It would appear that another approach at least at the start would be a "Study of Taxation in the Unorganized Borough" to determine both feasability and cost of administering such a property tax. It is completely possible that the cost of administration could exceed the revenue produced at least for the first few years.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

March 13, 1979

The Honorable Bill Parker
Chairman
House Community & Regional
Affairs Committee
Court Building, Room 628
Juneau, AK 99801

Dear Mr. Parker:

HOUSE BILL NO. 9

House Bill No. 9, an Act providing for assessment, levy and collection of a tax on developed land in the unorganized borough, was introduced in the House on January 24, 1979 and was referred to the House Community and Regional Affairs and Finance Committees.

For the consideration of the House Community and Regional Affairs Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. P. A. Wall, Director, Administrative Services Division, Department of Revenue, concerning the proposed legislation.

Sincerely,

R. D. Stevenson

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This analysis is based on the assumption that the original mapping program and establishment of the necessary assessment data and file will be let out for contract.

The additional staff included are only to supervise the original project and then maintain the system after the initial program.

Time does not allow the program to start before FY'81 so no impact has been included for FY'80.

	FY'81
Sufficient Equipment to establish new personnel in environment condusive to work	$37,330

Note: Subsequent years are based on inflationary pressure on FY 81 except the $805,000 for professional fees has been projected to decrease to $115,000 in FY 84 assuming original establishment of maps and records to be complete by that time. Also the Equipment item has been reduced substantially after initial purchase.

Additional Comments: We would envision the process of setting up the administration as multiple step in nature. The first logical step would be an in depth study to establish proper procedure of implementing the administrative process. Subsequent steps at this point are tentative in nature and would be subject to revision at the conclusion of Step I.

Step Two would be setting up of a mapping program by region. Administratively, mapping of one region at a time would appear appropriate. This mapping program would involve a private contract with supervisory direction and controlled by professional staff to be added to the Department of Community and Regional Affairs.

Step Three would be listing, enumeration and calculation of data into preliminary appraised values (this should be done by geographic area and directly follow Step 2 in each area).

Step Four would be onsite review of finished product by professional staff of the Department of Community and Regional Affairs for acceptance or refusal of contractor's work.

Step Five would be the compilation of all data into final assessment roll and present to review board for their actions.

Step Six - At conclusion of Review process, final assessment roll would be compiled and presented to Department of Revenue for collection.

As you can see, this process will be relatively time consuming, however, it appears to be the best and most logical approach to solution of the problem.

Also, it should be noted that even though some of the work is to be contracted, it is essential that professional staff be heavily involved from the onset to insure the quality of the finished product.

It would appear that another approach at least at the start would be a "Study of Taxation in the Unorganized Borough" to determine both feasability and cost of administering such a property tax. It is completely possible that the cost of administration could exceed the revenue produced at least for the first few years.

Very truly yours,

Fermin Gutierrez
Administrator

cc: Representative Dick Eliason
Representative Mike Miller

Mr. Michael C.T. Smith
Asst. Commissioner
Dept. of Natural Resourses

Februauy 1, 1979

Dear Mr. Smith,

I recently came into possession of a memo to you from Claud Hoffman, Chief Cadastral Engineer (1/19/79, file #1020) regarding the Dept. of Natural Resources' proposed survey (and other) regulations, in which Mr. Hoffman comes to the totally irresponsible conclusion that the regulations be adopted; irresponsible, that is, if his position has anything to do with presenting the desire of the Alaskan people.

In the memo he notes 15 general objections which people voiced at various public hearings on the matter. The public outrage he mentions regarding the usurption of Alaskan's rights, domination by excessive government regulations and insensitive beaurocratic control was exceeded only by what he observed as the frustration felt due to lack of adequate notice for the hearing. The fact that the hearings were tactically set during the holidays only serves to solidify public belief that the State hopes to adopt these restrictive regulations as quietly and swiftly as possible. For after citing lack of participation in Anchorage and Juneau, he discounts the Fairbanks testimony (all negative) as a reaction "to such other 'hot' issues as the 'D2' and 'Antiquities Act'", and concludes that we "take a serious look at the authority we actually have.....and proceed on line and adopt the regulations...."

I submit that this type of thinking on the part of a State Agency is in direct conflict with the will of Alaskans, and that further action in this direction will only serve to fuel the fires of discontent just now beginning to challange the power of the Federal government (as witnessed by CMAL, Alaskans Unite, etc.). It is my hope that those fires need not ignite the walls of our own State agencies to regain the Alaska we came here for.

Sincerely,

Barry L. Brown

RE: HB 51 "amending the definition of vacant unappropriated and unreserved land' with reference to land selection entitlements of municipalities;

The bill was drafted to deal with Bierne sensitive lands which are part of the municipal entitlements. It would protect these lands from selection if the Bierne initiative goes into effect.

On Feb. 14 a meeting was held in Anch. , headed by Mike Smith of the Div. of Lands, to discuss the problems connected with the Bierne Initiative and regulations dealing with municipal entitlements. Attending the meeting were representatives of the following Boroughs: Ketchikan, Juneau, Mat Su, Kenai, Anch. Kodiak, Fbks. North Slope, Bristol Bay and Haines were not represented nor was Sitka. At that meeting it was decided that the problem could be handled administrationally and that the bill was not needed.

FROM: REP. BILL PARKER, Chairman

RE: HB 68 relating to the Village Safe Water Act

The following recommendations are excerpted from the Governor's Management and Efficiency Review Report

Recommendations

254. **Discontinue construction of village safe water projects.**

The village safe water program is financed completely by the state and there is substantial concern about its effectiveness. The program applies to villages with population ranges of from 25 to 600 persons. Approximately $5-million has been spent to complete eight projects and three more are scheduled.

A fiscal 1977 request of $2-million has been made for the program plus an additional $300,000 for annual maintenance work. The maintenance figure could double as additional projects are completed. The villages are unable to operate and maintain the facilities and a decision must be made on the future of the program.

In view of the inability of the villages to run these facilities successfully, the construction program should be discontinued. As some of the native corporations involved become more experienced, they could contract with the state for such a program, recognizing that rural water and waste disposal systems are almost never financially self-sustaining. Implementation would result in an estimated one-time cost avoidance of $2-million and an annual saving of approximately $300,000.

pp. 135, 137

The final implementation report of the Governor's Management and Efficiency Review states that this particular recommendation has not been implemented. (See p.10)

VILLAGE SAFE WATER PROGRAM
An Update to January 20, 1977

Introduction

The Village Safe Water Act (AS 46.07), passed in 1970, calls for "at least one facility for safe water and hygienic sewage disposal in each village" in Alaska. Little progress was made in the program until December of 1972 due to lack of funds, inability to hire someone to administer the Village Safe Water (VSW) program, and lack of operation and maintenance provisions. Since 1972, six VSW facilities have been constructed, two more are nearly complete, and another is being designed. In addition, an operation and maintenance support program and a comprehensive planning effort have been organized and initiated.

Construction

The six VSW facilities constructed to date are in the villages of Northway, Chevak, Alakanuk, Selawik, Nulato and Pitkas Point. A facility will be completed in Beaver in January, 1977, and in Koyukuk in February of 1977. A facility for Kongiganak is being designed, and construction is scheduled for summer of 1977.

At the nine locations listed above, the VSW projects consist of central sanitation facilities to which village residents can come to obtain water supply, sewage disposal, bathing and laundry services. No piped water distribution or sewage collection systems are involved except for water and sewer service lines to schools.

Construction methods used so far have included: 1) competition bid construction contracts administered by the Alaska Department of Public Works, 2) competitive bid construction contracts administered by the Alaska Department of Environmental Conservation (ADEC), and 3) force account construction by the villages through construction management contracts with engineering consultants. All facilities so far have been designed by engineering consultants.

The force account/construction management method of construction has been the most satisfactory of the three methods used. Facilities constructed that way have been built cheaper and faster than those built under competitive bid construction contracts; the quality of construction has been better; and the villages have been more intimately involved in, and satisfied with, their projects.

VSW facilities have cost from $350,000 at Pitkas Point (begun in FY 76) to almost $1,200,000 at Selawik (begun in FY 74). Villages served have ranged in size from 85 (Pitkas Point) to over 500 (Selawik).

Operation and Maintenance

Experience in the VSW program has confirmed that virtually any utility system installed in remote Alaskan villages is doomed to eventual failure unless the village is given financial, technical, and/or management assistance. Any program for providing utilities in rural Alaska must either adequately provide for long term operation and maintenance, or expect system failures that adequate operation, maintenance and management could have prevented.

Goals and Objectives

"SW Comprehensive Planning

GOAL

To develop a statewide comprehensive program for providing sanitation services in rural Alaska.

PLAN OBJECTIVES

1. Inventory existing water supply and sewage disposal facilities in rural Alaskan villages.

2. Develop criteria for evaluating the adequacy of existing water supply and sewage disposal facilities. identified in # 1 above.

3. Identify existing agency programs providing sanitation facilities to Alaskan villages. Quantify the resources currently available. Identify and describe the technical, management and administrative approaches presently used.

4. Develop criteria to evaluate the effectiveness of thes programs.

5. Evaluate the adequacy of technical, management and administrative approaches identified in #3. above.

6. Identify and evaluate alternative technical, administrative and management methods that might be used to address sanitation needs in rural Alaska.

7. Recommend changes in the activities and resources of existing programs to incorporate the alternatives noted in # 6 above. Recommend new programs and/or authority necessary for implementation.

8. Analyze existing methods of operation, maintenance and management of village sanitation facilities.

In FY 76, the annual operating budgets for VSW facilities ranged from $28,000 at Northway to over $100,000 at Selawik. ADEC provided a total of about $225,000 in VSW operation and maintenance grants in FY 76 to six villages. In addition, ADEC provided technical and management assistance to the six villages. Although expensive, the VSW operation and maintenance support program has made it possible for all completed VSW facilities to serve the public as intended.

Comprehensive Planning

ADEC is developing a comprehensive plan intended to define the roles of State and federal agencies and other groups involved in providing rural sanitation services. An early step in this planning is to inventory all village sanitation facilities. Completing this inventory is viewed as the cornerstore of the VSW planning effort.

The Ninth Alaska Legislature passed a resolution suggesting that a VSW advisory committee be organized consisting of representatives from the 12 Native Regional Service Associations. This committee would assist ADEC with policy and management decisions concerning the VSW program. The Department feels the advisory committee is a good idea and welcomes increased involvement for the Regional Associations.

Several local, State, federal and private organizations participate either directly or indirectly in providing rural sanitation services. A strong working relationship must be developed among the diverse groups if a comprehensive plan for sanitation services throughout rural Alaska is to be successfully developed and implemented.

9. Develop alternative methods for operation, maintenance and management of village sanitation facilities.

10. Recommend changes in the activities and resources of existing programs to incorporate the alternative approaches noted in #9 above.

11. Integrate the findings of the above analysis with the comprehensive plan.

12. With the assistance of the appropriate governmental agencies and Native non profit regional associations, proceed to implement the plan.

PUBLIC INVOLVEMENT & PROGRAM COORDINATION

Because several local, State and federal organizations participate either directly or indirectly in developing rural sanitation facilities, this major planning effort can not be undertaken alone. To insure proper plan development and implementation, a strong working relationship must be developed among the diverse groups currently working on rural sanitation problems.

Public participation and inter-agency coordination must be an integral part of the VSW comprehensive planning process. In this regard, a maximum effort will be made to enlist the active participation of the native regional health organizations, the villages and appropriate federal and state agencies. We hope that by the time a draft of the plan has been formulated, significant public comment and coordination will have been obtained. The results of our collective efforts will be a comprehensive plan for providing rural sanitation services in Alaska.

TELEPHONE NO:

FROM: Ernst W. Mueller
Commissioner
Dept. of Environmental Conservation

SUBJECT: Village Safe Water Program

Several months ago I requested Dr. Jerry Sargent, who is in charge of our Department's Village Safe Water Program administered under AS 46.07, to prepare a comprehensive briefing paper so that you and your staff can be more informed on that program, its successes and failures, and our plans for the future, of this program. That paper is now completed and is attached.

In particular, this briefing will (1) help provide you with a basis for evaluating VSW capital requests this Department will make over the next several years, and (2) apprise you of the need for defining State policy concerning operation and maintenance of VSW facilities, and perhaps rural utility systems in general. During the current fiscal year, we will be making recommendations to you and the Budget Review Committee concerning these two areas. We hope this information will be helpful to you in evaluating them.

OPERATION AND MAINTENANCE 14

I. THE STATUTE

The Village Safe Water (VSW) Act of 1970 (AS 46.07.010-080) was passed for the purpose of providing "safe water and hygienic sewage disposal facilities in villages in the state," and "to assure that there will be at least one facility for safe water and hygienic sewage disposal in each village." The Act stipulates that each facility will provide at least a safe water supply, means for sewage disposal, and bathing and laundry services. A village is defined as "an unincorporated community which has between 25 and 600 people residing within a two-mile radius, or a second class city." The Department of Environmental Conservation (ADEC) is seeking to have "or a second class city" deleted from that definition because some second class cities in Alaska are big enough that a central facility could not provide adequate sanitation services.

A village receiving a VSW project is not required to contribute toward costs of construction. The State may "provide for construction by contract or through grants to public agencies or private nonprofit organizations, or otherwise."

When a VSW facility is completed the recipient village must be given title to it. The village must agree to accept ownership of the facility and be responsible for its operation and maintenance. The State may assist a village with operation and maintenance expenses when the local governing body lacks sufficient financial rescources.

II. BACKGROUND AND PAST PROJECTS

In April of 1974 the Budget Review Committee requested ADEC to prepare an Issue Analysis on the Village Safe Water Program. The complete text of that analysis appears in Appendix A of this report.

The following excerpts from the VSW Issue Analysis describe activities in the program through June of 1974:

> ...Voters approved a three million dollar bond issue in 1970 to fund the VSW program and another one million dollar bond issue in 1972. Little progress was made in the program, however, until December, 1972 for the following reasons: 1) no money was available to administer the program until October, 1972 and even when the VSW staff position became available, a person suitable to fill it could not be found; and 2) no provision had been made for funds to operate and maintain VSW facilities and ADEC was reluctant to construct facilities without assurance they would operate properly.
>
> In December, 1972, a member of the ADEC staff began a survey of sanitation facilities in small villages throughout Alaska (most of which are native villages) to determine which villages were most in need of VSW projects. Letters were written to government agencies (e.g., the United States Public Health Service and the Bureau of Indian Affairs), native associations (e.g., regional corporations and health corporations) and other organizations with knowledge of village sanitation problems, requesting information and suggestions concerning plans for VSW projects. As a result of this study 32 villages were identified as being most in need of the sanitation services specified by the VSW Act. Meanwhile, in late 1972 and early 1973, the villages of Northway and Chevak requested assistance under the VSW program in finishing central facilities they had begun to construct on their own initiative. Since Northway and Chevak had committed their own resources and thus demonstrated a sincere desire to improve sanitation in the villages they were granted assistance. Then in early 1973, the Department of Education, lacking funds to provide water and waste services for the new schools scheduled for construction in remote villages in 1973-74, asked ADEC to install VSW facilities in Alakanuk, Selawik and Nulato to provide sanitation services for the new schools to be built there in addition to providing sanitation services for the villages. ADEC agreed to do so provided the Department of Education would agree to provide all funds and logistical support necessary for continued operation and maintenance of the VSW facilities...
>
> ...Five villages are receiving major central sanitation facilities construction projects under the VSW program (Northway, Chevak, Alakanuk, Selawik and Nulato). In addition, Arctic Village was granted

a few thousand dollars to buy washing machines and dryers to install in a facility constructed by the U. S. Public Health Service. Total expenditures in the six villages will be approximately three million dollars, leaving about one million dollars for additional projects···

···To date there has been little need for priority criteria for VSW projects. Staff and money have not been available to identify villages qualified for and in need of VSW assistance, so there is little to prioritize. Thirty-two villages were identified as being in critical need of a safe water source, but much more study and coordination is necessary to determine which villages should receive VSW assistance and the extent of each facility.

In general, only villages in most critical need of a safe water supply have been considered for VSW projects. Also important is the village's ability to operate and maintain facilities installed, either unassisted or through arrangements with a school, PHS clinics or other sources of revenue.

Nearly three-fourths of the VSW program's bond money was used for the three joint projects with ASOSS high schools. Those projects were chosen less according to VSW priority criteria than in response to Department of Education pleas and expressed willingness to operate and maintain the finished facilities. Remaining money will be devoted to three or four villages where water supply needs are critical and schools and clinics can provide revenue for operation and maintenance."···

Since June of 1975, the villages of Beaver, Koyukuk and Pitkas Point have been selected to receive VSW projects. They were chosen based on their especially critical need for sanitation services, which need was identified during the ADEC survey of village sanitation facilities begun in December of 1972. The three projects are being funded out of the approximately $800,000 that remain in the VSW bond funds after the projects in Northway, Chevak, Arctic Village, Nulato, Selawik and Alakanuk are completed.

III. EVALUATION OF PROJECTS TO DATE

The VSW program is new to Alaska State government and virtually without precedent. Hence the best methods for achieving the mission of the program are still being worked out as experience is gained.

The Arctic Village project did not involve any construction since VSW funds were provided only for buying washing machines and dryers.

The Northway and Chevak projects consisted of adding to and finishing central sanitation facilities that the villages had started to build on their own initiative. ADEC hired engineering consultants to design and prepare plans and specifications for the improvements made with VSW funds, after which ADEC awarded competitive bid construction contracts to have the work done. These two projects went reasonably well, although at Chevak the termination date of the construction contract had to be extended several months partly due to adverse weather conditions.

At Nulato, Selawik and Alakanuk the VSW facilities are being built in conjunction with new State schools. In each village the school and VSW facility have been designed and are being built under contracts prepared and administered by the Division of Buildings, Department of Public Works. These projects have been most unsatisfactory as is illustrated by the following excerpts from the VSW Issue Analysis:

> ...'One purpose of this issue analysis is to investigate the assumption it is cheaper to construct capital facilities in remote Alaskan villages simultaneously and under the same contract whenever possible. The VSW projects and State high schools in Alakanuk, Selawik and Nulato were expected to cost less by joint construction than if they were built under individual contracts. So far, the VSW facilities are costing more than twice what was originally estimated by the architectural and engineering consultants retained by the Department of Public Works, Division of Buildings; and the facilities themselves have been scaled down...
>
> ...Whether or not it is more efficient to construct two or more State capital projects jointly (one contract) in a remote village than to build them separately is not an easy question. At first

blush, one might think it obvious joint projects would be cheaper since contractor mobilization costs should be less and one large contract should be cheaper to administer than two or more smaller ones. Experience, however, has not given unqualified support to that thesis.

Experience with joint construction in the VSW program is limited to the three projects in Alakanuk, Selawik and Nulato. They have been very unsatisfactory projects from ADEC's point of view in that they have cost double what was anticipated, the facilities had to be scaled down as costs became exorbitant, and monitoring the contract procedure became virtually impossible. The causes of these problems are many and complex. Perhaps among them are: 1) the jobs were big and complex enough that including them in one contract was unwieldy, 2) the consulting engineers and architects did less than satisfactory work, 3) the contract documents were poorly and incompletely done, 4) ADEC did not exert enough control over work done by the consulting engineers and architects, 5) the Division of Buildings did not (perhaps due to lack of time and expertise) critically monitor work prepared by the consulting engineers and architects, and 6) ADOE imposed a severe time limit on time available to prepare the projects for construction.

The major and perhaps root cause of the many problems with the three projects was lack of time for adequate design and contract preparation. The consulting engineers and architects claim they did not have time to do the kind of job they would like to have done. On the other hand, in preliminary negotiations with the consultants about doing the jobs, they indicated the limited time would be "no problem." The Division of Buildings might have been expected to notice the inadequacies in the consultants' work, but they claim not to have had time to review the work properly. Lack of expertise may also have been a factor. Perhaps ADEC should have kept closer track of work done by the consultants; but being insulated from the consultants, contracts and contractors by the Division of Buildings made communication and effective participation difficult.

Joint construction may be just too difficult to organize and administer (at least for certain types of projects) given State construction procedures. On the other hand, ADEC's disappointing experience in joint construction may be due to causes not attributable to joint construction per se. Perhaps some future VSW projects should be built with ADEC managing consultants and contracts directly to see if that method has advantages. Another possibility is force account work, managed either by ADEC or the Division of Buildings"...

The Division of Buildings called a final inspection for the Nulato project on November 13, 1974. ADEC discovered many deficiencies in the VSW facility during the final inspection, and the Department has since then experienced great difficulty in getting the deficiencies resolved. Appendix L consists of copies of

correspondence that illustrate the specific problems with the Nulato project. Final inspection for the Selawik and Alakanuk projects is scheduled for the Fall of 1975.

Design and construction of the VSW facilities for Beaver, Koyukuk and Pitkas Point are being managed directly by ADEC through grants to the villages. For each project ADEC, the village, and a consulting engineering firm enter into three-way contracts; one for design and one for construction management. The design contract specifies the scope of work to be performed by the engineering consultant, sets the compensation rate for design services and prescribes the procedure by which the village pays the consulting engineer with VSW grant money from ADEC. Under the construction management contract the consulting engineer agrees to···"Manage all activities necessary for construction of a VSW facility,··· (be) responsible for the timely ordering, scheduling and expediting of all equipment ··· and material necessary for construction, ··· (and) be responsible for managing all construction activity at the VSW facility site···" In keeping with the intent of VSW authorizing legislation, the village agrees to provide local people to work on the VSW project to the extent they are available. The construction management contract also prescribes procedures by which the village pays construction expenses, the consulting engineer's fee, and labor costs with VSW grant funds from ADEC. To date the three design contracts have been signed and design of two of the projects is nearly complete. The Construction management contracts have also been signed. Construction at Pitkas Point and Koyukuk has begun, and construction at Beaver will start in the Spring of 1976.

The methods by which the Beaver, Koyukuk and Pitkas Point projects are being administered are unique. So far (through design) they have been very satisfactory. It is anticipated that these facilities will cost far less than if they were constructed under typical State competitive bid construction contracts.

Appendix C contains photographs to illustrate physical features of various VSW facilities.

IV. FUTURE PROJECTS

PLANNING

Based on the survey of village sanitation facilities done by ADEC starting in December, 1972, villages tentatively determined to have a high priority to receive VSW projects after FY 76 are Kongiganak, Eek, Anvik, Stevens Village, Chignik Lake, Kasigluk and Nunapitchuk in that order. That priority list was prepared over two years ago with a bare minimum of field effort since staff and funds to do a comprehensive survey have not been available.

ADEC requested additional staff and support funds for FY 76 for planning in the VSW program, and the request was recently approved by the Legislature. If a satisfactory candidate for the new VSW engineering position can be found, a planning effort as described in the following excerpts from the VSW Issue Analysis will be begun:

> "Essential to long range planning for the Village Safe Water program are estimates of how much the program will cost and a description of the schedule according to which expenditures should be made. The cursory inventory of village sanitation needs made by ADEC staff in 1973 served only to identify 32 villages with the most obvious and critical needs. More thorough investigation is necessary to gather field data and coordinate USPHS (United State Public Health Service-Office of Environmental Health, Sanitation Facilities Construction program for Alaska natives) and VSW efforts to determine which villages should have VSW projects. Once the villages are identified, engineering field studies must be made to serve as the basis for preliminary design of facilities and cost estimates. Then, and only then, will the capital spending needs for the VSW program be known with confidence...
>
> ...The three primary planning needs in the Village Safe Water Program are: 1) to identify those villages where VSW facilities should be installed, 2) to determine what services should be provided by each facility to be built, and 3) to establish a schedule according to which the projects are to be constructed...
>
> ...Determining what services should be provided by each VSW facility involves working closely with the village involved. Traditional bathing practices might suggest a type of bathing facility to include in the VSW plant (e.g. traditional fire bath suggests sauna bath). Raw water availability and quality will determine the water source and treatment system. Local environmental conditions greatly influence the choice of a waste treatment

and disposal system. And the size and type of building to erect, foundation requirements, heating needs, and other physical features of the intended facility are also functions of local conditions."...

FUNDING

To date, four million dollars have been available for VSW capital construction. Those funds will be exhausted by the projects in Arctic Village, Northway, Chevak, Selawik, Alakanuk, Nulato, Beaver, Koyukuk and Pitkas Point. It is interesting to note that about three of the four million dollars were consumed by the Selawik, Alakanuk and Nulato projects.

A proposed bond bill for additional VSW capital construction funds was not passed by the 1974 Legislature. In order to make at least token progress in what ADEC considered a very worthwhile program, the Department requested two million dollars from the General Fund for FY 76. Half of that request was granted, making one million dollars available for VSW capital construction in FY 76.

Preliminary intentions based on 1972-73 planning are to offer VSW projects to the villages of Kongiganak and Eek, and perhaps Anvik depending on how much each project will cost. There may, however, be new factors or changed conditions to consider in selecting sites for the FY 76 projects.

V. OPERATION AND MAINTENANCE

SCOPE OF PROBLEM

Village Safe Water facilities must be adequately operated and maintained if they are to serve their intended purpose. Following are excerpts from the VSW Issue Analysis concerning operation and maintenance:

> ..."The legislative assignment of the Village Safe Water program is to provide safe water, sanitary means of waste disposal, bathing and laundry facilities for the inhabitants of small villages in Alaska. Funds were made available for capital construction but no provision was made for meeting long-term operation and maintenance expenses; and virtually none of the villages are capable of sustaining a facility of the type specified by the VSW Act without financial, technical and administrative assistance.
>
> When the Department of Education called on ADEC to build VSW facilities that could provide water and waste service for new high schools, ADEC was reluctant to devote resources intended for village service to school service. But the Department of Education was willing to provide all financial and logistical support necessary for continued operation and maintenance of the VSW facilities, thus dissolving the major obstacle barring progress in the VSW program. So the decision was made to serve the schools with the village VSW facilities in return for the operation and maintenance guarantee from ADOE.
>
> Unfortunately, the basic premise upon which the decision was made to build VSW facilities in conjunction with the high schools in Alakanuk, Selawik and Nulato got lost in the shuffle when ASOSS assumed control of the rural school capital construction program. ASOSS was reluctant to accept the responsibility for operation and maintenance which the Department of Education had previously accepted, which acceptance was the only reason ADEC had agreed to serve the schools with VSW facilities in the first place. By this time, the contracts for the joint VSW-school construction had been awarded and construction was far enough along that the projects could not be cancelled. Fortunately, ASOSS has recently agreed to provide $6,000.00 per month for VSW water and waste service for the schools at Alakanuk and Nulato. ...
>
> ...A facility to provide the services specified by the Village Safe Water Act must contain sophisticated equipment and appliances. Since public health is at stake, water and waste treatment systems must be kept operating properly at all times. Hence, at least one full-time, trained and paid maintenance man must attend every VSW facilities.
>
> Virtually all of the maintenance people will have to come from the villages where VSW plants are installed because "outsiders" are

usually reluctant to take up residence in remote villages. Since people with the training and experience necessary to operate and maintain a VSW facility are usually not available locally, an elaborate, extensive and continuing program for training of VSW plant operators is required.

A continuous and generous flow of revenue will be required to meet the operation and maintenance expenses of VSW facilities. In addition to the plant operator(s) salary, there will be treatment chemicals, electricity, fuel and replacement and repair parts to buy. Operation and maintenance expenses for just a small facility (e.g., 2 washers, 2 dryers, 2 showers, 2 rest rooms, 2 saunas, water supply and waste disposal) could run at least $25,000 per year (1974 prices), excluding amortization of capital costs for replacement purposes. For the larger facilities being built in Alakanuk, Selawik and Nulato, operation and maintance expenses could reach ninety to one hundred thousand dollars per year (excluding amortization).

Sources of revenue in the villages are limited. Individuals who use the VSW facilities will pay fees, but fees cannot be so high people no longer can afford to use the facilities. Two to three thousand dollars per month might be raised through users' fees in larger villages (400 to 500 residents) and proportionately less in smaller towns. Public health clinics, some owned by the U. S. Public Health Service and some owned by the villages, are possible sources of revenue but not more than $500 to $1,000 per month. Whether or not the health clinics can be assessed that much for water and waste service has yet to be determined. Schools are also potential users of VSW water and waste service and sources of revenue. In the past, both BIA and State schools have had their own water supply and waste treatment systems, unless service from other systems was available. Most school systems, however, do not meet water supply criteria and waste disposal requirements of the State. To provide a water and waste system for a school capable of meeting State requirements could cost as much as seventy or eighty thousand dollars per year including capital, operation and maintenance costs. The actual cost at a given school would depend, of course, on such things as availability of water, environmental conditions for waste disposal, size of school, and rate of increase in replacement costs. How much a school is assessed for VSW plant service might reasonably be based on what it would cost the school to provide its own service.

In the final analysis, some minimum amount of money will have to be forthcoming every year to meet operation and maintenance expenses if VSW facilities are to serve their intended purpose. The major sources of those funds are public health clinics, schools and individual facility users. Revenue from individual users and clinics is limited to less than half the VSW facility revenue requirements. Hence, more than half the operation and maintenance costs will have to be picked up by the schools or some other source."...

VSW program involvement was minor enough in Arctic Village that responsibility for continued successful functioning of the sanitation facilities installed rests elsewhere than with ADEC.

The Chevak and Northway facilities were opened for public use early in 1974. Since then there have been damaging freeze-ups in both facilities; the Chevak facility has been periodically closed, or open for only limited use due to lack of money for fuel; and neither facility has served its intended purpose as well as it should because the necessary financial, administrative, and technical assistance has not been provided.

The Nulato facility was first opened for public use in mid-November of 1974. The operational record of this facility has been poor due mostly to the construction problems described earlier in this report. Also the VSW staff engineer has had to spend a great deal of time helping the local plant operators establish administration, management, operation and maintenance systems for the facility. That experience has clearly demonstrated the need for some means by which the villages can have access to continuing assistance in the administration, operation and maintenance of their VSW facilities. The needs for assistance at Nulato, Selawik and Alakanuk are especially critical due to the size and complexity of their facilities.

MEETING OPERATION AND MAINTENANCE NEEDS

The Department of Environmental Conservation requested and received $289,000 in its FY 76 operating budget to assist eight villages with operation and maintenance of VSW facilities. Those funds were requested only as an interim provision until State policy concerning operation and maintenance of VSW facilities can be established. A major purpose of this report is to provide information which can serve as a basis for deciding how operation and maintenance support for VSW facilities might best be provided. Some alternatives listed in the VSW Issue Analysis were:

...1) a grant program to subsidize rural water and waste utility service, 2) a system of State owned and operated facilities to provide water and waste service in remote areas, 3) a utility system owned and operated by native organizations either as a service or a profit making venture (perhaps subsidized by the State), or 4) a public utility managed by a private organization perhaps controlled and subsidized by the State.

A program for operation and maintenance of VSW facilities should perhaps not be considered independent of the need for a system to insure proper operation and maintenance of rural sanitation facilitiies in general. In fact it might be well to consider the possibility of an operation and maintenance system for all rural utilities.

The U. S. Public Health Service (USPHS) and the Alaska Village Demonstration Project (AVDP) sponsored by the Environmental Protection Agency are the agencies other than ADEC with programs for providing rural sanitation facilities. Recognizing the need for agencies with similiar missions to cooperate, ADEC intends to invite USPHS and AVDP to participate in a planning effort to arrive at a comprehensive program for rural sanitation services. [The following preliminary goal and objectives have been drawn up to guide such a planning effort:]

Goal

To devise a comprehensive program for achieving sanitation services in Alaskan villages.

Objectives

1. Inventory current efforts (who involved and description and extent of programs).

2. Identify the people for whom services are being planned (i.e. the recipients).

3. a. Describe sanitation functions that should be provided, if any. Examples are water supply, sewage disposal and bathing facilities.

   b. Identify various feasible methods of achieving the sanitation functions described in (a) above (e.g. central watering point, individual wells, piped water service to houses, vehicle haul system). Estimate the relative costs of these methods, including installation of required physical facilities and operation and maintenance.

4. Determine where resources should come from for installing facilities identified in 3-b above; categorized according to types of recipients (if any such distinctions are made) and methods of achieving sanitation functions (from 2-b above). Examples of resource sources are State government, federal government, Native organizations and local governments.

5. Determine what functional presence should be maintained for how long and by whom for the various physical facilities installed. Examples are training, management and administrative assistance, technical assistance, and operation and maintenance assistance.

6. Determine where resources should come from to achieve the functions identified in (5) above.

7. Devise major features of a comprehensive program to connect resource sources identified in (4) and (6) above with recipients.

8. Evaluate existing programs with respect to how well they contribute to achieving the comprehensive program resulting from (7) above.

9. Determine what changes in existing programs and/or new programs are needed to achieve the comprehensive program resulting from (7) above.

VI. CONCLUSION

The Village Safe Water program grew out of recognition of the critical need for adequate sanitation services in rural Alaska. Providing rural sanitation services involves two major efforts: 1) capital construction, and 2) operation and maintenance.

CAPITAL CONSTRUCTION

The major emphasis of the Village Safe Water Act is on construction of central sanitation facilities. Several methods of construction are authorized and ADEC is trying the various options in search of the most productive methods. With the additional staff and funding provided for FY 76, engineering planning can now be done to determine the State-wide need for VSW facilities and estimate total program costs. At least preliminary indications of the total potential scope of VSW capital construction needs should be available by the end of FY 76.

OPERATION AND MAINTENANCE

Construction of any utility system, especially in the relatively harsh environment of rural Alaska, is money wasted unless provisions are made for the system to be properly operated and maintained. Most, if not all villages qualifying for VSW projects lack the necessary resources to administer, manage, operate and maintain even a minimum VSW facility (or any other utility system) without continuing outside assistance.

The Village Safe Water Act contains only brief mention of operation and maintenance assistance for villages which receive VSW facilities. To date the State does not have a firm policy position on how to provide for VSW operation and maintenance. Some of the options to be explored (mentioned earlier in this report) have already become apparent in the few years the VSW

program has been in existence. More such options and a better view of their advantages and disadvantages should result from the planning effort by VSW staff scheduled for FY 76. Perhaps it is reasonable to set the end of FY 76 as the time by which the State can establish policy concerning VSW operation and maintenance. Until then ADEC has funds to help villages manage, operate and maintain their VSW facilities.

Assignment Sheet/Cover Sheet

FY 76 Issue Analysis

(Confidential Internal Working Paper)

Title: Village Safe Water Project

Category: NRMEC

Assigned Issue Description:

Develop a long range plan describing the objectives of the Village Safe Water program and the strategy by which those objectives are to be achieved. Investigate the assumption that construction of VSW facilities in conjunction with other state capital projects in rural Alaska is a more efficient use of State funds than separate construction. A set of criteria for assigning priorities to villages eligible for VSW projects should be developed. Possibilities for agreements with federal and other state agencies concerning joint planning of VSW facilities should be considered.

VSW ISSUE ANALYSIS

OBJECTIVES

The specific objectives of this analysis are to:

1) Present a generalized summary of activities in the VSW program from its inception to the present.
2) Describe problems with operation and maintenance of VSW facilities and investigate possible solutions.
3) Analyze experience to date with joint capital construction projects involving VSW facilities and state schools.
4) Describe the planning and budgeting needs of the VSW program and suggest how they might be met.
5) Present criteria used for assigning priorities to villages eligible for VSW projects.
6) Suggest appropriate arrangements with federal and other state agencies to facilitate planning for VSW facilities.

SUMMARY AND CONCLUSIONS

SUMMARY

The Village Safe Water program is intended to provide safe water, waste disposal, bathing and laundry facilities in villages (less than 600 inhabitants) in Alaska. Since its inception in 1970, the program has been involved in five capital construction projects, three of which are joint projects with State-Operated high schools.

The Alaska Department of Environmental Conservation (ADEC) has been reluctant to build VSW facilities in villages where provisions cannot be made for revenue to operate and maintain them. Most villages are not capable of sustaining even a minimal facility without outside assistance, and there is not enough money in the VSW program itself to provide continuing support. The three joint projects with schools were entered into only because the Department of Education (ADOE) agreed to operate and maintain the VSW facilities in return for water and waste service for the schools. Since the Alaska State-Operated School System (ASOSS) gained jurisdiction over the schools, it has been reluctant to honor the Department of Education committment but has recently agreed to do so.

Joint construction means having two or more capital projects (e.g., a VSW facility and a State school) built by one contractor under one contract. The three joint construction projects involving VSW facilities and ASOSS schools have been immensely problematic. This does not mean VSW facilities should not be built to serve State schools, but rather that troublesome construction procedures should be amended. The facilities have cost more than twice what was

anticipated by ADEC and the projects have had to be scaled down due to exhorbitant costs. The consulting engineers and architects did less than satisfactory work on the projects, the contract documents contained costly errors and omissions, and communications among all parties concerned have been muddled at best. One cause of these problems was the time limit imposed by ADOE for preparation of the projects for contracting and construction.

ADEC policy has been not to build VSW projects in villages where U. S. Public Health Service (USPHS) sanitation facilities have been or are to be installed. Hence, VSW program planning is greatly influenced by USPHS planning for construction of water distribution and waste collection and disposal systems. USPHS finds it difficult to project a reliable schedule for construction projects, making it difficult to plan VSW projects accordingly.

Financial requirements of the VSW program cannot be determined until: 1) an extensive survey is made of sanitation services in all villages, 2) USPHS intentions are known with confidence, and 3) villages qualified for VSW program assistance are identified. Once the villages are identified, investigation must be made to determine what facilities should go in each village, engineering data must be gathered, and preliminary design be done in advance of budgeting for capital construction projects, but adequate money and staff have not been available to do those things.

The VSW program can provide badly needed sanitation services to people in rural Alaska, and for the State to have such a constructive program is commendable. Administrative problems analyzed in this report are perhaps no more than might be expected for a new program virtually without precedent. The issue analysis procedure will have served its intended purpose if problems in the VSW program,

openly discussed in this analysis, are recognized by appropriate parties and constructive solutions (some of which are suggested herein) are worked out.

CONCLUSIONS

1) Current policy for the VSW program is to build central sanitation facilities only in villages where dependable provisions can be made for continuing and successful operation and maintenance. Since such provisions are difficult, if not impossible, to make in most Alaskan villages, inter-agency planning is necessary to establish long term policy for providing rural water and waste facilities.

2) Advance planning money and staff are necessary to determine needs to be met by the VSW program and the cost of meeting those needs.

3) The question of whether or not joint capital construction is the best approach for rural State projects has not been resolved. There is evidence in the VSW program that joint construction might not be the best procedure. Alternative means of constructing VSW facilities (and perhaps other State facilities as well) should be tried. Alternatives to having the Division of Buildings administer all rural capital construction projects should also be tried.

4) When a program is transferred from one agency to another (e.g., rural schools from ADOE to ASOSS), provision must be made to insure committments made under the program previous to the transfer will be honored.

5) Village Safe Water facilities can provide sanitation services for village residents and state schools for far less than the cost of serving only the

villagers with VSW facilities and providing separate sanitation systems for the schools.

6) The State can provide essential and laudible services to rural Alaskans through the VSW program. Every effort should be made to solve the procedural problems involved in getting VSW facilities built and to adequately fund the program.

BACKGROUND

The Village Safe Water (VSW) Act of 1970 (AS 46.07.010-.080) calls for the State of Alaska to install "at least one facility for safe water and hygenic sewage disposal in each village". The Department of Health and Social Services (ADHSS) was originally charged with carrying out the program. In 1971, a segment of ADHSS was transferred to the Department of Environmental Conservation (ADEC) which was created by the legislature July 1, 1971. VSW activities were carried on mostly within the new department and in May of 1973, ADHSS and ADEC signed a letter of understanding which essentially turned the VSW program over to ADEC. A copy of the letter of understanding is attached to this analysis.

Voters approved a three million dollar bond issue in 1970 to fund the VSW program and another one million dollar bond issue in 1972. Little progress was made in the program, however, until December, 1972 for the following reasons: 1) no money was available to administer the program until October, 1972 and even when the VSW staff position became available, a person suitable to fill it could not be found; and 2) no provision had been made for funds to operate and maintain VSW facilities and ADEC was reluctant to construct facilities without assurance they would operate properly.

In December, 1972, a member of the ADEC staff began a survey of sanitation facilities in small villages throughout Alaska (most of which are native villages) to determine which villages were most in need of VSW projects. Letters were written to government agencies (e.g., the United States Public Health Service and the Bureau of Indian Affairs), native associations (e.g., regional corporations and health corporations) and other organizations with knowledge of village sanitation problems, requesting information and suggestions concerning plans for VSW projects. As a result of this study, 32 villages were identified as being most in need of the sanitation services specified by the VSW Act. Meanwhile, in late 1972 and early 1973, the villages of Northway and Chevak requested assistance under the VSW program in finishing central facilities they had begun to construct on their own initiative. Since Northway and Chevak had committed their own resources and thus demonstrated a sincere desire to improve sanitation in the villages, they were granted assistance. Then in early 1973, the Department of Education, lacking funds to provide water and waste service for new schools scheduled for construction in remote villages in 1973-74, asked ADEC to install VSW facilities in Alakanuk, Selawik and Nulato to provide sanitation services for the new schools to be built there in addition to providing sanitation services for the villages. ADEC agreed to do so provided the Department of Education would agree to provide all funds and logistical support necessary for continued operation and maintenance of the VSW facilities. Agreements were drawn up and signed by ADEC and the Department of Education specifying the conditions under which the VSW facilities were to be constructed and operated in Nulato and Selawik (see attached copies). Before the Alakanuk agreement got signed, the rural school capital construction program was transferred from ADOE to the Alaska State-Operated School System (ASOSS) and ASOSS assumed responsibility from the Department of Education for the schools to be built in Alakanuk, Selawik and Nulato. In addition, the Selawik school will

be managed as an independent school district starting July 1, 1974. Hence, there has been some confusion and some discord about who should be responsible for operation and maintenance of the VSW facilities being built in conjunction with ASOSS high schools.

Five villages are receiving major central sanitation facilities construction projects under the VSW program (Northway, Chevak, Alakanuk, Selawik and Nulato). In addition, Arctic Village was granted a few thousand dollars to buy washing machines and dryers to install in a facility constructed by the U. S. Public Health Service. Total expenditures in the six villages will be approximately three million dollars, leaving about one million dollars for additional projects.

DEFINITION OF PROBLEMS

OPERATION AND MAINTENANCE

The legislative assignment of the Village Safe Water program is to provide safe water, sanitary means of waste disposal, bathing and laundry facilities for the inhabitants of small villages in Alaska. Funds were made available for capital construction but no provision was made for meeting long-term operation and maintenance expenses; and virtually none of the villages are capable of sustaining a facility of the type specified by the VSW Act without financial, technical and administrative assistance.

When the Department of Education called on ADEC to build VSW facilities that could provide water and waste service for new high schools, ADEC was reluctant to devote resources intended for village service to school service. But the Department of Education was willing to provide all financial and logistical

support necessary for continued operation and maintenance of the VSW facilities, thus dissolving the major obstacle barring progress in the VSW program. So the decision was made to serve the schools with the village VSW facilities in return for the operation and maintenance guarantee from ADOE.

Unfortunately, the basic premise upon which the decision was made to build VSW facilities in conjunction with the high schools in Alakanuk, Selawik and Nulato got lost in the shuffle when ASOSS assumed control of the rural school capital construction program. ASOSS was reluctant to accept the responsibility for operation and maintenance which the Department of Education had previously accepted, which acceptance was the only reason ADEC had agreed to serve the schools with VSW facilities in the first place. By this time, the contracts for the joint VSW-school construction had been awarded and construction was far enough along that the projects could not be cancelled. Fortunately, ASOSS has recently agreed to provide $6,000.00 per month for VSW water and waste service for the schools at Alakanuk and Nulato.

JOINT CONSTRUCTION

Joint capital construction refers to the construction of two or more separate projects by one contractor under one contract. Joint capital construction should not be confused with the cooperative venture of having other State facilities like schools receive sanitation services from VSW facilities.

One purpose of this issue analysis is to investigate the assumption it is cheaper to construct capital facilities in remote Alaskan villages simultaneously and under the same contract whenever possible. The VSW projects and State high schools in Alakanuk, Selawik and Nulato were expected to cost less by joint con-

struction than if they were built under individual contracts. So far, the VSW facilities are costing more than twice what was originally estimated by the architectural and engineering consultants retained by the Department of Public Works, Division of Buildings; and the facilities themselves have been scaled down.

PLANNING AND BUDGETING

The Village Safe Water Act calls for safe water, sanitary waste disposal, bathing and laundry facilities in every village in Alaska. But VSW facilities need not be installed in all villages because the U. S. Public Health Service (USPHS) is charged with providing sanitation facilities in native villages. Hence, intentions of the federal program are very important in VSW program planning. Unfortunately, the USPHS priority list and plans for sanitation facilities construction projects vary greatly from year to year, making it difficult to plan VSW projects accordingly. To make matters worse, the USPHS has recently been directed to devote most of its sanitation facilities construction effort to serving new housing projects. Virtually the entire program thus becomes subject to the dubiety of rural housing construction programs in Alaska.

Essential to long range planning for the Village Safe Water program are estimates of how much the program will cost and a description of the schedule according to which expenditures should be made. The cursory inventory of village sanitation needs made by the ADEC staff in 1973 served only to identify 32 villages with the most obvious and critical needs. More thorough investigation is necessary to gather field data and coordinate USPHS and VSW efforts to determine which villages should have VSW projects. Once the villages are identified, engineering field studies must be made to serve as the basis for

preliminary design of facilities and cost estimates. Then, and only then, will the capital spending needs of the VSW program be known with confidence.

ANALYSES

OPERATION AND MAINTENANCE

A facility to provide the services specified by the Village Safe Water Act must contain sophisticated equipment and applicances. Since public health is at stake, water and waste treatment systems must be kept operating properly at all times. Hence, at least one full-time, trained and paid maintenance man must attend every VSW facility.

Virtually all of the maintenance people will have to come from the villages where VSW plants are installed because "outsiders" are usually reluctant to take up residence in remote villages. Since people with the training and experience necessary to operate and maintain a VSW facility are usually not available locally, an elaborate, extensive and continuing program for training of VSW plant operators is required.

A continuous and generous flow of revenue will be required to meet the operation and maintenance expenses of VSW facilities. In addition to the plant operator(s) salary, there will be treatment chemicals, electricity, fuel and replacement and repair parts to buy. Operation and maintenance expenses for just a small facility (e.g., 2 washers, 2 dryers, 2 showers, 2 rest rooms, 2 saunas, water supply and waste disposal) could run at least $25,000 per year (1974 prices), excluding amortization of capital costs for replacement purposes. For the larger facilities being built in Alakanuk, Selawik and Nulato, operation

and maintenance expenses could reach ninety to one hundred thousand dollars per year (excluding amortization).

Sources of revenue in the villages are limited. Individuals who use the VSW facilities will pay fees, but fees cannot be so high people no longer can afford to use the facilities. Two to three thousand dollars per month might be raised through users' fees in larger villages (400 to 500 residents) and proportionately less in smaller towns. Public health clinics, some owned by the U. S. Public Health Service and some owned by the villages, are possible sources of revenue but no more than $500 to $1,000 per month. Whether or not the health clinics can be assessed that much for water and waste service has yet to be determined. Schools are also potential users of VSW water and waste service and sources of revenue. In the past, both BIA and State schools have had their own water supply and waste treatment systems, unless service from other systems was available. Most school systems, however, do not meet water supply criteria and waste disposal requirements of the State. To provide a water and waste system for a school capable of meeting State requirements could cost as much as seventy or eighty thousand dollars per year including capital, operation and maintenance costs. The actual cost at a given school would depend, of course, on such things as availability of water, environmental conditions for waste disposal, size of school, and rate of increase in replacement costs. How much a school is assessed for VSW plant service might reasonably be based on what it would cost the school to provide its own services.

In the final analysis, some minimum amount of money will have to be forthcoming every year to meet operation and maintenance expenses if VSW facilities are to serve their intended purpose. The major sources of those funds are public

health clinics, schools and individual facility users. Revenue from individual users and clinics is limited to less than half the VSW facility revenue requirements. Hence, more than half the operation and maintenance costs will have to be picked up by the schools or some other source. The schools are understandably reluctant to commit large amounts of education funds to water and waste service. But such service is as essential t a school as its heating system or roof; and that service must be provided by the school if a VSW facility is not to serve the school. According to estimates done by ADEC, the annual cost (amortization of capital construction plus operation and maintenance) for a school to have its own water and waste system is eighty percent or more of the total annual operation and maintenance costs for a VSW facility serving both the school and the village. Hence, even if the schools agree to pay all operation and maintenance expenses for VSW facilities, the State would be providing adequate water and waste systems for its schools, and sanitation facilities villages for only about twenty percent more than it would cost to provide water and waste service for the school alone. Capital costs of VSW facilities is not included in the above cost comparisons for school water and waste service because the VSW facilities would be built to serve the villages regardless of school participation. Schools would probably not have to meet all operation and maintenance expenses for VSW facilities anyway, because some revenue will be generated by villagers using the facilities and perhaps USPHS clinics and other users.

It is obvious that inter-agency planning needs to be done concerning water and waste utilities in remote villages. Some of the questions that need answers are: How will operation and maintenance of VSW facilities by provided for? Where will operation and maintenance revenue come from? How can rural schools

best be provided water and waste service? What agency should administer State capital and operation and maintenance funds? Should the VSW program provide water and waste service in remote villages on a continuing basis (including periodic replacement of facilities as required); and if so, should the program be given the relative permanence of general fund support as opposed to dependence on bond elections?

Some alternatives to consider are: 1) a grant program to subsidize rural water and waste utility service, 2) a system of State owned and operated facilities to provide water and waste service in remote areas, 3) a utility system owned and operated by native organizations either as a service or a profit making venture (perhaps subsidized by the State), or 4) a public utility managed by a private organization perhaps controlled and subsidized by the State.

JOINT CONSTRUCTION

Whether or not it is more efficient to construct two or more State capital projects jointly (one contract) in a remote village than to build them separately is not an easy question. At first blush, one might think it obvious joint projects would be cheaper since contractor mobilization costs should be less and one large contract should be cheaper to administer than two or more smaller ones. Experience, however, has not given unqualified support to that thesis.

Experience with joint construction in the VSW program is limited to the three projects in Alakanuk, Selawik and Nulato. They have been very unsatisfactory projects from ADEC's point of view in that they have cost double what

was anticipated, the facilities had to be scaled down as costs became exhoritant, and monitoring the contract procedure became virtually impossible. The causes of these problems are many and complex. Perhaps among them are: 1) the jobs were big and complex enough that including them in one contract was unwieldy, 2) the consulting engineers and architects did less than satisfactory work, 3) the contract documents were poorly and incompletely done, 4) ADEC did not exert enough control over work done by the consulting engineers and architects, 5) the Division of Buildings did not (perhaps due to lack of time and expertise) critically monitor work prepared by the consulting engineers and architects, and 6) ADOE imposed a severe time limit on time available to prepare the projects for construction.

The major and perhaps root cause of the many problems with the three projects was lack of time for adequate design and contract preparation. The consulting engineers and architects claim they did not have time to do the kind of job they would like to have done. On the other hand, in preliminary negotiations with the consultants about doing the jobs, they indicated the limited time would be "no problem". The Division of Buildings might have been expected to notice the inadequacies in the consultant's work, but they claim not to have had time to review the work properly. Lack of expertise may also have been a factor. Perhaps ADEC should have kept closer track of work done by the consultants; but being insulated from the consultants, contracts and contractors by the Division of Buildings made communication and effective participation difficult.

Joint construction may be just too difficult to organize and administer (at least for certain types of projects) given State construction procedures. On the other hand, ADEC's disappointing experience in joint construction may

be due to causes not attributable to joint construction per se. Perhaps some future VSW projects should be built with ADEC managing consultants and contracts directly to see if that method has advantages. Another possibility is force account work, managed either by ADEC or the Division of Buildings.

PLANNING AND BUDGETING

Planning

The three primary planning needs in the Village Safe Water Program are: 1) to identify those villages where VSW facilities should be installed, 2) to determine what services should be provided by each facility to be built, and 3) to establish a schedule according to which the projects are to be constructed.

The Village Safe Water Act clearly calls for water supply, waste disposal, laundry and bathing facilities in <u>every</u> village with between 25 and 600 inhabitants in Alaska. Ostensibly, the USPHS has the similar mission of providing water distribution and waste collection and disposal systems in <u>native</u> villages in Alaska. USPHS usually installs relatively elaborate systems to provide running water and sewage disposal service to each house. Since the USPHS systems are usually more desirable than VSW facilities both for public health reasons and from the villages' standpoint, it seems reasonable to plan VSW projects only where USPHS systems have not been and perhaps will not be installed. If the USPHS really does intend to provide water and waste disposal services in all native villages, the VSW program's purpose is only to provide interim sanitation services until the USPHS mission is accomplished. But if some villages are destined never to receive USPHS projects, VSW program planning is greatly influenced by the dependability of USPHS planning.

Determining what services should be provided by each VSW facility involves working closely with the village involved. Traditional bathing practices might suggest a type of bathing facility to include in the VSW plant (e.g., traditional fire bath suggests sauna bath). Raw water availability and quality will determine the water source and treatment system. Local environmental conditions greatly influence the choice of waste treatment and disposal system. And the size and type of building to erect, foundation requirements, heating needs, and other physical features of the intended facility are also functions of local conditions.

A critical factor in deciding what services to provide is the village's ability to operate and maintain the facility. More services require more extensive facilities which are more difficult and expensive to operate and maintain. Most villages are currently unable to support even a minimal water supply and bathing center without participation by schools or outside assistance. State schools and village residents can both be provided sanitation services from VSW facilities cheaper than if the villagers have VSW facilities and the schools have separate sanitation systems. Hence, financial participation by State schools in operation and maintenance of VSW facilities is desirable unless some other form of assistance is made available. <u>In no case should a VSW facility be built unless and until dependable provisions have been made to operate and maintain it</u>.

Scheduling the construction of VSW projects involves prioritizing the projects according to some set of criteria. The system used so far by ADEC is described later in this report.

Budgeting

Funding decisions concerning the VSW program must be based on knowledge

of the program's mission. If one-time capital construction facilities for an identified number of villages is the intent, the VSW program is finite. After the qualified villages have been identified, preliminary engineering investigations and design could be done to serve as the basis for cost estimates, and total cost of the program would be known. If continuing provision of sanitation services in some number of qualified villages is the intent, the VSW program is continuous and includes involvement in operation, maintenance and replacement of facilities.

A great deal of time and money is required to make the preliminary engineering field investigations and designs essential for accurate cost estimations, and dependable cost estimates for the VSW and every other State program are absolutely essential in planning State services and making state budget decisions. All too often ADEC and most other State agencies are asked for spur-of-the-moment cost estimates for capital construction projects. Such estimates can be correct only by coincidence, and they do more harm than good when appropriations based on them prove inadequate. Advance planning money must be provided so preliminary engineering and cost estimates can be done before budgeting. ASOSS was recently authorized a $400,000.00 advance planning revolving fund for planning capital projects. The VSW program would benefit greatly from a similar fund.

PRIORITY CRITERIA

To date there has been little need for priority criteria for VSW projects. Staff and money have not been available to identify villages qualified for and in need of VSW assistance, so there is little to prioritize. Thirty-two villages were identified as being in critical need of a safe water source, but much

more study and coordination is necessary to determine which villages should receive VSW assistance and the extent of each facility.

In general, only villages in most critical need of a safe water supply have been considered for VSW projects. Also important is the village's ability to operate and maintain facilities installed, either unassisted or through arrangements with a school, PHS clinics or other sources of revenue.

Nearly three-fourths of the VSW program's bond money was used for the three joint projects with ASOSS high schools. Those projects were chosen less according to VSW priority criteria than in response to Department of Education pleas and expressed willingness to operate and maintain the finished facilities. Remaining money will be devoted to three or four villages where water supply needs are critical and schools and clinics can provide revenue for operation and maintenance.

INTER-AGENCY COORDINATION

Coordination of VSW program planning with planning for USPHS sanitation facilities projects is vital. The relationship between the two programs was described earlier. ADEC has recently taken the initiative in establishing a routine by which USPHS and ADEC can communicate more openly and coordinate planning for village sanitation projects more fully. Copies of correspondence concerning this initiative are attached to this report.

Coordination of VSW program capital construction with other State capital construction projects may or may not be imperative depending on whether or not joint construction is judged desirable for rural capital projects. The assump-

tion that joint construction is desirable is made questionable by experience in the VSW program. If the problems with joint construction can be overcome, the obvious center for coordination of projects should be the agency administering the joint ventures--probably the Division of Buildings. Coordinating and programming all State rural capital construction projects would be a massive task, however, to say nothing of managing the joint projects themselves.

Further direction for inter-agency coordination will be pointed out if and when the questions posed earlier in this report and requiring the attention of inter-agency planning are answered. Coordination with AVEC might allow VSW facilities to make use of waste heat from power generators. Other State installations (e.g., road maintenance shops, airfield maintenance shops and Fish and Game projects) might be coordinated with the VSW program to receive water and waste services.

THE BRIGHT SIDE

The purpose of an issue analysis is to focus on the problems in a program. But many things are right about the VSW program. There is a desperate need for sanitation services in Alaskan villages; and VSW facilities, despite past problems with getting them built, can help satisfy that need. Village schools face critical water supply and waste disposal problems which VSW facilities could help solve. The relatively unspoiled and often fragile natural environment of rural Alaska must be protected from the insults of improper disposal methods for human wastes. VSW facilities offer that protection.

The VSW program is new and virtually without precedent. The growing pains described in this analysis are perhaps part of the experience out of which can grow an efficient and popular service by the State.

LETTER OF UNDERSTANDING

This letter of understanding is entered into this _____ day of May 1973 between the Department of Health and Social Services and the Department of Environmental Conservation. The terms of this letter of understanding are as follows:

1. The Department of Environmental Conservation agrees to do all planning and engineering with regard to Village Safe Water Act facilities.

2. The Department of Health and Social Services agrees to approve all planning and engineering by the Department of Environmental Conservation and the expenditures of all funds made by the Department of Environmental Conservation for Village Safe Water Act facilities.

3. The Department of Environmental Conservation agrees to accept all responsibility for Village Safe Water Act facilities.-

Frederick P. McGinnis Commissioner Department of Health and Social Services	Max C. Brewer Commissioner Department of Environmental Conservation

AGREEMENT CONCERNING VILLAGE SAFEWATER

ACT FACILITY AT SELAWIK, ALASKA

This agreement is made and entered into this 29 day of June, 1973 between the Department of Environmental Conservation, State of Alaska, the Department of Health and Social Services, State of Alaska, the Department of Education, State of Alaska, and the City of Selawik, Selawik, Alaska, for the purpose of providing for the construction and the continued operation and maintenance of a Village Safewater Act (AS 46.07.010 - .080) facility at Selawik, Alaska. The terms of the agreement are as follows:

1. The Department of Environmental Conservation and the Department of Health and Social Services agree to provide the capital funds necessary to construct a Village Safewater Act facility at Selawik, Alaska, in conjunction with the construction of the high school facility of the Department of Education at Selawik, Alaska.

2. The City of Selawik agrees to be responsible for the operation and maintenance of the Selawik Village Safewater Act facility constructed in accordance with this agreement.

3. The Department of Environmental Conservation, the Department of Health and Social Services and the Department of Education agree to encourage the City of Selawik to develop, adopt and enforce an ordinance requiring the members of the community to take their garbage to the incinerator and their chemical toilet wastes and honey bucket wastes to the sewage treatment plant located in the Selawik Village Safewater Act facility.

4. The Department of Environmental Conservation, the Department of Health and Social Services and the Department of Education agree to

encourage the City of Selawik to adopt a fee schedule for the use of the Selawik Village Safewater Act facility, the revenues of which will be used to replace such items as washing machines and dryers as necessary.

Agreed to this 21 day of June, 1973.

AGREEMENT CONCERNING THE OPERATION AND MAINTENANCE OF THE VILLAGE SAFEWATER ACT FACILITY AT SELAWIK, ALASKA

This agreement is made and entered into this 29 day of June, 1973 between the City of Selawik and the Department of Education, State of Alaska. The terms of the agreement are as follows:

1. The City of Selawik agrees to permit use of the Village Safewater Act facility to be located at Selawik, Alaska, by the schools of the Department of Education at Selawik, Alaska.

2. The Department of Education agrees to provide to the City of Selawik all funds and logistical support necessary for the continued operation and maintenance of the Village Safewater Act facility at Selawik. Operation and maintenance includes all repairs whether minor or major in nature. However, repair does not include re-construction of the Selawik Village Safewater Act facility if such facility is substantially or entirely destroyed.

Agreed to this 29 day of June, 1973.

R. Lind by Asst. Comm.

Dr. Marshall L. Lind, Commissioner

AGREEMENT CONCERNING VILLAGE SAFEWATER
ACT FACILITY AT NULATO, ALASKA

This agreement is made and entered into this 17th day of May, 1973 between the Department of Environmental Conservation, State of Alaska, the Department of Health and Social Services, State of Alaska, the Department of Education, State of Alaska, and the City of Nulato, Nulato, Alaska, for the purpose of providing for the construction and the continued operation and maintenance of a Village Safewater Act (AS 46.07.010 - .080) facility at Nulato, Alaska. The terms of the agreement are as follows:

1. The Department of Environmental Conservation and the Department of Health and Social Services agree to provide the capital funds necessary to construct a Village Safewater Act facility at Nulato, Alaska, in conjunction with the construction of the high school facility of the Department of Education at Nulato, Alaska.

