....They could lower the student/teacher ratio to one to one."

The state will pay people not to work.

State employes will reap much higher salaries.

And the state will be into all sorts of businesses, from banking to fishing.

That's Tom Fink's view of what will happen if the state decides to keep, rather than spend, it's huge revenue surplus.

Fink, a conservative Republican leader who served several years in the state House including a term as speaker, said he thinks whether the legislature attempts to keep the money, return it to the people or spend it, the state's going to end up spending it.

Given that, he's in favor of holding down the state operating budget, and using the money for two major purposes:

- Paying off its $750 million in bonded debt;
- And, paying for "a very expanded capital improvements program."

The state has so much money it could build a capital, build the $3 billion to $4 billion Susitna dams, pay for crossings on Tarnagain and Knik arms, build roads, bridges and docks, he said.

Besides all of that, the state set aside a fund for local governments to draw on for their own capital improvement projects.

The important thing is to see that government does not have a surplus, he said. "We have to find a wise way to take it out of state hands. We ought to eliminate personal, corporate and the special oil and gas income tax. We can easily do that and still have a huge surplus."

Severance taxes on oil pumped out of the ground ought to be lowered until they're the same rate as other states charge, he said.

Tom Fink

And he suggested the state could pay off some of the national debt with money left over. "Wouldn't that be wonderful?"

While he favors eliminating various taxes, Fink indicated he doesn't like the idea of the state giving $350 to each resident,a proposal passed by the state House.

"I think it would attract a lot of people to Alaska just to get $350." The type of person who would come for that probably wouldn't be a very good type for Alaska to have, he said.

What he thinks will happen, Fink said, is that state income taxes will be suspended. "There'll be 146 people we don't need to collect income tax. But we'll need 500 people to pass it out," he joked.

While he doesn't want the government to stockpile surpluses, Fink noted projections are that by the year 2,000, the state will have a $200 billion surplus. "That's one-half million for every man, woman, and child. If you have a wife and 11 kids, that $6.5 million," he noted.

Fink has a wife and 11 kids.

Study in magnificent new edifices

hayden green

If, a few months ago, anyone would have suggested that I would be advocating the need for another impact statement, my reaction would have been to suggest a sobriety test.

It does seem, however, that another impact statement is in order and should relate to property taxes. With all the people showing up in Juneau, hats in hands, and all chorusing a syncopated version of, "How about a free lunch," we really need to take a look at whether Alaska property owners can afford to lay out the birdseed required to satisfy the warblings of these insatiable songbirds. We may find that those tempting free lunches are accompanied by a sizable bill for the fancy fiddle music that renders their theme song.

Just suppose that the folks in Juneau do decide to part with the big bucks for a whole slew of public buildings for Anchorage. In the midst of all the jubilation and mutual backslapping over having managed to get our fair share of the pie, let's don't neglect a look at that day in the not so distant future when all the fanfare has subsided and the dust has settled and we are left sitting in the shadows of all these new and magnificent edifices.

Do you imagine Juneau will continue to fork over the means to maintain and operate these buildings? I really don't think so. My guess is that the property owners will be called on to dig a little deeper and come up with the money to feed this extra drain on the public expense burden.

Doubtless, about this time, someone will decide that the roads servicing all these sparkling new structures are simply inadequate and demand improvements. No sooner has this situation been corrected when, lo and behold, we will discover that the parking downtown just will not meet the needs of all those people using all those roads to get to all those buildings, and we will be faced with the construction of parking garages to meet those needs. Who do you think will be allowed to pay for all this?

A lot has been written recently about the salary increases that the Legislature voted themselves. I want to go on record as stating that I think these people aren't being paid enough. Because, as my old daddy used to say, "If all you pay is peanuts, you're liable to attract nothing but monkeys," and judging from the chattering that continues to emanate from the capital, we in Alaska have managed to attract our own circus.

Legislature gets 'anti-pork' proposal

By ROXINNE ERVASTI
Associated Press Writer

JUNEAU—A formula for allocating construction money throughout the state based on population and area has been proposed in the Legislature. One lawmaker said the idea might be looked upon as an "anti-pork barrel" bill.

The proposal was presented to the Senate and House Community and Regional Affairs committees Wednesday. The House panel did not discuss it but there was some debate over it in the Senate committee, which plans to introduce it soon.

The bill, yet to be drafted, would set up a "capital foundation fund" which the Legislature would appropriate to on an annual basis, starting with about $86 million this year. Advisory committees in unorganized boroughs would set their own spending priorities.

The idea is to get more public input in unorganized boroughs, which now primarily rely on individual legislators to "bring home the bacon."

Sen. Arliss Sturgulewski, R-Anchorage, and chairman of the Senate panel, said the legislation would have been "an anathema" in the days before the state's oil wealth.

"But now we're seeing $500 million proposed for capital improvements . . . what we're doing, by the Legislature being the sugar daddy, is throwing the burden on many municipalities for operational costs."

She said if a detailed study was made of the long-range results of current spending proposals on local entities, "the fiscal note would be staggering beyond belief."

In summary, the intent and provisions of the proposal are:

• Where there is local government, capital improvement plans would be developed much as they are now;

• In unorganized boroughs, advisory groups would set spending priorities;

• The allocations could be accumulated over several years for large projects, and they could be used as match for state and federal grants—thus assisting areas that have no way of raising match money now;

• Funds could be used for maintenance and operation as well as construction, thus getting around what Mrs. Sturgulewski said is a situation where communities are indirectly encouraged not to maintain structures so that they can eventually get "construction" appropriations for repairs.

A suggested formula is that the fund total the equivalent of $200 per capita in the state.

Allocation would be based on one half the population of a municipality or unorganized borough, and one half its area. Allocations would be determined by multiplying area and population times a construction cost differential. Each entity gets a minimum of 5 percent of the largest distribution made.

Sen. Bob Mulcahy, R-Kodiak, joked that the intent appeared to be to wipe out the "pork barrel" process. "The legislative process, while it may not be all that good, is a heck of a lot better," he said. "I'm accountable back there. This would just create another layer of government."

Sen. Tim Kelly, R-Anchorage, said he could not support the concept.

"You're saying you would give $42 million to the organized boroughs, which have a population of 349,000, and twice as much, $85 million, to the unorganized boroughs, which only have 80,000 people," he said.

Mrs. Sturgulewski said nothing would preclude the Legislature from making additional appropriations.

A related measure that has already been passed by her committee (CSSB 348) would establish a system of planning grants for unorganized boroughs.

The grants, a minimum of $25,000 plus $25 per capita each year for up to three years, would allow the unorganized boroughs to study whether they want to organize.

Spending formula proposed

by Roxanne Ervasti
Associated Press

Juneau — A formula for allocating construction money throughout the state based on population and area has been proposed in the Legislature. One lawmaker said the idea might be looked upon as an "anti-pork barrel" bill.

The proposal was presented to the Senate and House Community and Regional Affairs committees Wednesday. The House panel did not discuss it but there was some debate over it in the Senate committee, which plans to introduce it soon.

The bill, yet to be drafted, would set up a "capital foundation fund" which the Legislature would appropriate to on an annual basis, starting with about $96 million this year. Advisory committees in unorganized boroughs would set their own spending priorities.

The idea is to get more public input in unorganized boroughs, which now primarily rely on individual legislators to "bring home the bacon."

Sen. Arliss Sturgulewski, R-Anchorage, and chairman of the Senate panel, said the legislation would have been "an anathema" in the days before the state's oil wealth.

"But now we're seeing $800 million proposed for capital improvements . . . what we're doing, by the Legislature acting the sugar daddy, is throwing the burden on many municipalities for operational costs."

She said if a detailed study was made of the long-range results of current spending proposals on local entities, "the fiscal note would be staggering beyond belief."

In summary, the intent and provisions of the proposal are:

— Where there is local government, capital improvement plans would be developed much as they are now.

— In unorganized boroughs, advisory groups would set spending priorities.

— The allocations could be accumulated over several years for large projects, and they could be used as match for state and federal grants — thus assisting areas that have no way of raising match money now.

— Funds could be used for maintenance and operation as well as construction, thus getting around what Sturgulewski said is a situation where communities are indirectly encouraged not to maintain structures so that they can eventually get "construction" appropriations for repairs.

A suggested formula is that the fund total the equivalent of $200 per capita in the state.

Allocation would be based on one-half the population of a municipality or unorganized borough, and one-half its area. Allocations would be determined by multiplying area and population times a construction cost differential. Each entity gets a minimum of 5 percent of the largest distribution made.

Sen. Bob Mulcahy, R-Kodiak, joked that the intent appeared to be to wipe out the "pork barrel" process.

"The legislative process, while it may not be all that good, is a heck of a lot better," he said. "I'm accountable back there. This would just create another layer of government."

Sen. Tim Kelly, R-Anchorage, said he could not support the concept.

"You're saying you would give $42 million to the organized boroughs, which have a population of 349,000, and twice as much, $85 million, to the unorganized boroughs, which only have 80,000 people," he said.

Sen. Pat Rodey, D-Anchorage, said he saw the concept as a "reform" and said it would get money out to local areas immediately, in contrast to the backlog of bond projects approved by voters.

"It would have an important impact on the legislative process by making the local voice stronger," said Rodey. "I see it as having a leavening effect on the ups and downs of a change in legislative leadership."

Sen. Terry Stimson, D-Anchorage, supported it. "I see it causing a legislator to come down here with a list of priorities from the people back home who had an opportunity to set them," he said.

Sturgulewski said nothing would preclude the Legislature from making additional appropriations, but that her idea would guarantee a minimum kind of revenue sharing for capital construction.

ILLUSTRATION OF FORMULA (in round terms)

Base:	Population	X	Construction Cost Differential		Area (Sq. Mi.)	X	Construction Cost Differential	
Organized Areas	349,000		1.0	= 349,000	149,376		1.0	= 149,376
Unorganized Boroughs	80,000		1.25	= 100,000	437,036		1.25	= 546,295
	429,000			449,000				695,671

Appropriation: 429,000 X $200 = $85,800,000

Grant:

Adjusted Per Cent of Population X $200
Adjusted Per Cent of Area X $200

Organized Areas

349,000 / 449,000	= .78	X	$42,900,000	=	$33,462,000	
149,376 / 695,671	= .215	X	$42,900,000	=	9,223,500	
					$42,685,500	$42,685,500

Unorganized Boroughs

100,000 / 449,000	= .22	X	$42,900,000	=	$ 9,438,000	
546,295 / 695,671	= .785	X	$42,900,000	=	33,676,500	
					$43,114,500	43,114,500
					Total	$85,800,000

April 3, 1980

Dear Alaskan:

This package of material is about SB 546, proposing a Capital Foundation Fund for construction of capital projects throughout Alaska. This bill is a further result of the work conducted by the Joint House and Senate Community and Regional Affairs Committees during the summer of 1979. During the course of the Committees' work, many people identified problems regarding planning for and funding capital projects. We feel that SB 546 proposes a viable solution to difficulties experienced throughout the state. We hope that you will read the enclosed descriptive materials and the bill itself.

Senate Bill 546 proposes a systematic approach to construction of capital projects. Every area of the state would receive a formula entitlement, much like revenue sharing. Expenditure of the entitlement requires only the development of a capital improvement plan. In organized boroughs and home rule municipalities, local governments plan for and expend these funds themselves for eligible projects. In unorganized boroughs (as defined in SB 348 and HB 580), an advisory group plans for the capital projects, though the funds are expended by the Department of Transportation and Public Facilities, as their fiscally responsible agent.

Funds may be used for a variety of capital projects. Priorities are annually established on the borough level. Maintenance costs are also eligible for use of these Capital Foundation Funds. There are many other significant considerations in SB 546. Please read the descriptive material and the bill itself. Contact us regarding any suggestions for changes, comments, etc.

We look forward to hearing from you about the Capital Foundation Fund.

Sincerely,

Arliss Sturgulewski

Information Sheet

CAPITAL FOUNDATION FUND

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

CAPITAL FOUNDATION PROGRAM
(Construction and Maintenance)

FORMULA

Appropriations. The amount of appropriations authorized to be made to the capital foundation program for a fiscal year is equal to two hundred dollars times the state population.

Distribution. Amounts in the capital foundation program shall be distributed annually to municipalities and unorganized boroughs by the department by (a) allocating one-half of the amounts on the basis of population and one-half on the basis of area; and (b) determining the share of an individual municipality or unorganized borough by multiplying its population and area by the construction cost differential for that region. The minimum grant shall be five per cent of the largest distribution made to any municipality or unorganized borough.

Construction Cost Increases. The Department of Transportation and Public Facilities shall submit to the legislature on or before February 15 of each year an estimate of the average percentage increase in construction costs in the state during the previous year.

DEFINITIONS

(1) 'population" means the population of the state, municipality, or an unorganized borough as determined by the department using the latest figures of the U.S. Bureau of the Census or other reliable population data, including but not limited to school enrollments, public utility connections, registered voters, or certified employment payrolls.

(2) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the Department of Transportation and Public Facilities using the latest figures.

(3) "department" means the Department of Community and Regional Affairs.

ILLUSTRATION OF FORMULA (in round terms)

Base:	Population	X	Construction Cost Differential		Area (Sq. Mi.)	X	Construction Cost Differential	
Organized Areas	349,000		1.0	= 349,000	149,376		1.0	= 149,376
Unorganized Boroughs	80,000		1.25	= 100,000	437,036		1.25	= 546,295
	429,000			449,000				695,671

Appropriation: 429,000 X $200 = $85,800,000

Grant:

Adjusted Per Cent of Population X $200
Adjusted Per Cent of Area X $200

Organized Areas

$\frac{349,000}{449,000}$ = .78 X $42,900,000 = $33,462,000

$\frac{149,376}{695,671}$ = .215 X $42,900,000 = 9,223,500 / $42,685,500 — $42,685,500

Unorganized Boroughs

$\frac{100,000}{449,000}$ = .22 X $42,900,000 = $ 9,438,000

$\frac{546,295}{695,671}$ = .785 X $42,900,000 = 33,676,500 / $43,114,500 — 43,114,500

Total $85,800,000

5/6/80 Letter Instead

TO: Tam Cook
FROM: Marjorie Gorsuch & Margo Waring
RE: CS 1010 and CS546 Work Draft

P. 1 Please develop an "intent" section based on the memo attached. Include those items you feel are relevent for such a section.

p. 2 Line 19 Add: An entitlement for a project identified in the capital improvement plan of an organized borough, home rule municipalities as defined in AS 29.08.010, or muncipalities unified under AS 29.-68 shall be made if the municipality has assumed the relevant powers. (or "and if the units of government identified in 44.42.100 (a) have assumed the relevant powers.")

p. 2 Line 23 Consolidate with line 24 to read: "(4) community parks and recreational facilities;" and renumber accordingly

p. 3 Line 21 "regional council shall be composed of no more than 11 members as follows:"

p. 3 Line 22 Change to read: "(1) at least one representative of each first class city located within an unorganized borough etc.

add

p. 3 Line 26/"Representatives of first class cities shall be elected officials selected by the city council."

p. 4 Line 3 and following rewrite as follows:
(a) With assitance from the department, each regional council established under AS 44.42.120 shall formulate an annually updated capital improvment plan for at least a five year period. Such plan shall:
(1) identify .....(continue with line 11-27)

Line 28 Add a new (c) to read:

"(c) To qualify to receive an entitlement from the capital projects foundation fund, each organized borough, home rule municipality and unified municipality shall formulate an annually updated capital improvementplan for at least a five year period . The capital improvement plan and revisions to such plan shall be submitted to the city council or borough assembly. After a public hearing, and after approval by the council or assembly, a capital improvement plan shall be submitted to the department."

The above replaces the existing (c).

p. 5 line 14 See additional wording on attached blue sheet.

p. 5 lines 28 and following: (Eliminate current (b))

"A project built with capital foundation fund entitlement within an organized borough outside a city shall be operated and maintained by the borough. A project built with capital foundation fund entitlements in a city within an organized borough shall be owned, maintained and operated by the unit of government exercising the relevant power. In a case where the power is jointly exercised, ownership, maintenance and operation shall be determined by agreement."

p. 5 lines 15 and following: Rewording to be supplied by Jim Rhode.

p. 6 lines 25,26 Eliminate "This additional money may be obtained from other entitlements made from the capital projects foundation fund".

p. 7 line 18 Add " as annually determined"

a source of funding in addition to such other funding sources as bonding. restricts the legislative perogative to appropriate capital funds.

Nothing in this legislation

CAPITAL FOUNDATION

FUND

Intent

It is the intent of this legislation to establish a capital foundation program which will equitably provide funds for the orderly development of capital improvements throughout the state. It is intended that the planning for such developments reflect regional and local needs and priorities and that, whenever possible, borough governments have complete responsibility for the expenditure of the capital foundation program funds.

This legislation recognizes that most capital development projects have greater than local significance and should, therefore, be planned and prioritized on the regional level. Further, the legislation acknowledges that the cost of construction and the cost of maintenance are closely related and that maximally efficient use of funds is encouraged by combining maintenance and construction funds.

Formula

Please see attached pages.

Funds may be used for either capital construction, betterment or maintenance, but not operation of the facilities. Funds allocated to either organized or unorganized boroughs do not lapse and may be accumulated for large projects or for growth management purposes.

Question: Should there be a ceiling on the amount which may be accumulated by any one borough?

Eligible Facilities

libraries
public protection facilities including fire service and holding facilities
neighborhood parks and other recreation facilities
water/sewer
solid waste and resource recovery facilities
health facilities
community facilities
Transportation facilities such as local service roads & trails, small boat harbors, seaplane floats, local transit facilities and equipment, upgrading and improvements in existing air transport facilities such as aviation aides and improvements and associated field improvements, emergency and/or recreational airstrips, so long as no transportation facilities jeopardize or are inconsistent with the state system as defined in the regional transportation plans and the State Facilities Plan.

However, only projects identified in the capital improvement plan are eligible for Capital Foundation Program expenditures.

Distribution

Capital Foundation Program funds will be distributed by formula to boroughs and to unified home rule municipalities, provided each has developed a capital improvement plan which includes a priority listing of capital improvement projects. In organized boroughs the cip will need assembly approval, after a public hearing.

In third class boroughs and for the unorganized borough, the following measures are taken to provide for planned regional development of capital improvements, as there is no regional government responsible for planning and expending funds.

Funds will be distributed to unorganized boroughs (SB 348). If this legislation is not passed, funds will be distributed to those areas identified as REAA's.

However, expenditure of the funds for unorganized boroughs is the responsibility of DOTPF. In order to properly plan for and prioritize capital improvements in the unorganized boroughs, advisory groups are established to assist DOTPF. (Amend Chap. 168 SLA 78).

Regional Advisory Councils

Advisory Council members are appointed by the Governor.

Membership of the advisory groups will consist of one elected official from each first class city or municipality, selected by the city. Additional representation from elected officials of second class cities and representatives of unincorporated communities shall be selected from nominations made by the Division of Community Planning, DCRA and DOTPF. Each regional advisory council shall consist of fifteen members.

The regional advisory councils will assist DOTPF in the development of a regional capital improvement plan, in prioritization among projects, in decision making regarding trade-offs between maintenance and new construction, and in project scheduling.

If an unorganized borough opts to become organized, the borough government will assume the capital improvement planning responsibility, responsibility for foundation program funds and may take title to existing capital improvement projects.

Definitions

Maintenance means preservation, upkeep and repair to keep a facility as close as possible to original condition.

Betterment means improvements, adjustments, additions which more than restore to a former condition for better service without major changes in original construction.

Operation means all costs attributable to utilization of the facility, such as heat, light, janitorial services.

Tam)
In the section on distribution of entitlements 44 42 140 1. 14 we need two paragraphs
the central idea is that after a project has been i' tified for construction that particular year (in the cip and annual upd te) th lowing is possible

IN AN ORGANIZED BORO: nothing prohibits the boro from arranging with a city in which the particular project is to be built for the city to receive and expend funds for the construction

IN THE UNORGANIZED BORO: The commisiioner shall arrange, wher a project is identifiied by the cip for construction that yera, for the city to receive and expend the funds for ~~the~~ that project. (This means a change in the later section where we talk about the responsit ility of the commissioner)

both are candidates as exercise of the relevant power (as in changes in bill)

CITY OF BARROW

Re: SB546

Dear Arlis:

The City of Barrow would like to provide written testimony on SB546 Capital Foundation Fund. We had anticipated being able to provide input via the teleconference network, unfortunately, the phone company was unable to provide a hook-up in time.

We wholeheartedly support the concept of the type of program proposed in SB546. However, we would like to raise several questions for your consideration.

a. Where does a home rule municipality such as the North Slope Borough fit into this type of program. We note mention of "organized" First Class Boroughs, Organized Second Class Boroughs, and Unified Home rule Municipalities, but nothing about Organized Home rule Boroughs.

b. How much control or input will local municipalities located in a Borough have in determining what capital improvement programs will be selected for inclusion under this bill.

c. Will cities and boroughs be able to work together effectively when a city has the statutory responsibility for a particular service or facility, but the borough is the one receiving funding that could be used on the cities projects.

d. To us, the intent of Sec. 44.42.150 is unclear. It seems to imply that a borough is the fund recipient, but the cities are the ones that will own/operate/maintain facilities funded by SB546. If that is the case, the same question asked is C above should also be asked here.

e. How will this program relate to the Annual Overal Economic Development Plan (OEDP) developed by some areas for the Economic Development Administration (EDA).

f. Sec. 44.42.150 C might be changed to allow for an adjustment factor that could allow for a cost override or project increase up to a certain amount. Perhaps a fixed percentage of the project cost. Some smaller communities might not be able to raise additional funds, and would thus have to scrap the entire project because of a 4 or 5 thousand dollar price increase.

We appreciate your considerations and the opportunity to actively participate in the decision making of Alaskas future.

Sincerely yours,

Bryan MacLean
City Manager

RE: Capital Projects Foundation Fund Bill

The Capital Projects Foundation Fund bill (SB 546) has been reviewed and will be introduced in the House on 4/16/80 with the following changes:

p. 1 Article 2 Sec. 44.42.100 (a)

Entitlements for capital projects shall be made to organized boroughs, home rule municipalities as defined in AS 29.08.010; and to unified municipalities.(These references are used throughout the House version)
p. 2 A new (c) is added and subsequent sections renumbered.

(c) A first class city which has not adopted a home rule charter and which is outside of an organized borough and outside of a regional educational attendance area shall be included in the capital improvement plan and shall be represented on the regional council of a regional educational attendance area or an unorganized borough which borders the city.

p. 3 Sec. 44.42.120 Regional Council representation will be a follows:

A Regional council shall be composed of 15 members as follows:

(1) one elected official who is selected by the city council of each first class city located within an unorganized borough or regional educational attendance area, or which is included in an unorganized borough's capital improvement plan or a regional educational attendance area's capital improvement plan
(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within an unorganized borough or regional educational attendance area; members from second class cities shall be elected officials.

p. 4 line 1 Reworded as follows:

(5) identify possibilities for pprjects involving facilities having more than one use

p. 4 Line 25 and following read:

(b) the amount of an entitlement shall be allocated one-half on the basis of adjusted population and one-half on the basis of adjusted area. An entitlement shall be the ratio of the adjusted population to the total adjusted population plus the ratio of the adjusted area to the total adjusted area, times one-half the amount of an appropriation to the capital projects foundation fund.

p. 5 line 12 A new (c) is added:

(c) An entitlement from the capital projects foundation fund for a project located in a first or second class city as part of the capital improvement plan of an unorganized borough or a regional educational attendance area may be disbursed, with the concurrence of the city council of the first or second class city, subject of the following terms; (continues as SB 546 p. 5 line 13)

Senator Arliss Sturgulewski

Information Sheet

CAPITAL FOUNDATION FUND

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

PHONE (907) 524-3825

April 10, 1980

Senator Arliss Sturgulewski
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski,

I have just finished my review of the literature you and Representative Parker sent on SB 546. I feel that SB 546 warrants considerable praise in that it is an equitable bill that does not favor one area over another. More importantly, it will provide for the construction of basic facilities in small communities which will lead to an increase of services for those communities and surronding areas. The fact that the bill allows for the maintenance of constructed facilities is extremely import. In too many cases, facilities go unused and deteriorate from a lack of fuel and maintenance.

I am, however, concerned over the administration of the program should the bill be enacted this session. If the dealings that the City of McGrath has had with DOTPF are indicative of DOTPF's administration of rural projects, I am fearful that overhead and engineering will seriously reduce the effectiveness of the program for the unincorporated boroughs. At the present time, DOTPF takes 15% for engineering and additional percentages for overhead. Take Project SOS-1(024) for example. Public hearings were held in McGrath on 9/19/78. The City was led to believe, the letters are on file in my office, that the project would be completed during the summer of 1979. The project was delayed beyond the 1979 construction seasons. Ombudsman Complaint A79-0988 revealed that delays in the project cost the project $79,000. Moreover, there was not sufficent money left in the project to complete it! I would estimate that $125,000 was lost from the project due to delays, engineering and travel and per diem. In order to complete the project, the City went for a supplemental appropriation for $200,000. Yesterday, I took DOTPF's material estimates and cost and calculated the cost of the entire project. At their estimate, the entire project should have cost approximately $348,000 and not the $530,000 which they told the Ombudsman!

Senator Sturgulewski, I and many others have no faith in DOTPF when it comes to the administration of CIP in rural Alaska. Many second class cities and REAAs can do the same job for less money

with better results. In my opinion, and it is my opinion only, I think that DOTPF keeps the rural CIPs on the back burner so that the overhead will finance their operations.

I would recommend that SB 546 contain provisions for those communities which have demonstrated the ability to complete a CIP which would limit or eliminate DOTPF's participation in this program. I feel that the State and the taxpayers would get more for their money.

Thank you for the oppertunity to comment on SB 546 and to sound off about DOTPF.

Sincerely,

Robert S. Juettner
City Administrator

cc: Representative Bill Parker

CITY OF SKAGWAY

GATEWAY TO THE GOLD RUSH OF "98"
P. O. BOX 415 SKAGWAY, ALASKA 99840

April 10, 1980

Joint Senate and House
Community & Regional Affairs Committee
Local Government Study
Pouch V State Capital
Juneau, Alaska 99811

Dear Co-Chairmen Sturgulewski and Parker:

Your letter of 3 April and Senate Bill No. 546 concerning the Capital Projects Foundation Fund have been reviewed with great interest by the Skagway Common Council. The Council's comments, questions and recommendations follow:

The proposed legislation provides that entitlements from the Fund be made to organized boroughs and home rule municipalities which have capital improvement plans and, further, provides that these recipients shall administer the capital improvement projects so funded. In the case of the unorganized boroughs the legislation provides that the Department - presumed to be DOT&PF - shall make entitlements and manage them subject to enactment of other legislation or shall make and manage the entitlements for regional educational attendance areas (REAA). Under a strict interpretation of these provisions the City of Skagway would be excluded from participation in the Capital Projects Foundation Fund program - i.e. Skagway is a first class City as defined in Alaska Statute Title 29 but is not in either type of borough or REAA. Also Skagway currently has under preparation a capital improvement plan which will be the equivalent of those required of boroughs or REAAs.

Accordingly, the City Council respectfully requests that S.B. 546 be rephrased to provide that, for purposes of receipt and management of entitlements, the City of Skagway be treated as being in the organized borough/home rule municipality category.

The City of Skagway concurs in the concept of the Capital Projects Foundation Fund and, subject to the revision noted above, endorses passage of S.B. 546.

Sincerely,

Robert F. Messegee
Mayor

ILLUSTRATION OF FORMULA (in round terms)

Base:

	Population	X	Construction Cost Differential			Area (Sq. Mi.)	X	Construction Cost Differential		
Organized Areas	349,000		1.0	=	349,000	149,376		1.0	=	149,376
Unorganized Boroughs	80,000		1.25	=	100,000	437,036		1.25	=	546,295
	429,000				449,000					695,671

Appropriation: 429,000 X $200 = $85,800,000

Grant:

Adjusted Per Cent of Population X $200
Adjusted Per Cent of Area X $200

Organized Areas

$\frac{349,000}{449,000}$	= .78 X	$42,900,000	=	$33,462,000		
$\frac{149,376}{695,671}$	= .215 X	$42,900,000	=	9,223,500		
				$42,685,500		$42,685,500

Unorganized Boroughs

$\frac{100,000}{449,000}$	= .22 X	$42,900,000	=	$ 9,438,000		
$\frac{546,295}{695,671}$	= .785 X	$42,900,000	=	33,676,500		
				$43,114,500		43,114,500
					Total	$85,800,000

Further Illustrations, Capital Foundation Program

$$\frac{\text{Adjusted Local Population}}{\text{Adjusted Total Population}} + \frac{\text{Adjusted Local Area}}{\text{Adjusted Total Area}} \times \text{One-half Appropriation} = \text{Entitlement}$$

Municipality of Anchorage

$$\frac{200,000}{449,000} + \frac{1,884}{695,671} = .4477 \times \$42,900,000 = \$19,206,330$$

Fairbanks North Star

$$\frac{60,227}{449,000} \quad \frac{7,500}{695,671} = .1448 \times \$42,900,000 = \$\ 6,211,920$$

City & Borough of Juneau

$$\frac{23,115}{449,000} \quad \frac{3,100}{695,671} = .0555 \times \$42,900,000 = \$\ 2,380,950$$

Ketchikan Gateway

$$\frac{13,463}{449,000} \quad \frac{1,250}{695,671} = .0318 \times \$42,900,000 = \$\ 1,364,220$$

MARGE

Regarding the problem of first class and home rule cities outside of organized boros and outside of REAAs.

I think we are faced with a couple of options:

1. count them separately (we would need to determine how the formula affects them)
2. place them in REAAs for funding purposes . This could be done by amending 348/50 or by special language in 546.
3. A little of both: count home rule cities separaetly but put first class cities in the REAAs.

The policy issues that are important here deal with the desire for regional approaches, the need for regional approaches in the sorts of capital projects we have suggested, the "autonomy" of cities, and general equitablness.

My own feeling is that we should go with three above. If this were done, we would need only to strike the word "unified" from home rule and then put in language that would say:

do I need "unified" as well as "home rule municipalities" home rule specified

(either in 348 or in 546) For purposes of this act, first class cities ~~in~~ outside of organized ~~boroughs~~ and outside of REAAS shall be considered as ~~part of~~ belonging to the REaa surrounding ~~the city~~ or contiguous with that first class city.

RE: Capital Projects Foundation Fund Bill

We have reviewed SB 546 and would like the House version of the bill drafted as a companion to SB 546 but with the following changes:

p. 3 lines 8 and following should read:
(1) one representative from each first class city selected by their city councils who are elected officials from first class cities located within the unorganized borough or regional educational attendance area;
(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within the unorganized borough or regional educational attendance area. Second class city representatives shall be elected officials.

p. 4 line 1
(5) identify shared facility opportunities

p. 5 lines 10 and following:
Delete wording following "recipient"
Draft a new (c) to read as follows:
(c) For projects built in first or second class cities in the unorganized boroughs, upon concurrence by the Council, the commissioner may make an agreement including any provision agreed upon by the parties, including the following:
(continue with line 13)

Bill would like the bill ready for our 8:30 A.M. Committee meeting on 4/9 and for introduction that day. Many thanks.

TO: Tam Cook
FROM: Marjorie Gorsuch
RE: Changes in House version of Capital Foundation bill

Tam,

It is our intent that entitlements for capital projects be available to organized first class boroughs, organized second class boroughs, and organized third class boroughs (do we just want to reference boroughs?), unified home rule municipalities and home rule cities which have capital improvement plans.(p. 1 (a) and whereever appropriate)

We also want the following language added where appropriate: (p. 1. line 23?)

For purposes of this act, first class cities outside of organized boroughs and outside ~~of unorganized~~ boroughs or regional educational attendance areas shall be considered as belonging to the ~~regional educational~~ attendance area or unorganized borough surrounding or contiguous with that first class city.

Add:
p. 4 line 28 should read:
"adjusted area to the total adjusted area. times one-half times the total amount of an"etc.

p. 3 Sec. 44.42.120 Regional Council representation will be a follows:

A Regional council shall be composed of 15 members as follows:

(1) one elected official who is selected by the city council of each first class city located within an unorganized borough or regional educational attendance area, or which is included in an unorganized borough's capital improvement plan or a regional educational attendance area's capital improvement plan
(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within an unorganized borough or regional educational attendance area; members from second class cities shall be elected officials.

p. 4 line 1 Reworded as follows:

(5) identify possibilities for porjects involving facilities having more than one use

p. 4 Line 25 and following read:

(b) the amount of an entitlement shall be allocated one-half on the basis of adjusted population and one-half on the basis of adjusted area. An entitlement shall be the ratio of the adjusted population to the total adjusted population plus the ratio of the adjusted area to the total adjusted area, times one-half the amount of an appropriation to the capital projects foundation fund.

p. 5 line 12 A new (c) is added:

(c) An entitlement form the capital projects foundation fund for a project located in a first or second class city as part of the capital improvement plan of an unorganized borough or a regional educational attendance area may be disbursed, with the concurrence of the city countil of the first or second class city, subject ot the following terms; (continues as SB 546 p. 5 line 13)

Alaska State Legislature

House of Representatives

TO: House C&RA Committee Members
FROM: Rep. Bill Parker, Chairman
DATE: 4/15/80
RE: Capital Foundation Fund bill Workshop

There will be a special meeting of the House C&RA Committee tomorrow, Wednesday, April 16 at 8:30 A.M. in Room 112 of the Capitol to review the Capital Foundation Fund bill to be introduced by the Committee.

The Senate C&RA Committee has introduced companion legislation in the form of SB 546 which will be teleconferenced by both the House and Senate Committees tomorrow afternoon at 1:30 P.M. in the Governor's Conference Room.

This bill is a further result of the work conducted by the Joint House and Senate Community and Regional Affairs Committees during the summer of 1979. During the course of the Committee work, many people identified problems regarding planning for and funding capital projects.

Attached is a copy of the House bill to be introduced on 4/16 and some newspaper clippings which may be of interest. Please bring these materials to the Workshop tomorrow morning.

Spending formula proposed

by Roxlune Ervasti
Associated Press

Juneau — A formula for allocating construction money throughout the state based on population and area has been proposed in the Legislature. One lawmaker said the idea might be looked upon as an "anti-pork barrel" bill.

The proposal was presented to the Senate and House Community and Regional Affairs committees Wednesday. The House panel did not discuss it but there was some debate over it in the Senate committee, which plans to introduce it soon.

The bill, yet to be drafted, would set up a "capital foundation fund" which the Legislature would appropriate to on an annual basis, starting with about $86 million this year. Advisory committees in unorganized boroughs would set their own spending priorities.

The idea is to get more public input in unorganized boroughs, which now primarily rely on individual legislators to "bring home the bacon."

Sen. Arliss Sturgulewski, R-Anchorage, and chairman of the Senate panel, said the legislation would have been "an anathema" in the days before the state's oil wealth.

"But now we're seeing $800 million proposed for capital improvements . . . what we're doing, by the Legislature being the sugar daddy, is throwing the burden on many municipalities for operational costs."

She said if a detailed study was made of the long-range results of current spending proposals on local entities, "the fiscal note would be staggering beyond belief."

In summary, the intent and provisions of the proposal are:

— Where there is local government, capital improvement plans would be developed much as they are now.

— In unorganized boroughs, advisory groups would set spending priorities.

— The allocations could be accumulated over several years for large projects, and they could be used as match for state and federal grants — thus assisting areas that have no way of raising match money now.

— Funds could be used for maintenance and operation as well as construction, thus getting around what Sturgulewski said is a situation where communities are indirectly encouraged not to maintain structures so that they can eventually get "construction" appropriations for repairs.

A suggested formula is that the fund total the equivalent of $200 per capita in the state.

Allocation would be based on one-half the population of a municipality or unorganized borough, and one-half its area. Allocations would be determined by multiplying area and population times a construction cost differential. Each entity gets a minimum of 5 percent of the largest distribution made.

Sen. Bob Mulcahy, R-Kodiak, joked that the intent appeared to be to wipe out the "pork barrel" process.

"The legislative process, while it may not be all that good, is a heck of a lot better," he said. "I'm accountable back there. This would just create another layer of government."

Sen. Tim Kelly, R-Anchorage, said he could not support the concept.

"You're saying you would give $42 million to the organized boroughs, which have a population of 349,000, and twice as much, $85 million, to the unorganized boroughs, which only have 80,000 people," he said.

Sen. Pat Rodey, D-Anchorage, said he saw the concept as a "reform" and said it would get money out to local areas immediately, in contrast to the backlog of bond projects approved by voters.

"It would have an important impact on the legislative process by making the local voice stronger," said Rodey. "I see it as having a leavening effect on the ups and downs of a change in legislative leadership."

Sen. Terry Stimson, D-Anchorage, supported it. "I see it causing a legislator to come down here with a list of priorities from the people back home who had an opportunity to set them," he said.

Sturgulewski said nothing would preclude the Legislature from making additional appropriations, but that her idea would guarantee a minimum kind of revenue sharing for capital construction.

Information Sheet

CAPITAL FOUNDATION FUND

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determin pace.

ILLUSTRATION OF FORMULA (in round terms)

Base:

	Population	X	Construction Cost Differential			Area (Sq. Mi.)	X	Construction Cost Differential		
Organized Areas	349,000		1.0	=	349,000	149,376		1.0	=	149,376
Unorganized Boroughs	80,000		1.25	=	100,000	437,036		1.25	=	546,295
	429,000				449,000					695,671

Appropriation: 429,000 X $200 = $85,800,000

Grant:

Adjusted Per Cent of Population X $200
Adjusted Per Cent of Area X $200

Organized Areas

$\frac{349,000}{449,000}$ = .78 X $42,900,000 = $33,462,000

$\frac{149,376}{695,671}$ = .215 X $42,900,000 = 9,223,500

$42,685,500 $42,685,500

Unorganized Boroughs

$\frac{100,000}{449,000}$ = .22 X $42,900,000 = $ 9,438,000

$\frac{546,295}{695,671}$ = .785 X $42,900,000 = 33,676,500

$43,114,500 43,114,500

Total $85,800,000

Further Illustrations, Capital Foundation Program

$$\frac{\text{Adjusted Local Population}}{\text{Adjusted Total Population}} + \frac{\text{Adjusted Local Area}}{\text{Adjusted Total Area}} \times \text{One-half Appropriation} = \text{Entitlement}$$

Municipality of Anchorage

$$\frac{200,000}{449,000} + \frac{1,884}{695,671} = .4477 \times \$42,900,000 = \$19,206,330$$

Fairbanks North Star

$$\frac{60,227}{449,000} \quad \frac{7,500}{695,671} = .1448 \times \$42,900,000 = \$\ 6,211,920$$

City & Borough of Juneau

$$\frac{23,115}{449,000} \quad \frac{3,100}{695,671} = .0555 \times \$42,900,000 = \$\ 2,380,950$$

Official Business

April 3, 1980

Dear Alaskan:

This package of material is about SB 546, proposing a Capital Foundation Fund for construction of capital projects throughout Alaska. This bill is a further result of the work conducted by the Joint House and Senate Community and Regional Affairs Committees during the summer of 1979. During the course of the Committees' work, many people identified problems regarding planning for and funding capital projects. We feel that SB 546 proposes a viable solution to difficulties experienced throughout the state. We hope that you will read the enclosed descriptive materials and the bill itself.

Senate Bill 546 proposes a systematic approach to construction of capital projects. Every area of the state would receive a formula entitlement, much like revenue sharing. Expenditure of the entitlement requires only the development of a capital improvement plan. In organized boroughs and home rule municipalities, local governments plan for and expend these funds themselves for eligible projects. In unorganized boroughs (as defined in SB 348 and HB 580), an advisory group plans for the capital projects, though the funds are expended by the Department of Transportation and Public Facilities, as their fiscally responsible agent.

Funds may be used for a variety of capital projects. Priorities are annually established on the borough level. Maintenance costs are also eligible for use of these Capital Foundation Funds. There are many other significant considerations in SB 546. Please read the descriptive material and the bill itself. Contact us regarding any suggestions for changes, comments, etc.

We look forward to hearing from you about the Capital Foundation Fund.

Sincerely,

Arliss Sturgulewski

ADDITIONS/CHANGES RE CONVERSATION W/DOOLEY

(first, note that the escrow account idea is accepted: language in the bill to say that funds do not lapse--allows accumulation for large projects and is a tool for growth management)

add language that says that transportation facilities planned for in the cip cannot contradict findings of the regional transportation plan and that interregional conflicts will be resolved by DOTPF with adsistance of existing interdepartmental and policy groups)

make sure that the cip language identifies the cip as a plan not a program.

indicate that the geogeographical areas (unorganized boros or REAAs may be combined by DOTPF with reasons and conclusions etc brought to legislature for approval).

ADVISORY GROUPS

membership: the advisory group (for the unorganized boros) which help in the development of the capital improvement plan and in the setting of priorities) shall consist of one elected official from each first class city or municipality --to be selected by the city--. Representation of unincorporated and 2nd class cities shall be slected by DOTPF and CRA working with the local people.

FEB 13, 1980 meeting: Bushre, Rhode, Waring

Discussion: 1) regarding the formula, it was agreed that the wisest approach would be a formula that reflected, within limits, the current allocations of funds to regions.
2) Capital projects to be included: solid waste, health facilities, transportation facilities, community facilities, ~~energy conservation or generation~~. Maintenance costs were to be included in eligible costs, as tradeoffs between new and old buildings and the importance of life cycle analysis are important.
3) Language will be included that will state that if a project is not in a capital improvement program, Foundation dollars cannot be spent for that project.
4) Distribution arrangements: Money will go to boros only. Boros may get a set additional amount for the numbers of first class cities it contains. Money will go directly to home rule municipalities. When a third class boro, that boro will be treated as the next lower class which is an "unorganized boro" as per SB 348 . If that bill does not pass, funds will be distrubuted per REAA boundaries. However, as there is no boro government responsible or accountable for planning and expending funds--or that can own and have title to property etc--those functions will be retained by the State and managed in a trustee relationship with the unorganized boros. When retained by the state, DOTPF and CRA will jointly etsblish a planning process to develop a CIP in the boro and establish advisory boards to assist them in that endeavor.This will be consistent with Chap 168 SLA 78 on a regional basis (as per SB 348). Foundation funds will be ~~developed~~ expended according to the CIP. If and when an unorganized boro opts to become organized, then they would assume the planning/fund expending functions and would, additionally, take title to whatever property there may be.

Boros & municipalities must have CIPs.

If project costs in CIP, can spend foundation $

CIP

Capital Development Foundation

1. The problem is divisable into
   a) what should the formula be and what facilities/maintenance should it cover and
   b) to whom should it go?
2. To whomever it goes, the following principles need to be observed
   a) no special service districts
   b) no forcing of government on people
   c) equitable distribution
   d) simplicity of classes of recipients

3. Regarding (2), as many extra concerns that can be incorporated, the better.
-transportation planning, effects of reapportionment

Concept: The money will go to boroughs, when there is a borough. They should have a cip. Ditto home rule municipalities. When it is a third class boro (if they survive this session), they will be treated as the next lower class.

In the unorganized boro:

Funds will be distributed along the boundry of 1) the unorganized boros as per SB or if SB is not enacted, 2) along the lines of the REAA. However, as there is no boro government responsible and accountable for planning and expending money--or that can own title to land, property, etc--those functions will have to remain with the state. When the functions are retained by the state, DOTPF will plan for PF under Chap. 168 SLA 78 on a regional basis (per SB unorganized boro bill). To facilitate that planning process, each unorganized boro will have its own planning advisory group to advise and assist DOTPF. A CIP will be developed for each and funds expended accordingly.

If and when an unorganized boro opts to become organized, then they would assume the planning/fund expending functions and would, additionally, take title to whatever property there may be. The same principle will apply to maintenance funds.

? Does this happen now?

Capital Projects to be considered:

water/sewer; solid waste facilities; health facilities; transportation facilities; community facilities; ~~school maintenance~~; energy conservation or generation

Maintenance

Questions: will a fund be established for each so that funds can accumulate for large projects? yes

CAPITAL FOUNDATION PROGRAM
(Construction and Maintenance)

FORMULA

Appropriations. The amount of appropriations authorized to be made to the capital foundation program for a fiscal year is equal to two hundred dollars times the state population.

Distribution. Amounts in the capital foundation program shall be distributed annually to municipalities and unorganized boroughs by the department by (a) allocating one-half of the amounts on the basis of population and one-half on the basis of area; and (b) determining the share of an individual municipality or unorganized borough by multiplying its population and area by the construction cost differential for that region. The minimum grant shall be five per cent of the largest distribution made to any municipality or unorganized borough.

Construction Cost Increases. The Department of Transportation and Public Facilities shall submit to the legislature on or before February 15 of each year an estimate of the average percentage increase in construction costs in the state during the previous year.

DEFINITIONS

(1) 'population" means the population of the state, municipality, or an unorganized borough as determined by the department using the latest figures of the U.S. Bureau of the Census or other reliable population data, including but not limited to school enrollments, public utility connections, registered voters, or certified employment payrolls.

(2) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the Department of Transportation and Public Facilities using the latest figures.

(3) "department" means the Department of Community and Regional Affairs.

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for local capital projects; establishing the capital projects foundation fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.42.020 is amended by adding a new paragraph to read:

(14) adopt regulations for management of the capital projects foundation fund established under AS 44.42.100 and administer these funds.

* Sec. 2. AS 44.42 is amended by adding new sections to read:

ARTICLE 2. CAPITAL PROJECTS FOUNDATION GRANTS.

Sec. 44.42.100. CAPITAL PROJECTS FOUNDATION FUND. There is established within the department a capital projects foundation fund for the purpose of providing state assistance to local governments and to the unorganized borough for improvement, maintenance and new construction of capital projects. Within the limits of appropriations for the purpose, the department shall make grants to qualified local governments for capital projects and shall manage grants for capital projects in the unorganized borough.

Sec. 44.42.110. ELIGIBLE FACILITIES. A grant from the capital projects foundation fund may be used for improvement, maintenance, or new construction of the following type of facility if the facility is identified in a regional plan under AS 44.42.130:

(1) libraries;

(2) community and emergency detention facilities;

(3) fire halls, including the purchase of fire vehicles;

(4) parks;

(5) recreational facilities;

(6) water and sewer facilities;

(7) health facilities;

(8) community centers;

(9) transportation facilities which do not duplicate and which are not inconsistent with the state transportation system as determined by the department, including

(A) service roads;

(B) trails;

(C) harbors and docks for small boats;

(D) seaplane floats;

(E) public transit facilities, including the purchase of transit vehicles;

(F) emergency and recreational airstrips for small aircraft.

Sec. 44.42.120. REGIONAL ADVISORY COUNCILS. (a) To qualify to receive a grant from the capital projects foundation fund, a local government must establish a regional advisory council of at least five members.

(b) If a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date" is enacted, a regional advisory council shall be established for each unorganized borough established under the terms of that enactment. If that bill is not enacted before the effective date of this Act, a regional advisory

council shall be established in each regional educational attendance area organized under AS 14.08.031. There shall be 15 members on each regional advisory council established under this subsection as follows:

(1) one elected official from each first class city in the unoganized borough or regional educational attendance area selected by the city council or assembly;

(2) additional persons, up to a total of 15, selected by the governor from lists of persons nominated by the Department of Transportation and Public Facilities or the Department of Community and Regional Affairs who are elected officials of second class cities or persons from unincorporated communities.

Sec. 44.42.130. CAPITAL IMPROVEMENT PLAN. (a) With assistance from the department, each regional advisory council established under AS 44.42.120 shall formulate a capital improvement plan which identifies all capital projects needed in the region, assigns a priority to each identified project, and contains cost estimates for each project.

(b) A capital improvement plan for a local government shall be submitted for approval by the council or assembly of the local government after a public hearing. Revisions in an approved plan must also be submitted for approval before becoming effective. A capital improvement plan for an unorganized borough or a regional educational attendance area shall be submitted for approval by the department after a public hearing.

Sec. 44.42.140. DISTRIBUTION OF GRANTS. (a) Grants from the capital projects foundation fund shall be distributed annually by the department to each local government which has approved a capital improvement plan as required by AS 44.42.130. Amounts from the capital projects foundation fund shall be distributed annually to accounts established by the department for each unorganized borough or for each regional educa-

Funds do not lapse ?

tional attendance area if unorganized boroughs have not been established by enactment of a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date".

(b) The amount of grants to be made to a region shall be determined by multiplying its population and area in square miles by the construction cost differential for that region and using this figure when compared with the total of figures similarly arrived at for all regions to calculate a percentage share of the total appropriation.

Sec. 44.42.150. USE OF GRANTS. (a) A grant from the capital projects foundation fund to a local government may be used only for a facility identified in an approved capital improvement plan. Each local government shall determine which project to finance with the grant received each year under AS 44.42.140.

(b) A grant from the capital projects foundation fund shall be disbursed in accordance with the terms of an agreement between the commissioner and the local government. The agreement may include any provision agreed upon by the parties, but must include in substance the following provisions:

Optional (1) that the local government shall secure, retain and protect title to the site of an existing facility or on which a new facility is to be constructed; for purposes of this paragraph it is sufficient that title is obtained in fee or by a lease which provides that the local government enjoys exclusive use of the land and any improvements for the estimated life of the facility;

(2) that the local government agrees to proceed with and complete the proposed project expeditiously in accordance with plans

submitted to the department;

(3) that the ~~local government~~ agrees to assume responsibility for the operation of the facility, and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the payment of state money;

(4) that the grant will not exceed the estimated total project cost as determined by the commissioner.

(c) If it appears that the cost of a facility financed in part by a grant from the capital projects foundation fund will vary substantially from costs estimated at the time a grant was made for the facility from the capital projects foundation fund, the local government is responsible for obtaining the additional money. The additional money may be obtained from other grants made from the capital projects foundation fund to the local government. If a project costs less to complete than estimated, the ~~local government~~ may apply to use this money on other projects as provided in this subsection.

(d) A grant from the capital projects foundation fund may be used by a ~~local government~~ to match other state or federal grants.

(e) In the unorganized boroughs or regional educational attendance areas each regional advisory council shall determine annually which projects identified in its capital improvement plan to finance. The department is responsible for the projects selected. The regional advisory council for the unorganized borough or the regional educational attendance area is responsible for the operation of a facility financed by a grant from the capital projects foundation fund and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the department begins work on a project.

Sec. 44.42.160. DEFINITIONS. In AS 44.42.100 - 44.42.160

(1) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the department using the latest available figures;

(2) "improvement" means renovations and additions to an existing facility which allow for better service than the facility provided in its original condition;

(3) "improvement, maintenance or new construction" includes, in addition to costs directly related to the project, the total of all costs of financing and carrying out the project; these include, but are not limited to, the costs ~~of all necessary studies~~, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property, an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary;

(4) "local government" means the government of a unified home rule municipality or organized borough;

(5) "maintenance" means restoration and repair needed to keep a facility as close as possible to its original condition;

(6) "population" means the population of a unified home rule municipality, organized borough, or unorganized borough or regional educational attendance area as determined by the department using the latest figures of the United States Bureau of the Census or other reliable sources of population data, such as school enrollment figures,

public utility connection figures, registered voter rolls, certified employment payrolls;

(7) "region" means a unified home rule municipality, organized borough, and unorganized borough established if a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date" is enacted, or a regional educational attendance area which has an ~~approved~~ capital improvements plan.

The Honorable Jay S. Hammond
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

The Juneau Legal Women, a group of local people, mostly women attorneys, who are interested in issues of law, would like to take this opportunity to urge you not to withdraw Alaska's delegation to the White House Conference on Families. We think it is clear that a free exchange of ideas is necessary on topics involving the family, including those topics which may be considered sensitive, but actually reflect the reality of the family structures in which many Alaskans live. We urge you not to cut off this opportunity for exchange of ideas and not to withdraw Alaska from the Conference on Families.

Sincerely,

Juneau Legal Women

Dear Governor Hammond:

It has come to my attention that you are considering withdrawing the Alaskan delegation to the White House Conference on Families. I wish to inform you that AAUW could not support that action.

The Conference was called to identify ways to strengthen and support American families. It is important that we have the opportunity to meet with scholars, professionals and policy makers to assess the current status of public and private programs which affect our families. Controversial issues may well be addressed; but what better way to air diverse opinions than in an open forum such as this conference?

I am reminded of your strong support for Alaska Public Forum. I am puzzled as to why you feel Alaskans, who are most versed in participatory government, should be kept home.

I urge you to reconsider your position and encourage Alaskan delegates to participate in this important dialogue with government.

Very truly yours,

Janice L. Foster

Dear Governor Hammond:

This letter is to urge you not to withdraw Alaska from the White House Conference on Families. We have reviewed the report of the Alaska Statewide Conference and feel it contains many concerns of Alaska citizens that should be taken to the national conference. Many of these are concerns of our organization; i.e. equal opportunity in employment and education, child care and other family concerns of the working women, employment of the elderly, etc.

By copy of this letter we are also advising all members of the Legislature of our concern.

Sincerely yours,

Marie Darlin

RESOLUTION OF THE CITY AND BOROUGH OF JUNEAU, ALASKA

Serial No. 662

A RESOLUTION URGING THE GOVERNOR TO SUPPORT THE PARTICIPATION OF THE ALASKA DELEGATION IN THE WHITE HOUSE CONFERENCE ON FAMILIES.

WHEREAS, legislation at the federal level affects families in many ways, and

WHEREAS, a national discussion of these issues may be beneficial in reducing the negative effects of legislation on families, and

WHEREAS, the White House Conference on Families was designed for this purpose, and

WHEREAS, the citizens of Juneau and of Alaska saw potential benefit in having their viewpoints on such issues represented in the national conference, and

WHEREAS, a multitude of Juneau citizens participated in the development of ideas to be represented by the state delegation, and in the selection of delegates, and

WHEREAS, the City and Borough of Juneau has already supported the participation of its citizens in this process;

NOW, THEREFORE, BE IT RESOLVED that the Assembly of the City and Borough of Juneau strongly urges the Governor of Alaska to support the participation of the Alaska delegation in the White House Conference on Families.

Adopted this 15th day of May, 1980.

Mayor

Attest:

Clerk

HOUSE RESOLUTION

Relating to participation
by the State of Alaska in the
White House Conference on Families

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES:

WHEREAS President Carter has announced a White House Conference on Families in 1980 to identify ways to strengthen and support American families; and

WHEREAS Governor Hammond issued an Executive Proclamation on January 31, 1980 declaring March, 1980 as White House Conference on Families Month and inviting community organizations to spearhead local participation through meetings and hearings to assist in developing state and national public policy to support families; and

WHEREAS the goal of the State program was identified by Governor Hammond in such proclamation as the assessment of needs and development of policies, through broad public participation, which would give support to families in the delivery of programs and services; and

WHEREAS the organizational work to implement the Governor's directive was dominated by volunteer efforts statewide with the support of the Governor's Office; and

WHEREAS hearings were held in Anchorage, Bethel, Dillingham, Eagle River, Fairbanks, Juneau, Kenai, Ketchikan, Kodiak, Sitka, Seldovia, Soldotna, and the Yukon-Kuskokwim area; and

WHEREAS testimony was also developed by the Aleutian/Pribilof Islands Association, Alaska Native Sisterhood, Fairbanks Native Association, Kodiak Native Association, and the Tanana Chiefs Conference; and

WHEREAS the Alaska White House Conference on Families was held on March 28,29 in Anchorage and was a culmination of a variety of statewide hearings, reports, organizational meetings, public testimony, and village council meetings and included delegates chosen by direct involvement through local activities, elections, local steering committees, local advisory committees, and appointments by legislators; and

WHEREAS such delegates discussed issues related to family strengths and supports, diversity of families, changing realities of family life, impact of public and private institutional policies on families, impact of discrimination, families with special needs, and developed twelve issues/concerns with action-oriented recommendations based on these themes; and

WHEREAS the Conference participants elected six delegates and the Governor appointed 3 delegates to represent the State of Alaska at the White House Conference on Families; and

WHEREAS the Alaskan delegation can offer much insight to the White House Conference on unique features of the Alaska lifestyle which tend to strengthen family life--the ability to enjoy and appreciate the natural habitat, the social openness and trust, and a large degree of individual self-sufficiency; and

WHEREAS the broad-based participation of individuals from

throughout the state has produced a delegation representative of the diversity of views and philosophies on the subject of family life which exists in Alaska; ~~and~~

BE IT RESOLVED that the House of Representatives respectfully requests that the State of Alaska participate in the White HOuse Conference on ~~the~~ Family; and that the duly elected, delegates attend the Conference ~~to be held on~~

League of Women Voters of Alaska

May 8, 1980

Honorable Jay S. Hammond
Governor
State of Alaska
Pouch A,
Juneau, Alaska 99811

Dear Governor Hammond:

The League of Women Voters of Alaska supports continued State participation in the White House Conference on Families.

The League worked closely with state and local community organizers throughout the entire process from planning community hearings to acting as recorders and facilitators. You are to be commended for carrying out the process in such an open manner. The entire process of choosing delegates was well done.

The League is appalled that you would consider abandoning the White House Conference on the Family and negating the grass root effort and commitment of Alaskans that went into choosing delegates and identifying issues impacting families in Alaska today.

The citizens of this state participated in the local hearings and state conference in good faith that they and Alaska's ideas would become part of the national dialogue on families. It is your responsibility to support this citizen/state effort and continue with the state participation in the conference.

The family is the most important basic unit in our society, and one which is strongly impacted by the more traditional political issues of economics. To consider withdrawing Alaska from dialogue on the family simply because more traditional issues are already consuming your time and energy is untenable. Non-participation is not the answer to controversy.

The League of Women Voters of Alaska urges you to keep faith with the citizens of Alaska who support the ideals of this conference and wish to continue the State's participation in the White House Conference on Families.

Sincerely,

Jean Stassel

Jean Stassel
President

May 13, 1980

Governor Jay Hammond
Members of the Alaska State Legislature
Juneau, Alaska

Dear Governor Hammond, and House and Senate members:

I've been informed that Alaska's participation in the White House conference on Families is in question.

I would strongly urge you to support Alaska's participation in that conference for two reasons:

1. You as lawmakers know that your decisions have an impact on the living patterns and institutions of society. Legislation at all levels--federal, state, and municipal--cannot fail to have impact on families.. In a sense it is not possible to "do nothing," because the consequences of governmental policy reach deeply into society already. The only issue is whether we will face problems squarely.

2. The document prepared by Alaskans comprises the opinions of a wide spectrum of people, containing both liberal and conservative viewpoints. The delegates selected also are representative of nearly all viewpoints and should effectively represent the diversity of opinions within our state.

I hope you will sustain the confidence of people in our state's democratic processes and support our participation in the upcoming conference.

Sincerely,

John Jensen

John Jensen

Governor Jay Hammond
State of Alaska
Juneau, Alaska 99811

9 May 1980

Dear Governor Hammond,

I am disappointed and perplexed that you have proposed Alaska's withdrawl from the national White House Conference on Families. I am concerned that delegates to the State Conference and alternates to the National Conference were not informed of this serious proposal by a letter from you, and many may still be unaware if their local newspapers or media did not pick up on the story.

Speaking for Juneau's involvement, a large spectrum of people gave oral or written testimony or support to the local hearings. Some spent a great deal of time and thought on their presentation with the idea that their contributions would matter. They did. Juneau came up with a position paper which contained both "liberal" and "conservative" concerns, and the three elected delegates were bound by that paper in their actions at the State Conference.

Although some groups would claim that only their families are legitimate ones, I do not feel that most Alaskans believe that families, the basic nurturing unit of our society, can be stereotyped. In fact, nationwide figures show that an employed father, a housewife mother, and children (any number) is only 15% of our nations families. In Alaska where there is a higher than average incidence of employed women, this percentage is even lower.

Nor do I feel that the scare issues of ERA, abortion and gay rights are a significant part of the Conference outcome. None were targeted as major issue areas by an panel, and the latter two were mentioned only by the first panel and in a conservative context. The ERA is simply a fact of Alaskan life and law since our own state ERA was passed eight years ago. The conference was at times frustrating to people of all persuasions, but it was on the whole a democratic process, and the concluding document is a democratic document. It cannot fail, therefore, to contain things with which we may not all agree, but to censor or alter it in any way now would cause even more distrust of government.

Special attention was given at the Conference to the needs and concerns of our native peoples. Rosita Worl and Mary Jane Fate were excellent and informative keynote speakers there. Alaska's Native and rural people have unique family concerns which will not be heard at the national level if we are to withdraw.

Please reconsider your proposal.

Sincerely yours,

Susan R. Clark

Susan R. Clark, alternate delegate to
the National Conference

GOVERNMENT INTERVENTION AND THE MAINTENANCE OF FAMILIES

by

Rosita Worl

Presented to the
White House Conference on Families
Anchorage, Alaska
March 28, 1980

The social ramifications of government intervention on family structure are both constructive and destructive; planned and inadvertent; excessive and inadequate; and responsive and repressive. Because of their special and unique relationship to the federal government, American Indians and Alaska Natives have been directly and intimately affected by government policy. The government has the power to aggregate, disperse, and displace Native American families. I would like to make it explicitly clear that I am not speaking of an infamous "black page" in American history, but rather of ongoing processes which continue to affect the survival of families.

Governmental practices continue to allow the removal of Native children from their homes and even communities. In 1973, the Senate Committee on Interior and Insular Affairs' Subcommittee on Indian Affairs received reports that alarmingly high percentages of Indian children were being separated from their parents through actions of non-tribal governmental agencies. Studies by the Association on American Indian Affairs, state welfare offices, and private child welfare groups indicated that in some areas as many as 25 percent of all Indian children are being placed in institutions or in foster or adoptive homes, usually with non-Native families (Senate Select Committee Report on S. 1214, The Indian Child Welfare Act of 1977).

During the enrollment of Alaska Native shareholders under the Alaska Natives Claims Settlement Act, Alaska Natives were shocked to learn of the high number of Native infants who were systematically placed in non-Native adoptive homes. The concept of "illegitimate child" did not exist in many parts of Alaska until white missionaries

introduced it. The idea of a "fatherless child" was viewed as the ultimate absurdity. Zealous individuals pressured Native girls to give up their "fatherless children" instead of allowing them or other family members to care for the children, which has been the traditional pattern.

Although the Indian Child Welfare Act of 1977, enacted to deter these mass removals, established legislative standards to govern the placement of Native children in foster or adoptive care settings, Native children continue to be removed from their homes and communities through a host of different programs. Church-sponsored programs of many kinds aggressively recruit and remove Native children from their homes and communities. Native families are subject to the close scrutiny of welfare agents who hold different concepts about kinship, family, and children. Judicial decisions appear to favor non-Native parents in cases in which Native and non-Native parents separate. Also, in spite of the Molly Hootch case, many Native children are still forced to leave their homes and communities to reside in boarding school facilities because the law requires them to attend school, and no local program is available. Currently, we have generations of Natives who were thus displaced at critical times of their lives. Because of this, they were denied the experience of living as a member of a family unit, and they cannot be expected to provide as healthy a family environment as they might have otherwise.

The educational process itself erodes Native value systems and ideas of family and community. Education teaches culture, and the education provided by white America for Indians, Aleuts, and Eskimos has always been aimed at teaching Western culture, the ideologies of which are founded on competition rather than cooperation and on individualism

rather than the group. I suggest that Americans concerned about the disintegration of the family unit should analyze the effects of the system of values and attitudes which encourages individualism.

At this point I would like to demonstrate how legislative action based on the American concept of individualsism can serve to divide families. Under the Alaska Native Claims Settlement Act (ANCSA) of 1971, each Native individual was enrolled as a shareholder. However, the legislation did not allow children born after 1971 to be enrolled. Several thousand Native children born after the passage of the act have been disenfranchised from their entitlement and equal participation in political and economic Native corporations organized under ANCSA. In a single family, some children will participate while others will not. Such discrimination is bound to generate divisiveness and conflict among family members and in the larger community.

I make no attempt to delineate the various patterns of family organization found among Alaskan Inupiat, Yupik, Aleut, Athapaskan, Tlingit, Tshimpshian, or Haida. The forms, organization, and composition of Alaska Native families are diverse and complex. Each group has adopted kinship systems which have perpetuated their survival. Traditional family forms among Alaska Natives include matrilineal, patrilineal, or bilateral extended families. The concept of traditional families takes different forms and meanings in different societies. I would like to emphasize that families are distinct from household units; families may be dispersed through several households but continue to interact as a single family unit. However, government policies appear to equate families with households and develop laws and regulations oriented toward the single household unit. In Native and many other

ethnic communities, modes of affiliation, reciprocity, and familial relations have different residential patterns. Furthermore, functions which the larger society has delegated to institutional agencies, such as child welfare and old-age offices, are still maintained by the families and communities which have remained culturally intact.

The government has a clear policy of protecting the environment, but no policy exists to protect the family. Whenever developments or legislation which may alter the environment are proposed, voluminous environmental impact statements are drafted and evaluated. However, these same environmental impact statements ignore the impacts, stress, and tension that will be placed on families.

Alaskan families are facing and will continue to face rapid and extensive pressures for change, most immediately those associated with outer continental shelf and other oil and gas projects. Negative impacts on families experiencing rapid and extensive change will be rampant in the state, and social disintegration social illness, and family traumas manifesting themselves in alcoholism and violence will be the consequences. The government has been grossly negligent in delineating and recognizing such social ramifications. I maintain that governments must analyze the scope of the economic policies and resulting impacts on families as well as those from legislative, administrative, and judicial decisions. Once these are identified, we must seek remedies and mitigative measures to minimize the negative impacts on families.

Family organizations differ in our diverse and pluralistic society and should not be forced into one dominant ideological mold. The maintenance of family units, in whatever form, has been the foundation and strength of America.

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

April 28, 1980

OPEN LETTER TO WHITE HOUSE CONFERENCE ON FAMILIES
NATIONAL DELEGATES

Ms. Leslye Korvola
1094 Coppett
Fairbanks, Alaska 99701

Dear Ms. Korvol.:

No matter how one may define "family", most would agree that certain economic, educational, social and societal concerns are common to all families. Beyond these, there are spiritual, moralistic and life-style considerations which draw controversy. Underlying both the contoversial and non-controversial issues is the very serious question as to what degree government should involve itself in any of them.

Many have expressed desires that the role of Alaska's delegation to the Conference on Families be expanded to provide a forum for crusading on behalf of controversial issues. Some, for example, would have you take either a militant pro or anti-abortion stance; a militant pro or anti-ERA position; or a militant pro or anti-gay rights posture. While it may be argued that these issues impact families, it would be a serious mistake to let them be perceived as the focus of your efforts. Surely, there are enough non-controversial matters impacting families to deal with without permitting the more controversial to obscure the views of most Alaskans and thus incur increasing opposition to Alaska's participation in the Conference.

Frankly, the entire effort is already fraught with the potential to become simply another exercise which, like many governmental invasions into the lives of its citizens, is conceived in hope, only later to abort in dismay.

In my view, many problems confronting families today lie not in the temperal realm so much as they pertain to impoveritization of the human spirit. As such they are not likely to be significantly impacted by yet another governmental program designed to obscure the problem beneath a flurry of tax dollars. Since this prime root cause of many family ailments transcends the political arena, it cannot, and should not, be addressed by government if we are to maintain a proper separation of church and state. Therefore, I look for no magic resolution of major family problems to flow forth from this conference.

Unlike those who fear the conference will result in some dramatic - or dismaying - federal program which either bolsters or corrodes the family structure, I suspect the effort instead may accomplish little. In view of recent and prospective massive cutbacks in federal spending, fears -- or hopes -- seem exaggerated that costly new proposals more heavily involving government in family life will be funded by the Congress. Accordingly, though I might have preferred that President Carter had not brought the proposal up at all, much less have then lobbed it to us governors, I doubt that the Conference's deliberations will yield an end product which would have major impact.

Nonetheless, there is growing agitation against Alaska's participation in the conference. Several legislators have urged me to withdraw. Recently, the Republican party adopted a platform plank requesting withdrawal, as five other states have done.

In my view, the last thing we Alaskans need at this moment is another divisive issue, real or imaginary. With the aggravations of capital move, d(2), gas pipelines, petrochemicals, stratospheric interest rates, the fish price crash, the economic crunch, and reapportionment, we already have sufficient turmoil. Unfortunately, the Whitehouse Conference on Families seems fertile soil from which such has already sprouted.

In view of this, I selected three delegates who, in my belief, reflected the views of most Alaskans as to what were appropriate positions for the Alaskan delegation to take at the conference. It is my understanding, however, that some delegates have asserted they feel no constraints to stay

within non-controversial boundaries and intend to delve into other issues which many feel do not represent the views of most Alaskans. While it is, of course, permissible for anyone to attend the conference and, as an individual, espouse such views, those who intend to do so under the aegis of the State of Alaska would not, in the view of most Alaskans, serve the State's best interests.

Before reaching a final decision as to whether I shall concur with their request, I am advising, by copies of this letter, legislators, the Republican party, and a multitude of concerned citizens who have urged Alaska to withdraw from the Conference, that I would ask all nine delegates to meet and review the policy positions you would present to the Conference.

Subsequently, should my three appointed delegates recommend we go forward with participation in the Conference, we should do so; otherwise, we will withdraw

Sincerely,

Jay S. Hammond
Governor

The Committee preceeded discussion of the bill with an overview of a report on the subject of exemptions prepared by the Dept. of C&RA, "An Examination of Property Tax Exemptions" by Terry Early, State Assessor. The questions related to exemptions were discussed and the "circuit breaker" legislation included in the material was outlined. The Dept. reiterated its opposition to further exemptions wich erode the tax base and shift the burden of taxation to others in the community. Early stated that senior citizens exemptions should be based on need. And that property tax should be based on ability to pay. There are currently 3 different approaches used to tax boats--the Municipal League is working on a solution to this problem. The problem with the current optional exemption to the property tax is that the resource rich communities benefit. There should be some consideration given to payment in lieu of taxes for communities which have a preponderance of state & federally owned facilities.

The word " contiguous" was removed in the SSHCR45. One of the problems with the bill is that a subdivider can hold the land in tax exempt status.

Parr- Discusses history of "circuit breaker" approach. It started in the Midwest in an attempt to help low income persons. In Michigan if the taxes exceed 3% of income, the state will reimburse 60%.

Early - The state currently reimburses for 1 acre urban land and 5 acres rural land. The Dept. believes there should be a limit on the amount of land which is tax free. 70% of the money in Anch. goes to one individual. How much are we willing to subsidize?

Metcalfe - There should be some provision for those who hold leasehold interests in land which are not saleable. The base exemption should be on the value rather than on the property size.

COMMITTEE ACTION: Adopted Parr's amendment. Recommends a further referral to Finance Committee and a redo of the fiscal note.

TAPE # _____ SIDE _____ Footage _____

Parr- The transferred payments question should be looked at. Leave room for the municipalities to decide what they want to do. State shouldn't be making all those decisions. Local government should ahve discretion.

Plotnick, Office of Aging
Favors SSHCR 45. Programs for the elderly should be based on need but Seniors are generally in need. The exemption is actually more valuable than the longevity bonus. Your home is your castle.

Metcalfe - Value of property should be determinent.

Plotnick- Estate taxes will take more than this situation.

Malone - On the question of senior citizen's exemption being based on need, it is not necessarily based on need but rather public policy as benefit for a certain cateogy of people. The intent of the resolution is that the propoerty owned and occupied as permanent place of abode be exempt. There is no intent of changing the law rather to clarify it. Malone reveiws the history of the law as addressed in letter from J. Chenoweth.

The question was raised whether or not there should be a provision added to the resolution stating that administrative guidelines contrary to the intent of the law should not be promulgated. Malone responds that the administrative regs were actully made ineffective by the Pegues memo on the subject and that it has been determined that resolutions are not appropriate mechanisms for repealing regulations.

People who should have received exemptions should probably receive it retroactively.

Malone cites the law which has two distinct parts:
1. Provides eligible residents are entitled as a matter of law to the exemption
2. provides that the legislative appropriate money to fill loss of revenue to the municipalities--reimbursement subject to funding by the legislature.. Therefore, if there isn't enough money, the senior is still entitled to the exemption. Advise people that they are entitled to reimbursements. Municipalities could absorb but a supplemental may be in order by the state.

Parr- Amend to add " Be it furter resolved that qualifying residents 65 years of age and older who because of administrative interpretation did not receive the full amount of the exemption, be reimbursed.

Redo fiscal note and ask for Finance Committee referral.

Fiscal note for an existing law is unusual (Parr)

Dove Kull testifies in support of the bill.

Decision made by sponsor, Rep. Malone to deal with amendment in the form of a letter of intent to the Finance Committee.

Re: Ombudsman Complaint A79-0788
(Pending)

Dear Mr. McCarter:

On July 24, 1979, this office received a complaint alleging that the State Assessor has arbitrarily limited the senior citizens property tax exemption to one acre in urban areas and five acres in rural areas. According to the complainant, the State Assessor does not have statutory authority under AS 29.53.020 (e) to impose such a limitation on the property tax exemption granted to senior citizens.

Please take notice that this complaint has been fully investigated by the Office of the Ombudsman, and has been found to be Justified.

In our investigation of this complaint, we found that the property tax exemption in question is based on AS 29.53.020 (e) which states:

> The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570. (emphasis added)

When this law was originally enacted in 1972, it contained a provision to limit the exemption to those individuals with an annual income of less than $10,000.00. That provision was repealed in 1973. In 1976 the legislature passed an amendment to limit the exemption to the upper third quartile of assessed values in the state during the previous year. However, this provision was repealed during the 1977 Legislative Session, retroactive to January 1, 1977. Thus the quartile system was never

placed in effect.

The only limitation stated in the present statute on the amount of land to be included in the exemption is the phrase "real property owned and occupied as a permanent place of abode." The last two sentences of subsection (e) are clearly intended to prohibit the fraudulent transfer of real property to senior citizens for the purpose of avoiding taxes. As currently written, AS 29.53.020 (e) contains no mention of, or reference to, any specific acreage limitation on the amount of "real property owned and occupied as a permanent place of abode."

Shortly after this statute was first enacted, the State Assessor began utilizing administrative guidelines to impose an acreage limitation on the amount of land that senior citizens claimed as their permanent place of abode. These guidelines were based on the argument that the amount of land in the exemption must be strictly construed pursuant to 19 AAC 35.120 (4) of the Alaska Administrative Code. Subsection (4) of that Regulation, adopted in 1973, defines "permanent place of abode" as "a dwelling, or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to convenient use of the dwelling unit." Since the Regulation does not contain mention of any specific acreage limitation, administrative guidelines were used to limit the exemption to one acre in urban areas and five acres in rural areas.

Over the years, at least three municipalities attempted to give full exemptions to senior citizens living on parcels larger than the one-acre and five-acre limitations. These municipalities took the position that the State did not have the statutory authority to limit the exemption to a specific number of acres. The State Assessor dissuaded the Municipality of Anchorage and the Matanuska-Susitna Borough from exempting large parcels by threatening to reject their reimbursement requests. In 1977, however, the State reimbursed the Kenai Borough on the basis of the full amount of the property claimed by senior citizens rather than the one-acre and five-acre formula. Due to the controversy surrounding the use of administrative quidelines to justify an acreage limit, the State Assessor drafted an amendment to 19 AAC 35.120 (4) which would have further defined "permanent place of abode" as "limited to not more than one acre if urban nor more than five acres if rural."

This proposed change in the Regulations met with strong opposition and in early 1978 the Legislature's Administrative Regulation Review Committee held hearings on the proposed amendment. After an exhaustive search, the Legislative Counsel could find no evidence to support the contention that the Legislature had ever intended a specific acreage limitation on the senior citizens exemption. In a written opinion, the Legislative Counsel concluded:

> there appears to be no basis in law by which the state assessor may direct or authorize local assessors to give approval to less than the entire parcel shown by an otherwise qualified applicant to be his or her permanent place of abode.

After the March 1978 hearings, members of the Administrative Regulation Review Committee were divided on the issue of whether there should be an acreage limitation. The only point agreed upon by the Committee was that if such an acreage limitation is to be instituted it must be written into the statute, not adopted by regulation or administrative guideline. Therefore, the Committee recommended that the matter be referred to the Legislature for consideration as an amendment to the statute. A bill to amend the statute was introduced in the 1978 session, but no final action was taken on it. So the State Assessor continued to administer the one-acre and five-acre limitations through the use of administrative guidelines. This resulted in the filing of a complaint with the Ombudsman and initiation of the present investigation.

In responding to our original inquiry regarding this complaint, the State Assessor asserted that the one acre and five acre limitation was mandated by the municipalities. Several municipal tax assessors assert, on the other hand, that the State Assessor forced this formula on the municipalities. The Department of Community and Regional Affairs requested an opinion from the Attorney General's Office on the agency's authority to impose a specific acreage limitation.

In an opinion dated August 17, 1979, Assistant Attorney General Rodger W. Pegues wrote that the State Assessor's one-acre and five-acre limitation "comports" with the purpose expressed in the phrase "owned and occupied" in the statute. Mr. Pegues justified his assertion not on the basis of specific reference to evidence of legislative intent but rather on the supposition that "we do not believe that a windfall for holders of vast tracts of land was intended or that the exemption was designed to encourage speculation in realty and the withdrawl of large tracts from the market." Mr. Pegues concluded that if the State Assessor's language of limitation were incorporated into the agency's regulations "as an interpretation of AS 29.53.020 (e), it would survive judicial scrutiny. However, until it is adopted as a regulation under the Administrative Procedure Act, it can have no legal force or effect on a person claiming the exemption." The Attorney General's opinion also suggested that if the Assessor has consistently interpreted AS 29.53.020 (e) as incorporating the one-acre and five-acre limitation, "the interpretive regulation can be given retroactive effect when it is adopted."

On the basis of the above-cited opinion, the Department of Community and Regional Affairs recently announced that it will hold public hearings for the purpose of amending the definition of "permanent place of abode" (19 AAC 35.120 (4[ ) to include the one and five acre limitations. That is precisely what the agency attempted unsuccessfully to do in early 1978. The agency's present course of action runs contrary to the recommendation made to the agency by the Legislature's Administrative Regulation Review Committee in 1978.

FINDING: We find the complaint to be Justified. We find the phrase "real property owned and occupied as a permanent place of abode" in AS 29.53.020 (e) to be clear on its face. We found no evidence of legislative intent and no persuasive interpretive rules to indicate that the legislature meant the phrase to authorize a specific acreage limitation.

The present statute should be applied as written: without an acreage limitation.

We also find that the definition of "permanent place of abode" in the Regulations (19 AAC 35.120 (4)) is in conflict with the language of the statute since "necessary to convenient use" implies a limitation of the exemption. In a similar manner, the State Assessor's "administrative guidelines," which have been used in the past to justify the one-acre and five-acre limitation, are also in conflict with the language and intent of the statute.

We find that the agency, by administratively imposing a limitation on a general tax exemption granted to a specific group of citizens, has infringed upon the functions of the Legislature. Tax relief is a question for legislators to decide, not a policy matter that should be decided by administrative officials. The State Tax Assessor and the Department of Community and Regional Affairs have assumed a taxing role by implementing specific acreage limitations on the Senior Citizens Property Tax Exemption. For this reason we find the agency's actions to be arbitrary and an abuse of administrative powers.

RECOMMENDATIONS:

1. We recommend that the Department of Community and Regional Affairs desist from enforcing the one-acre and five-acre "administrative guidelines" which are counter to the language of the statute.

2. We recommend that the agency not adopt the proposed change in 19 AAC 35.120 (4) which would further define "permanent place of abode" as "limited to not more than one acre if urban, nor more than five acres if rural."

3. We recommend that the agency amend 19 AAC 35.120 (4) to eliminate the phrase "which are necessary to convenient use of the dwelling unit" from the definition of "Permanent place of abode."

4. We recommend that if the agency believes there should be an acreage limitation on the Senior Citizens Property Tax Exemption, then the agency should address the issue by asking the Governor to introduce a bill to amend AS 29.53.020 (e) in the forthcoming session.

Since this report of our findings contains formal recommendations made by this office, may we have a response from you within thirty days, pursuant to AS 24.55.190 (b) and AS 24.55.200. Should you wish to discuss any part of this report, please feel free to call me at 276-4011.

Sincerely,

Frank Flavin
Ombudsman

January 21, 1978

SUBJECT: Acreage limitations on senior citizen property tax exemption applications.

TO: Representative Hugh Malone, Speaker
House of Representatives

FROM: John B. Chenoweth
Legislative Counsel

You have been asked by a constituent to comment on the validity of a determination by the Department of Community and Regional Affairs providing only a partial exemption to homestead property under the senior citizens property tax exemption program, AS 29.53.020(e) - (i). The constituent apparently received approval of a portion of his homestead, but the entirety of the parcel was not approved, thereby requiring a payment by him of a portion of the tax.

The applicable statutes are AS 29.53.020(e) and (f):

> (e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570.

> (f) No exemption may be granted except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors. The claimant must file the application no later than January 15 of the assessment year for which the exemption is sought, but during the same year the governing body of the municipality for good cause shown may waive the claimant's failure to make timely application for the exemption for that year and authorize the assessor to accept the application as if timely filed. The claimant must file a separate application for each assessment year in which the exemption is sought. If an application is filed within the required time and is approved by the assessor, he shall allow an exemption in accordance with the provisions of this section. If a claimant whose failure to file by January 15 of the assessment year has been waived as provided in this subsection and the application for exemption is approved, the amount of tax which the claimant may have already paid for the assessment year with respect to the property exempted shall be refunded to him. The assessor may at any time require proof in the form he considers necessary of the right and amount of an exemption claimed under this section.

To implement the program, the Department had adopted administrative regulations in 19 AAC 35. A definition of "permanent place of abode" is provided in 19 AAC 35.120(4):

> "permanent place of abode" means a dwelling, or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to the convenient use of the dwelling unit;

The underscored language is apparently the basis by which the local assessor or the state assessor determines that less than the entirety of a homestead owned and occupied by a qualifying senior citizen is eligible for the tax exemption.

There appears to be no basis in law by which the state assessor may direct or authorize local assessors to give approval to less than the entire parcel shown by an otherwise qualified applicant to be his or her permanent place of abode.

Your courses, as I see them, are these:

(1) you may write to the constituents indicating that they have a right of appeal of the decision of the assessor under the applicable provision of the Administrative Procedure Act;

(2) you may direct, or suggest that the constituents direct, a letter to the Department of Community and Regional Affairs, under AS 44.62.220 - 44.62.230, asking amendment of the regulation to repeal the language in the definition of "permanent place of abode" that authorizes exemption of a portion of the applicant's residence parcel;

(3) you may, directly or through the Administrative Regulation Review Committee, seek annulment of the regulation; or

(4) you may submit a bill to make clear that the whole parcel used by an otherwise qualified applicant as his permanent place of abode shall qualify for the exemption, with the bill carrying a retroactive clause to protect the interest of your constituent and others similarly situated.

(Further on this matter, though not directly applicable to the instance you have described: Amendments to the senior citizens property tax exemption pending with the Department of Law make more specific the limitation alluded to. The limitation on acreage which would qualify for the exemption is specifically set at one acre in "urban" areas and five acres in "rural" areas. Apparently, the pending amendments do not otherwise describe or define when an area is "rural" or "urban".)

RE: Property Tax Exemptions

Tomorrow, Feb. 22, the Committee will be hearing SSHCR 45 relating to senior citizen tax exemption. In conjunction with review of this bill, and in light of the fact that the committee will be hearing a number of bills related to property tax exemptions, I would like the committee to consider a report done by the Dept. of Community and Regional Affairs entitled "An Examination of Property Tax Exemptions." (attached)

Pages 2-8 and the Appendix will be particularly pertinent to the discussion. I am interested in your reaction to the proposal by the Dept. to consider a "circuit breaker" approach to the question of property tax relief. (See Appendix)

INTRODUCTION

During the first session of the 11th Legislature, several bills that dealt with exemptions were introduced.

At that time, the Department of Community and Regional Affairs asked for time to study and be able to report on the whole exemption problem before additional erosion of the local tax base is allowed.

The attached report is a synopsis of the information developed by this study, with some recommendations included. Some suggested legislation is also included.

It should be pointed out that this report deals strictly with the major exemption problems. In many cases, the study only points out the problem or suggests several options. The main thrust of the study was not to suggest solutions, but instead, point out problems and offer technical assistance in the development of acceptable solutions by elected officials.

EXEMPTION

Background-Philosophy and Policy

Property tax exemptions are nearly as old as the property tax itself, and are as often misunderstood. The basic description of tax exemption and tax reform is a shifting of the tax burden from one taxpayer to another.

The cost of local government will be about the same regardless of the revenue source and the tax structure used to support it. Whether or not those costs are reasonable is another subject, and is not discussed herein. However, which segment of society pays what portion of that local government cost is very dependent on that tax structure. The net effect of granting property tax exemption is to correspondingly increase the burden on the balance of the taxpayers in direct proportion to the exempted amount.

Originally, exemptions were created to prevent government from taxing itself. The reason being that the public entity should not have to pay taxes to itself. Over the years, the definition of public entity was expanded to include churches, and then with the advent of a more complex society, additional reasons for granting exemptions to special interest groups were established. A proliferation of exemptions to these special interest groups in many areas of the country has added to the unrest over property taxes, and in many instances has increased the burden on the average taxpayer. It is felt that before the State of Alaska proceeds any further down the exemption trail, an attempt should be made to establish priorities and policies. A lack of firm

policy in other states has led to a hodge podge of exemptions that defy logic in some instances (i.e. exemptions extended to Beet Sugar manufacturers, owners of middle income apartment dwellings, and department stores).

Credibility of the property tax has been questioned continuously and with increasing intensity. A major cause of unrest with the tax is the feeling by taxpayers that they are paying more than their fair share. This unrest can only be resolved by a scrupulously equitable and uniform system founded upon the broadest possible tax base.

There are several reasons generally given for allowing the property tax base to be eroded by exemptions. Any of these reasons could be more effectively achieved through more direct and more visible subsidies. Little rationale can be found for increasing the complexity and expense of the assessment process to provide grants-in-aid for whatever worthwhile cause.

As a broad policy statement, the Department of Community and Regional Affairs favors few if any additional exemptions, and feels that all exemption programs should be reviewed in the following context:

ANY EXEMPTION GRANTED MUST EITHER BE FOR PUBLIC PROPERTY OR FOR SUFFICIENT PUBLIC GOOD TO JUSTIFY A TRANSFER OF BURDEN TO THE BALANCE OF THE COMMUNITY.

Additionally, non-uniformity of exemption can create problems.

The current optional exemptions create animosity in taxpayers. Although, in general, the Department is in favor of local control, the optional exemptions are one area where local control causes more problems than it solves.

Taxpayers have a tendency to brag about any tax break they get, and those who don't get the same breaks are generally upset. Fairbanks taxpayers don't think they should pay sales tax because Anchorage doesn't, and Anchorage wants a $10,000 residential exemption because Fairbanks has one. Also, some select communities can grant additional optional exemptions, and the only loss in revenue is to the State General Fund (see discussion of residential exemptions on page 14).

Based on the stated policy and philosophy in this section, the following are discussions of what are considered to be the major exemption problems currently facing the local assessor in Alaska.

SENIOR CITIZENS AND OTHER GROUPS

Current statutes providing for property tax relief to senior citizens do not appear to be as equitable as is desirable. Any revision to these specific programs will require decisions as to the reason for the exemption at the very beginning.

There appear to be several reasons for exempting Senior Citizens. The three major reasons are:

1) They are, in many cases, on a fixed income and cannot absorb property taxes increased by inflation.

2) It is considered desirable to provide tax relief as an incentive to continue as residents of the State of Alaska.

3) It is considerably less expensive to assist a senior citizen to maintain their own home than to have them reside in a state supported facility.

Other reasons sometimes advanced such as:

Showing our esteem for and gratitude to the pioneers of the state or

Rewarding our wartime veterans

are better left to the normal grant-in-aid type programs.

Once the reasons for the exemption are established, the next logical area for examination becomes other groups also deserving of this type of exemption and meeting the same criteria. There

are at least two categories that have been mentioned recently, they are; Disabled Veterans and Indigent Persons. Therefore, some sort of master plan or master policy should be developed that is capable of dealing effectively and equitably with each of these groups on some basis.

The next consideration has to be one of equity and what is a proper measure thereof.

The major reasons listed earlier seem to indicate that the effectiveness of this type of program should probably be based on need.

The next step would appear to be to examine the current programs to determine if they meet this criteria:

SENIOR CITIZEN HOMEOWNERS

The Senior Citizen Homeowner is exempted from paying property tax on his residence, with some limits on the amount of acreage, but no limits on the dollar amounts. In 1978 this averaged approximately $586 per applicant. However, the range of tax dollars saved ran from a high of $6,245 to a low of $3.35.

SENIOR CITIZEN RENTER

The Senior Citizen Renter is rebated a portion of the previous year's rent based on a formula which is: 1/2 the current millage

rate, in municipality where the senior resides, (taken as a percentage) multiplied by the rent paid. A practical example of this formula is as follows:

Local Millage x 1/2 as percentage x Rent Paid = Rebate

15 Mill x (1/2) = 7.5% x $3,600 = $270

This rebate, however, is limited to a maximum of $375 per year, per applicant. The average rebate from 1978 was $181 per person.

It is very obvious that there are inequities within this system as it now exists. It does not seem reasonable that the average savings in one program is larger than the maximum allowable under the other program. Also the Senior Citizen Homeowner Program is for the current year and the senior doesn't have to pay out any cash whereas the renter pays out money and is rebated. Still another apparent problem is lack of any criteria dealing with ability to pay. Under the current system · are rebating $6,000 plus to several homeowners but limiting renters to a maximum of $375. By establishing some kind of income criteria, the same amount of benefits might be distributed more equitably among senior citizens.

In many areas of the country a "circuit breaker" type exemption program has been instituted and seems to work relatively well in most instances.

There is a major difference between administration of a circuit breaker and our current system. The circuit breaker concept, although simple in nature, can be designed to meet numerous criteria. It could provide a limited property tax relief to low income taxpayers and more substantial relief to senior citizens and disabled veterans if that was the desired effect.

This circuit breaker can be modified to provide many kinds of relief to many segements of society depending on the financial capabilities and the desires of the legislature. Because of billing and filing dates in Alaska it would have to be done as a rebate like the renters now is. This is not the optimum, but because of the improved equity this problem might be overlooked. Also the administration might better be handled by the Department of Revenue as opposed to present location, however, it is possible to leave administration with Community and Regional Affairs.

The appendix includes a suggested model Circuit Breaker Bill.

MOTOR VEHICLES

Assessment and taxation of motor vehicles is treated three different ways by the various municipalities. Some levy an ad valorem (at value) tax, some levy the state collected registration tax which is based on a rate schedule by age of the vehicle, and others do not tax vehicles at all.

The discovery of taxable vehicles is a major problem, in most jurisdictions levying an ad valorem tax on vehicles. It is almost a "volunteer" tax. The owner must declare the vehicle in order for the vehicle to be "discovered" on the tax roll. Investigation for discovery becomes intolerably time consuming and expensive, especially in view of the limited return in revenue for each vehicle.

Putting an equitable value on a vehicle is also a problem. Accurate use of "blue book" requires fairly detailed description of the vehicle and a reasonable estimate of its conditions. Description by the owner is seldom complete and condition remains a guess without personal inspection. Therefore, the jurisdiction is generally inclined to accept tne owner's estimate of value.

These problems have the effect of penalizing the more honest taxpayer and subsidizing the less scrupulous, thereby destroying the theory of equally proportionate participation and also the credibility of the tax system.

AS 28.10.255 provides an optional procedure as an alternative to ad valorem tax. The statute allows the municipality to have a registration tax collected by the state at the time the annual state registration fee is collected. The state then retains a portion of the tax collected for administration and pays the remainder to the municipality.

This alternative to ad valorem tax has decreased administration costs substantially for the Municipality of Anchorage.

It appears that the major reason only three municipalities have thus far chosen to exercise this option is objection to the rate schedule provided. This schedule has been tailormade to fit Anchorage ad valorem rates and thus results in a rate per vehicle substantially higher than the comparable rate for ad valorem taxes in most jurisdictions. Obviously, vehicle owners object to the increased tax rate.

Another objection has been that the state collected tax is combined with the registration fee which makes a substantial lump sum payment that is difficult for many taxpayers to meet all at once.

BOATS

The assessment and taxation of boats is not only subject to the same problems as vehicles but also is further complicated by the problems of establishing the tax situs. This many times, requires an elaborate agreement between jurisdictions both interstate and

intrastate. For instance, in the case of a vessel registered in a home port in Washington but fishing the entire season out of Bristol Bay.

The statewide equity in the taxation of boats is further eroded by AS 29.53.025 (1) which allows the jurisdiction the option to levy not more than $5.00 for a boat less than 5 tons nor more than $15.00 for a boat of more than 5 tons.

This optional levy provision amounts to much the same thing as exemption from property tax. It can be construed as a tax break to a selected group of small businessmen (fishermen) and a select group of residents (boat dwellers), who demand much the same service (i.e. refuse disposal and police) as do other residents, but because of strong lobbying efforts, do not pay a proportionate share of local government costs.

Current situs provisions further complicate the matter. 29.53.060 states in part "(a) The assessor of a municipality shall assess property at it's full and true value as of January 1 of the assessment year,...". Most assessors feel that that date is an, as of, appraisal date, (the date to which appraisals are tied) as opposed to a situs date, (the date when physical presence is required for taxation). This, however, is not a universal interpretation and in fact should be made clear.

If in fact, this is a situs date, then many boat owners would

move to non-taxing jurisdictions for that one day to avoid property taxes. Again the honest taxpayer has to pay and the less than honest or more devious taxpayer does not.

PLANES

Aircraft is another category of property that is highly transitory, expensive, and subject to rapid depreciation.

Often municipalities are taxing, at least commercial, aircraft based on "value per average daily landings". Others use a "flat rate" schedule, while some planes are valued at full and true value.

Any or all of these categories of property may be exempted under the "grandfather rights" provision, AS 29.53.052, which allows any exemptions in effect on September 10, 1972 to be continued indefinitely.

MOVABLE PERSONAL PROPERTY

All of the items previously discussed in this section fall under the category of movable personal property. This broad heading also includes other types of vehicles such as snow machines and motorcycles etc. Proper administration of a property tax on these personal type vehicles is in many cases thought to cost more than it generates; if in fact it is possible to properly administer a normal property tax on this type of property.

There are two solutions apparent to this problem. They are:

1. Mandatory state registration and flat rate tax collections would provide equity and at the same time is the most economical method for assessment and tax collection for these mobile types of property. This has proven effective with automobiles, if the rate is properly structured.

   It is our recommendation that such a mandatory act be adopted.

2. Mandatory exemption: The idea of exempting motor vehicles, boats, and planes would have a severe revenue reducing effect on some municipalities. However, mandatory exemptions must be considered as a viable solution to current problems.

Optional exemptions in many cases hinder movement toward more equitable distribution of tax burdens in the state. While these optional exemptions are good window dressing in the eyes of supporters of local control, they are basically a method of shifting the burden locally and in some cases away from that of the local municipality to the balance of the state.

Residential Exemption - The statute provides for an optional exemption of up to $10,000 on a place of residence. It should be pointed out that almost all of the municipalities that grant this exemption are wealthy in terms of money generated by natural resources. In most of those cases the exemptions are granted at the expense of the balance of the taxpayers of the State. When the cost of government remains static but assessed values are reduced (i.e. residential exemption), normally the millage rates go up. In areas where the state levies 20 mills minus the local rate on oil and gas properties, it is also evident that increases in local rates decrease state revenue. The end result of granting the optional residential exemption is a shifting of the burden from the residential property owner to the business community and the balance of the state. It should also be pointed out that the residential property owners benefiting from this exemption are the same property owners who are already benefiting the most from the natural resource development.

The other types of exemption, although not of the same magnitude,

do cause hard feelings and in some cases can cause lack of growth in those units that are not wealthy enough to grant them. They compound the old adage, "that the rich get richer and the poor get poorer." Those units that can grant optional exemptions can more easily attract new business and increase their tax base while poorer municipalities do not have that advantage.

The Department therefore recommends that the following policy be adopted:

> NO ADDITIONAL OPTIONAL EXEMPTIONS BE ADOPTED AND THAT HEARINGS BE HELD TO DETERMINE THE MOST PRACTICAL APPROACH TO ELIMINATING THE OPTIONAL EXEMPTIONS EITHER BY MAKING THEM MANDATORY STATEWIDE OR NON-EXEMPT STATEWIDE.

GENERAL EXEMPTIONS

The extensive land and other property holdings of federal and state governments have long been a problem for local governments. Generally speaking, these holdings are exempt from local property taxation.

These exempt properties still require public services provided by local government such as trash removal, police protection, fire protection, etc.

As the percentage of governmental land within these municipalities increase, so does the burden for support of that local government increase on the balance of the taxpayers. Communities that have a large preponderance of state and federally owned facilities, normally speaking, have a tendency towards having higher tax rates than similar municipalities without this percentage of tax exempt properties. Considering that state and federal facilities generally service more than just the community in which these facilities are located, it seems unreasonable that local residents should be forced to bear this disproportionate share of services provided to those facilities.

In some cases, the federal government currently pays fees in lieu of taxes for services provided their facilities. This, however, is not true in all cases.

It would seem reasonable that the State should pay some sort of fee in lieu of taxes at least on improved facilities that create

a need for services. This fee should not necessarily be equivalent to property taxes, but should relate to the cost of the services provided by the local municipality.

APPENDIX

An Act to provide State relief to householders for extraordinary property tax burden.

SECTION I. PURPOSE. The purpose of this act is to provide property tax relief through a system of tax credits and refunds and appropriations from the General Fund to certain persons who own or rent their homesteads.

SECTION II. DEFINITIONS AS USED IN THIS ACT. (a) "Income" means a sum of Federal adjusted gross income as defined in the Internal Revenue Code of the United States and all non-taxable income including but not limited to the amount of capital gains excluded from adjusted gross income; alimony, support money, non-taxable strike benefits, cash public assistance and relief, the gross amount of any pension or annuity, all payments received under Federal Social Security and State unemployment insurance laws, non-taxable interest received from the Federal government or any of its instrumentalities, workman's compensation and a gross amount of "loss of time" insurance. Income does not include gifts from a non-governmental source or surplus foods or other relief in kind supplied by a public or private agency.

(b) "Household" means the association of persons who live in the same dwelling, sharing its furnishings, facilities, accommodations, and expenses. That term does not include bona fide leasees, tenants or roomers and boarders on contract.

(c) "Household income" means all income received by all persons of the household in a calendar year.

(d) "Homestead" means the dwelling, whether owned or rented, and so much of the land surrounding it, not exceeding one acre, if urban, or five acres if rural, as is reasonably necessary for the use of the building as a home and may consist of a portion of a multi-dwelling or multi-purpose building and a part of the land upon which it is built. It does not include personal property such as furniture, furnishings or appliances, but a mobile home or a houseboat may be a homestead.

(e) "Claimant" means a person who has filed a claim under this act and was domiciled in this state for the entire calendar year for which he files for relief under this act. When two or more individuals of a household are able to meet the qualifications for claimant, they may determine among them who the claimant shall be. If they are unable to agree, the matter shall be referred to the commissioner and his/her decision shall be final.

(f) "Property taxes accrued" means property taxes (exclusive of special assessment, delinquent interest and charges for service) levied on a claimant's homestead in this state in 1980 or any other calendar year thereafter. For purposes of this paragraph, property taxes are levied when the taxes become due and payable. If claimant owns his homestead on the assessment date "property taxes" accrued means taxes levied on the levy date for that year even if the claimant does not own his homestead for the entire year.

When a household owns and occupies two or more different homesteads in this state in the same calendar year, property taxes accrued shall relate only to that property occupied by the household as a

homestead on the levy date. If a homestead is an integral part of a large unit such as a farm or multi-purpose or multi-dwelling building, property taxes accrued shall be that percentage of the total property taxes accrued as the value of the homestead is of the total value. For purposes of this paragraph, "unit" refers to a parcel of property covered by a single tax statement of which the homestead is part.

(g) "Gross rent" means rent actually paid in cash or its equivalent solely for the right of occupancy of the homestead. Exclusive of charges for utilities, services, furniture, furnishings, or personal appliances furnished by the landlord as part of the rental agreement.

When a claimant owns two or more homesteads in a year and does not own his homestead as of the levy date, gross rent shall mean the total rent paid for the homestead most recently rented multiplied by the number whose numerator is twelve and whose denominator is the number of months said homestead has been rented by the claimant. If the landlord and tenants have not dealt with each other at arms-length and the commissioner is satisfied that the gross rent charge is excessive, he/she may adjust the gross rent to a reasonable amount for purposes of this act.

(h) "Rent constituting property taxes accrued" means 20 percent of the gross rent.

(i) "Senior citizen" means an applicant who is 65 years of age or older on January 1 of the levy year.

(j) "Disabled veteran" means a person honorably separated from the military service of the United States whose disability was incurred or aggravated in the line of duty in the uniformed services of the United States, and whose disability has been rated by the branch of the service or the Veterans Administration at 50% or more.

SECTION III. CLAIM IS PERSONAL. The right to file a claim under this act shall be personal to the claimant and shall not survive his death, but such right may be exercised on behalf of the claimant by his legal guardian or attorney-in-fact. If the claimant dies after having filed a timely claim, the amount therein shall be disbursed to another member of the household as determined by the commissioner. If the claimant is the only member of his household, the claim may be paid to the executor or administrator. But, if neither is appointed and qualified within two years of the filing of the claim, the amount claimed shall escheat to the State.

SECTION IV. CLAIM IS A REBATE FROM STATE FUNDS. Subject to limitations provided in this act, the claimant may claim, in any year, a rebate for property taxes accrued or rent constituting property taxes accrued for the preceding year. The amount of the rebate after authorization by the commissioner shall be paid to the claimant from balances retained by the state for general purposes.

SECTION V. FILING DATE. No claim, with respect to property taxes accrued or with respect to rent constituting property taxes accrued, shall be paid or allowed, unless the claim is actually filed with

and in the possession of the department on or before April 15, 1980. Subject to the same conditions and limitations, claims may be filed on or before April 15 with respect to property taxes accrued for the next preceding calendar year.

SECTION VI. SATISFACTION OF OUTSTANDING TAX LIABILITIES. The amount of any claim otherwise payable in this act may be applied by the department against any liability outstanding on the books of the department against the claimant or against his or her spouse who was a member of the claimant's household in the year for which the claim relates.

SECTION VII. ONE CLAIM PER HOUSEHOLD. Only one claimant per household per year shall be entitled to relief under this act.

SECTION VIII. COMPUTATION OF CREDIT. The amount of any claim made pursuant to this act shall be determined as follows:

(a) A senior citizen or disabled veteran is entitled to claim a grant under this act in the amount of property taxes accrued or rent constituting property taxes accrued upon the homestead not to exceed $500. Property taxes accrued by a senior citizen or disabled veteran in excess of $500 are also eligible for claim under paragraph (b) of this section.

(b) A claimant shall be entitled to reimbursement equal to 60% of the amount by which the property taxes on the homestead or the credit for rental of the homestead for the taxable year exceeds the percentage of the claimants total household income for that

taxable year computed as follows:

HOUSEHOLD INCOME	PERCENTAGE
Not over $5,000	3.5%
Over $5,000 but not over $6,000	4.0%
Over $6,000 but not over $7,000	4.5%
Over $7,000 but not over $8,000	5.0%
Over $8,000 but nor over $9,000	5.5%
Over $9,000	6.0%

(c) No credit under this section shall exceed $1,500.

(d) The department shall prepare a table under which claims under this act shall be determined. The table shall be published in the department's regulations and shall be placed on the appropriate forms. The amount of the claim as shown in the table for each bracket shall be computed only to the nearest dollar.

(e) The claimant, at his election, shall not be required to record on his claim the amount claimed by him.

(f) The claim allowable of persons making this election shall be computed by the department.

SECTION IX. ADMINISTRATION. The commissioner shall make available suitable forms with instructions for claimants including a form which may be included with or as part of the individual income tax claim. The claim shall be in such form as the commissioner may prescribe.

SECTION X. PROOF OF CLAIM. Every claimant under this act shall supply to the department in support of his claim reasonable proof of rent paid, name and address of owner or managing agent of property rented, property taxes accrued, changes of homestead and a statement that the property taxes accrued and used for these purposes have been, or will be paid by them and that there are no delinquent property taxes on the homestead.

SECTION XI. DENIAL OF CLAIM. If it is determined that a claim is excessive and was filed with fraudulent intent, the claim shall be disallowed in full. If the claim has been paid, the amount paid may be recovered by assessment as income taxes are assessed, and the assessment shall bear interest from the date of payment of the claim until refunded or paid at the rate of one-and-one-half (1½) percent per month. The claimant in such case and any person who assisted in the preparation or filing of such excessive claim or supplied information upon which such excessive claim was prepared with fraudulent intent is guilty of a misdemeanor.

SECTION XII. PUBLIC WELFARE RECIPIENTS EXCLUDED. No claim for refund under this act shall be allowed to any person who is receiving public funds for the payment of taxes or rent during the period for which the claim is filed.

SECTION XIII. DISALLOWANCE OF CERTAIN CLAIMS. A claim shall be disallowed if the department finds that the claimant received title to his homestead primarily for the purpose of receiving benefits under this act.

SECTION XIV. AS 29.53.020 (e) through (i) is annulled.

SECTION XV. AS 29.73.060 is annulled.

House District Six Democrats sent the following message to SENATOR KERTULA, District Six; REP. CARNEY, District Six; SENATOR HACKNEY, Senate H.E.S.S.; REP. BUCKHOLDT, House H.E.S.S.; SENATOR SACKETT, Senate Finance; and REP. MEEKINS, House Finance:

THE DEMOCRATS AT A MEETING ON FEBRUARY 2, 1980 UNANIMOUSLY ENDORSED THE PACKAGE OF BILLS RECOMMENDED BY THE LEGISLATIVE INTERIM COMMITTEE ON SERVICES TO ELDERLY.

SPECIAL CONCERN WAS VOICED FOR PASSAGE OF A STRONG OLDER ALASKANS COMMISSION, H.B. 618 AND AN IDENTICAL BILL ON THE SENATE SIDE. THE ONLY OPPOSITION TO THIS BILL APPEARS TO COME FROM SOME OF THE SENIOR CENTERS BECAUSE OF MIS-INFORMATION ABOUT THE LEVEL OF THEIR FUNDING UNDER THE OLDER ALASKANS COMMISSION IF ESTABLISHED. WE ARE NOT INFORMED AS TO THE SOURCE OF THIS MIS-INFORMATION, BUT HAVE REASON TO BELIEVE THAT IT ISSUES FROM A CENTRAL SOURCE.

WE URGE YOUR SUPPORT FOR A VIABLE AND EFFECTIVE OLDER ALASKANS COMMISSION.

SIGNED

JOHN SHAW

The following telegram was sent through 278-3668 on February 2, 1980 to SENATOR HACKNEY, Chairman Senate H.E.S.S. Committee and to REP. THELMA BUCKHOLDT, House H.E.S.S. Committee:

THE 959 SPONSORED CHAPTER OF THE NATIONAL COUNCIL OF SENIOR CITIZENS TOOK ACTION ON A NUMBER OF BILLS TO IMPROVE CONDITIONS FOR ALASKA'S RESIDENT ELDERLY. THE PACKAGE OF LEGISLATION FROM THE LEGISLATIVE INTERIM COMMITTEE ON SERVICES TO ELDERLY HAS RECEIVED OUR MEMBERS UNANIMOUS SUPPORT. WE REQUEST ESPECIALLY THE PASSAGE OF A STRONG AND VIABLE OLDER ALASKANS COMMISSION.

re: senior citizen exemptions

Presently there are differences of opinion on how to determine the amount of the senior citizen property tax exemption. Municipal attorneys have advised that municipalities must exempt the entire parcel. Reimbursement, however, is based on a limited acreage formula. When you mandate exemptions without reimbursement, you cause everyone else's taxes to be raised to make up the difference. The League urges action to clarify the issue. SSHCR 45 is one way to do this.

SUGGESTED AMENDMENT

Line 21, and following to page 2, line 9:

BE IT RESOLVED by the Alaska State Legislature that under the provisions of AS 24.20.090 and Uniform Rule 48(c) the Alaska Legislative Council is directed to prepare a revision of Title 29 of the Alaska Statute (Municipal Government) by directing the legal services division of the Legislative Affairs Agency to prepare the revision with the assistance of a policy advisory group representative of the concerned public from all areas of the state and a working group of persons experienced in the application of AS 29, and soliciting the advice of the Alaska Code Revision Commission; and be it

FURTHER RESOLVED that the policy advisory group consist of two members of each House of the Legislature appointed by the presiding officer and other members selected by the presiding officers of each house from persons recommended by legislative members, by the Department of Community and Regional Affairs, the Alaska Municipal League, the Rural Alaska Community Action Program, Inc., and other interested parties; and that the ~~working~~ group consist of municipal attorneys, municipal managers, municipal clerks or other municipal staff, appointed by the director of legal services of the Legislative Affairs Agency, representatives of the Departments of Community and Regional Affairs and Law and a member of the staff of the legal services division; and be it

5/21/80

TO: Rep. Russ Meekins, Chairman, Finance Committee
FROM: Rep. Bill Parker, Chairman, C&RA
RE: HCR 70

Attached is an amendment for your consideration when hearing HCR 70 relating to the revision of Title 29.

March 31, 1980

TO: Senator Clem Tillion

FROM: Senator Arliss Sturgulewski

RE: Revision of AS 29

It is generally recognized, especially by those who work most closely with it, that AS 29 is in need of revision. Since the time of original enactment, changes in the title, problems in its application, and policy questions of importance have been noted by municipal attorneys, city managers and clerks, and such other municipal officials as assessors. The Legislative Revisor has indicated that AS 29 should be next approached in terms of needed revision.

The work of revision is complicated and, at times, highly technical. I have received numerous inquiries and requests for a process by which to revise AS 29. I have discussed this problem with many people, including Mr. Berrier, and Ms. Chitwood of the Alaska Municipal League.

I would like to suggest the following as an approach to the revision of AS 29 during the period of time between this session and the 1981 session. Funds and responsibility for this project would be directed by the Legislative Council to Mr. Billy Berrier, Legislative Legal Services, to conduct the revision. I foresee the project as follows: two groups would be selected by Mr. Berrier from recommendations provided by the Department of Community and Regional Affairs, Alaska Municipal League and other interested and affected parties. The first group would be a policy advisory group composed of a variety of perspectives and interests, representing the diversity of local governments across the state, and would include a representative of the legislature. The second, a much smaller group, would be a working group, composed of people who have had experience in the application of AS 29. The work group should consist of municipal attorneys, representatives of the Department of Community and Regional Affairs and the Department of Law, as well as a staff member of Legislative Legal Services; other municipal staff functions should also be represented, such as managers or clerks. While the actual technical work would be conducted by the working group, the policy group would provide overall guidance and assistance on policy questions.

Administrative and secretarial responsbility would rest in Legal Services. In order to support this project funds would be required for travel and per diem. Most local governments will be glad to contribute staff time to this project. However, for both the policy and the working group it will be necessary to provide travel funds. As often as possible, teleconferencing will be used to reduce travel needs and to expedite the

project. A draft bill will be ready for January 1981.

It is anticipated that $20,000 should cover the cost of this project. Any funds remaining would be returned.

Thank you for your attention to this matter.

FAIRBANKS NORTH STAR BOROUGH
Box 1267, Fairbanks, Alaska 99707

April 1, 1980

Senator Arliss Sturgulewski
Pouch V
Juneau, Alaska 99811

Re: Municipal Code Revisions

Dear Arliss:

Both because of Alan Teshe's letter of March 18 to you and a recent conversation with Ginny Chitwood, I would urge you to make every effort to provide for the interim review of AS 29. I would urge that the Alaska Municipal League be a participant in the review process either as a contractor, a co-sponsor or in some other capacity. Based upon the discussions at the Local Government Symposium as well as comments received by the Joint House-Senate C & RA hearings, I think that participation from the unorganized borough is desirable.

A good deal of the criticism of and antagonism toward local government stems from inflexibility in portions of the code and vagueness in other parts. The writers of the Constitution were wise in their recognition that strong and flexible local government could best meet the needs of the diverse areas of this state. Too often local governments are unable to respond effectively because of unrealistic restrictions imposed by the state.

I hope that there is something that you can do to accomplish this review, and if I can be of any assistance, please let me know.

Very truly yours,

J. D. Nordale
Borough Attorney

Dear Jim:

Enclosed is a copy of SCR 66 which directs the Alaska Legislative Council to revise AS 29, Municipal Government. I'm also attaching a copy of my March 31 memo to Senator Clem Tillion which spoke to this issue. The Senate Concurrent Resolution was drawn as a result of that memorandum. The fiscal note is much higher than I anticipated, however, I think it is important that there be an advisory group and working group, and that funds be provided to bring people together.

I would appreciate whatever support you can lend to see the passage of SCR 66. I will be contacting the House Community and Regional Affairs Committee to request that they introduce a similar resolution on their side, and expedite it as fast as possible through the system. I will be bringing SCR 66 to the Senate Community and Regional Affairs Committee Tuesday, April 29.

Kindest personal regards,

Arliss Sturgulewski
Senator, District 10-H

State Capital
Juneau, Alaska 99811

Dear Arliss:

Re. Municipal code revisions.

Attached with this letter is a list of examples of various provisions of Title 29 which should be clarified through revision of that title. This list is by no means exhaustive and I am sure that other attorneys and municipal officials throughout the state could add additional examples and support a thorough revision of Title 29.

As we discussed some time ago in Juneau, I recommend that the Legislature form an interim committee to review AS 29 during the next two years and that the committee be empowered to seek assistance from municipal attorneys throughout the state, hold hearings as it deems appropriate, and present a new municipal code to the Legislature in 1981 or 1982. I have received expressions of support from attorneys representing several municipalities throughout the state and am confident they will assist the Legislature in preparing a revised municipal code.

Thank you very much for your continued attention to this matter. If there are additional questions I can answer regarding Title 29 or if the Legislature is prepared to take action in this matter, please do not hesitate to contact me.

Cordially,

Allan E. Tesche
Borough Attorney

AS 29: Revisions Needed

29.08

Although an attempt has been made in this Chapter to classify the various kinds of Alaskan municipalities, more recent amendments to Title 29 and unification of several cities and boroughs have resulted in confusion over definitions of "cities", "boroughs", and "municipalities". It is not clear, for instance, whether the unified Municipality of Anchorage is a city, a borough, or unified municipality or all three forms of government within existing provisions of AS 29.

29.13.100

The Code should contain a uniform system for designating statutes that expressly apply to home rule municipalities and all such statutes should be consistently cross referenced.

29.23.050

The statutory residence requirement prescribed in this section is probably invalid. It is suggested that such residence requirements throughout AS 29 be reduced to a maximum of one year.

29.23.060(d)

Circumstances, other than financial interests, which allow a member to abstain should be better defined.

29.23.080

The procedure for determining vacancies under this section conflicts with the procedure established under AS 29.23.570.

29.23.130(B)

Once again, the three residency requirement in this section should probably be reduced to one year to assure its constitutional validity.

29.23.150 and AS 29.23.470

Both require assembly appointmet of an acting borough manager in the absence of or disability of the manager. If these sections address different policy questions, they are unclear; if they do not, one should be eliminated as redundant.

29.23.170

This provision does not specify when a veto becomes effective or specify any time limit for the overriding of the veto. Moreover, it does not indicate what is the status of an ordinance between the time its veto is announced and the time the Assembly first has an opportunity to override the veto. For instance, if the mayor vetos a line

item in the budget, may expenditures be made under that item until the mayor announces the veto at the next regular assembly meeting, or does the veto immediately strike the item until the veto is overridden?

29.23.200

The three year residency requirement here is also probably invalid.

29.23.210

As with the provisions for boroughs, this section should provide more definite standards for abstention on other than conflict of interest grounds.

29.23.250

Another probably invalid three year residency requirement.

29.23.270

This provision has the same ambiguities with regard to the effectiveness of a veto and a veto override as the provision applying to boroughs.

29.23.555

This section has been superceded by AS 39.50.

29.33.070-245

Serious thought should be given to the purpose of the planning, platting and zoning provisions in this code. Should they only prescribe minimum due process standards for rezonings and other land use decisions or should they detail all of the administrative procedures to be followed by local governments in this area. This article presently tries to do little of both and does neither very well.

29.33.190

This section makes it unlawful for any person to sell or attempt to sell land located within a subdivision which has not yet been approved by the borough platting authority and subjects violators to certain criminal sanctions. But AS 29.53.100 requires that the borough assessor assess real property to "the owner of record as shown on the records of the district recorder" even though that person may be the owner of record only by virtue of an illegal subdivision in violation of AS 29.33.190. Moreover, AS 29.53.310 allows persons holding security interest in illegally subdivided lands to obtain release for portions of lots or tracts originally subdivided even though such lands were illegally subdivided in violation of AS 29.33.190.

29.33.070

It is unlear whether platting powers can be delegated to a second class borough or a city within the borough under this section.

29.33

The current language of this chapter, as it incoprorates a traditional definition of zoning and makes zoning along with platting the principal means of land use regulations, is unduly restrictive and should be revised to allow more innovative forms of land use regulation by boroughs and municipalities.

29.33.250

Presumably the transfer required is one from all cities exercising the power rather than from a city.

29.33 and 29.38

Should there be a provision for a borough to exercise a power in some but not all cities (for example in second class cities but not in first class cities)?

29.48.030(b) AS 29.48.035(b) and (c)

These provisions are redundant. The limitations on the powers of second class boroughs should be stated in a more concise fashion in one easily accessible part of the code.