2. The City of Nulato agrees to be responsible for the operation and maintenance of the Nulato Village Safewater Act facility constructed in accordance with this agreement.

3. The Department of Environmental Conservation, the Department of Health and Social Services and the Department of Education agree to encourage the City of Nulato to develop, adopt and enforce an ordinance requiring the members of the community to take their garbage to the incinerator and their chemical toilet wastes and honey bucket wastes to the sewage treatment plant located in the Nulato Village Safewater Act facility.

4. The Department of Environmental Conservation, the Department of Health and Social Services and the Department of Education agree to encourage the City of Nulato to adopt a fee schedule for the use of the Nulato Village Safewater Act

Mr. Edward S. Jacobsen
Sanitary Engineering Director
U.S. Public Health Service
P.O. Box 7-741
Anchorage, Alaska 99510

Dear Mr. Jacobsen:

Long range planning for the Village Safe Water Program is currently being done in the Alaska Department of Environmental Conservation. The purposes of the planning are to identify communities where Village Safe Water facilities should be built, determine what services should be included in those facilities, and estimate their costs.

Critical factors in deciding where Village Safe Water projects will be located are past activities and future plans of your Sanitation Facilities Construction program. We feel the water distribution and waste collection and treatment systems installed by your agency are highly desirable in any community for which they are feasible. Hence those villages intended to receive a Public Health Service project are not likely to be considered for the centralized facilities authorized by the Village Safe Water Act.

In short, our planning is greatly dependent on your planning. I suggest our agencies get together soon to discuss and work out a cooperative and continuing planning procedure whereby our individual efforts to provide remote sanitation facilities can be clearly defined and programmed. Please let me know your reaction to this proposal and feel free to suggest a time, place, and format.

Sincerely yours,

Max C. Brewer
Commissioner

Dr. Max C. Brewer, Commissioner
Dept. of Environmental Conservation
Pouch "O"
Juneau, Alaska 99801

Dear Max:

I was glad to receive your letter of April 23, suggesting a planning meeting to coordinate our efforts in the various villages in Alaska.

I would like to suggest a meeting in Anchorage. The time could be arranged to coincide with some trip you have to make to Anchorage. Just let us know about a week in advance and we'll arrange to be available.

I would suggest that the meeting be quite informal. First you or your staff could present your program and explain the limitations or constraints of the operation; then someone from our office could explain our program and the limitations imposed by our operating policies. A discussion of possible joint effort and each agency's construction schedule would follow from this.

Let us know when you will be able to meet or if you have any other suggestions.

Sincerely,

Edmund S. Jacobsen, P.E.
Sanitary Engineer Director
Chief, Office of Environmental
Health

May 22, 1974

Edmond S. Jacobsen
Chief, Office of Environmental Health
Alaska Area Native Health Service
P.O. Box 7-741
Anchorage, Alaska 99510

Dear Mr. Jacobsen:

Your recent encouragement of a meeting to discuss coordination of our rural sanitation facilities programs is gratifying. As was pointed out in my last letter, we would like to avoid spending Village Safe Water Act funds in villages where water distribution and waste disposal systems have been or soon will be built by your agency. Hence the coordination I speak of is less in the form of joint projects and more in terms of establishing a procedure to insure mutual understanding of the year by year intentions of our two agencies.

I suggest we schedule semi-annual meetings to be held alternately in Juneau and Anchorage. At these meetings you or members of your staff could describe your most current plans for sanitation facilities projects, and I or members of my staff could do the same for Village Safe Water projects. These meetings would at least improve communications between our agencies and help avoid conflict in our rural activities.

Let me know what you think of my suggestions. If you agree with the intent, perhaps we can schedule a meeting to discuss details in the near future.

Sincerely,

Max C. Brewer

of ALASKA MEMORANDUM

RECEIVED
JUN 26 1974
BUDGET & MANAGEMENT

TO: M.R. Charney, Director
Division of Budget & Management
Department of Administration

DATE : June 25, 1974

FROM: Buel A Taggart
Commissioner
Department of Public Works

SUBJECT: FY 76 Issue Analysis Village Safe Water Projections
131-1-03 P

We are submitting the following analysis on the issue of Village Safe Water Projection, prepared by the Division of Buildings, Department of Public Works.

Summary and Conslusions

The Village Safe Water Act of 1970 (as 46.07) provides that safe water and sewage disposal shall be provided to villages in the State.

Program costs could be reduced by developing a more efficient design utilizing prefab construction methods, or purchasing prefab modules or trailers.

The Department of Public Works suggests that the program be implemented similarly to the matter it has in the past. Cooperating with other State agencies. The buildings and their contents would be designed in Alaska by Alaskan engineers and architects.

Problem Definition

The basic problem in implementing this program is developing a satisfactory design that will satisfy the Department of Environmental Conservation's requirements, and be economical to operate.

Objectives

The objectives of this issue analysis are (1) to establish criteria for a basic or standard Safe Water Facility design satisfying the requirements of the Department of Environmental Conservation, fill the requirements of the villages where the facility will be used, be economical to construct, and will adequately function with only minimum maintenance; (2) to develop guidelines for implementing a training program of adequate scope to successfully educate one or two persons in each village to perform maintenance on the structure and its associated equipment and (3) to establish a source of revenue adequate to carry out all the required activity.

Alternatives

Criteria for developing a basic or standard design for a Safe Water Project may be determined from the following information.

- Results of a subsurface site investigation & permafrost
- Availability of water on site
- The quality of the water on the site
- The types of sewage disposal already in use by local residents
- The methods used by residents to transport garbage and refuse
- The population to be served by the facility
- The projected increase or decrease in population to be served
- The ability of the community served to own and operate the facility
- Funds available for the project

Developing guidelines for a training program may be obtained by the following methods:

- Research other training programs used by other Departments, such as the Department of Labor or the Department of Education
- Make inquiries into training programs that other States have developed
- Investigate the possibility of the contractor training two or more people to operate and maintain the facility

Major Constraints

The major constraints involving the Village Safe Water Projects are:

a) The climatalogical extremes that are found in the State with the usual underground conditions, such as seasonal frost and permafrost, make designing a low-cost structure very improbable.

b) Most villages where a Safe Water Facility will be located are in areas where subsurface soil conditions will be a problem, and construction costs will be high.

c) The majority of the future Safe Water Facilities will be located in villages having very little, if any, source of revenue.

REMOTE VILLAGE WATER

INTRODUCTION

In late April of 1976 the chairman of the Alaska Water Study Committee (AWSC) called a meeting at which the chairman of the problem information task force on remote village water was identified, and the general objectives of the task force were given. Time budgeted for the task force to make its study and submit its report was about two months.

A great deal of information on conditions in Alaska villages has been gathered in the past for various purposes. Unfortunately, most of the data are scattered among government agencies in formats tailored to serve the specific purpose(s) for which the data were gathered in the first place. In two months, it was possible only to barely begin defining and documenting water related problems in the far flung and diverse villages of Alaska.

Members of the remote village water task force were:

Jerry Sargent (chairman)	-	Alaska Department of Environmental Conservation
Bill Ryan	-	Alaska Native Health Service
Dave Gray	-	Representing the Alaska Federation of Natives
Larry Kimball	-	Alaska Department of Community and Regional Affairs

TASK FORCE ASSIGNMENT

The overall mission of the task force on remote village water as assigned by the AWSC was "development of additional information on those (remote village water related) problems considered to be serious and of immediate concern". Specific activities assigned to the task force were:

1. Review the technical memoranda for Activities 1 and 2 of the Alaska Water Assessment, and suggest appropriate changes.
2. Develop documentation for remote village water problems.

3. Describe the effects (adverse and beneficial) of not solving each problem.

4. Consider alternatives for solving the problems, and assess impacts of solutions.

5. Make any recommendations to the AWSC which the task force considers appropriate.

TASK FORCE ACTIVITIES

In order to schedule task force efforts such that as much as possible of the information requested by the AWSC could be provided, the following outline of activities for task force members was prepared:

1. Review technical memoranda for Activities 1 and 2 of the Alaska Water Assessment.

2. Develop a list of suspected water related problems in Alaska villages. Also, list all "places" considered villages for the purposes of this task force study.

3. Inventory the current status of Alaska villages with respect to the water related problems listed in 2 above.

4. From the inventory in 3 above, confirm or discount problems listed in 2 above. The inventory is documentation of confirmed problems.

5. Evaluate problems confirmed in 4 above in view of the State Regional Futures in the technical memorandum for Activity 2 of the Alaska Water Assessment.

6. Speculate about what new water related problems might arise in Alaska villages in view of the State Regional Futures.

7. Describe consequences of not solving problems identified in 4 and 6 above.

8. Discuss alternatives for solving problems listed in 4 and 6 above, and estimate consequences and impacts of solving them.

With time to complete all eight of the activities listed above, the task force might have arrived at a clear definition of water related problems in remote Alaska villages, along with alternatives for solutions. But in the two months available to the task force and with the efforts of the task force members being an addition to their full time jobs, only a beginning could be made.

Review of Technical Memoranda

The short section on remote village water in the technical memoranda for Activities 1 and 2 are very general, and none of the broad generalities seemed to be greatly in error. The few comments by task force members on the technical memoranda are:

1. For the purposes of the Water Assessment, the number of villages, or "small communities that are remote geographically, and in many cases culturally, from the state's population centers" (quoted from the Activity 2 technical memorandum) was determined by the task force to be 201.
2. The technical memoranda were correct in stating "The greatest difficulty with water systems may not be in getting them installed, but keeping them running." The task force would change the word "may" to "is".
3. The state's Village Safe Water (VSW) program is currently structured and funded adequately to maintain VSW systems after installation, a statement to the contrary in the Activity 2 technical memorandum notwithstanding.
4. Questions raised about the appropriateness of water quality standards in the Activity 1 technical memorandum also apply to waste treatment and disposal standards.
5. In the Activity 1 technical memorandum, complicated and difficult logistics should be added to "cold climate and permafrost" as factors complicating solutions to remote village water problems.

Water Related Problems in Remote Villages

Members of the task force were asked to reach a concensus on a list of the general categories of remote village water problems. The list of problems is:

1. Domestic Use
2. Industrial and Institutional Use
3. Contamination by Waste Disposal
4. Flooding
5. Erosion

After lengthy discussion, water based transportation was eliminated from the list of problems since that problem might be more legitimately included in a transportation study. Also, human use or consumption of water resources has not yet resulted in water transportation problems that did not exist independent of human activity.

Current Status of Remote Villages

Need For Inventory

The task force as a group confirmed what the individual task force members had previously suspected independently, to wit there is no comprehensive compilation of data by which the severity and extent of the water related problems listed in the previous section of this report could be assessed. Hence it became necessary to gather and compile the appropriate data from various files and references.

A comprehensive and accurate inventory of the status of remote villages with respect to water related problems will take many months to prepare. Incidentally, such an inventory will be done as part of a joint program planning effort between the Alaska Department of Environmental Conservation's Village Safe Water Program and the USPHS Alaska Native Health Service. For the purpose of the task force study, however, only a barely cursory inventory could be done. Hence conclusions drawn from the inventory done by the

task force, and presented in this report, must be considered only a gross first estimate of village conditions, subject to many omissions and errors in data for individual villages.

The Inventory

Choices of data to include in the inventory were based on what information was needed to judge the extent and severity of the 5 remote village water problems listed earlier in this report. Categories of data sought for each village included in the study (a total of 201 villages) were: a) population, b) number of homes, c) present domestic water supply, d) adequacy of present domestic water supply, e) planned or ongoing improvements in present domestic water supply, f) housing projects planned, g) name and description of institutions and/or industrial establishments, h) present water supply for institutions and industrial establishments, i) adequacy of present water supply for institutions and industrial establishments, j) planned capital projects, k) garbage disposal method, l) domestic sewage disposal method(s), m) industrial and institutional sewage disposal method(s), n) other man-made contamination of natural surface or subsurface waters, o) frequency of flooding, p) severity of flooding (percent of village), q) type of flooding, and r) whether or not there is an erosion problem. All catagories of information were not, of course, available for all 201 villages.

Domestic Use- The severity of the village domestic water use problem was judged based on data from 190 villages. The villages were categorized as: 1) hauling water from undeveloped and unimproved sources, 2) hauling water from a developed source(s), and 3) having water service to each home (including individual wells, piped service, and vehicle delivery). If the service from a water supply system in category (2) or (3) appeared reasonably dependable (in quality and quantity) and convenient to consumers, the village with that system was considered not in need of immediate domestic water use improvements. On the other hand, all villages in category (1), and any villages in categories (2) and (3) with undependable or unreasonably inconvenient systems were considered in need of immediate domestic water use improvements.

Table I is a summary of the domestic water use data.

TABLE I. Domestic Water Use Summary

	Category	Number of Villages	% of 190
1.	Haul water from undeveloped source(s)	48	25
2.	Haul water from developed source(s)	63	33
	a. Portion of 2 adequate	34	18
	b. Portion of 2 inadequate	29	15
3.	Have water service to homes	79	42
	a. Portion of 3 adequate	54	28
	b. Portion of 3 inadequate	25	13
4.	Require immediate improvements in domestic water use (1 + 2b + 3b)	102[a]	54
5.	Do not require immediate improvements in domestic water use (2a + 3a)	88[b]	46

a. Represents a total population of 24,105 or 49% of the villages' population.

b. Represents a total population of 24,957 or 51% of the villages' population.

Industrial and Institutional Use- The severity of industrial and institutional water use problems was evaluated based on data from 141 villages containing a total of 358 institutions and industrial establishments. Data were not readily available on industrial and institutional water use in the other villages.

The water supplies of the 358 institutions and industrial establishments were categorized (see Table II) as adequate, moderately inadequate, and severly inadequate.

TABLE II. Industrial and Institutional Water Use

Category	Number of Institutions and Industrial Establishments	% of 358
Have an adequate water supply[a]	170	48
Have a moderately inadequate water supply	127	35
Have a severely inadequate[b] water supply	61	17

a. Adequate means piped service to a building plumbing system, with water of reasonably acceptable quality and quantity.

b. Severely inadequate means water is unreasonably difficult to obtain and/or quality is poor enough to discourage consumption.

Contamination by Waste Disposal- In evaluating the extent of man-made contamination of natural surface and subsurface waters around remote villages, the task force examined garbage disposal methods, sewage disposal methods and any other evidence of contamination (e.g. fuel spills) in sources from which the inventory was drawn. The severity of village water contamination was judged based on data from 146 villages. Those villages were categorized as having no evidence of contamination of natural waters, having severe and hazardous water contamination problems, and having conditions such that contamination of natural waters is very likely (even though no immediate or severe consequences of such contamination are evident). A severe and hazardous contamination problem is defined as a situation where direct contact between people and untreated sewage is possible (e.g. honey buckets dumped on a river bank, cess pool contents flooding to the ground surface).

A summary of the data on contamination of natural waters around remote villages is shown in Table III.

TABLE III. Contamination of Natural Waters

Category	Number of Villages	% of 146
No evidence of Contamination	45	31
Severe and hazardous contamination exists	70	48
Potential for contamination exists, but no immediately hazardous situation exists	31	21

Flooding- The flood data used in this study were taken from the Flood Hazard Information summary prepared by the Alaska District of the Corps of Engineers. Of the 201 remote villages (as defined for the purposes of this study) the Corps of Engineers Flood Hazard report contained sufficient information on 174. Those 174 villages were categorized as having a severe flooding problem (at least 20% of the village flooded at least once every 5 years), a minimal flooding problem (any portion of the village flooded no more frequently than once every 100 years) and a moderate flooding problem (any village not in the severe or minimal categories). Table IV is a summary of the flood data.

TABLE IV. Flood Hazard

Category	Number of Villages	% of 174
Severe flood problem	10	6
Moderate flood problem	96	55
Minimal flood problem	68	39

Erosion- The erosion data used in this study came from the same source as the flood data. The Corps of Engineers report only indicates whether there is or is not erosion at a given village site. Apparently the Corps indicates an erosion problem if they have ever received reports revealing such a problem. Lacking such a report, no erosion problem is indicated. In other words the erosion data are not the result of systematic evaluation of the erosion situation at all villages. The Corps Flood Hazard report has erosion data on 192 of the 201 villages in this study. Of those 192 villages, 86 are reported as having an erosion problem (45%), while 106 are listed as not having erosion problems (55%).

Evaluation of Problem List After Inventory

In general, the inventory data confirm that domestic use, industrial and institutional use, contamination by waste disposal, flooding and erosion are indeed significant problems for remote Alaska villages. Extrapolating the data to all 201 villages included in the study, which represents a total population of 50,345, the following conclusions are drawn:

1. Domestic water service to about 24,000 people in rural Alaska is in need of immediate improvement.

2. Water service to about 106 institutions and industrial establishments in rural Alaska is severly inadequate, while service to about 219 institutions and industrial establishments is moderately inadequate.

3. In 96 Alaska villages there is severe and hazardous contamination of natural surface and/or subsurface waters due to disposal of man-made wastes. In another 42 villages the potential for such contamination exists.

4. The task force was surprised to learn that only about a dozen villages have a severe flooding problem by the definition of severe used in this report and according to data from the Corps of Engineers. It must be pointed out, however, that "severe" means different things to different people, and less than half of the villages can be considered as not having flooding problems.

The task force is convinced that flooding is a major problem in Alaska that cannot be overlooked. It is also important to recognize that "flooding" can refer to a threat from both high water and moving ice.

5. The erosion data gathered for this study do little to confirm, discount or quantify the extent of erosion problems in Alaska villages. It is probably safe to speculate, however, that at least half (and perhaps far more) of the 200 plus villages in Alaska face erosion problems.

Remarks

Gathering the inventory data and evaluating the current status of remote village water problems consumed nearly all the time available to the task force for this study. Hence little time was spent analyzing the State Regional Futures, predicting consequences of not solving water related problems, and describing alternatives for solving problems. Those issues were discussed, however, in a lengthy and wide-ranging meeting of the task force. Following is a summary of the major points made during that meeting.

1. Inadequate water supply and waste disposal systems in villages cause health problems and make life unnecessarily uncomfortable and inconvenient. A measurable portion of village disease and death rates can be attributed to substandard water supply and waste disposal methods. When village residents must devote a significant portion of their individual energies to satisfying basic sanitation needs (the same needs satisfied as an assumed matter of course for most Alaskans), less time, energy and other resources are available for more productive enterprise.

2. Water supply and waste disposal problems in Alaska villages can be solved given enough money and committment by government. The technology exists to make adequate water supply and waste disposal services available in virtually all villages. But the technology can be applied only if money is available for capital construction. And capital construction is only a beginning. Successful operation,

maintenance and management of village sanitation facilities is far more difficult to contend with than construction. Unless operation, maintenance and management problems are solved, much capital construction effort is wasted.

Satisfactory service from even the simplest water supply and waste disposal facility is doubtful unless technical, management and, frequently, financial assistance is made available to villages from outside sources. The need for assistance increases as the complexity of sanitation facilities increases. The relatively recent standards of performance imposed by government on water supply and waste disposal systems have made and will make mandatory ever more complex systems.

3. Whatever programs and funds are made available to villages for solving sanitation problems could eventually be administered through the native regional service organizations, which are primarily the non-profit counterparts of the land claim corporations and the regional health corporations. Although not currently in a position to take on complete responsibility for multi-million dollar sanitation facility programs, the regional organizations are much closer to the village people and their environment than are most government agencies. Hence if the regional organizations are willing, every effort should be made to build their ability to administer programs providing village sanitation services.

4. When a more abundant, more convenient and better quality water supply is made available in a village, the waste (especially sewage) disposal needs of that village will increase correspondingly.

5. The availability and cost of energy relate to several aspects of village water. Most of the village energy needs are met by petroleum fuels. Because of transportation problems, large storage capacities are required to sustain heat and electrical energy production throughout the winter. In addition the cost of fuel in villages ranges from two to five times the cost in major Alaskan urban centers. A majority of the villages currently

have inadequate or no bulk fuel storage capacity. The energy requirements, then, for the operation of domestic water and sewage treatment facilities are critical factors in establishing these services. Another aspect of the increased use and need for fuel in the villages is the increased threat that large scale fuel storage and delivery poses for water pollution. Alternate sources of energy have been proposed for some areas such as wind generated, hydroelectric, and geothermal power. However, these sources are only in the development stage.

6. Solutions to flooding and erosion problems are less technological than institutional and social. If founded in good comprehensive planning, possible solutions to flooding and erosion problems include relocating villages, protecting villages from damage with physical facilities (e.g. breakwaters, retaining walls), planning to accept some expected amount of damage, and lessening flood and erosion damage by modifying natural water flows. Of overriding importance, however, is the need to consider the lives, values and aspirations of the village residents.

7. Most of the villages depend on water transportation for a large portion of their bulk supplies. A large percentage of these communities are accessible by water for only a few months of the year when the rivers and the coasts are free from ice. The resultant high transportation costs and limited delivery adversely affect village development and the provision of basic goods and services. Although harbor and docking facilities, navigation aids, and flood and erosion control perscriptions can improve water transportation, the development of land and air transportation systems offers alternative and complementary solutions to transportation problems.

SUMMARY OF DATA

From
Survey of Rural
Sanitation Facilities

Number of villages in survey 201

Total population as of June, 1976 - 50,345

I. Domestic Water Use (Data from 190 villages)

Category	Number of Villages	% of 190
1. Haul from undeveloped source(s)	48	25
2. Haul from developed source(s)	63	33
3. Have water service to homes	79	42

II. Industrial and Institutional Use (Data from 141 villages with a total of 358 establishments)

Category	Number of Institutions and Industrial Establishments	% of 358
1. Have an adequate water supply [a]	170	48
2. Have a moderately inadequate water supply	127	35
3. Have a severly inadequate [b] water supply	61	17

a. Adequate means piped service to a building plumbing system, with water of reasonably acceptable quantity and quality.
b. Severly inadequate means water is unreasonably difficult to obtain and/or quality is poor enough to discourage consumption.

III. Planned Improvements in the Water Supply (Data from 158 villages)

Category	Number of Villages
1. Planned	47
2. Under construction	10

IV. Contamination of Natural Waters

Category	Number of Villages	%
1. Garbage Disposal (Data from 132 villages)		
a. Indiscriminate dumping	23	17
b. Controlled dumpsite	50	38
c. Dumpsite present but may or may not be in use	59	45
2. Domestic Sewage Disposal (Data from 163 villages)		
a. Privies and/or honey buckets - dump site unknown and/or inadequate	78	48
b. Honey buckets with adequate and controlled dump site	13	8
c. Have disposal service to homes (e.g. haul, piped, individual on-site system)	72	44
3. Industrial and Institutional Sewage Disposal (Data from 117 villages with a total of 278 establishments)		
a. Privies and/or honey buckets- dump site unknown and/or inadequate	55	20
b. Honey buckets with adequate and controlled dump site	16	6
c. Have disposal service to establishment (e.g. haul, piped, individual on-site system)	207	74
4. To Summarize the Evidence of Contamination (Data from 146 villages)		
a. No evidence of contamination	45	31
b. Severe and hazardous contamination exists	70	48
c. Potential for contamination exists, but no immediate hazardous situation exists	31	21

V. Flood Hazard (Data from 174 villages)

Category	Number of Villages	%
1. Severe flood problem [a]	10	6
2. Moderate flood problem [b]	96	55
3. Minimal flood problem [c]	68	39

a. At least 20% of village floods at least once every five years.
b. Any village not in the severe or minimal categories.
c. Any portion of the village flooded no more frequently than once every 100 years.

VI. Erosion (Data from 195 villages)

Category	Number of Villages	% of 195
1. Army Corps of Engineers indicates erosion problem	89	46
2. Army Corps of Engineers does not indicate erosion problem	106	54

APPENDIX A

MEMORANDUM State of Alaska

TO: The Honorable Jay S. Hammond, Governor

DATE: September 13, 1976

FILE NO:

TELEPHONE NO:

FROM: Ernst W. Mueller, Commissioner, Department of Environmental Conservation

SUBJECT: Village Safe Water Program Planning

On September 12, 1975, we provided you with a briefing on the Village Safe Water (VSW) program. In the briefing we pointed out the need for planning and policy-making with respect to the State's role in providing rural sanitation facilities. This memorandum is a progress report on VSW planning efforts, with recommendations and a description of options to serve as the basis for policy decisions to guide the VSW program.

INVENTORY OF RURAL SANITATION SERVICES

A beginning has been made on a statewide inventory of rural sanitation facilities. The form of the inventory and its current status are best described in Appendix A which contains a report entitled Report of the Task Force on Remote Village Water for the Alaska Water Assessment. The task force chairman, Jerry Sargent, is the current manager of the VSW program. Appendix A also contains a summary of the inventory data gathered.

The inventory must now be passed among the various agencies, organizations and individuals that are familiar with sanitation facilities in individual villages for appropriate additions, deletions, and corrections. Ultimately, of course, the accuracy of the inventory will have to be verified by visiting sample villages and observing how well existing facilities match the inventory data.

Preparing the inventory and keeping it up to date has been, and will continue to be, an enormous task. It appears, however, that the inventory will be well worth the investment. Large sums of State, federal, and other monies are spent on capital projects in Alaska's villages, without the benefit of adequate site data. In fact, a healthy amount is sometimes included in rural capital projects for site investigations - many of which are duplications of previous investigations. Also, the data collected for specific projects are not systematically organized and preserved for use on future projects. More money is probably already

being spent each year to gather village site data than would be needed to set up and maintain a single comprehensive inventory of all rural sanitation facilities in the State.

Besides being of value to the State, an accurate inventory of rural sanitation services would also be valuable to other government entities, Native organizations, communities and individuals (e.g., see Appendix B for a copy of a letter from the Bristol Bay Health Corporation dated July 30, 1976).

The Department of Public Works is currently working on an inventory of State facilities as part of a revamping of State construction methods. Part of their data, and perhaps some of their inventory management methods, will be valuable to us.

We suggest that developing and maintaining the inventory of rural sanitation facilities be a top priority VSW activity.

CONSTRUCTION OF VSW FACILITIES

Past Projects

In our VSW briefing to you dated September 12, 1975, we described problems encountered when VSW facilities were constructed through State construction contracts administered by the Division of Buildings. Since then we have completed one facility (Pitkas Point), and nearly completed two others (Beaver and Koyukuk), using the design and construction management techniques described in the September 12th briefing.

We estimate that the Pitkas Point project cost at least 25% less than it would have by traditional State construction methods. Just as important, however, is the fact that the facility was built in less than a year, and both we and the village are happy with it.

The Beaver and Koyukuk projects were delayed several months due to funding entanglements with the Legislative Budget and Audit Committee. But they will be completed around January or February of 1977, at costs comparable to our Pitkas Point experience.

Our latest project is at Kongiganak, where the design and construction methods will be similar to the methods used at Pitkas Point, Koyukuk, and Beaver. A significant difference, however, is that the State is not party to the Kongiganak design and construction management contracts. Rather the State has made a VSW construction grant to the

village, the village has contracted directly with a design and construction management consultant, and we are helping the village administer their contracts.

Future Projects

The political representatives of the people of Alaska (i.e., the legislative and executive branches of State government) passed a bond bill during the Ninth Legislative Session calling for 1.5 million dollars more for VSW capital construction. If Alaska's residents approve the bond bill in November, we will carry out the public's wish and build about three more VSW facilities during FYs77 and 78. Our intention would be to use the same design and construction management methods we used at Kongiganak.

In selecting villages to receive the FY 77-78 VSW projects, we would make a concerted effort to involve the appropriate regional Native organizations. We feel that ultimately any VSW construction the people of Alaska choose to fund should be managed by the non-profit regional Native organizations (see Appendix C for VSW construction options as stated in a draft of the Department's FY 78 budget submittal). Hence the regional organizations should be involved in projects right now to the extent they are able. Over the next several years we must try to develop their ability to manage the VSW construction program.

OPERATION AND MAINTENANCE OF VSW FACILITIES

As we have pointed out frequently in the past, virtually no village in the State has the resources to adequately operate, maintain and manage a VSW facility (or any other utility system) without outside financial, technical, and management assistance. This Department will spend $289,000 in FY 77 to help eight villages operate and maintain their VSW facilities. The total of the operating budgets for those same eight facilities in FY 77 is estimated at $ $470,000.

In FY 78 there will be nine VSW facilities in operation, and the Department has requested $371,000 to assure their successful operation and maintenance. The total of the FY 78 operating budgets for the nine facilities is estimated at $606,500.

A recommendation of the Governor's Management and Efficiency Review was that VSW facilities not be constructed since the villages are unable to operate and maintain them without assistance. Such a question is less a matter of management efficiency than a matter of public policy. In the VSW Act the people of the State said provisions were to be made for water supply, waste disposal, bathing and laundry services

in every village in the State. Providing those services requires public expenditures for both capital construction and operation and maintenance. As the managers of the VSW program, we are obligated to point out the futility of capital construction without adequate provisions for operation and maintenance. Then it is up to the public to decide whether or not the State should provide rural sanitation services as specified in the VSW act.

During FY 76, VSW operation and maintenance support to villages consisted of cash grants to the villages, equipment and materials purchased by the State and given to the villages, and contractual services provided by people and businesses under contract with the State. In order to involve the villages more in managing their VSW facilities, and to avoid the costs and delays attending State and Departmental administrative procedures, VSW operation and maintenance funds will be distributed only as grants to the villages as soon as a grant system to do so is established in FY 77.

If there is to be an operation and maintenance support program for VSW facilities funded by the State in years to come, such a program should ultimately be administered by the non-profit regional Native organizations. As with the VSW construction program, however, the regional organizations are not yet fully capable of taking on management of a VSW operation and maintenance program. Part of our job would be to build such a capability in the regional organizations.

VSW PLANNING

Our planning objectives in the VSW program are still as described in the September 12 briefing. The inventory of existing rural sanitation services has occupied most of our planning attention so far, although we have also made progress in developing a familiarity and working relationship with the regional Native organizations and other agencies with interest and involvement in providing rural sanitation services.

Our ultimate goal is still to design a comprehensive program for achieving sanitation services in Alaska villages. That design should suggest what role the State (and all other appropriate groups) should play in providing rural sanitation services. It could take at least another year or two to develop the comprehensive program.

We recommend that only a limited number of VSW facilities be constructed from now on until long term provisions are made for their operation and maintenance, and until we have developed the comprehensive program for rural sanitation services. If the people of the State want some VSW construction to take place in the mean time, we suggest no more than two facilities per year.

SUMMARY OF RECOMMENDATIONS

1) A complete inventory of rural sanitation services should be developed and maintained as part of continuing VSW program activities.

2) A top priority activity in the VSW program should be comprehensive planning to develop a statewide program for providing rural sanitation services (see specific objectives in the September 12 briefing).

3) Construction of new VSW facilities should be limited to no more than two projects per year until a comprehensive program for rural sanitation services is developed, and until adequate provisions are made for operation and maintenance.

4) The State must accept the responsibility of making provisions for successful operation and maintenance of VSW facilities. Hence State funds to support VSW facilities already constructed and to be constructed (if the people of Alaska call for any) must be provided every year unless other provisions are made as part of the comprehensive program for rural sanitation services called for in (2) above.

5) Assuming there is a place for the VSW program in the comprehensive program for rural sanitation services called for in (2) above, the VSW program (both capital construction and operation and maintenance) should ultimately be administered largely by the Native regional non-profit organizations. Since those organizations are not yet ready to take on such a program, the State should help develop their ability to do so.

APPENDIX B

BRISTOL BAY AREA HEALTH CORPORATION
P. O. BOX 233
DILLINGHAM, ALASKA 99576

PHONE: (907) 842-3322

July 30, 1976

Dr. J.W. Sargent, PH. D.
Sanitary Engineer
Dept. of Environmental Conservation
Village Safe Water
Pouch O
Juneau, Alaska 99811

Dear Dr. Sargent:

Please find enclosed the village information sheets required for your inventory of sanitation services. I have included information available from BBAHC village files and from the OEH files of Kanakanak Service Unit. In your letter, you did not list the particular agencies asked to participate in the inventory in the Bristol Bay region. If you have not included Regional School Districts 6 and 7, (formerly Alaska Unorganized Borough School District), I recommend that you do so; the school district personnel have accurate information on the village schools and are aware of community conditions as well. To clear up some confusion, the Bristol Bay Area Health Corporation is a non-profit health entity, its service area covers the combined boundaries of the Kanakanak Service Unit/IHS and Bristol Bay Native Corporation, the for-profit corporation formed under the Native Land Claims Settlement Act. I am enclosing a list of villages served by the Bristol Bay Area Health Corporation for your information in the future. The detailed update on Dillingham was obtained from the planning office of Choggiung Limited, the Dillingham Village Corporation.

The reaction from all of us working on the inventory is that it is long overdue and that we could all use a copy of the completed survey for our own planning files. Please send us a copy when you are finished.

Sincerely,

BRISTOL BAY AREA HEALTH CORPORATION

Nancy Knoohuizen

APPENDIX C

VSW Construction Options

Excerpts from Draft of FY 78 Budget

Written in a Draft of Department's FY 78 Budget

The alternatives for construction of VSW facilities are essentially the same for FY 78 as they were for FY 77 (see the following list of alternatives A, B, C and D for Objective 3 as listed in the Department's FY 77 budget s submittal).

The latest VSW project (in Kongiganak) is being designed and constructed by about the same methods as described in Alternative A, except that the state is not party to the consulting contracts. Rather the state has a separate grant agreement with the village.

Alternatives A, B, C, and D for Objective 3 as listed in the Department FY 77 Budget

Alternative A - Construction Management by ADEC through Consultants

The three most recent VSW projects (Beaver, Koyukuk and Pitkas Point) are being designed and constructed under three way contracts among ADEC, the villages, and a consulting engineering firm. There is one contract for design and one for construction management. The design contract specifies the scope of work to be performed by the engineering consultants, sets the compensation rate for design services, and prescribes the procedure by which the village pays the consulting engineer with VSW grant money from ADEC. Under the construction management contract the consulting engineer agrees to manage all activities necessary for construction of a VSW facility, including ordering, scheduling, and expediting all equipment and materials necessary for construction. The village agrees to provide local people to work on the project. The construction management contract also prescribes procedures by which the village pays construction expenses, the consulting engineer's fee, and labor costs with VSW grant funds from ADEC. These three projects have been very satisfactory so far.

Alternative B - Construction Contracts Managed by ADEC through Construction

For two VSW projects (Northway and Chevak), ADEC hired engineering consultants to design and prepare construction contract documents. Construction was done by contractors under competitive bid contracts. These projects were reasonably successful, although the relationship between the construction contractors and the villages was beyond ADEC's control.

Alternative C - State Public Works Construction

Three VSW facilities (Selawik, Alakanuk and Nulato) have been built by traditional state construction methods (i. e. Division of Buildings managing design by consultants and construction by competitive bid contracts). The projects were far more costly than originally estimated and the facilities themselves are unsatisfactory in many ways (see FY 76 Issue Analysis entitled Village Safe Water Projects).

When a construction contractor does a job in a remote Alaskan village, he usually moves a construction camp and crew of "outside" workers into the village. The impact of such a camp on a village is frequently less than beneficial to the village.

Alternative D - Contracts with Native Organizations

This alternative is yet untried. Some of the regional native corporations may develop into organizations capable of managing programs like the VSW program. Conceivably, a Native Corporation could contract with the State to manage VSW projects, either totally or in part. Much planning analysis and negotiation is necessary before this alternative can be fairly weighed, and the native corporate entities need time to become more firmly established.

THREE

VILLAGE SAFE WATER PROGRAM
An Update to January 20, 1977

Introduction

The Village Safe Water Act (AS 46.07), passed in 1970, calls for "at least one facility for safe water and hygienic sewage disposal in each village" in Alaska. Little progress was made in the program until December of 1972 due to lack of funds, inability to hire someone to administer the Village Safe Water (VSW) program, and lack of operation and maintenance provisions. Since 1972, six VSW facilities have been constructed, two more are nearly complete, and another is being designed. In addition, an operation and maintenance support program and a comprehensive planning effort have been organized and initiated.

Construction

The six VSW facilities constructed to date are in the villages of Northway, Chevak, Alakanuk, Selawik, Nulato and Pitkas Point. A facility will be completed in Beaver in January, 1977, and in Koyukuk in February of 1977. A facility for Kongiganak is being designed, and construction is scheduled for summer of 1977.

At the nine locations listed above, the VSW projects consist of central sanitation facilities to which village residents can come to obtain water supply, sewage disposal, bathing and laundry services. No piped water distribution or sewage collection systems are involved except for water and sewer service lines to schools.

Construction methods used so far have included: 1) competition bid construction contracts administered by the Alaska Department of Public Works, 2) competitive bid construction contracts administered by the Alaska Department of Environmental Conservation (ADEC), and 3) force account construction by the villages through construction management contracts with engineering consultants. All facilities so far have been designed by engineering consultants.

The force account/construction management method of construction has been the most satisfactory of the three methods used. Facilities constructed that way have been built cheaper and faster than those built under competitive bid construction contracts; the quality of construction has been better; and the villages have been more intimately involved in, and satisfied with, their projects.

VSW facilities have cost from $350,000 at Pitkas Point (begun in FY 76) to almost $1,200,000 at Selawik (begun in FY 74). Villages served have ranged in size from 85 (Pitkas Point) to over 500 (Selawik).

Operation and Maintenance

Experience in the VSW program has confirmed that virtually any utility system installed in remote Alaskan villages is doomed to eventual failure unless the village is given financial, technical, and/or management assistance. Any program for providing utilities in rural Alaska must either adequately provide for long term operation and maintenance, or expect system failures that adequate operation, maintenance and management could have prevented.

In FY 76, the annual operating budgets for VSW facilities ranged from $28,000 at Northway to over $100,000 at Selawik. ADEC provided a total of about $225,000 in VSW operation and maintenance grants in FY 76 to six villages. In addition, ADEC provided technical and management assistance to the six villages. Although expensive, the VSW operation and maintenance support program has made it possible for all completed VSW facilities to serve the public as intended.

Comprehensive Planning

ADEC is developing a comprehensive plan intended to define the roles of State and federal agencies and other groups involved in providing rural sanitation services. An early step in this planning is to inventory all village sanitation facilities. Completing this inventory is viewed as the cornerstore of the VSW planning effort.

The Ninth Alaska Legislature passed a resolution suggesting that a VSW advisory committee be organized consisting of representatives from the 12 Native Regional Service Associations. This committee would assist ADEC with policy and management decisions concerning the VSW program. The Department feels the advisory committee is a good idea and welcomes increased involvement for the Regional Associations.

Several local, State, federal and private organizations participate either directly or indirectly in providing rural sanitation services. A strong working relationship must be developed among the diverse groups if a comprehensive plan for sanitation services throughout rural Alaska is to be successfully developed and implemented.

Goals and Objectives

VSW Comprehensive Planning

GOAL

To develop a statewide comprehensive program for providing sanitation services in rural Alaska.

PLAN OBJECTIVES

1. Inventory existing water supply and sewage disposal facilities in rural Alaskan villages.

2. Develop criteria for evaluating the adequacy of existing water supply and sewage disposal facilities. identified in # 1 above.

3. Identify existing agency programs providing sanitation facilities to Alaskan villages. Quantify the resources currently available. Identify and describe the technical, management and administrative approaches presently used.

4. Develop criteria to evaluate the effectiveness of these programs.

5. Evaluate the adequacy of technical, management and administrative approaches identified in #3. above.

6. Identify and evaluate alternative technical, administrative and management methods that might be used to address sanitation needs in rural Alaska.

7. Recommend changes in the activities and resources of existing programs to incorporate the alternatives noted in # 6 above. Recommend new programs and/or authority necessary for implementation.

8. Analyze existing methods of operation, maintenance and management of village sanitation facilities.

9. Develop alternative methods for operation, maintenance and management of village sanitation facilities.

10. Recommend changes in the activities and resources of existing programs to incorporate the alternative approaches noted in #9 above.

11. Integrate the findings of the above analysis with the comprehensive plan.

12. With the assistance of the appropriate governmental agencies and Native non profit regional associations, proceed to implement the plan.

PUBLIC INVOLVEMENT & PROGRAM COORDINATION

Because several local, State and federal organizations participate either directly or indirectly in developing rural sanitation facilities, this major planning effort can not be undertaken alone. To insure proper plan development and implementation, a strong working relationship must be developed among the diverse groups currently working on rural sanitation problems.

Public participation and inter-agency coordination must be an integral part of the VSW comprehensive planning process. In this regard, a maximum effort will be made to enlist the active participation of the native regional health organizations, the villages and appropriate federal and state agencies. We hope that by the time a draft of the plan has been formulated, significant public comment and coordination will have been obtained. The results of our collective efforts will be a comprehensive plan for providing rural sanitation services in Alaska.

SUBJECT: VSW Planning

The VSW planning effort has progressed to a critical juncture. We have been following a set of carefully developed planning objects (see copy enclosed), the first two of which we have accomplished, and we see a way to handle objectives three and four. But now we are all but stalled on the fifth objective.

Greg Capito has written a good summary of our planning efforts to date (see copy enclosed). As you can see, successful accomplishment of objective five is the key to going on with recommendations for improving methods of solving rural sanitation problems.

We could just gloss over the lack of information for evaluating existing sanitations methods, do superficial and subjective evaluations, and crank through the remaining objectives in order to "turn out the plan." But that would be falling into the trap that dooms many planning efforts to failure. If existing sanitation methods cannot be rationally and objectively evaluated by consistent and disciplined methods, arguments for change can neither be supported nor convincingly made. The result is a plan on the shelf gathering dust.

We are looking for fresh insights and ideas anyone might have about how to handle the evaluations. We also want all interested parties to understand our situation. Greg's write-up will be sent to various people like Fred Reiff and perhaps the regional health directors in further search of ideas.

We may be faced with having to gather the information we need by going village to village, with whatever help we can get from PHS staff and people like Jordan. If so, it could take at least a year to do the evaluations alone. Greg is currently working up some time, manpower and cost estimates for possible ways of gathering the information.

ALASKA

VILLAGE STUDY

GOAL

To develop a Statewide comprehensive program for achieving sanitation services in rural Alaska.

PLAN OBJECTIVES

1. Inventory existing water supply, sewage and solid waste disposal facilities in 200 rural Alaskan villages.

2. Develop criteria for evaluating the adequacy of existing water supply, sewage and solid waste disposal facilities identified in #1 above.

3. Evaluate the adequacy of sanitation facilities in 200 villages.

4. Identify existing agency programs providing sanitation facilities to Alaskan villages. Quantify the resources currently available. Identify and describe the technical, management and administrative approaches presently used.

5. Develop criteria to evaluate the effectiveness of these programs.

6. Evaluate the adequacy of technical, management and administrative approaches identified in #4 above.

7. Identify and evaluate alternative technical, administrative and management methods that might be used in rural Alaska.

8. Recommend changes in the activities and resources of existing programs to incorporate the alternatives noted in #7 above. Recommend new programs and/or authority necessary for implementation.

9. Analyze existing methods of operation, maintenance and management of village sanitation facilities.

10. Develop alternative methods for operation, maintenance, and management of village sanitation facilities.

11. Recommend changes in the activities and resources of existing programs to incorporate the alternative approaches noted in #10 above.

12. With the assistance of the appropriate governmental agencies and Native non-profit regional associations, prompt implementation of the plan.

PUBLIC INVOLVEMENT AND PROGRAM COORDINATION

Because several local, State and federal organizations participate either directly or indirectly in developing rural sanitation facilities, this major planning effort cannot be undertaken alone. To insure proper plan development and implementation, a strong working relationship must be developed among the diverse groups currently working on rural sanitation problems.

Public participation and inter-agency coordination must be an integral part of the comprehensive planning process. In this regard, a maximum effort will be made to enlist the active participation of the Native regional health organizations, the villages and appropriate federal and State agencies. We hope that by the time a draft of the plan has been formulated, significant public comments and coordination will have been obtained. The results of our collective efforts will be a comprehensive plan for providing rural sanitation facilities in Alaska.

SUBJECT: Progress Report-
Alaska Village Study

SYNOPSIS

Developing a rural sanitation program for Alaska is an immense undertaking. But in two (2) years, progress has been made to: 1) inventory existing sanitation facilities in 200 rural villages; 2) develop criteria to evaluate the adequacy of sanitation services in these communities; and 3) establish a working relationship with the diverse groups involved in rural sanitation.

However, the Alaska Village Study has reached an impasse. Our inability to collect the specific and detailed information needed to evaluate sanitation services in 200 remote villages is an immediate problem which must be resolved. If we don't come up with a timely solution, the study cannot be completed.

Another concern is our relationship with the Native Health Corporations. A lack of environmental health and sanitation expertise coupled with chronic staff turnover makes it extremely difficult to maintain a productive relationship with these 12 regional organizations.

The close working relationship with PHS which has evolved over the past two years must also be strengthened. Their level of involvement in the Village study must increase. In fact, the continued support and active participation of PHS are crucial to the success of the planning effort.

Of less immediate importance to the Alaska Village Study but certainly issues to watch include: 1) the passage of SB 449, the Water and Sewer Bond Bill; 2) the rift between AFN and the ANHB; 3) the continuing saga of lab support for the project; and 4) EPA's attempt to buy a piece of the Study.

INTRODUCTION

Building and maintaining water, sewer, and solid waste facilities in rural Alaskan villages is a difficult proposition. Over the years, local, State and federal agencies have invested millions in public funds to protect health by providing adequate sanitation facilities in the bush. These uncoordinated programs are haunted by complex social, economic, political and technical problems which have persisted for years and slowed efforts to develop really effective, long term solutions.

To remedy this situation, ADEC has been leading a drive to develop a comprehensive sanitation program for rural Alaska which will: 1) inventory sanitation facilities in over 200 villages; 2) evaluate the adequacy of these facilities and the agencies which sponsor them; and 3) propose changes in existing programs in order to improve sanitation services in the villages.

For two years ADEC, PHS and the Native Regional Health Corporations have been involved in this Alaska Village Study. What follows is a review of this planning effort with emphasis on problems and progress to date.

THE INVENTORY

This first step in the Alaska Village Study is complete. With help from the rural school districts, PHS and to a lesser degree, the Regional Health Corporations, basic information on water, sewer and solid waste services in 200 villages was compiled. One hundred copies were printed and distributed to people and organizations involved in rural sanitation. By strictly controlling distribution, we hope to make the annual update easier. This November, a call for updated information will go out. Corrections, additions and deletions will be made in December, then reprinted and distributed in January, 1979. Aerial photographs will be added to fill in the gaps.

For us, the Inventory is the cornerstone of the Alaska Village Study. Other uses within the Department include the preparation of revenue sharing forms and answering questions from the Commissioner and others about remote villages - especially during the legislative session. Environmental Analysis has used it extensively in water quality management planning and Facility Construction from time to time has felt the need to consult this document. Except for the preparation of sanitary surveys, the Inventory is rarely used in NRO, SCRO, and SERO. In fact, some staff members have never seen this document!

The real value of the Inventory to others is more difficult to determine. A spot check provides some insights. At PHS, where several copies have been distributed, the document is used to answer questions about facilities in remote villages. However, I don't think it's used day to day as a planning or management tool. A check of the service units reveals that most sanitarians know their villages and do not refer to the Inventory very much.

At BIA, where an increase in staff is noted, the Inventory is used to familiarize new personnel with school sanitation facilities. BIA emphasized that the Inventory is a positive step to improving communication and coordination with other agencies.

Within the Health Corporations use seems to vary. For example, in the North Slope Borough, their Capital Improvements Plan is used instead of the Inventory by the Department of Public Works and the Health Department. At SEARHC, new staff members unfamiliar with the Southeast Region find the Inventory valuable. At the Aleut/Pribilof League, the Inventory is considered a reliable source of information and is used by staff members when discussing sanitation problems with PHS.

At the State level, DOTPF (Facility Procurement) has used the Inventory extensively in its planning program. At the Alaska Energy Office in Anchorage, the Inventory is used on occasion, especially the aerial photographs, to locate existing and potential fuel storage sites in the villages.

At a minimum, the Inventory is a concrete example of cooperation between the Regional Health Corporations, PHS and the State. At a time when most organizations only talk about developing a strong working relationship with other units of government, this is no small item.

Updating the Inventory will be time consuming and laborious, but it's worth the effort.

THE EVALUATION

The second step in the Alaska Village Study is to evaluate the adequacy of the 200 village sanitation facilities identified in the Inventory. This activity is crucial because it should help identify the strong points and weaknesses of village sanitation systems and provide the basis for recommending changes in the programs which provide village sanitation services.

With help from PHS, and to a lesser degree the Health Corporations, an evaluation system was developed. During May 1978, agencies were contacted and dozens of reports reviewed in an effort to obtain the data required to complete the evaluation. It soon became obvious that the specific and detailed information needed could not be found in rural surveys or reports. Data gaps seemed to persist from one report to another. In early June, we contacted people with first hand knowledge of the villages. Based on our experience with the Inventory, the PHS sanitarians seemed most likely to have the information we needed. We focused our attention on the Doyon and Calista regions which contain one half of the rural villages in the State. In mid June I visited the Bethel Service Unit and interviewed two (2) field sanitarians. Each had about 3½ years of experience in the Delta. However, during two days of interviews, a serious problem was encountered. The sanitarians could not provide the specific and detailed information we need on villages in this region. They had no data on O&M, village economics, the reliability of village power or even basic health information for Grayling, Marshall, Shageluk, Holy Cross, Mt. Village, and Pilot Station. In Anvik and several other villages, they couldn't identify the preferred source of drinking water. These are several reasons for this lack of information:

1. Usually when sanitarians visit a village, it's for a specific purpose like vaccinating dogs or inspecting the health clinic. They aren't trying to answer questions concerning the economics, acceptability, or accessibility of a sanitation system.

2. In the more remote portions of this region, villages are visited only once a year and it's difficult to really evaluate sanitation services after spending so little time in a community.

3. Our evaluation system is very detailed and specific. The sanitarians have never examined village sanitation methods in this fashion. They can generalize based on their experience but the evaluation system demands much more.

Two PHS field engineers were then interviewed with similar results. The most glaring information gaps involved village economics. They had no idea of how villages obtained funds to pay local operators or sustain the facility from day to day. However, the engineers felt strongly that unraveling the mystery of village finances and spending priorities was the most important feature of the evaluation.

A few weeks later I tried another approach. I accompanied experienced AVCP employees to three (3) villages in an effort to collect this hard to get information. Enough data was obtained to complete three (3) evaluation forms in one (1) week. So even though this method was expensive and very time consuming, it works and we have the best information available on these village sanitation systems.

In mid August I was invited to the Inupiat Health Board Meeting in Barrow and tested yet another approach. For two (2) days I tried to interview individual Health Board members during meeting breaks to evaluate sanitation services in their villages. If this approach worked, it would expedite the review of sanitation facilities in 200 villages. However, I ran into a serious problem using this method. There was little time available to interview Health Board members. Fifteen or twenty minutes is barely long enough to get acquainted. During these short periods, I could get only a sketchy idea of what was happening in the villages. A good evaluation would probably take several hours if done by interview. Since most of the Health Board members were staying with friends, there weren't any other opportunities to meet later and talk about water and sewer problems. So I determined that this was not the way to collect the information needed to evaluate sanitation services in the villages.

Another approach is worth mentioning. This involves training qualified individuals to evaluate the adequacy of sanitation services. Initially, this idea was attractive because sanitarians, community liaisons and the like live in the regions, know the people and visit the villages, so if the evaluation could be incorporated into their travel schedules, we might save money and obtain some valuable information. However, this idea has not panned out because of the inherent quality control problems. The AVCP trip cited above really brought home just how persistent one must be to collect information by visiting the villages. I can't think of a qualified person in the Doyon or Calista regions with enough time and dedication to do this job right.

In summary, we recognized early on the lack of water quality and health data in the villages, but did not foresee similar problems collecting the other information needed to complete the evaluation. Given the size of this project and the time element involved, we are really in a bind. If we don't come up with an efficient way to collect this hard to get information, the study will be jeopardized.

COORDINATION

Because many local, state and federal organizations participate either directly or indirectly in providing rural sanitation services, the Alaska Village Study cannot be undertaken alone. To insure proper plan development and implementation, a strong relationship must be developed among the diverse groups currently working on rural sanitation problems. Keep in mind we must enlist the support of these diverse groups by persuasion since we have no authority over them. While it is impossible to effectively coordinate our activities with every group, we identified a few key organizations and opened lines of communication with them. The 12 non-profit Native Regional Health Corporations immediately attracted our attention because their responsibility is to represent Alaska Native people in all health related matters. In addition, they were by far the best organized group in the regions. At the federal level, the Office of Environmental Health within PHS has designed and constructed sanitation facilities in Alaska Native villages since 1962 and is still the lead agency in providing these services. To a lesser degree, we have also worked with BIA, HUD and EPA as well as AVCP and a few other regional organizations. What follows is a review of the working relationship we've developed with these groups.

Regional Health Corporations

House Concurrent Resolution #110 adopted by the Ninth Alaska Legislature suggested the formation of an advisory committee for the VSW program. This group, consisting of representatives of the 12 Regional Health Corporations would advise and assist in the administration of the VSW program. In Feburary 1977 the Association of Regional Health Directors unanimously endorsed this idea and became our Advisory Board. Their first activity was to assist the Department in selecting candidate villages most in need of a VSW facility. This was a very difficult task because only one or two facilities could be built and 12 regions were competing for limited funds. Prioritization was done by examining background data on each village. This information was then placed in perspective by evaluating each community's prospects for sanitation improvements. After several weeks of deliberation, a priority list was drafted. On the whole this process worked very well. In fact, one Health Corporation not present had a village from its region placed at the top of the list! We've followed the Advisory Board's recommendations and VSW facilities are being built at Council and Tanana.

Late in 1977, the Health Corporations also helped provide basic information for the Inventory of Rural Sanitation Services. I spent many hours in their regional offices interviewing staff and identifying sanitation facilities in 200 rural villages. The Health Corporations were cordial and very generous with their time.

However, some serious problems have surfaced in our dealings with the Health Corporations The first is turnover which has reached epidemic proportions. The average "life expectancy" of a health director is about eight months. Staff turnover is even greater and with so many people coming and going, it's almost impossible to maintain continuity and an effective working relationship with the 12 regional organizations.

Secondly, while sanitation is a big concern within the regions, most organizations do not have technical staff to address these problems. (Only Norton Sound employs a sanitarian.) Currently, the Health Corporations administer accident prevention, alcohol abuse, health aide, manpower, mental health and similar programs. So it's difficult to talk to them about evaluating the adequacy of sanitation facilities in the bush. As a result, little time has been spent with the Health Corporations on this important activity and communication has deteriorated over the last six months.

Finally, there has been internal squabbling within the non-profit corporations which may have a serious impact on our planning effort. AFN and the Alaska Native Health Board (ANHB) are struggling to decide who speaks for Native people on health issues. To firm up its power base, the ANHB apparently dissolved its standing committee, the Association of Regional Health Directors (ARHD), which acts as our Advisory Board. From now on the ANHB will formulate rural sanitation policy and the ARHD will only address regional problems. Already I've noticed that the Health Directors meet less frequently, and there's a real question about their ability to help us set construction priorities this fall. We need an advisory board made up of people that work day to day with village sanitation problems like the ARHD. We look to them for professional and technical involvement in establishing VSW program strategies. The ANHB is a lay group without technical expertise or staff and it will be extremely difficult to work with them on issues which require technical expertise and an intimate knowledge of the villages.

PHS

In the last two years we've spent hundreds of hours with PHS. Fred Reiff has been cordial and generous with his staff time. He appointed Lynn Wallace to work on the Alaska Village Study with us. Although this relationship is informal, we have made progress on the Inventory and to a lesser degree, the evaluation. Despite some strong philosophical differences, there seems to be considerable trust on both sides.

Continued PHS support of the Alaska Village Study is crucial because they are the lead agency in providing rural sanitation services and, as such, must play a major role in implementing any study recommendations which may be forthcoming. They also have by far the biggest and most talented staff available to help with the Study. The working relationship developed over the past two years must be strengthened as we move onto the more difficult areas of the Study.

When Lynn's replacement reports for duty this fall, we'll have to meet with Fred and see if we can secure more of a commitment. That should not be difficult if PHS perceives the Study as a valuable and essential part of their program. If Fred agrees to increase their level of involvement, there's hope for the future. If not, the Study will be jeopardized.

EPA

EPA involvement in the Alaska Village Study began early in 1977 when Senator Mike Gravel asked ADEC for ways to improve P.L. 92-500, the Federal Water Pollution Control Act of 1972. We responded with a carefully worded amendment to Section 113 which: 1) confirmed the State's position as the lead agency in trying to develop a comprehensive rural sanitation program; and 2) required all appropriate federal agencies to assist the State in developing the plan and obligated them to implement it. The amendment we originally proposed called for the President to direct federal agencies to participate in the study. But the Congress changed that and directed EPA to conduct the study. Congressional staff who made that change probably thought it would be negligible but it was the beginning of our problems with the Environmental Protection Agency. From this point on, the State's established position as the lead agency in developing a rural sanitation program for Alaska was in direct conflict with what EPA perceived as their new statutory responsibility under Section 113 of the Act.

Early in 1978, EPA officials remained in the dark about the Alaska Village Study. No directives, guidance or funds were forthcoming from headquarters. We then began to work with EPA officials in Anchorage to: 1) explain the objectives of the Study; 2) help define EPA's role in the project; and 3) secure federal support to help continue the work with authorizations we drafted into Section 113.

In May 1978, these issues were discussed at a meeting in Juneau with EPA Region X officials. At this meeting, EPA's role in the Alaska Village Study was defined as: 1) representing the federal government's regulatory interests; 2) motivating recalcitrant federal agencies (if any) to participate in the study; and 3) managing the typing, printing or other administrative tasks and submitting all reports required by the Act. It was reaffirmed that independent action by EPA would be counter-productive. Bob Burd and Ed Coate of Region X agreed with this position and seemed relieved that the State was able and willing to assume responsibility for directing the Alaska Village Study.

As to the question of funding, we learned that EPA officials had simply neglected to request the funds available under Section 113 and support for the project had "simply fallen into a crack." Neither was lab support possible because Region X couldn't handle the additional work load.

Clearly, the lack of lab support has slowed our progress. However, in retrospect, the loss of funds may have been a blessing in disguise. The paper work and bureaucratic red tape generated by an EPA grant would force us to spend considerable time on purely administrative tasks and less on doing the actual work. In addition, during the past two years we've learned you simply can't buy agency support for this project. Neither can the assistance of competent, qualified, professionals in the rural sanitation field be purchased, because most are already employed by organizations like BIA and the U.S. Public Health Service.

At this point in time there's a real question whether EPA can make any substantive contribution to the project. As a consequence, I think we should stand firm and resist any effort by EPA to buy a piece of, or become directly involved in, the Alaska Village Study.

Other Agencies

From time to time we've worked with HUD and BIA. Both have been cordial and cooperative. These organizations are indirectly involved with rural sanitation in the bush. Later in the Study, when we evaluate programs, we'll spend more time with them.

Since Jordan Suhr moved to Bethel to work with AVCP, we've taken a real interest in their IHS Feasibility Study. Jordan has agreed to help us evaluate sanitation facilities and does so when he visits the villages. But so far he has sent only 5 or 6 forms. When visiting a village he interviews the plant operator and evaluates the system while the AVCP economist does his thing with the village administrator. At the end of the day, they mingle with residents. Even though that approach is expensive, time consuming and laborious, it works and they have collected the best information available on village sanitation systems. However, Jordan points out that only 15-20 communities will be visited this summer because of financial and manpower constraints.

OTHER ISSUES

Laboratory Support

Early on we recognized that more data was needed to evaluate the adequacy of drinking water supplies in the villages. PHS agreed, for the Inventory revealed their information was spotty. However, lab support would be needed to analyze the drinking water of 200 rural villages. The saga began last March with the ADEC lab in Douglas. They couldn't help with a project of this size because bottle washers were in short supply. In May, there was a promise of support from EPA. Apparently Section 113 funds were available to assist us in obtaining lab support. After several weeks EPA notified us they couldn't help after all because funds had not been requested. (Meanwhile, the field season continues to slip by.) The U.S.G.S. was consulted in late June but their cost estimate was prohibitive. In July, with hopes fading, PHS decided to contract with a private outfit for laboratory service. The cost would be split 50/50 with ADEC reimbursing PHS when State funds became available. However, PHS couldn't simply go out and hire a chemist. The OEH contracting officer got involved and the matter has been tied up for months. Meanwhile, back at the Douglas lab, work had slackened, (with fall approaching), and they agreed to provide limited support until the PHS contract is awarded. The trail of tears continues into September with full time lab support just a dream (or memory).

The humor of this incident is lost when one considers how vital laboratory support is to the future of the Alaska Village Study--and how little control we have over the outcome.

SB 449

The Alaska Village Study has encouraged communication and thus helped to minimize duplication of effort in facility construction. But the 1978 Water and Sewer Bond Bill is a giant step backward because it directs ADEC to spend public funds in 11 rural communities, even though PHS has or soon will install sanitation services in each of these villages. In addition, the Legislature has dictated 11 project sites and thus undermined our relationship with the VSW Advisory Board, which in the past has been heavily involved in selecting communities most in need of a VSW facility. Finally, SB 449 is contrary to our policy of going slow on new construction--until the Village Study is completed and solutions to difficult questions like operation and maintenance are proposed.