Moreover, AS 29.48.030 and .035, insomuch as those sections distinguish between "regulation" and provision of "municipal facilities and services", are at the very least confusing and perhaps unnecessary.

29.48.030(a)(12)

The term transportation "system" used in this section should be defined.

29.48.260

Provisions of this section governing disposal of municipal properties should be clarified and revised to reflect increased land values throughout the state, to state who makes determinations of the value of land offered for sale and the date upon which such valuations must be based. Moreover, the statute should be clarified to either include or exclude rights-of-way or easements from its provisions.

29.53.135

The language regarding the composition of the Board of Equalization is unclear. The statute presently requires "at least that number of members of the assembly over and above the number required for a quorum to transact business"; the statute is unclear when applied to a lay board to whom the equalization function is delegated.

29.53

Should be amended to require payment of all taxes, even those due for more recent assessments on properties whose owners have requested issue of a quitclaim repurchase deed. Present law mandates issue of a quitclaim repurchase deed to the owner of record upon payment of those taxes assessed for the tax year stated in the clerk's deed even though the same property is the subject of other foreclosure proceedings brought in subsequent years. An amendment to AS 29.53 which would require payment of all taxes owing on a parcel before a quitclaim repurchase deed can be issued would eliminate substantial confusion in the minds of taxpayers, and would reduce administrative complexity for borough finance departments presently confronted with multiple foreclosure actions on the same parcels.

29.63.090

The present statute governing service areas does not adequately address the question of whether a service area may be used for exercise of a governmental regulatory power rather than for provision of municipal or services.

8.60.050-100

Regulation of junk yards in this section should be cross-referenced to those sections of Title 29. relating to areawide planning, platting and zoning powers.

9.25.110-120

It is unclear whether public records statutes apply at all to municipal government. If it is the intention of the Legislature to apply the public records laws of AS 9.25.110-120 to cities and boroughs, then those sections should be amended accordingly with an appropriate cross references to Title 29.

Dear Tom:

Thank you very much for your comments regarding the Local Government Study. Our final report is due out very soon and I will see that you are added to this mailing list. Overall, I am pleased with the results of this study. Although the proposals may seem modest, they seem to follow well the constitional directions set for local governments and certainly can bring some cohesiveness and coordination to the delivery of services to rural Alaska. Your indepth comments and support can certainly help in seeing that this needed legislation is adopted by this session of the Legislature.

Your voice adds to a growing chorus speaking to the need for thorough technical revision of Title 29 of the Alaskan Statutes. When a certain number of amendments have been made to the Statutes, a recommendation is made for a revision of the Title. This is the case, as I understand it, with Title 29 and the recommendation is being made that Title 29 be the next title to be revised. I have had preliminary discussions with Representative Bill Parker regarding this and with several other interested parties, such as the Alaska Municipal League. One possible approach might be the establishment of a short-term committee composed of chairs of the Senate and House Community and Regional Affairs, Mr. Jack Chenoweth, from the Legislative Legal Department, other attorneys who are familiar with working on the Statutes, and other interested persons. I would see this as a working group that would produce revisions to Title 29 for introduction to the next Legislature. It seems to me there needs to be a careful delineation of the so-called housekeeping aspects and other issues that may be of major policy impact. For example, issues dealing with service areas, annexation procedures, etc., may take some special review and consideration.

I will discuss this matter further with Mrs. Ginny Chitwood, Alaska Municipal League, and with Representative Bill Parker as to possible methods for best proceeding with the revision of Title 29. I am sending copies of this letter to a number of people in hopes that both you, Tom, and the ones receiving copies will send me their thoughts and comments as to how best to proceed. It would be very helpful to have some input as to the number of policy issues, in addition to overall revisions that may well need to be addressed. Again, thank you for your interest and I will look forward to hearing from you further on this.

Sincerely,

Arliss Sturgulewski
Senator, District 10-H

Dear Arliss:

I appreciated the opportunity to attend your discussion group on local government in rural Alaska, and thank you for sending me a copy of the report resulting from that session. I regret that I have not responded sooner to your request for implementation proposals.

While it certainly is not an essential prerequisite to the program you propose, I suggest that you consider as a complementary project a thorough technical revision of Title 29 of the Alaska Statutes. As an attorney for general law municipalities who has had substantial experience working with Title 29, I frequently am exposed to its legal inadequacies as a charter for the operation of small municipalities. Title 29 is at once too vague to be helpful in some areas and too restrictive in others. A new rural municipality can ill afford the added expense of developing a home rule charter and detailed municipal code merely to avoid the deficiencies of Title 29. While the structure of local government organization under Title 29 is basically sound, many of its procedural and administrative provisions do not provide the support and instruction that those who administer small, rural municipalities require.

I believe that if there were support for the project in the legislature it would not be difficult to assemble a committee of attorneys and others with day to day experience in the operation of general law municipalities to undertake a revision of Title 29 to make it more useful to those who operate under it-generally the smaller, more rural municipalities in the state.

Re: Local Government Study

Dear Senator Sturgulewski:

Thank you for your letter dated May 23, 1979 regarding the local government study. My laundry list includes the following:

1. A need to review what is local government in Alaska and what are the functions. For example, the State provides police protection to many residents of Alaska, even though these same residents are capable of providing the service (Mendenhall Valley, etc.)
2. Why cities and boroughs? The conflicts are many and well documented.
3. What is a borough, and when is it a large City (eg. Bristol Bay Borough) or a State (eg. North Slope Borough)?
4. Why are the residents of the unorganized borough unwilling to assume additional responsibilities (ie. form boroughs)?
5. Why did the City of Petersburg receive less money (under the school foundation program) when the annexation became effective?
6. Are the current methods of financing local government appropriate? For example, the City of Valdez has 28 1/2 times the taxable assessed property per person as the City of Petersburg, yet similar services are provided.
7. Why haven't home rule municipalities been more creative when writing charters?
8. Why hasn't the legislature taxed the unorganized borough to the same extent other municipalities are taxed to provide education, roads, police protection, health services, etc, etc, etc.

CITY OF PETERSBURG IN THE STATE OF ALASKA CORPORATE SEAL APRIL 20, 1910

9. Why is there an unequal funding mechanism for educational services and school buildings? For example, the unorganized borough outside first class cities receives "free" educational services and buildings.

10. Why did it take twenty years to determine that a problem exists (1959 to 1979)?

The above are only a few of my concerns.

Sincerely,

Bruce Aronson
City Manager

BA/plc

Looking forward to the answers! Bruce

Dear Arliss:

I am glad that we had an opportunity to meet at the Seminar sponsored by the Federal-State Land Use Planning Commission. I especially welcome the opportunity to express some of the concerns and problems that face our municipality.

On an external level, our biggest problem is: The relationship between the City, Borough, and State.

The Borough is responsible for various duties as outlined in Title 29. When they don't live up to their responsibilities to a level we (the City) feel is acceptable, we have no recourse but to accept their nonaction. If we try and do it ourselves, the Borough says that it is their responsibility and if we ask the State for assistance, they say it is a Borough and not a City responsibility.

At times it appears that the Borough wants to assume additional powers for the purpose of increasing their level or revenues, but we don't often see a subsequent increase in the level of service, particulary police protection.

On an internal level, we have three basic problems:

1) Educating the Council as to their responsibilities and limits of authority and consequences of their actions.
2) Keeping informed and updated on State policies and programs.
3) Adaquate funding to develope a professional organization/staff.

The larger established muncipalities often seem to loose sight of the fact that rural communities often operate on a very low key because of inadaquate revenue sources in amounts necessary to attract and maintain a professional staff.

I appreciate being added to your mailing list and if I can be of assistance by providing further input, please feel free to contact our office.

Sincerely yours,

Bryan MacLean

COMMITTEE WORK DRAFT

CONCURRENT RESOLUTION RE KODIAK

WHEREAS the road system extending north/northeast of the current boundaries of the City of Kodiak to those areas popularly known as Spruce Cape, Island Lake, Mill Bay and Monashka Bay defines a natural community of residents whose lives and activities generally involve interaction; and

WHEREAS after public hearings and a public decisional meeting the Local Boundary Commission of the State of Alaska has recommended annexation of the major portion of the area described by the road network to the City of Kodiak; and

WHEREAS the Legislature, by its adoption of House Joint Resolution 10 has disapproved the annexation submitted to the Eleventh Legislature by the Local Boundary Commission; and

WHEREAS after opportunity for public comment before legislative committees, it appears that an adequate draft municipal services annexation plan was not available for public review; and

WHEREAS there is ample evidence in the record of hearings before the Local Boundary Commission and the legislative committees that growth and development are occurring in the area; and

WHEREAS population growth and development have in some areas created a situation which endangers the public health and has necessitated that certain services be provided;

BE IT RESOLVED by the Alaska State Legislature that the Governor is respectfully requested to direct the Commissioner of the Department of Community and Regional Affairs to:

(1) work with ~~the Department of Environmental Conservation,~~ appropriate state departments the City of Kodiak and the Kodiak Island Borough to alleviate immediately the public health problem in the areas of Island Lake, Dark Lake and their drainage;

(2) work with the City of Kodiak and the Kodiak Island Borough to examine alternatives, including their impact, which might be applicable to providing the appropriate services to the territory located generally north/northeast of the existing corporate limits of the City of Kodiak, including but not limited to:

(A) step annexation, by which residents of the newly annexed area would pay a perentage of the full city property tax rate equal to the total percentage cost of all services provided; or

(B) annexation, with an adequate draft municipal service plan which may include a provision for differential tax zones;

(C) unification;

(D) other alternative methods of delivering services throughout the area along the road system extending north/northeast of the City of Kodiak;

(3) convene public meetings with interested residents to ascertain the nature and degree of essential services and to review information relative to cost and benefits of various alternatives for delivering essential services;

FURTHER RESOLVED that the Commissioner of the Department of Community and Regional Affairs evaluate, in consultation with the City of Kodiak and the Kodiak Island Borough, the alternatives and recommend a plan of implementation; and be it

FURTHER RESOLVED that the Commissioner of Community and Regional Affairs transmit a report not later than January 20, 1980 to the Second Session of the Eleventh Legislature.

Introduced: 2/19/79
Referred: Rules

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

HOUSE CONCURRENT RESOLUTION NO. 7

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Relating to an annexation of territory to the City of Kodiak.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the road system extending north and northeast of the present boundaries of the City of Kodiak to those areas popularly known as Spruce Cape, Island Lake, Mill Bay, and Monashka Bay defines a natural community of residents whose lives and activities generally involve interaction with residents of and services provided in the City of Kodiak; and

WHEREAS, after public hearings and a public decisional meeting, the Local Boundary Commission of the State of Alaska has recommended annexation of a major portion of the area described by the road network to the City of Kodiak; and

WHEREAS the Legislature, by its adoption of House Joint Resolution 10, has disapproved the annexation submitted by the Department of Community and Regional Affairs on behalf of the Local Boundary Commission; and

WHEREAS, after opportunity for public comment before legislative committees, it appears that an adequate municipal services (amend #) draft annexation plan was not earlier available for public review; and

WHEREAS there is ample evidence in the record of hearings before the Local Boundary Commission and the legislative committees that growth and development are occurring in the area; and

WHEREAS population growth and development have in some areas created a situation which endangers the public health, and require that certain services be provided;

BE IT RESOLVED by the Alaska State Legislature that the Governor is

respectfully requested to direct the commissioner of the Department of Community and Regional Affairs immediately to

(1) work with the appropriate departments of the state government, the City of Kodiak and the Kodiak Island Borough to alleviate the public health problem in the areas of Island Lake, Dark Lake and their drainage;

(2) work with the City of Kodiak and the Kodiak Island Borough to examine alternatives, including their impact, which might be applicable to the provision of appropriate services to the area located generally north and northeast of the corporate limits of the City of Kodiak, including but not limited to

(A) step annexation, by which residents of the annexed area would pay a percentage of the full city property tax rate equal to the total percentage cost of all services provided;

(B) annexation, with an adequate draft municipal services plan which may include provision for differential tax zones;

(C) unification; and

(D) any other methods of providing services throughout the road system extending north and northeast of the City of Kodiak; and

(3) convene one or more public meetings with interested residents of the area for the purpose of ascertaining the nature and degree of essential services and to review information relating to costs and benefits of the various alternatives for delivering services; and be it

FURTHER RESOLVED that the commissioner of the Department of Community and Regional Affairs evaluate, after consultation with the City of Kodiak and the Kodiak Island Borough, the alternatives and recommend a plan of implementation; and be it

FURTHER RESOLVED that the commissioner transmit a report to the Second Session of the Eleventh Legislature not later than January 20, 1980.

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE CITY OF KODIAK, ALASKA

SUBMITTED TO THE ELEVENTH LEGISLATURE, FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 24, 1979

RECOMMENDATION FOR ANNEXATION OF TERRITORY

to the

City of Kodiak

WHEREAS, the petitioner, the City of Kodiak, has requested that certain property in the Mill Bay area be annexed to the city, to wit: twenty five lots contiguous to and North and East of the City of Kodiak, including residential and commercial properties; and

WHEREAS, upon receipt of the petition, the Department of Community and Regional Affairs determined that the petition was sufficient; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission held a public hearing at Kodiak, Alaska, on December 12, 1977, in the Kodiak City Council Chambers; and

WHEREAS, as a result of that public hearing, the Local Boundary Commission determined other urban lands in addition to those defined in the petition might be suitable for annexation to the City of Kodiak; and

WHEREAS, after giving proper public notice, the Local Boundary Commission held an additional public hearing at Kodiak on April 26, 1978, to consider annexation of geographical areas generally described as the Spruce Cape area, the Mill Bay area, the Monashka Bay area, and the United States Coast Guard Station to the City of Kodiak; and

WHEREAS, after giving proper public notice, the Local Boundary Commission held a public meeting in Anchorage on August 16, 1978, to review the record of proceedings on the

petition; and

WHEREAS, the City of Kodiak has stated to the Local Boundary Commission that it is financially capable of providing its full range of general fund services to the area encompassed by the Local Boundary Commission decision; and

WHEREAS, the Local Boundary Commission has determined that the territory to be annexed meets the standards for annexation set forth at 19 AAC 05.010(3) in that the area is generally urban in character, as evidenced by Kodiak Island Borough population estimates, property valuations, and the relatively high level of commercial activity; and

WHEREAS, the Local Boundary Commission has determined that the territory to be annexed meets the standards for annexation set forth at 19 AAC 05.010(4) in that evidence gathered at the public hearings shows that the area to be annexed is in need of municipal services which can be most efficiently provided by the City of Kodiak; and

WHEREAS, the Local Boundary Commission has determined that the territory to be annexed meets the standards for annexation set forth at 19 AAC 05.010(5) in that Kodiak Island Borough planning documents indicate there is likelihood that growth and development will occur in the territory and annexation will enable the city to plan for and control that development and arrange the most efficient municipal services plan to accommodate the expected growth;

NOW, THEREFORE, the Local Boundary Commission recommends that, pursuant to Article X, Section 12, of the Alaska

Constitution, and Alaska Statutes 44.19.260, the petition to annex the territory generally described as the Spruce Cape area and the Mill Bay area be approved and that the boundaries of the City of Kodiak be amended to read as follows:

Beginning at Corner 3 of U.S. Survey 3945, said point being the true point of beginning; thence,

(1) S 55°21'W, 10,868.88 feet to Corner 2 of U.S. Survey 3945; thence,

(2) S 34°34'E, 4250.40 feet to Corner 1 of U.S. Survey 3945; thence,

(3) S 5°06'E, 957.66 feet to Corner 2 of U.S. Survey 2537-B, identical with Corner 15, U.S. Survey 3945; thence,

(4) S 5°05'30"E, approximately 260.74 feet, more or less, to a point intersecting with the Northerly ROW of the Abbert Highway; thence,

(5) along the said ROW in a Westerly and then Southerly direction to a point located upon the common boundary of Public Land Orders 5566 (parcel 2) and 5550, located within U.S. Survey 1673; thence,

(6) S 45°00'E, 2000 feet; thence,

(7) Southeasterly 3,280 feet, more or less, to point "A", said point "A" lying: S 15°34'E, 1,290 feet, more or less, to the center of the channel of St. Paul Harbor from the Southwest corner of Lot 6, Block 20 of U.S. Survey 2537-B; thence,

(8) N 58°06'E, 7,470 feet to a point in the channel North of the Easterly tip of Crooked Island; thence,

(9) N 0°50'W, 1,644.7 feet to a point located in the channel between Near Island and Holiday Island; thence,

(10) N 42°22'E, 5,200 feet, to Point "B", said point "B" lying: S 42°22'W, 3,037.1 feet, more or less, from a point on an

isolated rock which bears S 31°50'E, 191.95 feet from WC 6 MC, U.S. Survey 1822, said point also lying S 32°24'E, 1,162 feet, more or less, from MC 6, U.S. Survey 2873; thence,

(11) N 32°24'W, to a point in the channel which is 1,000 feet from the mean high water line of Kodiak Channel; thence,

(12) along a line, 1000 feet seaward, from the meander line of mean high water in a Northeasterly and then Northwesterly direction to a point 1,000 feet Northerly from the most Northerly tip, at mean high water, of Spruce Cape; thence,

(13) continuing along a line, 1,000 feet seaward, from the meander line of mean high water, proceeding around Mill Bay in a Southwesterly, Northwesterly, and then Northeasterly direction, to a point which is located upon the projected extension seaward of the Northern boundary of Lot 17, Block 1, Second Addition of Miller Point Subdivision, plat approved 11/28/66, said boundary being more specifically described as a line bearing S 73°01'E from the Division of Lands Witness Corner monument located 15 feet West of the Northeast Corner of Lot 17, Block 1, of said subdivision; thence,

(14) N 73°01'W, 1,000 feet to the Northeast Corner of Lot 17, Block 1, of said subdivision; thence,

(15) N 73°01'W, along the Northerly boundary of Lot 17, Block 1, of said subdivision, 327.41 feet, and continuing on approximately the same bearing an additional 1728.59 feet to WC 6 of Lot 3, U.S. Survey 3462; thence,

(16) S 47°56'W, 2551.56 feet to Corner 1, Lot 3, U.S. Survey 3462, identical to the East Corner of Lot 3 of Block 6, Monashka Bay Subdivision, plat approved 9/19/67; thence,

(17) S 45°42'59"W, 295.41 feet, to the South Corner of Lot 3, Block 6 of said subdivision; thence,

(18) N 44°05'04"W, approximately 115 feet, along the Southwesterly boundary of Lot 3, Block 6 of said subdivision to a point which bears N 50°13'26"E from the South Corner of

Lot 7, Block 5, of said subdivision; thence,

(19) S 50°13'26"W, across Otmeloi Way to the South boundary of Lot 7, Block 5, of said subdivision, and continuing along the Westerly ROW of Lake View Drive, 4,433.17 feet, more or less, to the Southeast Corner of Lot 7 of Block 8 of the Monashka Bay Subdivision, plat approved 9/19/67; thence,

(20) S 79°11'50"E, 569.59 feet, to Corner 5 of U.S. Survey 3467; thence,

(21) S 23°54'W, 2500.01 feet, to Corner 4 of U.S. Survey 3467, identical with Corner 4 of U.S. Survey 3468; thence,

(22) S 85°27'W, 746.33 feet, to Corner 3 of U.S. Survey 3468, identical with Corner 3 of U.S. Survey 2538-A; thence,

(23) S 55°21'W, 1893.54 feet, to Corner 4 of U.S. Survey 3945; thence,

(24) N 34°39'W, 2811.6 feet to Corner 3 of U.S. Survey 3945, the true point of beginning.

In accordance with Article X, Section 12, of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the legislature or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Re: Kenai Peninsula Borough Boundary Hearing

Dear Arliss:

The State Boundary Commission conducted a hearing on January 12, 1979, in Soldotna, during which only Philip Waring, our Planning Director, and Mayor Don Gilman gave testimony.

We take no exception to the Boundary Commission action since it conforms exactly to the Borough boundaries as we understood them to be.

Sincerely,

Clyde Baxley, Administrative Assistant
Kenai Peninsula Borough

75.8 Against
24.2 For

HONORABLE SENATORS AND REPRESENTATIVES:

THANK YOU FOR COMING.

I am T. T. Jackson, a continuous resident of Kodiak for thirty-seven years. I have a wife Alma, and a son, Dell. We have a 100 unit Mobile Home Park outside the City of Kodiak. We are two miles from down town.

I am against annexation at this time. I am also against forming any service district.

I am for the City of Kodiak putting their house in order; that is.to pave all their streets that they now have; then annex Island Lake area and when that is brought up to the City standards; then advance with more annexing.

We, on Spruce Cape are not a burden to either the City or the Borough. Since the Borough was organized, not one cent of Borough money has been spent in the Spruce Cape area. The City of Kodiak has been very helpful with water and fire protection; however, we more than pay for these services. After the 1964 disaster, the Bureau of Docks & Yards built an 8 inch water main with fire hydrants for the Spruce Cape area, from the City Boundary on Mission Road for over two miles to the Loran Station on Spruce Cape Road; and the City took charge of these services and paid the Bureau of Docks & Yards $42,000.00. In turn we pay the City over 2 mills for fire protection and we pay 27 per cent more than the City of Kodia residents do per unit for water.

I estimate that there are about 300 families on Spruce Cape - there are 8 Mobile Home parks and many other MobilHomes out of parks and more parks being planned. At this time I will inform you that the City has an ordinance that prohibits Mobile Homes and even if the City desired it - it may be impossible to change this ordinance as they have been bonded under this ordinance.

Mobile Home Parks are self sufficient. That is they pay the same mill rate and water rate as other residences and businesses, but they receive no government aid. We build and maintain our streets, sewer and water systems and fire hydrants. No way can we become a burden to anyone. Spruce Cape pays annually approximately $90,000.00 to the City of Kodiak in Sales tax. I am sure none of this is returned to Spruce Cape. We are independent people who ask little and give much.

The State Legislators are noted for not listening to the people. One Example - ten years ago, the voters of Alaska asked, with a majority vote, for a Constitutional Convention. The Constitution of Alaska states that we are entitled to that convention, but ten years have passed and not even a mention of the Constitutional Convention. Here in Kodiak we have voted for NO ANNEXATION and NO SERVICE DISTRICT; now we are being told that the Constitution states that we must have one or the other. If the Legislators can change one part of the Constitution, then why not the other, or give us that Convention and let us make the necessary changes.

What our election here in Kodiak is telling you is that we want LESS GOVERNMENT.

Are there any questions?

PRESENTATION FOR

JOINT COMMITTEES OF COMMUNITY & REGIONAL AFFAIRS

KODIAK, ALASKA FEBRUARY 10, 1979

BY WILLIAM H. BULEN, PRESIDENT KODIAK SANITATION, INC.

HONORABLE SENATORS AND ASSEMBLYMEN
LADIES AND GENTLEMEN

My name is William Bulen. My son Richard Bulen and I own and operate Kodiak Sanitation, Inc.. We have a lot of interest in the matter before you and obviously most of it is financial. Therefore, asking us how we feel about the matter is like getting a wolf to watch the sheep.

However, there is one aspect to the present situation which we think is grossly unfair and I will confine my remarks to this problem.

We have many complaints from our commercial customers regarding the unauthorized use of dumpsters. Only this week I received a call from someone at Kodiak Community College asking what they could do to stop people from using their dumpster. I had to advise them that for all practical purposes their only recourse was to talk to the people involved. As you can understand, this would serve no purpose beyond causing the offenders to find another dumpster.

In the area you are considering today we serve 89 homes and all trailer parks. We estimate that there are 315 additional residential units in the area, which are the ones without refuse service. Some of these people take their trash to the dump but a large percentage of them take it to town and place it in a convenient dumpster. The other day I heard someone remark that they had seen someone transfering trash to the dumpster at the new Post Office while people in two other cars waited to do likewise.

I do not mean to infer that all borough residents are garbage freeloaders but I will have to admit that even some of my friends are numbered among them. For some strange reason, otherwise honest people will not hesitate to steal service.

The only practical solution to this and other garbage related problems is mandatory garbage service, which would be achieved by annexation. In this we do have a financial interest so I will say no more.

Thank you

TESTIMONY OF BETTY WALLIN,
MAYOR OF THE KODIAK ISLAND BOROUGH
BEFORE THE HOUSE AND SENATE COMMITTEES ON
COMMUNITY AND REGIONAL AFFAIRS
REGARDING THE PROPOSED ANNEXATION
BY THE CITY OF KODIAK OF
THE MILL BAY ROAD & MISSION ROAD AREAS

I am Betty Wallin, Mayor of the Kodiak Island Borough. I'd like to welcome you to Kodiak and take this opportunity to thank you for bringing your hearing here so that the people affected may speak to you directly.

The citizens living in the annexation area have very specific grievances against the City and reasons for believing that annexation would be contrary to their interests. As mayor for all the citizens of the Borough, inside and outside the City, my perspective on annexation is perhaps more broadly based. I firmly believe that annexation should not be allowed to proceed for two reason: first, it would constitute a travesty of our democratic processes; second, it would sound the death knell for unification.

It is possible that you will hear today from a few individuals claiming to support annexation. But virtually all who have contacted me -- and there have been many -- have expressed strong opposition to this proposal. They have argued over and over again against the unfairness of having this decision made without the benefit of a vote of the people concerned. (We complain about the federal government controlling our lands without understanding our needs and heeding our voice. How different will it be if the State, through its Local Boundary Commission, decides the fate of the residents of the annexation territory without appreciation for their needs and knowledge of how they might vote?)

I have had no answer for the citizens who approached me with their concern. I have found myself in complete accord with their views. Were this a case where residents were clearly in support of annexation, or apathetic in their attitude, the Local Boundary Commission's omnipotent role would be more palatable. But, obviously, this is not such a case. We ask the help of you, our elected representatives in bringing democracy to the annexation process.

I have, as indicated, a second problem with this annexation. It derives from an aspiration I hold for Kodiak, a hope for its future which would avoid problems such as this in the days and years to come. This hope is for unification.

We held an election on unification last October, in the midst of all this controversy. The proposition was defeated. But the tallies on either side were not terribly far apart. Given a little more time to explain to the people what unification could do for Kodiak Island, I am convinced the outcome would be different. I am equally convinced that unification is the only sensible, constructive way to go for this City and this Borough. And I am just as firmly convinced that it will not come to pass if this annexation takes place.

For the sake of democracy, for the sake of all those people whose interests would be adversely affected, and for the hope for the future -- unification -- I ask that Committee members recommend passage of Senator Mulcahy's and Representative Zharoff's respective resolutions.

Thank you for your consideration.

10 Feb 1979

Dear Sirs:

Due to a prior commitment, my husband and I are unable to attend this meeting but want to go on record as being against this proposed annexation. We own Lots 13 & 15, Survey 3103 on the back side of Island Lake.

The city seems to conveniently forget why we have a water line in this area and more than once have been reminded at public meetings. I testified at the Boundary Commission meeting last fall that during the time Pete Dewean was mayor, the city did some work at the reservoir that put blue clay into the lake system. This blue clay was plugging filters on washers, and furnaces and was only a matter of time until these appliances would be ruined beyond repair. In order to avoid a law suit, a water line was run out here by the city. We were informed we would be charged a higher rate, the excess to be used for the maintenance and repair of the line.

When Jack Isadore was city manager, he called a meeting of the Island Lake and Shakafka Acres residents and tried to stampede us into asking for annexation. This meeting was held at East

Elementary school. He pointed out the inadequacies of the water line, the need for sewers etc. The final topper however was the statement that the city could not offer anything in the way of utilities at that time - I can't remember his exact words, but that was the gist of it.

We don't feel that the city can offer us ~~anything~~ any more at this time than they could then and therefore are against this proposed action

Thank you very much

IN THE

CONCURRENT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Relating to a determination of the corporate boundaries of the City of Kodiak.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the road system extending northward of the current boundaries of the City of Kodiak to those areas popularly known as Spruce Cape, Island Lake, Mill Bay, and Monashka Bay defines a natural community of residents whose lives and activities generally involve interaction with residents of and services provided in the City of Kodiak; and

WHEREAS, after public hearings and a public decisional meeting, the Local Boundary Commission of the State of Alaska has recommended annexation of a major portion of the area described by the road network to the City of Kodiak; and

WHEREAS, after opportunity for public comment before legislative committees, it appears that the record of the proceedings in the matter of the consideration of annexation of territory to the City of Kodiak was incomplete in that the Local Boundary Commission did not undertake extensive consideration to alternatives to an annexation with legislative review; and

WHEREAS the Legislature, by its adoption of House/Senate Joint Resolution , has disapproved the annexation submitted by the Department of Community and Regional Affairs on behalf of the Local Boundary Commission; and

WHEREAS there is ample evidence in the record of hearings before the Local Boundary Commission and the legislative committees, and in minutes of the City Council of the City of Kodiak, that growth and development are

occurring in the area and that the changes are having an impact on municipal services; and

WHEREAS the City of Kodiak is already providing certain needed services to residents of the area, either through agreement with the Kodiak Island Borough or without charge to area residents; and

WHEREAS other services which residents of the area appear to be willing to support may not be provided by the city because of the legislature's rejection of the annexation, threatening or endangering the public health and safety; and

WHEREAS still other services are provided by the state, services which area residents have expressed unwillingness to assume at a local level but which, because of steady population growth and increasing demands on the state treasury, may require assumption at the local level; and

WHEREAS annexation plans providing for gradual extension of full services into the annexed area on a step annexation basis or for full annexation with concurrent imposition of a differential tax zone scheme (each of which would permit area residents to pay only for those municipal services actually received) may be appropriate for application to situations of this kind;

BE IT RESOLVED by the Alaska State Legislature that the Governor is respectfully requested to direct the commissioner of the Department of Community and Regional Affairs immediately to

(1) examine alternative annexation procedures which might be applicable to the annexation of a portion or all of the territory located generally northward of the existing corporate limits of the City of Kodiak along the road network, including but not limited to,

(A) step annexation, by which residents of the annexed area would be provided a full range of services by the city at a date not more than five years from the effective date of the annexation; or

work efforts - City Kodiak / Kodiak Island Borough to develop an acceptable annexation plan providing for differentials

(B) full annexation, with concurrent adoption of an ordinance imposing differential tax zones and providing that tax levies within the zones be commensurate with city services actually provided;

(2) meet with officials of the City of Kodiak and the Kodiak Island Borough to evaluate the impact of each alternative annexation plan on the capacity of the city and the borough to provide services;

(3) convene one or more public meetings with interested residents of the area for the purpose of ascertaining the nature and degree of essential services that should be provided;

(4) determine, with the assistance of responsible state officials, whether growth and development in the area warrants provision of increased state services, and the cost of these increases;

(5) consider whether the state, residents of the area, or both, should bear the cost of incremental services to be provided;

(6) evaluate relevant information and determine whether, on the basis of information gathered, any annexation plan which has been examined equitably resolves, or holds out the possibility of equitable resolution of, problems attending provision of services in the area under consideration; and

(7) under authority granted in AS 44.19.260(a)(3), define a geographic area, and present an annexation plan for the area together with supporting testimony and evidence, to the Local Boundary Commission; and be it

FURTHER RESOLVED that, if the Local Boundary Commission is presented with a plan of annexation by the commissioner of community and regional affairs, it shall, after opportunity for public hearing, promptly and fully consider the plan presented, submitting any recommendation which it may have for an annexation based on the plan, to the Second Session of the Eleventh

Legislature in the manner provided by law; and be it

FURTHER RESOLVED that nothing in this resolution requires the commissioner of community and regional affairs to recommend a plan of annexation to the Local Boundary Commission, and nothing in this resolution requires the commission to report favorably on a plan of annexation recommended to it, but if the commissioner or the commission decides not to take action in accordance with the provisions of this resolution, a report shall be transmitted not later than January 20, 1980, to the Second Session of the Eleventh Legislature explaining the reasons for that decision.

BILL FARRER

PRESENTATION MADE BEFORE THE ANNEXATION COMMITTEE
December 12, 1978
by City Manager Clair Harmony

I. Should annexation become a reality this January, we at City Hall have tried to set up a preliminary plan:
   1. What will take place
   2. What the 2,000 residents of the new area might expect in the way of effective delivery of services and, of course, what their concerns are now.

We are here tonight to present our best *estimates* as to costs, taxes, location of services, and to offer some options.

We are not in an advocate role, but are simply trying to do some preplanning for an action which at this point in time has been initiated and recommended by the Local Boundary Commission and will be going before the State Legislature in January.

The existence of the Annexation Committee, and this public hearing before that body, are sincere efforts to encourage expressions of public concern and input. Hopefully the committee will formulate a policy statement that can be adopted by the Kodiak City Council, which will provide for the following:
1. Early and special representation.
2. Reasonable differential property tax[illegible]ng zones.
3. Efficient priorities on road improvements.
4. Quality Police and Fire services.
5. Good delivery of water and sewer services.
6. Ultimate expansion of Parks/Recreation and Library services.
7. Modifications that might be envisioned by the community at large, the public here tonight and the committee, through its deliberations.

1. As to early representation:
   a. Voting franchise rights would become effective immediately.
   b. In addition, a special representative would be elected from the new area, to serve in an advisory capacity with the City Council for three (3) years.

2. The differential taxation zones would attempt to provide some equity based on the delivery of services such as roads, police and fire. As long as the City cannot get a fire truck to a home because of poor access routes, there should be less of a tax burden on that homeowner, and so on.

   Basically the difference between Fire Zones 1, 2 and 3 are that Zone 1 would receive 100% delivery of City services, therefore the

full mill rate (9.10). Zone 2 would have no effective delivery of fire service and are those areas where the roads are not maintainable, thus 75% mill rate.

Zone 3 would pay a 50% mill rate and would have poor delivery of police, fire and road improvements. All zones would be changed over the next several years as these services are upgraded.

3. Improvements to roads would progress at a reasonable rate, funded by increased shares in State Revenue Sharing, highway funding and, hopefully, the commitment by the State Legislature to fund greater levels of capital improvements. This could accellerate quality delivery of services to the annexation area.

4. Police and fire services can be expanded from revenue sharing funds, together with the slow phasing out of the State Troopers.

5. Water and sewer services which are funded through assessment districts, State and Federal grants could proceed in higher density areas, and be in as early as 1980 in those areas.

6. Parks/Recreation and Library services would expand on a somewhat slower basis, I would guess, and generally would be funded by general assessments and grants.

II. Briefly, advantages of annexation would include:
1. Relief to the polluted conditions of Island Lake.
2. Better fire and rescue.
3. Quality delivery of water at a lower user rate.
4. Exemption of personal property taxes.
5. Reduction in fire insurance rates.
6. An equal voting status with your neighbors inside the present City boundaries.
7. Plus other factors which will insure for the general health and welfare of the whole area.

III. Conclusion

In conclusion, we are here tonight to answer questions about annexation, which may or may not take place. It is sort of out of our hands. We have tried to research the various possibilities without spending an exorbitant amount of time and City dollars. What is really needed are the expressions on your concerns which can help the City Council provide reasonable alternatives and effective delivery of service, should annexation become a reality.

Special Supplement to the Kadiak Times and Kodiak Daily Mirror

City of Kodiak

SPECIAL REPORT
ANNEXATION

The area outlined below has been recommended for Annexation by the State of Alaska Boundary Commission. It generally encompasses the area from the existing City limits to Spruce Cape along the water — then to Abercrombie and along Lake View Drive.

ISLAND LAKE ANNEXATION HISTORY

In 1968, the first attempt at annexing Island Lake and Spruce Cape occurred. The main reason for the residents request appears to be fire protection. An election was held and the annexation question was defeated.

In 1970, the Borough initiated step annexation of certain areas (including Island Lake). The Boundary Commission recommendation included a larger area. The Boundary Commission also recommended that all services be provided in one year rather than step annexation. The City, Borough and private citizens sent telegrams and letters to legislators asking that annexation not be approved as the services could not be provided in one year and the cost to the residents both Borough and City, would have been exorbitant.

In 1972, petitions were received from Island Lake residents requesting annexation However, Municipal Boundary regulations were being revised by the State. After the new regulations were established, the City was told that the petition would have to be done under the new regulations. The City Manager at that time, met several times with the residents of Island Lake concerning annexation.

Then the City Manager discussed the problem with the Council and it was agreed that the City should proceed rather than asking the people to present another petition. It was then discovered that planning Grant funds would be available for a comprehensive study of the services needed and manner of providing them. The Borough has planning powers, & the City Manager worked with the Borough to obtain the funds and conduct the study. In the July 22, 1976 Council minutes, The City Manager states, regarding the progress on annexation, "The Borough has applied for a grant to study the situation . . .part of the study would be on whether annexation or a service district would be the best method."

A service district was considered by the residents favorably, but since it was to be contiguous to the present city limits and all services would be furnished by the City, a serious legal question arose as to its position under State Statute.

At the present, the Local Boundary Commission recommendation to annex the area to the City of Kodiak will be made within the first 10 days of the forth-coming State Legislature.

WHAT ABOUT WATER & SEWER

The City of Kodiak engineering department has been doing preliminary planning for water and sewer service to the proposed annexation area so that construction could begin as soon as possible, if annexation were approved. Previous studies have been incorporated. It is anticipated that grants will be received for 50% to 75% of the costs.

The City has to the best of its ability incorporate the previous work of the citizens and engineering firm retained by the Borough. Plans showing proposed water and sewer lines will be available at the public meeting.

One unusual concept advanced is to allow acceptable Septic Systems in low denisty hard to reach areas in order to keep cost down and to allow assessment relief for the life of the System. Detailed engineering can not be realized until annexation is a reality & appropriate Grant monies can be applied for.

WHAT ABOUT ROADS

1st Priority?

1. Unamed Road in U.S.S. 3467
2. Track A Island Lake
3. Unamed Road in U.S.S. 3219, 3103, 3464 Island Lake
4. Cliffside & Cliffside Loop
5. Seabreeze & Woodland
6. Unamed Road in U.S.S. 3099

2nd Priority? What else should be done.

Reconstruct for purpose of snow removal, road grading, fire & police coverage.

There are 2½ miles of maintainable roads in the area. Maintenance means grading, drainage, snow removal and dust control.
With a minimum of work another 2½ miles of road would be maintainable.

WHAT ABOUT POLICE

Available on maintainable road system with one year or more additional coverage of state police - dispatch available on personal, telephone, or C.B. contact. Additional policemen and vehicles will be added as necessary to cover the entire area.

DIFFERENTIAL TAXATION?

WHAT IS IT ? A method of allowing new residents a break on taxation until they receive the same type and quantity of services as other residents.

Zone No. 1

Generally that area next to Mission Road outside the present boundaries that may enjoy all City services afforded present City residents. Present Mill Rate for City purposes at 100% would apply.

Zone No. 2

Generally that area north of Mill Bay USS 2467, Shafaka Acres, Block 7 Monashka Bay subdivision that cannot receive full services. Mill Rate at 75% would apply.

Zone No. 3

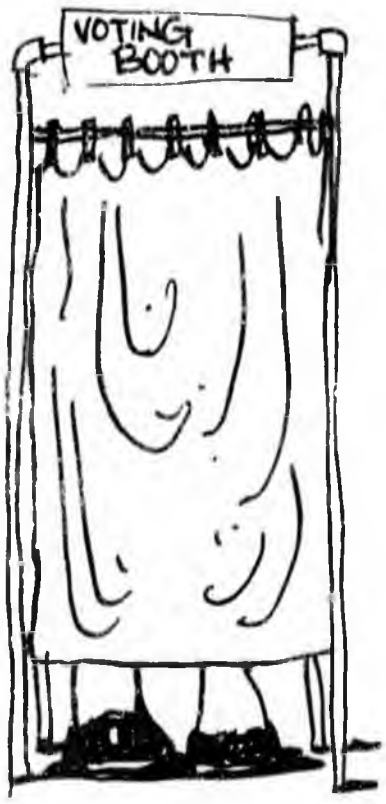
Generally that area of Woodland Acres, and back of Island Lake that the city is presently unable to reach adequately with fire & police due primarily to present road conditions. 50% of the City Mill rate.

SEE THE CITY'S MAP

EARLY & SPECIAL REPRESENTATION

Early representation is afforded by a City Charter provision which allows any resident who has lived in the newly annexed for 2 years and in Alaska for 3 years the ability to run for Mayor or Council.

Also, the City Council by special provision will ask for the election of a special representative from the annexed area to serve as an advisor with the council for 3 years. Residents of the annexed area will of course vote for all council members and mayor as their respective terms expire.



THE CITY MADE THE FOLLOWING PROMISES IN RESOLUTION NO. 24 - 78

CITY OF KODIAK

RESOLUTION NO. 24 - 78

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Kodiak, Alaska as follows:

1. The City will, to the extent possible, establish and implement in the areas to be annexed, a system of differential taxation for any such areas that do not receive all services of the City supported by taxation or which receive these services at a level different from that provided in other areas of the City.

2. The City Manager is hereby directed to develop tentative plans for the provision of services to the areas proposed for annexation and to determine whether the City may be prevented by requirements for capital improvements or for other reasons from providing full services to portions of those areas for any temporary period of time. On or before October 1, 1978, the City Manager shall report to the Council and advise of the areas where provision of full services may be temporarily delayed, the level of service that will be provided and the estimated differential in cost between full services and the services to be provided.

3. The City Manager and the City Attorney shall explore existing legal requirements regarding residency requirements for voting and elective office, and the existing number of Council Members an make recommendations to the Council on or before October 1, 1978, regarding possible changes in law or policy to provide residents of newly annexed areas with representation within the City comparable to that currently available to City residents, and any recommendations regarding required changes in ordinances to implement that objective.

4. The City shall engage in an information program regarding the proposed annexation with the objective of making the public and the legislature aware of the need for and benefits of annexation, and shall employ the services of a qualified person, to the extent determined advisable, to actively support approval of the annexation by the Alaska legislature.

PASSED AND APPROVED this 24th day of August, 1978.

LET THE CITY KNOW WHAT OTHER WRITTEN PROMISES YOU WANT:

Kodiak Wrap-Up

Zharoff reports: The House is organized

Rep. Fred Zharoff, Democrat-Kodiak, called Kadiak Times Tuesday afternoon to report the Alaska House of Representatives had finally organized just 15 minutes prior to his call.

Rep. Alvin Osterback, D-Sand Point, emerged victorious from the organizational melee, which had entered its second week after majority Democrats failed to reach a consensus. Osterback, without a large constituency, but with considerable legislative savvy, was named co-chairman of the important Resources Committee.

Zharoff says he personally will likely be on the House Resources Committee and the Judiciary Committee. However, this was still tentative at press time. Zharoff said the bush caucus, of which he is a member, had held out for "an equal distribution of power," and despite the delay came out ahead with Nels Anderson in an important leadership post.

Zharoff gave this rundown on the House organization:

Speaker: Terry Gardiner of Ketchikan.

Rules Committee Chairman: Sam Cotten, Anchorage.

Majority Leader: Nels Anderson, Dillingham.

Finance Committee, Russ Meekins, Anchorage.

Judiciary: Charlie Parr, Fairbanks.

Commerce: Fred Brown, Fairbanks.

State Affairs: Mike Miller, Juneau.

Community and Regional Affairs: Bill Parker, Anchorage.

Health, Education & Social Services: Thelma Bucholdt, Anchorage.

Resources: (Co-chairmen) Alvin Osterback of Sand Point and Bill Miles of Anchorage.

Labor and Management: Vern Hurlburt of the Kuskokwim area.

Other committee appointments are to be made after the Committee on Committees meets, Zharoff explained.

Zharoff said he had been working long and hard but was enjoying his new job immensely. He called it "quite an experience."

One of the side benefits in the organizational delay, from Zharoff's point of view, was that it enabled him to get to know each of the legislators personally.

Rep. Zharoff's mailing address is Pouch 'V' Juneau, Alaska, 99811. Office space and telephone numbers have not yet been assigned.

NEARING COMPLETION — Cedar siding helps make this modern new structure on Rezanof Drive one of Kodiak's more attractive buildings. Scheduled for completion in early March, the professional building will house the dental offices of Dr. Knox N. Christie and Dr. Daniel H. Farrer on the ground floor. Upstairs, attorney Stan Fischer and Opthamologist Dr. Ken Richardson will have offices. (One space is still vacant upstairs.) The building has been constructed at a cost in excess of $100,000.

Stiff sentences for SARAH LEE skipper & crew

The skipper of the salmon boat SARAH LEE , found guilty this week in Superior Court of salmon fishing in closed waters received a one-year suspended jail sentence, a $10,000 fine, with $5,000 suspended; and forfeited a $3,000 gill net and $3,520 in red salmon to the State. In addition, George Gatter, 36-year-old Kodiak fisherman, was put on probation by the Court for five years and his commercial salmon fishing privileges suspended for one year.

Crewman on the SARAH LEE, William Fiorentino, 30, was fined $5,000, with $2,500 suspended, and received a 30 day suspended jail sentence.

Gatter and Fiorentino were found guilty of fishing red salmon in closed waters in Kvichak River in Bristol Bay last July. The SARAH LEE was said to be three and one-quarter miles inside closure markers at the time it was seized by the Alaska Fish and Wildlife Patrol vessel VIGILANT. In sentencing the two fishermen, Judge Roy Madsen called the case the worst to come before his court in the last three years.

Dr. Donald L. McKernan named chairman of 200-mile conference

Internationally recognized fisheries expert Dr. Donald L. McKernan has been named chairman of the Northwest/Alaska 200-mile Fisheries Impact Conference to be held in Seattle at the Olympic Hotel Tuesday and Wednesday, February 27 and 28, sponsoring officials announced today.

Dr. McKernan is presently director of the Institute for Marine Studies and Professor of Marine Affairs and Fisheries at the University of Washington. Since graduating from the University of Washington in 1940, he has served in numerous high-ranking posts dedicated to improving the fisheries resource in the United States. He is also the author of many technical articles and papers on subjects related to oceanography and fisheries, covering both U.S. and foreign waters.

The conference, expected to draw as many as 800 delegates, will explore all harvesting and marketing facets created by the Fisheries Conservation and Management Act. The recently implemented act places the United States under complete control of the fisheries resource off all its coastal waters.

"In the past, foreign nations have been taking more fish off our coast than our own fishermen," Dr. McKernan said. "Now, implementation of the act means foreign fishing in these areas will be reduced and the question is how to provide our own fishermen with the means to place more fishery products on the world market."

Suggested answers to these questions will be contained in a foreign and domestic marketing study to be presented Tuesday morning by Earl R. Combs and Associates of Mercer Island. The market study was authorized 18 months ago by the Office of the Secretary of Commerce and the National Marine Fisheries Service, closely following President Carter's signing of the act into law.

"Our country now has the opportunity to become a major producer of fisheries products for all world markets," Dr. McKernan added. "There may be as much as 15 to 20 percent of the total U.S. harvest of all species of fish found in these waters, including whiting, cod, sole, flounder and others."

Panels of experts in financing, harvesting, processing and marketing will follow the presentation of the study, exploring all methods towards acheivement of world leadership.

The conference is sponsored by the Washington State Department of Commerce and Economic Development, the U.S. Department of Commerce, the Pacific Northwest Regional Commission and Washington Public Ports Association.

Firearms Useage Committee holds first meeting

Public safety and the discharge of firearms within the Kodiak Island Borough was the topic of discussion at the first meeting of the Borough's Firearm's Useage Committee on Jan. 19.

The advisory committee was appointed by Borough Mayor Betty Wallin in response to numerous complaints she has received over the years in regard to careless discharge of firearms in the borough. Mrs. Wallin attended the first session herself.

Jack McBride, who writes the trap shooting column "Hits and Misses" for Kadiak Times, was elected chairman of the group.

The 11 member committee, which will meet again on Feb. 26 in the borough assembly room, will make recommendations to the borough assembly on the problem of indiscriminate discharge of firearms in public and populated areas of the borough.

One possibility under consideration by the committee is designating certain areas used for recreation as "public areas," which would enable Alaska State Troopers to enforce existing state statutes against careless firing of guns in such public areas.

Among those attending the session was Richard W. Garnett III, the borough attorney, and Sgt. Jim Hogan of the Alaska State Troopers.

Hogan reviewed state statutes. It is unlawful to discharge a firearm in a public place (made public by an assemblage of persons) and it is unlawful to discharge a firearm on, from, or across a highway. It is not legal to discharge a firearm within the Kodiak City limits.

The committee is strictly an advisory body and discussed the need here for shooting and firing ranges within the borough.

Reduced-price lunches reduced

On January 26, 1979 the price for reduced-price school lunches was adjusted to 10 cents. Students eligible to receive reduced-price lunches had been paying 20 cents per lunch. This reduction is a result of a change in Public Law 95-627 regarding the school lunch program.

EDITORIAL:

• A crying need

Kodiak and the Aleutian Chain need another ferry to replace or support the M/V TUSTU–MENA.

Kodiak should not be left alone for two months without ferry service. The ferry will leave on its last trip Jan.31 and will not return until March.

Former State Senator Kay Poland, D-Kodiak, says "I may not be in office anymore, but you can't turn your interest off just because you're not in office. I suppose I'll always feel strongly on issues that affect the state and Kodiak in particular. . . "

Kay asserts, and we strongly agree, that the ferry as part of Alaska's Marine Highway System "is just as much a part of our road system as our highways are. . . "

Mrs. Poland points out that the ferry also helps somewhat to keep the soaring cost of living down.

Kay tried for four years to get a freight-passenger ferry for the Aleutians. That same ferry could serve as a back up for the TUSTUMENA. While the "Trusty Tusty," may be beloved, she is getting to be quite an old lady. We need a new one. The TUSTUMENA was one of the first ferries built in the early 1960's. She's also the only ocean going ferry. As Mrs. Poland points out, "When she goes we're left with nothing. There's nothing to back her up. There's nothing even on the drawing boards."

Kay anticipates it would be at least three years from concept to completion if the much needed additional ferry were to be approved tomorrow.

As Senator, Mrs. Poland did manage to have a study funded and conducted. That study showed the Aleutian ferry might be the only self-supporting ferry in the state. Yet, the administration and the Legislature keep putting it off.

The TUSTUMENA is old and ships, like people, can only last so long. Seventeen cracks were discovered in her hull two years ago, and she was pulled out of service early — in October for repair because she couldn't withstand the stress of winter storms.

We were left only with air service to the mainland.

The TUSTUMENA definitely needs a back up vessel. A ferry serving the rapidly growing Aleutian Chain could also service our island villages.

The need is obvious. We hope the Legislature and the governor will not continue to ignore Kodiak and the Aleutians in this regard.

LETTERS:

Borough role on land claims?

Dear Editor:

Certain facts are incontestable. The first is, human nature being what it is, that given an inch, most people will try to take a foot. The second is that we have already witnessed an attempt by one Native group to claim lands not rightfully theirs which was caught by the courts. The third is that there are very substantial doubts raised in the suit by the Citizens Action Group that there are lands claimed by the Kodiak Natives

Kay Poland sees solutions to Kodiak's dismal voting record, worst in Alaska

by KENT BRANDLI
Editor

Out of 4,159 persons registered to vote here in last August's primary election, only 1,370 voted, giving Kodiak the dubious distinction of having the worst voter turnout in Alaska.

Only 32.9 percent of those eligible here voted, says former State Senator Kay Poland. "It really makes it tough for representatives in Juneau to carry a heavy clout with such a poor showing," she adds.

In other fishing communities, where fishermen are out at sea on election day as they are in Kodiak, the turnout was much better. For example, in Seward and Cordova, 45.1 percent of those eligible voted.

"I've been harping on this for years, but it doesn't seem to do any good. Just the same faithfuls vote," according to Mrs. Poland.

She produces statistics to back up her argument, and proposes solutions.

"Sometimes it takes a real effort to vote. Such is the case with the fishermen. It takes some effort to vote absentee."

Sketch by Kay Linscheid

KAY POLAND

She also blames the state's election procedures, and the handling of voter registrations locally. "When the change was made from the court's handling absentees to the borough clerk handling it, there should have been ads in the newspapers, and on television and radio explaining the switch. This wasn't done in time."

Mrs. Poland says she personally voted absentee and had to "find out by traipsing all around." Within her own family "two of my kids who always voted were challenged. There is really something fouled up there."

Mrs. Poland did not seek re-election to the State Senate last year. Instead she ran unsuccessfully for Lt. governor with Tom Kelly as an Independent.

There is need for some correction, Mrs. Poland says. "There's apparently got to be an overhaul and it's got to start with proper training of the registrars. Also, I believe there's got to be some kind of a numerical check on voter registration forms," the former senator says. "The registrar should have to account for every form used or unused — voided or not," Mrs. Poland feels this

KODIAK ISLAND BOROUGH'S RESPONSE TO WRITTEN INFORMATION SUBMITTED BY THE CITY OF KODIAK ON FEBRUARY 10, 1979 AT THE JOINT HEARING OF THE HOUSE AND SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES ON THE PROPOSED ANNEXATION BY THE CITY OF KODIAK

At the public hearing in Kodiak on February 10, 1979, the City of Kodiak presented legislators with a packet of written information. This information was not made available to the Borough or other interested parties until the opportunity for testimony was concluded. At this time, if Committee members can tolerate the introduction of still one more document into this record, the Borough would like to identify the concerns it has with the City's submission and attempt to clarify some of the issues in this controversy.

Myth #1: The Island Lake pollution problem requires annexation.

The only true health problem which exists in the annexation area is the pollution associated with the smaller lots in the vicinity of Island Lake. At most, approximately 150 people are involved, probably no more than ten percent of the total population in the annexation region. The percentage of land subject to the problem consists of approximately five percent of the total territory.

This is not to say that the problem does not need to be addressed, and immediately so. But it does suggest that the solution proposed by the Local Boundary Commission is too far-reaching. The Borough has the capability of handling the problem promptly through its existing service district. The City has acknowledged that it could contract with the Borough and provide

the same service as if the area were annexed. The utility rates for the residents involved could be higher under this approach than if annexation occurred. But the other 90 percent of the people living in the annexation region would not be impacted at all. And it is possible that the surcharge to service recipients outside municipal boundaries would actually be lower than the costs of annexation plus sewer and water assessments at normal City rates.

Myth #2: This annexation complies with regulatory standards propounded by the Local Boundary Commission.

In its recommendation for annexation, the Local Boundary Commission finds that its regulatory standards have been met in that:

> the area is generally urban in character, as evidenced by Kodiak Island Borough population estimates, property valuations and the relatively high level of commercial activity; and
>
> . . . the area to be annexed is in need of municipal services which can be most efficiently provided by the City of Kodiak; and
>
> . . . Kodiak Island Borough planning documents indicate there is likelihood that growth and development will occur in the territory and annexation will enable the City to plan for and control that development and arrange the most efficient municipal services plan to accomodate the expected growth . . . .

a. It is probably evident to legislators who took the bus tour and viewed the aerial map at the public hearing that a substantial portion of the annexation area is not "urban" by anyone's standards. Kodiak's striking spruce trees, of which Dr. Johnson spoke so eloquently, are the only notable inhabitants of more than one third of the land in question. (See Staff

Report to the Local Boundary Commission; May 17, 1978 at 11.) As stated at the hearing, much of the other land consists of large one, two and three acre lots with single residences upon them. As for the "relatively high level of commercial activity", once one leaves Mill Bay Road, the commercial activity is almost non-existent.

b. The second standard, relating to the need for municipal services, is of course tied into the Island Lake problem. As stressed by the Borough and local residents at the hearing, sewer and water are the only needed services, and they are needed in only a small portion of the annexation area. Most significant, however, there is absolutely no evidence that the City can provide this particular set of services most efficiently.

Were the Borough to insure that the citizens of Island Lake receive their sewer and water, an interesting and healthy consequence would apparently follow. The Borough could then be considered a public utility. At the present time, the City is the only provider of sewer and water in the area. Because it is a municipal utility and has no competition, it does not come under the jurisdiction of Alaska Public Utilities Commission. (AS 42.05.711[b].) Should the Borough enter the picture, however, there would be competing utilities and regulation would follow. Such regulation would insure that unduly discriminatory rates against non-City residents, and unwarranted refusal to extend services, would not be countenanced. (See, AS 42.05.301, AS 42.05.391, and AS 42.04.641.)

The issue of more efficient delivery of services brings into question the economic analysis performed by the City. It is noteworthy, first, that the City has presented conflicting statements about the revenue that would be generated through real property taxes garnered from the annexation territory. In the newspaper insert, included in the City's packet, the total revenue anticipated from the area is set at $160,579. In the memorandum to the City Manager from the Finance Director, dated January 23, 1979, and also included in your packet, the City claims the revenue would be $209,000 at full taxation and approximately $150,000 with the proposed differential tax zones.*

Given the high proportion of Zone 2 and 3 areas versus Zone 1 regions on the City's differential tax zone map, it is difficult to understand the derivation of the $150,000 figure. Nonetheless, however one resolves the City's confusion on this point, $150,000 or $160,579 is still insufficient revenue to extend full general fund services, and some utility services, to the entire annexation area. Yet such was the promise of Mr. Harmony at the Committee's public hearing.

To determine what services might realistically be provided with $160,000, the City must, first, subtract certain losses in revenue that annexation would occasion. According

---

* The Local Boundary Commission's decision to recommend annexation of the Mill Bay and Mission Road areas was based on the assumption that the City was capable of providing all services to the entire area immediately. (See Minutes of the Local Boundary Commission Decisional Meeting; August 16, 1978; at 7, 9 and 10.)

to the City's figures, it would lose $65,550 in fire district monies from this area and another $25,000 in personal property tax payments** that would have to be assumed on behalf of the new residents. The combined loss would be $90,550. Finally, surcharge monies currently obtained from those individuals now receiving City water would no longer be available, although the City apparently provided no data on this point.

After performing the necessary arithmetic, the City could find itself with approximately $60,000 to use for the provision of "full services". If these funds were used for police protection, for example, there would be no net benefit to the residents. With the removal of the State Troopers, the status quo would remain unchanged -- except for the increase in taxes.

In Mr. Harmony's memorandum to Committee members, entitled "Economic Analysis of Annexation vs. Service District", the City makes several questionable assumptions. First, there is the view that public sewer and water will be universally required. Clearly, this is not the case, with many families operating presently with EPA approved on-site systems. Second, there is an assumption that fire insurance will drop over $300.00 per household for the annexed territory. Obviously, this decrease will occur only when a new fire station is con-

---

** The City's sales tax is obviously regressive. By spreading the cost of personal property tax over those who do not own the property along with those who do, an additional regressive effect is achieved. Individuals without the means to own their own boats, trucks, and the like are made to share in the cost of those items for others. Of course, as the City swallows up more territory, the cost to it of this personal property tax burden increases markedly.

structed, a new vehicle purchased, more firefighters hired, roads improved and fire hydrants installed. Again, it is impossible to see from where the finances to accomplish all this would come.

Sound economic inquiry indicates that annexation would inescapably result in one of two consequences: either the promised services would not be delivered, or the mill rate for the entire City would have to be raised significantly. In light of either possibility, it is clear that the City has failed to perform the in-depth cost analysis necessary to assure fair dealing with its residents -- both those within the current City boundaries, and those who would be included were annexation to take place.

c The third and last standard relied upon by the Local Boundary Commission revolves around the likelihood of growth in the territory and the City's need to plan for such expansion. It is fair to assume that some growth will take place in Kodiak over the next decade. That, given the information provided to the Commission and Legislature, is about all that it is fair to assume. No information has been provided on precisely where in Kodiak such growth may be anticipated or whether such growth would bring with it new service problems; it is certainly possible that growth would occur on large enough lots so that sewer and water, for example, could be provided on-site.

There is, of course, nothing to limit the City's ability to take into account, in its long range planning, the possibility of furnishing sewer and water or even other services

to new areas some time in the future. But to require residents in need of no services to pay hundreds of dollars more in taxes so that the City may plan for some hypothetical development in the future seems totally unwarranted.

Myth #3: The annexation question must be finally resolved at this time.

If one writes the above statement, identified as Myth #3, and tacks on "because" at the end of the sentence, it is difficult to know how to complete the thought. "The annexation question must be finally resolved at this time, because . . . otherwise there will be a pollution problem"? Not so, as described above. "The annexation question must be finally resolved at this time, because . . . otherwise there will not be political order on Kodiak Island"? Maybe not perfect, theoretical order, but a much more realistic, equitable approach to local government, and one which allows for unification. "The annexation question must be resolved at this time, because . . . the Local Boundary Commission and Legislature are tired of dealing with it"? Aha.

It appears that, at best, the Local Boundary Commission overextended its reach in attempting to resolve this matter. The Commission is understandably tired of dealing with Kodiak's situation. But it would constitute a grave disservice to the people of Kodiak if, because of what appears to be an error in judgment by the Commission, residents of this area were forced into an unjust, unnecessary and costly annexation, simply to be "done" with the issue.

The hard data for annexation is simply not present. While it is natural to seek order in our lives and resolution of thorny problems, the case for annexation -- the needs and the economies -- has simply not been made. Members of the House and Senate Committees on Community and Regional Affairs are respectively asked to base their decisions on the facts before them and to recommend passage of the Zharoff/Mulcahy resolutions.

Mr. Jim Crane, Atty.
909 W 9th Ave.
Suite 140
Anchorage, Alaska

Dear Mr. Crane,

Enclosed please find a copy of both HJR 10 and HCR 7 as requested in our phone conversation of Feb. 21.

The tape of the House Community and Regional Affairs Committee meeting of Feb. 16, 1979 is presently being put on a cassette tape and will be mailed as soon as possible.

Please contact us if we can be of further service.

Yours truly,

Bill Parker,
Chairman

DATE: Feb. 21, 1979

RE: Cassette tape

Please make a cassette tape of TAPE 2 Side 1 Sections 1875-2010 of House C&RA Hearing of Feb. 16 which deals with discussion of HJR 10 and HCR 7. Please send the tape to:

Mr. Jim Crane, Atty.
909 W 9th Ave.
Suite 140
Anchorage, Ak. 99501

Copy mailed 2/23/79

If there is a charge for this, please send the bill to Mr. Crane as per his request.

We need tape back by Friday A.M.

RECOMMENDATIONS OF THE LOCAL BOUNDARY COMMISSION
RE ADJUSTMENT OF KENAI BOUNDARY

Contacted Clyde Baxley, Administrative Assistant of Borough
He will send letter (copy of that sent to Rep. Branson)
re acceptability of Boundary Commisson's Report.

Neith City nor Borough have any problem with the report.
The City is not involved in the correction of what
is virtually a gap in the legal description of the area.

DATE: Feb. 19, 1979

Attached please find a letter from the Administrative Assistant of the Kenai Peninsula Borough related to the proposed Local Boundary Commission recommendation for correcting an error in the present corporate boundary description of the Kenai Peninsula Borough. As you know, this will automatically go into effect as of March 9, 1979.

This letter is for your information so that you will know that there have been no objections to the proposal.

Also attached are some copies of additional letters received recently from the Kodiak area re annexation.

January 30, 1979

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Re: Kenai Peninsula Borough Boundary Hearing

Dear Arliss:

The State Boundary Commission conducted a hearing on January 12, 1979, in Soldotna, during which only Philip Waring, our Planning Director, and Mayor Don Gilman gave testimony.

We take no exception to the Boundary Commission action since it conforms exactly to the Borough boundaries as we understood them to be.

Sincerely,

Clyde Baxley, Administrative Assistant
Kenai Peninsula Borough

Joint CRA Committee
Pouch V
Juneau, Ak.

Chairman and members:

Thanks you for coming to Kodiak to hold a hearing concerning the recent annexation decision of the Boundry Commission. It is interesting to note that when the Boundary Commission came to Kodiak for a public hearing, only three members were present yet the decision was made by the entire commission. Listening to tapes is not the same as being at a hearing. If only the three members attending voted, the annexation would have been defeated as Mr. Strandberg voted against it. In later conversation with one of your committee members, I believe Mr. Bettisworth said he was not in favor but went along with the majority. Mr. Bettisworth attended. This leaves only the chairman, Ms

Gallagher, of the members attending actively in favor of this annexation.

Mr. Strandberg's concerns, about the time frame for providing services is well founded. Annexations of any size made in the past to the City of Kodiak have provided a poor track record of providing services in a timely manner. In one case, seven years to provide sewer and sidewalks are still to be provided & more than 12 years later. This proposed annexation virtually doubles the size of the residential & business land mass of the City of Kodiak.

It makes about $26,000/yr which is marginal in Kodiak. I own lot 12 USS 3101 near the end of Spruce Cape Rd. The size of this lot is 1.13 acres. I have a duplex on this property. Spruce Cape Rd is a State Road, and whether annexed or not will still be State maintained. & have city water provided by a line

installed by the U.S. Army Corp of Engineers. In order to put this line in it was necessary to blast 3/4 miles through bed rock. The cost of a sewer line in this area is prohibitive and the priority put the city very low as we have no pollution problem. It will be at least ten years before the city of Kodiak will get around to us. They haven't even a tentative time frame. Yet they propose that we be in a 100% tax zone. Even if I were willing to change my life style, I could not. I have as much housing as is allowed with the services available. I couldn't subdivide and sell a portion. The average lot inside the city is 7200 square feet. The taxes are two and 1/2 times the tax outside. I will be paying taxes on 44,000 square feet with no way to reduce this size. To this fact? I haven't even had a say in this.

The voting district proposed for annexation voted 50 out of a

possible 850. This represents about 60%. The entire borough voted only 32.9%. I think this shows we are concerned and responsible citizens, more so than any other area in the borough. We resent not having a say in our destiny especially when city voters seem to care so little what happens to them.

The City of Kodiak is a Home Rule City. It gives their City Council tremendous power without concern for the will of the people (especially apathetic people). Their history of keeping their word is not good. For example, the proposal to put the sewer plant on Spruce Cape Rd included a sewer line for that road. The residents didn't object, feeling that one would be built. The first thing cut because of cost was the sewer line for Spruce Cape Rd, but the sewer plant was put there. The proposal voted on by the people included this sewer line yet we

didn't get it.

Please reverse the Boundary Commission decision, or rather recommend reversal.

Thanks you for your consideration.

Sincerely

Ed Jack

Spruce Cape Rd resident

WITNESSES TESTIFYING:

Parr -- Discusses reason for introducing bill. Publication by "State Council on Gov's." brough to his attention the fact that the federal gov't might eliminate the revenue sharing program as a way of helping to balance the federal budget. Points out that it is the only federal program without strings.

William Prichard, Dept. of C&RA.

1972 federal program began. By Sept. 30,1980 $39.117 Million will have been received by the State. $78.7234 Million received by the municipalities. (1/3 of the funds go to the state; 2/3 goes to the municipalities) Anchorage alone received $6.162 Million; Kodiak $256,000.

Metcalfe- Would amend it to continue the program or allow for equal reduction in taxes. No support expressed for this idea.

COMMITTEE ACTION: Committee passes out bill with unanimous DO PASS recommendation

Dave Gray, Administrative Assistant, Rep. Nels Anderson
Reviews changes in the CS with the Committee. Discusses relevancy of the ALIVE decision relative to the effectiveness of resolutions in regard to HJR 60.

Parr - Points out that HB721 (also related to Lake Elva) calls for a "grant" rather than a loan. Questions the difference between the procedure being used in this resolution as compared with what was done in the Swan and Tyee Lakes hydro resolutions. In these cases it was a "subordinated loan" approach which was used. Yest p. 1 line 28,29 of CSHJR 60 refers to "state financing" of the project rather than a subordinated loan.

Carney - Lake Elva should be financed the same way as the southeastern projects.

Gray - The sponsor will review the Swan and Tyee Lake bills to compare with approach being suggested in HJR 60.

COMMITTEE ACTION: No Action

Rep. Nels Anderson

David Gray, Administrative Assistant, Rep. Anderson

Have determined that there is not much support for the $15,000,000 grant approach. The project itself has been under consideration for many years. Lake Elva has been found to be feasible. There is no problem with anadromous fish. FERC licensing needed. 1.5 megawatts minor project so FERC license could be issued quickly.

Three legislative measures related to Elva have been proposed--HJR 60, HB 721, HB722. A replacement bill for $5,000,000 grant is needed instead and HB 722 should be left in Committee.

Amendment suggested to HJR 60 p. 1 line 20. Delete "not" l. 23 delete "by" after constructed insert "for" delete "only" after project. l. 29 use more traditional language etc. (see written proposed amendments)

John Pearson, PRes. Nusagak Electric

Reviewed history of the Lake Elva project. 1964 Nusagak Electric formed. 1965 Original permit cancelled. Cost relatively inexpensive for diesel. 1976 Another preliminary permit requested. The need for a long term solution evident.

Dave Bouker, Manager Nusagak Electric

$16.8 per WE is the cost now for electricity. Close to deficit level. A rate of increase is necessary. Price for KW goes up constantly. Standard increased from $53.8 to $91.6 in one year. Hydropower will not necessarily lower cost but will stabilize power production expense. 64% of expense is fuel at this time. Addition of hydro will ease costs. It is a good investment. Schools will be on system.

Terry McGuire, Director of Finance, Ak. Power Authority

Tazimina land presents problems. Lake Iliamna and Clark are in a National Monument. Downstream effects of hydro on andronomous stream is also a problem here. Tazamini is seen as

COMMITTEE ACTION: No Action

TAPE # 6 SIDE 1 Footage 1422-1528

an ideal regional project.

APA was requested to become involved in the project. Suggests that line 25 delete "only"--leaves open for future ownership rights of project. Contract revenue bonds considered. Same as proposed for Tyee. Ultimate ownership with State. Policy decision re whether local utilities should own project and state own regional projects?

Little field activity has been done at the site. Actual necessary costs not clarified. Method of financing not clear.

7C Analysis of Governor's Decisions

ITEM	AMOUNT	FUNDING SOURCE	EXPLANATION
Dillingham Hydroelectric Project			The agency request is to determine the feasibility of hydroelectric generation in the Dillingham area with emphasis on Lake Elva. However, a recent Alaska Power Administration report states that "high costs raise serious questions about the validity of additional investments in Lake Elva investigations". Consequently, funding for Lake Elva feasibility studies are not funded. The intent of the Gov. Rec. is to use existing data (i.e. Bristol Bay Energy & Electric Potential) to evaluate the potential for all forms of renewable energy in the Dillingham area and to recommend which projects would be most cost-effective in displacing fuel oil.
Agency Request	400.0	G.F.

CONTINUATION OF NARRATIVE

in a recently completed reconnaissance study by R. W. Retherford Associates for the Alaska Power Administration entitled "Bristol Bay Energy and Electric Power Potential". Grant Lake, about 65 miles north of Dillingham, would incorporate a dam at the lake outlet to increase head and provide full regulation of flows. Installed capacity would be 1.5 MW and 12 million KWH could be provided annually. Access would be by air or overland vehicle. The site is located in Wood River Lakes Park, but hydro development is listed as a compatible use.

The proposed Lake Elva Project is located at a site about 49 miles north of Dillingham. This project would also require a dam to provide increased head and flow regulation. Installed capacity would be 1.5 MW and the project could provide about 8.5 million KWH annually. This site is also located in the state park, and access would be via Lake Aleknagik and Lake Nerke. A stream gage has been installed at this site to verify flow estimates.

The Tazimina Lake Project would include a forebay dam and a reservoir dam upstream. The site is approximately 120 miles from Naknek. It is located in a wildnerness study area, but no definite finding of compatibility has been made. Access to the site would be via a planned state road from Iliamna to Nondalton. With 30 MW capacity, this project would be capable of serving the needs of the Iliamna area as well as Dillingham and Naknek.

A feasibility assessment of these three projects is currently underway. It is anticipated that one or two of the projects will prove viable and should be developed.

III. Estimated Capital Cost.

Preliminary cost estimates are from the previously cited Retherford report and include the cost of transmission. They are 1979 estimates.

Lake Elva $10 million

CATEGORY Power Development AGENCY Alaska Power Authority PROGRAM Economic Development

PROJECT TITLE Dillingham Hydroelectric Project

35b PROPOSED PROJECT ANALYSIS REVISED

000086

Grant Lake	$12 million
Tazimina	58 million

In addition, approximately $400,000 is required for detailed feasibility study and license application for the most viable project.

IV. Operational Expense.

Based on estimates for other hydroelectric projects of similar size and location, annual operation and maintenance costs are estimated at $50,000 for each of the smaller projects and $150,000 for the Lake Tazimina Project. These costs would be paid out of revenues from the sale of project power.

V. Alternatives Considered.

In addition to the 12 other hydroelectric sites, alternative means of providing power include continued use of diesel generation, coal-fired generation from local coal resources, and perhaps wind generation. Alternatives are being further evaluated in the feasibility assessment now underway.

PROJECT NARRATIVE

I. Project Need Statement.

Nushagak Electric Cooperative supplies electrical power to the Dillingham area. It is a REA cooperative with about 2,900 KW of diesel generating capacity. The Naknek/King Salmon area is served by Naknek Electric Association, an REA cooperative with about 3,700 KW of diesel generating capacity. Thus, the area is susceptible to fuel price increases caused by both inflation and increases in the relative price of diesel oil. Since 1970, the amount of electricity provided by the two utilities has increased at 11% per year, and growth in demand is expected to continue at a rate of at least 4.5% annually.

Several potential hydroelectric projects in the area have been identified that offer the possibility of displacing diesel-fired generation and meeting at least a portion of the anticipated load growth. Unlike diesel fuel, hydroelectric generation is virtually free of the effects of inflation and fuel price escalation. Further, it is in keeping with the state mandate to develop renewable resources.

II. Project Description.

Three projects are now under consideration for the area and are the subject of a feasibility assessment presently underway. The three are the best sites from a longer list of 15 sites evaluated

I. INTRODUCTION AND SUMMARY

A. INTRODUCTION

This reconnaissance study has been performed for the Alaska Power Authority (AKPA) under the contract "Reconnaissance Study for Hydroelectric Development at Lake Elva Near Dillingham and on the Kisaralik River Near Bethel" dated August 13, 1979. This study is a follow on to an earlier study[1]. The purpose of this study is to evaluate previously identified potential hydroelectric sites in the Dillingham area in greater detail, including

- implementation of stream-gauging;
- site - reconnaissance and evaluation;
- conceptual design;
- economic feasibility analysis;
- investigation of other alternate electric energy resources.

A supplementary report will summarize the stream-gauging program and its impact on the conclusions of this study after a period of approximately one year.

B. SUMMARY

The questions to be answered by this study can be summarized as follows:

- Can the Lake Elva hydropotential be developed economically for Dillingham?
- Are there alternates which are also feasible?

Preliminary investigations described in the Bristol Bay study noted earlier have identified three promising hydroelectric sites in the Bristol Bay area:

Lake Elva
Grant Lake, and
Tazimina Lake

---

[1] "Bristol Bay Energy and Electric Power Potential - Phase I", Draft - Oct. 79 prepared for the U.S. Department of Energy, Alaska Power Administration.

Development of these sites had been assessed as feasible in regard to cost, capacity, environmental impact, and land status. Since implementation of construction of the three projects is judged nearly mutually exclusive due to the high expenditures involved, this study has assessed technical and economic feasibility of the possible alternate plans. Sensitivity to load growth and various interest rates has been determined. The area presently utilizes diesel generation exclusively and is experiencing very high increases in electric energy cost due to the recent escalation of fuel oil prices. All alternate developments have therefore been compared to the basic case of continued exclusive diesel generation.

The following paragraphs will summarize the main sections of the report.

1. Existing Systems and Future Power Requirements

With the Tazimina potential under consideration, power requirements have been established for 15 communities in the Nushagak/Kvichak/Iliamna area. With a forecasting period of 20 years the possible developments are shown on Table I-1. Whether the "high" or "low" load growth scenario is realized will depend greatly on the cost of electric energy. A low growth rate can be expected with the continued use of diesel generation and the steadily increasing cost. If a more cost-stable source of electric energy is available, it is anticipated that the historic growth rate will continue and industrial development will be encouraged.

2. Hydroelectric Site Evaluation

To allow a more accurate assessment of the available power, a stream-gauge has been installed at Elva Creek and low flow (winter) measurements will be taken at the Tazimina River. A series of historical measurements are available for Grant Lake. Presently the prime capacity of the three sites is assessed as follows:

Site	Capacity (kW prime)	Capacity (kW installed)	Total Cost* (1979-1000$)	Cost/kW Prime (1979-$)
Lake Elva	955	2x750	12,940	13,550
Grant Lake	1385	2x1350	17,416	12,575
Tazimina				
Stage I	9000	2x9,000	50,820	5,647
Stage II	18403	4x9,000	45,774	4,868

* Incl. transmission to load centers.

Electrical Energy and Power Requirements

Table I-1

Mitigation of the anticipated impact of plant development on salmon spawning grounds has led to the downscaled development proposals for Grant Lake and Tazimina. Subsoil conditions at the planned Tazimina damsite will also not allow construction of the dam at the previously considered height.

Lake Elva and Grant Lake are located in the Wood River Lakes State Park but are listed as non-objectionable developments in the park statutes. Tazimina is located in a wilderness study area which is presently included in the 1978 federal emergency withdrawel. Attempts to obtain a powersite exemption are underway.

3. Economic Feasibility Analysis

Alternate development plans have been evaluated for the Dillingham system and for a regional intertied system including up to 15 communities. Utilizing annual cost and present worth comparisons the following scenarios have been found to be the most advantageous developments:

Lake Elva for the Dillingham system only;
Lake Tazimina for a regional intertied system.

Transmission interties of 10 communities in the Kvichak/ Nushagak area to the central generating plants in Naknek and Dillingham have been found feasible independent of hydroelectric power potential development. This is mostly due to the high fuel cost in remote locations and low generating efficiencies.

The following table will illustrate the economical differences for the main alternate development plans investigated. Unit cost for marketable energy are listed for a medium interest rate of 5%. Low load growth has been used to show the less advantageous cases for the hydro developments.

TABLE I-2

Alternate Plan	Busbar Cost of Electric Energy in ¢/kWh 1980	1990	2000
Continued use of diesel (Dillingham)	13.2	21.7	35.3
Small communities, local diesel[2]	37.4	63.1	101.6
Intertied system[1], diesel only	14.1	22.2	35.8
Dillingham system with Lake Elva	13.2	20.0	28.3
Dillingham with Grant Lake	13.2	20.5	25.7
Intertied system[1] with Elva and Grant	14.1	24.9	32.6
Intertied system [1,2] with Lake Tazimina	14.1	18.1	15.5
Intertied system [1,2] with Elva + Tazimina	14.1	21.3	18.0

1 10 communities with Dillingham and Naknek.
2 Includes Iliamna, Newhalen and Nondalton.

It should be noted that the above are busbar cost -- not cost to the consumer.

4. Other Electric Energy Resources

The most viable alternate at this time to fuel oil or hydro-electric resources appears to be wind energy conversion. The available systems are still very costly though and reliability of the equipment in Alaska has not proven to be very high. With continued improvements it is anticipated that utilization of WECS will be economically feasible by individuals in remote locations as well as by electric utilities to offset fuel cost. Applications for pumping or heating appear to be even more promising. The cost for electric energy generation by WECS at this time in the Dillingham or Iliamna areas has to be anticipated between 30¢/kWh and 80¢/kWh. These cost do not include standby generators.

To utilize diesel generation more efficiently -- if no other source of electric energy is available -- central generation with transmission interties promise cheaper energy, if the transmission ties are economically feasible. The single wire ground return (SWGR) line concept is anticipated to offer savings of approximately 60% compared to conventional three phase transmission or distribution lines.

A demonstration project to be built in 1980 in the Bethel area is presently in the design stage. If the project is successful, this type of line construction is expected to increase and make interties between small communities and load centers possible. For this report the feasibility of interties has been investigated for 10 communities in the Nushagak/Kvichak area. It is conceivable that busbar cost of electric energy in the small communities could be lowered by up to 50% if the interties to Dillingham and Naknek are built. This is mostly caused by enhanced generating efficiency and lower fuel cost in Dillingham and Naknek compared to the more remote communities.

The possibility of an intertie between the Bristol Bay and Kuskokwim area has been briefly investigated, assuming that the Tazimina and Kisaralik hydropotential are developed. This preliminary evaluation indicates that this intertie could be marginally feasible somewhere around 1995 when the load growth in the Dillingham area would require implementation of the Tazimina Stage 2 development. The possible reduction in standby capacity has not been taken into account in this evaluation.

The above mentioned interties actually represent a form of conservation. It is not anticipated that it will be possible to actually reduce electric energy consumption in this area, where hookup saturation is still low. Other means of conservation of fuel oil such as utilization of variable speed engines and waste heat recovery are strongly encouraged.

5. Conclusions and Recommendations

The economic analysis clearly favors development of the Tazimina hydropotential for an intertied system of 15 communities. In order to pursue implementation of this project a regional power authority or a generation and transmission cooperative will have to be established to assure representation of the individual communities and act as the entity that will install and operate the facilities.

If the Tazimina development is not pursued, Lake Elva is the next best choice for Dillingham alone. It is the project with the shortest construction time and can be undertaken by the local utility with REA financing.

Either project should be prepared for FERC license application as soon as possible to assure the earliest possible start of construction.

Pat O'Connell X	Fred Zharoff X
	Ray Metcalfe X

Rep. Ernie Haugen
Rep. Oral Freeman

Gave general overview of proposed projects with reference to feasibility studies prepared by the Alaska Power Authority. The State has already advanced money for the necessary planning and environmental review of these projects. (see study summaries supplied as background)

Dick Ballard, Thorne Bay Company of Wrangell

It should be made clear that the request is not for a handout. Front end costs are a problem for a small community. There is currently an indication that 25% of the excess power available would be used by local industry. City Creek is not seen as an alternative for Tyee as it is a "run-of-the-river" generation project. It will only be on the line 60-70% of the time as it is a conductive system which depends on the rainfall. Steam generation has been considered. Standby in the amount of the power used by the community is necessary. The existing diesel generators in Petersburg and Wrangell will be sufficient to provide the necessary backup. Consumers were paying $.14 1/2 per kw in Jan. 1980. The costs for hydropower are related to paying off the bonds rather than to the cost of the water...

The costs to the consumer of energy generated by the projects were discussed in relation to the varying amounts of state funding considered. Rep. Freeman sees the value of the projects in the stabilizing of the energy costs which will take place. Also, the existing diesel machinery is old and will need replacement.

Ginny Chitwood, Municipal League

Supports the concept of hydroelectric power.

COMMITTEE ACTION: Postponed action until Ak. Power Authority representative can be contacted.

Pat O'Connell		Fred Zharoff	X
		Ray Metcalfe	X

Eric Yould, Executive Director, Ak. Power Authority

Yould gave the history of the projects and discussed the finances and feasibility of the hydro facilities. Indicated that $500,000 had already been expended in studing the feasibility of the projects (during 1977-78) and that $3.1 Million has been expended on the Swan Lake project and $2 Million on the Tyee.

Estimates indicate it would cost Petersburg $5,000000 extra to convert to electricity.

Yould indicated that in fact it might be a viable alternative to run Tyee to Ketchikan.

It appeared that on the life cycle analysis, Swan Lake is preferable to Mahoney.

The relationship between hydro and development is not always clear but the presence of cheap power can stimulate develpment.

Yould responded to the questions (see attached) asked by the Chairman.

Carney questions the feasibility of having later users share in the major costs of building the hydro projects. Response indicated that there would be potential psycholicial problems in voting on a bond which someone else was going to be paying for. This restriction on a bond might effect its marketability.

COMMITTEE ACTION: Passed bill out.

Bill from Marjorie

TYEE AND SWAN LAKES HYDRO PROJECTS

AREAS FOR DISCUSSION

Among the projects submitted by the Alaska Power Authority, how do Tyee and Swan Lake rank in terms of priority for funding?

Explanation of the funding approach involved in the projects--you might want to have "subordinated loans" explained.

What community growth rate was calculated in the development of the user and cost figures?

Was the public involved in the discussion of the relative costs of the alternatives explored?

What is the "backup" system requirement? Does it have to be a certain % of the capacity of the main system? And if so, does building a larger hydro facility necessitate a larger diesel backup and therefore increase the costs to the consumer? ✓

More Specific questions

What is the status of the City Creek hydroelectric project in Petersburg and how does it relate to the Tyee project?

Has there been full exploration of the possibility of Tyee serving the Ketchikan community? Or of Swan serving the Petersburg/Wrangell areas? Interties possibilities?

It appears that a factor which may lessen the adverse effect of excess capacity of the Swan Lake facility is the possible sale of power to Louisiana Pacific Corp. HOw likely is this possibility? Have the relative costs to the consumer of carrying the excess capacity anticipated in both these projects been evaluated ? Have the merits of a facility with smaller capacity been fully explored?

Questions generated by 2/25/80 hearing on bill:

Testimony was given that the existing diesel generators are old and will eventually need replacement. Was the cost of this replacement calculated in the cost figures for the hydro projects?

different financial options - review

Petersburg/Wrangell - dependent on electrical conversion

Thomas Bay Power Commission
Box 613
Wrangell, Alaska

Attn: Harry Sundberg

Dear Sirs:

As you are probably aware I met with the City Council members and the Mayor on February 17, 1980, to discuss the electricity needs of our new sawmill which is being built at the AWP 6-Mile site. This sawmill is expected to be in operation by March 15, 1981. Our engineering is now far enough along for us to forecast the electricity needs of that site. At present we anticipate in the new mill about 5,735 connected Hp. This along with the present sorter and powerhouse, plus our needs for heating and lighting, puts us in need of a considerable amount of power. The total connected Hp will be approximately 6,100. When this is broken down to Kw and to usage percentage, it breaks down as follows:

6,100 Hp x .75% = 4,575 Kw
4,575 Kw x .60% usage = 2,745 requirement.
2,745 Kw + 200 Kw (heating & lighting) = 2,945 Kw

AWP Producing Capacity = 1,800 Kw/hour.

2,945 Kw - 1,800 Kw = 1,145 Kw need.

As you can see we will need about 1,000 Kw/hour for all hours of operation plus some usage during non-operating hours.

We requested the City to install a new line from the power plant to the mill site so they could provide us with this power. At present they do not have the line capacity to do so.

If you can be of any assistance to us in this project I would certainly appreciate it. This may fit into your future plans for hydro power from the Bradfield area. We are also consiering in the future a whole log chipper which would add about 1500 Hp to our mill; however, at this time I am delaying this as the City does not have

the capability to handle both the new mill and this chipper.

If you have any questions please feel free to contact me about them.

Thank you.

Respectfully,

L. Ingle
Vice President

Conclusion

INTRODUCTION

The Ketchikan Public Utilities (KPU) submitted a Federal Energy Regulatory Commission (FERC) license application in February of 1979. Approval of the license for construction is expected by July of 1980. Ketchikan Public Utilities has applied for and received Project loans from the Water Resources Revolving Loan Fund and $3,450,000 in loans from the Power Project Revolving Loan Fund administered by the Power Authority. Loans to date have been principally for the preconstruction costs of Project development and for purchase of equipment to automate the KPU generation control system. The City of Ketchikan has requested that the Alaska Power Authority issue revenue bonds to finance construction of the Project.

The Alaska Power Authority desires to assist KPU by issuing revenue bonds to finance construction, interest during construction and a reserve fund for the Swan Lake Project. The financing will be accomplished through the tax exempt municipal market with security provided only by the merits of the Project and the strength of sales contracts for Project power. A request for $18,000,000 in state assistance in financing construction of the Project has been requested. This amount will permit flexibility in entering the bond market for the remainder of the construction financing needs, diminish the amount of bond indebtedness by $25,000,000, and indicate state support and interest in the Project to the benefit of the overall Project financing. State assistance in the form of a subordinate loan to the Project debt with graduated interest payments and/or deferred principal payments will permit lower cost power in the early years of operation and contribute to the overall security of the Project.

PROJECT DESCRIPTION

The Project site is located at Swan Lake in a remote area approximately 22 air miles northeast of Ketchikan near the northern end of Carroll Inlet. Swan Lake, a low-elevation lake surrounded by mountains, drains westward through a narrow gorge and into Carroll Inlet via Falls Creek. Historical stream gaging records and correlations with nearby basins indicate that the basin yields an average of 335,000 acre-feet of runoff per year. The site is extremely well suited for the development of a hydroelectric generating facility and, based on the optimization studies conducted, a project arrangement has been selected which will permit the maximum economical utilization of the site potential.

The selected Project arrangement will consist of: a 190 foot high thin arch concrete dam located approximately one mile downstream from the outlet of Swan Lake; a 2,280 foot long concrete lined power tunnel leading to a powerhouse located just north of the mouth of Falls Creek near tidewater; a permanent port facility located at tidewater approximately 1,000 feet north of the powerhouse site; about one mile of access roads connecting the port facility, powerhouse and dam; a switchyard located just north of the powerhouse; approximately 30.5 miles of 115 KV wood pole transmission line crossing Carroll Inlet from the powerhouse site with a single overhead span, extending south along the west side of the Inlet, and then west across the northern tip of George Inlet up the White River Valley and past Ward Cove and then south to the proposed substation site near the existing S. W. Bailey Diesel Plant. The Project will have an installed capacity of 22,000 KW, will operate under an average gross head of 311 feet and have a dependable capacity of 18,000 KW delivered to the load center. It will be capable of delivering 85,400,000 kwh average annual energy and 66,700,000 kwh of firm annual energy to the load center. For the scheduled on-line date of November 1983, the Project is estimated to have Total Capital Requirements of $107,000,000 including inflation, interest and issue costs.

Existing Capabilities and Projected Demand

The KPU system includes 8,550 KW of existing hydroelectric capacity which produces 62.7 Gwh of energy, and 17,320 KW of diesel generation capacity to supplement all additional demand. Peak power and average annual energy forecasts for Ketchikan are:

Year	Peak Power MW	Annual Energy kwh X 10⁶
1975	14.5	76.6
1980	17.3	97.7
1985	22.5	124.7
1990	28.0	158.0

The capacity and energy of Swan Lake will be fully utilized by 1989 if the 10 year historic load growth of 5%/year is maintained. All excess energy may be marketed to the Louisiana Pacific Ketchikan Pulp Mill through a power sales contract, in which case the Project power may be fully utilized upon first operation.

Alternatives Considered

Lake Grace, Mahoney Lakes, and continued use of diesel generation were alternatives considered to the Swan Lake Project. Lake Grace is larger than Swan Lake and has potential environmental constraints that would preclude development since it is located in a restricted land status area. Mahoney Lakes, which has roughly 1/2 the power and energy potential of Swan Lake, was determined to be too samll to meet long term needs of the Ketchikan system. Continued dependence on diesel generation is determined to be the least feasible of all alternatives.

Environmental Impacts

The environmental impacts of the Swan Lake Project and associated transmission line are principally associated with the construction activity itself, and the visual distractions the completed system will have on the presently undisturbed surroundings. Over the long run, imbalances or alterations in the existing wildlife and fishery ecosystems of the area are not anticipated. There are no endangered species known to inhabit the Project area.

Air and Water Quality

Operation of the Project would not degrade air quality. However, some temporary impacts on air quality may be experienced during construction, due to exhaust and crankcase emissions from vehicles and construction equipment and the dust generated by drilling and movement of equipment. Noise levels will increase due to blasting, machinery operation, and other construction activities. Project operation will result in some increased noise, particularly in the vicinity of the powerhouse. However, this impact is expected to be minor.

Construction of the dam and dikes would introduce sediment into Falls Creek. Other surface waters may experience increased sediment loads due to clearing and earth moving operations along the transmission line route and quarrying and land clearing operations in other Project areas. During Project operation fluctuations in the water level of Swan Lake may cause soil erosion which would introduce sediments into Falls Creek.

Land Use

Direct impacts on land use would stem from the inundation of 450 acres of land presently covered with shrub and the removal from alternative uses of 240 acres along the transmission line routes. The impact of the Project on regional land use patterns is not expected to be severe. The inundated acres represent an addition to an existing reservoir. The main transmission line would be constructed in a route containing limited timber and recreational uses. The existence of the line would interfere with the area's scenic and aesthetic qualities.

Social and Economic Impacts

Project construction activity would focus on the Ketchikan area. The level and duration of social and economic impacts would depend on a number of factors, including the need to import a Project workforce, the number of workers who would be accompained by dependents, their length of stay, and the ability of Ketchikan to absorb a small increase in demand for housing, public services and consumer goods. Most workers will be physically located at a temporary field camp near the powerhouse location. These impacts would be primarily secondary, short-term economic impacts associated with personal consumption expenditures of the Project workforce.

Engineering Considerations

The dam site 2,800 feet upstream from the mouth of Falls Creek is a suitable location for a concrete arch dam. The crystalline schist bedrock at the site would provide an adequate foundation for this type of structure. To elimate the hazard of locating a surface penstock through an area which might be subject to landslides and snowslides, a concrete lined power tunnel constructed in bedrock is proposed. The powerhouse site adjacent to the mouth of Falls Creek on Carroll Inlet has adequate bedrock for the foundation of the powerhouse. The spillway preliminary design accommodates only 50% of the probable maximum flood inflow into the reservoir, therefore the non-overflow portions of the arch dam must be designed to accommodate this infrequent occurrence. The 115 KW transmission line is adequately sized to accomodate Swan Lake power transmission. The necessity to upgrade the transmission line to accommodate additional sources of power should be considered prior to construction.

Economic Feasibility

The Swan Lake Project was compared to the Lake Grace, Mahoney Lake, and all diesel alternatives in an economic analysis. Results of the analysis are that any hydroelectric alternative is superior to continued dependence on diesel. The Mahoney Lakes Project has a lower cost/KW than the Swan Lake Project, however, reliance upon supplemental diesel generation

occurs from first power-on-line of this Project which is too small to satisfy long term needs. The Lake Grace Project has environmental problems, it is larger than Swan Lake, and the cost/KW of power is equal to Swan Lake. The Swan Lake Project satisfies the long term needs of the KPU system, and depending upon the rate of escalation of diesel fuel over the normal rate of inflation, the Project can achieve cost savings to the system of between $2 and $22 million over the first 10 years of Project operation.

Project Costs and Financing

Without state assistance, an estimate of Project costs are:

Land and Land Rights	$ 572,000
Powerplant Structures and Improvements	4,010,000
Reservoirs, Dams and Waterways	23,232,000
Water Wheels, Turbines and Generators	5,866,000
Accessory Electric Equipment	1,649,000
Miscellaneous Power Plant Equipment	3,430,000
Construction and Access Facilities	9,082,000
Transmission Facilities	11.428,000
Subtotal - Direct Construction Cost	$59,269,000
Sales Tax	-0-
DIRECT CONSTRUCTION COST	$59,269,000
Contingencies,	8,761,000
Subtotal	$68,030,000
Engineering	8,396,000
TOTAL CONSTRUCTION COST	$76,426,000

The total amount of the revenue bond issue will be approximately $107,000,000 to include interest during construction, funding of reserve funds, and costs of issuance. This amount could be decreased by $25 million if the recommended amount and form of state assistance is approved. The $18,000,000 loan to the Ketchikan Public Utilities would be subordinate debt to the bond indebtedness, with graduated interest payments and deferred principal and interest payments to shape overall Project debt service in a manner to improve the revenue bond Project financing.

The ability of the Project to be financed without state assistance is questionable due to the Project size, amount of the bond issue, and the potential for power excess to system needs in the early years of operation. Without state assistance, an interest penalty on the overall bond issue will result in even higher power costs for Ketchikan consumers.

The Power Authority may issue contract revenue bonds (under an Indenture of Trust between the Power Authority and a trustee bank) for the difference between Project capital requirements and a subordinated State loan. Under the plan, the Power Authority would own the Project, KPU would have the option to purchase after obligations are repaid, KPU would operate/maintain the facilities, KPU would be responsible for debt service, KPU would set rates to collect revenues with a stipulated coverage. The bonds would be amortized over 40 years, with the Reserve and Contingency Funds paying the last years and one-half debt service.

CONCLUSION

This summary was prepared by the staff of the Alaska Power Authority to comply with Section 44.56.180 of the enabling statutes of the Power Authority. The maximum amount of bonds estimated to be necessary to finance the Swan Lake Project is $120 million. The Power Authority intends to assist the Ketchikan Public Utilities to finance the Project with state assistance in the form of an $18 million subordinate loan. The Power Authority does not intend to design, construct, or operate the Project itself. The Project will be designed, constructed, and operated by Ketchikan Public Utilities, with rights to the capacity remaining with the Utility, and ownership of the Project determined by the optimal acceptable form of revenue bonds issued for the Project. Ultimate ownership rights upon retirement of debt service will remain with the Utility. The general design and financial feasibility of the Swan Lake Project is acceptable, and the Project should proceed to construction. The Power Authority recommends that the Legislature adopt a joint resolution approving the general design and financial feasibility of the Swan Lake Project, approve action of the Power Authority to issue bonds in a maximum amount of $120,000,000 for the Project, and approve state assistance in the form of an $18 million subordinate loan for the Project.

7C Analysis of Governor's Decisions

ITEM	AMOUNT	FUNDING SOURCE	EXPLANATION
Swan Lake Hydro Project			The request is for a subordinated loan, needed to assure sale of revenue bonds. The Governors recomendation is that the source of funding be the Renewable Resources Investment Fund (RRIF) rather than the General Fund.

PROJECT NARRATIVE

I. Project Need Statement.

The City of Ketchikan has increasing demand for electric energy which exceeds its existing hydroelectric capacity. Diesel generating capacity is used to provide power at a rapidly increasing price due to the cost of fuel. The project will be difficult to finance due to the restricted market area, the amount of project power that may be excess to initial demand, and the high cost in $/KW for the project. It will be difficult for the utility to market debt for the full cost of the project unless a loan from the State subordinate to the revenue bond debt is made in a manner similar to the Green Lake project at Sitka.

II. Project Description.

The Swan Lake project consists of a dam, power tunnel, penstock, powerhouse, and 28 mile 115 KV transmission line to the City of Ketchikan. The project will have 22 MW of installed capacity producing 18 MW's of firm power and 69 million kwh of firm energy per year. A total of $3,435,000 has been loaned by the state through the Power Project Revolving Loan Fund for design, license application, and purchase of equipment associated with the project in FY'79 and FY'80. A FERC license is expected to be approved by September of 1980, and construction will begin as soon as possible thereafter.

CONTINUATION OF NARRATIVE

III. Documentation of Estimated Capital Cost.

Construction costs estimates for the project were prepared by R. W. Beck and Associates in a Feasibility Report on the project for the Ketchikan Public Utility. The cost estimate of $86 million included interest during construction and inflation throughout the construction period. The total amount of the bond issue to include financing costs and funding of reserves could exceed $100 million which would be perceived by investors as too large for a community the size of Ketchikan. State assistance in the form of a subordinate loan will provide a degree of security to investors and result in a bond issue in a more acceptable range of $80 million.

IV. Analysis of Estimate of Operational Expense.

The hydroelectric plants of the utility will all be fully automated as a result of funds made available to the community in FY'80. This will decrease significantly the operations and maintenance costs of the project for the utility. All O & M costs and debt service will be paid from revenues derived from the sale of electric power by the utility.

V. Identification of Alternatives Considered.

The alternatives available to Ketchikan are limited to other hydroelectric projects or continued dependence upon diesel generation and its associated rapidly increasing cost. Diesel generation is not considered a viable alternative in the short or long run based solely on economics. Other hydroelectric projects considered are Mahoney Lake, Lake Grace, and Lake Tyee. Mahoney Lake was considered too small by the utility and not adequate to meet long term needs even though the cost/KW for power from the project was less than Swan Lake. Lake Grace was encumbered by federal land actions. Lake Tyee was almost a year behind Swan Lake in development, and the merits of the project in relation to Swan Lake were unknown, since Lake Tyee was located 83 miles from Ketchikan. Considering the present progress of project development for Swan Lake, it appears to be the best short and long term solution to Ketchikan's power requirements since Lake Tyee can still be developed to provide future power requirements of the City.

PROJECT NARRATIVE

I. Project Need Statement.

Petersburg and Wrangell are largely dependent on diesel electric generation and its associated increasing costs. A renewable resource alternative energy project would alleviate this condition. Either hydroelectric or wood/biomass power generation could be solutions. Both alternatives are being investigated, however the hydroelectric option is most favored due to its flexibility in operation, low O & M costs, and stable source of fuel. The project may also be capable of providing power to Kake and additional power to Ketchikan.

II. Project Description.

The Swan Lake project is in two stages. Stage 1 provides 15 MW of power and 69 million kwh/year of energy at a cost of $45 million. It consists of a lake tap, power tunnel, penstock, powerhouse, 57 mile 115 KV transmission line to Wrangell, and a 31 mile 37 KV line to Petersburg. Stage II requires construction of a dam to increase storage capacity and the addition of generators in the powerhouse. Stage II produces an additional 15 MW's of capacity and 62 million kwh/year of additional firm energy.

III. Documentation of Estimated Cost.

R. W. Retherford Associates prepared a Preliminary Feasibility Report on the project and estimate in 1978 dollars a cost of $41 million for the

CONTINUATION OF NARRATIVE

Stage I Project including 7% inflation and interest during construction. Due to increased inflation in 1979, an estimated cost of $45 million is included in this project description. A detailed and updated cost estimate is presently being prepared by the engineer as part of the FERC license application. The two communities of Petersburg and Wrangell will have difficulty in financing the project on their own due to the dollar value of the bond issue relative to the size of the communities and the amount of excess project power remaining to be marketed in the early years of operation. A state loan for the project subordinate to the payment of revenue bond debt service will reduce the total dollar value of the bond issue, increase the security of the bonds and make them more marketable, and help to insure project financing. The state loan appropriation is required no later than FY'81 to insure availability of funds prior to the construction financing when the FERC license should be approved. Since the loan may be considered a capital project appropriation, the funds would guarantee timely project financing if they were appropriated in FY'81 for use upon receipt of the FERC license. In FY'80, HB 32 appropriated $2 million for loans for the project. The Power Authority assumed responsibility for management and development of the project in response to a request of the Thomas Bay Power Commission and the two communities. The expenditure of the $2 million appropriated for the project will have to be clarified by the legislature.

IV. Analysis of Estimate of Operational Expense.

All operating and maintenance expenses will be paid from project revenues and are estimated to be $200,000/year with 4 FTE positions for Stage I, and increase by $100,000/year with one additional FTE position with development of Stage II.

V. Identification of Alternatives Considered.

Alternatives considered to the Lake Tyee project were other hydroelectric projects which were determined to be too large or small with a higher cost/KW of power produced, continued use of diesel generation with its asso-

000072

ciated high operating and fuel costs, and wood waste combustion steam generation. The wood waste development appears competitive to Lake Tyee in the near term for a short period of economic analysis if a long-term low cost source of waste wood fuel can be established. The wood waste alternative has rapidly increasing fuel and operating costs which are subject to inflation. It also has a useful life of approximately 30 years, which is much shorter than a hydroelectric project.

FROM: Margo W. Waring

RE: Lake Tyee Hydropower Development

Here are some initial thoughts on the Tyee situation:

1. No one is looking at a system approach to hydropower development. Each project proposed is over capacity.

2. Swan Lake (Ketchikan) expects a FERC license in September 1980. It will produce 69 million kwh/year. It needs a subordinate loan of $20 million, of a total of $100 million bonded, based on Ketchikan's growth rate that is inflated by about .8.

3. Lake Tyee is one alternative to Swan Lake. Tyee is one year behind Swan Lake. APA says Swan should be built "since Lake Tyee can still be developed to provide future power requirements" of Ketchikan (p.000069), despite the fact that Swan will produce great excess capacity.

4. Tyee will produce, at stage 1, 69 million kwh/year. Stage 2 will produce an additional 62 million kwh/year. Stage 1 will cost $45-55 million and require a subordinate loan of $10-15 million.

5. Report #HG 050800117036F identifies (p.19) nine different hydro sites for Petersburg and Wrangell. Wood waste burning is also an alternative.

6. For Petersburg and Wrangell it is apparently more cost-effective to develop several small sites, with shorter transmission lines, produce no excess capacity, and save considerable money in the provision of back-up capacity. The back-up capacity problem has been ignored in feasibility studies; but, significant costs are incurred for consumers when back-up is necessary for one large plant, instead of for ~~one~~ small plant.

scrutiny of project revenue financing is partially or totally eliminated [See Financing Addendum, pages 4-10]. As noted in the addendum, the cost and delays should be insignificant and the extra protection should be sufficient to offset any loss of usual market tests.

HB570

Bill Miles

Dave Rogers

ISSUE III:

TO INSURE THAT THE GOVERNOR AND LEGISLATURE RECEIVE A BASIC MINIMUM OF FEASIBILITY INFORMATION IN A STANDARDIZED FORM FOR ALL POWER PROJECTS PROPOSED BY THE AUTHORITY.

Option 1:

The Alaska Power Authority Statute should be amended as follows:

AS 46.56.180(c) is amended by adding the following new sentences immediately after the first sentence in the subsection [note: if the option suggested under Issue II above is also adopted, the sentences offered here should occur first] to read:

including but not limited to →

Each feasibility study shall include but not be limited to, the following information: total cost, construction cost, operating and maintenance cost projections, construction timetable, revenue source, stream of revenues, rate of return (imputed), net present value, benefit cost ratio, potential environmental effect, potential effect on local communities and the availability of alternative government financing. Each feasibility study shall also incorporate standardized non-site-specific parameters including: discount rate, interest rate by type of debt, fuel price escalation rate, state electric load growth and imputed values for non-cash costs and benefits. All values selected shall be consistent with those used in the Department of Commerce and Economic Development long term electric power development plan, when adopted. The authority may include an analysis based on different values with an explanation for any differences.

No discussion of alternatives

or rejected methods, projects, financing

Subordinated Coin debt makes a project revenue bond financeable - Reduces total debt makes unfeasible projects feasible.

RE: SWAN LAKE HYDROELECTRIC PROJECT

Dear Eric:

At your request, we have described the proposed plan of finance of the above-captioned Project, addressing the question of State funding assistance and its impact on financeability of the Project.

We have reviewed the various engineering reports published on the Project and we have engaged Booz, Allen & Hamilton to assist us with the technical aspects of that review. We have consulted with Wohlforth & Flint, bond counsel, and with representatives of Ketchikan Public Utilities.

We are pleased to submit herewith our report. We are available at your convenience to discuss this report with representatives of the State, the Authority, Ketchikan Public Utilities and other interested parties.

Very truly yours,

FIRST SOUTHWEST COMPANY

INTRODUCTION

The City of Ketchikan, Alaska, having made the decision to discontinue its reliance on the use of diesel electric generation to meet existing future power demands, has requested the assistance of the Alaska Power Authority (the "APA") in the financing of its Swan Lake Hydroelectric Project (the "Project").

A plan of finance is proposed for the Project and a preliminary analysis of four alternatives containing various combinations of State funding and revenue bond funds is set forth. The impact of each alternative on electric cost has been estimated, based upon certain assumptions set forth in the report. The report concludes with our recommendation and justification thereof.

THE PROJECT

The Project is a major hydroelectric generating facility located at Swan Lake, approximately 22 air miles northeast of Ketchikan near the north end of Carroll Inlet. Swan Lake, a low-elevation lake surrounded by mountains, drains westward through a narrow gorge into Carroll Inlet via Falls Creek. (See Figure 1)

The Project consists of a 190 foot high thin arch concrete dam located downstream from the outlet of Swan Lake, a concrete lined power tunnel leading to a powerhouse, a permanent port facility, access roads connecting the dam, powerhouse and port facility, a switchyard and approximately 30.5 miles of 115 KW wood pole transmission lines.

Figure 1

PETERSBURG-WRANGELL-KETCHIKAN AREA

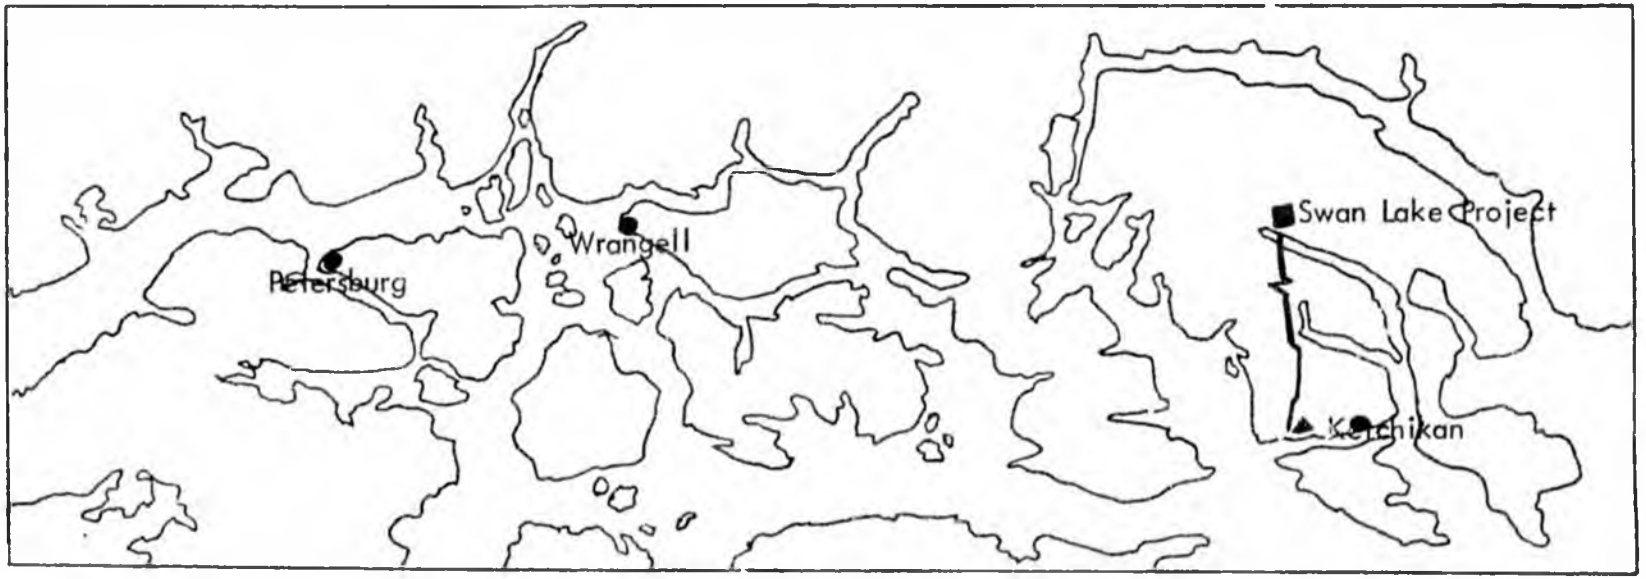

Figure 1

PETERSBURG-WRANGELL-
KETCHIKAN AREA

The Project is designed to have an installed capacity of 22,000 KW and a dependable capacity of 18,900 KW delivered to the load center. It is designed to be capable of delivering 85,400,000 KWH average annual energy and 66,700,000 KWH of firm annual energy to the load center.

R. W. Beck and Associates, Engineers and Consultants, concluded in their Evaluation Report dated June 1978 that the "Project is technically and environmentally feasible." Nevertheless, R. W. Beck's Demand and Energy Forecast dated January 11, 1980 indicates that "it appears that even if electrical loads grow at the highest projected rate in future years, there would still be significant amounts of both firm and secondary energy available for sale during the initial years of Project operation."

Booz, Allen & Hamilton, Inc., Consultants, have reviewed the Project reports and generally concur with the findings as to technical and economic feasibility. Their assessment is contained in Appendix A.

The central factor emphasized in all of the economic feasibility reports is the long term benefits KPU will derive by replacing its diesel generating facilities with relatively fixed cost hydroelectric facilities.

THE CITY

The City of Ketchikan, a community located in Southeast Alaska has a current population of approximately 8,600. Ketchikan Public Utilities ("KPU"), the municipally-owned public utility system, operates the electric, water and telephone system and provides electricity for a service area with a population of approximately 12,600.

The existing hydroelectric facilities have produced average annual energy of approximately 63,000,000 KWH and the existing diesel facilities could produce 77,900,000 KWH.

During the fiscal year ended December 31, 1979, KPU sold 72,213,615 KWH and has experienced a load growth of approximately 4.6% per year over the last 10 years.

PROPOSED PLAN OF FINANCE

It is proposed that contract revenue bonds be issued by APA pursuant to an Indenture of Trust between APA and a trustee bank. From the proceeds of this bond issue and a proposed subordinated State loan, the Project would be constructed. Although APA would nominally own the Project when construction is completed, KPU would operate the Project, control its output and would obtain title to the Project through a bargain option to purchase after all obligations have been repaid. APA would enter into a contract with KPU under which KPU would agree, in consideration for its use of the facilities, to timely pay (a) amounts to the trustee equal to the principal and interest on the Bonds; and (b) principal and interest requirements on the State obligation. All payments to be made by KPU pursuant to the Contract would constitute reasonable and necessary operating expenses of KPU. The Indenture of Trust and the Contract must insure that KPU's obligation to pay its reasonable operation and maintenance expenses, including payments due under this contract, has priority over its obligations to make principal and interest payments on any of its other debts. KPU would covenant to set rates projected to be necessary to generate gross revenues at least

equal to (a) 1.25 times the payments under this Contract, (b) projected operation and maintenance expenses and (c) all other debt service payments in the upcoming year. The funds KPU generates from the 25% coverage requirement would be used to finance capital expenditures of the electric, water and telephone system and to provide funds that could be used to redeem the APA contract revenue bonds (thus lowering future debt service requirements).

A Reserve Fund equal to average annual debt service requirements and a Contingency Fund equal to 6 months average annual debt service requirements would be capitalized from bond proceeds. The Contingency Fund could be used to pay extraordinary repairs and maintenance on the Project and, if needed, to pay debt service on the Bonds. Both funds would have to be replenished by KPU if drawn upon.

The Bonds would be amortized over 40 years, with the Reserve and Contingency Funds being used to pay the last 18 months' debt service.

To implement the proposed plan of finance, defeasance of KPU's outstanding revenue bonds may be required.

THE NEED FOR STATE ASSISTANCE

The need for State assistance arises when the Project is reviewed from the standpoint of financeability. The long term economic feasibility of the Project appears to be established in that diesel fuel prices are expected to continue rising over time while the costs of capital intensive hydroelectric generating facilities are relatively fixed. The most critical concern in terms of ability to finance the Project in the tax-exempt bond market is the substantial excess capacity that may exist in the early years of Project operation and its adverse effects on electric cost in

the short run. In 1985, the Project's average annual energy of 85,400,000 KWH, when added to the 63,000,000 KWH from KPU's existing hydroelectric facilities, will result in significant excess capacity relative to the projected 96,000,000 KWH sales. This estimate of sales was prepared by R.W. Beck and Associates in January, 1980 and represents the low load and energy forecast based upon conservative growth assumptions. Thus, rates must be increased to the extent necessary to satisfy the debt service requirement attributable to this potential annual excess of 52,400,000 KWH. Although high electric rates are certainly undesirable from the personal financial standpoint of the Ketchikan consumer, they also increase the bond market's perceived risk of an obligation in that economic growth in the area may be retarded.

There are two significant factors which together may lessen the adverse effect of excess capacity on KPU electric costs. The first factor is the possible sale of a block of power to Louisiana Pacific Corporation ("LPK"). The size of this block of power could range from 5,000,000 KWH to 25,000,000 KWH per year. The exact dimensions of the purchase and the price and terms have yet to be negotiated and will depend on LPK's power alternatives. The actual cost effect will be a function of the amount of power purchased and the differential between the LPK price and KPU's average cost per KWH. Nevertheless, even under the most favorable circumstances, some excess capacity is projected to exist until 1993.

The second factor which ameliorates the adverse cost effects of excess capacity is a loan from the State, repayment of which would not be required until after full capacity is reached. State assistance in the form of a subordinated loan is justified in that the ability to obtain conventional financing for the Project under reasonable terms is enhanced. The State loan would lower electric

rates in the following ways:

(1) Interest payments on the loan would be partially deferred and principal repayment fully deferred until full capacity is attained, thereby minimizing the adverse rate effects of excess capacity in the early years of Project operation;

(2) The loan is subordinated to the APA revenue bonds, thus enabling the APA to obtain a more favorable interest rate than would otherwise be possible;

(3) The 25% debt service coverage requirement would not be applied to the loan debt service requirements, thus resulting in significant rate relief.

The terms of the loan as proposed approximate the terms of the Sitka-Green Lake loan and are described in more detail in Appendix B. The assumed 7% interest rate approximates the State's own cost of borrowing. Although the actual interest rate could range from 5% to 7%, the more conservative rate was used in the analysis.

ANALYSIS OF STATE FUNDING ALTERNATIVES

Four alternative financings, assuming four different levels of State subordinated funding, are illustrated in Appendix C, based upon the assumptions set forth in Appendix B. The estimated average cost per KWH for each alternative are set forth below:

		Estimated Average Cost per KWH			
		(1985)	(1986)	(1991)	(1996)
I.	No State Loan*	14.6¢	15.1¢	14.8¢	16.2¢
II.	$10,000,000 State Loan	13.5¢	13.9¢	14.1¢	14.4¢
III.	$18,000,000 State Loan	12 6¢	12.9¢	13.5¢	13.9¢
iV.	$25,000,000 State Loan	11.8¢	12.1¢	13.0¢	13.6¢

* Without a State loan, the actual interest rate would probably be higher than the assumed rate, thus resulting in electric costs higher than the estimates set forth here.

The above estimates do not include the positive effects of any sale of power to LPK. Although the actual cost per KWH will decrease if LPK purchases power from KPU, the relative cost impact of a State loan is validly illustrated above. Negotiations between KPU and LPK for the purchase of both firm power and surplus power should commence in late February or early March.

The assumptions used to derive the above cost estimates (set forth in more detail in Appendix B) are, in our opinion, conservative but realistic. Conservatism is required in any analysis involving the question of financeability. Any changes in the assumptions will have a material effect on the projections. In particular, the assumptions as to future KPU System demand, the levels of inflation of construction costs and operating expenses and the terms of the State loan yet to be determined are all assumptions that have a material bearing on the results.