In summary, SB 449 is a bad piece of legislation. It may complicate and seriously disrupt our efforts to develop and implement a rational program for addressing rural sanitation problems in Alaska.

CONCLUSIONS

This progress report has identified several important issues which may affect the outcome of the Alaska Village Study. Despite their potential impact, we have little control or influence over them. These include 1) timely lab support for the project; 2) passage of SB 449; 3) the rift between AFN and the ANHB; and 4) chronic staff turnover within the health corporations. We can exert some influence over three other issues mentioned in the report. These are: 1) EPA involvement in the project; 2) the problem of data collection; and 3) greater PHS participation.

With all of these factors at work, chances for completing the Study are 50/50 and less than that for making the December 1979 deadline.

Village Safe Water Projects in Alaska

—Case Studies—

DEFINITION OF PROGRAM

HISTORY

Like other areas of the country, Alaska draws the traditional distinction between urban and rural areas. Here, the urban areas are concentrated around the major municipalities such as Anchorage, Fairbanks, Juneau and Seward. The remainder of the State is defined as rural and is often referred to as the "bush." Providing sanitation services (primarily water supply and waste disposal) in the bush is quite a different proposition from providing such services in the cities. In the past, state and federal assistance for such services has been provided to urban areas through a series of programs that have differed from those in the bush.

Municipal Water and Sewer Grants

Communities in Alaska can receive financial assistance for installing water supply and waste disposal systems through the State Water and Sewer Construction Grants program. Through this program, both federal and state funds are available for municipal sewage treatment and disposal, interceptor sewers, sewage collection and water supply. Communities receiving these funds are requested to provide matching funds in varying proportions. This "matching fund" proviso of the Construction Grants program has, naturally, limited its success and impact in bush Alaska.

Bush Programs

Until 1970, the only active program for providing sanitation services in rural Alaska was the U.S. Public Health Service, Indian Health Service, Office of Environmental Health. In the late 1960's Senators Ted Kennedy and Ted Stevens toured rural Alaska and were appalled at the lack of sanitation services in bush villages. Their reaction to this sorry condition was the promotion of a combined federal and state program to answer the need for rural sanitation services.

The federal program was the Alaska Village Demonstration Project (AVDP).[1] The state program was the Village Safe Water (VSW) program. Simply stated, AVDP was to construct two projects which were to demonstrate the best way to supply rural sanitation services; the State was to follow this up by building sanitation systems that were developed by AVDP.

THE VILLAGE SAFE WATER ACT

The Village Safe Water Act of 1970 was passed for the purpose of providing "safe water and hygienic sewage disposal facilities in villages in the State," and "to assure that there will be at least one facility for safe water and hygienic sewage disposal in each village." The Act stipulates that each facility will provide at least a safe water supply, means for sewage disposal, and bathing and laundry services. A village is defined as "an unincorporated community which has between 25 and 600 people residing within a two-mile radius; or a second class city." The VSW act is administered by the Alaska Department of Environmental Conservation (ADEC).

A village receiving a VSW project is not required to contribute toward costs of construction. The State may "provide for construction by contract or through grants to public agencies or private nonprofit organizations, or otherwise."

When a VSW facility is completed, the recipient village must be given title to it. The village must agree to accept ownership of the facility and be responsible for its operation and maintenance. The State

[1] *The Alaska Village Demonstration Project was treated in some depth in Volume 7, number 2,* The Northern Engineer.

TABLE 1
Villages Receiving VSW Facilities

may assist a village with operation and maintenance expenses when the local governing body lacks sufficient financial resources.

VSW CONSTRUCTION EXPERIENCES

Description of Projects

By the end of fiscal year 1977, Village Safe Water sanitation facilities will have been constructed in nine Alaska villages. Table 1 lists the nine villages and the data on them concerning population, location and climate.

The VSW project goals in all nine of the villages will be the construction of *central* sanitation facilities. A central facility is a building from which the various sanitation services are dispensed (e.g., a faucet for filling a water bucket or barrel, a dumping bin for "honey buckets," clothes washers and dryers, showers, and rest rooms). The central facility concept contrasts with that of providing these services to individual homes through a piped distribution and collection system. In some communities, factors such as permafrost conditions, climate and community layout might make a central facility preferable to community distribution and collection systems.

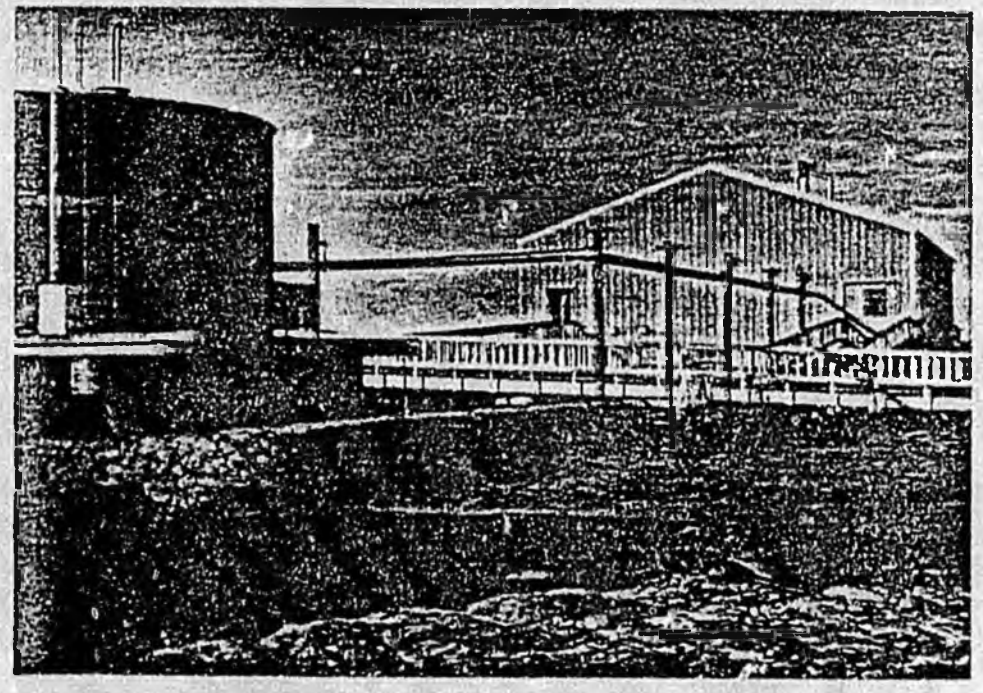

FIGURE 1. Alakanuk Village Safe Water Facility.

Northway and Chevak

At Northway and Chevak, existing community watering points were improved and laundry equipment and showers were added. Wastewater from the Northway facility (containing no toilet waste) is discharged to a small natural pond. Chemical toilets are emptied into a Federal Aviation Administration sewage treatment system several miles away. At Chevak, wastewater is discharged to a sewage lagoon. These facilities were designed and constructed under contracts administered by ADEC.

Nulato, Selawik and Alakanuk

The sanitation facilities in these villages were the first full fledged ones constructed under the VSW program.

In each village, a new state school and the VSW facility were designed and constructed under joint contracts administered by the Alaska Department of Public Works. All three VSW facilities were patterned after the Alaska Village Demonstration Projects in Emmonak and Wainwright. The VSW facilities are two-storied structures approximately 55 feet square, built on piles. They contain washers and dryers, showers, saunas, rest rooms, solid waste disposal bins, honey bucket dumps and a watering point.

In all three facilities, water treatment is by alum coagulation/flocculation, rapid sand filtration, and chlorination. The water treatment plants are standard Met-Pro physical/chemical package plants with a 14,000 gpd capacity.

The sewage treatment plants are also 14,000 gpd Met-Pro physical/chemical package plants, in which the unit processes are alum coagulation/flocculation, carbon sorption, rapid sand filtration, and chlorination. Treated effluent is dis-

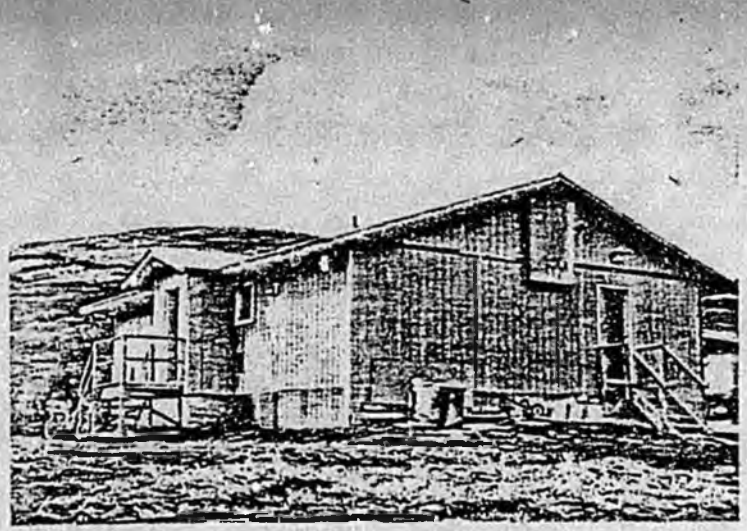

FIGURE 2. Pitkas Point Village Safe Water Facility.

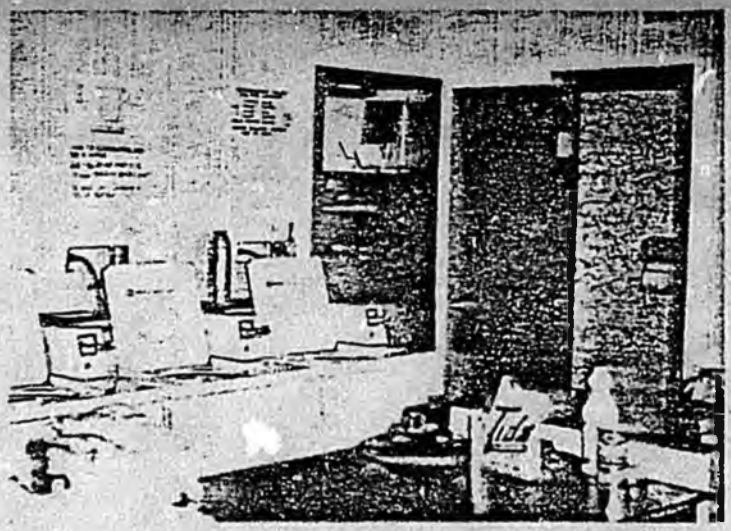

FIGURE 3. Pitkas Point Laundry Room.

charged to the land surface through an elevated, insulated and heated conduit.

Sludge from both the water and sewage treatment plants is dewatered by centrifugation and incinerated. Solid waste from the solid waste collection bins is also incinerated.

In each facility the primary source of building heat and heat for the dryers is a heat exchanger on the incinerator stack. A hot water boiler is the secondary heat source, and a hot air furnace is the "last ditch" source of building heat in case the incinerator and boiler fail or are inadequate. The incinerator, boiler and hot air furnace are interconnected through complex control systems which have been very difficult to keep operating properly.

At Nulato neither one of the treatment plants has performed consistently well since the facility was completed in November of 1974. Sludge build-up has caused severe reductions in the capacities of both plants. Since the main water treatment requirement is the removal of iron (28 mg/l) and manganese (5 mg/l), the physical/chemical process that was installed was probably not the best choice. At Selawik and Alakanuk, raw water is obtained from surface sources, and the treated water has been of good quality since the facilities were completed in October 1975 and December 1975, respectively. The sewage treatment plants are also operating well.

Pitkas Point, Koyukuk, Beaver and Kongiganak

The Pitkas Point project was completed in February, 1976. This facility is built with relatively simple mechanical and structural systems compared to the big and sophisticated installations at Alakanuk, Selawik and Nulato. The structure is wood frame with about 1300 square feet of floor space. It provides a watering point, honey bucket dump, washers and dryers, rest rooms, showers and saunas.

Raw water from a creek bed collection gallery is filtered (when raw water quality requires it) through a bed of sand and activated carbon; then it is chlorinated and fluoridated. Sewage receives secondary biological treatment in Multi-Flo package plants. These plants consist of an aeration chamber and a filter membrane for solids separation. Treated effluent is discharged to an underground leach field.

Unique construction methods were used at Pitkas Point. The State, through ADEC, gave a grant to the village. The funds were used to hire consulting engineers who were to design and manage the construction of the Pitkas Point facility. ADEC helped the village negotiate and administer the consulting contracts.

The projects at Koyukuk, Beaver and Kongiganak are being patterned after the relatively successful Pitkas Point project.

COSTS

Table 2 summarizes capital construction costs for VSW projects to date. The costs shown include both design and construction. The figures for Koyukuk, Beaver and Kongiganak are preliminary estimates.

OPERATION AND MAINTENANCE

The construction of any utility system, especially in the relatively harsh environment of rural Alaska, is money wasted unless provisions are made for the system to be properly operated and maintained. Most, if not all, villages lack the necessary resources to administer, manage, operate and maintain even a minimum VSW facility (or any other utility system for that matter) without continuing outside assistance.

A facility to provide the services specified by the Village Safe Water Act must contain relatively sophisticated equipment and appliances. Since public health is at stake, water and waste treatment systems must be kept operating properly at all times. Hence, at least one full-time trained and paid maintenance person must attend every VSW facility.

Virtually all of the maintenance people have to come from the villages where VSW plants are installed because "outsiders" are usually reluctant to take up residence in remote villages. Since people with the training and experience neces-

TABLE 2
Capital Construction Costs For VSW Projects

Village	Cost (in thousands of dollars)
Northway	60 (VSW contribution)
Chevak	75 (VSW contribution)
Nulato	860
Selawik	1100
Alakanuk	1000
Pitkas Point	350
Koyukuk	440
Beaver	450
Kongiganak	550

sary to operate and maintain a VSW facility are usually not available locally, an elaborate, extensive and ongoing program for training of plant operators is required.

A continuous and generous flow of revenue is required to meet the operation and maintenance expenses of VSW facilities. In addition to the plant operator(s)' salary, there are treatment chemicals, electricity, fuel and replacement parts to buy.

Table 3 lists the estimated annual operating budgets (FY 76 figures) for VSW facilities completed as of February, 1976. The figures in Table 3 exclude amortization of capital costs.

Sources of revenue in the villages are limited. Individuals who use the VSW facilities will pay fees, but the fees cannot be so high that people can no longer afford to use the facilities. Up to $2000 dollars per month might be raised through users' fees in larger villages (400 to 500 residents) and proportionately less in smaller towns. Public Health clinics, some owned by the U.S. Public Health Service and some owned by the villages, might receive water supply and waste disposal services from VSW facilities and thus pay users' fees, but the revenue collected in this way would not exceed more than a few hundred dollars a month. Fees paid for school water and sewer services represent a third source of revenue which could routinely amount to about 25 per cent of the VSW facility operating budget. So, as a general rule, more than half of the money needed to operate VSW facilities will have to come from outside the villages.

TABLE 3
Operating Budgets For VSW Facilities

Villages	Annual Operating Budget (FY 76) (thousands of dollars)
Northway	28.0
Chevak	37.5
Nulato	109.0
Selawik	109.0
Alakanuk	109.0
Pitkas Point	46.0

CONCLUSION

The Village Safe Water program grew out of recognition of the critical need for adequate sanitation services in rural Alaska. Providing such services involves two major efforts: (1) capital construction, and (2) operation and maintenance. Of the two activities, operation and maintenance have proved to be the more difficult in the VSW program.

The technological problems associated with providing water supply and waste disposal services in the Arctic are indeed unique and challenging. But by far less tractable are long term operation and maintenance problems such as finding enough money to pay the bills, keeping mechanical equipment operative at remote sites, and managing personnel from great distances without reliable communications.

Without dependable provisions for operating and maintaining sanitation facilities in rural Alaska, constructing them is wasted effort.

Dr. Jerry Sargent is a Sanitary Engineer with the Alaska Department of Environmental Conservation, Pouch C, Juneau, Alaska.

Jon Scribner is the Water Programs Director with the Alaska Department of Environmental Conservation.

Again, we are grateful to Dr. Dan Smith, Head of the Northern Technology Centre, for allowing us to publish this article which was originally given at the Utilities Delivery Symposium last spring.

Mr. Ernst W. Mueller
Commissioner
Dept. of Environmental Conservation
Pouch O
Juneau, Alaska 99811

Dear Mr. Mueller;

Thank you for the excellent publication on Village Sanitation in Alaska. We at Alaska Federation of Natives, Inc. and the twelve regional health directors are very impressed with the work done in this area. This publication will go a long way in getting the best possible facilities for our rural areas.

The regional health directors, and myself, found working with your office a real pleasure. We especially would like to commend Greg Capito, on his brief but complete presentations he has made to our group. His manners and professionalism is a tribute to you and your office. Mr. Capito, will always be welcome to our meetings and will be well received by the villages he helps.

Once again thank you,

Very Truly Yours,

Re: Village Safewater

Dear Govornor Hammond:

House Concurrent Resolution #110, adapted by the Ninth Alaska Legislature, suggested the formation of an advisory committee for the State's Village Safewater (VSW) Program. This group, consisting of representatives of the 12 Native Regional Health Corporations, would advise and assist the Alaska Department of Environmental Conservation in the administration of this rural sanitation program.

At a regularly scheduled meeting of the Association of Regional Health Directors (ARHD) in Anchorage on February 24, Senior Planner Gregory Capito of the Village Safewater Program, made a presentation to the group. His main purpose was to find out if the A.R.H.D. would act in an advisory capacity for the VSW program. Mr. Capito presented the advantages and disadvantages of being an advisory board. The Association of Regional Health Directors unanimously endorsed this idea and requested that the VSW program be expanded to provide sanitation services to remote Alaskan communities.

It is our sincere hope that through this advisory group, we can work together to address the critical sanitation problems facing rural Alaska.

Yours truly,

ALASKA FEDERATION OF NATIVES, INC.

RESOLUTION
77-02
*****

WHEREAS, the intent and purpose of the Office of Environmental Conservation is to establish and insure standards of water quality and environmental sanitation; and

WHEREAS, the Village Safewater Program is a mechanism whereby the Office of Environmental Sanitation can assist local communities in meeting standards established by the Office;

NOW THEREFORE BE IT RESOLVED, that the Association of Regional Health Directors advises the State Legislature of the importance of maintaining within the Office of Environmental Conservation the capacity of assisting local communities of meeting standards of environmental health by continuing the Village Safewater Program through the Office; and

BE IT FURTHER RESOLVE that the transfer of Village Safewater Program to the Division of Transportation and Public Facilities is likely to reduce the effectiveness of the Office in promulgating acceptible standards of environmental sanitation.

JAY S. HAMMOND, GOVERNOR

POUCH O — JUNEAU 99811

February 18, 1977

Bob Worl, Executive Director
NORTH SLOPE BOROUGH HEALTH DEPARTMENT
P.O. Box 69
Barrow, Alaska 99723

Dear Bob:

RE: Rural Sanitation

Please recall the recent meetings with you or your staff concerning two or three Village Safe Water (VSW) Facilities to be built this year in Alaska Native villages. As discussed earlier, we would like you to help us select a village in your area most in need of a VSW project.

Since 1970, the Department of Environmental Conservation has sponsored construction of nine VSW facilities. Hence, we have some experience to share with you that might help in selecting a village.

First of all, remember that we build central facilities where people come to get water, deposit waste, bathe and do laundry; as opposed to piped water and sewer service to each house usually installed by the U.S. Public Health Service. Physical features are important in deciding whether a piped system or central facility is appropriate. For example, ice-rich permafrost or swampy terrian make it technically and economically difficult to construct a conventional piped system. Also, in a village spread out along both sides of the river, a piped system may be too difficult and expensive to install. Therefore, villages in your region which possess these types of physical characteristics may be better suited for a centralized VSW system.

To minimize duplication of effort, please do not consider those villages in your region which have received, or are likely to receive, HUD housing and thus PHS water and sewer systems. Also, please note that a VSW facility should not be constructed in a village where a PHS system already exists.

The size of the community is also important. The Village Safe Water Act, as it will probably be amended, defines "village" as an incorporated or unincorporated community which has between 25 and 600 people residing within a two mile radius.

Perhaps the single most important factor to consider is how a village obtains its water supply. For example, melting ice or collecting rain for drinking water is more inconvenient and unsafe than having a good quality, year round stream close by.

The Honorable George H. Holman
State of Alaska, State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Holman:

A copy of Ernst W. Mueller's letter to you, dated December 15, 1978 was forwarded to Jim Martin, Deputy Director of the Yukon Kuskokwim Health Corporation. Jim passed the letter on to me because one of my departments is involved with the problems of safe water and sanitation in the villages. In attempting to provide information and offer advice, the department also receives complaints and tries to help villages with the many water and sanitation problems they have.

good ideas

As you are well aware efforts to provide VSW facilities in the past have met with only moderate success. The past pattern of failure, or partial failure, seems likely to be repeated as a result of the new water and sewer bond bill (S.B. 449) which was approved on November 7, 1978. I assiduously second the comments made by Ernst Mueller regarding the need for comprehensive planning.

I am especially concerned that in spite of the construction of facilities in the so many villages still lack the minimum necessity of safe water to drink and isposal of their sewerage, especially when the lack is due to poor planning. I like to present the following points for your attention.

1. The importance of a VSW feasibility study for each village cannot be over emphasized. This is especially important if no funds for repair, maintenance or operation are to be forth coming

   a. The planned facility should not require more funds for upkeep than the village can reasonably provide - or are willing to provide.

   b. The facility should not require a larger maintenance crew than the village can supply.

   c. The facility should not require greater skill to operate, than the village has available.

   d. The facility should not require more power to operate, than the village can produce.

   e. The facility should have been tested regarding its suitability to the climate and terrain of the individual village.

2. Providing facilities with no regard to the need for on-going upkeep of the facilities is at best, a half measure towards alleviation of the problem. The upkeep is a separate entity which perhaps should be covered by a second bill which would provide for:

   a. The cost of major repairs.

   b. A subsidy which may be based on the ability of the village to maintain the facility.

   c. On-going training programs for maintenance crews.

I hope these comments and observations will be of interest to you and hope you will contact me if I can be of help at any time.

Sincerely yours,

Jillian L. Loschky

Pouch V
Juneau, Alaska 99811

Dear Senator Hohman:

With reference to a letter I sent you, dated January 9, 1979, I would like to retract comments I made in paragraph two and point one, of that letter.

I erroneously used the phrase "VSW Facilities," when in fact I should have identified Public Health Service installations, which are actually the facilities presenting problems in the past. Greg Capito, Senior Planner, of the Village Safe Water Department of Enviornmental Conservation, called me today. Having seen my letter to you, he was understandably concerned to find the VSW project had been unjustly vilified. All the VSW facilities are in good working order.

Please accept my regrets for the error.

Sincerely,yours,

Mrs. Jillian F. Loschky
Assistant Health Director

Dear Greg:

When it comes to "making friends and influencing people," I am afraid I may have already lost you.

I realize ignorance of the law is no excuse, but it is the only one I have. I did not realize VSW and PHS were totally unconnected, or at least I did not connect the two; even when working on the subject. I believe this is my fifth or sixth week in Alaska and this job. I am juggling several programs and trying not to make the sort of stupid mistake I made here.

I enclose a letter I have written retracting the use of the phrase, VSW facilities. If you wish me to make any further reparation, or acts of contrition, please let me know. You can imagine I already feel very dull-witted.

Meanwhile, I send my abject apologies.

Sincerely yours,

Jillian

Mrs. Jillian Loschky

ENCLOSURE

Finally, the interest or initiative a village has demonstrated in correcting or alleviating local waste disposal problems is another point to consider when selecting a candidate village.

Keep in mind that there is flexibility in the VSW program. If a facility providing less than all the services specified in the VSW act is desired by a village, the following options may be available: 1) A central watering point; 2) A central watering point plus a waste disposal plant or 3) Option (2) plus bathing and/or laundry services.

We hope that by the time each regional health organization completes the screening process and selects a village, the Association of Regional Health Directors or similar group will agree to act in an advisory capacity for the VSW program. This group will help us prioritize the villages selected, using the guidelines outlined above. Department of Environmental Conservation engineers will then conduct field investigations and on-site inspections of the top two or three villages and discuss the projects with village leaders. This way the top selections are either confirmed or rejected. If rejection occurs, the process is repeated with the next village on the list.

Before you begin the screening process, please read carefully the enclosed material. The Village Safe Water Act will clearly define the purpose, objectives and limitations of our program. The case studies report from the Northern Engineer will give you a better idea of the sanitation systems we've constructed in the past.

We look forward to your active participation in this selection process and to being advised of your choice by March 11. Please feel free to contact me at 465-2687 in Juneau if you have any questions or comments.

Sincerely,

Greg Capito

Dear Mr. Capito:

Please forgive the extended delay in responding to your letter of March 29, 1977 requesting our input in the Southeast community selection for your village safe water project.

Judging from our past community profiles, personal evaluations and on-site visits, it has been determined that the villages of Tenakee and Kasaan are in most need of your services. These two Southeast villages lack adequate water facilities for their everyday needs. It is also my understanding that the PHS has had very little, if any, involvement with these communities as far as constructing water facilities there.

I hope this information will assist you in the final selection process.

Again, forgive the delay, I did not receive your letter until a few days ago.

Sincerely,

Archie Cavanaugh

Juneau, Alaska 99811

Dear Greg:

This letter is in response to your letter dated February 18, 1977 regarding the Village Safe Water Act.

The village we would like to submit for the program is Kobuk. At the present time it has no city water or sewage system. This leaves the residents of Kobuk without any means of showering, washing clothes and sewage treatment; all of which are considered vital in the maintenance of adequate health standards.

Due to being located near a large deposit of bornite and other minerals Kobuk is expected to grow in the forseeable future, making it even more imperative that a safe-adequate water-sewage treatment system be installed.

The village of Kobuk is interested in option three of the Village Safe Water Act.

Sincerely,

MAUNELUK ASSOCIATION

Dear Greg:

Thank you for your letter of February 18, 1977 and your presentation to the Association of Regional Health Directors on February 24, 1977.

Herewith is the information you requested:

We have only three villages in the Chugach Region: English Bay, Port Graham, and Tatitlek. All of these have Public Health Service water and sewer systems which, though in need of improvement, are basically adequate in comparison to other villages. It appears, therefore, that none of our villages fit the conditions of, or are in need of, the Village Safe Water Program.

I wish you well in your efforts to administer and plan this program in the direct and forthright manner you have demonstrated in the past.

Sincerely,

Gregg Brelsford
Health Director

Dear Greg:

RE: Rural VSW Selections

This is in answer to assist you select a village in our area most in need of a VSW project.

During the Native Health Board meeting last week, I presented your request to the Board members. I also made a short explanation of the project to be involved. The Board selected the following villages but not prioritized. They said for you to prioritize and make the selection after you have made the field observations.

Eek	population:	199
Newtok		152
Kipnuk		324
Sheldons Point		138

All of the above are in need of a VSW project. When you have decided to travel to the above villages, let me know and I will be glad to travel with you to act as an interpreter. When we get to those villages we will be able to get all the information necessary for both our offices and also for your selection.

The Native Health Board was pleased you requested their assistance in the selection of a village, especially to help improve the health needs of the villages.

Sincerely,

Peter C. Phillip
Community Liaison

JAY S. HAMMOND, GOVERNOR

POUCH O — JUNEAU 99811

April 19, 1977

Mr. Bob Worl, Executive Director
NORTH SLOPE BOROUGH HEALTH
DEPARTMENT
P.O. Box 69
Barrow, Alaska 99723

Dear Bob:

RE: Rural Sanitation

The Village Safe Water (VSW) program will construct two or three new sanitation facilities this year in rural Alaskan communities. At an April 13 meeting in Kotzebue, the Association of Regional Health Directors, (ARHD), acting as the VSW advisory board, prioritized a list of eight rural villages. A summary of the group's recommendations follows:

REGIONAL HEALTH CORP.	VILLAGE	ARHD PRIORITY
Norton Sound Health Corp.	Council	1
Tanana Chiefs Health Authority	Tanana	2
Bristol Bay Health Authority	Pilot Point	3
North Slope Borough Health Dept.	Nuiqsut	4
Cook Inlet Native Association	Ninilchik	5
Copper River Health Dept.	Mentasta	6
Yukon-Kuskokwim Health Dept.	Nightmute	7
Maneluk Association	Kobuk	8

The prioritization process was done by examining background data, including information relating to the difficulty each village faces in obtaining a reliable source of clean water. This information was then placed in perspective by evaluating each community's prospects for sanitation improvements. For example, Council was placed at the top of the list because of the village's undeveloped source of supply and there were no improvements planned. In contrast, Kobuk, also with an undeveloped source, was placed at the bottom of the priority list because the Public Health Service has immediate plans to construct a sanitation system under provisions of the Indian Health Care Improvement Act, P.L. 94-437.

Tanana and Pilot Point were placed 2 and 3 on the priority list. The Village of Tanana uses groundwater with a high iron content. It was also pointed out that this village of nearly 500 people may not receive a PHS project until FY 80 or 81. Pilot Point has a difficult water supply problem with a tundra lake as the source. Prospects of a PHS project for Pilot Point appear dim until FY 79.

The advisory group carefully deliberated the existing health problem in the Village of Ninilchik. Here, the source of supply contains bacterial contamination during much of each year. The board placed Ninilchik number four on the priority list and petitioned appropriate federal and state agencies to investigate the health problem and take appropriate action to correct the immediate health hazard. To address the long term sanitation needs of Ninilchik, the board recommended that scheduled improvements for the village planned by PHS for FY 80, be accelerated to protect the health and welfare of residents and tourists.

Nuiqsut, Mentasta and Nightmute were recognized as villages with water supply problems. However, PHS project planning for these communities is scheduled to begin by FY 77 or 78.

The advisory board also considered prioritizing Kassan, a late entry submitted by the S.E. Alaska Regional Health Corporation. But since the board felt Kassan would not displace the top three villages, there was no need to consider them this year.

Now that the prioritization process is completed, the Dept. of Environmental Conservation, working through the appropriate Regional Health Corporations, will contact the top 2 or 3 villages. This will be done to determine what type of facilities the people in these communities would like, and the technical and economic feasibility of constructing, operating and maintaining these systems.

In order to keep the board advised on the candidate selection process, written reports will be mailed to each member of the ARHD. An update could also be presented at the next regularly scheduled Association meeting, if the organization so desires.

Thank you for your active participation in the candidate selection process. We welcome your increased involvement in the VSW program.

Sincerely yours,

Greg

Gregory Capito
Senior Planner
Village Safe Water

The Water Programs Division is responsible for conserving and enhancing the state's marine and fresh water environment. Activities include control of liquid waste discharges, surveillance of water quality, management of the state/federal water supply and sewage treatment facility construction program and provision of safe water facilities and supplies.

The fiscal 1976 budget appropriation is almost $1.2-million, including $167,000 in federal funds, while the staff includes 24 full-time and two part-time employees. An additional full-time position has been requested by the Department of Environmental Conservation for fiscal 1977.

Responsibilities in the Terrestrial Programs Division encompass evaluating the environmental impact of development activities on the state's land and air resources. Activities include regulation of air pollution, solid waste management, control of hazardous substances and review of development activities in permafrost rich areas.

The fiscal 1976 budget appropriation is approximately $569,000 including $190,000 in federal funds and covers a staff of 14. A reduction of three positions is anticipated in the fiscal 1977 budget request.

The Program Coordination Division develops broad environmental plans to ensure consistency in department actions, coordinate all permit activity and monitor the development of federal and state regulations. It has commenced preparation of a comprehensive environmental plan for the state.

The fiscal 1976 budget appropriation is $235,000 including almost $67,000 in federal funds. There are four employees and a request for an additional position has been made for fiscal 1977.

A full range of administration and technical support activities is provided to the department through the Management Services Division. It is also the main administrative contact with other state agencies. The fiscal 1976 budget appropriation is approximately $793,000 including almost $120,000 in federal funds. There are 24 employees and a request has been made for two additional positions in fiscal 1977.

A liaison activity in the department employs nine people with a fiscal 1976 budget appropriation of $461,000. A request has been made for an additional five employees in fiscal 1977 although only five of the nine positions now authorized are filled.

Evaluation

The department operates at a highly efficient level. However, its activities are duplicated by other state agencies in several instances. In some cases, current staff is not adequate to handle existing work loads and questions of construction policy have been raised in regard to the ability of local villages to operate and maintain certain types of facilities.

Recommendations

254. Discontinue construction of village safe water projects.

The village safe water program is financed completely by the state and there is substantial concern about its effectiveness. The program applies to villages with population ranges of from 25 to 600 persons. Approximately $5-million has been spent to complete eight projects and three more are scheduled.

February 18, 1977

William Dann, Executive Director
NORTON SOUND HEALTH CORPORATION
P.O. Box 966
Nome, Alaska 99762

Dear William:

RE: Rural Sanitation

Please recall the recent meetings with you or your staff concerning two or three Village Safe Water (VSW) Facilities to be built this year in Alaska Native villages. As discussed earlier, we would like you to help us select a village in your area most in need of a VSW project.

Since 1970, the Department of Environmental Conservation has sponsored construction of nine VSW facilities. Hence, we have some experience to share with you that might help in selecting a village.

First of all, remember that we build central facilities where people come to get water, deposit waste, bathe and do laundry; as opposed to piped water and sewer service to each house usually installed by the U.S. Public Health Service. Physical features are important in deciding whether a piped system or central facility is appropriate. For example, ice-rich permafrost or swampy terrian make it technically and economically difficult to construct a conventional piped system. Also, in a village spread out along both sides of the river, a piped system may be too difficult and expensive to install. Therefore, villages in your region which possess these types of physical characteristics may be better suited for a centralized VSW system.

To minimize duplication of effort, please do not consider those villages in your region which have received, or are likely to receive, HUD housing and thus PHS water and sewer systems. Also, please note that a VSW facility should not be constructed in a village where a PHS system already exists.

The size of the community is also important. The Village Safe Water Act, as it will probably be amended, defines "village" as an incorporated or unincorporated community which has between 25 and 600 people residing within a two mile radius.

Perhaps the single most important factor to consider is how a village obtains its water supply. For example, melting ice or collecting rain for drinking water is more inconvenient and unsafe than having a good quality, year round stream close by.

Finally, the interest or initiative a village has demonstrated in correcting or alleviating local waste disposal problems is another point to consider when selecting a candidate village.

Keep in mind that there is flexibility in the VSW program. If a facility providing less than all the services specified in the VSW act is desired by a village, the following options may be available: 1) A central watering point; 2) A central watering point plus a waste disposal plant or 3) Option (2) plus bathing and/or laundry services.

We hope that by the time each regional health organization completes the screening process and selects a village, the Association of Regional Health Directors or similar group will agree to act in an advisory capacity for the VSW program. This group will help us prioritize the villages selected, using the guidelines outlined above. Department of Environmental Conservation engineers will then conduct field investigations and on-site inspections of the top two or three villages and discuss the projects with village leaders. This way the top selections are either confirmed or rejected. If rejection occurs, the process is repeated with the next village on the list.

Before you begin the screening process, please read carefully the enclosed material. The Village Safe Water Act will clearly define the purpose, objectives and limitations of our program. The case studies report from the Northern Engineer will give you a better idea of the sanitation systems we've constructed in the past.

We look forward to your active participation in this selection process and to being advised of your choice by March 11. Please feel free to contact me at 465-2687 in Juneau if you have any questions or comments.

Sincerely,

Greg Capito

FROM: Gregory Capito GREG
Senior Planner
Village Safe Water

SUBJECT: V.S.W. Candidate Selection Process: Update

Two or three Village Safe Water facilities will be built this year in Native communities. In meetings and more recently in letters, we requested that each Native Health Corporation select a village most in need of a Village Safe Water project. An update of this selection process follows:

1. North Pacific Rim Health Department

   Gregg Brelsford indicated no candidate in his area because all villages are covered by PHS.

2. North Slope Borough Health Department

   Elise Patkotak says ~~Pt. Hope~~ Nuiqsut is the choice, telcon 3-14. TELCON 4-4-77;

3. Kodiak Area Native Health Authority

   Don Skaw - expect no letter from him as all 6 villages are covered by HUD/PHS.

4. Maneluk Association

   Chuck Green says Kobuk is the candiate village.

5. Southeast Alaska Regional Health Corporation

   Conrad Baines has yet to decide but Kasaan is likely candidate. S.E. area is heavily covered by HUD/PHS.

6. Norton Sound Health Corporation

   Ray Van Ostran says the Village of Council is the probable choice according to telcon 3-14. He must check with Bill Dann to confirm this selection.

7. Tanana Chiefs Health Authority

   Paul Sherry is acting Director. Five villages are under consideration but a candidate cannot be submitted until April 1 - because of staffing problems. He states that several communities like Circle would like to construct buildings which would serve as municipal centers as well as sanitation facilities. But additional matching funds are needed. He indicates that the Village Corporations could act as the construction contractor in this sort of an effort. I told him to put his idea on paper and explain it in greater detail.

TANANA — PERSONNEL CONTACT 4-1-77

8. Aleut/Pribilof Health Department

Marie Sipary says that because of PHS coverage no villages in her area qualify.

9. Bristol Bay Area Health Corporation

Robert Clark has not responded to the request. Planning officer Nancy Knoohuizen indicates she will bring it to his attention as soon as possible. Pilot Point TELCON 3-23-77

10. Cook Inlet Native Health Department

The staff of this Health Corporation is leaving and Dan Slaby formerly of T.C.C. is taking over in April. We should expect no response until then. NINILCHIK - TELCON 4-4-77.

11. Yukon-Kuskokwim Health Corporation

Alvin Ivanoff nominates Eek, Newtok and Kipnuk, and Sheldon's Point. They couldn't decide on just one. The Yukon Kuskokwim Health Corporation Board thought our method of selecting candidates is a good one. But Leon Moses of Chevak wondered what would happen if O & M funds ran out? He warned Board members to be cautious. NIGHTMUTE TELCON with Peter 4-6-77

12. Copper River Health Department

Still no candidate village received from Billy Peters. Attempts to obtain a response continue. MENTASTA - TELCON 4-4-77. with Billy

The Association of Regional Health Directors has agreed to act in an advisory capacity for the VSW program. This group will help us prioritize the candidate villages. The selection process will be probably completed this spring when Dept. of Environmental Conservation engineers conduct field investigations and on-site inspections of the top two or three villages and discuss the projects with village leaders.

Enclosure

April 19, 1977

Mr. William Dann, Executive Director
NORTON SOUND HEALTH CORP.
P.O. Box 966
Nome, Alaska 99762

Dear William:

RE: Rural Sanitation

The Village Safe Water (VSW) program will construct two or three new sanitation facilities this year in rural Alaskan communities. At an April 13 meeting in Kotzebue, the Association of Regional Health Directors, (ARHD), acting as the VSW advisory board, prioritized a list of eight rural villages. A summary of the group's recommendations follows:

REGIONAL HEALTH CORP.	VILLAGE	ARHD PRIORITY
Norton Sound Health Corp.	Council	1
Tanana Chiefs Health Authority	Tanana	2
Bristol Bay Health Authority	Pilot Point	3
North Slope Borough Health Dept.	Nuiqsut	4
Cook Inlet Native Association	Ninilchik	5
Copper River Health Dept.	Mentasta	6
Yukon-Kuskokwim Health Dept.	Nightmute	7
Maneluk Association	Kobuk	8

The prioritization process was done by examining background data, including information relating to the difficulty each village faces in obtaining a reliable source of clean water. This information was then placed in perspective by evaluating each community's prospects for sanitation improvements. For example, Council was placed at the top of the list because of the village's undeveloped source of supply and there were no improvements planned. In contrast, Kobuk, also with an undeveloped source, was placed at the bottom of the priority list because the Public Health Service has immediate plans to construct a sanitation system under provisions of the Indian Health Care Improvement Act, P.L. 94-437.

Tanana and Pilot Point were placed 2 and 3 on the priority list. The Village of Tanana uses groundwater with a high iron content. It was also pointed out that this village of nearly 500 people may not receive a PHS project until FY 80 or 81. Pilot Point has a difficult water supply problem with a tundra lake as the source. Prospects of a PHS project for Pilot Point appear dim until FY 79.

The advisory group carefully deliberated the existing health problem in the Village of Ninilchik. Here, the source of supply contains bacterial contamination during much of each year. The board placed Ninilchik number four on the priority list and petitioned appropriate federal and state agencies to investigate the health problem and take appropriate action to correct the immediate health hazard. To address the long term sanitation needs of Ninilchik, the board recommended that scheduled improvements for the village planned by PHS for FY 80, be accelerated to protect the health and welfare of residents and tourists.

Nuiqsut, Mentasta and Nightmute were recognized as villages with water supply problems. However, PHS project planning for these communities is scheduled to begin by FY 77 or 78.

The advisory board also considered prioritizing Kassan, a late entry submitted by the S.E. Alaska Regional Health Corporation. But since the board felt Kassan would not displace the top three villages, there was no need to consider them this year.

Now that the prioritization process is completed, the Dept. of Environmental Conservation, working through the appropriate Regional Health Corporations, will contact the top 2 or 3 villages. This will be done to determine what type of facilities the people in these communities would like, and the technical and economic feasibility of constructing, operating and maintaining these systems.

In order to keep the board advised on the candidate selection process, written reports will be mailed to each member of the ARHD. An update could also be presented at the next regularly scheduled Association meeting, if the organization so desires.

Thank you for your active participation in the candidate selection process. We welcome your increased involvement in the VSW program.

Sincerely yours,

Greg

Gregory Capito
Senior Planner
Village Safe Water

February 22, 1977

The Honorable Joe Orsini
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini:

In your letter dated February 11, 1977 you inquired about how our Village Safe Water design and construction contracts are awarded and administered. Enclosed is a copy of a report entitled, "The State of Alaska Village Safe Water Program" in which the short history of the VSW program is summarized. As you can see in the report, we have tried four different methods of constructing VSW projects in search of satisfactory projects at reasonable costs.

The first two projects (at Northway and Chevak) were small remodelling efforts, with design done by engineering consultants under contract with this Department, and construction done by typical competitive bid construction contracts administered by this Department.

Several Alaskan consulting firms were interviewed by our staff. Criteria evaluated included (no priority): experience in remote Alaska construction; sanitary engineering qualifications; capability to administer construction contracts; interest in working on small jobs (Consultant feew were about $7,000 to $10,000); and the department's long experience in reviewing and evaluating sewerage plans prepared by consulting engineers. CH2M/Hill, Alaska and Ellerbe, Alaska were selected to design these two projects.

These projects went quite well, although we faced the inflexibility of lump sum construction contracts, and we couldn't very well control the impact of the construction contractors on the villages.

The next three projects (at Selawik, Alakanuk and Nulato) were designed and built by typical State construction methods through the Division of Buildings. These projects were most unsatisfactory and expensive as is described in the enclosed report.

Being dissatisfied with the first five VSW projects, we resolved to try new methods of constructing facilities in Pitkas Point, Koyukuk and Beaver. We chose a combination of three-party design and construction management contracts among the Department, the villages, and engineering consultants. For each project there was a design contract followed by a separate construction management contract, with the same consulting firm involved in both contracts. Constrution was carried out by the villages, using the engineering consultants to manage construction activities and grant funds from this Department to pay the bills. This Department, with participation by the villages, directed the day to day activities of the consultants.

Consultants with a unique combination of talents were needed to carry out these last three projects. Especially important was competence and arctic experience in structural engineering, foundations, mechanical engineering, electrial egineering, sanitary engineering and construction management. We also wanted firms willing to work in an "extension of staff" role, since we wanted close control over development of the projects.

We were in a particularly advantageous position to evaluate consultants when these projects began because of 1) our dealings with consultants in the municipal construction grants program, and 2) our intimate involvement with about 15 consultants in reviewing water supply and waste disposal design they were doing for a massive rural school construction program.

As you can imagine, there were not any consulting firms in the State possessing fully all the attributes we were looking for. Sanitary engineering ability and construction management experience were the specialties most difficult to find, to say nothing of finding firms equally well qualified over the wide range of specialties needed. We finally selected three firms which, at that time, came closest to possessing the abilities we were looking for. They were CH2M/Hill, DOWL Engineers and R & M Consultants.

We wanted a different firm for each job to get a wide range of ideas on how to provide the services specified in the Village Safe Water Act. Unfortunately, CH2M ran into organizational problems a few months after they accepted the Koyukuk project, and the job had to be transferred to another firm. To minimize lost time and money in the transfer, we thought it best to have a firm with VSW experience complete the Koyukuk job. Since DOWL was nearing the end of the Pitkas Point VSW project, we asked them to finish the facility in Koyukuk.

The VSW projects in Pitkas Point, Koyukuk and Beaver have been much more satisfactory than the first five. They cost much less and were built much faster than they would have been if they were built by competitive bid construction contracts this Department and the villages had more control over how they were built, the villages were more involved in administering the projects, and village residents were the employees during construction.

There is, however, still room for improvement. There was some inefficiency due to the consultants' lack of experience with our construction methods. Also, the villages could be even more directly involved in managing their projects. For our latest project in Kongiganak, the village has contracted directly with their own consulting firm (C.E. West and Associates) for design and construction mangement (see enclosed copies of the design and construction management contracts).

The village has designated this Department as their representative to direct the consultant's work since communication from the village is difficult and the village lacks technical expertise.

We recommended C.E. West and Associates to Kogniganak because 1) Mr. West himself had experience with innovative construction management techniques while he was Public Works Director for Anchorage, 2) Ed Pohl, with good arctic experience and credentials, would do the sanitary engineering, 3) Mark Fryer, with the experience of having worked on the Beaver project would do the mechanical engineering, and 4) Mr. West had the experience of working on the Pitkas Point project during the short time he was with DOWL Engineers.

Once again, thank you for your continuing interest in the Village Safe Water program.

Sincerely yours,

Jonathan W. Scribner
Director
Division of Water Programs

Enclosures

bc: Jerry Sargent
Commissioner Mueller/w/cc of Orsini ltr
JWS:JmS:tl

January 18, 1977

Honorable Joseph L. Orsini
Alaska State Senate
Pouch Y
Juneau, Alaska 99811

Dear Senator Orsini:

I thourht it might be helpful to follow up the telephone conversation between Mr. Scribner of this Department and you concerning our proposed amendment to the Village Safe Water (VSW) Act.

The present law defines a "village" as an unincorporated community which has between 25 and 600 people residing within a two mile radius, or a second class city.

We feel this definition is antiquated and should be revised for the following reasons:

- Many small villages, for example, Selawik and Pelican, are now first class cities and would not qualify under the Act, although they otherwise might qualify for a VSW project.

- Second class cities larger than 600 population qualify under the present definition although VSW projects would not be appropriate solutions to sanitation problems in these communities.

To clarify what we understand to be the legislative intent of the VSW Act we have proposed to revise the definition of "village" to read:

> "village" means an incorporated or unincorporated community which has between 25 and 600 people residing within a two mile radius."

This definition would include some 200 communities in Alaska. Of these 200 there are perhaps 70 to 100 communities where a centralized VSW project would be appropriate - the remaining communities have some form of water and sewer service to individual homes or realistically could be

served by such systems. So far a total of eight VSW facilities have been completed or nearly completed under the Act. Funding is available for two or three more projects. At the present rate of funding we feel the program must concentrate on providing projects to communities where there is the greatest need for sanitation services and where there is active community interest in a project.

We have had occasional interest from "villages" along the major highway systems in the State but have not rated them high in priority because they already have access to many of the services available under the VSW Act. Given the present policy of solving the worst problems first, and the current funding rate, these communities may not be granted projects for many years. The proposed modifications would not change the likelihood of projects for these communities.

Please let me know if you would like further clarification on the effect of the proposed change. We appreciate your interest in the VSW program.

Sincerely,

Ernst W. Mueller
Commissioner

bc: Sargent

JWS/rs

July 20, 1977

DOWL Engineers
4040 "B" Street
Anchorage, Alaska 99503

Gentlemen:

The State of Alaska Village Safe Water program will soon be entering the initial design phase on two more central water and sewer facilities. The next two projects scheduled for design and construction are Council and Tanana.

Several consulting engineering firms have expressed strong interest in working on these projects in the past. My concern is the interest your consulting firm may have in working on either of the two new projects.

Work on this type of project demands a solid and diversified engineering background. Engineering skills which are mandatory for work on these projects include sanitary engineering, structural engineering, soils and foundation engineering, mechanical engineering and electrical engineering. In addition to the engineering expertise necessary for design of the project, it is also essential the consulting firm selected has an adequate knowledge of construction scheduling and management techniques pertinent to "bush" construction.

In the event you may not be very familiar with the VSW program, I shall briefly outline some of the major points of the program.

Initial contact with the community is made by ADEC. Through a series of meetings, the scope of the project is mutually agreed upon by the community and ADEC. At this point in time ADEC becomes the technical representative for the community and the consultant selection process is begun. When the consultant is selected, a representative of the consultant and a representative of ADEC travel to the community to begin collecting design data, and to establish liaison between the community and the consultant. The design phase of the project then progresses with periodic conceptual meetings among the concerned

parties. The design phase of the project ends when a set of final plans is produced and agreed to by ADEC and the community. A second end product of the design phase is a realistic cost estimate for the construction phase of the project.

Assuming the construction cost estimate is within budget limitations, a construction management contract is negotiated, and the construction phase of the project is begun. During the construction phase the consultant is responsible for all materials ordering and shipping, all project scheduling and logistics, and all actual construction activities. The facility itself is constructed to the maximum extent possible by people in the community working under the direct supervision of a construction technician hired and directed by the consultant. The consultant is further responsible for timely schedule estimates and periodic construction reports. During the final days of construction the consultant prepares a set of as-built plans and a comprehensive operations and maintenance manual, and instructs a locally hired operator in proper use of the same. Following a final inspection of the facility by all concerned parties, and the completion of a punch list, if any, the facility becomes the responsibility of the community and ADEC. The final task for the consultant is to prepare a complete construction analysis for ADEC and the community.

Should your firm be interested in working on one of these projects, I would appreciate it very much if you would send me your qualifications by August 12, 1977.

Should you wish further information on the program, or further clarification on the scope of work involved with these projects, please feel free to write me or call me at (907) 465-2636.

Sincerely,

Jordan Suhr

Impressions of Consultant Interviews
Council - Tanana - Selawik/Nulato - Chevak

① Waken Redbird & Asso. I talked with Mr. Redbird for an hour Aug. 29. Their firm was mainly into surveying on the pipeline but has since gotten into many govt. projects in the bush including a considerable amount of building design and inspection. They do have an electrical engineer & feel capable of handling lesser mechanical items. However, they don't have experience in sanitary and thought they would ask Ed Pohl to do that work.

Mr. Redbird questioned our construction management concept mainly because of the possibility of poor village cooperation with labor and the contract. I explained how things had worked in the past but it is a new concept to him.

They have very low key salesmanship (in contrast to Bomhoff, etc) but expressed a desire to do one or both of the new projects.

The main impression I got was that they will have to be convinced that the jobs can be done the way we say they can. They apparently have a big lack of experience dealing with bush shipping & scheduling and with working in a village with the villagers.

② Ellerbe-Alaska, Fairbanks - I spent a couple hours Sept. 1 with Les Rogers, ③ R. Gray & some of their technical help. The firm has a 21 year history of Alaskan work, much of it in the bush. They have design groups of architects, civil engineers (structural & utility) and mechanical / electrical engineers but lack ~~soils~~ extensive soils and sanitary capability. However, they apparently have a working relationship with Greg Jones who is a sanitary engineer

that left Dames & Moore to work for himself. They have asked Mr. Jones to contact me in Anch. Sept. 8.

Mr. Rogers expressed his worry that Fairbanks firms would not receive as much consideration for our jobs as Anchorage firms. I told him that if a Fairbanks firm appeared outstandingly suited we would try to consider them equally with Anchorage firms. He is aware of the logistics problems, however.

Their lead Mechanical Engr. seemed quite good at applying innovative thinking to bush facilities while maintaining simple operation. He also had some ideas on cost savings. In contrast to other engineers of his type, he worked his way up to a P.E. without a degree and seems to have a more practical view of things.

They are very interested in the jobs and I think they may be good for Council — especially if we decide to try some different power generation & sizing (wind).

③ Michael Baker, Jr. - Mr. William McMullen, the Alaska manager of the firm, and I spent 2 hours discussing our projects and their firm. Although most of their work has been pipeline soils and surveying work, they are quite interested in a project of ours.

Their firm has 1300 engineers & technicians around the world. So items that could not be handled in Fairbanks would be sent outside within the firm. Those items would be mech./elec. & sanitary.

The only experience they have which applies is that much of their in house book keeping for Alyeska was very similar to our construction bookkeeping. I guess they are also very good in soils exploration.

④ Philleo Engineering & Architectural - I spent 1 hour with Mr. E. Philleo, & Mr. H. Isberg, and Doug - ? . Doug is a young engineer working on his MSCE - Sanitary - at the University. He has had quite a little bush experience and worked with Dan Smith in Edmonton.

The firm is quite small and, consequently, has no electrical, mechanical, or soils expertise. They mentioned using Jim Lake for electrical and Crews Mc & Hoffman for mechanical. After hearing that last firm name I sort of wrote off Philleo.

The following are consultants both Jordan & I talked with. Therefore I will just discuss my main impressions of them.

Arctic Environmental Engineers - They sure talk a convincing story of bush experience, innovative design, and keeping the facilities managable. Apparently their clients have been well satisfied. Their all around experience fits our jobs very well and most all of Tanana and Council could be done in house with the exception of soils work.

Wince - Corthell - What a pair. First impression tells me that here is one guy that is ideal for us and one that should sell used cars. But I've been wrong on more ~~th~~ first impressions than I will admit. Several years ago I heard some good gossip about Allan Corthell and people apparently still think that way. The firm is quite small but they have a lot of bush experience - both design and working with villagers.

Tryck Nyman Hayes - I wish I had paid more attention to gossip about this firm. Seems like everyone has something political to say about them at one time or another. They do have similar experience and some very good personnel that we met.

DOWL - They've had a few of our jobs and I'm all for trying someone new. However, there is something to say for sticking with a good thing. I would like to see rough design proposals from 3 firms, including DOWL, before making the Tanana selection.

Bomhoff & Asso. – I can foresee the R&M problem here of being 3rd or 4th on their importance scale once the project is started. I would feel allright about using them but I think we have better, untried choices.

Ted Forsi & Asso. – This firm was hard for me to gage. They are certainly young and energetic but lack the expertise for an involved project like Tanana. Much of that job would be farmed out. However, they do have bush experience and might be ideal for Council.

R&M – One man does not a firm make! And I'm not sure the one man is an ideal match for Tanana or Council. The previous lack of importance given our job, lack of communication, lack of clean construction, and lack of PR in the village convinces me we don't want to try them again.

The Big Selections.

Using a rating of 3 = excellent (recommended) 2 = good (consider later) 1 = fair (keep in mind) I will list only those firms I consider qualified for our jobs. In each case see my above discussion of the firm.

Tanana

3 - DOWL - I know exactly what they are capable of. See my dollar idea on page ④.

3 - One of the firms Jordan saw without me might be good. ?

2½ - Tryck Nyman Hayes - Maybe they would be excellent. Or maybe we could end up low on their list of importance.

1 - Arctic Environmental - I don't think this is the job to try them out on. I've heard pro & con on the firm and I don't want to get surprised on a job this size.

Council

3 - Hillerbe - Council wouldn't take as much plan review, etc. and I would like to try their engineers.

3 - Wince-Corthell - I think they would try hard to work <u>with</u> us and the village.

2 - Ted Forsi - Their youth might mean ~~might not be~~ very conscientous work.

1 - Philleo - This firm might be too used to typical State work for our jobs.

Selawik / Nulato

3 - Arctic Environmental - I think they have just the right combination of sanitary engineering and innovative gut engineering for these modifications. I know we want to try this firm and I think this is the place instead of Tanana.

2 - R&M - I'm not all that impressed with Dan Smith's ability to modify an existing plant. I think he would rather add on than use what's there. And I sure am not impressed with the rest of the firm. With direction, however, Dan could very well surprise me.

2 - Quadra - I talked with Ed once about these modifications and he had a few interesting ideas.

Chevak

3 Quadra - I think John would give us the best attack at this difficult problem.

1 R&M - Their only advantage is that they have a lot of pipeline planting experience.

Attn: George Davidson

Dear Mr. Davidson:

In July of this year I wrote a letter concerning the construction of Village Safe Water projects in the communities of Tanana and Council. Your consulting firm expressed interest in working on one or both of these projects.

Since early August this Department has been reviewing the credentials of all consulting firms that expressed interest in the program. Someone directly associated with the Village Safe Water program has had personal contact with all interested firms. In many cases I personally visited with members of the firm.

I was very surprised, and pleased, to receive nearly twenty responses to my letter, although the number of responses mandated a more thorough and exhaustive selection process than I had originally envisioned. Finally this past week we made the actual consultant selections, and unfortunately I must inform you that your firm was not selected to work at either Tanana or Council. This is certainly no reflection on the qualifications or capabilities of your personnel. Selecting the consultants to work on these projects was a very difficult task indeed. Nearly all firms interviewed had outstanding qualifications, as well as a wide range of experience on similar projects. I could only wish that we had more projects.

I sincerely hope that you will continue your interest in the Village Safe Water program. I am hopeful that we will have more construction projects in the future, and that at such time you will again be interested in working with us.

Thank you for your cooperation in our consultant selections.

Sincerely,

Jordan Suhr

Someone directly associated with the Village Safe Water program has had personal contact with all interested firms. In many cases I personally visited with members of the firm.

I was very surprised, and pleased, to receive nearly twenty responses to my letter, although the number of responses mandated a more thorough and exhaustive selection process than I had originally envisioned. Finally the past week we made the actual consultant selections, and unfortunately I must inform you that your firm was not selected to work at either Tanana or Council. This is certainly no reflection on the qualifications or capabilities of your personnel. Selecting the consultants to work on these projects was a very difficult task indeed. Nearly all firms interviewed had outstanding qualifications, as well as a wide range of experience on similar projects. I could only wish that we had more projects.

I sincerely hope that you will continue your interest in the Village Safe Water program. I am hopeful that we will have more construction projects in the future, and that at such time you will again be interested in working with us.

Thank you for your cooperation in our consultant selections.

Sincerely,

Jordan Suhr
Sanitary Engineer
Village Safe Water

ARTICLES OF INCORPORATION

OF

COUNCIL SAFEWATER CORPORATION

We, the undersigned natural persons of the age of nineteen years or more, acting as incorporators of a corporation under the Alaska Nonprofit Corporation Act, adopt the following Articles of Incorporation for such Corporation:

ARTICLE I

The name of the Corporation shall be: Council Safe Water Corporation.

ARTICLE II

The period of duration: Perpetual (see Article IV, number 1).

ARTICLE III

The purpose for which this Corporation is organized are to engage in construction, ownership, and management of a sanitation facility to be built in Council as authorized by the State of Alaska Village Safe Water Act (AS 46.07).

ARTICLE IV

Provisions, not inconsistent with law, which the incorporators elect to set out in the Article of Incorporation for the regulation of the internal affairs of the Corporation, including provision for distribution of assets on dissolution or final liquidation:

1. The Council Safe Water Corporation is organized to construct, own, and manage a Village Safe Water (VSW) facility in Council as called for in Paragraph C, Section 46.07.050, at such time as the Village might incorporate, the newly incorporated City will assume the powers and duties of this Corporation; whereupon this Corporation will commence action for voluntary dissolution.

ARTICLE VII

The names and addresses of the incorporator(s) of the Corporation are as follows:

Max Gray	Council, Alaska
Darlene Tetlow	Council Alaska
Don D. Tetlow	Council AK 99790

IN WITNESS WHEREOF, we have executed these Article of Incorporation this 14 day of September, 1977.

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

POUCH O – JUNEAU 99811

October 4, 1977

Mr. Jake Titus
Board Chairman
Council Safewater Corporation
Council, Alaska

Dear Mr. Titus:

Governor Jay Hammond has asked me to convey his pleasure in advising you that Council has qualified to receive a grant, through the Village Safe Water (VSW) Program, for design of a central sanitation facility. As we understand your desires, the facility is to include a safe and dependable year round water supply and a central waste disposal area.

When the design is complete, we anticipate offering you a second grant, as funds become available, for actual construction costs for the facility.

Acceptance of this design grant is subject to the following grant conditions.

1) Council Safewater Corporation (hereafter called the Corporation) will retain a consulting engineering firm licensed to do business in Alaska, to design the Council VSW facility. In previous discussions, we understand the Corporation is selecting Ellerbe Alaska as the consulting design firm.

2) The Corporation will enter into a design contract with the consulting engineering firm selected in item (1) above, specifying the engineering planning and review requirements of the consultant. ADEC will assist the Corporation in preparing the contract, and it must be approved by the ADEC before being signed by the Corporation. Under the design grant, VSW funds will be used by the Corporation to pay expenses specified in the contract. Funds will be accounted for and disbursed in accordance with provisions of the design contract. Additional reasonable accounting requirements may be established during the life of the project.

3) If a VSW construction grant is offered to the Corporation, the Corporation will retain a consulting engineering firm licensed to do business in Alaska to manage construction of the VSW facility. ADEC will assist the Corporation in selecting the consulting construction management firm. The Corporation will enter into a construction management contract with the consulting engineering firm so selected specifying the construction management requirements of the consultant. ADEC will assist the Corporation in preparing the construction management contract, and that contract must be approved by ADEC before it is signed by the Corporation. Under the construction grant VSW funds will be used by the Corporation to pay construction expenses approved by ADEC as specified in the construction management contract.

4) The Corporation will establish and maintain a separate bank account into which all VSW design grant funds will be deposited, and out of which all VSW design expenses will be paid. If a VSW construction grant is offered to the Corporation, all construction grant funds will be deposited in the same account and used only for actual construction expenses. No other funds will be deposited in the VSW account without prior approval by ADEC.

5) Upon completion of the Village Safe Water facility to the satisfaction of the Corporation and according to the technical requirements of ADEC the Corporation agrees to make every reasonable effort to provide for its continued operation and maintenance.

If you wish to accept this Village Safe Water design grant offer subject to the above grant conditions, please so indicate by appropriate signatures at the end of this letter. If you have questions about the grant or wish to suggest any changes please inform me immediately.

I am very pleased at the prospect of the construction of improved health and sanitation facilities for the citizens of Council.

Sincerely,

Ernst W. Mueller
Commissioner

Board Chairman, Council Safewater Corporation

CONTRACT TO PROVIDE ENGINEERING SERVICES FOR
A VILLAGE SAFE WATER FACILITY IN COUNCIL, ALASKA

This contract between the Council Safewater Corporation (hereafter called the Corporation), and Ellerbe Alaska (hereafter called the Contractor);

WITNESSETH that:

This contract is entered into by direct negotiation and is a contract for professional services; and

The Contractor is willing to undertake performance of this contract under the terms of the contract.

NOW THEREFORE, the parties hereto agree as follows:

Article 1. The Service to be Performed

The Contractor will provide all necessary engineering services for a project generally described as a Village Safe Water (VSW) sanitation facility construction project in Council, Alaska.

Specific services the Contractor agrees to furnish are as follows:

1. Do all necessary engineering planning, field investigation, and design for a VSW facility in Council, Alaska, including collecting adequate site data, investigating land ownership and providing for required access, and designing economical facilities to adequately provide a water supply and waste disposal in Council.

2. Meet with the Corporation and the Corporation's designated representative as reasonably required by the Corporation's designated representative to establish the scope of the VSW project and review progress of the project.

3. Prepare engineering plans and a materials list for the Council VSW facility. The plans and materials list are to be sufficient to guide construction of the facility and ordering of necessary materials; and to be subject to the review and approval of the Corporation and the Corporation's designated representative.

The activities and functions required of the Contractor to supply the services described in items (1), (2) and (3) of this Article I are the following:

A. Project Definition--meetings between the Corporation's designated representative and the Contractor as reasonably required by the Corporation's designated representative to supply the Contractor with information and instructions pertinent to the project.

B. Data Collection and Review--collection and review by the Contractor of all pertinent published and unpublished data available on Council and community facilities. This activity will be performed prior to the meetings described in item (A) above.

C. Project Reconnaissance--trips to Council by members of the Contractor's staff as reasonably required by the Corporation's designated representative to gain familiarity with the village, its people and local resources.

D. Soils and Surveying--the Contractor will send men and equipment to Council to gather all soils and topographic data necessary for designing the [illegible] facility. The Contractor will also provide for all materials testing and data analysis required for design of the Council [illegible] facility.

E. Conceptual Design--the Contractor, the Corporation and the Corporation's designated representative will come to written agreement on a Conceptual Design which will indicate the general methods for providing the services to be included in the Council VSW facility. The Conceptual Design will be represented in flow diagram and narrative form.

F. Preliminary Design--when the Contractor, the Corporation and the Corporation's designated representative have agreed to a Conceptual Design, the Contractor will prepare a detailed design of a complete VSW facility to achieve the functions described in the Conceptual Design. Included with the Preliminary Design will be an estimate of construction costs for the facilities designed, and an estimate of annual operations and maintenance costs for the facilities designed. The design data and cost estimates will be presented in a standard engineering drawing and narrative form which will allow the Corporation and the Corporation's designated representative to review all design details typically required in a finished engineering design will be represented in this Preliminary Design, although not necessarily in final draft form.

G. Final Design--when the Corporation and the Corporation's designated representative have reviewed the Preliminary Design and cost estimates, and made recommendations for alterations (if any), the Contractor will amend the Preliminary Design to accommodate those alterations. If any alterations to the Preliminary Design which constitute a change in the Conceptual Design are required by the Corporation and the Corporation's designated representative, such alterations will be considered outside the scope of work of this contract and eligible for added compensation at the rates shown in Appendix A. The Final Design and cost estimates will be presented in complete engineering drawings and include any narrative required for clarity. A complete materials list will be prepared as part of the Final Design.

H. Review of Project Progress with the Corporation's Designated Representative--the Contractor accepts responsibility for keeping the Corporation's designated respresentative apprised of progress on the activities required by this contract. Among the review sessions will be meetings between the Corporation's designated representative and the Contractor:

1) following Project Reconnaissance and Soils and Surveying data collection and analysis (items C and D above)

2) to review the Conceptual Design (item E above)

3) to review the Preliminary Design (item F above)

4) to review the Final Design (item G above).

Article II. Evaluation of Performance

The Corporation's designated representative will monitor all work done by the Contractor on the Council VSW project. No payment will be made to the Contractor under this contract until the Corporation and the Corporations designated representative agree the Contractor's performance is consistent with the terms of this contract.

Article III. Performance Period

The period of performance under this contract shall begin on the date of signing by the Contractor. All performance required of the Contractor under this contract will be completed by June 30, 1978. The Contractor may be paid for his work on the Council VSW project performed prior to the beginning date of this contract, if such payment is approved by the Corporation's designated representative.

1) following Project Reconnaissance and Soils and Surveying data collection and analysis (items C and D above)

2) to review the Conceptual Design (item E above)

3) to review the Preliminary Design (item F above)

4) to review the Final Design (item G above).

Article II Evaluation of Performance

The Corporation's designated representative will monitor all work done by the Contractor on the Council VSW project. No payment will be made to the Contractor under this contract until the Corporation and the Corporations designated representative agree the Contractor's performance is consistent with the terms of this contract.

Article III. Performance Period

The period of performance under this contract shall begin on the date of signing by the Contractor. All performance required of the Contractor under this contract will be completed by June 30, 1978. The Contractor may be paid for his work on the Council VSW project performed prior to the beginning date of this contract, if such payment is approved by the Corporation's designated representative.

Article IV. Consideration.

A. General Compensation.

For all costs up to a total of $20,000.00 associated with fulfilling the terms of this contract and not specifically covered elsewhere in this contract, the Contractor will be reimbursed by the Corporation as follows:

1. Engineering and Office Personnel--engineering and office personnel shall be compensated at the appropriate rates from the fee schedule in Appendix A which is attached to and is made a part of this contract.

2. Other Expenses--for direct expenses not covered by item (1) above, compensation shall be at the appropriate rates shown in Appendix A.

B. Special Compensation.

1. Field Activities--when the Contractor's personnel and equipment are in, or enroute to, Council, or otherwise involved in field activities called for by this contract, reimbursement to the Contractor for his personnel and equipment shall be at the appropriate

rates shown in Appendix A. This reimbursement shall not be part of the $20,000.00 limit set in paragraph A of this Article IV. All travel, transporation, and other arrangements for performance of field activities called for by this contract must have the approval of the Corporation's designated representative prior to the actual travel, transport and/or other field activities.

2. Transportation, Meals and Lodging--for all travel, transportation, and other field activity related costs authorized by the Corporation's designated representative for fulfilling this contract and not covered by item B-1 above, the Contractor will be reimbursed by the Corporation at actual invoice cost. This reimbursement shall not be a part of the $20,000.00 limit set in paragraph A of this Article IV.

Article V. Payment

The Contractor will be compensated by the Corporation in the amounts specified in Article IV of this contract. The Contractor will keep detailed cost records to be submitted with, and serve as justification for, monthly payment requests. The monthly payment requests will be made to the Corporation's designated representative. After reviewing a monthly payment request, the Corporation's designated representative will notify the Contractor in writing of the amount of the payment request approved for payment. The contractor will then prepare a check to himself, using check blanks provided by the Corporation for drawing on the Corporation's bank account, in the amount approved by the Corporation's designated representative. The Contractor will then send the prepared check to the Corporation for signature, after which the Corporation will return the signed check to the Contractor. Any payment made to the Contractor under this contract not approved in writing by the Corporation's designated representative constitutes a breach of this contract, and any such payments must be refunded by the Contractor to the Corporation.

Article VI. Successors and Assigns

This contract shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

Article VIII. Additional Contract Provisions

In signing this contract, the Contractor agrees in good faith to being desirous of, and willing and able to, undertake total management of construction of the VSW facility dealt with in this contract, provided acceptable terms for doing so can be arrived at between the Contractor and the Corporation.

Appendix B attached hereto and made a part hereof sets forth additional general provisions of this contract.

Appendix C attached hereto and made a part hereof is a general outline of the scope of work called for by this contract. It is included only as a guide for the Contractor and is not an all-inclusive specification of contract requirements. Article 1 of this contract is the governing specification of the services required of the Contractor.

IN WITNESS WHEREOF, the parties have executed this contract:

PROFESSIONAL FEES

HOURLY RATES

ARCHITECTURAL AND ENGINEERING SERVICES

SEPTEMBER 1977

Personnel Category	Hourly Rate
Principal	$ 55.00
Professional Employee	$ 50.00
Technical Employee III	$ 41.50
Technical Employee II	$ 31.00
Technical Employee I	$ 24.00
Clerical II	$ 22.00
Clerical I	$ 19.00
Consultation, Brief	$ 75.00
Court Appearances and Testimony	$ 75.00 hour (minimum $300.00)

Consultants, Sub-Contract Services and Materials

Except where other arrangements have been established, all authorized services of consultants, sub-contract services, and reimbursable materials and expenses will be billed at actual cost plus ten percent.

Travel and Per Diem Reimbursement

Except where other arrangements have been established, all expenses of authorized travel will be billed at actual cost. If per diem schedules are included in the professional services contract they will be used in place of the actual cost basis. When use of private aircraft is authorized, billing will be on the basis of reimbursement at cost. Cost basis for the aircraft typically used is established as follows:

PA-23	$ 60.00 per hour
PA-12	$ 25.00 per hour

APPENDIX B

Article B-1. Inspection and Reports

A. The Corporation's designated representative shall have the right to inspect, in such manner and at all reasonable times as it deems appropriate, all activities of the Contractor arising in the course of its undertakings under this contract.

B. The Contractor shall report his progress in such manner and at such times as the Corporation's designated representative may reasonably require.

Article B-2. Corporation Saved Harmless

The Contractor shall hold and save the Corporation, its officers, agents and employees harmless from liability of any nature or kind, including costs and expenses of or on account of any or all suits or damages of any character whatsoever resulting from injuries or damages sustained by any person or persons or property by virtue of any wrongful act or omission of the Contractor not specifically directed by the Corporation, its the Corporation's duly authorized agents, or the Corporations designated representative.

APPENDIX B

Article B-1. Inspection and Reports

A. The Corporation's designated representative shall have the right to inspect, in such manner and at all reasonable times as it deems appropriate, all activities of the Contractor arising in the course of its undertakings under this contract.

B. The Contractor shall report his progress in such manner and at such times as the Corporation's designated representative may reasonably require.

Article B-2. Corporation Saved Harmless

The Contractor shall hold and save the Corporation, its officers, agents and employees harmless from liability of any nature or kind, including costs and expenses of or on account of any or all suits or damages of any character whatsoever resulting from injuries or damages sustained by any person or persons or property by virtue of any wrongful act or omission of the Contractor not specifically directed by the Corporation, its the Corporation's duly authorized agents, or the Corporations designated representative.

Article B-3. Equal Employment Opportunity.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age or sex. The Contractor will take affirmative action to insure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, national origin, ancestry, age, or sex. Such action shall include but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruiting advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

B. The Contractor agrees that he will fully cooperate with the offfice or agency of the State of Alaska which seeks to deal with the problem of unlawful or invidious discrimination, and with all other State efforts to guarantee fair employment practices under this contract, and said Contractor will comply promptly with all requests and directions from the State Commission for Human Rights or any of its officers or agents relating to prevention of discriminatory employment practice.

C. Full cooperation as expressed in clause (B) foregoing shall include, but not be limited to, being a witness in any proceeding involving questions of unlawful or invidious discrimination if such is deemed necessary by any offical or agency of the State of Alaska, permitting employees of said Contractor to be witnesses or complaintents in any proceeding involving questions of unlawful or invidious discrimination, if such is deemed necessary by any offical or agency of the State of Alaska, participating in meetings, submitting periodic reports on the equal employment aspects of present and future employment, assisting in inspection of the construction site, and promptly complying with all State directives deemed essential by any office or agency of the State of Alaska to insure compliance with all Federal and State laws, regulations, and policies pertaining to the prevention of discriminatory employment practices.

Article B-4. Disputes.

A. Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Commissioner of the Alaska Department of Environmental Conservation (hereafter called the Commissioner) who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Contractor. The decision of the Commissioner or his duly authorized representative

shall be final and conclusive unless, within 30 days from the date of receipt of such copy, the Contractor mails or otherwise furnishes to the Commissioner a written appeal. The decision of the Commissioner or his duly authorized representative for the determination of such appeal shall be final and conclusive. This provision shall not be pleaded in any suit involving a question of fact arising under this contract as limiting judicial review of any such decision to cases where fraud by such official or his representative or board is alleged: Provided, however, that any such decision shall be final and conclusive unless the same is fraudulent or capricious or arbitrary or so grossly erroneous as necessarily to imply bad faith or is not supported by substantial evidence. In connection with any appeal proceeding under this clause, the Contractor shall be afforded an opportunity to be heard and to offer evidence in support of his appeal. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Commissioner's decision.

B. This Disputes clause does not preclude consideration of questions of law in connection with decisions provided for in paragraph (A) above. Nothing in this contract, however, shall be construed as making final the decision of any administrative official, representative or board on a question of law.

Article 5-5. Termination.

The Corporation's designated representative may, by written notice, terminate this contract in whole or in part, when it is in the best interest of the Corporation. The Corporation shall be liable only for payment in accordance with the payment provisions of this contract for services rendered prior to the effective date of termination.

Article 5-6. No Assignment.

The Contractor shall not assign this contract, nor any part thereof, nor any right to any of the monies to be paid him hereunder, nor shall any part of the work done or material furnished under said contract be sublet, except with the written consent of the Corporation's designated representative.

Article 5-7. No Additional Work.

No claim for additional services, not specifically herein provided, done or furnished by the Contractor, will be allowed, nor shall the Contractor do any work or furnish any material not covered by the contract unless such work is ordered in writing by the Corporation's designated representative.

Article 5-8. Independent Contractor.

The Contractor, and his agents and employees of the Contractor, shall act in an independent capacity and not as officers of employees or agents of the Corporation in the performance of this contract.

Article B-9. Availability of Appropriation.

This agreement is subject to the availability of Village Safe Water grant funds under AS 46.07.

Article B-10. Requirement for Alaska Business License.

It is understood and agreed that if an Alaska Business License is required under Alaska Statutes 43.70 the Contractor is now in possession of the same or, in the event he does not now have a license, he will apply for same to the Commissioner of Revenue, Pouch SA, Juneau, Alaska 99801 within 30 days following the effective date of this contract.

Article B-11. Conformity with Federal Regulations.

Not withstanding any other provisions of this contract, it is expressly understood that during any wage/price freeze imposed by Executive Order or Federal legislation the rates paid will be determined in accordance with federal guidelines.

No retroactive payment will be made at the termination of the wage/price freeze unless such payment is consistent with federal guidelines.

Article B-12. Payment of Taxes.

As a condition of performance of this contract, the Contractor shall pay all Federal, State, and local taxes incurred by the Contractor, sub-contractor or other person or persons in the performance of this contract, and the Corporation may require proof of payment of these taxes as a condition precedent to payment by the Corporation under this contract.

Article B-13. Ownership of Documents.

All plans, drawings and specifications, originals and tracings, shall become the property of the Corporation, whether the facilities for which they are made be commenced or not. All field notes shall be kept in new hard cover field books and will be retained by the City at the completion of the project.

Article B-14. Corporation's Designated Representative.

For the purposes of this contract, the Corporation's Designated Representative is the Alaska Department of Environmental Conservation.

APPENDIX C

I. Project Start

A. Time with the Corporation's designated representative to obtain what the Corporation's designated representative has on:

1) Demography
2) Goals and Objectives
3) Design Criteria
4) Influent Parameters
5) Water Supply Alternatives and Source
6) Waste Water Alternatives
7) Building Site
8) Building Uses

B. Data Collection and Review

II. Reconnaissance--1st trip to village

A. Get acquainted with people
B. Review with local people the preliminary information developed in (1) above
C. Get overview of local resources (generally the physical facilities, power availability, accommodations, etc.)
D. Probably soil investigation and well site (or other water source) selection

III. Review by Corporation's designated representative

A. Review information developed in (I) above in light of experience in (II) above.

B. Take account of any engineering and soils information arising from (II) above.

IV. Field Survey--2nd trip to village

A. Detailed topographic data for design

B. Additional soils information if needed

C. Explain final scope of project to local people

V. Review by Corporation's designated representative

Short meeting or discussion to consider any new factors which have arisen during (IV) above.

VI. Conceptual Design

General description of services and methods for the VSW facility, with written agreement among the Corporation, the Corporation's designated representative, and the Contractor.

A. Water Supply

1) Source development

2) Transmission system

3) Treatment

B. Waste Disposal

Mr Jake Titus
Board Chairman - Council
Safewater Corporation
Council, Alaska

Dear Mr. Titus:

Governor Jay Hammond has asked me to convey his pleasure in advising you that Council has qualified to receive a construction grant, through the Village Safe Water (VSW) program, to construct a VSW facility. The grant will be in the amount of actual construction costs for the VSW facility.

In a design grant agreement signed by the Council Safewater Corporation on October 25, 1977 (see copy enclosed), conditions were established for managing the construction grant herein offered. If you wish to accept this Village Safe Water grant, subject to the grant conditions previously agreed to, please indicate by appropriate signatures at the end of this letter. If you have questions about the grant or wish to suggest any changes, please inform me.

Sincerely,

Ernst Mueller, Commissioner
Department of Environmental
Conservation

CONTRACT TO PROVIDE FOR CONSTRUCTION MANAGEMENT
FOR A VILLAGE SAFE WATER FACILITY
IN COUNCIL, ALASKA

This contract between Council Safe Water Corporation (hereafter called the Corporation), and Ellerbe Alaska (hereafter called the Contractor);

WITNESSETH that:

This contract is entered into by direct negotiation and is a contract for professional services; and

The Contractor and the Corporation are willing to undertake performance of this contract under the terms of the contract:

NOW THEREFORE, the parties hereto agree as follows:

Article 1. The Service to be Performed.

The Contractor will provide all necessary engineering and construction management services for a project generally described as a Village Safe Water (VSW) sanitation facility construction project in Council, Alaska.

Specific services the Contractor agrees to furnish are as follows:

1. Manage all activities necessary for the construction of a VSW facility in Council, Alaska. Said VSW facility will be constructed according to the approved design resulting from the contract entitled Contract to Provide Engineering Services for a Village Safe Water Facility in Council, Alaska signed by the Contractor on January 19, 1978; and

according to any modifications in design requested by the Corporation or the Corporation's designated representative.

2. Maintain detailed, itemized and accurate records of all financial transactions required in the course of constructing the Council VSW facility. These financial records are to be sufficient to satisfy audit requirements for expenditure of State of Alaska grant funds.

3. Manage start-up and training activities as directed by the Corporation's designated representative.

Among the activities and functions required of the Contractor to supply the services described in the above items (1), (2) and (3) of this Article I are the following:

A. Equipment and Materials - the Contractor is responsible for the timely ordering, scheduling and expediting of all equipment (including construction tools and equipment) and materials necessary for construction of the Council VSW facility. All equipment and materials used in the project shall be approved by the Corporation's designated representative prior to ordering. The Corporation's designated representative shall in a timely manner indicate its approval or disapproval of equipment and materials proposed by the Contractor to be used in the VSW project. The Corporation's designated representative may waive the prior approval requirement for incidental equipment and materials reasonably required in

construction of the VSW project when time required for such approval would unreasonably delay progress on the construction project.

B. Management Foreman - the Contractor shall provide a Management Foreman to be on the construction site in Council at all times when construction on the Council VSW project is progressing. The Management Foreman will be an employee of the Contractor and must be approved by the Corporation's designated representative and the Corporation.

The Management Foreman is responsible for managing all construction activities at the VSW project site, including managing laborers and all other construction personnel. All personnel other than the Management Foreman working on the VSW construction project will be employed by the Corporation. The Contractor or his designated representative will inform the Corporation of needs for personnel to work on the construction project and the Corporation will provide these personnel through local (Council) hire to the extent local people are available. If personnel needs cannot be met locally, the Corporation may obtain assistance from the Contractor in obtaining personnel from outside Council. The Management Foreman shall have authority to dismiss and discipline personnel provided by the Corporation to work on the VSW project. The Management Foreman will promptly report such dismissals and disiplinary actions to the Corporation.

C. Financial Management

(1) Equipment and Materials - the Contractor shall requisition in the Corporation's name, all equipment and materials required for the Council VSW project. The Corporation's designated representative must approve all equipment and materials before they are requisitioned under this contract.

The Contractor will make out all necessary checks, using blanks provided by the Corporation, for payment of bills for equipment and materials approved by the Corporation's designated representative. The Contractor will send these checks to the Corporation for signature after the Contractor has given the Corporation's designated representative the check number, payee and amount for each check. After signing the checks, the Corporation will return them to the Contractor for appropriate distribution. The Contractor shall submit to the Corporation's designated representative a copy of each check written along with appropriate backup data (e.g., invoice, bill of lading).

(2) Time and Payroll - for all personnel employed by the Corporation and working on the VSW project, the Contractor will keep complete and faithful records of time worked on the VSW construction project. The Contractor

will submit upon request of the Corporation's designated representative a complete and up to date statement of personnel payroll information for all personnel employed by the Corporation and working on the construction project. The personnel payroll statement will include the time worked by each person, the work classification of each person, and total pay for each person.

Every two weeks the Contractor will submit to the Corporation for signing and distribution: 1) payroll checks for all personnel working on the VSW project during the previous two weeks, and 2) all required payroll deduction checks. Said checks will be prepared by the Contractor using blanks provided by the Corporation. Before submitting the payroll checks to the Corporation for signing, the Contractor will give the Corporation's designated representative the check number, payee and amount for each check. Any checks to be mailed outside of Council will be returned to the Contractor for distribution.

All legally required payroll deduction report forms and payments will be prepared and distributed as necessary by the Contractor.

If the Corporation's designated representative finds any personnel payroll statement incorrect or inconsistent with the terms of this contract,

it will be returned to the Contractor for correction. The Contractor will be responsible for correcting the personnel payroll statement and making consequent corrections in deduction payments and personnel payroll statements.

D. Monthly Work Schedule - By the twentieth day of each month during which this contract is in force, the Contractor will submit to the Corporation's designated representative a Monthly Work Schedule for the following month. The Corporation's designated representative may waive this Monthly Work Schedule requirement for any given month if activities under this contract are so limited for that month as to make a Monthly Work Schedule unnecessary. The Monthly Work Schedule will be in two separate sections entitled: 1) Construction Schedule, and 2) Project Management Schedule.

(1) Construction Schedule - the Construction Schedule will be a description of all activities at the Council project site planned for a given month, including a general description of work to be accomplished.

(2) Project Management Schedule - the Project Management Schedule will be a description of all the Contractor's activities on the VSW project planned for a given month, including [illegible] by the Management Division, work to be done by engineering and office

personnel, and anticipated transportation and travel.

(3) Total Project Estimate - the first Monthly Work Schedule after design of the Council VSW project is completed will contain a projection by the Contractor of a total schedule for accomplishing the Council construction project, including a general description of, and time sequence for, activities at the construction site; an estimate of total equipment and materials expenses; an estimate of supplies and materials necessary for operation of the project for a period of one year following completion; a general description of, and time sequence for, activities by the Contractor; and an estimate of the total Construction Management fee. In each succeeding Monthly Work Schedule, the Total Project Estimate will be evaluated by the Contractor and adjusted as necessary to keep it current and accurate.

If the Corporation's designated representative approves the Total Project Estimate, the dollar amount of the total project estimate for the total Construction Management fee becomes a limit on the amount that can be paid for the Construction Management fee under this contract. The Contractor may request from the Corporation's designated

representative increases in the limit on the Construction Management fee if such increases are justified and reasonably essential to the completion of the project.

Each Monthly Work Schedule must be approved by the Corporation's designated representative prior to the work described in each Monthly Work Schedule being accomplished.

E. Start-up and Training - the Contractor will manage and direct start-up training activities as directed by the Corporation's designated representative during the first thirty (30) days after the VSW project is operational and accepted in writing as complete by the Corporation and the Corporation's designated representative.

Prior to completion of the VSW construction project, the Contractor will prepare five (5) bound sets of maintenance manuals and operating instructions for submittal to the Corporation's designated representative for approval. The Manuals will consist of: 1) complete descriptive data for all equipment and controls utilized in the VSW project, giving all capacities, characteristics, curves and diagrams; 2) a complete list of repair and replacement parts essential to maintenance of the VSW project; and 3) a complete descriptive narrative of all operating procedures for all systems in the project (including general methods

for servicing all equipment).

During the (30) day start-up and training period, and using the maintenance manuals described above as a text, the Contractor will, as directed by the Corporation's designated representative, train personnel provided by the Corporation to operate and maintain the VSW project. The Contractor will, to the extent requested by the Corporation's designated representative, demonstrate to the operators being trained, and explain to them in detail, all activities required for operation of the VSW project. All operation and maintenance activities performed by the Contractor will be explained to the operators as they are being performed.

E. Additional Requirements - The Contractor will prepare and submit to the Corporation's designated representative for approval a complete set of detailed and accurate as built plans for the VSW project. These plans will be complete and submitted to the Corporation's designated representative within thirty (30) days after the VSW project is complete and accepted in writing by the Corporation and the Corporation's designated representative.

The Contractor will prepare and submit to the Corporation's designated representative a narrative [illegible] construction experiences, both typical and unique to the VSW

project. The report will also include a summary of expenditures on the VSW project. The report will be prepared using a format approved by the Corporation's designated representative.

The Contractor will prepare and submit to the Corporation's designated representative a summary of labor hours worked on the VSW project. This summary will be sufficient to satisfy requirements for a final workman's compensation audit.

Article II. Evaluation of Performance

The Corporation's designated representative will monitor all work done by the Contractor on the Council project which is the subject of this contract. A representative of the Corporation's designated representative shall be acquainted with the scope of the project and shall have the authority to render decisions promptly and furnish information expediently. No payment will be made to the Contractor under this contract unless the Contractor's performance is consistent with the terms of this contract. If the Corporation's designated representative becomes aware of any fault or defect in the project, or nonconformance with contract specifications, the Corporation's designated representative shall give prompt notice thereof to the Contractor.

Article III. Performance Period.

The period of performance under this contract shall commence on the date by which all parties to it have

signed. All performance required of the Contractor under this contract will be completed by December 31, 1978 unless such completion is prevented or hindered by failure of the Corporation to supply personnel as called for in this contract, act of God, strike, partial or total interruption or loss or shortage of transportation facilities, fire, lockout, commandeering of raw materials, products, plants or facilities or by other similar or different acts of civil or military authorities or by other like causes beyond the control of the Contractor. The Contractor may be paid for work on the project covered by this contract which was performed prior to the date of signing by all parties, if such payment is approved by the Corporation's designated representative.

Article IV. Consideration.

All compensation to the Contractor for performance under this contract will be paid under the Construction Management fee. For all costs up to $36,000. associated with fulfilling the terms of this contract, the Contractor will be reimbursed by the Corporation as follows:

1. Management Foreman - The Contractor will be reimbursed by the Corporation for payroll expenses for the Management Foreman. The Contractor's choice of a Management Foreman must be approved by the Corporation's designated representative prior to the Management Foreman performing work called for by this contract. The Management Foreman's rate will be $31.00 per hour .

Travel by the Management Foreman authorized by the Corporation's designated representative and necessary for fulfilling this contract will be reimbursed by the Corporation at actual invoice cost. For meals and lodging while in work status approved by the Corporation's designated representative, the Management Foreman will be paid $60.00 per 24 hour day.

2. Engineering and Office Personnel - for work approved by the Corporation'a designated representative under this contract, the Contractor's personnel shall be compensated at the appropriate rates from the fee schedule in Appendix A, which is attached to and made a part of this contract.

3. Transportation, Travel, Meals and Lodging - for travel by the Contractor's personnel, and transportation authorized by the Corporation's designated representative and not covered elsewhere in this contract, the Contractor will be reimbursed by the Corporation in accordance with the rates in Appendix A. For meals and lodging expenses for the Contractor's personnel while in authorized travel status, the Contractor will be reimbursed in accordance with the rates in Appendix A. All travel under this contract must have the prior approval of the Corporation's designated representative.

4. Other Expenses - for direct expenses approved by the Corporation's designated representative and

not covered elsewhere in this contract, the Contractor will be reimbursed by the Corporation in accordance with the rates in Appendix A.

Article V. Payment.

The Contractor will be compensated by the Corporation according to procedures specified in Article IV of this contract.

The Contractor will submit to the Corporation's designated representative a request for monthly payment of the Construction Management fee for the appropriate month. Each such monthly payment request will include complete detailed records to substantiate the request. After reviewing a monthly payment request, the Corporation's designated representative will notify the Contractor in writing of the amount of the payment request approved for payment. The Contractor will then send the prepared check to the Corporation for signature, after which the Corporation will return the signed check to the Contractor. Any payment made to the Contractor under this contract not approved in writing by the Corporation's designated representative constitutes a breach of this contract, and any such payments must be refunded by the Contractor to the Corporation.

A retainage in the amount of $2,000 will be withheld until the Contractor has completed all requirements of this contract. The retainage will be withheld from the last $10,000 to be paid to the Contractor under this contract.

Article VI. Successors and Assigns.

This contract shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

Article VII. Additional Contract Provisions.

Appendix B which is attached to and made a part of this contract sets forth additional provisions of this contract.

IN WITNESS WHEREOF, the parties have executed this contract:

Contractor

APPENDIX "A"

ELLERBE ALASKA FAIRBANKS DIVISION

PROFESSIONAL FEES

HOURLY RATES

ARCHITECTURAL AND ENGINEERING SERVICES

SEPTEMBER 1977

Personnel Category	Hourly Rate
Principal	$ 55.00
Professional Employee	$ 50.00
Technical Employee III	$ 41.50
Technical Employee II	$ 31.00
Technical Employee I	$ 24.00
Clerical II	$ 22.00
Clerical I	$ 19.00
Consultation, Brief	$ 75.00
Court Appearances and Testimony	$ 75.00 hour (minimum $300.00)

Consultants, Sub-Contract Services and Materials

Except where other arrangements have been established, all authorized services of consultants, sub-contract services, and reimbursable materials and expenses will be billed at actual cost plus ten percent.

Travel and Per Diem Reimbursement

Except where other arrangements have been established, all expenses of authorized travel will be billed at actual cost. Meal and lodging expenses will be billed in accordance with Article 27 (Travel and Per Diem) of the agreement between the State of Alaska and the Alaska Public Employees Association, 1977-1979. When use of private aircraft is authorized, billing will be on the basis of reimbursement at cost. Cost basis for the aircraft typically used is established as follows:

PA-23	$ 60.00 per hour
PA-12	$ 25.00 per hour

APPENDIX B

Article B-1. Inspection and Reports

A. The Corporation's designated representative shall have the right to inspect, in such manner and at all reasonable times as it deems appropriate, all activities of the Contractor arising in the course of its undertakings under this contract.

B. The Contractor shall report his progress in such manner and at such times as the Corporation's designated representative may reasonably require.

Article B-2. Corporation Saved Harmless

The Contractor shall hold and save the Corporation, its officers, agents and employees harmless from liability of any nature or kind including costs and expenses for or on account of any or all suits or damages of any character whatsoever resulting from injuries or damages sustained by any person or persons or property by virtue of any wrongful act or omission of the Contractor not specifically directed by the Corporation, its duly authorized agents, or its designated representatives.

Article B-3. Equal Employment Opportunity.

A. The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, ancestry, age, or sex. The Contractor will take affirmative action to insure that applicants are employed and that employees are treated during employment

without regard to their race, color, religion, national origin, ancestry, age, or sex. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruiting advertising; layoff or termination, rates of pay or other forms of compensation; and selection for training, including apprenticeship.

B. The Contractor agrees that he will fully cooperate with the office or agency of the State of Alaska which seeks to deal with the problem of unlawful or invidious discrimination, and with all other State efforts to guarantee fair employment practices under this contract, and said Contractor will comply with all requests and directions from the State Commission for Human Rights or any of its officers or agents relating to prevention of discriminatory employment practice.

C. Full cooperation as expressed in clause (B) foregoing shall include, but not be limited to, being a witness in any proceeding involving questions of unlawful or invidious discrimination if such is deemed necessary by any official or agency of the State of Alaska, permitting employees of said Contractor to be witnesses or complainants in any proceeding involving questions of unlawful or invidious discrimination, if such is deemed necessary by any official or agency of the State of Alaska, participating in meetings, submitting periodic

reports on the equal employment aspects of present and future employment, assisting in inspection of the construction site, and promptly complying with all State directives deemed essential by any office or agency of the State of Alaska to insure compliance with all Federal and State laws, regulations, and policies pertaining to the prevention of discriminatory employment practices.

Article B-4. Disputes.

A. Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Commissioner of the Alaska Department of Environmental Conservation (hereafter called the Commissioner), who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Contractor. The decision of the Commissioner or his duly authorized representative shall be final and conclusive unless, within 30 days from the date of receipt of such copy, the Contractor mails or otherwise furnishes to the Commissioner a written appeal. The decision of the Commissioner or his duly authorized representative for the determination of such appeals shall be final and conclusive. This provision shall not be pleaded in any suit involving a question of fact arising under this contract as limiting judicial review of any such decision to cases where fraud by such official or his representative

or board is alleged: Provided, however, that any such decision shall be final and conclusive unless the same is fraudulent or capricious or arbitrary or so grossly erroneous as necessarily to imply bad faith or is not supported by substantial evidence. In connection with any appeal proceeding under this clause, the Contractor shall be afforded an opportunity to be heard and to offer evidence in support of his appeal. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Commissioner's decision.

B. This disputes clause does not preclude consideration of questions of law in connection with decisions provided for in paragraph (A) above. Nothing in this contract, however, shall be construed as making final the decision of any administrative official, representative or board on a question of law.

Article B-5. Termination.

The Corporation's designated representative may, by written notice, terminate this contract, in whole or in part, when it is in the best interest of the Corporation. The Corporation shall be liable only for payment in accordance with the payment provisions of this contract for services rendered prior to the effective date of termination.

Article B-6. No Assignment.

The Contractor shall not assign this contract, nor any part thereof, nor any right to any of the monies to be paid him hereunder, nor shall any part of the work done or material furnished under said contract be sublet, except with the written consent of the Corporation's designated represent tive.

Article B-7. No Additional Work.

No claim for additional services, not specifically herein provided, done or furnished by the Contractor, will be allowed, nor shall the Contractor do any work or furnish any material not covered by the contract, unless such work is ordered in writing by the Corporation's designated representative.

Article B-8. Independent Contractor.

The Contractor, and any agents and employees of the Contractor, shall act in an independent capacity and not as officers, employees, or agents of the City in the performance of this contract.

Article B-9. Availability of Appropriation.

This contract is subject to the availability of Village Safe Water grant funds under AS 16.07.

Article B-10. Agreement for Alaska Business License.

It is understood and agreed that if an Alaska Business License is required under Alaska Statutes 45.70 the [illegible] of this agreement or in the event he does not now have a license he will apply for same

to the Commissioner of Revenue, Pouch SA, Juneau, Alaska 99801 within 30 days following the effective date of this contract.

Article B-11. Conformity with Federal Regulations.

Not withstanding any other provisions of this contract, it is expressly understood that during any wage/price freeze imposed by Executive Order or Federal legislation the rates paid will be determined in accordance with federal guidelines.

No retroactive payment will be made at the termination of the wage/price freeze unless payment is consistent with federal guidelines.

Article B-12. Payment of Taxes.

As a condition of performance of this contract, the Contractor shall pay all Federal, State, and local taxes incurred by the Contractor, sub-contractor or other person or persons in the performance of this contract, and the Corporation may require proof of payment of these taxes as a condition precedent to payment by the Corporation under this contract.

Article B-13. Ownership of Documents.

All plans, drawings and specifications, originals and tracings, shall become the property of the Corporation, whether the facilities for which they are made be [illegible] and shall be delivered to the Corporation and may be retained by the

Corporation at the completion of the project.

Article B-14. Corporation's Designated Representative.

For the purposes of this contract, the Corporation's Designated Represetntative is the Alaska Department of Environmental Conservation.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

CONTRACT TO PROVIDE FOR CONSTRUCTION MANAGEMENT
FOR A VILLAGE SAFE WATER FACILITY
IN COUNCIL, ALASKA

AMENDMENT NO. 1

Article IV. Consideration. shall be changed in the first paragraph to read as follows:

> All compensation to the Contractor for performance under this contract will be paid under the Construction Management fee. For all costs up to $42,000 associated with fulfilling the terms of this contract, the Contractor will be reimbursed by the Corporation as follows:

This amendment increases the maximum allowable fee by $6,000.00

Contractor

Water and Sewer Construction Grants

The Department of Environmental Conservation administers a grant program which provides incorporated communities with assistance in the construction of water and sewerage services. Two basic grant programs are administered: the State general obligation bond water and sewer grant program and the federal water pollution control program.

Under the State water and sewer grant program, incorporated municipalities may apply for grants to fund up to 50 percent of project costs for new water and sewerage facilities or one-half the non-Federal share of eligible costs if federal funding is involved. Funded projects include facilities needed for community growth as well as facilities needed to correct existing public health and environmental problems.

Eligible projects presently are funded as need arises. The source of funding for these grants is general obligation bond funds which have been authorized by the voters. Presently, approximately $18 million is available for obligation to projects through this program.

These grants have supported projects in major communities in all regions of the state. The program is not heavily used by bush communities because the Public Health Service and the State Village Safe Water programs are addressing utility needs of remote areas and it is usually difficult for small remote communities to raise the 50 percent matching requirements. In some instances, however, projects in remote areas are funded through the program in conjunction with other federal, state, or local funding scurces.

The grant program for construction of sewage treatment facilities is administered under the authorization of the federal Clean Water Act of 1977. Depending upon congressional appropriations from year to year, Alaska is allocated $16-25 million annually. These funds are then available to communities to finance 75 percent of the cost of sewage treatment and interceptor projects. The State water and sewage grant program mentioned above contributes an additional 12 1/2 percent toward such projects leaving only 12 1/2 percent to be funded locally.

The Environmental Protection Agency is responsible for this grant program. However, EPA may delegate the administration of the program to the states, and make funding available to those states which assume administration of the program. In order to reduce the delays in grant processing which occurred under EPA administration, Alaska assumed responsibility for a major portion of the program in December of 1978 (one of the first states to do so).

Since 1975, approximately $20 million of Federal funds a year has been awarded to 30 communities throughout the State. As with the State water and sewer grant program, the larger communities have benefitted the most from the program. Recent changes to the Clean Water Act present opportunities for making funding available to smaller communities for innovative, individual, or non-conventional sewage handling facilities.

Village Safe Water

The Village Safe Water Act calls for at least one facility for safe water and hygienic sewage disposal in each village in Alaska.

Since 1972, eleven VSW facilities have been constructed. They are in the villages of Northway, Chevak, Alakanuk, Selawik, Nulato, Koyukuk, Beaver, Pitkas Point, Kongiganank, Tanana and Council. A facility is being designed for Akiachak and will be constructed during the summer and fall of 1980.

In these eleven villages the VSW projects consist of sanitation facilities to which village residents can come to obtain water supply and sewage disposal services; with bathing and laundry services available in all except Council. No piped water-distribution or sewage collection systems are involved except for water and sewer service lines to schools.

Construction methods used so far have included: 1) competitive bid construction contracts administered by what was then the Alaska Department of Public Works, 2) competitive bid construction contracts administered by the Alaska Department of Environmental Conservation (ADEC), and 3) force account construction by the village through construction management contracts with engineering consultants.

The force account/construction management method of construction has been the most satisfactory of the three methods used. Facilities constructed that way have been built cheaper and faster than those built under competitive bid construction contracts; the quality of construction has been better; and the villages have been more intimately involved in, and satisfied with, their projects.

VSW facilities have cost from $118,000 at Council for a project begun in FY 78, to over $1,400,000 at Tanana, of which $755,000 were VSW funds. Villages served have ranged in size from 60 (Council) to over 550 (Selawik).

Experience in the VSW project has proved that financial, technical, and/or management assistance to the villages is necessary to ensure that the facilities continue to operate. ADEC provides technical and management assistance to the eleven villages. The VSW operation and maintenance support program has made it possible for all completed VSW facilities to serve the public as intended. It is instructive to note that the operation and maintenance cost per village has been decreasing in actual dollars (i.e., ignoring inflation) over the last few years.

ADEC has been working on a comprehensive planning effort intended to define the roles of State and federal agencies and other groups involved in providing rural sanitation services. The Department has sought close cooperation with the U.S. Public Health Service and the regional Native health corporations in carrying out the planning. In fact the Directors of the health corporations have served as an advisory board for the VSW program.

An early step in the planning was to inventory all village sanitation facilities. The inventory is updated annually and is widely viewed as the single most complete and dependable source of information on village sanitation.

Current plans are to investigate certain questions concerning how the VSW program should operate over the long term. Among the questions to be investigated are: 1) What services should VSW facilities provide (e.g., solid waste, piped service to individual homes, saunas)?; 2) Should there be village eligibility criteria for VSW program assistance?; 3) How should construction priorities be set?; 4) How fast should VSW facilities be built (i.e., how much construction money over what period of time)?; 5) What funding sources other than water and sewer bonds can be coordinated into VSW projects? and 6) What should the State's role be in operation and maintenance of VSW facilities, and perhaps other village sanitation facilities as well?

Authority: 46.07

CRITERIA SYSTEM
for
Allocation of Federal Water Pollution Control Grant Funds

The Federal Water Pollution Control Act Amendments of 1972 (PL 92-500) as amended by the Clean Water Act of 1977 (PL 95-217) provide grant funds to assist municipalities with facility plans (Step 1), engineering designs (Step 2) and project construction (Step 3) for water pollution control facilities. These funds are allocated to the State of Alaska for obligation through the Department of Environmental Conservation. The Department develops an annual Priority List for determining which projects will receive grants.

The project Priority List is developed using a criteria system to assign a numerical ranking to eligible projects in accordance with EPA requirements. These requirements stipulate that the type of project, severity of pollution, project step and continuity, receiving water usage, existing population affected, public health and environmental hazards, and the effect on water quality standards be considered in developing the Priority List.

The point values for the criteria system have been revised in accordance with PL 95-217 and have been used to prepare the Priority List for allocation of available federal funds. Each project appearing on the Priority List has been assigned appropriate points in each of nine categories. The points for each category are summed and the total used to determine the project rank on the Priority List. The project with the highest point total will be the highest priority project.

In developing the criteria system, the State can not consider "readiness to proceed" as a category for ranking projects. However, "readiness to proceed" can be a reason for moving a project into the fundable portion of the priority list if a higher ranking project will be unable to proceed on schedule, before the end of the fundable year.

When it appears that a project on the fundable portion of the priority list will not be ready to proceed within the fundable year, the State, with EPA concurrence, will notify the applicant that their project is being by-passed in favor of the highest ranking project on the extended portion of the Priority List that is ready to proceed. The applicant being by-passed may appeal this decision to the Department by requesting an adjudicatory hearing conducted under the Administrative Procedure Act. Projects that are by-passed will retain their relative priority rating for consideration on future Priority Lists.

The estimated completion schedules for projects on the fundable portion of the Priority List, by-passed for not being ready to proceed, will be compared with the schedules for compliance contained in the NPDES permit. In those cases where significant delays have occurred, appropriate State and/or EPA enforcement action will be recommended to achieve compliance with permit conditions.

Any projects on the extended portion of the priority list that are by-passed due to not being ready to proceed will be notified and given the opportunity to appeal. After agreement is reached with the applicants proposed for by-pass, the State will certify to EPA that those projects not ready to proceed may be by-passed to reach a project that will be ready during the fundable period.

In addition to funds obligated to specific projects, reserve accounts from each fiscal year's federal allocation will be set aside for the following purposes:

1) Up to two percent of each year's allocation or $400,000, whichever is greater, may be reserved and granted to the State to manage the grants program and other specified portions of the Water Pollution Control Program.

2) Two percent of the federal allocation for FFY 79 and 80 and three percent for FFY 81 shall be reserved for projects incorporating alternative and innovative technology, and may be used to increase a federal grant up to a maximum of 85 percent. A minimum of 0.5 percent of the federal allocation for FFY 79, 80 & 81 shall be for projects using innovative technology.

3) Four percent of each year's allocation shall be reserved for alternatives to conventional treatment for communities with populations of 3,500 or less, or sparsely populated areas of larger communities.

4) A reserve of not less than five percent of each year's allocation will be maintained for funding grant increases.

5) A reserve may also be established to fund Step 1 & 2 projects that may or may not appear on the Priority List. To be funded, these projects must have a priority ranking high enough to appear on the fundable portion of the Priority List.

6) A state designation reserve may also be established for funding of project increases that occur prior to grant award.

The amounts set aside in these reserve accounts will vary from year to year depending on the federal allocation to Alaska and on the need for the particular reserve within the limitations described above. The specific amounts to be set aside in these reserves will be designated in the annual Priority List, which is subject to public review and comment.

This criteria system and the Priority List developed using these criteria are subject to annual review and comment at public hearings held for this purpose. These hearings are announced through individual mailings and public notice in newspapers of general circulation a minimum of 45 days prior to the first scheduled hearing. Public input regarding the preparation of the Priority List is welcomed.

Project priority rankings are determined according to the following nine categories. Appropriate points are assigned to arrive at a point total and priority ranking for each project:

I. Project Component

In determining the relative priority of the various project components the Department emphasizes the importance of maximizing the benefits to be achieved from limited federal funds. Project components required to achieve compliance with State water quality standards and protect public health will receive higher consideration than project components required by federal law which may provide treatment beyond what is required to protect health or the environment.

Hence, secondary or advanced treatment projects, when required only to satisfy an NPDES permit or other portions of federal law, may be phased on the Priority List so that the initial phase would meet water quality and health considerations, and the final phase would be constructed at a later date, subject to availability of funds. Projects for collection sewers, storm sewers and correction of combined sewer overflows are not considered eligible project categories for use of funds allocated to Alaska.

Projects are assigned a point total by multiplying the point value of the project component by the percentage of cost that a specific component bears to the total eligible project cost and then summing the point values computed for the components.

	Component	Points
a)	Initial phase(s) of treatment into marine water required to protect public health or achieve water quality standards; secondary treatment for discharge into fresh water; or any treatment required prior to discharge to groundwater.	300
b)	Rehabilitation or expansion of treatment facilities or correction of infiltration/ inflow in sewage collection systems where existing conditions are disrupting the efficiency of existing treatment facilities.	250
c)	Rehabilitation and correction of infiltration/inflow of sewage collection systems where the required corrections are done in conjunction with a new treatment facility.	200

d) Construction of new interceptor sewers, pump stations and appurtenances. — 150

e) Upgrading existing treatment facilities to secondary or advanced wastewater treatment levels when required for reasons other than meeting water quality standards or protection of public health. — 100

II. Project Water Quality Need

To date the Department has not completed an approved water quality management plan. However, information that will be the basis for this plan was taken into consideration in allocating points to projects in this category.

Points awarded for one section only.

a) Project necessary to treat or eliminate a discharge contributing to a documented violation of the Alaska Water Quality Standards. — 400

b) Project necessary to minimize or eliminate documented "non-point source" contamination of groundwater or surface waters resulting from subsurface sewage disposal systems. — 300

c) Project necessary to prevent potential water pollution problems or where the environment may be adversely affected due to the impact of accelerated development or industrial growth. — 200

d) Project only necessary to comply with the effluent limitations contained in an NPDES permit for a point source discharge. — 100

III. Regulatory Emphasis for Violation of Water Quality Standards

	Points
a) Notice of Violation issued by Department of Environmental Conservation or EPA	50
b) Compliance order issued by Department of Environmental Conservation or EPA	80
c) Charges filed by State Attorney General or legal counsel for EPA	100

IV. Public Health Emphasis

	Points
Verification from a state or local health official that a project is necessary to avert or correct a public health hazard.	100

V. Receiving Water Usage - Affected By Existing Discharge

		Points
a)	Freshwater/Groundwater	
1)	Drinking and food processing	100
2)	Propogation of fish and shellfish used as a food source	50
3)	Water contact recreation	20
b)	Marine water	
1)	Propagation of fish and shellfish as a food source	50
2)	Water contact recreation	20

VI. Project Continuity

		Points
a)	Award of a Step 1 grant or approval of a facility plan developed without a grant qualifies the project for 100 points to help insure sufficient funding to complete the project.	100
b)	Award of a Step 2 or 2 & 3 grant or approval of plans and specifications completed without a grant award qualifies the project for an additional 100 points to help insure sufficient funding to complete the project.	100
c)	Step 3 projects, where construction is phased over several years or where rehabilitation or corrective measures are required to improve the efficiency of existing sewerage facilities constructed under a previous grant shall qualify for an additional 50 points.	50

VII. Project Step		Points
a)	Approved initial application and plan of study	30
b)	Approved facility plan	20
c)	Approved final design plans and specifications	10

VIII. Existing Population Benefiting from Project		Points
a)	under 1,000	30
b)	between 1,000 and 3,500	50
c)	between 3,500 and 10,000	70
d)	over 10,000	100

IX. Alternative or Innovative		Points
	Step 2, 2 & 3, or 3 projects identified in an approved facility plan as containing alternative or innovative technology components shall qualify for 50 points in addition to all other points awarded to the project.	50

PROJECT PRIORITY LIST FOR THE ALLOCATION OF FEDERAL WATER POLLUTION CONTROL GRANT FUNDS FOR FFY 80

The FFY 80 "Project Priority List" consists of sewage system improvements required in the five year period 1979-1984. The list prioritizes 76 projects, each awarded a numerical score derived in accordance with procedures established in the Criteria System. The fundable portion of the Priority List is represented by those projects targeted for grant award during FFY 80. The remaining projects represent the extended portion of the Priority List and will be funded from future federal appropriations.

Program funding available for FFY 80 is estimated at $46,984,482 and is comprised from the following Congressional appropriations:

1)	FFY 77 Supplemental Carryover	$ 3,162,861
2)	Title III - Public Works Employment Act of 1976	4,263,723
3)	FFY 79 Appropriation*	20,527,414
4)	FFY 80 Appropriation (based on $3.8 billion)	17,000,000
5)	FFY 76-73 Carryover	30,484
		$44,984,482

*This balance may be reduced by additional grant awards prior to the adoption of the Priority List, effective October 1, 1979.

In addition to the $44,984,482, the state must obligate $6,443,343 from the FFY 78 appropriation by October 1, 1979 or lose it to reallocation. It is anticipated that the following projects will receive grants prior to October 1, 1979:

Palmer-West Interceptor Step 4	$1,315,703
Soldotna - Step 3	2,175,000
Sitka - Step 3 - Phase I	3,675,000
Eagle River - Step 3	3,765,000
State Management Assistance Grant	154,651
	$11,085,354

If the above grants are awarded by October 1, 1979 the FFY 78 appropriation will be depleted and the FFY 79 appropriation will be reduced by $4,642,011 to $15,885,403. Therefore, the dollars available for obligation during FFY 80 may be reduced to $40,342,471. These projects do not appear on the attached priority list since it is expected that they will be awarded prior to October 1, 1979. However, in the event that any of these projects do not receive grant awards by the expiration date of the FFY 79 priority list, they will be placed on the fundable portion of the FFY 80 priority list to be awarded grants from available funds.

For planning purposes the Department assumes that annual federal appropriations to Alaska will be $22,500,000, through 1984. The total five year funding available is estimated at $132.5 million. The five year project list, adjusted for inflation, estimated at $121.7 million will likely exceed the available funding resources, since reserve accounts must be established from these funding sources.

The following reserve accounts will be established from the $40,342,471 estimated to be available for obligation to projects during FFY 80:

1)	Reserve for a State Management Assistance Grant to the Department of Environmental Conservation	$ 814,180
2)	Two percent of FFY 80 federal allocation plus FFY 79 Carryover to establish a reserve for increasing funding up to 85 percent for eligible projects incorporating alternative and innovative technology	772,817
3)	Four percent of the FFY 80 federal allocation plus FFY 79 Carryover to establish a reserve to fund alternatives to conventional treatment in communities with populations of 3,500 or less, or sparsley populated areas of larger communities	1,428,137
4)	Grant increase reserve	3,500,000
5)	Reserve for unidentified Step 1 & 2 projects that have a priority ranking high enough to place the project on the fundable portion of the Priority List	100,000
6)	Reserve established for State designation to fund project increases that occur prior to grant award.	3,248,337
	Total Reserves	$9,863,471

Therefore, $30,479,000 will be available for obligation to projects targeted for grant award during FFY 80. Funds not obligated during FFY 80 will be reprioritized for obligation on the FFY 81 Priority List.

VILLAGE SAFE WATER PROGRAM
An Update to January 20, 1977

from DEC

Introduction

The Village Safe Water Act (AS 46.07), passed in 1970, calls for "at least one facility for safe water and hygienic sewage disposal in each village" in Alaska. Little progress was made in the program until December of 1972 due to lack of funds, inability to hire someone to administer the Village Safe Water (VSW) program, and lack of operation and maintenance provisions. Since 1972, six VSW facilities have been constructed, two more are nearly complete, and another is being designed. In addition, an operation and maintenance support program and a comprehensive planning effort have been organized and initiated.

Construction

The six VSW facilities constructed to date are in the villages of Northway, Chevak, Alakanuk, Selawik, Nulato and Pitkas Point. A facility will be completed in Beaver in January, 1977, and in Koyukuk in February of 1977. A facility for Kongiganak is being designed, and construction is scheduled for summer of 1977.

At the nine locations listed above, the VSW projects consist of central sanitation facilities to which village residents can come to obtain water supply, sewage disposal, bathing and laundry services. No piped water distribution or sewage collection systems are involved except for water and sewer service lines to schools.

Construction methods used so far have included: 1) competition bid construction contracts administered by the Alaska Department of Public Works, 2) competitive bid construction contracts administered by the Alaska Department of Environmental Conservation (ADEC), and 3) force account construction by the villages through construction management contracts with engineering consultants. All facilities so far have been designed by engineering consultants.

The force account/construction management method of construction has been the most satisfactory of the three methods used. Facilities constructed that way have been built cheaper and faster than those built under competitive bid construction contracts; the quality of construction has been better; and the villages have been more intimately involved in, and satisfied with, their projects.

VSW facilities have cost from $350,000 at Pitkas Point (begun in FY 76) to almost $1,200,000 at Selawik (begun in FY 74). Villages served have ranged in size from 85 (Pitkas Point) to over 500 (Selawik).

Operation and Maintenance

Experience in the VSW program has confirmed that virtually any utility system installed in remote Alaskan villages is doomed to eventual failure unless the village is given financial, technical, and/or management assistance. Any program for providing utilities in rural Alaska must either adequately provide for long term operation and maintenance, or expect system failures that adequate operation, maintenance and management could have prevented.

In FY 76, the annual operating budgets for VSW facilities ranged from $28,000 at Northway to over $100,000 at Selawik. ADEC provided a total of about $225,000 in VSW operation and maintenance grants in FY 76 to six villages. In addition, ADEC provided technical and management assistance to the six villages. Although expensive, the VSW operation and maintenance support program has made it possible for all completed VSW facilities to serve the public as intended.

Comprehensive Planning

ADEC is developing a comprehensive plan intended to define the roles of State and federal agencies and other groups involved in providing rural sanitation services. An early step in this planning is to inventory all village sanitation facilities. Completing this inventory is viewed as the cornerstore of the VSW planning effort.

The Ninth Alaska Legislature passed a resolution suggesting that a VSW advisory committee be organized consisting of representatives from the 12 Native Regional Service Associations. This committee would assist ADEC with policy and management decisions concerning the VSW program. The Department feels the advisory committee is a good idea and welcomes increased involvement for the Regional Associations.

Several local, State, federal and private organizations participate either directly or indirectly in providing rural sanitation services. A strong working relationship must be developed among the diverse groups if a comprehensive plan for sanitation services throughout rural Alaska is to be successfully developed and implemented.

Goals and Objectives

VSW Comprehensive Planning

GOAL

To develop a statewide comprehensive program for providing sanitation services in rural Alaska.

PLAN OBJECTIVES

1. Inventory existing water supply and sewage disposal facilities in rural Alaskan villages.

2. Develop criteria for evaluating the adequacy of existing water supply and sewage disposal facilities. identified in # 1 above.

3. Identify existing agency programs providing sanitation facilities to Alaskan villages. Quantify the resources currently available. Identify and describe the technical, management and administrative approaches presently used.

4. Develop criteria to evaluate the effectiveness of these programs.

5. Evaluate the adequacy of technical, management and administrative approaches identified in #3. above.

6. Identify and evaluate alternative technical, administrative and management methods that might be used to address sanitation needs in rural Alaska.

7. Recommend changes in the activities and resources of existing programs to incorporate the alternatives noted in # 6 above. Recommend new programs and/or authority necessary for implementation.

8. Analyze existing methods of operation, maintenance and management of village sanitation facilities.

9. Develop alternative methods for operation, maintenance and management of village sanitation facilities.

10. Recommend changes in the activities and resources of existing programs to incorporate the alternative approaches noted in #9 above.

11. Integrate the findings of the above analysis with th comprehensive plan.

12. With the assistance of the appropriate governmental agencies and Native non profit regional associations, proceed to implement the plan.

PUBLIC INVOLVEMENT & PROGRAM COORDINATION

Because several local, State and federal organizations participate either directly or indirectly in developing rural sanitation facilities, this major planning effort can not be undertaken alone. To insure proper plan development and implementation, a strong working relationship must be developed among the diverse groups currently working on rural sanitation problems.

Public participation and inter-agency coordination must be an integral part of the VSW comprehensive planning process. In this regard, a maximum effort will be made to enlist the active participation of the native regional health organizations, the villages and appropriate federal and state agencies. We hope that by the time a draft of the plan has been formulated, significant public comment and coordination will have been obtained. The results of our collective efforts will be a comprehensive plan for providing rural sanitation services in Alaska.

RE: HB 68 relating to the Village Safe Water Act

The following recommendations are excerpted from the Governor's Management and Efficiency Review Report

Recommendations

254. Discontinue construction of village safe water projects.

The village safe water program is financed completely by the state and there is substantial concern about its effectiveness. The program applies to villages with population ranges of from 25 to 600 persons. Approximately $5-million has been spent to complete eight projects and three more are scheduled.

A fiscal 1977 request of $2-million has been made for the program plus an additional $300,000 for annual maintenance work. The maintenance figure could double as additional projects are completed. The villages are unable to operate and maintain the facilities and a decision must be made on the future of the program.

In view of the inability of the villages to run these facilities successfully, the construction program should be discontinued. As some of the native corporations involved become more experienced, they could contract with the state for such a program, recognizing that rural water and waste disposal systems are almost never financially self-sustaining. Implementation would result in an estimated one-time cost avoidance of $2-million and an annual saving of approximately $300,000.

pp. 138, 139

The final implementation report of the Governor's Management and Efficiency Review states that this particular recommendation has not been implemented. (See p.10)

SUBJECT: CSHB 69, relating to emergency fire-fighting personnel

TO: Representative Bill Parker
ATTN: Marge Corsuch, A.A.

FROM: John B. Chenoweth
Legislative Counsel

I have taken the liberty of excising all reference to the language which you provided to me from the draft Committee Substitute. When I finally figured out what was being said, I could not help but think that a limitation on emergency employment expressed in terms which refer to "conditions necessitating immediate action to provide for carrying on work that must be continued in the public interest" had absolutely no applicability in the context of fighting fires. However, if you think that it ought to go back in, let me suggest something like

> ". . .only if his employment is critical if work that is in the public interest is to be continued."

You might also wish to consider inclusion of an immediate effective date. If this bill becomes effective in its present form, the effective date might well be mid-summer, when hiring activity for fire-fighting is at its height. An immediate effective date clause could alleviate problems arising out of a summer implementation.

JBC:jdn

Enclosure

HB 69

* Section 1. AS 39.25.110 is amended by adding a new paragraph to read:

(22) emergency fire-fighting personnel hired by the commissioner of natural resources under AS 41.15.030(b). Individuals hired as an emergency appointment may be hired for a period not to exceed thirty (30) calendar days, and must be made under conditions necessitating immediate action to provide for carrying on work that must be continued in the public interest.

George Hollett 279-5577
Div. of Land

REMARKS: (use reverse side if necessary)

Hollett - no max ha. limitation in original bill. Usually no one stays longer than 3 mths. Village crews come + go together. BLM has pay scale comparable to lower "48" so conflict with state workers. Concern Larson if pay is high enough. Seasonal people on payroll (Bill Fond) sometimes do work. BLM still protects Native lands - then C becomes state responsibility after 2yrs. Home taken over urban areas. Sen Sackett may sponsor ~ about 30,000 ha.

Sec. 41.15.010. Intent. It is the intent of §§ 10 — 170 of this chapter to provide protection for the timber resources and watersheds on all lands in the state. (§ 1 ch 138 SLA 1961)

Am. Jur. reference. — 34 Am. Jur., Logs and Timber, §§ 4, 53.