SUMMARY AND CONCLUSION

The Project appears to be needed by the City of Ketchikan in order to discontinue its present reliance on diesel electric generation and to meet its future power needs. The Project appears to be technically and economically feasible. The excess capacity of the Project in its early years will increase electric costs during that period, thus possibly resulting in a more difficult and higher interest rate financing. Although some of that excess capacity may be used to produce power to sell to a single large purchaser, a State loan will mitigate the adverse cost effects of excess capacity if repayment of the loan is delayed until full capacity is reached.

We therefore recommend that an $18,000,000 State loan in support of the Project be authorized. We believe that an $18,000,000 loan is justified in light of the following:

(1) Without State assistance, the Project could not be financed in our opinion without suffering a penalty in interest rate, thus increasing the electric rate burden of the Ketchikan consumer.

(2) The $18,000,000 recommended loan amount approximates the Project funding requirements during the first year of construction. The loan would provide timing flexibility for the revenue bond financing, thus enhancing APA's ability to obtain the lowest possible interest rate.

(3) State assistance in the form of an $18,000,000 subordinated loan would strengthen the overall Project financing, thus increasing the assurance of repayment of both the APA revenue bonds and the State loan.

Re: Swan Lake Hydroelectric Project (Ketchikan, Alaska)

Dear Mr. Jackson:

We have, at your request, conducted an assessment of the current status of the Swan Lake Hydroelectric Project. We are pleased to present herewith our findings.

* * * * *

BACKGROUND

The proposed Swan Lake Project is located in a remote area some 22 air miles northeast of Ketchikan near the north end of Carroll Inlet. Swan Lake is a low-elevation lake surrounded by mountains which drains westward through Falls Creek into Carroll Inlet.

The Project's arrangement will be:

- 190 foot-high thin-arch concrete dam one mile downstream from the outlet of Swan Lake
- 2,280 foot long concrete-lined power tunnel
- Permanent port facility
- One mile of access roads connecting the port facility, powerhouse, and dam
- 30.5 miles of 115KV wood pole transmission line.

The project will have an installed capacity of 22 MW and a dependable capacity of 18 MW. Average and firm annual energy

capability is 85.4 and 66.7 GWH, respectively.

The scheduled date for commercial operation is November, 1983; total project capital requirements are estimated at $85,690,000, including direct construction costs, contingencies, engineering/administrative costs, interest during construction, and escalation.

CITY OF KETCHIKAN (KETCHIKAN PUBLIC UTILITIES)

The City of Ketchikan has a population of some 8,600. Ketchikan Public Utilities, the municipally-owned public utility system, supplies the electric, water, and telephone needs of the community. As is typical of most Southeast Alaska communities, Ketchikan is almost entirely self-sufficient in terms of public services.

Major commercial and industrial activities supporting the local economy include logging and wood processing, fishing, and tourism. Transportation and communication links with surrounding areas and regions outside Southeast Alaska are up-to-date and accessible.

The City recently decided to reduce its substantial reliance on oil-fired diesel electric generation, which now accounts for about half of total system needs. The Swan Lake output could, in large measure, displace this oil-based generation in the early years of its operation.

The City will require additional capacity by 1983-1984 to meet peak demand and reserve requirements, which is the time when the Swan Lake Project is scheduled to become operational.

FINANCING PLAN

The City has requested the assistance of the Alaska Power Authority in financing the Project through the issuance of revenue bonds, and the City is also seeking a State of Alaska loan. The amount of the State loan will have

substantial influence upon debt service and, therefore, upon the cost of energy. Preliminary calculations indicate that the difference in annual energy cost between the case of no State loan and one of $40 million is about 50%.

CURRENT STATUS

The Swan Lake Project has been the subject of numerous studies over the past quarter century, including efforts made by the U.S. Bureau of Reclamation, the Alaska District Corps of Engineers, and several engineering firms such as R. W. Beck and Associates. This latter organization concluded in a report of June 1978 that the project is technically and environmentally feasible.

Based upon our review of available information, and upon our field investigations to Ketchikan, Southeast Alaska (Petersburg, Wrangell, Juneau), and to the Project stie, we concur with these findings as to Project feasibility...in fact recent changes have tended to make the Project more attractive since definitive studies were conducted. There are two primary influences at work here:

- The cost of diesel fuel (now about 65¢ per gallon) is higher than envisaged and will continue to escalate at a greater rate than that of general inflation

- The Louisiana-Pacific Timber Products Plant in Ketchikan has expressed definite interest in negotiating for firm power from the Project.

The influence of the first of these is obvious; the higher-cost diesel fuel increases the estimated savings associated with the Project. The effects of firm power sales to the local paper products company are substantial, because in the early years of Project operation excess capacity exists. Thus, both influences work toward Project feasibility and reduced costs to customers, which is the most important measure or consideration.

Alaska is fortunate in many respects, not the least of which is its potential for other, future hydroelectric power development. The Alaska Power Administration is considering the possibility of constructing a D.C. transmission line from Juneau to Ketchikan via Wrangell and Petersburg, thus forming a Southeast Gird and making possible future sale of Snettisham power. This would be a back-up to the diesel sets at Petersburg, Wrangell, and Ketchikan, and, with other future hydro developments like Lake Grace, Lake Mahoney, and Tyee Lake, for example, economy interchange as well as reliability back-up would then be possible.

Much work remains to quantify the benefits associated with the strategic development of power supply for the whole of the Southeast, but the potential for benefit clearly exists.

We trust the foregoing is responsive to your needs for an assessment of the current status of Swan Lake. Should you have questions or require further detail, kindly so inform us.

Respectfully submitted,

BOOZ, ALLEN & HAMILTON Inc.

Griffith R. Morris

APPENDIX B

ASSUMPTIONS

1. Critical Dates:

   FERC license to be received July 1, 1980

   Revenue Bonds dated October 1, [illegible]

   Major construction contract awarded March 1, 1981

   Project becomes operational April 1, 1984

   Interest capitalized through October 1, 1984 payment

   First principal payment October 1, 1986

2. Calculation of estimated costs of construction:

Direct construction cost, estimated as of January, 1978		$47,682,000
Escalation @ 7% (38 months from January-1978 to March-1981)		10,570,000
		$58,252,000
Contingencies @ 15%		8,738,000
		$66,990,000
Engineering and Administration @ 12 1/2%		8,374,000
		$75,364,000
	SAY	$75,500,000(1)

3. Terms of State Loan:

   a) Loan dated October 1, 1980, although the loan could be issued as early as July 1, 1980
   b) Term of loan - 40 years, with principal amortization beginning October 1, 1996
   c) Interest rate - 3% annually, with an adjustment to an overall annual 7% rate from date of issue to maturity
   d) Interest capitalized at 3% for four years

(1) This number differs from the $85,690,000 total Project Capital Requirements estimate set forth on Page A-2 because interest during construction has been deleted from costs of construction and added to the financing cost.

4. Calculation of estimated operation and maintenance expenses:

			Rounded Estimates
Project Expenses(1) as of 1985		$ 873,000	
Other Electric Department Expenses:			
1978 Electric Dept. Expenses	$1,930,597 (2)		
1978 Diesel Operation Expenses	(815,001)(2)		
Net existing 1978 Expenses	1,115,596		
7 years escalation @ 10%	780,917		
1978 Existing Expenses (escalated)		1,896,513	
Total 1985 Operation & Maintenance Expenses		$2,769,513	$2,800,000
1 years escalation at 10%		276,951	
1986 escalated Expenses		$3,046,464	$3,000,000
5 years escalation at 7%		1,066,262	
1991 escalated Expenses		$4,112,726	$4,100,000
5 years escalation at 7%		1,439,454	
1996 escalated Expenses		$5,552,180	$5,600,000

5. The annual sales of KWH by KPU are assumed to be as follows:

Year	Estimated KWH Sales
1985	96,343,000(1)
1986	99,026,000(1)
1991	108,494,000(1)
1996	118,000,000

6. The City of Ketchikan is assumed to have annual debt service requirements of $1,275,000 on the City's presently outstanding utility revenue bonds.

(1) Source: R. W. Beck and Associates
(2) Source: City of Ketchikan, Annual Financial Report, December 31, 1978

APPENDIX C

ALTERNATIVE 1
(NO State Loan)

1. Use of proceeds:

Costs of Construction	$75,500,000	
Less. Interest earnings during Construction	(22,500,000)	
Less: State loan proceeds	-0-	
Construction Funds from Bond Proceeds		$ 53,000,000
Capitalized Interest (4 yrs. @ 8.5%)		36,380,000
Reserve Fund		9,630,000
Contingency Fund		4,780,000
Costs of Issuance		3,210,000
		$107,000,000

2. a) Calculation of cost per KWH, first full year of operation (1985):

Debt Service Requirements, APA Contract Revenue Bonds	$ 9,095,000
25% Coverage	2,273,750
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	-0-
Operation and Maintenance Expenses	2,800,000
Less: Interest earnings on Reserve and Contingency Funds	(1,368,950)
Gross Revenues Required	$ 14,074,800

b) Calculation of projected average electric cost:
$14,074,800 ÷ 96,343,000 KWH = 14.6¢/KWH

3. a) Calculation of cost per KWH, second full year of operation (1986):

Debt Service Requirements, APA Contract Revenue Bonds	$ 9,650,000
25% Coverage	2,412,500
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	-0-
Operation and Maintenance Expenses	3,000,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,368,950)
Gross Revenues Required	$ 14,968,550

b) Calculation of projected average electric cost:
$14,968,550 ÷ 99,026,000 KWH = 15.1¢/KWH

4. a) Calculation of cost per KWH, seventh year of operation (1991-first year of full interest payment on State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 9,650,350
25% Coverage	2,412,587
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	-0-
Operation and Maintenance Expenses	4,100,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,368,950)
Gross Revenues Required	$ 16,068,987

b) Calculation of projected average electric cost:
$16,068,987 ÷ 108,494,000KWH — 14.8¢/KWH

5. a) Calculation of cost per KWH, twelfth year of operation (1996-first year of amortization of State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 9,650,000
25% Coverage	2,412,506
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	-0-
Operation and Maintenance Expenses	5,600,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,368,950)
Gross Revenues Required	$ 17,568,556

b) Calculation of projected average electric cost:
$17,568,556 ÷ 108,494,000 KWH — 16.2¢/KWH

$ 107,000,000.

(1) INTEREST CALCULATED AT 8.500%
(2) Capitalized Interest

ALTERNATIVE II
($10,000,000 Loan)

1. Use of proceeds:

Costs of Construction	$75,500,000	
Less: Interest Earnings during Construction	(21,000,000)	
Less: State loan proceeds	(8,800,000)*	
Construction Funds from Bond Proceeds		$ 45,700,000
Capitalized Interest (4 yrs. @ 8.5%)		31,450,000
Reserve Fund		8,413,000
Contingency Fund		4,162,000
Costs of Issuance		2,775,000
		$ 92,500,000

* Net of $1,200,000 Capitalized Interest

2. a) Calculation of cost per KWH, first full year of operation (1985):

Debt Service Requirements, APA Contract Revenue Bonds	$ 7,858,250
25% Coverage	1,964,562
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	300,000
Operation and Maintenance Expenses	2,800,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,194,625)
Gross Revenues Required	$ 13,003,187

b) Calculation of projected average electric cost:
$13,003,187 ÷ 96,343,000 KWH = 13.5¢/KWH

3. a) Calculation of cost per KWH, second full year of operation (1986):

Debt Service Requirements, APA Contract Revenue Bonds	$ 8,338,250
25 % Coverage	2,084,562
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State Loan	300,000
Operation and Maintenance Expenses	3,000,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,194,625)
Gross Revenues Required	$ 13,803,187

b) Calculation of projected average electric cost:
$13,803,187 ÷ 99,026,000 = 13.9¢/KWH

4. a) Calculation of cost per KWH, seventh year of operation (1991-first year of full interest on State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 8,336,425
25% Coverage	2,084,106
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	700,000
Operation and Maintenance Expenses	4,100,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,194,625)
Gross Revenues Required	$ 15,300,906

b) Calculation of projected average electric cost:
$15,300,906 ÷ 108,494,000 KWH = 14.1¢/KWH

5. a) Calculation of cost per KWH, twelfth year of operation (1996-first year of State Loan Amortization)

Debt Service Requirements, APA Contract Revenue Bonds	$ 8,338,050
25% Coverage	2,084,512
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	860,000
Operation and Maintenance Expenses	5,600,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,194,625)
Gross Revenues Required	$ 16,962,937

b) Calculation of projected average electric cost:
$16,962,937 ÷ 118,000,000 KWH = 14.4¢/KWH

$ 92,500,000.

ALTERNATIVE III
($18,000,000 Loan)

1. Use of Proceeds:

Costs of Construction	$75,500,000	
Less: Interest Earnings during Construction	(20,000,000)	
Less: State loan proceeds	(15,840,000)*	
Construction Funds from Bond Proceeds		$ 39,660,000
Capitalized Interest (4 yrs. @ 8.5%)		27,200,000
Reserve Fund		7,140,000
Contingency Fund		3,600,000
Costs of Issuance		2,400,000
		$ 80,000,000

* Net of $2,160,000 Capitalized Interest

2. a) Calculation of cost per KWH, first full year of operation (1985):

Debt Service Requirements, APA Contract Revenue Bonds	$ 6,800,000
25% Coverage	1,700,000
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	540,000
Operation and Maintenance Expenses	2,800,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,020,300)
Gross Revenues Required	$ 12,094,700

b) Calculation of projected average electric cost:
$12,094,700 ÷ 96,343,000 — 12.6¢/KWH

3. a) Calculation of cost per KWH, second full year of operation (1986):

Debt Service Requirements, APA Contract Revenue Bonds	$ 7,215,000
25% Coverage	1,803,750
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	540,000
Operation and Maintenance Expenses	3,000,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,020,300)
Gross Revenues Required	$ 12,813,450

b) Calculation of projected average electric cost:
$12,813,450 ÷ 99,026,000 — 12.9¢/KWH

4. a) Calculation of cost per KWH, seventh year of operation (19[illegible]-first year of full interest payment on State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 7,215,900
25% Coverage	1,803,975
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State Loan	1,260,000
Operation and Maintenance Expenses	4,100,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,020,300)
Gross Revenues Required	$ 14,634,575

b) Calculation of projected average electric cost:
$14,634,575 ÷ 108,494,000 = 13.5¢/KWH

5. a) Calculation of cost per KWH, twelfth year of operation (1996-first year of amortization of State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 7,215,350
25% Coverage	1,803,837
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State Loan	1,545,000
Operation and Maintenance Expenses	5,600,000
Less: Interest Earnings on Reserve and Contingency Funds	(1,020,300)
Gross Revenues Required	$ 16,418,887

b) Calculation of projected average electric cost:
$16,418,887 ÷ 118,000,000 KWH = 13.9¢/KWH

$ 80,000,000.

ALTERNATIVE IV
($25,000,000 State Loan)

1. Use of proceeds:

Costs of Construction	$75,500,000	
Less: Interest earnings during Construction	(19,000,000)	
Less: State loan proceeds	(22,000,000)*	
Construction Funds from Bond Proceeds		$ 34,500,000
Capitalized Interest (4 yrs. @ 8.5%)		23,800,000
Reserve Fund		6,450,000
Contingency Fund		3,150,000
Costs of Issuance		2,100,000
		$ 70,000,000

*Net of $3,000,000 Capitalized Interest

2. a) Calculation of cost per KWH, first full year of operation (1985):

Debt Service Requirements, APA Contract Revenue Bonds	$ 5,950,000
25% Coverage	1,487,500
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	750,000
Operation and Maintenance Expenses	2,800,000
Less: Interest earnings on Reserve and Contingency Funds	(912,000)
Gross Revenues Required	$ 11,350,500

b) Calculation of projected average electric cost:
$11,350,500 ÷ 96,343,000 KWH = 11.8¢/KWH

3. a) Calculation of cost per KWH, second full year of operation (1986):

Debt Service Requirements, APA Contract Revenue Bonds	$ 6,315,000
25% Coverage	1,578,750
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	750,000
Operation and Maintenance Expenses	3,000,000
Less: Interest earnings on Reserve and Contingency Funds	(912,000)
Gross Revenues Required	$ 12,006,750

b) Calculation of projected average electric cost:
$12,006,750 ÷ 99,026,000 KWh = 12.1¢/KWH

4. a) Calculation of cost per KWH, seventh year of operation (1991-first year of full interest payment on State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 6,311,400
25% Coverage	1,577,850
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	1,750,000
Operation and Maintenance Expenses	4,100,000
Less: Interest earnings on Reserve and Contingency Funds	(912,000)
Gross Revenues Required	$ 14,102,250

b) Calculation of projected average electric cost:
$14,102,250 ÷ 108,494,000 KWH = 13.0¢/KWH

5. a) Calculation of cost per KWH, twelfth year of operation (1996-first year of amortization of State loan)

Debt Service Requirements, APA Contract Revenue Bonds	$ 6,311,000
25% Coverage	1,577,750
Debt Service Requirements, Utility System Revenue Bonds	1,275,000
Debt Service Requirements, State loan	2,145,000
Operation and Maintenance Expenses	5,600,000
Less: Interest earnings on Reserve and Contingency Funds	(912,000)
Gross Revenues Required	$ 15,996,750

b) Calculation of projected average electric cost:
$15,996,750 ÷ 118,000,000 KWH = 13.6¢/KWH

$ 70,000,000.

RE: TYEE LAKE HYDROELECTRIC PROJECT

Dear Eric:

At your request, we have described the proposed plan of finance of the above-captioned Project, addressing the question of State funding assistance and its impact on financeability of the Project.

We have reviewed the various engineering reports published on the Project. We have consulted with Wohlforth & Flint, bond counsel, with representatives of the Thomas Bay Power Commission and the Cities of Petersburg and Wrangell.

We are pleased to submit herewith our report. We are available at your convenience to discuss this report with representatives of the State, the Authority, Thomas Bay Power Commission and other interested parties.

Very truly yours,

FIRST SOUTHWEST COMPANY

Paul N. Arnett, Resident Manager
Anchorage, Alaska

John I. Hinton, Vice President
Dallas, Texas

INTRODUCTION

The Thomas Bay Power Commission, having made the decision to discontinue its reliance on the use of diesel electric generation to meet existing and future power demands, has requested the assistance of the Alaska Power Authority (the "APA") in the financing and construction of the Tyee Lake Hydroelectric Project (the "Project") as a capital project of the State. The Thomas Bay Power Commission is composed of the Cities of Petersburg and Wrangell (the "Cities").

This report is a preliminary analysis of four alternatives containing various combinations of State funding and revenue bond funds. The impact of each alternative on electric costs has been estimated, based upon certain assumptions set forth in the report.

THE PROJECT

The Project is a major hydroelectric generating facility located at Tyee Lake, approximately 40 miles southeast of the City of Wrangell, Alaska. Tyee Lake is a natural lake perched 1,370 feet above the Bradfield Canal.

The Project,Stage 1 of two stages, consists of a ten foot diameter unlined tunnel, 6,785 feet in length, between Tyee Lake and Bradfield Canal, a gate shaft and gate, a surge tank, a steel penstock, a powerhouse containing two 10,000 KW impulse turbine-generator sets and a 115 KV transmission line approximately 83 miles in length connecting the Project with the Cities of Wrangell and Petersburg. (See Figure 1.) Stage 2 (a potential future addition) consists in large part of the addition of a dam.

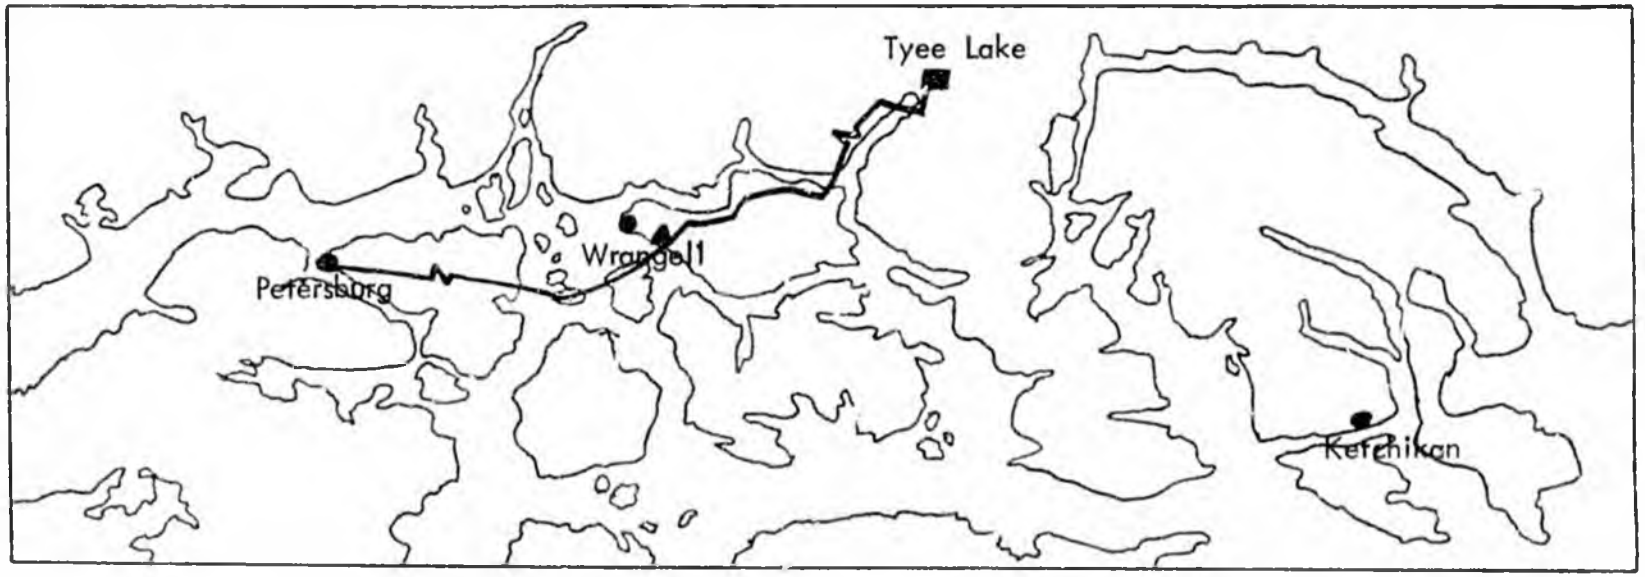

Figure 1

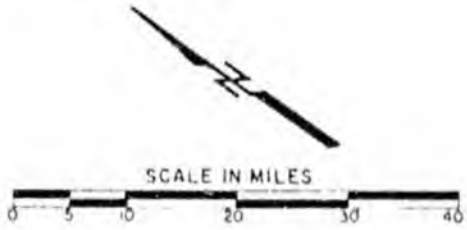
Petersburg-Wrangell-Ketchikan Area
Location Map



PETERSBURG-WRANGELL-KETCHIKAN AREA

The Project is designed to have an installed capacity of 20,000 KW and a firm capacity of 8,900 KW. It is designed to be capable of delivering 114,100,000 KWH average annual energy and 75,200,000 KWH of firm annual energy.

Robert W. Retherford Associates, a division of International Engineering Company, Inc., concluded in their Definite Project Report dated December, 1979, that the Project "is the most economical means by which the Cities can meet the immediate and future energy requirements of their service areas".

Although the Project output is not expected to be fully utilized for 11 years, the Cities will derive long term benefits from the Project by replacing their diesel generating facilities with power from relatively fixed cost hydroelectric facilities.

THE CITIES

The City of Petersburg, a community located in Southeast Alaska, has a current population of approximately 3,200. Petersburg has a total of 7,630 KW installed capacity, 79% of which is diesel generation and 21% of which is hydroelectric generation. During the year ended December 31, 1979, Petersburg sold approximately 19,600,000 KWH and has experienced a load growth of approximately 4.7% per year over the last five years.

The City of Wrangell, located approximately 32 miles from Petersburg, has a current population of approximately 3,200. Wrangell has a total of 7,750 KW primary installed capacity, all of which is diesel generation. During the year ended December 31, 1979, Wrangell sold approximately 11,600,000 KWH and has experienced a load growth of

approximately 5% per year over the last five years.

PROPOSED PLAN OF FINANCE

It is proposed that APA revenue bonds be issued pursuant to an Indenture of Trust between APA and a trustee bank. From the proceeds of this bond issue and a proposed subordinated State loan, the Project would be constructed. APA would own and operate the Project and sell power to the Cities pursuant to a Wholesale Power Sales Agreement. APA would covenant to set its wholesale rates at the level projected to be necessary to generate gross revenues at least equal to (a) 1.25 times debt service on the Bonds, (b) projected operation and maintenance expenses of the Project, and (c) debt service requirements of the State loan. The funds the APA generates from the 25% coverage requirement would be used for improvements and extensions of the Project and to provide funds that could be used to redeem the APA revenue bonds (thus lowering future debt service requirements).

A Reserve Fund equal to average annual debt service requirements and a Contingency Fund equal to 6 months average annual debt service requirements would be capitalized from bond proceeds. The Contingency Fund could be used to pay extraordinary repairs and maintenance on the Project and, if needed, to pay debt service on the Bonds. Both funds would have to be replenished if drawn upon.

The Bonds would be amortized over 40 years with the Revenue and Contingency Funds being used to pay the last 18 months' debt service.

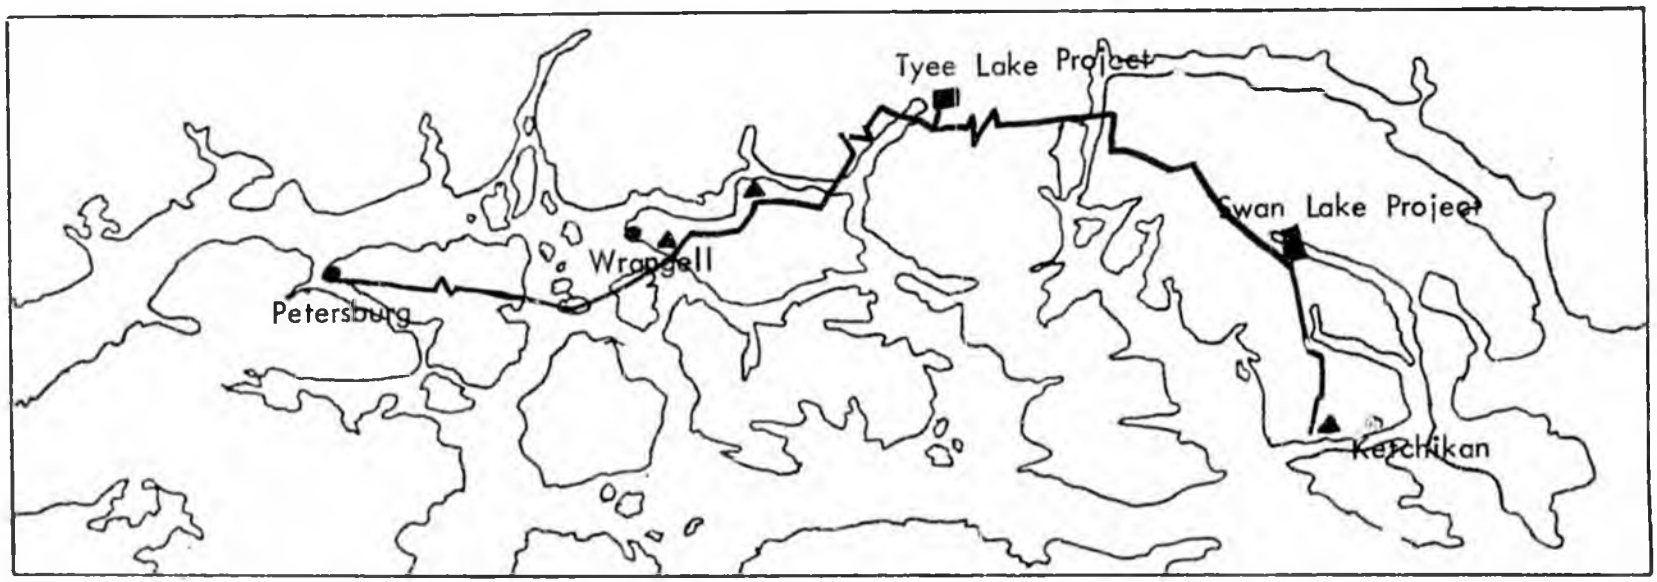
THE NEED FOR STATE ASSISTANCE

The need for State assistance arises when the Project is reviewed from the standpoint of financeability. The long term economic feasi-

bility of the Project appears to be established in that diesel fuel prices are expected to continue rising over time while the costs of capital intensive hydroelectric generating facilities are relatively fixed. The most critical concern in terms of ability to finance the Project in the tax-exempt bond market is the substantial excess capacity that may exist in the early years of Project operation and its adverse effects on electric costs in the short run. In the first full year of Project operation (1985), its firm energy of 75,200,000 KWH will result in significant excess capacity relative to the projected 33,726,000 KWH of energy from diesel generation which the Project would displace in that year. Thus, rates must be increased to the extent necessary to satisfy the debt service requirements attributable to this 41,474,000 annual KWH excess. Although high electric rates are certainly undesirable from the personal financial standpoint of the Petersburg/Wrangell consumer, they also increase the bond market's perceived risk of an obligation in that economic growth in the area may be retarded.

There are three significant factors which together may lessen the adverse effect of excess capacity on the Cities' electric costs. The first factor is the possible sale of a block of power in the distant future to Ketchikan Public Utilities ("KPU"). This sale could only occur after terms of the sale are negotiated following elimination of excess capacity in the Swan Lake Project and after a transmission line is constructed between the three electric systems (see fig. 2). The sale, in any case, could only assist the Project in the long run.

The second factor is the potential increased demand from conversion of oil-fired residential heating in the Cities to the use of electric



Petersburg-Wrangell-Ketchikan Area
Location Map

SCALE IN MILES
0 5 10 20 30 40

PETERSBURG-WRANGELL-KETCHIKAN AREA

Figure 2

heatpumps. The extent and timing of such conversion cannot now be projected.

The third factor which ameliorates the adverse cost effects of excess capacity is a loan from the State, repayment of which would not be required until after full capacity is reached. State assistance in the form of a subordinate loan is justified in that the ability to obtain conventional financing for the Project under reasonable terms is enhanced. The State loan would lower electric rates in the following ways:

(1) Interest payments on the loan would be partially deferred and principal repayment fully deferred until full capacity is attained, thereby minimizing the adverse rate effects of excess capacity in the early years of Project operation.

(2) The loan is subordinated to the APA revenue bonds, thus enabling the APA to obtain a more favorable interest rate than would otherwise be possible.

(3) The 25% debt service coverage requirement would not be applied to the loan debt service requirements, thus resulting in significant rate relief.

The terms of the loan as proposed approximate the terms of the Sitka-Green Lake loan and are described in more detail in Appendix B. The assumed 7% interest rate approximates the State's own cost of borrowing. Although the actual interest rate could range from 5% to 7%, the more conservative rate was used in the analysis.

ANALYSIS OF STATE FUNDING ALTERNATIVES

Four alternative financings, assuming four different levels of State subordinated funding, are illustrated in Appendix B, based upon

the assumptions set forth in Appendix A. The estimated average wholesale cost per KWH for each alternative are set forth below:

		Estimated Average Cost per KWH (1985)	(1986)	(1991)	(1996)
I.	Nc State Loan*	20.7¢	20.2¢	14.4¢	12.0¢
II.	$ 5,000,000 State Loan	19.0¢	18.7¢	13.7¢	11.8¢
III.	$10,000,000 State Loan	17.4¢	17.1¢	13.0¢	11.6¢
IV.	$15,000,000 State Loan	15.8¢	15.5¢	11.0¢	9.7¢

The estimated average retail cost per KWH for each alternative and for each city are calculated in Appendix C and set forth below:

Petersburg

		Estimated Average Cost per KWH (1985)	(1986)	(1991)	(1996)
I.	No State Loan*	16.1¢	16.4¢	14.2¢	13.2¢
II.	$ 5,000,000 State Loan	15.1¢	15.5¢	13.7¢	13.0¢
III.	$10,000,000 State Loan	14.1¢	14.5¢	13.1¢	12.9¢
IV.	$15,000,000 State Loan	13.2¢	13.5¢	11.7¢	11.4¢

Wrangell

		Estimated Average Cost per KWH (1985)	(1986)	(1991)	(1996)
I.	No State Loan*	24.7¢	24.2¢	18.8¢	16.8¢
II.	$ 5,000,000 State Loan	23.1¢	22.6¢	18.0¢	16.6¢
III.	$10,000,000 State Loan	21.5¢	21.0¢	17.3¢	16.1¢
IV.	$15,000,000 State Loan	19.9¢	19.4¢	15.3¢	14.5¢

*Without a State loan, the actual interest rate would be higher than the assumed rate, thus resulting in electric costs higher than the estimates set forth here.

The retail costs for Petersburg are materially lower than the Wrangell costs because of the low cost of hydroelectric facilities presently existing in Petersburg. Although all of the above cost estimates appear high, they are reasonable in comparison to future diesel generated energy if the price of diesel fuel continues to increase faster than the rate of inflation.

The assumptions used to derive the above cost estimates (set forth in more detail in Appendix A) are, in our opinion, conservative but realistic. Conservatism is required in any analysis involving the question of financeability. Any changes in the assumptions will have a material effect on the projections. In particular, the assumptions as to future Petersburg/Wrangell demand, the levels of inflation of construction costs and operating expenses and the terms of the State loan yet to be determined are all assumptions that have a material bearing on the results.

SUMMARY AND CONCLUSION

The Project appears to be needed by the Cities of Petersburg and Wrangell in order to discontinue their present reliance on diesel electric generation and to meet their future power needs. The Project appears to be technically and economically feasible. The excess capacity of the Project in its early years will increase electric costs during that period, thus raising the question of financeability. Although some of that excess capacity may be used to produce power to sell to Ketchikan Public Utilities at some time in the distant future and some conversion of oil-fired residential heating to electric heatpumps may occur, a State loan will mitigate the adverse cost effects of excess capacity if repayment of the loan is delayed until full capacity is reached.

We therefore recommend that at the very minimum a $10,000,000 State loan in support of the Project be authorized and that serious consideration be given to a $15,000,000 or greater loan amount to insure a more favorable financing in light of the high electric costs during the early years of Project operation. We believe that a large State loan is justified in light of the following:

(1) Without substantial State assistance, the Project, in our opinion, cannot presently be financed in the tax-exempt bond market at a reasonable rate of interest.

(2) A large loan would provide funding for the Project during the early stages of the construction period. The loan would provide timing flexibility for the revenue bond financing, thus enhancing APA's ability to obtain the lowest possible interest rate.

(3) State assistance in the form of a large subordinated loan would strengthen the overall Project financing, thus increasing assurance of repayment of both the APA revenue bonds and the State loan.

APPENDIX A

ASSUMPTIONS

1. Critical Dates:

   FERC license to be received April 1, 1981

   Revenue bonds dated May 1, 1981

   Logging camp removed June 1, 1981

   Major construction contract awarded October 1, 1981

   Project becomes operational January 1, 1984

   Interest capitalized through November 1, 1984

   First principal payment May 1, 1986

2. Calculation of estimated costs of construction:

Direct construction cost, estimated as of January 1, 1980, including engineering costs and contingencies	$39.590,000 (1)	
Escalation @ 7% (21 months from January, 1980 to October, 1981)	4,839,775	
	$44.429,775	
SAY	$45,000,000 (2)	

3. Terms of State Loan:

   a) Loan dated May 1, 1981
   b) Term of loan - 40 years, with principal amortization beginning May 1, 1996
   c) Interest rate - 3% annually, with an adjustment to an overall annual 7% rate from date of issue to maturity
   d) Interest capitalized at 3% for 3½ years

---

(1) Source: Robert W. Retherford Associates
(2) This number differs from the $53,333,000 set forth on page 7-2 of the Definite Project Report because interest during construction has been deleted from costs of construction and added to the financing costs and inflation escalation of Project costs was assumed to cease following award of the major construction contract .

4. Calculation of estimated Project operation and maintenance expenses:

Estimated expenses as of January 1, 1980	$ 700,000 (1)
5 years escalation @ 10%	350,000
1985 operating expenses	$1,050,000
1 year escalation @ 10%	105,000
1986 operating expenses	$1,155,000
5 years escalation @ 7%	404,250
1991 operating expenses	$1,559,250
5 years escalation @ 7%	545,738
1996 operating expenses	$2,104.988

5. a. Calculation of Petersburg estimated other operation and maintenance expenses:

		Rounded Estimates
1979 Electric Utility Fund operating expenses	$1,052,129	
1979 diesel fuel expenses	(431,487)	
Net existing 1979 expenses	$ 620,642	
6 years escalation @ 10%	372,389	
1985 operating expenses	$ 993,031	$1,000,000
1 year escalation @ 10%	99,304	
1986 operating expenses	$1,092,335	$1,100,000
5 years excalation @ 7%	382,319	
1991 operating expenses	$1,474,654	$1,500,000
5 years escalation @ 7%	516,131	
1996 operating expenses	$1,990,785	$2,000,000

(1) Source: Robert W. Retherford Associates

b. Calculation of Wrangell estimated other operation and maintenance expenses:

		Rounded Estimates
1979 Electric Utility Fund operating expenses	$ 818,549	
1979 diesel fuel expenses and purchased power	(461,134)	
Net existing 1979 expenses	$ 357,415	
6 years excalation @ 10%	214,449	
1985 operating expenses	$ 571,864	$ 600,000
1 year escalation @ 10%	57,186	
1986 operating expenses	$ 629,050	$ 600,000
5 years escalation @ 7%	220,168	
1991 operating expenses	$ 849,218	$ 800,000
5 years escalation @ 7%	297,226	
1996 operating expenses	$1,146,444	$1,100,000

6. The annual KWH sales to the Cities are assumed to be as follows:

Year	Estimated Petersburg KWH Purchases (1)	Estimated Wrangell KWH Purchases (2)
1985	17,326,000	16,400,000
1986	19,866,000	16,950,000
1991	34,426,000	20,100,000
1996	45,806,000	24,300,000

7. The Cities of Petersburg and Wrangell are assumed to have annual debt service requirements (including coverage) on their presently outstanding electric utility revenue bonds of $179,000 and $68,000, respectively. (3)

(1) Robert W. Retherford Associates estimates adjusted for 12,404,000 KWH of energy expected to be produced from Petersburg's existing hydroelectric facilities

APPENDIX B

ALTERNATIVE I
(No State Loan)

1. Use of proceeds:

Costs of construction	$45,000,000	
Less: interest earnings during construction	(11,000,000)	
Less: State loan proceeds	-0-	
Construction funds from bond proceeds		$34,000,000
Capitalized interest (3 1/2 years)		18,891,000
Reserve fund (1 yr.)		5,802,000
Contingency fund		2,902,000
Costs of issuance (3%)		1,905,000
		$63,500,000

2. a) Calculation of gross revenues required for Project financing, first full year of operation (1985):

5.7m/yr. amortized

Debt service requirements, APA Contract Revenue Bonds	$ 5,397,500
25% coverage	1,349,375
Debt service requirements, State loan	-0-
Project expenses	1,050,000
Less: interest earnings on Reserve and Contingency Funds	(826,800)
Gross revenues required	$ 6,970,075

Calculation of projected average wholesale electric cost: $6,970,075 ÷ 33,726,000 = 20.7¢/KWH

b) Calculatior of gross revenues required for Project financing, second full year of operation (1986):

Debt service requirements, APA Contract Revenue Bonds	$ 5,699,113
25% coverage	1,424,778
Debt service requirements, State loan	-0-
Project expenses	1,155,000
Less: interest earnings on Reserve and Contingency Funds	(826,800)
Gross revenues required	$ 7,452,091

Calculation of projected average wholesale electric cost: $7,452,091 ÷ 36,816,000 = 20.2¢/KWH

c) Calculation of cost per KWH, sixth year of operation (1991)- first year of full interest payments on state loan:

Debt service requirements, APA Contract Revenue Bonds	$ 5,706,563
25% coverage	1,426,641
Debt service requirements, State loan	-0-
Operation & Maintenance expenses	1,559,250
Less: interest earnings on Reserve and Contingency Funds	(826,800)
Gross revenues required	$ 7,865,654

Calculation of projected average wholesale electric cost: $7,865,654 ÷ 54,526,000 = 14.4¢ /KWH

d) Calculation of cost per KWH, 11th year of operation (1996) - first year of amortization of State loan principal:

Debt service requirements, APA Contract Revenue Bonds	$ 5,396,038
25% coverage	1,424,010
Debt service requirements, State loan	-0-
Operation and maintenance expenses	2,104,988
Less: interest earnings on Reserve and Contingency Funds	(826,800)
Gross revenues required	$ 8,398,236

Calculation of projected average wholesale electric cost: $8,398,236 ÷ 70,106,000 KWH = 12.0¢/KWH

$ 63,500,000.

ALTERNATIVE II
($5,000,000 State Loan)

1. Use of proceeds:

Costs of construction	$45,000,000	
Less: interest earnings during construction	(10,500,000)	
Less: State loan proceeds	(4,475,000)	
Construction funds from bond proceeds		$30,025,000
Capitalized interest (3 1/2 years)		16,660,000
Reserve fund		5,090,000
Contingency fund		2,545,000
Costs of issuance		1,680,000
		$56,000,000

2. a) Calculation of gross revenues required for Project financing, first full year of operation (1985):

Debt service requirements, APA Contract Revenue Bonds	$ 4,760,000
25% coverage	1,190,000
Debt service requirements, State loan	150,000
Project expenses	1,050,000
Less: interest earnings on Reserve and Contingency Funds	(725,325)
Gross revenues required	$ 6,424,675

Calculation of projected average wholesale electric costs: $6,424,675 ÷ 33,726,000/KWH = 19.0¢/KWH

b) Calculation of gross revenues required for Project financing, second full year of operation (1986):

Debt service requirements, APA Contract Revenue Bonds	$ 5,037,675
25% coverage	1,259,419
Debt service requirements, State loan	150,000
Project expenses	1,155,000
Less: interest earnings on Reserve and Contingency Funds	(725,325)
Gross revenues required	$ 6,876,769

Calculation of projected average wholesale electric costs: $6,876,769 ÷ 36,816,000/KWH = 18.7¢/KWH

c) Calculation of cost per KWH, sixth year of full interest payments on State loan:

Debt service requirements, APA Contract Revenue Bonds	$ 5,030,738
25% coverage	1,257,685
Debt service requirements, State loan	350,000
Operation and Maintenance expenses	1,559,250
Less: interest earnings on Reserve and Contingency Funds	(725,325)
Gross revenues required	$ 7,472,348

Calculation of projected average wholesale electric costs: $7,472,348 ÷ 54,526,000 KWH = 13.7¢/KWH

d) Calculation of cost per KWH, 11th year of operation (1996 first year of amortization of State loan principal):

Debt service requirements, APA Contract Revenue Bonds	$ 5,021,238
25% coverage	1,255,310
Debt service requirements, utility system Revenue Bonds	
Debt service requirements, State loan	604,443
Operation and maintenance expenses	2,104,988
Less: interest earnings on Reserve and Contingency Funds	(725,325)
Gross revenues required	$ 8,260,654

Calculation of project average wholesale electric costs: $8,260,654 ÷ 70,106,000 KWH = 11.8¢/KWH

ALTERNATIVE III
($10,000,000 State Loan)

1. Use of proceeds:

Costs of construction	$45,000,000	
Less: interest earnings during construction	(10,000,000)	
Less: State loan proceeds	(8,950,000)	
Construction funds from bond proceeds		$26,050,000
Capitalized interest (3 1/2 years)		14,429,000
Reserve fund		4,378,000
Contingency fund		2,188,000
Costs of issuance		1,455,000
		$48,500,000

2. a) Calculation of gross revenues required for Project financing, first full year of operation (1985):

Debt service requirements, APA Contract Revenue Bonds	$ 4,122,500
25% coverage	1,030,625
Debt service requirements, State loan	300,000
Project expenses	1,050,000
Less: interest earnings on Reserve and Contingency Funds	(623,770)
Gross revenues required	$ 5,879,355

Calculation of projected average wholesale electric costs: $5,879,355 ÷ 33,726,000 = 17.4¢/KWH

b) Calculation of gross revenues required for Project financing, second full year of operation (1986):

Debt service requirements, APA Contract Revenue Bonds	$ 4,366,663
25% coverage	1,091,666
Debt service requirements, State loan	300,000
Project expenses	1,155,000
Less: interest earnings on Reserve and Contingency Funds	(623,770)
Gross revenues required	$ 6,289,559

Calculation of projected average wholesale electric costs: $6,289,559 ÷ 36,816,000 KWH = 17.1¢/KWH

c) Calculation of cost per KWH, sixth year of operation (1991 - first year of full interest payments on State loan):

Debt service requirements, APA Contract Revenue Bonds	$ 4,359,275
25% coverage	1,089,819
Debt service requirements, utility system Revenue Bonds	
Debt service requirements, State loan	700,000
Operation and maintenance expenses	1,559,250
Less: interest earnings on Reserve and Contingency Funds	(623,770)
Gross revenues required	$ 7,084,574

Calculation of projected average wholesale electric cost: $7,084,574 ÷ 54,526,000 KWH = 13.0¢/KWH

d) Calculation of cost per KWH, 11th year of operation (1996 first year of amortization of principal on State loan:

Debt service requirements, APA Contract Revenue Bonds	$ 4,350,375
25% coverage	1,087,594
Debt service requirements, Utility System Revenue Bonds	
Debt service requirements, State loan	1,208,886
Operation and maintenance expenses	2,104,988
Less: interest earnings on Reserve and Contingency Funds	(623,770)
Gross revenues required	$ 8,128,073

Calculation of projected average wholesale electric cost: $8,1238,073 ÷ 70,106,000 KWH = 11.6¢/KWH

$ 48,500,000.

ALTERNATIVE IV
($15,000,000 State Loan)

1. Use of proceeds:

Costs of construction	$45,000,000	
Less: interest earnings during construction	(9,500,000)	
Less: State loan proceeds	(13,425,000)	
Construction funds from bond proceeds		$22,075,000
Capitalized interest (3 1/2 years)		12,197,000
Reserve fund		3,665,000
Contingency fund		1,833,000
Costs of issuance		1,230,000
		$41,000,000

*Net of $1,575,000 capitalized interest. 89.5%

2. a) Calculation of gross revenues required for Project financing, first full year of operation (1985):

Debt service requirements, APA Contract Revenue Bonds	$ 3,485,000
25% coverage	871,250
Debt service requirements, State loan	450,000
Project expenses	1,050,000
Less: interest earnings on Reserve and Contingency Funds	(522,310)
Gross revenues required	$ 5,333,940

Calculation of projected average wholesale electric costs: $5,333,940 ÷ 33,726,000 KWH = 15.8¢/KWH

b) Calculation of gross revenues required for Project financing, second full year of operation (1986):

Debt service requirements, APA Contract Revenue Bonds	$ 3,695,650
25% coverage	923,913
Debt service requirements, State loan	450,000
Project expenses	1,155,000
Less: interest earnings on Reserve and Contingency Funds	(522,310)
Gross revenues required	$ 5,702,253

Calculation of projected average wholesale electric costs: $5,702,253 ÷ 36,816,000 KWH = 15.5¢/KWH

c) Calculation of cost per KWH, sixth year of operation (1991 - first year of full interest payments on State loan):

Debt service requirements, APA Contract Revenue Bonds	$ 3,683,875
25% coverage	920,969
Debt service requirements, Utility System Revenue Bonds	
Debt service requirements, State loan	350,000
Operation and maintenance expenses	1,559,800
Less: interest earnings on Reserve and Contingency Funds	(522,310)
Gross revenues required	$ 5,992,334

Calculation of projected average wholesale electric costs: $5,992,334 ÷ 54,526,000 KWH = 11.0¢/KWH

d) Calculation of cost per KWH, 11th year of operation (1996 - first year of amortization of principal on State loan):

Debt service requirements, APA Contract Revenue Bonds	$ 3,676,000
25% coverage	919,000
Debt service requirements, Utility System Revenue Bonds	
Debt service requirements, State loan	604,443
Operation and maintenance expenses	2,104,988
Less: interest earnings on Reserve and Contingency Funds	(522,310)
Gross revenues required	$ 6,782,121

Calculation of projected average wholesale electric costs: $6,782,121 ÷ 70,106,000 KWH = 9.7¢/KWH

$ 41,000,000.

14. Fiscal Note--Dept. of Revenue: requested by Osterback Re: Revenue Collection and Management

* Sec. . AS 43.75.130 is amended to read:

Sec. 43.75.130. REFUND TO LOCAL GOVERNMENTS. The commissioner of revenue shall pay to each organized borough, to [AND] each city, and to each municipality unified under AS 29.68.240 - 29.68. 40, 20 [OF THE FIRST CLASS 10] per cent of the amount of tax revenue collected in the municipality [BOROUGH OR CITY] from taxes levied by AS 43.75 [AS 43.75.010 - 43.75.-090]. If tax revenue is collected in a city within a borough, the department shall pay an amount equal to 10 per cent of the amount of revenue collected in the city within the borough to the city and the same amount to the borough.

* Sec. . AS 43.18 is amended by adding new sections to read:

ARTICLE 5. GRANTS FOR FISHERIES PROJECTS.

Sec. 43.18.500. GRANTS FOR FISHERIES PROJECTS. (a) The fisheries facilties grant account is established in the general fund. An amount to carry out the provisions of (b) of this section may be appropriated annually by the legislature to the account.

(b) Within the limits of legislative appropriations for this purpose, the commissioner may make grants to municipalities receiving shared fisheries tax revenues under AS 43.75.130. A grant provided under this section may not exceed 13 1/3 per cent of the amount of revenue collected in the municipality from the tax levied and collected under AS 43.75. The commissioner may make a grant to a municipality under this section only if the municipality demonstrates to the commissioner's satisfaction that the grant will be used on a fisheries project.

(c) In this section,

(1) "commissioner" means the commissioner of [ ];

(2) "fisheries project" means a dock or comparable facility which may be used for the transfer or transportation of fishery products, including all utilities necessary to service the project;

(3) "municipality" means a borough, home rule or general law city, or a municipality unified under AS 29.68.240 - 29.68.440;

MEMORANDUM TO: Rules Commictee

From: Secretary of the Senate

Subject: COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 132 (relating to fisheries taxes) - Conclusion on by Senace Judiciary Committee Chairman

President Tillion referred the above message to the Rules Committee this date.

Official Business

Senate

Committee on Judiciary

Pouch V
State Capitol
Juneau, Alaska 998

March 12, 1979

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature

Re: C SB 132

Dear Mr. President:

On March 9, 1979, you requested me, in my capacity as chairman of the Senate Judiciary committee, to review the captioned bill and to report to the Senate as to its constitutionality.

At the outset, I should state that the following comments are mine and mine alone; I do not profess to speak for the other members of the Judiciary committee. It should likewise be noted that I do not claim any special expertise in the field of constitutional law, nor have I had sufficient time to devote to the research which would ordinarily be entailed in analyzing this bill.

A close reading of CSSB 132 indicates two sections of the bill would run afoul of the Alaska Constitution. Those two are 43.75.136, providing for payments to the Commercial Fishing and Agriculture Bank, and 43.75.131, making increased refunds to local government.

Article IX, sec. 7 of the Alaska Constitution provides as follows:

> "The proceeds of any state tax or license shall not be dedicated to any special purpose except when required by the federal government for state participation in federal programs. This provision shall not prohibit the continuance of any dedication for special purposes existing upon the date of ratification of the constitution by the people of Alaska."

I was assisted in my efforts to check the constitutionality of the questioned sections of the bill by the opinions of two Attorneys General dated, respectively, April 4, 1969 and May 2, 1975. Both opinions not only considered the case law of this and other jurisdictions, sparse as it is, but they also reviewed the minutes of the Alaska Constitutional Convention and committees thereof. It is evident, in both these opinions, that the framers of our constitution did not want to have additional taxes earmarked or dedicated to special purposes.

A dedication of ten per cent of the fish tax existed at the time of the ratification of the Constitution, and the dedication clearly falls within the exemption. Problems arise when that ten per cent is increased, as in the instant bill, to thirty-three and one-third per cent. The issue of the constitutionality of increasing the percentage of an existing dedicated fund was not specifically addressed by either of the opinions reviewed. However, material contained in these opinions strongly suggests that increasing an existing dedicated fund was not intended by the Constitution.

It is equally clear that payments to the Commercial Fishing and Agriculture Bank and earmarking state tax revenue for the construction of docks, etc. by local governmental units would do violence to the Constitution of the State of Alaska.

The Attorney General's opinion of April 4, 1969 holds:

> "The proceeds of any state tax or license which must be shared with local governmental units are dedicated to a special purpose and are in violation of Article IX, sec. 7 of the Alaska Constitution."

The Attorney General's opinion of May 2, 1975 states:

> "Accordingly, it is our conclusion that the dedication of any source of public revenue: tax, license, rental, sale, bonus-royalty, royalty, or whatever is limited by the state Constitution to those existing when the Constitution was ratified or required for participation in federal programs."

Conclusion: CSSB 132, as written, is patently unconstitutional.

Respectfully submitted,

Ziegler

Robert H. Ziegler, Sr.
Chairman
Senate Judiciary Committee

Juneau, Alaska 99811

Re: CSSB 132 (FINANCE), relating to fish-processing taxes

Dear Senator Tillion:

In your letter of March 12, 1979, you requested that this office review AS 43.75.131 and 135 as proposed in the above-referenced bill in light of the comments of Senator Ziegler, Chairman, Senate Judiciary Committee, who raised substantial concerns regarding the constitutionality of these provisions under Article 9, Section 7 of the Alaska Constitution. That provision states:

> The proceeds of any state tax or license shall not be dedicated to any special purpose, except as provided in section 15 of this article or when required by the federal government for state participation in federal programs. This provision shall not prohibit the continuance of any dedication for special purposes existing upon the date of ratification of this section by the people of Alaska.

AS 43.75 130 and 135 in the present fish processing tax chapter presently provide that the "commissioner of revenue shall pay to each organized borough and each city of the first class [twenty percent] of the amount of tax revenue" collected under this chapter. Since § 130 was originally enacted in 1962 (§ 6, ch. 155, SLA 1962) and § 135 in 1963 (§ 1, ch. 89, SLA 1963) neither of the refund provisions qualify under the grandfather clause in the second sentence of the constitutional provision. This mandatory language ("shall pay") was carried over into the new proposal AS 43.75.131 which requires the following distributions:

SLH

DRAFT

It is the intent of this committee that the revenue shared with the local municipalities pursuant to AS 43.75.131 be used for docks and other fisheries related projects. It is believed that such improvements would operate as an incentive to the development of a bottomfishing industry in the state as well as to improve and further develop the fisheries currently being exploited. This committee recognizes that AS 43.75.131 and 136 merely reflect the policy of the current legislature and that future legislatures would be free to disregard the formula set forth therein. Future legislatures should examine the extent to which municipalities which have received these revenues have made reasonable efforts to meet the demand for fishery related facilities. If future legislatures find that needed fisheries development programs have not been implemented, the revenue sharing program reflected in AS 43.75.131 should be reevaluated.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

March 8, 1979

The Honorable Alvin Osterback
Co-Chairman
House Resource Committee
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Osterback:

You have requested the Department of Revenue look at fish tax receipts that would be collected if a tax rate based on the effective current canned salmon rate was applied uniformly.

The breakdown of revenues on the attached sheets is based on a tax rate of 4.45 percent. This rate was arrived at by taking the raw value of salmon used by canneries, $121,758,700 (based on Fish And Game Catch Estimates) and dividing it by the FY 1978 tax collected from canneries, $5,420,438.

The total amount of revenue that would be collected using a 4.45 percent rate would be $15,205,850. A further breakdown of this total is attached for your information.

Sincerely,

John R. Messenger
Acting Commissioner

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is estimated that this bill will raise an additional 12 million dollars and bring total fish tax collections to 20 million dollars. These collections will be split evenly among the general fund, revenue sharing to municipalities, and the commercial fishing and agriculture bank, until fully capitalized. It is estimated that revenue sharing to municipalities would be increased by about 4 million dollars as shown in the attached breakdown. It would also allow an annual appropriation to the commercial fishing and agriculture bank of approximately 7 million dollars. Revenue to the general fund would be increased by approximately 1 million dollars and then by a greater amount when the commercial fishing and agriculture bank is fully capitalized. A breakdown of the distribution of revenues is shown in the attached pages.

Alaska State Legislature

House of Representatives

Committee on

Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811

Official Business

Date: 4/3/79
TO: C&RA Committee
FROM: Rep. Bill Parker, Chairman
RE: CSSB 132 Relating to Fisheries Taxes

For your background information, below are listed the various versions of the section of SB 132 related to "refund to local governments."

Existing Law -- AS 43.75.130 Attached

Senate Bill No. 132 -- Original version introduced on 2/12/79 by Sen.Kerttula
Attached

CS SB132 -- Offered 3/8/79 by Community and Regional Affairs Committee

Sec. 43.75.131 REFUND TO LOCAL GOVERNMENTS. (a)The department shall pay to each borough, to each city of the first class, and to each municipality unified under AS 29.68.240 - 29.68.440, an amount equal to 33 1/3 per cent of the amount of tax revenue collected in the municipality from taxes levied in this chapter. In the case of tax revenue collected inside a city within a borough, the revenue to be shared shall be divided equally between the city and the borough.
(b) One-half of the revenue shared with a borough or city of the first class shall be used for docks or other fishery enhancement projects and those expenditures must be certified and reported to the department annually no later than January 30.

CS SB132 (Finance) Offered 3/12/79 by the Finance Committee

Same as in CS SB132 by C&RA (See above)

CS SB 132 (Rules) Offered 3/17/79 by the Rules Committee

Sec. 43.75.131 TAX SHARING WITH MUNICIPALITIES. The legislature may annually appropriate to each borough, to each city of the first class, and to each municipality unified under AS 29.68.240 - 29.68.440, an amount equal to 33 1/3 per cent of the amount of tax revenue collected in the municipality from taxes levied in this chapter. If tax revenue is collected in a city within a borough, the legislature may divide the tax revenue appropriated under this section between the city and the borough.

If a receiver, trustee, or assign is operating the property or business, he shall make the return for the person. A tax due on the basis of such return shall be collected in the same manner as if collected from the person of whose business he has custody and control. The requirements for time and place of payment of tax, and the obligation to keep records and make the records available to the commissioner of revenue are the same as those prescribed in the business license tax law for salmon canneries. (§ 2 ch 190 SLA 1959)

Sec. 43.75.120. Violations and penalties. (a) The liability to file returns and pay interest and deficiency assessments, and the subjection of property to liens is the same as prescribed in the business license tax law for salmon canneries.

(b) A violation of §§ 100 — 120 of this chapter or the regulations issued under §§ 100 — 120 of this chapter is a misdemeanor subject to punishment as prescribed in the business license tax law for salmon canneries. (§ 3 ch 190 SLA 1959)

Article 4. General Provisions.

Section
130. Refund to local governments
135. Additional refund to boroughs and cities

Sec. 43.75.130. Refund to local governments. The commissioner of revenue shall pay to each organized borough and each city of the first class 10 per cent of the amount of tax revenue collected in the borough or city from taxes levied by §§ 10 — 90 of this chapter. (§ 6 ch 155 SLA 1962; am § 75 ch 69 SLA 1970; am § 10 ch 218 SLA 1976)

Effect of amendment. — The 1976 amendment substituted "city of the first class" for "city of the first, second, and third classes."

Legislative committee report. — For report on ch. 69, SLA 1970 (HB 561), see 1970 House Journal Supplement No. 2, p. 7.

Sec. 43.75.135. Additional refund to boroughs and cities. In addition to the payment allowed in § 130 of this chapter the commissioner of revenue shall pay to each organized borough 10 per cent of the amount of tax revenue collected in the borough from taxes levied by §§ 10 — 90 of this chapter and shall pay to each city of the first class located in the unorganized borough 10 per cent of the amount of the tax revenue collected in the city from taxes levied by §§ 10 — 90 of this chapter. (§ 1 ch 89 SLA 1963; am § 1 ch 120 SLA 1969; am § 11 ch 213 SLA 1976)

Effect of amendment. — The 1976 amendment substituted "city of the first class" for "city of the first, second, and third classes."

8

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

March 9, 1979

The Honorable John C. Sackett
Chairman
Senate Finance Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Sackett:

CS SB 132 would reform the Alaska fishery taxes by making them more equitable and uniform among types of processing while at the same time raising additional revenue for the state and municipalities for fishery enhancement programs.

Our present fish tax structure can be traced back to 1949 and has been changed little since that time. The tax structure contains different tax values and rates according to fish species being processed and the manner of processing. These different rates and values are shown in Attachment 1. Although this tax structure may have been appropriate in 1949, the tax structure as applied to today's economics is extremely unequitable and inefficient and bears no relationship to the value of the resource harvested or the economics of the business.

The fish tax structure we are proposing first of all standardizes the tax at a rate of 6 percent of the raw value of the product for all species and ~~all methods of~~ processing. Under this bill an additional $12 million would be raised the first year and the total of $20 million would be divided equally between the general fund, the commercial fishing and agriculture bank, and revenue sharing to municipalities.

Secondly, and as important as standardizing the tax structure, the legislation we are proposing will enable the state and municipalities to continue funding fishery enhancement programs, by making an additional amount of revenue available for the development of our

04-02LH

fishery industry. Specifically additional funding would be available to the Commercial Fishing and Agricultural Bank for fishermen and processor loans and additional revenue sharing would be available to fishing communities. The specific amount of this funding is shown in Attachment 2 and 3.

The State has placed a strong emphasis on Renewable Resource Development. Appropriations for fish enhancement programs alone have totaled approximately $90 million dollars since FY 1977, $30.5 million of which has been for operating expenditures and another $58.4 million for capital expenditures. Since FY 1973 fishery loans has totalled $48 million including $13 million in FY 1978.

We are all concerned about the state's financial condition. This additional funding will insure that money is available for future fishery enhancement programs.

When the Commercial Fishery and Agricultural Bank goes into operation this year it will have a beginning appropriation of $2 million. With the $6.8 million that would be appropriated with this legislation it is estimated that the bank would be able to make approximately $54 million in loans in its first year of operation. Resident processors as well as fishermen will be able to take advantage of the bank and sums large enough to help a developing bottom fishery will be available within the state.

Municipalities, too, are facing fiscal problems. The amounts of revenue sharing available to municipalities in this legislation will help solve those problems and in some cases enable municipalities to implement projects on their own without having to rely on the passage of general obligation bonds to fund their docks and fish enhancement programs.

Sincerely,

John R. Messenger
Acting Commissioner

EXISTING FISH TAX RATES

CANNERIES

FY 78 Receipts = $5,420,438

Salmon - 3% of average wholesale price of canned product during months of August - December of five years preceding license year

If figured on raw value would be an effective tax rate of 4.45%

Crab - 2% of raw value

Clam - 1% of raw value for butter clams
2% of raw value for razor clams

Herring - 1% of raw value

FREEZERSHIPS

FY 78 Receipts = $1,299,516

- 4% of raw value

The Commerce Committee considered SENATE BILL NO. 94 (relating to occupational licensing fees) and reports it back as follows: Senator Bradley, Chairman and Senator Sturgulewski signed "do pass". Senators Ferguson and Stimson signed "no recommendation". Senator Kelly signed "do not pass". SB 94

SENATE BILL NO. 94 was referred to the Finance Committee.

The Resources Committee considered SENATE BILL NO. 113 (waste of wild food animals) and reports it back as follows: Senator Sumner, Chairman and Senators Dankworth, Mulcahy and Fahrenkamp signed "do pass". SB 113

SENATE BILL NO. 113 was referred to the Rules Committee.

The Community and Regional Affairs Committee considered SENATE BILL NO. 132 (refund of raw fish tax receipts to local government) and recommends it be replaced with COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 132, entitled: SB 132

"An Act relating to fisheries taxes; and providing for an effective date."

and reports it back as follows: Senator Sturgulewski, Chairman and Senators Kelly and Stimson signed "do pass". Senator Rodey signed "no recommendation". Senator Mulcahy signed "do not pass". The Committee further attaches a letter of intent.

SENATE BILL NO. 132 was referred to the Finance Committee.

Letter of intent accompanying SENATE BILL NO. 132 follows:

The Senate Community and Regional Affairs Committee has adopted and passed Committee Substitute for Senate Bill 132 which has a referral to the Senate Finance Committee.

Testimony, received by the Committee, indicates the need for further investigation on the economic ramifications of this legislation, with particular emphasis on the development of bottom fisheries.

By Senate Community and Regional Affa'rs Committee

Chairman

Vice-Chairman

SENATE FINANCE COMMITTEE
March 9, 1979
8:35 a.m.

Chairman Sackett convened the meeting at approximately 8:35 a.m. All committee members were present with the exception of Senator Sumner. Also in attendance were Senators Kerttula, Mulcahy, Tillion, and Stimson, as well as the Governor's Legislative Assistant Keith Specking, Garrey Peska, Administrative Assistant to the Finance Committee, representatives of the media, and individuals listed on the attendance sheet appended to these minutes. PRESENT

Chairman Sackett moved that SB 132 (Act relating to the refund of raw fish tax receipts to local government) be brought up for discussion, advising that Senate President Tillion and Mr. Specking were present to testify concerning the bill. SB 132

Senator Tillion advised that the legislation allows foregiveness of property taxes to municipalities equal to the amount paid for fishery development. He directed committee attention to page 2 of the fiscal note accompanying SB 132, advising that page 2 sets forth current distribution of shared taxes as well as proposed distributions under the subject bill.

Under the above legislation, fisheries would be taxed at basically the same rate for all species. Such taxation would not increase the general fund by a significant amount, but it would make funds available for development of fishery programs.

Senator Tillion advised committee members of the existence of a $1.684 million fisheries development bank formed last year, advising that funding in the bank can be leveraged through the Spokane Bank of Cooperatives. Development funding covers vessel loans as well as improvements ashore. He further stated that taxes do not fall evenly throughout Alaska. Senator Tillion advised that 60% of the crab caught in Alaska is caught by non-resident fishermen, while nine years ago Alaskans caught 90%. The greatest amount of crab is now caught by fishermen coming out of Seattle.

The program requires five years' residency in Alaska in order to be eligible, during three of which the individual must have participated in Alaskan fisheries. Senator Tillion advised that for the state's long-term good it will be

more beneficial to effect the increased tax now rather than maintain the status quo.

Senator Ray questioned whether revenue derived from the anticipated tax increase would be placed in the renewable resources fund, and Senator Tillion responded "no, last year we formed the bank and put $2 million into it set up as the Alaska Commercial Fishing and Agriculture Bank under the bank of cooperatives system set up by the federal gover ment."

Mr. Keith Specking next appeared before the committee to comment on the proposed bill (copy of Mr. Specking's verbatim testimony attached to these minutes). KEITH SPECKING

Following Mr. Specking's testimony, and in response to a question from Senator Ray, Senator Tillion demonstrated the effect of increased revenue sharing under the proposed legislation, advising that where the Haines Borough currently receives $35 thousand, under the subject bill it would receive $106 thousand. Basically, what the state hopes to do through increased revenue sharing is to develop its fisheries industry and take back what has been lost to Seattle. Increased funding will enable local municipalities to float revenue bonds to finance dock improvements. The fisheries industry will thus be bearing the cost of improvements rather than the general public.

Senator Mulcahy next appeared before the commi ee advising that the subject bill will have "the biggest impact on fisheries that has ever come along." He stated that problems with the legislation center on the fact that there has not been adequate time to develop information, receive input, or conduct research. He further stated that everyone knew the administration was considering a raw fish tax, but no one knew it would be anything as large as the proposed bill. In some areas of the industry the bill would effect a 500% tax increase. SENATOR MULCAHY

Senator Mulcahy stated that he believed everyone would agree that there is only one established fishery industry in Alaska--the salmon industry. Therefore the tax in his area is sometimes higher than other fishery areas xperience. Some fishery areas are new and need a chance to "develop and get on their feet." Future development appears to be in bottom fisheries. Other areas of the industry have peaked out and are now functioning at a lower level.

Senator Mulcahy alluded to problems in the bottom fish industry revolving around big foreign fleets and cheaper labor markets in foreign countries. If Alaska is going to develop a bottom fish industry, it is going to have to give the on-shore development plant a break. The Bering Sea and Continental Shelf could be the sea port of Alaska if it is only allowed to develop.

He further advised that enactment of SB 132 would kill attempts by Senator Stevens to get $2 million in funding at the national level, adding that he didn't believe a short-term moratorium would be sufficient since investors will look to a longer term.

Senator Mulcahy allowed that the current tax structure needs looking into. However, he advised that "the name of the game in resource development is that it is going to cost the state something during development." Another thing, he advised, that has helped to develop the fleet is "the existing federal tax set up. A boat owner can take money out of income tax, set it aside, and put it back into the industry."

New fishing vessels over 100 feet in length have primary as well as secondary processing capabilities. SB 132 is going to have a substantial impact on crab processing in Alaska. Senator Mulcahy further advised that he believed the numbers connected to the legislation to be understated, saying that he felt the raw fish tax "is going to generate more than anticipated," and ultimately the state will be hitting the consumer and the fisherman a lot harder than anticipated with the subject bill. He stated that with the fuel tax added on top of the raw fish tax, he felt the state would be placing the crab industry in a bad position, particularly after the peak is over.

Making reference to the Combs (sp?) Report, Senator Mulcahy advocated a bottom fishery industry without tax for the next 10 to 12 years. He further advised that Alaska may end up with 20% of the processing conducted on shore while the remaining (73%) is processed at sea.

Senator Mulcahy further advised that he had no objection to eliminating the Seattle fleet, but feared that under the proposed bill, bottom fisheries would be damaged in Alaska. He stated that impact from the legislation is sufficient enough to demand a good hard look, adding that Alaska will not have a second chance at this industry.industry.

Senator Mulcahy made reference to the fishing industry in the Pribilof Islands and the local desire to get something "going on shore." Under the proposed bill, Senator Mulcahy advised that he could not see how the local effort "would have a chance to get started."

In response, Senator Tillion advised that if Alaska is going to develop a domestic fisheries industry (small boat) it needs financing for development. He added that the small fleet could properly conduct the harvest, but it needs a source of financing. He further attested to the need for Alaskans to get something out of the fishing industry. The subject bill would provide funding assistance to fisheries and to municipalities. He concluded by stated that without funding, there is no way Alaska is going to develop its fisheries.

Senator Ray again raised questions concerning use of revenue generated by the fish tax, and Senator Tillion advised that language contained in federal regulations would allow for a cooperative effort through the Spokane Bank permitting leveraged use of agricultural funds in the Spokane Bank. Two years ago, the federal government expanded the agriculture bank to include fisheries, allowing Alaska to use agriculture funds from other states. Senator Kerttula expanded upon the above statement, advising that since Alaska has such a small percentage of agricultural development, it is allowed to use agricultural funding for fishery projects.

Chairman Sackett advised that SB 132 would be held in committee for review at a later time.

SB 132
HELD OVER

The Chairman next moved that SB 62 (Act making a supplemental appropriation to the special projects office, Office of the Governor, to continue funding the Delta agricultural development project) be brought up for discussion, advising that Bob Palmer from the Governor's Office was before the committee to testify. Mr. Palmer advised that last year the legislature appropriated first-phase funding for the project. Such funding provided money for the clearing operation which is now underway as well as money for the elevator and other items. The administration emphasized that last year's appropriation was for the first phase, and that the administration would be back before the legislature seeking funding for the second phase.

SB 62

BOB PALMER
DELTA
PROJECT

//

SENATE FINANCE COMMITTEE
March 10, 1979
10:00 a.m.

Chairman Sackett called the meeting to order at 10:00 a.m. Senators Dankworth, Bennett, Hackney, Sackett, Ray and Hohman were present. Also presnet were: Dr. Sherman Carter, VP for Finance, U of A, Don McKnight and Russell Clark from ADF & G, Jack Utton, Director of Natural Resources, Tanana Chiefs, Bob Palmer, Special Projects, Office of the Governor, Jim Farmer, Executive Director, Koyukon Development Corporation, and Robert Shelley, Analyst, Budget & Management. PRESENT

Senator Sackett advised that the purpose of the meeting was that of a bill session. He then brought up SB 132 (An Act relating to the refund of raw fish tax receipts to local government). He advised the committee that a CS had been prepared which included an amendment offered by Senator Tillion. Chairman Sackett explained the changes made by the CS. SB 132

Senator Hohman moved that CS SB 132 be passed from committee with individual recommendations. CS SB 132 passed as follows: senators Hackney, Bennett, Dankworth and Sackett voted do pass. Senators Hohman and Ray voted no recommendation. MOTION

Senator Sackett moved that SB 62 (supplemental appropriations to Special Projects Office, Office of the Governor, to fund Delta Agricultural Development Project) be brought before the committee for discussion. It was so ordered. SB 62

Senator Sackett introduced Bob Palmer, Special Projects director to give testimony on the bill. Mr. Palmer offered information regarding the bill, and gave information to the committee that had been requested in a previous meeting. Senator Hohman had questions concerning the contract dates. Mr. Palmer stated that 30% of the work had to be completed by May 1980, 60% completed by May 1981, and total preparation and ready for planting had to be completed by May 1982. When asked if they were going to stick by the contract dates, Mr. Palmer replied "most definitely!" He said there might be a couple who would not make the contract date, but he felt most of them would. CONTRACT DATES

Senator Sackett explained that a CS had been prepared for the bill. The changes were explained. Senator Hohman made a motion that CS SB 62 be passed from committee with individual recommendations. There being no objection, it was so ordered. CS SB 62 passed as follows: Senators Hohman, Hackney, Bennett, Dankworth and Sackett voted do pass. Senator Ray voted do not pass unless amended. MOTION

Assistant Attorney General

SUBJECT: Municipal revenue sharing, fish processing taxes; our file J-66-687-77

This responds to your request for our opinion on the proper interpretation and application of AS 43.75.130 and 135, which provide for sharing of certain revenues with organized boroughs and first class cities.

AS 43.75.130 was enacted in 1962 and, since amended, reads as follows:

> The commissioner of revenue shall pay to each organized borough and each city of the first class 10 per cent of the amount of tax revenue collected in the borough or city from taxes levied by §§ 10 -- 90 of this chapter.

AS 43.75.135 was enacted in 1963 and, since amended, reads as follows:

> In addition to the payment allowed in § 130 of this chapter, the commissioner of revenue shall pay to each organized borough 10 per cent of the amount of tax revenue collected in the borough from taxes levied by §§ 10 -- 90 of this chapter and shall pay to each city of of the first class located in the unorganized borough 10 per cent of the amount of the tax revenue collected in the city from taxes levied by §§ 10 -- 90 of this chapter.

Under a literal reading of these two sections, as pointed out by the Legislative Audit Division, an organized borough, whether or not there is a first class city within it, would receive 20 percent of the revenue collected from sources within it. However, a literal reading does not arrive at the result the legislature appears to have intended. To better understand how these two statutes came to read as they do, one should read the latter as it was enacted in 1963 before being amended to include cities:

> Additional Refund to Boroughs. In addition to the payment allowed in sec. 130 of this chapter, the commissioner of revenue shall pay to each organized borough 10 per cent of the amount of tax revenue collected in the borough from taxes levied by secs. 10 -- 90 of this chapter.

§ 1, ch. 89, SLA 1963.

What happened was that the 1962 statute gave cities 10 percent of the taxes collected within them and organized boroughs 10 percent of the taxes collected within them. Of course, many cities are within organized boroughs, and the taxes collected within those cities are then collected within both. The result was that a city would get the 10 percent if the tax was collected within its limits and so would the borough, for a total local share of 20 percent. */ If the tax were collected solely within a city, i.e., one not in a borough, it would get 10 percent. If the tax were collected from outside the city limits in an organized borough, then the borough would get the 10 percent and nothing went to the city. In other words, the local people got 10 or 20 percent of the tax revenue based entirely on the locus of the tax source and the existence of both a city and an organized borough.

This result was patently unintended and unfair. The tax was to be shared with those municipal entities which levied a local tax to support schools and was designed to reduce their tax burden. Where there is a city and an organized borough, the residents in both pay the same local taxes for schools.

The 1963 Legislature passed ch. 89 to provide for a borough to get an additional 10 percent share when the city did not receive a share so that the total local share would be 20 percent. Finally, in 1969, the statute was again amended to provide the same for cities. In that way, the total local share was uniformly set at 20 percent.

*/ Of course, the original statute could have been interpreted to have a different result, i.e., it could have been viewed as not giving an organized borough any share of the tax collected from within first class cities within the borough. This would have resulted in a total local share of 10 percent. Arguably, the legislature may orginally have intended this result. However, the agency interpreted the statute otherwise, and the subsequent acts of the legislature tend to ratify the agency's view.

which--in all likelihood--was what was eventually intended by the legislature.

Our analysis is buttressed by a contempory agency construction. Under the legislation as originally enacted, when taxes were collected from a source within a city in an organized borough, the Department of Revenue gave both 10 per cent. If they were collected from a source outside the city, the borough got 10 percent and the city, nothing.

After the 1963 enactment, in the first situation given above, both continued to get 10 percent, for a total local share of 20 percent. But in the second situation given above, the borough now got 20 percent, i.e., an additional 10 percent, bringing the total local share in that situation up to an equal 20 percent.

After the 1969 amendment (to give cities as well as organized boroughs an additional 10 percent), the department continued to split 20 percent between the city and the borough when the tax source was a city within a borough (i.e., 10 percent to each), to give the borough 20 percent when the source was within the borough but outside of any city, and then to give a city which was not in an organized borough 20 percent as well. We perceive this latter amendment as tantamount to the ratification of the agency's interpretation. In effect, the legislature said, "Do the same for cities outside of boroughs."

While the precise language and history of the statute are obscure, we believe that the department's practical, longstanding and consistent interpretation of the statute and the legislature's apparent ratification of that interpretation are pretty much conclusive. Accordingly, and despite the literal terms of the statute, the department should continue to apply it as it has been doing.

RWP:chp

CHAPTER 218, Sec. 11 Session Laws of Alaska 1976

Sec. 10 AS 43.75.130 is amended to read:

Sec. 43.75.130 REFUND TO LOCAL GOVERNMENTS. The commissioner of revenue shall pay to each organized borough and each city of the first class 10 per cent of the amount of tax revenue collected in the borough or city from taxes levied by secs 10 - 90 of this chapter.

Sec. 11. AS 43.75.135 ADDITIONAL REFUND TO BOROUGHS AND CITIES. In addition to the payment allowed in sec. 130 of this chapter, the commissioner of revenue shall pay to each organized borough 10 per cent of the amount of tax revenue collected in the borough from taxes levied by secs 10 - 90 of this chapter and shall pay to each city of the first class located in the unorganized borough 10 per cent of the amount of the tax revenue collected in the city from taxes levied by secs 10 - 90 of this chapter.

Dept of Revenue Guideline

TO SHARE RAW FISH TAX

Raw Fish tax should be shared as soon as possible after July 1 of each year. This tax is shared with boroughs, home rule cities and first class incorporated cities only.

A. Incorporated cities within an unincorporated borough receive 20%
B. First class cities in an incorporated borough receive 10%
D. The organized borough [outside of any city] receives 20%
C. The organized borough of a first class city receive 10%
E. Tax collected outside of any borough is not shared.
F. Penalty and Interest only is not shared

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

If a tax rate of 4.45 percent is used as a base, an additional $7 million would be raised bringing the total fish tax collections to $15.2 million. These collections will be split evenly among the general fund, revenue sharing to municipalities, and the commercial fishing and agriculture bank, until fully capitalized. It is estimated that revenue sharing to municipalities would be increased by about 3 million dollars as shown in the attached breakdown. It would also allow an annual appropriation to the commercial fishing and agriculture bank of approximately 5 million dollars. With a 4.45 percent rate, revenue to the general fund would decrease by about $1 million dollars, but would increase considerably when the commercial fishing and agriculture bank is fully capitalized in a few years. A breakdown of the distribution of revenue is shown on the attached pages.

WITNESSES TESTIFYING:

Jack Chenoweth -Discusses history of 10% allocation to municipalities. His research showed that while the provision was originally established in 1953 it was repealed in 1962. Ch. 55 assigned a new 10%repayment statutue which was in fact discretionary. Refered to oninion by Assistant A.G. Donough which stated that the 10% was discretionary. Chenoweth reviewed proposed amendment which would provide for a 20% allocation to the municipalities with 13 1/3% given to the municipalities specifically for fishery enhancement projects. He pointed out that it would be difficult to guarantee that 13 1/3% would be used for fisheries projects.

Palmer McCarter
Opposed to limit the amount which could be applied for. Some municipalities don't have the power to operate port facilities. Other communities might need more and they would be limited to 13 1/3 %. Suggests that C&RA be given discretionary powers in filling applications. Leave out limit Line 22.

Rep. Nels Anderson - Suggests incorporation of HB300 provisions which would provide for a minimum entitlement of $25,000.

John Messenger, Dept. of Revenue
The repealer would have to be removed.A letter of intent could be added to specify that an amount over 20% would have to be used for fisheries projects when it was received.

Anderson again raises concept in HB300. It is the concensus that this addition would stretch the "germaine" concept if it were attached to this bill. Instead HB300 will be heard on 4/9/79.

COMMITTEE ACTION: Passed out CS with indicated changes.

TAPE # 7 SIDE 1 Sections 10 - 933

Committee agrees to make entitlement to municipalities 33 1/3% (also to include 2nd Class Cities); change title of the section; and take out the repealer citation which would now be irrelevant. The CS with these changes is agreed to.

BILL NUMBER AND TITLE: CSSB 132 relating to fisheries tax

ORIGINAL SPONSOR : Kertulla

OTHER SPONSORS: C&RA Substitute
Finance CS, Rules CS (final version)

RECEIVED FROM:

FURTHER REFERRALS:

MEMBERS PRESENT: Parker, Metcalfe, Branson, Zharoff, O'Connell

MEMBERS ABSENT: Carney, Parr

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Rep. Parker -- Announced that the C&RA Committee would concentrate on the local governnment provisions of the fisheries taxes bill.

Ernie Haugen -- Abrupt raise. Original SB 132 only dealt with refund to local governments. Present bill is such an expansion of original bill that no one knows what it is all about. It will have a dramatic impact on local employment. The 6% tax will send the fishermen to Prince Rupert to sell fish. A tax incentive should be considered. Fully supports the idea of a tax study of the whole fisheries taxation question. The industry would cooperate in putting together a workable tax structure.

John Messenger, Acting Commissioner of Revenue
Concentrating remarks on revenue sharing section. Proposal in CSSB132 is different than original bill. Constitutional question was discussed by Messenger. Administration of current program was discussed.

Branson questions why second class cities are not receiving revenue monies based on the fish tax. Response from Jack Chenoweth is that originally, from the time of statehood, first, second and third class cities received revenue, but in 1972 a change was made with the reclassification of cities and the second class cities were eliminated as they do not have educational functions and the original designated fund justification was tied to education.

Rep. Zharoff expressed concern with the lack of an incentive fishermen would have to sell fish on-shore. With the emphasis on fresh, and frozen products, there would be an impetus set up for operations to move off shore.

COMMITTEE ACTION: Another hearing scheduled on 4/6/79 as a "mark-up" session.

TAPE # 6 SIDE 2 Sections 32-812

Rick Lauber, Alaska Manager of the Alaska Seafood Processors

Ak. Seafood Processors handle 65% of fish processed in the state. Dedicated fund provisi --10% of the dedicated fund is constitutional. Additonal 10 questionable. By repealing the original provision, the municipalities would not be in a safe position. It might be acceptable to add 10% or so on top of the 10% specified in current law.

Lauber questions revenue sharing projections saying they are only estimates and the accuracy of them is questionable. There won't be a change in the revenue sharing entitlement of a community which depends on canned salmon at the present time.. A 5 or 10X increase is most questionable.

The bill is touted as an aid to bottomfish development . SB won't do that as revenue sharing is based on present processing within communities. There is no guarentee that bottomfish will locate in the same places. Yakatat and Sitka would be likely places to share in revenue but they wouldn't get enough and would still come to the state for additional money.

The current tax system is not necessarily outdated. The value of fish has risen and so the tax has also risen accordingly. The given figures should be checked for accuracy.

Any increases of the tax on the bottomfish industry would preclude the industry's ever developing. Bottomfish is part of an international market so the prices have to be kept marketable.

There should be consideration given to the idea of a tax incentive for the bottomfish industry.

The Legislature should stand behind the fish study bill, HB 36, which was passed by the House.

Ginney Chitwood , Executive Director of the Municipal League

No position on the increase in the raw fish tax. Concerned about removing the constitutional dedication of funds to the municipality. Gross business license tax repeal is a case in point. The corporate income tax was to take its place. The municipalities have never received the 150% promised. Nor the 10% of corporate income promised. Again, revenue sharing is not funded at 100% by the legislature (or Gov.)

Sen. Mulcahy -- Greatest concern is the impact this bill would have on communities. Outdated information on figures is being used. the projections are not accurate. Income is substantially greater than that shown.

M E M O R A N D U M January 25, 1979

SUBJECT: Fisheries tax rebates
(Work Order #6047)

TO: Representative Margaret Branson

FROM: John B. Chenoweth, Legislative Counsel

Here are the several versions of last year's HB 256. The approaches taken may help you reach a decision.

HB 256 increases the amount of rebate to 20 percent only to organized boroughs, and only under AS 43.75.135. It would extend no additional assistance to cities. (That is not to say that, in meeting the request of the Municipal League, the bill could not be drafted in such a way as to extend increased aid only to cities).

CSHB 256 increases aid to only school districts (i.e., boroughs and home rule and first class cities of the unorganized borough) by increasing the percentage rebate to 20 percent.

CSHB 256 am gives every municipality (second class cities, too) 20 percent, and repeals the "additional refund" section, AS 43.75.135.

Also examined last year was HB 696 which, if enacted as offered, would have provided for a rebate to second class cities on the same basis as is now provided in law for first class cities.

VERBATIM TRANSCRIPT

KEITH SPECKING ON SENATE BILL 132

March 9, 1979

SF-79 Tape No. 19, Side 2

Chairman:

Mr. Specking vou have the floor.

Specking: Thank you Mr. Chairman. Mr. Chairman, I think the Senator's recognized background in fisheries management far exceeds mine. However, I would like to point out that we would have no problem with the proposed amendment except that we would like our legal people to examine the language more closely. I suspect that philosophically the Governor's view is that some form of severence of this valuable resource should be made available for wider distribution to all the citizens of Alaska. I think the Senator pointed out that we're spending somewhere in the neighborhood of--or requesting--or spending nearly $30 million annually. The recovery from the present tax structure is minimal. Related to that, I would point out that the present system of taxation is a scattered system developed over a long period--much of it very old. The proposed tax increase would-- To the best of our calculations, the existing percentage rate on canned salmon is 4.45%. The system of taxing that is 3% of the average wholesale price for the canned product for a five-month period for five years.

The net effective rate is 4.45%. This would bring an increase of 1.55%. Crab is taxed at 2% of the raw value. This would be an increase of 4%. Clams at 1% for butter clams, 2% for razor clams, herring 1% of its value, etc. So that creates a very difficult situation. We have taxed freezer ships at 4%. This would be an increase of 2%. Cold storages at 1%. The whole situation of the processing industry has changed with relationship to the volume of the product processed since the time that these tax structures were created. The Senator pointed out the differences very well.

Included in your packet is a suggested distribution to boroughs and municipalities if the tax were enacted, compared against the present distribution of the raw fish tax.

I would like to suggest that where the wording on the front page says for fishery enhancement programs we are not talking about enhancement programs (inaudible portion of the tape) but rather that language might better be for fishery related development programs.

Chairman: Where are you talking about?

Specking: On the first page of the letter presented to you, Mr. Chairman.

Chairman: Of the amendment?

Specking: No, on the packet that was handed out by--

Hohman: The Department of Revenue letter?

Specking: Yes, the first page where we say fishery enhancement programs, we didn't mean to imply that these were fish hatcheries. Better language might be for fishery related development programs. And we would like to correct that language in the bill, so that it reflects that we're not talking about fish hatcheries per se.

On page 2, the language reads one-half the revenue shared with a borough or city of the first class shall be used for docks or other fishery enhancement projects, would like to change that to other fishery development related projects.

Chairman: Anything else?

Specking: I might tell you briefly that the capitalization of the fisheries and agriculture bank is very desirable. Members to that board have been appointed and they are working with the Department of Commerce and searching for an executive director. We hope to have that bank operative sometime within the next two months.

Thank you, Mr. Chairman.

TO: HOUSE BILL NO. 306

Page 3, line 7:

After "by-products," delete the remainder of the paragraph and insert:

except fish species which have been designated by the commissioner of fish and game as a developing commercial species under AS 16.05.050(12);

Page 6, following line 20, insert:

* Sec. 13. AS 16.05.050 is amended by adding a new paragraph to read:

(12) not later than October 31 of each year, designate and provide to the commissioner of revenue the names of those species of fish of which there is a significant supply and for which there is a developing commercial market.

Renumber subsequent sections.

SENATE FINANCE COMMITTEE
March 9, 1979
8:35 a.m.

Chairman Sackett convened the meeting at approximately 8:35 a.m. All committee members were present with the exception of Senator Sumner. Also in attendance were Senators Kerttula, Mulcahy, Tillion, and Stimson, as well as the Governor's Legislative Assistant Keith Specking, Garrey Peska, Administrative Assistant to the Finance Committee, representatives of the media, and individuals listed on the attendance sheet appended to these minutes. PRESENT

Chairman Sackett moved that SB 132 (Act relating to the refund of raw fish tax receipts to local government) be brought up for discussion, advising that Senate President Tillion and Mr. Specking were present to testify concerning the bill. SB 132

Senator Tillion advised that the legislation allows foregiveness of property taxes to municipalities equal to the amount paid for fishery development. He directed committee attention to page 2 of the fiscal note accompanying SB 132, advising that page 2 sets forth current distribution of shared taxes as well as proposed distributions under the subject bill.

Under the above legislation, fisheries would be taxed at basically the same rate for all species. Such taxation would not increase the general fund by a significant amount, but it would make funds available for development of fishery programs.

Senator Tillion advised committee members of the existence of a $1.684 million fisheries development bank formed last year, advising that funding in the bank can be leveraged through the Spokane Bank of Cooperatives. Development funding covers vessel loans as well as improvements ashore. He further stated that taxes do not fall evenly throughout Alaska. Senator Tillion advised that 60% of the crab caught in Alaska is caught by non-resident fishermen, while nine years ago Alaskans caught 90%. The greatest amount of crab is now caught by fishermen coming out of Seattle.

The program requires five years' residency in Alaska in order to be eligible, during three of which the individual must have participated in Alaskan fisheries. Senator Tillion advised that for the state's long-term good it will be

more beneficial to effect the increased tax now rather than maintain the status quo.

Senator Ray questioned whether revenue derived from the anticipated tax increase would be placed in the renewable resources fund, and Senator Tillion responded "no, last year we formed the bank and put $2 million into it set up as the Alaska Commercial Fishing and Agriculture Bank under the bank of cooperatives system set up by the federal government."

KEITH SPECKING

Mr. Keith Specking next appeared before the committee to comment on the proposed bill (copy of Mr. Specking's verbatim testimony attached to these minutes).

Following Mr. Specking's testimony, and in response to a question from Senator Ray, Senator Tillion demonstrated the effect of increased revenue sharing under the proposed legislation, advising that where the Haines Borough currently receives $35 thousand, under the subject bill it would receive $106 thousand. Basically, what the state hopes to do through increased revenue sharing is to develop its fisheries industry and take back what has been lost to Seattle. Increased funding will enable local municipalities to float revenue bonds to finance dock improvements. The fisheries industry will thus be bearing the cost of improvements rather than the general public.

SENATOR MULCAHY

Senator Mulcahy next appeared before the committee advising that the subject bill will have "the biggest impact on fisheries that has ever come along." He stated that problems with the legislation center on the fact that there has not been adequate time to develop information, receive input, or conduct research. He further stated that everyone knew the administration was considering a raw fish tax, but no one knew it would be anything as large as the proposed bill. In some areas of the industry the bill would effect a 500% tax increase.

Senator Mulcahy stated that he believed everyone would agree that there is only one established fishery industry in Alaska--the salmon industry. Therefore the tax in this area is sometimes higher than other fishery areas experience. Some fishery areas are new and need a chance to "develop" and get on their feet." Future development appears to be in bottom fisheries. Other areas of the industry have peaked out and are now functioning at a lower level.

Senator Mulcahy alluded to problems in the bottom fish industry revolving around big foreign fleets and cheaper labor markets in foreign countries. If Alaska is going to develop a bottom fish industry, it is going to have to give the on-shore development plant a break. The Bering Sea and Continental Shelf could be the sea port of Alaska if it is only allowed to develop.

He further advised that enactment of SB 132 would kill attempts by Senator Stevens to get $2 million in funding at the national level, adding that he didn't believe a short-term moratorium would be sufficient since investors will look to a longer term.

Senator Mulcahy allowed that the current tax structure needs looking into. However, he advised that "the name of the game in resource development is that it is going to cost the state something during development." Another thing, he advised, that has helped to develop the fleet is "the existing federal tax set up. A boat owner can take money out of income tax, set it aside, and put it back into the industry."

New fishing vessels over 100 feet in length have primary as well as secondary processing capabilities. SB 132 is going to have a substantial impact on crab processing in Alaska. Senator Mulcahy further advised that he believed the numbers connected to the legislation to be understated, saying that he felt the raw fish tax "is going to generate more than anticipated," and ultimately the state will be hitting the consumer and the fisherman a lot harder than anticipated with the subject bill. He stated that with the fuel tax added on top of the raw fish tax, he felt the state would be placing the crab industry in a bad position, particularly after the peak is over.

Making reference to the Combs (sp?) Report, Senator Mulcahy advocated a bottom fishery industry without tax for the next 10 to 12 years. He further advised that Alaska may end up with 20% of the processing conducted on shore while the remaining (73%) is processed at sea.

Senator Mulcahy further advised that he had no objection to eliminating the Seattle fleet, but feared that under the proposed bill, bottom fisheries would be damaged in Alaska. He stated that impact from the legislation is sufficient enough to demand a good hard look, adding that Alaska will not have a second chance at this industry.industry.

Senator Mulcahy made reference to the fishing industry in the Pribilof Islands and the local desire to get something "going on shore." Under the proposed bill, Senator Mulcahy advised that he could not see how the local effort "would have a chance to get started."

In response, Senator Tillion advised that if Alaska is going to develop a domestic fisheries industry (small boat) it needs financing for development. He added that the small fleet could properly conduct the harvest, but it needs a source of financing. He further attested to the need for Alaskans to get something out of the fishing industry. The subject bill would provide funding assistance to fisheries and to municipalities. He concluded by stated that without funding, there is no way Alaska is going to develop its fisheries.

Senator Ray again raised questions concerning use of revenue generated by the fish tax, and Senator Tillion advised that language contained in federal regulations would allow for a cooperative effort through the Spokane Bank permitting leveraged use of agricultural funds in the Spokane Bank. Two years ago, the federal government expanded the agriculture bank to include fisheries, allowing Alaska to use agriculture funds from other states. Senator Kerttula expanded upon the above statement, advising that since Alaska has such a small percentage of agricultural development, it is allowed to use agricultural funding for fishery projects.

Chairman Sackett advised that SB 132 would be held in committee for review at a later time.

SB 132
HELD OVER

The Chairman next moved that SB 62 (Act making a supplemental appropriation to the special projects office, Office of the Governor, to continue funding the Delta agricultural development project) be brought up for discussion, advising that Bob Palmer from the Governor's Office was before the committee to testify. Mr. Palmer advised that last year the legislature appropriated first-phase funding for the project. Such funding provided money for the clearing operation which is now underway as well as money for the elevator and other items. The administration emphasized that last year's appropriation was for the first phase, and that the administration would be back before the legislature seeking funding for the second phase.

AN Ponfac COMPANY

March 10, 1979

Honorable Alvin Osterback
Alaska House of Representatives
Pouch V
Juneau, AK 99811

RE: HB 306

Dear Alvin;

On behalf of Pacific Pearl Seafoods, which has six seafood canneries operating in Alaska as well as one floating processor, I would like to use this letter to voice our vehement objections to the above-mentioned House bill, the purpose of which is to raise the tax on raw fish from 1% to 6%:

1) On the east coast of the United States, American tanner crab meat is already being undersold by the Canadians ($5.25/lb vs. $4.30/lb.). The proposed increase in the raw fish tax would only serve to up the American crab price by an additional 16¢, thus furthering the gap between the two and handicapping an American industry so as to be uncompetitive.

2) Far from promoting the development of a bottomfish fishery, an increase in the raw fish tax across the board would only inhibit such a growth. The 6% raw fish tax would be more than the profit margin in such a high volume - low profit fishery. So, if the promoters of HB 306 are really interested in strengthening the bottomfish potential in Alaska, it would seem they are going about it in a very inefficient way. I might add that the bottomfish industry is going to be a very essential part of this State's future fisheries resources. It is in the interest of Alaska that everything possible be done to advance the bottomfish industry, which this proposed raw fish tax increase does not do.

3) Such a drastic increase in the raw fish tax, rather that adding to the State's coffers, could very possibly end up bringing the State less monies. Why should floating processors fish in State waters and be taxed so exorbitantly when they can go outside State boundaries and not be taxed at all?

4) There are definite legal questions concerning just what constitutes the State's territorial boundaries. For instance, the International Halibut Commission said that a state cannot tax anything past a three-mile limit.

PACIFIC PEARL SEAFOODS
P.O. BOX 828
KODIAK, ALASKA 99615
[illegible] TELEX 090-25-355

This bill, if passed, is going to effect several thousands of Alaskans involved in various aspects of the fisheries industry. Therefore, it is particularly essential that it not be rushed through the House committees without the public and fishing industry being give an opportunity to speak out on it.

Respectfully,

Charles L. Jensen

March 16, 1979

Senator George Hohman
Representative Nels A. Anderson, Jr.
Pouch V
Juneau, Alaska 99811

Dear George and Nels:

(CS Senate Bill 132)

This letter is in protest of House Bill 306 (Fisheries Taxes). We ask you as our Senator and Representative to use all of your efforts in having this Bill defeated.

Why does the State Administration and some legislators want to tax the fish processors to fund State programs to the detriment of the fishermen? The fishermen and the consumers will be paying this tax indirectly for the fish processor. This means lower fish prices for the fishermen and higher prices for the consumer.

This Bill (306) discourages development of the fisheries. I don't see how the State can say they encourage development when taxation of this sort is placed on them before any development occurs. It doesn't make sense.

It seems to me the State of Alaska should have learned their lesson with the taxation they placed against the oil industry when one speaks of encouraging development.

Many fishermen in Bristol Bay come from small villages that will not benefit from this taxation proposal but will be paying their fair share to the local governments and the State of Alaska.

We must keep in mind that we cannot run off half cocked into programs we can't afford nor should we place taxation on

industries without first studying the impacts in greater detail. It will be a grave mistake should this legislation pass.

I ask that you keep me informed of the status of this Bill.

Sincerely,

Harold H. Samuelsen

HB306

March 9, 1979

Rep. Alvin Osterback

In response to House Bill 306 and Senate Bill 132 - Raw Fish Tax

We strongly object to the proposed increase in the Raw Fish Tax and the way it is being handled. We feel that above and beyond disagreeing with the terms of this bill, even more outrageous is the denial of due process of law presently taking place. (In regard to the butchering and railroading of Senate Bill 132.)

Already crippled by excess licenses, permits, taxes and other regulations, this behind-the-back attack on the fisheries could be the death blow for the Alaskan fishing industry.

In effect, this Bill would force the progressive Alaskan fishermen to become part of the Seattle-based fleet in an effort to maintain even a minimal profit margin. Although legislative action at this date indicates otherwise, the fisheries represent a major industry with a heavy impact on the continued economic stability of this state.

With the passage of this Bill, the presently under-utilized bottomfish fishery will never get off the ground as a shore-based fishery, and at best, would never come close to reaching its full potential.

We request you, our representative, to make known our extreme disapproval of the terms and concepts set forth in this Bill, and our disappointment in the way it is being handled.

Thank you for your consideration in this matter.

I am,

Alvin R. Burch
Manager

CSSB132

KODIAK AREA CHAMBER OF COMMERCE

HB306

KACC

March 9, 1979

AN OPEN LETTER TO THE GOVERNOR OF ALASKA AND THE MEMBERS OF THE STATE LEGISLATURE:

Gentlemen:

The Kodiak Area Chamber of Commerce strongly opposes the proposed increase in the Raw Fish Tax, and deplores the ram-rod methods used to push this measure into law.

The increased tax will have a most serious impact on the economy of Kodiak and all the other fishing communities in the State. It will not only immediately affect the fishermen and the processors, it will be most detrimental to every person in the fishing communities, and the snow-ball effect will ultimately lower the economy of the entire State and all its citizens.

The carrot on the stick, calling for returning a larger percentage of the tax to local governments, is an obvious ploy designed to gain support from Legislators representing districts that would benefit financially. While they grab the free lunch carrot, Kodiak and the other fishing communities are being beaten with the stick.

The Chamber urges the Legislators to stop all debate on this issue until public hearings are held in all fishing communities, including Kodiak, in order to more fully understand the impact on the fishing communities and the ultimate effect the increased Raw Fish Tax will have on the economy of the State.

Sincerely,

Art Jordan, Manager
KODIAK AREA CHAMBER OF COMMERCE

HB306

P. O. Box 37
Kodiak, AK 99615
March 10, 1979

Senator Robert Mulcahy
Alaska State Senate
Pouch V
Juneau, AK 99811

RE: SB 132, HB 306

Dear Senator Mulcahy:

We are writing this letter to state our strong objections to the above-mentioned bill which would up the raw fish tax to 6% from its present 1%.

First of all, the most obvious fact is that the increase is so pronounced as to raise the question why the jump of 5%? But beyond that is the point that we as individuals are for less taxation regardless of the limitation in services. If Proposition 13 in California last year was any example, we certainly aren't the only ones for less taxation.

There is a theory which we believe is very valid, namely that government can't tax a company. Companies only pass any taxes on to the consumer by marking up the price of their product. A solution to the problem of inflation is not further taxation, which was stipulated as being one of the reasons that this bill was initiated in the first place.

Most of the seafood that comes from Alaskan fisheries (i.e. crab and shrimp) are already very high-priced products, barely in competition with the same foreign products. This proposed increase in the fish tax should help substantially in putting Alaskan seafood products out of the market completely. Being a luxury item, people in the United States are going to stop buying it if the price becomes too exorbitant.

Alaska's fishery resources are extremely important to a good many people in this State: fishermen and their families, cannery employees, and all the services and suppliers connected with seafood processing. To see Alaska's fisheries become too inhibited or slow down all together would certainly not help the State or the livelihoods of those who derive their income from fisheries.

As far as providing revenue to the municipalities, Kodiak for one is an example of a city who has more than enough money at present. A fact that was made clear in the arguments the City used in trying to persuade the Joint Committee on Community and Regional Affairs that it should be allowed to annex parts now in the borough. We sincerely hope that you take a good look at this bill and consider just how destructive it could be.

Sincerely,

Cynthia M. Pistorese
Secretary (Pacific Pearl Seafoods)

CSSB 132

RESOLUTION 79-9

A RESOLUTION IN OPPOSITION OF HB 306 - RAW FISH TAX

WHEREAS, HB 306 has been introduced which would standardize the raw fish tax at 6% of raw value regardless of species of fish being processed or the method of processing, and

WHEREAS, the fishing industry is the major economy of Seldovia and this industry is presently depressed in this area, and

WHEREAS, increased taxation of this industry will bring harm to processor and fisherman alike, and will further depress the economy of our area,

NOW, THEREFORE, BE IT RESOLVED, by the City Council of the City of Seldovia, that this municipality hereby urges a vote of Do Not Pass on HB 306, and any related Senate bills.

PASSED AND APPROVED THIS _____ day of March, 1979.

Darlene Crawford,
Mayor

ATTEST:

Linda M. Cyr
City Clerk

(SEAL)

April 2, 1979

Dear Legislator:

I am in favor of the 6 per cent raw fish tax.

Kodiak fishermen have not paid a boat tax for the past 15 years. Many fishermen now have million dollar vessels and own interests in seafood processing plants.

Non-fishermen Alaskans are paying taxes for the fishermen.

Many fishing boats are foreign owned and also from the Lower '48. These boat owners catch Alaska's fish and leave the State with the money. The 6 per cent raw fish tax would insure Alaskans a piece of the pie. Fishermen have been free-loading long enough.

By this letter, I am expressing my strong support of needed legislation of a 6 per cent raw fish tax.

Sincerely,

Okey Chandler
Box 1655

* Sec. . AS 43.75.130 is amended to read:

Sec. 43.75.130. REFUND TO LOCAL GOVERNMENTS. The commissioner of revenue shall pay to each organized borough, t- [AND] each city, and to each municipality unified under AS 29.68.240 - 29.68.440, 20 [OF THE FIRST CLASS 10] per cent of the amount of tax revenue collected in the municipality [BOROUGH OR CITY] from taxes levied by AS 43.75 [AS 43.75.010 - 43.75.090]. If tax revenue is collected in a city within a borough, the department shall pay an amount equal to 10 per cent of the amount of revenue collected in the city within the borough to the city and the same amount to the borough.

* Sec. . AS 43.18 is amended by adding new sections to read:

ARTICLE 5. GRANTS FOR FISHERIES PROJECTS.

Sec. 43.18.500. GRANTS FOR FISHERIES PROJECTS. (a) The fisheries facilties grant account is established in the general fund. An amount to carry out the provisions of (b) of this section may be appropriated annually by the legislature to the account.

(b) Within the limits of legislative appropriations for this purpose, the commissioner may make grants to municipalities receiving shared fisheries tax revenues under AS 43.75.130. A grant provided under this section may not exceed 13 1/3 per cent of the amount of revenue collected in the municipality from the tax levied and collected under AS 43.75. The commissioner may make a grant to a municipality under this section only if the municipality demonstrates to the commissioner's satisfaction that the grant will be used on a fisheries project.

(c) In this section,

(1) "commissioner" means the commissioner of [ ];

(2) "fisheries project" means a dock or comparable facility which may be used for the transfer or transportation of fishery products, including all utilities necessary to service the project;

(3) "municipality" means a borough, home rule or general law city, or a municipality unified under AS 29.68.240 - 29.68.440;

IN THE SENATE

HOUSE CS FOR CS FOR SENATE BILL NO. 132

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to fisheries taxes; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. The legislature finds that the state has

(1) funded and implemented several fisheries-related development programs;

(2) funded and implemented fishery loan programs;

(3) increased its fishery protection and management program;

(4) funded and implemented a limited entry program; and

(5) embarked on a program of encouraging the development of a bottom fishing industry.

* Sec. 2. PURPOSE. The purposes of this Act are to

(1) insure that the state is able to continue its efforts toward overall fisheries-related development programs by raising additional revenue to pay for the programs;

(2) make the imposition of the fisheries tax more uniform among fisheries businesses; and

(3) provide funding for the development of new fisheries.

* Sec. 3. AS 43.75 is amended by adding new sections to read:

Sec. 43.75.011. FISHERIES BUSINESS LICENSE. A person engaging or attempting to engage in a fisheries business shall first apply for and obtain a license as provided in AS 43.75.020.

Sec. 43.75.015. FISHERIES BUSINESS TAX. (a) A person engaged in a fisheries business is liable for and shall pay a tax equal to five per

cent of the value of the fishery resource processed by his fisheries business during the year.

(b) A person engaging or attempting to engage in a fisheries business who actually and physically processes the fishery resource is liable for and shall pay to the department the whole tax imposed by this section. In determining this tax liability, the person may not deduct from the value of the fishery resource processed the value of fishery resources canned or processed for other fisheries businesses, but shall include this as part of the value of the fishery resources canned or processed.

Sec. 43.75.017. CREDIT. A person engaged in a fisheries business is allowed as a credit against the tax due under this chapter an amount equal to one-half of the amount which he paid during the tax year as an assessment under AS 16.10.530 - 16.10.540. The credit authorized by this section may not exceed 50 40 per cent of the taxpayer's total tax liability under this chapter before application of the credit authorized by this section.

Sec. 43.75.131. TAX SHARING WITH MUNICIPALITIES. The legislature may annually appropriate to each borough, to each city of the first class, and to each municipality unified under AS 29.68.240 - 29.68.440, an amount equal to 20 33 1/3 per cent of the amount of tax revenue collected in the municipality from taxes levied in this chapter. If tax revenue is collected in a city within a borough, the legislature may divide the tax revenue appropriated under this section between the city and the borough.

Sec. 43.75.136. PAYMENTS TO COMMERCIAL FISHING AND AGRICULTURE BANK. The legislature may annually appropriate 33 1/3 per cent of the amount of tax revenue collected under this chapter to the Commercial Fishing and Agriculture Bank established in AS 44.54.010 until the bank

is fully capitalized as determined by the commissioner of commerce and economic development based upon the estimated capital needs of the bank

Sec. 43.75.140. DEFINITIONS. In this chapter

(1) "department" means the Department of Revenue;

(2) "fisheries business" means a person who engages in processing fisheries resources for sale by freezing, cooking, salting, or other method and includes but is not limited to canneries, cold storages, freezer ships, and processing plants;

(3) "fishery resource" means fin fish, shellfish and fish by-products, including but not limited to salmon, halibut, herring, crab, clam, cod, shrimp, and pollock;

(4) "value" means the actual price paid for the fisheries resource by the fisheries business including indirect consideration such as fuel, supplies, or gear, except that "value" means the market value of the fishery resource if procured in company-owned or subsidized boat operated by employees of the fisheries business or under lease or other arrangement.

* Sec. 4. AS 43.75.100 is repealed and re-enacted to read:

Sec. 43.75.100. TAX IMPOSED ON TAKING OF FISHERY RESOURCE. (a) person taking, purchasing, or otherwise acquiring a fishery resource covered by this chapter which has not been subject to the tax imposed i AS 43.75.015 who sells the fishery resource to a fisheries business outside the taxing jurisdiction of the state is subject to the tax set out in AS 43.75.015 on the value of the fishery resource sold.

(b) A person paying the tax imposed by (a) of this section may claim the tax credit authorized by AS 43.75.017.

* Sec. 5. AS 43.75.030(a) is amended to read:

(a) A person subject to the tax shall file a return stating the value of [RAW] fisheries <u>resources</u> [PRODUCTS] processed during the

license year, computed as required by [AS 43.75.010 - 43.75.050 OF] this chapter, and such other information as the department prescribes by regulation. The return shall show the license number and shall be signed by the taxpayer or his authorized agent, under penalty of perjury. If a receiver, trustee, or assign is operating the property or business, he shall file the return for the person. A tax due on the basis of such a return shall be collected in the same manner as if collected from the person of whose business he has custody and control.

* Sec. 6. AS 43.75.030(e) is amended to read:

(e) Every person engaging or attempting to engage in a business for which a license is required under [AS 43.75.010 - 43.75.050 OF] this chapter shall keep [SUCH] records, make [SUCH] statements under oath, file [SUCH] returns, and comply with all [SUCH] regulations which [AS] the commissioner of revenue may prescribe.

* Sec. 7. AS 43.75.050(f) is amended to read:

(f) A person who wilfully fails to obtain a license, pay a tax, make a return, keep or display a record, or supply the information at the time required by law or regulation, in violation of [AS 43.75.010 - 43.75.055 OF] this chapter, is, in addition to other penalties provided by law, guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both, together with the cost of prosecution.

* Sec. 8. AS 43.75.055 is amended to read:

Sec. 43.75.055. SECURITY FOR COLLECTION OF TAXES. Each applicant for a license under this chapter shall, in or with his application, state under oath the amount of each of the products which he expects to produce during the license year. The applicant shall further state the extent of lienable real property owned by the applicant in the state against which the tax may be collected and other information with

respect to description, location and value of the property which the department prescribes. If the lienable value of the property is not equal to three times the amount of the tax for which the applicant will probably be liable under this section, the department may not issue the license until the applicant files with the department a surety bond approved by the attorney general in a penal sum equal to twice the probable amount of the tax for which the applicant will be liable, conditioned upon payment of the tax in full when due, with interest if not paid before delinquency. However, if the applicant purchases salmon for export from Alaska in the round, the amount of the bond is $50,000 unless the applicant is the owner of lienable real property in the state of a value of at least $50,000, and the bond must be conditioned upon payment to the fisherman of the full purchase price for the salmon and the payment of the tax in full when due. The department may waive the bond requirement if the applicant posts other security in the form of collateral acceptable to the department or prepays the estimated tax.

* Sec. 9. AS 43.75.110 is amended to read:

Sec. 43.75.110. DUTY OF TAXPAYER AND PAYMENT OF TAX. A person subject to taxes under AS 43.75.100 - 43.75.120 shall make a return stating the value of [RAW] fisheries resources [PRODUCTS] taken, purchased, or otherwise acquired during the license year for sale to fisheries businesses [FREEZER SHIPS, FLOATING COLD STORAGES, OR FLOATING CANNERIES] outside of the taxing jurisdiction of the state computed as required by AS 43.75.100 - 43.75.120, and other information to carry out the provisions of AS 43.75.100 - 43.75.200 as may be prescribed by the department. The return shall contain the license number and shall be signed by the taxpayer or his authorized agent, under penalty of perjury. If a receiver, trustee, or assign is operating the property or business, he shall make the return for the person. A tax due on the

basis of such return shall be collected in the same manner as if collected from the person of whose business he has custody and control. The requirements for time and place of payment of tax, and the obligation to keep records and make the records available to the commissioner of revenue are the same as those prescribed in AS 43.75.011 - 43.75.050 [THE BUSINESS LICENSE TAX LAW FOR SALMON CANNERIES].

* Sec. 10. AS 43.75.120 is amended to read:

Sec. 43.75.120. VIOLATIONS AND PENALTIES. (a) The liability to file returns and pay interest and deficiency assessments, and the subjection of property to liens is the same as prescribed in AS 43.75.011 43.75.050 [THE BUSINESS LICENSE TAX LAW FOR SALMON CANNERIES].

(b) A violation of AS 43.75.100 - 43.75.120 or the regulations issued under AS 43.75.100 - 43.75.120 is a misdemeanor subject to punishment as prescribed in AS 43.75.011 - 43.75.050 [THE BUSINESS LICENSE TAX LAW FOR SALMON CANNERIES].

* Sec. 11. AS 29.53 is amended by adding a new section to read:

Sec. 29.53.162. TAX ADJUSTMENT FOR PROPERTY OF PERSONS ENGAGED IN CERTAIN FISHERIES BUSINESSESS. (a) The borough shall allow as a credit against the tax levied on the real property of a taxpayer used by the taxpayer in the processing of fisheries resources the amount of tax paid under AS 43.75.015 and 43.75.100 during the preceding tax year of the borough on the processing of a fish species designated by the commissioner of fish and game as a developing commercial species under AS 16.05.050(12). The tax credit may not exceed the taxpayer's tax liability to the borough under this chapter.

(b) A taxpayer claiming the tax credit provided in (a) of this section shall furnish with the tax payment a copy of his return filed with the Department of Revenue under AS 43.75.030(e) indicating his liability for, and payment of, fisheries taxes under AS 43.75 during t

preceding calendar year. A taxpayer claiming the tax credit provided in (a) of this section who, during the previous year, has processed both fish species designated by the commissioner of fish and game as developing commercial species and fish species which have not been so designate shall include a certified statement indicating the proportion of the total fisheries resource attributable to species designated by the commissioner of fish and game and for which a credit is claimed under this section.

(c) If the property for which a tax credit is claimed under this section is located inside a city within a borough and each municipality levies and collects a property tax, the tax credit allowed to the taxpayer

(1) against the tax due the city is the amount of tax paid under AS 43.75.015 and 43.75.100 attributable to developing commercial fish species designated by the commissioner of fish and game multiplied by the ratio of the city's property tax rate to the total property tax rate levied by the city and the borough;

(2) against the tax due the borough is determined by subtracting from the total tax credit allowed, the amount determined under (1) of this subsection.

* Sec. 12. AS 16.05.050 is amended by adding a new paragraph to read:

(12) not later than October 31 of each year, designate and provide to the commissioners of revenue and community and regional affairs the names of those species of fish of which there is a significant supply and for which there is a developing commercial market.

* Sec. 13. AS 43.75.010, 43.75.060, 43.75.070, 43.75.080, 43.75.090, 43.75.095, 43.75.130, and 43.75.135 are repealed.

* Sec. 14. TRANSITION. The taxes paid for the 1978 calendar year under AS 43.75 shall be shared with municipalities in accordance with AS 43.75.130

and 43.75.135, as those sections read before repeal by this Act. The taxes paid for the 1979 calendar year and for each succeeding calendar year may be shared with municipalities in accordance with AS 43.75.131, added by sec. 3 of this Act.

* Sec. 15. TREATMENT OF HALIBUT. For purposes of AS 16.05.050(12), added by sec. 12 of this Act, halibut is designated a developing commercial fish species. The designation of halibut as a developing commercial fish species ceases when the commissioner of fish and game no longer designates halibut as a species of which there is a significant supply and for which there is a developing commercial market.

* Sec. 16. Sections 1 - 10, 13 and 14 of this Act are retroactive to January 1, 1979.

* Sec. 17. Sections 1 - 10, 13, 14 and 16 of this Act take effect immediately in accordance with AS 01.10.070(c). Section 11 of this Act take effect January 1, 1980. Sections 12 and 15 of this Act take effect July 1, 1979.

Senator Jay Kertulla-

Seward vitally needs this revenue sharing. Filing of application was late due to an inadvertent error. Kerttula feels perhaps the Commissioner of C&RA felt she had to be particularly careful in regard to this funding as the request was from her home district. Thinks that this was unnecessary and that the late filing communities should receive the funds.