Sec. 41.15.020. Regulations. The commissioner shall, by regulation, make provision for the protection of forested lands in the state from fire and other destructive agents. (§ 2 ch 138 SLA 1961)

Sec. 41.15.020. Commissioner may make contracts for forest protection. (a) The commissioner may enter into protection contracts which he considers necessary.

(b) The commissioner may hire emergency fire-fighting personnel up to a total of 30,000 man-hours each year, and shall establish classifications and rates of pay for the emergency fire-fighting personnel consistent with the compensation paid by other fire-fighting agencies. The commissioner may adjust the classifications and rates based on findings of the federal Bureau of Land Management for Alaska. (§ 2 ch 138 SLA 1961; am § 1 ch 100 SLA 1976)

Effect of amendment. — The 1976 amendment added present subsection (b).

Editor's note. — Section 119, ch. 218, SLA 1976, provides an effective date for ch. 100, SLA 1976.

Sec. 41.15.040. Right of entry to control and suppress fires. [illegible] approval by the commissioner or his authorized agent, employees of the division of lands, or of any organization authorized to prevent, control or suppress fires or destructive agents, and others assisting in the control or suppression of fires upon request of an officer or employee of the United States or the state may at any time enter upon any land, whether publicly or privately owned, for the purpose of preventing, suppressing or controlling forest fires and destructive agents. See TAPE #3 -- Section 2-200 for recorded minutes of hearing.

BILL:

HB 70 Appropriation Craig and Klawock

Sponsors: Freeman and Gardiner

This appropriation was introduced last year--was vetoed by Hammond.

Craig--crawler tractor needed for road work.

Klawock-- now they are using vintage fire truck (circa '39)
The fire alarm system proposed would be an electrical one. They presently use a bell and telephones. KLawock is spread out so an alarm system is vital.
Backhoe is needed for city construction work...primarily for putting in sewers required by Federal law.

HB
83

CITY OF KODIAK
ALASKA

March 12, 1979

Mr. Bill Parker, Chairman
House Community and Regional Affairs Committee
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Gentlemen:

The Council took action at their meeting of March 8, opposing HB 83. The Council definitely feels that a higher percentage of the raw fish tax should be returned to the municipalities. However, Kodiak is in a unique situation in that the major portion of the revenue is produced inside the boundaries of the City of Kodiak. Yet the Borough receives twice the amount of refund.

I do not know how the amendment to the Statutes, giving the borough an additional percentage, was passed several years ago or which area was in favor of it, but it is certainly unfair.

The City of Kodiak has 15 year-round processing plants and the Kodiak Island Borough has 3 or 4 seasonal plants. The City provides all services to the canneries; fire protection, police, water, sewer, streets, etc. For all these services necessary to obtain the revenue, the City of Kodiak has received only 10% and the Kodiak Island Borough has received 20% of the monies collected.

To explain the extent the City assists the canneries and fishermen, I would like to address certain services. The City pays the Borough for personal property tax and does not levy any City personal property tax. This is a real advantage to canneries with a great deal of equipment and boat owners, who may be residents of the Borough or another State, with boats stored inside the City limits.

The real emergency on the Monashka Dam repair was to provide water to the canneries. If it had not been for the canneries' need, the City could have waited and attempted to obtain State or federal grants. It now appears that the City is stuck with a $250,000 repair bill.

Several years ago the canneries were directed to provide for the disposal of their fish wastes. The City not only coordinated a necessary study to entice a private company to establish a plant and process the waste, but also leased land from the State and provided it for locating the plant at a subsidized rental. To this day, the City provides a reduced rental for the waste plant.

POST OFFICE BOX 1397, KODIAK, ALASKA 99615 PHONE (907) 486-3224

The City of Kodiak also operates the boat harbor and for many years, as you know, has attempted to obtain federal funding for a larger boat harbor (Dog Bay).

For the reasons stated above and others that could be mentioned, it is felt that the city or borough providing the services to those generating the revenues should receive the largest share of the raw fish tax.

Thank you for your consideration and attention in this matter.

Sincerely,

CITY OF KODIAK

Gary Stevens
Mayor

Re: House Bull No. 83

Dear Mr. Osterback:

House Bill No. 83, an Act relating to the raw fish tax, was introduced in the House on January 25, 1979 and was referred to the House Resources and Finance Committees. The bill was given a further referral on January 30, 1979 to the House Community and Regional Affairs Committee.

For the consideration of the House Resources Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. Phil Wall, Director, Administrative Services Division, Department of Revenue concerning the proposed legislation.

Sincerely

STATE of ALASKA

MEMORANDUM

TO: Mr. Keith Specking
Legislative Assistant
Office of the Governor

DATE: February 6, 1979

FILE NO:

TELEPHONE NO:

FROM: Ernst W. Mueller
Commissioner
Department of Environmental Conservation

SUBJECT: HB 95

House Bill 95 relating to sanitary landfills, is the same as HB 707 introduced during the last session. The remarks which follow are substantially the same as our previous comments. The immediate focus of the bill appears to be to assist the City of Dillingham in its opposition to the department's attempts to alleviate the public safety and environmental hazards created by that city's dump. That matter has long been in the courts. In the long run, however, this bill could preclude approval of Alaska's solid waste management plan by the U. S. Environmental Protection Agency. Aside from being an embarrassment to a state trying to demonstrate its environmental responsibility, EPA disapproval would also involve a loss of federal solid waste management funds to the state, and, in the future, local governments, and may very well result in increased federal involvement in solid waste management in Alaska.

In analyzing the bill, it is important to understand the concept of a "sanitary landfill." A sanitary landfill has been universally defined as a solid waste facility sited to avoid safety, health and environmental hazards, confined to the smallest practicable area, and covered on a daily basis. Over the past several years, the Department of Environmental Conservation has worked closely with Alaska municipalities to convert their "dumps" to "sanitary landfills." Normally, this can be accomplished without requiring the closing of the existing facility. The program, I believe, has met with a substantial amount of success.

In some cases, however, cooperation has not been enough and enforcement action is necessary. The City of Dillingham provides a case in point. Because of its location, the Dillingham dump creates both water pollution and public safety hazards. The proximity of the dump to the airport is the department's greatest concern. Dumps--particularly poorly operated ones--attract birds, which in turn threaten air safety. A near catastrophe in Homer in September, 1976, which was disclosed at hearings on the Dillingham facility, illustrates well the magnitude of that threat. A Wien 737 jet with 52 passengers encountered a flock of seagulls upon takeoff. One engine exploded and another stalled as several birds were ingested into the jet engines. Thankfully, the pilot was able to restart one engine and return to Homer without crashing into the sea. The cost to Wien from this one incident exceeded $250,000.

Because of this hazard, dumps located close to airports must, in certain circumstances, be relocated. Dillingham has recognized that this is the case with their facility, but has been, in our view, less than aggressive

in finding other sites. HB 95, by precluding the department from directing relocation in the event that eminent domain is necessary, would substantially impair the department's ability to reduce adverse impacts associated with local dumps. While we are confident that relocation of the Dillingham facility can be accomplished without the use of eminent domain, the bill may well thwart necessary remedial action in future cases.

This is particularly true in light of the Resource Conservation and Recovery Act, passed by Congress in 1976 (PL 94-580). The Act authorizes the establishment of minimum standards for both hazardous waste disposal and solid waste management in general (secs. 3004, 4002), and provides states with the opportunity to develop solid waste programs to implement those standards (secs. 3006, 4007). My department is working hard to develop such a state program. The primary consequences of failure to develop an adequate program are (1) loss of solid waste management grant funds (sec. 4007(b)); and (2) direct U. S. Environmental Protection Agency involvement in local solid waste management (secs. 3005, 3006). EPA, it should be noted, can directly enforce its guidelines for solid waste management if an imminent environmental or public health hazard is present (sec. 7003).

The fundamental goal of the federal Act is to convert existing dump facilities to sanitary landfills--which will be defined by EPA according to criteria scheduled for promulgation this summer. The Act also mandates the closure of open dumps. To accomplish this, relocation of municipal facilities will sometimes be required. The draft EPA guidelines, for example, require relocation where the facility is in close proximity to an airport--as is the case in Dillingham, unless it can be determined that the facility does not cause a conflict between birds and air traffic. Because HB 95 would deny the department the enforcement authority necessary to carry out the federal guidelines, and because the bill defines "sanitary landfill" to include open dumps--no matter how great the hazards they pose to the environment and human life--the likely consequence of its enactment would be substantial direct federal control over Alaska's solid waste problems. This would not only make solid waste control substantially more onerous on Alaska's municipalities, but would add considerable ammunition to the assertion that Alaska is incapable of managing its own affairs.

HOUSE BILL NO. 95

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to sanitary landfills."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.020 is amended by adding a new paragraph to read:

(12) require relocation of municipal sanitary landfills; if the municipality has not received patent to the total amount of land for which it is eligible under AS 29.18.201 - 29.18.213, and if exercise of the municipality's power of eminent domain would be required to provide a suitable relocation site, the department may not require relocation until a suitable relocation site becomes available without requiring the use of the power of eminent domain.

* Sec. 2. AS 46.03.900 is amended by adding a new paragraph to read:

(26) "sanitary landfill" means a land area used for the disposal of solid waste.

FROM: Ernst W. Mueller
Commissioner
Department of Environmental Conservation

SUBJECT: HB 95

House Bill 95 relating to sanitary landfills, is the same as HB 707 introduced during the last session. The remarks which follow are substantially the same as our previous comments. The immediate focus of the bill appears to be to assist the City of Dillingham in its opposition to the department's attempts to alleviate the public safety and environmental hazards created by that city's dump. That matter has long been in the courts. In the long run, however, this bill could preclude approval of Alaska's solid waste management plan by the U. S. Environmental Protection Agency. Aside from being an embarrassment to a state trying to demonstrate its environmental responsibility, EPA disapproval would also involve a loss of federal solid waste management funds to the state, and, in the future, local governments, and may very well result in increased federal involvement in solid waste management in Alaska.

In analyzing the bill, it is important to understand the concept of a "sanitary landfill." A sanitary landfill has been universally defined as a solid waste facility sited to avoid safety, health and environmental hazards, confined to the smallest practicable area, and covered on a daily basis. Over the past several years, the Department of Environmental Conservation has worked closely with Alaska municipalities to convert their "dumps" to "sanitary landfills." Normally, this can be accomplished without requiring the closing of the existing facility. The program, I believe, has met with a substantial amount of success.

In some cases, however, cooperation has not been enough, and enforcement action is necessary. The City of Dillingham provides a case in point. Because of its location, the Dillingham dump creates both water pollution and public safety hazards. The proximity of the dump to the airport is the department's greatest concern. Dumps--particularly poorly operated ones--attract birds, which in turn threaten air safety. A near catastrophe in Homer in September, 1976, which was disclosed at hearings on the Dillingham facility, illustrates well the magnitude of that threat. A Wien 737 jet with 52 passengers encountered a flock of sea gulls upon takeoff. One engine exploded and another stalled as several birds were ingested into the jet engines. Thankfully, the pilot was able to restart one engine and return to Homer without crashing into the sea. The cost to Wien from this one incident exceeded $250,000.

Because of this hazard, dumps located close to airports must, in certain circumstances, be relocated. Dillingham has recognized that this is the case with their facility, but has been, in our view, less than aggressive

in finding other sites. HB 95, by precluding the department from directing relocation in the event that eminent domain is necessary, would substantially impair the department's ability to reduce adverse impacts associated with local dumps. While we are confident that relocation of the Dillingham facility can be accomplished without the use of eminent domain, the bill may well thwart necessary remedial action in future cases.

This is particularly true in light of the Resource Conservation and Recovery Act, passed by Congress in 1976 (PL 94-580). The Act authorizes the establishment of minimum standards for both hazardous waste disposal and solid waste management in general (secs. 3004, 4002), and provides states with the opportunity to develop solid waste programs to implement those standards (secs. 3006, 4007). My department is working hard to develop such a state program. The primary consequences of failure to develop an adequate program are (1) loss of solid waste management grant funds (sec. 4007(b)); and (2) direct U. S. Environmental Protection Agency involvement in local solid waste management (secs. 3005, 3006). EPA, it should be noted, can directly enforce its guidelines for solid waste management if an imminent environmental or public health hazard is present (sec. 7003).

The fundamental goal of the federal Act is to convert existing dump facilities to sanitary landfills--which will be defined by EPA according to criteria scheduled for promulgation this summer. The Act also mandates the closure of open dumps. To accomplish this, relocation of municipal facilities will sometimes be required. The draft EPA guidelines, for example, require relocation where the facility is in close proximity to an airport--as is the case in Dillingham, unless it can be determined that the facility does not cause a conflict between birds and air traffic. Because HB 95 would deny the department the enforcement authority necessary to carry out the federal guidelines, and because the bill defines "sanitary landfill" to include open dumps--no matter how great the hazards they pose to the environment and human life--the likely consequence of its enactment would be substantial direct federal control over Alaska's solid waste problems. This would not only make solid waste control substantially more onerous on Alaska's municipalities, but would add considerable ammunition to the assertion that Alaska is incapable of managing its own affairs.

Taken from Departmental Regulations

18 AAC 60.130. DEFINITIONS. Unless the context indicates otherwise, in this chapter:

(1) "commissioner" means the commissioner of the Department of Environmental Conservation;

(2) "department" means the Department of Environmental Conservation;

(3) "hazardous waste" means waste that is capable of causing injury, disease or impairment of health, or property damage, including but not limited to poisons, pesticides, acids, caustics, infectious or pathological wastes, radioactive materials, explosive materials and oil and petroleum products;

(4) "incineration" means the process of burning solid, liquid or gaseous combustible wastes to gases and a residue, within an incinerator;

(5) "incinerator" means any equipment, device or contrivance excluding fireplaces and burn barrels, used for the controlled thermal reduction of solid waste;

(6) "landfill" means a land area used for the disposal of solid waste;

(7) "leachate" means water that has percolated through solid waste and contains dissolved or suspended portions from the solid waste;

(8) "lift" means a compacted layer of solid waste and its overlying earth cover in a landfill;

(9) "open burning" means the burning of any material such that the products of combustion are emitted directly into the ambient air without passing through a stack or flare;

(10) "permit" means written authorization from the department;

(11) "person" means any individual, public or private corporation, political subdivision, government agency, municipality, industry, copartnership, association, firm, trust, estate, or any other entity whatsoever;

(12) "public litter receptacle" means a container provided for the public, as a convenience, in order to dispose of solid waste;

(13) "putrescible waste" means material capable of being decomposed so as to cause nuisance or obnoxious odors;

(14) "reclamation facility" means a facility in which solid waste is stored, dismantled or reprocessed to recover salvageable materials for purposes of sale or reuse.

HOUSE BILL NO. 97

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to historic, prehistoric, and archeological resources."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 41.35.230(4) is amended to read:

(4) "historic, prehistoric and archeological resources" includes deposits, structures, ruins, sites, buildings, graves, artifacts, fossils, or other objects of antiquity which provide information pertaining to the historical or prehistorical culture of people in the state as well as to the natural history of the state <u>but does not include fragments of fossilized ivory which can be removed without excavation and which are not located on state monuments or historic sites</u>.

Bill Hamble 274-4676 - Approved
Terry M. Williams
Fossilized fragment can provide archeological info often associated with early finds
Legal ' state lands - wouldn't change Antiquities Act or Fed + private lands it would still be illegal. Likely to cause enforcement problems on other lands.
Vague as to what "fragment" is - Could be important find.
Amendment will lead to deletions other provisions Historic Preservation Act.
Fed. objection requested - take action on sale "equity +" in all artifacts on Fed. lands

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M January 20, 1979

SUBJECT: Criminal penalties for possession of artifacts (Work Order No. 5826)

TO: Representative Nels A. Anderson, Jr.

FROM: James A. McKenzie
Legislative Counsel

In this work order I was asked to construct a solution to the problem of administrative approval being required for removal of relatively insignificant artifacts from state land. The enclosed bill amends the definition of "historic, prehistoric, and archeological resources" in the Alaska Historic Preservation Act to exclude fragments of fossilized ivory which can be removed without excavation and which are not located on state monuments or historic sites.

It can be expected that this type of exception will cause some problems in enforcement of the Act. According to the House Resources committee report on the Act, a copy of which is enclosed, "Testimony was presented to the committee indicating that in the absence of this or similar legislation, an increasing number of tourists, souvenir hunters, and amateur artifact diggers can soon be expected to seriously disturb the existing archeological remains of Alaska's indigenous cultural groups." Richard Engen, Director of Libraries and Museums, feels that a complete ban on removal of artifacts from state land without a permit is necessary to discourage souvenir hunters from digging up and possibly damaging artifacts of substantial historical value. Proving that someone obtained an artifact by excavation is difficult unless the excavating is observed, but proof of possession is much easier. Hence, even though the exception in this bill does not apply to the excavation of fossilized ivory, it could increase the risk that excavation will occur. It is possible as well that some fragments of fossilized ivory may be of historical value. Finally, it should be noted that existing law provides that nothing in the Alaska Historic Preservation Act diminishes the cultural rights and responsibilities of persons of aboriginal descent or infringes upon

their right of possession and use of those resources which may be considered of historic, prehistoric, or archeological value. AS 41.35.020.

In sum, I was unable to construct a wholly satisfactory solution to the problem you raised because the basic policy of the Alaska Historic Preservation Act is to discourage souvenir hunters, while the likely result of any exception is to encourage them.

JAMcK:jdn

Enclosure

Chapter 35 Alaska Historic Preservation Act

Section
220. Enforcement authority
230. Definitions
240. Title of chapter

Legislative committee report. — For report on ch. 130, SLA 1971 (HCSSB 119 am H), see 1971 House Journal, p. 579.

Sec. 41.35.010. Declaration of policy. It is the policy of the state to preserve and protect the historic, prehistoric and archeological resources of Alaska from loss, desecration and destruction so that the scientific, historic and cultural heritage embodied in these resources may pass undiminished to future generations. To this end, the legislature finds and declares that the historic, prehistoric and archeological resources of the state are properly the subject of concerted and coordinated efforts exercised on behalf of the general welfare of the public in order that these resources may be located, preserved, studied, exhibited and evaluated. (§ 1 ch 130 SLA 1971)

Sec. 41.35.020. Title to historic, prehistoric and archeological resources; local display. (a) The state reserves to itself title to all historic, prehistoric and archeological resources situated on land owned or controlled by the state, including tideland and submerged land, and reserves to itself the exclusive right of field archeology on state-owned or controlled land. However, nothing in this chapter diminishes the cultural rights and responsibilities of persons of aboriginal descent or infringes upon their right of possession and use of those resources which may be considered of historic, prehistoric or archeological value.

(b) Although title to historic, prehistoric and archeological resources is in the state, local cultural groups may obtain from the state, or retain, for study or display, artifacts and other items of these resources from their respective cultures or areas if the advisory committee created in § 110 of this chapter finds that (1) the group has a durable building with weatherproof and fireproof construction and humidity control and other factors necessary to serve as a museum which will assure safe preservation of the items, (2) the item sought to be obtained is not one for which there is an undue risk of damage during transportation, and (3) the item sought to be obtained or retained is not one requiring special treatment or care beyond the ability or means of the group requesting it. A group retaining such an item or obtaining one from the state shall house it in the museum building and shall make every reasonable effort to assure its safe preservation. If the advisory committee finds that a local cultural group is not properly taking care of an item the group shall return it to the department. (§ 1 ch 130 SLA 1971)

Sec. 41.35.030. Designation of monuments and historic sites. Upon the recommendation of the Historic Sites Advisory Committee, the governor may declare by public order any particular historic, prehistoric or archeological structure, deposit, site or other object of scientific or historic interest that is situated on land owned or controlled by the state to be a state monument or historic site and he may designate as a part of the monument or site as much land as is considered necessary for the proper access, care and management of the object or site to be protected. When an object or site is situated on land held in private ownership, it may be declared a state monument or historic site in the same manner, with the written consent of the owner. (§ 1 ch 130 SLA 1971)

Sec. 41.35.040. Administration and financial support of monuments and historic sites. State-owned monuments, sites and other historic, prehistoric or archeological properties owned or purchased by the state are under the control of the Department of Natural Resources and their maintenance shall be covered in the appropriations made to that department. Privately owned state monuments or historic sites are eligible to receive state support for their maintenance, restoration and rehabilitation if they are kept accessible to the general public and application for support is made in conformity with regulations adopted by the commissioner of natural resources. (§ 1 ch 130 SLA 1971)

Sec. 41.35.050. Regulations. The commissioner of natural resources shall adopt regulations to carry out the purposes of this chapter. (§ 1 ch 130 SLA 1971)

Sec. 41.35.060. Power to acquire historic, prehistoric or archeological properties. (a) The department, with the recommendation of the Historic Sites Advisory Committee, may acquire real and personal properties that have statewide historic, prehistoric or archeological significance by gift, purchase, devise or bequest. The department shall preserve and administer property so acquired. The department may acquire property adjacent to the property having historic, prehistoric or archeological significance when it is determined to be necessary for the proper use and administration of the significant property.

(b) If an historic, prehistoric or archeological property which has been found by the department, upon the recommendation of the Historic Sites Advisory Committee, to be important for state ownership is in danger of being sold or used so that its historic, prehistoric or archeological value will be distroyed or seriously impaired, or is otherwise in danger of destruction or serious impairment, the department may establish the use of the property in a manner necessary to preserve its historic, prehistoric or archeological character or value. If the owner of the property does not wish to follow the restrictions of the department, the department may acquire the property by eminent domain under AS 09.55.240 — 09.55.460. (§ 1 ch 130 SLA 1971)

Sec. 41.35.070. Preservation of historic, prehistoric and archeological resources threatened by public construction. (a) The department shall locate, identify and preserve in suitable records information regarding historic, prehistoric and archeological sites, locations and remains. The information shall be submitted to the heads of the executive departments of the state.

(b) Before public construction or public improvement of any nature is undertaken by the state, or by a governmental agency of the state or by a private person under contract with or licensed by the state or governmental agency of the state, the department may survey the affected area to determine if the area contains historic, prehistoric or archeological values.

(c) If the department determines that historic, prehistoric or archeological sites, locations or remains will be adversely affected by the public construction or improvement, the proposed public construction or improvement may not be commenced until the department has performed the necessary investigation, recording and salvage of the site, location or remains. All investigation, recording and salvage work shall be performed as expeditiously as possible so that no state construction project will be unduly impaired, impeded or delayed.

(d) If in the course of performing public construction or improvements, historic, prehistoric or archeological sites, locations, remains or objects are discovered, the department shall be notified and its concurrence shall be requested in continuing the construction or improvement. Upon receipt of this notice, the department shall survey the area to determine whether the area contains historic, prehistoric or archeological data which should be preserved in the public interest. The survey shall be conducted as expeditiously as possible. If, as a result of the survey, it is determined that (1) this data exists in the area, (2) the data has exceptional historic, prehistoric or archeological significance, and should be collected and preserved in the public interest, and (3) it is feasible to collect and preserve the data, the department shall perform the necessary work to collect and preserve the data. This work shall be performed as expeditiously as possible.

(e) If the concurrence of the department, required under (b) and (c) of this section, is not obtained after 90 days from the filing of a request for its concurrence to proceed with the project, the agency or person performing the construction or improvement may apply to the governor for permission to proceed without that concurrence and the governor may take the action he considers best in overruling or sustaining the department.

(f) The costs of investigation, recording and salvage of the site shall be reimbursed by the agency sponsoring the construction project.

(g) Notwithstanding (a) — (f) of this section, all actions to stop any project must first be approved in writing by the commissioner of natural resources. (§ 1 ch 130 SLA 1971; am § 1 ch 112 SLA 1974)

Revisor's note (1971). — In ch. 130, SLA 1971, subsection (g) referred to "(a) and (f)." However, the 1974 amendment adding (g) read "(a) — (f)," and the text has been corrected here. (See 1974 House Journal, p. 1251).

Effect of amendment. — The 1974 amendment substituted "department" for "state archeologist" throughout the section, deleted "in cooperation with the state archeologist" in the first sentence of subsection (c) and in the fourth sentence of subsection (d), substituted "its concurrence" for "his concurrence" in the first sentence of subsection (d) and in subsection (e), and deleted "of the archeologist" following "all actions" in subsection (g).

Sec. 41.35.080. Permits. The commissioner may issue a permit for the investigation, excavation, gathering or removal from the natural state, of any historic, prehistoric or archeological resources of the state. A permit may be issued only to persons or organizations qualified to make the investigations, excavations, gatherings or removals and only if the results of these authorized activities will be made available to the general public through institutions and museums interested in disseminating knowledge on the subjects involved. If the historic, prehistoric or archeological resource involved is one which is, or is located on a site which is, sacred, holy or of religious significance to a cultural group, the consent of that cultural group must be obtained before a permit may be issued under this section. (§ 1 ch 130 SLA 1971; am § 2 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "with the advice and concurrence of the state archeologist" following "commissioner" near the beginning of the first sentence.

Sec. 41.35.090. Notice required of private persons. Before any construction, alteration or improvement of any nature is undertaken on a privately owned, officially designated state monument or historic site by any person, he shall give the department three months notice of intention to construct on, alter or improve it. Before the expiration of the three-month notification period, the department shall either begin eminent domain proceedings under § 60(b) of this chapter or undertake or permit the recording and salvaging of any historic, prehistoric or archeological information considered necessary. (§ 1 ch 130 SLA 1971; am § 3 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "and the state archeologist" following "department" in the first sentence.

Sec. 41.35.100. Excavation and removal of historic, prehistoric or archeological remains on private land. Before any historic, prehistoric or archeological remains are excavated or removed from private land by the department, the written approval of the owner shall first be secured. When the value of the private land is diminished by the excavation or removal, the owner of the land shall be compensated for the loss at a monetary sum mutually agreed on by the department and

the owner or at a monetary sum set by the court. (§ 1 ch 130 SLA 1971; am § 4 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "or the state archeologist" following "department" in the first sentence.

Sec. 41.35.110. Historic sites advisory committee. There is created in the Department of Natural Resources the Historic Sites Advisory Committee. (§ 1 ch 130 SLA 1971)

Sec. 41.35.120. Composition of committee. The committee consists of the following persons:

(1) the director of the Alaska State Museum;

(2) the state liaison officer appointed under the National Historic Preservation Act of 1966, Public Law 89-665 (80 Stat. 915);

(3) three persons with professionally relevant backgrounds appointed from each of the following fields: history, architecture and archeology; and

(4) two persons appointed to represent indigenous ethnic groups. (§ 1 ch 130 SLA 1971; am §§ 5, 6 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment substituted "director of the Alaska State Museum" for "state archeologist" in paragraph (1), and in paragraph (3) inserted "each of" and deleted anthropology, paleontology, geology and natural history from the list of fields.

Sec. 41.35.130. Appointment of members. Members of the committee are appointed by the governor and confirmed by the legislature meeting in joint session. The members of the committee shall serve at the pleasure of the governor. (§ 1 ch 130 SLA 1971)

Sec. 41.35.140. Term of membership. The term of office for a member of the committee is three years, except for those who are members by virtue of their positions with the state. They serve for as long as they remain in the position by virtue of which they are members of the committee. A member appointed to fill a vacancy serves for the unexpired term of the member he succeeds. Of those members listed under § 120(3) and (4) of this chapter, upon initial appointment, one shall serve for one year, two for two years, and two for three years. (§ 1 ch 130 SLA 1971)

Sec. 41.35.150. Compensation. The members of the committee serve without compensation but are entitled to per diem and travel expenses authorized by law for other boards and commissions. (§ 1 ch 130 SLA 1971)

Cross reference.— As to transportation and per diem expenses for members of boards, commissions, etc., see AS 39.20.180.

Sec. 41.35.160. Officers. At the first meeting of each year, the committee shall elect a chairman from among its members. (§ 1 ch 130 SLA 1971)

Sec. 41.35.170. Meetings and quorum. The committee shall meet at least twice a year. Additional meetings may be called by the chairman or by petition of at least five members. Five members of the committee constitutes a quorum. (§ 1 ch 130 SLA 1971)

Sec. 41.35.180. Duties of the committee. The Historic Sites Advisory Committee shall

(1) develop criteria for the evaluation of state monuments and historic sites and all real and personal property which may be considered to be of historic, prehistoric or archeological significance as would justify their acquisition and ownership by the state;

(2) cooperate with the Department of Natural Resources in formulating and administering a statewide historic sites survey under the National Historic Preservation Act of 1966, Public Law 89-665 (80 Stat. 915);

(3) review those surveys and historic preservation plans that may be required, and approve properties for nomination to the National Register as provided for in the National Historic Preservation Act of 1966, Public Law 89-665 (80 Stat. 915);

(4) provide necessary assistance to the governor and the legislature for achieving balanced and coordinated state policies and programs for the preservation of the state's historic, prehistoric and archeological resources.

(5) consult with local historical district commissions regarding the establishment of historical districts under AS 29.48.108 — 29.48.110 and the approval of project alterations under AS 45.98.040; recommend, if appropriate, the formulation of additional criteria for the designation of historical districts under AS 29.48.110(b); approve plans for and evaluate the suitability of specific structures for purposes of loan eligibility and continuance under the historical district revolving loan fund (AS 45.98); and consult with the Department of Commerce and Economic Development relative to the adoption of regulations for historical district loans under AS 45.98. (§ 1 ch 30 SLA 1971; am § 7 ch 112 SLA 1974; am § 4 ch 139 SLA 1977)

Effect of amendments. — The 1974 amendment deleted "and the state archeologist" following "Department of Natural Resources" in paragraph (2).

The 1977 amendment added paragraph (5).

Editor's note. — Section 1, ch. 139, SLA 1977, provides: "INTENT. It is the intent of the legislature to foster an awareness of the need to preserve our historic past to protect those visible aspects of our invaluable heritage so that present and future generations may continue to be enriched by the originality and strength of Alaska's architectural and cultural beginnings."

Sec. 41.35.190. Powers of chairman. Subject to available appropriations the chairman may, with the concurrence of a majority of the committee, employ necessary personnel and may contract for the services of experts and other persons who may be needed. (§ 1 ch 130 SLA 1971)

Sec. 41.35.200. Unlawful acts. (a) It is unlawful for a person to appropriate, excavate, remove, injure, or destroy, without a permit from the commissioner, any historic, prehistoric or archeological resources of the state.

(b) It is unlawful for a person to possess, sell, buy or transport within the state, or offer to sell, buy or transport within the state, historic, prehistoric or archeological resources taken or acquired in violation of this section or 16 U.S.C. 433.

(c) No person may unlawfully destroy, mutilate, deface, injure, remove or excavate a gravesite or a tomb, monument, gravestone or other structure or object at a gravesite, even though the gravesite appears to be abandoned, lost or neglected.

(d) An historic, prehistoric or archeological resource which is taken in violation of this section shall be seized by any person designated in § 220 of this chapter wherever found and at any time. Objects seized may be disposed of as the commissioner determines by deposit in the proper public depository. (§ 1 ch 130 SLA 1971; am § 8 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "knowingly" preceding "possess, sell, buy or transport" near the beginning of subsection (b).

Sec. 41.35.210. Penalties. A person who violates a provision of this chapter is guilty of a misdemeanor, and upon conviction is punishable by a fine of $1,000, or by imprisonment for not more than six months, or by both. (§ 1 ch 130 SLA 1971)

Sec. 41.35.220. Enforcement authority. The following persons are peace officers of the state and shall enforce this chapter:

(1) an employee of the department authorized by the commissioner;

(2) a peace officer in the state;

(3) any other person authorized by the commissioner. (§ 1 ch 130 SLA 1971)

Cross reference. — For definition of "peace officer," see AS 01.10.060(6).

Sec. 41.35.230. Definitions. In this chapter, unless the context otherwise requires,

(1) "commissioner" means the commissioner of natural resources;

(2) "committee" means the Historic Sites Advisory Committee;

(3) "department" means the Department of Natural Resources;

(4) "historic, prehistoric and archeological resources" includes deposits, structures, ruins, sites, buildings, graves, artifacts, fossils, or other objects of antiquity which provide information pertaining to the historical or prehistorical culture of people in the state as well as to the natural history of the state. (§ 1 ch 130 SLA 1971)

Sec. 41.35.240. Title of chapter. This chapter may be cited as the Alaska Historic Preservation Act. (§ 1 ch 130 SLA 1971)

Bill -

You might ask Dick or Bill Youngsen how Sec. 41.35.020 (marked section) is applied.?

Chapter 35 Alaska Historic Preservation Act

Section
220. Enforcement authority
230. Definitions
240. Title of chapter

Legislative committee report. — For report on ch. 130, SLA 1971 (HCSSB 119 am H), see 1971 House Journal, p. 579.

Sec. 41.35.010. Declaration of policy. It is the policy of the state to preserve and protect the historic, prehistoric and archeological resources of Alaska from loss, desecration and destruction so that the scientific, historic and cultural heritage embodied in these resources may pass undiminished to future generations. To this end, the legislature finds and declares that the historic, prehistoric and archeological resources of the state are properly the subject of concerted and coordinated efforts exercised on behalf of the general welfare of the public in order that these resources may be located, preserved, studied, exhibited and evaluated. (§ 1 ch 130 SLA 1971)

Sec. 41.35.020. Title to historic, prehistoric and archeological resources; local display. (a) The state reserves to itself title to all historic, prehistoric and archeological resources situated on land owned or controlled by the state, including tideland and submerged land, and reserves to itself the exclusive right of field archeology on state-owned or controlled land. However, nothing in this chapter diminishes the cultural rights and responsibilities of persons of aboriginal descent or infringes upon their right of possession and use of those resources which may be considered of historic, prehistoric or archeological value.

(b) Although title to historic, prehistoric and archeological resources is in the state, local cultural groups may obtain from the state, or retain, for study or display, artifacts and other items of these resources from their respective cultures or areas if the advisory committee created in § 110 of this chapter finds that (1) the group has a durable building with weatherproof and fireproof construction and humidity control and other factors necessary to serve as a museum which will assure safe preservation of the items, (2) the item sought to be obtained is not one for which there is an undue risk of damage during transportation, and (3) the item sought to be obtained or retained is not one requiring special treatment or care beyond the ability or means of the group requesting it. A group retaining such an item or obtaining one from the state shall house it in the museum building and shall make every reasonable effort to assure its safe preservation. If the advisory committee finds that a local cultural group is not properly taking care of an item the group shall return it to the department. (§ 1 ch 130 SLA 1971)

Sec. 41.35.030. Designation of monuments and historic sites. Upon the recommendation of the Historic Sites Advisory Committee, the governor may declare by public order any particular historic, prehistoric or archeological structure, deposit, site or other object of scientific or historic interest that is situated on land owned or controlled by the state to be a state monument or historic site and he may designate as a part of the monument or site as much land as is considered necessary for the proper access, care and management of the object or site to be protected. When an object or site is situated on land held in private ownership, it may be declared a state monument or historic site in the same manner, with the written consent of the owner. (§ 1 ch 130 SLA 1971)

Sec. 41.35.040. Administration and financial support of monuments and historic sites. State-owned monuments, sites and other historic, prehistoric or archeological properties owned or purchased by the state are under the control of the Department of Natural Resources and their maintenance shall be covered in the appropriations made to that department. Privately owned state monuments or historic sites are eligible to receive state support for their maintenance, restoration and rehabilitation if they are kept accessible to the general public and application for support is made in conformity with regulations adopted by the commissioner of natural resources. (§ 1 ch 130 SLA 1971)

Sec. 41.35.050. Regulations. The commissioner of natural resources shall adopt regulations to carry out the purposes of this chapter. (§ 1 ch 130 SLA 1971)

Sec. 41.35.060. Power to acquire historic, prehistoric or archeological properties. (a) The department, with the recommendation of the Historic Sites Advisory Committee, may acquire real and personal properties that have statewide historic, prehistoric or archeological significance by gift, purchase, devise or bequest. The department shall preserve and administer property so acquired. The department may acquire property adjacent to the property having historic, prehistoric or archeological significance when it is determined to be necessary for the proper use and administration of the significant property.

(b) If an historic, prehistoric or archeological property which has been found by the department, upon the recommendation of the Historic Sites Advisory Committee, to be important for state ownership is in danger of being sold or used so that its historic, prehistoric or archeological value will be distroyed or seriously impaired, or is otherwise in danger of destruction or serious impairment, the department may establish the use of the property in a manner necessary to preserve its historic, prehistoric or archeological character or value. If the owner of the property does not wish to follow the restrictions of the department, the department may acquire the property by eminent domain under AS 09.55.240 — 09.55.460. (§ 1 ch 130 SLA 1971)

Sec. 41.35.070. Preservation of historic, prehistoric and archeological resources threatened by public construction. (a) The department shall locate, identify and preserve in suitable records information regarding historic, prehistoric and archeological sites, locations and remains. The information shall be submitted to the heads of the executive departments of the state.

(b) Before public construction or public improvement of any nature is undertaken by the state, or by a governmental agency of the state or by a private person under contract with or licensed by the state or governmental agency of the state, the department may survey the affected area to determine if the area contains historic, prehistoric or archeological values.

(c) If the department determines that historic, prehistoric or archeological sites, locations or remains will be adversely affected by the public construction or improvement, the proposed public construction or improvement may not be commenced until the department has performed the necessary investigation, recording and salvage of the site, location or remains. All investigation, recording and salvage work shall be performed as expeditiously as possible so that no state construction project will be unduly impaired, impeded or delayed.

(d) If in the course of performing public construction or improvements, historic, prehistoric or archeological sites, locations, remains or objects are discovered, the department shall be notified and its concurrence shall be requested in continuing the construction or improvement. Upon receipt of this notice, the department shall survey the area to determine whether the area contains historic, prehistoric or archeological data which should be preserved in the public interest. The survey shall be conducted as expeditiously as possible. If, as a result of the survey, it is determined that (1) this data exists in the area, (2) the data has exceptional historic, prehistoric or archeological significance, and should be collected and preserved in the public interest, and (3) it is feasible to collect and preserve the data, the department shall perform the necessary work to collect and preserve the data. This work shall be performed as expeditiously as possible.

(e) If the concurrence of the department, required under (b) and (c) of this section, is not obtained after 90 days from the filing of a request for its concurrence to proceed with the project, the agency or person performing the construction or improvement may apply to the governor for permission to proceed without that concurrence and the governor may take the action he considers best in overruling or sustaining the department.

(f) The costs of investigation, recording and salvage of the site shall be reimbursed by the agency sponsoring the construction project.

(g) Notwithstanding (a) — (f) of this section, all actions to stop any project must first be approved in writing by the commissioner of natural resources. (§ 1 ch 130 SLA 1971; am § 1 ch 112 SLA 1974)

Revisor's note (1971). — In ch. 130, SLA 1971, subsection (g) referred to "(a) and (f)." However, the floor amendment adding (g) read "(a) — (f)," and the text has been corrected here. (See 1971 House Journal, p. 1251).

Effect of amendment. — The 1974 amendment substituted "department" for "state archeologist" throughout the section, deleted "in cooperation with the state archeologist" in the first sentence of subsection (c) and in the fourth sentence of subsection (d), substituted "its concurrence" for "his concurrence" in the first sentence of subsection (d) and in subsection (e), and deleted "of the archeologist" following "all actions" in subsection (g).

Sec. 41.35.080. Permits. The commissioner may issue a permit for the investigation, excavation, gathering or removal from the natural state, of any historic, prehistoric or archeological resources of the state. A permit may be issued only to persons or organizations qualified to make the investigations, excavations, gatherings or removals and only if the results of these authorized activities will be made available to the general public through institutions and museums interested in disseminating knowledge on the subjects involved. If the historic, prehistoric or archeological resource involved is one which is, or is located on a site which is, sacred, holy or of religious significance to a cultural group, the consent of that cultural group must be obtained before a permit may be issued under this section. (§ 1 ch 130 SLA 1971; am § 2 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "with the advice and concurrence of the state archeologist" following "commissioner" near the beginning of the first sentence.

Sec. 41.35.090. Notice required of private persons. Before any construction, alteration or improvement of any nature is undertaken on a privately owned, officially designated state monument or historic site by any person, he shall give the department three months notice of intention to construct on, alter or improve it. Before the expiration of the three-month notification period, the department shall either begin eminent domain proceedings under § 60(b) of this chapter or undertake or permit the recording and salvaging of any historic, prehistoric or archeological information considered necessary. (§ 1 ch 130 SLA 1971; am § 3 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "and the state archeologist" following "department" in the first sentence.

Sec. 41.35.100. Excavation and removal of historic, prehistoric or archeological remains on private land. Before any historic, prehistoric or archeological remains are excavated or removed from private land by the department, the written approval of the owner shall first be secured. When the value of the private land is diminished by the excavation or removal, the owner of the land shall be compensated for the loss at a monetary sum mutually agreed on by the department and

the owner or at a monetary sum set by the court. (§ 1 ch 130 SLA 1971; am § 4 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "or the state archeologist" following "department" in the first sentence.

Sec. 41.35.110. Historic sites advisory committee. There is created in the Department of Natural Resources the Historic Sites Advisory Committee. (§ 1 ch 130 SLA 1971)

Sec. 41.35.120. Composition of committee. The committee consists of the following persons:

(1) the director of the Alaska State Museum;

(2) the state liaison officer appointed under the National Historic Preservation Act of 1966, Public Law 89-665 (80 Stat. 915);

(3) three persons with professionally relevant backgrounds appointed from each of the following fields: history, architecture and archeology; and

(4) two persons appointed to represent indigenous ethnic groups. (§ 1 ch 130 SLA 1971; am §§ 5, 6 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment substituted "director of the Alaska State Museum" for "state archeologist" in paragraph (1), and in paragraph (3) inserted "each of" and deleted anthropology, paleontology, geology and natural history from the list of fields.

Sec. 41.35.130. Appointment of members. Members of the committee are appointed by the governor and confirmed by the legislature meeting in joint session. The members of the committee shall serve at the pleasure of the governor. (§ 1 ch 130 SLA 1971)

Sec. 41.35.140. Term of membership. The term of office for a member of the committee is three years, except for those who are members by virtue of their positions with the state. They serve for as long as they remain in the position by virtue of which they are members of the committee. A member appointed to fill a vacancy serves for the unexpired term of the member he succeeds. Of those members listed under § 120(3) and (4) of this chapter, upon initial appointment, one shall serve for one year, two for two years, and two for three years. (§ 1 ch 130 SLA 1971)

Sec. 41.35.150. Compensation. The members of the committee serve without compensation but are entitled to per diem and travel expenses authorized by law for other boards and commissions. (§ 1 ch 130 SLA 1971)

Cross reference.— As to transportation and per diem expenses for members of boards, commissions, etc., see AS 39.20.180.

Sec. 41.35.160. Officers. At the first meeting of each year, the committee shall elect a chairman from among its members. (§ 1 ch 130 SLA 1971)

Sec. 41.35.170. Meetings and quorum. The committee shall meet at least twice a year. Additional meetings may be called by the chairman or by petition of at least five members. Five members of the committee constitutes a quorum. (§ 1 ch 130 SLA 1971)

Sec. 41.35.180. Duties of the committee. The Historic Sites Advisory Committee shall

(1) develop criteria for the evaluation of state monuments and historic sites and all real and personal property which may be considered to be of historic, prehistoric or archeological significance as would justify their acquisition and ownership by the state;

(2) cooperate with the Department of Natural Resources in formulating and administering a statewide historic sites survey under the National Historic Preservation Act of 1966, Public Law 89-665 (80 Stat. 915);

(3) review those surveys and historic preservation plans that may be required, and approve properties for nomination to the National Register as provided for in the National Historic Preservation Act of 1966, Public Law 89-665 (80 Stat. 915);

(4) provide necessary assistance to the governor and the legislature for achieving balanced and coordinated state policies and programs for the preservation of the state's historic, prehistoric and archeological resources.

(5) consult with local historical district commissions regarding the establishment of historical districts under AS 29.48.108 — 29.48.110 and the approval of project alterations under AS 45.98.040; recommend, if appropriate, the formulation of additional criteria for the designation of historical districts under AS 29.48.110(b); approve plans for and evaluate the suitability of specific structures for purposes of loan eligibility and continuance under the historical district revolving loan fund (AS 45.98); and consult with the Department of Commerce and Economic Development relative to the adoption of regulations for historical district loans under AS 45.98. (§ 1 ch 30 SLA 1971; am § 7 ch 112 SLA 1974; am § 4 ch 139 SLA 1977)

Effect of amendments. — The 1974 amendment deleted "and the state archeologist" following "Department of Natural Resources" in paragraph (2).

The 1977 amendment added paragraph (5).

Editor's note. — Section 1, ch. 139, SLA 1977, provides: "INTENT. It is the intent of the legislature to foster an awareness of the need to preserve our historic past to protect those visible aspects of our invaluable heritage so that present and future generations may continue to be enriched by the originality and strength of Alaska's architectural and cultural beginnings."

Sec. 41.35.190. Powers of chairman. Subject to available appropriations the chairman may, with the concurrence of a majority of the committee, employ necessary personnel and may contract for the services of experts and other persons who may be needed. (§ 1 ch 130 SLA 1971)

Sec. 41.35.200. Unlawful acts. (a) It is unlawful for a person to appropriate, excavate, remove, injure, or destroy, without a permit from the commissioner, any historic, prehistoric or archeological resources of the state.

(b) It is unlawful for a person to possess, sell, buy or transport within the state, or offer to sell, buy or transport within the state, historic, prehistoric or archeological resources taken or acquired in violation of this section or 16 U.S.C. 433.

(c) No person may unlawfully destroy, mutilate, deface, injure, remove or excavate a gravesite or a tomb, monument, gravestone or other structure or object at a gravesite, even though the gravesite appears to be abandoned, lost or neglected.

(d) An historic, prehistoric or archeological resource which is taken in violation of this section shall be seized by any person designated in § 220 of this chapter wherever found and at any time. Objects seized may be disposed of as the commissioner determines by deposit in the proper public depository. (§ 1 ch 130 SLA 1971; am § 8 ch 112 SLA 1974)

Effect of amendment. — The 1974 amendment deleted "knowingly" preceding "possess, sell, buy or transport" near the beginning of subsection (b).

Sec. 41.35.210. Penalties. A person who violates a provision of this chapter is guilty of a misdemeanor, and upon conviction is punishable by a fine of $1,000, or by imprisonment for not more than six months, or by both. (§ 1 ch 130 SLA 1971)

Sec. 41.35.220. Enforcement authority. The following persons are peace officers of the state and shall enforce this chapter:

(1) an employee of the department authorized by the commissioner;

(2) a peace officer in the state;

(3) any other person authorized by the commissioner. (§ 1 ch 130 SLA 1971)

Cross reference. — For definition of "peace officer," see AS 01.10.060(6).

Sec. 41.35.230. Definitions. In this chapter, unless the context otherwise requires,

(1) "commissioner" means the commissioner of natural resources;

(2) "committee" means the Historic Sites Advisory Committee;

(3) "department" means the Department of Natural Resources;

(4) "historic, prehistoric and archeological resources" includes deposits, structures, ruins, sites, buildings, graves, artifacts, fossils, or other objects of antiquity which provide information pertaining to the historical or prehistorical culture of people in the state as well as to the natural history of the state. (§ 1 ch 130 SLA 1971)

Sec. 41.35.240. Title of chapter. This chapter may be cited as the Alaska Historic Preservation Act. (§ 1 ch 130 SLA 1971)

Rep. Malone

WITNESSES TESTIFYING:

Rep. Malone-- Raising the limit to $50,000 increases the value of the bill to those communities which can use it. (Initiative in Kenai enables residents to take advantage of exemption) Lines 13-15 were added in 1973. The entire Section (a) was originally added to give local governments increased flexibility re taxing.

Concerns were expressed related to what the net effect of this change would be fiscally. Fiscal note was requested of Palmer McCarter representing the Dept. of Community and Regional Affairs. Parr pointed out that the main concern was the effect it could have on pipeline related monies.

"Alaska Taxable" was consulted. It was determined that presently North Slope, Valdez,Fairbanks North Star Borough (and Kenai by Initiative) are presently used AS29.53.025 (a)

DON GILMAN
MAYOR

The Honorable Hugh Malone
House of Representatives
State of Alaska
Pouch V
Juneau, Alaska 99811

Dear Representative Malone:

This letter is written to provide you with an analysis of the fiscal implications to the Borough of a $50,000 real property exemption. Representative Branson and I have talked about this concept via telephone, and at her suggestion the following information is provided:

1. Currently there are approximately 5,000 owner occupied residences within this Borough. The Assembly has declared that trailer units, multi-family dwelling units, living areas attached to or included in a business, are considered to be residential for the purposes of exemption as long as the owner resides at that address. There are about 4,500 hundred single family residences occupied by the owner.

2. The average assessment on land and improvements is well over $50,000, therefore we must assume that nearly all of the 4,500 residences would qualify.

3. 4,500 x $50,000 = $225,000,000 reduction of current assessed value - ($1,800,000,000 approximately).

4. With current mill rate (4.5) a loss of revenue of $1,012,500.

5. A mill rate increase of .64 mill would need to be levied on remaining assessed value ($1,575,000,000) to make up lost revenue, or 5.14 mill equivalent.

6. Oil and gas properties subject to 20 mill gas tax equals $450,000,000. With .64 mill rate increase the State would receive $288,000 less than at current rate.

In fairness it must be pointed out that businesses, vacant land, and those portions of multi-family dwellings over and above the $50,000 exemption would be having an increase in taxes both from increased assessments and increase in rates.

If I can be of further assistance please contact my office.

Sincerely,

Donald E. Gi'man, Mayor
Kenai Peninsula Borough

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Based on the assumption that those units that grant the optional $10,000 exemption would also grant the $50,000 authorized in this bill. The State would lose approximately $850,000 in revenue. Currently three of the taxing jurisdictions that grant the $10,000 current exemptions have their taxing ability limited by AS 29.53.045 & 50 and also AS 43.56.010. Therefore, any additional exemptions would decrease locally generated revenue but be offset by Oil and Gas Tax revenues. This increase in oil and gas tax revenues would be a direct dollar for dollar reduction in State General Fund.

WITNESSES TESTIFYING:

Ginny Chitwood, Municipal League

Refers to Senate rationale for removing reference to mayor's salary not being able to be reduced. The only public officials at the present time who can't have salaries reduced are judges. Senate did not want to include mayors.

Parr- Concerned about the need for balance. O'Connell agrees with Parr. Sees that the Seante wording might alllow the Coun cil or Assembly to use mayor's salary as a weapon. Would like to see the assurance that the mayor's salary not be reduced back in the bill as it was contained in HB 127. Allows mayors to keep up with the cost of living. Parr says leave statute as is or use HOuse version.

Concensus is that the House version of the bill, HB 127, replace CSSB201 as a House Committee Substitute.

Passed out with a unanimous DO PASS recommendation.

Support for HB132

February 3, 1979

The Honorable Nels A. Anderson, Jr.
Representative District 16
Pouch V
Juneau, Alaska 99811

Dear Nels:

The Choggiung, Ltd. Board, at a meeting February 7, 1979, agreed to give the City of Dillingham X number of acres at the 9 Mile pit site. This acreage will be determined by a future joint Land Selection Committee meeting. This, to the best of my knowledge, will provide an acceptable landfill site for the city. Soil Conservation Service and State Department of Environmental Conservation have both looked at the site and a ground water level test hole has been bored which proved satisfactory.

We are still under a state court Compliance Order Action 77-7216 which required that we have our landfill in operation by September 15, 1978, with final grading of old site accomplished by October 15, 1978. The civil penalty specified in this court order could amount to $225.00 per day plus an initial penalty of $1,600.00.

Our amended budget provides $30,000 towards our landfill location. The following breakdown shows the funding we still must have to operate a landfill some nine miles from our townsite area.

1. Landfill Compactor — Request $118,500.

Model	Caterpillar 170 HP 20 ton 816 -	$115,000.
Options	or	
	John Deere JD646-B's	105,000.
	Freight 32,000 # Seattle/Dlg	3,500.

Justification:

Presently a D7 Bulldozer provides both snow removal on townsite streets as well as twice weekly cover of refuse. The relocation of landfill will require one additional piece of equipment. The models above are designed for landfills.

2. Equipment Storage Building - New Site — Request $25,000.

Type — Pole construction, wood frame, insulated, concrete floor, metal skin. Size 24x30 with large garage door.

Building delivered to Dillingham	$ 9,000.
Erection	6,000.
Insulation, floor, etc.	10,000.
	$25,000.

Justification:

The new site must have adequate protection for the equipment which will allow heating during winter months and year around maintenance as required.

3. Covering Old Landfill Site — Request $70,000.

Final graveling to consist of diversion of all surface runoff water and cover of two (2) feet compacted soil.
Note: This estimate is substantially lower than previously submitted, but we plan a cheaper type of fill such as overburden. Also, the site has had another year's fill.

Justification:

State Compliance Order

4. Assistance New Site — Request $11,500.

Item — Incinerator dome type structure, approximate 40x50, construction pipe frame, chain link fence or metal skin enclosure, moveable, home built by maintenance crew.

Justification:

Department of Environmental Conservation will allow controlled burning of cardboard, etc. We must have adequate protection due to forest setting. Mr. Cherry, DEC, feels our foreman's idea is feasible. This will be also partially funded within our $30,000. local effort.

TOTAL REQUEST: $ 225,000.

Until we receive funding of some type to finance our closing of the old site and efficient operation of a new one, we will still have problems complying with the requirements of the compliance order.

Sincerely,

Laura M. Schroeder

Laura M. Schroeder
City Manager

CITY OF DILLINGHAM

P.O. BOX 191 DILLINGHAM, ALASKA 99576

TELEPHONE (907) 842-5211 or 842-5212

PROPOSED OPERATING PLAN FOR 9 MILE LANDFILL

PLANS FOR SITE

1. Fence surrounding area with chain link fence not less than 6 ft. height and gate.

2. Burm to be created with over-burden material creating a dike of at least 10 feet in height for screening as well as containment purposes. Outcome horseshoe type area.

3. Floor of area to be lined with a landfill lining material then pad of over-burden, these will prohibit any possible ground water pollution by infiltration through floor of pit.

4. Drainage ditch and culverts on right side of road to eliminate any ground water crossing into pit area.

5. Vehicle unloading area on top bank of pit with guards to protect against any danger of going over edge.

6. Enforce city ordinance requiring closed vehicles for transportation on city streets.

Have state litter statutes enforced.

OPERATING PROCEDURES

1. Site to be covered at least twice weekly. (This is current procedure.)

2. Daily attendent during summer months and Monday through Friday during period August 15th through May 30th. Seven day attendance depends on successfull recruitment.

3. Fire pump to be set up using either lake or stream for source.

4. Burnable items to be burned in dome type structure somewhere near size of 40 x 50 feet. Vehicles or trucks fully loaded with burnables could back inside. Other loads would be separated and moved inside by hand or machine.

5. Machine storage and attendent building to be built in general area. We are looking at regular cat or John Deere type equipment with compactor wheels.

COMMENTS

Department of Environmental Conservation again today approved burning. States dome type or any incinerator type permissable. Materials to be segregated such as no tires.

Current water table within allowances and by creating a higher pad with over-burden even more acceptable.

Fish & Game has stated no objections before I first approached Choggiung mid January.

Education of general public on hauling and litter control will be started immediately upon site approval.

PREDICTED START UP DATE

Request to have our compliance order set ahead to August 79 as proposed during September 78.

This will allow for evaluation of known spring breakup problem and correction by drainage and culverts.

The time extension will also allow time to erect fence, prepare site and establish an acceptable operation of new site.

UNITED STATES DEPARTMENT OF AGRICULTURE RECEIVED SEP 18 1978
SOIL CONSERVATION SERVICE

2221 East Northern Lights Blvd., Suite 129, Anchorage, Alaska 99504

SUBJECT: RB - Trip Report, Dillingham Land Fill Investigation DATE: September 15, 1978

TO: Sterling E. Powell
Water Resource Specialist
Soil Conservation Service
Anchorage, Alaska 99504

As was requested, I investigated the possibility of installing a sub-surface drainage system for land fill sites selected by the officials of the City of Dillingham. I investigated the soils and the slope of the land and it is my opinion that both sites - Tower Road and Wood River Road - can be drained. Cost of installation and operation of both sites would be high.

I also made a reconnaissance investigation of several gravel pits:

Gravel pit no. 1 - adjacent to Squaw Creek
Good site for land fill but stream pollution may develop after the pit has been used for a period of time.

7-Mile Gravel Pit
Very good site for land fill. It appears that it is away from streams and houses and it is dry.

9-Mile Gravel Pit
Good site in portion that has not been excavated deep enough to intercept underground water flow. This site can be developed for a land fill site.

Dan Conners Gravel Pit
Fair site but is adjacent to Squaw Creek. Could be developed for land fill site.

Conclusions and Recommendations:

All of the sites can be utilized for land fill sites but I feel that 7-Mile gravel pit is the best site. Cost estimates should be made on each site to determine which site would be the least costly to develop and maintain.

Before final designs are developed, a more detailed sub-surface investigation should be made to determine the need for sub-surface drains, drain depth, drain size, distance between drains, slope, outlet conditions, etc.

If for some reason the gravel pits cannot be utilized for solid waste disposal sites, I recommend that a soil scientist be requested to make an investigation in the Dillingham area to locate a better site than the Towers Road and the Wood River Road sites. I feel that sites can be located that would be much less costly to install and operate.

UNITED STATES DEPARTMENT OF AGRICULTURE
SOIL CONSERVATION SERVICE
P. O. Box F, Palmer, Alaska 99645

RECEIVED OCT 3 1978

SUBJECT: Trip Report - Dillingham Landfill Investigation DATE: September 29, 1978

TO: Louis A. Fletchar
State Soil Scientist
Soil Conservation Service
2221 E. Northern Lights Blvd.
Anchorage, Alaska 99504

In response to the request by the City of Dillingham, I located several areas that have the potential for development as landfill sites. After investigating the soil properties, drainage patterns, and accessibility of the sites it is my opinion that the city has several options open for consideration.

Site #1 - Located 1/4 to 1/2 mile east of 9-Mile Quarry Road along BLM survey trail. Area is 200 feet to the south of survey line on elevated ground, adjoining Lars Nelson's property. Depth to apparent water table exceeds 15 feet and most of the area has 12 to 15 feet of soil material that would provide excellent daily cover for a landfill. Site is nearly level and leachates would not pose a hazard to the local water quality. Access to the site would require that a road be built along the present survey trail. The road would be 1/2 mile or less in length and would cross a short segment of bog soils.

Disadvantages to this site include the distance from the city and the proximity to a proposed subdivision.

Site #2 - Dolly Herman's proposed native allotment (#5528) across from south entrance to Mile-7 Gravel Pit. This area has good potential for development. Depth to the water table is deep and there is sufficient soil material overlying gravel to provide good cover for a landfill. Depth to gravel is less than 3 feet near the road, but depth increases to 12 feet 150 feet east of road. Site #2 is smaller in usable size than site #1 and potential for pollution of Squaw Creek, although slight, is more of a consideration. Access to the area would require only a short access road with no real construction difficulties.

Site #3 - Located on Native Corporation land adjoining Dolly Herman's native allotment (the eastern boundary). This wooded area would be an excellent location. Water table, depth of soil material over gravel, and slope are all well suited for a landfill. Access could be acquired by building a road along Dolly Herman's and Richard Clark's property line. Road would have to be 1/2 to 3/4 miles long and would cross 100 to 150 yards of very wet muskeg. The muskeg could be avoided if a right-of-way could be obtained on Herman's allotment.

Site #4 - Located 3/4 mile NW on Lake Road from junction with highway on left hand side of road. Native Allotment Lot 1 #4982 and Lot 5 #4980. This site was not looked at in detail, but it appears to be an excellent location. It is well drained, nearly level, deep to gravel, and is close in to the city. Little access road would need to be built.

The suitable areas for a landfill site that are away from the airport, the Squaw Creek drainage, and with easy access, are for the most part located along the lake road. If it is not possible to acquire a site near the road, the next best location would be the higher ground 1/2 to 3/4 miles east of the lake road. The only disadvantage to locating a landfill site in that area would be the added expense of building and maintaining an access road.

Upon final selection of a solid waste disposal site I would recommend further investigations with a backhoe, the input of the Fish and Wildlife Service, and the Department of Environmental Conservation.

THIRD JUDICIAL DISTRICT

AT ANCHORAGE

STATE OF ALASKA,
Petitioner,
vs.
CITY OF DILLINGHAM,
Respondent.

No. 77-7216

STIPULATED SETTLEMENT

Whereas, the City of Dillingham (hereinafter "City") has not complied with Alaska Department of Conservation (hereinafter "ADEC") Compliance Order 77-5 dated March 21, 1977 and subsequent amendments, and

Whereas, the City desires to comply with the Compliance Order and is ready, willing, able and has in part already undertaken to comply in part, and

Whereas, the parties are desirous of an amicable settlement without the necessity of a trial,

Therefore the parties agree:

I. The City pays to ADEC the sum of Eight Hundred and Ninety Dollars ($890.00) in reimbursement to the State of Alaska for certain costs incurred by the State of Alaska in connection with review of matters set forth in the compliance order and with respect to the establishment of a new public landfill site.

II. City and ADEC agree to the following compliance dates:

1. July 15, 1978: Select and acquire property necessary for solid waste disposal site.
2. July 30, 1978: Submit completed application for solid waste disposal facility permit.
3. September 15, 1978: Commence operation of solid waste disposal facility.