Palmer McCarter--Dept. of C&RA

Reiterrated the Dept.'s position that there had to be some cut off date for the administration of the program.

Parr--suggests that a late filing penalty might be considered.

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Sterling Gallagher-- Consutant with John Nuveen
Discussed proposed amendment and need for it. Provisions of AS 29.58,200-220 which govern the issuance of revenue bonds by a general law municipalitiy such as the Fairbanks North Star Borough do not allow for the authorization of revenue bonds for the purpose of acquiring home mortgages. The proposed amendment would provide the requisite assurance that revenue bonds issued by the Borough would be valid.

Larry Kimball, Dept. of C&RA
Discussed Dept. support of amendment suggested by Ketchikan Gateway Borough (see attached letter) re responsibility of the borough in regard to fun .ion as board of adjustment,

Discussion followed on inclusion of "election as large" as an option in the reapportionment plan. Branson opposed to "at large" concept but will go along with it.Metcalf suggests that there be a dual vote on the reapportionment plan, that a majority inside and outside of the cities support it for passage. This concept is not given committee support.

Concensus of the committee is to support the House CS for CSSB137 which incorporated HB 384, Apportionment and Composition of Borough Assemblies, and to add amendment proposed by Sterling Gallagher. Election at Large concept is to be retained as an option in the House CS.

COMMITTEE ACTION: House CS passed out.

TAPE # 8 SIDE 1 Sections 61-1051

Also testifying:

Palmer McCarter & Don ARgetsinger
Support concept of municipalities being given the option of having voting "at large".

Marilyn Miller, Municipal League
Supports concept of "at large" option being included. Six out of 11 municipalities now have "at large" representation including three home rule boroughs.

Randy Phillips
Raises possibility of HB 429 being considered as an amendment to SB137. After discusssion it is decided that HB 429 will be acted upon separately.

KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

April 10, 1979

The Honorable Bill Parker
Chairman, Community & Regional Affairs
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

With regard to CSSB 137 (Rules), Section 10, which amends AS 29.33 .110(a), I would like to offer the following comments and suggestions:

AS 29.33.070(a) says that Boroughs shall provide for planning, platting and zoning on an areawide basis. Paragraph (b) of the same section allows a borough to delegate planning, platting, and zoning responsibilities to the council of a city. AS 29.33.110(a) usurps the borough's prerogative to delegate the responsibility of board of adjustment by stating: " * * * The city council is the board of adjustment for the area within the city boundaries * * * "

There are two cities within the Ketchikan Gateway Borough. The City of Ketchikan is a home-rule city and the City of Saxman is a second-class city. The Ketchikan Gateway Borough provides for planning, platting, and zoning on an areawide basis. The Borough also provides for board of adjustment procedures by ordinance. The City of Ketchikan does not provide for board of adjustment procedures by ordinance, and I doubt the City of Saxman is even aware that they have the responsibility for board of adjustment. Conceivably there could be three different determinations and/or interpretations of the zoning code on similar appeals depending upon where property is located. Title 29 does not provide that these cities will prescribe procedures for appeals. AS 29.33.245 says: " * * * The assembly shall prescribe procedures for hearings and appeals. * * *" I question whether Title 29 has any influence on the home-rule city in the area of zoning. It

appears more logical that the Borough which has a vested interest in zoning regulation because they are charged with enforcing the decisions of the board of adjustment should retain the board of adjustment function unless they so chose to delegate it. Therefore, I suggest . . .

> "(a) The borough assembly is the board of adjustment but may delegate by ordinance part or all of its functions to a city within the borough in accordance with AS 29.33.070(b). * * *"

Your comments and/or questions are welcome.

Sincerely,

KETCHIKAN GATEWAY BOROUGH

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER / POUCH B—JUNEAU 99801

April 26, 1979

The Honorable Bill Parker, Chairman
House Committee on Community &
Regional Affairs
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

At the request of your staff we have reviewed the proposed legislation providing for simultaneous incorporation and unification of municipalities and offer the following comments:

1) The proposal presents a very significant alternative because it does present a one-step option for an area to go from unorganized borough status to home rule unified status, the most sophisticated and antonomous form of local government recognized under State law. In special cases this may be the optimum method of unifying, but it could also be used by areas who wish "automatic antonomy" but do not possess the skills or financial basc to adequately govern as a home rule municipality. This problem of attaining home rule status before a regional local area is prepared to shoulder the responsibilities could occur under the present two-step process but it would be a slower and more deliberate process.

2) Upon unification all cities within the area are dissolved. We feel this may also prove to be a negative aspect of this proposal if a large area opts to unify under this mechanism. Governing a large land area with great distances between populated areas presents many different types of problems which would not confront a small second class city.

3) The proposed legislation requires an area wishing to unify meet borough standards set forth in AS 29.18.030, and that it contain one or more cities. This may allow a single city to make a case that it meets the borough standards and use this legislation to, in effect, unify "with itself" in an attempt to keep from being annexed by an existing borough or block the formation of a newly formed borough. If the precedent is set allowing this "single city unification" Alaska could ultimately, in the extreme case, have hundreds of small unified governments. This would defeat the whole purpose of regional borough government.

4) Although we feel this proposed legislation may fill a need in some instances and this draft is certainly an improvement over earlier proposals, legislation of this magnitude should be subjected to careful review and study, and in our view, is certainly deserving of a full range of public hearings.

We appreciate the opportunity to comment.

Sincerely,

Don Argetsinger

Don Argetsinger
Deputy Commissioner

5B 157

ANALYSIS OF PROPOSED LEGISLATION PROVIDING FOR SIMULTANEOUS INCORPORATION AND UNIFICATION OF MUNICIPALITIES

RE: SECOND DRAFT

Purpose of Proposed Legislation

The proposed addition to Title 29, Chapter 68 would have the effect of allowing the incorporation and unification of a municipality to occur simultaneously. The current statutory scheme provides only for separate incorporation and unification procedures, with A.S. 29.18.050 - 29.18.150 providing for incorporation and A.S. 29.68.240 - 29.68.440 providing for unification.

By allowing the simultaneous incorporation and unification of an area, the State would avoid duplicity of petition and election procedures inherent in the seriatim incorporation and unification procedure currently provided for. Additionally, the State and local governments would avoid the myriad of lawsuits between an incorporated borough and municipal entities within its boundaries which inevitably arise between the time of incorporation and eventual unification.

The proposed legislation, however, is not designed to change existing procedures for separate incorporation and unification. It merely adds a third alternative for those areas which are geographically and sociologically ready to take a single step from the unorganized borough to existing as a unified municipality. In this respect,

the proposed legislation does not take away from the State the prerogatives it has under current legislation for granting or denying petitions to incorporate, or to otherwise supervise the division of the State into organized boroughs. In fact, the proposed legislation would give to the State a greater power of supervision than currently exists, since the State would assume the supervisory functions otherwise performed by a borough concerning the question of unification.

Under the current statutory scheme for separate incorporation and unification, various supervisory functions are performed by the Department of Community and Regional Affairs, the Local Boundary Commission, and the Borough Assembly. For the purpose of effeciency, the proposed legislation for simultaneous incorporation and unification places all of these supervisory functions in the Department of Community and Regional Affairs, except for the functions of the local Boundary Commission under A.S. 29.18.080(b) and A.S. 29.18.090 pertaining to incorporation.

Location in the Statute

The proposed legislation has been drafted as Article 5 of Chapter 68. In effect, a new Article is thereby added to Chapter 68, which will require no amendments to the currently numbered sections in that Chapter. Chapter 68 is an appropriate chapter since it concerns alteration

of boundaries, and Article 3 therein provides for unification of local government. The proposed legislation could not be added as a new Article under Chapter 18 of Title 29, since that Chapter is devoted solely to incorporation.

Section by Section Analysis

Section 29.68.620

This section authorizes a procedure for incorporating and unifying an area at the same time notwithstanding other procedural requirements, including those applicable to separate incorporation or unification. It should be noted that §29.68.840 of the proposed legislation provides that the procedures for simultaneous incorporation and unification do not change the procedures for separate incorporation and unification provided elsewhere.

Section 29.68.630

This section is a blending of the provisions of 29.18.050 and 29.68.250, which respectively provide for the commencement of incorporation and unification procedures by petition. The petition requirements of 29.18.050 are incorporated by reference in the proposed section 640, discussed infra. The provision of 29.68.250 that formation of a Charter Commission may be proposed by resolution of the Assembly is modified to allow initiation by resolution of a first class home rule city within the proposed municipality. There is precedent for allowing a local government body's resolution to affect a surrounding area (§35149 Cal. Govt. Code). This would present no due process violation since the resolution merely proposes the question to be presented to all affected voters.

Section 29.68.640

This section represents a modification of A.S. 29.68.260 to reflect the fact that the petition will be asking for an election on both incorporation and unification. It should be noted that the question to be posed to the voters is not severable into the question of incorporation and the question of unification. In other words, the proposition submitted to the voters would only raise the question of whether the singular procedure of simultaneous unification and incorporation should occur, and there would be no opportunity to vote only for incorporation without unification.

This section also incorporates the provisions of A.S. 29.68.260 concerning the signature requirements for the petition, and the provisions of A.S. 29.18.050 concerning the informational requirements.

Section 29.68.650

This section incorporates the provisions of 29.18.060 and 29.68.270 concerning review of the petition for statutory compliance. This section represents very little change to the current scheme in incorporation procedures, but substitutes the Department of Community & Regional Affairs for the Borough Assembly concerning review of the unification aspect of the petition.

Section 29.68.660

This section incorporates by reference A.S. 29.18.070 concerning investigation, combination of petitions, and the requirement of at least one public hearing on the question of incorporation. It also utilizes the provisions of A.S. 29.18.090, by providing that the Local Boundary Commission makes the final decision on whether the proposed unified municipality

meets the standards for incorporation, with appeal of such decision pursuant to the Administrative Procedure Act.

Section 29.68.670

The source of this new section is 29.68.290. In lieu of requiring the petitions to be filed with "the Borough Clerk", the new section requires filing with the Department of Community & Regional Affairs.

Section 29.68.680

The language of this section is taken from A.S. 29.68.300, with the exception that the new section substitutes the Department of Community & Regional Affairs for the Borough Clerk.

Section 29.68.690

The language of this section is taken from A.S. 29.68.310, except the term "proposed unified municipality" is substituted for the word "borough".

Section 29.68.700

This section consists of a blending of the provisions of A.S. 29.18.110 and 29.68.390, with modifications thereof to reflect the fact that the Department of Community & Regional Affairs shall perform the functions under the new section that would otherwise be performed by either the Local Boundary Commission or the Borough Assembly under the sections for separate incorporation or unification. In the election provided for by this section, the voters will address the question of simultaneous unification incorporation and, if the petition passes, elect charter commission members. It should be noted that this section

does not provide for election of initial officers, since that will occur after ratification of the charter. See discussion of §29.68.790, infra.

Section 29.68.710

This section uses the election scheme of A.S. 29.18.110 in that a simple majority of all votes cast within the boundaries of the proposed unified municipality will approve the proposition for simultaneous incorporation and unification. Since initial incorporation of an area has as much, if not greater, impact upon the individuals residing in that area as unification would have, and since A.S. 29.18.110 currently requires only a simple majority vote to approve of incorporating an area, it is felt that the same simple majority requirement can be fairly applied to that portion of the proposition pertaining to unification.

Section 29.68.720

This section is an adaptation of A.S. 29.68.330, describing how the Charter Commissioners are elected in the charter election.

Section 29.68.730 thru 29.68.830

These sections are basically adaptations of A.S. 29.68.340 to 29.68.440, with some exceptions noted below, and with changes in language to reflect the fact that the Department of Community & Regional Affairs would be performing the functions pertaining to unification procedures which would otherwise be performed by a borough in the current statutory scheme, and to reflect the fact that the entity within which

the procedures occur is a "proposed unified municipality" instead of a borough.

Proposed §29.68.730(g) provides that the expenses incurred by the Charter Commission will be borne by the State, since there would be no existing borough to bear the costs.

The lack of an existing borough also was the basis for the provision in proposed §29.68.750 whereby public hearings would occur in each area represented by the eight charter commission members not elected at large, rather than areas represented on the "Borough Assembly" as provided by A.S. 29.68.360.

Proposed §29.68.780 deviates from its source (A.S. 29.68.390) by providing that the Department of Community and Regional Affairs perform functions that §29.68.39 required of a borough clerk, and by ommitting the filing of the ratified charter with a borough clerk.

Additionally, §29.68.78(d) provides for three chances to ratify the charter, instead of two, as provided under A.S. 29.68.390.

The provisions of A.S. 29.68.390(e), relating to borough assembly appointments to Charter Commission vacancies, have not been incorporated into the proposed legislation. The reason is that there would be no borough assembly to make such appointments in an area seeking simultaneous incorporation and unification. The Charter Commission will still be able to fill vacancies pursuant to the provisions of §29.68.730(e), which was adapted from A.S. 29.68.340(e).

Proposed §26.68.790 provides for election of initial officers of the unified municipality in an election to be held after ratification of the charter. It is reasonable to delay the election of initial officials until the candidates and voting public know what kind of government will be established by

by the charter. The procedural aspects of the nomination and election of initial officers, as well as qualification requirements, are adapted from A.S. 29.18.120. Of course, the ratified charter should not become effective until there are elected officers to run the new government, so this proposed section provides that the charter takes effect the same day as the newly elected officers are certified. The effect of the charter will be to dissolve all local governments within the area of unification in accordance with the charter, which is currently provided for under A.S. 29.68.400.

Section 29.68.840

This section provides that current legislation on incorporation and unification as separate procedures will remain intact. In short, the proposed legislation will apply only to simultaneous incorporation and unification. A borough which has already incorporated and now wishes to unify would, therefore, still proceed under the provisions of 29.68.240 thru 29.68.440 for separate unification. By the same token, an area within the unorganized borough which desires to only incorporate would proceed according to the provisions of A.S. 29.18.050 thru 29.18.150.

The effect of this section, therefore, is to prevent legislative repeal of any of the provisions in currently existing legislation pertaining to incorporation and unification of municipal entities.

SECOND DRAFT

Amendment proposed for addition to SB 177 - not considered

Article 5. Simultaneous
Incorporation and Unification

Sec. 29.68.620. SIMULTANEOUS INCORPORATION AND UNIFICATION AUTHORIZED. Notwithstanding other provisions of law relating to incorporation and unification, an area conforming to the standards set forth in A.S. 29.18.030, which contains one or more cities within its proposed boundaries, may simultaneously incorporate and unite to form a single unified municipality by complying with this chapter.

Sec. 29.68.630. SIMULTANEOUS INCORPORATION AND UNIFICATION TO BE PROPOSED BY PETITION OR RESOLUTION. Simultaneous incorporation and unification of an area shall be proposed by filing a petition with the Department of Community and Regional

Affairs conforming with the requirements of section 640 of this chapter, or by resolution of the council of a first class home rule city within the proposed unified municipality. Such a resolution shall present the proposition required in §640(a) of this chapter, include all information required by §640(c), and shall be presented to the Department of Community and Regional Affairs. Such a resolution may be adopted not more often than once every 12 months.

Sec. 29.68.640. PETITION REQUIREMENTS.

(a) The petition shall read:

"PETITION FOR ELECTION CONCERNING SIMULTANEOUS INCORPORATION AND UNIFICATION AND ELECTION OF CHARTER COMMISSION TO PROPOSE UNIFICATION CHARTER

We, the undersigned, qualified voters of the proposed unified municipality do hereby petition that the following proposition be placed before the voters within the proposed unified municipality as provided by law:

'Shall there be simultaneous incorporation of the area described as

and formation of a charter commission (the charter commission members to be elected as elsewhere provided in this ballot) to prepare, adopt and submit to the voters for their approval or rejection a proposed charter uniting the incorporated area and all cities within it as a single unit of home rule government having the powers,

duties and functions of a unified government as authorized by law?

Yes [ ] No [ ]'

Signature	Address	Inside First Class or Home Rule City	Outside First Class or Home Rule City"

(b) The petition shall be signed by at least

(1) that number of qualified voters within the proposed unified municipality who live outside of all first class and home rule cities in the proposed unified municipality equal to 25 per cent of the qualified voters who voted in the last general election; and

(2) that number of qualified voters residing in each first class and home rule city located within the proposed unified municipality equal to 25 per cent of the qualified voters who voted in the last general election in each city.

(c) The petition shall include all information about the proposed unified municipality which is required by A.S. 29.18.050.

Sec. 29.68.650. REVIEW. The Department of Community and Regional Affairs shall review the petition to determine whether it complies with §640 of this chapter. A deficient petition shall be immediately returned to the person who initiated it with a statement indicating which requirements have not been satisfied.

Sec. 29.68.660. INVESTIGATION AND CALL FOR CHARTER COMMISSION NOMINATIONS. Once it is determined by the Department of Community and Regional Affairs that a petition meets the requirements of §640 of this chapter, the following actions shall be taken:

(1) the Department of Community and Regional Affairs shall comply with the provisions of A.S. 29.18.070 and A.S. 29.18.080(a), concerning the incorporation aspects of the petition or resolution;

(2) the Local Boundary Commission shall comply with the provisions of A.S. 29.18.080(b) and A.S. 29.18.090 concerning the incorporation aspects of the petition or resolution.

(3) if the Local Boundary Commission determines that the proposed municipality meets the standards for incorporation, it shall accept the petition or resolution and the Department of Community and Regional Affairs shall issue a call for the nomination of charter commission candidates, specifying the filing deadline and outlining the procedure described for making nominations under §670 of this chapter.

Sec. 29.68.670. NOMINATION OF CHARTER COMMISSION CANDIDATES. (a) Charter commission candidates shall be nominated by a petition signed by at least 50 qualified voters of the area within the proposed unified municipality from which the candidate seeks election or by a number of qualified voters from that area equal to at least 10 per cent of the number of votes cast from that area in the last general election, whichever is less.

(b) Nomination petitions shall be filed with the Department of Community and Regional Affairs on or before the date set by the Department of Community and Regional Affairs, which date shall not be less than 30 days

after notice of the call for nominations has been given by the Department of Community and Regional Affairs.

Sec. 29.68.680. QUALIFICATIONS OF CHARTER COMMISSION CANDIDATES. A person is eligible to be nominated as a candidate for the charter commission if he has been a qualified voter of the area within the proposed unified municipality from which he seeks election for at least one year immediately preceding the date his nomination petition is filed with the Department of Community and Regional Affairs.

Sec. 29.68.690. COMPOSITION OF CHARTER COMMISSION. The charter commission members shall be qualified voters and shall consist of 11 members, three of whom shall be residents elected at large from the area of the proposed unified municipality and 8 of whom shall be (1) residents of and elected from the area outside cities in the proposed unified municipality or (2) residents of and elected from a city or cities in the proposed unified municipality. The number representing

each of these areas shall be proportionate to the respective populations as determined by the Department of Community and Regional Affairs.

Sec. 29.68.700. ELECTION. (a) After accepting the petition or resolution for simultaneous incorporation and unification, and after the date fixed for receiving nominations for charter commission candidates, the Department of Community and Regional Affairs shall immediately notify the lieutenant governor of its acceptance of the petition. Within 30 days after notification, the lieutenant governor shall order an election in the proposed unified municipality to determine whether the voters desire simultaneous incorporation and unification of the proposed unified municipality. The election shall be held not less than 30 nor more than 90 days after the date of the election order.

(b) The ballot on the question of simultaneous unification and incorporation shall be worded exactly as provided in §640(a) of this chapter.

(c) The election of charter commission members shall take place at the same time as the election on the question of simultaneous incorporation and unification. If the petition fails, no charter commission members are elected.

(d) An Alaska voter who has been a resident of the area within the proposed unified municipality for 30 days before the date of the election order may vote.

(e) The lieutenant governer shall supervise the election in the general manner prescribed by the Alaska Election Code (A.S. 15.05 - 15.60). The State shall pay all election costs under this section.

Sec. 29.68.710. REQUIREMENTS FOR APPROVAL OF SIMULTANEOUS INCORPORATION AND UNIFICATION. If a majority of the votes cast within the boundaries of the proposed unified municipality favors the proposition for simultaneous incorporation and unification, the proposition shall be approved.

Sec. 29.68.720. REQUIREMENTS FOR ELECTION OF CHARTER COMMISSION. If simultaneous incorporation and unification is approved, those charter commission

candidates who received the highest number of votes from their respective areas shall serve as members of the commission.

Sec. 29.68.730. CHARTER COMMISSION ORGANIZATION AND PROCEDURE. (a) The charter commission authorized by this chapter shall hold its first meeting within 30 days of the date of certification of its election. The commission shall elect from among its members a chairman and a deputy chairman.

(b) A majority of the total membership of the charter commission constitutes a quorum. No decision of the commission is valid or binding unless approved by that number of members necessary to constitute a quorum.

(c) The charter commission may elect other officers from among its membership, adopt rules governing its procedures and hire and discharge commission employees. Rules adopted must conform with the provisions of this chapter.

(d) Meetings of the charter commission shall be open to the public at all times. A journal of commission proceedings shall be kept and shall be available for public inspection at the Department of Community and Regional Affairs.

(e) Vacancies on the charter commission shall be filled by a majority vote of the commission. The person appointed to fill a vacancy must be a qualified voter of the same area as the person whom he succeeds and must have been a qualified voter of that area for at least one year immediately preceding the date of his appointment.

(f) The Department of Community and Regional Affairs may grant a per diem allowance to the commission members and may reimburse the members for travel expenses incurred in carrying out the duties prescribed by this chapter.

(g) Costs, fees, and other expenses incurred by the charter commission shall be paid by the State.

Sec. 29.68.740. CHARTER PREPARATION. (a) A charter commission established under this chapter shall prepare, adopt and submit a proposed home rule charter for the area to be unified to the voters for approval or rejection at an election called by the Department of Community and Regional Affairs and held within 60 days of the date of publication and posting of the proposed charter as required in §770 of this chapter. The charter shall include among its provisions:

(1) provisions for adjustment of existing bonded indebtedness and other obligations in a manner which will reserve a fair and equitable burden of taxation for debt service, subject to §800 of this chapter;

(2) provision for the establishment of

(A) service areas;

(B) sections, if desired; and

(C) reapportionment of the sections, if established;

(3) provision for nonpartisan government and provision for the selection, organization, authority and responsibilities of the governing body and its executive and administrator;

(4) the transfer or other disposition of property and other rights, claims, assets and franchises of the local government to be unified under the charter;

(5) provision for exercise of the rights of initiative and referendum as required by A.S. 29.13.050;

(6) a method of amending the charter;

(7) the date on which the charter, if approved at the charter election required by §780 of this chapter, is effective;

(8) designation of the new unified municipality's official name, subject to the provisions of (b) of this section;

(9, other charter provisions which the charter commission elects to include and which may be included in a home rule charter under this chapter and the state constitution.

(b) The area to be unified shall be known as a borough or a city or by some other designation consistent with existing law.

Sec. 29.68.750. PUBLIC HEARINGS. Both before and after drafting the proposed charter, the charter commission shall hold a public hearing in each area of the proposed unified municipality represented on the charter commission by the eight charter commission members who were not elected at large. Other public hearings may be held by the charter commission whenever and wherever it believes necessary and appropriate.

Sec. 29.68.760. FILING OF PROPOSED CHARTER. Upon the adoption of a proposed home rule charter by the charter commission, the charter shall be signed by at least a majority of the total membership of the commission and shall be filed with

the Department of Community and Regional Affairs. A copy with signatures affixed shall also be filed with the clerk of each city within the proposed unified municipality.

Sec. 29.68.770. PUBLICATION AND POSTING OF PROPOSED CHARTER. Within 10 days after filing the proposed charter, the Department of Community and Regional Affairs shall have it published once in at least one newspaper having general circulation distributed within the proposed unified municipality, if there is a newspaper having general circulation distributed within the proposed unified municipality. In addition, the Department of Community and Regional Affairs shall have a copy of the proposed charter posted in at least three public places within each city of the proposed unified municipality and each area outside cities. Copies of the proposed charter shall be made available by the Department of Community and Regional Affairs to the public at both the office of the Department of Community and Regional Affairs and the office of the clerk of each city within the proposed unified municipality. The Department of Community and Regional Affairs shall publish notice by radio and television of the publication, posting, and availability of the proposed charter in a manner intended to apprise the entire proposed unified municipality population of the existence of the proposed charter.

Sec. 29.68.780. ELECTION ON CHARTER.

(a) The proposed charter adopted by the charter commission shall be submitted to the voters at the election specified in §740 of this chapter. The Department of Community and Regional Affairs shall prepare the ballots for use in the election in the manner in which regular municipal elections are conducted. In addition, the Department of Community and Regional Affairs shall publish notice of the election by radio and television in a manner intended to apprise the entire proposed unified municipality population of the election.

(b) A person who is a qualified voter within the proposed unified municipality may vote in the election on the proposed charter.

(c) If a majority of the votes cast in the area of the proposed unified municipality outside all first class and home rule cities and a majority of the votes cast in the remaining area of the proposed unified municipality, composed of all first class and home rule cities, are cast in favor of the proposed charter, the charter is ratified. If the charter is ratified, two copies of the charter shall be filed with each of the following authorities:

(1) lieutenant governor;

(2) commissioner of the Department of Community and Regional Affairs;

(3) district recorder for the area of the unified municipality;

(4) clerk of each city in the unified municipality.

(d) If a proposed charter is rejected, the charter commission shall prepare, adopt and submit another proposed charter to the voters within the proposed unified municipality at a general election, or a special election called by the Department of Community and Regional Affairs, held within 120 days of the date of the first charter election. If the second proposed charter is also rejected, the Charter Commission shall submit a third proposed charter to the voters at an election called by the Department of Community and Regional Affairs and held within 120 days of the second charter election. If the third proposed charter is rejected, the Charter Commission shall be dissolved, and the question of simultaneous incorporation and unification shall be treated as if it had never been proposed or approved.

Sec. 29.68.190. [illegible]

OFFICERS AND EFFECT OF RATIFIED CHARTER.

(a) After ratification of the charter, nominations for initial officers of the unified municipality shall be made by petition in the form prescribed by the lieutenant governor which includes the name and address of the nominee and a statement of the nominee that he is qualified under the provisions of this title for the office that he seeks. A person may file for and occupy more than one office, but he may not serve simultaneously as municipal mayor and as member of the municipal assembly or council. Petitions to nominate elected municipal officers must include the signatures and resident addresses of 50 voters in the area of the unified municipality, or that area of the unified municipality from which the officers are to be elected under the composition and apportionment set out in the accepted incorporation petition.

(b) Election of the initial officers shall occur within 90 days after ratification of the charter. The elected initial officers shall take office on the first Monday following certification of their election. The initial elected assembly or council members shall determine by lot the length of their terms of office so that a proportionate number of terms expire each year, resulting in staggered terms of office for members subsequently elected.

(c) The ratified charter becomes effective on the same day that the elected initial officers take office and operates to dissolve all local governments within the area of the unified municipality in accordance with the charter.

Sec. 29.68.800. ASSETS AND LIABILITIES. A municipality created by simultaneous incorporation and unification shall succeed to all the assets and liabilities of the local governments it unified. A bonded indebtedness or other debt incurred before unification shall remain the tax obligation of the area which contracted the debt, except that the tax obligation may be spread over a larger area by ordinance if the governing body determines that the asset for which the bonded indebtedness or other debt was incurred was used for the benefit of the larger area before unification, or is so used after unification. However, pre-unification bonded indebtedness or other debt for sewage collection systems, water distribution systems, and streets, even if determined to be used for the benefit of a larger area than that which incurred the debt, shall remain the tax obligation of the area which incurred the debt.

Sec. 29.68.810. ORIDNANCES. Within two years after ratification of the charter, the governing body of the unified municipality

shall revise, repeal, or reaffirm all city ordinances, resolutions and orders in force within the unified municipality at the time of unification. Each ordinance, resolution, regulation, or order in force at the time of unification shall remain in force until superseded by action of the new governing body.

Sec. 29.68.820. RIGHT TO STATE AND FEDERAL FUNDS PRESERVED. All provisions of law authorizing contributions of any kind, in money or otherwise, from the state or federal government to cities shall remain in full force and effect with respect to a unified municipality organized under §§ 620 - 830 of this chapter.

Sec. 29.68.830. POWERS OF A UNIFIED MUNICIPALITY. A municipality organized under §§ 620 - 830 of this chapter shall have all powers

(1) not prohibited it by law or charter;

(2) granted to organized boroughs and first class cities.

Sec. 29.68.840. EFFECT. §§620 - 830 of this chapter do not modify the procedures for incorporation pursuant to §§29.18.050 - 29.18.150 or for unification pursuant to §§29.68.240 - 29.68.440.

(1) provisions for adjustment of existing bonded indebtedness and other obligations in a manner which will reserve a fair and equitable burden of taxation for debt service, subject to §800 of this chapter;

(2) provision for the establishment of

(A) service areas;

(B) sections, if desired; and

(C) reapportionment of the sections, if established;

(3) provision for nonpartisan government and provision for the selection, organization, authority and responsibilities of the governing body and its executive and administrator;

(4) the transfer or other disposition of property and other rights, claims, assets and franchises of the local government to be unified under the charter;

(5) provision for exercise of the rights of initiative and referendum as required by A.S. 29.13.050;

(6) a method of amending the charter;

(7) the date on which the charter, if approved at the charter election required by §780 of this chapter, is effective;

A message dated May 1, 1979 was read stating the Senate has passed the following and it is returned:

HB 81 HOUSE BILL NO. 81
(trapping license receipts; effective date)

The above bill was referred to the Chief Clerk for enrollment.

HB 359 am A message dated May 1, 1979 was read stating the Senate has adopted the FREE CONFERENCE COMMITTEE Report on HOUSE BILL NO. 359 amended (salmon enhancement and SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 359 amended Senate (enhancement of the salmon fishery through private hatchery development), thus adopting:

FREE CONFERENCE COMMITTEE SUBSTITUTE
FOR HOUSE BILL NO. 359
(relating to salmon enhancement)

REPORTS OF SPECIAL COMMITTEES

CSHB 34 The Free Conference Committee which has had CSHB 34 (preparation and distribution of a taxpayer's summary of the budget) and SCS CSHB 34 (budget and appropriation information) under consideration, recommends that

FCCSHB 34 (relating to budgets, to appropriations, and to fiscal information; and providing for an effective date)

be adopted. The report was signed by Senators Sackett (Chairman), Sumner and Hohman, and Representatives Rogers (Chairman), Duncan and Montgomery.

CONSIDERATION OF THE DAILY CALENDAR

SECOND READING OF SENATE BILLS

CSSB 137 (Rls) COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 137 (Rules) (the municipal code; and providing for an effective date) was read the second time with the Community and Regional Affairs Committee report (page 1144 of the journal)

HCS CSSB 137

Mr. Anderson moved and asked unanimous consent that HOUSE COMMITTEE SUBSTITUTE FOR COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 137 (same title) be adopted in lieu of the original bill. There being no objection, it was so ordered.

Amendment No. 1 by Cotten:

Page 8, line 8

Add new subsection:

"(c) A municipality may also issue revenue bonds for any lawful purpose. The bonds shall be payable from any amounts pledged by the municipality except taxes and shall not constitute general obligations of the municipality."

Mr. Cotten moved and asked unanimous consent that Amendment No. 1 be adopted.

Mr. Miller objected.

The question being: "Shall Amendment No. 1 be adopted?" The roll was taken with the following result:

Yeas:	24	Anderson, Barnes, Bettisworth, Branson, Buchholdt, Carney, Chatterton, Cotten, Halford, Hayes, McKinnon, Malone, Martin, Metcalfe, Montgomery, Moss, Munson, Osterback, Parr, Phillips, Randolph, Schaeffer, Smith, Zharoff.
Nays:	7	Beirne, Freeman, Gardiner, Miller, O'Connell, Parker, Rogers.
Not voting:	9	Brown, Duncan, Eliason, Fuller, Guy, Haugen, Hurlbert, Meekins, Miles.

And so, Amendment No. 1 was adopted.

HCS CSSB 137 amH

Mr. Metcalfe moved and asked unanimous consent that HCS CSSB 137amH be moved to the bottom of the calendar.

Mr. Malone objected.

Mr. Metcalfe withdrew his motion.

Mr. Malone moved and asked unanimous consent that HCS CSSB 137amH be returned to the Rules Committee to be placed on this afternoon's supplemental calendar. There being no objection, it was so ordered.

SB 250 SENATE BILL NO. 250 (continuing the existence of the Alcoholic Beverage Control Board; effective date) was read the second time with the Commerce Committee report (page 1154 of the journal).

HCS SB 250 Mr. Anderson moved and asked unanimous consent that HOUSE COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 250 (terminating the existence of the Alcoholic Beverage Control Board, reassigning its responsibilities to the Department of Commerce and Economic Development, amending laws relating to the department's responsibilities; and providing for an effective date) be adopted in lieu of the original bill. There being no objection, it was so ordered.

Amendment No. 1 by Randolph:

Page 7, line 10

Delete "may in its discretion," and insert "shall"

Page 7, lines 14 through 17

Delete all material after the word "resort"

Mr. Randolph moved and asked unanimous consent that Amendment No. 1 be adopted.

Mr. Miller objected.

The question being: "Shall Amendment No. 1 be adopted?" The roll was taken with the following result:

Yeas:	26	Barnes, Beirne, Bettisworth, Carney, Chatterton, Cotten, Freeman, Halford, Hayes, Hurlbert, McKinnon, Malone, Martin, Metcalfe, Miles, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Randolph, Rogers, Schaeffer.
Nays:	10	Anderson, Branson, Brown, Buchholdt, Eliason, Fuller, Gardiner, Miller, Smith, Zharoff.
Not voting:	4	Duncan, Guy, Haugen, Meekins.

HCS SB 250 amH And so, Amendment No. 1 was adopted.

Mr. Anderson moved and asked unanimous consent that HCSSB 250amH be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

HCS CSSB 137amH (relating to worker's compensation for volunteer ambulance attendants and police), which had been returned to the Rules Committee (page 1289 of the journal), was read the second time. HCS CSSB 137 amH

Amendment No. 2 by Malone:

Page 1, lines 22 and 23:

Delete subsection (a)

Renumber subsequent sections

Mr. Malone moved and asked unanimous consent that Amendment No. 2 be adopted.

Mr. Parker objected.

The question being: "Shall the House adopt Amendment No. 2?" The roll was taken with the following result:

Yeas:	21	Barnes, Bettisworth, Brown, Buchholdt, Chatterton, Cotten, Eliason, Freeman, Gardiner, Halford, Hurlbert, Malone, Martin, Metcalfe, Montgomery, Monson, Osterback, Randolph, Schaeffer, Smith, Zharoff.
Nays:	12	Anderson, Branson, Carney, Fuller, Hayes, Miles, Miller, Moss, O'Connell, Parker, Parr, Phillips.
Not voting:	7	Beirne, Duncan, Guy, Haugen, McKinnon, Meekins, Rogers.

And so, Amendment No. 2 was adopted.

Amendment No. 3 by Metcalfe:

Page 2, line 8:

Replace subsection (c) with the following:

(c) The proposals set out in (b) of this section shall be submitted to the voters. The vote on the proposals submitted to the voters shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and home rule cities in the borough. The other classification shall consist of all votes cast in the remaining area of the borough. The borough assembly shall, within three months of the certification of the results of the election, adopt an ordinance providing for its composition and the form of representation which conforms to the form of representation receiving a plurality of the votes in each classification at that election.

HCS CSSB 137 amH

Mr. Metcalfe moved and asked unanimous consent that Amendment No. 3 be adopted.

Mr. Malone objected and withdrew his objection.

There being no further objection, Amendment No. 3 was adopted.

Mr. Anderson moved and asked unanimous consent that HCS CSSB 137amH be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

HCS CSSB 137amH was read the third time.

The question being: "Shall HCS CSSB 137amH pass the House?" The roll was taken with the following result:

Yeas:	27	Anderson, Beirne, Bettisworth, Branson, Brown, Carney, Chatterton, Cotten, Eliason, Freeman, Fuller, Gardiner, Halford, Hayes, Hurlbert, McKinnon, Malone, Metcalfe, Miles, Montgomery, Moss, Munson, Osterback, Parker, Parr, Randolph, Schaeffer.
Nays:	5	Barnes, Martin, Miller, O'Connell, Phillips.
Not voting:	8	Buchholdt, Duncan, Guy, Haugen, Meekins, Rogers, Smith, Zharoff.

And so, HCS CSSB 137amH passed the House.

Mr. Anderson moved and asked unanimous consent that the roll call on the passage of HCS CSSB 137amH be considered the roll call on the effective date clause. There being no objection, it was so ordered.

Representative Malone served notice of reconsideration on HCS CSSB 137amH on the next legislative day.

SENATE BILL NO. 137 by the Rules Committee by request of the Governor, entitled: SB 137

"An Act relating to the municipal code; and providing for an effective date."

was read the first time and referred to the Community and Regional Affairs Committee.

Fiscal note is zero.

Governor's transmittal letter follows:

February 9, 1979

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting for your consideration a measure to amend certain features of the Alaska Municipal Code to eliminate some of its problems. The bill is very similar to last legislature's CSHB 483 am, which was introduced by the Community and Regional Affairs Committee.

The first section merely specifies when newly elected assemblymen take office correcting an obvious oversight. The second deletes a redundant specification of a borough's mayoral election. AS 29.28.020 specifies the date for all municipal elections. The third section eliminates the altogether unwarranted delay in implementing the manager plan of government. The fourth straightens out the seating date for newly elected councilmen and also eliminates a redundant reference to the date of councilmanic elections.

200

SB 137

Section five adds a provision for emergency meeting of city councils; none now exists. A similar provision for borough assemblies is currently contained in AS 29.23.060(a).

Section six reduces the term of mayor in second class cities from three years (as a rule) to one. The rationale for the change is that a term of one year is ample where, as here, the office is filled by and from the council rather than by a vote of all the voters in the municipality.

Section 7 removes still another redundant reference to municipal election dates. Section 8 places a 60-day deadline on the assembly or council to move ahead with a manager plan following voter approval. Legally, there is no choice on the matter. The manager plan is actually adopted by the voters. The amendment merely tells the courts how long the legislature is giving the council or assembly to act.

Section 9 deletes a cross reference to other sections of the code. The proposed amendment here means that this provision will stay current when and if new areawide powers are added by the legislature. The deletion of the specific cross reference in section 10 (board of adjustment) accomplishes the same result.

Section 11 substitutes the word "borough" for the words "platting board" in identifying who may bring suit to enjoin a prohibited transfer of an interest in realty. It is the borough, and not its platting board, which is the juridical entity to sue and be sued.

Section 12 deletes resolutions from the requirements for codification. As with legislative resolutions, there is no need to codify a municipal resolution. Section 13 revises the language defining the word "codified" and more particularly the word "ordinance." The existing language is meaningless.

Section 14 adds a new provision requiring that resolutions -- which will no longer be codified -- will be kept serially for future reference.

Section 15 revises AS 29.48.200 to conform with the changes recommended for sec. 180.

Section 16 adds a new chapter authorizing municipalities to establish public corporations or other authorities to operate public facilities or services. There is no prohibition against their doing so, and therefore home rule municipalities may do so now. This is a device which investors outside are familiar with, and it should facilitate municipal revenue bonding.

Sincerely,

Jay S. Hammond
Governor

BY THE JUDICIARY AND LEGISLATIVE AFFAIRS COMMITTEE

HOUSE CS FOR CS FOR SENATE BILL NO. 137

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the municipal code; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.23 is amended by adding new sections to read:

Sec. 29.23.021. ASSEMBLY COMPOSITION AND APPORTIONMENT. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If a borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with AS 29.23.[illegible] and prescribed by charter or ordinance.

(c) An assembly may not provide for weighted voting.

Sec. 29.23.023. COMPOSITION AND REPRESENTATION REQUIREMENTS FOR GENERAL LAW [illegible] BOROUGHS. (a) The assembly of a general law borough may not be composed of more than 11 members.

(b) The assembly of a general law borough shall provide, by ordinance, that members of the borough assembly are

(1) elected at large by all qualified voters of the borough, [illegible] live within a particular district as set out in the ordinance by the borough for the election of borough assembly members; or

(2) [illegible] districts or combination districts and at large [illegible]

[illegible] population per delegate

lished by the borough for the election of borough assembly members.

(c) A member of the assembly of a general law borough may not be elected or appointed by and from the council of a city in the borough.

Sec. 29.23.025. ASSEMBLY RECOMPOSITION AND REAPPORTIONMENT. (a) Not later than July 31, 1981, and, thereafter, within four months after the official report of a federal decennial census, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 - 29.23.023.

(b) If the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021 - 29.23.023, the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may change the composition of the assembly.

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 borough voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains a finding that the existing apportionment does not meet those standards, the assembly shall make the determination requested.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. In order for the ordinance to be approved it must receive the approval of a majority of voters voting.

(e) Within [illegible] of a determination by the assembly that the [illegible] of AS 29.23.021 -

29.23.025; the assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the four month time period, an ordinance providing for reapportionment has not been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 - 29.23.023.

(f) A reapportionment ordinance, or a determination of the borough assembly that applicable standards do not require adoption of a change in apportionment, is subject to judicial review.

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which follows approval of a reapportionment ordinance.

* Sec. 2. AS 44.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021; 29.23.025 - 29.23.030 (composition and apportionment of borough assembly, borough assembly reapportionment and reapportionment; assembly representation)

* Sec. 3. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council, but the number of members of a borough assembly may not exceed 11;

* Sec. 4. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are provided by borough charter or ordinance. The regular term of office begins on the first Monday following certification of the election.

TER OR ORDINANCE, OR THEY CEASE TO BE A MEMBER OF EITHER THE ASSEMBL
COUNCIL.] The current term of incumbent assemblymen may not be alte
under this section. This section applies to home rule and general la
boroughs.

* Sec. 5. AS 29.23.130(c) is amended to read:

(c) The borough mayor's regular term of office is three years a
until a successor is elected and has qualified and begins on the firs
Monday following certification of the mayor's [ITS] election [, WHICH
MUST BE THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTIO
IS PROVIDED BY ORDINANCE]. The assembly may provide by ordinance for a
different term not to exceed four years, except that the current term
an incumbent borough mayor may not be altered.

* Sec. 6. AS 29.23.130(d) is amended to read:

(d) A borough may adopt or abandon a manager plan at any time,
provided by AS 29.23.410 - 29.23.490. The borough mayor may veto an
ordinance or resolution calling for an election on this question. The
manager has all the powers and duties of the borough mayor as chief
administrative officer. [IF THE MANAGER PLAN IS ADOPTED, IT BECOMES
EFFECTIVE FOLLOWING CERTIFICATION OF THE RESULTS OF THE FIRST REGULAR
ELECTION OCCURRING AT LEAST SIX MONTHS AFTER ADOPTION OF THE PLAN.]
The borough mayor then serves as borough manager.

* Sec. 7. AS 29.23.260( ) is amended to read:

(c) Councilmen are elected [AS PROVIDED IN AND SUBJECT TO] AS
[29.23.] TUESDAY OF OCTOBER, UNLESS A DIFFERENT ELECTION DATE IS PROVIDED
BY LAW OR PROVIDED BY ORDINANCE, TO [FOR] three-year terms [OF OFFICE]
or until their successors are elected and have qualified. The
[BOROUGH] mayor [SHALL BE] elected [AT THE SAME TIME AND] for the same
[TERM OF OFFICE AS THE COUNCILMEN] unless the assembly by ordinance
provides for a different term not to exceed four years.

incumbent councilmen may not be altered.

* Sec. 8. AS 29.23.210(a) is amended to read:

(a) The council shall meet at least once every month, unless otherwise provided by ordinance. Special meetings may be held on the call of the mayor or two councilmen upon not less than 24 hours written or oral notice communicated to each member. In an emergency, a special meeting called on less than 24 hours notice is a legal meeting if all members are present or there is a quorum and all absent members have waived in writing the required notice. A waiver may be made either before or after the time of the meeting. The waiver shall be attached to and made a part of the journal for the meeting.

* Sec. 9. AS 29.23.250(c) is amended to read:

(c) The mayor of a second class city is elected by and from the council for a term of one year and until a successor is elected and has qualified [EQUAL IN LENGTH TO A COUNCILMAN'S TERM].

* Sec. 10. AS 29.23.250(d) is amended to read:

(d) The mayor's regular term begins on the first Monday following certification of the mayor's [HIS] election [, WHICH IS HELD ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The council of a second class city shall meet on the first Monday after certification of the regular election [DATE] and elect a mayor who takes office immediately.

* Sec. 11. AS 29.23.440(a) is amended to read:

(a) If the manager plan is approved, the assembly or council shall, within 30 days, adopt it by ordinance or resolution.

* Sec. 12. AS 29.23.610(b) is amended to read:

(b) The city, whether it has or has not, may exercise all powers

* Sec. 13. AS 29.33.070(b)(2) and (3) are amended to read:

(2) delegate other planning and zoning powers conferred by this chapter [ADMINISTRATIVE AND ENFORCEMENT RESPONSIBILITIES] to a [THE] city within the borough [, PROVIDED THAT BOROUGH JURISDICTION IS NOT IMPAIRED];

(3) revoke or modify any part or all of the [HIMSELF] powers delegated under this subsection.

* Sec. 14. AS 29.33.110(a) is amended to read:

(a) The assembly is the board of adjustment for areas outside cities. The city council is the board of adjustment for the area within the city boundaries but may delegate by resolution or ordinance part or all of its functions to the borough [, SUBJECT TO AS 29.33.070(b)(2),] in addition to making delegations as provided for an assembly under AS 29.33.245. Meetings of the borough board are held at the call of the presiding officer and of the city board by the mayor. The presiding officer or mayor may administer oaths and compel attendance of witnesses. Meetings and hearings of the board shall be open to the public and the board shall keep minutes of its proceedings as a public record.

* Sec. 15. AS 29.33.190(a) is amended to read:

(a) The owner or agent of the owner of land located within a subdivision who transfers, sells, or enters into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and recorded, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500 for each lot or parcel transferred, sold, or included in a contract to be sold. The borough [CITY] may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action.

* Sec. 16. AS 29.33.250(a) is amended to read:

(a) [EXCEPT AS PROVIDED IN AS 29.33.070(b)(2), THIS SUB-

ated.

* Sec. 17. AS 29.48.180(c)(3) is amended to read:

(3) the ordinance is a provision which establishes a rule of conduct or behavior and which is included, or to be included, in a code of ordinances or other complete system of [POSITIVE] law enacted [PROMULGATED BY THE COUNCIL] and kept current [BY THE CITY] at reasonable intervals.

* Sec. 18. AS 29.48 is amended by adding a new section to read:

Sec. 29.48.185. RESOLUTIONS. The assembly or council shall provide for the maintenance of a permanent file of resolutions that have been adopted.

* Sec. 19. AS 29.48.200 is amended to read:

Sec. 29.48.200. PENALTIES. For the violation of an ordinance, the assembly or council may prescribe a punishment not to exceed a fine of $500 or imprisonment for 30 days, or both. However, the punishment authorized under this section may be imposed only if [AN ORDINANCE IS CODIFIED AND] copies of the ordinance are made available for distribution to the public at cost.

* Sec. 20. AS 29.53.065(b)(2) is amended to read:

(2) a claimant receiving the exemption must file with the municipality by March [JANUARY] 15 of each subsequent year a separate declaration proving eligibility as of January 1 in order to retain the exemption; within the same year the assessor [THE ASSESSOR OR BOARD] for good cause shown may excuse the claimant's failure to make a timely application and approve the application as if timely filed;

* Sec. 21. AS 29.53.070 is repealed.

* Sec. 22. AS 29.53.080 is repealed.

* Sec. 23. The uncodified law of the State of Alaska is amended by sec. 4 of this Act,

borough assembly - city council seats are not affected by the amendment made to AS 29.25.040 in sec. 4 of this Act until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 31 of this Act, or is effected as required or proposed under AS 29.23.021 - 29.23.025, added by sec. 1 of this Act.

* Sec. 24. Sections 1 - 3 and 21 of this Act take effect January 1, 1981. Sections 4 - 20, 22 and 23 of this Act take effect immediately in accordance with AS 01.10.070(c).

IN THE SENATE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

SENATE BILL NO. 137

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the municipal code; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. The regular term of office begins on the first Monday following their election. However, if under a borough apportionment city councilmen are appointed as assemblymen or elected to dual assembly-council seats, they may not be replaced until their assembly term expires as provided by city charter or ordinance, or they cease to be a member of either the assembly or council. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs.

* Sec. 2. AS 29.23.130(c) is amended to read:

(c) The borough mayor's regular term of office is three years and until a successor is elected and has qualified and begins on the first Monday following his election [, WHICH IS HELD THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The assembly may provide by ordinance for a different term not to exceed four years, except that the current term of an incumbent borough mayor may not be altered.

* Sec. 3. AS 29.23.130(d) is amended to read:

(d) A borough may adopt or abandon a manager plan at any time, as provided in secs. 410 - 480 of this chapter. The borough mayor may not veto an ordinance or resolution calling for an election on this question. The manager has all the powers and duties of the borough mayor as chief administrative officer. [IF THE MANAGER PLAN IS ADOPTED, IT BECOMES EFFECTIVE FOLLOWING CERTIFICATION OF THE RESULTS OF THE FIRST REGULAR ELECTION OCCURRING AT LEAST SIX MONTHS AFTER ADOPTION OF THE PLAN.] The borough mayor then serves as borough executive.

* Sec. 4. AS 29.23.200(c) is amended to read:

(c) Councilmen are selected [AN ELECTION IS HELD ANNUALLY ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT ELECTION DATE OR INTERVAL OF YEARS IS PROVIDED BY ORDINANCE, TO CHOOSE COUNCILMEN] for three-year terms and until their successors are elected and have qualified. The regular term of office begins on the first Monday following the election. The council may provide by ordinance for different terms not to exceed four years, except that the current term of incumbent councilmen may not be altered.

* Sec. 5. AS 29.23.210(a) is amended to read:

(a) The council shall meet at least once every month, unless otherwise provided by ordinance. Special meetings may be held on the call of the mayor or two councilmen upon not less than 24 hours written or oral notice communicated to each member. In an emergency, a special meeting called on less than 24 hours notice is a legal meeting if all members are present or there is a quorum and all absent members have waived in writing the required notice. A waiver may be made either before or after the time of the meeting. The waiver shall be attached to and made a part of the journal for that meeting.

* Sec. 6. AS 29.23.250(c) is amended to read:

(c) The mayor of a second class city is elected by and from the council for a term of one year and until a successor is elected and has qualified [EQUAL IN LENGTH TO A COUNCILMAN'S TERM].

* Sec. 7. AS 29.23.250(d) is amended to read:

(d) The mayor's regular term begins on the first Monday following his election [, WHICH IS HELD ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The council of a second class city shall meet on the first Monday after the regular election date and elect a mayor who takes office immediately.

* Sec. 8. AS 29.23.440(a) is amended to read:

(a) If the manager plan is approved, the assembly or council shall, within 60 days, adopt the plan by ordinance or resolution.

* Sec. 9. AS 29.33.010(b) is amended to read:

(b) No city, whether home rule or not, may exercise an areawide power [CONFERRED IN, OR ASSUMED BY MEANS OF SECS. 250 - 290 OF, THIS CHAPTER] once that power is being exercised by a borough.

* Sec. 10. AS 29.33.110(a) is amended to read:

(a) The assembly is the board of adjustment for areas outside cities. The city council is the board of adjustment for the area within the city boundaries but may delegate by resolution or ordinance part or all of its functions to the borough [, SUBJECT TO SEC. 70(b)(1) OF THIS CHAPTER,] in addition to making delegations as provided for an assembly under sec. 245 of this chapter. Meetings of the borough board are held at the call of the presiding officer and of the city board by the mayor. The presiding officer or mayor may administer oaths and compel attendance of witnesses. Meetings and hearings of the board shall be open to the public and the board shall keep minutes of its proceedings as a public record.

* Sec. 11. AS 29.33.190(a) is amended to read:

(a) The owner or agent of the owner of land located within a subdivision who transfers, sells, or enters into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and recorded, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500 for each lot or parcel transferred, sold, or included in a contract to be sold. The borough [PLATTING BOARD] may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action.

* Sec. 12. AS 29.48.180(a) is amended to read:

(a) Each ordinance [AND RESOLUTION] after adoption shall be codified.

* Sec. 13. AS 29.48.180(c)(2) is amended to read:

(2) the ordinance is a provision which establishes a rule of conduct or behavior and which is included, or to be included, in a code of ordinances or other complete system of [POSITIVE] law promulgated [BY THE COUNCIL] and kept current [BY THE CITY] at reasonable intervals.

* Sec. 14. AS 29.48 is amended by adding a new section to read:

Sec. 29.48.185. RESOLUTIONS. The assembly or council shall provide for the maintenance of a permanent file of resolutions that have been adopted.

* Sec. 15. AS 29.48.200 is amended to read:

Sec. 29.48.200. PENALTIES. For the violation of an ordinance, the assembly or council may prescribe punishment not to exceed a fine of $500 or imprisonment for 30 days, or both. However, the punishment authorized under this section may be imposed only if [AN ORDINANCE IS CODIFIED AND] copies of the ordinance are made available for distribution to the public at cost.

* Sec. 16. AS 29 is amended by adding a new chapter to read:

CHAPTER 59. OBLIGATIONS ISSUED ON BEHALF OF MUNICIPALITIES.

Sec. 29.59.010. AUTHORITY TO ISSUE OBLIGATIONS FOR SPECIFIED PURPOSES. (a) A general law municipality may establish a public corporation or other municipal instrumentality. This public corporation or other municipal instrumentality may issue obligations to provide the public facilities and services enumerated in AS 29.48.030(a).

(b) The public corporation or other municipal instrumentality created under authority of (a) of this section shall be created and operated solely to provide one or more of the public facilities or services enumerated in AS 29.48.030(a).

* Sec. 17. This Act takes effect immediately in accordance with AS 01.10.070(c).

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 137

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the municipal code; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. <u>The regular term of office begins on the first Monday following certification of the election.</u> However, if under a borough apportionment city councilmen are appointed as assemblymen or elected to dual assembly-council seats, they may not be replaced until their assembly term expires as provided by city charter or ordinance, or they cease to be a member of either the assembly or council. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs.

* Sec. 2. AS 29.23.130(c) is amended to read:

(c) The borough mayor's regular term of office is three years and until a successor is elected and has qualified and begins on the first Monday following <u>certification of the mayor's</u> [HIS] election [, WHICH IS HELD THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The assembly may provide by ordinance for a different term not to exceed four years, except that the current term of an incumbent borough mayor may not be altered.

* Sec. 3. AS 29.23.130(d) is amended to read:

(d) A borough may adopt or abandon a manager plan at any time, as provided in AS 29.23.410 - 29.23.480. The borough mayor may not veto an ordinance or resolution calling for an election on this question. The manager has all the powers and duties of the borough mayor as chief administrative officer. [IF THE MANAGER PLAN IS ADOPTED, IT BECOMES EFFECTIVE FOLLOWING CERTIFICATION OF THE RESULTS OF THE FIRST REGULAR ELECTION OCCURRING AT LEAST SIX MONTHS AFTER ADOPTION OF THE PLAN.] The borough mayor then serves as borough executive.

* Sec. 4. AS 29.23.200(c) is amended to read:

(c) Councilmen are selected [AN ELECTION IS HELD ANNUALLY ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT ELECTION DATE OR INTERVAL OF YEARS IS PROVIDED BY ORDINANCE, TO CHOOSE COUNCILMEN] for three-year terms and until their successors are elected and have qualified. The regular term of office begins on the first Monday following certification of the election. The council may provide by ordinance for different terms not to exceed four years, except that the current term of incumbent councilmen may not be altered.

* Sec. 5. AS 29.23.210(a) is amended to read:

(a) The council shall meet at least once every month, unless otherwise provided by ordinance. Special meetings may be held on the call of the mayor or two councilmen upon not less than 24 hours written or oral notice communicated to each member. In an emergency, a special meeting called on less than 24 hours notice is a legal meeting if all members are present or there is a quorum and all absent members have waived in writing the required notice. A waiver may be made either before or after the time of the meeting. The waiver shall be attached to and made a part of the journal for that meeting.

* Sec. 6. AS 29.23.250(c) is amended to read:

(c) The mayor of a second class city is elected by and from the council for a term of one year and until a successor is elected and has qualified [EQUAL IN LENGTH TO A COUNCILMAN'S TERM].

* Sec. 7. AS 29.23.250(d) is amended to read:

(d) The mayor's regular term begins on the first Monday following certification of the mayor's [HIS] election [, WHICH IS HELD ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The council of a second class city shall meet on the first Monday after certification of the regular election [DATE] and elect a mayor who takes office immediately.

* Sec. 8. AS 29.23.440(a) is amended to read:

(a) If the manager plan is approved, the assembly or council shall, within 60 days, adopt the plan by ordinance or resolution.

* Sec. 9. AS 29.33.010(b) is amended to read:

(b) No city, whether home rule or not, may exercise an areawide power [CONFERRED IN, OR ASSUMED BY MEANS OF AS 29.33.250 - 29.33.290] once that power is being exercised by a borough

* Sec. 10. AS 29.33.110(a) is amended to read:

(a) The assembly is the board of adjustment for areas outside cities. The city council is the board of adjustment for the area within the city boundaries but may delegate by resolution or ordinance part or all of its functions to the borough [, SUBJECT TO AS 29.33.070(b)(1),] in addition to making delegations as provided for an assembly under AS 29.33.245. Meetings of the borough board are held at the call of the presiding officer and of the city board by the mayor. The presiding officer or mayor may administer oaths and compel attendance of witnesses. Meetings and hearings of the board shall be open to the public and the board shall keep minutes of its proceedings as a public record.

* Sec. 11. AS 29.33.190(a) is amended to read:

(a) The owner or agent of the owner of land located within a subdivision who transfers, sells, or enters into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and recorded, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500 for each lot or parcel transferred, sold, or included in a contract to be sold. The borough [PLATTING BOARD] may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action.

* Sec. 12. AS 29.48.180(a) is amended to read:

(a) Each ordinance [AND RESOLUTION] after adoption shall be codified.

* Sec. 13. AS 29.48.180(c)(2) is amended to read:

(2) the ordinance is a provision which establishes a rule of conduct or behavior and which is included, or to be included, in a code of ordinances or other complete system of [POSITIVE] law enacted [PROMULGATED BY THE COUNCIL] and kept current [BY THE CITY] at reasonable intervals.

* Sec. 14. AS 29.48 is amended by adding a new section to read:

Sec. 29.48.185. RESOLUTIONS. The assembly or council shall provide for the maintenance of a permanent file of resolutions that have been adopted.

* Sec. 15. AS 29.48.200 is amended to read:

Sec. 29.48.200. PENALTIES. For the violation of an ordinance, the assembly or council may prescribe punishment not to exceed a fine of $500 or imprisonment for 30 days, or both. However, the punishment authorized under this section may be imposed only if [AN ORDINANCE IS CODIFIED AND] copies of the ordinance are made available for distribution to the public at cost.

* Sec. 16. AS 29.59 is repealed and re-enacted to read:

CHAPTER 59. OBLIGATIONS ISSUED ON BEHALF OF MUNICIPALITIES.

Sec. 29.59.010. AUTHORITY TO ISSUE OBLIGATIONS FOR SPECIFIED PURPOSES. (a) A home rule or general law municipality may establish a public corporation or other municipal instrumentality. This public corporation or other municipal instrumentality may issue obligations to provide the public facilities and services enumerated in AS 29.48.030(a).

(b) The public corporation or other municipal instrumentality created under authority of (a) of this section shall be created and operated solely to provide one or more of the public facilities or services enumerated in AS 29.48.030(a).

* Sec. 17. AS 29.63.065(b)(2) is amended to read:

(2) a claimant receiving the exemption must file <u>with the department</u> by <u>March</u> [JANUARY] 15 of each subsequent year a separate application proving eligibility as of January 1 in order to retain the exemption. Within the same year the <u>department</u> [THE ASSEMBLY OR COUNCIL] for good cause shown may waive the claimant's failure to make timely application and approve the application as if timely filed.

* Sec. 18. This Act takes effect immediately in accordance with AS 01.-10.070(c).

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

April 26, 1979

The Honorable Bill Parker
Chairman
Community and Regional Affairs Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

The Department of Community and Regional Affairs has considered points raised by Ms. Georgianna C. Booth, Deputy Clerk, Ketchikan Gateway Borough, in her April 10 letter to you with regard to Committee Substitute for Senate Bill 137 (Rules), Section 10. We concur with Ms. Booth in both her analysis and recommendations.

There does indeed appear to be an inconsistency between AS 29.33.070 and AS 29.33.110(a), as Ms. Booth alleges. Subsection (a) of AS 29.33.070 clearly assigns to first and second class boroughs planning, platting and zoning authority on an areawide basis, including the responsibility of serving as the board of adjustment, also on an areawide basis. Subsection (b) of AS 29.33.070 allows, but does not require the borough assembly by ordinance to delegate to a city council the borough's responsibility to serve as a board of adjustment within the city.

AS 29.33.110(a) implies that a city council acts as the board of adjustment for the area within the city's boundary whether or not the borough assembly delegates such authority to the city council. However, AS 29.33.070 and concept of areawide planning lead to the conclusion that a city council may serve as the board of adjustment only if such authority is delegated to the city council by the borough assembly. For this reason, we support Ms. Booth's recommendation to amend AS 29.33.110(a) to read:

> Sec. 29.33.110. Board of adjustment. (a) The assembly is the board of adjustment but may delegate by ordinance part or all of this function to a city within the borough in accordance with

§70(b)(1) of this chapter, in addition to making delegations as provided for an assembly under §245 of this chapter. Meetings of the borough...

We encourage the Community and Regional Affairs Committee to consider amending Committee Substitute for Senate Bill 137 as proposed in this letter.

Sincerely,

Lee McAnerney
Commissioner

Re: Proposed Issuance of Fairbanks North Star Borough Home Mortgage Revenue Bonds.

Dear Jim:

Yesterday we discussed the power of the Fairbanks North Star Borough to issue revenue bonds for the purpose of acquiring home mortgage loans under the plan submitted to you by John Nuveen & Co. In this respect, we noted the provisions of AS 29.58.200-220 which govern the issuance of revenue bonds by a general law municipality such as the Fairbanks North Star Borough. These provisions apparently authorize bonds for public facilities, the rates or fees to be charged for which would be pledged to the payment of the bonds. The statute does not contemplate the authorization of revenue bonds for the purpose of acquiring home mortgages where the essential security for the bonds would be the home mortgages and the payments of principal and interest made thereon.

Accordingly, we discussed the fact that an amendment to the above quoted sections would probably be necessary in order to provide the requisite assurance that revenue bonds issued by the Borough for home mortgages would be valid.

I enclose on the attached sheets, alternative proposals, one amending the revenue bond section to expand generally revenue bonding powers, and the other one limited to an expansion for home revenue mortgage purposes.

Very truly yours,

Eric E. Wohlforth

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act concerning revenue bonds of municipalities."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. AS 29.58.200 is amended to read as follows:

Sec. 29.58.200. REVENUE BONDS. (a) A municipality may acquire, construct, improve and equip capital improvements to be operated upon a revenue-producing basis, and bonds for these purposes are payable solely from pledged revenue of the public facilities for which the bonds are issued.

(b) A municipality may also issue revenue bonds for any lawful purpose. The bonds shall be payable from any amounts pledged by the municipality except taxes and shall not constitute general obligations of the municipality.

Sec. 2. AS 29.58.205 shall read as follows:

Sec. 29.58.205. NO ELECTION REQUIRED. No election is required to authorize the issuance and sale of revenue bonds, unless otherwise provided by ordinance.

Sec. 3. AS 29.58.210 is amended to read as follows:

Sec. 29.58.210. FORMS AND TERMS. The assembly or council shall fix the date of the bonds, denominations, maturities, rates or rates of interest, place and manner of payment, redemption terms, registration privileges, manner of execution and signatures required and all other details of the bonds. If an officer whose

signature appears on the bonds or coupons ceases to be an officer before delivery of the bonds, his signature is valid as if he had remained in office until delivery.

* Sec. 4. AS 29.58.220 is amended to read as follows:

Sec. 29.58.220. PAYMENT. Bonds issued under §§200-220 of this chapter or the proceedings of the assembly or council authorizing their issuance may contain the covenants which the assembly or council considers advisable concerning

(1) the rates or fees to be charged for services rendered by the public facilities, the revenue of which is pledged to the payment of the bonds or the terms and conditions of any other charges or other amounts collected which are pledged to the payment of the bonds;

(2) the deposit and use of the revenue of the public facilities or of the charges or other amounts collected which are pledged to the payment of the bonds;

(3) the issuance of additional bonds payable from the revenue of the public facilities or from the charges or other amounts collected which are pledged to the payment of the bonds;

(4) the rights of the bondholders in case of default in the payment of the principal or interest on the bonds, including the appointment of a receiver to operate the public facilities;

(5) other covenants as the assembly or council determines.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.070(c).

April 30, 1979

Ms. Georgianna Booth
Deputy Clerk
Ketchikan Gateway Borough
344 Front St.
Ketchikan, Ak. 99901

Dear Ms. Booth,

Thank you for your comments of April 10, 1979 on CSSB 137 (Rules) relating to the Municipal Code. The Department of Community and Regional Affairs agreed with your suggested amendment and the Committee supported its incorporation in House CSSB 137 (Rules).

It seems more logical that the Borough retain the board of adjustment function and more consistent with the provisions of AS 29.33.070 (a).

Thank you for your comments. Enclosed please find a copy of the House Committee Substitute with the amendment on p. 6, Sec. 14, Lines 19-23.

Yours truly,

Bill Parker
Chairman

KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

April 10, 1979

The Honorable Bill Parker
Chairman, Community & Regional Affairs
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

With regard to CSSB 137 (Rules), Section 10, which amends AS 29.33 .110(a), I would like to offer the following comments and suggestions:

AS 29.33.070(a) says that Boroughs shall provide for planning, platting and zoning on an areawide basis. Paragraph (b) of the same section allows a borough to delegate planning, platting, and zoning responsibilities to the council of a city. AS 29.33.110(a) usurps the borough's prerogative to delegate the responsibility of board of adjustment by stating: " * * * The city council is the board of adjustment for the area within the city boundaries * * * "

There are two cities within the Ketchikan Gateway Borough. The City of Ketchikan is a home-rule city and the City of Saxman is a second-class city. The Ketchikan Gateway Borough provides for planning, platting, and zoning on an areawide basis. The Borough also provides for board of adjustment procedures by ordinance. The City of Ketchikan does not provide for board of adjustment procedures by ordinance, and I doubt the City of Saxman is even aware that they have the responsibility for board of adjustment. Conceivably there could be three different determinations and/or interpretations of the zoning code on similar appeals depending upon where property is located. Title 29 does not provide that these cities will prescribe procedures for appeals. AS 29.33.245 says: " * * * The assembly shall prescribe procedures for hearings and appeals. * * *" I question whether Title 29 has any influence on the home-rule city in the area of zoning. It

appears more logical that the Borough which has a vested interest in zoning regulation because they are charged with enforcing the decisions of the board of adjustment should retain the board of adjustment function unless they so chose to delegate it. Therefore, I suggest . . .

> "(a) The borough assembly is the board of adjustment but may delegate by ordinance part or all of its functions to a city within the borough in accordance with AS 29.33.070(b). * * *"

Your comments and/or questions are welcome.

Sincerely,

KETCHIKAN GATEWAY BOROUGH

Georgianna C. Booth

Chairman, Senate Rules

Page 1, line 24 --

(b) The borough assembly shall provide for its composition and for the form of its representation. Not later than July 31, 1981, and thereafter within four months after the report of a federal decennial census, the assembly shall propose and submit to the voters at a regular election or special election called for the purpose alternative forms of representation by which members are

(1) elected at large by all qualified voters of the borough, but required to live within an election district or zone established by the borough for election of assembly members, with each district or zone being of substantially equal population; or

(2) elected by and from election districts or zones established by the borough for the election of borough assembly members.

(c) The borough assembly shall, within three months of the certification of the results of the election held in accordance with (b) of this section, adopt an ordinance providing for its composition and the form of representation which conforms to the form of representation receiving a majority of the votes at that election.

((Existing (c) becomes new (d).))

SENATE SPECIAL COMMITTEE ON ELECTORAL REFORM
POUCH V
JUNEAU, ALASKA 99811
465-3822

QUESTIONNAIRE-LOCAL OFFICIALS

1. ARE YOU IN FAVOR OF CONSOLIDATING LOCAL AND STATE ELECTIONS?

_____YES _____NO - see copy of letter attached.

Comments:

2. SHOULD THE STATE PROVIDE ADDITIONAL ASSISTANCE IN LOCAL ELECTIONS?

_____YES _____NO

Comments:

3. HOW CAN WE INCREASE THE NUMBER OF VOTERS IN LOCAL ELECTIONS? People should be educated that local elections are also important
More publicity on voter registration via news media and radio for state elections; articles stressing responsibility of voter toward local govt.
4. WHAT SPECIFIC CHANGES WOULD YOU RECOMMEND IN IMPROVING elections AND SIMPLIFYING ELECTIONS?

- later-

5. ANY COMMENTS ON SB 126, 127: SB 126 - no comment.
I know the municipal clerks are supporting SB 127, but I have reservations as to how this would work. There are a great number of municipalities in the State; it would take some coorperation from all to get the input into the
6. ADDITIONAL SUGGESTIONS: system on who voted in municipal elections - of which there are many throughout the year.

- if you are in no great hurry - will come up with some suggestions. Personally, I do not feel state election laws are all that bad, the state just needs to follow them.

February 28, 1979

Senator Arliss Sturgulewski
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: SB 137

Dear Senator Sturgulewski:

It is difficult to debate the proposed amendments to Title 29, SB 137 when the reasons for the requested changes are not known.

A.S. 29.23.040 Proposed Amendment "The regular term of office begins on the first Monday following their election."

The above amendment will create difficulties with most municipal elections. The Alaska Municipal Clerks Association adopted a uniform model election code for local elections, and most of us have our elections on the first Tuesday in October. In this borough some of the city clerks have allowed us to combine their elections with the borough election. All 5 cities and the borough has the regular election on the first Tuesday in October. We use the same polling places and in most instances the same election judges and split the expense.

In the Kenai Peninsula Borough there are 26 precincts, some in remote areas. At times we cannot get all the ballots back to this office until the Monday following the election. We start canvassing at 9 A.M. on that particular Monday. Canvassing is sometimes continued until Tuesday a.m. The election is certified Tuesday night by the assembly and if the elected or appointed candidate is present he assumes the office on that night.

It seems to me the assembly and Mayor's term should begin when the election is certified and the person has been administered the oath of office. Occasionally an elected person is certified, but may be out of town on that particular night or ill and cannot be administered the oath until a later date. (He has 30 days from date of election or appointment to take the oath and be seated.)

Each municipality has its own problems with timing and coordination of the entire election process. For example, our ballots returning from the Hope Precinct, leave Hope on Friday; 2 P.M. They arrive

at the Soldotna Post Office on Saturday after the Post Office has closed. Mail leaves Hope only on Tuesday and Friday.

English Bay and Port Graham mail pick up is on Friday; weather permitting. Cook Inlet Aviation gets the mail out usually after 1 P.M. from these areas. The pilot put these packets in the mail at Homer sometime late Friday. The mail leaves Homer about 12:30 or 1 p.m. on Friday, so the materials do not reach Soldotna until Monday. The Post Office is usually closed on Monday as this is Columbus Day. We make arrangements with the postmaster to pick up what we can on Saturday, but sometimes this is inconvenient for the postal employees.

Sec. 2. A.S. 29.23.130 (c) indicates deletion from Title 29 of the Tuesday in October for the regular election day, which leads me to believe the state may be considering combining municipal with state elections. Most municipal clerks will object to this, however, there may be some who have different procedures set out in charters, and they might not object to the combination.

The reasons we would object to combining with the State are:

1. Polling place space is limited; ballot boxes,booths limited.
2. State election law and municipal election laws differ to some extent.
3. Municipal Clerks would not want the legality of their elections to depend on state management or vise versa.

4. Combining the city/borough with state elections would be most confusing. We have found this true at times when combining our city and borough elections. The judges get very busy at certain hours, and the voter may put his city ballots in the borough ballot box or his questioned ballot in the borough questioned ballot envelope.

I have talked with the City Clerk of Soldotna, also Kenai and our assembly representative from Homer. You will probably receive more correspondence on this subject.

It seems once a procedure has been established and people get accustomed to it, it is difficult to change.

Yours very truly,

Frances Brymer

(Mrs) Frances Brymer,
Borough Clerk

for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. However, if under a borough apportionment city councilmen are appointed as assemblymen or elected to dual assembly-council seats, they may not be replaced until their assembly term expires as provided by city charter or ordinance, or they cease to be a member of either the assembly or council. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 13 ch 118 SLA 1972)

Cross reference.—See Editor's note to AS 29.18.120.

Effect of amendment. — The 1972 amendment rewrote this section.

Editor's note.— Section 20, ch. 118, SLA 1972, provides: "The terms of elected officials who are incumbents on September 10, 1972, are not affected by this Act. Their terms expire as provided before enactment of this Act."

Sec. 29.23.130. Power generally. (a) If the borough has not adopted a manager plan, the borough executive and administrative power is vested in an elected borough mayor. If the borough has adopted a manager plan, the administrative power is vested in an appointed manager and the executive power in an elected borough mayor who has the same functions as those of the mayor of a manager-plan city under § 240 of this chapter.

(b) A borough voter is eligible to be borough mayor. The assembly may by ordinance establish residence requirements for candidates for borough mayor not exceeding three years.

(c) The borough mayor's regular term of office is three years and until a successor is elected and has qualified and begins on the first Monday following his election, which is held the first Tuesday of October, unless a different date of election is provided by ordinance. The assembly may provide by ordinance for a different term not to exceed four years, except that the current term of an incumbent borough mayor may not be altered.

(d) A borough may adopt or abandon a manager plan at any time, as provided in §§ 410—480 of this chapter. The borough mayor may not veto an ordinance or resolution calling for an election on this question. The manager has all the powers and duties of the borough mayor as chief administrative officer. If the manager plan is adopted, it becomes effective following certification of the results of the first regular election occurring at least six months after adoption of the plan. The borough mayor then serves as borough executive. (§ 2 ch 118 SLA 1972)

(e) A borough adopting a manager plan may, by agreement with a city, enter into a contract providing for the manager of a city located within the borough to serve also as borough manager. A city adopting a manager plan may, by agreement with a borough, enter into a contract providing for the manager of a borough within which the city is located to serve also as city manager. Appointment and service of the manager shall be as otherwise provided for managers in §§ 130 — 150 and §§ 450 — 470 of this chapter. Nothing in this subsection affects the authority of the assembly or council to provide for other dual office holding if the dual offices held are compatible or otherwise to appoint officers and employees in accordance with law.
(am § 1 ch 6 SLA 1975; am § 1 ch 63 SLA 1976)

Sec. 29.23.200. Composition, eligibility, election and term. (a) Each first class city has a council of six members elected by the voters at large. Each second class city has a council of seven members elected by the voters at large. The council of a first or second class city may by ordinance provide for election of members other than on an at-large basis for all members.

(b) A city voter is eligible to hold office as a member of the council. The council may by ordinance establish residence requirements for council members not exceeding three years. A council member who ceases to be eligible to be a city voter immediately forfeits that office. (§ 2 ch 63 SLA 1976)

(c) An election is held annually on the first Tuesday of October, unless a different election date or interval of years is provided by ordinance, to choose councilmen for three-year terms and until their successors are elected and have qualified. The regular term of office begins on the first Monday following the election. The council may provide by ordinance for different terms not to exceed four years, except that the current term of incumbent councilmen may not be altered. (§ 2 ch 118 SLA 1972)

Sec. 29.23.210. Procedure. (a) The council shall meet at least once every month, unless otherwise provided by ordinance. Special meetings may be held on the call of the mayor or two councilmen upon not less than 24 hours written or oral notice communicated to each member.

(b) The council shall determine its own rules and order of business and provide for keeping a journal of its proceedings.

(c) Four councilmen constitute a quorum. Four affirmative votes are required for the passage of an ordinance, resolution, or motion.

(d) The final vote on each ordinance, resolution, or substantive motion is a recorded roll call vote. All councilmen present shall vote unless the council, for special reasons, permits a member to abstain. (§ 2 ch 118 SLA 1972)

Sec. 29.23.250. Election and term of mayor. (a) A voter of a home rule or general law city is eligible to hold the office of mayor, except that a home rule city may prescribe additional residency requirements by charter. The council, for all other cities, may be ordinance establish residence requirements for candidates for mayor not exceeding three years.

(b) The mayor of a first class city is elected at large for a term of three years and until a successor is elected and has qualified. The council may provide by ordinance for a different term not to exceed four years, except that the current term of an incumbent mayor may not be altered.

(c) The mayor of a second class city is elected by and from the council for a term equal in length to a councilman's term.

(d) The mayor's regular term begins on the first Monday following his election, which is held on the first Tuesday of October, unless a different date of election is provided by ordinance. The council of a second class city shall meet on the first Monday after the regular election date and elect a mayor who takes office immediately. (§ 2 ch 118 SLA 1972)

Editor's note.—Section 20, ch. 118, SLA 1972, provides: "The terms of elected officials who are incumbents on September 10, 1972, are not affected by this Act. Their terms expire as provided before enactment of this Act."

Sec. 29.23.440. Adoption. (a) If the manager plan is approved, the assembly or council shall adopt the plan by ordinance or resolution.

(b) The assembly or council shall notify the Department of Community and Regional Affairs of the adoption of the manager plan. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in subsection (b).

Sec. 29.33.010. Scope of areawide powers. (a) First and second class boroughs shall exercise the powers as specified and in the manner specified in this chapter on an areawide basis, both inside and outside cities within their boundaries.

(b) No city, whether home rule or not, may exercise an areawide power conferred in, or assumed by means of §§ 250 — 290 of, this chapter once that power is being exercised by a borough. (§ 2 ch 118 SLA 1972; am § 6 ch 93 SLA 1977)

Effect of amendment. — The 1977 amendment substituted "First and second class boroughs" for "Boroughs" at the beginning of subsection (a).

Cited in Jefferson v. State, Sup. Ct. Op. No. 1084 (File No. 2000), 527 P.2d 37 (1974).

Sec. 29.33.110 Board of adjustment. (a) The assembly is the board of adjustment for areas outside cities. The city council is the board of adjustment for the area within the city boundaries but may delegate by resolution or ordinance part or all of its functions to the borough, subject to § 70(b)(1) of this chapter, in addition to making delegations as provided for an assembly under § 245 of this chapter. Meetings of the borough board are held at the call of the presiding officer and of the city board by the mayor. The presiding officer or mayor may administer oaths and compel attendance of witnesses. Meetings and hearings of the board shall be open to the public and the board shall keep minutes of its proceedings as a public record.

(b) The board of adjustment shall hear and decide

(1) appeals regarding alleged errors in enforcement of zoning ordinances and building codes;

(2) appeals from the decisions of the planning commission on requests for conditional uses;

(3) appeals from the decisions of the planning commission on requests for variances from the terms of the zoning ordinance which are not contrary to the public interest, when a literal enforcement would deprive a property owner of rights commonly enjoyed by other properties in the same district.

(c) A variance shall not be granted because of special conditions caused by actions of the person seeking relief or for reasons of pecuniary hardship or inconvenience. A variance shall not be granted which will permit a land use in a district in which that use is prohibited. (§ 2 ch 118 SLA 1972)

Sec. 29.33.190. Penalties. (a) The owner or agent of the owner of land located within a subdivision who transfers, sells, or enters into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and recorded, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500 for each lot or parcel transferred, sold, or included in a contract to be sold. The platting board may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action.

(b) No person may record a plat or seek to have a plat recorded unless it bears the approval of the platting board. A person who knowingly violates this requirement is punishable upon conviction by a fine of not more than $500. (§ 2 ch 118 SLA 1972)

Sec. 29.48.180. Codification. (a) Each ordinance and resolution after adoption shall be codified.

(b) Within three years after incorporation of the municipality, the municipal executive, with the advice and assistance of a legal advisor, shall have prepared a general codification of all municipal ordinances of general applicability having the force and effect of law. The municipal code shall be revised and printed at least every five years, unless the code is kept current by regular supplements.

(c) In (a) of this section, "codified" means

(1) the ordinance has been given a serial number or other permanent identifying number and, bearing a notation of the date of adoption and the designation of the adopting authority, it has been entered by the municipal clerk in a properly indexed book maintained for the purposes of organizing and recording the ordinances; or

(2) the ordinance is a provision included, or to be included, in a code of ordinances or other complete system of positive law promulgated by the council and kept current by the city at reasonable intervals.

(d) This section applies to general law and home rule municipalities. (§ 2 ch 118 SLA 1972)

Revisor's note (1972).—For specific discussion of AS 29.48.180, see 1972 House Journal, p. 1725, or 1972 Senate Journal Supp. No. 3, p. 8.

Minimum codification requirements. —To meet the minimum codification requirements of this section municipal ordinances should be topically arranged under a logical and systematic set of chapters and subchapters. There should be a table of contents, an index, and a system of cross-referencing. The code, to be useful, must have a current supplement which indicates all additions, amendments, and repeals. Periodically the additions and changes noted in the supplement should be incorporated into the main body of the code. These are minimum requirements. Nothing

Sec. 29.48.200. Penalties. For the violation of an ordinance, the assembly or council may prescribe punishment not to exceed a fine of $500 or imprisonment for 30 days, or both. However, the punishment authorized under this section may be imposed only if an ordinance is codified and copies of the ordinance are made available for distribution to the public. (§ 2 ch 118 SLA 1972)

Chapter 59. Obligations Issued on Behalf of Municipalities.

Section
10. Authority to issue obligations for specified purposes

Effective date of chapter. — Section 5, ch. 56, SLA 1976, makes this chapter effective May 6, 1976, in accordance with AS 01.10.070(c).

Sec. 29.59.010. Authority to issue obligations for specified purposes. (a) A home rule or general law municipality may establish a public corporation or other municipal instrumentality. This public corporation or other municipal instrumentality may issue obligations to provide the public facilities and services enumerated in AS 29.48.030(a).

(b) The public corporation or other municipal instrumentality created under authority of (a) of this section shall be created and operated solely to provide one or more of the public facilities or services enumerated in AS 29.48.030(a). (§ 4 ch 56 SLA 1976)

Cross reference. — As to loans to municipalities by the bond bank authority through purchase of municipal bonds, see AS 44.58.170.

7. Other Officers and Employees (§§ 29.23.360—29.23.401)
8. Adoption or Repeal of Manager Plan (§§ 29.23.410—29.23.480)
9. Miscellaneous Provisions (§§ 29.23.500—29.23.580)

Article 1. Borough Assembly.

Section
10. General power
20. Composition, apportionment, and reapportionment
30. [Repealed]
40. Regular term of office
50. Qualifications
60. Procedure
70. Departments
80. Assembly vacancies
90. [Repealed]
100. [Repealed]

Sec. 29.23.010. General power. The legislative power of a borough is vested in the assembly. (§ 2 ch 118 SLA 1972)

Establishment of department and procedures for exercise of areawide power. — The establishment of a department and of standards and procedures to be used in the exercise of an areawide power is a task for the borough assembly, in which is vested the general legislative power. 1962 Op. Att'y Gen., No. 9.

The borough assembly may set up a board of health as an advisory board and be substantially guided by such a board of health in its exercise of the public health power, as long as the borough assembly is the body finally expressing the public health power. 1962 Op. Att'y Gen., No. 9.

Borough chairman cannot serve on borough assembly. — To permit the borough chairman to serve on the borough assembly would constitute a clear violation of this section, and would violate the common law prohibition against holding incompatible offices. 1963 Op. Att'y Gen., No. 27.

But positions of borough assemblyman and school board representative can be served concurrently. — A person elected to the positions of borough assemblyman and borough school board could properly exercise the powers, privileges and duties of both offices concurrently. 1963 Op. Att'y Gen., No. 27.

Sec. 29.23.020. Composition, apportionment, and reapportionment. (a) The assembly shall be composed of the number of members and be apportioned in a manner set out in the incorporation petition approved by the voters or, if a borough is already incorporated, the assembly shall be composed and apportioned in a manner prescribed by charter or ordinance. Assembly composition and apportionment, including voting procedures based on the apportionment, may be prescribed in any manner consistent with the equal representation standards of the Constitution of the United States.

(b) Within six months of October 14, 1972, and thereafter within six months of the official report of a federal decennial census and issuance of any supplementary data to the report necessary to

establish population distribution within the borough, the ass shall

(1) determine and declare by resolution whether the existi assembly apportionment meets the standards designated under (a) of this section;

(2) if the existing apportionment does not meet the designated standards, provide by ordinance for reapportionment and, if it chooses, changes in assembly composition, in accordance with the designated standards;

(3) submit the ordinance to borough voters for approval or rejection as provided in (c) of this section.

(c) The vote on an ordinance submitted under (b) (3) of this section shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and the home rule cities of the borough. The other classification shall consist of all votes cast in the remaining areas of the borough. In order for the ordinance to be approved it must receive majority approval in each classification. If, at the end of the time period prescribed in (b) of this section, no ordinance has been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards designated in (a) of this section.

(d) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide for its reapportionment and, if it chooses, a change in assembly composition, whenever, on the basis of federal census reports or other reliable population data, it determines that the existing apportionment does not meet the standards for apportionment designated in (a) of this section. The assembly is required to determine whether the standards are being met upon petition of 50 borough voters. The petition must include reliable evidence that the existing apportionment of the assembly does not meet the designated standards. Reapportionment under this section shall be implemented by ordinance or by act of the Department of Community and Regional Affairs in the same manner as prescribed for reapportionment in (c) of this section.

(e) Members of the assembly are selected according to assembly composition and apportionment set out in the incorporation petition approved by the voters or subsequently provided in accordance with this section. A change in assembly composition or apportionment under this section shall be effective beginning with the next regular election to the assembly.

(f) Assembly or Department of Community and Regional Affairs determinations or reapportionments made under this section are subject to judicial review. The running of time periods specified

in (b) of this section shall be tolled until a final judgment is rendered in an action brought under this subsection.

(g) This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 12 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Cross reference.—See Editor's note to AS 29.18.120.

Effect of amendments. — The first 1972 amendment rewrote this section.

The second 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the last sentence of subsections (c) and (d), and in the first sentence of subsection (f).

This section provides a convenient method for reapportioning whenever necessary. 1965 Op. Att'y Gen., No. 5.

It does not indicate what population data may be used by the reapportioning agency. 1965 Op. Att'y Gen., No. 5.

However, the agency may use population data other than official census figures in apportioning seats or votes. 1965 Op. Att'y Gen., No. 5.

The only limit imposed by this section is that a reapportionment plan may not take effect until the next assembly election. 1965 Op. Att'y Gen., No. 5.

Sec. 29.23.030. Election and appointment.

Repealed by § 16 ch 118 SLA 1972.

Cross reference.—See Editor's note to AS 29.18.120.

Editor's note.—The repealed section derived from § 2, ch. 118, SLA 1972.

Sec. 29.23.040. Regular term of office. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. However, if under a borough apportionment city councilmen are appointed as assemblymen or elected to dual assembly-council seats, they may not be replaced until their assembly term expires as provided by city charter or ordinance, or they cease to be a member of either the assembly or council. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 13 ch 118 SLA 1972)

Cross reference.—See Editor's note to AS 29.18.120.

Effect of amendment. — The 1972 amendment rewrote this section.

Editor's note.—Section 20, ch. 118, SLA 1972, provides: "The terms of elected officials who are incumbents on September 10, 1972, are not affected by this Act. Their terms expire as provided before enactment of this Act."

Sec. 29.23.050. Qualifications. A resident of the borough is eligible to be an assemblyman if he is a borough voter. An assemblyman who ceases to be a borough voter immediately forfeits his office. An assemblyman elected from or selected to represent a borough area less than the borough area at large and who becomes a resident of another area may continue to serve only until the next regular election. The assembly may by ordinance establish residence requirements for assemblymen not exceeding three years.

Chapter 23. Municipal Officers and Employees.

Article 1. Borough Assembly.

Sec. 29.23.010. General power.

Lack of a valid legislative body would not prevent the valid incorporation of a municipality. This conclusion is bolstered by noting that Alaska's newly-enacted Municipal Government Code has completely separated the statutes relating to the incorporation procedure from those relating to the borough's legislative body. Jefferson v. State, Sup. Ct. Op. No. 1084 (File No. 2000), 527 P.2d 37 (1974).

The incorporation of a municipality is a process both conceptually and functionally distinct from that of establishing a legislative body for that corporation. Jefferson v. State, Sup. Ct. Op. No. 1084 (File No. 2000), 527 P.2d 37 (1974).

Sec. 29.23.020. Composition, apportionment, and reapportionment.

Section supersedes home-rule enactments. — By AS 29.13.100 the legislature has specifically provided that this section supersedes existing and prohibits future home-rule enactments which provide otherwise. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Section is ambiguous as to when voter ratification of subsequent apportionment plan required. — This section is ambiguous as to whether there must be voter ratification of an apportionment plan when the existing plan has not been determined to be unconstitutional. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Such ratification is required when existing plan not found unconstitutional. — Voter ratification of a subsequent apportionment plan is required when the existing plan has not been determined to be unconstitutional. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Authority to alter apportionment, etc., when apportionment is unconstitutional. — The assembly is required to take action when it determines that the apportionment of its assembly fails to meet the standards of the equal protection clause of the United States Constitution. Under those circumstances, authorization is granted to the assembly to make changes in its composition as well as to make the necessary reapportionment. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

But section is ambiguous as to authority when apportionment not found unconstitutional. — This section is ambiguous as to whether the assembly may alter either its apportionment or composition when the existing arrangement has not been found by the assembly to be unconstitutional. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

This section may have several referents: (a) that the make-up of the assembly may initially be composed and apportioned in a manner prescribed by the charter or ordinance, (b) that there may be changes made in the composition and apportionment by charter or ordinance at any time or (c) such changes may only be made in the manner spelled out in subsections (b) and (d) of this section which mandate such changes when the assembly apportionment fails to meet equal representation standards. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

The words in subsection (a), "... If a borough is already incorporated, the assembly shall be composed and apportioned in a manner prescribed by charter or ordinance," while not ambiguous in themselves, refer to several different possible applications. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

This particular ambiguity is best resolved in favor of the assembly having the power of reapportion itself or alter its composition even when there has been no determination of unconstitutionality. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Section is ambiguous as to when election required for reapportionment. — Taking in conjunction this section's silence

as to whether an election is required for reapportionment with its silence on the power of the assembly to reapportion in the absence of a determination of unconstitutionality, the supreme court found ambiguity exists as to whether an election is required. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

The legislature intended that all reapportionment ordinances be submitted to the electorate. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Sec. 29.23.060. Procedure.

Cross reference.
As to abstaining from official action when there is a conflict of interests, see AS 29.23.555.

Article 2. Borough Executive and Administrator.

Section
130. Power generally

Sec. 29.23.130. Power generally.

(b) A borough voter is eligible to be borough mayor. The assembly may by ordinance establish residence requirements for candidates for borough mayor not exceeding three years.

(e) A borough adopting a manager plan may, by agreement with a city, enter into a contract providing for the manager of a city located within the borough to serve also as borough manager. A city adopting a manager plan may, by agreement with a borough, enter into a contract providing for the manager of a borough within which the city is located to serve also as city manager. Appointment and service of the manager shall be as otherwise provided for managers in §§ 130 — 150 and §§ 450 — 470 of this chapter. Nothing in this subsection affects the authority of the assembly or council to provide for other dual officeholding if the dual offices held are compatible or otherwise to appoint officers and employees in accordance with law.
(am § 1 ch 6 SLA 1975; am § 1 ch 63 SLA 1976)

Effect of amendments. — The 1975 amendment, effective February 17, 1975, added subsection (e).

The 1976 amendment added the second sentence of subsection (b).

As the rest of the section was not affected by the amendments, it is not set out.

Article 3. City Council.

Re: Proposed Issuance of Fairbanks North Star Borough Home Mortgage Revenue Bonds.

Dear Jim:

Yesterday we discussed the power of the Fairbanks North Star Borough to issue revenue bonds for the purpose of acquiring home mortgage loans under the plan submitted to you by John Nuveen & Co. In this respect, we noted the provisions of AS 29.58.200-220 which govern the issuance of revenue bonds by a general law municipality such as the Fairbanks North Star Borough. These provisions apparently authorize bonds for public facilities, the rates or fees to be charged for which would be pledged to the payment of the bonds. The statute does not contemplate the authorization of revenue bonds for the purpose of acquiring home mortgages where the essential security for the bonds would be the home mortgages and the payments of principal and interest made thereon.

Accordingly, we discussed the fact that an amendment to the above quoted sections would probably be necessary in order to provide the requisite assurance that revenue bonds issued by the Borough for home mortgages would be valid.

I enclose on the attached sheets, alternative proposals, one amending the revenue bond section to expand generally revenue bonding powers, and the other one limited to an expansion for home revenue mortgage purposes.

Very truly yours,

Eric E. Wohlforth

ALTERNATE "B"

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act concerning revenue bonds of municipalities".

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.58.200 is amended to read as follows:

Sec. 29.58.200. REVENUE BONDS. (a) A municipality may acquire, construct, improve and equip capital improvements to be operated upon a revenue-producing basis, and bonds for these purposes are payable solely from unpledged revenue of the public facilities for which the bonds are issued.

(b) A municipality may also issue revenue bonds to finance the purchase of residential mortgage loans. The bonds shall be payable from the principal and interest of the mortgage loans and from any other amounts pledged by the municipality except taxes and shall not constitute general obligations of the municipality.

* Sec. 2. AS 29.58.205 reads as follows:

Sec. 29.58.205. NO ELECTION REQUIRED. No election is required to authorize the issuance and sale of revenue bonds, unless otherwise provided by ordinance.

* Sec. 3. AS 29.58.210 is amended to read as follows:

Sec. 29.58.210. FORMS AND TERMS. The assembly or council shall fix the date of the bonds, denominations, maturities, rate or rates of interest, place and manner of payment, redemption terms, registration privileges, manner of execution and signatures

required and all other details of the bonds. If an officer whose signature appears on the bonds or coupons ceases to be an officer before delivery of the bonds, his signature is valid as if he had remained in office until delivery.

* Sec. 4. AS 29.58.220 is amended to read as follows:

Sec. 29.58.220. PAYMENT. Bonds issued under §§200-220 of this chapter or the proceedings of the assembly or council authorizing their issuance may contain the covenants which the assembly or council considers advisable concerning

(1) the rates or fees to be charged for services rendered by the public facilities, the revenue of which is pledged to the payment of the bonds, or the terms and conditions of any other amounts collected which are pledged to the payment of the bonds;

(2) the deposit and use of the revenue of the public facilities or of other amounts collected which are pledged to the payment of the bonds;

(3) the issuance of additional bonds payable from the revenue of the public facilities or other amounts collected which are pledged to the payment of the bonds;

(4) the rights of the bondholders in case of default in the payment of the principal or interest on the bonds, including the appointment of a receiver to operate the public facilities;

(5) other covenants as the assembly or council determines.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.070(c).

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

April 26, 1979

The Honorable Bill Parker
Chairman
Community and Regional Affairs Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

The Department of Community and Regional Affairs has considered points raised by Ms. Georgianna C. Booth, Deputy Clerk, Ketchikan Gateway Borough, in her April 10 letter to you with regard to Committee Substitute for Senate Bill 137 (Rules), Section 10. We concur with Ms. Booth in both her analysis and recommendations.

There does indeed appear to be an inconsistency between AS 29.33.070 and AS 29.33.110(a), as Ms. Booth alleges. Subsection (a) of AS 29.33.070 clearly assigns to first and second class boroughs planning, platting and zoning authority on an areawide basis, including the responsibility of serving as the board of adjustment, also on an areawide basis. Subsection (b) of AS 29.33.070 allows, but does not require the borough assembly by ordinance to delegate to a city council the borough's responsibility to serve as a board of adjustment within the city.

AS 29.33.110(a) implies that a city council acts as the board of adjustment for the area within the city's boundary whether or not the borough assembly delegates such authority to the city council. However, AS 29.33.070 and concept of areawide planning lead to the conclusion that a city council may serve as the board of adjustment only if such authority is delegated to the city council by the borough assembly. For this reason, we support Ms. Booth's recommendation to amend AS 29.33.110(a) to read:

> Sec. 29.33.110. Board of adjustment. (a) The assembly is the board of adjustment but may delegate by ordinance part or all of this function to a city within the borough in accordance with

§70(b)(1) of this chapter, in addition to making delegations as provided for an assembly under §245 of this chapter. Meetings of the borough...

We encourage the Community and Regional Affairs Committee to consider amending Committee Substitute for Senate Bill 137 as proposed in this letter.

Sincerely,

Lee McAnerney
Commissioner

cc: Ms. Georgianna C. Booth
Deputy Clerk
Ketchikan Gateway Borough

KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

April 10, 1979

The Honorable Bill Parker
Chairman, Community & Regional Affairs
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

With regard to CSSB 137 (Rules), Section 10, which amends AS 29.33 .110(a), I would like to offer the following comments and suggestions:

AS 29.33.070(a) says that Boroughs shall provide for planning, platting and zoning on an areawide basis. Paragraph (b) of the same section allows a borough to delegate planning, platting, and zoning responsibilities to the council of a city. AS 29.33.110(a) usurps the borough's prerogative to delegate the responsibility of board of adjustment by stating: " * * * The city council is the board of adjustment for the area within the city boundaries * * * "

There are two cities within the Ketchikan Gateway Borough. The City of Ketchikan is a home-rule city and the City of Saxman is a second-class city. The Ketchikan Gateway Borough provides for planning, platting, and zoning on an areawide basis. The Borough also provides for board of adjustment procedures by ordinance. The City of Ketchikan does not provide for board of adjustment procedures by ordinance, and I doubt the City of Saxman is even aware that they have the responsibility for board of adjustment. Conceivably there could be three different determinations and/or interpretations of the zoning code on similar appeals depending upon where property is located. Title 29 does not provide that these cities will prescribe procedures for appeals. AS 29.33.245 says: " * * * The assembly shall prescribe procedures for hearings and appeals. * * *" I question whether Title 29 has any influence on the home-rule city in the area of zoning. It

appears more logical that the Borough which has a vested interest in zoning regulation because they are charged with enforcing the decisions of the board of adjustment should retain the board of adjustment function unless they so chose to delegate it. Therefore, I suggest . . .

> "(a) The borough assembly is the board of adjustment but may delegate by ordinance part or all of its functions to a city within the borough in accordance with AS 29.33.070(b). * * *"

Your comments and/or questions are welcome.

Sincerely,

KETCHIKAN GATEWAY BOROUGH

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER / POUCH B – JUNEAU 99811

March 1, 1979

Proposed amendment put in CSSB

The Honorable Arliss Sturgulewski
State Senate
State of Alaska
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

We would like to respectfully request that the attached language be considered as a suggested amendment to Senate Bill 137.

This suggested wording would "clean-up" another section of Title 29.

This section deals with Senior Citizen Sewer and Water Assessment Deferment and the fact that the State fully pays that special assessment to the municipality involved.

The problem stems from the requirement of involvement by a local unit in a program for which it no longer has any involvement, since the State has already reimbursed the municipality for the loss of revenue created by the Senior Citizen Special Assessment Deferment program.

The section being amended relates only to renewal of the exemption each January. The revision allows the Department to waive the renewal deadline rather than requiring local councils and assemblies to be involved in the routine, annual renewal. Also, the renewal deadline is proposed to be moved from January 15 to March 15 to allow more time following the end of a calendar year for a succession of notices prior to the deadline.

This would clear up some areas of confusion and simplify the administration not only for the Department but also for the Senior Citizens and the municipality involved.

Thank you for your consideration in this matter.

Sincerely,

Lee McAnerney
Commissioner

By: Palmer McCarter

Enclosure

1-P2LH

PROPOSED LEGISLATION
A BILL

For an Act entitled: "An Act relating to senior citizen special assessment exemption."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.63.065(b) is amended to read:

(2) A claimant receiving the exemption must file <u>with the department</u> by [JANUARY] <u>March</u> 15 of each subsequent year a separate application proving eligibility as of January 1 in order to retain the exemption. Within the same year the <u>department</u> [THE ASSEMBLY OR COUNCIL] for good cause shown may waive the claimant's failure to make timely application and approve the application as if timely filed.

A M E N D M E N T

Offered in the HOUSE By Hurlbert

TO: CSSB 137 (Rules)

Page 5, between lines 6 and 7:

Insert the following:

"* Sec. 17. AS 29.23.540(c) is amended to read:

(c) No state employee or school district employee may be denied the right to serve as an elected municipal official because of his employment by the state or a school district unless specifically prohibited by charter or ordinance of a municipality, adopted at a special or general election. However, no school district employee may serve on a school district board in the school district where he is employed except in a school district with an average daily membership, as defined in AS 14.17.250(1), of 300 or less. Provisions of this section do not apply to term of office in effect on August 24, 1976."

Renumber remaining sections accordingly

AMENDMENT

Offered in the HOUSE By Hurlbert

TO: CSSB 137 (Rules)

Page 5, between lines 6 and 7:

Insert the following:

"* Sec. 17. AS 29.23.540(c) is amended to read:

(c) No state employee or school district employee may be denied the right to serve as an elected municipal official because of his employment by the state or a school district unless specifically prohibited by charter or ordinance of a municipality, adopted at a special or general election. However, no school district employee may serve on a school district board in the school district where he is employed except with the written approval of the commissioner of education. Provisions of this section do not apply to term of office in effect on August 24, 1976."

Renumber remaining sections accordingly

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may be appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71 SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.240. Repealer.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.01, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(1) "average daily membership" means the aggregate days of membership of pupils divided by the actual number of days in session for the school term;

(2) "commissioner" means the commissioner of the Department of Education;

(3) "district" means any city or borough school district;

beyond those assured by the foundation program. (§ 1.01 ch 164 SLA 1962)

Sec. 14.17.225. Construction and implementation of chapter. (a) This chapter may not be construed so as to create a debt of the state.

(b) Funds to carry out the provisions of §§ 10 — 190 of this chapter may be appropriated annually by the legislature into the public school foundation account. If amounts in the account are insufficient to meet the allocations authorized under §§ 10 — 190 of this chapter, such funds as are available shall be distributed pro rata among each district based upon the district's basic need.

(c) Repealed by § 1 ch 79 SLA 1971.

(d) The average daily membership allotment supplemental account is established. Funds to carry out the provisions of § 215 of this chapter may appropriated annually by the legislature to the account. If amounts in the account are insufficient to meet the allocations authorized under § 215 of this chapter, such funds as are available shall be distributed pro rata among eligible districts based upon § 215 of this chapter.

(e) Repealed by § 1 ch 79 SLA 1971. (§ 8 ch 95 SLA 1969; am § 1 ch 79 SLA 1971)

Effect of amendment. — The 1971 amendment repealed subsections (c) and (e).
Legislative committee report. — For report on ch. 79, SLA 1971 (HB 365), see 1971 House Journal, p. 586.

Sec. 14.17.230. Transition.

Repealed by § 2 ch 71 SLA 1972.

Editor's note. — The repealed section derived from § 5.04, ch. 164, SLA 1962.
Legislative committee report. — For report on ch. 71, SLA 1972 (HCSSB 383 am H), see 1972 House Journal, p. 898.

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 145

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to implementation of the Alaska Coastal Management Program."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.40.050 is amended to read:

Sec. 46.40.050 ACTION AND SUBMISSION BY COASTAL RESOURCE DISTRICTS. Each coastal resource district shall make substantial progress, in the opinion of the council, toward completion of an approvable district coastal management program and shall complete and submit to the council for approval its program within 30 months of the effective date of this Act [JUNE 4, 1977] or within 30 months of certification of the results of the district's organization, whichever is later. If, in the opinion of the council, after receipt of a written request for extension from the district which includes the reasons for the extension, an extension is considered proper, the council may grant an extension to a date not to exceed 54 months of the effective date of this Act or within 54 months of certification of the results of the district's organization, whichever is later.

* Sec. 2. AS 46.40.090(a) is amended to read:

(a) A district coastal management program approved by the council [AND THE LEGISLATURE] for a coastal resource district which does not have and exercise zoning or other controls on the use of resources within the entire coastal area of the district shall be implemented by appropriate state agencies, and by municipalities within the district which have and exercise zoning power. Implementation shall be in

Senate Action -- CZM

IN THE SENATE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

SENATE BILL NO. 145

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to implementation of the Alaska Coastal Management Program."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.40.050 is amended to read:

Sec. 46.40.050. ACTION AND SUBMISSION BY COASTAL RESOURCE DISTRICTS. Each coastal resource district shall make substantial progress, in the opinion of the council, toward completion of an approvable district coastal management program and shall complete and submit to the council for approval its program within 30 months of the effective date of this Act [JUNE 4, 1977] or within 30 months of certification of the results of the district's organization, whichever is later. If, in the opinion of the council, after receipt of a written request for extension from the district which includes the reasons for the extension, an extension is considered proper, the council may grant an extension to a date not to exceed 54 months of the effective date of this Act or within 54 months of certification of the results of the district's organization, whichever is later.

* Sec. 2. AS 46.40.090(a) is amended to read:

(a) A district coastal management program approved by the council [AND THE LEGISLATURE] for a coastal resource district which does not have and exercise zoning or other controls on the use of resources within the entire coastal area of the district shall be implemented by appropriate state agencies, and by municipalities within the district which have and exercise zoning power. Implementation shall be in

accordance with the comprehensive use plan or the statement of needs, policies, objectives and standards adopted by the district.

* Sec. 3. AS 46.40.120(b) is amended to read:

(b) The commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or set any other appropriate service area boundary according to geographic, cultural, or other features relevant to coastal planning

(1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; [OR]

(2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional educational attendance areas as a single coastal resource service area; or

(3) if the commissioner determines that another boundary would be more appropriate to the needs of this chapter.

* Sec. 4. AS 46.40.080 is repealed.

Senate Action -- CZM

SB 145 --Committee Substitute would eliminate all of SB 145 except for Section 1 amendments.

Action on CZM Regulations:

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Ginny Chitwood, Municipal League

Refers to Senate rationale for removing reference to mayor's salary not being aule to be reduced. The only public officials at the present time who can't have salaries reduced are judges. Senate did not want to include mayors.

Parr- Concerned about the need for balance. O'Connell agrees with Parr. Sees that the Seante wording might alllow the Coun cil or Assembly to use mayor's salary as a weapon. Would like to see the assurance that tne mayor's salary not be reduced back in the bill it was contained in Hi 127. Allows mayors to keep up with the cost of living. Parr say leave statute as is or use HOuse version.

Concensus is that the House version of the bill, HB 127, replace CSSB201 as a House Committee Substitute.

Passed out with a unanimous DO PASS recommendation.

Bill was introduced last year ('78) as HB ~~125~~ or ~~127~~.
Introduced this yr. at request of Municipal League.

Mayor of Soldotna doesn't receive salary. Wanted to give him some compensation so bill being introduced to say you can raise amount but not change it.(reduce it)

Hearing to be held on March 2 when Municipal League Legislative Committee and Mayors are in Juneau.

3/2/79 Workshop with Municipal League

Ron Larson--Mayor, Mat-Su Borough- on Municipal League Legislative Committee
HB 127 Top priority of Municipal League
Local level would amke the decisions themselves
If you establish a salary are you "changing" a salary?

Tom Bearup--Mayor, Soldotna
Supports HB 127

Jim NOrdale -- Attorney, North Star Borough. On Municipal League Leg. Committee
Home Rule communities are (aren't) under the bill.
Supports HB 127.

Dr. Mike Emmick--Kodaik (POrt Lions)
Supports HB 192 (Revenue Sharing)
On 40% bill--In KOdaik they take total number of votes and divide by # of people who voted. Expense to local government should be considered.
This is a problem if you are voting in a fire service area. Perhaps 300 people live in the area. You need 40% and only 100 people vote.
It should be local option to allow municipality to retain the 40% provision in elections.

Martin Tengs-- Haines Borough Mayor.

Mike Emmick--Anchorage had been supportive of HB 192 when it was being drafted.

Re HB 192 suggests using 17Million rather than 27Million $ to get realistic formula.

Dear Representative Parker,

The Ridesharing Bill (SB 311) which is in your committee was introduced in response to some model state law that showed up at a meeting of the Western Council of the Conference of State Governments. In the enclosed folder is a report excerpted from the proceedings of that conference.

The thrust of the 1979 annual CSG meeting was ENERGY. From various speakers, the one theme that emerged was that remedies for the United States are several years away. The answer to the energy question is, of course, energy self-sufficiency for our country. In the meantime, the one thing we can all practice is energy conservation. As you will note by the comments on page 15 of the enclosed booklet, substantial amounts of gas could be saved if ride-sharing were practiced on a widespead basis. Perhaps it's time for Alaska to do its bit.

SB 311 is merely an effort to remove some of the impediments for people wishing to enter into a ridesharing arrangement. I'd be very glad to appear before your committee and testify on the bill.

Also enclosed is some material from Al Koschmann who is with the U.S. Department of Transportation.

Sincerely,

Glenn

Dear Friends and Colleagues:

Our Annual Meeting in Helena, Montana fulfilled its two major objectives: education on a significant issue on which legislators have to give leadership and make decisions, and setting a direction for the work of the Western Conference in the coming year.

The critical importance of energy issues to the entire nation -- and their particular difficulties and potential in the West -- persuaded the Executive Committee to concentrate the entire educational portion of the Conference on "Energy: The Western Perspective." Knowledgeable speakers shared their expertise with the audience. The discussion between speakers and the audience elicited additional provocative ideas and generated serious thought about options many had not yet considered.

Our plenary discussions led logically to another part of our program -- work groups in which participants debated problems and likely solutions to energy issues and planned activities which they believed the Western Conference should undertake the coming year. The products of the work groups were of high calibre, and the Executive Committee now has the critical task of selecting from among this rich store of proposed projects those they deem of most significance to the West and achievable with Western Conference resources. Following the next Executive Committee meeting in November, committees and task forces will be asked to begin activity on projects stemming from the work groups in which you yourselves participated and which will reflect your interests.

These Proceedings are <u>not</u> intended merely as a record of the Annual Meeting. We have included much of the content of the panels because of the richness of thought and ideas expressed. We have included a summary of the specific proposals from the work groups. We hope that these sections -- the program summaries and the action proposals -- will contribute to your thinking and your actions as you give leadership to your state and region on these complex energy issues.

Thank you for joining us at the Annual Meeting. I hope you will be part of the work of the Western Conference during the coming months.

Sincerely,

Bill Grannell, Representative, Oregon
Chairman, Western Conference

Special recognition and thanks must be given to the Host Committee of the State of Montana, chaired by Representative Bob Marks, and to its staff, headed by Diana Dowling, Executive Director of the Montana Legislative Council, who worked unceasingly to organize an imaginative social program which added so much to the pleasure of all who attended.

To them, to the Montana State Legislature who invited us to Big Sky country, to the Montana business community who contributed support, delegates and guests express warm appreciation.

To our own Western Conference staff belongs the credit for an Annual Meeting program whose content will stimulate thought and spur action throughout the coming year.

12:00 pm ADJOURNMENT

ENERGY ISSUES IN THE WEST

Energy Issues in the West, the topic for the 1979 Western Conference Annual Meeting, provided an opportunity for participants to examine the scope of the energy dilemma and develop recommendations for grappling with some of the issues. The following pages summarize the key points made by the speakers and panelists. To enable the reader to get additional information from any of the speakers on their viewpoint or their specific recommendations, their addresses and phone numbers will be found on pages 53-55.

Due to recording difficulties, the comments of Guy Martin, Assistant Secretary for Land and Water Resources, Department of Interior, and Betsy Moler, Staff Counsel, U.S. Senate Committee on Energy and Natural Resources, were not included.

OPENING PLENARY SESSION
Monday, September 24

LIEUTENANT GOVERNOR TED SCHWINDEN, Montana
Keynote Speaker and Moderator, Energy Options Panel

Topic: Energy Issues in the West

The West has come into focus in the national arena. A recent Newsweek cover story entitled "The Angry West vs. The Rest" is testimony to this. "The energy needs of this country have caused Easterners to cast hungry eyes toward the resources of the West. We are sitting on a wealth of coal, oil, shale, uranium, and other minerals that can provide us with our trump card in trying to gain a louder voice in Washington." The Lieutenant Governor cautioned that the West not be lured by grandiose production schemes without fully examining the trade-offs. Some guarantees must be made that the states will retain the right to control production and development within their own borders. The Energy Mobilization Board, if allowed full power to determine the course of production, could leave the West with "scarred plains and dried up rivers." A Newsweek cover story one hundred years from now might be entitled "The Wasted West...A National Tragedy".

As policy makers it is important to make the distinction between temporary and permanent solutions. As state officials, the question as to the appropriate role of the states in contributing to these temporary and permanent solutions must be addressed. Everyone involved in energy decisions has the responsibility for seeing that the public is not misled into believing that exploiting limited energy resources can be considered a final solution. "As a region, as individual states, and as individuals, we must make a commitment to decrease consumption and increase conservation...But the most effective conservation efforts cannot solve the energy problem without exploring new areas of supply."

"We in the West have our own challenge. By joining together as an informed Western coalition, we have begun to catch the ear of the rest of the nation. If we want to shake the image of the West as the country's kid brother, we are going to have to prove that we can stand on our own two feet--that we can take our future into our own hands and develop ways to serve the country's energy needs while protecting the region's unique personality..."

ENERGY OPTIONS
Monday morning, September 24

ED CAHILL
Economic Consultant, Standard Oil of California

Topic: Oil

In the United States, about 50% of our total energy is dependant on oil. Another 25% on gas. In the first seven months of this year net imports accounted for 42% of our total energy consumption as compared with 51% in Western Europe and 75% in Japan.

Dependence on foreign oil must be diminished. Any one of the OPEC countries can produce an energy crisis in free world energy supply overnight. Moreover, world oil production is rapidly approaching its peak.

The United States is the only country in the free world with ample resources to meet its energy needs. However, all resources must be tapped.

The conservation track record in the U.S. is good. In 1978, the U.S. consumed 8% less energy per unit of GNP than in 1972. Gasoline consumption in July was down 6% from one year ago. We need to continue a strong effort in conservation. In addition we must pursue our coal, oil shale, nuclear, solar, geothermal and biomass resources.

State governments can play a significant role in providing incentives for the development of energy resources. States can assist in removing some regulatory barriers such as price controls, imbalanced environmental regulations and taxes.

DR. FRANK RAHN
Director, Electric Power Research Institute,

Topic: Nuclear

Nuclear power has an important and continuing role in the future production of electrical power. It is important to distinguish between electrical generation and energy sources that will make contributions other than electrical generation, such as solar heating.

While total energy consumption over the last few years has been relatively stagnant, electrical demand has increased. There are currently 52 GW nuclear capacity service in the U.S. These plants produced 12½% of the total electrical power produced in the U.S. last year. We have another 139 GW of nuclear capacity on order. This is at least 75 GW of generation capacity less than what we had expected from nuclear power.

The major advantages of nuclear power are cost and reliability.

ENERGY OPTIONS

Nuclear power appears today to be the least expensive electrical option we have. In addition, nuclear power is not subject to sudden fuel disruption. Once a nuclear plant has been built, the plant becomes anti-inflationary because about one-third of the cost of electricity comes from the cost of fuel itself as contrasted with two-thirds for that of fossil fuel. The major cost from Three Mile Island is that related to replacement power from oil and fossil fuel plants. Each nuclear power plant saves enough gasoline to fuel roughly half a million cars.

The disadvantages of nuclear are financial issues, safety, waste disposal and public perception. Nuclear plants have been cancelled or delayed due to the fact that they require 20% more in capital outlay than comparable capacity fossil fuel plants.

While the accident at Three Mile Islands focused on safety issues, there were no workers killed or injured, no evidence of any member of the public injured, and none of the safety related systems failed.

The technology for handling the waste disposal issue is in hand. All of the engineering principles are understood. It is policy and institutional questions which are holding back solutions to the waste problem.

The public has a nebulous misperception as to what the real risks of nuclear power are. Radiation from ordinary nuclear operation is neglible compared to either background radiation or radiation received from medical X rays.

CHARLES METZGER, Regional Representative of the Secretary
U.S. Department of Energy, Region VIII

Topic: Coal

Many factors contibute to increased demand for coal: the pending synthetic fuels program; the Powerplant and Industrial Fuel Use Act, which calls for coal conversion; problems associated with nuclear power, which resulted in a reduction of projected nuclear plants; increased wheeling of electricity to other areas; expanded foreign markets for coal; and population increases in the West.

The limitations to coal development include the cost of materials, siting difficulties, environmental regulating leasing, and transportation.

The national eye is on the West because it is rich with energy resources. The potential is for crash development particularly in light of the Energy Mobilization Board and the proposed synthetic fuels program. However, the concerns of the West should keep development within reasonable limits. The West will not allow the EMB to move too rapidly to deplete our resources.

ENERGY OPTIONS

The concern in the West for the land, as exemplified by the reclamation of coal lands, has contributed significantly to a new attitude particularly on the part of industry.

Western states have increased their ability to deal with energy issues. However, the responsibility placed on the shoulders of elected officials is great. Energy is a tough problem and politicians are faced with hard decisions that will not always come out rosy.

DAVE FREUDENTHAL
Administrative Aide to Governor, Wyoming

Topic: Synthetic Fuels

The synthetic fuels program, as originally outlined by President Carter, was clearly a "crash" program. Its objectives addressed the problem of supply but it failed to account for the physical realities of gearing up for such a program. A modified program is being discussed because it would take a massive capitol investment to accomplish the original goal. There is an unwillingness in the nation as a whole to commit that level of investment. The society cannot afford the massive shift of resources. Senator Jackson indicated that the original proposal represented a one trillion dollar shift in capital availability and resources.

Synthetic fuels offer a long term, as opposed to an immediate solution. Even in the long term, its potential should not be over-emphasized. Cost of construction has vastly increased and continue to do so. In addition, much of the ultimate responsibility for the realization of synthetic fuels potential lies in the private sector. Government policy regarding synthetic fuels does not always account for the private sector role.

The development of synthetic fuels poses some fundamental policy problems for the states. The Energy Mobilization Board, the "step child" of synthetic fuels, with its waivers and procedures regarding substantive state law, its designation of priority projects, and so on, will produce more problems than we currently have in contending with layers of "red tape". States may have to reformulate their regulatory structure. State legislatures may have to respond quickly to priority and time line changes imposed at the federal level. It may also mean that states will have to take a different approach to protecting the substantive rights of citizens regarding facility permitting.

Another problem with synthetic fuels is that many states have not developed environmental standards for many of the byproducts created by synthetic fuels. If the EMB passes in any of its forms, it may have the ability to prevent the application of post construction standards to a synthetic fuels plant.

ENERGY OPTIONS

It is inevitable that those states siting synthetic fuels plants are going to need an increase in the funding of regulatory bodies, both for the handling and processing of the permits and for the increase in technical aid. Also, the regulatory bodies are going to have to formulate information immediately so that the sites can be designated with some clarity.

Synthetic fuels development potentially compounds the reserved water rights problem in the West. As federal resources shift toward massive energy development, the pressure on the states to provide funds for social programs will increase.

WILSON CLARK
Assistant to Governor for Issues and Planning, California

Topic: Solar and Renewables

It has been stated that much of the discussion among proponents of solar energy today is just as irresponsible as that of nuclear advocates in the early 1950's. Then nuclear proponents were saying that no other energy form would be needed; nuclear power will be so bountiful it will be too cheap to meter.

Renewable sources of energy are probable sources, not panaceas. We are not going to see a major source of energy supply in the next twenty years from solar energy. But we must make a commitment now if we hope to see anything in twenty years.

California has pursued an aggressive program to explore the extent to which the consumer marketplace can be penetrated by conservation and solar energy. One of the greatest impediments to this process is the limited understanding individuals have regarding appliances, housing design, and solar techniques. The consequences are maintainance of traditional building practices, zoning laws, bank loans and a pervasive attitude, particularly on the part of local government, that housing is housing and energy is energy and the two are different categories.

A study by the Department of Commerce on electrical growth indicated an annual level of 3½% which would result in the need for about 1.1 million megawatts of capacity by the year 2000. With this growth projection we would need the generating capacity of plus or minus 500 1000-megawatt powerplants. In Stobough and Yergin's book* they indicate that the potential for reducing the level of growth through various conservation housekeeping techniques and more aggressive local utility programs, would amount to 150 to 200 power plants. Further, if we improve the efficiency of our industrial electrical use system by techniques such as combined cycle generation in fossil plants and cogeneration, it is possible to produce as much as 100 to 200 equivalent 1000-megawatt power plants. Further, in the solar area, photovoltaic

*"Energy Future", Random House, New York, 1979.
The six year study on energy by the Harvard Business School

power might reasonably provide energy equivalent of five to twenty power plants by the year 2000.

Other power plant equivalents:
Concentrated solar energy by power towers, solar ponds -- 10 power plants;
Wind power -- 30-50 power plants;
Hydro power (small scale) -- 30-50 power plants
Biomass -- 40-80 power plants

In this 20 year bridging period, with this conservative estimate, we can get from our alternatives a supply in the range of 365 to 590 power plant equivalents. The Battelle Labs have computed that in the United States over the last generation we have spent somewhere around $220 billion to subsidize conventional energy facilities ranging from hydro to coal to gas to nuclear. With an equivalent kind of investment, we can build quite a bridge to the future. We cannot have a renewable society in 20 years, but perhaps, in the span of two or three generations, we will have something to debate about other than sharing a progressively smaller pie.

Moderator TED SCHWINDEN
Summary

1- The energy crisis ultimately is a political crisis.

2- We have already delayed too long in taking the actions that are necessary. That delay, in large part, has occurred because the public does not perceive that there is indeed an energy crisis in this country.

3- Regulatory lag is costly, not only in terms of real dollars, but also in terms of failure to move forward in developing acceptable energy options for the future.

4- There are no miracles in the energy business. Many of the things we are talking about are transitions. Final solutions are a long way down the road.

CONSERVATION
Monday afternoon, September 24

AMORY LOVINS
Consultant, Friends of the Earth
Author, "Soft Energy Paths"

Topic: Overview: Role of Conservation in Solving Energy Problems

Mr. Lovins emphasized that conservation could save more than 40% of energy expenditures without entailing major sacrifices in life style. With the minimum attention now being given to energy efficiency, industry has already saved twice as much energy as we are getting from Alaskan oil. Efficiency improvements made in the last five years in all sectors of our economy has achieved twice the energy producing capacity that is claimed can be achieved by synthetic fuels in ten years. An energy conscious materials policy would treble our national energy efficiency.

The basic question in thinking about the energy problem is: What do we use the energy for?

58% of our energy goes into heating
34% into portable liquid fuels to run vehicles
8% for special premium industrial uses that need electricity

Instead of lumping these separate elements together as total energy needs, we should examine how much energy it takes to accomplish separate tasks.

In areas such as home heating, we could have enormous savings by examining end use. Electricity at 3¢ KWH is equivalent to buying oil at $48/barrel heat equivalent. New electricity by building a new power plant would be about 6¢ KWH or $100/barrel heat equivalent. That's expensive for heating a home. We use electricity for purposes for which we can never get our money's worth. It's like cutting butter with a chain saw or using a forest fire to fry an egg. 92% of our energy supply problem is heat and portable liquid fuels, but supplying more electricity is too slow and too expensive. Asking what kind of new power station to build is the wrong question. They're all uneconomic. We can heat homes much more economically by using weatherstripping, insulation, greenhouses, biomass alcohols, etc. Expensive large power stations are unnecessary overkill.

Traditionally we define the energy problem by demand predictions which lump all needs together. Instead, we should start with the tasks we're trying to accomplish with the energy. How can each of them be done with the least amount of energy? This approach has significant implications for policy.

Efforts to increase oil supply by the heat equivalent of one barrel of oil/day increases capitol investment tenfold. Moving to power stations and grids, capitol intensity increases another tenfold. It becomes so capitol intensive that every thousand

megawatt power plant directly and indirectly loses approximately 10,000 net jobs just by starving other parts of the economy for needed capitol.

Soft technologies are always cheaper than present oil and gas; they are consistently cheaper than what we would have to do to replace oil and gas (e.g., synthetic fuels). A "shell game" is played with energy costs. Department of Energy compares costs of the hard technologies with each other; then they compare costs of conservation and solar with historically cheap and heavily subsidized oil and gas rather than against current replacement costs.

Mr. Lovins called for building on the existing consensus for using conservation and renewables, pointing out that moving quickly on these areas of agreement might lessen the need for the hard technologies on which there is great disagreement.

C. P. DAVENPORT
Vice President, Pacific Power and Light

Topic: Utility Conservation

Mr. Davenport's company stopped the "hard sell" of electric energy in 1970. In 1973, Pacific Power and Light began to promote and subsidize actively conservation among electric consumers. In 1976, the company began home energy audits and encouraged customers to retrofit their homes for greater energy efficiency. In 1977, the Oregon legislature passed a bill which defined the plan currently being used by Pacific Power and Light.

The plan consists of the following elements: If you are customer of Pacific Power and Light with an electrically heated house, the company will give your house an energy audit free of charge. Once sources of energy waste are located, the company will find an independent contractor to make energy saving improvements and finance the improvements up to $1,500 at a 10-year 6½% loan ($2,000 if storm windows are included).

This plan was a basic shift in policy for the company. It used funds for home energy improvement loans instead of for the construction of a new power plant. The company's decision to invest in conservation was based on economic necessity. Conservation is cheaper than building a new plant and it uses less energy.

Mr. Davenport finished his talk with a quote from Daniel Yergin, editor of Energy Future:

> Conservation of energy produces no radioactive waste, costs nothing in the way of petrodollars. Moreover, it can provide the energy that conventional sources may not be able to furnish. Unhappily, it does not receive the emphasis and

attention it deserves. The barriers to potential savings through conservation are very great but they are rarely technological. Although some of the barriers are economic, they are in most cases institutional, political, and social. Overcoming them requires policies that champion conservation, that will give it a chance equal in the market place with that enjoyed by the conventional sources of energy.

ED KEARNEY, Executive Director
National Committee on Uniform Traffic Laws

Topic: Transportation Conservation

In the U.S., according to the U.S. Bureau of the Census, 80 million people drive to work. Of those, 52 million are alone in their cars. If a substantial number of those 52 million single car commuters would share rides to work, it would save the country 10 million gallons of gas per day!

Mr. Kearney represents a national project funded by the federal government to look into the laws, both state and federal, which are impediments to ride-sharing arrangements. Some of the impediments to ride-sharing and to van-pooling (the most organized and institutionally supported program of ride sharing) are:

1. Workman's compensation requirements make employers fearful that, by encouraging ride-sharing, they will increase their liability for injury-compensation payments.

2. Income taxes. Record keeping is required if you collect money from riders.

3. If the riders cross taxing jurisdictions, a common occurrence, it brings the regulation of the arrangement under reciprocal jurisdictional arrangements and special gasoline tax provisions.

4. Some states have laws prohibiting the use of public vehicles for private purposes.

A partial solution to some of the problems is contained in the model legislation for van-pooling and ride-sharing which was developed under Mr. Kearney's project. State legislators were encouraged to study all of their state's laws which may inhibit ride-sharing and to pass legislative packages with ride-sharing, and consequent energy savings it offers, in mind.

(Following this page: Model State Law to Remove Legal Impediments to Ridesharing Arrangements)

INTRODUCTION

Eighty percent of travel to work is by motor vehicle and most drivers commute by themselves. If drivers participated in ridesharing arrangements, it has been estimated that over 10 million gallons of gas would be saved each day and that rush hour traffic could be reduced by 30%. For these and other reasons, people should be encouraged to share rides to work and any law that unnecessarily impedes or discourages such sharing should be changed.

The National Committee on Uniform Traffic Laws and Ordinances is an independent, non-profit, voluntary association, which exists to maintain the Uniform Vehicle Code and Model Traffic Ordinance. The Uniform Vehicle Code is a specimen set of motor vehicle and traffic laws used as a guide by state legislatures, and the Model Traffic Ordinance is a companion document used by local legislative bodies. The National Committee is a carefully selected group of over 140 individuals representing federal, state and local government, private industry, and other groups interested in achieving sound, uniform motor vehicle and traffic laws. Since 1972, the National Committee has drafted texts of model laws in areas of emerging interest that are not covered by the Uniform Vehicle Code. The purpose of this activity is to have the best possible laws to test new ideas or to conduct programs necessary to solve new problems.

Under the title "Model Ridesharing Law" (dated March 26, 1979), the first draft of this document was distributed to more than 1,000 agencies and organizations for their review. Over 65 letters commenting on the first draft were received. These comments were summarized and a second draft dated June 15, 1979 was prepared and distributed to all persons who had commented on the first draft. The second draft, and letters commenting on it, were submitted to a Special Panel, which at a meeting on August 20-21, 1979, decided the contents of this document. The members of the Special Panel were: Senator Nat Washington (Chairman), Jack Derby (California Office of Ridesharing), Ken Dirkzwager (Minnesota Division of Driver and Vehicle Services), Bill Fortune (National Association of Vanpool Operators), Charles Gray (National Association of Regulatory Utility Commissioners), Tim Letzkus (Highway Users Federation for Safety and Mobility), Herb Scheuer (American Public Transit Association), and Mavis Walters (Insurance Services Office).

The preparation of this document was preceded by a review by the NCUTLO Staff of state laws which could impede forming carpools and vanpools. This review will be published under the title "Legal Impediments to Forming Carpools, Vanpools and Other Types of Ridesharing Arrangements." Using that review will enable each state to determine which of sections of this Model Law should be considered for enactment and will facilitate determining how the sections of this Model Law compare with laws in all jurisdictions.

§ 1. DEFINITION OF RIDESHARING

Section 1. Ridesharing arrangement defined.

Ridesharing arrangement means the transportation of persons in a motor vehicle where such transportation is incidental to another purpose of the driver. The term shall include ridesharing arrangements known as carpools, vanpools and buspools.

§ 2. MOTOR CARRIER LAWS

Section 2. Motor carrier laws do not apply to ridesharing.

The following laws and regulations of this state shall not apply to any ridesharing arrangement using a motor vehicle with a seating capacity for not more than 15 persons, including the driver:

(a) Chapter ..... pertaining to the regulation of motor carriers of any kind or description by the (Public Utilities Commission).

(b) Laws and regulations containing insurance requirements that are specifically applicable to motor carriers or commercial vehicles.

(c) Laws imposing a greater standard of care on motor carriers or commercial vehicles than that imposed on other drivers or owners of motor vehicles.

(d) Laws and regulations with equipment requirements and special accident reporting requirements that are specifically applicable to motor carriers or commercial vehicles.

(e) Laws imposing a tax on fuel purchased in another state by a motor carrier or road user taxes on commercial buses.

§ 3. WORKMEN'S COMPENSATION LAWS

Section 3. Workmen's compensation law does not apply to ridesharing.

Chapter ..... providing compensation for workers injured during the course of their employment shall not apply to a person injured while participating in a ridesharing arrangement between his or her place of residence and place of employment or termini near such places, provided that if the employer owns, leases or contracts for the motor vehicle used in such arrangement, Chapter ..... shall apply.

§ 4. LIABILITY OF EMPLOYER

Section 4. Liability of employer.

(a) An employer shall not be liable for injuries to passengers and other persons resulting from the operation or use of a motor vehicle, not owned, leased or contracted for by the employer, in a ridesharing arrangement.

(b) An employer shall not be liable for injuries to passengers and other persons because he provides information, incentives or otherwise encourages his employees to participate in ridesharing arrangements.

§ 5. INCOME TAXES

Section 5. Ridesharing payments are not income.

Money and other benefits, other than salary, received by a driver in a ridesharing arrangement using a motor vehicle with a seating capacity for not more than 15 persons, including the driver, shall not constitute income for the purpose of Chapter ..... imposing taxes on income.

Comment: Excepting income received by a driver in smaller ridesharing arrangements from taxes will avoid keeping records. Such a record-keeping requirement is perceived as an impediment to forming carpools and vanpools.

§ 6. MUNICIPAL LICENSES AND TAXES

Section 6. Municipal licenses and taxes.

No county, city, town or other municipal corporation may impose a tax on, or require a license for, a ridesharing arrangement using a motor vehicle with a seating capacity for not more than 15 persons, including the driver.

§ 7. OVERTIME AND MINIMUM WAGE LAWS

Section 7. Overtime compensation and minimum wage laws.

The mere fact that an employee participates in any kind of ridesharing arrangement shall not result in the application of Chapter ..... (laws requiring payment of a minimum wage, overtime pay or otherwise regulating the hours a person may work).

§ 8. BUSES AND STATE VEHICLE CODES

Section 8. Certain ridesharing vehicles are not commercial vehicles or buses.

(a) A motor vehicle used in a ridesharing arrangement that has a seating capacity for not more than 15 persons, including the driver, shall not be a "bus" or "commercial vehicle" under the portion of Chapter ..... (state vehicle code) relating to equipment requirements or rules of the road.

(b) A motor vehicle used in a ridesharing arrangement that has a seating capacity for not more than 15 persons, including the driver, shall not be a "bus" or "commercial vehicle" under the portions of Chapter ..... (state vehicle code) relating to registration.

(c) The driver of a passenger car (motor vehicle that has a seating capacity for not more than 10 persons, including the driver) used in a ridesharing arrangement is not a "chauffeur" nor is he transporting persons for compensation under the driver licensing portions of Chapter ..... (state vehicle code).

Comment: As to "passenger car" in subsection (c), Uniform Vehicle Code § 1-142 defines this term as a motor vehicle designed to carry 10 passengers or less that is used to transport persons.

§ 9. USE OF PUBLIC VEHICLES

93. Section 9. Use of public motor vehicles for
94. ridesharing.
95. Motor vehicles owned or operated by any state
96. or local agency may be used in ridesharing arrange-
97. ments (for public employees). Participants in any
98. such ridesharing arrangement shall pay the actual
99. total costs of using the vehicle in that arrangement.

Comment: States should enact the phrase in parentheses if they decide to allow only public employees to ride to work in vehicles owned or leased by government agencies.

MISCELLANEOUS TOPICS

Incentives

Several people commenting on the "Model Ridesharing Law" recommended the enactment of incentives that would increase sharing rides. While this subject is definitely worthy of consideration, it was deemed beyond the scope of this document.

Cost and availability of insurance

A problem for forming ridesharing arrangements in the past has been the cost and availability of insurance, particularly for vanpools.

Mandating coverage. The Special Panel considered a section which would have prohibited insurers from increasing premiums, cancelling any policy or denying coverage because a motor vehicle is used in a ridesharing arrangement. Members of the Panel unanimously agreed that this approach could be counter-productive and could even result in higher premiums for vehicles used in pooling arrangements. The Panel also thought that enactment of the sections in this document coupled with recent developments in the insurance industry should solve this problem.

No fault benefits. In states where economic losses caused by injuries in crashes are compensated on a no-fault basis, consideration of the source of such compensation in accidents involving ridesharing vehicles should be considered. There may be some reduction in insurance premiums for ridesharing vehicles if the occupants are compensated by their own insurers rather than the insurer of the owner of the vehicle.

Deduction of expenses by employer

The Special Panel considered a section which would allow employers to deduct the costs of "promoting, organizing, administering and operating" ridesharing programs as ordinary business expenses. The Panel's view was that providing for such deductions in state income tax laws was unnecessary because employers already could deduct such costs as ordinary business expenses. And inclusion of the cost of operating vanpools might allow employers to write off the cost of acquiring vans on an accelerated basis.

Parking facilities

Several people commenting on the first draft recommended that this Model Law contain sections that would facilitate establishing lots where people could park their cars and continue their journey to work or sporting events in ridesharing arrangements or by using public transit. The Panel did not regard problems in this area to be impediments to most ridesharing arrangements but it did agree that it would be helpful to alert states to possible existence of problems in establishing such lots.

Use of public funds for parking lots located on private property. If the owners of a parking lot in a shopping center agree to allow commuters to park cars in their lot, there probably should be authority to expend public funds to indicate the existence of the facility and to pay the cost of any extra maintenance that may be necessary.

Liability issue. Owners of private property who allow commuters to park probably should be liable for injury or damages to such users only when the owners are grossly negligent. Another approach would be to authorize purchasing insurance to cover any such liability.

Tax-exempt status. If a church allows commuters to park in its lot, it may be necessary to provide that such use of its property does not affect its tax-exempt status.

TRANSPORTATION
Monday afternoon, September 24

Moderator: Representative John Sessions, Idaho

HONORABLE LILA COCKRELL
Mayor of San Antonio, Texas

Topic: Transportation of Coal

The major problem in San Antonio re coal transportation is the exorbitant rates set by Burlington-Northern Railroad and approved by ICC for transportation of coal from Wyoming to Texas.

The history of the situation is that in the early 1970s, San Antonio decided to convert most of its power generation from natural gas to coal. The quoted price of coal was $7.50 per ton from Wyoming mines; the railroad's charge for transporting was $7.90 per ton. At these costs, San Antonio decided to convert and to construct coal-fired plants although the costs of construction of a coal plant were about two and one-half times that of a gas plant.

The 1979 price of transportation by Burlington-Northern is $19.05 per ton -- an increase of $11 per ton in less than eight years. You could add $2.00 more if San Antonio had not decided to purchase its own freight cars and provide its own maintenance.

The major Texas utilities now won't use Wyoming coal. They are exploring Australian, South African coal. Absurdly, it is actually cheaper to ship coal across the wide ocean than it is to transport it across a couple of states. San Antonio would not have considered coal conversion in 1972 had it anticipated the increases in cost.

Mayor Cockrell believes that deregulation of the railroads might cause even higher rates and less service.

WILLIAM SAGE
Vice-President, Public Affairs, Northern Tier Pipeline Company

Topic: Transportation of Oil

Here is the history of two proposals to carry crude product from the west coast to middle America. Both have been dropped. (1) The Kitimat Pipeline was rejected by Canadian officials because of possible oil spills; (2) the SOHIO project (Long Beach to Texas) was dropped by SOHIO due to the difficulty of obtaining necessary state and local permits. There has been no oil refinery construction in the past ten years and none is likely in the near future.

Supply and demand play an important part in decisions re oil

transportation. Alaska Pipeline pumps 1.2 million barrels of heavy sulfur crude into Valdez where it goes by tanker down the West Coast of the United States. Due to the lack of desulfurization equipmen , only 400-500,000 barrels are utilized on the west coast. The remaining oil goes to the Panama Canal to be loaded in large stationary tanks. Smaller tankers then take it through the Canal to the Gulf of Mexico. Once oil gets to the Gulf of Mexico, it still has to be transported to where it is needed. It is estimated that this process costs $2 more per barrel than would any other proposed pipeline system.

The review process Northern Tier is undergoing for its pipeline in Washington State is a one-stop permitting process. Northern Tier applied formally through use of an Environmental Impact Statement and paid for an independent consultant hired by the State. The consultant evaluates Northern Tier's EIS and prepares a State EIS. The Washington Energy Facilities Siting Council reviews both documents, makes recommendation to the Governor who must make a decision within sixty days. One legal issue still has to be decided: Can state government pre-empt county and local zoning ordinances?

A federal permit for pipelines is issued under the Federal Energy Act of 1978 and it provides for the BLM to do an EIS with input from all affected federal agencies. BLM makes its recommendation to the President by October 15 (for this particular pipeline) and the President must decide by December 6. The Department of Energy supports Northern Tier strongly.

Northern Tier has already committed $55 million to future construction costs as a direct result of the permit process and public concern about environment. It has a Public Information Office in Port Angeles (pipeline site) and has held a dozen public meetings to work with local communities in addressing environmental concerns.

How do you go about constructing a 1550 mile pipeline? You have to be very aggressive to get one built with the morass of regulations and the environmental groups seeking to delay the project.

ROBERT M. JEFFERSON
Manager, Nuclear Materials Transportation Technology Department
Transportation Technology Center, Sandia Laboratories

Topic: Transportation of Nuclear Materials

There is a basic problem we face -- the disparity between the public perception of the problems attending nuclear waste and the real facts.

··· Public Perception: All radioactive wastes need the same degree of care during transport.

Fact: The basic rule, in effect since the 1940s, is that regulation should be proportional to the risks involved in transporting waste. For example, nuclear spent fuels are much more dangerous than radioactive pharmaceuticals; therefore, they are regulated and protected differently.

There are four categories of waste:

1)	Exempt	Smoke detector
2)	Type A	Radioactive pharmaceuticals
3)	Type B	Radioactive gauges; radioactive therapy sources
4)	Spent nuclear fuels	

··· Public Perception: Protection must be provided by the packaging itself; there should be no reliance on how the package is moved or handled.

Fact: The first two categories must survive normal handling experience. Certain tests are designed to test packaging.

For Type B, the packaging must be able to survive extra severe accidents. Radioactive materials are the only hazardous materials that must be packaged to survive accidents. World-wide engineering test standards are used. Packages must survive four tests, including dropping from a height, fire, and immersion in water. The public misunderstands the efficiency of this testing process, which is more than adequate to protect against accidents.

The amount of nuclear material moved in this country is infinitesimal compared to other hazardous material. Looking back to 1957, there is only one truck accident per 400,000 miles, occurring at a velocity under 80 mph in 99% of the cases. Trains have also had few accidents, most not severe. This proves the number of truck and train accidents that could damage the packaging are very few.

··· Public Perception: Nuclear wastes are vulnerable to the possibility of sabotage.

Fact: A world-wide study of sabotage found only a minor case of attack on a nuclear shipment.

Sandia Labs tries to make the risk as low as possible and still be cost-effective. Mr. Jefferson contends that stringent procedures and regulations surrounding nuclear wastes render its transportation less hazardous than that of other dangerous materials.

Plenary Speaker
Tuesday morning, September 25

Jackson Gouraud
Deputy Undersecretary
U.S. Department of Energy

The National Effort To Solve The Energy Crisis

The energy problem is real, and we're in for a very rough 20-25 years, beginning right now. Worldwide oil demand exceeds worldwide oil supply. We are living on the edge of crisis.

Whatever we do in the long-term, in the short-term we are dependent on imported oil. What are the near-term alternatives? The only significant alternatives to oil are natural gas, coal, and nuclear. Under the Natural Gas Pricing Act, a trillion cubic feet of gas from intrastate production has been released to interstate sale, and this extra gas is easing demand on oil. As far as nuclear is concerned, public perception of its risks and the financial risks envisioned by potential lenders has made it unlikely that we will have the 150-200 nuclear plants anticipated by 2000. Some say we'll be lucky to keep on line the 70-odd plants now in existence, and perhaps finish 90 others under construction. Coal also has problems. It is dangerous and difficult to mine, to transport, and to burn without polluting.

So, if the supply side of the energy picture is gloomy in the near-term, what else is there? There is the demand side; we have to reduce our energy demands; we have to conserve.

Conservation should mean "the wise use of resources", "the elimination of waste", and "doing more with less". The cheapest added barrel of oil you can buy anywhere is the barrel you save by not letting it go wastefully up your chimney or out your exhaust pipe.

What <u>you</u> can do about the energy crisis:

1. Industrialize to put in place a 55% solar state tax credit.
2. Deregulation of van-pools. Van-pools have been exempted from ICC regulation. Sixteen states have already deregulated van-pooling. The remaining states need to do so. Our goal: a saving of 400,000 barrels of oil per day through car-pooling, van-pooling, and commuter buses and trains.
3. Small-scale Hydroelectric Development
   Federal goal: 100 small-scale hydroelectric plants by the end of 1981 to be constructed with over $300 million in funds reprogrammed from a myriad of federal agencies. States need to remove unreasonable/outdated licensing and permitting requirements Massachusetts and New Hampshire are examples of states who have simplified permitting and review requirements and passed legislation to encourage development of hydroelectric potential.
4. Low-Income Weatherization Assistance
   The flow of money for weatherization assistance to low-income people has been slowed by federal administration problems. We're making a major effort to solve them. We need state cooperation. Make sure your state is not sitting on weatherization funds.
5. Utility Home Audits
   DOE's Residential Energy Conservation Service will soon be issuing regulations prescribing standards for mandatory utility audits of homes. States will be

required to work with utilities to design a plan for carrying out these audits. State legislatures could help by watching utility rate-making so that those who weatherize their homes are not penalized with higher rates as consumption drops. Property tax assessments should also be watched so that people can retrofit their homes without threat of higher assessments. Legislatures can help market the federal tax credit for weatherization and solar retrofits. They can help us meet the President's goal to retrofit 90% of existing homes by 1985. Look at time-of-sale retrofit requirements. There is much states can do here.

There are things we're doing in Washington to cope with the energy crisis. The supply-demand crunch is real and will be while we make the transition to other energy resources. But this country has all the energy resources it needs to meet its demands for centuries once they're developed. And much is being done to develop them by Washington.

In April 1978, a DOE commercialization Committee was formed. I was Chairman, and it included the Assistant Secretaries and the Director of Energy Research. We listed all the technologies with commercial potential and organized Task Forces to assess each technology for its technical readiness, economic potential, and its institutional, environmental, and market acceptablity. We identified 19 technologies in four categories.

LIQUID FUELS: We identified Enhanced Oil Recovery, Coal Liquifaction, and Oil Shale. Conventional methods leave almost 2/3 of the oil in the ground. Enhanced Oil Recovery means getting more out of the fields by various methods. The processes are expensive and take time, but we could double or more than double our proved reserves of 30 billion barrels. Oil produced by these techniques will be allowed world price. Beginning in January 1980, producers can get upper tier prices for their lower tier oil to finance 75% of certain Enhanced Oil production, up to $20 million a project.

Coal Liquifaction Processes: The closest to commercialization is Solvent Refined Coal (SRC), which can be produced by two different technologies. Two SRC demonstration plants, each illustrating a different process, will be built.

Oil Shale: We plan a limited-duration financial incentive, a $3 per barrel tax credit, to speed industry development of Oil Shale. Production could reach 300,000 barrels a day by the 1990's.

Gaseous Fuels: includes several processes. We are trying to modify pricing regulations for methane from tight sand formation. DOE has awarded a $3.8 million grant to test the commercial possibilities of using natural gas from coal seams and Devonian shale. We are trying to get a subsidy for a consortium willing to put the first High-BTU Gasification facility together.

ELECTRIC MARKETS TECHNOLOGIES: Some are still in the R&D stage: Utility Atmospheric Fluidized Bed Combustion, Combined-Cycle Integrated Gasifier, and Fuel Cell Power Plants. Considered ready now are: Geothermal, Low-Head or Small Hydroelectric, and Small Wind. Pacific Gas & Electric has increased its Geothermal Energy production from The Geysers, near San Francisco, from 500 to 600 megawatts. By 1985, production will be over 2,000 megawatts. Geothermal reservoirs around the country, heating in the 300-400^{0}F range, can be used in many industries and are being explored. Cheap oil forced many small or Low-Head hydroelectric dams into disuse. We're now helping municipalities, indstries, and public utilities by

providing $300 million to renovate 100 small hydroelectric projects by 1981.

DIRECT END USE: includes Urban Waste, Cogeneration, Industrial Atmospheric Fluidized Bed Combustion, Solar Hot Water, Passive Solar, and several conservation projects.

Urban Waste: Is a widely-known energy source in Europe; we're close to mastering the economics that would encourage broad use here.

Cogeneration: Fifteen people in DOE regional offices have been appointed to get cogeneration going. The technology is well developed, and many industries are expected to move into it soon.

Atmospheric Fluidized Bed Combustion: We are co-sponsoring four 10-30 megawatt plants in several industries to prove its value. We're confident that when these projects prove successful, other industries will adopt their process.

Solar Hot Water and Passive Solar: Principal barrier holding back their development is high first cost. To supplement the NEA tax credits, we plan these steps:

1. To work for a fair share of passive and active solar in new housing.
2. To encourage lenders and appraisers to consider solar and conservation potential on appraisal and lending forms.
3. To help rationalize solar component certification and to eliminate duplicate tests in different states.
4. To help establish 500 to 1,000 small firms, many of them divisions of existing HVAC and plumbing contractors, to solicit business and install collectors.
5. To mount a major public information program to make sure people understand what they can do about solar and conservation.

Finally, there are existing products that can save energy, but people aren't aware of them and industry is slow in switching from first-cost to life-cycle costing. Noteworthy are: Oil-Field Heating Equipment, High Efficiency Motors, Air/Fuel Ratio Combustion Controls, and Ignition Devices to eliminate pilot lights.

These are some of the things being done in Washington and elsewhere to solve our energy problems. The actions I've described will help reduce oil imports; conservation by the public, business, and industry will do even more.

REGULATORY INCENTIVES AND BARRIERS
Tuesday morning, September 25

Moderator: John Watson, Executive Director
Western Interstate Energy Board

CONLEY WARD, JR.
Commissioner, Idaho Public Service Commission

Topic: Utility Regulations

Mr. Ward spoke on the importance of state utility commissions with the West's emerging role as the nation's energy supplier. Much of the regulation of energy should be done at the state level in preference to federal strategies such as the creation of an Energy Mobilization Board, an attempt to create another level of bureaucracy.

The states should change their public utilities commissions from "bulwarks of the status quo" to institutions encouraging every effort, both public and private, toward innovation and efficiency. Coal-fired electric plants require three BTUs of coal for every BTU of electricity produced. It would be better to use coal directly in industrial processes. Mr. Ward criticized the monopolization of electricity production within the states by electric utilities. It is arguable that this protective system has outgrown its usefulness as it inhibits energy efficient schemes, such as cogeneration.

The next fifty years will require great changes in our entire outlook toward energy, and state governments should develop regulatory and tax structures that will encourage innovation in dealing with energy problems.

REPRESENTATIVE CARY PETERSON, Utah

Topic: Resource Ownership

State efforts to wrest control of its own resources from the federal government is becoming, in the words of Senator Norman Glaser of Nevada, a "Sagebrush Rebellion."

Some of the major activities by state governments in this regard:

- Nevada Assembly Bill 314 calls for state control of BLM lands.
- California recently passed AM 1407 which ordered feasibility study of state control of BLM lands.
- Utah and several other Western states are preparing similar bills for introduction in the next legislative session.
- U.S. Senator Orrin Hatch, Utah, introduced a bill in the Congress that would return all BLM lands to state and private control as is constitutionally provided.

The Western Conference has formed a coalition of state and local governments to study and lobby for redress of the problem of excessive federal ownership of Western state lands. Members of

the Conference were urged to become active in their support of this emerging movement.

SENATOR TOM TOWE, Montana
(Senator Towe was one of the chief sponsors of the coal tax in Montana)

Topic: Taxing of Energy Resources

The Montana coal tax is neither an incentive nor a barrier to energy development. The state of Montana passed the coal tax because coal is non-renewable resource. The philosophy behind the tax is: the state must require that people taking things out of the ground give something back to the people of the state.

The Montana coal tax is 30%, collected as a severance tax by the state. An additional amount, 45% of the sales price of the coal, is placed into the taxable valuation of the counties. This amounts to about 3%. The coal tax, then, is 33% of the coal price once it is ready for market.

Revenues from the tax go to three general areas: one-third for impact (rapid growth phenomenon was one of the chief reasons for supporting the tax); one-third for future generations (e.g. education and alternative energy development); one-third for the state's general fund.

The coal tax has given the state control over the impact of coal development.

RUSSELL HULSE
Vice President for Resources and Planning, Arizona Public Service Company

Topic: Interstate Transmission of Power

Growth is the single word that best characterizes the West today. Arizona, for example, has a growth pattern similar to many other Western states. In the last eight years Arizona's population has grown 32%; in the next ten it will grow 26%.

The continued growth of the Western states will require much more energy. At present rates of consumption, by the year 2000, the population in the West will require three times as much coal, twice as much natural gas, and three times as much oil. Because oil and natural gas are becoming less available, the West will have to rely on the development of coal and nuclear power.

Mr. Hulse's solution to future energy problems in the West is for the states to pool their energy resources. He urged a loosening of state and federal regulations regarding the interstate transmission of power. Two other key factors to implementing an effective method of regional power transmission are technological improvements and education of localities on the economies of large power plants supplying power on a regional basis.

NICHOLAS YOST
General Counsel, Council on Environmental Quality

Topic: Environmental Regulations

1) What are the environmental problems? 2) What are the laws and regulations we have adopted to deal with them? 3) What has our experience been under those laws and regulations? 4) What are we doing to improve the situation?

There is probably not a person who does not want to free the U.S. from dependence on OPEC oil. There is probably not a person--particularly in the West--who doesn't care about clean air and clean water.

The intent of federal regulations is to protect the public. Sometimes regulation writers miss the mark or go overboard, but in all cases regulations attempt to address real problems.

Nine classes of regulations impinge on energy development. This list includes the Clean Air Act, the Clean Water Act, and the Surface Mining Act. The National Environmental Policy Act implements environmental impact statements through the Council on Environmental Quality.

One myth: The use of Environmental Impact Statements retards energy growth. Since 1977, there have been 76 applications for coal-fired plants. Of those, 74 have been approved. In the period of 1975-78, there have been 49 applications for refineries; only two of those have been turned down. Moreover, during the last six years, U.S. refinery capacity has increased 27%.

Another myth: Environmental Impact Statements lead to excessive litigation. Taking the years since NEPA's effectiveness (1970) there were 1,052 NEPA lawsuits--roughly 100 per year. Of these, 103 involved energy development; 17 of those involved injunctions. That is only two per year.

President Carter ordered the Council on Environmental Quality to reorganize the entire NEPA process, adopting regulations to force federal agencies to accomplish three things:

1. Reduce delay
2. Reduce paperwork
3. Try to insure that the system concentrated on arriving at environmentally sensitive decisions rather than paperwork.

Public interest, business, and environmental groups all took part in the process. At the end of it, they agreed that the new regulations regarding environmental impact statements were an improvement over the old system. Some of the accomplishments cited include:

1. Mandatory time limits.
2. The so-called scoping process: getting everyone with an interest in the controversy involved from the outset.
3. An effort to make the permits work concurrently rather

than consecutively.

4. Reduction of paperwork: Shortening the length of the Environmental Impact Statements.

Mr. Yost concluded by supporting President Carter's plan to create an Energy Mobilization Board.

WORK GROUP RECOMMENDATIONS
(Summary)

1979 Western Conference Annual Meeting

Process

The work group topics were closely related to those discussed in the plenary sessions. They were intended to focus on the specifics of problems/needs in the various subject areas and propose appropriate actions for the coming year to the Executive Committee of the Western Conference who will decide on priorities and assignment to committees.

Each work group was facilitated by one or two legislators who helped keep the group on target. The group was asked to look at possibilities for future action with the following criteria in mind:

1) Does this program element have specific Western significance?
2) What is now being done?
3) What needs to be done?
4) What is the best mechanism for accomplishing this?
5) Who are the key players?
6) How much time should be devoted to the effort?
7) What resources are available to lend assistance?
8) How will we evaluate the product?

In the course of a single afternoon, twelve small groups met, argued, shared ideas. Limited space makes it impossible to include all phases of the discussion, but listed below are the recommendations which will be seriously considered for the Western Conference Work Plan for 1980.

Summary of Recommendations from the Work Groups

ENERGY OPTIONS

OIL

Establish central information clearinghouse on land and resource development questions.

COAL

1. Continue OSM funded surface mining project
2. Advocate passage of S 1403, the "Surface Mining Control and Reclamation Act Amendments of 1979", in the House of Representatives.
3. Assess state laws and programs related to mine and plant siting, protection of clean air and water, and mitigation of social impacts from increased coal mining and usage.
4. State by state assessment and comparison of coal taxes to include impacts on production, revenues, and mitigation of negative social impacts.
5. Examination of the viability of establishing a uniform data base on coal in the Western states to be used as a resource for elected officials.

ENERGY OPTIONS (Continued)

SYNTHETIC FUELS

1. Analysis of state water laws and interstate compacts with a focus on the effects of synthetic fuels development on Western water rights.
2. Expedite and induce development of synfuels through:
   * tax incentives and subsidies for research and development (state level)
   * impact aid to affected communities
   * revision of federal tax structure to induce private industry efforts at research and development and aid to affected communities
   * excess profits tax should be channeled into private industry R&D and impact aid
   * adoption of an Energy Mobilization Board with limited powers regarding substantive state law

ALCOHOL FUELS

Formation of an alcohol fuels committee of the Western Conference to examine the potential for alcohol fuels to replace other compounds, emissions control problems related to alcohol fuels, the BTU balance, and the efficient use of byproducts of alcohol fuels.

SOLAR AND RENEWABLES

Information clearinghouse on solar energy to include:
* compilation of proven cost effective programs
* compilation of current research projects
* compilation of state legislation

NUCLEAR

1. Develop a model site banking/prepermitting program for power plants.
2. Develop regional criteria for determining what materials should be disposed in disposal sites and what levels of radiation should be allowed.

CONSERVATION

RESIDENTIAL CONSERVATION

1. CSG Actions

   a. Compile, analyze and evaluate existing financial incentive programs and disseminate to legislatures (what is working; what isn't)
   b. CSG, NCSL lobby conservation in Congress
      1) Education (include lawmakers)
      2) Testing and demonstration funds for both individual states and CSG
      3) Push DOE or other appropriate organizations to publish consumer guides
   c. CSG compile, analyze and evaluate information delivery systems
      1) Energy extension service
      2) May need to disseminate DOE generated info
   d. CSG evaluate laws, regulations including mobile/modular housing

2. State Actions

   a. Provide low interest loan programs to provide front end money
   b. Each state develop energy oriented curriculum
      1) K-12
      2) Community colleges (installers)
   c. Set example for energy efficiency
      1) Life cycle costing
      2) Retrofit weatherization into building
      3) Pilot programs/demonstrations
   d. Make utilities analyze end use and provide the most efficient life cycle costed power--be it thermal, renewable, or conservation
   e. Examine building practices and building codes for obsolete practices and problems for improved efficiency (include retrofit as well as new; recognize regional differences)
   f. Rate structure changes, e.g. Baseline/Marginal cost
   g. Education
      1) Publicity campaign to inform public about benefits
      2) Elected officials take lead role
      3) Educate professional community
      4) Educate public servants
      5) Make consumers guides available.
   h. Mandate energy audits for all homes
   i. Require energy efficiency "full disclosure" act for homes (include selling or renting)
   j. Require retrofit at time of sale
   k. Ban baseboard heat (or charge a fee for all new baseboard heat)
   l. Examine utility charters
      1) Allow profit on conservation
      2) May need to reevaluate along end use lines
   m. Set up energy fund
      1) Must include oil, gas, electric
      2) Provide front end funds

CONSERVATION (Continued)

INDUSTRIAL CONSERVATION

Study the utilization of unused industrial energy in the specific areas of co-generation, siting, waste heat, and energy efficiencies. Study should include:

* identification of regulations impeding co-generation, etc.
* development of model legislation for industrial tax credits
* development of model legislation for rate structure incentives for higher energy efficiencies
* development of industrial awareness program on increased energy efficiency

TRANSPORTATION CONSERVATION

1. Review state laws which may serve as impediments to vanpooling and present info to states prior to 1980 legislative session.
2. Prepare a paper explaining in detail the "Metcalf Amendment", compile Western States weight limit laws, and distribute package to chairpersons of the Western States Committees on Transportation and to the Western Conference of Trucking Association Directors.
3. Work to develp a standardized presentation that can be used throughout the West to inform people how improved driving habits can save fuel.
4. Study programs such as Utah's satellite parking lots to see where states can further encourage carpooling.
5. Research the question of improving fuel efficiency in agricultural equipment.
6. The Federal Clean Air Act requires states with non-attainment areas for carbon monoxide and ozone to enact mandatory vehicle emissions inspection and maintenance (I&M) statutes and implement those programs by 1982. The States of the Western Conference of the Council of State Governments are encouraged to examine energy savings potential of requiring vehicles to be maintained as recommended by vehicle manufacturers (e.g., engine parameter adjustments) so as to comply with the requirement of the federal Act. Such adjustments maximize fuel efficiency, minimize emissions, and assure maximum performance.

TRANSPORTATION

TRANSPORTATION OF COAL

1. Establish a task force to develop policy on ICC regulations and present to Congress
2. Prepare model legislation on railroad taxation to provide necessary incentives for private railroad development.
3. Develop amendments to the 4R Act which would allow greater western participation for introduction in Congress.

TRANSPORTATION OF OIL

1. Develop model oil spill liability legislation
2. Develop model legislation relating to "one stop" permit clearinghouse

TRANSPORTATION OF NUCLEAR MATERIALS

1. Sponsor workshops for legislators on scientific and technological management and transportation of nuclear materials.
2. Put pressure on the Department of Transportation for better enforcement of regulations.
3. Determine what jurisdictions the states have to adopt penalties and inspect shipments according to federal standards. Determine whether the states can adopt by reference federal standards and then enforce them. If states can, then training programs for inspectors of carriers of nuclear materials should be arranged in each state for the vigorous enforcement of standards.

Luncheon Speaker
1979 Annual Meeting
Western Conference

Dr. Alan Rosenthal
Eagleton Institute of Politics
Rutgers University

Getting It Together Rather Than Pulling It Apart

Introduction

The title of my speech is "Getting It Together Rather Than Pulling It Apart." It is about something that is given little attention these days--the legislative institution.

I have been working with state legislatures for 13 years--observing the scene and developing affection for legislatures and the people who inhabit them. I am a legislative groupie or legislative junkie--I'm not sure which.

I have just finished the manuscript for a book on state legislatures--It's titled LEGISLATIVE LIFE, and will be published next year by Harper & Row. Let me repeat that, so you can write it down.

Most of the period during which I've been involved with legislatures has been one of legislative progress, development, reform. From, let's say 1965 to 1975, legislatures built their capacity, acquired the wherewithal to do a job. Able staff was hired, facilities were expanded, salaries were raised, procedures were streamlined, the process was opened up--and so forth.

You should feel proud of these institutions in which you serve. As a citizen, I take pride in that messy, disorderly, chaotic, unpredictable, lovable institution that we call the legislature.

But the easy period--of progress, of development, of building capacity--is over, done, finished.

I am concerned--have spoken of my concerns in various states and have written them up--and would like to share a selected few concerns (but by no means all of them) with you.

The legislature as an institution is under challenge. There are forces from without and from within threatening to pull it apart--just when it needs to be getting itself together.

Yet, the legislature tends to respond to these forces, as all of us do, in terms of old solutions--drawing on reforms that proved useful during the period of progress in 1965 to 1975.

But the reforms that served well yesterday may not serve well today. It is said, in fact, that today's reforms are likely to become tomorrow's tyrannies. So we should be wary of reform--which reform for what.

Let me briefly illustrate what I see happening--pulling the legislature apart--by considering: first, independence; second, ethics; and third, structure.

Getting It Together Rather Than Pulling It Apart

A. First, let's take independence. I'm referring now to the independence of individual members, not that of the legislatures as a branch of government.

The independence of individual legislators has been enhanced significantly these past years. Salaries are higher, pension provisions are generous, staff and staff allowances are available, legislators in more and more states have offices and people working their districts for them.

Meanwhile, wherever they meant anything at all--usually in the East or Midwest--political party organizations mean much less today. Few legislators in my own state of New Jersey take instructions from local party leaders anymore.

Independence is a good thing, but it can go too far. It probably has in many places.

Today the individual is king--he does his own thing, restrained only by the people back home, a powerful group or two in his district, and his ambitions for higher office.

In legislatures today there is less socializing, less colleagiality, less drinking, less poker, less of a community. Members work harder, alone and take their recreation jogging--hardly a social activity. Individualism is triumphant.

If individuals are pulling the legislature apart, then leadership should be be able to hold it together.

But leadership has been diminished practically everywhere. Legislative leaders could never command. Now they find it difficult even to persuade.

Everyone in the legislature today is his own leader--no one is a follower. Yet, without followers there can be no leaders.

Individualism and independence, fine for members, can be harmful to the institution.

The institution depends on people coming together, not moving apart.
The institution requires interdependence and community.
The institution needs people interested in the legislature--in its future as well as in their own.

B. Let's take ethics as a second example.

There is no question that twenty or even ten years ago, in a number of legislatures, the ethical climates and practices left much to be desired. But most legislators were compulsively honest, square, dull.

Since then we have undergone an ethical revolution. There are now strict conflict of interest laws. There are now strict disclosure laws. There are now ethics committees and regulations prohibiting this and forbidding that.

There are even ways now for disqualifying members from being involved in any subject they happen to know about--in the fear that interests will come into conflict. Of course they will--life is a bundle of conflicing interests, resolved only by death.

We are going bananas about purity--legislators must be purer than thee and purer than thou.

The press keeps up its unrelenting vigil, protecting us all from impurity--such as that found in junketing.

Probably no legislative delegation that went to San Francisco for the annual meeting of NSCL this past summer escaped enumeration in the local press.

How many people went?

How much did it cost? Where did the money come from? A reporter from the Boston Globe was there counting the buses that left for the Napa Valley late one afternoon.

DeNardis from Connecticut handled the matter as cleverly as anyone I know.

The press, through its vigil, uncovers malefaction and frailty for all of us to see.

I must admit (there is no better place than here and no better time than now) to both malefaction and frailty--in about equal parts.

Arriving in my room here at the Colonial early Saturday morning (1:30 a.m. your time, 3:30 real time), I was famished.

Imagine my surprise and joy to find a large basket with bread, meat, and cheese. I thought--It must be the food-basket fairy. But I discovered later that day from an article in Friday's Great Falls Tribune that Safeway had provided gift baskets to 30 government leaders. They made a mistake with me. I am not a government leader, but ate the food anyway. I wish to apologize for taking bread and cheese out of the mouths of government leaders, but I also want to thank Safeway.

Then, of course, there was the steak and egg breakfast today, brought by the Montana Bankers Association. I do not eat big breakfasts, so here I'm clean. But I am appreciative, nonetheless, to the bankers for the offer.

I must return East very early tomorrow morning, so I shall miss Atlantic Richfield's cocktails, Buttrey Food Store's hors d'oeuvres, the Wine Institute's wine, the Air Transport Asscciation's hard liquor later in the week. I am leaving my name and address behind so that all of this can be forwarded and I shall miss none of the goodies.

One final comment by way of this disrespectful ethical detour. The Great Falls Tribune reported that Chevron donated $1,500 to bring in speakers for the conference, but (I quote here) "had no say to which speakers, according to Legislative Council director Diana Dowling."

Getting It Together Rather Than Pulling It Apart

I have great respect for Diana Dowling, but let's be candid about this.

A few months ago, when I was filling up at my neighborhood Chevron station, the dealer asked if, by chance, I would be willing to speak to all kinds of people, so I said why not. The very next day (after checking, I assume, with Corporate Headquarters) the dealer asked me to choose between speaking to the Hawaiian Legislature in Honolulu, the 16-member unicameral of the Virgin Islands in St. Thomas, or a bunch of stray legislators from some Western states in Helena, Montana. I naturally chose Helena, and here I am.

I am not only grateful to all the people I mentioned--I am beholden, and I am grateful, too, to the Great Falls Tribune, the newspaper responsible for letting me know just whom to be beholden to.

Regulating ethical behavior can go only so far.

The problem is that regulations acquire a life and momentum of their own, and pretty soon the regulations are using us rather than vice versa.

A column by David Broder in The Washington Post, and other papers, a few days ago, illustrates my point.

The ethics committee of the U.S. Senate has been active of late. Among its many rulings there is "Interpretive Ruling No. 236".

Franked newsletters are limited to 5 "personally phrased references to a senator per page". Ah--but what is the definition of a page--with little pages, teeny-weeny pages, one will be able to get more references in all. The committee, to plug up the loophole, defined a page to be each side of an 8½ by 11 inch or 8½ by 14 inch sheet of paper, irrespective--mind you--of the number of folds.

I hope that the Senate has hired the additional staff necessary to enforce its ruling--reading and counting senatorial references in all the newsletters. Perhaps this is appropriate work for college student interns, who can thus learn first hand what the federal government is all about.

We should not pass regulations regarding ethical behavior (and other matters as well) that cannot reasonably be enforced--and without adding to our burgeoning bureaucracies.

Indeed, the ethic fever is pulling the legislative institution apart.

We have managed in the name of ethics and reform to ruin what was left of political parties. We must make sure that we don't, waving the banners of ethics and reform, end up ruining ourselves.

I do not believe that politicians generally are crooks--although a few undoubtedly are. It is time to stop treating them as if they all were. It is time to stop sowing distrust and governing on the basis of such negative beliefs.

C. Take structure as a third and final example of what is happening.

Getting It Together Rather THan Pulling It Apart

The assumption has been--and continues to be--that there is a structural solution for any problem.

In fact, when there is no program that is safe to advance politically, or no money to spend, legislators frequently resort to reorganization.

They reorganize the executive branch--which is always fair game--and whatever else is at hand. They even reorganize themselves.

Reorganization is not in itself foolishness. However, structural change frequently is not the solution for what ails us.

It is an easy solution to understand even though it may have little to do with the issues at hand.

It can be reflected in either an organization chart or in members, or sometimes both. What can be more alluring than boxes and figures!

Take one structural change that has been among the currency of reform for some time. REDUCE THE NUMBER OF STANDNG COMMITTEES IN THE LEGISLATIVE HOUSE. Reformers are insistent in their advocacy of fewer committees. Why fewer?

How many is too many? How many is too few? What is just right?

Whatever the advantage of fewer committees may be, there are disadvantages. Reformers ignore them.

A major disadvantage is the weakening of leadership power. With fewer committees, there will be fewer chairmanships available to leaders for allocating among members. Inactive, letterhead committees can be important, allowing leaders to appoint members to them who otherwise might do poorly chairing major committees. Leadership needs flexibility and more rather than fewer committees helps provide it.

The member of committees is a complicated issue, and it can't be discussed outside of a specific context. Yet, it is presented by reformers in terms of fewer being better--tidier, more logical.

We must beware of neatness and logic, which are divorced from common sense and politics.

One of the most popular structure reforms goes beyond reducing the number of committees--it is the reduction in the number of legislators.

Reformers advocate reducing the size of the house.

Many legislative bodies have shrunk in membership over the years--Massachusetts and Connecticut, most significantly.

New Hampshire has resisted the tide of reform, and still has a house of 400 members. The ridicule heaped on New Hampshire is fierce. But it is a delightful house, with all sorts of folks, male and female, young and old, big and little, fat and thin, and it manages pretty well, better than their small Senate.

Why smaller bodies--just to save a few bucks (that will be frittered away elsewhere), just to rid the world of politicians?

In this increasingly impersonal world, where the media mold the message and the bureaucracy gets tangled in knots, what is wrong with small districts--legislators representing a few people rather than multitudes.

A California senator has 500,000 constituents, while a representative from a single-member district in New Hampshire has 2,000 and one from Montana has 7,000.

Small here is nice, not nasty.

Furthermore, a legislative body requires a certain number of members in order to do its job.

Senates generally are small, and it is difficult to divide up labor among leadership and standing committees, and among fiscal affairs, substantive policy domain, and the various forms of legislative oversight. There simply may not be enough talent for the tasks at hand.

Up to a point, the more members the more talent. I believe in the "one-third" principle.

It goes as follows (I'll speak slowly--you may want to jot it down):

In any group --be it legislator or human and ranging in size from 12 to 3.7 million --1/3 of the members will be able, 1/3 will be unable, and 1/3 will be in the middle.

Applying that principle specifically to the legislature: 1/3 of the members are able, hard working, skillful legislators, good at lawmaking and at oversight--no matter what; 1/3 are unable, interested in other things, perhaps lazy, not at all willing to do the tough job--no matter what; and 1/3 are switch hitters--they can go either way depending upon circumstances, conditions, and fate.

Applying the "1/3 cubed" principle--in a 150 member body, there will be 50 able people, and perhaps as many as 50 others with some ability for majority and minority positions, for standing committees, for leaderships, and so forth. That's not too many at all.

I am not formally recommending that a branch of 100 be enlarged to 400, but such a recommendation is just as worthy of serious consideration as a proposal for reducing a house from 400 to 100.

We cannot afford to spread the good people thinner, and the way to get more good people is not by further limiting opportunities to achieve legislative office. It is by maintaining, or even increasing, opportunities.

Then, of course, there is unicameralism--which will probably again be on the ballot in Montana next year.

I am much too circumspect, tactful to comment on unicameralism, since I am now in

Montana, and since I will be visiting with Nebraska in a few weeks.

I am reminded, however, of Jesse Unruh's position on unicameralism. Jess, as most of you know, was a major shaper of state legislatures in the 1960's, having served as Speaker of the California Assembly for 8 years. He is now State treasurer. Unruh favored unicameralism, and when asked why replied: "I always thought it meant one man".

One man meant Unruh. Unicameralism doesn't mean one man, but it does mean fewer men and/or fewer women.

D. Now, having gone--at least by example--through some things that are pulling the legislative institution apart--I am obliged to comment on how it can be gotten together. At least the title of my remarks holds out that promise.

Earlier this year a talk I gave in Florida and Nevada was published in State Legislatures magazine under the title "Separate Roads--The Legislator as an Individual and the Legislature as an Institution". A number of legislators and staff members who read it thought that my comments came uncomfortably close to the mark. But at least one legislator--Dorothy Bradley, a former member of the Montana House, was disappointed. I suggested no solutions for the problems, she pointed out.

I shall not disappoint her with inconsistent behavior today. I still have not specific solutions for the problems. No devices, no formulas, no gimmicks, no reforms, no panaceas (and if I did, I have little time left here to present them).

However, I do believe that if we can stop the legislature from being pulled apart by the ambitions of individual members, by the pressures from the press, by the demands of all kinds of groups, by the moral fervor of the times. and by phoney-baloney solutions--there's a good chance then of getting it together.

It's up to legislators. They will have to trust themselves and their leaders. They will have to dedicate themselves to some new tasks--such as legislative oversight, which if properly done can be remarkably beneficial. They will have to use their common sense and show that they have guts, perhaps a bit more than they have done recently.

As legislators--and also as legislative staff--you are the custodians of a vital political institution. After you have achieved higher office or returned to the pleasures of private life, and after energy and conservation policies have been modified and redirected in countless ways, the legislature will still be here.

There's nothing to take its place--how healthy or how infirm an institution is up to all of you. I hope that when you leave to go on or back to better things, the legislature is stronger than when you arrived.

I wish you well in the task ahead--maintaining and strengthening the state legislature as an institution of government. It is one of the most important parts of your job, and--I will not deny--certainly one of the toughest.

RESOLUTIONS

1979 Annual Meeting

I.	Public Land Policy
II.	Western Coalition Activities
III.	Congressional Study of the Economic Impact of Federal Laws and Regulations on Public Lands
IV.	Waiver of Federal Sovereign Immunity
V.	Public Land Information Clearinghouse
VI.	Wilderness Areas
VII.	Sale of Federal Lands
VIII.	Amendments to 1902 Reclamation Act
IX.	Grazing on Public Range Lands
X.	Federal Acreage Limitations on Agricultural Projects
XI.	A Bill to Divest the Federal Government of the Public Domain and to Vest Title Therein with the Respective States
XII.	Water Rights
XIII.	Assistance from Western States Water Council
XIV.	Energy Education
XV.	Pacific Northwest Power
XVI.	Energy Mobilization Board
XVII.	Hualapai Hydroelectric Project
XVIII.	Energy Supply and Usage
XIX.	Exempting State Plans from Strip Mining Regulations
XX.	Holtzman Bill HR 3697
XXI.	The Bumpers Bill S 111
XXII.	Roth Grant Reform Bill S 878
XXIII.	Resolution on Ridesharing Arrangements
XXIV.	Federal Regulatory Rebellion
XXV.	International Trade
XXVI.	To the President of the United States (on federal speakers at Western Conference meetings)
XXVII.	Sunset Provision on Western Conference Resolutions

Copies of any or all of the Resolutions may be obtained from the Western Office, The Council of State Governments.

REORGANIZATION OF THE WESTERN CONFERENCE

At the 1979 Annual Meeting, the delegates recognized a need to enhance the effectiveness of the Western Conference by assuring that the various segments of our annual work program complement each other, have clear objectives and specific plans for their achievement, and concentrate on issues of special concern to the West.

Reorganization of the Western Conference was endorsed so that an organization with a more focused direction and with greater program coherence could emerge.

The most significant change requires that the Executive Committee take responsibility for the direction of the Western Conference, setting priorities among proposed projects, evaluating them for merit and feasibility, and assigning them to committees and/or task forces for action. This task appropriately belongs to the Executive Committee because its membership includes the chairs of the committees thereby permitting it an overview of all ongoing projects as well as the ability to weigh their relative merit and potential pay-off for the West.

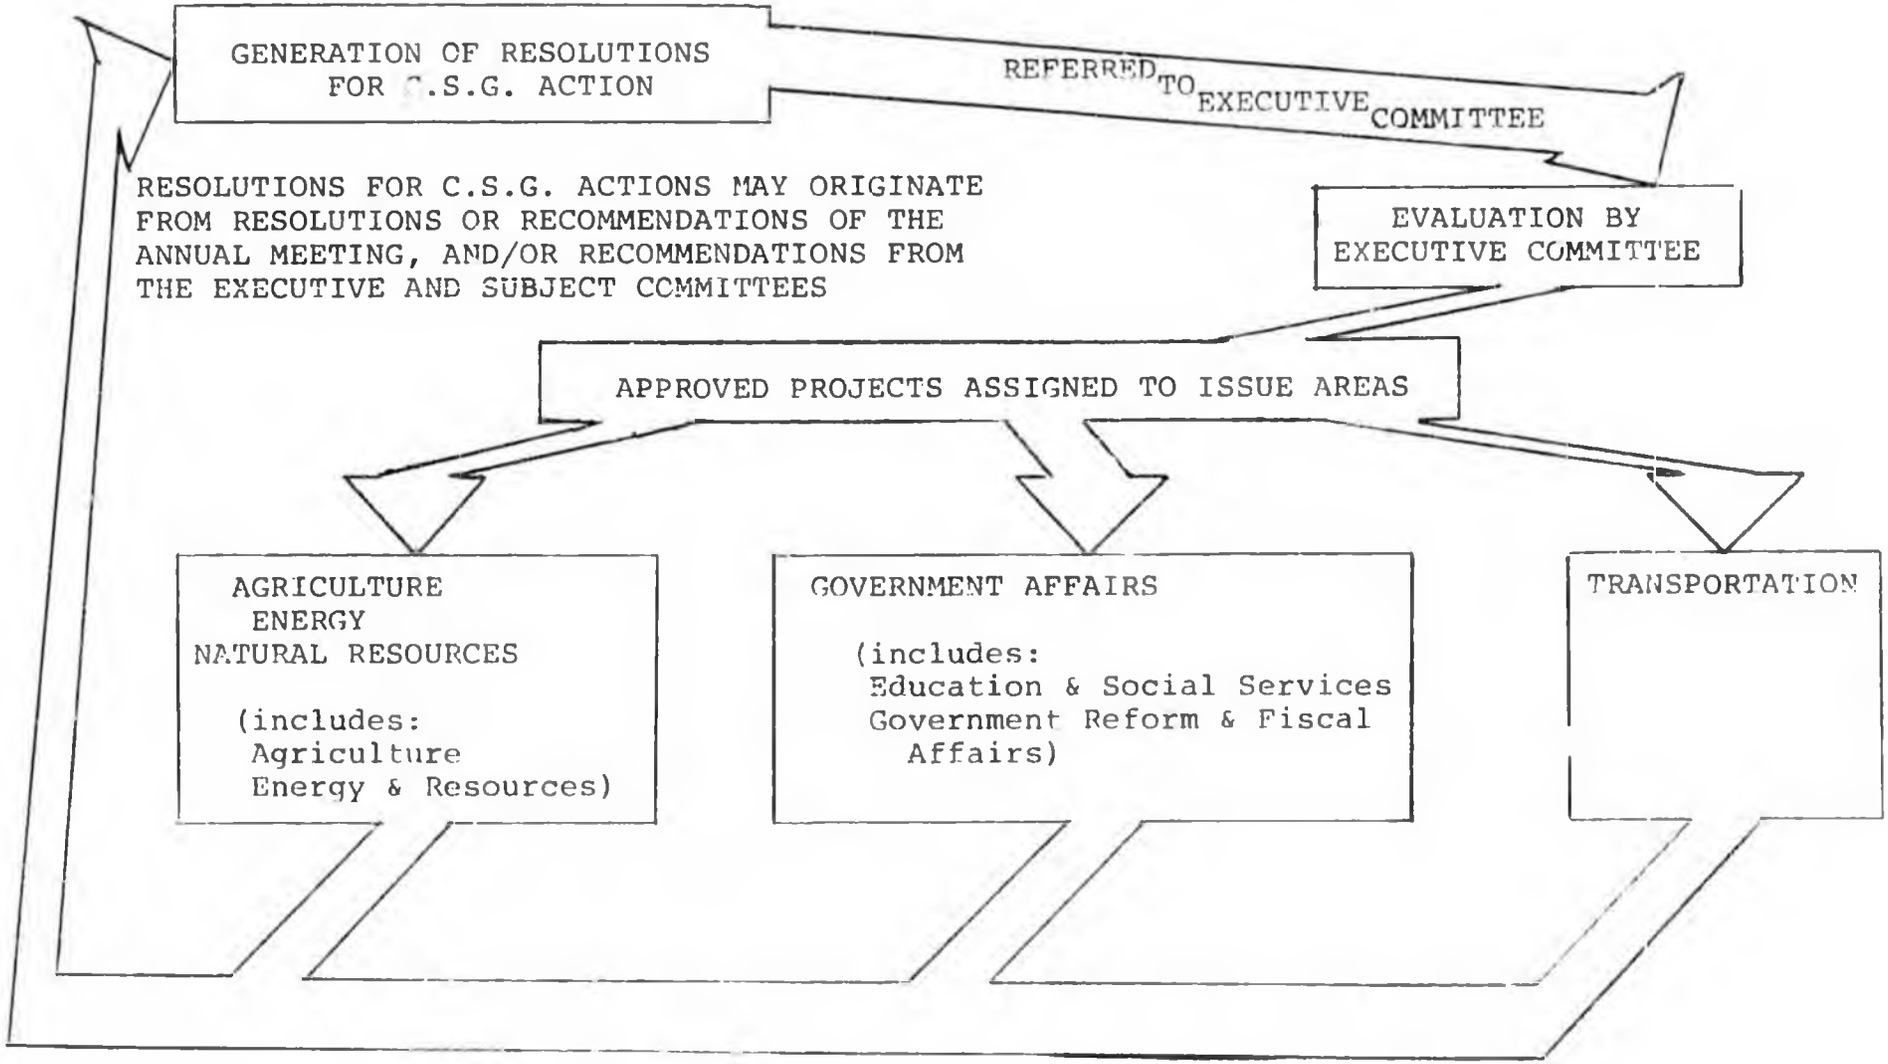
In addition, in an effort to lessen fragmentation, three issue areas were established with the six current committees falling under the three umbrellas:

Agriculture/Energy/Natural Resources
Government Affairs
Transportation

The Executive Committee, taking into consideration any proposals coming from the six subgroups, will assign tasks to them, receive reports on their activities, and make a report on our collective work at the 1980 Annual Meeting. If additional organizational changes appear useful at that time, the Executive Committee will forward recommendations to the delegates prior to the Annual Meeting so that there is time to consider any further proposals likely to strengthen the Western Conference.

Following this page is a chart reflecting the organizational changes and outlining the process by which Western Conference programs will be developed and put into action.

COUNCIL OF STATE GOVERNMENTS ISSUE FLOW CHART



EVALUATION

Your reaction to and comments on the questions below will be very helpful to those responsible for planning next year's Annual Meeting. Please take the few minutes necessary to respond--and leave the form on the table or with the staff person in your work group before you leave.... Thanks very much for your help.

(Ratings: 1 is high; 5 is low. Please use back of page if necessary.)

..A single focus conference (rather than multi-topic as in previous conferences) is a

GOOD IDEA — BAD IDEA

1 2 3 4 5

Next year, I would prefer:

single focus_____
multi-cocus _____
OR (suggest your idea of a useful format)_____

_____

..Listening to the panel speakers and discussion I

LEARNED MANY THINGS I DID NOT KNOW — I'D HEARD IT ALL BEFORE

1 2 3 4 5

Panel Discussions in full plenary sessions are

WORTHWHILE — WORTHLESS

1 2 3 4 5

Briefly, what ideas/facts/issues discussed (in plenary/panel discussions) were of particular significance to you?

_____

_____

_____

_____

..The Conference presented approaches/ideas about energy issues and possible solutions to problems that can influence your future activity and/or study.

WILL GREATLY INFLUENCE — WILL NOT INFLUENCE

1 2 3 4 5

If possible, be specific about which ideas and/or your anticipated response.

_____

_____

_____

..Work groups intended to plan ongoing activity around specific issues or projects is

AN EXCELLENT IDEA FOR AN ANNUAL MEETING — BAD OR INAPPROPRIATE FOR ANNUAL MEETING

1 2 3 4 5

My particular Work Group achieved

A PLAN(S) WELL OUTLINED — NOTHING CONCRETE

1 2 3 4 5

How might the Work Group have been more effective?

ALLOW MORE TIME _____

_____

..Any other comments?? (e.g., content/format/site/registration procedure/social events/ transportation/etc.) Please use back of page.

Respondent: LEGISLATOR____ STATE STAFF____ GUEST____

Name (only if you wish)_____

THANKS AGAIN.

EVALUATION RESULTS

(For the first time, the 1979 Annual Meeting of the Western Conference asked participants to give their reactions to the Conference. On Tuesday afternoon, at the end of the Work Groups, sixty (60) participants filled in and returned the questionnaire on page Respondents were: Legislators - 41; State Staff - 11; Guests - 8. The results follow).

..A single focus conference (rather than multi-topic as in previous conferences) is a

GOOD IDEA				BAD IDEA
1	2	3	4	5
(36)	(12)	(7)	(3)	(1)

..Next year, I would prefer:

SINGLE FOCUS 40
MULTI-FOCUS 8
OR ...

- Energy again (2)
- Water Resources
- one or possibly two topics (5)
- let issues define format. Single focus has real advantages as to depth, but may restrict participation -- important second issues may be overlooked (4)
- Combating Federal regulations in lands, resources, and all other areas possible
- Energy is long-time problem; might be well to design a continuing mechanism which would not require a fullscale, one-issue conference
- Single, but limit to 3 days

.. Listening to the panel speakers and discussion I

LEARNED MANY THINGS I DID NOT KNOW				I'D HEARD IT ALL BEFORE
1	2	3	4	5
(12)	(20)	(19)	(5)	(3)

.. Panel discussions in full plenary sessions are

WORTHWHILE				WORTHLESS
1	2	3	4	5
(18)	(26)	(9)	(4)	(1)

(one comment: need more input from audience)

..Briefly, what ideas/facts/issues discussed (in plenary/panel discussions) were of particular significance to you?

- significance of soft energy and conservation (10)
- conservation technology/incentives/barriers
- federal regulatory problems (2)
- federal government pre-emption of states' rights (8)
- federal red tape and ignorance of federal bureaucrats about what other departments are doing
- need for developing a viable energy policy
- utility regulations (2)
- need for Western Coalition concept across the spectrum (2)
- broad range of alternatives and the attempts to facilitate them
- transportation of coal
- solar and renewables
- nuclear safety
- nuclear transport and waste (3)
- PP&L program and other energy enhancement programs (3)
- energy needs projections
- ideas on energy especially in areas of electricity, coal, oil
- presentations of Amory Lovins ... Cahill ... Conley Ward
- coal freight rates
- Recitation of track record on energy projects (Council on Environmental Quality)
- programs in other states
- problems associated with use and production of energy alternatives
- perspective of end use analysis being primary consideration for looking at future needs, new construction
- relationships in data sources -- comparison tables by cost, barrels of oil, etc. -- as common language for discussions
- update on where Congress may be heading (2)
- economic benefits of conservation vs new thermal plants
- energy simulator (exhibit)
- synfuels information
- need for inter-state cooperation
- Administration position on the Energy Mobilization Board proposal
- Arguments for nuclear power (2)

..The Conference presented approaches/ideas about energy issues and possible solutions to problems that can influence your future activity and/or study.

WILL GREATLY INFLUENCE				WILL NOT INFLUENCE
1	2	3	4	5
(11)	(17)	(23)	(5)	(2)

..If possible, be specific about which ideas and/or your anticipated response.

- ideas re solar (2)
- ideas re coal, nuclear transportation, van pooling, and federal lands/water
- S 1403 active support -- continue work on 95-87
- federal/state impact review
- I will strive to incorporate ideas presented for greater conservation effort and more reliance on private effort into my future legislative and personal action.
- plant siting preplanning
- I'll stress conservation options (4)
- energy alternatives
- a unity of western states can be cemented and carry greater influence in D.C.
- the discussion of the West as the "national powerhouse" concerns me
- the Energy Mobilization Board is a poor idea (except for federal regulations) and should be opposed
- the States should demand the needed independent authority when given the responsibility for federal energy programs
- need to emphasize that both conservation and energy development are required -- prove conservation alone is not enough
- need for and potential impact of common action regarding federal roadblocks relating to energy/land use issues
- efforts to eliminate overlapping permits and impact statements and consolidate them with planning the development in question
- carry the message of conservation as the cheapest source of "new" energy
- single permit programs in other states
- synfuel work session was productive and problem-oriented in very practical way
- legislative and regulatory reforms that may be needed/possible -- what others have done in these areas
- nuclear materials management
- interest in life-line rates and conservation awards
- workshop suggestions on last day
- recommendation on one-stop permit for states - pipeline, etc.
- carpool legislation should be done

..Work groups intended to plan ongoing activity around specific issues or projects is an

EXCELLENT IDEA FOR AN ANNUAL MEETING				BAD OR INAPPROPRIATE FOR ANNUAL MTG
1	2	3	4	5
(26)	(21)	(9)	(1)	(2)

..My particular Work Group achieved

A PLAN(S) WELL OUTLINED				NOTHING CONCRETE
1	2	3	4	5
(19)	(26)	(7)	(2)	(2)

..How might the Work Groups have been more effective?

ALLOW MORE TIME	6
MORE BACKGROUND INFORMATION PROVIDED	22
MORE CLEAR-CUT GOALS	13

OTHER ...

- would have come prepared with more specifics if I'd known we would review appropriate legislation from other states
- should be earlier in program -- too tired when set-up
- should meet 2 or 3 times rather than one long session
- alert everyone earlier that will have this important function
- alert each state to have well-informed person on state programs
- poor attendance -- perhaps assign legislators?
- schedule people into group -- particularly resource people
- more information and longer advance time for facilitators and staff
- group leader more knowledgeable and more focused on specific goals and alternatives
- mix group better -- representatives from different states
- more knowledgeable resource people

.. Overall, was this Conference

VERY GOOD (of worth to you)				NOT WORTHWHILE
1	2	3	4	5
(24)	(29)	(5)	(0)	(2)

.. Factors you feel contributed to what was good about the Conference

- high quality speakers/panelists (14)
- location conducive to work (4)
- Montana a very fine host (4)
- topic of great interest and timely (8)
- format good (2)
- staff and guests did outstanding job
- panel discussion on facets of single issue (3)
- input from other than federal bureaucrats
- work sessions (6)
- very high caliber of participants
- individual participation encouraged
- openness to both sides of issues (5)
- opportunity for questions
- good panels
- good to meet other people and exchange ideas and viewpoints (3)
- very well planned, organized and busy schedule (9)
- social activities -- broaden acquaintances (2)
- additional time for the conference
- broad representation
- a digestable program
- information presented helped expand knowledge and gave potential new sources of information
- Mission Mountain Wood Band

..Good Factors (continued)

- interaction with legislators of many views
- ran close to schedule (2)
- informed me of causes of energy problems
- goal orientation of working sessions
- commitment of delegates to achieve a direction (2)
- broad cross-section of resources on panels (2)
- work ethic of conference
- came up with specific ideas and recommendations
- sharing views on problems that affect various states
- positive attitude of delegates
- issues identified and addressed
- support of S 1403
- support of maintaining state supremacy with Energy Mobilization Board
- panels rather than traditional speakers
- opportunity for audience participation reacting to a broadly based panel
- appreciated eyeball opportunity with Metzger and Martin
- people I met to contact for information and assistance in future (2)
- social events were superb

..Factors you feel lessened Conference's value to participants

- nothing new presented
- lack of interest and cooperation of Administration/lack of attendance of real policymakers from D.C. (10)
- lack of printed take-home material on specific subjects
- working on Sunday - prefer time for church
- preoccupation with reorganization
- lack of explanation re resolution procedures
- bureaucratic "party line" presentations
- conference too long (4)
- too tight a schedule; no breaks (3)
- too many speeches
- Conference never answered "what now" and "so what" questions
- lack of interest by participants and/or competing/distracting activities held during conference
- not starting on time (2)
- not enough question time (2)
- some sessions not well attended
- work groups somewhat fragmented
- need more media coverage
- not enough time on resolutions
- local legislators not allowed to dictate some of the speakers
- not enough time for interchange among participants
- opposing opinions not presented together or at all
- some decisions cut-and-dried; little time for healthy cynicism or misgivings to be voiced
- need more active participation by industry (displays, etc.)
- smaller workshops probably better
- repetitive (3)
- conferees not keen on business part of conference

..Other Comments

- A very good meeting and I hope I'm back next year
- I have attended/planned/participated in a large number of conferences and this one ranks high on list of successes.

CONFERENCE SPEAKERS
(Resource List)

CAHILL, Ed
Economic Consultant, Standard Oil of California

REMARKS:

Of particular interest to you may be Section 6, pages 15-20, in the manual "How Ridesharing Can Help Your Company." It provides a concise overview of vanpools. I've also attached a brochure on the cost factors for ridesharing, and an article on the vanpool program in North Dakota. If I can be of any further assistance, let me know.

ANNUAL COSTS OF COMMUTING TO WORK BY DRIVING ALONE AND RIDESHARING

This publication has been developed by the Federal Highway Administration (FHWA) to advise commuters about the amount of money involved in traveling to work by driving alone, carpooling, or vanpooling. By making commuters aware of the costs of driving alone as compared to the costs of ridesharing, it is hoped that more commuters who presently drive alone will carpool or vanpool. Not only will the commuter save money, but the Nation will save fuel, air pollution will be reduced, and the highway system will serve more people in fewer vehicles.

The operating costs shown in the table include all mileage-related costs associated with the work trip for gas, oil, maintenance, tires, and repairs. The owning costs shown in the table include all other nonmileage-related costs associated with ownership of a vehicle, such as insurance, depreciation, finance charges, licensing fees, and taxes. The latter are assigned to the commuting costs based upon the proportion that the work trip mileage bears to the average automobile nonwork trip mileage.

The costs shown should be viewed as conservative. They do not assume that an additional vehicle is required by the household as a result of one car being used for commuting to work, nor do they include the costs of parking since this cost varies widely and can be easily determined by commuters based on their specific circumstances. The costs of using an automobile or van are based on preliminary cost data for the FHWA document entitled "Cost of Owning and Operating Automobiles and Vans 1979."

Two types of carpooling costs are shown since there is an appreciable difference, depending on whether the arrangement is one where each of the carpoolers takes turns at using his or her auto (shared driving carpool) or where one auto is used and all share the costs (shared riding carpool). Costs are shown for the two extremes of vehicle size, the American subcompact of the Chevette or Pinto type and the American standard of the Caprice or LTD type. In addition, costs are shown for a range of one-way commuting distances covering 10, 20, and 40 miles. The 40-mile commuting distance is particularly appropriate in vanpooling situations.

To illustrate the use of this table in determining the individual commuter's savings by ridesharing, consider the case of the "Lone Ranger" who uses a standard sized auto alone for a 20-mile trip (40-mile roundtrip) to work. The total costs amount to $1,857 per year, *not including* the costs of parking at work or any extra vehicle ownership costs if another vehicle is needed by the household since the commuting vehicle is not available. Our "Lone Ranger" could save $804 by alternating driving with only one other person in a shared driving carpool ($1,857 - $1,053) or save $1,392 by being one of four persons in a shared riding carpool ($1,857 - $465), or save $1,500 as a member of a 12-person vanpool ($1,857 - $357).

TECHNICAL ANALYSIS

Assumptions

Seven assumptions were made to develop a methodology for calculating costs for driving alone and for ridesharing.

1. There are two options for carpooling:

   a. Shared Driving: Each person shares using his or her car. All cars must carry insurance based on being driven to work but each car gets a 10 percent discount due to reduction in work mileage.

   b. Shared Riding*: One person's car is used. Costs for that car are shared equally among everyone in the carpool. Only that car must carry insurance based on being driven to work, but it does not get any discount due to reduction in work mileage.

2. The average person works 250 days per year.

3. The average nonwork trip mileage per year is constant at 6,667 miles** irrespective of the work trip mileage. The fixed costs (insurance, depreciation, taxes, finance charges) of owning a vehicle should be assigned to work trip commuting based on the ratio of work to total annual mileage.

4. All of the van ownership costs are attributed to the work trip.

5. The costs contained in the document "Cost of Owning and Operating Automobiles and Vans 1979," while based on costs in the Baltimore, Maryland/Washington, D.C., area, are considered to be representative of the average in the United States in 1979.

6. The average vanpooling commuting operation uses a van for only the initial 4 years of the useful life of the van, while the average drive-alone or carpool commuting operation uses an automobile that can be either new or up to 10 years old.

7. The costs of parking the commuting vehicle at work are not included as they vary widely and can be readily determined by commuters based on their own experience.

---

*The change in auto ownership costs of the riders who no longer need a car for commuting are not considered in this option. The rider can realize additional cost savings by selling a vehicle that was formerly needed to commute to work.

**The document "Cost of Owning and Operating Automobiles and Vans 1979" shows the average automobile operates 10,000 miles per year and the "National Personal Transportation Study Report: Volume 8" shows that nonwork purposes account for two-thirds of the total automobile miles.

Calculations

This section shows the methodology used to calculate the values in the table.

Operating costs for driving alone and carpooling — These costs include gasoline, oil, tires, repairs, and maintenance. Parking fees and tolls are not included in these calculations.

1. Annual work trip mileage is determined by multiplying the one-way commute miles by 2 (trips per day) and by 250 (work days per year).

2. The following unit costs *(in cents per mile)* are used:

Item	Subcompact	Standard
Gasoline @ $1/gal.*	4.00 cents	6.67 cents
Oil, tires, maint., repairs	4.23	5.73
TOTAL	8.23 cents	12.40 cents

*Subcompact gets 25 mpg and Standard gets 15 mpg.

3. Annual operating cost *for driving alone* is the product of the annual work trip mileage and the unit cost.

4. Annual operating cost *for shared driving and shared riding carpools* equals that for driving alone divided by the number of carpoolers.

Ownership costs for driving alone and carpooling — These are average annual costs for all fixed or nonmileage-related costs associated with owning an automobile.

5. The following costs (in dollars) are used:

Item	Subcompact	Standard
Insurance	$200	$ 223
Depreciation	425	646
Finance charges	45	70
Taxes, license fees	61	89
TOTAL	$731	$1,028

6. The "P" ratio is developed which is the ratio of the annual vehicle work trip to total mileage. The annual total mileage equals the annual work trip mileage plus 6,667 as per assumption number 3. The "P" ratio is used to assign the appropriate portion of the vehicle ownership costs to the work trip. "P" values for the range of work trip miles used to calculate the costs shown in the table are as follows:

Annual Vehicle Work Trip Miles	"P" Ratio
1,250	.16
2,500	.27
5,000	.43
10,000	.60
20,000	.75

7. Annual ownership cost *for driving alone* is the product of the total fixed costs in 5. and the "P" ratio for the annual vehicle work trip miles.

8. Annual ownership cost *for shared riding carpools* is that cost for driving alone divided by the number of carpoolers.

9. Annual ownership cost *for shared driving carpools* is the product of the total fixed costs in 5. and the "P" ratio for the annual vehicle work trip miles for one of the vehicles used in shared driving carpooling. In addition, a 10 percent discount in the annual cost of insurance for the vehicle is included as per assumption 1a.

Operating costs for vanpooling —

1. Annual work trip mileage is determined as in 1. for carpooling.

2. The following unit costs *(in cents per mile)* are used:

Item	
Gasoline @ $1/gal*	10.00 cents
Oil, tires, maint., repairs**	3.06 cents
TOTAL	13.06 cents

*Van gets 10 mpg

**This is 1¢ - 3¢/mile less than for automobiles in 2. for carpooling due to assumption 6 since maintenance and repair costs are less for a van with 4-year life compared to an auto with 10-year life.

3. Annual operating cost *for vanpools* is the product of the annual work trip mileage and the unit costs divided by the number of people in the vanpool.

Ownership costs for vanpooling —

4. The average annual cost (in dollars) for all fixed or nonmileage related costs associated with owning a van during the initial 4-year life is as follows:

Item	
Insurance*	$ 900
Depreciation	1,463
Financing	399
Taxes, license fees	213
TOTAL	$2,975

*Insurance costs can vary considerably due to vehicle ownership arrangements and insurance company policies.

5. Annual ownership cost *for vanpools* is the ownership costs in 4. divided by the number of people in the vanpool.

Cut and Save

WORKSHEET
FOR
YOUR COST OF COMMUTING TO WORK

This worksheet is designed to allow the reader an opportunity to calculate the commuting costs for his or her particular situation. First calculate the costs to drive alone, then calculate the costs under the ridesharing options. How does the cost of driving alone compare to the cost of ridesharing to work?

1. Annual depreciation costs of your vehicle* $ _____
2. Annual cost of insurance for your vehicle $ _____
3. Annual taxes (sales, personal property, etc) for your vehicle $ _____
4. Annual fees (State registration and licensing) for your vehicle $ _____
5. Annual finance charges on the loan for your vehicle $ _____
6. Price per gallon of gasoline (cents/gal) _____ cents/gal
7. Your number of working days per year _____ days
8. Daily one-way mileage that you travel to work _____ miles
9. Your annual mileage to work (2 x line 8 x line 7) _____ miles
10. Your annual nonwork related mileage (estimated) _____ miles
11. Miles per gal. (mpg) of your commuting vehicle _____ miles/gal
12. Number of people in the carpool/ vanpool _____
13. Annual parking cost/tolls (daily x line 7) $ _____

Your costs for driving alone to work:

14. Mileage-related operating costs for your vehicle
    - Gasoline (line 6 ÷ line 11) _____ cents/mi
    - Oil, tires, maintenance and repairs (use 4.23¢/mi for subcompact; 4.59¢/mi for compact; and 5.73¢/mi for standard)** _____ cents/mi

    Total for line 14 _____ cents/mi
15. Annual mileage-related operating costs (line 14 x line 9) ÷ 100 $ _____
16. Annual parking cost/tolls (line 13) $ _____
17. Your total annual operating costs (line 15 + line 16) $ _____

18. Your average annual ownership cost (for all travel purposes):
    - Insurance (line 2) $ _____
    - Depreciation (line 1) $ _____
    - Finance charge (line 5) $ _____
    - Taxes (line 3) $ _____
    - Fees (line 4) $ _____

    Total for line 18 $ _____

19. Proportion of your ownership costs allocated to the work trip [line 9 ÷ (line 9 + line 10)] 0. _____
20. Your annual ownership cost for work trip (line 18 x line 19) $ _____
21. Your total cost for driving to work alone (line 17 + line 20) $ _____

Now, calculate your commuting costs in a ridesharing situation.

For a shared driving carpool:

22. Your total annual operating cost for the work trip (line 17 + line 12) $ _____
23. Your average annual ownership cost (for all travel purposes)
    - Insurance (90% of line 2) $ _____
    - Depreciation (line 1) $ _____
    - Finance charge (line 5) $ _____
    - Taxes (line 3) $ _____
    - Fees (line 4) $ _____

    Total for line 23 $ _____

24. Annual work trip mileage for your vehicle in a shared driving carpool (line 9 + line 12) _____ miles
25. Proportion of your ownership costs allocated to the work trip for a shared driving carpool [line 24 ÷ (line 24 + line 10)] 0. _____
26. Your annual ownership cost allocated to the work trip for each person in a shared driving carpool (line 23 x line 25) $ _____
27. Your total cost for commuting to work in a shared driving carpool (line 22 + line 26) $ _____

For a shared riding carpool:

28. Your total annual operating costs for the work trip (line 17 + line 12) $ _____

29. Your annual ownership costs allocated to the work trip in a shared riding carpool (line 20 ÷ line 12) $ _____
30. Your total cost for driving to work in a shared riding carpool (line 28 + line 29) $ _____

For a vanpool:

31. Mileage-related operating costs for the van
    - Gasoline (line 6 ÷ 10 mpg, or actual if known) _____ cents/mi
    - Oil, tires, maintenance and repair (use 1.06¢/mi for estimate if actual costs are not known) _____ cents/mi

    Total for line 31 _____ cents/mi
32. Annual mileage-related operating costs for the van (line 9 x line 31) ÷ 100 $ _____
33. Annual parking cost/tolls (line 13) $ _____
34. Total annual operating costs for the van (line 32 + line 33) $ _____
35. Total ownership costs per year for the van
    - Insurance $ _____
    - Depreciation* $ _____
    - Financing charges $ _____
    - Taxes $ _____
    - Fees $ _____

    Total for line 35 $ _____
36. Your total cost for commuting to work in a van [(line 34 ÷ line 35) + line 12] $ _____

*Depreciation = (purchase price - estimated selling price) ÷ No. of years owned.

**Based upon preliminary cost data for the FHWA document "Cost of Owning and Operating Automobiles and Vans 1979." Substitute your specific costs if known.

☆U.S. GOVERNMENT PRINTING OFFICE: 1979-281-568/211

VANPOOLING

Vanpools and Shortcuts Through Red Tape

What do starting vanpools and cutting government red tape have in common? Fortunately, in North Dakota the two are very compatible, reports FHWA Division Administrator George H. Seaworth.

As part of an FHWA-funded program, the state is offering no-interest loans to individuals or businesses that would like to start vanpools. To encourage pooling, the requirements and paperwork to start a vanpool have been cut to a minimum. The state has an energetic public transit assistance office pushing the program.

One man decided to test the speed in cutting the red tape. Daniel Jenkowski, manager of the Underwood Hotel, had heard of the vanpool program and decided it could be a valuable asset for many of his customers who work at the Beulah power plant, a round trip distance of 140 miles. The story, related by State Highway Commissioner Walter Hjelle, gives an idea of what can be done to slice through red tape.

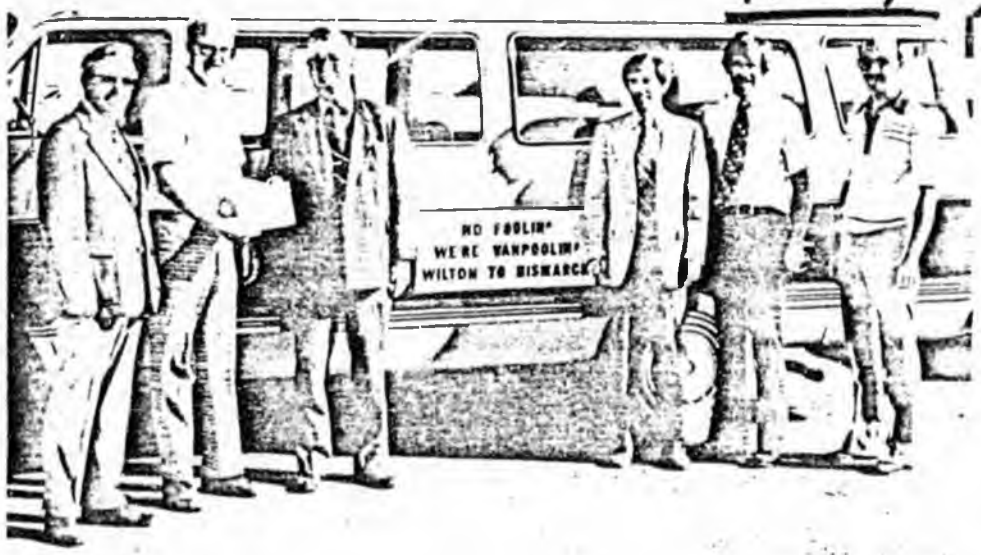
Jenkowski stopped by one recent Monday morning to inquire about funding of a van. He filed a request for assistance, and was informed of the four basic requirements for starting a vanpool:

1. Get a minimum of eight riders signed up.
2. Obtain two price quotes on vans.
3. Agree to operate the vanpool for at least four years.
4. Pay 10 percent of the van's total cost as a down payment.

On Friday, Jenkowski returned. He had found the riders, gotten the bids, and had the money in hand for a down payment. After reviewing the vehicle specifications, and signing the contract, Jenkowski was able to drive his new van home Friday evening.

Hjelle credited the Federal Highway Administration with simplifying its requirements for administering the federal funds. "The procedure is very basic and uncomplicated since the Department handles all the paperwork for the program," he said. "I must admit, however, that it's rare to have someone complete the arrangements as quickly as Jenkowski did."

One major drawback for many aspiring vanpools is the lack of vans in stock.



(Left to right) George Seaworth, FHWA; Bill Bitz, Owner; Walter Hjelle, NDSHD; Bill Weimer, NDSHD; Duane Beitz, NDSHD and John Milke, NDSHD.

"There has been a heavy demand for vans," Hjelle said, "and with the changeover to 1980 models, there is a shortage of available vans. Some pools have had to wait as long as three months before they could get their vans. Jenkowski got bids on vans that were in stock at the dealers."

For Jenkowski, the arrangements were handled in a week. Behind the scenes, however, it took a little longer as the state coordinated among several departments to get the contract approved and signed, obtain the title and mortgage lien and establish the project file.

One important area the state checks is vehicle specifications. In promoting vanpooling, it encourages the purchase of deluxe vans, since rider comfort helps to hold riders in the pools. Among the options the state allows are air conditioning, an auxiliary rear heater, additional insulation and cloth seats. Normally, a van costs $9,500—$10,000 but if the owner/driver wants to purchase additional options such as camping or stereo equipment, he may do so at his own expense.

"As of September 5, we have funded 27 vanpools," Division Administrator Seaworth reported, with total funding of $240,000 for the program. There are 13 owned by organizations or companies and 14 owned by individuals. The minimum round trip distance is 10 miles, the maximum, 180, with a total of 1,415 round trip miles and 336 persons involved.

Estimated gas savings on the vanpools already in existence total 220,000 gallons per year. Although the vans get only about eight miles per gallon in town and 12 miles per gallon on the road, the gas savings add up quickly when eight to 12 people share the ride. The record for commuting the greatest distance is presently held by the John Larson Company, whose vanpool travels 90 miles one way from Bismarck to north of Beulah where energy development is underway.

"In the North Dakota State Highway Department central office, they have three pools started," Seaworth said, "and several more people, statewide, are interested in pooling." The vanpools have the advantage of preferential parking. One problem is most people want to ride rather than be the sponsor/driver. The former 10 percent operator down payment was very attractive and the state has highly recommended changing back to this matching requirement. Since a 100 percent (less administrative costs) payback is expected, the cost to the government is not substantially increased.

"We're very pleased with the success to data," Seaworth said. "If more people would take advantage of the program, we'll be happy to eliminate the red tape. We just want to get the vanpools started." ■

How Ridesharing Can Help Your Company

A Manual for Employers

What Ridesharing Car Do For Your Company

Section
1

Ridesharing is not a new mode of transportation. But, it is a special mode which increases the productivity of existing transportation and worksite parking facilities to serve a growing population without extensive capital investment or business and residential relocations.

Over 15 million of the nation's commuters rideshare through carpools, vanpools, and buspools. Ridesharing benefits users by reducing the costs and daily hassle of driving to work. It benefits the public through reductions in energy use, traffic congestion and air pollution. It can benefit the employer by delivering employes refreshed and on time, by attracting employes from a broader labor market, and by helping to solve company problems such as overflow parking, retention of workers in relocations and long commutes to remote worksite locations.

Carpooling is the old faithful and most widely promoted form of ridesharing. Vanpooling is a relatively new and carfee commuting mode offering the door-to-door convenience of private autos plus the economy of a multi-passenger vehicle. Buspooling is a useful concept that has not been fully exploited. However, successful buspools operate in many suburban areas.

Many companies are realizing substantial benefits from their investment in ridesharing programs. These benefits include the following.

Reduced Need for Parking Space

Pooling programs can reduce parking requirements and open areas for more productive use at some worksites and/or reduce the cost of leased space. These reductions can result in substantial savings to employers and are of particular benefit to companies which are expanding and either need to use present parking space for new structures or need additional space to handle more employes.

For each vanpool that is formed, a company can remove six or more vehicles from its lots. For each carpool formed, about two vehicles can be removed. The 3-M Company in St. Paul, Minn., saved $2.5 million by eliminating the need for 1,500 additional parking spaces through vanpools. The Tennessee Valley Authority saved $10 million by reducing the need for construction and maintenance of parking and highway facilities.

Elimination of one surface parking space can save an estimated $135 a year. For a space in a parking garage, the saving would be $395 a year. These savings are even greater in areas of increased land values and construction costs. Some estimated costs for construction and land run as high as $1,000 per surface space and $6,000 for a multi-story parking lot stall. When operating and maintenance expenses and taxes are added to the cost of parking areas, the annual savings increase by $200 to $1,000 per space.

Relocation

When companies relocate, they often risk losing some of their labor force due to excessive travel distances to the new site. Erving Paper Mills in Brattleboro, Vt., initiated vanpooling to prevent the loss of highly skilled employes when it moved 25 miles from a previous worksite. Prudential Insurance in Newark and Nabisco in East Hanover, N.J., have also successfully used vanpools to retain employes after relocation.

More Convenient Commuting

Pooling provides the means to bring employes to sites where transit service is poor, where there is a high crime rate, or where locations are remote. Some companies that have found pooling a successful way to make commuting easier include Montgomery Ward in Chicago; Sperry Flight Systems, Phoenix; General Mills in Minneapolis; Hoffman-LaRoche, Nutley, N.J.; Chrysler Corp., Detroit; AT&T in Somerset, N.J.; and Winnebago in Forest City, Iowa.

Air Quality

Federal clean air requirements may cause state and local government officials to petition employers to reduce the number of vehicles bringing employes to and from work. Although Erving Paper Mills, Erving, Mass., instituted a pooling program due to plant relocation, it was most pleased to receive Industry Magazine's award for the most important contribution by a Massachusetts company to the improvement of the environment. Continental Oil Company in Houston and 3-M Company also received much favorable publicity as a result of their programs.

Reduced Congestion

Often state and local governments are unable to relieve auto congestion near worksites. In addition to reducing traffic, company ridesharing programs in urban areas reduce the number of vehicles parked on neighborhood side streets. The Geico Insurance company in Washington, D.C., instituted a ridesharing program after neighborhood residents complained that streets were clogged with employes' cars. Now the firm has better neighborhood relations and a better image as a result.

let's pool together, America!

All across the country, folks are finding that carpooling pays. By making driving more fun. And putting fewer cars on the road.

And whether you're going to work, play or school, a pool is better for all of us. It saves effort. It saves fuel. And it sure saves money, too.

So carpool America! Share a ride with a friend.

What Ridesharing Can Do For Your Employes

Section 2

Hundreds of companies have found that ridesharing is an inexpensive and direct means of providing lower cost, more efficient transportation for employes. Ridesharing is an opportunity offered by the company which is purely voluntary on the part of the employe, yet serves to bring the employe closer to the company.

Employe Benefits

The following are some of the specific benefits for your employes:

Lower Commuting Costs—The cost of ridesharing is usually substantially lower than that of driving to work alone. Out-of-pocket commuting costs for driving alone are estimated at 8.4 cents per vehicle mile. In a carpool, these costs are divided among the members. For vanpooling, the operating cost per mile averages 9.1 cents, but this is divided among the riders. Although automobile insurance rates vary with the type of coverage, size of car, residential location, age, and sex of driver, etc., reducing the user's share of driving time could result in classifying the car as more pleasure than business driving, with rates 10 to 20 percent lower depending on work distances. Driving less also means reduced wear and tear on the cars.

Personalized Service—While participating in pools may not be quite as convenient as solo driving, many people find it does have advantages and conveniences. Driving times are preset and reliable. Many pools operate door-to-door. If they do not, pick-up points can be selected to suit the convenience of carpool members and to avoid inclement weather. Often employers offer preferential parking spaces to pool vehicles which are much closer to the work place entrance.

Special Carpool Lanes—The growing number of bus/carpool lanes on freeways is speeding up commuting trips for many ridesharing workers. The city may have or plan to build special high occupancy vehicle lanes near your work location. Some 50 preferential lane projects have been established in 33 cities and more are planned. See Exhibit A for a list of selected cities with high occupancy lanes for carpools, buses, and vanpools.

The More Relaxed Mode—Sharing the driving enables carpoolers to avoid the tension and hassle that go with driving alone every day. The certainty of a carpool or vanpool, the assurance of having a seat—these things make ridesharing very attractive to many people. Some people who dislike driving long distances say they like the security, safety, and companionship of riding with a group.

Alternative Uses for Travel Time—An employe who doesn't have to drive is free to doze, socialize, read, or just daydream. This is more important for the long haul commutes of 10 or more miles.

Car Free for Family Use—When the car is no longer needed for the trip to work every day, it is available to other family members, thus reducing the need for a second car. The employe can save money by deferring the purchase of a second car; or, if he/she owns a second car, he/she may be able to sell it.

Leaving Work on Time—Ridesharing offers strong incentives to leave work at the normal close of business. Since many employes dislike after-hours meetings, they appreciate the regularity of a ridesharing pool that enables them to leave on time.

Barriers to Overcome

Appealing as the benefits may be, for many employes there are drawbacks. Every employer who is considering starting a ridesharing program should be aware of them. They are important in setting the goals for the program. Potential drawbacks can be minimized through good management. For some employes these barriers must be overcome before they are willing to pool:

Extra Pick-up and Drop-off Time—Depending upon how far apart the pooling employes live from each other, extra pick-up and drop-off time can become a disadvantage. If the travel times are too great, a pool may not be practical.

Interpersonal Relations—Some drivers treasure their time alone in the car each day as periods to listen to the radio or collect their thoughts. Further, some are reluctant to open the way for strangers to intrude on their personal lives, or discuss sensitive situations at the employment site. While congeniality and compatibility usually develop in successful pools, some people subconsciously fear the exposure to new interpersonal conflicts—from the simple issues of smokers vs. nonsmokers to more complex social or political differences.

Dependence on Others—Some people are unwilling to depend on others for a function where timeliness and reliability are of such paramount importance.

Loss of Flexibility—Many commuters hold in high regard the flexibility of having their own car at work. Many shop after work, or have other activities which prevent them from going straight home. Pools are unsuitable for those who choose to maintain irregular hours, for last minute meetings or for after-work activities.

Employes with Problems at Home or Small Children—For those who need to respond quickly to problems arising at home, such as with children or invalids, pooling may also prove difficult.

continued

Part-Time Employes—Part-time employes may have difficulty finding members with comparable hours. However, some workers pool one way and use public transit the other.

Solutions

For potential poolers some of these problems are real, some are imagined, some can be remedied, some cannot. Many of the potential problems inhibiting pool formations can be overcome if the company ridesharing coordinator establishes good lines of communication with all prospective poolers and takes a personal interest in the matching operation.

For those with special interests or preferences, one solution is to organize pools with rules: no-talk-in-the-morning pools, no-smoking pools, five-minute-maximum-wait pools, and so on. These rules would be established before the members join and be listed as preferred options on the application forms for ridesharers seeking to form pools.

Issues for Management Consideration

Section 3

Certain decisions must be made at the outset concerning your company's potential to support and operate a ridesharing program. The first decision is whether the firm will launch a self-generated pooling program or participate in an area-wide program. In some urban areas, area-wide pooling efforts are sponsored by local government agencies such as councils of governments or metropolitan planning organizations or even state departments of transportation.

Ridesharing programs can be mounted most successfully at worksites with large numbers of employes. Nationally there are some 12,000 establishments with 500 or more workers. However, the smaller firms which represent the majority of employers stand to benefit more from the broad coverage offered by an area-wide ridesharing program.

In the absence of an area-wide effort several small employers can form a joint venture to cooperate in a ridesharing program. This can be most effective where the employers are located in the same area. This was the case with Aerospace and the Air Force Space and Missile Systems Organization (SAMSO) in El Segundo, Calif., when they introduced a carpool matching service and bus operation in 1972. In 1975 they started a vanpool program which is currently carrying 130 employes in 13 vans.

Some local governments offer turnkey marketing as part of their ridesharing programs. City ridesharing coordinators approach companies and offer assistance in promoting, surveying, matching, and organizing employe pools, thus relieving employers of practically all responsibility of program start-up. They also supply information on van purchases, insurance and accounting schemes. After a program has been established, it is turned over to the company.

Some organizations utilize private third-party operators who own and operate vans. They provide an attractive option to employers wishing to limit the time and other resources invested in their vanpool programs. While third party arrangements involve fewer headaches, they are also more costly. The third-party owner can be an employe-owner-operator, who buys the van and provides the service, or a financial institution, such as an employe credit union, or a private company providing the service.

A company's decision on whether to participate in an available program or to start its own will depend on the size of the company, the kind of problems it faces, and the state of development of the area-wide program.

A second planning decision involves what kinds of ridesharing the firm will want to support. The firm may select among carpooling, vanpooling, and subscription bus service. While all have common features regarding promotion, matching and incentives, a van or buspooling program will probably involve buying or leasing vehicles, with additional employe staff responsibilities, although van ownership can be left to individual employes.

In coming to such decisions it is important to conduct a feasibility study to identify the potential market for the various forms of ridesharing and an investigation of legal and financial constraints. The study should detail how such activities as employe surveys, promotion, organization, matching, van acquisition, insurance, maintenance, fare structure, fare disbursements, administering of program incentives, program monitoring, driver selection, and training will be handled. The company should consider conducting a pilot program with a few vans or buspools and establishing matches for new carpools before acquiring additional vehicles.

If van or buspool service is being considered, potential legal problems should be investigated in advance regarding public regulation of such services, competition with conventional transit, driver and vehicle licensing, the liability of organizers and operators, driver compensation, and taxation. These concerns are addressed in Section Six.

Management Support

Top management support is essential for the success of a ridesharing program, both in the initial planning stage and in program development. Management must play a central role in determining the goals, objectives, and incentives of the program, enthusiastically encourage employe interest, maintain an open line of communication with the ridesharing coordinator, and exhibit continued support of program operations and expansion.

The development of a large vanpool program can involve substantial amounts of money and time. Administrative duties could require the services of one full or part-time position. Purchases of equipment or leasing costs are obvious items of direct control, but it should also be recognized that the cost of initial program development and of operation usually must be absorbed by employers. Employe interest can be developed by determining what transportation problems employes have and through a wide range of promotional and incentive strategies. These include special parking privileges for ridesharing participants, flexitime, and elimination of free or subsidized parking. Management must recognize that the publicity, employe surveys, and the process of matching employes into pools will result in some diversion of time and effort from the primary duties of the employe who serves as ridesharing coordinator. These can be minimized, however, with good planning. More information on management cost consideration is provided in Section Five.

Staff Support

In most successful programs, the program coordinator has access to top management, is highly interested in the establishment of a ridesharing operation and has a record of accomplish-

continued

ing assignments. A useful first step is for the coordinator to organize an advisory committee, including representatives from personnel, administration, legal, insurance, accounting, and public relations to investigate all aspects of program feasibility. These departments logically have an interest in the operation and success of the program. Further, their experience, support, and help will be needed in the promotion and implementation of the program. For example:

Personnel: Initial survey of employes for pooling information (residential location, route to work, work schedule, etc.) and coordination with labor union representatives.

Administration: In-house promotion, community relations, incentives, benefits, arranging for preferential parking for poolers.

Legal Office: Van acquisition, insurance, taxation, potential liability.

Accounting: Keeping track of cash flow from van riders to vendors (van dealer, service stations, etc.) and the driver.

Payroll: Collecting van or bus fares through payroll deduction if that option is chosen.

Identification of the Potential Market

Carpooling: Practically any size company can institute a carpooling program. As the number of employes increases, the average occupancy of vehicles used in the work trip tends to rise markedly. High density destinations, along with transportation and work conditions at the job site (e.g., lack of parking or public transit, job turnover, irregular hours) are more likely to influence pooling formations than the number of employes in a company. Three of the most commonly stated reasons for not carpooling are: (1) lack of a match, (2) need for transportation at lunch, and (3) incompatible hours. These can largely be resolved through good program management.

Vanpooling and Buspooling: Companies with 500 or more employes offer the best potential for successful vanpool and buspool programs because they are more likely to have enough employes living in close enough proximity to form a pool, and they are in a better position to absorb the administrative expenses involved. However, small companies can also form such pools. Erving Paper Mills, Erving, Mass., Zenith Corp. in Chicago, Aramco Services in Houston, and other firms with work sites of 100 to 500 employes have launched successful vanpool programs.

For the company that is large enough, the probability for a successful vanpool program is high if the firm has regular (non-shift) work hours, gives advance notice of overtime schedules or minimizes overtime requirements, offers use of vehicles during the day for errands, lunch, etc., and offers back-up transportation in personal emergencies or to employes required to work late.

No matter which variety of pooling is considered, the geographic location of your plant may offer better potential to some commuter neighborhoods than others. Commuter characteristics to look for in identifying potential markets include:

- Residential locations generally 10 miles or more away from the employment site. Trip distances in urban areas average slightly less than a 20-mile round trip for carpools and a 20 to 50-mile round trip for van or buspools. Longer routes produce the most successful van/buspools because the cost savings over other modes increase with trip length. The importance of time spent doing something else (reading, dozing) increases with travel time, and passenger collection and distribution times comprise a smaller fraction of total travel time.
- A sufficient concentration of employes residing in the same area or along a commuting route. For vanpools, at least 12 interested employes should be identified plus a reserve to help maintain high occupancy. For buspools, at least 50 employes with proximate origins and destinations and common work hours are needed, plus a reserve base.
- Employes in areas lacking public transit or served by inadequate transit are prime pooling candidates.
- Traffic congestion along major commuter routes to the plant influences pooling potential. Vanpools have been popular in the Palos Verdes area of Los Angeles, for example, where commuter routes are heavily congested.
- The availability of high occupancy vehicle lanes on nearby freeway and arterial streets or of special bypass lanes on access ramps to freeways.
- Finally, the desire of some employes to form a commuter group to sponsor a van or buspool. They may all be personally acquainted or share other common factors which influence the potential for pool success. Such a group may be an informal "booster" club or a more structured one that actually participates in the program through driver or rider recruitment.

A visual survey and sample counts in parking lots or garages may be a useful first step to determine how most employes arrive at work. An informal survey can then be conducted by the personnel department using employe records and zip codes or city maps to pinpoint areas with large residential populations. Similarity of work hours will also need checking if your company operates on shifts or staggered work hours. Once areas of residential concentration have been identified, trip distances to the work location must be estimated for van or buspool potential. It would also be a good idea to determine the availability of existing transit service using route maps and timetables.

Depending on company size, it may be more time and cost efficient to obtain this information as well as an indication of employe interest by conducting a simple survey. A sample survey is included in Exhibit L.

Program Promotion and Organization

Section 4

Soliciting Interest

There are many ways to publicize the benefits of ridesharing programs and the incentives offered by the employer. Area-wide programs with broad based advertising may have already created a climate of opinion which makes pooling "the way to go." In some companies ridesharing promotions have taken on the flavor of major campaigns. All the channels that your firm typically uses for employe communications, e.g., memos, fliers, newsletters, public address announcements, bulletin boards, or lunch gatherings, can be used to introduce and promote ridesharing. Employe booklets, posters, and ads can be obtained from the U.S. Department of Transportation.

The promotional materials should stress the personal convenience and savings from pooling and might list potential pilot areas for vanpool participation, estimated fares and the responsibilities and benefits for pool drivers. If possible, all promotional materials should lead the employe into taking the action which will get him or her involved. That action could be filling out response cards (conveniently placed near the ad), signing a register of interested parties, or calling the organization's pooling coordinator. Some programs have been started solely on the basis of such promotion, bypassing a formal survey.

Potential Rider Survey and Matching

There is a variety of ways of getting information on employes' interests, residential areas, and work schedules. The most prevalent way is a survey based on a form given each employe. Often, however, the completion of forms is left entirely voluntary. One possible remedy is to have forms turned in at the end of a special "coffee klatch" or lunchtime presentation on the company's ridesharing program. Another way is to have office supervisors or shop stewards distribute and collect the completed forms.

Matching programs may be run at the company level or local government level. Heavily traveled commuting routes, corridors leading to high employment concentrations and longer than average trips should be identified as indicators of high potential. This matching process identifies commuters with common home-to-work trip lengths and routes, residential locations and compatible work hours.

A locator board is another matching technique. This involves putting up a map with a rack of response cards and matching the respondents. Too often, however, they are placed in only one area and are self-servicing. One drawback of this system is that all persons must visit that one location, assuming they have been informed of its existence.

When there is a large number of responses, 300 or more, matching can be done by computers, which can handle large volumes of forms quickly, require little employe effort, minimize errors, and provide a low cost individual printout for each applicant of fellow employes with whom they might form a pool. Computer printouts should be prepared in the form of a personal letter to prospective poolers, providing the names and complete information about other employes near them who want to rideshare.

If a company feels that a major problem of matching is the development of its own soft-ware, there are many existing computer programs. A company can acquire matching assistance through regional government agencies or from the U.S. Department of Transportation. Several versions of computer soft-ware are available and a company can choose the one that can be most readily adapted to its situation and available equipment.

Pilot Pooling Program

A demonstration or pilot program, concentrating on carpooling and a few vans or buses limited to employe residental areas of greatest potential, is a good way to test the feasibility of such service and to identify any problem areas. It is also a good promotional technique since employes can see how it works and whether participating employes like it. Survey forms can be distributed to employes from areas targeted by the feasibility study for initial service, or they can be distributed to employes of all areas to which the program may be expanded. If all employes ares surveyed, it should be pointed out that the program will begin as a pilot and may not offer service in their area at the outset.

The vans or buses needed for the pilot stage should be ordered as early as possible. Delivery time on purchases may be six to eight weeks. Leased vehicles can generally be obtained in a shorter time. Potential riders may lose interest or make other travel arrangements if they have to wait too long before service starts.

Pooling Incentives

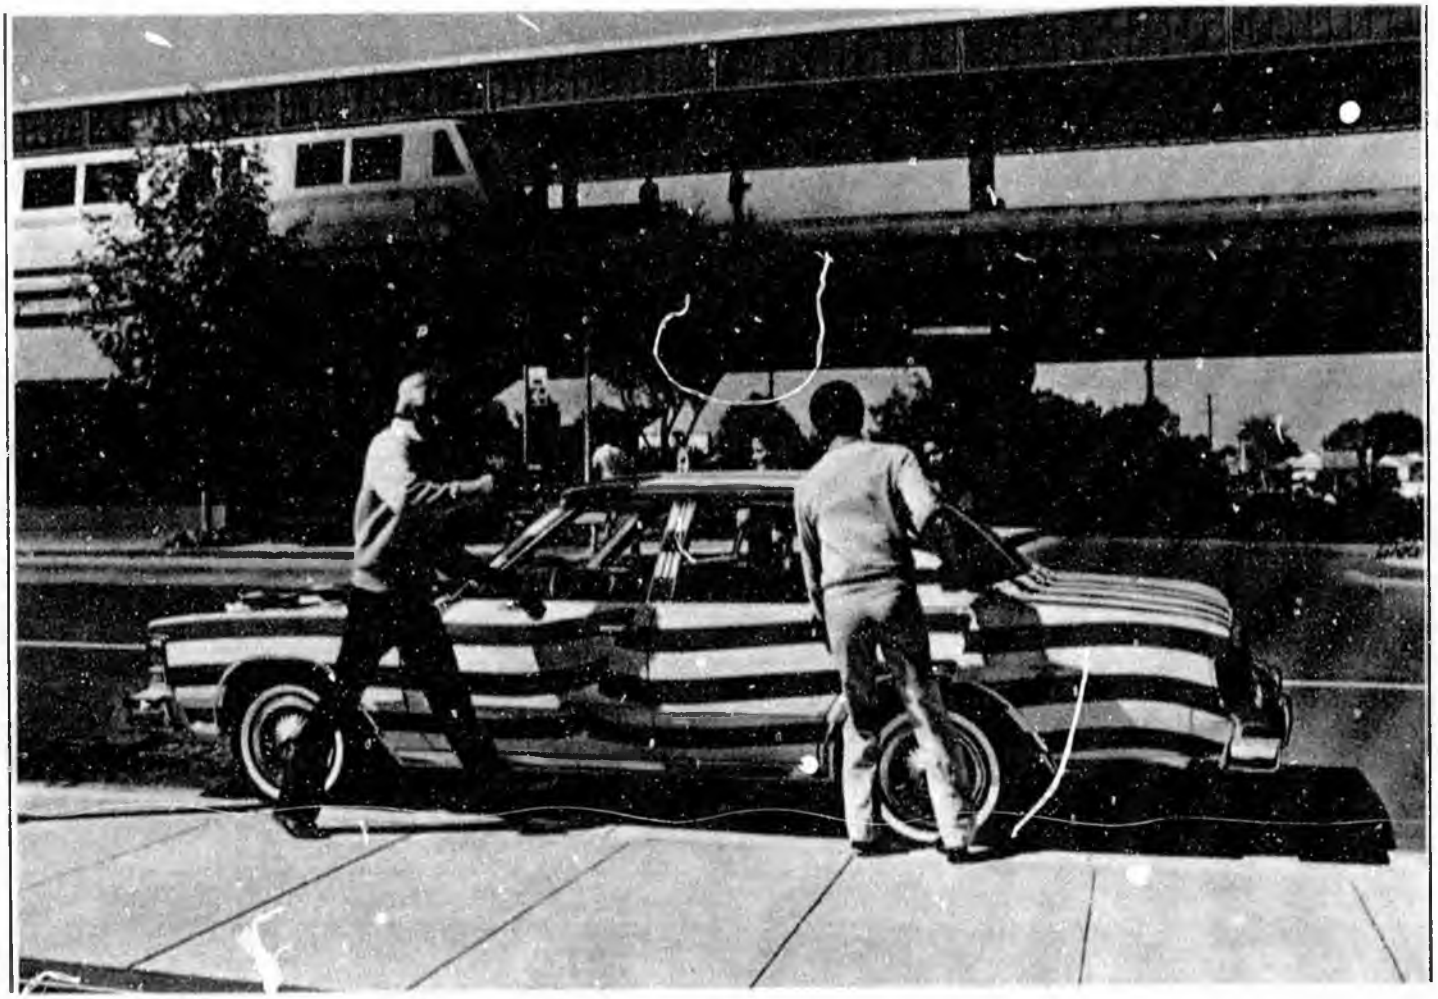
Most successful programs offer some or all of the following incentives to ridesharing employes:

- Preferential parking in the form of reserved spaces when lots are crowded, or assigned spaces closest to the building entrances when lots are large. Even if the entire parking lot is close to the plant entrance, an area set aside for the vans or carpools is a highly visible expression of management commitment and an effective promotional tool.
- Flexible hours.
- Quitting times five minutes before other employes.
- Advance overtime notice or relief from overtime demands.

continued

- Use of company vehicles during workday for errands, lunch, etc.
- Back-up vans or alternative travel arrangements for employes in personal emergencies or for those working late.