4. October 15, 1978: Final grading of old dump site, including diversion of all surface run-off water around the site to present run-off water from passing through the refuse, cover with minimum of two (2) feet compacted soil, restoration and rehabilitation; written sign-off approval from ADEC.

ADEC shall review the City's Solid Waste Disposal Management Permit application promptly upon receipt and shall conduct any required on-site inspections of the proposed area without delay. If requested, ADEC shall omit and advise the City in preparation of permit applications.

III. City shall conduct a regular shoot-scare program as follows:

1. PERSONNEL - The city shall designate one or more persons to carry out the shoot-scare program.
2. TIME - The shoot-scare program will be initiated by shooting or scaring birds at the existing dumpsite and in the vicinity of the airport at least thirty minutes to the scheduled or amended touchdown time of all scheduled jet aircraft and landings of all non-scheduled jets for which the City has been given at least two hours prior notice. The program shall continue with active shooting or scaring while all such jet aircraft are on the ground and shall terminate not sooner than ten minutes after the departure of each such jet aircraft described above. The dump site and vicinity of the airport shall be monitored after the dispersal of birds during the times described in this section to prevent their return to the area.

3. NOTICE - City is responsible for determining the scheduled touchdown time or amended touchdown time for all scheduled jet aircraft. City shall provide a 24 hour contact for notification of all non-scheduled landings and shall make reasonable attempts to activate the shoot-scare program for the benefit of those nonscheduled aircraft for which two hour prior notice has not been provided.

4. METHODS - The City's shoot-scare program shall be conducted to keep birds away from the dump site and vicinity of the airport during the times provided in paragraph III - 2 and shall include shooting at birds or using noises or visual effects to frighten birds. City shall have sole discretion regarding the necessity of actually destroying birds.

5. MATERIALS - to be selected by the City in conformity with applicable laws and regulations.

IV. City shall pay the following unliquidated, civil penalty for any failure to comply with the dates given which has not been approved by the court for good cause shown.

1. Acquisition of property - $250.00 plus $50.00 for each additional day of delay.
2. Submission of application - $100.00 plus $25.00 for each additional day of delay.
3. Commencement of operation - $1,000.00 plus $100.00 for each additional day of delay.
4. Final Grading - $250.00 plus $50.00 for each additional day of delay.
5. Failure to control birds in accordance with any requirement of Part III - $100.00 for each day in which one or more violations occur.

CAT PLUS™

Gives You More For Your Landfill Equipment Dollar

Before, during, and **after** your purchase of a Cat-built machine for your sanitary landfill, CAT PLUS is working for you.

Right at the start, your Cat dealer provides a wide range of CAT PLUS product application services to help you select the right equipment match for your operation. Services that run the gamut from landfill planning and technological assistance to aid in custom engineering equipment to do your job more efficiently.

And once you know the machine you need, your Cat dealer helps you buy it, with flexible equipment financing programs that can be tailored to your individual requirements.

After delivery of your equipment, CAT PLUS works to keep it running at the lowest cost possible. Custom Track Service, Scheduled Oil Sampling and other preventive maintenance programs help you avoid trouble by warning in advance, so you can schedule service at the most convenient time. Fast, expert shop and field service. Parts Exchange Service and Major Component Exchange minimize delay and expense to get you running again if downtime does occur.

And that's not all. CAT PLUS includes operator and serviceman training courses, Cat Care Seminars, assistance in setting up maintenance and cost record systems and a lot more. Whatever it takes to give you the highest total value for your machine investment is available in your Caterpillar Dealer's exclusive CAT PLUS program.

Give your Cat dealer a call while your sanitary landfill is still in the planning stages and get this CAT PLUS "extra value" system working for you right from the start. We'd like to make you another in our long list of sanitary landfill success stories.

Cat Landfill Compactors—2 models—the 170 HP, 20 ton 816 and the 300 HP, 32 ton 826B.

Cat track-type Tractors—7 models —62 to 410 HP.

Cat Wheel Loaders—8 models— 65 to 550 HP; 1 to 12 cu. yd. buckets. (Including landfill type.)

Cat Wheel Tractor-Scrapers—12 models—standard, elevating, or tandem-powered. 150 to 950 HP. Heaped capacities 11 to 54 cu. yd.

You get more from a Caterpillar product. Because more goes into it.

CATERPILLAR

Caterpillar, Cat and ⊞ are Trademarks of Caterpillar Tractor Co.

JD646-Bs Battle Sandstone in Santa Fe Landfill

SANTA FE, N.M.—Better compaction, reduced maintenance, and fuel savings were three benefits realized when owners and operators of a sanitary landfill serving the city of Santa Fe switched from crawlers to JD646-B Compactors.

The landfill serves 55,000 people, with only ½-acre open for dumping. Andy Roybal, assistant director of environmental services, estimates the total 10-acre tract, open since 1976, will be usable until 1980. "By that time, we should have a real good park-site," says Roybal.

Two John Deere Compactors handle 176 tons of refuse per day, from junked cars to paper waste. Roybal finds they use about 30 percent less fuel than the crawlers they replaced.

"With the sandstone present on this site, and our seven-day work week, service is everything; and our John Deere dealer is great," say Roybal. "He's 85 miles away, but if I called him right now, I could set my watch by him. He'd be here in two hours."

MEMORANDUM

TO: Lisa Rudd, Chairman
Community and Regional Affairs

FROM: Representative Nels A. Anderson, Jr. ah/for NAA

SUBJECT: Back up material for HB 677

Enclosed for your information is Back up material for HB 677.

The $250,000.00 appropriation is the $144,334.00 under Landfill Closeout (Cost) plus the costs of relocation of existing dump which is $105,000.00. Together the total is $249,334.00.

The cost of maintenance of the dump is $45,800.00 which the city should take care of.

CITY OF DILLINGHAM

P.O. BOX 191 DILLINGHAM, ALASKA 99576

TELEPHONE (907) 842-5211 or 842-5212

January 10, 1978

Freeman:

Enclosed is a summary of the figures you asked for with regard to landfill, and sewage treatment costs.

As you know, the legislation has been passed regarding primary treatment for communities having a direct ocean outfall. We should qualify under these guidelines. Rob Spring of IHS was in yesterday and said it would take 6-9 months to write the regs and suggested we hold off on any decision regarding treatment plants until they are finalized. I told him we already had agreed to that.

Consequently he said IHS doesn't want to install sewer in Windmill Hill until we know what type of system to use. I can see his point.

Anyway, the time delay should aid in giving you time to work on this bill.

The enclosures are as follows:

1. Basic cost estimates from WinceCorthell for Sewage Treatment. (Perhaps now negated.)

2. Rough summary from Don Caswell on costs for landfill and treatment plant.

3. Dana Birch's estimated costs regarding landfill close out.

4. Letter from Ivan Widom to Senator Gravel about sewage treatment in Dillingham.

The staff has worked well to complete these facts. I wish you a lot of success in your venture.

LANDFILL CLOSE-OUT

field length - 140 yards/420 feet	420 ft.
field width - 75 yards/225 feet	X 225 ft.
	94,500 sq. ft.
fill depth - 2.5 feet	X 2.5 ft.
(compaction rate 25%)	236,250 cu. ft.
	÷ 27
cubic yards fill needed to cover landfill	8,750 cu. yd.
@ $7.50 per cubic yard	$7.50
cost of fill to cover landfill site	$65,625

POND

length - 40 yards/120 feet	120 ft.
width - 30 yards/90 feet	X 90 ft.
	10,800 sq. ft.
depth - 20 feet	X 20 ft.
	216,000 cu. ft.
	÷ 27
cubic yards needed to fill pond	8,000 cu. yd.
@ $7.50 per cubic yard	$7.50
cost of fill for pond	$60,000

TRUCK TIME

loading time	5 min.
dump time	10 min.
travel time - 15 miles @ 30 m.p.h	30 min.
round trip travel time	45 min.

10 loads @ 10 cubic yards = 100 cu. yd. daily
9000 cu. yards @ 100 cu. yd. daily @ 3 trucks = 30 working days

COST

gravel for landfill	$65,625
gravel for pond	$60,000
D - 7 @ $593 per day X 30 days	$17,790
Grader @ $313 per day X 3 days	$919
	$144,334 ✓

MEMO TO: GORDON RYAN

FROM: DON CASWELL

DATE: 1/9/78

SUBJECT: Costs of relocation of existing dump.

1. Clearing the new dump area

   2 weeks work by use of a Bulldozer @ 8 hrs a day
   (80 hrs x $75.00/hr) $60,000

2. Access Road construction - 1,320 feet (1/4 mile)
   1,320 feet long x 20 feet wide x 4 feet deep =
   Approximately 7,000 yds @ $10.00 yd delivered
   & spread= $40,000 + some right-of-way work $5,000 45,000

   TOTAL $105,000 ✓

SUBJECT: Costs for maintenance of any dump, existing or new.

1. Dump personnel - 2 people @ $10,000/yr each $ 20,000

2. Equipment for backfill operators
   2 hrs twice a week x 52 weeks = 104 hrs @ $75.00 7,800

3. Trenching equipment - 10 hrs/mo x 12=120 hrs @ $150/hr 18,000

   TOTAL $ 45,800

SUBJECT. Costs for sewage disposal and affiliated plant

1. Planned Sewage Plant Construction for an estimated 50,000 G.P.D. capacity for the use of both Windmill Hill area and Dillingham proper.

   Construction cost $ 1,000,000 +

2. Annual maintenance costs
   A. 2-8 hr. shifts x 7 days/wk= 112 manhours
   x $8.50/hr = $952/wk x 52 wks= $49,504/yr
   plus overtime or differential in Swing Shift
   Estimated maintenance costs $75,000 - $100,000/yr.

In all probability a minimum of 3 men would be needed to operate a full size sewage treatment plant, considering yearly vacations, extra maintenance and weekends.

The plant I supervised in the lower 48 employed 5 men on a regular basis on two 8 hr shifts, however it is a fairly complicated plant where one man doubled as a Labratory Technician to do the required sewage testing.

RE: Ambulance appropriation request for Dillingham

Dear Nels:

We wish to thank you for your support in funding for a Dillingham ambulance. We appreciate your work especially in getting legislative approval of the ambulance during last session. Last fall, we received approval from Indian Health Service to obtain a G.S.A. ambulance; this has been delayed in procurement proceedings but we are hopeful delivery will be made by the end of the year.

Realizing that this region has many pressing needs requiring State financial assistance we withdraw our request at this time.

Sincerely,

BRISTOL BAY AREA HEALTH CORPORATION

POSITION PAPER/Department of Health and Social Service

POSITION PAPER

HOUSE BILL NO. 134

"An Act making a special appropriation to the Department of Community and Regional Affairs for a grant to the City of Dillingham for the purchase of an ambulance; and providing for an effective date."

The Emergency Medical Services Section of the Division of Public Health agrees that the City of Dillingham is in need of an ambulance. It should be noted however, that the use of the ambulance should be possible outside of the city limits, especially since the hospital is not within the city limits. It also should be noted that IHS funds will probably be available to the hospital for an ambulance within a year; this ambulance has been "promised" for over a year now and probably will not be available another year.

We are also aware that because of the needs in the area, two ambulances could easily be used, especially in the summer season with fishing accidents and with the frequency which ambulances and other vehicles in small communities breakdown and are periodically disfunctional.

		Ray Metcalfe	X

Rep. Malone
Points out that the bill would legislate an "advisory" vote on the question of boundary changes. First class cities already have the authority to hold such an election.

Committee discussion centers on having such an advisory vote in both the area annexing and the area to be annexed.

Malone - People in area to be annexed or excluded could vote. Doesn't address extending vote beyond area but the municipalities could already do this.

Parr - Salchuk area is trying to secede from the Fairbanks borough. A certain amount of the pipeline tax money would go with it. The rest of the people in the borough have a stake in this decision. Parr prefers that the advisory vote be both inside and outside of the annexed area.

Malone - Has no objection to Parr's recommendation. Suggestion made that the election should be a state election and that the costs should be borne by the state.as decisions on boundaries are state decisions.

Palmer McCarter, Director of Local Assistance,Dept. of C&RA
Refers to position delivered by the dept. in 1979 (see minutes in file).

COMMITTEE ACTION: CS to be drafted which includes above suggestion.

INDIVIDUALS CONTACTED:
Dept. of C&RA
Local Boundary Commission Members
Rep. Malone
Marilyn Miller
Patty Ann Polley (Dir. of Elections)
Jack Chenoweth

WITNESSES TESTIFYING:

Rep. Malone--Bill wasintroduced last session and passed HOuse. Needed because it gives an additional element of information and helps to raise the level of public debate on an annexation issue.

On question of whom would be voting on issue--those inside as well as outside? Would you need a majority of both? Just those in annexed areas? This point is unclear in the bill.

Joan Katz --Attorney for Kodiak Borough. More information is needed before the issue is submitted to voters. Economic data, service analysis, revenue lost if annexation occurs...etc. The Advisory vote should be controlling unless there is clear and convincing evidence of need in major portion of area to be annexed. Who will be voting?

Patty Ann Polley, Director of the Division of Election

Says the state should be given responsibility for administering election. Estimated that the bill would require approximately 6 elections per year at a cost of $5000 each so approximately $30,000 would be needed. Since it is a state agency being given responsibility (Boundary Commission), the state should adminsiter the election.

Sig Strandberg , member of the Local Boundary Commission

Opposed to the passage of HB146. Apprehensive of the results. The bill would seriously erode the authority of the Local Boundary Commission as given in the Constitution. Current state law gives the state an opportunity to establish sensible boundaries. Commission should be able to determine extent of "boundaries". Boundary changes are both "political" and "economic" in nature.

Commission might be able to make the process more democratic. Annexation plan should be given more attention by the Commission.An impartial, careful review by the Local Boundary Commission is helpful. A more comprehensive report to the Legislature by the Commission would help legislature understand.

(con't)

COMMITTEE ACTION: No Action--

TAPE # 2 SIDE 1 Sections 120-1870

Vic Fischer--Gave historical background on local government. New concept of Boroughs which were seen as evolving concepts.1964 Mandatory Borough enacted. Forced incorporaton of areas into boroughs. Much controversey over this.. Further progress was made with city/borough unification allowed. Issues and problems different now than in 1968.There needs to be an evaluation of local government. Is there a need for both cities and boroughs? Boroughs were conceived as larger areas of representational government..'71 report recommends Borough Commission changed to Local Boundary Commission to keep idea of local government in mind. Take a look at whole rural issue. ...unorganized borough concept to give leeway for local governments to form slowly.There would be a gradual assumption of services. Unorganized boroughs NOT formed for taxation purposes. Hopes that Senate and House CRA committees will use an interim committee to look at needs, issues, etc. of rural communities.

Marilyn MIller -- opposed to local government handling election as outlined in HB 146. Feels that it should be a state function.

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 146

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act amending boundary change procedures of the Local Boundary Commission."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.68.010 is amended by adding new subsections to read:

(d) If 10 percent of the qualified voters of an area proposed to the Local Boundary Commission to be annexed or excluded under (a) of this section or 10 percent of the qualified voters of the city or borough to which an annexation is proposed or from which an exclusion is proposed under (a) of this section submit to the Local Boundary Commission a petition requesting an advisory vote on the proposed boundary change, the commission, after public hearing conducted in the area, shall require the city or borough to conduct an advisory vote on the proposed boundary change before rendering its decision on the proposed boundary change. When a petition requesting an advisory vote is submitted under this subsection, the Local Boundary Commission shall advise the mayor of the city or borough to which annexation is proposed or from which an exclusion is proposed that the commission has received a petition asking that an advisory vote on the proposed boundary change be conducted, and request the city council or borough assembly to conduct an advisory vote on the proposed boundary change.

(e) When the Local Boundary Commission requests a city or borough to conduct an advisory vote under (d) of this section, the city or borough shall present to the voters within the city or borough and, separately, to the voters in the area proposed for annexation or

exclusion, a ballot setting out a proposition phrased so that a voter may indicate whether he favors or opposes the proposed boundary change. The ballots shall be canvassed by the city council or borough assembly and the results certified to the Local Boundary Commission in separate classifications indicating the vote by residents of the city or borough and the vote by residents of the area which is the subject of the boundary change petition.

(f) An advisory vote may be submitted to the voters by the borough assembly or city council only

(1) at a regular election; or

(2) at a special election if that election has been called by the borough assembly or city council for the purpose of placing before the voters a question other than the proposition to be submitted under this section.

(g) When presenting a proposed boundary change to the legislature as provided under (a) of this section, the Local Boundary Commission shall also present the result of an advisory vote related to that boundary change held under this section.

(h) Subject to appropriations for the purpose, the state shall reimburse a city or borough for its costs of conducting an election held under this section in areas located outside a city or borough.

(i) The Local Boundary Commission shall adopt by regulation procedures for submitting a petition and for conducting an election under this section.

(d) If 10 percent of the qualified voters of an area proposed to the Local Boundary Commission to be annexed or excluded under (a) of this section petition for a vote on the proposed boundary change, the commission, after public hearing conducted in the area as prescribed by regulation, shall conduct an advisory vote on the proposed boundary change before rendering its decision on the proposed boundary change. The commission shall adopt by regulation procedures for submitting a petition and for conducting an election under this subsection.

(e) If a petition requesting an advisory vote is submitted under (d) of this section, the Local Boundary Commission shall advise the mayor of the municipality to which annexation is proposed or from which an exclusion is proposed that the commission has received a petition asking that an advisory vote on the proposed boundary change be conducted. If, within 60 days of receipt of notice of the Local Boundary Commission by the mayor under this subsection, 10 percent of the qualified voters of the municipality petition for a vote on the proposed boundary change, the commission shall conduct an advisory vote in that municipality on the proposed boundary change before making its decision on the proposed boundary change. An election under this subsection shall be held at the same time as an election under (d) of this section.

The Local Boundary Commission

(1) shall adopt by regulation procedures for submitting a petition and for conducting an election under this subsection;

(2) may request the lieutenant governor to enter into an agreement with a municipality by which the municipality will conduct the election under this subsection.

(f) When presenting a proposed boundary change to the legislature as provided under (a) of this section, the Local Boundary Commission shall also present the result of an advisory vote related to that boundary change held under (d) or (e) of this section.

(g) Subject to appropriations for the purpose, the state shall pay the costs of elections held under (d) and (e) of this section.

Introduced: 2/7/79
Referred: Community & Regional Affairs and Judiciary

IN THE HOUSE BY MALONE

HOUSE BILL NO. 146

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act amending boundary change procedures of the Local Boundary Commission."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.68.010 is amended by adding a new subsection to read:

(d) If 10 per cent of the qualified voters of an area proposed to the Local Boundary Commission to be annexed or excluded under (a) of this section petition for a vote on the question, the commission, after public hearing conducted in the area as prescribed by regulation, shall conduct at its expense a single advisory vote on the question before rendering its decision on the question, under procedures for petition and election developed by the commission. When presenting a proposed boundary change to the legislature as provided under (a) of this section, the commission shall also present the result of any advisory vote held under this subsection.

* The advisory vote ~~shall~~ may be conducted in both the area proposed to be annexed or excluded, and in the city or borough to which the area would be annexed. All qualified voters ~~resident~~ may vote. Ballots ~~shall be tabulated separately in each~~ in the city ~~and~~ or borough shall be tabulated separately from ballots in the area proposed to be annexed.

Article 2. Service Areas.

Section
90. Service areas

Sec. 29.63.090. Service Areas. (a) Service areas to provide special services within a borough may be established, operated, altered or abolished by the assembly by ordinance. Special services include services not provided on an areawide basis within the borough or the borough area outside cities or a higher or different level of service than that provided on an areawide basis or in the borough area outside cities. In a first class borough the assembly may exercise within a service area any power granted a first class city by general law; in a second class borough an exercise of the powers must be approved by a majority of the qualified voters residing within the service area and voting on the question at a regular or special election.

(b) The assembly may levy or authorize the levying of taxes, charges, or assessments in service areas to finance the special services.

(c) The assembly may provide for appointed or elected boards to supervise the furnishing of special services in service areas.

(d) A new service area may not be established if, consistent with the purposes of art. X of the state constitution, the new service can be provided by an existing service area, by annexation to a city, or by incorporation as a city.

(e) The assembly may exercise or delegate to a service area any powers which may be exercised by a first class borough in the area outside cities. In a second class borough, each exercised or delegated power must be approved by a majority vote at a regular or special election held within the service area. The rate of taxation and the issuance of bonds are subject to assembly approval. (§ 2 ch 118 SLA 1972)

Chapter 68. Alteration of Boundaries.

Article
1. Annexation and Exclusion (§ 29.68.010)
2. Merger and Consolidation (§§ 29.68.030—29.68.110)
3. Unification of Local Governments (§§ 29.68.240—29.68.440)
4. Dissolution (§§ 29.68.500—29.68.580)

Article 1. Annexation and Exclusion.

Section
10. Local boundary commission

Sec. 29.68.010. Local boundary commission. (a) The Local Boundary Commission may consider any proposed local government boundary change. It may present proposed changes to the

legislature during the first 10 days of any regular session. The change shall become effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

(b) In addition to the regulations governing annexation by local action adopted under AS 44.19.260, the Local Boundary Commission shall, within 90 days of September 10, 1972, establish procedures for annexation and exclusion of territory by cities and boroughs by local action. The procedures established under this subsection shall include

(1) a provision requiring that a proposed annexation and exclusion must be approved by a majority of the voters voting on the question residing within the area proposed to be annexed or excluded;

(2) provisions that municipally-owned property adjoining the municipality may be annexed by ordinance without voter approval; and

(3) provisions that an area adjoining the municipality may be annexed by ordinance without an election if all property owners and voters within the area petition the assembly or council.

(c) A boundary change effected under (a) of this section prevails over a boundary change initiated by local action, without regard to priority in time. (§ 2 ch 118 SLA 1972)

Defining boundaries is a legislative function.—The creation of municipalities, and the defining of the extent of the boundaries thereof, involve the exercise of legislative, not judicial, power. Town of Fairbanks v. Barrack, 282 F. 417 (9th Cir. 1922); In re Annexation to City of Anchorage, 16 Alaska 519, 146 F. Supp. 98 (D. Alas. 1956).

Expansion of municipal boundaries is matter of statewide concern. — Those who reside or own property in the area to be annexed have no vested right to insist that annexation take place only with their consent. The subject of expansion of municipal boundaries is legitimately the concern of the state as a whole, and not just that of the local community. Fairview Pub. Util. Dist. No. 1 v. City of Anchorage, Sup. Ct. Op. No. 61 (File Nos. 69, 71), 368 P.2d 540 (1962).

Annexation procedure may be changed.—The state may permit residents of local communities to determine annexation questions at an election. But when this has been done, the state is not irrevocably committed to that arrangement. If the citizens of the state, in adopting a constitution, decide that it is in the public interest to establish another election procedure, there is no constitutional obstacle to that course of action. Fairview Pub. Util. Dist. No. 1 v. City of Anchorage, Sup. Ct. Op. No. 61 (File Nos. 69, 71), 368 P.2d 540 (1962).

One proceeding for annexing several tracts.—See In re Town of Sitka, 11 Alaska 201 (1946).

Areas in public utility district may be annexed.—The fact that the areas are embraced within a public utility district constitutes no bar to annexation. In re Annexation to City of Anchorage, 15 Alaska 504, 129 F. Supp. 551 (D. Alas. 1955). See Fairview Pub. Util. Dist. No. 1 v. City of Anchorage, Sup. Ct. Op. No. 61 (File Nos. 69, 71), 368 P.2d 540 (1962).

Consent of voters in district required if annexation proceeds under this article. — The provision of AS 42.35.370 providing for dissolution of a utility district with the consent of the voters when "the whole or the integral part of a district becomes

annexed to an incorporated city" has application only where annexation takes place under the petition-election procedure of this article and has no application where annexation takes place under a different method established by Alaska Const., art. X, § 12. Fairview Pub. Util. Dist. No. 1 v. City of Anchorage, Sup. Ct. Op. No. 61 (File Nos. 69, 71), 368 P.2d 540 (1962).

Article 2. Merger and Consolidation.

Section		Section	
30.	Methods of merger or consolidation	70.	Report and hearing
40.	Petition	80.	Decision
50.	Review	90.	Election
60.	Investigation	100.	Assets and liabilities
		110.	Ordinances

Sec. 29.68.030. Methods of merger or consolidation. Two methods may be used to initiate merger or consolidation of home rule and general law municipalities:

(1) petition to the Local Boundary Commission under regulations adopted by the commission, or

(2) the local option method specified in §§ 40—110 of this chapter. (§ 2 ch 118 SLA 1972)

Sec. 29.68.040. Petition. (a) Residents of two or more municipalities may file a merger or consolidation petition with the Department of Community and Regional Affairs. The petition must be signed by a number of municipal voters of each municipality equal to at least 25 per cent of the number of votes cast in its last regular election.

(b) The petition includes

(1) the name and class of each municipality;

(2) the name and class of the proposed municipality;

(3) the proposed composition and apportionment of the assembly or council;

(4) maps, documents, and other information which show that the proposed municipality meets the standards for municipal incorporation. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the first sentence of subsection (a).

Sec. 29.68.050. Review. The Department of Community and Regional Affairs shall review a petition for content and signatures and shall return a deficient petition for correction or completion. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.68.060. Investigation. If the petition contains the required information and signatures, the Department of Community

and Regional Affairs shall investigate the proposal. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.68.070. Report and hearing. (a) The Department of Community and Regional Affairs shall report its findings to the Local Boundary Commission with its recommendations regarding the merger or consolidation.

(b) The Local Boundary Commission shall hold at least one public hearing in each of the municipalities included in the merger or consolidation petition, unless officials of the municipalities agree to a single hearing. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" near the beginning of subsection (a).

Sec. 29.68.080. Decision. If the Local Boundary Commission determines that the proposed municipality fails to meet the standards for incorporation, it shall reject the petition. If the commission determines that the proposed municipality meets these standards, it shall accept the petition. If the commission determines that the proposed boundaries or the composition and apportionment of the assembly or council can be altered to meet the standards, it may change the proposal and accept the petition. The decision may be appealed under the Administrative Procedure Act (AS 44.62). (§ 2 ch 118 SLA 1972)

Sec. 29.68.090. Election. (a) The Local Boundary Commission shall immediately notify the lieutenant governor of its acceptance of a merger or consolidation petition. Within 30 days after notification, the lieutenant governor shall order an election within the area to be included in the new municipality to determine whether the voters desire merger or consolidation. The election is held not less than 30 nor more than 90 days after the election order.

(b) A voter who is a resident of the area to be included within the proposed municipality may vote.

(c) The lieutenant governor shall supervise the election in the general manner prescribed by the Alaska Election Code (AS 15.05—15.60). The state shall pay all election costs.

(d) The lieutenant governor shall certify the election results. If merger or consolidation is approved, he shall, within 10 days, set a date for election of officers of the new municipality under AS 29.18.120. The election date is not less than 60 nor more than 90 days after the election order. This date is the effective date for the merger or consolidation. (§ 2 ch 118 SLA 1972)

Sec. 29.68.100. Assets and liabilities. (a) When two or more municipalities merge, one municipality succeeds to the rights, powers, duties, assets and liabilities of the others.

(b) When two or more municipalities consolidate, the newly-incorporated municipality succeeds to the rights, powers, duties, assets and liabilities of the consolidated municipalities. (§ 2 ch 118 SLA 1972)

Sec. 29.68.110. Ordinances. The ordinances, resolutions, rules, regulations, procedures and orders of the former municipalities remain in force within their respective territories until superseded by the action of the successor municipality. (§ 2 ch 118 SLA 1972)

Article 3. Unification of Local Governments.

Section
240. Unification of local governments authorized
250. Unification to be proposed by petition
260. Petition requirements
270. Review of petition
280. Call for charter commission nominations
290. Nomination of charter commission candidates
300. Qualifications of charter commission candidates
310. Composition of charter commission
320. Election
330. Requirements for approval of unification and election of charter commission
340. Charter commission organization and procedure
350. Charter preparation
360. Public hearings
370. Filing of proposed charter
380. Publication and posting of proposed charter
390. Election on charter
400. Effect of the charter after ratification
410. Assets and liabilities
420. Ordinances
430. Right to state and federal funds preserved
440. Powers of a unified municipality

Sec. 29.68.240. Unification of local governments authorized. An organized borough and all cities within the borough may unite to form a single unit of home rule local government by complying with this chapter. (§ 2 ch 118 SLA 1972)

Unification is consistent with the purpose expressed in Alaska Const., art. X, § 1, of minimizing the number of local government units. City of Douglas v. City & Borough of Juneau, Sup. Ct. Op. No. 672 (File No. 1379), 484 P.2d 1040 (1971).

Coexistence of cities and boroughs not required.—Alaska Const., art. X, § 2, merely authorizes but does not require the coexistence of cities and boroughs. City of Douglas v. City & Borough of Juneau, Sup. Ct. Op. No. 672 (File No. 1379), 484 P.2d 1040 (1971).

Sec. 29.68.250. Unification to be proposed by petition. (a) Formation of a charter commission to propose a unification charter shall be proposed by resolution of the assembly or by petition. An assembly resolution for the purpose may be adopted not more often than once every 12 months.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF NATURAL RESOURCES

DIVISION OF FOREST, LAND AND WATER MANAGEMENT

323 E. 4TH AVENUE
ANCHORAGE, ALASKA 99501

March 30, 1979

Honorable Bill Parker, Chairman
Community & Regional Affairs Committee
State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Bill:

I have a copy of Commissioner Mueller's letter to you of March 6, regarding House Bill 172.

He rightly notes that we have found the requirement for developing off-site sewage facilities in many places to be a significant obstacle to development of State owned subdivisions. The problems that Ernie cites with the absence of off-site sewage I think are very significant and ones that should not be overlooked in designing any program. The problem is actually lack of funding to develop sewage systems that would comply with State and local regulations. We have proposed to solve that problem through an enterprise bond fund which would be authorized to issue revenue bonds to develop the necessary roads, streets, sewers, etc. If this bill passes, the problems of disposal of State lands in those areas where there is insufficient on-site sewage capability will be solved.

I would like to make the point as strongly as possible that I believe that it is the responsibility of the developer regardless of whether or not it is the State to make the initial investment in the improvements to the land that makes the subdivision a benefit to the community rather than a menace.

Yours truly,

THEODORE G. SMITH
Director

WITNESSES TESTIFYING:

Ernie Mueller, Commissioner of DEC

Objects to drafting of CS which requires that program be mandatory. At the present time no municipality performs all of the services they would be required to cover under CSHB172. The State would ultimately have to provide back up. Many communities have expressed concern that they would not be able to provide the services the state now does.

The bill implies that construction standards for sewage treatment systems would be set by the municipalities. There is a need for uniformity of standards statewide. Municipalities could end up suing each other. The program should have voluntary rather than mandatory involvement. CSHB172 implies repeal of plumbing codes.
Broad approach of the bill is very objectional to the Dept.
Original bill did not deal with sewerage treatment facilities.,rather just on-lot review.

Freeman -- Provisions need to be made for a community such as Ketchikan which is 1 block wide and 3 miles long. A sewer system is not practical here.

Mueller - Enforcement should not be used instead of prevention. On-lot waste disposal is the problem. Communities should be given the right to develop viable options. Restrict bill to on-site problem. There should be minimum standards to be met
John Scribner -- refers to come of the implications of the bill.

Rep. Branson suggests that the problem be handled in 29.33.090.

Jack Chenoweth -- Stated that 46.03.720 be amended at the suggestion of Scribner.

WITNESSES TESTIFYING:

Freeman -- Rep. Parker, Rep. Freeman and Jack Chenoweth have worked together on a CS for HB 172 following the direction of the CRA Committee. CSHB 172 before the committee for discussion at this time.

Freeman feels it meets the needs of the municipalities by removing the veto power of DEC.

Joh Scribner -- Testifying for DEC. Sees problems in the proposed CS HB 172. There are no minimum standards other than those set by the municipalities.

The bill deals with more areas than just "on-site" disposal concerns as had been the original concern. Sewerage systems discussed and the implications of the bill are broader.

Problem with p. 2 Lines 20-23. Federal standards apply here and would conflict with municipalities setting standards.

COMMITTEE ACTION: Will take up bill when all members have had chance to digest CS. March 14 --Jack Chenoweth will be invited.

Freeman (4993) Marilyn Miller Dept. Environmental Conservation
Lee Sharp Chenoweth

WITNESSES TESTIFYING:

Freeman -- Cites references to DEC's role in holding up land transmission and use from "Alaska Land, A Report to the Legislature". DEC is stopping subdivisions. Land isn't getting to the people. Let municipalities handle own affairs.
Mistake on Line 20 prompts rewrite in form of Committee Substitute. (eliminates word "not")

John Scribner-- Water Program , DEC
Only 9% of cost of getting land out to the public is traceable to DEC.Local gov't can have option of reviewing subdivisions for compliance now with a request for a waiver from DEC. If the municipalities are given this responsibility, minimum standards should be set.Local governments don't have expertise and money so waiver has not been requested except in Anch.
AS 46.03.720 refers to DEC's responsibility re individual plats--this portion of statutes may also be involved in a change of approach.

Freeman -- Problem should be solved on local level. Legislature gets "heat" as DEC is a state agency. "Big Brother" approach not acceptable. Decision should be made on local level. Rep. Metcalfe thinks local gov't should have right to shoose to have DEC review rather than making it mandatory. Freeman --DEC should have advisory capacity only.

Chenoweth -- Mentioned error of "not" being included on Line 20 of HB 172

Rep. Parr suggests that Committee Substitute be drafted giving DEC review responsibility for compliance and that the municipalities be responsible for developing their own standards and that the local government have veto power.

COMMITTEE ACTION:Committee Substitute to be drafted including concepts discussed.

BILL WORK SHEET

COMMITTEE ON COMMUNITY AND REGIONAL AFFAIRS Received from

BILL NO. HB 172 re Limiting authority of DEC to require submission, review etc. of subdivision
Original Sponsor & development plans Fiscal Note Requested ~~OSRA~~ DEC 16 Feb 2604

Contacts: Freeman 4993 ✓ Lee Thorpe ✓ m. Miller ✓ 40 - 2640

LAA Legal Research contact: Chenoweth

✓ John Scribner- DEC 2604

Says this bill originated as a result of publication of "Alaska Land-A Report To The Legislaute" published by the Dept. of Natural Resources Jan. 1979 (see attached) Says that in researching problem, DEC found that in 2 areas DEC regs had seeminly caused a problem: Glen Allen--a plot of land proposed for subdividing intersected 3 regional boundaries. Div. of Lands got 3 different interpretations of DEC regs. Problem was resolved. Ted Smith doesn't feel there is a problem with the regs, according to Scribner. He was pleased with the response of DEC.

Ketchikan- parcels of state owned land was to be subdivided. There was no topsoil, only bedrock in this area. No on-site waste disposal was possible. Div. of Lands has proposed a collection system which will work.

According to Scribner, Russ Meekins appointed Oral Freeman to look into this.

Sec. 46.03.720 (a) States no person may construct, extend, install or operate a sewerage system or treatment works, or any part of a sewerage syste or treatment works, until plans for it are submitted to the department for review and the department approves them in writing and issues a written permit.

Requirement for DEC can be waived if the local government takes the responsibility. (See 18AAC 72.068

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 172

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to review and approval of subdivision and development plans by municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.090 is amended to read:

Sec. 46.03.090. PLANS FOR POLLUTION DISPOSAL. The department may require the submission of plans

(1) for sewage and industrial waste disposal or treatment or both for a publicly or privately owned or operated industrial establishment[,]; and

(2) for a community, public or private property subdivision or development only

(A) if that subdivision or development is located outside a municipality which exercises platting and subdivision approval authority under AS 29.33.150 - 29.33.240; or

(B) if, in a municipality which exercises platting and subdivision approval authority, standards applicable to the review and approval of subdivision plats have not been adopted and filed with the Department of Community and Regional Affairs in accordance with AS 29.33.155.

* Sec. 2. AS 46.03.720(a) is amended to read:

(a) Except when construction, extension or installation of a sewerage system or treatment works receives approval by the platting board of a municipality in conjunction with the review and approval of

a subdivision or dedication under AS 29.33.150 and 29.33.155, no [N.] person may construct, extend, install or operate a sewerage system or treatment works, or any part of a sewerage system or treatment works, until plans for it are submitted to the department for review and the department approves them in writing and issues a written permit.

* Sec. 3. AS 29.33.150(1) is amended to read:

(1) form, size, and other aspects of subdivisions, dedications, and vacations of land, including but not limited to, standards for review and approval of proposed subdivisions having sewerage and wastewater treatment and disposal systems, including on-lot treatment and disposal systems;

* Sec. 4. AS 29.33 is amended by adding a new section to read:

Sec. 29.33.155. STANDARDS FOR SUBDIVISIONS. The municipality shall adopt standards applicable for the review and approval of subdivisions with respect to type and location of water sources and sewerage treatment and disposal systems. A copy of the municipality's current ordinance defining standards applicable for the review and approval shall be filed with the commissioner of community and regional affairs. The municipality's ordinance shall provide that a proposed subdivision may not be approved if the subdivision does not contain soils suitable for effective absorption of discharged wastewater or if treatment and disposal results in the release of wastewater which does not meet water quality criteria defined by the municipality.

* Sec. 5. AS 29.33.160 is amended by adding a new subsection to read:

(c) The platting board may request the Department of Environmental Conservation to review and advise on proposed type and location of water sources and sewerage treatment and disposal systems for proposed subdivisions submitted for platting board review and approval.

* Sec. 6. AS 46.03.020 is amended by adding a new paragraph to read:

(12) when requested to do so by a municipality exercising platting and subdivision authority under AS 29.33.150, review proposed type and location of water sources and sewerage treatment and disposal systems for proposed subdivisions by application of the municipality's ordinances for water supply and sewerage treatment and disposal.

* Sec. 7. AS 44.47.050(5) is amended to read:

(5) maintain a library or reference file of municipal ordinances required to be kept by the department by law, serve as a clearinghouse for information useful in solution of community and regional problems, and channel to the appropriate authority requests for documents, information and services;

* Sec. 8. This Act takes effect immediately in accordance with AS 01.10.-070(c).

STATE OF ALASKA
DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

POUCH O – JUNEAU 99811

March 6, 1979

The Honorable Bill Parker
Chairman, Community and Regional
Affairs Committee
State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Chairman Parker:

Currently being considered by the Committee on Community and Regional Affairs is House Bill 172. This bill would restrict the authority of the Department of Environmental Conservation to review and approve subdivision plans for suitability for on-site waste disposal to only those areas outside the boundaries of organized municipalities. Presumably, municipalities would have the option of requiring subdivisions to meet requirements similar to those currently imposed by our regulations, or to allow them to be developed and sold without any assurance that a homebuilder can construct an on-lot sewage disposal system.

If this bill were to become law, Alaska can expect severe economic, public health, and environmental consequences. While we fully agree that local governments should take the lead in implementing land use controls through their local planning and zoning programs, many simply do not have the financial or staff resources to conduct technical review of subdivisions for their suitability for on-site waste disposal. Thus, we can expect a number will not undertake this additional task, thus assuring that many subdivisions in organized areas will not be suitable for on-site waste disposal. The present statewide review program has resulted in numerous platting changes to subdivisions to ensure that such disposal is possible, or that an alternative waste collection and disposal system is provided.

Attempts at construction of on-site waste disposal systems on inadequate soils will result in contaminated ground water, a flow of raw human body wastes across the surface of the land, or an untreated discharge to nearby waterways. Substantial threat to public health can result from direct contact with these uncontrolled sewage discharges, or by ingestion of contaminated well water.

In addition to the public health implications, passage of this bill could severely stall new housing starts in Alaska. Presently, Federal home loan financing and guarantee programs require certification by a State or local government agency that land is suitable for on-lot waste disposal before a loan will be approved for a home without community sewer service. Alaskan banks, which administer these Federal funds, inform us that approximately 50 percent of new home loans in Alaska have some Federal funding or guarantee. Naturally, other home loan programs are available, but usually at a substantially higher interest rate.

Review and certification for on-lot waste disposal suitability can occur at either the subdivision-wide level, or on an individual lot basis. Because soil borings must be taken, and analysis must be made by qualified persons, it is far more economical to conduct these investigations on a subdivision-wide basis. If this Department's review and approval of waste disposal capability on a subdivision-wide basis is eliminated in organized municipalities, lending institutions will simply require an investigation on each and every lot before granting a Federal home loan. This will result in greater expense to the home buyer. The Department of Environmental Conservation currently performs single-lot reviews in those areas where subdivision-wide review was not conducted, generally on small or older subdivisions. Because of the additional workload associated with a change from a subdivison-wide to a lot-by-lot review, I anticipate that it will be necessary to add five to ten additional staff to conduct the reviews required by banks handling Federal lending and guarantee programs. I must emphasize that the banks with which we have discussed this program simply will not make such home loans unless they can be assured by a responsible government agency that on-site waste disposal is feasible. Neither they, nor the Federal Government, will take the risk of losing an investment because of a failing waste disposal system, or a contaminated water supply.

If a builder is able to finance his home in another manner, and constructs a waste disposal system which subsequently fails, he may find himself with a home he cannot sell. This situation exists in Eagle River near Anchorage, where homes with contaminated wells and failing sewage systems cannot be sold.

This latter situation has occurred many times in the past--on several occasions to entire subdivisions--where wells will become contaminated from failing sewage systems sometimes affecting hundreds of lots. In some cases, entire families have become seriously ill--even death may result. Eventually, the State and local governments must step in to help, through the construction of complete new community water and sewer

systems. These systems will cost many times what would have been required if they had been installed when the property was first developed; in some cases, even with State and Federal grant funding assistance, the sewer and water assessments far exceed the total original cost of the lots. Just a few examples where this has occurred include Lemeta in Fairbanks, Deborah Subdivision in Eagle River, Mendenhall Valley in Juneau, Island Lake in Kodiak, and Robe River Subdivision in Valdez. Many millions of dollars in State funds have been spent to correct the problems in Lemeta and the Mendenhall Valley. Many others are not yet solved, but are scheduled to cost tens of millions of State and Federal funds.

Apparently, the impetus behind this bill relates to alleged problems the Department of Natural Resources has in disposing of State-owned lands. A recent report by the Division of Lands implies that compliance with subdivision review regulations is an obstacle to the State's land disposition program, especially as regards homesites. Unfortunately, the report tells only part of the story. The Department of Environmental Conservation does not have any requirements concerning private water systems, only regarding waste disposal. Further, regardless of the subdivision review regulations, a small proportion of State-owned lands simply cannot be used for on-site sewage disposal because of bedrock, high water table, muskeg, or other similar problems.

Further, it has been alleged by some that meeting our subdivision waste disposal requirement is overly costly. A review of the Division of Lands' cost analyses indicates that this is simply not the case. The Division of Lands has estimated that, over the next few years, $618 million will be needed to dispose of State-owned lands. The vast majority of these costs are for road and street construction--only 9 percent is for sewer and water improvements. Roughly one-half of the 9 percent is for community water systems--an improvement which is not required by the Department of Environmental Conservation. The other one-half is for sewage collection and disposal systems proposed by private consultants to the Division of Lands because the soil cannot be used successfully for on-site sewage disposal.

My staff and I are committed to working with the Department of Natural Resources to resolve difficult problem areas, as indeed we are with any land developer. In one case, near Glennallen, our joint efforts actually resulted in more developable lots than originally proposed by DNR's consultant. Except for coordination problems which existed several months ago between my field staff and the Division of Lands and which has since been resolved, DNR has been quite complimentary of our assistance in this unprecedented land disposal effort.

This bill would very possibly result in more stringent requirements being imposed on subdivisions outside municipal boundaries than those inside, unless every municipality chose to undertake the expense of establishing a subdivision review program similar to ours. In our view, this is somewhat anomalous--in most cases, municipal requirements are more strict than State requirements.

As you know, DEC regulations presently provide for local governments to carry out subdivision plan review in lieu of the Department. The Municipality of Anchorage is the only municipality to apply for the program and receive approval. No other municipality has even applied for the program in spite of our active encouragement to do so. The requirements are extremely minimal and anything less stringent cannot responsibly be said to protect public health or prevent pollution problems.

As an alternative to this bill, and the other proposal discussed during your February 28 hearing, I would suggest that local governments be specifically granted the authority and the responsibility for controlling on-site sewage disposal problems within their boundaries. This would require that municipalities develop and implement a program which is at least as stringent as the State's in a manner similar to that of Anchorage. Only in this manner can we ensure that even a minimal level of protection is afforded to those who buy land in Alaska, protection against severe threats to public health, some assurance they can finance their new homes, and protection against the loss of a portion of their substantial investment.

Sincerely,

Ernst W. Mueller
Commissioner

Mr. Keith Specking

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER / POUCH B – JUNEAU 99811

March 13, 1979

The Honorable Bill Parker
Chairman, Community and Regional Affairs Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

The Department of Community and Regional Affairs has reviewed The House Community and Regional Affairs Committee's substitute for House Bill 172. The draft substitute addresses many of the concerns we had with the original bill, specifically new responsibilities the bill would delegate to municipalities which exercise platting power.

Section 4 of the committee substitute requires all municipalities which exercise platting authority to adopt standards for review and approval of subdivisions with respect to the type and location of water sources and sewerage treatment and disposal systems. Sections 5 and 6 support local enforcement of subdivision ordinances through technical assistance from the Department of Environmental Conservation.

Taken together, Sections 4, 5, and 6 of CSHB 172 create a potentially effective system for delegating to local governments certain of the State's police powers, particularly those pertaining to the protection of the public health. There are three points we would like the committee to consider in its deliberation on the bill.

1. Before the State delegates to local governments responsibilities so vital as the prevention of public health hazards produced through pollution by inadequate on-site sewerage disposal, and the assurance for prospective landowners or leaseholders that they will be able to obtain financing to purchase or construct a home (many financing institutions require assurance of adequate water supply and sewerage disposal before issuing a loan), it should ensure that municipal standards of review and approval will be adequate to provide the public the protection to which they are entitled. Two ways for CSHB 172 to do this would be to (1) modify Sec. 4 (p.2, line 23) to require that local standards meet minimum standards presently applied by the Department of Environmental Conservation or (2) to require municipalities to submit standards to the Department of Environmental Conservation for approval.

2. Local subdivision ordinances in many small municipalities in the State are administered solely by a planning commission, consisting of volunteers, and sometimes assisted by a city foreman or engineer. In such instances, the cities may prefer for the Department of Environmental Conservation to retain the responsibility of review and approval of subdivisions for the adequacy of water supply and sewerage treatment and disposal. Section 4 makes the assumption of the Department of Environmental Conservation's previous responsibilities in this regard mandatory for local governments which must exercise platting powers (i.e., boroughs of all classes but the third class, first class cities, and home rule cities). Changing "SHALL" on page 2, line 14 to "may" would clarify the voluntary nature of municipal assumption of the responsibility for review and approval of subdivisions with respect to the type and location of water supply and sewerage treatment and disposal.

3. The Department of Environmental Conservation's technical assistance program would have to be adequately funded in order to insure the bill's promise to offer municipalities the technical expertise they need to properly review subdivisions.

We appreciate your consideration of points raised in this letter.

Sincerely,

Lee McAnerney
Commissioner

STATE OF ALASKA
DEPT. OF ENVIRONMENTAL CONSERVATION
JAY S. HAMMOND, GOVERNOR
POUCH O – JUNEAU 99811

March 15, 1979

The Honorable William Parker
Chairman
House Committee on Community
& Regional Affairs
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

The committee substitute for House Bill 172 that was prepared on March 14, 1979 addresses few of the concerns expressed in our testimony before you.

One of our major concerns is that the bill gives local government exclusive authority over water and sewerage systems for subdivisions without assigning them adequate responsibility to insure protection of public health and prevent pollution of State waters. We have a great deal of respect for the abilities of local government, given a fair chance, but, as written, CS HB 172 is in effect "throwing them to the wolves" by also abrogating the State's responsibilities in this matter. By not setting some kind of minimum standards for local governments to fall back on when reviewing and approving water and sewage aspects of subdivisions, some will be virtually helpless to deal with extraordinary political and development pressures to approve the installation of systems on unsuited sites. The consequences of this action will result in public health problems; loss of financing opportunities for development; pollution of State waters; and unnecessary expenditure of State, federal and local monies for clean-up.

The State of New York, after over 40 years of exclusive local control, developed so many serious sewage problems that minimum state standards for on-lot waste disposal were recently adopted. Other states have taken similar actions. Alaska is in a unique position to assist local government by requiring them to meet certain minimum standards for protection of public health and prevention of pollution of State waters and we should not step backward as dictated by this bill.

Another major concern expressed before your committee still has not been addressed adequately. There remains a substantial conflict with State and federal law with respect to construction of sewerage systems and sewage treatment and disposal systems; and setting of sewage treatment standards and water quality standards. This conflict can be resolved substantially by limiting review of subdivisions by local government specifically to individual on-lot disposal of wastewater.

The March 14 draft exempts any jurisdiction from responsibility for reviewing and approving of on-site sewage disposal systems in subdivisions previously approved by local government. We believe the Committee does not intend that these individual systems within approved subdivisions be exempted from review altogether and suggest that appropriate assignment of responsibility be added.

There are several lesser concerns with wording that should be addressed by the committee for clarification:

1. Sec. 1. The additions on lines 27-29 of page 1 are vague and will lead to problems of interpretation. We suggest integration of this introductory phrase into the more specific wording on page 2, lines 4-7 by the addition of "under authority of AS 29.33.150-AS 29.33.240" after "municipality" on line 4, and the elimination of lines 27-29 down to, no.

2. The term "sewerage system or treatment works" should be substituted for the similar terms on page 2, lines 11, 12, 17 and 26 and page 3, lines 2 and 3.

3. Beginning on page 2, line 29, delete the phrase "exercising platting and subdivision authority under AS 29.33.155" and on page 3, line 3 and 4 the phrase "by application of the municipality's ordinances for water supply and sewerage treatment and disposal." The first phrase is unnecessary and confusing. It is our view that the communities power to request assistance from this Department, and our responsibility to respond to these requests, should not be unduly limited. The language in the proposed committee substitute would preclude a long standing practice between the Fairbanks North Star Borough and this Department. An Ad Hoc Subdivision Review Committee has been in existance for a number of years, by which federal, State and local agencies provide advice to the Borough on a broad variety of matters relating to subdivision development. This approach has been very valuable to the Borough in its subdivision review program. The proposed language would prohibit this program for no discernable reason.

Thank you for this opportunity to comment on this bill. We enthusiastically support the concept of local control, but feel it is important to also provide municipalities with the necessary tools to do the job effectively. The present draft falls short of that goal.

Sincerely,

Ernst W. Mueller
Commissioner

March 8, 1979

The Honorable Representative William Parker
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

My staff has reviewed the possible implications of HB 172 and the following comments are provided for your information:

The principle of local control and local regulation embodied in the proposed amendment to Alaska Statute 46, Chapter 3, is one that should be supported. It has been recognized by Ketchikan Gateway Borough Planning staff, the KGB Planning Commission and even the local Environmental Conservation Officer that waste water disposal regulations, formulated for a statewide average, are not suitable for Ketchikan with its poor soils, high precipitation and high water table. I assume HB 172 does not question the value of good environmental safeguards but addresses only the inequities that have arisen from ADEC comprehensive regulations. Unfortunately in devesting ADEC of the power to review subdivision or development plans where the municipality has subdivision authority (such as Ketchikan) there is no guarantee the local community will have the funds and expertise to carry the job through. It seems to me, at least as far as Ketchikan is concerned, that the problem is the relative insensitivity of the regulations to local conditions not the contention that Alaska Statute 46 violates the rights of municipal self rule. If a mechanism can be designed to allow local government to draft local waste water regulations for adoption into State law and let ADEC provide technical and enforcement services the result would be very beneficial. Special skills are needed to write and enforce environmental regulations, even those designed for local conditions, and I think HB 172 as presented will create a vacuum into which the municipality will be unable to step without State assistance.

HB 172

City Council of Sand Point

Sand Point, Alaska 99661

February 28, 1979

Marilyn Miller
Alaska Municipal League
204 N. Franklin St.
Juneau, Alaska 99801

Dear Marilyn:

This letter follows our brief conversation today. Recall that I mentioned concern over a recent bill or proposal in the legislature to limit the State Department of Environmental Conserv ation from exercising subdivision control within municipal jurisdictions. I understand the intent of the proposed legislation but would not wish to see a strict prohibition placed upon DEC to exercise subdivision control.

The City of Sand Point has by ordinance set forth procedures for subdivision which includes DEC review and assistance.

The city would wish any new legislation relating to DEC and subdivisions have language that would optionally permit municipalities to by ordinance include or permit DEC review, assistance or regulatory overv iew of subdivision plans and construction.

Thank you.

Sincerely yours,

David A. Jensen
City Manager

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 172

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to review and approval of subdivision and development plans by municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA

* Section 1. AS 46.03.090 is amended to read:

Sec. 46.03.090. PLANS FOR POLLUTION DISPOSAL. The department may require the submission of plans

(1) for sewage and industrial waste disposal or treatment or both for a publicly or privately owned or operated industrial establishment[,]; and

(2) for a community, public or private property subdivision or development only

(A) if that subdivision or development is located outside a municipality which exercises platting and subdivision approval authority under AS 29.33.150 - 29.33.240; or

(B) if, in a municipality which exercises platting and subdivision approval authority, standards applicable to the review and approval of subdivision plats have not been adopted and filed with the Department of Community and Regional Affairs in accordance with AS 29.33.155.

* Sec. 2. AS 46.03.720(a) is amended to read:

(a) Except when a plat receives approval by the platting board of a municipality in conjunction with the review and approval of a subdivision or dedication under AS 29.33.155, no [NO] person may construct,

extend, install or operate a sewerage system or treatment works, or any part of a sewerage system or treatment works, until plans for it are submitted to the department for review and the department approves them in writing and issues a written permit. The review and approval of a plat of a subdivision or dedication by a municipality exempts the department from review of individual subdivision lots under this subsection.

* Sec. 3. AS 29.33.150(1) is amended to read:

(1) form, size, and other aspects of subdivisions, dedications, and vacations of land, including but not limited to, standards for review and approval of proposed subdivisions having on-lot sewerage and wastewater treatment and disposal systems;

* Sec. 4. AS 29.33 is amended by adding a new section to read:

Sec. 29.33.155. STANDARDS FOR SUBDIVISIONS. A municipality which requires subdivision approval may adopt standards applicable for the review and approval of subdivisions with respect to type and location of water sources and sewerage treatment and disposal systems. A copy of the municipality's current ordinance defining standards applicable for the review and approval shall be filed with the commissioner of community and regional affairs. The municipality's ordinance shall provide that a proposed subdivision may not be approved if the subdivision does not meet the standards defined by the municipality.

* Sec. 5. AS 29.33.160 is amended by adding a new subsection to read:

(c) The platting board may request the Department of Environmental Conservation to review and advise on proposed type and location of water sources and sewerage, sewerage treatment and disposal systems for proposed subdivisions submitted for platting board review and approval.

* Sec. 6. AS 46.03.020 is amended by adding a new paragraph to read:

(12) when requested to do so by a municipality exercising

platting and subdivision authority under AS 29.33.155, review proposed type and location of water sources and sewerage, sewerage treatment and disposal systems for proposed subdivisions by application of the municipality's ordinances for water supply and sewerage treatment and disposal.

* Sec. 7. AS 44.47.050(5) is amended to read:

(5) maintain a library or reference file of municipal ordinances required to be kept by the department by law, serve as a clearinghouse for information useful in solution of community and regional problems, and channel to the appropriate authority requests for documents, information and services;

* Sec. 8. This Act takes effect immediately in accordance with AS 01.10.-070(c).

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

POUCH O – JUNEAU 99811

Mueller 2600

March 6, 1979

The Honorable Bill Parker
Chairman, Community and Regional
Affairs Committee
State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Chairman Parker:

Currently being considered by the Committee on Community and Regional Affairs is House Bill 172. This bill would restrict the authority of the Department of Environmental Conservation to review and approve subdivision plans for suitability for on-site waste disposal to only those areas outside the boundaries of organized municipalities. Presumably, municipalities would have the option of requiring subdivisions to meet requirements similar to those currently imposed by our regulations, or to allow them to be developed and sold without any assurance that a homebuilder can construct an on-lot sewage disposal system.

If this bill were to become law, Alaska can expect severe economic, public health, and environmental consequences. While we fully agree that local governments should take the lead in implementing land use controls through their local planning and zoning programs, many simply do not have the financial or staff resources to conduct technical review of subdivisions for their suitability for on-site waste disposal. Thus, we can expect a number will not undertake this additional task, thus assuring that many subdivisions in organized areas will not be suitable for on-site waste disposal. The present statewide review program has resulted in numerous platting changes to subdivisions to ensure that such disposal is possible, or that an alternative waste collection and disposal system is provided.

Attempts at construction of on-site waste disposal systems on inadequate soils will result in contaminated ground water, a flow of raw human body wastes across the surface of the land, or an untreated discharge to nearby waterways. Substantial threat to public health can result from direct contact with these uncontrolled sewage discharges, or by ingestion of contaminated well water.

In addition to the public health implications, passage of this bill could severely stall new housing starts in Alaska. Presently, Federal home loan financing and guarantee programs require certification by a State or local government agency that land is suitable for on-lot waste disposal before a loan will be approved for a home without community sewer service. Alaskan banks, which administer these Federal funds, inform us that approximately 50 percent of new home loans in Alaska have some Federal funding or guarantee. Naturally, other home loan programs are available, but usually at a substantially higher interest rate.

Review and certification for on-lot waste disposal suitability can occur at either the subdivision-wide level, or on an individual lot basis. Because soil borings must be taken, and analysis must be made by qualified persons, it is far more economical to conduct these investigations on a subdivision-wide basis. If this Department's review and approval of waste disposal capability on a subdivision-wide basis is eliminated in organized municipalities, lending institutions will simply require an investigation on each and every lot before granting a Federal home loan. This will result in greater expense to the home buyer. The Department of Environmental Conservation currently performs single-lot reviews in those areas where subdivision-wide review was not conducted, generally on small or older subdivisions. Because of the additional workload associated with a change from a subdivison-wide to a lot-by-lot review, I anticipate that it will be necessary to add five to ten additional staff to conduct the reviews required by banks handling Federal lending and guarantee programs. I must emphasize that the banks with which we have discussed this program simply will not make such home loans unless they can be assured by a responsible government agency that on-site waste disposal is feasible. Neither they, nor the Federal Government, will take the risk of losing an investment because of a failing waste disposal system, or a contaminated water supply.

If a builder is able to finance his home in another manner, and constructs a waste disposal system which subsequently fails, he may find himself with a home he cannot sell. This situation exists in Eagle River near Anchorage, where homes with contaminated wells and failing sewage systems cannot be sold.

This latter situation has occurred many times in the past--on several occasions to entire subdivisions--where wells will become contaminated from failing sewage systems sometimes affecting hundreds of lots. In some cases, entire families have become seriously ill--even death may result. Eventually, the State and local governments must step in to help, through the construction of complete new community water and sewer

systems. These systems will cost many times what would have been required if they had been installed when the property was first developed; in some cases, even with State and Federal grant funding assistance, the sewer and water assessments far exceed the total original cost of the lots. Just a few examples where this has occurred include Lemeta in Fairbanks, Deborah Subdivision in Eagle River, Mendenhall Valley in Juneau, Island Lake in Kodiak, and Robe River Subdivision in Valdez. Many millions of dollars in State funds have been spent to correct the problems in Lemeta and the Mendenhall Valley. Many others are not yet solved, but are scheduled to cost tens of millions of State and Federal funds.

Apparently, the impetus behind this bill relates to alleged problems the Department of Natural Resources has in disposing of State-owned lands. A recent report by the Division of Lands implies that compliance with subdivision review regulations is an obstacle to the State's land disposition program, especially as regards homesites. Unfortunately, the report tells only part of the story. The Department of Environmental Conservation does not have any requirements concerning private water systems, only regarding waste disposal. Further, regardless of the subdivision review regulations, a small proportion of State-owned lands simply cannot be used for on-site sewage disposal because of bedrock, high water table, muskeg, or other similar problems.

Further, it has been alleged by some that meeting our subdivision waste disposal requirement is overly costly. A review of the Division of Lands' cost analyses indicates that this is simply not the case. The Division of Lands has estimated that, over the next few years, $618 million will be needed to dispose of State-owned lands. The vast majority of these costs are for road and street construction--only 9 percent is for sewer and water improvements. Roughly one-half of the 9 percent is for community water systems--an improvement which is not required by the Department of Environmental Conservation. The other one-half is for sewage collection and disposal systems proposed by private consultants to the Division of Lands because the soil cannot be used successfully for on-site sewage disposal.

My staff and I are committed to working with the Department of Natural Resources to resolve difficult problem areas, as indeed we are with any land developer. In one case, near Glennallen, our joint efforts actually resulted in more developable lots than originally proposed by DNR's consultant. Except for coordination problems which existed several months ago between my field staff and the Division of Lands and which has since been resolved, DNR has been quite complimentary of our assistance in this unprecedented land disposal effort.

This bill would very possibly result in more stringent requirements being imposed on subdivisions outside municipal boundaries than those inside, unless every municipality chose to undertake the expense of establishing a subdivision review program similar to ours. In our view, this is somewhat anomalous--in most cases, municipal requirements are more strict than State requirements.