Generally, the larger the firm, the greater its capacity to provide incentives.



Costs of Start-Up and Administration

Section 5

In planning ridesharing programs, most employers will want to have an estimate of the costs involved. The company may conclude that it will receive benefits from the program which more than offset the costs; or it may choose to absorb certain program costs and recognize them as employe benefits or worthwhile community relations efforts. However, it is important to recognize all of the possible costs before starting a ridesharing program.

Administrative time and effort will usually be the major resource not recovered. The dollar value of administrative costs is difficult to determine in general because they vary with the size and stage of the program. Start-up costs will be greater than ongoing administrative costs since more staff time will be required. Generally, it requires only a fraction of a staff person's time to administer a small program once it is organized, especially if ridesharing workers take an active part in its operation.

What Do Carpooling Programs Cost?

Carpooling programs usually involve less direct support by the employer than vanpool programs. They require no capital investment, but do require administrative support. In assessing potential costs, most employers examine what it has cost other companies to initiate pools under similar circumstances. Recent comprehensive estimates of costs for company-sponsored carpooling indicate that both the initial organizing costs and the ongoing costs vary widely; not as much with company size as with the quality of the program and/or the kind of incentives used. Well planned and promoted programs often take a few months of top management preparation time and continue to require some part-time effort from the ridesharing coordinator and a full-time secretary.

The primary expenditure of staff time is not on carpool promotion directly, but rather on matching assistance and administering an incentive program such as preferential parking. Most costs are program expenses, i.e., they are associated with setting up and operating a carpool program, which do not vary greatly regardless of company size or number of poolers.

A moderately well-organized carpool promotion/matching program can be started for about $12,000 in staff time and materials. This estimate is probably most applicable to large firms (1,000 or more employes) where some carpooling incentives are offered.

Ongoing costs can range from nothing (if after the program is promoted there is no further corporate involvement) to the cost of one full-time staff member. Experience indicates the work can be handled by a quarter-time secretary with estimated annual maintenance cost (including overhead) of $4,000. The estimates for nine companies maintaining carpooling programs appear in Exhibit F of the Appendix.

What Do Vanpooling Programs Cost?

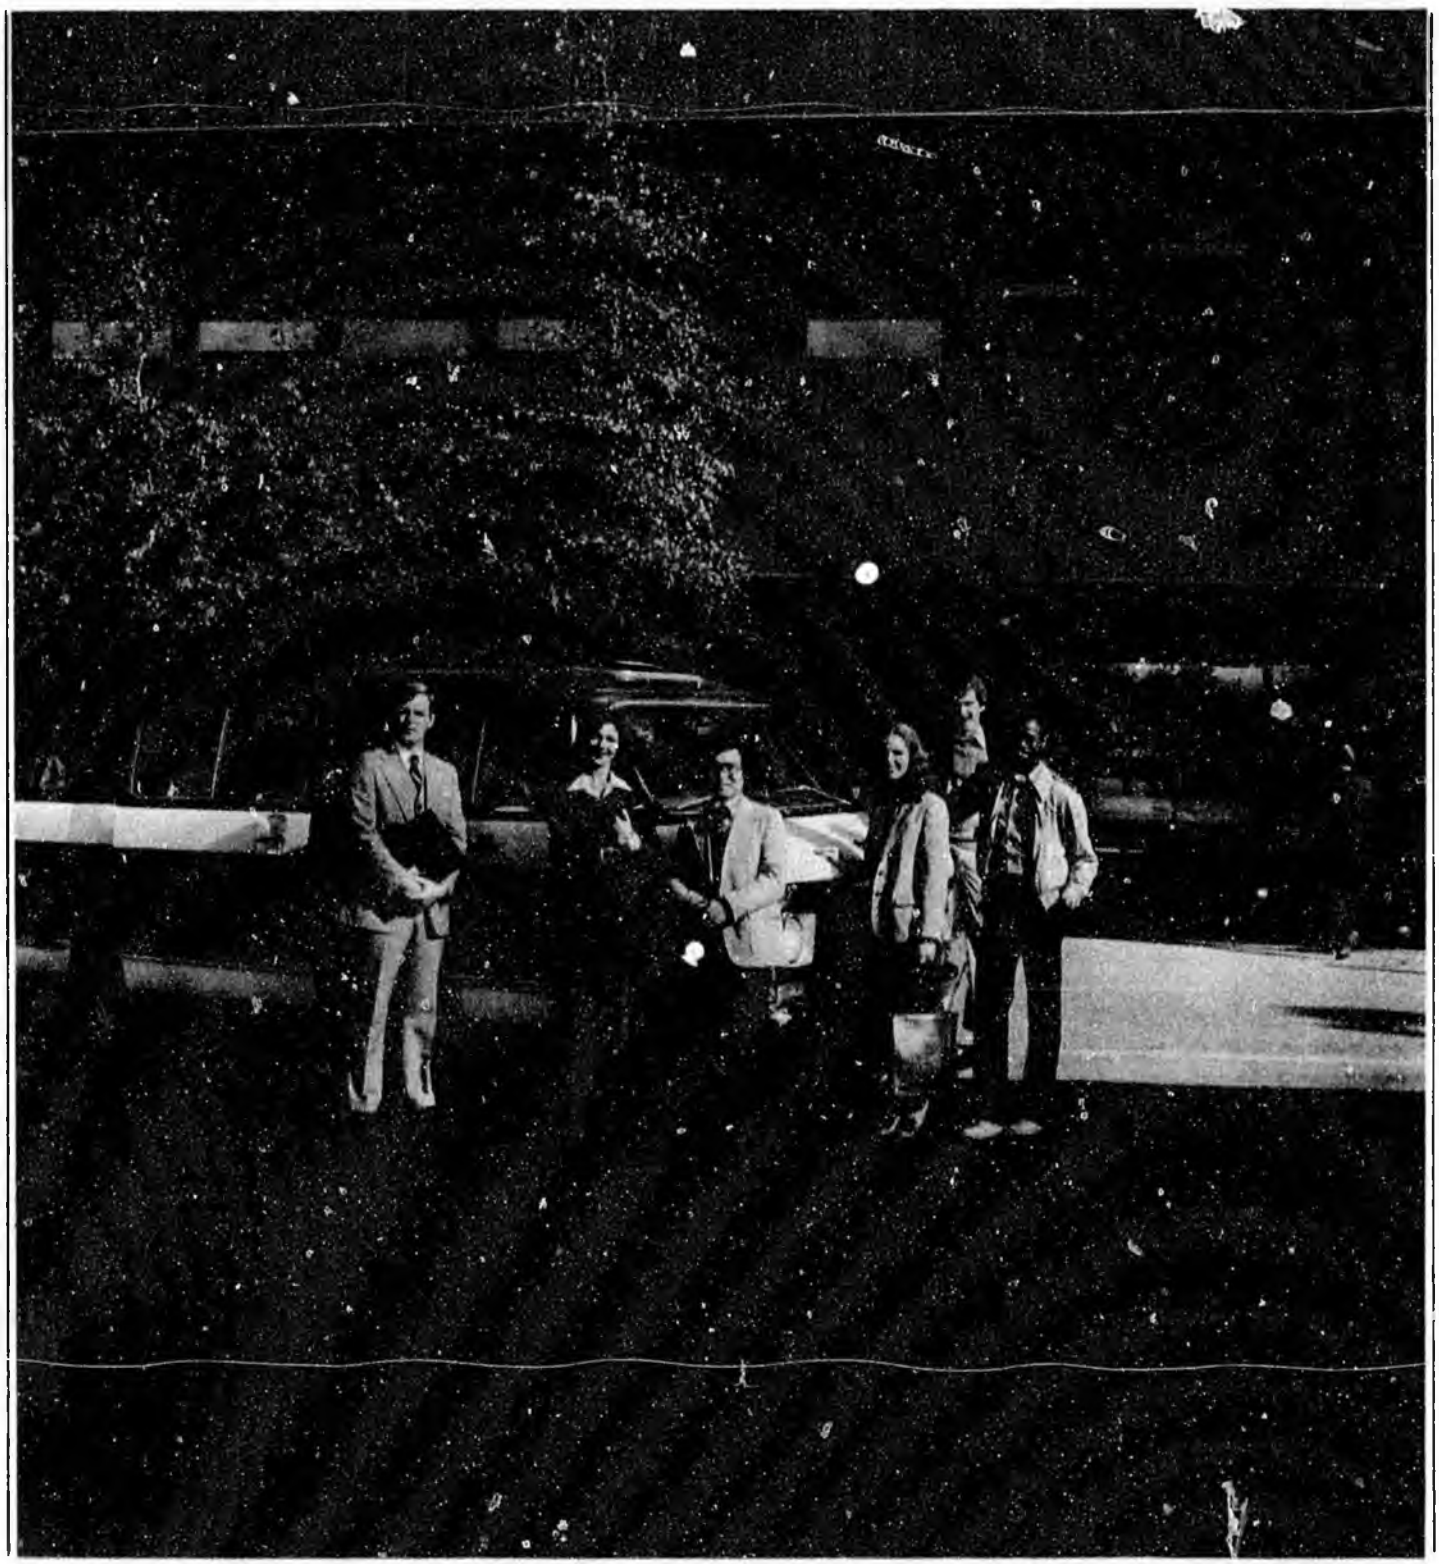
A company-sponsored vanpooling program requires all the start-up activities of a carpooling program plus certain additional costs; and, of course, there are economies of scale if both car and vanpooling are undertaken. These added costs may include van acquisition and insurance and setting up accounting and fleet management systems. A decision to purchase vans can involve substantial capital expenditure and expose the company to liability risk, so more planning and decision-making time should be allocated, generally three to six months, before launching a program.

Exhibit G presents several companies' estimates of the costs required to start up a vanpooling program, excluding van purchases. The estimates vary considerably due in part to differences in reporting and in the decisionmaking structures of the individual companies. The total start-up cost for 3-M company of $26,000 seems to be a reasonable mid-point.

In preparing these and other estimates, two facts emerged. First, some companies (i.e., Zenith and Conoco in Houston) spent a great deal of time researching the concept before implementation. As vanpooling is now more familiar, less initial research will be necessary and therefore planning costs may be lower. Second, if the vanpool idea germinated at the top management level, less time was spent in research than if the idea was presented to top management. Like the carpool programs, the time spent on establishing a vanpool program is primarily related to planning, decisionmaking, and system set-up activities which are not repeated regardless of vanpool turnover.

Estimates of the administrative costs involved in maintaining a vanpool program are provided in Exhibit H. Annual program maintenance appears to cost about $290 per van. For 1978, the purchase price of new vans ranged from $8,800 to 9,500 and vans cost about 7¢ to 10¢ per mile to operate. Specific details on the cost of acquisition of vans, insurance, etc., and how to set van fares will be found in the section "Considerations Unique to Vanpools."

In existing vanpool programs, certain costs are absorbed by companies and are not covered by revenues from fares. These usually include the cost of administrative staff time and the initial capital or interest cost of financing the purchase of vans. If companies are not willing to support programs in this manner, they can charge for capital expense, parking, vehicle registration, and even administrative costs. In Knoxville, Tenn., for example, the TVA Employes Credit Union, which performs many of the administrative functions for the TVA vanpool program, charges $15 per month per van for its service. The impact of these added costs on program participation must also be given consideration. Keep in mind that employe participation may be diminished if the resulting fares are so high that they are not competitive with the cost of their present means of transportation.



Considerations Unique to Vanpools

Section **6**

Vanpools have grown substantially in the last five years. Much has been learned about vanpool formation and operation. This section addresses the concerns most often expressed.

Driver Selection

The selection of good, responsible, and enthusiastic vanpool drivers is extremely important to the success of the program. The driver becomes the pivotal force in maintaining the enthusiasm of the van riders and the efficiency of the operation. In most cases drivers not only operate the vans, but provide most of the management of the service as well.

Duties—The driver's responsibilities include:

Organizing the vanpool from the list of prospective participants or from other employes the driver recruits.

Keeping the level of van occupancy at or above the breakeven load (9 or 10 riders).

Driving the van to and from the place of work, maintaining reliable, on-time service.

Arranging for proper maintenance and cleaning of the van.

Providing adequate overnight parking of the van to ensure its safety and reliability in the event of severe weather.

Collecting and dispensing fares to the appropriate department of the company (unless the riders pay their fares directly to the company, possibly through payroll deductions).

Keeping a record of the vanpool's operations, such as mileage for commuting, business and personal use, and number of passengers each week.

Helping select and train a back-up driver.

It is very important that these and any other responsibilities the company wants the driver to assume be clearly spelled out. Most firms have their driver sign an agreement that outlines both the duties of the driver and the commitments of the company. A sample agreement developed by the Masspool program is presented in Exhibit I. Masspool is a statewide project which implements carpool and vanpool programs in Massachusetts.

Driver Incentives—In return for the services performed, most programs provide some or all of the following benefits to the driver.

- A free ride to and from work.
- Monetary incentive of allowing the driver to keep the fares of the extra passengers (over the number needed to break even), which can potentially total about $100 per month if the van is running at full capacity.
- Personal use of the van after working hours, on a reasonable mileage basis.
- Option for buying the van, when it is retired from commuter passenger service.

Driver Selection Criteria—The potential drivers are generally asked to submit an application providing information on their driving record, attendance record and mechanical aptitude. Recommendations may be obtained from supervisors concerning the employe's dependability, ability to get along with others and assume responsibility.

Two or three qualities should be sought in selecting a driver. First, the person must be a safe driver (with a record to back it up); dependable (come to work on time and keep a schedule, etc.); and, very important, a "hustler" who is able to find and keep passengers. In assessing these qualities, especially the latter, it is important for the interviewer to understand personal motivations. As one writer put it, a person who wants to drive a van only for the personal use or extra income without showing a genuine interest in the success of the operation may not be the best choice for a driver.

Van Acquisition

Selecting the Vehicle—The major criterion in selecting the vehicle is seating capacity. It is important to select a large enough van to allow a feasible cost per passenger but not so large that the time needed to pick up riders becomes too great. The most popular size is a 12-seat van.

The following options (except for the last three which should be purchased for emergencies) are all available on the 12-seat vans made by the major auto manufacturers:

- V-8 engine
- automatic transmission
- power steering
- power front disc brakes
- heavy duty or radial tires
- shocks and suspension matched to load
- exterior rear view mirrors on both sides
- custom or deluxe interior with carpeting
- oversize fuel tank
- air conditioner and heater with front and rear outlets
- AM or AM/FM stereo radio with rear speaker
- push-out side windows for ventilation

continued

- fire extinguisher
- first aid kit
- flares

Standard vans are not built to consistently carry full passenger loads over long time periods. Therefore, safety and reliability should not be sacrificed by avoiding some extras to keep the costs down. All vans should be equipped with heavy duty suspension and other heavy duty options (radial tires).

Mini buses accommodating 16 to 19 passengers are also available, but additional costs and regulatory issues must be considered. If considering such a purchase, check with the manufacturer to see how they can be outfitted.

Financial Considerations

The purchase price of vans will range from $8,800 to $9,500 depending on how they are equipped, how many are bought, the buyer's bargaining relationship with the dealer, and the cost of financing. Many companies have purchased the vans and established fares that assure reasonable pay-back. Such purchases are eligible for tax benefits and investment credits, but should not be made without recognizing the inherent added costs described in Section Five.

The principal decision in vanpool program financing is whether to purchase or lease the vans. Vans can be purchased outright, on credit, or leased. Leasing is generally considered the costlier of these options because of finance charges and charges for the lessor's business expenses including overhead. Vehicles purchased outright involve some cost savings and tax benefits, but many companies cannot afford to tie up their capital in this way.

Company benefits gained from the program, (e.g., savings from reduced need for parking facilities), must be traded off against the vanpool investment. Most van purchases are financed over time, generally through lending institutions other than the company's prime lender. Some company credit unions provide the most attractive terms, offering 100 percent financing at lower than usual interest rates. Under the Federal-aid highway legislation, states can elect to use Federal-aid funds to make interest-free loans up to 75 percent of the value of the van, provided the loans are paid back.

If the number of vans is substantial or the company regularly purchases vehicles, fleet financing should be obtainable. Some companies report fleet price purchases ranging 10–15 percent below the van sticker price.

Companies already utilizing vans in their daily business operations should explore the possibility of using these vans to transport employes to and from work. State regulations governing vanpool operations should be examined since some states prohibit dual use. Impacts on insurance costs must also be assessed.

Leasing

The decision to lease vans will depend on (1) the availability of an interested lessor in your community, (2) your company's cash position, (3) tax options, (4) ability to dispose of the vans at the end of their useful lives, and (5) the level of commitment the employer initially wants to make in vanpool sponsorships.

Leasing enables your firm to sponsor a van for a fixed monthly charge that includes most of the costs of vehicle acquisition, financing, insurance, and maintenance, if desired. Some companies prefer the predictability of cost and convenience of leasing and the accurate budgeting which this arrangement allows. Companies that are uncertain about the feasibility of a van program may prefer to lease vans at the outset until it is determined that the program is successful. Alternatively, if a company program is extremely successful and there is demand for expansion, leased vehicles can be obtained on short notice to fill that demand.

Your accounting staff will have to determine the fiscal advantages of leasing versus buying. Leasing generally will add $4 to $5 to the fare charge, but leasing costs will vary depending on the services provided. For example, some leasing firms obtain insurance at 20–40 percent below the standard rate. Their volume of maintenance work may also result in low costs; alternatively, if your firm services its own fleet of vehicles, you may save money by servicing your vans.

In 1978, the typical cost for leasing a van driven 50 miles daily round trip was about $140 per month. This covers the cost of the van, freight, dealer preparation, excise tax, registration fees, sales tax, financing charges, and the lessor's overhead. The monthly cost may also include insurance costs of approximately $40 and maintenance costs of $35 for a total cost of $215 per van. You should also check for the availability of closed and open end leases and make the selection according to how they best fit your needs.

Maintenance

One of the benefits mentioned frequently by vanpool riders is the satisfaction in knowing their van will be at the door without fail every morning. Most of the credit for this goes to the careful attention that drivers pay towards maintaining their vans. Seeing that each van is maintained as scheduled by your program is the driver's responsibility.

If your firm has a large vehicle fleet with its own shop, why not use it for van service? At the garage of Texas Instruments, time

and parts used for vanpools are charged directly to the vanpool account. Most repairs are handled the same day. The Aerospace Corporation services its leased vans in-house.

Whether your vans are leased or purchased you may be able to arrange for maintenance on a contract basis from a dealer, auto service center, or a reliable, nearby service station. These contracts offer comprehensive service for a fixed price averaging $35 per month. In addition to regularly scheduled tune-ups and alignments, the contract may also include pick-up and delivery of the vans for your lot, replacement of specified, worn out or defective parts, tires for the life of the van, and use of a replacement van during longer repairs.

Estimated maintenance costs should be included in operating cost to determine the fare, so it is important to accurately assess these costs.

Fares for Vanpools

The setting and collection of fares should be clearly understood and not subject to controversy. In most vanpool programs, it is made clear to the riders that they are paying in advance for a reserved seat. A sample agreement appears in Exhibit K. Refunds usually are not made for occasional inability to ride the van because all of the riders are sharing a fixed cost. Van fares are usually low enough, however, that poolers can occasionally miss a ride and still save a considerable amount of money compared to driving alone.

Nevertheless, you may wish to adjust the rules for the particular conditions at your worksite. At the Aerospace Corporation those who frequently miss one or more days each week are accommodated by a system that charges one-third of the monthly fare by subscription and the remainder as a daily fare. Part-time or substitute riders are seated for the daily fare plus a small surcharge. Chrysler in Detroit offers to support its vanpools for a 60-day grace period if ridership drops below the breakeven level. This gives the driver a chance to recruit new riders without operating in the red.

A few firms lower fares by using vans for business purposes during the work day. In turn, the department using the van pays the van account 15 cents per mile. This more than offsets the van's operating costs of 7–10 cents per mile and helps defray fixed costs. In St. Paul, Minn., Cenex vans display the company logo and receive a fee from their advertising department. Find out whether business use is affected by state regulations and how it affects the insurance classification and rates of the vans, so that you don't wind up with an increase rather than a decrease in fares.

Some companies allow vanpool riders, if properly licensed, to sign up for the use of their van for lunchtime errands, at the discretion of the driver. Thus, poolers needn't feel stranded during the day. In this case, it may be necessary to charge a reasonable usage rate.

A form for calculating vanpool fares is included in this booklet as Exhibit J. After your vans have been running for six months or a year you will have a better basis for adjusting fares to more accurately reflect your costs.

In some cases, the driver is responsible for managing the financial affairs of the vanpool. In company sponsored programs, the firm must establish a system to see that each rider is billed for the upcoming month's fare and that the driver receives whatever incentive reward is due. This may be handled through either an invoice or payroll deduction. In the first case the driver issues each rider a monthly invoice. The rider either mails a check directly to the company cashier or pays the driver, who deposits the checks in the proper account.

Cenex and Erving Paper Mills use payroll deduction. Along with other deductions, each rider's monthly fare is taken out of the paycheck and placed in the vanpool's account. The driver can receive incentive payments through the same mechanism according to the amounts shown on the van's monthly expense record. To minimize month-to-month changes in the payroll deductions, have poolers work out payments for substitute riders and backup drivers among themselves.

Federal Aid for Vanpool Projects

Federal-aid Primary, Secondary, and Urban System highway funds can be used for vanpool projects. The funds can be used with a federal share of 75 percent and a local match of 25 percent which can be paid by the company. These highways funds can be used to:

- Establish vanpool projects, including personnel, public information, matching, and other project expenses.
- Acquire vehicles, through interest-free loans or leasing, as long as the loan is paid back and the users pay fees covering reasonable vehicle depreciation, operating and maintenance costs.
- Protect against financial loss if the vanpool must be terminated before the end of a previously agreed upon period of time, usually 12 months.

Under the Energy Tax Act of 1978, employers that provide a commuting vehicle which seats at least eight passengers to carry employes to and from work and which has a three-year useful life may be entitled to an investment credit. The value of this commuter transportation is not considered employe income so long as it meets the qualifications for the investment credit, is provided under a written plan assuring the transportation's value is in addition to (not in place of) the employe's compensation, and that the service does not discriminate in favor of officers,

continued

shareholders or highly-paid employes.

Regulatory Status of Ridesharing Operations

Vehicles engaged in pooling operations may be subject to regulation at the federal, state, and local levels.

Because vanpools are a comparatively new phenomenon, regulations are undergoing change constantly. The following summary is based on information obtained in early 1979. It is not to be construed as a strict interpretation of the law, but for guidance only. All employers are urged to get their own legal interpretations of the laws prevailing in their states and jurisdictions. Other companies sponsoring ridesharing programs in your state can be very helpful.

Federal—Federal law now exempts from regulation by the ICC vehicles seating up to 15 passengers that are used for a single daily commuting round trip. This eliminates a problem previously faced by ridesharing pools that cross state lines.

State—In some states, regulation can be a major problem. Motor carrier statutes applicable to pooling operations vary from state to state and are generally administered by public utility commissions.

Carpools have generally been exempt from regulations based on seating capacities of seven or less riders, or have been ignored or overlooked by regulatory bodies because there were too many to regulate.

Common carrier status is inapplicable to vanpooling since the service is not available to the public-at-large. Nor does the general public have a right to demand service by the vanpool. If vanpools are regulated as contract carriers which contract only with persons they choose to deal with, they will be free of motor carrier regulation (although they do remain subject to vehicle and driver licensing registration, insurance, and safety requirements).

State motor carrier regulations are especially important for van or buspool operations because they influence such factors as route planning, driver requirements and licensing, registration, inspection, safety requirements, insurance requirements, and ultimately, the fare structure.

In recent years, many states have totally or partially exempted vanpools from regulation. The most prevalent exemption has been for employer-sponsored and other non-profit vanpool operations. Some states, however, still consider vanpools subject to substantial regulation and do not exempt them.

The states use various definitions and limitations in exempting vanpools from regulation. These limitations focus on such things as seating capacity of vans, the purpose of the travel, requiring that fares be limited to covering certain expenses, and the ownership of the vans.

New Hampshire, for example, exempts vanpools with 8 to 15 passengers while Illinois sets the level at 12 to 15 passengers, and Tennessee and California at 15 passengers or less.

Illinois permits arrangements where operating, administrative, maintenance and reasonable depreciation costs are paid principally by the persons using the vans. Pennsylvania provides that vanpool riders may contribute such amounts so as not to exceed the cost of operation to the employer.

Buspools are regulated in most states because they are generally for-profit operations contracted out to third parties by employers or city governments.

Insurance

In the case of vanpools, liability is assumed by the owner or driver of the vehicles. While vanpools have not been involved in any serious accidents, a company contemplating vanpool sponsorship should be concerned about protecting its liability while assuring that employes would be adequately compensated in the event of an accident. As in the discussion on regulation, the following information is offered for general guidance only. Your insurance underwriter and your state insurance commissioner can advise you on how regulations affect your situation.

Statistics on vanpool accidents to date indicate vans are an above average safety risk. However, since no serious vanpool accident has yet occurred, there is no firm basis for predicting the degree of liability which would rest on the employer or driver, or whether workers' compensation would be judged the primary source of compensation.

The insurance industry's Insurance Services Office (ISO), a statistical and actuarial body, has established classifications for vanpools which have been adopted by most states that require approval of such classifications.

For employer sponsored pools, ratings applicable to vanpools of 9–20 persons are set at 1.05 times the lowest commercial rate and 1.25 for all other pools. The latter rating covers third party operations, multiple employment site pools, and employer pools where workmen's compensation probably will not apply.

The relatively low classification assigned to employer van insurance is based on the assumption that workers' compensation would apply to most vanpool accidents. ISO based its decision on a state analysis of workers' compensation laws. ISO says the applicability of workers' compensation to van accidents will be decided on a case-by-case basis.

Adoption of the ISO ratings by the states should help to reduce the wide variation in vanpool premium rates although independent underwriters in each state are free to use or reject the classifications, and coverage may not be available everywhere at the lower rates.

Options for Employer Coverage—As an employer contemplating vanpool sponsorship, you will want to consult insurance and legal staffs to determine the most comprehensive type of insurance and the best source and rates. No specific amount of insurance coverage or rate recommendations can be made for all programs but your staff may be able to reduce its research time by obtaining recommendations from other companies. Alternatively, your local planning organization, if engaged in a ridesharing program, may be able to advise or assist in obtaining coverage.

Existing Company Coverage—Many large companies have experienced little difficulty in obtaining insurance for their vans. They simply extend their existing fleet insurance or umbrella policy to cover vanpools. Increases in premium rates should be minimal, but will vary depending on the amount of coverage desired, the number of passengers to be insured, etc. The savings from fleet insurance can be substantial—over $250 per van per year compared to special policy coverage. Insurance costs are generally completely recouped from van fares.

Self-Insured—Some companies elect to insure for all or a portion of the vanpool risk. Comprehensive and collision insurance can be added to existing fleet or umbrella coverage through a self insurance fund. Aerospace Corporation, for example, set up such a fund by initially assessing each van $20 per month to build a reserve and then lowered the monthly charge to $10. Montgomery Ward in Chicago, Winnebago in Forest City, Iowa, Texas Instruments in Dallas, and AT&T Long Lines in Somerset, N.J., also self insure for part or all of their vanpool risks.

Special Policies—It is important to have an insurance program to limit liability so that the total assets of your company are not at risk. If you have no other option but to purchase a special vanpool policy, two important criteria that insurance underwriters will use for rate classification are (1) the financial capability of your company and the degree of control you have over the program and (2) the requirements you have established for driver training. Special policy rates range from $400 to $750 for extensive coverage of $1 million or more. You should contact other company vanpool coordinators to identify their best sources of coverage and rates. (See Exhibit B for the list of vanpool programs.)

Companies which lease vans may find it advantageous to insure through the lessor, many of whom have a good insurance rating due to their large volume and good safety records. Some leasing company insurance rates are 20 to 40 percent below the standard rates. But check closely on the amount of coverage provided.

Driver Liability—Some companies are now required to purchase a special rider covering the liability of vanpool drivers. Interpretations on the need for such coverage vary among insurance underwriters from state to state, as there is no precedent for judging the degree of liability which would rest on the employer or the driver if judged at fault in a major vanpool accident.

There is no reliable method of limiting driver liability contractually. Such limits may be spelled out in ridership contracts, but courts have generally not accepted such agreements purporting to relieve a party from liability.

Some cases imply the courts might support such a liability limitation in rider contracts if passengers have been given a clear option of paying higher fares for increased protection or lower fares with a reduction in liability.

Workers' Compensation—Generally, state workers' compensation statutes make employers strictly liable for employe injuries that occur within the course of employment. The maximum amount of recovery for death or disability is limited, but the employer is usually required to pay for all medical bills incurred. The major issue in vanpool accidents would be whether the injured party was an employe acting within the scope of his/her job at the time the injury was sustained.

The Insurance Services Office, in adopting a specific classification for employer vanpools, assumed workers' compensation would cover the injuries of any employe rider. The decision was based on a state by state analysis of Workers' Compensation Acts.

The issue of Workers' Compensation is far from resolved and will ultimately hinge upon each state's interpretation of its act.

Your insurance broker or agent will make an assessment of coverage by Workers' Compensation and then set your van insurance premium accordingly. When the agent assumes coverage by Workers' Compensation, your van insurance premium will be lower.

Other Regulations

Safety—States may have vehicle safety regulations which your vans will have to meet. Generally, the agency responsible for motor vehicle licensing and registration or the public service/utilities commission can provide information on safety requirements. Your insurance agent should also be able to advise you in this regard.

You may also wish to require an express warranty in your van purchase agreement or leasing contract, which holds the seller/lessor responsible for providing a van in full compliance with the states' safety standards as they apply to a van to be used for commuter vanpooling.

continued

Vehicle Registration—You should contact the agency in your state responsible for motor vehicle licensing and registration to determine the classification most appropriate to vanpool vehicles. In some states you may have an option. If so, select the classification which costs the least, provided there are no special limitations which could prove to be a problem for your vanpool. For example, certain "truck" or "commercial vehicle" classifications may cost less than a "passenger vehicle" license. But such vehicles may be excluded from parkways or certain local streets, and may be required to pay higher bridge or turnpike tolls.

Finally, consult your insurance agent regarding the proposed classification to see if there are insurance implications.

Driver Licensing—As is the case with the vanpool vehicle, a state may have special licensing requirements for vanpool drivers, usually due to the carriage of passengers, even though the vans are physically no larger than full size cars. Check with the state's agency for motor vehicle operator licensing. All drivers, backup drivers and occasional drivers must secure the appropriate licenses.

Even where not mandatory, some companies have required van drivers to obtain a "chauffeur" or similar license, and to complete a "safe drivers" training course such as the "Defensive Drivers Course" offered by local offices of the National Safety Council. The course consists of eight hours of classroom work to teach driving skills to licensed drivers through lectures and visual aids. These added precautions will give the driver more confidence in his or her van driving ability and provide further assurance that the van will be operated safely at all times. Further information about defensive driving courses can be obtained from the National Safety Council, Ray Martinez, Director of Training, Driver Improvement Program, 444 Michigan Avenue, Chicago, Illinois 60611, telephone (312) 527-4800, ext. 328.In some states employers may be able to obtain copies of drivers' records of violations to insure the selection of safe drivers. In other states with applicable privacy statutes you may ask your employes to provide you with copies of their records.

Income Tax and Wages—The employer, as operator of the vanpool, should follow appropriate IRS regulations to properly account for operating expenses, van depreciation, and revenues.

If you choose a fare structure that provides a financial incentive to the driver to keep the van full, the driver is required to report this incidental income on his or her personal tax return.

Van riders may not itemize their fares or any other commuting costs as deductions.

The Wage and Hour Division of the U.S. Department of Labor has stated that there is no requirement that vanpool drivers be paid by their employers for their driving time, since participation in a vanpool program is entirely voluntary.

State Requirements—In the states where statutory exemptions for vanpools have recently been passed, the amendments were not controversial. Should you determine that the expense and inconvenience of meeting your state's current licensing and certification requirements renders vanpooling infeasible or less attractive for your company, and you may want to contact your legislative representatives and request an amendment to the law.

Where Can I Get Help?

Section 7

There is a wealth of printed material available containing more detailed information on how to organize carpools, vanpools, and buspools. In addition there are individuals who can provide technical assistance.

Many local governments have developed or are in the process of training specialists to provide technical assistance in starting up or running a ridesharing program. In many cities, area-wide programs are underway which the employer can join, thereby reducing some of the costs.

The Federal-aid highway legislation allows states to use Primary, Secondary, and Urban System funds for ridesharing activities at 75 percent federal share. Local officials are encouraged to exercise considerable initiative and creativity in developing projects with the funds which are tailored specifically to local needs. Activities eligible for funding include vehicle acquisition costs. Some local governments have purchased vehicles and leased them to private employers. Funds may also be used to protect vanpool sponsors from the risk of vanpool failures.

Help is available from local officials and state transportation and energy offices. Federal Highway Administration division offices are located in the state capital in most states and are listed in Exhibit C.

Printed material is also available directly from:

U.S. Department of Transportation
Office of Public and Consumer Affairs, I-38
400 7th Street, S.W.
Washington, D.C. 20590

You may wish to consult with other employers on current vanpooling practices. A listing of U.S. employers sponsoring vanpool programs appears in Exhibit B.

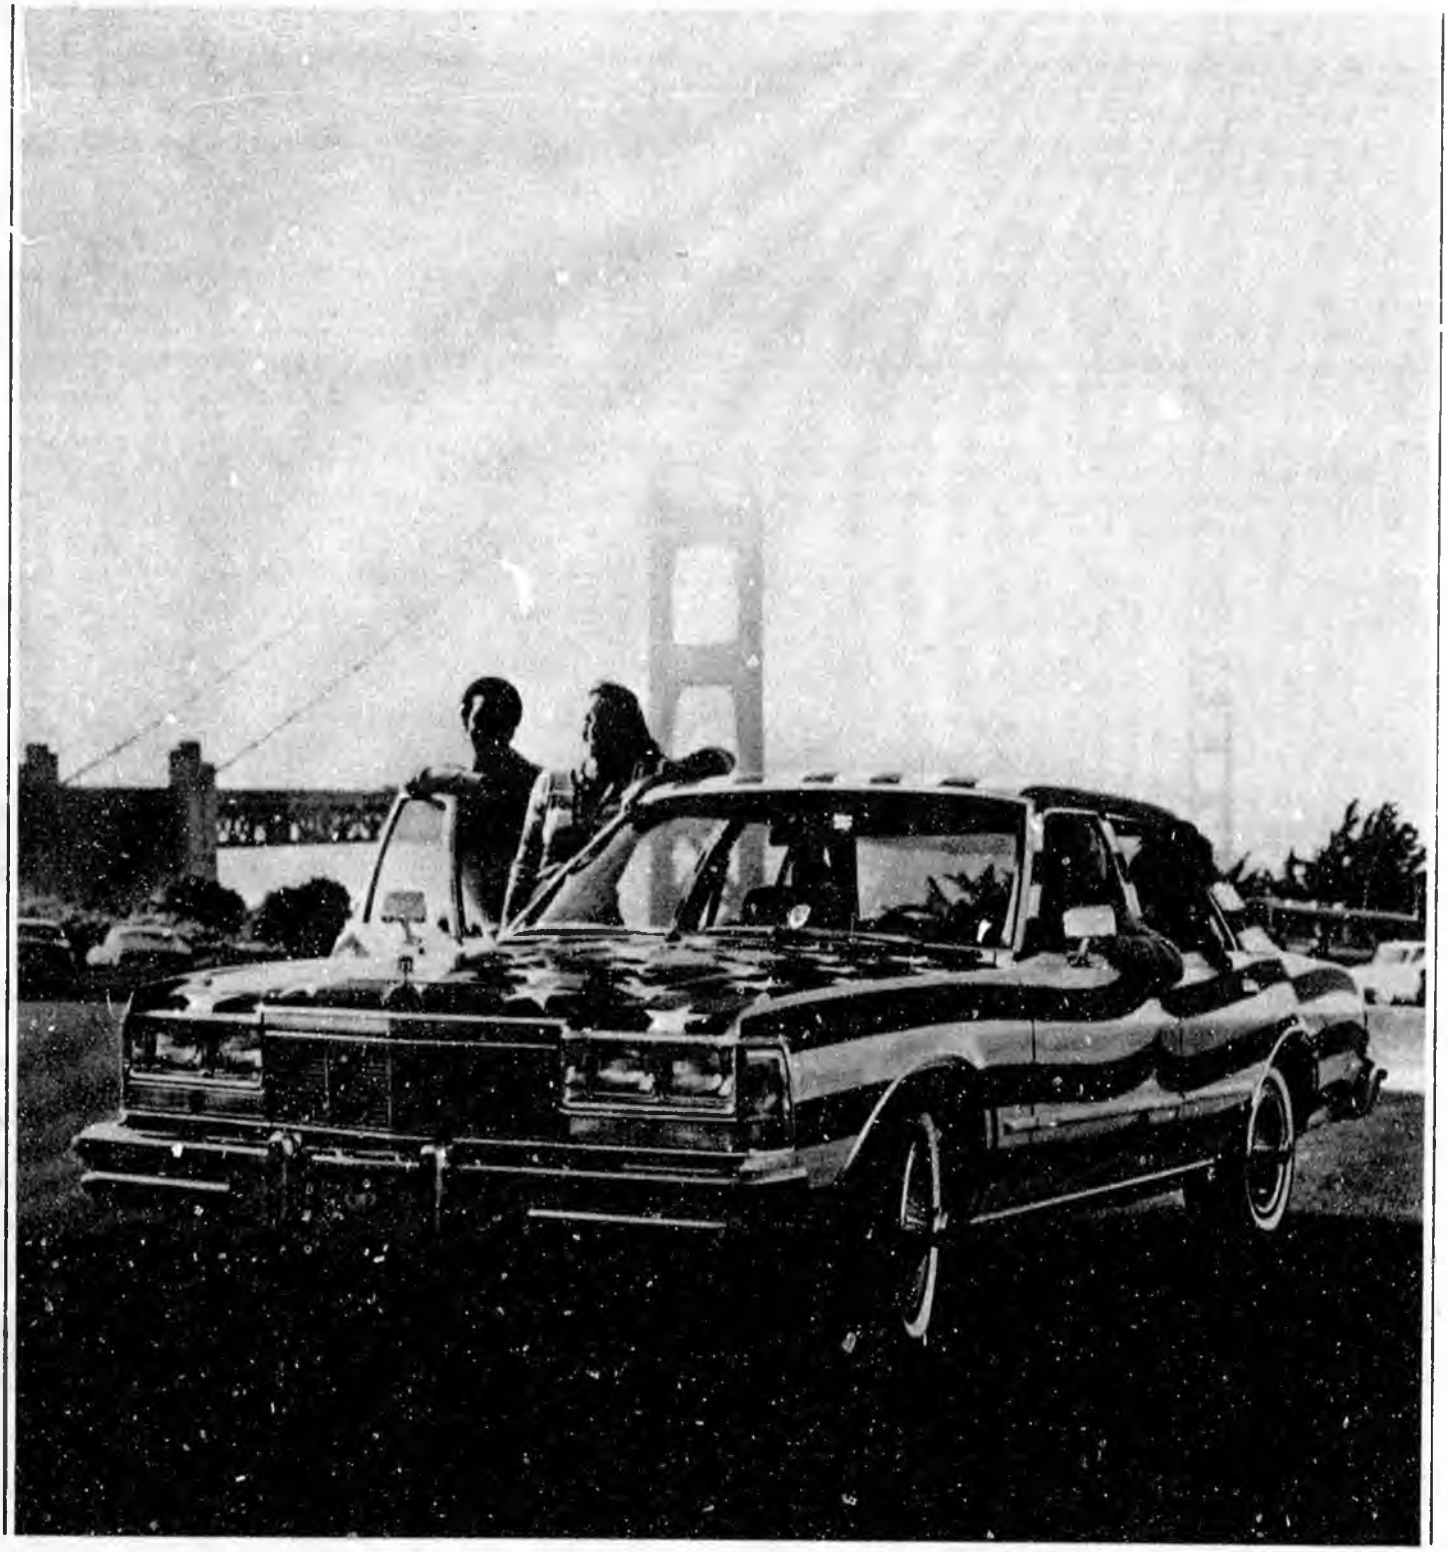
back cover pocket



Selected HOV Projects and Preferential Treatments for Ridesharing Pools

Exhibit

A

Los Angeles—El Monte Busway Express Lanes

Description:
The 11-mile express lane facility for buses and carpools is a two-lane exclusive roadway in the center and along the side of the San Bernardino Freeway (one lane in each direction) between El Monte and Los Angeles. The section from El Monte to the Long Beach Freeway is open to carpools with three or more persons.

Commuter Usage:
Buses carry 5,300 daily round trip passengers. Some 1,600 carpools use the lanes during peak periods.

Los Angeles—Freeway Ramp Bypasses

Description:
Buses and two-or-more-person carpools are given preferential bypass treatment at metered freeway entry ramps. Eligible vehicles may bypass single occupant vehicles at ramps. Some 24 such ramps are operating in either the a.m. or p.m. peak period, and there are plans to open more.

Commuter Usage:
In the initial stage, there was an average 50 percent increase in the number of carpools using the ramps. There were, on the average, 1,850 carpools and 105 buses using the bypasses in the a.m. peak period, carrying 4,270 and 4,200 persons respectively.

Marin County, Calif.— U.S. 101 Bus-carpool Lanes

Description:
Contra-flow bus lane in one direction, and with-flow bus and carpool lanes in both directions, in two separate segments on an eight-lane divided facility. The contra-flow bus lane operates during afternoon peak periods and use is limited to buses and three-or-more-person carpools southbound between 6 and 9 a.m., and northbound between 4 and 7 p.m.

Commuter Usage:
Some 1,500 to 1,800 three-or-more-person carpools and 120 transit buses use the facility during each peak period.

Location:
The four-mile contra-flow lane runs from just north of the Golden Gate Bridge to just south of the Richardson Bay Bridge. The with-flow lane continues from the Richardson Bay Bridge to Sir Francis Drake Boulevard, a distance of 3.8 miles.

Connecticut Turnpike— Reduced Tolls

Description:
Commutation tickets on the 129-mile Connecticut Turnpike were reduced from $3.50 to $1 for a book of 42 tickets for three person carpools. Use is limited to a series of three consecutive toll (barrier) stations during a 60-day period.

Commuter Usage:
Approximately 5,000 per day or 110,000 per month.

Honolulu—Kalanianaole Highway HOV Lane

Description:
The project operates as a reversible exclusive lane for buses and three-person carpools on a four-lane undivided street for 2.0 miles and on a six-lane divided arterial for an additional one-half mile. The facility operates only from 6 to 8 a.m. with two or three regular inbound lanes, the reversible inbound reserved lane, and one or two regular lanes outbound.

Commuter Usage:
1,200 autos and 16 buses carrying 3,600 and 660 passengers respectively during the morning peak period.

Location:
The highway serves the University of Hawaii and the Honolulu CBD.

Miami—I-95/7th Avenue HOV Lanes

Description:
The median shoulder of I-95 in the Miami area has been reserved and converted for the exclusive use of carpools of two or more persons and buses. The project operates from 7 to 9 a.m. southbound and 4 to 6 p.m. northbound on weekdays. Lanes are open to general use at other times.

Commuter Usage:
1,650 daily passengers on 52 buses, and approximately 2,600 persons in 1,250 carpools in the p.m. peak hour, including 22 percent violators. Prior to lowering the permissible carpool size to two persons, ridership peaked at approximately 1,700 persons in 700 automobiles. However, almost half of the automobiles were violators.

Location:
The 7.5-mile project runs on I-95 from the Golden Glades interchange south along N.W. 7th Avenue to downtown Miami, the Airport, and Civic Center.

Miami—South Dixie Highway HOV Lane

Description:
The project consists of a median with-flow bus and carpool lane, and traffic signal improvements in a 5.5-mile segment of South Dixie Highway, a six-lane arterial. Initially, buses were carried on a contra-flow lane, but this was dropped in favor of joint use of the median lane with carpools of two or more persons. The project operates from 7 to 9 a.m. and 4 to 6 p.m. on weekdays.

Commuter Usage:
Average daily bus ridership is about 2,100 on 61 buses, representing a 100 percent increase in ridership. The facility carries 1,200 carpools serving 2,600 passengers during peak hours. The bus/carpool lane carries about 40 percent of all riders on the highway during peak hours.

Location:
South Dixie Highway between S.W. 72nd Avenue in South Miami to the entrance to I-95 south of the Miami central business district.

Boston—I-93 HOV Lane

Description:
A preferential lane is located in the far left lane of a four-lane roadway. The lanes are reserved for buses and carpools of three or more persons. The intent of the preferential lane is to give head-of-the-line privileges to carpools for downtown Boston during the morning rush hours.

Commuter Usage:
An average of 32 buses and more than 500 carpools per day, carrying a total of 2,620 passengers.

Location:
A 3/4 mile section of I-93 southbound in Charlestown, Mass.

Minneapolis—Grant Street Carpool Ramp

Description:
The I-35 Urban Corridor Demonstration project established nine bypass ramps for buses. The Grant Street project permits carpools of three or more people to share the use of the bypass ramp in downtown Minneapolis. The Grant Street ramp is limited to vehicles outbound from the CBD in the evening peak period.

Commuter Usage:
Average occupancy of carpools is 3.6 persons. The project serves approximately 240 persons per peak period.

Washington, D.C./Northern Virginia—Shirley Highway (I-95)

Description:
Buses and four-or-more-person carpools are allowed the exclusive use of a physically separated two-lane reversible section in the median of I-95. The Shirley Highway is a major commuter route which links suburban Northern Virginia and Washington, D.C. The buses and carpools enter and exit on exclusive ramps.

Commuter Usage:
During the a.m. peak period (6 to 9:30 a.m.) 4,042 carpools and 540 buses carry 16,000 and 21,600 persons respectively. Approximately 56 percent of the use (or 21,000 persons) occurs in a single hour.

Location:
The 12-mile facility extends from Springfield, Va., to Washington, D.C. via the 14th Street Bridge. Vehicles can save 15 or 20 minutes by using the express lane. The highly successful project has attracted a substantial number of carpools.

Costs of Maintaining Company Sponsored Vanpool Programs

Vanpool
Driver / Coordinator
Cooperative Agreement

Exhibit

I

This Agreement between the Driver/Coordinator whose signature appears below and (*Company Name*), hereinafter called the "Company," shall become effective on the date it is accepted by the Company, as evidenced by the signature of its authorized representative in the space provided below for this purpose.

For the purpose of forming and operating a vanpool with a minimum of nine (9) passengers, the Company agrees to furnish the use of a 12-passenger van, to assist in forming and maintaining the vanpool and to render such other reasonable assistance as may be required for the functioning of the vanpool. The Driver/Coordinator will be the primary driver of the van during the term of this Agreement.

The Driver/Coordinator agrees to be responsible for the following in connection with the operation of the van assigned to him or her.

1 Obtain and maintain a valid State driver's or chauffeur's license as required for operating the van.

2 Drive the van to and from his/her Company location and pick up and deliver the other Company employees who pay to ride with him/her.

3 Keep the passenger pool for the van at or above the minimum of nine (9) paying passengers, but not to exceed a maximum of eleven such passengers.

4 Operate the van on a punctual schedule and according to a route approved by the Company.

5 Arrange for service and maintenance in accordance with the schedule prescribed in the vehicle's maintenance or instruction manual. Obtain fuel for the van and clean the vehicle inside and out as needed.

6 Train sufficient Backup drivers to insure daily operation of the van.

7 Supply a secure place for "at home" parking of the van, preferably in a locked garage.

8 Arrange alternative transportation for passengers to and from the Company in the event the van is not operable due to mechanical failures or other similar emergencies.

9 Keep a record, satisfactory to the Company, of the operation, expense and income of the van.

10 Maintain a list of all passengers and either bill and collect from passengers by the first day of each month the approved fares and deposit the monies as specified by the Company, or submit a signed list for monthly payroll deductions as specified by the Company.

The Company agrees to reimburse the Driver/Coordinator for his or her out-of-pocket expenses in the operation of the van to and from work along the prescribed route. The Company also agrees that the Driver/Coordinator may ride free to and from work daily and retain any funds received from passengers in excess of the required minimum of nine (9) passengers and that he or she may use the vehicle during off hours at a rental rate of cents per mile to be based on the actual costs incurred by the Company including, but not necessarily limited to gas, oil, and maintenance. The Company also agrees that the Driver/Coordinator may make the vehicle available for use by the Backup driver, as an incentive to the Backup driver, at the above rate and under the same terms as applicable to the Driver/Coordinator as set forth herein. The Backup driver must maintain required State driver's license for driving the van. The Company reserves the sole right to decide if the off-hour use of the vehicle is proper and does not become excessive as to mileage or type of use.

It is agreed that the following regulations apply to the operation of the van:

1 Operation of the unit is permitted only by the Driver/Coordinator and Backup drivers and by the spouse of either of them, if properly licensed. Only under emergency conditions will any other person be permitted to operate the vehicle. In this connection, in the absence of both the Driver/Coordinator and the Backup driver, any Company employee that is a member of the vanpool may operate the van for pickup and delivery of passenges to and from work if he or she is authorized to do so by the Driver/Coordinator and is properly licensed.

2 The vehicle is to carry no passengers to and from the Company facilities, other than Company employees.

3 In the case of personal use, the carrying of passengers other than Company employees and members of the immediate household of either the Driver/Coordinator or the Backup driver is not allowed without prior written permission of the Company.

4 The vehicle is not to be used for a trip beyond a one-hundred (100) mile radius of the Driver/Coordinator's home without specific advance written approval from the Company.

5 The vehicle is not to be used to carry passengers or freight for hire, for ride sharing or any other purpose involving pay for transportation, other than the specific purpose of the Company vanpool program.

6 Repair work will be done only by those persons approved by the Company. All repair work, except in emergency situations, must have prior approval of the Company.

7 Accessories, including appearance items, or additional equipment will not be added or removed without prior approval of the Company.

8 Use of the vehicle to pull trailers is not allowed. No trailer hitches, temporary or permanent, are to be attached to the unit.

9 The vehicle is not to be used for any purpose requiring the removal of any seats.

10 The vehicle is to be driven only on hard surfaced public streets and highways and other normal access roads and driveways, and is not to be driven off normal roads, on beaches or in fields, on frozen lakes and rivers, or in any other manner that would expose the vehicle to unsafe conditions.

11 The vehicle is not to be driven over bridges posted to allow vehicles weighing only 4 tons or less.

12 The Driver/Coordinator is responsible for promptly reporting any accident involving bodily injury or property damage. Such reporting is to be in accordance with the procedures specified by the Company.

a Such reporting is also to include injury to a passenger in the van even though no other party is involved. (This would include such cases as a person falling inside the vehicle or injuring himself or herself while entering or alighting from the vehicle.)

b The Driver/Coordinator will be responsible for completing and filing all appropriate motor vehicle accident reports as well as the Company automobile accident reports.

c In the case of any and each accident during personal use of the van in which damage to the van is sustained, the Driver/Coordinator or Backup driver must pay the Company up to a maximum of (*the Company collision deductible, if any*) for repairs to cover the deductible amount under the van insurance.

13 Safe courteous driving habits, consistent with complete observance of all traffic regulations are of the utmost importance. Any citation resulting from a moving traffic violation while driving the van is the responsibility of the Driver/Coordinator and/or Backup driver. The Driver/Coordinator and/or Backup driver agrees to report to the Company any citation resulting from a moving traffic violation, whether committed while driving the van or any other vehicle.

14 The Company, at its sole option, may dissolve any vanpool which is unable to maintain the minimum number of nine paying passengers and/or which is operating uneconomically.

15 The fares charged passengers will be periodically reviewed by the Company and increased or decreased consistent with the cost of operation.

16 The Driver/Coordinator is responsible for reporting the extra income received from any passengers over the minimum of nine on his or her State and Federal Income Tax returns.

This Agreement may be terminated by either party on thirty (30) days written notice delivered to the other party in person, by telegram or by mail. In addition, it will terminate automatically on (a) termination of the Driver/Coordinator's employment with the Company, (b) loss by the Driver/Coordinator of the required State driver's license or (c) breach by the Driver/Coordinator of the terms of this Agreement.

Vanpool Cost and Fare Calculation

Exhibit **J**

		Sample	Your Van
A	**Calculate the monthly fixed cost of a *purchased* vehicle**		
1	Determine the cost per month for depreciation purposes		
	Start with the cost of the vehicle	$7,400	
	Subtract immediate depreciation (tires)	− 200	
		$7,200	
	Less salvage value (after 4 years)	−2,800	
	Equals depreciable value	$4,400 or	$ 92/month
2	Add other annual expenses		
	License, registration, taxes	$ 120	
	Insurance	+ 460	
	Equals other fixed expenses	$ 580 or	+ $ 48/month
3	Monthly fixed cost (items 1 plus 2 above)		$140/month
4	Add optional maintenance contract		+$ 35/month
	Total monthly fixed cost		**$175/month**
B	**Or calculate the monthly fixed cost of a *leased* vehicle**		
1	Start with your monthly leasing cost		$140/month
2	Add maintenance contract (if not in lease)		35/month
3	Add insurance (if not in lease)		40/month
	Total monthly fixed costs		**$215/month**
C	**Calculate per mile operating costs for *purchased* and *leased* vehicles**		
1	Start with the cost of gasoline (60¢/gal ÷ 9 Mi/gal)	$0.067/mile	
	If you included a maintenance contract on A or B, gas is your only per mile cost. Otherwise:		
2	Add the cost of oil change, filter and lubrication	$0.005/mile	
3	Add other maintenance cost	$0.012/mile	
4	Tire costs over the life of the van	$0.006/mile	
	Total operating cost/mile	**$0.09 /mile**	
D	**Calculate passenger fares**		
1	Start with each van's daily round trip distance	50 miles	
2	Multiply this by your average number of workdays in a month	×20 = 1000 miles	
3	Multiply this by your per mile operating cost from C	×$0.09 = $ 90/month	
4	Add the van's monthly fixed cost from A or B	+$ 140 = $230/month	
5	Divide this cost by your breakeven number of passengers	÷ 9 = **$ 26/month**

Vanpool Subscription Agreement

Exhibit

K

(*Company Name*) is pleased to announce that it is organizing a van pool program, on a pilot basis, to enable you and your fellow employes to get to work and back in a way that will be more efficient and economical than driving your own cars. If you and a sufficient number of fellow employes living near enough to you to form a convenient and efficient vanpool elect to participate in this program, the Company will attempt to provide a commuter van which will:

1 Pick you up for transportation to work and deliver you to your home or other mutually agreeable location after work on a regular schedule to be determined by the Driver/Coordinator.

2 Continue to operate in the event the Driver/Coordinator is unable to drive; a Backup driver will be provided for this purpose.

3 Continue to operate during a 60-day grace period if and when the number of passengers has fallen below the minimum load; in this event it is expected that the Driver/Coordinator and the passengers will be able to recruit the additional passenger(s) necessary to meet minimum load before the 60 days has expired.

If you elect to participate you will be expected to:

1 Pay each month's commuter fare to the driver in advance or authorize payroll deduction where available; for this you receive a guaranteed reserved seat on the commuter van. (Note: Prior to the first payment you will receive an invoice showing the amount you are to pay each month; estimated fares are available from the Vanpool Administrator.)

2 Notify the Driver/Coordinator in advance whenever you cannot meet the van's scheduled pick-up time; it is your responsibility to be on time for pick-up.

3 Arrange other means to get to and from work if you cannot meet the van schedule on a particular day.

4 Understand that the van must maintain a schedule and that it cannot wait more than three (3) minutes for a passenger pick-up.

5 Notify the Driver/Coordinator in advance when you are on sick leave or vacation. (Note: You may arrange for a substitute passenger to take your reserved seat, if he or she lives near or can meet the regular van route.)

6 Notify the Company and the Driver/Coordinator at least 15 days in advance if you elect to withdraw from the commuter vanpool.

If you wish to subscribe to this program under the terms set forth above, please so indicate by signing and dating this agreement and returning it to the Vanpool Administrator. A minimum of nine (9) passengers plus a Driver/Coordinator must be subscribed to a specified route before a van can be ordered. Service would begin upon receipt of the vehicle, which is estimated to require approximately 60 days once the order is placed.

BILL NUMBER AND TITLE: SB334am Acquisition of Land by the United States

ORIGINAL SPONSOR: Ziegler
RECEIVED FROM: Senate C&RA

OTHER SPONSORS:
FURTHER REFERRALS: Resources

HEARING DATE: 5/7/80

MEMBERS PRESENT:			
Bill Parker	X	Pat Carney	X
Margaret Branson	X	Charlie Parr	X
Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	X

Guy VanDoren, A.A.,Sen. Ziegler

Bill is based on Oklahoma Land bill. Navada has passed similar legislation as has Utah. There is a possibility that a western regional lawsuit might evenually be developed related to land rights and a claim against the federal government. Two basic policies underlie the bill: (1) the equal footing doctrine which says that all states should enter the Union on the same basis and that the western states have been discriminated against.(2) Federal government is bound to a policy of transition of ownership to the states.

Sponsor would like to see p. 1 line 15 reference to "state land" read "land in the state" wherever it appears as it did in the original bill.

Van Doren expresses the opinion that the issue will go to the courts at some time but that the Federal government needs to be made aware of state's rights. The Western Attorney Generals may be working on suits related to the issue.

Parr - Asks if the bill shouldn't be made retroaction to statehood.

Ken Vasser, Attorney for Legislative Research, Leg. Affairs

In regard to the retroactive question, state's rights must first be determined. The bill is presently "progressive" in nature effecting future activity. Question of states' rights vs. federal rights. Power to exercise "exclusive legislation" rather than land ownership.

Parr - While he can see that logically the bill should be retroactive, there may still be a problem with homestead land.

Parr - p. 1. line 27,28 Neither the term "withdrawal" nor "acquisition" is accurate if you assume that the state owned the land all the time.

Vasser - Agrees and says use of term "unlawful" might be preferable.

COMMITTEE ACTION: Directs that CS be prepared with noted chan

TAPE # 10 SIDE 2 Footage 551-1574

Parr - "attempted" withdrawn might be considered.

Branson - Suggests there might be some conflict between the bills passed by the House recently and the idea of making this bill retroactive. Asks if the state consented to the passage of ANCSA?

Committee approves of amendments as noted.

Metcalfe - Suggests adding the 'management program" as contained in HB398 to the bill. Says that there must be a "clash" created if the state is going to get any action. The state must assert its management rights.

AMENDED TITLE: SB 334 AM

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM

November 26, 1979

SUBJECT: Acquisition of Land by the United States (Work Order Number 7480)

TO: Senator Robert H. Ziegler, Sr.

FROM: Kenneth E. Vassar
Legislative Counsel KEV

Enclosed is the bill you requested, based upon Oklahoma's HB 1178, which would prohibit the federal government from acquiring land in the state without the consent of the state legislature. No doubt you are aware that this bill will raise some constitutional inquiries.

The bill is explicitly based upon Art. I, Sec. 8 of the United States Constitution. Art. I, Sec. 8, ¶17, provides that:

> Congress shall have power . . .
> To exercise exclusive legislation in all cases whatsoever over [the District of Columbia] and to exercise like authority over all places purchased by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsenals, dock-yards, and other needful buildings . . .

It is interesting to note that the bill would seem to expand this power of Congress to the extent that it consents to the acquisition by the United States of land by means beyond simple purchase. On the other hand, the bill attempts to limit Congress' power by providing that the United States may not, without the legislature's consent, acquire land for any purpose other than those listed. The constitutional provision relates to the exercise of exclusive legislation and does not speak to the acquisition of land.

The results of a consent by a state to the exercise of exclusive jurisdiction by Congress may be briefly noted. Congress alone has the power to punish for crimes committed within the area. Battle v. United States, 209 U.S. 36 (1908).

Private property within the area is not subject to taxation by the state. Surplus Trading Co. v. Cook, 281 U.S. 647 (1930). State statutes enacted after the cession have no effect. Western Union Telegram Co. v. Chiles, 214 U.S. 274 (1909). And, the law of the state in effect at the cession continues until changed by Congress. James Stewart and Co. v. Sadrakula, 309 U.S. 94 (1940).

Whether the United States has the power to acquire land, other than with the consent of a state's legislature, other than for those purposes enumerated in Art. I, Sec. 8, ¶17, and other than with the concomitant power of exclusive jurisdiction over those lands, is a matter of some debate recently. Arguably, such power derives from Art. I, Sec. 8, ¶18, which provides that:

> The Congress shall have power . . .
> To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the government of the United States . . .

Art. IV, Sec. 3, ¶2 further provides:

> The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular state.

It appears to be implicitly recognized by the foregoing that the United States will own property. This is particularly so since the government of the United States owned property even prior to the adoption of the Constitution. In 1783, six years prior to the ratification of the Constitution, Virginia ceded its claims to the area beyond the Ohio River to the Confederation. Other states of the Confederation made similar grants. These grants were the basis of what is now called the public lands of the United States.

Finally, the provisions of Art. VI, ¶2, provide that the laws of the United States are the supreme law of the land. If the acquisition of land by the United States is a legitimate and constitutional function of the federal government, this bill would be in conflict with any laws passed by Congress in furtherance of that function. Hence, under Art. VI, ¶2, the state law would be invalid. In my opinion,

that is the most likely outcome if the bill should pass and be challenged in court, although I have no cases to cite specifically addressing the issue.

A corollary matter rises with relation to the Alaska Statehood Act (72 Stat. 339). Sec. 4 of that act provides in part:

> As a compact with the United States said State and its people do agree and declare that they forever disclaim all right and title to any lands or other property not granted or confirmed to the State or its political subdivisions by or under the authority of this Act. . .

The Statehood Act, as the supreme law of the land, would take precedence over any subsequently enacted state law which would conflict with its provisions.

Finally, I would like to bring to your attention a particular section in the bill which was not included in the Oklahoma bill. That is sec. 38.05.510, which expressly denies any potential inference of consent to President Carter's Antiquities Act withdrawals in Alaska. This is a matter which I thought you might want to add ss since part of sec. 38.05.500 of the bill includes a consent to the acquisition of land by the United States for the purpose of consolidation within existing boundaries of National Forests within Alaska.

Vol. 12 No. 16 Sept. 14, 1979

Remember the ad headline of a few years ago? "They all laughed when I sat down to play...But...?"

Can well apply that phrase to the "SAGEBRUSH REBELLION". That's the name that Nevada State Senator Norman Glaser branded onto the impressive movement that took roots in his state.

The ..... "SAGEBRUSH REBELLION"

And one thing is certain...no one is laughing about it now...since the 13 Western States, including Alaska, are becoming involved. It's a ground-swell sort of thing and it can well shake the rafters in Washington before they are through.

At the Western Coalition on Public Lands regional meeting in Reno last week, one gained the specific feeling that something was about to happen...some long-needed actions were about to be taken. And sponsored by the Western Conference, Council of State Governments...Western Region, National Association of Counties...with Nevada Legislature's Select Committee on Public Lands as host...it was clearly evident nobody was fooling. And what is more, the whole action is being well researched, studied and organized...Final direction is pointed toward the Supreme Court.

What is happening...is a rebellion against long standing inequities that have strayed from the original intent. Behind it is the same kind of spirit and determination that built this nation...to correct the long tolerated ills, that if left hanging much longer, could seriously impair this nation.

It's a rebellion against the right-angle drift from basic principles of our constitution. It's directed against over-regulation, against irresponsible legislation. It is leveled at inexcusable "overlording" by bureaucrats and aimed at unfair treatment and unequal footing between sister states. It's a rebellion to break the back of the overdose of preservation counter-culture groups who have whipped the federal government (the Congress, Administration and Agencies)...into an unrealistic submission...no-growthers hiding behind environmentalism, that can bring this nation to its knees if not stopped cold.

The "Sagebrush Rebellion" is directed at Federal negligence...at requirements that have fouled up essential management and development of our public lands within the concerned states...at frustrations at being prevented from exploring and developing needed resources such as oil, coal, minerals, timber, water, grazing within the respective state's boundaries.

NO REPRODUCTION WITHOUT WRITTEN PERMISSION © DEAN SHERMAN, INC

And to say the least, it is a rebellion against the BLM Organic Act which declares that henceforth all federal public lands will remain within the ownership and control of the Federal Government. That was the igniting spark!

The fact is...the "Sagebrush Rebellion" is rolling. From our overview it seems apparent that it will not be stopped until its objectives have been somehow satisfied. Right now, that means until each state concerned has control of the public lands within its borders. Nobody is going to ride the range with blazing 30/30s or six-shooters...and it will take some time because this is both a legal as well as a philosophical issue.

But the Western states have sensed that the timing is ripe to gain an equality with other states. And they likely are right in view of energy shortages, critical water issues, massive wilderness oversell, severe economic pressures within various states...and what is obviously mismanagement of much public land by federal bureaucracies...often managed for politics by unrelated people. It doesn't appear likely either, that the situation will be eased or settled by soothing words of bureau heads, politicians, committee chairmen or administrative pleas.

Nevada has given lead to an action that may now be broadened to meet needs of other western states...And it seems likely will spread like wildfire. Nevadans did it by initiating their own legislation that has declared that: "Subject to existing rights...all public lands in Nevada and all minerals not previously appropriated, are property of the State of Nevada and subject to its jurisdiction and control."

Now take a quick look into some of the action...since whatever happens now, within the 13-western states, will have a profound effect on the future management and ownership of the more than every other acre of land in those states that has been under control of federal bureaus. And we are talking about the states of Montana, Wyoming,Colorado, New Mexico, Utah, Arizona, California, Nevada, Oregon,Washington, Idaho, Alaska and Hawaii.

Legislation to date includes....

The Nevada Assembly Bill No. 413 which asserts a strong moral claim upon the public lands...commits itself to wise management on multiple use basis...and provides for a transition period of continuing, uninterrupted management of the lands.

Commitment reads that the state will administer the lands "to conserve and preserve natural resources, wildlife, habitat, wilderness areas, historical sites and artifacts...permit development of compatible public uses for recreation, agriculture, ranching, mining, timber production and development and production and transmission of energy and other public utility services under principles of multiple use".

A sum of $250,000 was appropriated beginning July 1, 1979 for the biennium, to cover costs of carrying out the act and enforcement.

CALIFORNIA passed its Assembly Bill 1407 without a dissenting vote, on Sept. 5th, is now on the Governor's desk for signing. It's a beginning action... provides funds and directs the State Lands Commission to study and determine lands within the boundaries of California which may now be under management of BLM...but which should by constitutional right, be vested in the state. Excludes private and other specific lands as political subdivisions, parks, monuments, national forest lands,etc. To be reported back by July 1, next year.

Most of the legislators from other states in the West left the meeting with the declared intent of developing compatible legislation for their own state.

On the Federal level...Senator Orrin Hatch (D-Utah) has introduced Senate bill S.1680. Referred to as the "Hatch Act"...it carries the name "Western Lands Distribution and Regional Equalization Act of 1979".

Co-sponsors include Senators Goldwater and DeConcini of Arizona...Cannon of Nev., Zorinsky of Neb., Stevens of Alaska, Helms of North Carolina, Garn of Utah and Jepsen of Iowa.

The Hatch bill would cede some 544 millions of acres of BLM and National Forest lands to control of the 13 Western states. It sets up procedures too, for states to obtain title to the unappropriated Federally-held public lands within their respective borders. This ranges from 29% of the lands in the state of Washington to 87% in Nevada and 96% in Alaska.

There is claimed sound legal basis for the action, as well as philosophic and economic. One is the "Equal Footing Doctrine". While not a part of the constitution...it was one of the well developed constitutional documents dating back to the Northwest Ordinance of 1787. Holds that the states must be admitted to the Union on an "equal footing". And the primacy of state sovereignty has since been upheld by the Supreme Court on numerous occasions.

Many states had that or similar statements in their admittance documents. On the other hand, many western states were required to sign documents that they would not seek control of unappropriated lands within their borders... An action that is now viewed as illegal in some quarters.

A second base is the "Public Trust Theory: Says in effect that if a state has NOT, by virtue of its admission to the union...acquired title to unappropriated public lands...then the federal government holds a bare title as trustee for the people of the state...There is then an obligation to develop a systematic plan for disposal of those public lands for the benefit of the beneficiaries.

Legal issues are complex and varied. But Western Attorney Generals are already organized, researching and moving into a key spot on this entire issue. They know they are fighting unlimited funds...potential political abuse and scorn of entrenched environmentalists who will fight to maintain their strangle-hold on Congress. Reportedly Federal Government lawyers are skeptical, consider the Western states case to be without merit.

But the growing mood among the Western states attorney generals is little fazed by Washington legals...That there is a serious problem between federal and western states relationships...that there is a basic inequity in the way in which the public lands are being administered...and in the way public land states can exercise their rightful sovereignty over lands within their borders.

As a matter of fact...the Western Conference of Attorney Generals meeting in Juneau in July...passed a resolution establishing a "Study Committee on Public Lands" and essential task groups. In many western states the respective attorney generals have given the public land issue the highest priority rating in their offices...stand ready to work with each other and with legislators. They urge other states considering such legislation to closely involve their Attorney Generals...That they make line item appropriations available on which expensive litigation can be carried out.

Frank Gregg, Director, Bureau of Land Management...told the Western Coalition that he hoped they would develop a triple strategy to go along with their enthusiasm for gaining ownership of the public lands.

One, the legal case, that may go on for years...Another, the Congressional initiative that involves a question of such magnitude that it cannot be resolved quickly...The third...a recognition that in the meantime we have a body of laws...we have lands...we have people who use the lands...and we must make some choices and decisions now.

In the push to oust the federal landlords, he asked that equal attention be given to current laws and problems...particularly to the Federal Land Policy Management Act...where there is need for continuing interest and involvement in decision making.

Gregg assured the Western Coalition that many changes have been made and more would be made, in BLM. That both he and Secretary Andrus take the concept of "multiple use" seriously...that he staunchly believes that "if the government is going to hang onto its lands, then it must become a good manager. And if it isn't going to be a good manager...then it ought to get rid of the lands".

He expressed belief that the frustrations expressed in the "Sagebrush Rebellion" are reactions to newly effected Federal environmental regulations, running into potential economic development and spurred by the energy crisis ..believed that the environmental pendulum is beginning to swing back and we will "see a better balance ahead".

As an answer to closer cooperation...Gregg suggested pooling of technical resources and a willingness to set up some experimental projects to "test out if we can cooperate under a shared-decisions system".

Gregg took his lumps along with other federal officials. And though well liked, the audience obviously does not trust the system of dominance of political decisions behind him.

SENATOR Paul Laxalt (R-NV) in a top notch speech, said that the "Sagebrush Rebellion" indicates that the people in the west no longer want their states to be treated like colonies. They want full partnership...are sick and tired of arbitrary policies imposed upon them by non-elected bureaucrats 3000 miles away who had not the slightest knowledge of what their decisions are doing.

He suggested an omnibus "Western Package" bill which would embrace all of the land and water problems and provide the protection needed as one solution. And this would include pending legislation that any court litigation must be heard where controversies arise...and not in Washington where courts are often used as a mechanism for influencing local decisions."

REP. Don Clausen (R-Cal) and the ranking Republican on the Interior Committee, expressed his belief that whatever legislation relating to Public Lands considered by the Congress...it must assure that we are maintaining the economic and political integrity of the county governments. "And as far as I am concerned...what is really required is a major massive coalition that would be born irrespective of party, and says in no uncertain terms...that we want to advance a program of fiscal and institutional decentralization away from the domination of what has in effect been an over-consoling central government in Washington".

Dean Sherman

An Act

ENROLLED HOUSE
BILL NO. 1173

BY: MORGAN, HOLDEN, SHEPPARD, ROGERS, BRADLEY, ANDERSON, MONKS, PETERSON, MILACEK, HILL, JOHNSON (Don), KENNEDY, SHURDEN, GLOVER, BRISCOE and CUNNINGHAM of the HOUSE

and

YOUNG, DAHL, JOHNSTON and LAMB of the SENATE

AN ACT RELATING TO PROPERTY; AMENDING 80 O.S. 1971, SECTIONS 1 AND 6; GRANTING CONSENT OF THIS STATE TO ACQUISITION OF LAND BY THE FEDERAL GOVERNMENT FOR CERTAIN PURPOSES; GRANTING CONSENT FOR CERTAIN LIMITED ACQUISITIONS BY CERTAIN MEANS; REQUIRING LEGISLATIVE APPROVAL FOR CERTAIN ACQUISITIONS; REVOKING CONSENT FOR CERTAIN ACQUISITIONS; PROVIDING CONCURRENT JURISDICATION OF THIS STATE AND THE FEDERAL GOVERNMENT OVER ACQUIRED LANDS; REPEALING SECTIONS 7-301 AND 7-306, CHAPTER 17, O.S.L. 1974 (29 O.S. SUPP. 1978, SECTION. 7-301 AND 7-306); AND DECLARING AN EMERGENCY.

BE IT ENACTED BY THE PEOPLE OF THE STATE OF OKLAHOMA:

SECTION 1. 80 O.S. 1971, Section 1, is amended to read as follows:

Section 1. A. The consent of this state is hereby given, in accordance with Section 8 of Article I of the Constitution of the United States, to the acquisition by the United States, by purchase, condemnation or otherwise, of any land in this state required for sites for custom houses, post offices, arsenals, forts, magazines,

907-465-3800

MEMORANDUM

November 26, 1979

SUBJECT: Acquisition of Land by the United States (Work Order Number 7480)

TO: Senator Robert H. Ziegler, Sr.

FROM: Kenneth E. Vassar
Legislative Counsel

Enclosed is the bill you requested, based upon Oklahoma's HB 1178, which would prohibit the federal government from acquiring land in the state without the consent of the state legislature. No doubt you are aware that this bill will raise some constitutional inquiries.

The bill is explicitly based upon Art. I, Sec. 8 of the United States Constitution. Art. I, Sec. 8, ¶17, provides that:

> Congress shall have power . . .
> To exercise exclusive legislation in all cases whatsoever over [the District of Columbia] and to exercise like authority over all places purchased by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsenals, dock-yards, and other needful buildings . . .

It is interesting to note that the bill would seem to expand this power of Congress to the extent that it consents to the acquisition by the United States of land by means beyond simple purchase. On the other hand, the bill attempts to limit Congress' power by providing that the United States may not, without the legislature's consent, acquire land for any purpose other than those listed. The constitutional provision relates to the exercise of exclusive legislation and does not speak to the acquisition of land.

The results of a consent by a state to the exercise of exclusive jurisdiction by Congress may be briefly noted. Congress alone has the power to punish for crimes committed within the area. Battle v. United States, 209 U.S. 36 (1908).

Private property within the area is not subject to taxation by the state. Surplus Trading Co. v. Cook, 281 U.S. 647 (1930). State statutes enacted after the cession have no effect. Western Union Telegram Co. v. Chiles, 214 U.S. 274 (1909). And, the law of the state in effect at the cession continues until changed by Congress. James Stewart and Co. v. Sadrakula, 309 U.S. 94 (1940).

Whether the United States has the power to acquire land, other than with the consent of a state's legislature, other than for those purposes enumerated in Art. I, Sec. 8, ¶17, and other than with the concomitant power of exclusive jurisdiction over those lands, is a matter of some debate recently. Arguably, such power derives from Art. I, Sec. 8, ¶18, which provides that:

> The Congress shall have power . . .
> To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the government of the United States . . .

Art. IV, Sec. 3, ¶2 further provides:

> The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular state.

It appears to beimplicitly recognized by the foregoing that the United States will own property. This is particularly so since the government of the United States owned property even prior to the adoption of the Constitution. In 1783, six years prior to the ratification of the Constitution, Virginia ceded its claims to the area beyond the Ohio River to the Confederation. Other states of the Confederation made similar grants. These grants were the basis of what is now called the public lands of the United States.

Finally, the provisions of Art. VI, ¶2, provide that the laws of the United States are the supreme law of the land. If the acquisition of land by the United States is a legitimate and constitutional function of the federal government, this bill would be in conflict with any laws passed by Congress in furtherance of that function. Hence, under Art. VI, ¶2, the state law would be invalid. In my opinion,

that is the most likely outcome if the bill should pass and be challenged in court, although I have no cases to cite specifically addressing the issue.

A corollary matter rises with relation to the Alaska Statehood Act (72 Stat. 339). Sec. 4 of that act provides in part:

> As a compact with the United States said State and its people do agree and declare that they forever disclaim all right and title to any lands or other property not granted or confirmed to the State or its political subdivisions by or under the authority of this Act. . .

The Statehood Act, as the supreme law of the land, would take precedence over any subsequently enacted state law which would conflict with its provisions.

Finally, I would like to bring to your attention a particular section in the bill which was not included in the Oklahoma bill. That is sec. 38.05.510, which expressly denies any potential inference of consent to President Carter's Antiquities Act withdrawals in Alaska. This is a matter which I thought you might want to address since part of sec. 38.05.500 of the bill includes a consent to the acquisition of land by the United States for the purpose of consolidation within existing boundaries of National Forests within Alaska.

Rep. Parker discusses the outcome of a meeting on the subject of CSSB562 which occurred on 5/8/80 and which was attended by Jessie Dodson, Murray Walsh, Larry Kimball, John Halliwell (Haines), Tom Lawson, John Halterman, and Marjorie Gorsuch and Margo Waring (staff to House and Senate C&RA). At the meeting the group discussed the concerns raised by Roger Allington in his testimony on the bill. It was the concensus of the group that the CSSB562 as written, would meet the needs of the areas affected and that Mr. Allington's objections were not well founded.

Murray Walsh, Office of Coastal Zone Management
Reitterated the comments made by Rep. Parker and added that Don Gillman, Vice Chairman of the Council had been contacted and that he support CSSB562 as written.

Rep. Metcalfe suggests amending the bill with the Allington amendments. There was no support for this motion.

The committee signed out CSSB562.

COMMITTEE ACTION: Bill passed out.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the formation of coastal resource service areas; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.40.120(a) is amended to read:

(a) Except as otherwise provided in [(b) OF] this section, each regional educational attendance area established under AS 14.08.031 containing a part of the coastal area may be organized as a coastal resource service area.

* Sec. 2. AS 46.40.120 is amended by adding a new subsection to read:

(d) For purposes of coastal zone management only, the commissioner of the Department of Community and Regional Affairs may, after public hearings held in the regional educational attendance area affected, divide an existing regional educational attendance area into no more than three coastal resource service areas according to geographic, cultural, economic, environmental, or other features relevant to coastal management planning; however

(1) each coastal resource service area formed by dividing an existing regional educational attendance area must contain at least one first class city or home rule city;

(2) a city within a coastal resource service area formed by dividing an existing regional educational attendance area may not elect to exclude itself from the coastal resource service area; and

(3) a coastal resource service area formed before the effective date of this Act may not be divided for coastal management planning

1st cl. cities - pl. powers. - grandfather them. // Craig/Klawock 3/11 rural "create - no pl. powers Cordova PWS.

purposes.

* Sec. 3. AS 46.40.190 is amended to read:

Sec. 46.40.190. COOPERATIVE ADMINISTRATION. (a) A city within the coastal area which is not part of a [AN ADJACENT] coastal resource service area shall be included [MAY INCLUDE ITSELF] for purposes of this chapter within an adjacent coastal resource service area unless [IF] its governing body, by resolution adopted by a majority of its membership, chooses to exclude [CONSENTS TO THE INCLUSION OF] the city from an adjacent coastal resource service area and a copy of the resolution is filed with the commissioner of the Department of Community and Regional Affairs.

(b) Nothing in this chapter restricts or prohibits cooperative or joint administration of functions between a municipality and a coastal resource service area organized under the provisions of this chapter upon initiation of a mutual agreement for the purpose. A city which elects to be excluded from an adjacent coastal resource service area under (a) of this section shall enter into a mutual agreement for cooperative or joint administration of functions with the coastal resource service area board from the adjacent coastal resource service area.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.10.-070(c).

I can't believe that they have forgotten that the local autonomy was originally a potential comparable - this is much preferable for CZM purposes!

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B – JUNEAU 99811

April 21, 1980

The Honorable Bill Parker
Chairman
Community and Regional Affairs
Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

At your request, the Department of Community and Regional Affairs has prepared background information on HB 992 and explored alternatives to the bill.

BACKGROUND

The Alaska Coastal Management Act of 1977, as amended, allows residents of the unorganized borough to organize coastal resource districts encompassing one or more regional educational attendance areas (REAAs). The Commissioner of Community and Regional Affairs has authority to combine two or more REAAs into a single coastal resource service area prior to organizational elections. Municipalities which exercise planning powers are also districts; they may join an adjacent coastal resource service area but are not required to do so. Each district prepares a coastal management program to be submitted to the Coastal Policy Council and State Legislature. This system seems to work well in certain areas, but has been received with reservation in others. Attachment 1 lists each coastal REAA and coastal resource districts within each REAA and indicates whether the district's coastal management program is under way or completed. REAAs which have not yet conducted coastal management elections but could do so under the present law are described as "potential" districts.

Coastal resource districts have been organized in three regions of the unorganized borough; another region is seriously considering following suit. Districts have formed in the Northwest Alaska region (REAA 1), the Bering Straits region (REAA 2), and the Yukon/Kuskokwim region (REAAs 3 and 4); district formation is under consideration in the Bristol Bay region (REAAs 6 and 7). These four regions have the following traits in common:

1. Each region has one dominant regional center: Kotzebue in the Northwest Alaska region; Nome in the Bering Straits region; Bethel in the Yukon/Kuskokwim region and Dillingham in the Bristol Bay region.

2. All of the communities in the Northwest Alaska region and all but one in each of the other regions are second class cities or unincorporated and therefore obtain educational services from an REAA. (First class and home rule cities operate their own school districts.)

3. In two of the three regions which have organized coastal resource districts the regional center has chosen not to join the adjacent service area. Consequently, in the Bering Straits region there are two coastal resource districts, the City of Nome and the Bering Straits Coastal Resource Service Area; in the Yukon/Kuskokwim region, there are also two coastal resource districts, the City of Bethel and the Yukon/Kuskokwim Coastal Resource Service Area.

In addition to the regions discussed in the foregoing paragraphs, there are six coastal REAAs which have not yet organized coastal resource districts. They have the following characteristics:

1. Four of them--the Aleutian Islands (REAA 8), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19) and Prince William Sound (REAA 21)--have several first class or home rule cities each and no dominant regional center. Therefore, each region has several school districts, several coastal resource districts, and no established central gathering place or service center (except Anchorage, Juneau, or Seattle).

2. Federal landholdings consume much of the land within each region. Federally owned land is not part of the State's coastal zone. Settled areas and non-federal land often occur as isolated pockets separated by thousands of acres of federally owned land.

HB 992 resulted from concern that options offered by the Alaska Coastal Management Act may not be well suited to the second set of REAAs discussed above (REAAs 8, 9, 10, 18, 19, 21). Attachment 2 describes advantages and disadvantages of the status quo [AS 46.40.120(b)], HB 992, two legislative alternatives and one administrative alternative.

Sincerely,

Marie Matsumoto-Pignalberi

	Region	Coastal Resource Districts (Including cities and boroughs within regions generally defined by REAAs)
REAA 1	Northwest Alaska	* NANA Coastal Resource Service Area
REAA 2	Bering Straits	* Nome * Bering Straits Coastal Resource Service Area
REAA 3&4	Lower Yukon/ Lower Kuskokwim	Bethel * Yukon/Kuskokwim Coastal Resource Service Area
REAA 6&7	Nushagak-Bristol Bay Lake/Peninsula-Bristol Bay	Dillingham * Bristol Bay Borough * Bristol Bay Coastal Resource Service Area (potential)
REAA 8	Aleutian Islands	Unalaska King Cove Sand Point Aleutian Chain Coastal Resource Service Area (potential)
REAA 9	Pribilof Islands	Pribilof Islands Coastal Resource Service Area (potential)
REAA 10	Adak	Adak Coastal Resource Service Area (potential)
REAA 18	Northern Panhandle	* Yakutat * Haines (City) * Skagway * Juneau Pelican Hoonah * Sitka * Kake Northern Panhandle Coastal Resource Service Area (potential)
REAA 19	Southern Panhandle	* Petersburg * Wrangell * Klawock * Craig * Hydaburg * Ketchikan Gateway Borough Southern Panhandle Coastal Resource Service Area (potential)
REAA 20	Met...katla/Annette	* Annette Islands Indian Reserve
REAA 21	Chugach	* Cordova * Valdez Prince William Sound Coastal Resource Service Area (potential)

* Program under way or completed

Status quo	Advantages	Disadvantages
AS 46.40.120(b) allows the Commissioner of Community and Regional Affairs to consolidate two or more REAAs into one coastal resource service area after considering standards applicable to incorporation of borough governments , the likelihood that a borough would be incorporporated within the area, or the extent of federally owned land and water within the area.	By using the REAA as the basic unit for planning in the unorganized borough, the present law does not create any new boundaries for delivery of government services.	The present law allows first-class and home rule cities (and second-class cities under certain circumstances) to develop coastal management programs separate from the region. Many cities do not see it in their best interest to join forces with an entire REAA. Consequently, coastal resource service areas are not being organized in several REAAs, yet many cities have legitimate interest in influencing development outside their corporate limits.
HB 992		
Under HB 992, AS 46.40.120(b) would be amended to allow the Commissioner of Community and Regional Affairs to not only consolidate two or more REAAs into one coastal resource service area, but also subdivide REAAs into separate coastal resource service areas according to geographic, cultural, or other features relevant to coastal management planning. Borough incorporation standards would also be considered, as would federal ownership of coastal land and water.	HB 992 also uses REAAs as the basic unit of reference for coastal resource service areas. First-class or home-rule cities of the unorganized borough might be more inclined to join coastal resource service areas smaller than the entire REAA in which they are located. HB 992 would allow residents to plan for those areas which affect them most directly and with which they are most intimately familiar.	Indiscriminate subdivision of an REAA could produce fragmented coastal management programs.
Legislative alternative #1		
Retain the language of HB 992, but restrict application of the subdivision provision to the Aleutian Chain (REAA 8), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19), and Prince William Sound (REAA 21). Allow the Commissioner of Community and Regional Affairs to combine REAAs with subdivisions of other REAAs if such combinations satisfy standards mentioned in HB 992.	This provision would restrict application of the subdivision section to areas most likely to express interest in them.	The restriction may be unnecessary since coastal resource service areas have organized districts in most of the other coastal REAAs. There may be constitutional questions about treating regions differently by specifying the geographic area rather than by specifying standards which must be met

Legislative alternative #2	Advantages	Disadvantages
Retain the language of HB 992, but add the following provision: If an REAA is divided and an organization election is called in one subdivision, an election will automatically be called in all other subdivisions of the REAA. If any one of the subdivisions elects to organize a district, all other subdivisions are automatically organized. The coastal management program from all subdivisions of an REAA must be coordinated from the outset and submitted simultaneously to enable the Coastal Policy Council and State Legislature to reach a reasonable conclusion about the compatibility of the plans. Although each subdivision would have its own board, there would be a seven-member regional oversight board with representation from the entire REAA (or combination of REAAs) on a one-man, one-vote basis.	All of the advantages of HB 992. Greater coordination among plans than would be afforded under HB 922.	Certain areas may be prematurely coerced into preparing a coastal management program by virtue of actions taken by neighboring areas. Any section could delay approval of the programs of other sections. Creation of another layer of government would make the process more cumbersome and costly.
Administrative alternative		
A coastal resource service area encompassing one or more REAAs could voluntarily organize itself in such a way that board members from one area would meet routinely with local people in that area and use full board meetings as a means to combine sectional ideas and make compromises if necessary.	Local involvement in regional coastal management planning with as few new formal structures as possible. No legislative change would be needed.	The representation and consequent voting strength of any given area on the seven-member service area board would be less in an entire REAA than in a subdivision of it.

Application of ACMP to the Aleutian/Pribilof Island Region

Problem:

Options provided under the Alaska Coastal Management Act for formation of "coastal resource districts" are not applicable to the Aleutian/Pribilof Island Region.

Background:

The Aleutian/Pribilof Island Region presents a unique situation relative to the establishment of coastal resource service areas. Within the Region are three first-class cities (Sand Point, King Cove and Unalaska) as well as regional educational attendance areas 8, 9 and 10 (Aleutian Chain, Pribilof and Adak).

Under present law the first-class cities have the option of becoming single coastal resource service areas, thus establishing their own coastal management planning programs within their respective political boundaries, or of joining forces with the REAA's to develop a regional planning effort.

In addition, the three REAA's may become separate coastal resource service areas or, under authority granted in AS 46.40.120(b) the Commissioner of the Department of Community and Regional Affairs, may consolidate REAA's 8, 9 and 10 into one or two service areas for coastal management purposes.

Given these conditions there exists the possibility of one or six, or any combination within these numbers, coastal resource service areas being created within the Aleutian/Pribilof Island Region.

The population of the Region is approximately 3600 with 2274 (63%) residing in the three first-class cities (Sand Point 773, King Cove 733 and Unalaska 768). The second-class communities of Akutan and St. Paul contain 652 residents, 85 and 567 respectively. Total Regional population residing in incorporated municipalities totals 2926 or 81%. Clearly, if the first-class communities elect to establish their own programs within their jurisdictions, the remaining area (REAA's 8, 9, & 10) will be substantially diluted of human resources with which to develop and implement a coastal management program.

Land interests in the region are geographically complex. Village corporations were unable to select ANCSA entitlements within the core townships of Native villages due to the configuration of islands and Federal reserves. As such, village corporations selected deficiency lands under the Act this resulted in the ownership of land many miles from their respective villages. An example is the Tanadqusix Corporation at St. Paul (Pribilof Islands). Tanadqusix Corporation has substantial land holdings approximately 200 miles away on Unalaska Island. This is the case for a majority of the Aleutian's village corporations thus creating an extremely fragmented pattern of land ownership and land interests throughout the chain.

Several Aleutian villages are vacant of population, yet represent vast land holdings and thus development interests for shareholders residing elsewhere. Unga and Sanak are two cases in point. Village Corporation members from Unga and Sanak reside in Sand Point yet hold major land interests outside of Sand Points City boundaries. They fear that should Sand Point elect to become a coastal resource service area they, as residents of Sand Point, will be precluded from having a voice in a coastal management program which encompasses their corporate land holdings.

The communities, on the other hand, would prefer to work with the respective corporations in a coastal management program but do not care to be involved or necessarily influenced by actions a thousand miles away.

The Aleutian/Pribilof Island Region situation strongly indicates the need to provide a third option for creating coastal resource service areas. This option would address the need to create service districts which emphasize common interests and geographic proximity in areas where land mass, economic interests and population are not contiguous.

Proposed Legislative Amendment

Section 3 AS 46.40.120(b) is amended to read:

(b) The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or may subdivide an existing regional education attendance area according to geographic, cultural or other features relevant to coastal management planning.

Dear Mr. Kimball Gary

In response to your letter of March 21, 1980 concerning the language of a possible amendment to AS 46.40.120(b), I can state the amendment accomplishes precisely the purpose which the City Council hopes for. I have discussed the language of the amendment with City Manager Burton; it has the support of the City administration. At the next regular City Council meeting (April 10, 1980), we shall report on the swift response which we have had from the Division to our request for assistance and inform the Council of the proposed amendment.

Thank you, again, for the attention which you have given this matter.

Sincerely,

Unalaska, Alaska 99685

Dear Mr. Richard Careaga:

In response to your letter of March 17 requesting our assistance in drafting an amendment to AS 46.40.120(b), I would like to relay the following information.

The City Councils of Sand Point and King Cove have made identical requests. In order to accommodate these requests in a timely manner I drafted a proposed amendment and presented same to the Alaska Coastal Policy Council on Wednesday, March 19.

Following my presentation and brief discussion the Council voted 11-0 in favor of a resolution supporting the proposed amendment. This support will accompany the proposed amendment to Juneau where we will request it be introduced via committee. We will meet with Sand Point officials and legislators for the affected area next week in Juneau to discuss the matter.

I have enclosed a copy of the proposed amendment for your City Council's review. Should the Council support it as written, I would appreciate a letter to that affect. Should there be a need to amend the language please contact me immediately as time is of the essence.

Thank you for your assistance in this matter and please assure the City Council and Mayor Holmes that we will keep them informed as things progress.

Thank you also for the courtesies extended during our recent visit. I enjoyed our stay.

Best regards,

Larry

Alaska Department of Community and Regional Affairs
225 Cordova, Building B, Suite 104
Anchorage, Alaska 99501

Dear Mr. Kimball:

The City Council, by motion, has instructed me to contact your office to determine the feasibility of amending AS 46.40.120 to permit the Commissioner discretionary authority to establish coastal resource service areas which emcompass areas smaller than REAA's. It is the view of the City Council that participation in a properly drawn service area could be a more effective mechanism for Unalaska's taking part in coastal management under the Act than either as its own district or as part of a district taking in most of the Chain.

Any assistance which your office could render in drafting a candidate amendment would aid us greatly in approaching our legislators on the question and would be greatly appreciated.

Sincerely yours,

SENATE BILL NO. 641

For an Act entitled: "An Act Relating to Wage Rates".

The Wage and Hour Divison of the Alaska Department of Labor respectfully endorses the proposed amendments to Secs. 36.05.010 and 36.05.070(a) of Title 36, PUBLIC CONTRACTS.

We believe the proposed amendments will clarify the interpretation of the meaning and intent of these sections which are ambiguious and which have been referred to as "somewhat muddled" in a memorandum dated May 15, 1974 signed by former Deputy Attorney General Michael R. Peterson.

We submit the new language provided in the proposed amendments constitutes a reasonable interpretation of the meaning of "prevailing wage rates". To hold otherwise would be to lock workers into the rates prevailing at the beginning of a contract. Should the performance of a contract require a considerable length of time and should economic factors cause a change in these prevailing rates it seems only logical and equitable that workers should be paid at the new adjusted rates being paid to other workers of similar classifications on projects commenced at a later date.

We further submit in support of this position that "in the case ambiguity of language, that construction should be adopted which would be most favorable to the parties seeking to obtain the wage rate which the statute calls for" re: McKibbin vs City of New York, N.YS 2nd 50,52 (1945) affirmed 53 N.YS 2nd 474, affirmed 64 N.E. 2nd 288.

In conclusion we submit, Prevailing Wage Rates should be effective from the date they are established by the Department of Labor and applicable to all contracts involving public funds.

STATE
of ALASKA

MEMORANDUM

SB641

TO: E. T. Leland, Supervisor
Wage and Hour Division
Department of Labor

DATE : February 23, 1976

FROM: Avrum M. Gross
Attorney General

SUBJECT: "Prevailing wage rates"

By: Richard M. Burnham
Assistant Attorney General

You have asked this department for our views on the following three questions.

1. Does "prevailing wage rate" mean the advertised rate, AS 36.05.070(a) and (b)(2), or does it mean the rate periodically determined by the Department of Labor under AS 36.05.030 and 8 AAC 30.050?

2. If the prevailing wage rate is the same as the contract wage rate at the outset of a contract, must the contract wage rate change during the life of the contract in accordance with changes in the prevailing wage rate?

3. Where a contractor on a public works project is signatory to a collective bargaining agreement obligating him to make payments to a union benefit trust account, does the contractor satisfy the requirement of Title 36 by paying the benefit amounts directly to the employee as wages rather than making payments to the union trust account on behalf of the employee?

Our short answers to your questions are: (1) the "prevailing wage rate" means the rate periodically determined by the Department of Labor; (2) the contract wage rate must equal or exceed the prevailing wage rate and therefore the contract rate must change accordingly during the life of the contract; and (3) payments directly to the employee satisfy the requirements of Title 36.

The purpose of AS 36.05 is to assure that the state and its political subdivisions do not pay substandard wages on public construction projects. Of primary import in AS 36.05 is sec. 05.010 which mandates that whatever wage a contractor or subcontractor pays on a public construction project, it shall not be "less than the prevailing rate of wages for work of a similar nature in the region in which the work is done."

E. T. Leland, Supervisor
Wage and Hour Division

February 23, 1976

As a result of this mandate, the advertised rate, referred to in AS 36.05.070, must at least equal the prevailing wage rate in existence at the time the advertised rate is published. Most often, the advertised rate will be but a statement of what the prevailing wage rate is at that moment in time. As the prevailing wage rate changes, so must subsequent advertised rates.

This same analysis applies to public construction contract rates as they too must not be less than the prevailing wage rate. If during the life of the contract the prevailing wage rate increases to the point where it exceeds the contract rate, the latter rate must be increased accordingly to comply with AS 36.05.010.

Pursuant to AS 36.05.030 and 8 AAC 30.050 promulgated thereunder, the determiner of the prevailing wage rate is the Department of Labor, and that rate is to be "periodically revised". 8 AAC 30.050(a)

The above discussion establishes what the "prevailing wage rate" means. Whether a public contractor chooses to pay that rate directly to an employee or to pay a portion of it into a union trust account is not a concern of Title 36 for this title only addresses the amount of the wage and not the manner by which it is to be paid. We suggest that disagreements over whether an employer has complied with the provisions of a collective bargaining agreement be left to the parties to the agreement to resolve.

SUBJECT: Relating to the regulations of the Alaska Housing Finance Corporation defining the term "rural." (Work Order No's: 6419 and 6420)

TO: Senator Bill Ray

FROM: John B. Chenoweth, Legislative Counsel

A word, if I may, concerning the legislation provided:

The confusion begins because the Alaska Housing Finance Corporation has, by regulation, defined the term "rural." In fact, their responsibility was to apply the standards which are part of the definition of the term "remote, underdeveloped or blighted area" to the map of Alaska.

It is apparent that AHFC has taken the easy way out, excluding the entirety of the three unified municipalities (Anchorage, Juneau, Sitka) and the urban areas of some other boroughs merely on th basis of population. Ms. Walton has a good point in that AHFC has not met the legal requirement imposed by AS 18.56.210(12) with its several standards as to what constitute "remote, underdeveloped or blighted" areas. The Senate Concurrent Resolution is submitted to annul the regulation.

However, that is not to say that AHFC will not essentially try to do substantially the same thing the next time around. The bill is offered to emphasize the point that AHFC shall make its geographical determination on the basis of a reading of all the standards, not just population, and that within urbanizing boroughs and unified local governments the board should go beyond examination of the corporate limits to see whether parts of the borough or unified municipality would meet the "remote, underdeveloped or blighted" standards.

That is not to say that even if the bill and resolution are adopted just as offered here, AHFC will conclude that Linda Walton's house at 23 mile Glacier Highway is in a "remote, underdeveloped or blighted" area. If you want AHFC to have the authority to promote residential housing in "rural, underdeveloped or blighted" areas, please let me know. I will go through AS 18.56 and change "remote" to "rural" every place it appears, and conjure up a definition of "rural" that is tied to, say, the absence of water and sewer systems, as Ms. Walton suggests.

You may offer the resolution, the bill, both, or neither, depending on how you want to get at the points presented in Ms. Walton's letter. But I do not guarantee that, even if both pieces of legislation are enacted, AHFC will find that 23 mile Glacier Highway is "remote, underdeveloped or blighted." "Rural," perhaps, but hardly "remote."

JBC:nem

Alaska HOUSING FINANCE CORPORATION

February 21, 1979

Hon. W. E. "Brad" Bradley
Pouch V
Juneau, Alaska 98111

Dear Senator Bradley:

I am enclosing a status report on the rural housing program which was authorized by the legislature in 1978 under AS 18.56.090(25). As you can see, we have put a great deal of time, effort and money into establishing this program to fulfill what we feel is the legislative intent for this program. You must also keep in mind that this has to be a viable and ongoing program in order to meet the needs of the bush communities. We, therefore, designed our loan criteria around what we feel is prudent business practice. We can foresee, if our criteria is followed, that in not too many years, this program would be in a position to command the sale of bonds in the public market, and be self-sustaining without the need for money being provided from the State's general fund to purchase all the mortgages created under the program. It appears the State is short of funds, and by creating a viable program, we feel it would be good for the taxpayer and still serve the needs of our remote communities.

AHFC was created in 1971 for the primary purpose of increasing the supply of housing in the State for persons of lower and moderate income and for persons residing in remote, underdeveloped or blighted areas of the State. We have a total of 7,023 loans in our portfolio totaling $377,433,000. There is a total of $420,460,000 bonds outstanding from a total issued of $428,725,000 and with the sale this week of an additional $72 million issue, AHFC will have provided over $500 million for housing throughout the State of Alaska with the use of the tax-exempt bond market and not the taxpayers dollars.

In order to continue providing the much needed housing for our State, it is necessary for the legislature to appropriate money for the Mortgage Insurance Fund. This amount is equal to 2% of the bonds issued on the public market. We leverage this 2% figure on a 50 to 1 basis in selling the bonds; i.e., $1 million of appropriated funds allows us to sell $50 million in bonds. AHFC has requested by resolution of the Board of Directors, an appropriation for fiscal year 1980 of $6 million. It is anticipated we will need $4 million in our regular loan program with an additional $1 million for anticipated impact in loan applications from Alaska Veterans since their program has been sus-

Telephone (907) 274-4621
Suite 100
Plaza 201 E. 3rd Avenue
P.O. Box 1020
Anchorage, Alaska 99510

pended. House Bill 165 has been introduced requesting an appropriation of $5 million. The continuation of our regular program will lend credence to our ability to go to the bond market in the future for the rural program that we want to institute as soon as possible.

Your support for our appropriation is necessary so AHFC can continue to provide funds at reasonable rates to the people of our State.

Sincerely,

J. M. Linton

FROM: James P. Kennedy, Rural Program Coordinator

Re: Rural Housing Program
Summary of Events

The Rural Program Coordinator was hired July 10, 1978 to assist in the implementation of the Rural Housing Program. With the Executive Director of AHFC, we began to develop the Rural Program guidelines and criteria. In addition, a good deal of time was spent reviewing existing and past Federal and State housing programs and the causes of failure of many of these programs. From the beginning the "Rural Housing Program" was designed to be efficient, simple, and secure. Early on we developed simplified Loan Application forms, Property Appraisal forms, Verification forms and a simplified Seller/ Servicer Guide.

On July 28, 1978, the Program Coordinator first met with Mr. Pat Pletnikoff, President of the Association of Alaska Housing Authorities and Executive Director of the Aleutian Housing Authortiy. We reviewed the program guidelines and the proposed loan criteria. We also discussed the participation of the individual Housing Authorities in the program. Mr. Pletnikoff was supportive. He and his staff have helped coordinate the efforts of AHFC and the Regional Housing Authorities since that time. He also provided the necessary exchange of information required to finalize the criteria to be used.

On August 2, 1978, we visited Nome to discuss the program with Charles Nelson of the Bering Straits Regional Housing Authority and other interested persons in the Nome area. They expressed interest, support, and a willingness to participate in the program.

On August 3, 1978, we requested any final recommendations and comments from all of the Regional Housing Authorities and further requested that individuals be identified to receive training as loan originators. That request was followed up on August 15.

On August 18, we went to Barrow with the same intent of soliciting support and participation in the program. The North Slope Burrough Housing Authority expressed continued support.

Throughout this period of time we worked with title insurance and mortgage insurance companies to develop mechanisms for adequate security of the Rural program loans. We also wrote "plain language" Note and Deed of Trust documents in order to help make the mortgage loan more understandable to the ultimate rural borrower.

On September 19, a progress report (attached) was sent to the AHFC Board chairman and all Board members. The prime difficulty was the lack of Housing Authority Personnel available to attend the training session.

A three-day tour of rural communities with representatives of TICOR Mortgage Insurance Co. was conducted on September 26, 27, and 28. The tour was to familiarize them with the condition of the home to be insured as well as with the economic condition in rural areas. (Barrow, Bethel, Marshall, and Kotzebue)

The Program Coordinator attended the meeting of the Association of Alaska Housing Authorities held in Kodiak October 3, 1978. Some of the Housing Authorities had become hesitant to get involved, and others had workload and budget problems that prevented them from sending any of their staff to the proposed training session. This difficulty was expressed in the October 17 progress report the AHFC Board Chairman and all board members. With the assistance of the Aleutian and AVCP Regional Housing Authorities, others were again encouraged to participate. The October 27 meeting of the Association resulted in firm commitments from the AVCP, Aleutian, Bering Straits, and KANA Regional Housing Authorities. We also received commitments for future participation from the Bristol Bay and Tlingit-Haida Housing Authorities.

With these commitments we scheduled and conducted the planned training in Anchorage. From November 27 through December 15, Housing Authority personnel were trained in loan origination, loan processing, loan closing, and loan servicing. Classroom instructions were conducted in the offices of AHFC, and "on the job training" was conducted at the First National Bank of Anchorage, Alaska National Bank of the North and United Bank Alaska. At this point, we felt the Housing Authority personnel were sufficiently trained and equipped to implement the program. On January 15, 1979, the staff of AHFC recommended to the Board of Directors final approval and implementation of the new "Rural Housing Program" along with some other policy changes designed to encourage the availability of AHFC loans in rural areas. Those recommendations were not approved at the February 7th meeting of the Board held in Juneau.

The staff of AHFC desires, and is ready to implement and administer, a sound and effective "Rural Housing Program" as soon as possible.

RURAL HOUSING PROGRAM

The purpose of the proposed rural housing program is to expand the activities of AHFC to permit the financing of homes in rural areas of the State for those borrowers who can afford the cost of homeownership, but for whom financing has been unavailable.

The current AHFC programs can and do meet a portion of the market in rural areas. The proposed rural housing program will increase the scope and availability of home financing. The following represents some of the factors that were considered, as problem areas in the development of a viable, ongoing program.

1). Lack of an existing lender competent and willing to originate and service loans in rural areas.

2). Difficulty in obtaining mortgage insurance, title insurance, and fire insurance, in some cases.

3). Lack of suppliers of new housing.

4). Borrowers income source that is not suitable to the usual monthly payments.

The elements that provide for these factors are:

1). The Regional Housing Authorities will supplement the usual lenders in rural areas. They have provided personnel for specialized training in loan origination, loan processing, loan closing and loan servicing. They possess specialized knowledge of housing in remote areas. They have first hand knowledge of, and regular contact with those who will be borrowers under the program. They are active residents of the areas to be served.

A loan committee representing the Housing Authorities and AHFC will review loan submissions. The committee has provided input for establishing loan criteria and policy and will supervise the seller/servicers.

2). A good deal of consideration was given to the problem of mortgage security. Private mortgage insurance is available in most every case, at a cost comparable to other areas of the State. Title insurance is available in most every case. The major problem is the high cost of the necessary survey. We believe that a marketable title does increase the value of real property substantially so we will allow the cost of the survey to be added to the value. Our loan would then finance a large portion of that cost.

We further believe that adequate fire insurance is critical, particularly in rural areas, not only for the protection of AHFC and its bond holders, but ultimately for the homeowner himself. Until alternate sources of fire insurance are available we see no way to avoid this cost. It should also be noted that the generally higher monthly cost of fire insurance is offset somewhat by the lack of property taxes in most rural areas. Providing for alternative methods of hazard insurance is a political discussion of State and Federal Governments.

3). We believe there is a great potential for cooperation between the Native Regional Corporations and the Regional Housing Authorities in developing reliable suppliers of new housing. There is also the potential for cooperation between the Housing Authorities and existing lenders for interim financing. The readily available long-term financing commitments will, in turn, make construction financing more attractive.

4). The proposed rural housing program allows for payment schedules other than monthly when the income source of the borrower dictates.

We believe that the loan criteria (summary attached) developed in cooperation with the Housing Authorities and others meets a need for unsubsidized residential financing. At the same time the criteria provides for prudent lending practices to adequately protect the Housing Authorities, AHFC, its bond holders, and the potential borrowers.

ALASKA HOUSING FINANCE CORPORATION

P.O. Box 1020, Anchorage, Alaska 99510

TO: All Board Members DATE: January 15, 1979

FROM: J. M. Linton, Executive Director
and James P. Kennedy, Rural Program Coordinator

Subject: Staff Recommendation for "Remote Rural Housing Program"

Only the participating Regional Housing Authorities will originate and service loans under the "Remote Rural Housing Program." They will originate loans in the major "hub" communities as well as the more remote areas, and will benefit from the portfolio mix thus achieved. They will not be able to originate loans for purchase under any of AHFC's existing programs. The Housing Authorities will contribute to a "loan committee" that will review all submissions, develop reliable suppliers of new housing, and will periodically review and make recommendations concerning loan criteria. In addition, the "loan committee" will supervise the Seller/Servicers and will assist in dealing with and correcting default situations.

Existing AHFC Seller/Servicers will continue to originate and service loans under present AHFC programs. They will further benefit as construction lenders with "take-out" commitments processed through the Housing Authorities. It is further recommended that where appropriate, the existing AHFC rural programs be modified to encourage lender's more active participation in remote areas. For example: AHFC will pay ½ of 1% servicing fee to lenders on those loans originated in remote areas.

This recommendation is made for the following reasons:

From the beginning the "Remote Rural Housing Program" was conceived as a special purpose program. A separate and distinct insurance account and funding is required. It is felt that the legislative intent of amendments to Section 11, AS 18.55.997 and Section 7, AS 18.56.090, authorizing the Regional Housing Authorities to make and sell loans to AHFC, and aurhtorizing AHFC to purchase Housing Authority loans, was to establish the Seller/Servicer arrangement under this program.

The Regional Housing Authorities have provided personnel for specialized training. These personnel are residents of the rural areas they will serve. They are knowledgeable of the housing needs and have a first-hand knowledge of, and regular contact with, those who will be borrowers under the program.

Initially, there will be approximately $9 million available to the Housing Authorities. If those funds were allocated among our existing Seller/Servicers as well as the participating Housing Authorities, they would be spread very thinly. It is necessary for the continued success of the program for the Housing Authorities to develop a portfolio of sufficient size to cover their administrative costs. Their only income will be derived from origination and servicing fees of Rural Program loans as they have no deposit base from which to work.

Finally, this recommendation provides a basis for a mutually beneficial cooperative relationship between the Housing Authorities and our existing Seller/Servicers. It will provide our existing Seller/Servicers additional incentive to become more actively involved in the remote, underdeveloped, and blighted areas of the State. It will demonstrate to legislative bodies AHFC's dedication to more vigorous involvement in all rural areas. It will not limit the funds available to the Housing Authorities, and it will increase AHFC's overall portfolio ratio of "rural" to "urban" and "suburban" loans.

SUMMARY OF LOAN CRITERIA

REMOTE RURAL HOUSING PROGRAM

1). Loans eligible for purchase:

a). Loans to finance the purchase of a dwelling designed for the residential use and intended as the principle residence of the borrower(s).

b). Loans to owner/builders which constitute the first permanent financing on a newly constructed residential dwelling, the construction of which was financed by the owner or a lender, provided that the loan to be purchased does not exceed 80% of the appraised value.

2). Basic Criteria for single family dwellings:

Max. Loan Amount	Min. Down Payment	Term	PMI Req.
$90,000	10%	30 yrs.	yes
$75,000	5%	20 yrs.	yes

3). Basic Criteria for duplex loans:

Max. Loan Amount	Min. Down Payment	Term	PMI Req.
$130,000	20%*	30 yrs.	No*

* 10% secondary financing allowable. PMI is required on duplex loans with less than 20% equity contributed by the borrower.

4). Lien requirement: Each mortgage purchased under the Remote "Rural Housing Program" must meet the following critera:

a). Constitute a first lien, subject only to permitted encumbrances, on real estate in fee simple, or on a leasehold having a term necessary to secure the Corporation's interest (not less than 10 years past the term of the mortgage).

b). Be a mortgage loan for completed, owner-occupied residential housing located in a "rural" area as defined in AS 18.55.997 as from time to time amended.

c). Be insured by a policy of title insurance acceptable to the Corporation.

5). Fees:

a). AHFC Loan Commitment Fee is ½ of 1% of the loan amount.

b). Seller/Servicers may charge an origination fee of 1% of the loan amount.

c). AHFC will pay a servicing fee of ½ of 1%.

6). Income Limits: None

7). Interest Rate: No rate will be guaranteed.

FROM: Jay Kennedy
Rural Program Coordinator

Re: Rural Housing Program, Progress Report

1. The following work has been completed:

   a. I was hired as program coordinator effective July 3, 1978.

   b. In coordination with the Association of Alaska Housing Authorities there has been a slight modification of the proposed program. The Association will act as the "Seller/Servicer" per se, with the various regional housing authorities acting as loan originators in their respective areas. This was done with an eye toward more efficiency, stability, and economy in loan servicing, and to avoid unnecessary duplication of effort and staff.

   c. The Program Coordinator has prepared the training program including the necessary study aids, training schedule and publications that will be required. Included in these publications are the following:

      1). A revised Seller/Servicer Guide specifically for the rural program.

      2). Revised "plain language" Note and Deed of Trust forms for use in the rural program.

      3). Appraisal forms, application forms and the numerous verification documents have been modified to better meet the requirements of the rural program.

   d. The various local banks who have volunteered their services for providing "on the job training" for the trainees have confirmed this interest and support.

   e. The AHFC Bond Counsel and Bond underwriters are prepared to issue and sell bonds to the Department of Revenue.

2. The following work is in progress:

   a. The Regional Housing Authorities and the Association of Alaska Housing Authorities are identifying the individuals who will receive training as Loan Originators, Seller/Servicers and individuals who will form the Loan Committee. This needs to be done before a firm date to begin training is set. Training is tentatively scheduled to begin October 16, 1978, and end November 10, 1978.

   b. Representatives of Ticor Mortgage Insurance Company will be touring some rural areas of the state with the Program Coordinator the week of the 25th of September. Mr. Robert Sullivan, an interested member of the banking community, will also accompany that tour.

I will provide you with follow-up information on the results of that tour. I will also provide you with the finalized training schedule and the results of decisions made by agencies other than AHFC. The Rural Housing Program should be fully functional by December 1, 1978.

TAPE # 6 SIDE 1 Sections 600-619; 950-1192

SECOND READING OF SENATE RESOLUTIONS

SENATE CONCURRENT RESOLUTION NO. 12 (approving regulations adopted by the Alaska Coastal Policy Council) was read the second time. SCR 12

Senator Sturgulewski moved and asked unanimous consent that the letter of intent of the Community and Regional Affairs Committee on pages 372-373 of the journal be adopted as the Senate Letter of Intent. Without objection, the letter was adopted and appears as follows:

SENATE LETTER OF INTENT

Testimony received by the Community and Regional Affairs Committee indicated the need for a change in the Alaska Coastal Policy Council's regulations. Specifically:

1) 6 AAC 80.100 (a)(3) timber harvest and timber management activities must be planned so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats. The testimony indicated the need:

following the words "streambanks and shorelines," to delete
the word "prevent," and replace with the word "minimize."

A representative from the Alaska Coastal Policy Council and a representative from the Office of the Coastal Management concurred with the need for this change.

It is the intent of this Committee that the words "minimize adverse impacts" should apply to both fish resources and habitats, and wildlife resources and habitats.

The Committee urges the Alaska Coastal Policy Council to consider and adopt this change at its earliest convenience.

Senator Colletta moved that the Senate adopt SENATE CONCURRENT RESOLUTION NO. 12. Senator Kerttula objected.

SCR 12 The question being: "Shall SENATE CONCURRENT RESOLUTION NO. 12 (approving regulations adopted by the Alaska Coastal Policy Council) pass the Senate?" The roll was taken with the following result:

Yeas:	10	Colletta, Fahrenkamp, Meland, Mulcahy, Rodey, Stimson, Sturgulewski, Summer, Tillion, Ziegler
Nays:	8	Bennett, Bradley, Dankworth, Ferguson, Hackney, Kelly, Kerttula, Ray
Absent:	2	Hohman, Sackett

and so, SENATE CONCURRENT RESOLUTION NO. 12 failed to pass the Senate.

Senator Kerttula gave notice of reconsideration on SENATE CONCURRENT RESOLUTION NO. 12.

UNFINISHED BUSINESS

SCR 7 Senator Kerttula requested that the reconsideration of SENATE CONCURRENT RESOLUTION NO. 7 be taken up at this time.

RECONSIDERATION OF SENATE RESOLUTIONS

SENATE CONCURRENT RESOLUTION NO. 7 was before the Senate at this time on reconsideration.

The question to be reconsidered is: "Shall SENATE CONCURRENT RESOLUTION NO. 7 (annulling a regulation of the Alaska Housing Finance Corporation defining the term "rural" for the purposes of administration of its housing loan program) pass the Senate?" The roll was taken with the following result:

Official Business

Alaska State Legislature

House of Representatives

Committee on

Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811

LETTER OF INTENT
SCR 12

The concept of local control in coastal zone management has been basic to the development of the state's coastal zone management program. A predominant concern of the committee is the functioning of this local control in the unorganized borough.

This letter is intended to condition legislative approval of these regulations on a requirement that the Department of Community and Regional Affairs submit an adequate development plan for the organization of effective, locally-controlled coastal resource districts. Appropriations for the coastal management program will be allocated accordingly. The committee suggests that the Department of Community and Regional Affairs work with the Legislative Council to satisfy this requirement.

While rural communities may not initially want to involve themselves in coastal zone management, it is doubtful they will want to entrust it to others when fully understood. Considering the implications district coastal zone management has for subsistence habitat protection and rehabilitation, one can probably expect strong local participation in district coastal zone management policy making.

The Legislative Council will establish an interim program to monitor the state's coastal resource disticts' community organization. Important to this organization is fair local-level understanding of the phrase "land and water uses of state concern". The energy siting regulations are designed to guide local coastal resource districts to properly regulate such land and water uses of state concern.

In addition, the committee is aware that the proposed standard 6 AAC 80.160 (a) introduces a new element in the coastal management program . Existing public participation regulations (6 AAC 80.020 and 6 AAC 85.130) apply specifically to adoption of district programs and amendments to district programs. In districts which develop district programs containing areas which merit special attention, the public involvement provisions of 6 AAC 85.130 apply. It is the intent of this committee that regulations for public involvement be developed for areas not in districts which are designated as meriting special attention by the Council. Council designation should include evidence of effective and significant opportunity for public participation in the specified "concurrence" and such public involvement process should be specified in the Alaska Coastal Managemnet Plan Guidelines.

Further, it is the intent of the committee that the letter of intent of the Senate Community and Regional Affairs Committee which appears on page 463 of the Senate Journal be approved.

Don Clocksin,Alaska Legal Service

Committee shouldn't feel as it it has a firm obligation to approve the regulations. It should not be rushed into. Committee should review Federal requirements for approval. Clocksin doesn't feel the Alaska Plan complies in two areas:
Sec. 305 (a) (6) Call for "A description of the organizaitonal structure proposed to implement such management program, including the responsibilities and inter-relationships of local, areawide, state, regional, and interstate agencies in the management process".

In this regard, the Alaska CZM Plan soes not have sufficient detail in the organizational structure of the implementation in the unorganized borough.There is no mechanism for implementation of the program in the unorganized borough. Just the direction that the program be handled by the State. There are few guidelines in the unorganized borough re AMSA creations.

Thereis no way to resolve conflicts between state agencies and districts within the unorganized borough.

Sec. 205 (a) (8) Additional provision in the Federal Act calls for "a planning process for energy facilities likely to be located in, or which may significantly affect, the coastal zone, including, but not limited to, a process for anticipating and managing the impacts from such facilities."

Clocksin claims that the Five-year plan developed by the State did not have adequate public imput. There are no adequate procedures for analyzing the impact on the coasts.

Specific problems with the proposed regulations:
6 AAC 80.070 "Major" and "minor" facilities not delineated. (a)
6 AAC 80.070 (b) This wording might be taken to mean that the districts and state agencies "must" locate suitable siting locations for major energy facilities. Clocksin says it was not the intent of the Federal Act to require this.

COMMITTEE ACTION:

TAPE # 5 SIDE 1 Sections 520-525

6 AAC 80.900 (20) "feasible and prudent" definition leaves an "open door" (Ex. A safety feature for an energy facility might be seen as being too costly and this definition could be construed to not require that it be used. Public interest would not necessarily be well served in this case)

6 AAC 80.070 (c)Broad range of items are involved in oil and gas leases. Areas which are speciafically of local concern should not be included as uses of state concern. (Ex. Where drilling waste get dumped, where gravel is taken from, etc.) The local district should have a say in the disposition of these matters which are of a definite local concern.

AS 46.40.210 (6) Questions definition of "uses of state concern" as outlined in this section. This should be subjected to critical public review. A Resolution was drafted by the Council but not adopted regarding this definition.

Clocksin suggests that the Committee pass SCR 12 with a Letter of Intent which would include the following points:

1. A directive that more attention be given the program implementation in the unorganized borough
2. That a mechanism be developed which would resolve conflicts between the local districts and the state. court
3. That there be assurance that the placing of energy facilities not be a requirement for every district which develops a plan
4. That there be a limitation on the definition of the "feasible and prudent" which would recognize "public interest" and safeguard that public interest.
5. That "uses of state concern" definition not be tied to all leasing activities. The local districts should have the control over related leasing activity which is strictly of local concern.
6. Broader questions should be looked at:
   Is there a real planning process for energy facilities?
   Should there be one?
   There should be legislative review of the 5 yr. proposed leasing program and the extent to which it coincides with CZM and generally, how it relates to the whole CZM program.

Fran Ulmer, Co-Chairman of the Ak. Coastal Policy Council
In response to the points made by Clocksin (listed above)

1. This is up to the Legislature. If they want to create a mandatory borough, it is up to them.
2. The Act is silent in conflict situations which go beyond the authority of the Council.
3. Act says that there are a number of uses the districts must find place for. The Federal Gov't has not indicated that this requirement goes too far.
4. "Feasible and prudent" definition is a balancing act. Product of the bast thinking the Council could come up.
5. "Use of State Concern" definition is from the CZMAct adopted by the legislature in 1977.

Allington, Co-Chair of Ak. Coastal Policy Council

If must be made clear that if the regs. don't pass, there will be no more Federal funds made available.

1. Re lack of specifics in the unorganized borough handling. Planning is done by the Locals and implemented by the State. Intent of the legislature was to not add another bureaucratic layer.

3. This wording was the result of the decision that the local district rather than the state identify sites for energy siting.

4. The point of the "feasible and prudent" definition was to get balance.

The resolution drafted by the Council was intended a a guideline in relation to "uses of state concern".

Walsh

Federal government has indicated that it will approve the plan.

Parr--Questioning of some of the funding proposed under the CEIP. Police Adacemy Design-Community Bldg. Initial funding should not be appropriated for extraneous activities.

Committee Action -- There will be further discussion of SCR 12

MEMBERS PRESENT:

Parker, Carney, Parr, Metcalfe, O'Connell, Branson, Zharoff

MEMBERS ABSENT:

None

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Roger Allington, Co-Chairman of theAlaska Coastal Policy Council
Related background of CZM Plan adoption. Refers to the two "carrots" dangled by the Federal government--money and federal consistency provisions.

Fran Ulmer, Co-Chairman of the Ak. Coastal Policy Council
Reviewed membership of the Council. Mentioned importance of CZM in relation to massive oil leasing schedule proposed by Dept. of INterior. $5 MIllion in Planning monies have been expended by the State. (rather are expected to be received)

Murray Walsh, Office of CZM
Four grants have been received by the State at $1.4 Million each. $250,000 have been appropriated by the State general fund.

Larry Kimball, C&RA
Section 308 CEIP monies also will be received by the state. These funds include construction and design monies as well as planning money. There are grants as well as loans in this program.
Council has overriding power if a local plan restricts a use of state concern. If it is "feasible and prudent" the local gov't has control.

Mark Stephens, Cept. of C&RA
Discusses the various Coastal Resource Districts. Refers to differences in the various plans which have been prepared around the state. N.W. Ak. REAA has planned an election April 3;Yukon Kuskakwim on May 15. Seven member boards will be elected in these areas.
CZM is meant to be a "balanced management program". It is a "process" rather than a plan which is being approved.

TAPE #5 SIDE 1 Sections 1-480

COASTAL ZONE MANAGEMENT WORKSHOP

2/26/79

Guest Speaker: Clifton Curtis, Center for Law and Social Policy, Washington, D.C.

Original CZM legislation passed in 1972 on the Federal level. Attributed consciousness raising during '60's as being partially responsible. CZM as grant-in-aid program in '72..Amended in '76..General policies speak to development as well as protection so there is a basic conflict in policy statement. '74 Alaska begins receiving money. Sec. 307 Consistency provisons. Neutral planning process--too little guidance from Feds. according to Curtis.
1979 - 13 states have plans
'79-- 8 more states will be approving plans
Mentioned Cal. law suit..Curtis says concern for national interest not happening. This concern has been focused primarily on energy siting impacts and recreation uses, access to beaches, and protection of fragile areas have not been given as much consideration as areas for national conern. Cal. case got to merits of issue.Stated that there was adequate consideration given to energy interest. That there is no mandate which requires frim siting decisions.
Look at needs and balance approach.
Don't be too specific in regs.
Curtis sees the following problems in CZM plan:
1. Lack of specificity--ambiguite in legislation. Should define areas of national conern
2.Process oriented so if good programs don't result you have just increased bueauracy.
3. Annual reveiw requirement. Little guidance for giving $ .Good programs should be rewarded. Incentives should be included in Federal legislation.

Energy siting--hightest and best use. Look for possible relocation inland.
O.C.S. activity--83% of nation's total in Ak.
Maximum safeguards; should require use of best tachnology;more information on likely effect on environment.
*Oversight function of legislature is important one.
Imbalance in ferms of pressure re decisons

**Affirmative approval requirement may be appropriate now in theoretical stage---this requirement later may delay putting plans into effect.
In some areas local zoning ordinances may work but you run a great risk if you don't have adequate ordinances. Veto approach over plans might be a way to go.

Management plan better for organized boroughs while not so in unorganized borough. More of an effort money and staff-wise needed to assist and advise people so they can be in a better positon to act.

"Uses of state concern" development of these at heart of matter. If there is no "feasible alternative" then it may be located on the coast. Curtis says this is an indefinite phrase.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 21, 1979

SUBJECT: Authority to implement and enforce coastal management programs by service areas in the unorganized borough: (Work Order No. 6365)

TO: Representative Bill Parker

FROM: John B. Chenoweth, Legislative Counsel

I have tried to draft the enclosed bill to meet your directive that authority to implement (as well as to plan) coastal management programs in the unorganized borough be granted to the coastal resource service areas which may be formed in the unorganized borough.

You should know, I think, that the premise underlying the statement in Mr. Cohen's letter, the apparent source of this request, is partially in error. When the coastal management legislation took shape in 1977, some thought went into the relationship between existing cities of the unorganized borough and the service areas which might be formed there. The consensus, now part of the legislation, was to provide a range of options, allowing individual cities that were willing and able to initiate and complete the planning process to do so, or to authorize service areas to undertake the planning process, or to rely on existing state agencies where there was no interest expressed at the community or regional level. As to implementation, it was clear that, in the unorganized borough, because cities (first or second class) had authority to exercise planning, zoning, and other powers, rather than extend planning and zoning authority to service areas (where there was really no push to extend the authority), existing law would be left unchanged: either a city would implement or state agencies would act. If people were really worked up enough on a regional basis to want to become involved in implementation, the first or second class borough option remained available to them.

Mr. Cohen states: "In the unorganized borough, this power [i.e., responsibility for implementation of coastal management programs] is taken away from the local people and placed with state agencies." He is not correct. As a matter of law, the exercise of zoning and other controls in the unorganized borough outside of cities has never rested with anyone other than the state agencies. (AS 40.15.070 - 40.15.075; AS 44.47.050 (8) and (9)).

The 1975 Legislature mandated unorganized borough control of education; the 1977 legislation authorized a role for the unorganized borough in coastal resource planning. The 1979 Legislature is asked to extend authority of service areas to exercise zoning and other controls in the coastal zone. Frustration prompts me to ask how, if all these are granted, withholding only the authority and responsibility to levy and collect taxes, this structure is any different than the first or second class borough system now provided in general law?

SENATE CONCURRENT RESOLUTION NO. 12

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Approving regulations adopted by the
Alaska Coastal Policy Council.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Chapter 84, Session Laws of Alaska 1977, established the Alaska Coastal Policy Council and charged the council with the responsibility of adopting regulations establishing guidelines and standards for the development of a coastal management program; and

WHEREAS the Alaska Coastal Policy Council has adopted guidelines and standards in 6 AAC 80 and 6 AAC 85 for use by state agencies in making land and water use decisions and for use by municipalities and coastal resource service areas in the preparation and development of district and coastal resource service areas coastal management programs; and

WHEREAS the guidelines and standards adopted by the council on March 31, 1978 have been approved by the legislature during the Second Session of the Tenth Legislature with selective deletions and letters of intent calling for further attention to certain matters in the guidelines and standards; and

WHEREAS the council adopted amendments to the guidelines and standards on December 15, 1978, in response to the request of the legislature and other parties; and

WHEREAS the amendments to the guidelines and standards approved and adopted by the Alaska Coastal Policy Council are generally consistent with the objectives for the state coastal management program identified in AS 46.-40.020; and

WHEREAS AS 46.40.080 requires approval of amendments to the state coastal management program either by adoption of a concurrent resolution by a

majority of the members of each house of the legislature or by majority vote of the members of each house at the time the houses are convened at a joint legislative session to confirm executive appointments submitted by the governor; and

WHEREAS, in accordance with the statute, the Alaska Coastal Policy Council has submitted its amendments to the guidelines and standards for legislative approval;

BE IT RESOLVED, that in accordance with AS 46.40.080, the Alaska State Legislature approves the amendments to 6 AAC 80 and 6 AAC 85 adopted by the Alaska Coastal Policy Council on December 15, 1978.

SECOND READING OF SENATE RESOLUTIONS

SENATE CONCURRENT RESOLUTION NO. 12 (approving regulations adopted by the Alaska Coastal Policy Council) was read the second time. SCR 12

Senator Sturgulewski moved and asked unanimous consent that the letter of intent of the Community and Regional Affairs Committee on pages 372-373 of the journal be adopted as the Senate Letter of Intent. Without objection, the letter was adopted and appears as follows:

SENATE LETTER OF INTENT

Testimony received by the Community and Regional Affairs Committee indicated the need for a change in the Alaska Coastal Policy Council's regulations. Specifically:

1) 6 AAC 80.100 (a)(3) timber harvest and timber management activities must be planned so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats. The testimony indicated the need:

following the words "streambanks and shorelines," to delete
the word "prevent," and replace with the word "minimize."

A representative from the Alaska Coastal Policy Council and a representative from the Office of the Coastal Management concurred with the need for this change.

It is the intent of this Committee that the words "minimize adverse impacts" should apply to both fish resources and habitats, and wildlife resources and habitats.

The Committee urges the Alaska Coastal Policy Council to consider and adopt this change at its earliest convenience.

Senator Colletta moved that the Senate adopt SENATE CONCURRENT RESOLUTION NO. 12. Senator Kerttula objected.

April 13, 1979

The Honorable Bill Parker, Chairman
Committee on Community & Regional Affairs
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Bill Chairman:

I want to call your attention to the Coastal Energy Impact Program (CEIP) awards just announced.

This less publicized aspect of the total Coastal Zone Management Program has provided $2.5 million in State and local planning grants to date. The announcement of $1.5 million in additional local grants in the enclosed press release brings the benefits of this program to $4.0 million.

In addition, the program offers another $65 million in low interest loans to provide facilities which could be required by coastal communities because of petroleum development projects.

If I or members of my staff administering this program can provide further information, please let us know.

Sincerely,

Lee

ALASKAN COMMUNITIES RECEIVE FEDERAL FUNDS
April 11, 1979
#67

Municipal planning and design projects totaling $1.5 milion have been recommended for funding under the U.S. Department of Commerce Coastal Energy Impact Program, Governor Jay Hammond announced today. The State has recommended funding for projects in nine communities.

Although the proposed grants are subject to review by the Department of Commerce, federal officials have accepted State recommendations in the past, Governor Hammond added.

The Coastal Energy Impact Program, administered by the State Department of Community and Regional Affairs, requires the federal government to assume some of the responsibility for consequences to local communities for energy development projects undertaken to meet national needs. Grants and loans are made available to help plan for the consequences of coastal energy development; to provide front-end financing for municipal facilities needed when energy projects affect coastal cities; and to plan for facilities to guard against losses to coastal environmental and recreational resources.

"With eight outer continental shelf lease sales off Alaskan coasts proposed by the Department of the Interior over the next five years, many communities could be affected," Governor Hammond said.

The largest project in the group to be funded is $1 million for preliminary engineering of water source development in Eagle River Valley in Anchorage. Anchorage officials have said early development of additional water supplies must be addressed there as a result of oil exploration administrative and support personnel being based in Anchorage.

Several projects in Kenai Peninsula communities are to receive funds. They are funding for the development of preliminary plans for new municipal office buildings in Homer, $50,000; in Kenai, $50,000; and in Soldotna, $50,000. In addition, Soldotna, as the seat of borough government and as a major residential area for oil industry workers, is to receive $115,000 for planning water system expansion.

Two communities will also receive funds for large-scale topographic mapping for further planning of municipal utilities and drainage networks. Kenai will receive $65,000 and Seldovia will receive $32,000.

Seward, anticipating major harbor activity in support of offshore oil exploration, is to receive $91,000 to fund

preliminary planning for hydroelectric power development.

The Kenai Peninsula Borough is to receive $68,000 to prepare a long-range solid waste disposal plan.

Cordova and Skagway, althrough not affected by OCS development, are to receive planning grants under another section of the federal energy impact law which provides partial funding for coping with energy-related impacts affecting the coastal zone.

The Cordova grant of $24,000, matched by $6,000 in local monies, will fund preliminary engineering for additional water supply which will be needed when Coast Guard personnel and their families arrive to man a new helicopter base in that city.

A matching grant to the city of Skagway is to prepare a development strategy to guide the city in managing substantial population growth, due to workers handling ocean freight destined for the proposed gas pipeline construction project in Canada.

Alaska State Legislature

House of Representatives

Committee on

Community & Regional Affairs

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

LEITER OF INTENT
SCR 12

The concept of local control in coastal zone management has been basic to the development of the state's coastal zone management program. A predominant concern of the committee is the functioning of this local control in the unorganized borough.

This letter is intended to condition legislative approval of these regulations on a requirement that the Department of Community and Regional Affairs submit an adequate development plan for the organization of effective, locally-controlled coastal resource districts. Appropriations for the coastal management program will be allocated accordingly. The committee suggests that the Department of Community and Regional Affairs work with the Legislative Council to satisfy this requirement.

While rural communities may not initially want to involve themselves in coastal zone management, it is doubtful they will want to entrust it to others when fully understood. Considering the implications district coastal zone management has for subsistence habitat protection and rehabilitation, one can probably expect strong local participation in district coastal zone management policy making.

The Legislative Counci will establish an interim program to monitor the state's coastal resource disticts' community organization. Important to this organization is fair local-level understanding of the phrase "land and water uses of state concern". The energy siting regulations are designed to guide local coastal resource districts to properly regulate such land and water uses of state concern.

In addition, the committee is aware that the proposed standard 6 AAC 80.160 (a) introduces a new element in the coastal management program . Existing public participation regulations (6 AAC 80.020 and 6 AAC 85.130) apply specifically to adoption of district programs and amendments to district programs. In districts which develop district programs containing areas which merit special attention, the public involvement provisions of 6 AAC 85.130 apply. It is the intent of this committee that regulations for public involvement be developed for areas not in districts which are designated as meriting special attention by the Council. Council designation should include evidence of effective and significant opportunity for public participation in the specified "concurrence" and such public involvement process should be specified in the Alaska Coastal Managemnet Plan Guidelines.

Further, it is the intent of the committee that the letter of intent of the Senate Community and Regional Affairs Committee which appears on page 463 of the Senate Journal be approved.

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER / *POUCH B—JUNEAU 99801*

March 27, 1979

The Honorable Bill Parker, Chairman
Committee on Community & Regional Affairs
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Bill Chairman:

In response to a request by Representative Parr, I have asked our staff member administering the Coastal Energy Impact Program (CEIP) to project possible funding of CEIP in Alaska over the next five to six years.

First, a word of explanation about the program: The bulk of funding for planning (or possibly for construction) comes from the formula grants section of the program (color red on the attached Figure 1). Formula grants are allocated among states based on activity during the prior fiscal year in the areas of: 1) Outer Continental Shelf (OCS) acreage leased (50%), 2) oil produced in the OCS off that state (25%) and 3) oil first landed on that state's shores (25%).

Barring an immediate major find in the Lower Cook Inlet with accompanying rapid development, we do not believe that the oil produced or oil first landed factors will come into play in determining the Alaska CEIP allocation in the next five years. For purposes of "guestimating," however, we have assumed low end-of-the-range allocations during the first four years and the high end-of-the-range allocation during the final year. Put another way, the Alaska entitlement will be based only on acreage leased through FY '83, but will rise somewhat in FY '84 as oil production begins.

Other assumptions are:

1. Federal appropriations over the five year period will remain constant*, at the level of the FY '80 budget request:

Formula Grants	$27,750,000 (same as FY '79--red on Figure 1)
Planning Grants	3,500,000 (green on Figure 1)
Environmental/Recreational	-0- (yellow on Figure 1)

*Although the Office of Coastal Zone Management-CEIP, is considering requesting a doubling of formula grants in FY '81, an official there feels that such a request is not likely. This official has written an article for Practicing Planner (December 1978), in which he points out that "the anticipated energy boom town will be the exception," and that "few areas will be impacted by tremendous...growth and...increased demand for public facilities..."

2. Congress will not pass an amendment to the Outer Continental Shelf Lands Act Amendments of 1978 to provide Alaska with a minimum of two percent of the total national CEIP formula grant appropriations each year. (The Department is working with the Congressional Delegation in an effort to insure that Alaska would receive at least the 2% minimum in years following years in which there is no OCS acreage leased.)

3. During the entitlement years, Alaska OCS acreage leased will account for between 20 and 40 percent of the total acreage leased nationally in any one year (Lower Cook Inlet sale in October 1977 covered 42% of acreage leased nationally in FY '78).

4. Lease sales shown on the Department of Interior March 1979 Planning Schedule will be held; thus, there will be a sale off Alaska in FY '80 (Beaufort Sea, Dec., '79), three sales in FY '81, none in FY '82, two in FY '83 and one in FY '84.

Under the above assumptions, formula grant funds, useable for planning or for construction, would be available as follows:

FY '79	$4,234,000	
FY '80	0	
FY '81	$2.8 million	(20% x 50% x $27.8 million) (FY '81 allocation dependent on questionable lease sale in FY '80.)
FY '82	2.8 million	
FY '83	0	
FY '84	5.5 million	(40% x 50% x 27.8 million)

FY '80-FY '84 = $11 million [Probable Range: $10 million to $25 million]

Although formula grants (red on Figure 1) may be used for construction, the amounts are so small that we have agreed with municipal officials that Alaska allocations should be limited to planning and design. A single grant for construction in even one of the smaller municipalities could require all or most of our available allocation of formula grant funds.

In addition to formula grants, it probably is reasonable to assume award of between $300,000 and $350,000 for each of the five years for planning grants (80% federal--green on Figure 1).

Please let me know if I can provide additional information.

Sincerely.

lee

Lee McAnerney
Commissioner

SECOND READING OF SENATE RESOLUTIONS

SENATE CONCURRENT RESOLUTION NO. 12 (approving regulations adopted by the Alaska Coastal Policy Council) was read the second time. SCR 12

Senator Sturgulewski moved and asked unanimous consent that the letter of intent of the Community and Regional Affairs Committee on pages 372-373 of the journal be adopted as the Senate Letter of Intent. Without objection, the letter was adopted and appears as follows:

SENATE LETTER OF INTENT

Testimony received by the Community and Regional Affairs Committee indicated the need for a change in the Alaska Coastal Policy Council's regulations. Specifically:

1) 6 AAC 80.100 (a)(3) timber harvest and timber management activities must be planned so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats. The testimony indicated the need:

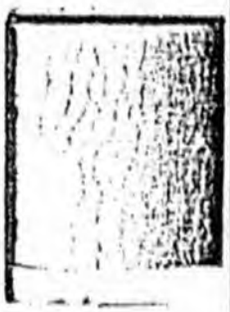
following the words "streambanks and shorelines," to delete
the word "prevent," and replace with the word "minimize."

A representative from the Alaska Coastal Policy Council and a representative from the Office of the Coastal Management concurred with the need for this change.

It is the intent of this Committee that the words "minimize adverse impacts" should apply to both fish resources and habitats, and wildlife resources and habitats.

The Committee urges the Alaska Coastal Policy Council to consider and adopt this change at its earliest convenience.

Senator Colletta moved that the Senate adopt SENATE CONCURRENT RESOLUTION NO. 12. Senator Kerttula objected.



STATE OF ALASKA

COASTAL POLICY COUNCIL

January 25, 1979

LOCAL MEMBERS:
Roger Allington, Northern Southeast, Co-Chairman
Roger Fagerstrom, Bering Straits
Donald Gilman, Lower Cook Inlet
Eben Hopson, Northwest
Malcolm "Pete" Isleib, Prince William Sound
Stan Paukan, Southwest
Robert Sanderson, Southern Southeast
Lidia Selkregg, Upper Cook Inlet
Betty Wallin, Kodiak-Aleutians

STATE MEMBERS:
Frances Ulmer, Director of Policy Development & Planning, Co-chairwoman
Donald Harris, Commissioner of Transportation & Public Facilities
Phillip Hubbard, Commissioner of Commerce & Economic Development
Robert LeResche, Commissioner of Natural Resources
Lee McAnerney, Commissioner of Community & Regional Affairs
Ernst Mueller Commissioner of Environmental Conservation
Ronald Skoog, Commissioner of Fish & Game

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Gardiner:

On behalf of the Alaska Coastal Policy Council, and as required by law, we respectfully submit that portion of the Alaska Coastal Management Program adopted during 1978. We also request that you initiate legislative review and approval of this portion of the program.

Section 44.19.893(4) of the Alaska Coastal Management Act requires the Council to "...submit annually to the legislature, not later than the 10th day of each regular session, the portion of the coastal management program approved or amended by the council during the preceding year..."

As you also know, Section 46.40.080. of the Act provides that:

> The Alaska coastal management program adopted by the council, and any additions, revisions, or amendments of the program, take effect upon adoption of a concurrent resolution by a majority of the members of each house of the legislature or by a vote of the majority of the members of each house at the time the houses are convened in joint session to confirm executive appointments submitted by the governor.

In a legal opinion issued last spring, the Attorney General defined the "coastal management program" as that phrase is used in the foregoing citations, to include all regulations adopted by the Council, and all local government coastal programs mandated by Section 46.40.030. of the Act.

ALASKA
COASTAL MANAGEMENT PROGRAM

The attached portion of the program consists of a set of amendments to the ACMP Guidelines and Standards adopted by the Council in December of 1978.

The original Guidelines and Standards were prepared during late 1977 and early 1978 and submitted to the Legislature in April of 1978. (This late submittal was authorized by SB 388 which amended the Act to allow a one-time special submittal date for the originial Guidelines and Standards.) In June of 1978 the original Guidelines and Standards were approved by the Legislature and went into effect.

Since the last session, however, a number of requests were made to amend the Guidelines and Standards including some requests by the Legislature itself through letters of intent. In Section 80.010(c) of the original Guidelines and Standards, the Council bound itself to review these regulations periodically, and so, in the fall of 1978, the Council re-examined the regulations in light of various requests and suggestions and adopted the attached amendments.

We have followed the requirements of the Administrative Procedures Act in adopting these regulations and the Attorney General has reviewed and approved these amendments.

In a few days you will also receive the Council's Annual Report which describes the activities of the Council and ACMP as a whole. That report will repeat this submission and request for approval of these amendments. Further, the Annual Report will contain a number of reference items, such as the Alaska Coastal Management Act of 1977, and the original Guidelines and Standards, and will be a convenient reference source for the Legislature as it considers the requests of the Council.

We thank you for your consideration of these requests. We are at your disposal for presentations and discussions on these amendments to the Guidelines and Standards and any other matters related to ACMP. Please call Murray Walsh at the Office of Coastal Management (465-3540) to arrange for our participation if you or other members of the Legislature would so desire.

Sincerely,

Frances A. Ulmer
Co-Chairman

Roger Allington
Co-Chairman

Enclosures

6 AAC 80.040(b), COASTAL DEVELOPMENT, is amended to read:

(b) The placement of structures and the discharge of dredged or fill material into coastal water must, at a minimum, comply with the standards contained in Parts 320-323, Title 33, Code of Federal Regulations, (Vol. 42 of the Federal Register, pp. 37133--47 (July 19, 1977)).
(Eff. 7/18/78, Reg. 67; am. / /, Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.060, RECREATION, is amended by adding a new subsection to read:

(b) Districts and state agencies shall give high priority to maintaining and, where appropriate, increasing public access to coastal water. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.070, ENERGY FACILITIES, is amended to read:

(a) Sites suitable for the development of major energy facilities must be identified by districts and the state in cooperation with districts.

(b) The siting and approval of major energy facilities by districts and state agencies must be based, to the extent feasible and prudent, on the following standards:

(1) site facilities so as to minimize adverse environmental and social effects while satisfying industrial requirements;

(2) site facilities so as to be compatible with existing and subsequent adjacent uses and projected community needs;

(3) consolidate facilities;

(4) consider the concurrent use of facilities for public or economic reasons;

(5) cooperate with landowners, developers, and federal agencies in the development of facilities;

(6) select sites with sufficient acreage to allow for reasonable expansion of facilities;

(7) site facilities where existing infrastructure, including roads, docks, and airstrips, is capable of satisfying industrial requirements;

(8) select harbors and shipping routes with least exposure to

reefs, shoals, drift ice, and other obstructions;

(9) encourage the use of vessel traffic control and collision avoidance systems;

(10) select sites where development will require minimal site clearing, dredging and construction in productive habitats;

(11) site facilities so as to minimize the probability, along shipping routes, of spills or other forms of contamination which would affect fishing grounds, spawning grounds, and other biologically productive or vulnerable habitats, including marine mammal rookeries and hauling out grounds and waterfowl nesting areas;

(12) site facilities so that the design and construction of those facilities and support infrastructures in coastal areas of Alaska will allow for the free passage and movement of fish and wildlife with due consideration for historic migratory patterns and so that areas of particular scenic, recreational, environmental, or cultural value will be protected;

(13) site facilities in areas of least biological productivity, diversity, and vulnerability and where effluents and spills can be controlled or contained;

(14) site facilities where winds and air currents disperse airborne emissions which cannot be captured before escape into the atmosphere;

(15) select sites in areas which are designated for industrial purposes and where industrial traffic is minimized through population centers; and

(16) select sites where vessel movements will not result in overcrowded harbors or interfere with fishing operations and equipment.

(c) Districts shall consider that the uses authorized by the issuance of state and federal leases for mineral and petroleum resource extraction are uses of state concern. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.080(a), TRANSPORTATION AND UTILITIES, is amended to read:

(a) Transportation and utility routes and facilities in the coastal area must be sited, designed, and constructed so as to be compatible with district programs. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.100, TIMBER HARVEST AND PROCESSING, is amended to read:

(a) Commercial timber harvest activities in the coastal area must be conducted so as to meet the following standards:

(1) the location of facilities and the layout of logging systems must be sited so as to minimize adverse environmental impacts;

(2) free passage and movement of fish in coastal water must be assured; and

(3) timber harvest and timber management activities must be planned so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats.

(b) Commercial timber transport, storage, and processing in the coastal area must be conducted so as to meet the following standards:

(1) onshore storage of logs must be encouraged where compatible with the objectives of the Alaska Coastal Management Program;

(2) sites for in-water dumping and storage of logs must be selected and these activities conducted so as to minimize adverse effects

on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) roads for log transport and harvest area access must be planned, designed, and constructed so as to minimize mass wasting, erosion, sedimentation, and interference with drainage, and must be adequately maintained until they are returned to their pre-road natural drainage patters (put-to-bed); and

(4) stream crossings, including bridges and culverts, must be kept to a minimum number, designed to withstand seasonal high water and flooding, and must provide for free passage and movement of fish. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.110(a), MINING AND MINERAL PROCESSING, is amendend to read:

(a) Mining and mineral processing in the coastal area must be regulated, designed, and conducted so as to be compatible with the standards contained in this chapter, adjacent uses and activities, statewide and national needs, and district programs. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.160(a), AREAS WHICH MERIT SPECIAL ATTENTION, is amended to read:

(a) Any person may recommend to a district or to the council areas to be designated as areas which merit special attention. Districts shall designate in district programs areas which merit special attention. Areas which are not in districts and which merit special attention shall be designated by the council with the concurrence of appropriate state agencies, municipalities, and villages affected by the designation. Designations must include the following information:

(1) the basis or bases for designation under AS 46.40.210(1) or (b) of this section;

(2) a map showing the geographical location, surface area and, where appropriate, bathymetry of the area;

(3) a description of the area which includes dominant physical and biological features;

(4) the existing ownership, jurisdiction, and management status of the area, including existing uses and activities;

(5) the existing ownership, jurisdiction, and management status of adjacent shoreland and sea areas, including existing uses and activities;

(6) present and anticipated conflicts among uses and activities within or adjacent to the area, if any; and

(7) a proposed management scheme, consisting of the following:

(A) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to land and water within the area;

(B) a summary or statement of the policies which will be applied in managing the area; and

(C) an identification of the authority which will be used to implement the proposed management scheme. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.900, DEFINITIONS, is amended by adding new paragraphs to read:

6 AAC 80.900, DEFINITIONS. Unless the context indicates otherwise, in this chapter

(20) "feasible and prudent" means consistent with sound engineering practice and not causing environmental, social, or economic problems that outweigh the public benefit to be derived from compliance with the standard which is modified by the term "feasible and prudent;

(21) "including" means including but not limited to;

(22) "major energy facility" includes marine service bases and storage depots, pipelines and rights-of-way, drilling rigs and platforms, petroleum or coal separation, treatment, or storage facilities, liquid natural gas plants and terminals, oil terminals and other port development for the transfer of energy products, petrochemical plants, refineries and associated facilities, hydroelectric projects, other electric generating plants, transmission lines, uranium enrichment or nuclear fuel processing facilities, and geothermal facilities; "major energy facility" means a development of more than local concern carried out in, or in close proximity to, the coastal area, which meets one or more of the following criteria:

(1) a facility required to support energy operations for exploration or production purposes;

(2) a facility used to produce, convert, process, or store energy resources or marketable products;

(3) a facility used to transfer, transport, import, or export energy resources or marketable products;

(4) a facility used for in state energy use; or

(5) a facility used primarily for the manufacture, production, or assembly of equipment, machinery, products, or devices which are involved in any activity described in (1) - (4) of this paragraph;

6 AAC 80.900(9), is amended to read:

(9) "geophysical hazard areas" means those areas which present a threat to life or property from geophysical or geological hazards, including flooding, tsunami run-up, storm surge run-up, landslides, snowslides, faults, ice hazards, erosion, and littoral beach process; (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.040(a), BOUNDARIES, is amended to read:

(a) Each district must include a map of the boundaries of the coastal area within the district subject to the district program. Boundaries must enclose those lands which would reasonably be included in the coastal area subject to the district program if they were not subject to the exclusive jurisdiction of the federal government. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.130(b), PUBLIC INVOLVEMENT, is amended to read:

(b) At least 60 days before giving conceptual approval to the district program or significant amendment to the district program, the district shall give written notice to the council and any person who has requested notice in writing, as well as public notice of the proposed action by conspicuous advertisement in a newspaper of general circulation within the district. In addition, notice must be given by radio and by posting in villages and municipalities within the district. The notice must specify the time and place of a public hearing on the proposed action and the availability for review of the proposed district program document or significant amendment to the district program. The public hearing under this subsection may be held not sooner than 30 days after notice is given. At the public hearing, each person must be given

the opportunity to present statements, arguments, or contentions, orally or in writing. Districts shall insure that, where appropriate, translation into the appropriate Native language(s) is provided. The district shall consider all relevant matter presented to it. A written transcript or electronic recording of the public hearing must be submitted to the council. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.150, COUNCIL REVIEW, is amended to read:

(a) (((No changes.)))

(b) Within 30 days after submission of the district program or amendment under (a) of this section, the Office of Coastal Management shall issue its recommendation. The recommendation may be based, in whole or in part, on matters not submitted by the district under (a) of this section. Any matters so used must be identified in the recommendation and placed in the record file under (c) of this section. The recommendation must contain findings and conclusions based on this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, and AS 46.40.070. The recommendation must be served on the district, the council, all persons who testified or submitted timely written statements at the public hearing held under sec. 130(b) of this chapter, and all persons who have requested the recommendation in writing. Broad public notice of the recommendation must be given.

(c) (((No changes.)))

(d) Within 30 days after service of the recommendation, any person served with the recommendation may serve on the council comments on the recommendation. Within 30 days after public notice of the recommendation, any other person may serve on the council comments on the recommendation. Within 10 days after the deadline for serving comments on the council under this subsection, the Office of Coastal Management may submit additional matter to the council in response to the comments. All comments served and all additional matter submitted under this subsection will be placed in the record file. The Office of Coastal Management shall respond to all comments within 30 days of receipt.

(e) (((No changes.)))

(f) If the council's decision under (e) of this section disapproves, in whole or in part, the district program, the decision will specify the date and location for the initial mediation session under AS 46.40.-060(b). Mediation sessions will be held with due regard for the convenience of the participants. Any person may attend mediation sessions. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

REPORTS OF STANDING COMMITTEES

SCR 2 The State Affairs Committee has had SENATE CONCURRENT RESOLUTION NO. 2 (relating to the employment of persons in permanent part-time positions in state government) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Eliason, Fuller, Gardiner and Martin.

SCR 2 was referred to the Rules Committee for placement on the calendar.

CS SCR 11am The State Affairs Committee has had COMMITTEE SUBSTITUTE FOR SENATE CONCURRENT RESOLUTION NO. 11 amended (relating to the hazardous condition of the Muldoon and Fort Richardson cloverleafs on the Glenn Highway due to lack of adequate guardrails) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Eliason, Fuller, Gardiner and Martin.

CSSCR 11am was referred to the Rules Committee for placement on the calendar.

SCR 12 The Community and Regional Affairs Committee has had SENATE CONCURRENT RESOLUTION NO. 12 (approving regulations adopted by the Alaska Coastal Policy Council) under consideration and a majority of the committee reports it back with individual recommendations and attaches a letter of intent. Parker (Chairman), Branson and Parr recommend do pass. Carney and Zharoff have no recommendation.

SCR 12 was referred to the Rules Committee for placement on the calendar.

The Community and Regional Affairs Committee's letter of intent on SCR 12 appears as follows:

LETTER OF INTENT
SCR 12

The concept of local control in coastal zone management has been basic to the development of the state's coastal zone management program. A predominant concern of the committee is the functioning of this local control in the unorganized borough.

This letter is intended to condition legislative approval of these regulations on a requirement that the Department of Community and Regional Affairs submit an adequate development plan for the organization of effective, locally-controlled coastal resource districts. Appropriations for the coastal management program will be allocated accordingly. The committee suggests that the Department of Community and Regional Affairs work with the Legislative Council to satisfy this requirement.

SCR 17

While rural communities may not initially want to involve themselves in coastal zone management, it is doubtful they will want to entrust it to others when fully understood. Considering the implications district coastal zone management has for subsistence habitat protection and rehabilitation, one can probably expect strong local participation in district coastal zone management policy making.

The legislative Council will establish an interim program to monitor the state's coastal resource disticts' community organization. Important to this organization is fair local-level understanding of the phrase "land and water uses of state concern". The energy siting regulations are designed to guide local coastal resource districts to properly regulate such land and water uses of state concern.

In addition, the committee is aware that the proposed standard 6 AAC 80.160 (a) introduces a new element in the coastal management program . Existing public participation regulations (6 AAC 80.020 and 6 AAC 85.130) apply specifically to adoption of district programs and amendments to district programs. In districts which develop district programs containing areas which merit special attention, the public involvement provisions of 6 AAC 85.130 apply. It is the intent of this committee that regulations for public involvement be developed for areas not in districts which are designated as meriting special attention by the Council. Council designation should include evidence of effect ve and significant opportunity for public participation in the specified "concurrence" and such public involvement process should be specified in the Alaska Coastal Managemnet Plan Guidelines.

Further, it is the intent of the committee that the letter of intent of the Senate Community and Regional Affairs Committee which appears on page 463 of the Senate Journal be approved.

The Commerce Committee has had SENATE BILL NO. 125 (making a special appropriation for operating expenses of radio station KYUK, Bethel, and lapsing a portion of an appropriation for a capital expenditure for that station; effective date) under consideration and a majority of the committee reports it back with individual recommendations. Brown (Chairman), Munson and Bettisworth recommend do pass. Malone has no recommendation. Randolph recommends do not pass. SB 125

SB 125 was referred to the Finance Committee.

The Community and Regional Affairs Committee has had COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 134 (making a special appropriation to the Department of Community and Regional Affairs for grants to municipalities and other recipients in place of entitlements under the program of state aid to local governments; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Parker (Chairman), Branson, Carney, Parr and Zharoff. CSSB 134

CSSB 134 was referred to the Finance Committee.

Juneau, Alaska 99811

Re: CCS SCS CSHB 342 (coastal zone management)
Our File: J-88-066-77

Dear Governor Hammond:

At your request, we have reviewed CCS SCS CSHB 342 relating to the management of the coastal resources of the state. Although the bill contains some problems, we know of no reason, legal or otherwise, why it should be vetoed. A general discussion follows.

The proposed Act is the result of two and a half years of administration effort to obtain this legislation, the result of successful public education that has diminished public fears of coastal management, and the result of an administration-legislative partnership initiated last year around the common theme of obtaining federally approvable coastal management this year. 1976 HCR 123. Little would be served by rehashing earlier legislative proposals in this review. It is enough to say that they came too soon, were too new and comprehensive, and created too much power at the state level. The proposed Act stands in contrast. It follows two years of public debate; it acknowledges and uses the substantial body of existing law; it recognizes that municipalities should have a large part in coastal management; and it recognizes that the state can be most effective and useful by providing broad policies and guidelines to local governments for local implementation of the program.

Since the proposed Act was jointly sponsored by the administration with the legislature and passed virtually unchanged, we will abbreviate our discussion of how the proposed Act will work, and turn our attention to some of the problems associated with it. Most of the problems are not new; they were debated earlier within the administration -- such as the problem of creating new single purpose governments in the unorganized borough to handle coastal planning. But since this and other problems raised were regarded as serious by several state agencies, they will be set out in this review, as a record, and as a possible agenda for future action or amendment.

The central feature of the proposed Act is the creation of the Alaska Coastal Policy Council in the Office of the Governor. AS 44.19.891. The council is comprised of nine public members (who must be elected municipal officials) appointed by the governor from the nine coastal regions set out in sec. 891(1), and seven state cabinet officials mentioned in sec. 891(2). The main function of the council is to adopt guidelines and standards, for use by municipalities in organized boroughs and "coastal resource service areas" in the unorganized borough, stating how to develop a coastal management program and what to include in that program to gain council approval. The main components of these local programs (called "district coastal management programs") would be the adoption of boundaries, the identification of land and water uses and activities subject to the district program, the identification of those land and water uses and activities which are permissible in different areas of the district and which are not permissible, and the adoption of policies and regulations for control of permissible uses to minimize their adverse impacts and for the exclusion of impermissible uses. AS 46.35.040. The guidelines and standards of the council (and the district coastal management programs adopted under them) do not take effect until approved by concurrent resolution of the legislature. AS 46.-34.080.

After the guidelines and standards are adopted by the council, and the district coastal management programs, by the municipalities or coastal resource service areas, the district programs are submitted to the council for review and approval. The council reviews the district programs for consistency with the proposed Act, and with the guidelines and standards (AS 46.-35.060) and summarily approves the program if consistent. However, if the council finds deficiencies, it directs mediation of those deficiencies with the affected local entity, and, failing mediation, directs commencement of formal public hearings under the Administrative Procedure Act (AS 44.62). As previously mentioned, the district coastal mangement programs, after adoption by the local governments or service areas, and by the council, still do not take effect until legislative approval. AS 46.35.080.

Following legislative approval of the district programs, the municipalities which exercise zoning or land use controls implement the programs for their areas, and in areas of the coast where zoning or land use controls are not exercised state agencies implement the program. If the programs are not implemented or if they are not being properly enforced, a coastal resource district, a citizen of the district, or a state agency can commence an administrative action before the council under the Administrative Procedure Act ("APA"), to require implementation or enforcement.

The council decision is reviewable in superior court under the APA and orders of the council are enforceable in superior court under AS 46.35.100. That summarizes how the bill works; the rest of this review deals with problems associated with the bill.

Most of the problems associated with the proposed Act arise not so much from legal difficulties as from serious policy differences. Many of these issues were debated both publicly and internally during passage of the proposed Act, and, in many cases, the differences were not whether one approach was better than another, but whether the administration was willing "to live with" less than an ideal bill in order to get anything. Two principal issues where this surfaced were over planning in the unorganized borough and over authorization of state level regional planning.

The proposed Act authorizes creation of special service areas in the unorganized borough, under AS 29.03.020, called "coastal resource service areas." AS 46.35.110. These service areas, while encompassing the same geographical area as regional educational attendance areas established under AS 14.08.031, serve a single governmental purpose -- the preparation of a district coastal management program. They do not tax themselves to carry out this function, and they do not implement the program themselves -- that is left to state agencies acting under existing law. The service area simply plans.

Several state agencies consider this a major step back in providing governmental services to the unorganized borough. Almost every state agency agreed with this appraisal and favored, over the long haul, a comprehensive look at the problem of government in the unorganized borough. Within time limitations, there was considerable internal debate and the final administration position was "to live with" the provisions. Considering this is the third instance where single purpose service areas have been created (health and education previously), considering the long range implications for government in general in the unorganized borough, and considering the issue will arise again and again if unresolved, it may be time for the administration to initiate legislation to deal with the problem once and comprehensively.

Another issue is state-level regional planning in the coastal areas of the state. It relates to the previous issue because it was seen by some agencies as a substitute for the coastal resource service area in the unorganized borough. But in other respects the issue is broader: it encompasses the question

of whether regional plans are needed to prevent fragmentation of planning and management, created by chopping up the state into "districts," and it encompasses the question of whether state agencies are giving up any of their present planning and management prerogatives over the state's natural resources.

Initially the administration position was that state regional plans should be required and that these plans should explicitly incorporate the same components that must be in the district coastal management programs; i.e., identification of boundaries, land and water uses subject to the program, etc. The legislature failed to adopt our language, and adopted instead a simple direction to the council to 'initiate an interagency program of comprehensive coastal resource planning for each geographic region described in sec. 891(a)(3) of this chapter.' AS 44.19.893(2).

This language in the proposed Act may be viewed by some agencies as narrowing their planning authority. Under existing law, agencies could plan for anything reasonably related to the powers constitutionally or legislatively conferred upon them. The proposed Act would, to some extent, put them in the hands of the council, although the council is instructed to initiate a comprehensive interagency program. The proposed Act would also subject some of the state's coastal management activities to the council's discretion, when proposed in a state-level regional plan, or when in conflict with an approved district coastal management program.

These problems of erosion of state authority, and conflict with local programs are probably more theoretical than real. For example, the state has never used its zoning power in the unorganized borough, and there has even been substantial debate over whether it should be used. The legislature passed two bills this session which narrow the power. CSHB 273 am (third class boroughs) and SCS CSHB 67 (land sales, etc.). The legislature has, in the past, annulled environmental regulations it did not like and can always expand or narrow powers legislatively conferred. Furthermore, the council is unlikely to invade many of the state's management prerogatives because internally the council will be subject to the same 'political' and "bureaucratic" pressures and attitudes as exist in almost all other governmental institutions. The council will not be environmentally extreme, but neither is it likely to give away the state's resources.

In return for "giving up' some planning responsibilities and management discretion, the state gets: coastal management along the entire coast, management that must incorporate scientific

data and principles, management subject to minimum state standards and guidelines, and management which must consider suggestions made by the state and by the citizens of the state.

A provision of the bill which could cause substantial difficulties to municipalites is AS 46.35.080 requiring legislative approval before the Alaska coastal management program, and any additions, revisions or amendments, take effect. This legislative involvement is unnecessary and will cause unnecessary delays to municipalities initially adopting programs, and thereafter revising them. The City and Borough of Juneau urged deletion of this provision as did the administration, but the provision remained. This section may need to be amended in the future.

A final problem relates to the legislature's recent passage of CSHB 73 am, an Act relating to boroughs, to CSHB 73 am's relationship with this bill, and to the relationship of both with the federal Coastal Management Act of 1972. This bill is designed to win federal approval under the federal Coastal Zone Management Act, to obtain coastal management program development and administration grants, to maintain eligibility for federal OCS impact grants and loans, and to require federal consistency of federal activities with the state coastal management program. To obtain all these benefits, the state's program must meet the minimum requirements of federal law.

The thrust of the federal Act is to encourage states through grants-in-aid to develop comprehensive coastal management programs. Grants are available to states to develop programs in the first instance, and then to administer the programs after they meet federal approval. To win federal approval the state must show that it can control land and water uses and activities in the coastal zone, and that it can exclude land or water uses or activities it considers impermissible An example of an impermissible use might be an oil refinery in a productive wetland, when suitable alternative sites were available.

The principal planning and management power to exclude an impermissible use is the zoning power, the power to decree that in a particular zone particular uses are allowed and particular uses are not allowed. The proposed Act, in our opinion, meets this federal requirement: within municipalities exercising zoning powers, that power exists at the local level and its exercise must conform to council guidelines and standards; within the unorganized borough, the power to zone resides in the director of the Division of Lands.

The passage of CSHB 273 am, relating to boroughs, however, could seriously impair the state's chance to obtain federal approval, because that bill abolishes the power of the director of lands to zone in a third-class borough which has zoning powers but chooses not to exercise them or which exercises them, e.g., in a single service area within the borough. The later passage of SCS CSHB 67, if not vetoed, and if it becomes law after CSHB 273 am, would remedy the defect created by CSHB 273 am. SCS CSHB 67 reinstates the director's power to zone in third-class boroughs within the coastal zone where the borough chooses not to zone. In our opinion, the adoption of SCS CSHB 67, or a similar Act, is essential to the state's program. The power may never have to be used, but we must show the federal government we have it if we need it.

The bill now has to be implemented which, by its terms, can take up to three years. The administration, the legislature, and the public should continue to closely follow the next stages to make sure that the lofty ideals espoused by the proposed Act -- the protection and wise use of the coastal zone -- will not be lost in helter skelter scrambles to meet deadlines or develop the state's resources.

Sincerely,

Avrum M. Gross
Attorney General

The Honorable Joseph L. Orsini
Senator
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: Federal lands
in the Coastal Zone
Our File No. J-66-456-78

Dear Senator Orsini:

You have asked for our opinion as to which federally owned lands, if any, are subject to state regulation under the provisions of the Coastal Zone Managment Act of 1972 ("Act"). 16 U.S.C. §§1451-64. In our view:

(1) while federal land use decisions will not be governed or controlled by the state's coastal management program, they must, to the degree that they directly affect non-federal coastal resources, conform to the state program to the maximum extent practicable; and

(2) the activities of lessees, permittees and other private persons on non-exclusive federal coastal lands remain subject to state regulatory authority--including the coastal management program--unless the particular state regulation is preempted by, irreconcilably conflicts with or frustrates the pur-p pose of another federal law.

The difficulty in reaching a conclusion on this

matter is the imprecise wording of the Act itself. Section 304(a) of the Act excludes from the coastal zone "lands the use of which is by law subject solely to the discretion of or which is held in trust by the Federal Government. . ." Very few federal reserves are solely subject to the regulatory authority of the federal government. Indeed, the basic rule with regard to state jurisdiction within federal lands is that land ownership status itself is irrelevant in determining the extent of state jurisdiction. Kleppe v. New Mexico, 426 U.S. 529, 541-45 (1976); James v. Dravo Contracting Co., 302 U.S. 134 (1937); Colorado v. Toll, 268 U.S. 228 (1925); Omaechevarria v. Idaho, 246 U.S. 343 (1918); State ex. rel. Andrus v. Click, 554 P.2d 969, 973 (Idaho 1976). Unless, with the consent of the state, the area in question has become one of exclusive federal jurisdiction (U.S. Const., Art. 1, §8, ch. 17) 1/ the federal government's status vis-a-vis the land is "that of an ordinary proprietor." Paul v. United States, 371 U.S. 245, 264 (1963), and state regulatory jurisdiction is unimpaired. By virtue of its land ownership, and under the so-called Property Clause (U.S. Const., Art. IV, §3 cl. 2), Congress is empowered to enact laws pertaining to its lands which, in the event of irreconcilable conflict with state enactments, will supersede the latter.

1/ There are several areas in Alaska where Congress has the power of exclusive legislation. See Alaska Statehood Act, §§10, 11 (72 Stat. 339).

Kleppe v. New Mexico, supra. Moreover, Congress may pre-empt the exercise of traditional state authority on federal lands. To do so, however, Congress must "unmistakenly ordain exclusivity of federal regulation." DeCanas v. Bica, 424 U.S. 351 (1976). Nonetheless, Congress' power to supersede state law under the Property Clause does not end the inquiry, it only begins it--under considerations of conflict and pre-emption. Andrus v. Click, supra.

Certainly, there is nothing in the Act which would suggest a constricting of traditional concurrent authority of the states. Aside from extensive articulation of what has been termed "cooperative federalsim" (§§302, 303), section 307(e)(1) of the Act contains what the Senate Committee described as "a standard clause disclaiming intent to diminish Federal or State authority in the fields affected by the Act." S. Rep. No. 753, 92d Cong., 2d Sess., reprinted in [1972] U.S. Code Cong. & Adm. News 6734.

Thus, at first blush, the Senate Commerce Committee's statement that "national forests and wildlife refuges" (id., at 6723)--which are normally not areas of exclusive jurisdiction--were included in the exclusionary language of §§304(a), and the Conference Committee's view of the exclusion as including (without cavaet) "Federal lands" (id., at 6762), seem at once a misstatement of the law, and in potential conflict with the pre-emption disclaimer of the Act.

The reconciliation comes in a recognition of the

potential implications of including any federal lands within the definition of the coastal zone. Concurrent jurisdiction does not carry with it an ability to override federal land management; as noted previously, if an irreconcilable conflict develops, the state law must yield. Moreover, absent an express waiver of sovereign immunity, states have no right to direct federal officials to manage federal property in a particular manner. See EPA v. California, 426 U.S. 200 (1976). 2/ To the extent that including federal lands in the "coastal zone" definition might, in NOAA's words, "assimilate a limited body of state law into federal law for the purpose of governing the conduct of federal agencies," 3/

2/ Such an express waiver, both as to procedural and substantive requirements, has been made with regard to state solid waste (P.L. 94-580, §6001), air quality (P.L. 95-95, §118) and water pollution (P.L. 95-217, §313) controls. State standards adopted by the Department of Environmental Conservation under the rubric of the latter two laws must be incorporated in the state's coastal management program (§307(f)), and federal land managers are, indeed, under a direct obligation to conform to these standards. Pursuant to 33 U.S.C. §1288 (the so-called "208 planning process"), the Department of Environmental Conservation is developing water quality related management practice standards which, pursuant to §313 of the Federal Clean Water Act, will be binding upon, and enforceable against federal land managers. Thus, at least as to water quality protection, the meaning of the exclusionary language of §304(a) of the Coastal Zone Management Act may eventually be a moot question.

3/ Department of Justice, Scalia to Brewer letter, August 10, 1976 at 5.

the traditional reaches of concurrent jurisdiction would indeed be exceeded.iIn our opinion, it is this "exten[sion] [of] state authority" (S. Rep., supra at 6723) that Congress intended to preclude in §304(a). Thus, the phrase "the use of which is by law subject solely to the discretion of. . . the Federal Government", id., was not intended to draw a distinction between areas of concurrent and exclusive jurisdiction, but rather refers to the ultimate management prerogative which, on all federal lands, reposes with the responsible federal manager. Section 304(a) thus shields that prerogative from direct state control.

However, despite the fact that all federal lands are excluded from the definition of the coastal zone, federal officials must nonetheless conform their land management decisions to the state's program "to the maximum extent practicbble", §307(c)(1), for those management decisions which will "directly affect", id.) non-federal land or water resources covered by the state's program. As the conference report, supra at 6762, makes clear, the exclusionary language of section 304(a) does not exempt federal land management decisions from the consistency requirements of section 307. Under what conditions federal management decisions will "directly affect" non-federal coastal resources involves far too many variables to be susceptible to summarization. I have enclosed proposed rules which would interpret and implement the federal consistency requirements of section 307.

which should provide a good understanding of how the Department of Commerce interprets that section.

Finally, it is our opinion that the state may extend the requirements of its coastal management program, within the previously-noted confines that traditionally attend the exercise of concurrent jurisdiction, 4/ to the activities of private persons on federal coastal lands. Again as discussed previously, this authority would exist absent the federal Act and, far from the explicit manifestation of preemptive intent necessary to constrict state jurisdiction, the language of the Act indeed negates the existence of any pre-emptive designs. §§302, 303, 307(e)(1). Thus, while particular program regulations may--for reasons of conflict or pre-emption--have to yield, it is our view that a blanket exclusion by the state of all federal lands from the regulatory reach of the program is unwarranted.

Sincerely,

AVRUM M. GROSS
ATTORNEY GENERAL

February 27, 1979

Arliss Sturgulewski, Chairman
Alaska State Legislature
Senate
Committe on Community & Regional Affairs
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Arliss:

Although it is not possible for me to appear personally before your committee I wish to express some longstanding concerns related to the implementation of CZM. Please share them with other members of your committee.

1. The actual impact of CZM will be most felt by private landholders, since the State does not have jurisdiction over Federal lands and does not need CZM to manage its own lands. Private lands in Alaska are predominately owned by Native people (or will be when conveyed).

2. Much of the privately held land is by any standard, rural in nature, containing a variety of communities. Most of these communities do not have the planning capability or history of planning present in other Alaskan cities. While larger cities prepare their own plans to become part of the whole, rural communities cannot. Implementation of CZM should contain the resources necessary to allow rural communities their own planning process resources so that they may present their formal and technically acceptable points of view.

3. While the State has made an effort to involve these rural people that effort falls far short of the community planning process needed. The State thus is in the position of planning for, not with, communities which are made up of people who actually own most of of the land affected, as the people of better prepared communities do not.

4. I suggest a beefing up of community planning resources concurrent with CZM implementation.

This is not a "for or against" communication, but only raises some concerns which I have felt for some years.

Sincerely,

Roger

Roger Lang,
President

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 12, 1979

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting to you a bill which would make certain amendments to the Alaska Coastal Management Act (AS 46.40). These changes were recommended to me by resolution of the Alaska Coastal Policy Council at the council's December 14-15, 1978 meeting. The council is the administering body of the Coastal Management Program, and is composed of both state and local government representatives.

Under the Alaska Coastal Management Act, the council has established guidelines and standards for the preparation of local government coastal programs. These programs are then submitted to the council for its review to determine conformity with the guidelines and standards. This legislation would authorize an additional time period for preparation of local plans. Under current law, plans must be completed by December 1979 -- an unrealistic deadline for many local governments. The proposed amendments would afford an additional two years for preparation of plans if an adequate justification for the delay was presented to the council.

Under AS 46.40.080, the "Alaska Coastal Management Program" is effective only after approval by the legislature by concurrent resolution. A great deal of confusion has arisen as to what, in fact, constitute the components of the Alaska "program." In fact, the guidelines and standards for local program preparation were submitted to, and approved by, the legislature pursuant to that section last year. It has been suggested by some that, additionally, each local district program must, in addition to obtaining council approval, also obtain legislative approval under sec. 80. The suggestion makes no sense. Approval of local district programs is a quasi-judicial action of the council. AS

attendance areas. The Coastal Policy Council feels strongly that, in certain cases, these districts might be better drawn on rational cultural or geographic features, rather than educational attendance areas. Current law also provides that, in resource service areas which do not exercise planning and zoning powers, state agencies will be the sole implementing tool for the program. A change in the law proposed by the Department of Community and Regional Affairs would make it clear that within these service areas, those cities which in fact exercise zoning powers would implement the programs within their municipal boundaries.

Sincerely,

Jay S. Hammond

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting to you a bill which would make certain amendments to the Alaska Coastal Management Act (AS 46.40). These changes were recommended to me by resolution of the Alaska Coastal Policy Council at the council's December 14-15, 1978 meeting. The council is the administering body of the Coastal Management Program, and is composed of both state and local government representatives.

Under the Alaska Coastal Management Act, the council has established guidelines and standards for the preparation of local government coastal programs. These programs are then submitted to the council for its review to determine conformity with the guidelines and standards. This legislation would authorize an additional time period for preparation of local plans. Under current law, plans must be completed by December 1979 -- an unrealistic deadline for many local governments. The proposed amendments would afford an additional two years for preparation of plans if an adequate justification for the delay was presented to the council.

Under AS 46.40.080, the "Alaska Coastal Management Program" is effective only after approval by the legislature by concurrent resolution. A great deal of confusion has arisen as to what, in fact, constitute the components of the Alaska "program." In fact, the guidelines and standards for local program preparation were submitted to, and approved by, the legislature pursuant to that section last year. It has been suggested by some that, additionally, each local district program must, in addition to obtaining council approval, also obtain legislative approval under sec. 80. The suggestion makes no sense. Approval of local district programs is a quasi-judicial action of the council. AS

46.40.060 provides substantial procedural protections in the approval process both for local governments and affected citizens. Additionally, the council itself has created, for local plan approval, a decision-making process painstakingly designed to ensure protection of all interested parties. The procedure (6 AAC 85.150) envisions a decision based on the record, and premised on specific findings and conclusions for which substantial comment and review provisions are made.

Under a broad interpretation of sec. 80, even after the question of local plan approval has proceeded through public hearings, council findings, mediation, and adjudicatory hearing, it might still be argued that legislative approval of the program remains necessary. This creates several practical problems. First, although judicial review of final council action is available, would a court undertake review while the matter is pending before the legislature? And if the final decision is, in fact, that of the legislature, is it realistic to assume that judicial review would be available at all?

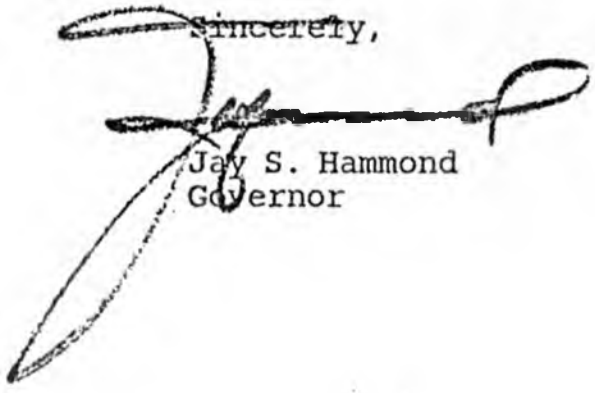
In addition, the requirement of legislative approval before the effectiveness of district programs places substantial burdens and uncertainties on local governments. While AS 46.40.060, and the council's regulations, provide for rather stringent deadlines for the review of district programs, those deadlines would become rather meaningless if the effectiveness of the program were, in fact, deferred until affirmative legislative concurrence were obtained. Perhaps most fundamentally, one would need to address the question of how the legislature would intend to conduct this "approval" authority. Would it sit as a fact-finding body? Would the resolution of approval contain findings of fact and conclusions of law based upon the record adduced at legislative hearings?

In sum, AS 46.40.080, to the extent that it suggests that legislative approval of district programs is required, is at best odd, and at worst terribly burdensome upon all those involved in the issue of coastal management. The proposed repeal of sec. 80 would remove this uncertainty, while still leaving adequate legislative review authority over future council guidelines (to the extent constitutionally permissible).

Two other proposed changes deal with implementation of the Coastal Management Program in the unorganized borough. Currently, the organization of coastal resource service areas must be based upon regional educational

attendance areas. The Coastal Policy Council feels strongly that, in certain cases, these districts might be better drawn on rational cultural or geographic features, rather than educational attendance areas. Current law also provides that, in resource service areas which do not exercise planning and zoning powers, state agencies will be the sole implementing tool for the program. A change in the law proposed by the Department of Community and Regional Affairs would make it clear that within these service areas, those cities which in fact exercise zoning powers would implement the programs within their municipal boundaries.

Sincerely,



Jay S. Hammond
Governor

VOL. 44 NO. 60 (USPS 293-940) KETCHIKAN, ALASKA, TUESDAY, MARCH 13, 1979 25 CENTS

Borough assembly skeptical:

More local control with coastal management

By MARK DAHLE
Daily News Staff Writer

In a workshop Monday night skeptical members of the Borough Assembly agreed to take part in the first phase of a coastal management program for Ketchikan.

Many members doubted that the program would work as it was explained, but the predominant feeling was that it was worth a try.

Kathy Carrsow, who explained the coastal management program to the assembly, said that once the local policy was federally approved, federal agencies would have to interpret their authority within those policy guidelines.

For example, she said, if the assembly had set the area near the ferry terminal aside as an area important for harbor development, the United States Postal Service would not have been able to build a post offic there.

In another example, she said a stream could be set aside as important for hydro power.

"For the fish and game department," she said, "all streams may be important for the fish resource. But at the local level we can say, 'This stream is more important for hydro.' "

A position paper the assembly received said that "trade offs must be made when incompatible resource uses are in conflict...The Alaska Coastal Management Program affords local governments the opportunity to take the major role in making these trade offs."

Assembly memberGary Elkins echoed the sentiments of many assembly members when he said, "I can't help but be a skeptic. It seems utopian." But he said he was "damn tired of having big brother..if this offers even a little bit of hope I'm all for it."

Carssow said the policy would streamline the decision-making policies, and let local governments have the prevailing policy.

The program sets the ground rule for giving governments control, according to Carssow. "Every program takes time to build clout," she saud. "But if we follow through, we can say 'listen, you made this deal with us.'"

The borough only has clear authority in determining the manangement policy of borough lands, she said. The U.S. Borax and Chemical Corp. mine at Quartz Hill is out of local jurisdiction, and the state will set the policy for it, since it is in an unorganized borough.

But the act allows local governments to address adjacent areas, like Quartz Hill. "It is not clear how much authority we have," she said.

The borough planning department is developing Ketchikan's coastal management program. To aid the department, six advisory task forces are planned.

Each task force is planned around coastal resources. They are: industrial-commercial waterfront; rural shorelines; viewsheds, heritage, recreational; fish and wildlife; timber and minerals; hazards and watersheds.

The task forces will be chaired by members of the borough planning department.

Each task force will include a member of the Borough Assembly, and one or more members of the community, selected by the borough mayor. City government staff will serve on task forces addressing resources within city boundaries. Local residents who want to be on a task force were encouraged to call the planning department.

Carssow said that June was set as a target for completion of work by the task forces ending the first phase, program development. In the first phase, areas requiring further study can be identified.

In June $2,188,000 will be available for Alaskan communities to work on the second phase of the project, which will more closely identify areas for specific applications. The monies are federal funds.

Also at the meeting, the Borough Assembly discussed an ordinance relating to the board of equalization hearings.

All assembly members were present except Helen Finney and Borough Mayor Carroll Fader.

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM February 21, 1979

SUBJECT: Authority to implement and enforce coastal management programs by service areas in the unorganized borough: (Work Order No. 6365)

TO: Representative Bill Parker

FROM: John B. Chenoweth, Legislative Counsel

I have tried to draft the enclosed bill to meet your directive that authority to implement (as well as to plan) coastal management programs in the unorganized borough be granted to the coastal resource service areas which may be formed in the unorganized borough.

You should know, I think, that the premise underlying the statement in Mr. Cohen's letter, the apparent source of this request, is partially in error. When the coastal management legislation took shape in 1977, some thought went into the relationship between existing cities of the unorganized borough and the service areas which might be formed there. The consensus, now part of the legislation, was to provide a range of options, allowing individual cities that were willing and able to initiate and complete the planning process to do so, or to authorize service areas to undertake the planning process, or to rely on existing state agencies where there was no interest expressed at the community or regional level. As to implementation, it was clear that, in the unorganized borough, because cities (first or second class) had authority to exercise planning, zoning, and other powers, rather than extend planning and zoning authority to service areas (where there was really no push to extend the authority), existing law would be left unchanged: either a city would implement or state agencies would act. If people were really worked up enough on a regional basis to want to become involved in implementation, the first or second class borough option remained available to them.

To: Representative Bill Boller

From: Clifton Curtis
Center for Law & Social Policy

SUBJECT: TESTIMONY BEFORE THE COMMITTEE ON COMMUNITY & REGIONAL AFFAIRS ON FEBRUARY 26, 1979.

Based on my understandings that you would pick up my transportation costs, plus a per diem, for my trip to Juneau from Portland, Oregon, the following are my expenses

- Air fare from Portland on 2/25 to Juneau, and return to Seattle, Washington on 2-26 $226.68

- 2 days per diem for 2/25 & 2/26 at $55 per day $110.00

- taxi/bus service from Seattle to downtown & back to airport ($3.00 each way) 6.00

TOTAL EXPENSES $342.68

Make check payable to:

2-26-79

Mr. Cohen states: "In the unorganized borough, this power [i.e., responsibility for implementation of coastal management programs] is taken away from the local people and placed with state agencies." He is not correct. As a matter of law, the exercise of zoning and other controls in the unorganized borough outside of cities has never rested with anyone other than the state agencies. (AS 40.15.070 - 40.15.075; AS 44.47.050 (8) and (9)).

The 1975 Legislature mandated unorganized borough control of education; the 1977 legislation authorized a role for the unorganized borough in coastal resource planning. The 1979 Legislature is asked to extend authority of service areas to exercise zoning and other controls in the coastal zone. Frustration prompts me to ask how, if all these are granted, withholding only the authority and responsibility to levy and collect taxes, this structure is any different than the first or second class borough system now provided in general law?

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE CONCURRENT RESOLUTION NO. (C&RA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Approving regulations adopted by the Alaska Coastal Policy Council.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS Chapter 84, Session Laws of Alaska 1977, established the Alaska Coastal Policy Council and charged the council with the responsibility, among others, of adopting guidelines and standards for the development of the district and the statewide coastal management programs; and

WHEREAS the Alaska Coastal Policy Council has adopted guidelines and standards in 6 AAC 80 and 6 AAC 85 for use by state agencies and by municipalities and service areas in the preparation and development of the district and statewide coastal management programs; and

WHEREAS the guidelines and standards adopted by the council on March 31, 1978 have been approved by the legislature by means of House Concurrent Resolution No. 125 which was adopted during the second session of the tenth legislature with selective deletions and letters of intent calling for further attention to certain matters in the guidelines and standards; and

WHEREAS the council has adopted amendments to the guidelines and standards on December 15, 1978 in response to the request of the legislature and other parties; and

WHEREAS the amendments to the guidelines and standards approved and adopted by the Alaska Coastal Policy Council are generally consistent with the objectives for the state coastal management program identified in AS 46.40.020 and additional parts of the coastal management program; and

WHEREAS AS 46.40.080 requires approval of the state coastal management program either by adoption of a concurrent resolution or by majority vote of the members of both houses at a joint legislative session as a prerequisite to the taking effect of the program; and

WHEREAS, in accordance with the statute, the Alaska Coastal Policy Council has submitted its amendments to the guidelines and standards for legislative approval.

BE IT RESOLVED that the Alaska State Legislature approves the regulations adopted by the Alaska Coastal Policy Council on December 15, 1978, as approved by the Department of Law and submitted to the legislature on January 26, 1979.

JAN 30 1979
POLICY DEVELOPMENT
& PLANNING

Ms. Frances A. Ulmer
Director
Division of Policy Development
and Planning
Office of the Governor
Pouch AP
Juneau, Alaska 99811

Dear ~~Ms. Ulmer:~~ Fran

I would like to take this opportunity to commend you and the other members of the Alaska Coastal Policy Council for the approval, at your December 14-15, 1978 meeting, of the proposed revisions to the Guidelines and Standards for the Alaska Coastal Management Program (ACMP). As I noted in my letter to you of November 17, 1978, we believe that the specificity and comprehensiveness contributed to the ACMP by these revisions should go far to assure the ultimate approvability of the Program. With adoption of the revisions, the Council has taken a very important step in the direction of Federal approval of the Alaska Program.

At the same time, we recognize that the Council's action is only the first of two critical steps that must occur in order to make these changes effective. Adoption of the proposed revisions by the Alaska Legislature is essential before they can be considered fully a part of the Program that is before me for approval. Although the ACMP and Draft Environmental Impact Statement have been circulated for public review and comment, the authorities upon which my preliminary determination of approvability is based include the revisions now before the Legislature. In order that the public may review the Program in its final form, and because it would be presumptuous to anticipate approval of the proposed revisions in the guidelines and standards by the Legislature, I do not intend to release the Final Environmental Impact Statement until the Legislature acts to establish the guidelines and standards in final form.

The need to await this final action raises another issue discussed in my November 17 letter: Federal support of the Alaska Program with funds during the interim period. We are sensitive to the need for adequate Federal funding of many of the important tasks of state and local governments under the ACMP between now and approval of the

Program, when the State becomes eligible for the substantial increase in funding available under Section 306 of the Federal Act. Alaska's share of the limited Federal program development funding is scheduled to be exhausted by June 30, 1979. Given the time needed for final program distribution and approval, we foresee the need for legislative action on the proposed Guidelines and Standards amendments, before April 30, 1979.

In the interests of smooth transition of the Alaska Coastal Management Program into the implemention stage, I urge you and Governor Hammond to use your good offices to encourage early action by the Legislature. We recognize that if circumstances force a lapse in Federal assistance, much valuable momentum toward sound coastal management by state agencies and local coastal communities will be lost. If I am able to assist you in any way to help us all meet our schedule, including testimony before the Legislature, I am at your service. We look forward to your success.

Sincerely yours,

Robert W. Knecht
Assistant Administrator

LAND

Federal, state, and local regulation — Statutory construction (§8.05)

Court jurisdiction and procedure — Injunctions (§15.71)

Oil industry trade group is not entitled to injunction barring Department of Commerce approval of California coastal zone management program for program's alleged failure to affirmatively accommodate energy facility siting in coastal zone, since program provides for adequate consideration of overall national interests, and since Section 306(c)(8) of Coastal Zone Management Act does not require state program to give priority consideration to energy interests.

Oil industry trade group challenges Department of Commerce approval of California Coastal Zone Management Act program.

On plaintiffs' motion for preliminary injunction.

Denied.

Philip K. Verleger, Howard J. Privett and Ward L. Benshoot, Los Angeles, Calif., for plaintiffs.

Sanford Sagalkin, deputy assistant attorney general, Bruce A. Rashkow, and William Brian Morrison, Department of Justice Washington, D.C., for federal defendants.

Roger Beers and James B. Frankel, Palo Alto, Calif., for intervenors Natural Resources Defense Council and Sierra Club.

Evelle J. Younger, attorney general, R.H. Connett, assistant attorney general, Roderick E. Walston, and Donatas Jamuta, deputy attorneys general, San Francisco, Calif., for intervenor California.

Full Text of Opinion

Plaintiffs American Petroleum Institute, Western Oil and Gas Association, and certain oil company members of the aforesaid Institute and Association brought this action against three federal officials ("the federal defendants") in their official capacities as Secretary of Commerce, Administrator of the National Oceanic and Atmospheric Administration ("NOAA"), and Acting Associate Administrator of the Office of Coastal Zone Management ("OCZM"), seeking declaratory and injunctive relief against defendants' imminent grant of "final approval" of the California Coastal Zone Management Program ("CZMP") pursuant to §306 of the Coastal Zone Management Act of 1972, as amended ("CZMA") (16 U.S.C. §§1451 *et seq.*) and seeking further relief in the nature of mandamus directing the federal defendants to grant "preliminary approval" to the CZMP pursuant to §305(d) of the Act.

In brief, plaintiffs contend that the California Program cannot lawfully be approved by the federal defendants under §306 of the CZMA, principally for two reasons. First, the CZMP is not a "management program" within the meaning of §304(11) of the Act in that (a) it fails to satisfy the requirements of §§305(b) and 306(c), (d), and (e), and regulations promulgated thereunder, as regards content specificity; and (b) it has not been "adopted by the state" within the meaning of §306(c)(1). Second, the procedures by which the CZMP has reached the present state of development violate the CZMA, the National Environmental Policy Act ("NEPA") (42 U.S.C. §§4321 *et seq.*), and California statutes in that the final environmental impact statement, which differs substantially from both the draft and revised draft environmental impact statements, was not subject to formal notice and hearings, yet purports to contain one of five "elements" of the CZMP.

The action was commenced on September 9, 1977, by the filing of a complaint and application for temporary relief, pursuant to which a temporary restraining order ("TRO") and order to show cause were issued on September 12, the effect of which was to restrain the federal defendants from giving final approval to the CZMP pending further hearing on plaintiffs' motion for a preliminary injunction. Thereafter, on October 7, following a hearing on October 3 and 6, an order, agreed to by all parties[1] issued, whose ef-

[1] Defendant California Coastal Commission had moved to intervene pursuant to Rule 24, F.R.Civ.P., which motion had been granted

last was to (1) consolidate the hearing on the motion for a preliminary injunction with the trial on the merits (pursuant to Rule 65(a)(2), F.R.Civ.P.), (2) establish a briefing schedule, (3) provide for the lodging of evidentiary matter, and objections thereto, and (4) lift the TRO in order to permit the federal defendants (a) to disburse funds to California under the CZMA and (b) to take whatever action they deemed "necessary and appropriate," including formal approval of the CZMP under §306[2], accompanied by the findings required under §306. The order further provided, however, that pending entry of final judgment in this Court, any such approval under §306 by the federal defendants would be deemed ineffective to trigger the "consistency" provisions of §307(c) and (d). The CZMP was given final approval by Acting Associate Administrator Knecht, to whom the duty of approving or disapproving management programs submitted under §306 had been and continues to be delegated, on November 7, 1977. His findings were issued at that time.

Thereafter, on February 13, 14, 15 and 16, 1978, the Court held the aforesaid consolidated hearing and heard argument on cross-motions for summary judgment, and the matter was further briefed and submitted to the Court for decision.

All of the parties have agreed that there is no genuine issue as to any material fact in this case and that by examining the pleadings and the evidence in the record before it, and after consideration of the arguments made in writing and orally, the Court may proceed to a disposition on the merits, which we now do.

For reasons set forth below, the Court affirms the federal defendants' §306 approval of the CZMP and grants judgment for defendants and against plaintiffs.

FACTS

The following facts appear to be before the Court without dispute:

1. Plaintiff American Petroleum Institute ("API"), a corporation organized under the District of Columbia nonprofit corporation laws, is a national trade association of approximately 350 companies and 7,000 individuals engaged in the petroleum industry. Its members include companies and individuals actively engaged in exploration, production, refining and marketing of petroleum products in the United States, including the State of California and the outer Continental Shelf off the coast of California.

2. Plaintiff Western Oil and Gas Association ("WOGA"), a corporation organized under the California nonprofit corporation laws, is a regional trade association of over 75 member companies and individuals engaged in the petroleum industry. Its members include companies and individuals responsible for in excess of 65 percent of the production of petroleum, in excess of 90 percent of the refining of petroleum, and in excess of 90 percent of the marketing of petroleum in the southern western states of the United States, including California and the outer Continental Shelf off the coast of California.

3. Plaintiffs Champlin Petroleum Company; Chevron U.S.A., Inc.; Continental Oil Company; Exxon Corporation; Getty Oil Company; Gulf Oil Corporation; Mobil Oil Corporation; Reserve Oil & Gas Company; Shell Oil Company; Texaco, Inc.; and Union Oil Company of California ("the oil company plaintiffs") are each corporations organized under the laws of the various states and are members of API or WOGA. The oil company plaintiffs, among other activities, are engaged in the business of exploration for and production of oil and natural gas both within the state of California and on the outer Continental Shelf ("OCS") off the California coast. Some of the oil company plaintiffs own interests in OCS leases purchased in federal lease sales under the provisions of the Outer Continental Shelf Lands Act (43 U.S.C. §§1331 *et seq.*). The remaining plaintiffs have interests in the coastal zone of California and/or are oil and gas consumers engaged in business in California.

4. Defendant Juanita Kreps, sued herein in her official capacity, is Secretary of the United States Department of Commerce ("Secretary") and is charged with administering the CZMA, which includes approval or disapproval of coastal zone management programs submitted by the coastal states, of which California is one. NOAA exists within the Department of Commerce. By administrative directive dated October 13, 1976, the Secretary delegated, *inter alia*, the CZMA approval func-

---

without objection October 3rd. Defendants Natural Resources Defense Council and Sierra Club ("NRDC"), who appeared as *amici* at the hearings, were granted permissive intervention on November 9th.

[2] Without such approval there had as yet been no final "agency action" (within the meaning of the Administrative Procedure Act ("APA"), 5 U.S.C. §§551(13) and 701) upon which judicial review could be predicated.

tion to the Administrator of NOAA and expressly reserved other powers under the Act. Defendant Richard Frank is the Administrator of NOAA and is sued herein in his official capacity. Within NOAA there exists the Office of Coastal Zone Management ("OCZM"). Defendant Robert W. Knecht is the Acting Associate Administrator ("Acting Administrator") for coastal zone management and is sued herein in his official capacity. By administrative directive dated October 20, 1976, the Administrator of NOAA delegated to the Associate Administrator for Coastal Zone Management the authority to exercise all functions under the CZMA not expressly reserved to either the Secretary or the Administrator of NOAA.

5. The defendant-in-intervention, California Coastal Commission, is an agency of the State of California created pursuant to the California Coastal Act of 1976 (Cal.Pub.Res.Code §§3000, *et seq.*). The Coastal Commission is the successor in interest to the California Coastal Zone Conservation Commission created pursuant to Proposition 20 (Cal.Pub.Res.Code §§27000, *et seq.*), which expired on December 31, 1976. The California Coastal Act became effective on January 1, 1977.

6. Defendants-in-intervention, Natural Resources Defense Council, Inc., and the Sierra Club ("NRDC") are associations whose members claim an interest in coastal zone management.

7. On March 31, 1976, the California Coastal Zone Conservation Commission submitted to the federal defendants a coastal zone management program for approval under the provisions of CZMA §306.

8. In September of 1976 the federal defendants issued a Draft Environmental Impact Statement ("DEIS") wherein they announced their tentative decision to approve the California Coastal Zone Management Program submitted in March. Thereafter, the State of California enacted the Coastal Act of 1976, which declared itself to be "California's coastal zone management program within the coastal zone for purposes of the Federal Coastal Zone Management Act of 1972 . . ." (Cal.Pub.Res.Code §30008.)

9. On October 20, 1976, the DEIS was withdrawn and the public hearings to be held thereon were cancelled. On April 12, 1977, the federal defendants issued a Revised Draft Environmental Impact Statement ("RDEIS") and announced their tentative decision to approve the revised coastal zone management program submitted by the Coastal Commission. At this time the CZMP was described as consisting of the California Coastal Act of 1976, the Coastal Conservancy Act (Cal.Pub.Res.Code §§31000 *et seq.*), and the Urban and Coastal Park Bond Act (Cal.Pub.Res.Code §§5096.777 *et seq.*). Public hearings were held on the RDEIS and the CZMP as therein described on May 19, 1977, in Los Angeles, California. Plaintiffs appeared and (by oral testimony and written comments submitted before the hearing and additional comments submitted thereafter) recommended that the CZMP not be approved and that a new environmental impact statement be prepared.

10. On August 16, 1977, the federal defendants issued their Final Environmental Impact Statement ("FEIS"), together with Attachment K, containing written statements from parties commenting on the CZMP. In the FEIS, the CZMP was described as consisting of five elements: the Coastal Act of 1976, the Coastal Conservancy Act, the urban and Coastal Park Bond Act, the Coastal Commission's final regulations (Cal.Admin.Code, Title 14, §§13000 to 14000), and Part II (Introduction and Chapters 1-14) ("the Program Description") of the FEIS.[3] On September 1, 1977, plaintiffs submitted to the federal defendants written comments objecting to approval of the CZMP as defendants proposed in the FEIS. Defendants replied by letter dated September 8, 1977, from Acting Administrator Knecht to plaintiffs' counsel, by which letter defendants indicated that they intended to proceed with approval of the CZMP. As noted previously, final approval, accompanied by a recital of findings, occurred on November 7.

The Court has before it for determination both preliminarily and for ultimate disposition questions of the highest importance, greatest complexity, and highest urgency. They arise as the result of high legislative purpose, low bureaucratic bungling, and present inherent difficulty in ju-

[3] The FEIS document is entitled *State of California Coastal Management Program and Final Environmental Impact Statement*. The "Program Description" (FEIS at 5-107) and "Coastal Management Program Appendices" have been printed with a black border, indicating that they comprise the CZMP. The combined document was utilized for efficiency reasons, in order to avoid the necessity of duplication of the Program in a separate document as well as in the FEIS.

dicial determination. In other words, for the high purpose of improving and maintaining felicitous conditions in the coastal areas of the United States, the Congress has undertaken a legislative solution, the application of which is so complex as to make it almost wholly unmanageable. In the course of the legislative process, there obviously came into conflict many competing interests which, in typical fashion, the Congress sought to accommodate, only to create thereby a morass of problems between the private sector, the public sector, the federal bureaucracy, the state legislature, the state bureaucracy, and all of the administrative agencies appurtenant thereto. Because the action taken gives rise to claims public and private which must be adjudicated, this matter is now involved in the judicial process.

In whatever technical form the questions and issues are here presented, they resolve themselves into the familiar situation in which a court must sit in some form of judicial review of administrative action — and it isn't easy.

We deal here with a hybrid kind of record and consequent hybrid form of review. As will appear from the extensive discussion below, the several approaches to and differing views of the proper scope and kind of judicial review are here brought under consideration.

We have questions of whether review is proper or timely and, if so, of what proper scope and result. We treat each *seriatim*.

STANDING

This issue need not detain us long. While defendants originally urged that plaintiffs in this case lack standing to litigate speculative harms, during oral argument counsel for the NRDC, to whom the task of pressing defendants' standing and ripeness contentions was apparently assigned, conceded that what had previously been designated an issue of standing was more properly characterized as a ripeness problem. The Court nevertheless briefly examines the standing of plaintiffs to maintain the present action before addressing the ripeness issue.

The Supreme Court has liberalized the law of standing so that, while injury in fact is always required, *Sierra Club v. Morton*, 405 U.S. 727, 740 [3 ERC 2039] (1972), "an identifiable trifle is enough." *U.S. v. Students Challenging Regulatory Agency Procedures (SCRAP)*, 412 U.S. 669, 689 n.14 [5 ERC 1449] (1973) [quoting Davis, *Administrative Law Treatise*, §22.09-5 at 748 (1970 Supp.)]; *National Automatic Laundary & Cleaning Council v. Schultz*, 443 F.2d 689, 693 (D.C.Cir. 1971). The distinction that the Court has drawn is one between actual and abstract injury.

> Abstract injury is not enough. It must be alleged that the plaintiff "has sustained or is immediately in danger of sustaining some direct injury" as a result of the challenged statute or official conduct.

O'Shea v. Littleton, 414 U.S. 488, 494 (1974). *See Cady v. Morton*, 527 F.2d 786, 791 [8 ERC 1097] (9th Cir. 1975).

In the present case plaintiffs, whose activities will be regulated by the CZMP to the extent that their activities in exploring for and developing oil and gas resources on the OCS must be consistent therewith, have alleged and shown injury in fact. For upon approval by the federal defendants of the CZMP under §306 of the CZMA, the consistency provisions of §307 are triggered. Thereafter, before federal agencies may approve certain activities of plaintiffs relating to exploration and development of OCS resources, plaintiffs must certify that the proposed activity is consistent with the CZMP. Although the state is afforded six months to certify to the federal agency whether or not a proposed activity is consistent, the initial burden of determining consistency falls to the applicant. The gravamen of the complaint is that the submitted CZMP as approved by the federal defendants lacks the requisite specificity under CZMA and consequently may not be approved under §306. If approved, plaintiffs claim immediate and substantial harm by compulsion to expend large sums of money to determine if their proposed activities are consistent. Moreover, plaintiffs allege that this lack of specificity increases their burden and makes it impossible to discharge, since they cannot with any reasonable assuredness certify that any activity subject to §307 is in fact consistent with the CZMP. The undeniable interest[4] of plaintiffs in the areas subject to the CZMP, the fact that once §306 approval is given, their activities are subject to regulation under it, and the fact that an immediate consequence is to compel plaintiffs to expend financial resources in an effort to satisfy the requirements of §307, combined with their claim that this burden is substantially increased by virtue of the very defects which they assert make ap-

[4] Plaintiffs have invested millions of dollars in exploration and development of energy resources located on the OCS and continue so to do.

proval improper, provide the necessary injury in fact to give plaintiffs standing to challenge the federal defendants' action in approving the CZMP under §306.

Accordingly, the Court finds that the plaintiffs have standing to litigate the issues presented.

RIPENESS

On this issue the Court must delineate what issues are and are not before it for review. The Court concludes that the approval given by the federal defendants results in action which is ripe for review, but that issues relating to the state's application of §307 of the CZMA to particular activities of plaintiffs is not ripe for review. This conclusion has impact with respect to two other issues in this lawsuit: first, plaintiffs' request that the Court undertake a full-scale declaration of the parties' rights and obligations under the CZMA and the CZMP; and, second, plaintiffs' claim that the environmental impact statement and review process were deficient in failing to address potential impact nationwide if energy resource development in areas subject to the CZMP was retarded or halted by virtue of the state's application of its §307 powers. The Court declines to undertake the first because such declarations are best left to a time when a court has before it a case or controversy sufficiently identifiable to allow to a specific issue application of a specific provision or provisions of the Act or Program. The Court declines the second so far as it requires the Court to assume that the state may abuse its §307 powers and that federal officials will fail to correct such abuses under their power so to do, pursuant to the provisions of §§307(c)(3) and 312.

A triology of Supreme Court decisions[3] forms the bedrock for the modern law of ripeness. In oft-quoted language from *Abbott Laboratories*, the Court stated:

> [The] basic rationale [of the ripeness doctrine] is to prevent the courts, through avoidance of premature adjudication, from entangling themselves in abstract disagreements over administrative policies, and also to protect the agencies from judicial interference until an administrative decision has been formalized and its effects felt in a concrete way by the challenging parties. The problem is best seen in a *twofold aspect*, requiring us to evaluate both the *fitness of the issues for judicial decision and the hardship to the parties of withholding court consideration.*

387 U.S. at 148-49 (emphasis supplied).

A. *Fitness of the Issues for Judicial Decision.*

Courts typically focus on two factors: whether they are presented with issues that are "purely legal" (*Abbott Laboratories, supra*, 387 U.S. at 149; *National Automatic Laundry & Cleaning Council, supra*, 443 F.2d at 695; *Bethlehem Steel Corp. v. U.S. Environmental Protection Agency*, 536 F.2d 156, 161 [8 ERC 2114] (7th Cir. 1976)) and whether they are presented with "final agency action" (*Abbott Laboratories, supra*, 387 U.S. at 149; *Natural Resources Defense Council, Inc. v. U.S. Nuclear Regulatory Commission*, 539 F.2d 824, 836-37 (2d Cir. 1976); *Bethlehem Steel Corp., supra*, 536 F.2d at 161).

Considering finality, or reviewability, first, the Court notes that approval under §306 is the culmination of the agency review process here involved. Following approval, there is nothing further to be done as part of the administrative process, other than the obligation of "continuing review" under §312(a), an obligation which relates to a management program that has already been approved under §306. The present case is thus unlike *Bethlehem Steel Corp.*, wherein the challenged regulations were found "only [to] provide for a study by the State . . . of future air pollution problems in the designated areas. Any standards for petitioners to follow will not be promulgated until the study is completed. Our review of the challenged actions consequently will interfere with an ongoing administrative process. Because of this we cannot say the agency action is 'final'." 536 F.2d at 161.

The fact that agency approval is here involved rather than rule-making is of no consequence. Courts have heeded the Supreme Court's approval in *Abbott Laboratories* of a "pragmatic" interpretation of the finality requirement. 387 U.S. at 150, citing *Columbia Broadcasting System v. U.S.*, 316 U.S. 407, 418-19 (1942) (FCC statement of intention not to license stations which maintained certain contracts with networks; no license yet denied or revoked); *National Automatic Laundry & Cleaning Council, supra* (interpretative letter of agency); *Natural Resources Defense Council, Inc., supra*, 539 F.2d at 837 (order of agency). The Court concludes that the federal defendants' approval under §306 constituted final agency action for purposes of reviewability.

On the question of whether purely legal issues are presented, the Court notes that

---

[3] *Abbott Laboratories v. Gardner*, 387 U.S. 136 (1967); *Toilet Goods Association v. Gardner*, 387 U.S. 158 (1967); and *Gardner v. Toilet Goods Association*, 387 U.S. 167 (1967).

this is not a case in which plaintiffs are challenging agency action on the grounds that it exceeds the agency's statutory authority (as was the case in *Abbott Laboratories* and *National Automatic Laundry*). Here the agency's action involved findings in part premised on its interpretation of the CZMA (as amended in 1976); hence the Court is presented with predominantly legal issues. The facts, while not unmuddied by the nature of the administrative action here involved[6], nevertheless are not in dispute. The dispute centers on the legal characterization of such facts under the language of the statute. Thus, the federal defendants' finding under §306(c)(8) that the California Program "provides for *adequate consideration* of the national interest involved in planning for, and in the siting of, [energy] facilities . . . which are necessary to meet requirements which are other than local in nature" pre-supposes a legal determination on the part of the agency as to just what is meant and required by "adequate consideration." This in turn requires an examination of Congress' intent in enacting and amending the CZMA. To be sure, this case does not fit neatly into the category of case typified by *National Automatic Laundry*. There the court could state: "There is no 'record' to be studied or made, for the only record involved on this issue is that established by such materials as the law and its legislative history." 443 F.2d at 695. Here, on the other hand, the very statute whose provisions must be construed requires that before approving a management program under §306, the agency find that it includes certain substantive provisions and that it has been adopted in accordance with certain procedures. Consequently, at the same time that the Court must construe the statute, it must review administrative findings subject to the limited review under §706(2)(A) of Title 5, the Administrative Procedure Act ("APA"). The complexity arises from the fact that many of those findings present classic examples of mixed questions of law and fact, further complicated by their essentially technical nature.

The Court's conclusion is supported further by the fact that the findings required under §306 involve the agency's comparison of the provisions of the CZMP with the CZMA and regulations promulgated thereunder, at least with respect to the requirements of the Act relating to substantive program content. As noted previously, nothing remains to be done by the agency *vis-à-vis* §306 approval. If the propriety of that approval is not ripe for judicial review at this time, it will never be ripe.

Finally, the Court notes that, irrespective of the above characterization, whether the issues presented are legal is merely a factor to be balanced against hardship to the parties; it is not a requirement in the absence of which the Court must find the action unripe for review. In pre-enforcement judicial review of agency action, typically the agency argues that the legal issues are too abstract or speculative to be determined in advance of their being shaped and sharpened by efforts to enforce them, or that the very fact of enforcement is uncertain. Where "consideration of the underlying legal issues would necessarily be facilitated if they were raised in the context of a specific attempt to enforce the regulations" (*Gardner, supra*, 387 U.S. at 171), a court might and probably should conclude that the matter is not ripe; but where the issues would not be sharpened thereby, ripeness is more readily found.

Here, the Court in applying the above principle concludes that issues specifically related to application of the §307 consistency power are wholly speculative and thus not ripe for review. On the other hand, review of the agency's approval predicated on its impact on plaintiffs' interests is nonspeculative. As defendants have stated, the propriety of the approval stands or falls on the record made before the agency and the support it lends to the administrator's findings that the CZMP,

---

[6] The Court is here faced with review of neither an adjudication nor rule-making, in both of which instances a clear administrative record emerges. Rather, the Court sits in review of agency action which stretches over a long period of time, includes non-transcribed public hearings, not essentially adversary in nature, and in fact, quite the contrary. Cooperative efforts on the part of the state and the agency produced the environmental impact statement. At times the Court has the sense that the record by its very nature permits only an occasional brief glance into the workings of the administrative decision-making process in this instance. Perhaps prompted in part by difficulties of this sort which inhere in attempts to review such action, courts have held that in circumstances like the present — that is, where agency approval of a specific program or project is involved — "from the standpoint of effectuating congressional intent, it is the Administrator's approval of the project in the first instance that becomes the all-important step in the process. And it is the Administrator's approval that should be the focal point for judicial review." *Air Line Pilots Association v. Dept. of Transportation*, 446 F.2d 236, 242 (5th Cir. 1971).

both in content and in manner of adoption and approval, meets the requirements of the CZMA.

B. *Hardship to the Parties of Withholding Court Consideration.*

In *Abbott Laboratories*, in finding petitioners' pre-enforcement challenge to certain labelling regulations promulgated by the Commissioner of Food and Drugs ripe for review, the Court emphasized the hardship to petitioners if judicial review were deferred. In so doing the Court focused on the impact on petitioners of deferring review:

> This is also a case in which the impact of the regulations upon petitioners is sufficiently direct and immediate as to render the issue appropriate for judicial review at this stage. These regulations purport to give an authoritative interpretation of a statutory provision that has a direct effect on the day-to-day business of all prescription drug companies; its promulgation puts petitioners in a dilemma that it was the very purpose of the Declaratory Judgment Act to ameliorate . . . . The regulations are clear-cut, and were made effective immediately upon publication . . . . If petitioners wish to comply they must change all their labels advertisements, and promotional materials; they must destroy stocks of printed matter; and they must invest heavily in new printing type and new supplies. The alternative to compliance . . . may be even more costly. That course would risk serious criminal and civil penalties . . . .

387 U.S. at 152-53. Similarly, in finding the issue of what sort of items are "color additives" within the meaning of the Color Additive Amendments of 1960 to the Food, Drug, and Cosmetic Act, 21 U.S.C. §321(t)(1), to be ripe for review in light of regulations relating thereto which respondents challenged as beyond the Commissioner's statutory authority to promulgate, the Court stressed the fact that "these regulations are self-executing, and have an immediate and substantial impact upon the respondents." *Gardner, supra*, 387 U.S. at 171.

The significance of this requirement of immediate and substantial impact is underscored by the Court's finding of a lack of ripeness in the remaining case in the above trilogy. In *Toilet Goods Association*, after having agreed with the Court of Appeals that the agency action was final and that the question presented was purely legal (387 U.S. at 162-63), the Court nevertheless found these factors outweighed by other considerations — chiefly the facts that (1) the regulation was not self-executing but merely gave notice of what the agency might do in the future, (2) justification for the regulation would depend "not merely on an inquiry into statutory purpose, but concurrently on an understanding of what types of enforcement problems are encountered by the FDA, the need for various sorts of supervision in order to effectuate the goals of the Act, and the safeguards devised to protect legitimate trade secrets" (*id.* at 163-64), and (3) immediate and substantial impact was lacking. While the second factor relates to the fitness of the issues, the first and third relate to hardship. In analyzing the lack of such in the case before it and contrasting it with the sort of impact "felt immediately by those subject to it in conducting their day-to-day affairs" (*id.* at 164), the Court remarked:

> This is not a situation in which primary conduct is affected — when contracts must be negotiated, ingredients tested or substituted, or special records compiled. This regulation merely states that the Commissioner may authorize inspectors to examine certain processes or formulae; no advance action is required of cosmetics manufacturers . . . . Unlike the other regulations challenged in this action, . . . a refusal to admit an inspector here would at most lead only to a suspension of certification services to a particular party, a determination that can then be promptly challenged through an administrative procedure, which in turn is reviewable by a court. Such review will provide an adequate forum for testing the regulation in a concrete situation.

Id. at 164-65.

From the above, it is evident that the Court is here faced with a problem of classification: Are the consequences of which plaintiffs complain — not those flowing from the manner in which California might exercise its §307 powers but rather those involving the need of plaintiffs to take steps to certify their proposed activities as consistent with the CZMP — consequences of "immediate and substantial impact"? More specifically, is the uncertainty in the conduct of the affairs which plaintiffs claim follows from §306 approval of the CZMP the sort of impact on day-to-day activities that courts have typically found to be a sufficient hardship to support a finding of ripeness?

First, it should be noted that the *Abbott Laboratories* standard refers to hardship to

the "parties," not merely the plaintiff. The agency may benefit as much as the private complainant from prompt judicial review of the challenged action. Perhaps more than any other single factor, placing an entire program of the breadth, dimension, and significance of the CZMP in a position where subsequent challenges could be made to the contents and manner of adoption of the entire CZMP would be intolerable from the point of view of the state and federal defendants. The state, in reliance on the approval and attendant receipt of millions of dollars in administration funds (80 percent of the costs thereof being borne by the federal government), will have proceeded to implement the CZMP in a variety of ways (e.g., staffing, acquiring fee title to certain lands). The federal defendants, faced with applications for §306 approval from other coastal states, and in reliance on the legality of the procedures utilized in adopting and approving the CZMP and in reliance upon their interpretation of the requirements of the CZMA, may proceed to approve other programs, the validity of which approval would then be cast in doubt. Given that all facts pertinent to a determination of whether the federal defendants' approval was proper have occurred and nothing that may occur hereafter can in any way alter the record upon which approval was premised, substantial hardship may result from deferring a decision on the merits.

Second, from plaintiffs' perspective, the hardship attendant upon having to determine whether present and planned activities are consistent with a program which has received §306 approval is severe, particularly in light of the contention that the very lack of specificity which makes compliance difficult if not impossible makes the approval unlawful under the CZMA. The cases which refer to uncertainty in business activities and increased costs do not resolve the questions posed earlier, though they tend to favor plaintiffs in this action. For example, in *Bethlehem Steel Corp., supra*, plaintiffs sought review of regulations of the Environmental Protection Agency designating certain areas in Indiana as air quality maintenance areas. The court found the matter unripe for review, noting that "petitioners are not required to do anything nor refrain from doing anything." 536 F.2d at 162. Petitioner steel and power companies had argued that they suffered immediate injury as a result of the designations because uncertainties in their business operations were thereby created — for example, the need to maintain capital to cover the possible expenditure of funds for pollution control equipment in the event more restrictive air pollution regulations were applied. The court rejected these arguments, finding the claims of uncertainty "not sufficient to warrant our review of an ongoing administrative process . . . . [T]he claims . . . do not involve injuries on the order of . . . concrete immediate business costs. . . ." *Id.* It further noted that petitioners "need not expend any funds at this time since there is no administrative directive to which they must comply nor, of course, do they face any sanctions for noncompliance." *Id.* at 163. Plaintiffs here have argued that they do incur immediate business costs by virtue of §306 approval and that they must comply with §307 or face refusal of permits, licenses, and other manifestations of federal agency approval of particular activities they may desire to undertake on the OCS. In *Phillips Petroleum Co. v. Federal Energy Administration*, 435 F.Supp. 1239 (D.Del. 1977), plaintiffs challenged the agency's interpretation and contemplated application of a 1973 regulatory scheme dealing with the method by which plaintiffs priced petroleum products as a result of increased costs incurred over a given thirteen-month period. The court found that the agency action had a direct and immediate impact on the plaintiffs' conduct of their business.

> Each month that passes without resolution of the present controversy threatens plaintiffs with a dilemma. If they actually charge the prices that they believe they are lawfully entitled to charge, they risk FEA action requiring price rollbacks, cash refunds, and substantial civil and criminal penalties, as well as private treble-damage actions. On the other hand, if plaintiffs forebear from such pricing, they may be forced unnecessarily to delay further in recovering costs they have actually incurred, and they may be permanently barred from recovery by missing market opportunities that will never be repeated.

Id. at 1246-47. *See Commonwealth of Puerto Rico v. Alexander*, 438 F.Supp. 90 (D.D.C. 1977) (expenses required to comply with the challenged regulations found to be injury in fact).

One problem the Court here faces in determining the existence of substantial immediate impact is the emphasis the cases appear to place on plaintiffs being placed in a "dilemma" should the Court defer review. *See, e.g., Abbott Laboratories,*

supra, 387 U.S. at 152; *Gardner, supra*, 387 U.S. at 171 ("quandry"); *National Automatic Laundry, supra*, 443 F.2d at 696. Arguably any costs of determining consistency which plaintiffs must bear after §306 approval result from the congressional scheme; and any increased costs due to the alleged unlawful lack of specificity in the CZMP are speculative. Similarly, any detriment to plaintiffs which results from the six-month period which Congress has afforded a state to exercise its §307 power before consistency is conclusively presumed is not a matter with respect to which plaintiffs may be heard to complain. The difficulty is that to the extent plaintiffs have a substantial interest in having the CZMP comply with the CZMA, if review, particularly of the manner of adoption and approval, is here denied, it is unclear whether such review will ever occur, and it is clear that if it does the hardship to the state and the federal defendants which would result from a successful challenge must also be considered. The court in *Bethlehem Steel Corp.* recognized the validity of this factor.

> The other consideration to be taken into account in determining whether there is sufficient hardship to the parties to warrant our review is that of whether the challenged action will be reviewable in the future. If it will not be reviewable later, our review now may be warranted to protect the right of the parties to have the issues heard in court.

536 F.2d at 163.

C. Conclusion.

Having examined the facts of this case in light of the above precedents, the Court finds that the issue of ripeness is a close question and takes to heart the admonition of the Seventh and District of Columbia Circuits:

> The determination to be made is the imprecise one of considering and balancing the relevant factors. It is "very much a matter of practical common sense," *Continental Air Lines, Inc. v. C.A.B.*, 522 F.2d 107, 124 (D.C.Cir. 1975).

Bethlehem Steel Corp., supra, 536 F.2d at 160.

The Court concludes that the approval of the federal defendants of the CZMP under §306 of the CZMA is ripe for review. First, the agency action challenged herein is final. Second, while there are mixed questions of law and fact involved in the agency's findings under §306, the facts are either documentary or not in dispute and the law is a proper subject for judicial review. Third, consideration of the issues involved in the §306 approval would not be sharpened by further actions taken with respect to the Program. Review of that which has occurred would not be further particularized by awaiting a challenge to a refusal of the state to certify one of plaintiffs' proposed activities as consistent with the CZMP. Fourth, while plaintiffs are not faced with the classic dilemma found in *Abbott Laboratories*, nevertheless they do face the onerous task of complying with a program whose provisions they claim are too uncertain to permit approval under §306 properly to have occurred. Fifth, the magnitude, impact, and significance of the CZMP, and the interests of the state and federal government in connection therewith, bespeak the need to resolve at the earliest practicable date the challenges to its approval, particularly those directed toward the manner by which it was adopted by the state and approved by the federal defendants. Severe hardship could accrue to defendants (particularly the state defendant) should a successful challenge be mounted subsequent to its implementation. Sixth, the public interest demands that claims that federal statutes have been violated (the CZMA and NEPA) should receive a judicial forum. The propriety of the §306 approval will never be more ripe for disposition. If not challenged at this time, important public interests may never receive the judicial forum to which they are entitled.

The Court concludes further that no issues regarding §307 are presently ripe for disposition. Whether the state will utilize its consistency powers improperly to retard or halt energy development are wholly speculative. No specific activities contemplated by plaintiffs have been presented or form any part of the record in this case; no anticipated refusals to certify have been alleged or presented. The construction of particular provisions of the CZMP will have to await the presentation of a concrete controversy over their meaning or application to specific activities. Similarly, the Court concludes that there is no need to engage in a treatise-like recital of each provision of the CZMA. Such construction of provisions and regulations as is necessary to review the federal defendants' findings under the limited standard of review applicable to this case will be undertaken. As with the CZMP, a detailed treatment of various provisions of the CZMA must await a more concrete dispute than is here presented for resolution.

STANDARD OF REVIEW

The standard of review has been the subject of serious dispute between the parties. Plaintiffs argue that while purely factual determinations made by an administrative agency without formal hearings are governed by the "arbitrary or capricious" standard of 5 U.S.C. §706(2)(A), nevertheless purely legal determinations, determinations of both questions of fact and law (such as mixed questions), and determinations of fact questions predicated on documentary evidence which the reviewing court is in as good a position as the agency to appraise all permit a reviewing court to undertake *de novo* review and to substitute its judgment for that of the agency, particularly where the agency possesses no special technical qualifications or long-standing expertise with respect to the subject matter of the challenged action. Plaintiffs argue that the federal defendants' §306 approval of the CZMP falls within the above categories warranting *de novo* consideration.

The starting point for any inquiry into the appropriate standard of review of agency action is §10 of APA, 5 U.S.C. §706:

> To the extent necessary to decision and when presented, the reviewing court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall —
>
> . . .
>
> (2) hold unlawful and set aside agency actions, findings, and conclusions found to be —
>
> (A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law;
>
> . . . .
>
> (C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;
>
> (D) without observance of procedure required by law; . . . .

As with so many statutory standards, the case law has placed a significant gloss on the meaning of the literal language, affecting its applicability in various contexts, its meaning, and the factors to be considered in determining whether the administrative action under review falls within the standard thus established.

One problem initially to be resolved is the ambiguous overlap among the "arbitrary and capricious," "excess of statutory authority," and "without observance of procedure" standards set forth in paragraphs (A), (C), and (D) of §706(2), inasmuch as all apply to "agency action, findings, and conclusions." Few cases deal with this difficulty; and the parties to this litigation have argued throughout for application of paragraph (A) alone or *de novo* review of what have been characterized as mixed questions of fact and law.

The Court distinguishes between (a) review of the federal defendants' decision to approve the CZMP based on the Acting Administrator's finding that its contents and manner of adoption by the state satisfied the substantive and procedural requirements of the CZMA, and (b) review of the agency's determination that the manner of §306 approval satisfied the procedural requirements of CZMA and NEPA. As to the former, the arbitrary and capricious standard governs; but as to the latter, the Court focuses its review on the observance of procedure standard. *Cady v. Morton, supra,* 527 F.2d at 793 (referring to the standard as "*ad hoc* in character"), citing *Lathan v. Brinegar,* 506 F.2d 677 [7 ERC 1048] (9th Cir. 1974) and *Trout Unlimited v. Morton,* 509 F.2d 1276, 1282 [7 ERC 1321] (9th Cir. 1974) (the procedural standard "is less helpful in reviewing the sufficiency of an EIS than one might wish").[7]

---

[7] The excess of statutory authority standard applies only to the extent that it authorizes judicial review of the agency's construction of the CZMA. *Ethyl Corp. v. EPA,* 541 F.2d 1, 34 & n.71 (D.C.Cir.), *cert. denied,* 426 U.S. 941 (1976). Here, there is no claim that the Acting Administrator's §306 approval exceeded his statutory authority except to the extent that the findings (and statutory construction) on which it was based are assailable under the arbitrary and capricious standard and in that sense unauthorized. Nor is the agency's authority to promulgate regulations under §§305 and 306 called into question. Thus, the excess of statutory authority standard has no significant bearing on this Court's review of the §306 approval.

The "substantial evidence" standard for agency findings of fact (5 U.S.C. §706(2)(E)) is inapplicable in that the substantial evidence test applies only to review of findings made on a hearing record. *Tiger International, Inc. v. CAB,* 554 F.2d 926, 935-36 (9th Cir. 1977), construing *Camp v. Pitts,* 411 U.S. 138, 141 (1973). *Accord, California Citizens Band Association v. U.S.,* 375 F.2d 43, 53-54 (9th Cir.), *cert. denied,* 389 U.S. 844 (1967). *See Hughes Air Corp. v. CAB,* 482 F.2d 143 (9th Cir. 1973). In this case, the agency was not required to act on the basis of a recorded hearing and the public hearings held provided an opportunity for the submission of comments and information to the agency, to be utilized by it in arriving at its determination under §306 of CZMA.

A distinction must also be made with regard to the applicability of the observance of procedure standard to this case. To the extent that the Acting Administrator is required under the CZMA to find that certain procedures were followed in placing the CZMP before him for §306 approval — these procedures relating to the fact and manner of adoption of the CZMP by the state — as noted above, the arbitrary and capricious standard applies. The observance of procedure standard applies to the procedures required of the federal agency in undertaking §306 approval. These are the procedures required by §306 of the federal agency itself and also those required by NEPA with respect to the environmental impact review process.

The arbitrary and capricious standard of review has been the subject of judicial opinions too numerous to cite here. It has been construed by the Supreme Court in *Citizens to Preserve Overton Park, Inc. v. Volpe*, 401 U.S. 402, 416 [2 ERC 1250] (1971).

> To make this finding the court must consider whether the decision was based on a consideration of the relevant factors and whether there has been a clear error of judgment. [Citations omitted.] Although this inquiry into the facts is to be searching and careful, the ultimate standard of review is a narrow one. The court is not empowered to substitute its judgment for that of the agency.

Quoted in *Bowman Transportation, Inc. v. Arkansas-Best Freight System, Inc.*, 419 U.S. 281, 285 (1974) ("The agency must articulate a 'rational connection between the facts found and the choice made' ").

This standard of review was treated at length in a thoughtful opinion by the District of Columbia Circuit in *Ethyl Corp. v. EPA*, 541 F.2d 1 [8 ERC 1785] (D.C.Cir. 1976). In reviewing a challenge to informal rule-making by the EPA requiring annual reductions in the lead content of gasoline pursuant to its authority under §211(c)(1)(A) of the Clean Air Act, the court stated:

> This standard of review is a highly deferential one. It presumes agency action to be valid. [Citation omitted.] Moreover, it forbids the court's substituting its judgment for that of the agency [citations omitted] and requires affirmance if a rational basis exists for the agency's decision. [Citations omitted.]
>
> This is not to say, however, that we must rubber-stamp the agency decision as correct. To do so would render the appellate process a superfluous (although time-consuming) ritual . . . . This is particularly true in highly technical cases.
>
> . . .
>
> There is no inconsistency between the deferential standard of review and the requirement that the reviewing court involve itself in even the most complex evidentiary matters; rather, the two indicia of arbitrary and capricious review stand in careful balance. The close scrutiny of the evidence is intended to educate the court. It must understand enough about the problem confronting the agency to comprehend the meaning of the evidence relied upon and the evidence discarded; the questions addressed by the agency and those bypassed; the choices open to the agency and those made. The more technical the case, the more intensive must be the court's effort to understand the evidence, for without an appropriate understanding of the case before it the court cannot properly perform its appellate function. But that function must be performed with conscientious awareness of its limited nature. The enforced education into the intricacies of the problem before the agency is not designed to enable the court to become a superagency that can supplant the agency's expert decision-maker. To the contrary, the court must give due deference to the agency's ability to rely on its own developed expertise. [Citation omitted.] The immersion in the evidence is designed *solely* to enable the court to determine whether the agency decision was rational and based on consideration of the relevant factors. [Citation omitted.] Thus, after our careful study of the record, we must take a step back from the agency decision. We must look at the decision not as the chemist, biologist or statistician that we are qualified neither by training nor experience to be, but as a reviewing court exercising our narrowly defined duty of holding agencies to certain minimal standards of rationality.

Id. at 34-36 (emphasis original).

The court noted that despite the use of "clear error of judgment" in *Overton Park*, the Supreme Court did not intend thereby to supplant the arbitrary and capricious standard with the broader-ranging review of district court fact findings permitted an appellate court under the "clearly erroneous" standard of Rule 52(a), F.R.Civ.P. The court concluded: "Accordingly, in the context of 'arbitrary and capricious' re-

view, we shall reverse for a 'clear error of judgment' only if the error is so clear as to deprive the agency's decision of a rational basis." 541 F.2d at 35 n.74.

While the agency's decision need not be based on substantial evidence, nevertheless "a decision must be considered 'arbitrary and capricious' if the facts on which it is purportedly based are not supported by the record." *National Citizens Committee for Broadcasting v. FCC*, 555 F.2d 938, 956 (D.C.Cir. 1977).

As noted previously, one of the features of this litigation which adds complexity to the standard of review issue is the fact that in undertaking to approve the CZMP under §306, the Acting Administrator is required to make certain findings, both as to content and manner of adoption by the state; yet these findings necessarily embrace a judgment on his part as to what the statute requires and what the agency's regulations themselves require, particularly with regard to (1) the specificity of a program's content under §§305(b) and 306(c), (d), and (e) and with regard to (2) what constitutes "adequate consideration of the national interest" under §306(c)(8). Thus, the Court in reviewing §306 approval must also review the Acting Administrator's construction and interpretation of the CZMA and the regulations promulgated thereunder.

That deference is due an agency's interpretation of its own regulations and the statute it is charged with administering is indisputable. *Seattle Trust & Savings Bank v. Bank of California, N.A.*, 492 F.2d 48, 50 (9th Cir. 1974), citing *Udall v. Tallman*, 380 U.S. 1 (1965); *U.S. v. Consolidated Mines & Smelting Co., Ltd.*, 455 F.2d 432, 446 (9th Cir. 1971) ("[T]he ultimate criterion is the administrative interpretation, which becomes of controlling weight unless it is plainly erroneous or inconsistent with the regulation . . ."); *Ethyl Corp., supra*, 541 F.2d at 31 n.64, citing *Train v. NRDC, Inc.*, 421 U.S. 60 (1975). The agency's construction should not be overruled unless clearly wrong. *American Trucking Association, Inc. v. U.S.*, 425 F.Supp. 903, 907 (D.D.C.), *aff'd*, 425 U.S. 955 (1975).

The critical inquiry is the degree of deference due the agency's interpretation. This turns on a number of factors. The principle of deference itself is premised on the twin notions of agency expertise and congressional acquiescence in that interpretation. *Wilderness Society v. Morton*, 479 F.2d 842, 866 [4 ERC 1977] (D.C. Cir.) (en banc), *cert. denied*, 411 U.S. 917 [5 ERC 1208] (1973); *Morton v. Ruiz*, 415 U.S. 199, 230 (1974). In an oft-quoted passage from *Skidmore v. Swift & Co.*, 323 U.S. 134, 140 (1944), the Court stated that the weight given an administrative decision "will depend upon the thoroughness evident in its consideration, the validity of its reasoning, its consistency with earlier and later pronouncements, and all those factors which give it power to persuade, if lacking power to control." Quoted in *Morton v. Ruiz, supra*, 415 U.S. at 237; *Hodgson v. Consolidated Freightways, Inc.*, 503 F.2d 797, 800 (9th Cir. 1974).

The clearest cases for the reviewing court's taking a hard look at the agency's interpretation of a controlling statute or regulation arise where the agency action is challenged on the ground that (1) it exceeds the agency's statutory authority, *Seattle Trust & Savings Bank, supra*, 492 F.2d at 50, (2) its interpretation is contrary to the evident congressional intent manifested in the language of the statute (and supported by the legislative history), *Morton v. Ruiz, supra*, 415 U.S. at 237 ("In order for an agency interpretation to be granted deference, it must be consistent with the congressional purpose"); *N.L.R.B. v. Brown*, 380 U.S. 278, 291 (1965); *Hart v. McLucas*, 535 F.2d 516, 520 (9th Cir. 1976) ("[W]hen . . . the administrative construction is clearly contrary to the plain and sensible meaning of the regulation, the courts need not defer to it"), or (3) its action does not call for the application of any special or long-standing expertise, *Texas Gas Transmission Corp. v. Shell Oil Co.*, 363 U.S. 263, 268-69 (1960) (agency construction of private contract expressly based on application of "ordinary rules of contract construction").