As you know, DEC regulations presently provide for local governments to carry out subdivision plan review in lieu of the Department. The Municipality of Anchorage is the only municipality to apply for the program and receive approval. No other municipality has even applied for the program in spite of our active encouragement to do so. The requirements are extremely minimal and anything less stringent cannot responsibly be said to protect public health or prevent pollution problems.

As an alternative to this bill, and the other proposal discussed during your February 28 hearing, I would suggest that local governments be specifically granted the authority and the responsibility for controlling on-site sewage disposal problems within their boundaries. This would require that municipalities develop and implement a program which is at least as stringent as the State's in a manner similar to that of Anchorage. Only in this manner can we ensure that even a minimal level of protection is afforded to those who buy land in Alaska, protection against severe threats to public health, some assurance they can finance their new homes, and protection against the loss of a portion of their substantial investment.

Sincerely,

Ernst W. Mueller
Commissioner

cc: Committee Members
Mr. Keith Specking

Taken From "Alaska Land" A Report To The Legislature -- Alaska Department of Natural Resources January 1979

SUMMARY

Among other things, Chapter 181 SLA 1978 (HB 720) required the Division of Lands to dispose of 30,000 acres of Homesite and Open-to-Entry lands during Fiscal Year 1979. This report describes how this will be accomplished and discusses options for this and future years.

A number of problems have been encountered by the Division in meeting this requirement: (1) The fiscal note that accompanied House Bill 720 (the precursor to Chapter 181 SLA 1978) did not contain sufficient money to survey the 30,000 acres of subdivisions required if the land is to be made available where the public wants it -- generally in organized boroughs. (2) The Cook Inlet Land Exchange and the Municipal Selection Act which also passed in 1978 have temporarily complicated existing title problems. Much land slated by the Division for disposal was selected either by municipalities or the Cook Inlet Regional Corporation under those two authorizations. (3) Land to be disposed of in small parcels (under 40 acres) within boroughs must be subdivided in accord with Borough subdivision regulations. In most boroughs these regulations include development of physical access, which requires not only money but time. (4) Department of Environmental Conservation regulations require review of any subdivision to ensure that onsite sewage disposal is possible. In some cases inside boroughs this results in substantial requirements for investment in sewer and/or water systems before the subdivision is approved.

The program that the Division has undertaken for the remainder of the fiscal year will meet the 30,000 acre requirement and surmount the problems listed above. The disposals will be made in three general categories:

1. Existing and planned subdivisions - 11,500 acres. These subdivisions are principally outside the boroughs so that the subdivision regulations do not apply.

2. Miscellaneous lots and large parcels open-to-entry - 8,000 acres. On surveyed lands there is no limit to the size of parcel that may be offered under the open-to-entry program. This category includes parcels of 40 acres or more for which there is no basic reason for retention in state ownership as well as various odd lots in existing subdivisions.

3. Dispersed open-to-entry - 16,750 acres. This is a modification of the existing open-to-entry program which limits the density of settlement, as requested by many Alaskans. This acreage represents in excess of 3,300 parcels which will be offered to individuals.

In sum this plan totals approximately 36,250 acres (to allow for shrinkage during review processes) which will be made available in approximately 5,000 individual parcels during the months of April to June 1979.

Other requirements of Chapter 181 include development of a needs assessment program, the redesignation of mental health land, presentation of a three level budget and an extensive revision of the regulations. All of these have been completed and are described in this report.

(c) The department will, in its discretion, require that the designs for sewerage systems and treatment works in remote areas have a history of successful operation in comparable environmental situations. Sewerage systems or treatment works also must be designed to successfully operate under the conditions of seasonal frost or perennial frost encountered in the areas where the construction is proposed.

(d) If any construction or other activity is intended which might render water of the state inaccessible or uninhabitable for spawning or propagation of salmon, or cause violations of the Water Quality Standards in ch. 70 of this title, the required submission of plans shall contain the following information:

(1) a detailed description of and timetable for the proposed construction or other activity; and

(2) other information the department requires to fully assess the impact of the proposed activity upon the waters.

(e) The department will, within 30 days of receipt of complete plans, approve plans submitted under this section if the applicant demonstrates that the sewerage system or treatment works will meet the requirements of this chapter and ch. 70 of this title.

(f) The department will, in its discretion, attach terms and conditions to approved plans necessary to insure compliance with the requirements of this chapter and ch. 70 of this title.

(g) For the purpose of reviewing plans required to be submitted under this section, the department will use, where applicable, the design criteria contained in the following:

(1) Sewage Treatment Plant Design, Manual of Practice Number 8, 1976, and Design and Construction of Sanitary and Storm Sewers, Manual of Practice Number 9, 1970; Water Pollution Control Federation, 3900 Wisconsin Avenue, Washington, D.C. 20016;

(2) Glossary -- Water and Wastewater Control Engineering, Joint Editorial Board, American Public Health Association, American Society of Civil Engineers, American Water Works Association and Water Pollution Control Federation, 1969; available from Water Pollution Control Federation, 3900 Wisconsin Avenue, Washington, D.C. 20016;

(3) Wastewater Engineering: Collection, Treatment, Disposal; Metcalf and Eddy, Inc., 1972, McGraw-Hill Book Company, New York, N.Y.;

(4) Recommended Standards for Sewage Works, Great Lakes-Upper Mississippi River Board of State Sanitary Engineers, Health Education Service, P.O. Box 7283, Albany, New York 12224.

(h) Copies of the referenced materials are on file in the lieutenant governor's office, and may be reviewed in any of the regional offices of the department.

(i) No person may install a package aerobic sewage treatment plant unless the plant, or a similar model in a series of plants, has been certified by the National Sanitation Foundation, unless it can be demonstrated to the department's satisfaction that the plant meets or exceeds the National Sanitation Foundation certification criteria. Approval of package plants will be made only on receipt of acceptable proof of satisfactory operation of similar systems under conditions of proposed use. A list of approved package aerobic sewage treatment plants is available from any of the regional offices of the department. (Eff. 8/10/73, Reg. 47; am 2/3/77, Reg. 61; am 3/4/78, Reg. 65)

18 AAC 72.065. SUBDIVISION PLAN REVIEW. (a) Before or within five days after the time of the filing of a proposed subdivision plat with a platting authority, or, where no subdivision plat is filed with a platting authority, at least 60 days before subdividing, the person proposing the subdivision, unless the subdivision is an isolated subdivision, shall submit to the department the following information:

(1) a map of the proposed subdivision

showing lot and street layout with lot dimensions and areas, contours sufficient to show topography, drainage, all marshy or muskeg areas, and any existing or proposed improvements or bodies of water within 200 feet of the proposed subdivision;

(2) recommended or proposed type and location of water sources and sewage treatment and disposal systems on a typical lot diagram in relation to water sources and sewage treatment and disposal systems on adjacent lots;

(3) to the extent ascertainable, a statement concerning the possibility of any future community water or sewerage systems and an approximate timetable for their development;

(4) representative soil testing, logs, and borings, prepared by a professional engineer registered in the State of Alaska, in an area sufficient to determine whether soils are suitable for on-site sewage disposal and to determine the area required for soil absorption systems; however, soil tests, logs, and borings are not required if the subdivision plat clearly indicates that the area for which representative tests, logs, and borings will not be made will not be used for residential or other development which would necessitate domestic sewage treatment and disposal; moreover, representative tests, logs, and borings are not required if a means of sewage treatment and disposal other than soil absorption systems is proposed under (2) of this subsection; and

(5) a statement concerning responsibility for construction, operation and maintenance of water supply and sewage treatment and disposal facilities in the proposed subdivision.

(b) No person creating a subdivision after the effective date of this section, except an isolated subdivision, may sell, contract to sell, lease, or otherwise convey an interest in any lot or lots within that subdivision if plan approval has not previously been granted for that subdivision by the department under this section.

(c) It is the responsibility of the subdivider to provide evidence of plan approval under this section to prospective buyers, lessees or promisees.

(d) Within 30 days of submission of complete plans, the department will approve the plans if the applicant demonstrates that

(1) where the person proposing the subdivision assumes responsibility for sewage treatment and disposal within the subdivision, the proposed manner of sewage treatment and disposal will meet the requirements of this chapter and ch. 70 of this title; or

(2) where the person proposing the subdivision does not assume responsibility for sewage treatment and disposal within the subdivision, there will exist practicable means of sewage treatment and disposal within the subdivision which will meet the requirements of this chapter and ch. 70 of this title.

(e) The department will, in its discretion, attach terms and conditions to approved plans necessary to insure compliance with the requirements of this chapter and ch. 70 of this title. (Eff. 2/3/77, Reg. 61; am 3/4/78, Reg. 65)

18 AAC 72.068. WAIVER OF SUBDIVISION PLAN REVIEW IN QUALIFIED JURISDICTIONS. (a) A platting authority may petition the department to waive the exercise of sec. 65 of this chapter within its jurisdiction. The petition shall contain

(1) a copy of all pertinent ordinances relating to the review of sewage treatment and disposal matters for subdivisions;

(2) a statement of all pertinent administrative and judicial enforcement processes available to the platting authority; and

(3) a statement of administrative organization, staff, funding and other resources available to the platting authority to administer and enforce its sewage treatment and disposal requirements.

(b) Within 90 days of receipt of a completed petition, the department will grant the petition if the applicant demonstrates that, based upon the information submitted under (a) of this

section and in light of the department's own investigation

(1) the ordinances of the platting authority governing sewage treatment and disposal matters in subdivisions are at least as stringent as the requirements of this chapter and ch. 70 of this title; and

(2) the platting authority possesses sufficient resources and enforcement authorities to insure uniform compliance with sewage treatment and disposal requirements, and is in fact consistently and uniformly applying and enforcing its ordinances regarding sewage treatment and disposal matters in subdivisions.

(c) A preliminary decision by the department to deny a petition will be served upon the platting authority in the manner prescribed by AS 44.62.370. A denial of a petition entitles the platting authority to an adjudicatory hearing which will be conducted under the Administrative Procedure Act (AS 44.62.350 et seq.).

(d) If the department has reason to believe that a platting authority for which a petition has been granted under this section is no longer meeting a requirement of (b) of this section, the department will, in its discretion, reassert the authority exercised through sec. 65 of this chapter within the jurisdiction of the platting authority. A preliminary decision to reassert authority will be served upon the platting authority in the manner prescribed by AS 44.62.360. A decision to reassert authority entitles the platting authority to an adjudicatory hearing which will be conducted under the Administrative Procedure Act.

(e) Upon final departmental action reasserting authority under (d) of this section, the requirements of sec. 65 of this chapter apply to any person proposing a subdivision who has not subdivided before the effective date of the reassertion of authority. (Eff. 2/3/77, Reg. 61)

Authority: AS 46.03.020(10)(A)
AS 46.03.090

18 AAC 72.070. OPERATIONAL REPORTS. The department may require that persons who own or operate a wastewater treatment works submit routine operational reports on forms supplied by the department. (Eff. 8/10/73, Reg. 47)

Authority: AS 46.03.020(10)(A)
AS 46.03.020(10)(D)

18 AAC 72.080. EMERGENCY NOTIFICATION. (a) The owner or operator of community or industrial liquid sewerage systems or treatment works shall report to the department within 24 hours by telephone or telegraph or, in the absence of both, by mail, in the event of

(1) treatment works out of operation for a period greater than six hours;

(2) chlorine accident, spill, or outage;

(3) treatment works flooding;

(4) sludge carry-over, washout, or overflow;

(5) any bypass of treatment works or part thereof during periods of high flow or equipment breakdown.

(b) A follow-up written report shall be sent to the department within seven days of the event reported.

(c) The written report shall contain but not be limited to

(1) times and dates of the event;

(2) a detailed description of the event, including quantities of sewage involved;

(3) details of any damage to receiving waters;

(4) actions taken to correct the causes of the event. (Eff. 8/10/73, Reg. 47)

Authority: AS 46.03.020(10)(A)

AS 46.03.710

18 AAC 72.090. PENALTY. Repealed. (Eff. 4/1/77, Reg. 61)

18 AAC 72.100. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "cesspool" means a subsurface pit which receives untreated sewage;

of quality and purity or group the designated waters of the state into classes as to minimum quality and purity, or both. The department shall classify waters in accordance with considerations of best usage in the interest of the public. The department may alter and modify classifications after hearing. (§ 3 ch 120 SLA 1971)

ALR references. — Statute prescribing standard of purity of water furnished for human consumption, 6 ALR 475.

Sec. 46.03.090. Plans for pollution disposal. The department may require the submission of plans for sewage and industrial waste disposal or treatment or both for a publicly or privately owned or operated industrial establishment, community, public or private property subdivision or development. (§ 3 ch 120 SLA 1971)

Sec. 46.03.100. Waste disposal permit. (a) A person who conducts an operation which results in the disposal of solid or liquid waste material or heated process or cooling water into the waters or onto the land of the state must procure a permit from the department before disposing of the waste material or water. The permit must be obtained for direct disposal and for disposal into publicly operated sewerage systems.

(b) This section does not apply to a person discharging only domestic sewage into a sewerage system. (§ 3 ch 120 SLA 1971; am § 3 ch 220 SLA 1976)

Effect of amendment. — The 1976 amendment in the first sentence of subsection (a), substituted "an operation" for "a commercial or industrial operation," inserted "or heated process or cooling water" and "or onto the land," and added "or water" to the end of the sentence.

Sec. 46.03.110. Waste disposal permit procedure. (a) An application for a permit shall be made on forms prescribed by the department or on forms prescribed by the United States Environmental Protection Agency and shall contain the name and address of the applicant, a description of his operations, the quantity and type of waste material sought to be disposed of, the proposed method of disposal, and any other information considered necessary by the department. Application for permit shall be made at least 60 days before commencement of a proposed discharge.

(b) Upon receipt of a proper application the department shall publish notice of the application in two separate publications of a newspaper of general circulation within the general area in which the disposal of waste material is proposed to be made. The notice may also be published in other appropriate information media. The notice shall include a statement that a person who wants to present his views to the department in regard to the application may do so in writing to the

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 172

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to review and approval of subdivision and development plans by municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.03.090 is amended to read:

Sec. 46.03.090. PLANS FOR POLLUTION DISPOSAL. The department may require the submission of plans

(1) for sewage and industrial waste disposal or treatment or both for a publicly or privately owned or operated industrial establishment[,]; and

(2) for a community, public or private property subdivision or development only

(A) if that subdivision or development is located outside a municipality which exercises platting and subdivision approval authority under AS 29.33.150 - 29.33.240; or

(B) if, in a municipality which exercises platting and subdivision approval authority, standards applicable to the review and approval of subdivision plats have not been adopted and filed with the Department of Community and Regional Affairs in accordance with AS 29.33.155.

* Sec. 2. AS 46.03.720(a) is amended to read:

(a) Except when construction, extension or installation of a sewerage system or treatment works receives approval by the platting board of a municipality in conjunction with the review and approval of

a subdivision or dedication under AS 29.33.150 and 29.33.155, no [NO] person may construct, extend, install or operate a sewerage system or treatment works, or any part of a sewerage system or treatment works, until plans for it are submitted to the department for review and the department approves them in writing and issues a written permit.

* Sec. 3. AS 29.33.150(1) is amended to read:

(1) form, size, and other aspects of subdivisions, dedications, and vacations of land, including but not limited to, standards for review and approval of proposed subdivisions having sewerage and wastewater treatment and disposal systems, including on-lot treatment and disposal systems;

* Sec. 4. AS 29.33 is amended by adding a new section to read:

Sec. 29.33.155. STANDARDS FOR SUBDIVISIONS. The municipality shall adopt standards applicable for the review and approval of subdivisions with respect to type and location of water sources and sewerage treatment and disposal systems. A copy of the municipality's current ordinance defining standards applicable for the review and approval shall be filed with the commissioner of community and regional affairs. The municipality's ordinance shall provide that a proposed subdivision may not be approved if the subdivision does not contain soils suitable for effective absorption of discharged wastewater or if treatment and disposal results in the release of wastewater which does not meet water quality criteria defined by the municipality.

* Sec. 5. AS 29.33.160 is amended by adding a new subsection to read:

(c) The platting board may request the Department of Environmental Conservation to review and advise on proposed type and location of water sources and sewerage treatment and disposal systems for proposed subdivisions submitted for platting board review and approval.

* Sec. 6. AS 46.03.020 is amended by adding a new paragraph to read:

(12) when requested to do so by a municipality exercising platting and subdivision authority under AS 29.33.150, review proposed type and location of water sources and sewerage treatment and disposal systems for proposed subdivisions by application of the municipality's ordinances for water supply and sewerage treatment and disposal

* Sec. 7. AS 44.47.050(5) is amended to read:

(5) maintain a library or reference file of municipal ordinances required to be kept by the department by law, serve as a clearinghouse for information useful in solution of community and regional problems, and channel to the appropriate authority requests for documents, information and services;

* Sec. 8. This Act takes effect immediately in accordance with AS 01.10.-070(c).

M. Miller
P. Arnoldt , Director Div. of Retirement

WITNESSES TESTIFYING:

Mike Miller -- Committee Substitute for HB 174 takes a new approach having all people automatically in program when they become elected officials.

Lee Sharp -- Cited problems which led to drafting of bill. Juneau Assemblyman wnated to op into program. Fbks. employee also had problem.

Arnoldt -- From an actuary standpoint, the CS HB 174 is a great improvement.. You can identify who is out there and start setting aside benefits. More sound than original bill.

Suggests the following amendments which were accepted as part of the Committee Substitute:

1. P. 1 LIne 17, 24 Change "Commissioner of Administration" to "administrator"
2. P. 2 Lines throughout -- remove references to "interest"
3. P. 2 Line 16 Change date to Jan. 31

Bruce Cummings - Div. of Retirement Employer would not have contributed to system so the bill creates a problem.

McKenzie thinks employer contributions are covered under 39.35.250 (a) Discusses employee contribution rate. It appears that 39.35.125 (d) would only cover state contributions to system rather than municipal. The state may need to put in the retroactive am't to cover for the municipalities' contributions. (PERS-Public Employee Retirement System)

Last section of bill drafted to deal with problem of state employee who retires from state employment and who is an elected official in local gov't in Fbks.

39.35.250 Calculated employer's contrib. rate effected by HB 174.

Paul Arnoldt (4460)
Problems with the bill. 1. Won't know who is out there to come in under coverage. 2. Retroactivity as problem.
Miller, Sharp, McKenzie working on this to come up with a CS..Would include following con epts: 1. Employee would have to come into system but could waive coverage. If waived could not come back into servcie.

2. One year period any former offical can come into service 3.Teacher problem. Statutes says that if you are covered under teacher's system, you are not under PERS.

RE: HB 174 Participation of elected officials and former elected officials in the Public Employees' retirement system

This bill covers both state and municipal employees who participate in the state retirement system.

On p. 2 the (g) section is to deal with a situation similar to what happened in Fairbanks where a state employee who was a member of the City Council was told that he would have to relinquish his Council seat when he had retired from State employeement in order to receive his benefits. Then he could be reappointed to the Council seat.

Persons contacted:

Lee Sharp

Marilyn Miller

Paul Arnoldt,(Director Division of Retirement & Benefits

Talked with Bruce Cummings of the Div. of Retirement. Said he thought the Dept. would be opposed as the retroactive retirement did not provide for employer contributions during the retroactive period. I asked for a fiscal note which the Dept. may or may not have available.

financial institution until the delinquency is reduced to less than one-half of one per cent.

(g) Notwithstanding any other provisions, the pension fund may purchase any assets of the retirement system of any participating municipality as of the effective date of participation in any amount mutually agreed upon by the participating municipalities and the commissioner of revenue. (§ 37 ch 143 SLA 1960; am § 1 ch 129 SLA 1961; am § 1 ch 150 SLA 1962; am § 2 ch 4 SLA 1964; am §§ 1 — 3 ch 80 SLA 1964; am § 1 ch 111 SLA 1964; am § 1 ch 56 SLA 1967; am § 4 ch 73 SLA 1969; am §§ 3, 4 ch 17 SLA 1970; am § 2 ch 112 SLA 1972; am §§ 3, 4 ch 25 SLA 1974)

Effect of amendments. — The 1972 amendment added paragraph (9) in subsection (a).

The 1974 amendment added paragraphs (10)—(15) in subsection (a) and added subsections (e)—(g).

Legislative committee reports. — For report on ch. 73, SLA 1969 (CSHB 278 am), see 1969 House Journal, p. 745. For report on ch. 25, SLA 1974 (CSHB 253 [Jud] am S), see 1974 House Journal, p. 481.

Article 2. Membership.

Section
120. Commencement of participation
125. Participation of elected officials
130. Termination of participation
140. Re-employment of former employees
150. Re-employment of retired employees
153. Army and air national guard employees

Sec. 39.35.120. Commencement of participation. (a) An employee of the state shall be included in this system upon commencement of his employment with the state, or on January 1, 1961, whichever is later. An employee of a political subdivision or public or quasi-public organization which becomes an employer shall be included in the system on the effective date of the employer's participation or the date of the employee's commencement of employment with the employer, whichever is later.

(b) Inclusion in the system is a condition of employment for an employee except an elected official. (§ 4 ch 143 SLA 1960; am § 1 ch 155 SLA 1966)

Sec. 39.35.125. Participation of elected officials. (a) An elected official may be included in the system if, within 60 days after taking the oath of his office or within 60 days after May 12, 1966

(1) he directs his employer in writing to make the necessary deductions from his salary and to pay into the system the contributions required by and for an employee under this chapter and

(2) notice is given the commissioner of administration in writing.

(b) After an elected official has elected to be included in the system he and his employer are liable for contributions whenever he is a qualified elected official of a participating employer.

(c) An elected official may be included retroactively in the system if he makes retroactive contributions equal to what he would have made if he had elected to be included when he became eligible under (a) of this section. (§ 2 ch 155 SLA 1966; am § 3 ch 159 SLA 1972)

Effect of amendment. — The 1972 amendment added subsection (c).

Legislative committee report. — For report on ch. 159, SLA 1972 (FCCS HCS CSSB 264), see 1972 House Journal, p. 924.

Sec. 39.35.130. Termination of participation. An employee shall be excluded from the system upon termination of his employment with the employer, unless he is eligible for a retirement benefit at that time. If the employee does not receive a refund of his contributions at the time of his termination, his contribution accounts, including voluntary contributions shall continue to be held in the system, earn interest at the prescribed rate and according to the prescribed method of allocation under § 100 of this chapter, and are available to the employee, his beneficiary, or his estate in one of the alternative settlement options under § 220 of this chapter within 60 days of an application for their withdrawal. (§ 5 ch 143 SLA 1960)

Sec. 39.35.140. Re-employment of former employees. If an employee's employment is terminated before the employee becomes eligible for a retirement benefit and the employee is subsequently re-employed by an employer, he is considered a new employee and may not receive credit for a prior period of employment, except as provided in § 350 of this chapter. (§ 6 ch 143 SLA 1960)

Sec. 39.35.150. Re-employment of retired employees. (a) If a retired employee is re-employed on a regular full-time basis by an employer, no pension payments may be made during the period of re-employment. During the period of re-employment, deductions from salary may be made at the option of the retired employee for contributions to the retirement fund as provided in § 160 of this chapter. Upon the subsequent retirement of the retired employee, he is entitled to receive a pension based on his credited service and compensation before the date of his previous retirement. If a previously retired employee makes contributions to the fund during his re-employment, his additional credited service and compensation during the period of re-employment shall be included to determine his final retirement benefit.

(b) In the case of re-employment of an employee who retires under § 370(c) or 380 of this chapter, the pension payable upon the employee's subsequent retirement shall be reduced by the actuarial equivalent of early retirement benefits previously received by the employee. (§ 7 ch

(16) bonds, debentures, notes, or other obligations issued, guaranteed, or assumed as to both principal and interest by the government of the Dominion of Canada, or by any province of Canada, or by any municipality of Canada which has a population of not less than 150,000, if (A) the full faith and credit of the issuer, guarantor, or assumer of the bonds, debentures, notes, or other obligations is pledged for the payment of principal and interest on them, (B) the principal and interest on them is payable in United States currency, either unconditionally or at the option of the holder, and (C) these obligations are rated A or an equivalent quality by a nationally recognized rating organization;

(17) bankers' acceptances which are eligible for discount at the Federal Reserve Bank and negotiable time certificates of deposit issued by commercial banks.

(am §§ 3, 4 ch 59 SLA 1977)

Effect of amendments.

The 1977 amendment, in subsection (a), inserted "private mortgage insurance" in paragraph (11), added the language beginning "however, (A) no mortgage insurance is necessary" to the end of th[illegible] paragraph, and added paragraphs (16) and (17).

As the rest of the section was not affected by the amendment, it is not set out.

Article 2. Membership.

Section
125. Participation of elected officials
130. [Repealed]
140. [Repealed]
150. Re-employment of retired employees
154. North Pacific Fishery Management Council employees
155. Former magistrates

Sec. 39.35.125. Participation of elected officials.

(b) After an elected official has elected to be included in the system he and his employer are liable for contributions whenever he is a qualified elected official of an employer.

(d) A former elected state official whose latest term of office expired before May 12, 1966 may be included retroactively in the system and receive credit for time previously served as an elected state official if he makes retroactive contributions equal to what he would have made if he had been eligible for membership in the system.

(e) Former elected state officials whose latest term of office expired before May 12, 1966 must claim prior legislative service and make retroactive contributions before July 1, 1977.

(am § 1 ch 254 SLA 1976; am § 19 ch 128 SLA 1977)

Effect of amendments.

The 1976 amendment, effective July 1, 1976, added subsections (d) and (e).

The 1977 amendment, effective July 1, 1977, substituted "an employer" for "a participating employer" at the end of subsection (b).

As the rest of the section was not affected by the amendments, it is not set out.

IN THE HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 174

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the participation of elected officials and former elected officials in the public employees' retirement system; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.35.120(b) is amended to read:

(b) Inclusion in the system is a condition of employment for an employee except as otherwise provided for an elected official.

* Sec. 2. AS 39.35.125 is repealed and re-enacted to read:

Sec. 39.35.125. PARTICIPATION OF ELECTED OFFICIALS. (a) An elected official is included in the system unless he files a written waiver of coverage with the ~~commissioner of~~ administration. A waiver under this subsection waives coverage of future employment as an elected official, regardless of any change of employer. An elected official may file a waiver under this subsection at any time after his election to office, including the period before he takes the oath of his office. An elected official may revoke a waiver under this subsection by filing a written revocation with the ~~commissioner of~~ administration. A revocation under this subsection operates prospectively only, and the elected official may not receive credited service for service as an elected official while the waiver was in effect. There is no limit on the number of times an elected official may file a waiver or revocation under this subsection.

(b) Service as an elected official before January 1, 1980 with a

employer may be included retroactively if the elected official or former elected official makes retroactive contributions, ~~together with interest as prescribed by regulation~~, equal to what he would have made if he had been included when he took the oath of his office as an elected official. ~~Interest accrues retroactively from the date each contribution would have been made~~. The rate used to calculate the retroactive contributions may not be less than the rate in effect on January 1, 1961. An elected official or former elected official must claim prior service and make retroactive contributions, ~~together with interest,~~ before ~~January 31~~ Feb. 1 1981. An elected official or former elected official may not receive credited service under this subsection for any period in which he was receiving a retirement benefit from the system. An elected official or former elected official receiving a retirement benefit from the system ~~on January 31, 1981~~ Jan. 1, 1981 is not eligible to claim credited service under this subsection unless he is reemployed as an active member and claims the credited service before ~~January 1, 1981~~ Feb. 1, 1981. Service as an elected official with an employer constitutes employment as an active member so long as no waiver of coverage under (a) of this section is in effect.

(c) An elected official included in the system and his employer are liable for contributions whenever he is an elected official unless waiver of coverage under (a) of this section is in effect.

* Sec. 3. AS 39.35.680(14) is amended to read:

(14) "elected official" means a person [MEMBER] whose compensation results from personal services rendered to an employer as an elected representative [AND WHO ELECTS COVERAGE UNDER AS 39.35.125];

* Sec. 4. AS 39.35.360(c) is repealed.

* Sec. 5. AS 39.35.125(a), as re-enacted in sec. 1 of this Act, applies to an elected official holding office on or after January 1, 1980, even though he may have assumed office before that date.

* Sec. 6. This Act takes effect January 1, 1980.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Of the identified 60 former elected State officials who did not participate in the PERS, it is estimated that 20 will elect participation under this bill. Proportionate similar elections are anticipated for future "former elected" State officials.

2. Estimate FY 80 covered State payroll to be $241,000,000.

3. Estimate future State payrolls will increase at 10% annually.

4. Increase in State employer contribution rate would be .0222% of covered payroll.

Paul B. Arnoldt

120. Commencement of participation
125. Participation of elected officials
130. Termination of participation
140. Re-employment of former employees
150. Re-employment of retired employees
153. Army and air national guard employees

Sec. 39.35.120. Commencement of participation. (a) An employee of the state shall be included in this system upon commencement of his employment with the state, or on January 1, 1961, whichever is later. An employee of a political subdivision or public or quasi-public organization which becomes an employer shall be included in the system on the effective date of the employer's participation or the date of the employee's commencement of employment with the employer, whichever is later.

(b) Inclusion in the system is a condition of employment for an employee except an elected official. (§ 4 ch 143 SLA 1960; am § 1 ch 155 SLA 1966)

Sec. 39.35.125. Participation of elected officials. (a) An elected official may be included in the system if, within 60 days after taking the oath of his office or within 60 days after May 12, 1966

(1) he directs his employer in writing to make the necessary deductions from his salary and to pay into the system the contributions required by and for an employee under this chapter and

(2) notice is given the commissioner of administration in writing.

(b) After an elected official has elected to be included in the system he and his employer are liable for contributions whenever he is a qualified elected official of a participating employer.

(c) An elected official may be included retroactively in the system if he makes retroactive contributions equal to what he would have made if he had elected to be included when he became eligible under (a) of this section. (§ 2 ch 155 SLA 1966; am § 3 ch 159 SLA 1972)

Effect of amendment. — The 1972 amendment added subsection (c).

Legislative committee report. — For report on ch. 159, SLA 1972 (FCCS HCS CSSB 264), see 1972 House Journal, p. 924.

Sec. 39.35.130. Termination of participation. An employee shall be excluded from the system upon termination of his employment with the employer, unless he is eligible for a retirement benefit at that time. If the employee does not receive a refund of his contributions at the time of his termination, his contribution accounts, including voluntary contributions shall continue to be held in the system, earn interest at the prescribed rate and according to the prescribed method of allocation under § 100 of this chapter, and are available to the employee, his beneficiary, or his estate in one of the alternative settlement options under § 220 of this chapter within 60 days of an application for their withdrawal. (§ 5 ch 143 SLA 1960)

Sec. 39.35.140. Re-employment of former employees. If an employee's employment is terminated before the employee becomes eligible for a retirement benefit and the employee is subsequently re-employed by an employer, he is considered a new employee and may not receive credit for a prior period of employment, except as provided in § 350 of this chapter. (§ 6 ch 143 SLA 1960)

Sec. 39.35.150. Re-employment of retired employees. (a) If a retired employee is re-employed on a regular full-time basis by an employer, no pension payments may be made during the period of re-employment. During the period of re-employment, deductions from salary may be made at the option of the retired employee for contributions to the retirement fund as provided in § 160 of this chapter. Upon the subsequent retirement of the retired employee, he is entitled to receive a pension based on his credited service and compensation before the date of his previous retirement. If a previously retired employee makes contributions to the fund during his re-employment, his additional credited service and compensation during the period of re-employment shall be included to determine his final retirement benefit.

(b) In the case of re-employment of an employee who retires under § 370(c) or 380 of this chapter, the pension payable upon the employee's subsequent retirement shall be reduced by the actuarial equivalent of early retirement benefits previously received by the employee. (§ 7 ch

(16) bonds, debentures, notes, or other obligations issued, guaranteed, or assumed as to both principal and interest by the government of the Dominion of Canada, or by any province of Canada, or by any municipality of Canada which has a population of not less than 150,000, if (A) the full faith and credit of the issuer, guarantor, or assumer of the bonds, debentures, notes, or other obligations is pledged for the payment of principal and interest on them, (B) the principal and interest on them is payable in United States currency, either unconditionally or at the option of the holder, and (C) these obligations are rated A or an equivalent quality by a nationally recognized rating organization;

(17) bankers' acceptances which are eligible for discount at the Federal Reserve Bank and negotiable time certificates of deposit issued by commercial banks.

(am §§ 3, 4 ch 59 SLA 1977)

Effect of amendments.

The 1977 amendment, in subsection (a), inserted "private mortgage insurance" in paragraph (11), added the language beginning "however, (A) no mortgage insurance is necessary" to the end of that paragraph, and added paragraphs (16) and (17).

As the rest of the section was not affected by the amendment, it is not set out.

Article 2. Membership.

Section
125. Participation of elected officials
130. [Repealed]
140. [Repealed]
150. Re-employment of retired employees
154. North Pacific Fishery Management Council employees
155. Former magistrates

Sec. 39.35.125. Participation of elected officials.

(b) After an elected official has elected to be included in the system he and his employer are liable for contributions whenever he is a qualified elected official of an employer.

(d) A former elected state official whose latest term of office expired before May 12, 1966 may be included retroactively in the system and receive credit for time previously served as an elected state official if he makes retroactive contributions equal to what he would have made if he had been eligible for membership in the system.

(e) Former elected state officials whose latest term of office expired before May 12, 1966 must claim prior legislative service and make retroactive contributions before July 1, 1977.

(am § 1 ch 254 SLA 1976; am § 19 ch 128 SLA 1977)

Effect of amendments.

The 1976 amendment, effective July 1, 1976, added subsections (d) and (e).

The 1977 amendment, effective July 1, 1977, substituted "an employer" for "a participating employer" at the end of subsection (b).

As the rest of the section was not affected by the amendments, it is not set out.

BILL NUMBER AND TITLE: HB 184 Delegation of Planning and Zoning Powers

ORIGINAL SPONSOR : Malone

OTHER SPONSORS:

RECEIVED FROM:

FURTHER REFERRALS:

MEMBERS PRESENT: Parr, Parker, Carney, Branson, Zharoff, Carney, Metcalfe, O'Connell

MEMBERS ABSENT: None

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Malone Allows assembly to delegate all or part of planning and zoning power vested by State law. There are five first class cities in Kenai..Borough is now in a position of needing to approve zoning in the cities. Borough has delegated enforcing authority. Zoning ordinances make planning work and the cities have the major responsibility for planning within city boundaries.Practically speaking, responsibility in some cases rests in cities rather than in boroughs.

Parr -- Are planning and zoning considered legislative powers? You can't delegate legislative power to a non-elected body (such as the Planning Commissions) City Council would have to be the final body of review.

Veronica Clark Planning supervisor for C&RA

Dept. has some reservations on HB 184:

1.Planning, platting, and zoning are mandatory powers of the Borough even though these powers are not always exercised.

2. Makes good sense to exercise planning on an areawide basis. A city plan might effect neighboring area or have regional impact. Some local entity should be responsible. Regional perspective needed.

Palmer McCarter and Veronica Clark

Suggested addition of 2 amendments. Palmer referring to p.1 Line 18 of amendments speaks to concern that city would know what standards were expected.

Various amendments to the amendments proposed by C&Ra were discussed. It was decided to support the original bill in unamended form.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the delegation of planning and zoning authority by boroughs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.33.070(b)(2) and (3) are amended to read:

(2) delegate other planning and zoning powers conferred by this chapter [ADMINISTRATIVE AND ENFORCEMENT RESPONSIBILITIES] to a [THE] city within the borough [, PROVIDED THAT BOROUGH JURISDICTION IS NOT IMPAIRED];

(3) revoke or modify any part or all of the [WITHDRAW] powers delegated under this subsection.

(c) Before a borough may delegate to a city within the borough planning and zoning powers conferred by this chapter, it must notify the city in writing of borough standards for the exercise of delegated powers.

(d) If a borough delegates to a city within the borough legislative powers conferred under this chapter, the city must submit to the borough assembly for approval the city's planning and zoning ordinances. If disapproval by resolution of the borough assembly is not received within 90 days from the date the ordinance was submitted to the borough assembly, the city's planning and zoning ordinances shall be considered approved.

90. Zoning

Sec. 29.33.070. Planning, platting and zoning. (a) First and second class boroughs shall provide for planning, platting and zoning on an areawide basis.

(b) The assembly by ordinance may

(1) designate the council of a city within the borough as a board of adjustment within the city;

(2) delegate other planning and zoning administrative and enforcement responsibilities to the city, provided that borough jurisdiction is not impaired;

(3) withdraw powers delegated under this subsection. (§ 2 ch 118 SLA 1972; am § 1 ch 17 SLA 1977; am § 7 ch 93 SLA 1977)

Effect of amendments. — The first 1977 amendment, in subsection (b) deleted "If a city within a borough is located more than 25 miles from a boundary of the borough seat" from the beginning of the introductory language and substituted "a city within the borough" for "the city" in paragraph (1).

The second 1977 amendment substituted "First and second class boroughs" for "Boroughs" at the beginning of subsection (a).

Cited in Moore v. State, Sup. Ct. Op. No. 1284 (File Nos. 2551, 2587), 553 P.2d 8 (1976).

Sec. 29.33.090. Zoning. (a) In accordance with the comprehensive plan, the assembly shall regulate and restrict the use of land and improvements by districts or contract zoning to permit specific uses provided for in the contract. Regulations shall be uniform for each class or kind of building, structure, land or water area within each district, but the regulations may differ among districts and exceptions may be made in order to provide for the preservation, maintenance and protection of historic sites, buildings and monuments. In this section, "contract zoning" means a zoning reclassification to a less restricted use when the owner of the rezoned property, either through an agreement with the assembly or a covenant in favor of the borough, places restrictions on the use of the land beyond the zoning requirements generally attaching to the new district in which the property has been placed. The assembly shall hold a public hearing on the proposed contract zoning.

(d) The assembly shall regulate and restrict the use of state land within the borough which is vacant, unappropriated and unreserved and which is found suitable for classification and disposal for homesite entry under AS 38.08.010. Compliance with the provisions of this subsection is a prerequisite to issuance of homesite entry permits for land within the borough.

IN THE HOUSE BY THE FINANCE COMMITTEE

CS FOR HOUSE BILL NO. 192 (Finance) am

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for equalization of the tax resources of municipalities, continuing a portion of the program of state aid for municipal purposes, and providing for minimum entitlements; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. It is the purpose of this Act to

(1) improve the revenue raising and distribution system for the benefit of residents of home rule and general law municipalities by providing for more equitable allocation of financial resources among municipalities to improve their fiscal capacities; and

(2) assure that no municipality suffers impoverishment of necessary public services, relative to other municipalities, because of the chance location of taxable wealth in the state.

* Sec. 2. AS 29 is amended by adding a new chapter to read:

CHAPTER 88. MUNICIPAL TAX RESOURCE EQUALIZATION.

Sec. 29.88.010. STATE EQUALIZATION OF TAX RESOURCES FOR LOCAL GOVERNMENT SERVICES. (a) During each fiscal year the state shall compute an equalization entitlement for local government services provided by a taxing unit.

(b) The equalization entitlement computed for each taxing unit is based on the population, relative ability to generate revenue, and local tax burden of the taxing unit and is determined by the application of the formula

Entitlement = P x R

where P = population, and

R = millage rate equivalent, determined by dividing the sum of the locally generated revenue of the taxing unit by one-tenth of one percent (0.1) of the full and true value of assessed property of the taxing unit determined under AS 29.88.020(d); however, the property value used under this subsection may not be less than 15 percent of the statewide average per capita full and true assessed property value.

(c) For purposes of this section, locally generated revenue

(1) includes,

(A) the actual revenue derived from the levy and collection of local taxes in the taxing unit for local government services during the preceding fiscal year of the taxing unit;

(B) motor vehicle payments received by the municipality during the preceding fiscal year under AS 28.10.431;

Amend

(C) revenue from fees, rentals, leases, penalties, licenses or permits received during the preceding fiscal year by the municipality for a function or service over which it has control, including revenues derived from utilities, parks and recreation services, mass transit, offstreet parking, and garbage and solid waste disposal services; and

TO

(D) special assessments received during the preceding fiscal year;

(2) excludes,

(A) revenue derived from the levy and collection of municipal taxes and appropriated for the operating expenses and debt service of utilities;

(B) revenue from interest earned on investments and from

cipality which does not qualify for inclusion in or recognition as locally generated revenue for local government purposes under AS 29.88.-010(c)(1). The adjustment shall be made by deducting an amount equa' to the department's estimate of revenue which is not recognized for those purposes. add value of municipal utilities [illegible] utilities

(d) The full and true assessed property value shall be determined by the department in the manner provided for the computation of state aid to education under AS 14.17.140. In addition to the computation for municipalities which levy and collect a property tax, the department shall determine an estimated full and true assessed property value for

(1) each municipality which is a school district and w..ch does not levy and collect a property tax; and

(2) each second class city in which the population of the city equals or exceeds 750 persons; however, a computation may not be required under this paragraph more often than once during a period of three successive calendar years; and

(3) all other second class cities, by determining the average per capita full and true assessed property value of all cities having a population of less than 750 in which an assessment is completed by a municipality or for which a determination is not made under (1) or (2) of this subsection.

(e) The department shall annually compute a statewide average per capita full and true assessed property value.

Sec. 29.88.025. REPORTS. No payment may be made to a municipality under AS 29.88 until the municipality has first submitted its certificate of estimated revenue and its financial report to the department for the fiscal year preceding the year for which the equalization entitlement is sought, together with a budget for the municipality's current fiscal year. The financial report shall include a listing of general

the sale and lease of land or equipment; and

(C) all other revenue from whatever service derived.

Sec. 29.88.015. DETERMINATION OF POPULATION. (a) For purposes of this chapter, the population of a taxing unit shall be determined annually by the latest figures of the United States Bureau of the Census or other population data which, in the judgment of the department, is reliable.

(b) The population of the taxing unit includes the population of any military reservation which is a part of the taxing unit.

Sec. 29.88.020. DETERMINATION OF MILLAGE RATE EQUIVALENT. (a) The department may require a municipality to return a certification, signed by the municipal treasurer or manager and the mayor, which provides an estimate of the locally generated revenue received by the municipality during the preceding fiscal year.

(b) Not later than October 15 of each year, the department shall make an initial determination of the millage rate equivalent of each taxing unit which will be used as the basis for computation and distribution of equalization entitlements for the fiscal year under this chapter. The department shall make the determinations based upon the certification returned by the municipality under (a) of this section.

(c) At the earliest possible date, but not later than December 15 of each year, the department shall make a final determination of the millage rate equivalent of each taxing unit which will be used as the basis for computation and distribution of equalization entitlements under this chapter. The department shall make the determinations based upon all audits, financial statements and other financial reports prepared and submitted by the municipality. The department shall adjust to the locally generated revenue reported by municipalities to exclude the portion of the municipal revenue-generating effort claimed by the muni-

revenue collected from taxes levied and assessed by the municipality and any other revenue which, in the opinion of the municipal officials, is eligible for inclusion in computations of the locally-generated revenue of the taxing unit.

Sec. 29.88.030. LIMITATION ON COMPUTATION AND USE OF PAYMENTS. (a) An equalization entitlement generated by the general tax levy of a taxing unit may be expended only for legally authorized expenditures of that taxing unit, but up to 15 percent of the payment of an equalization entitlement determined with reference to the areawide locally generated revenue of a municipality may be expended by the municipality at the discretion of its assembly or council.

(b) An equalization entitlement determined with reference to revenue other than revenue obtained from the levy and collection of taxes may be used for areawide or nonareawide purposes, at the discretion of the assembly or council.

Sec. 29.88.035. TAX EQUALIZATION ACCOUNT. The tax equalization account is established. Funds to carry out the provisions of this chapter shall be allocated by the department to the account. The amount allocated to the account shall be fully distributed by the department as payments to municipalities for the purpose of fulfilling each municipality's share authorized under AS 29.88.010, and the amount allocated to the account shall be distributed by the department pro rata among eligible municipalities.

Sec. 29.88.040. ADMINISTRATION. (a) The department may adopt regulations necessary to implement the provisions of this chapter. The regulations shall include, among other provisions, (1) procedures and filing dates for submitting financial reports; (2) procedures for obtaining information required to compute and determine the municipality's millage rate equivalent; and (3) procedures by which the department

shall notify a municipality in writing of the reasons for a proposed disallowance or adjustment of any factor bearing upon the determination of the municipality's entitlement and by which the municipality will be provided reasonable time in which to respond or to challenge the department's determination.

(b) The department shall make reasonable efforts to advise and assist municipalities in collecting information and completing reports necessary for the determination of entitlements under this chapter.

(c) The department shall, by regulation, classify for inclusion or exclusion as a component of a muncipality's millage rate equivalent under AS 29.88.010, any tax revenue appropriated for a utility not included in the definition set out in AS 29.88.045(4).

Sec. 29.88.045. DEFINITIONS. In this chapter

(1) "department" means the Department of Community and Regional Affairs;

(2) "municipality" means a city, borough or unified municipality incorporated under the laws of the state;

(3) "taxing unit" means a municipality and

(A) in a borough or unified municipality, a service area or the entire area outside cities;

(B) in a city, a differential tax zone;

(4) "utilities" means electricity, water, sewer, gas, heat, or telephone services, and refuse and garbage collection services.

* Sec. 3. AS 29 is amended by adding a new chapter to read:

CHAPTER 89. STATE AID FOR MISCELLANEOUS MUNICIPAL PURPOSES.

Sec. 29.89.005. REVENUE SHARING PAYABLE. In addition to the entitlements under AS 29.88, during each fiscal year the state shall pay aid to a municipality or other eligible recipient which has the power to

provide the services described in this chapter and exercises the power in the manner required by this chapter.

Sec. 29.89.010. STATE AID TO MUNICIPALITIES FOR ROADS. (a) The state shall pay to a municipality which has power to provide for road maintenance and exercises that power, a sum equal to $2,500 a mile for each mile of road, street or highway maintained by the local government, excluding (1) the official state highway system, (2) roads, streets or highways not dedicated to public use, (3) roads, streets or highways maintained under the local service road program (AS 19.30.111 - 19.30.-251), and (4) alleyways, in accordance with regulations adopted by the Department of Transportation and Public Facilities. No payments may be made for maintenance of roads not used by automotive equipment.

(b) Frozen waterways and connections from inhabited areas to waterways which may be safely used for public transportation by automotive equipment and are so used during a portion of a year are eligible for payments of $1,500 per mile if the waterways and connections are maintained during the period of use by a municipality or combination of municipalities. The Department of Community and Regional Affairs, after consultation with the Department of Transportation and Public Facilities, shall determine which waterways and connections qualify and, where the waterways or connections lie outside the corporate limits of a municipality, which municipalities shall receive the payments under this subsection unless the municipalities involved have agreed in writing to a particular distribution.

Sec. 29.89.015. STATE AID TO MUNICIPALITIES AND OTHER ELIGIBLE RECIPIENTS FOR HEALTH FACILITIES AND HOSPITALS. (a) The state shall pay

(1) to a municipality which has the power to provide hospital facilities and services and which exercises that power, $1,000 per bed

for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the hospital, or $75,000 a hospital for those hospitals with 10 or more beds, or $25,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect; money received under this paragraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality may determine;

(2) on the basis set out in (1) of this subsection to a municipality for a nonprofit hospital not operated by a municipality if the municipality first certifies to the department that the nonprofit hospital is in compliance with all standards for hospitals which have been adopted by the municipality; money may not be paid on behalf of a nonprofit hospital in the absence of this certification; payments to the municipality shall be transferred to the nonprofit hospital in accordance with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(3) to a municipality in which a health facility is operated, $1,000 per bed for each bed actually used for patient care, limited to the number of beds provided for in the construction design of the health facility, or $4,000 per health facility as the municipality may determine.

(b) A hospital may not receive payment under both (a)(1) and (a)(2) of this section.

(c) Money received by a municipality under (a)(3) of this section shall be used for expenses of health services or operation and maintenance of health facilities as the municipality may determine.

(d) Before money may be distributed under this section, the com-

missioner of health and social services shall certify to the distributing agency that any accumulation of assets by nonprofit corporations or other recipients under this section are dedicated irrevocably to a public purpose.

Sec. 29.89.020. STATE AID FOR HOSPITAL CONSTRUCTION. (a) If construction of a facility began after January 1, 1968, and state matching aid for construction approved for payment to the municipality or other facility sponsor constitutes less than 25 percent of the total project cost, the state shall pay to the municipality or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility or five percent of the total project cost, whichever is greater. State aid provided for in this section shall continue until the municipality or other facility sponsor has received an amount which, combined with state matching money for construction of the facility, equals 25 percent of the total project cost Money received for construction may not be used for any other purpose.

(b) In this section, "total project cost" includes, in addition to costs directly related to the project, the total of all costs of financing and carrying out the project. These include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property, and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the municipality or other facility sponsor; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indem-

nity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

Sec. 29.89.025. STATE AID TO VOLUNTEER FIRE DEPARTMENTS. (a) The state shall pay to a volunteer fire department registered with the state fire marshal a sum for protection purposes equal to $7.50 per capita for the population served by the department, as determined by the state fire marshal.

(b) A grant shall be made as set out in (a) of this section to facilitate the organization of a volunteer fire department upon application of the proposed fire protection group to the state fire marshal and approval of applications according to standards of organization and service prescribed by regulations adopted by the state fire marshal.

(c) In this section, "fire protection" includes, but is not limited to, fire protection provided by a volunteer fire department registered with the state fire marshal which has official recognition and financial support from the community or area in which it is located.

Sec. 29.89.030. POPULATION DETERMINATION. For purposes of this chapter, population shall be determined by the latest figures of the United States Bureau of the Census or other reliable population data, including but not limited to public school enrollment figures, public utility connection, registered voters or certified employment payrolls.

Sec. 29.89.035. AREA COST-OF-LIVING DIFFERENTIAL. (a) State payments to a municipality or other eligible recipient under AS 29.89.010 and AS 29.89.015 shall reflect area cost-of-living differentials. Amounts distributed shall be based upon the sum of per capita, per mile and per bed or facility grants due each municipality or other recipient multiplied by the appropriate area cost-of-living differential. The

area cost-of-living differential for each recipient shall be determined annually by election district under the provisions of AS 39.27.030; however, the area cost-of-living differential to be applied may not result in an amount to be distributed less than the base allocation.

(b) The election districts used in (a) of this section are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the governor September 3, 1965.

Sec. 29.89.040. MISCELLANEOUS SERVICES ACCOUNT. The miscellaneous services account is established. Money to carry out the provisions of this chapter shall be allocated by the department to the account in accordance with AS 29.90.010. If amounts in the account are insufficient for the purpose of each municipality's or other recipient's share authorized under this chapter, the amounts which are available shall be distributed pro rata among eligible municipalities and other recipients.

Sec. 29.89.045. REGULATIONS. The Department of Community and Regional Affairs shall adopt regulations necessary to carry out the purposes of this chapter. The regulations shall include minimum standards required to qualify a municipality for grants for each service and provisions for a performance report adequate to demonstrate to the department that each service for which credit was allowed was actually performed by the municipality, at least at the prescribed minimum level.

Sec. 29.89.050. DEFINITIONS. In this chapter

(1) "health facility"

(A) means a facility which is licensed, when required, by the state under AS 18.20.010 - 18.20.130 and which is owned or operated or both by a municipality or by a nonprofit corporation or other nonprofit sponsor;

(B) includes a public health center, maternity home,

community mental health center, facility for the mentally or physically handicapped, nursing home or convalescent center;

(C) excludes a facility operated or wholly supported by the state or the federal government;

(2) "hospital" means a licensed hospital determined by the Department of Health and Social Services to be a general hospital; the term excludes a facility operated or wholly supported by the state or the federal government.

* Sec. 4. AS 29 is amended by adding a new chapter to read:

CHAPTER 90. ADMINISTRATION OF MUNICIPAL FINANCIAL ASSISTANCE PROGRAMS.

Sec. 29.90.010. ALLOCATION AND DISTRIBUTION. (a) The Department of Community and Regional Affairs shall allocate money appropriated to the accounts established in AS 29.88 and AS 29.89 in amounts determined by the legislature. Money in the miscellaneous services account established in AS 29.89.040 which exceeds the amount required to fully distribute entitlements authorized by AS 29.89 shall be reallocated to the tax equalization account established in AS 29.88.035 and distributed according to the provisions of AS 29.88.

(b) Payments under AS 29.90.020 and AS 29.88 shall equal the amount allocated to the equalization account (AS 29.88.035), adjusted in accordance with this section. Payments under AS 29.90.020 and AS 29.88 shall be adjusted by proration in accordance with this subsection. Adjustments shall be determined by prorating amounts payable under AS 29.90.020 and amounts payable under AS 29.88 by a factor which, when applied, reduces all payments in equal proportion so that payments under AS 29.90.020 and payments under AS 29.88 total the amount allocated to the account established in AS 29.88.035, adjusted in accordance with this section.

Sec. 29.90.020. QUALIFICATION FOR MINIMUM ENTITLEMENT. (a) A municipality qualifying for an entitlement under AS 29.88 or AS 29.89 shall receive a minimum payment of $25,000 plus an area cost-of-living differential for each fiscal year if:

(1) the municipality has conducted a regular election under AS 29.28.010 - 29.28.050 during the fiscal year preceding the year for which payment of an entitlement is authorized and has reported the results of the election to the commissioner of the Department of Community and Regional Affairs;

(2) regular council meetings are held in the municipality in accordance with the requirements of AS 29.23.210 during the fiscal year preceding the year for which payment of an entitlement is authorized and a record of the proceedings is maintained;

(3) a municipal budget has been adopted for the fiscal year during which payment of an entitlement is authorized and an audit or financial statement, as applicable, for the preceding fiscal year has been prepared and furnished to the Department of Community and Regional Affairs in accordance with AS 29.23.560(a); and

(4) local ordinances adopted by the governing body of the municipality have been codified in accordance with AS 29.48.130.

(b) The area cost-of-living differential of each municipality payable under this section shall be determined annually by election district under the provisions of AS 39.27.030. However, except as provided in AS 29.90.010(b), application of the area cost-of-living differential may not result in an amount which is less than the minimum entitlement determined under (a) of this section. For purposes of this subsection, the election districts used are those designated by the proclamation of reapportionment and redistricting of December 7, 1961, and retained for the house of representatives by proclamation of the

governor September 3, 1965.

(c) The Department of Community and Regional Affairs shall pay to each municipality eligible to receive payment of a minimum entitlement under this section an amount equal to the difference between the minimum entitlement determined under (a) and (b) of this section and the sum of the amounts determined as payable for the same fiscal year under AS 29.88 and AS 29.89, except that a payment may be prorated and reduced under AS 29.90.010(b).

(d) If payments are required under this section, the payments shall be made from the money allocated to the equalization account established in AS 29.88.035.

* Sec. 5. AS 29.23.560(a)(3) is amended to read:

(3) tax assessment and tax levy figures as requested;

* Sec. 6. AS 29.23.560(a) is amended by adding new paragraphs to read:

(5) a copy of the current annual budget of the municipality;

(6) a summary of the optional property tax exemptions authorized in the municipality, together with the municipality's estimate of the revenues lost to it by operation of each of the exemptions.

* Sec. 7. AS 29.23.560(b) is amended to read:

(b) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under AS 29.88 and state aid for miscellaneous municipal services under AS 29.89 [STATE-SHARED REVENUES UNDER AS 43.18]. The Department of Community and Regional Affairs [STATE] shall withhold annual allocations under those chapters [THAT CHAPTER] in the event of noncompliance until such time as the report requirements are met [COMPLIED WITH].

* Sec. 8. AS 29.73 is amended by adding a new section to read:

Sec. 29.73.060. TAXPAYER NOTICE. (a) If a municipality levies and collects real or personal property taxes, the governing body shall

provide the following notice:

"NOTICE TO TAXPAYER

For the current fiscal year the (city) (borough) has been allocated the following amount of state aid for school and municipal purposes under the applicable financial assistance Acts:

PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE (AS 14.17) $

STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT (AS 4[illegible].18.100) $

MUNICIPAL TAX RESOURCE EQUALIZATION ASSISTANCE (AS 29.88) $

STATE AID FOR MISCELLANEOUS MUNICIPAL SERVICES (AS 29.89) $

TOTAL AID $

The millage equivalent of this state aid, based on the dollar value of a mill in the municipality during the current assessment year and for the preceding assessment year, is:

	MILLAGE EQUIVALENT	
	PREVIOUS YEAR	THIS YEAR
PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE	.... MILLS	.... MILLS
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT	.... MILLS	.... MILLS
MUNICIPAL TAX RESOURCE EQUALIZATION ASSISTANCE	.... MILLS	.... MILLS
STATE AID FOR MISCELLANEOUS MUNICIPAL SERVICES	.... MILLS	.... MILLS
TOTAL MILLAGE EQUIVALENT	.... MILLS	.... MILLS"

Notice shall be provided

(1) by furnishing a copy of the notice with tax statements mailed for the fiscal year for which aid is received; or

(2) by publishing in a newspaper of general circulation within the municipality a copy of the notice once each week for a period of three successive weeks, with publication to occur not later than 45 days after the final adoption of the municipality's budget.

(b) If the municipality levies and collects only a sales tax, the governing body shall provide a notice substantially in the form set out in (a) of this section. In providing notice under this subsection, the council or assembly shall substitute for the millage equivalency its estimate of the equivalent sales tax rate for each of the categories of financial assistance set out in (a) of this section. Notice shall be provided

(1) by publishing in a newspaper of general circulation within the municipality a copy of the notice once each week for a period of three successive weeks, with publication to occur not later than 45 days after the final adoption of the municipality's budget; or

(2) if there is no newspaper of general circulation in the municipality, by posting a copy of the notice for at least 20 days in at least two public places within the municipality, with posting to occur not later than 45 days after the final adoption of the municipality's budget.

(c) Compliance with the provisions of this section is a prerequisite to receipt of municipal tax resource equalization assistance under AS 29.88 and state aid for miscellaneous municipal services under AS 29.-89. The Department of Community and Regional Affairs shall withhold annual allocations under those chapters until municipal officials demonstrate that the requirements of this section have been met.

* Sec. 9. AS 29.13.100 is amended by adding new paragraphs to read:

(40) AS 29.73.060 (taxpayer notice)

(41) AS 29.88 (municipal tax resource equalization assistance)

(42) AS 29.89 (state aid for miscellaneous municipal services)

* Sec. 10. AS 43.18.010 - 43.18.045 are repealed.

* Sec. 11. (a) Notwithstanding other provisions of this Act,

(1) a municipality may not receive less than $25,000 plus an area cost-of-living differential during the first fiscal year in which this Act is effective; and

hh (2) a municipality which would receive less money under the provisions of this Act than it received for the last fiscal year under the provisions of AS 43.18 repealed by this Act shall, for the first five fiscal years during which this Act is effective, be entitled to receive an amount equal to that received for the last fiscal year under the former provisions of AS 43.18, in accordance with those provisions.

TC

amt orig. approp. for FY80 (prorated settlement)

(b) For the first ~~three~~ Seven fiscal years during which this Act is effective, if the amount appropriated to pay entitlements under this Act is insufficient for the purpose of paying the full entitlement due each municipality or other recipient, entitlements determined under AS 29.88, AS 29.89 and AS 29.90, together with the additional sums required by (a) of this section, shall be equally prorated and the prorated amounts distributed to municipalities and other recipients.

* Sec. 12. This Act takes effect on the first day of the fiscal year for which not less than $31,000,000 is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of this Act, or on July 1, 1983, whichever is earlier.

WITNESSES TESTIFYING:

Gardiner -- Bill introduced last year. Modernizes revenue sharing. More equitable distribution. The wealth of a community is recognized. p. 13 Municipal League suggestions incorporated--that a community show some sign of effort in order to receive basic $25,000 appropriation.

Meekins -- Questions whole revenue sharing concept. HB192 seems to put pressure on local governments to raise taxes. There would be no impetus to decrease reliance on sales and property taxes. Sales and property taxes are regressive

Rep. Brian Rogers asks if an evaluation of the current program has been done. Questions how municipalities are currently using the revenue sharing program.

Rep. Moss-- Could the basic $25,000 entitlement be seen as an attempt to pressure villages into organizing?

Mitch Gravo -- Representing Anchorage. Anchorage opposed to passage of HB192. Would like to see full funding of revenue sharing program. Anchorage has 42% of revenue but has 47% of the state's population. Has revenue sharing decreased local taxes? This bill as disincentive to decrease local taxes.

If there are special problems and specail needs in a community, they should be met separately.

Parr asks for information on ratio of income taxes paid to State vs. amount actually received . Asked if a group of 45 people could incorporate and receive $25,000?

Rep. Guy asks if snow mobiles could be covered under road appropriations? Told that HB 192 doesn't change current practice on this point.

John Williams -- testifies re Meekin's concern that HB192 would serve to encourage municipalities to raise taxes. In fact, it would require that Municipalities raise taxes by $14 for every $1 they would be receiving from the state.

WITNESSES TESTIFYING:

Gardiner -

Bill introduced last year. Municipal League did alot of work on the bill. Basically, it (1) modernizes revenue sharing program better fitting the needs of all communities. (2) provides for a more equitable distribution of dollars.

The wealthier communities have a tax base already. It attempts to help provide for those areas where an industry base is missing where there is no state employment.