The Supreme Court has also noted the difference between the deference to be accorded "legislative" regulations, which have "the force and effect of law," and "interpretive" regulations, to which a lesser deference is owed. *Batterton v. Francis*, U.S. , 97 S.Ct. 2399, 2405 n.9 (1977). With respect to the former, where Congress has expressly delegated to the agency the power to promulgate regulations which interpret statutory terms, the arbitrary and capricious standard applies to the agency's regulations; but in the latter case, "[v]arying degrees of deference are accorded to administrative interpretations, based on such factors as the timing and consistency of the agency's position, and the general nature of its expertise. [Citations omitted.]" *Id.* In affirming an appellate court's denial of enforcement of an N.L.R.B. order, the Court has stated, by

way of limitation on the principle of deference to agency interpretations of applicable statutes.

> Reviewing courts are not obliged to stand aside and rubber-stamp their affirmance of administrative decisions that they deem inconsistent with a statutory mandate or that frustrate the congressional policy underlying a statute . . . . [W]here, as here, the review is not of a question of fact, but of a judgment as to the proper balance to be struck between conflicting interests, "[t]he deference owed to an expert tribunal cannot be allowed to slip into a judicial inertia which results in the unauthorized assumption by an agency of major policy decisions properly made by Congress." *American Ship Building Co. v. National Labor Relations Board* 380 U.S. [300] at 318 . . . [(1965)].

N.L.R.B. v. Brown, supra, 380 U.S. at 291 (1965). *See Hodgson, supra,* 503 F.2d at 800.

A somewhat special situation is presented where an agency charged with implementing a new statute construes it. Courts tend to be more deferential to practical administrative interpretations of disputed provisions of the governing statute in such a case.

> Particularly is this respect due when the administrative practice at stake "involves a contemporaneous construction of the statute by the men charged with the responsibility of setting its machinery in motion, of making the parts work efficiently and smoothly while they are yet untried and new." [Citation omitted.]

Power Reactor Development Co. v. International Union, etc., 367 U.S. 396, 408 (1961), quoted in *NRDC, Inc. v. Train,* 510 F.2d 692, 706 (D.C.Cir. 1975). In *Power Reactor* the Court upheld an order of the Atomic Energy Commission continuing in effect a provisional construction permit issued for a nuclear power reactor. In so holding the Court, in addition to the factor of contemporaneous construction noted above, emphasized the fact that the agency's interpretation had repeatedly been brought to the attention of Congress, thereby suggesting congressional acquiescence in the administrative construction. *Id.* In *Washington Public Power Supply System v. FPC,* 358 F.2d 840 (D.C.Cir.), *rev'd on other grounds,* 387 U.S. 428 (1966), the court, after holding that where an agency must and does initially determine the specific application of a statutory provision the reviewing court is limited to deciding whether the agency interpretation "has 'warrant in the record' and a reasonable basis in law," *id.* at 846, quoted Mr. Justice Frankfurter's dissent in *I.C.C. v. J-T Transport,* 368 U.S. 81, 127 (1961):

> The factors to be considered on judicial review of such an administrative determination include the precision of the statutory language, the technical complexity of the relevant issues, the need for certainty as against experimentation, and the likelihood that Congress foresaw the precise question at issue and desired to express a foreclosing judgment on it.

See also Ethyl Corp., supra, 541 F.2d at 31 n.64; *NORML v. DEA,* 559 F.2d 735, 749 n.64 (D.C.Cir. 1977) ("[D]eference is owed to any agency decision construing a statute continually applied by the interpreting agency — particularly where the statutory meaning 'is enhanced by technical knowledge . . .'").

The application of these principles to the facts of this case satisfies the Court that considerable deference is due the federal defendants' interpretation of their approval regulations. First, the Acting Administrator's approval has proceeded on the assumption that the regulations are clear; and consequently, he has not articulated in precise terms what he understands the regulations to mean or require or how the provisions of the CZMP satisfy the particular provisions of each applicable regulation. He has expressly stated which of the 1975 regulations he has considered with reference to each of the specific findings required under the CZMA in order for §306 approval to be granted. However, to the extent his approval of the California Program can be said to be premised on interpretation of the NOAA regulations at all, his construction thereof proceeds *sub voce;* the fact that the CZMP has been found to meet their requirements is tantamount to little more than a statement that the provisions of the Program contain that which the regulations demand. No clearer interpretation has been forthcoming; and presumably, in the Acting Administrator's view, no clearer expression is here required. This makes judicial review difficult, to say the least, especially where the regulations on the whole have reference to fairly technical requirements, compliance with which the agency is in a far better position than the court to assess.

Second, although NOAA has no long-standing experience and expertise in administering the CZMA, nevertheless, it appears (as will be discussed *infra*) that Con-

gress placed responsibility for administering the CZMA in the Department of Commerce with the clear expectation that such responsibility ultimately would be delegated to NOAA, an agency favored by Congress expressly because of its technical expertise in matters relating to the Nation's coasts. Moreover, during enactment of the 1976 Amendments, Congress applauded NOAA's administration of the Act and directed it to promulgate regulations further clarifying the requirements of the Act (specifically §306(c)(8)). In short, Congress, fully cognizant of the federal defendants' efforts and activities in administering the CZMA since 1972, apparently determined to reaffirm its original vesting of considerable discretion in NOAA, thereby calling into play the greater deference due "legislative" regulations noted above.

Third, as will be shown subsequently, the Court concludes that the interpretation evidenced by the Acting Administrator's approval of the CZMP is not contrary to, but rather consistent with, the evident congressional intent in this instance. Fourth, the "special situation" alluded to where the agency is charged with implementing a new statute is here presented, and consequently greater deference is due.

Finally, the Court adheres to Mr. Justice Frankfurter's enumeration of factors to be considered and concludes that all four here favor according considerable deference to the federal defendants' implicit interpretation of the NOAA program approval regulations.

SCOPE OF REVIEW

From the inception of this lawsuit, the parties have been at odds over the issue of the permissible scope of review of the Acting Administrator's approval of the CZMP under §306. Defendants have urged the Court to restrict its review to the administrative record before the Acting Administrator, to be supplemented only if necessary to explain the basis for his decision by affidavits or testimony of the Acting Administrator. Plaintiffs have argued that the Court consider additional evidence necessary to understand the record, to explain or clarify ambiguities therein, and to illuminate deficiencies in the environmental impact statement.

Both sides agree that any consideration of the appropriate scope of review must commence with *Overton Park* and *Camp v. Pitts, supra*. Under §10 of APA, 5 U.S.C. §706, review is to be based on "the whole record"; however, the statute does not define what is meant by this expression and case law construing it is scarce. Moreover, there is no statutory requirement, either under APA or the CZMA, that the record take a particular form.

While judicial review is limited to the administrative record, if that record is inadequate to disclose the factors upon which the Acting Administrator's decision was based, the Court may require additional "explanation" by way of affidavits or testimony from the responsible official(s) or remand to the agency for formal findings. *Overton Park, supra*, 401 U.S. at 419-20; *Camp v. Pitts, supra*, 411 U.S. at 142-43. To be sure, "inquiry into the mental processes of the administrative decision-makers is usually to be avoided. [Citation omitted.] And where there are administrative findings that were made at the same time as the decision, . . . there must be a strong showing of bad faith or improper behavior before such inquiry may be made." 401 U.S. at 420. The Court was even more explicit in *Camp*:

> Unlike *Overton Park*, in the present case there was contemporaneous explanation of the agency decision . . . . The validity of the [agency's] action must, therefore, stand or fall on the propriety of that finding. . . . If that finding is not sustainable on the administrative record made, then the . . . decision must be vacated . . . and the matter remanded . . . for further consideration.

411 U.S. at 143.

At first blush the present action appears to be more closely assimilable to the pattern in *Overton Park* — the Acting Administrator's findings, while technically made contemporaneously with his approval of the CZMP, obviously could not avoid taking into account plaintiffs' claims asserted in this law suit (filed two months earlier). Further scrutiny, however, requires classification, if at all, in the category of action represented by *Camp v. Pitts*. The *Overton Park* court noted that in a case where the agency decision issued unaccompanied by any statement of reasons, any explanation following upon the heels of an action seeking review of that decision would likely take on the aspect of "litigation affidavits." "These affidavits [are] merely '*post hoc*' rationalizations [citation omitted] which have traditionally been found to be an inadequate basis for review." 401 U.S. at 419. Recognizing the potential problem presented by a district court having to

inquire into the mental processes of the responsible officials, the Court cautioned:

> It may be that the Secretary can prepare formal findings . . . that will provide an adequate explanation for his action. Such an explanation will, to some extent, be a '*post hoc* rationalization' and thus must be viewed critically. If the District Court decides that additional explanation is necessary, that court should consider which method will prove the most expeditious so that full review may be had as soon as possible.

Id.

No "additional explanation" is here required — nor is there need to view the Acting Administrator's November 7, 1977 findings as critically as those of the Secretary of Transportation in *Overton Park*. This is so because: (1) when the Acting Administrator had communicated to plaintiffs on September 8th his determination to approve the CZMP under §306, plaintiffs sought and this Court issued a temporary restraining order preventing the Acting Administrator from formal effectuation of his approval; and (2) no strong showing of bad faith or improper behavior on the part of the responsible officials has been presented. (This is not to disregard the sweeping allegation that the environmental review process was a sham undertaking to window dress a determination to approve the CZMP before the NEPA review was ever commenced.)[8]

As regards the agency's production of the "whole record" in this Court, plaintiffs, pursuant to the October 7, 1977 order, submitted the evidence they urged the Court to consider. This evidence included, among other things, affidavits of plaintiffs' agents and employees seeking to establish irreparable harm and affidavits of various experts seeking to demonstrate the inadequacy both of the CZMP and the FEIS. It also included documentary evidence which plaintiffs asserted either was or should have been before the Acting Administrator at the time of his approval of the CZMP, and thus included in the administrative record laid before the Court by the federal defendants.

Among the alleged deficiencies are federal defendants' failure to include the following documents or groups of documents:

(1) the Biennial Report to the Legislature of the California Energy Commission, Volumes 4 and 7 (May 1977);

(2) permit decisions of the California Coastal Commission and various regional commissions (which the state defendant has stated constitute precedents under the Coastal Act);

(3) certain papers prepared by the Governor's Office of Planning and Research;

(4) correspondence between the Coastal Commission and federal defendants;

(5) the California Coastal Commission "Meeting Notice" and "Agenda" for July 19-20, 1977;

(6) a memorandum from the Coastal Commission's Executive Director to the Commissioners (July 11, 1977);

(7) "Threshold Papers" (prepared by the staff at OCZM, which set forth certain "minimum requirements" which any program submitted for §306 approval was required to satisfy) (December 8, 1975 and May 24, 1976);

(8) NOAA Proposed Program Approval (§306) Regulations, 15 C.F.R. Part 923, 42 Fed.Reg. 43552 (August 29, 1977);

(9) NOAA Proposed Consistency (§307) Regulations, 15 C.F.R. Part 930, 42 Fed.Reg. 43586 (August 29, 1977);

(10) affidavits prepared by plaintiffs in connection with the filing of this lawsuit and plaintiffs' motions for preliminary relief[9]; and

(11) interrogatories from plaintiffs to federal defendants and the state defendant, and defendants' responses thereto (October 14, 1977).

Defendants objected generally to the receipt in evidence of the above on the grounds that consideration by the Court of plaintiffs' evidence would contravene the scope of review to which the Court must adhere under *Overton Park* and *Camp v. Pitts*

---

[8] Plaintiffs' reference to the fact that in issuing the DEIS and RDEIS the federal defendants indicated a tentative decision to approve is unpersuasive.

[9] The Court naturally has received these in connection with plaintiffs' motion for preliminary relief, but concludes that they do not constitute part of the administrative record. "The book has to be closed at some point in time." *Silva v. Lynn*, 482 F.2d 1282, 1286 n.5 (1st Cir. 1973). Plaintiffs had been given ample opportunity to present and submit comments to the Acting Administrator. They had done so. No reason appears why the fact of their filing an action should extend the period during which the agency was required to accept comments.

and that plaintiffs had the opportunity to submit such evidence to the agency during the review process. This last objection appears directed more at plaintiffs' expert testimony than at documents which plaintiffs assert were or, because of their notoriety and obvious importance, should have been before the Acting Administrator. To the extent it is directed at documents which were allegedly in the federal defendants' files, defendants' latter objection must be viewed as tantamount to an assertion that those challenging informal agency action have the burden of assuring that the agency considers its own records and documents. Certainly no such burden exists. *See County of Suffolk v. Secretary of the Interior*, 562 F.2d 1368, 1385 [10 ERC 1513] (2d Cir.), *cert. denied*, 429 U.S. 1307 [11 ERC 1272] (1977).

If the Court is to discharge its responsibility under APA, the "whole record" which was before the agency must be produced:

> . . . [T]he law requires production of the entire administrative record, . . . While there may be instances in which the entire record need not be filed, where the correctness of factual findings are involved or where complainants request the full record, . . . the agency must produce it in court.

Silva v. Lynn, 482 F.2d 1282, 1283 n.1 [5 ERC 1654] (1st Cir. 1973) (HUD decision to assist in a housing project); *NRDC, Inc. v. Train*, 519 F.2d 287, 291 (D.C.Cir. 1975); *Overton Park, supra*, 401 U.S. at 419-20.

This principle similarly demonstrates that defendants' first ground of objection — that receipt of such evidence by the Court would violate the limited scope of review mandated by APA — begs the question, namely, what constitutes the "whole record" in this instance?

During the February hearings, the Court tentatively admitted all plaintiffs' evidence, reserving a final ruling as to its admissibility (and for what purpose) pending plaintiffs' submission of a document setting forth the issues as to which the evidence was offered. That document having been received, the Court has determined to consider and has considered plaintiffs' proffered evidence for the purpose, unless otherwise indicated, of determining whether the federal defendants considered and/or lodged with the Court all that they should have during the review process and, if not, whether their failure so to do infected their decision to grant final approval to the CZMP to such a degree as to require this Court's vacating it and remanding the matter for further consideration.

Whether certain evidence be deemed part of the "whole record" or not, the Court notes that where (as here) the adequacy of the environmental impact statement is challenged, evidence pertinent thereto is admissible, not subject to the stricter constraints to which the receipt of other evidence (admittedly not part of the administrative record) is subject. *County of Suffolk, supra*. As the Second Circuit explained, with reference to the district court's receipt of evidence outside the administrative record in another challenge to the adequacy of an EIS:

> *Nor was the court obliged to restrict its review to the administrative record.* Although the focus of judicial inquiry in the ordinary suit challenging nonadjudicatory, nonrulemaking agency action is whether, *given the information available to the decisionmaker at the time*, his decision was arbitrary or capricious, and for this purpose "the focal point for judicial review should be the administrative record already in existence, not some new record made initially in the reviewing court", *Camp v. Pitts*, 411 U.S. 138, 142, 93 S.Ct. 1241, 1244, 36 L.Ed.2d 106 (1973), in NEPA cases, by contrast, a primary function of the court is to insure that the information available to the decisionmaker includes an adequate discussion of environmental effects and alternatives, *Natural Resources Defense Council, Inc. v. Callaway*, 524 F.2d 79, 90-94 (2d Cir. 1975); *Greene County Planning Board v. FPC*, 455 F.2d 412, 419-20 [3 ERC 1595] (2d Cir. 1972), which can sometimes be determined only looking outside the administrative record to see what the agency may have ignored.
>
> *A suit under NEPA challenges the adequacy of part of the administrative record itself — the EIS.* Glaring sins of omission may be evident on the face of the statement. [Citations omitted.] Other defects may become apparent when the statement is compared with different parts of the administrative record. [Citations omitted.] Generally, however, allegations that an EIS has neglected to mention a serious environmental consequence, failed adequately to discuss some reasonable alternative, or otherwise swept "stubborn problems or serious criticism . . . under the rug," *Silva v. Lynn*, 482 F.2d at 1285, raise issues sufficiently important to permit introduction of new evidence

Id. at 1384-85 (first and third emphases supplied; second emphasis original). *See Cady v. Morton,* 527 F.2d 786, 796 (9th Cir. 1975); *Friends of the Earth v. Coleman,* 513 F.2d 295, 300 & n.6 [7 ERC 1827] (9th Cir. 1975); *Trout Unlimited v. Morton,* 509 F.2d 1276, 1281, 1284 (9th Cir. 1974); *Life of the Land v. Brinegar,* 485 F.2d 460, 463, 469-73 (9th Cir. 1973), *cert. denied,* 416 U.S. 961 (1974). As previously noted, plaintiffs have lodged such expert testimony, and the Court has received it.

Plaintiffs have complained that the agency review of the CZMP was fatally infected by the agency's application of the January 1975 §306 regulations. Plaintiffs suggest that at least in some respects (and particularly with regard to §306(c) (8)), these regulations fail to take account of the 1976 Amendments to the Act and suggest that the CZMP should have been tested against the proposed regulations instead.[10] The federal defendants, to the contrary, argue that the CZMP must be tested by reference to the regulations in effect at the time it was developed and submitted to OCZM, that the 1976 Amendments worked no major changes in the approval requirements, and that, in any event, the CZMP meets all requirements of the CZMA, as amended.

The Court looks to the proposed and interim final regulations for the limited purpose of determining how the agency's views of the requirements of the CZMA may have changed in light of its experience in administering the CZMA and in light of the 1976 Amendments. To the extent that changes have been substantial and to the extent that the CZMP appears not to qualify for approval under the later regulations, the evidence is relevant to the issue of whether approval in late 1977 at the very time the new regulations were published in proposed form constituted an abuse of discretion.

ADOPTION BY THE STATE

On its face the record produced by the federal defendants establishes that the CZMP was "adopted by the state" within the meaning of CZMA §306(c)(1). In pertinent part this section provides:

> (c) Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that:
>
> (1) The state has developed and adopted a management program for its coastal zone in accordance with rules and regulations promulgated by the Secretary. . . .

The regulation which covers this requirement of §306(c) (1) is 15 C.F.R. §923.31, which provides that "(a). . . the management program must show evidence that: (1) The management program has been formally adopted in accordance with State law, or in its absence, administrative regulations; . . . " Subsection (b) (1) amplifies the agency's interpretation of this requirement:

> The management program must demonstrate that it represents the official policy and objectives of the State. In general, this will require documentation in the management program that the State management entity has formally adopted the management program in accordance with either the rules and procedures established by statute or, in the absence of such law, administrative regulations.

This presents no problem as to the first four of the five "elements" of which the Acting Administrator stated the CZMP consists: (1) the Coastal Act of 1976 (which he characterized as comprising "the core element" of the Program); (2) the Coastal Conservancy Act of 1976; (3) the Urban and Coastal Park Bond Act of 1976; (4) Coastal Commission Regulations promulgated pursuant to the Coastal Act of 1976; and (5) the "Program Description" (contained in Part II of the combined *State of California Coastal Management Program and Final Environmental Impact Statement* ("FEIS").[11] Approval of the California Coastal Management Program (November 7, 1977) ("Findings") at 3.

It is with respect to the status of this last element — the Program Description —

[10] The proposed regulations have since been replaced by "interim final" regulations. 43 Fed.Reg. 8378 (March 1, 1978).

[11] *See supra* note 3. This Program Description embraces the Introduction and Chapters 1 through 11 of Part II of what has heretofore been referred to simply as the FEIS. The only additional matter contained in Part II is a transmittal letter from the Governor of California to NOAA indicating that he has reviewed the CZMP and approves it, in accordance with the requirement of §306(c)(4).

that the Court has from the inception of this litigation found difficulty. Plaintiffs assert that the Program Description was prepared by Coastal Commission staff and that the record contains no evidence of its ever having been reviewed, much less formally adopted, by the Coastal Commission itself, even assuming that formal adoption by such would constitute "formal adoption by the State." Apparently only Chapter 11 was approved by the Coastal Commission, but plaintiffs contend that the approval was without notice and opportunity for public participation required not only by the CZMA but by the California Open Meeting Act (Cal.Gov.Code §§11120 *et seq.*).

The Introduction to Part II (the Program Description) of the FEIS states:

> Part II of this document is a narrative description of the legislative and administrative measures embodied in the C[Z]MP, organized to correspond to the specific requirements of the Coastal Zone Management Act of 1972, as amended. As such, the bulk of Part II is explanatory, descriptive, historical, and interpretative in nature. Chapter 11 is quite different in that it is a definitive policy statement adopted by the Coastal Commission. Chapter 11 explains how national considerations were addressed in the development of the C[Z]MP, illustrates how Federal agencies were involved in California's coastal planning, and outlines a general approach for implementing the Federal Consistency provisions of Section 307 of the CZMA in California. Several public hearings have been held on this material as it has evolved over the past two years.

FEIS at 15.[12]

Turning first to plaintiffs' charge that Chapter 11 was improperly adopted by the Coastal Commission, the Court notes that §11125 of the California Government Code provides:

> (a) The state agency shall prepare an agenda for, and provide notice of, its meeting to any person who requests such notice in writing. Notice shall be given at least one week in advance of and shall include the agenda for the meeting. . . .
>
> (b) Notice shall include the items of business to be transacted, and no item shall be added to the agenda subsequent to the provisions of such notice, absent unforeseen emergency conditions. . . .
>
> (c) A person may request, and shall be provided, notice pursuant to subdivision (a) for all meetings of the agency . . . only for a specific meeting or meetings. . . .

Section 11125.1 provides:

> (a) Notwithstanding any other provision of this chapter, agendas of public meetings and copies of public documents, or summaries thereof, which are to be discussed or considered at a public meeting of a state agency shall be made available to the public by the state agency prior to the commencement of such meeting. . . .

Plaintiffs have failed to allege that they requested notice of the July 19-20, 1977 meeting of the Coastal Commission at which Chapter 11 was formally adopted, either specifically or as part of an ongoing request for notice of "all meetings" under §11125(c). Nor have plaintiffs alleged that copies of revised Chapter 11 were unavailable to the public prior to the meeting under §11125.1(a). Nevertheless, plaintiffs have submitted an undated "Meeting Notice" and "Tentative Agenda" for those meetings. That notice omits any reference to presentation of Chapter 11 for action thereon by the Commission, although a July 11, 1977 memo to the Commissioners from Joseph E. Bodovitz, Executive Director of the Commission, submits the revised Chapter 11 and notes that it is to be considered by the Commission at the July 19-20 meeting. Thus, although on the record before the Court plaintiffs lack standing to complain of a violation of §11125(a), it would appear that a violation of §§11125.1(a) and 11125(b) may have occurred.

Even assuming such to be the case, the question remains whether this Court can grant plaintiffs the relief they seek — to wit, treating Chapter 11 as a nullity for purposes of reviewing the Acting Administrator's finding that the CZMP includes

---

[12] One substantive change wrought by revised Chapter 11 is described by the staff of the OCZM in their response to comments received on the RDEIS:

> Based on comments received on the draft, Chapter 11 . . . reflects a change in the Commission's earlier intention . . . delegate the Federal consistency decisions to local units of government after approval of local coastal programs. This change in policy — to maintain consistency determinations at the state level subject to review and comment by affected local, state, and federal agencies and interested groups — will assure that these decisions will reflect continuing statewide, regional, and national interests in the decisions.

11 as a nullity for

Chapter 11 of Part II of the FEIS and that Chapter 11 was formally adopted by the state within the meaning of §306(c)(1) and 15 C.F.R. §923.31. Section 11130, the only provision of the Open Meeting Act (Article 9 of Chapter 1 of Part 1 of Division 3 of the Government Code) which addresses the subject of relief for violations of that act, provides:

> Any interested person may commence an action by mandamus, injunction, or declaratory relief for the purpose of stopping or preventing violations or threatened violations of this article or to determine the applicability of this article to actions or threatened future actions by members of the state agency.

The remedial section looks to present and prospective violations; it is silent with respect to what relief, if any, is available for past violations of §§11125(b) and 11125.1(a). The parties have not addressed the issue and the Court, in reviewing what little case law has been reported under Article 9 and in reviewing the other provisions of Part 1 of Division 3 (dealing with "State Departments and Agencies" within the "Executive Department") has found no authority for plaintiffs' assault on the validity of the Commission's adoption of Chapter 11 as a "declaration of policy."[13] The few cases that have arisen under §11130 and the Open Meeting Act generally have involved plaintiffs' seeking present or prospective relief; none has sought to overturn action for violation of the notice and agenda provisions of §§11125 and 11125.1. *See, e.g., California State Employees Association v. State Personnel Bd.*, 31 Cal.App.3d 1009, 108 Cal.Rptr. 57 (3d Dist. 1973); *Harmer v. Superior Court*, 275 Cal.App.2d 345, 79 Cal.Rptr. 855 (3d Dist. 1969). In possibly the most closely analogous situation — that of a challenge to the validity of regulations — the California statute expressly provides for declaratory relief following the promulgation of the regulation (Cal.Gov.Code §11440), but conditions judicial relief on a finding of "substantial failure to comply with the provisions of this chapter [4.5]." The adoption of Chapter 11 has not been challenged on this ground, rather, the sole ground of attack has been alleged failure to comply with Article 9 of Chapter 1. The Court rejects this ground of attack, finding that plaintiffs have failed to show either their entitlement to receive notice of the July 19-20 meeting (and the agenda thereof), unavailability of Chapter 11 prior to the meeting, or, assuming a violation of the Open Meeting Act by omitting to include action on Chapter 11 in the agenda, authority for the relief they seek. The Court notes, finally, that the revisions to Chapter 11, which first appeared in the RDEIS, were largely a response to comments received by the Coastal Commission and the federal defendants from plaintiffs and other interested persons and agencies. In short, the policies sought to be furthered by the Open Meeting Act and by CZMA §306(c)(1) and (3) have here been effectuated. Plaintiffs' position with respect to the California Program, and in particular with respect to its alleged failure to comply with §306(c)(8), has been presented both to the Coastal Commission and to the federal defendants.

The determination that Chapter 11 was only adopted and thus properly considered by the Acting Administrator in examining the California Program under §306 does not end the inquiry, for there remains the problem of the status of the remainder of Part II. The Acting Administrator, in making his findings pursuant to §306(c)(1), stated:

> The essential elements of the California Coastal [Zone] Management Program — the Coastal Act, the Coastal Conservancy Act, and the Urban and Coastal Park Bond Act — which give the Program its enforceability have been formally adopted in accordance with State law.

Findings at 13. This apparent vacillation between the three statutory components of the CZMP and the five "elements" noted in the Findings at 3 — this distinction between "elements" and "essential elements" — is confusing and unfortunate. While Chapter 11 has been formally

---

[13] Plaintiffs have nowhere asserted (nor does the Court now raise *sua sponte* the issue) that adoption of Chapter 11 by the Coastal Commission constituted adoption of a "regulation" within the meaning of Government Code §11371(b), thereby raising issues of validity under §§11374 and 11420 *et seq.* The latter provisions deal with the procedure for the adoption of regulations. The Court notes, by way of analogy to the present issue, that under §11423, which requires notice of any proposed adoption, amendment, or repeal of a regulation, "[t]he failure to mail notice to any person as provided in this section shall not invalidate any action taken by a state agency pursuant to this article." Adoption of Chapter 11 under Article 9 presumably is subject to even less restrictive remedial measures than adoption of regulations under the above provisions.

adopted by the Coastal Commission, the remaining chapters of the Program Description were prepared by the Commission staff and apparently never presented to, much less acted upon, by the Commission itself.

As noted previously, in the Introduction to Part II of the FEIS, the Program Description (other than Chapter 11) is characterized as "a narrative description of the legislative and administrative measures embodied in the C[Z]MP, organized to correspond to the specific requirements of the Coastal Zone Management Act of 1972, as amended. As such, the bulk of Part II is explanatory, descriptive, historical, and interpretive in nature." FEIS at 15.

The Court has reviewed the Program Description and concurs in the view that its contents are primarily descriptive; it does not, except as previously noted with respect to Chapter 11, expand or amend or revise the Program embodied in the Coastal Act, the two companion pieces of legislation, and the duly adopted Coastal Commission regulations. Chapter 9, dealing with the addition of paragraphs (7), (8), and (9) to §305(b) by the 1976 Amendments to the CZMA, in essence merely describes, through references to specific provisions of the Coastal Act, how the California Program satisfies these recently added requirements of the CZMA.[11] As such, the Court concludes that formal adoption by the Commission was unnecessary.

At the same time, however, the Court has difficulty in considering these chapters as part of the Program itself. They appear rather to be a device, an organizational tool, to enable interested parties and the Acting Administrator to see more easily how the specific requirements of §306 have been dealt with and satisfied. The need for such a description stems from the fact that the California Legislature, in establishing its management program under a new federal statute, obviously did not track the provisions of the CZMA. Consequently, there is no one provision of the California Program — more specifically, the Coastal Act of 1976 — which, for instance, sets forth "a definition of what shall constitute permissible land uses and water uses" (§305(b)(2)) or "a planning process for energy facilities" (§305(b)(8)) or any of the other substantive items which a program must contain in order to receive §306 approval. Rather, whether the Program contains that which the CZMA requires must be gleaned from a broader perspective with a view to envisioning what the Program addresses and accomplishes and what standards, mechanisms and procedures it establishes. This is particularly true of those findings which the Acting Administrator must make respecting whether the Program, for example, establishes "an effective mechanism for continuing consultation and coordination" (§306(c)(2)(B)) or provides for "adequate consideration of the national interest" (§306(c)(8)) or provides a "method of assuring that local land and water use regulations . . . do not unreasonably restrict or exclude land and water uses of regional benefit" (§306(c)(2)).

This the Acting Administrator has done, and his use of the Program Description for this purpose cannot be faulted. That he in

---

[11] A management program submitted for §306 approval need not satisfy the requirements of §305(b)(7)-(9) before October 1, 1978. The Acting Administrator, however, has found the CZMP to satisfy these requirements in its present form.

Although in its response to comments received on the draft program and environmental impact statement regarding the national interest in siting facilities, the staff of the OCZM stated that the California Program has been "expanded to describe, in more detail, the energy facility planning and siting process (Chapter 9)", the Court's review of Chapter 9 reveals that "expand" was an unfortunate choice of words. Chapter 9, unlike Chapter 11, does not rise to the dignity of a declaration of policy; it does not modify or reverse previously announced Commission policies or procedures. The vast bulk of the chapter quotes or paraphrases sections of the Coastal Act to demonstrate how the California Program meets the requirements of §305(b)(7)-(9). Although it includes a description of the "Steps of the Energy Facility Planning Process" (FEIS at 66-67), a recital of with whom the Commission consults and what information (from which sources) it considers, and an identification of other agencies involved in the process (FEIS at 70-71) and energy facilities likely to affect the coast (FEIS at 72-73), these statements do not represent changes in policy or procedure. They embody the suggestions contained in the proposed (now interim final) national interest regulation regarding sources of relevant information which specify the national interests to be considered (15 C.F.R. §923.52(f) and (g)). The chapter is primarily descriptive. The Court concludes that while formal adoption by the Coastal Commission of Part II would have been a preferable procedure in this case, failure to do so is not fatal to the Acting Administrator's approval, even as respects Chapter 9.

rt's denial of enforcement of
rder, the Court has stated, by

fact so used the Program Description is suggested by his caveat to the findings issued with his approval:

> The findings herein should be understood to represent only a summary of how [the California Program] meets the requirements [of the CZMA]. Complete and detailed documentation is contained in the Combined California Coastal Management Program and NOAA Final Environmental Impact Statement (FEIS) and in Attachments by Reference which were submitted to NOAA in further substantiation of meeting all CZMA requirements. These documents are referenced in the findings that follow as appropriate.[7]

Findings at 3. Footnote 7 states: "References to the California Program may be found in Part II of the FEIS . . . ." This last suggests that the Acting Administrator himself recognized that strictly speaking, a "program description" cannot be part of the program any more than a person's shadow can be said to be part of that person.

Recognition of the need for establishing a clearer format for the submission of management programs for §306 approval — perhaps prompted by NOAA's experience in the California case — is evidenced by NOAA's "interim final" regulations (43 Fed.Reg. 8378, March 1, 1978), which, effective April 1, 1978, supersede the approval regulations against which the California Program was tested. New §923.71 ("Recommended format for program submissions") provides guidance in response to requests from a number of states for a "suggested format." The regulation includes such a format, noting that such is not mandatory so long as the state's program addresses all the sections of the CZMA and associated regulations. *See also* 15 C.F.R. §923.1(f). In subsection (b) NOAA suggests that

> States should include an index with their program submission that indicates where in the management program document the information can be found which is necessary to make the findings required by the Act and associated regulations.

Section 923.71(b) also provides a chart which lists the findings required by the Act and the associated regulations, and suggests that if states choose to utilize the chart as an index, they should add a third column listing the page numbers (or provisions) of the program document in which the requisite information can be found. Subsection (c) provides a recital of the suggested format.

There can be no doubt that had such a suggested format been in existence at the time of the submission of the California Program (assuming California had followed it), judicial review (and presumably administrative review) would have been greatly simplified. It may not be overstating the matter to say that many if not most of the issues raised by plaintiffs might have been eliminated or at least far more sharply focused.

Congress in enacting and amending the CZMA did not specify any particular form which management programs assume; nor for that matter did it specify the form or manner in which a program fulfill the requirements of §305(b). Wisely or unwisely, it left the details to the Department of Commerce and the states. In this instance, California has chosen to organize its Coastal Act in a manner which requires the Acting Administrator and the Court in essence to reconstruct the Program in light of the §306 approval requirements in much the same manner one might attempt to assemble a jigsaw puzzle. As unwieldy and unwelcome a task as this has been, the Court cannot say that the federal defendants' willingness to undertake it in order to evaluate the CZMP under §306 is arbitrary or capricious. While the Court, had it been presented with such a program for initial review, might well have returned it to the Coastal Commission for indexing along the lines suggested in 15 C.F.R. §923.71, the Court recognizes that it may not substitute its judgment for that of the Acting Administrator. The statute is silent on these matters; they have been left to the agency's discretion; and the agency has exercised its discretion in a nonarbitrary manner.

The Court notes, finally, with respect to what is and is not to be deemed part of a state's management program, that the regulation above-cited implicitly recognizes that "formal adoption by the state" is not required for the form of submission, although it presumably remains a requirement in some form. The current interim final program approval regulations do not contain the equivalent of 15 C.F.R. §923.31 of the regulations existing at the time of the Acting Administrator's approval of the CZMP. That regulation, it will be recalled, required that the program be "formally adopted in accordance with State law, or, in its absence, administrative regulations." The regulation had as its

source §306(c)(1). The present regulations make no reference whatever to "formal [or any other] adoption by the state." The regulations associated with §306(c)(1) — 15 C.F.R. §§923.3, 923.51, 923.55, and 923.58 — focus on general requirements, federal-state consultation, full participation, and public hearings. No mention of state adoption in any particular manner or with any specific formality is made. Section 923.71(c), in suggesting the format such program submissions for §306 approval should take, "recommends the following items as appendixes: . . . Text of Relevant Legal Authorities . . . ." In short, under the revised program approval regulations, a form of program developed by the state agency authorized to manage that state's coastal zone presumably would suffice, provided that there is some legal basis for that agency's establishing such a form of program. The matter appears most confused at this time inasmuch as the NOAA regulations fail entirely to address the issue. For present purposes, nonetheless, the Court in applying the then-existing regulation (15 C.F.R. §923.31) concludes that those chapters of Part II of the FEIS (the Program Description) which merely describe and organize that which is already contained in the other four "elements" of the California Program are not in themselves the Program but were properly considered by the Acting Administrator in his review of the Program.[5] The Court need not remand to the Acting Administrator to obtain his approval based on a review of just the other four "elements," since he appears to have understood the function of the Program Description, and since (with the exception of the formally adopted Chapter 11) the Program Description does not alter or amend the Coastal Act or related authorities, and since his utilization of Part II was not improper.

[5] The Coastal Act (Cal.Pub.Res.Code) §30330 contains a broad grant of authority to the Coastal Commission as "the state coastal zone planning and management agency for any and all purposes, [which] may exercise any and all powers set forth in the [CZMA]." Section 30009 provides that the Coastal Act "shall be liberally construed to accomplish its purposes and objectives." There is thus authority for the Commission's adoption of Chapter 11 as well as authority for its staff's preparing the Program Description for purposes of organizing the California Program along §306 approval lines for the convenience of the Acting Administrator and the public.

LEGISLATIVE HISTORY OF THE CZMA

A seemingly unbridgeable gulf between the parties concerning the proper construction of the CZMA establishes the cutting edge of this action. First, noted at the outset of this memorandum of decision, plaintiffs complain that the California Program fails to qualify for final approval under §306 because it lacks the requisite specificity Congress intended management programs to embody, especially with respect to the substantive requirements of §§305(b) and 306(c), (d), and (e), so as to enable private users in the coastal zone subject to an approved program to be able to predict with reasonable certainty whether or not their proposed activities will be found to be "consistent" with the program under §307(c). Second, plaintiffs contend that a proper understanding of §306(c)(8), particularly in light of the 1976 Amendments, compels the conclusion that in requiring "adequate consideration" Congress intended that an approvable program affirmatively accommodate the national interest in planning for and siting energy facilities and that the CZMP fails so to do. The Court here addresses each of these contentions.

A. *The Definition of "Management Program."*

Any attempt to resolve this underlying dispute, out of which most of the issues in this lawsuit arise, must begin with Congress' definition of a "management program" in §304(11) of the Act:

> The term "management program" includes, but is not limited to, a comprehensive statement in words, maps, illustrations, and other media of communication, prepared and adopted by the state in accordance with the provisions of this title, setting forth *objectives, policies and standards to guide* public and private uses of lands and waters in the coastal zone.

(Emphasis supplied.) This definition is exactly as originally contained in the Senate version of the CZMA (S.3507). In its report on S.3507, the Committee on Commerce stated:

> "Management program" is the term to refer to the *process* by which a coastal State . . . proposes . . . to manage land and water uses in the coastal zone so as to reduce or minimize a direct, significant, and adverse effect upon those waters, including the development of criteria and of the governmental structure capable of implementing such a program. In adopting the

standards set forth in para- (C), and (D) of §706(2), in- ll apply to "agency action, conclusions." Few cases deal iculty; and the parties to this e argued throughout for ap- aragraph (A) alone or *de novo* it have been characterized as ons of fact and law.

distinguishes between (a) re- deral defendants' decision to CZMP based on the Acting r's finding that its contents of adoption by the state satis- ubstantive and procedural of the CZMA, and (b) review y's determination that the 06 approval satisfied the pro- uirements of CZMA and the former, the arbitrary and ndard governs; but as to the urt focuses its review on the f procedure standard. *Cady v.* 527 F.2d at 793 (referring to as "*ad hoc* in character"), cit- *Brinegar*, 506 F.2d 677 [7 ERC r. 1974) and *Trout Unlimited v.* 2d 1276, 1282 [7 ERC 1321] 4) (the procedural standard l in reviewing the sufficiency n one might wish").[7]

s of statutory authority standard the extent that it authorizes judi- the agency's construction of the *op. v. In this case, the agency ed to act on the basis of a ng and the public hearings held portunity for the submission of nformation to the agency, to be arriving at its determination ZMA.

term "management program" the committee seeks to convey the importance of a *dynamic* quality to the planning undertaken in this act that permits adjustments as more knowledge is gained, as new technology develops, and as social aspirations are more clearly defined. The committee does not intend to provide for management programs that are *static* but rather to create a *mechanism for continuing review* of coastal zone programs on a regular basis and to provide a framework for the allocation of resources that are available to carry out these programs. S. Rep. No. 92-753, 92d Cong., 2d Sess. (1972), reprinted in Senate Committee on Commerce, Legislative History of the CZMA 201-02 (Comm. Print 1976) ("Legislative History") (emphases supplied).[16] The House version (H.R. 14146) did not contain a definition of "management program" and the Conference Report (H. Rep. No. 92-1544, 92d Cong., 2d Sess. (1972) (Legislative History at 443f)) failed to add anything further to the above explanation.

The Court agrees with defendants that Congress never intended that to be approvable under §306 a management program must provide a "zoning map" which would inflexibly commit the state in advance of receiving specific proposals to permitting particular activities in specific areas. Nor did Congress intend by using the language of "objectives, policies, and standards" to require that such programs establish such detailed criteria that private users be able to rely on them as predictive devices for determining the fate of projects without interaction between the relevant state agencies and the user. To satisfy the definition in the Act, a program need only contain standards of sufficient specificity "to guide public and private uses."

"The CZMA was enacted primarily with a view to encouraging the coastal states to plan for the management, development, preservation, and restoration of their coastal zones by establishing rational processes by which to regulate uses therein. Although sensitive to balancing competing interests, it was first and foremost a statute directed to and solicitous of environmental concerns. *See* §§302 and 303. "The key to more effective use of the coastal zone in the future is introduction of management systems permitting conscious and informed choices among the various alternatives. The aim of this legislation is to assist in this very critical goal." S. Rep. No. 92-753 (Legislative History at 198). *See* H. Rep. 92-1049, 92d Cong., 2d Sess. (1972) (Legislative History at 313 and 315).

The Amendments of 1976 made clear the national interest in the planning for, and siting of, energy facilities (to be discussed *infra*). Apparently neither the Act nor the Amendments thereto altered the primary focus of the legislation: the need for a rational planning process to enable the state, not private users of the coastal zone, to be able to make "hard choices." "If those choices are to be rational and devised in such a way as to preserve future options, the program must be established to provide guidelines which will enable the selection of those choices." H. Rep. No. 92-1049 (Legislative History at 315). The 1976 Amendments do not require increased specificity with regard to the standards and objectives contained in a management program. (Specificity as it relates to §306(c)(8) will be discussed *infra*.)

In conclusion, to the extent plaintiffs' more specific challenges to the Acting Administrator's §306 approval are premised on an interpretation of congressional intent to require that such programs include detailed criteria establishing a sufficiently high degree of predictability to enable a private user of the coastal zone to say with certainty that a given project must be deemed "consistent" therewith, the Court rejects plaintiffs' contention.[17]

[16] Hereafter parallel citations will be given to both the congressional report and the Legislative History (wherein the report may be found).

[17] the interim final program approval regulations (43 Fed.Reg. 8378, March 1, 1978), to be sure, require that the policies contained in a management program be "specific, comprehensive and enforceable, and . . . provide an adequate degree of predictability as to how coastal resources will be managed." 15 C.F.R. §923.1(c)(2). They do not require near certainty as to what particular decisions will emerge. Among the general requirements for approvability under §306 is that of 15 C.F.R. §923.3(a)(2):

> That the policies, standards, objectives and criteria upon which decisions pursuant to the program will be based are articulated clearly and are sufficiently specific to provide (i) a clear understanding of the content of the program, especially in identifying who will be affected by the program and how, and (ii) a clear sense of direction and predictability for decision makers who must take action pursuant to or consistent with the management program. . . .
>
> Subsection (h) clarifies the above requirement in noting the distinction between policies that are of an enforceable nature and those that are of an "enhancement" (or hortatory) nature, and provides examples of each which demon-

Section 306(a)(1) requires the Secretary, prior to approval of a management program under §306, find that it contains that which §305(b) specifies. Plaintiffs have focused their attack in large measure on what they charge is the CZMP's failure to include those items which §305(b) mandates, especially those required by paragraphs (2), (3), and (5) thereof. The attack is premised not on any alleged invalidity of or ambiguity in NOAA's regulations (15 C.F.R. Parts 920 and 923) — although plaintiffs insist the proposed (now interim final) program approval regulations (Part 923), rather than the then-existing regulations, should have been utilized in evaluating the California Program — but rather on the alleged failure of the Acting Administrator properly to apply the regulations to the CZMP.

The Court has reviewed the Acting Administrator's findings, the CZMA, and the regulations (both then-existing, proposed, and now interim final), and concludes that the Acting Administrator's finding that the Program satisfies the requirements of §305(b) (as required by §306(a)(1)) was not arbitrary or capricious, and further, that his application of the then-existing regulations (published January 9, 1975) was not an abuse of discretion or otherwise not in accordance with law. 5 U.S.C. §706(2)(A).

The Court has reviewed in great detail Attachment J to the FEIS, wherein the OCZM summarizes and responds to comments received both from other governmental agencies (state and federal) and from private interests addressed to the draft management program and EIS.[18] Attachment J includes OCZM's responses to similar concerns voiced by a number of reviewers (FEIS at J-1 through J-12) and its responses to comments received from individual reviewers (FEIS at J-13 through J-48), including plaintiffs (FEIS at J-29 through J-41) and various federal agencies (such as the Federal Energy Administration, the Federal Power Commission, and the Department of the Interior) whom plaintiffs have characterized as opposing §306 approval (FEIS at J-17 through J-22).[19]

In their comments the various parties have raised most of the issues which plaintiffs have raised in this action. The Court finds additional support for the Acting Administrator's decision in the thoughtfulness and reasonableness with which OCZM has addressed the views of the various reviewers. The Acting Administrator had these comments and responses before him at the time of his approval of the CZMP and they lend further support to the nonarbitrary character of his decision.

The Court notes that while the interaction between the state (Coastal Commission) and various interested and affected federal agencies during the review process was substantially less than ideal in this in-

strate that the approach embraced by the California Program satisfies the specificity requirements of the latest as well as the then-existing regulations.

[18] Although it is not clear that Attachment J includes responses to the RDEIS and Program, published in April 1977, it appears so to do. *See* Attachment K ("Written Statements from Parties who Commented on the [CZMP] and the Revised Draft (EIS)").

[19] Plaintiffs have characterized these agencies as having a "serious disagreement" with the Coastal Commission and the Acting Administrator regarding the approvability of the CZMP under §306, the existence of which precludes the Acting Administrator's approving the Program until the disagreement has been mediated by the Secretary of Commerce pursuant to §307(h). The Court rejects this argument. First, while the Secretary may not approve a management program "unless the views of Federal agencies principally affected by such program have been adequately considered" (§307(b)), the CZMA does not require that all such agencies concur in the Secretary's (Acting Administrator's) decision. Second, while the program approval regulations in effect at the time of the Acting Administrator's approval omitted to address §307(h), the proposed regulations published on August 29, 1977 (42 Fed.Reg. 43552 [Part 923] and 43586 [Part 930]) provided guidance as to how the process of mediation should be triggered, operate, and terminate (*see* 15 C.F.R. §§923.54 and 930.110-.116). The two key features which emerged in the proposed regulations were the voluntary nature of the mediation on the part of both the state and federal agencies and the need for a formal request for such on the part of at least one of them. Neither occurred in this instance. Finally, the Court notes that while FPC and FEA persisted in their view that the Acting Administrator grant only "preliminary approval" under §305(d), the DOI favored §306 approval. As stated earlier, the CZMA does not preclude the grant of §306 approval merely because one or more affected federal agencies disfavor such action by the Acting Administrator. The Court notes further that by its literal terms §307(h) does not apply to §306 approval; rather, it applies to development of management programs under §305 and to implementation of programs previously approved under §306. Again, while the Court might have cast its vote for preliminary approval, that is not the standard of review to which we must adhere.

stance, a situation of which the Acting Administrator was painfully aware,[20] nevertheless the requirement of §307(b) that "the views of Federal agencies principally affected by such program have been adequately considered" before §306 approval may be granted has been satisfied.

Without belaboring the point or embarking on a needless point-by-point analysis and refutation of plaintiffs' assertions regarding the Acting Administrator's findings under §305(b), the Court, consistent with the previously-expressed view of the specificity which the Act requires, finds the "performance standards" approach embodied in the California Program to be permissible. The CZMA, as noted earlier, does not speak to this issue beyond defining "management program" in §304(12).

The requirements of §§305(b) and 306(c), (d), and (e) do not constrain the state in the manner in which it meets them; nor does it constrain the Secretary or NOAA in establishing through regulations that which it will require of a management program in this regard. Congress has granted the Secretary and Acting Administrator considerable discretion. They have exercised it in promulgating approval regulations. The Court's review of these indicates that rule-making itself has been an open process and has involved ongoing interaction between NOAA and interested parties.

As noted previously, the Court, cognizant of Congress' expression of approval for the manner in which NOAA and OCZM (and particularly Mr. Knecht) have carried out its mandate (*see* S. Rep. No. 94-277, 94th Cong., 1st Sess. 30 (1975) (Legislative History at 756)), and further cognizant of Congress' resolving its original uncertainty over whether the CZMA should be administered by the Department of the Interior or the Department of Commerce in favor of the latter largely because of the "requisite oceanic, coastal ecosystem, and coastal land use expertise" found in NOAA (*see* S. Rep. No. 94-277 at 7 n.5 (Legislative History at 733)), concludes that considerable deference is due NOAA's interpretation of its own regulations. In short, the Acting Administrator's findings and Attachment J of the FEIS, when viewed in the context of the legislative history of the Act and of the statutory language itself, satisfy the Court that approval of the California Program has not been arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.[21]

B. *Adequate Consideration of the National Interest.*

Plaintiffs' fundamental grievance with the California Program stems from its assertion that the Program fails to satisfy the mandate of §306(c)(8) — that before the Secretary grant approval to a management program under §306 she find that it

> provides for adequate consideration of the national interest involved in planning for, and in the siting of, facilities (including energy facilities in, or which significantly affect, such state's coastal zone) which are necessary to meet requirements which are other than local in nature.

Plaintiffs urge that the CZMA, particularly in light of the 1976 Amendments, requires an "affirmative commitment" on the part of the state before §306 approval

---

[20] In response to a September 20, 1977 letter from the Assistant Administrator of Energy Resource Development at FEA, highly critical of the federal-state coordination in the review of the California Program, Acting Associate Administrator Knecht replied on September 23rd:

> In the conclusion of your September 20 letter, you express displeasure at the manner in which federal-state relations were carried out in the review of the California program. I share this displeasure, and would like to meet with you to discuss further the general problem of relations between our agencies. Our experience in the review of the California program is unfortunately indicative of other programs for which we have sought comments. While the formation of the new Department of Energy may help to solidify policies and interagency relations, I fear there are some deep-seated problems which will remain and which require our mutual attention. We expect seven more states to seek program approval in coming months; neither of our agencies can afford a repetition of the review process as it has proceeded in California.

The fact that coordination was poorer than might have been hoped does not require that this Court vacate the Acting Administrator's approval. His approval proceeded from full knowledge of the deficiencies.

[21] The Court notes that while California's is only the third program to receive §306 approval, the federal defendants have not been reluctant to send a program back for further development — to refuse §306 approval in favor of preliminary approval — as in the case of Washington, whose application for §306 approval was denied in May 1975. The state's program finally received §306 approval in mid-1976. *See* H. Rep. No. 94-878, 94th Cong., 2d Sess. 23 (1976) (Legislative History at 909).

is proper. The California Program allegedly fails adequately to make that commitment in that its general lack of specificity, coupled with what plaintiffs characterize as California's overall antipathy to energy development (as embodied in the policies and practices of its Coastal Commission), combine to give the Coastal Commission a "blank check" effectively to veto any or all exploration and development activities subject to §307(c) (3) simply by finding such activity not to be "consistent" with the CZMP.

Defendants, beyond taking issue with plaintiffs' characterization of California's energy posture, assert first, that plaintiffs' premise that the Act requires an affirmative commitment is incorrect as a matter of law and second, that the Program contains adequate consideration of national energy interests. Defendants contend that the CZMP contains "performance standards and criteria" more than adequate to satisfy the requirements of the CZMA and serve as a guide to plaintiffs in planning their activities in the coastal zone. Implicit in the various provisions of the Coastal Act (and in particular those in §§30001.2 and 30260-64) and in Chapter 11 of the Program Description are a wholly adequate consideration of the national energy interest.

Plaintiffs apparently focus on language in H. Rep. No. 92-1049 (which accompanied H.R. 14146) to the effect that, "if the program as developed is to be approved and thereby enable the State to receive funding assistance under this title, the State *must take into account and must accommodate* its program to the specific requirements of various Federal laws which are applicable to its coastal zone." Legislative History at 321. The report continues:

> To the extent that a State program does not recognize these overall national interests, as well as the specific national interest in the generation and distribution of electric energy . . . or is construed as conflicting with any applicable statute, the Secretary may not approve the State program until it is amended to recognize those Federal rights, powers, and interests.

Id. at 322.

It is to be noted that the reference in the House Report to the state's need to "accommodate" its program is to "the specific requirements of various [applicable] Federal laws." It is not a requirement that the state program expressly "accommodate" energy interests. In the program approval regulations published on January 9, 1975 (40 Fed.Reg. 1683), NOAA stated that:

> A management program which integrates . . . the siting of facilities meeting requirements which are of greater than local concern into the determination of uses and areas of Statewide concern will meet the requirements of Section 306(c)(8).

15 C.F.R. §923.15(a). In subsection (b) NOAA amplified on the above requirement.

> . . . The requirement should not be construed as compelling the States to propose a program which accommodates certain types of facilities, but to assure that such national concerns are included at an early stage in the State's planning activities and that such facilities not be arbitrarily excluded or unreasonably restricted in the management program without good and sufficient reasons . . . . No separate national interest "test" need be applied and submitted other than evidence that the listed national interest facilities have been considered in a manner similar to all other uses, and that appropriate consultation with the Federal agencies listed has been conducted.

The Coastal Zone Management Act Amendments of 1976, Pub. L. 94-370 ("1976 Amendments"), while largely prompted by the 1973 Arab oil embargo and while expressly recognizing the national interest in the planning for and siting of energy facilities, nevertheless did not alter the requirement of "adequate consideration" in §306(c) (8) or make any changes in the degree of specificity required under the Act. Rather, recognizing that coastal states like California were currently burdened by the onshore impacts of Federal offshore (OCS) activities and likely to be burdened further by the plans for increased leases on the OCS, Congress sought to encourage or induce the affected states to step up their plans *vis-à-vis* such facilities.

The primary means chosen to accomplish this result was the Coastal Energy Impact Program ("CEIP") contained in new §308. As the Conferees explained, the purpose of the 1976 Amendments was

> to coordinate and further the objectives of national energy policy by directing the Secretary of Commerce to administer and coordinate as part of the [CZMA], a coastal energy impact program.

The conference substitute follows both the Senate bill and the House amendment in amending the 1972 Act to encourage new or expanded oil and natural gas production in an orderly manner from the Nation's outer Continental Shelf (OCS) by providing for financial assistance to meet state and local needs resulting from specified new or expanded energy activity in or affecting the coastal zone.

H. Rep. No. 94-1298, 94th Cong., 2d Sess. 23 (1976) (Legislative History at 1073). The formula Congress provided for calculating a state's share of the Coastal Energy Impact Fund ("the Fund") established to carry out the CEIP's purposes is itself further evidence of the congressional intention to provide "built-in incentives for coastal states to assist in achieving the underlying national objective of increased domestic oil and gas production." H. Rep. No. 94-1298 at 25 (Legislative History at 1075).

> The formula, as so constructed, provides incentives to coastal states (if they are interested in increasing their share of the funds appropriated for this purpose) to encourage and facilitate achievement of the basic national objective of increasing domestic energy production. This provision would be in harmony with sound coastal zone management principles because Federal aid would be available only for states acting in accord with such principles. For example, since the grant is based on new leasings, production, first landings, and new employment, it is to the state's interest to apply the "consistency" provisions and related processes to the issuance of oil exploration, development and production plans, licenses, and permits as quickly as possible rather than to postpone decision-making for the statutory 6-month period.

> The Secretary shall not intercede in any land use or water use decision of any costal state with respect to the siting of any energy facility or public facility by making siting in a particular location a prerequisite to, or a condition of, financial assistance under this section.

Id. The Congress was particularly careful to circumscribe the role of the federal government in particular siting decisions. Thus, §308(i) provides:

> The Secretary shall not intercede in any land use or water use decision of any coastal state with respect to the siting of any energy facility or public facility by making siting in a particular location a prerequisite to, or a condition of, financial assistance under this section.

This provision is consistent with the approach of the CZMA as a whole to leave the development of, and decisions under, a management program to the state, subject to the Act's more specific concern that the development and decision-making process occur in a context of cooperative interaction, coordination, and sharing of information among affected agencies, both local, state, regional, and federal. This fast, especially as regards energy facility planning, is the policy behind the Energy Facility Planning Process ("EFPP") of §305(b)(8) and the Interstate Grants provision of new §309 (which encourages the coastal states to give high priority to coordinating coastal zone planning utilizing "interstate agreements or compacts"). It should be noted that the only amendment to the national interest requirement of §306(c)(8) effectuated by the 1976 Amendments is the additional requirement that in fulfilling its obligation to provide "adequate consideration of the national interest" in the case of energy facilities, the state also give such consideration "to any applicable interstate energy plan or program" established under §309.

The Court rejects plaintiffs' argument that affirmative accommodation of energy facilities was made a *quid pro quo* for approval under §306 by the 1976 Amendments. In addition to the above, the Court notes that Congress itself did not assume that such siting was automatically to be deemed necessary in all instances. For instance, in its report on H.R. 3981, the Committee on Merchant Marine and Fisheries stated that the addition of the EFPP in §305(b) (8)

> reflects the Committee's finding that increasing involvement of coastal areas in providing energy for the nation is likely, as can be seen in the need to expand the Outer Continental Shelf petroleum development. State coastal zone programs should, therefore, specifically address how major energy facilities are to be located in the coastal zone *if* such siting is necessary. Second, the program shall include methods of handling the anticipated impacts of such facilities. The Committee in no way wishes to accelerate the location of energy facilities in the coasts; on the contrary, it feels a disproportionate share are there now. . . . There is no intent here whatever to involve the Secretary of Commerce in specific siting decisions.

H. Rep. No. 94-878 at 45-46 (Legislative History at 931-32) (emphasis supplied). The concern that the CEIP not encourage the siting in the coastal zone of energy facilities which could be located elsewhere is embodied in §308. *See* H. Rep. No. 94-878 at 15 and 26 (Legislative History at 900 and 912).

The Senate Committee on Commerce, in reporting S.586 to the full Senate, stated:

> The Secretary of Commerce (through NOAA) should provide guidance and assistance to States under this section 305(b) (8), and under section 306, to enable them to know what constitutes "adequate consideration of the national interest" in the siting of facilities necessary to meet requirements other than local in nature. The Committee wishes to emphasize, consistent with the overall intent of the Act, that this new paragraph (8) requires a State to develop, and maintain a planning process, but does not imply intercession in specific siting decisions. *The Secretary of Commerce (through NOAA), in determining whether a coastal State has met the requirements, is restricted to evaluating the adequacy of that process.*

S. Rep. No. 94-277 at 34 (Legislative History at 760) (emphasis supplied).

Consistent with this mandate, NOAA has promulgated revised program approval regulations (43 Fed.Reg. 8378, March 1, 1978). These interim final rules follow the submission of comments on the proposed rules published on August 29, 1977 (42 Fed.Reg. 43552). The Court looks to the revised regulations because they reflect NOAA's interpretation of any changes wrought by the 1976 Amendments, the former regulations against which the California Program was tested having been promulgated after the Arab oil embargo but before the 1976 Amendments.

In its response to several reviewers' suggestion that §306(c) (8) be interpreted to require that facilities be accommodated in a state's coastal zone, the agency reiterated the position it has maintained since the inception of the CZMA that

> the purpose of "adequate consideration" is to achieve the act's "spirit of equitable balance between State and national interests." As such, consideration of facilities in which there may be a national interest must be undertaken within the context of the act's broader finding of a "national interest in the . . . beneficial use, protection, and development of the coastal zone" (Section 302(a)). Subsection 302(g) of the Act gives "high priority" to the protection of natural systems. Accordingly, while the primary focus of subsection 306(c) (8) is on the planning for and siting of facilities, adequate consideration of the national interest in these facilities must be based on a balancing of these interests relative to the wise use, protection and other development of the coastal zone. As the Department of Energy noted in its comments on the proposed regulations:
>
> > The Act presumes a balancing of the national interest in energy self-sufficiency with State and local concerns involving adverse economic, social, or environmental impacts.
>
> 43 Fed.Reg. 8379.

Section 306(c) (8) is treated at length in 15 C.F.R. §923.52. After generally noting that one "need not conclude . . . that any and all such facilities proposed for the coastal zone need be sited therein," the regulation proceeds to set forth requirements which must be met by the management program in order to satisfy §306(c) (8). While these are considerably more detailed than those contained in its predecessor (15 C.F.R. §923.15, January 9, 1975), they do not change the basic tenor of the rule as interpreted by NOAA. Having previously determined that the Acting Administrator's utilization of the then-existing regulations was proper — indeed, to have applied proposed regulations arguably would have been improper — and having determined that it was not abuse of discretion to proceed with approval of the California Program rather than await promulgation of final revised approval regulations, given the fact that the proposed regulations effected no fundamental change of philosophy but merely a "shift in emphasis" (42 Fed.Reg. 43552), the Court concludes that the Acting Administrator's finding that the CZMP satisfied §306(c) (8) is neither arbitrary nor capricious.

The Court notes further in this regard that the standards established by the Coastal Act (and in particular §§30260-64 and 30413) for making energy facilities siting decisions, in the words of the Coastal Commission staff, "establish the general findings that must be made to authorize coastal dependent industrial facilities, liquefied natural gas terminals, oil and gas developments, refineries, petrochemical facilities and electric power plants." FEIS, Part II (Chapter 9) at 66. The key to the

California approach, and one which the Acting Administrator and this Court had acceptable under the CZMA, is that the standards require that "findings" be made upon which specific siting decisions ensue. For instance, in dealing with the siting of oil tanker facilities, §30261(a) requires that

> . . . [t]anker facilities shall be designed to (1) minimize the total volume of oil spilled, (2) minimize the risk of collision from movement of other vessels, (3) have ready access to the most effective feasible containment and recovery equipment for oil spills, and (4) have onshore deballasting facilities to receive any fouled ballast water from tankers where operationally or legally required.

As can readily be seen from these provisions, whether a particular tanker facility siting proposal will be deemed "consistent" with these requirements of the California Program will turn on specific findings of a factual nature. The California Program sensibly does not attempt to map out in advance precisely what type or size tanker facilities will be found to meet these requirements in particular areas of its almost 1,000-mile coastline. Rather, by its very nature, the Coastal Act encourages plaintiffs with a particular facility in mind to address themselves to the standards set forth in the Coastal Act and to plan such a facility in cooperation and communication with the Coastal Commission from the inception. This approach seems consonant with the overall approach of the CZMA itself. In this regard it is noteworthy that the Senate Committee on Commerce, in summarizing the "key findings" of a number of reports made under the aegis of the committee-created National Ocean Policy Study, stated that "coastal states often have been criticized unfairly for delaying the siting of energy facilities when such action often is the result of lack of information and planning." S. Rep. No. 94-277 at 3 (Legislative History at 729). The CZMP takes an approach which has received the congressional blessing. To the extent plaintiffs seek not guidance with respect to the way in which coastal resources will be managed but instead a "zoning map" which would implicitly avoid the need to consult with the state regarding planned activities in or affecting its coastal zone, the Court rejects their position. While wholly sympathetic to the legitimate concerns of corporate officers and planners who must conform their activities to the standards of the CZMP, the Court nevertheless concludes that the Acting Administrator's finding that the Program satisfies §306(c) (8) is supportable and hence not arbitrary or capricious. It proceeds from a correct interpretation of the CZMA.

Finally, the Court notes that both the California Program and the CZMA contain safeguards to protect plaintiffs from arbitrary exercise by the Coastal Commission of its §307 consistency powers. First, plaintiffs under the Coastal Act may seek judicial review of a decision of the Coastal Commission finding a specific proposed activity of plaintiffs to be inconsistent with the CZMP. Such review certainly may encompass a challenge to the Commission's interpretation of the California Program as well as a challenge to specific findings upon which the determination presumably would be based. Second, with respect to an adverse consistency determination regarding any proposed activity for which a federal license or permit is required or which involves an OCS plan, the party against whose activity such a determination has been made may seek review by the Secretary of Commerce (who could also undertake review on her own initiative) on the grounds that "the activity is consistent with the objectives of this title or is otherwise necessary in the interest of national security." §307(c)(3)(A) and (B).[22] Third, under §312(a) the Secretary is obliged to conduct "a continuing review of (1) the

[22] In promulgating regulations under §307, NOAA has rejected the invitation of some reviewers to broaden the grounds of secretarial review. Some reviewers of the proposed regulations (41 Fed.Reg. 42879, September 28, 1976) urged that appellants should be able to argue on appeal that the State agency's consistency objection was not in accordance with the requirements of the management program. Other parties urged that the appeal process should be open to third party challenges to State agency concurrences which violate the requirements of the management program. No changes were made in response to these comments, and the regulations now clearly indicate that the Secretary will only consider appeals which are based on grounds that the activity either (i) is consistent with the purposes or objectives of the Act, or (ii) is necessary in the interest of national security.

42 Fed.Reg. 43586, 43595 (August 29, 1977) (Proposed Rules). The agency noted that general review of the manner in which a state implemented its approved program, "including the manner in which consistency concurrences and objections are issued," shall be reviewed by OCZM under its continuing review obligation of §312. *Id.* The final rules were published March 13, 1978 (43 Fed.Reg. 10510). *See* 15 C.F.R. §§930.120-.122.

management programs of the coastal states and the performance of such states with respect to coastal zone management; and (2) the coastal energy impact program provided for under section 308." Subsection (b) provides:

> The Secretary shall have the authority to terminate any financial assistance extended under section 306 . . . if (1) [s]he determines that the state is failing to adhere to an [i]s not justified in deviating from the program approved by the Secretary . . . .

In short, both as regards specific determinations of inconsistency and as regards general trends in and manner of issuance of such determinations, plaintiffs are amply protected by and have various forms of recourse under the California Program itself and §§307 and 312 of the CZMA.

APPROVAL BY THE FEDERAL DEFENDANTS

Plaintiffs have charged that the procedures followed by the state in developing and adopting, and by the federal defendants in approving, the California Program violated both the CZMA and NEPA.

> Section 306(c)(1) requires the Secretary to find that [t]he state has developed and adopted a management program for its coastal zone in accordance with rules and regulations promulgated by the Secretary, after notice, and *with the opportunity of full participation* by relevant Federal agencies, state agencies, local governments, regional organizations, port authorities, and other interested parties, public and private, *which is adequate to carry out the purposes of this title* and is consistent with the policy declared in section 303 of this title.

(Emphasis supplied.) The Acting Administrator has so found. Findings at 13-14 (and references to the FEIS contained therein). Section 306(c)(3) amplifies the requirement of §306(c)(1) by demanding a finding be made that "[t]he state has held public hearings in the development of the management program." This too has been found. Findings at 16 (and references to the FEIS contained therein).

Plaintiffs' claims of invalid adoption by the state having been discussed previously, the Court merely adds that the process of developing a coastal zone management program for the state of California has been ongoing since the enactment of Proposition 20 (the California Coastal Zone Conservation Act of 1972) and that the Acting Administrator's finding that that process has been open within the meaning of §306(c)(1) and (3) is supported by the record. Under the arbitrary and capricious standard applicable to such findings, they must be sustained.

Plaintiffs mount an assault on the review process undertaken by the federal defendants in approving the CZMP under §306, focusing on the purported inadequacies of the environmental review process culminating in the FEIS. As noted earlier, a challenge under NEPA invites broader-ranging evidentiary review (not limited to the administrative record) and requires application of the observance of procedure standard of review. 5 U.S.C. §706(2)(D); *Cady v. Morton*, *supra*, 527 F.2d at 793, citing *Trout Unlimited v. Morton*, *supra*, 509 F.2d at 1282, and *Lathan v. Brinegar*, *supra*, 506 F.2d 677; *Ethyl Corp. v. EPA*, *supra*, 541 F.2d at 34 n. 71. Having done so, the Court concludes that the environmental review process here followed and the FEIS produced thereby are adequate under §102(2)(C) of NEPA (42 U.S.C. §4332(2)(C)).

> Section 102(2)(C) mandates that an EIS address:
>
> (i) the environmental impact of the proposed action;
>
> (ii) any adverse environmental effects which cannot be avoided should the proposal be implemented;
>
> (iii) alternatives to the proposed action;
>
> (iv) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity; and
>
> (v) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.

Plaintiffs contend first, that the federal defendants utilized the environmental review process not to conduct a *bona fide* environmental review but to advocate a prior decision to grant final approval to the CZMP; second, that the FEIS is deficient because the Program discussed therein differs substantially from that disclosed in the RDEIS; third, that it fails to adequately discuss possible alternatives to §306 approval; fourth, that it fails to consider all available relevant information; and fifth, that it fails to discuss potential and unavoidable adverse impacts of approving and implementing the CZMP.

The Court discusses these claims in order.

First, the Court finds nothing improper in the federal defendants' informing the public and other organs of government of its tentative conclusion that the California Program meets the requirements of §306 so as to qualify for final approval. The nature of the cooperative interaction between the state and federal governments envisioned by the CZMA in the development of a management program makes it wholly unrealistic to assume that the federal agency charged with reviewing that program will entertain no preliminary conclusions as to its adequacy under the Act.

With respect to plaintiffs' second claim — that the RDEIS and FEIS differ substantially in their description of the elements of the California Program — the Court concludes that such claim lacks merit. First, the two statutory elements of the Program other than the Coastal Act both were noted in the RDEIS (at 8, 12, and 77). Neither establishes standards in the sense that the Coastal Act does; rather, these companion statutes provide a portion of the implementation authority required by §306(c)(6), (7), and (d) of the CZMA. Second, the RDEIS contains the original version of the Program Description found in the FEIS. As discussed at length in another section of this memorandum, Chapter II of the Program Description has been formally adopted by the Coastal Commission; and the remaining chapters, being of an essentially descriptive nature, were not required to be. The procedures followed may have been sloppy, but the Court cannot say that the failure expressly to designate Part II of the RDEIS an "element" of the CZMP was fatal — particularly in light of the Court's conclusions regarding the legal status of the Program Description. Finally, the Court notes that the revisions made in the Program Description were largely prompted by comments received on the original Program Description, including those received from plaintiffs.

Plaintiffs' third argument — that the FEIS fails adequately to discuss alternatives to §306 approval — is premised on plaintiffs' insistence that the federal defendants should have denied final approval and instead granted the CZMP preliminary approval under §305(d), particularly in light of the fact that the local coastal programs required by the Coastal Act (not due until 1980) will add the requisite degree of specificity to enable the Program to qualify for §306 approval. While there is support for plaintiffs' position in the legislative history surrounding the addition of "preliminary approval" to §305 effected by the 1976 Amendments (H. Rep. No. 94-878, 94th Cong., 2d Sess. 48 (1976) (Legislative History at 934)), nevertheless the FEIS discusses this alternative to §306 approval and rejects it on the basis of a reasonable construction of §§306(e)(1) (dealing with permissible implementation techniques for control of land and water uses) and 305(d), the NOAA regulations relevant thereto (15 C.F.R. §923.26), the pertinent legislative history, and the application of the above to the provisions of the CZMP. FEIS at 184-85. The federal defendants' conclusion — that "if a state has the necessary authorities in place and will employ acceptable implementation techniques, the 'preliminary approval' option is inappropriate" (FEIS at 184) — is reasonable in order to give harmonious and full effect to §§305(d) and 306(e)(1). Again, while the Court, if faced with the choice, might have opted for preliminary approval, we may not substitute our judgment for that of the Acting Administrator. It is sufficient for present purposes to note that, contrary to plaintiffs' contention, the FEIS does adequately discuss this alternative.

Plaintiffs' final two claims are premised on the alleged failure of the FEIS to discuss the adverse impact nationwide should California utilize its §307 consistency powers to retard or preclude OCS and related energy development. Plaintiffs also assert that the FEIS fails adequately to discuss the impact of the CZMP on the "socio-economic" environment (e.g., impact on "urban sprawl"). The Court rejects this argument.

> As this Circuit has stated:
>
> . . . [A]n EIS is in compliance with NEPA when its form, content, and preparation substantially (1) provide decision-makers with an environmental disclosure sufficiently detailed to aid in the substantive decision whether to proceed with the project in the light of its environmental consequences, and (2) make available to the public, information of the proposed project's environmental impact and encourage public participation in the development of that information.

Trout Unlimited v. Morton, supra, 509 F.2d at 1283. "An EIS need not discuss remote or highly speculative consequences . . . . [The] adequacy of the content of the EIS should be determined through use of a rule of reason." *Id.* In elaborating on this "rule of reason" the Second Circuit has observed that

> an EIS need not be exhaustive to the point of discussing all possible details bearing on the proposed action but will be upheld as adequate if it has been compiled in good faith and sets forth sufficient information to enable the decision-maker to consider fully the environmental factors involved and to make a reasoned decision after balancing the risks of harm to the environment against the benefits to be derived from the proposed action, as well as to make a reasoned choice between alternatives. [Citations omitted.]

County of Suffolk v. Secretary of the Interior, supra, 562 F.2d at 1375.

In this instance, the inadequacies raised by plaintiffs rest on the highly speculative assumption that in implementing its management program California will abuse its §307 consistency powers, the California courts will acquiesce therein, and, further, the Secretary of Commerce will fail to discharge her duties under §§307(c)(3) and 312. As stated during our discussion of the ripeness issue, the Court declines to make such an assumption — nor must the federal defendants in preparing the FEIS engage in such speculation.

The Court views the situation with which it is here presented as not unlike that presented in *Life of the Land v. Brinegar*, 485 F.2d 460 (9th Cir. 1973). In that case an action was brought by environmental groups to enjoin construction of a new seaward runway at Honolulu International Airport. The defendants in preparing the EIS determined that it was unnecessary to undertake air pollution studies because of the very nature and location of the proposed project. In rejecting plaintiff-appellants' claim that such omission was fatal to the adequacy of the EIS, this Circuit remarked:

> The Reef Runway will relocate aircraft takeoffs, the major source of aircraft air pollution, 6,700 feet seaward, and away from the populated areas of Honolulu. The essence of this project, therefore, involves moving the sources of the air pollution away from people. The federal and state officials concluded that detailed air pollution studies were unnecessary, on the premise that at the very least, the project was extremely unlikely to worsen the air quality in any relevant sense.

Id. at 470.

Similarly, the "essence" of the CZMP, in accordance with §§302 and 303 of the CZMA, is sensitivity to environmental concerns in establishing standards for utilization of the coastal zone; consequently, fewer and less detailed environmental studies would be expected because the Program emphasizes environmental preservation.[23]

Finally, the Court notes that the act of approving the California Program in itself does not result in the undertaking of any specific project by the state or federal governments or any private user(s) of the coastal zone. The concerns raised by plaintiffs — in particular, the alleged omission in the FEIS of an adequate discussion of the significance of permitting OCS development to go forward and the impact of precluding such development — will be addressed in connection with the preparation and dissemination of environmental impact statements for specific proposed activites. The environmental review here undertaken resembles that frequently utilized where a "multistage" project is involved; consequently, the failure of the FEIS to discuss such possibilities is justified on this alternative ground. The Second Circuit addressed this issue in *County of Suffolk, supra*. That case involved preparation of an EIS in connection with the proposed lease-sale by the Department of the Interior of federal lands on the OCS to petroleum companies. There, in reversing the district court's finding that that EIS was inadequate in its failure to explore the possibility that state and local governments affected by such lease-sale might bar the landing of pipelines on their shores and thereby in necessitating the use of tankers increase the hazards of oil pollution, the Court reasoned:

> . . . [T]he extent to which treatment of a subject in an EIS for a multistage project may be deferred, depends on two factors: (1) whether obtaining more detailed useful information on the topic of transportation is "meaningfully possible" at the time when the EIS for an earlier stage is prepared, *see National Resources Defense Council v. Morton*, 458 F.2d

[23] The Court is not unmindful of the substantial question raised by NRDC concerning plaintiffs' standing under NEPA to assert claims founded principally in and directed primarily to economic rather than environmental well-being. *See, e.g., Churchill Truck Lines, Inc. v. U.S.*, 533 F.2d 730 (D.C.Cir. 1975); *Clinton Community Hospital Corp. v. Southern Maryland Medical Center*, 510 F.2d 1037 (4th Cir.), *cert. denied*, 422 U.S. 1048 (1975). While cognizant of the irony of plaintiffs' pressing claims based on NEPA's strictures, the Court, construing "environmental impact" more broadly, nevertheless has chosen to address the merits of those claims.

at 837, and (2) how important it is to have the additional information at an earlier stage in determining whether or not to proceed with the project, *see National Resources Defense Council v. Callaway*, 524 F.2d at 88.

If the additional information would at best amount to speculation as to future event or events, it obviously would not be of much use as input in deciding whether to proceed. As we said in *Callaway, supra*, referring to *Morton, supra:*

> "NEPA does not require a 'crystal ball' inquiry. . . . An EIS is required to furnish only such information as appears to be reasonably necessary under the circumstances for evaluation of the project rather than to be so all-encompassing in scope that the task of preparing it would become either fruitless or well nigh impossible, *Indian Lookout Alliance v. Volpe*, 484 F.2d 11 (8th Cir. 1973). A government agency cannot be expected to wait until a perfect solution of environmental consequences of proposed action is devised before preparing and circulating an EIS." 524 F.2d at 88.

Where the major federal action under consideration, once authorized, cannot be modified or changed, it may be essential to obtain such information as is available, speculative or not, for whatever it may be worth in deciding whether to make the crystallized commitment (e.g., the construction of a bridge of a specified type between two precise points). But *where a multi-stage project can be modified or changed in the future to minimize or eliminate environmental hazards disclosed as the result of information that will not become available until the future, and the Government reserves the power to make such a modification or change after the information is available and incorporated in a further EIS, it cannot be said that deferment violates the "rule of reason." Indeed, in considering a project of such flexibility, it might be both unwise and unfair not to postpone the decision regarding the next stage until more accurate data is at hand.*

562 F.2d at 1378 (emphasis supplied). The court concluded that "projection of specific pipeline routes was neither 'meaningfully possible,' nor 'reasonably necessary under the circumstances.' " *Id.* at 1382. This factor of multistate projects whose various stages are "substantially independent" of one another similarly has been considered by this Circuit in assessing the adequacy of an EIS. *See, e.g., Cady v. Morton, supra*, 527 F.2d at 794 n.7; *Trout Unlimited v. Morton, supra*, 509 F.2d at 1285.

The Court concludes that this action presents an analogous situation to which this reasoning applies. Approval and implementation of the CZMP no more indicates which of potentially dozens of projects will be certified as consistent (and undertaken subject to what conditions) than the decision of the Department of the Interior to proceed with the lease-sale of a large tract of federal OCS lands indicated which of potentially dozens of exploration and development projects would be permitted (and under what conditions).

The Court concludes, as did the court in *Cady v. Morton, supra*, that "although the EIS could be 'improved by hindsight,' it has satisfied the intent of the statute. *National Forest Preservation Group v. Butz*, 485 F.2d 408, 412 (9th Cir. 1973)." 527 F.2d at 797.

The length, complexity and convolutions of this memorandum and of the findings and conclusions set forth herein speak louder and much more eloquently than the words themselves. The message is as clear as it is repugnant: under our so-called federal system, the Congress is constitutionally empowered to launch programs the scope, impact, consequences and workability of which are largely unknown, at least to the Congress, at the time of enactment; the federal bureaucracy is legally permitted to execute the congressional mandate with a high degree of befuddlement as long as it acts no more befuddled than the Congress must reasonably have anticipated; if ultimate execution of the congressional mandate requires interaction between federal and state bureaucracy, the resultant maze is one of the prices required under the system.

The foregoing shall constitute the Court's findings of fact and conclusions of law.

The administrative action is affirmed; the petition is denied, each side to bear its costs.

The Clerk of the Court shall send, by United States mail, a copy of this Memorandum of Decision and Order to counsel for all parties. DATED: August 30th, 1978.

LAWS OF ALASKA

1977

Source

CCS SCS CSHB 342

Chapter No.

84

AN ACT

Relating to the management of the coastal resources of the state; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE FINDINGS. The legislature finds that

(1) the coastal area of the state is a distinct and valuable natural resource of concern to all the people of the state;

(2) the demands upon the resources of the coastal area are significant, and will increase in the future;

(3) the protection of the natural and scenic resources and the fostering of wise development of the coastal area are of concern to present and future citizens of the state;

(4) the capacity of the coastal area to withstand the demands upon it is limited;

(5) the degree of planning and resource allocation which has occurred in the coastal area has often been motivated by short-term considerations, unrelated to sound planning principles, and

(6) in order to promote the public health and welfare, there is a critical need to engage in comprehensive land and water use planning in coastal areas and to establish the means by which a planning process and management program involving the several governments and areas of the unorganized borough having an interest in the coastal area may be effectively implemented.

* Sec. 2. LEGISLATIVE POLICY. It is the policy of the state to

(1) preserve, protect, develop, use, and, where necessary, restore or enhance the coastal resources of the state for this and succeeding generations;

(2) encourage coordinated planning and decision making in the coastal area among levels of government and citizens engaging in or affected by activities involving the coastal resources of the state;

(3) develop a management program which sets out policies, objectives, standards and procedures to guide and resolve conflicts among public and private activities involving the use of resources which have a direct and significant impact upon the coastal land and water of the state;

(4) assure the participation of the public, local governments, and agencies of the state and federal governments in the development and implementation of a coastal management program;

(5) utilize existing governmental structures and authorities, to the maximum extent feasible, to achieve the policies set out in this section; and

(6) authorize and require state agencies to carry out their planning duties, powers and responsibilities and take actions authorized by law with respect to programs affecting the use of the resources of the coastal area in accordance with the policies set out in this section and the guidelines and standards adopted by the Alaska Coastal Policy Council under AS 46.35.

* Sec. 3. AS 44.19 is amended by adding new sections to read:

ARTICLE 11A. ALASKA COASTAL POLICY COUNCIL.

Sec. 44.19.891. ALASKA COASTAL POLICY COUNCIL. (a) There is created in the Office of the Governor the Alaska Coastal Policy Council. The council consists of the following:

(1) nine public members appointed by the governor from a list comprised of at least three names from each region, nominated by the municipalities of each region; the nominees shall be the mayor or member of the assembly or council of a municipality; one public member shall be appointed from each of the following general regions:

(A) northwest Alaska, including, generally, the area of the North Slope Borough and the Northwest Arctic regional educational attendance area;

(B) Bering Straits, including, generally, the area of the Bering Straits regional educational attendance area;

(C) southwest Alaska, including, generally, the area within the Lower Yukon, Lower Kuskokwim, Southwest, and Lake-Peninsula regional educational attendance areas and the Bristol Bay Borough;

(D) Kodiak-Aleutians, including the area of the Kodiak Island Borough and the Aleutian, Adak and Pribilof regional educational attendance areas;

(E) Upper Cook Inlet, including the Municipality of Anchorage and the Matanuska-Susitna Borough;

(F) Lower Cook Inlet, including, generally, the area within the Kenai Peninsula Borough;

(G) Prince William Sound, including, generally, the area east of the Kenai Peninsula Borough to 141° W. longitude;

(H) northern Southeast Alaska, including the area southeast of 141° W. longitude and north of 57° N. latitude, including the entirety of the City and Borough of Sitka; and

(I) southern Southeast Alaska, including that portion of southeastern Alaska not contained within the area described in (H) of this paragraph;

(2) each of the following:

(A) the director of the division of policy development and planning;

(B) the commissioner of the Department of Commerce and Economic Development;

(C) the commissioner of the Department of Community and Regional Affairs;

(D) the commissioner of the Department of Environmental Conservation;

(E) the commissioner of the Department of Fish and Game;

(F) the commissioner of the Department of Natural Resources; and

(G) the commissioner of the Department of Public Works.

(b) Each public member appointed by the governor under (a)(1) of this section serves a term of two years and until his successor is appointed and qualified, except that the term of office of a public member first appointed under (a)(1)(A), (a)(1)(C), (a)(1)(E) and (a)(1)(G) of this section shall be one year. A public member may be reappointed.

(c) The council shall designate co-chairmen, one of whom shall be selected from among the public members appointed under (a)(1) of this section and one from among the members designated in (a)(2) of this section.

(d) Members appointed under (a) of this section may select one person to serve as a permanent alternate at meetings of the council. If the member appointed is unable to attend, the alternate may act in his place.

(e) Four public members and three designated members of the council constitute a quorum, but one or more of the members designated by the council may hold hearings. All decisions of the council shall be by a majority vote of the

members present and voting.

(f) Members of the council or their alternates are entitled to per diem and travel expenses authorized by law for members of boards and commissions.

(g) If there is a vacancy among the public members appointed under (a)(1) of this section, the governor shall make an appointment to become immediately effective for the unexpired portion of the term.

Sec. 44.19.892. POWERS OF THE COUNCIL. The council may

(1) apply for and accept grants, contributions, and appropriations, including application for and acceptance of federal funds which may become available for coastal planning and management;

(2) contract for necessary services;

(3) consult and cooperate with

(A) persons, organizations, and groups, public or private, interested in, affected by, or concerned with coastal area planning and management;

(B) agents and officials of the coastal resource districts of the state, and federal and state agencies concerned with or having jurisdiction over coastal planning and management;

(4) take any reasonable action necessary to carry out the provisions of secs. 891 - 894 of this chapter.

Sec. 44.19.893. DUTIES OF THE COUNCIL. In conformity with the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.), the council shall

(1) through the public hearing process and the recording of the minutes of the hearings, develop guidelines and standards for the preparation of, and approve, in accordance with AS 46.35, the Alaska coastal management program;

(2) establish continuing coordination among state agencies to facilitate the development and implementation of the Alaska coastal management program; in carrying out its duties under this paragraph, the council shall initiate an interagency program of comprehensive coastal resource planning for each geographic region described in sec. 891-(a)(1) of this chapter;

(3) assure continued provision of data and information to coastal resource districts to carry out their planning and management functions under the program;

(4) submit annually to the legislature, not later than the 10th day of each regular session, the portion of the coastal management program approved or amended by the council during the preceding year.

Sec. 44.19.894. COUNCIL STAFF. The council shall

utilize the staff of the office of coastal management within the division of policy development and planning in discharging its powers and duties. The coordinator of the office, with the concurrence of the council, may contract with or employ personnel or consultants he considers necessary to carry out the powers and duties of the council.

* Sec. 4. AS 46 is amended by adding a new chapter to read:

CHAPTER 35. THE ALASKA COASTAL MANAGEMENT PROGRAM.

ARTICLE 1 DEVELOPMENT OF ALASKA COASTAL MANAGEMENT PROGRAM.

Sec. 46.35.010. DEVELOPMENT OF ALASKA COASTAL MANAGEMENT PROGRAM. (a) The Alaska Coastal Policy Council established in AS 44.19.891 shall approve, in accordance with secs. 10 - 210 of this chapter, the Alaska coastal management program.

(b) The council may approve the Alaska coastal management program for a portion or portions of the coastal area before approving the complete program under (a) of this section. Portions of the program approved under this subsection shall be incorporated into the Alaska coastal management program.

(c) The Alaska coastal management program shall be reviewed by the council and, when appropriate, revised to

(1) add newly approved district coastal management programs, or revisions and amendments to the Alaska coastal management program;

(2) integrate newly approved district coastal management programs, or revisions and amendments of district coastal management programs, with existing approved programs and with plans developed by state agencies;

(3) add new or revised state statutes, policies, regulations or other appropriate material;

(4) review the effectiveness of implementation of district coastal management programs; and

(5) consider new information acquired by the state and coastal resource districts.

(d) All reviews and revisions shall be in accordance with the guidelines and standards adopted by the council under sec. 40 of this chapter.

Sec. 46.35.020. OBJECTIVES. The Alaska coastal management program shall be consistent with the following objectives:

(1) the use, management, restoration and enhancement of the overall quality of the coastal environment;

(2) the development of industrial or commercial enterprises which are consistent with the social, cultural, historic, economic and environmental interests of the people of the state;

(3) the orderly, balanced utilization and protection of the resources of the coastal area consistent with sound conservation and sustained yield principles;

(4) the management of coastal land and water uses in such a manner that, generally, those uses which are economically or physically dependent on a coastal location are given higher priority when compared to uses which do not economically or physically require a coastal location;

(5) the protection and management of significant historic, cultural, natural and aesthetic values and natural systems or processes within the coastal area;

(6) the prevention of damage to or degradation of land and water reserved for their natural values as a result of inconsistent land or water usages adjacent to that land;

(7) the recognition of the need for a continuing supply of energy to meet the requirements of the state and the contribution of a share of the state's resources to meet national energy needs; and

(8) the full and fair evaluation of all demands on the land and water in the coastal area.

Sec. 46.35.030. DEVELOPMENT OF DISTRICT COASTAL MANAGEMENT PROGRAMS. Coastal resource districts shall develop and adopt district coastal management programs in accordance with the provisions of this chapter. The program adopted by a coastal resource district shall be based upon a municipality's existing comprehensive plan or a new comprehensive resource use plan or comprehensive statement of needs, policies, objectives and standards governing the use of resources within the coastal area of the district. The program shall be consistent with the guidelines and standards adopted by the council under sec. 40 of this chapter and shall include:

(1) a delineation within the district of the boundaries of the coastal area subject to the district coastal management program;

(2) a statement, list, or definition of the land and water uses and activities subject to the district coastal management program;

(3) a statement of policies to be applied to the land and water uses subject to the district coastal management program;

(4) regulations, as appropriate, to be applied to the land and water uses subject to the district coastal management program;

(5) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to the land and water within the coastal area;

(6) a summary or statement of the policies which will be applied and the procedures which will be used to determine whether specific proposals for land or water uses

or activities shall be allowed; and

(7) a designation of, and the policies which will be applied to the use of, areas within the coastal resource district which merit special attention.

Sec. 46.35.040. DUTIES OF THE ALASKA COASTAL POLICY COUNCIL Through the public hearing process and the recording of the minutes of the hearings, the Alaska Coastal Policy Council shall

(1) by regulation, adopt under the provisions of the Administrative Procedure Act (AS 44.62), within six months of the effective date of this Act, for the use of and application by coastal resource districts and state agencies for carrying out their responsibilities under this chapter, guidelines and standards for

(A) identifying the boundaries of the coastal area subject to the district coastal management program;

(B) determining the land and water uses and activities subject to the district coastal management program;

(C) developing policies applicable to the land and water uses subject to the district coastal management program;

(D) developing regulations applicable to the land and water uses subject to the district coastal management program;

(E) developing policies and procedures to determine whether specific proposals for the land and water uses or activities subject to the district coastal management program shall be allowed;

(F) designating and developing policies for the use of areas of the coast which merit special attention; and

(G) measuring the progress of a coastal resource district in meeting its responsibilities under this chapter;

(2) develop and maintain a program of technical and financial assistance to aid coastal resource districts in the development and implementation of district coastal management programs;

(3) undertake review and approval of district coastal management programs in accordance with this chapter;

(4) initiate a process for identifying and managing uses of state concern within specific areas of the coast;

(5) develop procedures or guidelines for consultation and coordination with federal agencies managing land or conducting activities potentially affecting the coastal area of the state.

Sec. 46.35.050. ACTION AND SUBMISSION BY COASTAL RESOURCE DISTRICTS. Each coastal resource district shall make substantial progress, in the opinion of the council, toward completion of an approvable district coastal management program and shall complete and submit to the council for approval its program within 30 months of the effective date of this Act or within 30 months of certification of the results of the district's organization, whichever is later.

Sec. 46.35.060. REVIEW AND APPROVAL BY COUNCIL. (a) If, upon submission of a district coastal management program for approval, the council finds that the program is substantially consistent with the provisions of this chapter and the guidelines and standards adopted by the council and does not arbitrarily or unreasonably restrict or exclude uses of state concern, the council may grant summary approval of the district coastal management program, or may approve portions of the district program which are consistent.

(b) If the council finds that a district coastal management program is not approvable or is approvable only in part under (a) of this section, it shall direct that deficiencies in the program submitted by the coastal resource district be mediated. In mediating the deficiencies, the council may call for one or more public hearings in the district. The council shall meet with officials of the coastal resource district in order to resolve differences.

(c) If, after mediation, the differences have not been resolved to the mutual agreement of the coastal resource district and the council, the council shall call for a public hearing and shall resolve the differences in accordance with the Administrative Procedure Act (AS 44.62). After a public hearing held under this subsection, the council shall enter findings and, by order, may require

(1) that the district coastal management program be amended to make it consistent with the provisions of this chapter or the guidelines and standards adopted by the council;

(2) that the district coastal management program be revised to accommodate a use of state concern; or

(3) any other action be taken by the coastal resource district as appropriate.

(d) The superior courts of the state have jurisdiction to enforce orders of the council entered under (c) of this section.

Sec. 46.35.070. STANDARDS FOR COUNCIL REVIEW AND APPROVAL. (a) The council shall approve a district coastal management program submitted for review and approval if the program is consistent with the provisions of this chapter and the guidelines and standards adopted by the council.

(b) Notwithstanding an inconsistency of a district coastal management program submitted for review and approval with the guidelines and standards adopted, the council shall approve the program if it finds that

(1) strict adherence to the guidelines and standards adopted would result in a violation of another state law or policy;

(2) strict adherence to the guidelines and standards adopted would cause or probably cause substantial irreparable harm to another interest or value in the coastal area of the district; or

(3) the inconsistency is of a technical nature and no substantial harm would result to the policies and objectives of this chapter or the Alaska coastal management program.

(c) In determining whether a restriction or exclusion of a use of state concern is arbitrary or unreasonable, the council shall approve the restriction or exclusion if it finds that

(1) the coastal resource district has consulted with and considered the views of appropriate federal, state or regional agencies;

(2) the district has based its restriction or exclusion on the availability of reasonable alternative sites; and

(3) the district has based its restriction or exclusion on an analysis showing that the proposed use is incompatible with the proposed site.

(d) A decision by the council under this section shall be given within 90 days.

Sec. 46.35.080. EFFECTIVE DATE OF ALASKA COASTAL MANAGEMENT PROGRAM. The Alaska coastal management program adopted by the council, and any additions, revisions, or amendments of the program, take effect upon adoption of a concurrent resolution by a majority of the members of each house of the legislature or by a vote of the majority of the members of each house at the time the houses are convened in joint session to confirm executive appointments submitted by the governor.

Sec. 46.35.090. IMPLEMENTATION OF DISTRICT COASTAL MANAGEMENT PROGRAMS. (a) A district coastal management program approved by the council and the legislature for a coastal resource district which does not have and exercise zoning or other controls on the use of resources within the coastal area shall be implemented by appropriate state agencies. Implementation shall be in accordance with the comprehensive use plan or the statement of needs, policies, objectives and standards adopted by the district.

(b) A coastal resource district which has and exercises zoning or other controls on the use of resources within the coastal area shall implement its district coastal management program. Implementation shall be in accordance with the comprehensive use plan or the statement of needs, policies, objectives and standards adopted by the district.

Sec. 46.35.100. COMPLIANCE AND ENFORCEMENT. (a) Municipalities and state agencies shall administer land and

water use regulations or controls in conformity with district coastal management programs approved by the council and the legislature and in effect.

(b) On petition of a coastal resource district, a citizen of the district, or a state agency, showing that a district coastal management program is not being implemented, enforced or complied with, the council shall convene a public hearing to consider the matter. A hearing called under this subsection shall be held in accordance with the Administrative Procedure Act (AS 44.62). After hearing, the council may order that the coastal resource district or state agency take any action which the council considers necessary to implement, enforce or comply with the district coastal management program.

(c) In determining whether an approved district coastal management program is being implemented, enforced or complied with by a coastal resource district which exercises zoning authority or controls on the use of resources within the coastal area, the council shall find in favor of the district if

(1) zoning or other regulations have been adopted and are being enforced;

(2) variances are being granted according to procedures and criteria which are elements of the district coastal management program, or the variance is otherwise approved by the council; and

(3) procedures and standards adopted by the coastal resource district as required by this chapter or by the guidelines and standards adopted by the council and subsequently approved by the legislature have been followed and considered.

(d) In determining whether a state agency is complying with a district coastal management program with respect to its exercise of regulation or control of the resources within the coastal area, the council shall find in favor of the agency if

(1) the use or activity for which the permit, license or approval is granted is consistent with the district coastal management program and regulations adopted under it; and

(2) the use or activity for which the permit, license or approval is granted is consistent with requirements imposed by state statute, regulation, or local ordinance applicable to the use or activity.

(e) The superior courts of the state have jurisdiction to enforce lawful orders of the council.

ARTICLE 2. COASTAL MANAGEMENT PROGRAMS IN THE UNORGANIZED BOROUGH.

Sec. 46.35.110. AUTHORITY IN THE UNORGANIZED BOROUGH. Under AS 29.03.020 and secs. 110 - 180 of this chapter, the legislature authorizes organization of coastal resource service areas in the unorganized borough and grants

authority to the service areas which may be organized to perform the duties required under this chapter.

Sec. 46.35.120. COASTAL RESOURCE SERVICE AREAS. (a) Except as provided in (b) of this section, each regional educational attendance area established under AS 14.08.031 containing a part of the coastal area may be organized as a coastal resource service area.

(b) The commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area

(1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; or

(2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional educational attendance areas as a single coastal resource service area.

(c) A determination under (b) of this section shall be made before organization of the coastal resource service area and no later than six months from the effective date of this Act.

Sec. 46.35.130. ORGANIZATION OF COASTAL RESOURCE SERVICE AREA. (a) Organization of a coastal resource service area may be initiated by

(1) submission to the council of a petition signed by a number of registered voters equal to 15 per cent of the number of votes cast within the coastal resource service area at the last state general election;

(2) submission to the council of a resolution approved by the city council or traditional village council of not less than 25 per cent of the number of cities and villages within the coastal resource service area; or

(3) at the direction of a majority of the members of the council in the manner set out in sec. 160 of this chapter.

(b) Acting at the request of the council, the lieutenant governor, not less than 60 nor more than 90 days after receipt of a proper petition under (a)(1) of this section, a proper resolution under (a)(2) of this section, or at the direction of the council under (a)(3) of this section, shall conduct an election on the question of organization of a coastal resource service area.

Sec. 46.35.140. COASTAL RESOURCE SERVICE AREA BOARDS. (a) Each coastal resource service area, upon organization, shall have an elected board representing the population of

the service area. The board shall have the powers and duties and perform the functions prescribed for or required of coastal resource districts.

(b) A coastal resource service area board shall contain seven members. Board members shall be elected at large by the qualified voters of the coastal resource service area.

(c) The commissioner of the Department of Community and Regional Affairs, after consultation with residents of a coastal resource service area, may divide a service area into sections only for the purpose of nominating and electing board members. Division of a service area into sections for the purpose of nomination and election shall be in accordance with the provisions of AS 14.08.051(a). Division may be proposed in the petition submitted under sec. 130-(a)(1) of this chapter, in the resolution submitted under sec. 130(a)(2) of this chapter, at the direction of the council under sec. 130(a)(3) of this chapter, or may be proposed at any time by the members of the coastal resource service area board. If proposed by the board, the division of the service area into sections is subject to approval of a majority of the qualified voters voting on the question in the coastal resource service area at the next regular election or at a special election called for that purpose and, if approved, takes effect at the next regular election of members of the coastal resource service area board.

(d) The term of office of a member of a coastal resource service area board is three years, except that the terms of the members of the first board elected after organization of a coastal resource service area shall be determined by lot, with two members serving one-year terms, two members serving two-year terms, and three members serving three-year terms. Members serve until their successors are elected and have qualified. Nothing in this section prohibits the reelection of a board member.

(e) The lieutenant governor shall provide for the election of the members of coastal resource service area boards. The first election of board members shall occur not less than 60 nor more than 90 days after certification of the results of an organization election under sec. 130(b) of this chapter in which a majority of votes cast favors organization of the coastal resource service area.

(f) Except for the first election of members of coastal resource service area boards, elections shall be held annually on the date of election of members of regional educational attendance area boards under AS 14.08.071(b).

(g) A vacancy on a coastal resource service area board shall be filled by appointment as provided in AS 14.08.041-(a) for vacancies in the membership of regional educational attendance area boards.

(h) Members of coastal resource service area boards are subject to recall on the same grounds and in the same manner as provided for recall of municipal officials in AS 29.28.130 - 29.28.250. The lieutenant governor functions in place of the assembly or council and municipal clerk for receipt and review of recall petitions and the conduct of

recall elections.

Sec. 46.35.150. ELECTIONS IN COASTAL RESOURCE SERVICE AREAS. Organization elections under sec. 130 of this chapter and other elections, including recall elections conducted under sec. 140 of this chapter, shall be administered by the lieutenant governor in the general manner provided in the Alaska Election Code (AS 15.05 - 15.60). In addition, the lieutenant governor may adopt regulations necessary to the conduct of coastal resource service area board elections. The state shall pay all election costs.

Sec. 46.35.160. ORGANIZATION AT THE DIRECTION OF THE COUNCIL. (a) Whenever it appears that major economic development activity will occur in a coastal resource service area or in waters adjacent to a coastal resource service area which has not been organized, the council may direct the lieutenant governor to submit to the voters of the service area the question of organization. The council may require an election on the question only after holding at least one public hearing within the area proposed for organization.

(b) For purposes of this section, "major economic development activity" includes a call for nomination by the Secretary of the United States Department of the Interior for leasing of tracts within petroleum basins in waters of the outer continental shelf adjacent to the coastal resource service area or any other significant industrial or commercial activity which, in the opinion of the council, would commit the resources of the coastal area to a use of direct and significant impact upon the coastal waters of the state.

Sec. 46.35.170. PREPARATION OF DISTRICT COASTAL MANAGEMENT PROGRAM BY THE DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS. (a) If residents of a coastal resource service area reject organization of the service area at an election called for the purpose and the council finds, after public hearing, that major economic development activity has occurred or will occur within the service area, the council may direct the Department of Community and Regional Affairs to prepare and recommend for consideration by the council and for submission to the legislature a district coastal management program for the service area.

(b) At the request of the council, the Department of Community and Regional Affairs shall complete the district coastal management program in accordance with this chapter and the guidelines and standards adopted by the council for a coastal resource service area which has been organized but which has failed to make substantial progress in the preparation of an approvable district coastal management program within 18 months of certification of the results of an organization election or which has not submitted for approval to the council a program within 30 months of certification of the results of its organization election. Preparation of the program shall be conducted in consultation with the coastal resource service area and shall, to the maximum extent consistent with this chapter, reflect the expressed concerns of the residents of the service area.

(c) Before requesting the department to complete the district coastal management program under (b) of this

section, the council shall meet with the members of the coastal resource service area board to determine whether the board is able to complete a district coastal management program within the time limitations established in this section.

Sec. 46.35.180. APPROVAL OF PROGRAMS IN COASTAL RESOURCE SERVICE AREAS. (a) Before adoption by a coastal resource service area board, or by the Department of Community and Regional Affairs under sec. 170 of this chapter, a district coastal management program shall be submitted for review to each city or village within the coastal resource service area. The council of a city or traditional village council shall consider the program submitted for review. Within 60 days of submission, the council of a city or traditional village council shall either approve the program or enter objections to all or any portion of the program.

(b) If a city or village within a coastal resource service area fails to approve a portion of the district coastal management program prepared and submitted for approval under (a) of this section, the governing body shall advise the coastal resource service area board or the department, as applicable, of its objections to the proposed program and suggest alternative elements or components for inclusion in the district coastal management program. New matter submitted by a city or village which is substantially consistent with the guidelines and standards adopted by the council shall be accepted and the district coastal management program modified accordingly. If a city or village fails to provide objections and suggested alternatives within the time limits established in this section, the coastal resource service area board or the department, as applicable, may adopt the district coastal management program as initially offered.

(c) Objection by a city council under (b) of this section is limited to objection to elements of the program affecting resources or the use of resources within the corporate limits of the city. Objection by a traditional village council under (b) of this section is limited to objection to elements of the program affecting resources or the use of resources within the village or within two miles of the village.

(d) For purposes of this section, "village" means an unincorporated community where at least 25 persons reside as a social unit as determined by the Department of Community and Regional Affairs.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 46.35.190. COOPERATIVE ADMINISTRATION. (a) A city within the coastal area which is not part of an adjacent coastal resource service area may include itself for purposes of this chapter within an adjacent coastal resource service area if its governing body, by resolution adopted by a majority of its membership, consents to the inclusion of the city and a copy of the resolution is filed with the commissioner of the Department of Community and Regional Affairs.

(b) Nothing in this chapter restricts or prohibits cooperative or joint administration of functions between a municipality and a coastal resource service area organized under the provisions of this chapter upon initiation of a mutual agreement for the purpose.

Sec. 46.35.200. STATE AGENCIES. Upon the adoption of the Alaska coastal management program, state departments, boards and commissions shall review their statutory authority, administrative regulations, and applicable procedures pertaining to land and water uses within the coastal area for the purpose of determining whether there are any deficiencies or inconsistencies which prohibit compliance with the program adopted. State agencies shall, within six months of the effective date of the Alaska coastal management program, take whatever action is necessary to facilitate full compliance with and implementation of the program, including preparation and submission of recommendations to the council for additional or amended legislation.

Sec. 46.35.210. DEFINITIONS. In this chapter, unless the context otherwise requires,

(1) "area which merits special attention" means a delineated geographic area within the coastal area which is sensitive to change or alteration and which, because of plans or commitments or because a claim on the resources within the area delineated would preclude subsequent use of the resources to a conflicting or incompatible use, warrants special management attention, or which, because of its value to the general public, should be identified for current or future planning, protection, or acquisition; these areas, subject to council definition of criteria for their identification, include:

(A) areas of unique, scarce, fragile or vulnerable natural habitat, cultural value, historical significance, or scenic importance;

(B) areas of high natural productivity or essential habitat for living resources;

(C) areas of substantial recreational value or opportunity;

(D) areas where development of facilities is dependent upon the utilization of, or access to, coastal waters;

(E) areas of unique geologic or topographic significance which are susceptible to industrial or commercial development;

(F) areas of significant hazard due to storms, slides, floods, erosion or settlement; and

(G) areas needed to protect, maintain, or replenish coastal land or resources, including coastal flood plains, aquifer recharge areas, beaches and offshore sand deposits;

(2) "coastal resource district" means each of the following which contains a portion of the coastal area of

the state:

(A) unified municipalities established under AS 29.68.240 - 29.68.440;

(B) organized boroughs of any class which exercise planning and zoning authority;

(C) home rule and first class cities of the unorganized borough or within boroughs which do not exercise planning and zoning authority;

(D) second class cities of the unorganized borough, or within boroughs which do not exercise planning and zoning authority, which have established a planning commission, and which, in the opinion of the commissioner of the Department of Community and Regional Affairs, have the capability of preparing and implementing a comprehensive district coastal management program under sec. 30 of this chapter;

(E) coastal resource service areas established and organized under AS 29.03.020 and secs. 110 - 180 of this chapter;

(3) "council" means the Alaska Coastal Policy Council;

(4) "department" means the Department of Community and Regional Affairs;

(5) "use of direct and significant impact" means a use, or an activity associated with the use, which proximately contributes to a material change or alteration in the natural or social characteristics of a part of the state's coastal area and in which

(A) the use, or activity associated with it, would have a net adverse effect on the quality of the resources of the coastal area;

(B) the use, or activity associated with it, would limit the range of alternative uses of the resources of the coastal area; or

(C) the use would, of itself, constitute a tolerable change or alteration of the resources within the coastal area but which, cumulatively, would have an adverse effect;

(6) "uses of state concern" means those land and water uses which would significantly affect the long-term public interest; these uses, subject to council definition of their extent, include:

(A) uses of national interest, including the use of resources for the siting of ports and major facilities which contribute to meeting national energy needs, construction and maintenance of navigational facilities and systems, resource development of federal land, and national defense and related security facilities that are dependent upon coastal locations;

(B) uses of more than local concern, including those land and water uses which confer significant environmental, social, cultural, or economic benefits or burdens beyond a single coastal resource district;

(C) the siting of major energy facilities or large-scale industrial or commercial development activities which are dependent on a coastal location and which, because of their magnitude or the magnitude of their effect on the economy of the state or the surrounding area, are reasonably likely to present issues of more than local significance;

(D) facilities serving statewide or interregional transportation and communication needs; and

(E) uses in areas established as state parks or recreational areas under AS 41.20 or as state game refuges, game sanctuaries or critical habitat areas under AS 16.20.

* Sec. 5. AS 44.47 is amended by adding a new section to read:

Sec. 44.47.095. PLANNING ASSISTANCE FOR DEVELOPMENT AND MAINTENANCE OF DISTRICT COASTAL MANAGEMENT PROGRAMS. The department shall conduct a program of research, training, and technical assistance to coastal resource districts necessary for the development and implementation of district coastal management programs under AS 46.35. The technical assistance shall include the direct granting to the coastal resource districts of a portion of any funds received by the state from the federal coastal zone management program, in amounts to be individually determined for each coastal resource district by the commissioner. State agencies shall assist the department in carrying out the purposes of this section.

* Sec. 6. The Administrative Regulation Review Committee established in AS 24.20.400 - 24.20.460 shall review the administrative regulations adopted by the executive departments of the state government which affect the resources and use of the resources of the state's coastal area. The committee shall, not later than January 20, 1979, make formal recommendation with respect to annulment of regulations adopted which, in the opinion of the committee, fail to implement, interpret or carry out the policies, objectives and standards of the Alaska coastal management program. The recommendations of the committee shall be transmitted to the first regular session of the Eleventh Alaska Legislature.

* Sec. 7. This Act takes effect immediately in accordance with AS 01.10.070(c).

Approved by the Governor: June 3, 1977
Actual Effective Date: June 3, 1977

CHAIRMAN

H 60 (Rev. 12/78)

Box 461
Haines, Alaska 99827
February 14, 1980

Representative Bill Parker, Chairman
Committee on Community & Regional Affairs
House of Representatives
Pouch V
State Capitol
Juneau, Alaska 99811

Honorable Bill Parker:

Please accept this as written testimony for your public hearing on the Haines District Coastal Management Program, scheduled for February 27th and March 3, 1980.

The Haines plan covers a very small geographical area. For this reason future coastal plans of the area covering more territory are imminent. They will be conducted as municipal boundries are adjusted through annexation or establishment of a Borough Government with planning powers.

Therefore little time should be spent on this plan and it should be adopted as submitted.

Although the Haines Plan went through extensive public hearing and reflects the local attitude, it's preparation was truly only to comply with state and federal regulations.

Yours truly,

Marvin P. Hartshorn

The Senate Committee will appreciate comments from interested parties on the following concerns:

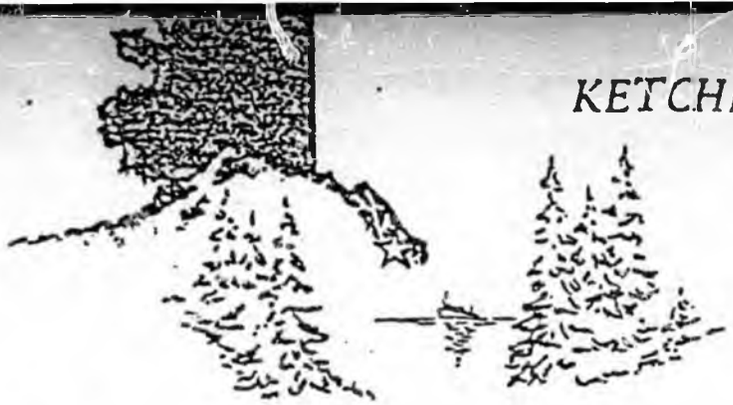
1. Coastal districts have divided their districts into "study" areas and "planning" areas. Do approved local policies apply to study areas and, if so, who is responsible for their implementation outside the planning area? How does level of local government (class of borough) effect this situation?

2. Can the legislature approve a plan if there are no implementing ordinances?

3. Districts have developed their plans at considerable time, expense and local involvement. What assurances are there that state and federal agencies will consistently and fully implement these plans? Are relationships between implementors systematized?

4. Apparently, state agencies have not been full participants in the district program planning process. What solutions are needed to this problem?

5. Other related issues which the public wishes to bring to the attention of the Committee.



KETCHIKAN GATEWAY BOROUGH
344 FRONT STREET
KETCHIKAN, ALASKA 99901

TO: Legislative Committee of
Alaska Municipal League

THRU: Judith A. Slajer
Borough Manager

FROM: Marvin Yoder MY
Economic Development Specialist

SUBJECT: Extraterritorial jurisdiction in Coastal Management district

Policy Statement p. 8 IV E(2)

Working with our municipal attorney, Mr. Walker, we decided that the basic need of organized districts was to be able to have input into plans being compiled in adjacent resource service areas.

The two options available are for the organized municipalities to use its resources to physically inventory and plan for those areas that have direct influence on the municipality or to simply state that the impact exists and then request an opportunity to determine the extent of the impact when the resource service area begins to formulate its plan. After discussing these concepts with individuals involved in Coastal Management programs, we chose the latter option.

The second decision was whether the proposed new language should be added to the State statutes or to the regulations. In the statutes AS 46.40.180 describes the requirements necessary for a resource district to have its plan approved. The proposed addition stipulated that concerns expressed by adjacent districts must be addressed by public hearings and records of these hearings are to be documented in the permanent record of the district.

The second approach would be to amend the regulations. This would be done by the Alaska Coastal Policy Council with the legislative concurrence. Section 6 AAC 85.140 provides opportunities for other government agencies to coordinate and review coastal plans and specifically mentions adjacent districts.

Our recommendation is to attempt to change the statutes and assume that the regulations will be changed to conform to the intent of the act.

On November 30, 1979 the proposed amendment was placed before the Policy Council and received favorable comments; however no formal action was taken. It is my opinion as a member of the Council that if there is a statute change, the Policy Council will change the regulations to reflect that change.

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to filing of notice of interest by adjoining boroughs or cities regarding proposed district coastal management plan in unorganized boroughs and providing opportunity to be heard prior to approval of district coastal management plan by Alaska Coastal Policy Council; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1: AS 46.40.180 is amended by adding new subsections thereto to read:

(e) Any organized borough or city which claims to have an interest in the manner in which resources, or the use of resources, in any unorganized borough adjacent to its boundaries are developed shall notify the Department of Community and Regional Affairs of the nature and extent of such interest. Before adoption by a coastal resource service area board, or by the Department of Community and Regional Affairs under Section 170 of this chapter, a district coastal management program shall be submitted to each organized borough or city which has filed a notice of interest with the Department of Community and Regional Affairs.

(f) The council shall not approve a district coastal management program unless it finds that each organized borough or city that has filed a notice of interest under (e) above has received notice and an opportunity to present its concerns regarding such plan at a public hearing before the coastal service area board or Department of Community and Regional Affairs which concerns shall become part of the record regarding such plan.

* Section 2: This Act takes effect immediately in accordance with AS 01.10.070(c).

Re: Amendment to Coastal Policy Act

At the annual meeting of the Alaska Municipal League, held last fall in Sitka, the members adopted the following paragraph as part of the 1980 policy statement:

> The League supports the concept of "extra-territorial" planning by municipalities in the unorganized borough with statutory provisions to permit the Alaska Coastal Policy Council to adopt said "extra-territorial" planning as part of the Alaska Coastal Management Program until such time as a resource district plan is adopted.

The enclosed bill, which is a starting point for implementing this section, and the memo from the Ketchikan Gateway Borough were endorsed by the AML Legislative Committee in December.

We believe it is very important that the concerns of adjacent areas be addressed in each coastal management plan that is approved. An amendment to the act, along the lines of this proposal, will help to achieve that goal.

The enclosed material has been submitted to the Alaska Coastal Policy Council and will be considered at its next meeting scheduled for mid-March.

HOUSE BIL. NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to filing of notice of interest by adjoining cities or boroughs regarding proposed district coastal management plan in unorganized boroughs and providing opportunity to be heard prior to approval of district coastal management plan by Alaska Coastal Policy Council; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1: AS 46.40.180 is amended by adding new subsections thereto to read:

(e) Any organized city or borough which claims to have an interest in the manner in which resources, or the use of resources, in any unorganized borough adjacent to its boundaries are developed shall notify the Department of Community and Regional Affairs of the nature and extent of such interest. Before adoption by a coastal resource service area board, or by the Department of Community and Regional Affairs under Section 170 of this chapter, a district coastal management program shall be submitted to each organized city or borough which has filed a notice of interest with the Department of Community and Regional Affairs.

(f) The council shall not approve a district coastal management program unless it finds that each organized city or borough that has filed a notice of interest under (e) above has received notice and an opportunity to present its concerns regarding such plan at a public hearing before the coastal service area board or the Department of Community and Regional Affairs which concerns shall become part of the record regarding such plan.

* Section 2: This Act takes effect immediately in accordance with AS 01.10.070(c).

SUBJECT: Extraterritorial jurisdiction in Coastal Management district

Working with our municipal attorney, Mr. Walker, we decided that the basic need of organized districts was to be able to have input into plans being compiled in adjacent resource service areas.

The two options available are for the organized municipalities to use its resources to physically inventory and plan for those areas that have direct influence on the municipality or to simply state that the impact exists and then request an opportunity to determine the extent of the impact when the resource service area begins to formulate its plan. After discussing these concepts with individuals involved in Coastal Management programs, we chose the latter option.

The second decision was whether the proposed new language should be added to the State statutes or to the regulations. In the statutes AS 46.40.180 describes the requirements necessary for a resource district to have its plan approved. The proposed addition stipulated that concerns expressed by adjacent districts must be addressed by public hearings and records of these hearings are to be documented in the permanent record of the district.

The second approach would be to amend the regulations. This would be done by the Alaska Coastal Policy Council with the legislative concurrence. Section 6 AAC 85.140 provides opportunities for other government agencies to coordinate and review coastal plans and specifically mentions adjacent districts.

Our recommendation is to attempt to change the statutes and assume that the regulations will be changed to conform to the intent of the act.

On November 30, 1979 the proposed amendment was placed before the Policy Council and received favorable comments; however no formal action was taken. It is my opinion as a member of the Council that if there is a statute change, the Policy Council will change the regulations to reflect that change.