P. 1. Line 21--preplaces existing system. Reviewed factors in formula to be used.
Ch. 89 p. 6 Line 25 -- reiterated existing program for unorganized borough Minimum funding of $25,000 for all communities.
P. 17 Line 7 "Hold Harmless" clause
P. 9 Line 5 Total Project Costs (SB222) 1978

John Williams

Proposed revenue sharing plan doesn't prioritize services as does present law.
No service provided is exempt as long as there is local revenue.
Formular reduces to amount taxed by 1 mil. Full and true property value--never less than 15% for communities which have no taxable property . Proposal would not go into effect until there is $27 MIllion..

Lee Sharp Worked on bill with Legislative Committee of Municipal League.

COMMITTEE ACTION: No action taken. Bill will be heard again.

RE: Revenue Sharing

On Friday, March 9, the C&RA Committee will meet with the House Finance Committee on the Revenue Sharing Budget and HB 192 at 8:30 A.M. Room 421, Capitol.

The following information might aid you in reviewing the proposed revenue sharing budget and in evaluating the implications of the various funding levels in terms of municipal entitlements.

For purposes of this analysis for the House Community and Regional Affairs Committee, the following municipalities are included: Anchorage, Fairbanks, Kenai, Kodiak Island, Mat-Su, Cordova and Valdez.

This review deals with the four projected funding levels under the current revenue sharing method based on FY '79 funding figures and with the entitlement projections based on passage and funding of HB 192.

TOTAL FUNDING LEVEL	BUDGET
Reduction 10% $16,819,200.	House Finance Committee
18,688,000.	Governor
17% or 21,857,300.	Agency Request
30% or 24,382,700.	Revised Agency Figure (see attached explanation of this request)
27,000,000.	HB 192

LOCAL GOV'T.	(H)FINANCE	GOV'S BUDGET	AGENCY BUDGET	REVISED AGENCY	HB 192
ANCHORAGE	$7,979,451.3	$8,866,057.	$10,373,286.	$11,525,874.	$11,404,644.
FAIRBANKS	986,319.9	1,095,911.	1,282,215.8	1,424,684.3	1,274,382.
KENAI	260,148.6	289,054.	338,193.18	375,770.20	557,287.
KODIAK	111,268.8	123,632.	144,649.44	160,721.60	513,446.
MAT-SU	166,479.3	184,977.	216,423.09	240,470.10	513,446.
CORDOVA	182,233.8	202,482.	236,903.94	263,226.60	270.98?
VALDEZ	243,579.6	270,644.	316,653.48	351,837.20	268,343.

3/2/79 Workshop with Municipal League

Ron Larson--Mayor, Mat-Su Borough- on Municipal League Legislative Committee
HB 127 Top priority of Municipal League
Local level would amke the decisions themselves
If you establish a salary are you "changing" a salary?

Tom Bearup--Mayor, Soldotna
Supports HB 127

Jim NOrdale -- Attorney, North Star Borough. On Municipal League Leg. Committee
Home Rule communities are (aren't) under the bill.
Supports HB 127.

Dr. Mike Emmick--Kodaik (POrt Lions)
Supports HB 192 (Revenue Sharing)
On 40% bill--In KOdaik they take total number of votes and divide by # of people who voted. Expense to local government should be considered.
This is a problem if you are voting in a fire service area. Perhaps 300 people live in the area. You need 40% and only 100 people vote.
It should be local option to allow municipality to retain the 40% provision in elections.

Martin Tengs-- Haines Borough Mayor.

Mike Emmick--Anchorage had been supportive of HB 192 when it was being drafted.

Re HB 192 suggests using 17Million rather than 27Million $ to get realistic formula.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

House Bill No. 192 would repeal AS 43.18.010 - 43.18.045 which provides for State Aid to Local Governments. The Governor's FY 80 request for maintenance of this grant program is $18,688,000.

House Bill No. 192, which calls for reform of the State Revenue Sharing Program and a minimum appropriation of $27,000,000, would cost $8,312,000 above the Governor's request to fund in FY 80.

The agency request for FY 80 to fund the existing Revenue Sharing Program at 100% was $21,857,290. As the implications of the new definition of "total project cost" for construction aid [AS 43.18.010(1)] are still unclear, even this figure may be insufficient for full funding

19 AAC 30.010. SCOPE OF REGULATIONS. The regulations in this chapter are prescribed for implementing, interpreting, and making specific the act providing state aid to local governments, AS 43.18.010 – 43.18.045. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.020. STANDARDS FOR PAYMENTS OF ENTITLEMENTS UNDER AS 43.18 AND THIS CHAPTER. Applicants for payments under AS 43.18.010 – 43.18.045 will demonstrate to the department that they are qualified for payments in the following categories of service for which they have power and exercise the power with a minimum level of financial support:

(1) POLICE PROTECTION: An applicant is eligible for payment if the following minimum standards are met:

(A) the applicant must provide police protection with one or more police officers on duty or on call at all times;

(B) a police officer must be at least 19 years of age and must not have been convicted by a court of a crime which is classified as a felony in this state within the past 10 years;

(C) an applicant will not be eligible to receive revenue sharing funds unless a police officer within 12 months after his appointment has satisfactorily completed a basic course in police training approved by the Department of Public Safety. The commissioner may grant an extension of time for the completion of the basic program by a police officer upon presentation of evidence by the municipality that a police officer is unable to complete the basic program within 12 months of his appointment due to illness, injury, family emergency, military service or special duty assignment. An extension may also be made when the commissioner determines that it would be in the public interest.

(D) notwithstanding the provisions of (A) and (B) of this section, the commissioner may waive the requirements set forth in paragraph (C) on presentation of evidence by the municipality and acceptance of the evidence by the Police Standards Council that a police officer is otherwise qualified based on work experience, education, or training;

(E) recognition of the applicant by the Police Standards Council as a "participating police department" is evidence of eligibility under this section.

(2) FIRE PROTECTION:

(A) a municipal applicant is eligible for payment if it provides fire protection. Fire protection includes, but is not limited to, fire protection provided by a volunteer fire department which is currently registered with the State Fire Marshal and which has official recognition and financial support from the municipality in which it is located;

(B) a volunteer fire department located

2

outside a municipality is eligible if it meets the following criteria:

(i) it is currently registered with the State Fire Marshal; and

(ii) minimum financial support as defined in 19 AAC 30.020(10) is provided; and

(iii) unexpended funds are dedicated irrevocably for the operation and maintenance of fire protection services;

(C) organizational grants shall be made on the same basis to facilitate the organization of a volunteer fire department in an area not in a municipality upon apolication of the proposed fire protection group to the State Fire Marshal and approval of an application according to standards of organization and service prescribed by regulations promulgated by the State Fire Marshal, and upon submitting an application for state aid to the department.

(3) AIR OR WATER POLLUTION CONTROL. An applicant is eligible for payment under this category if it meets either of the following minimum standards:

(A) the municipality is engaged in a comprehensive study of an air pollution control program or implementing an air pollution control program; or

(B) the municipality has a sanitary sewage treatment facility and sewage disposal system which is in compliance with state law or the sewage treatment facility is under construction and will meet state requirements.

(4) LAND USE PLANNING: An applicant is eligible for payment if the following minimum standards are met:

(A) the municipality shall be in the process of preparing or updating a comprehensive land use plan or be implementing a comprehensive land use plan through exercise of platting or zoning powers; and

(B) if a municipality has a population over 12,000 persons, the municipality, to qualify for aid under this paragraph, shall employ a staff planner charged with the primary responsibility for land use planning and plan implementation; or

(C) if the municipality has a population fewer than 12,000 persons, the municipality shall qualify for aid under this paragraph by availing itself of planning assistance through one of the following:

(i) a staff planner charged with the primary responsibility of land use planning and plan implementation or a planning commission engaged in the preparation or implementation of a comprehensive land use plan; or

(ii) an annual contract with a recognized planning firm to provide land use planning and plan implementation on a consulting basis with a work program outline approved by the Department of Community and Regional Affairs; or

(iii) participation in the state's continuing planning advisory service program of the Department of Community and Regional Affairs through assistance in the preparation or implementation of a comprehensive planning program.

(5) PARKS AND RECREATION: An applicant is eligible for payment if one or more of the following minimum standards are met:

(A) a municipality must provide a park or recreational facility available to the public; or

(B) the municipality provides a recreational program on a regular and continuing basis available to the public.

(6) TRANSPORTATION FACILITIES: An applicant is eligible for payment under this category if it operates one or more of the following facilities:

(A) a small boat harbor which provides deep water shelter, either natural or artificial, on the coast of a sea, lake, river or other body of water; or

3

(B) a port or dock which has the capability of receiving cargo from and discharging cargo to commercial vessels; or

(C) an airport for the convenience of private and commercial aircraft. Excluded are airports exclusively operated and maintained by a federal or state agency or by a private party, airports maintained on a seasonal basis, and natural landing strips; or

(D) a transit system for the transportation of people in accordance with established tariffs by rail and monorail, or buses specifically designed and constructed to accommodate the general public.

(7) ROAD MAINTENANCE: An applicant is eligible for payment under these categories if one or both of the following minimum standards are met:

(A) a public road, street or highway maintained by an applicant must be dedicated to public use by licensed automotive equipment; specifically excluded are roads, streets or highways maintained by a federal or state agency or maintained by the applicant pursuant to an agreement with a federal or state agency;

(B) an ice road maintained by an applicant must connect two or more inhabited areas and be used by licensed automotive equipment.

(8) HEALTH FACILITIES AND HOSPITALS: An applicant is eligible for payment under these categories if one or more of the following minimum standards are met:

(A) Municipal Health Services: an applicant shall have and exercise the health power and have within its boundaries a qualifying hospital under (B) or (C) of this section;

(B) Municipal Hospitals: an applicant must have and exercise the power to provide hospital facilities and services. Payment shall be based on the number of beds actually set up for patient care limited to the number of beds licensed as of July 1 of the entitlement year by the Department of Health and Social Services and provided for in the current construction design of the hospital. Funds received under this subparagraph may be used only for hospitals and shall be apportioned among qualifying hospitals as the applicant determines;

(C) Nonprofit Hospitals: an applicant shall certify to the department before June 30 of the entitlement year that the hospital is in compliance with all standards for hospitals which have been adopted by the applicant. Payments to the applicant shall be transferred immediately to the hospital in accord with the basis by which the entitlement was generated by the hospital and shall be applied to the annual cost of operation and maintenance of the hospital or for the provision of health care service at the hospital as the directors of the hospital determine;

(D) to be eligible under (B) or (C) of this section, the hospital must be licensed as a general hospital by the Department of Health and Social Services; hospitals wholly operated or wholly supported by a federal or state agency are ineligible under (B) and (C) of this section;

(E) Health Facilities: an applicant must have and exercise the power of health service. Payment shall be based on the number of beds set up for patient care, or payment shall be made per health facility as the applicant determines;

(F) to be eligible under (E) of this section, a health facility shall be a public health center, maternity home, community mental health center, facility for the mentally or physically handicapped, nursing home, or convalescent center which is licensed, when required, by the state under AS 18.20.010 - 18.20.130 or if licensing is not required, approved by the department, and is owned or operated by an applicant or by a nonprofit corporation or other nonprofit sponsor. Facilities wholly operated or wholly supported by a federal or state agency are ineligible;

(G) financial eligibility for hospitals and health facilities and health services shall be based on the financial support provided by

the applicant and excludes those services that are actually provided or wholly funded by a federal or state agency. Any unexpended entitlement received shall be dedicated irrevocably for the service, operation, or maintenance of the health facility or health service;

(H) funds received by a municipality under (A) or (E) of this section shall be used for expenses of health services or operation and maintenance of facilities as the applicant determines.

(9) CONSTRUCTION AID: an applicant is eligible for payment if the following minimum standards are met:

(A) if construction of a hospital or health facility began after January 1, 1968, and state matching aid for construction approved for payment to the municipality or other facility sponsor constitutes less than 25 percent of the total project cost, the state shall pay to the municipality or other facility sponsor each fiscal year a sum equal to $2,500 per bed for the maximum number of beds provided for in the construction design of the hospital or health facility. State aid provided for in this section shall continue until the municipality or other facility sponsor has received an amount which, combined with state matching money for construction of the hospital or health facility, equals 25 percent of the total project cost. No funds received for construction shall be used for any other purpose;

(B) state matching aid for construction means any construction aid program administered by the Department of Health and Social Services;

(C) project or construction costs shall be those contracted costs that are eligible for financial participation under the Hill-Burton Construction Program for construction of new buildings, including, but not limited to, the expansion, replacement and modernization of existing buildings and initial equipment of any such buildings; including architect and consultant fees, but not including the cost of land acquisition and offsite improvements;

(D) other facility sponsor shall refer to a public or nonprofit corporation which owns or operates, or both, a hospital or health facility which is located outside the corporate limits of a municipality.

(10) FINANCIAL BASIS FOR ELIGIBILITY: (a) A determination that a service was provided or a power was exercised shall be based on the financial support provided during an applicant's fiscal year containing July 1, 1976. Subsequently, the financial support shall be determined from the applicant's previous fiscal year containing July 1 of the previous entitlement period.

(b) Financial support is defined as a minimum cash disbursement of not less than 20 percent of the amount received for a category of service funded during the previous fiscal year or, in the case of a newly acquired power, a budget appropriation not less than 20 percent of the amount to be received for the eligible category of service. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.010 AS 44.47.050(14)
AS 43.18.040 AS 44.47.160

19 AAC 30.030. DATE OF ELIGIBILITY. Eligibility for receipt of state aid provided by AS 43.18.010 – 43.18.045 is predicated upon the possession and exercise of a power or provision of a service by an applicant as of July 1 of the entitlement period. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.040. APPLICATION. (a) Application for state aid to local governments under AS 43.18.010 – 43.18.045 shall be made on forms prescribed by the commissioner.

(b) Not later than August 15 of the entitlement period, the department will forward application forms to each municipality incorporated before July 1 of the entitlement period and to every other potential applicant incorporated before July 1 of the entitlement period which the department is aware of and which it believes may be eligible for state aid.

(c) As a condition to participation in the program, application for state aid under AS

5

43.18.010 – 43.18.045 shall be returned to the department mailed no later than November 1 of the entitlement period. Based on information certified by the municipal officials and contained in the application submitted, the commissioner will prepare an initial determination of entitlement no later than December 15 and will mail notice of the amount of entitlement to each applicant determined eligible. However, if the commissioner determines that an applicant has failed to comply substantially with AS 43.18.010 – 43.18.045 and the regulations of this chapter or failed to provide the category of service or failed to exercise the power funded during a previous entitlement year, the commissioner will reduce the current entitlement of the applicant by the difference between the sum of the prior year payments and the proper entitlements, or demand the sum of payment and prepayment amount be repaid to the department if the current entitlement is insufficient. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.010
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.050. APPEAL. (a) Within 10 days after receipt of the notice of entitlement from the department, an applicant may appeal the determination of initial entitlement to the commissioner. The appeal shall be in writing and shall identify the particular category or categories to which the applicant takes exception, the determination of entitlement to which the applicant takes exception, and the reasons for its exception. The appeal shall include all relevant supporting evidence.

(b) The commissioner shall review the record of appeal and enter the final determination of entitlement. The commissioner may affirm or modify the determination of entitlement previously entered, and shall notify the applicant of the decision.

(c) If the applicant fails to appeal an initial determination within the time set forth in subsection (a) of this section, the determination of entitlement entered pursuant to sec. 40(c) of this chapter constitutes the final determination of the department.

(d) The manner of computation of population may not be made the subject of an appeal. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.060. POPULATION DATA. (a) The date for determination of population of an applicant is July 1 of the entitlement year.

(b) The population data used in determination of allocations of state aid and adjustments to those allocations will be the official report of the United States Bureau of the Census. However, an applicant may substitute for the official report of the United States Bureau of the Census

(1) an enumeration, certified as true and correct by the governing body of the municipality or chief administrative officer of a volunteer fire department located outside a municipality, specifying the names of residents of the municipality, service area, or area served by a fire department, prepared according to the criteria established by the department; or

(2) an estimate of population based upon other reliable data such as public school enrollment figures, public utility connections, registered voters, and certified employment payrolls; or

(3) the latest military population supplied by the adjutant general for the military population residing on a military reserve; or

(4) the latest available population estimate prepared by the Division of Employment Security, Alaska Department of Labor.

(c) The commissioner may require each applicant which offers an estimate of its population to submit such evidence as may be necessary to verify computation of the population estimate. The commissioner may require the applicant to provide further information within 10 days of the date of receipt of notification, or the estimate will be rejected and allocations made on the basis of the best data available to the department. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.010(c) AS 44.47.050(14)
AS 43.18.040 AS 44.47.160

19 AAC 30.070. FINANCIAL REPORTS. (a) Each unified municipality, organized borough, home rule city, city of the first class, hospital, nonmunicipal health facility, or other facility sponsor shall submit one copy of its annual audit for the fiscal year preceding the entitlement period. Preparation of the audit shall be by a licensed accountant.

(b) Each city of the second class and each volunteer fire department located outside a municipality shall submit an audit or certified statement of income and expenditures of the accounts and financial transactions for the fiscal year preceding the entitlement period in a form approved by the commissioner.

(c) No payment of a final entitlement for the applicant will be made until an audit or statement of income and expenditures is filed by the applicant with the department. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.010(c)
AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.080. PREPAYMENT AND BUDGETS. (a) The commissioner may provide for prepayment to an applicant a sum not to exceed 50 percent of the previous year's entitlement computed without regard to any proration and not to exceed the current year's entitlement.

(b) Prepayments will be allowed to an applicant upon receipt by the department of a completed application and approved budget mailed no later than October 1 of the entitlement year.

(c) Prepayments shall be deducted from the entitlement prior to transmittal of the balance of the entitlement due. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.090. OVERPAYMENT AND ADJUSTMENT. (a) After mailing of prepayments, if the commissioner determines that the prepayment mailed to an applicant exceeds the entitlement payable to an applicant during the entitlement period, the commissioner shall

(1) request that the difference between the amount of prepayment and the proper entitlement be repaid to the department; or

(2) reduce, in the next entitlement period, the entitlement to an applicant by the difference between the sum of the payments and the proper entitlement.

(b) After mailing of the balance of the entitlement due to an applicant, if the commissioner determines that the sum of the prepayment and final payment exceeds the entitlement payable to the applicant during an entitlement period, the commissioner shall

(1) request that the difference between the sum of the payments and the proper entitlement be repaid to the department; or

(2) reduce, in the next entitlement period, the entitlement to an applicant by the difference between the sum of the payments and the proper entitlement. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.020
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.100. PRORATING THE ANNUAL APPROPRIATION FOR THE PROGRAM. If the amount appropriated is insufficient for the purpose of each applicant's share authorized under AS 43.18.010 – 43.18.045, such funds as are available shall be distributed pro rata among the applicants based upon the notices of final entitlement. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.110. INCORPORATION OR DISSOLUTION OF AN APPLICANT. (a) An applicant which is incorporated during the entitlement period is not eligible to receive state aid for the entitlement period during which it was incorporated.

(b) An applicant which is to be dissolved pursuant to AS 29.68.500 during the entitlement period will receive an entitlement payment prorated over the number of days in the entitlement period during which it has been in existence.

(c) Grants shall be made to facilitate the organization of volunteer fire departments located outside a municipality from the funds available. Requests may be made any time during the entitlement year on a proper application form. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.120. UNIFIED MUNICIPALITIES. For purposes of AS 43.18.010 – 43.18.045 and the regulations of this chapter, a unified municipality shall be treated as an organized borough. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.130. FINAL DETERMINATION FOR THE PROGRAM. The Department of Community and Regional Affairs will finally approve or disapprove entitlements based upon information provided by the applicant and other departments of the state. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)
AS 44.47.160

19 AAC 30.140. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "commissioner" means the Commissioner of the Department of Community and Regional Affairs;

(2) "department" means the Department of Community and Regional Affairs;

(3) "applicant" means any municipality, volunteer fire department located outside a municipality, or other facility sponsor;

(4) "facility" means a permanent improvement constructed, operated or maintained for the convenience of the public. (Eff. 9/5/76, Reg. 59)

Authority: AS 43.18.040
AS 44.47.050(14)

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 2, 1979

SUBJECT: Sectional Analysis of the Municipal League's Revenue Sharing Reform Proposal (Work Order No. 6162)

TO: Representative Terry Gardiner

FROM: John B. Chenoweth
Legislative Counsel

John Williams
Policy Analyst

In response to your request of the Legislative Council on July 21, 1978, we have participated with a special committee of the Alaska Municipal League in drafting a revenue sharing reform bill, which is now complete. The Board of Directors of the League approved the draft at its meeting in Juneau on January 19, 1979 (copy enclosed).

Following is a sectional analysis of the committee's product.

*Section 1. PURPOSE.

Three purposes are stated: (1) equity of allocation of state resources with municipalities; (2) basic support to municipalities for public services irrespective of physical location of taxable wealth; and (3) improvement of the administrative capacity of less populous municipalities.

*Section 2. CHAPTER 88.

This chapter contains the major revision of the revenue sharing program. In the most general terms, it provides for the computation and distribution of an "equalization entitlement" for local government services in accordance with a formula and schedules set out in the sections incorporated in the chapter.

Sec. 29.88.010 specifies the method that is utilized to distribute revenues under the chapter. Three factors are

applicable: population, revenue generation, and property value base.[1] The formula multiplies the population of the taxing unit[1] by the mill rate equivalent of allowed revenues[2] generated by the municipality. The sum of allowed revenues is divided by one-thousandth of the full and true taxable property value within the taxing jurisdiction. The resultant quotient is referred to as the "local effort" for the municipality: it is equal to the full and true mill rate equivalent of all allowed revenues generated by each municipality.

Sec. 29.88.015 specifies the means whereby population numbers shall be determined. Generally, Bureau of the Census data will be utilized; however, other reliable data in the judgment of the Department of Community and Regional Affairs may be used. The provision for population count is not unlike the provision of the current state aid program. Unlike the current program, however, no separate treatment is given the counting of persons who are residents of military reservations.

Sec. 29.88.020 describes the means whereby mill rate equivalent determinations will be made. Initially, a certified statement submitted by each municipality, on a form provided by the department, will specify the revenues generated in each municipality. This shall be accomplished by all municipalities by

---

1/ A "taxing unit" is defined, for purposes of this program as "a city, borough, unified municipality, or service area or differential tax zone."

2/ Allowed revenues include tax revenues plus other revenues which will diminsh the necessity of incremental tax revenues, including inspection fees, permits, fines, penalties, use fees, and income from mass transit, offstreet parking, and recreation programs. Revenues not allowed for inclusion are tax revenues used to subsidize utilities commonly run by private businesses (as defined in sec. 45 of this chapter), interest on investments, income from the sale or lease of land or equipment, and revenues from any other source.

October 15. By December 15, the department is to make a final determination for each municipality, after reviewing all financial audits and statements submitted by the municipalities. Any adjustments made to the figures initially submitted by a municipality shall be reported to the municipality along with the revised figures.

Full and true property values shall be determined in the manner provided in AS 14.17.140 (state aid to education). In municipalities which are not school districts and thus not covered by the provisions of AS 14.17, the state assessor shall, at least once each three years, estimate the property value for all cities with populations of 750 or more. For cities which are not school districts, and which have populations less than 750, estimated property values will be determined by averaging the per capita property values of all cities having populations less than 750 and for which assessments are completed.

Sec. 29.88.025 specifies the necessary documentation that would be supplied to the department by each municipality in support of its application. The fiscal information is to be for the fiscal year which precedes the fiscal for which the entitlement is sought.

Sec. 29.88.030: As with present law, the bill provides for entitlements to be returned to the taxing unit for which the entitlement was earned. There are two exceptions: 15 percent of an area-wide entitlement may be used for non area-wide purposes, and, the local government may decide the taxing jurisdiction that is to receive the entitlement generated by non-tax revenues (fees, permits, etc).

Sec. 29.88.035 establishes the tax equalization account from which entitlements earned under this chapter will be paid. The total appropriation to the account is to be distributed by prorating entitlements.

Sec. 29.88.040 gives the department authority to adopt, amend and repeal regulations necessary to implement the chapter. The regulations would contain provisions for obtaining information, set filing dates, providing notification to municipalities with respect to changes made by the department with regard to any entitlement, and a reasonable time for a municipality to respond to decisions of the department. In response

to some specific complaints by several of the Municipal League representatives who worked on the draft, language has been inserted by which the department is directed to supply application assistance to municipalities. Additionally, the department is empowered to extend the definition of utilities (section 045 of this chapter) to cover additional enterprise activities for which no working classification has been provided by statute.

Sec. 29.88.045 defines terms used in the chapter, including 'taxing unit' and 'utilities'.

*Section 3. CHAPTER 89.

Chapter 89 is, in substance, a restatement of present law regarding entitlements earned for road maintenance, health facilities and hospitals, construction aid, and volunteer fire departments in the unorganized borough. The following changes have been made from present law: (1) public road maintenance entitlements are based on $2500/mile (present law is $1500/mile); (2) ice road maintenance is based on $1500/mile (present law is $900/mile); (3) construction aid for hospitals is not multiplied by the cost of living factor, as is the case in present law; and (4) municipalities which exercise a health power will not receive a $2 per capita distribution.

Generally, this portion of present law which is saved in the Municipal League's draft bill provides for health related entitlements according to the following: (1) for hospitals with 10 or more beds -- the greater of $1,000 per bed or $75,000 per facility, (2) for hospitals with fewer than 10 beds -- the greater of $1,000 per bed or $25,000 per facility; (3) for health facilities -- $1,000 pe bed or $4,000 per facility; (4) the entire entitlement received for health purposes must be used for health purposes; (5) for hospitals which were begun after January 1, 1968, the greater of $2,500 per bed or 5 percent of the construction cost annually until the total payment equals 25 percent of the total construction cost; and (6) for volunteer fire departments in the unorganized borough, $7.50 per capita. Entitlements earned under this section (except for hospital construction) are multiplied by an area cost of living differential, determined under AS 39.27.030.

Section 29.89.040 establishes a miscellaneous services account, from which payments are made under this chapter.

*Section 4. CHAPTER 90.

Sec. 29.90.010 precludes an interpretation of the general administrative provisions of the state aid program to create of a debt to the state.

Sec. 29.90.020 directs the department to allocate funds from the two accounts established (AS 29.88.035 and AS 29.89.040) and further provides that any excess funds existing in the miscellaneous services account (Chapter 89) shall then be added to the tax equalization account (Chapter 88).

Subsection (b) describes the means for determining proration of funds allocated under the equalization formula of Chapter 88 and under the minimum entitlement provisions of AS 29.90.030. After the Chapter 88 and Chapter 89 entitlements have been determined, the amount necessary to guarantee the minimum entitlement provided for in Sec. 29.90.030 is calculated and all Chapter 88 municipal entitlements are proportionally reduced so that the sum of payments under Chapter 88 and under AS 29.90.030 equal the amount available in the tax equalization account.

Sec. 29.90.030 provides for payment of minimum entitlements. All municipalities are guaranteed a minimum of $25,000 (plus the cost of living allowance for their area) if (1) a regular election has been held; (2) regular council meetings have been conducted; (3) the municipality has adopted a budget; (4) local ordinances have been codified; and (5) some degree of municipal administration is provided for through a manager, clerk, or other part-time or full-time officer.

*Sections 5 - 9.

These sections make correlative changes in AS 29 required by the state aid program changes, and are generally self-explanatory.

*Section 10.

The section repeals the statutory basis of the present program of state aid to local governments.

*Section 11: "Hold Harmless"

Section 11 specifies that, for three years after this act becomes effective, no municipality will receive less than its actual entitlement earned in the last year that the present law is applied.

*Section 12

The section specifies that the act becomes effective when $27,000,000 is appropriated to the program, or July 1, 1982, whichever is earlier.

RATIONALE FOR STATE FUNDING OF THIS BRU

Each of the following programs is authorized by state law and in the case of the National Forest Receipts Program, by both state and federal statutory mandate:

AS 41.15.180. requires that the Commissioner of Administration receives national forest income under 16 U.S.C. 500 pay every organized borough and unified municipality "in which national forest land is located, a share of income from that forest... proportional to the area of national forest located within its boundaries."

AS 43.18.010 - .045. provides for the annual payment to any eligible "city or organized borough of any class which has power to provide the following services and exercise that power." Cost-breakdowns follow.

DESCRIPTION: Efforts aimed at achieving these goals are accomplished by providing State Revenue Sharing Grants payable from the amounts annually appropriated to boroughs, cities, and volunteer fire departments, possessing and exercising the following powers:

Policy Protection	$ 12 per capita	Road Maintenance	$ 1,500 per mile - Public Roads
Fire Protection	$7.50 per capita		900 per mile - Ice Roads
Air/Water Pollution Control	$ 2 per capita	Health Services	$ 2 per capita
Land Use	$ 2 per capita	Health Facilities	$ 1,000 per bed; $4,000 per facility
Parks and Recreation	$ 5 per capita		$ 2,500 per bed (construction)
Transportation Facilities	$ 5 per capita	Hospitals	$25,000/75,000 per hospital
			$ 1,000 per bed; 2,500 per bed (construction) over a 5 year period (applicant's option)

A cost-of-living differential is also provided.

Further provisions are made for payments to "volunteer fire departments registered with the state fire marshal and serving an area not in an organized borough or a city a sum for protection purposes equal to $7.50 per capita for the population served by the department."

$24,382.7	GF	Total FY 80 Continuation Level

EXPLANATION

As entitlements have been determined for all municipalities and volunteer fire departments participating in the FY 79 State Revenue Sharing Program, the Department is in a better position to estimate grant monies needed to fully fund the FY 80 Program.

The impact of the alternative method of making construction aid payments (5% of the construction cost if it is higher than $2,500 per bed) was not fully anticipated when projections were made for the FY 79 Program. The $634.9 needed in addition to restoration of the vetoed $1,743.0 can be exclusively attributed to payments made under the 5% method. For example, the Municipality of Anchorage would have received approximately $947,500 under the $2,500 per bed method. At 5% of the construction cost, the FY 79 construction aid entitlement for Anchorage was $1,959,543.

Five cities and volunteer fire departments did not meet the November 1, 1978 deadline for submission of revenue sharing applications. These applicants will be eligible for the FY 80 Program, and it is certain that all or most of them will meet the FY 80 reporting deadline.

Although Statewide projections of Alaska's population do not show any increase, there is movement within the State, as evidenced by special censuses conducted by the U. S. Census Bureau. This means that those communities experiencing growth will request a population increase, while those that may actually decline will not show any decrease. Unless a special census is conducted by the U. S. Census Bureau, we cannot arbitrarily reduce the populations of communities where we think there has been a decline. Generally, our population figures are higher than those prepared by other sources. By requiring detailed estimates from applicants, it is believed we can keep increases to a minimum; and, as a result, provide more accurate estimates of the populations in Alaskan municipalities.

Beginning January 1, 1979, Anchorage extended Police Protection to Eagle River and Chugiak. This in itself entitles the Municipality to approximately $180,000 in additional State shared revenue in FY 80. The City and Borough of Juneau is planning to build an alcoholism treatment facility and will probably be receiving $35,000 for construction aid. The Boroughs continue to create new Fire Service Areas and most municipalities are continually increasing road maintenance mileage. An approximate breakdown of service increases follows:

$180.0	Police Protection for Municipality of Anchorage
166.4	New Road Mileage @ Current Rate
50.0	New Fire Service Areas
86.8	Various increases in services by all classes of cities including Land Use Planning, Water Pollution Control, Health Facilities, etc.
35.0	Construction Aid for City & Borough of Juneau
$518.2	

Participation in the State Revenue Sharing Program increases every year. It is the Department's goal that every eligible applicant participate in this program. Approximately 20 volunteer fire departments and 19 municipalities did not participate this year. It is anticipated that half of these will participate in the FY 80 Program. The populations of these applicants are generally low and few services are being provided by the cities. A breakdown of this request is:

10 VFD's @ $500 ea.	= $ 5,000
10 Cities @ $5,000 ea.	= $50,000
	$55,000

The implications of the new definition of "total project cost" are difficult to evaluate at this point. However, it appears that construction aid payments would increase substantially and possibly even double. In fact, $2,373.8 is the total amount currently being paid to the major recipients of construction aid. Doubling current payments is the best estimate the Department can provide at this time. If this costly definition were repealed by July 1, 1979, $2,373.8 should be deleted from the agency's request. If the expanded definition is not repealed and no funds are appropriated to cover it, all municipalities and volunteer fire departments will be paying a portion of hospital construction costs in Anchorage and Fairbanks through a low proration factor.

HB 919 has been adequately planned for by restoring the vetoed amount and adding $634.9 to arrive at full funding for FY 79.

SUBJ: Revenue Sharing for Hospital Construction

Attached are the amendments to the Municipal Services Revenue Sharing statutes, AS 43.18, passed during the 1978 Session.

The amendment to paragraph (j) gives as an annual payment to a health facility sponsor the greater of $2,500 per bed or 5% of total project costs until these amounts, combined with any state matching funds for construction, total 25% of total project costs. Formerly only a payment of $2,500 per bed would be made until the 25% was reached.

This amendment to paragraph (j) affected four projects for FY 79, Providence Hospital, Alaska Hospital, Norton Sound Hospital in Nome, and Fairbanks Memorial Hospital. The FY 79 budget made no allowance for this speed-up in project payments -- the fiscal note for HB 919 which made the amendment had no funds included for that section of the bill. However, these hospitals did receive a partial speed-up since that is now the law, although suffering a pro-ration of their entitlement along with everyone else since this speed-up was not funded.

The cost of this amendment has been included in the FY 80 budget. The attached revised agency request estimates the additional cost to fully fund the 5% alternative at $643,900. Only Providence, Fairbanks Memorial, and Alaska Hospital will receive funds becau Norton Sound was paid off in FY 79.

31-01LH

24

The other 1978 amendment is reflected in paragraph (1) of AS 43.18.010 and changes the definition of project costs eligible for revenue sharing to include land acquisition, financing costs, architectural and engineering costs, machinery and equipment, and all other costs besides actual construction costs.

The revised agency request estimates that this definition will double the amount being paid for hospital construction revenue sharing; that is, it will add an additional $2,373,800 to entitlements. This is a rough estimate based on the example of an attached letter from Alaska Hospital that indicates their reimbursable costs would go from 25% of $16,137,400 to 25% of $40,550,136.

The cost of paragraph (1) could be less if it were construed to allow only costs incurred after the effective date of Chapter 168 SLA 1978 which was October 15, 1978. On the other hand it could be much more if it were determined to be retroactive to January 1, 1968 which is established in paragraph (j) as the beginning date of the program. This latter proposition has been made by Dr. Mike Beirne in his suit against the state. The state's arguments on that point are attached.

A strong argument against retroactivity not mentioned in the state's brief is that the last sentence of paragraph (j) requires that "no funds received for construction shall be used for any other purpose". Any completed hospital has presumably already paid all its construction costs. For that matter, strict adherence to this provision might allow only new projects to be reimbursed under the "total project cost" definition since any project that is begun will usually have its financing already arranged.

In fact, there are strong indications that this hospital reimbursement does not go for construction in many cases. Norton Sound recently inquired of Community and Regional Affairs if they could use their revenue sharing funds for operations. The 5% speed-up apparently came after they had covered their construction costs.

Of course, under either method of reimbursement the payments may extend beyond the construction period. Thus, there are strong pressures to use these funds for other than construction purposes. Community and Regional Affairs doesn't police this activity.

cc: Representative Bill Parker

payees. (§ 7-1-6 (c) ACLA 1949; am § 20 ch 186 SLA 1957; am § 1 ch 44 SLA 1969; am § 5 ch 143 SLA 1978)

Effect of amendment. — The 1978 amendment added the present second sentence.

Chapter 18. State Aid to Local Governments.

Article
2. Aid for School Construction (§§ 43.18.100 — 43.18.135)

Article 1. Aid for Miscellaneous Municipal Purposes.

Section
10. State aid to local governments
30. Local tax levy reduction

Sec. 43.18.010. State aid to local governments.

(j) If construction of a facility began after January 1, 1968 and state matching aid for construction approved for payment to the local government or other facility sponsor constitutes less than 25 per cent of the total project cost, the state shall pay to the local government or other facility sponsor each fiscal year a sum equal to $2,500 a bed for the maximum number of beds provided for in the construction design of the facility or five per cent of the total project cost, whichever is greater. State aid provided for in this subsection shall continue until the local government or other facility sponsor has received an amount which, combined with state matching money for construction of the facility, equals 25 per cent of the total project cost. No funds received for construction shall be used for any other purpose.

(k) A city or borough may not receive state shared revenue based on the population residing on that portion of a military reservation annexed to a city or borough after January 1, 1973, except as provided in this subsection. If a military reservation is located within a city or borough, the city or borough is limited in its entitlement to state shared revenue, based on the population residing on the reservation, as follows: 50 per cent of the amount paid per capita for police protection under (a)(1) of this section; 25 per cent of the amount paid per capita for parks and recreation under (a)(5) of this section; and 50 per cent of the amount paid per capita for transportation facilities or services under (a)(6) of this section.

(l) For the purposes of (j) of this section, "total project cost" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project. These include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative

and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.
(am § 24 ch 168 SLA 1978; am § 3 ch 173 SLA 1978)

Effect of amendments.
The first 1978 amendment added subsection (l).
The second 1978 amendment, effective July 1, 1978, added "or five per cent of the total project cost, whichever is greater" to the end of the first sentence of subsection (j).
As the rest of the section was not affected by the amendment, it is not set out.
Editor's note. — Subsection (k) is set out above to correct a typographical error in the main pamphlet.

Sec. 43.18.030. Local tax levy reduction. (a) The intent of §§ 10—100 of this chapter in authorizing state aid for educational purposes and municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year.

(b) If the municipality levies and collects real or personal property taxes, the governing body shall furnish the following notice with tax statements mailed for the fiscal year for which aid is received under AS 14.17 and §§ 10—100 of this chapter:

"NOTICE TO TAXPAYER

For the current fiscal year the (city) (borough) has been allocated the following amount of state aid for school and municipal purposes under the public school foundation program (Alaska Statutes 14.17), the municipal services revenue sharing program of Alaska Statutes 43.18.010 — 43.18.050, and the program of state aid for retirement of school construction debt (Alaska Statute 43.18.100):

PUBLIC SCHOOL FOUNDATION PROGRAM ASSISTANCE	$
STATE AID FOR RETIREMENT OF SCHOOL CONSTRUCTION DEBT	$
AID BASED ON MUNICIPAL SERVICES FURNISHED (fire protection, police protection, air or water pollution control, land use planning, road maintenance, parks and recreation, transportation facilities and services, hospital operation)	$
Total Aid	$

THE ALASKA HOSPITAL AND MEDICAL CENTER, Inc.

January 17, 1979

Mr. Clair Dalton
Municipal Finance Department
3500 Tudor Road
Anchorage, Alaska 99507

Dear Sir:

Attached is a copy of a letter from Bert Hall, which was hand carried to me yesterday.

This letter indicates the amount of money the Municipality is requesting from the State of Alaska to pass through to The Alaska Hospital and Medical Center under the provision of AS 43.18.010, State Aid to Local Government. Mr. Hall indicates that any disagreement with the amounts shown therein must be conveyed to you this date, to be included in the Municipality's appeal to the State.

We are in agreement with the total of $154,000 shown under General Purpose Revenue Sharing, but wish to amend and appeal the amount shown as "Construction Aid."

AS 43.18.010 previously provided for aid to construction of a hospital in the amount of $2500 per designed bed, annually, until 25 percent of the cost of construction had been paid. Under the original bill, only direct building costs were allowable, and, on that basis, our construction cost was shown as $16,137.400.

In the 1978 legislative session, AS 43.18.010 was amended by FCCS-SCS-HB 222, which was subsequently signed into law by the Governor. This amendment provided for an annual payment of $2500 per bed, or 5 percent of the total cost of construction, whichever is greater, payments to continue until 25 percent of the total project cost had been paid.

This amendment allowed costs of financing, purchase of equipment, legal and administrative fees, and many other associated costs not previously acknowledged. Under the provisions of this amendment, we have computed our total project cost to be $40,550,136.56, and are therefore requesting annual payment of $2,027,506.83 under the Construction Aid section.

new definition of construction costs not in effect

grants for sports facilities. These two do not exhaust the examples to be found in the three provisions Beirne cites.

In other words, these provisions establish precisely the contrary of the proposition for which Beirne cites them: the legislature, by enacting separate and dissimilar definitions of the term "total project cost" or its equivalent, expressed its intention that the terms were to have different meanings for different types of construction.

If the legislature had intended that the term was to have the same meaning for many different types of construction, it is reasonable to assume that it would have enacted a single definitional provision and given it broad application. As will be discussed next, this is precisely what it did in 1978, too late to lend any support to Beirne's arguments in this case.

Beirne's final argument is based on part of a legislative enactment, § 24 of FCCS SCS HB 222, § 24 Ch. 168 SLA 1978, amending AS 43.18.010 to define "total project cost" as used in AS 43.18.010(j). That enactment was signed by the Governor in July, 1978. Beirne states that "there can now be no question of the legislative intent to take the broadest possible view of what is included in "total project cost" (emphasis added). Not only is Beirne's characterization of what "legislative intent" now happens to be incorrect, but that is not an issue in this lawsuit. The question remains, what does the term mean for purposes of Beirne's applications for public funds for FY's 75 through 77, prior to the enactment of Ch. 168 SLA 1978?

The bill constitutes a major departure from the legislature's previous policy respecting state funding of construction projects, in that it adopts a single definition of "project costs" or its equivalent for purposes of state

ATTORNEY GENERAL, STATE OF ALASKA
STATE CAPITOL
POUCH K, JUNEAU, ALASKA 99811

financial participation in practically all construction projects, including airports (§ 19; "project costs"), agricultural and industrial fairs (§ 21; "project costs for capital improvement"), disaster assistance (§ 22; "costs of the project"), access roads to mineral resources (§ 23; "cost of construction"), hospital construction (§ 24; "total project cost"), school construction (§ 25; "costs of school construction"), convention and recreation facilities (§ 26; "costs of construction"), sports facilities (§ 27; "cost of construction"), tourist attractions (§ 29; "cost of construction"), municipal water and sewer systems (§ 31; "eligible costs"), village safewater systems (§ 32; "cost of the construction of a facility"), and alcoholism facilities (§ 34; "costs of improvement, renovation or new construction of facilities"). 9/ While the new legislation may create new rights, that issue is not before this court.

As previously discussed, the legislature declined the opportunity Beirne had earlier given it, in the form of SCR 13, to nullify the interpretation given by C&RA to the term "total project cost" as it applied only to hospital construction. If Beirne's argument is correct, that the legislature intended Ch. 168 SLA 1978 to apply retroactively to his hospital project, then it must have intended retroactive application to practically every construction project in the areas enumerated above in which there has been financial participation by the State. The implications of that argument are unsettling, to say the least: if it is correct, then any previous legislative, administrative, or judicial definition of or limitation on construction costs

---

9/ Only §§ 25, 26 and 27 deviate in any respect from the basic definition.

ATTORNEY GENERAL, STATE OF ALASKA
STATE CAPITOL
POUCH M, JUNEAU, ALASKA 99811
PHONE (907) 465-3600

eligible for state financial participation, which defined eligibility more narrowly than the definition adopted, for twelve different types of construction projects, by Ch. 68 SLA 1978, would arguably be invalid.

If the legislature intended this result, it could have said so. It did not say so, for obvious reasons: not only would retroactive application have created an administrative nightmare, but legislative and judicial ones as well.

There is, however, a much more straightforward answer to Beirne's argument that the new statute creates new rights retroactively. AS 01.10.090 provides:

> No statute is retrospective unless expressly declared therein.

Not only did the legislature not provide for retroactive application, but it expressly provided for a future effective date of October 15, 1978.

F. The Undisputed Facts Show That Beirne is in No Event Entitled to the Relief He Requests.

Beirne has asked the court, in a factual vacuum, to interpret "total project costs" as that term is used in AS 43.18.010(j) to mean "the totality of all the costs of the project," not excluding even those that are wasteful or extravagant. As has been demonstrated, his arguments are without merit. The most compelling reasons against granting the relief he requests, however, ultimately rest on the facts of this dispute. Beirne's claims for public funds are not only misleading but, as discovered in the course of the two audits performed on the project and in discovery during this lawsuit, those claims contain serious misrepresentations of fact.

Beirne claimed an entitlement to public funds

Kuskokwim Native Association

February 25, 1980

The Honorable Bill Parker
Pouch V
Juneau AK 99811

Dear Representative Parker:

I have been working in local government for the Kuskokwim Native Association villages over the past three years. During that time I have seen much development in each village's capability to handle its own affairs. However, one continuing problem is that of generating local revenue. This problem is extremely sever in those villages that are unincorporated, or lacking city status.

These unincorporated villages receive no state revenue sharing money, other than for their Volunteer Fire Department, a mere $7.50/capita. Yet many of these same villages maintain their own village clinic, and have CETA paid police and recreation directors but are not eligible for state revenue sharing in these areas.

As you are probably aware, the incorporated cities at the same time, receive state revenue sharing payments for the following services

- Police Protection
- Fire Protection
- Water or Air Pollution Control
- Land Use Planning
- Parks and Recreation
- Transportation Facilities
- Public and Ice Road Maintenance
- Health Facilities (such as village clinics)
- Health Services
- Hospitals
- State Construction Aid

What I am proposing is that the legislature look into the possibility of providing state revenue sharing monies to village serving an area not in an organized borough or city. These unincorporated villages, of which there are over 100 in Alaska should also be entitled to state revenue to manage their own local government affairs.

BOX 106, ANIAK, ALASKA 99557 PHONE (907) 675-4384

Most of the villages would not be eligible for the full range of payments since many may not have a public road system, sewer or water systems, or sophisticated transportation facilities; however, most do operate their own health clinics and attempt to provide police or recreation services, in addition to the already funded fire protection programs.

I believe the fiscal note attached to such an amendment to Chapter 18 of the Alaska Statutes would be small, especially considering the local government management experience that these villages would be encountering by administering these state revenue sharing funds.

At a time when the legislature is considering establishing regional units within the Unorganized Borough, I believe that we need to first strengthen the village local government capabilities.

I would appreciate your consideration of this proposal. If you would like to discuss it further with me, please write or call.

Thank you.

Sincerely,

Cheryl Jerabek

HB

223

Alaska State Legislature

House of Representatives

Committee on

Community & Regional Affair

Pouch V
State Capitol
Juneau, Alaska 99811

Official Business

COMMITTEE MINUTES

DATE: 3/7/79

BILL NUMBER AND TITLE: HB 223 Exemption of disabled veterans from payment of real property taxes

ORIGINAL SPONSOR : McKinnon,Buchholdt,Meekins Munson

OTHER SPONSORS:

RECEIVED FROM:

FURTHER REFERRALS: Finance

MEMBERS PRESENT: Parker, Carney, Zharoff, O'Connell, Branson, Metcalfe, Parr

MEMBERS ABSENT: None

INDIVIDUALS CONTACTED:

FISCAL NOTE: C&RA $279.5

WITNESSES TESTIFYING:

McKinnon -- Basically the philosophy of this kind of exemption should be considered. Modeled after exemption for Senior Citizens. Intorduced last year.

Terry Earley, State Assessor

Senate Bill 154 introduced to provide the same type exemption but covers rentors. (Fiscal Note would probably be for approximately $132,000 more for coverage of rentors) Questions were asked concerning the relationship of pensions to the proposed bill.

William Kelm, Department Adjtant, The American Legion, Dept. of Alaska

Veterans who are rater 10% receive "compensation" (not called "pension"). This compensation is not taxable. If a person has a 40% rating it usually means that his earning capacity is impaired.

If you are considering a renters exemption, you have an open-ended situation--how would you determine how much of the rent is going for taxes.

Committee requests fiscal impact of the following:

1. Changing gross income limit to $10,000 and including unremarried widows of veterans in exemption

2. Include renters in bill

3. Take income tax credit approach as alternative (circuit breaker?approach)

COMMITTEE ACTION: C&RA asked to prepare fiscal notes on above options.

TAPE # 3 SIDE 2 716-1025

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B – JUNEAU 99811

March 14, 1979

The Honorable Bill Parker
Chairman
House Community and Regional
Affairs Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

RE: HOUSE BILL NO. 223

At the request of the members of the House Community and Regional Affairs Committee, State Assessor Terry Earley has attempted, given information available from the Federal Veterans Administration, to analyze the cost of alternatives to House Bill No. 223. The five requested alternatives are recapped on the attached summary sheet; an individual fiscal note is also attached for each alternative.

I would like to again call your attention to the position stated by the State Assessor in his testimony before your committee on March 7, 1979. The Department is strongly opposed to the "piece-meal" approach of providing property tax relief to certain groups of taxpayers in Alaska (i.e., senior citizens and farmers). House Bill No. 223 would extend this type of tax relief program to disabled veterans.

Property tax relief should be made available to those in need throughout the State of Alaska but should not be provided those residents who do not have a demonstrated need for State refunded property tax relief payments. We believe a more comprehensive program of property tax relief ought to be made available by the Legislature, preferably in the form of a reimbursement or rebate based upon income as determined through the filing of Alaska State income tax returns.

The Department, through the Office of the State Assessor, is prepared to pursue a more equitable approach to providing residents of Alaska with property tax relief - particularly those in need of relief as a result of limited incomes. Proposed legislation could be made available for consideration by the next session of the State Legislature. We would appreciate an expression from your committee as to whether or not this is a worthwhile endeavor for the Department to pursue prior to the next session.

P2L11

If you have questions regarding the attached alternatives to House Bill No. 223, Mr. Earley or I will be pleased to respond.

Sincerely,

Lee McAnerney
Commissioner

By: Palmer McCarter
Director
Local Government Assistance Division

cc: Senator Arliss Sturgulewski, Chair
Senate Community and Regional Affairs Committee

Representative Joe McKinnon (Sponsor of HB 223)

Senator Brad Bradley (Sponsor SB 154)

During the meeting of the House Committee on Community and Regional Affairs of March 7, 1979 property tax exemptions for Disabled Veterans were discussed. The following is a recap of fiscal impacts of the several proposals discussed.

	TOTAL ELIGIBLE	TOTAL COST
1. Exempting veterans over 40% disabled both homeowners and renters and leaving the $20,000 income limit.	670	$311,280
2. Exempting veterans over 40% disabled both homeowners and renters and reducing income limit to $10,000.	424	$197,948
3. Exempting veterans over 40% disabled both homeowners and renters and also including veteran's widows and reducing income limit to $10,000.	544	$253,698
4. Exempting veterans over 40% disabled both homeowners and renters and eliminating income restrictions.	681	$317,044
5. Exempting veterans over 40% disabled both homeowners and renters, also including veteran's widows and eliminating income restrictions.	876	$407,902

Prepared by:

Department of Community and Regional Affairs
Office of the State Assessor

Other Approaches & Comments

An eligible veteran shall be exempt from a portion of his local property taxes or rent equivalent based on the following chart:

Percent of Disability	Taxes Payable as a Percentage of Income
10% to 30%	5%
30% to 40%	4%
40% to 50%	3%
50% to 60%	2%
60% to 70%	1%
70% and up	0%

Examples -

A veteran who is 25% disabled and has total income of $15,000 would be required to pay the first $750 of the tax bill on his residence.

A veteran who is 55% disabled and has an income of $10,000 would be required to pay the first $200 of the tax bill on his residence.

This approach ties the exemption to both income and percent of disability.

Because of the reliance on income there is some difficulty in administration.

The simplest way to administer this approach would be as a credit on state income tax. This is, of course, a refund that requires taxpayer outlay of cash and then a refund.

This program could also be administered much in the same manner as the senior citizen renters equivalency program with the Department of Community & Regional Affairs making the refunds directly to the disabled veteran.

Yet another approach would be to make the reimbursement completely contingent on income. Something to the effect: "disabled veterans with a disability greater than _____% shall be entitled to a refund of property taxes in the amount that the annual property tax bill or rent equivalent exceeds the appropriate percentage of their income based on the following table":

Income	Percentage
Under $4,000	0%
$4,000 but under $5,000	1%
$5,000 but under $6,000	2%
$6,000 but under $7,000	3%
$7,000 but under $10,000	4%
$10,000 and up	5%

Examples -

An eligible veteran has an income of $9,000 and pays taxes of $800.
$9,000 X 4% = $360 $800 - $360 = $440 refund

An eligible veteran has an income of $4,500 and pays taxes of $1,000.
$4,500 X 1% = $45 $1,000 - $45 = $955 refund

The easiest approach to administration of this type of reimbursement is an income tax rebate, but could be handled like the senior citizen renters program, with rebates by the Department to the eligible applicant.

One of the major complaints about the property tax over the years is that it is not responsive to the earning power of the taxpayer. The two alternatives mentioned do make property taxes more responsive to the taxpayers ability to pay.

However, it should also be pointed out that every class of taxpayers exempted increases the burden on the balance of the taxpayers.

There are approximately 380,000 people living in areas of the state where property taxes are levied. There are currently 5,400 senior citizens and 200 farmers being exempted; that is a total of 5,600 or 1 1/2 percent of the total population being subsidized. Although 5,600 residents does not sound like a lot when considered independently, the addition of the more standard type of exempt properties such as governmental, churches, charitable institutions, and property of veterans organizations make properties that are currently tax exempt a very substantial part of the property tax base throughout Alaska.

Other Approaches & Comments

An eligible veteran shall be exempt from a portion of his local property taxes or rent equivalent based on the following chart:

Percent of Disability	Taxes Payable as a Percentage of Income
10% to 30%	5%
30% to 40%	4%
40% to 50%	3%
50% to 60%	2%
60% to 70%	1%
70% and up	0%

Examples -

A veteran who is 25% disabled and has total income of $15,000 would be required to pay the first $750 of the tax bill on his residence.

A veteran who is 55% disabled and has an income of $10,000 would be required to pay the first $200 of the tax bill on his residence.

This approach ties the exemption to both income and percent of disability.

Because of the reliance on income there is some difficulty in administration.

The simplest way to administer this approach would be as a credit on state income tax. This is, of course, a refund that requires taxpayer outlay of cash and then a refund.

This program could also be administered much in the same manner as the senior citizen renters equivalency program with the Department of Community & Regional Affairs making the refunds directly to the disabled veteran.

Yet another approach would be to make the reimbursement completely contingent on income. Something to the effect: "disabled veterans with a disability greater than _____% shall be entitled to a refund of property taxes in the amount that the annual property tax bill or rent equivalent exceeds the appropriate percentage of their income based on the following table":

Income	Percentage
Under $4,000	0%
$4,000 but under $5,000	1%
$5,000 but under $6,000	2%
$6,000 but under $7,000	3%
$7,000 but under $10,000	4%
$10,000 and up	5%

Examples -

An eligible veteran has an income of $9,000 and pays taxes of $800.
$9,000 X 4% = $360 $800 - $360 = $440 refund

An eligible veteran has an income of $4,500 and pays taxes of $1,000.
$4,500 X 1% = $45 $1,000 - $45 = $955 refund

The easiest approach to administration of this type of reimbursement is an income tax rebate, but could be handled like the senior citizen renters program, with rebates by the Department to the eligible applicant.

One of the major complaints about the property tax over the years is that it is not responsive to the earning power of the taxpayer. The two alternatives mentioned do make property taxes more responsive to the taxpayers ability to pay.

However, it should also be pointed out that every class of taxpayers exempted increases the burden on the balance of the taxpayers.

There are approximately 380,000 people living in areas of the state where property taxes are levied. There are currently 5,400 senior citizens and 200 farmers being exempted; that is a total of 5,600 or 1 1/2 percent of the total population being subsidized. Although 5,600 residents does not sound like a lot when considered independently, the addition of the more standard type of exempt properties such as governmental, churches, charitable institutions, and property of veterans organizations make properties that are currently tax exempt a very substantial part of the property tax base throughout Alaska.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

According to the Federal Veterans Administration there are 706 veterans receiving compensation for 40% disability or greater. Our best estimate is that there are 200 additional unremarried widows of disabled veterans. This makes a total of 906 persons initially eligible. Assuming 25% of these people rent, we would have 226 renters and 80 homeowners. If we assume 40% of those are ineligible for exceeding the income limitation or being over 65 years of age and already eligible for exemptions, we end up with 408 homeowners and 136 renters.

408 homeowners @ $558 (average senior citizens savings) = $227,664

136 renters @ $184 (average senior citizen renter reimbursement) = 25,024

544 TOTAL $252,688

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B – JUNEAU 99811

March 14, 1979

The Honorable Bill Parker
Chairman
House Community and Regional
Affairs Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Parker:

RE: HOUSE BILL NO. 223

At the request of the members of the House Community and Regional Affairs Committee, State Assessor Terry Earley has attempted, given information available from the Federal Veterans Administration, to analyze the cost of alternatives to House Bill No. 223. The five requested alternatives are recapped on the attached summary sheet; an individual fiscal note is also attached for each alternative.

I would like to again call your attention to the position stated by the State Assessor in his testimony before your committee on March 7, 1979. The Department is strongly opposed to the "piece-meal" approach of providing property tax relief to certain groups of taxpayers in Alaska (i.e., senior citizens and farmers). House Bill No. 223 would extend this type of tax relief program to disabled veterans.

Property tax relief should be made available to those in need throughout the State of Alaska but should not be provided those residents who do not have a demonstrated need for State refunded property tax relief payments. We believe a more comprehensive program of property tax relief ought to be made available by the Legislature, preferably in the form of a reimbursement or rebate based upon income as determined through the filing of Alaska State income tax returns.

The Department, through the Office of the State Assessor, is prepared to pursue a more equitable approach to providing residents of Alaska with property tax relief - particularly those in need of relief as a result of limited incomes. Proposed legislation could be made available for consideration by the next session of the State Legislature. We would appreciate an expression from your committee as to whether or not this is a worthwhile endeavor for the Department to pursue prior to the next session.

If you have questions regarding the attached alternatives to House Bill No. 223, Mr. Earley or I will be pleased to respond.

Sincerely,

Lee McAnerney
Commissioner

Senate Community and Regional Affairs Committee

Representative Joe McKinnon (Sponsor of HB 223)

Senator Brad Bradley (Sponsor SB 154)

During the meeting of the House Committee on Community and Regional Affairs of March 7, 1979 property tax exemptions for Disabled Veterans were discussed. The following is a recap of fiscal impacts of the several proposals discussed.

	TOTAL ELIGIBLE	TOTAL COST
1. Exempting veterans over 40% disabled both homeowners and renters and leaving the $20,000 income limit.	670	$311,280
2. Exempting veterans over 40% disabled both homeowners and renters and reducing income limit to $10,000.	424	$197,948
3. Exempting veterans over 40% disabled both homeowners and renters and also including veteran's widows and reducing income limit to $10,000.	544	$253,698
4. Exempting veterans over 40% disabled both homeowners and renters and eliminating income restrictions.	681	$317,044
5. Exempting veterans over 40% disabled both homeowners and renters, also including veteran's widows and eliminating income restrictions.	876	$407,902

Prepared by:

Department of Community and Regional Affairs
Office of the State Assessor

Other Approaches & Comments

An eligible veteran shall be exempt from a portion of his local property taxes or rent equivalent based on the following chart:

Percent of Disability	Taxes Payable as a Percentage of Income
10% to 30%	5%
30% to 40%	4%
40% to 50%	3%
50% to 60%	2%
60% to 70%	1%
70% and up	0%

Examples -

A veteran who is 25% disabled and has total income of $15,000 would be required to pay the first $750 of the tax bill on his residence.

A veteran who is 55% disabled and has an income of $10,000 would be required to pay the first $200 of the tax bill on his residence.

This approach ties the exemption to both income and percent of disability.

Because of the reliance on income there is some difficulty in administration.

The simplest way to administer this approach would be as a credit on state income tax. This is, of course, a refund that requires taxpayer outlay of cash and then a refund.

This program could also be administered much in the same manner as the senior citizen renters equivalency program with the Department of Community & Regional Affairs making the refunds directly to the disabled veteran.

Yet another approach would be to make the reimbursement completely contingent on income. Something to the effect: "disabled veterans with a disability greater than ____% shall be entitled to a refund of property taxes in the amount that the annual property tax bill or rent equivalent exceeds the appropriate percentage of their income based on the following table":

Income	Percentage
Under $4,000	0%
$4,000 but under $5,000	1%
$5,000 but under $6,000	2%
$6,000 but under $7,000	3%
$7,000 but under $10,000	4%
$10,000 and up	5%

Examples -

An eligible veteran has an income of $9,000 and pays taxes of $800.
$9,000 X 4% = $360 $800 - $360 = $440 refund

An eligible veteran has an income of $4,500 and pays taxes of $1,000.
$4,500 X 1% = $45 $1,000 - $45 = $955 refund

The easiest approach to administration of this type of reimbursement is an income tax rebate, but could be handled like the senior citizen renters program, with rebates by the Department to the eligible applicant.

One of the major complaints about the property tax over the years is that it is not responsive to the earning power of the taxpayer. The two alternatives mentioned do make property taxes more responsive to the taxpayers ability to pay.

However, it should also be pointed out that every class of taxpayers exempted increases the burden on the balance of the taxpayers.

There are approximately 380,000 people living in areas of the state where property taxes are levied. There are currently 5,400 senior citizens and 200 farmers being exempted; that is a total of 5,600 or 1 1/2 percent of the total population being subsidized. Although 5,600 residents does not sound like a lot when considered independently, the addition of the more standard type of exempt properties such as governmental, churches, charitable institutions, and property of veterans organizations make properties that are currently tax exempt a very substantial part of the property tax base throughout Alaska.

Info received from McKenzie and Moss:
BILL TITLE MUST BE AMENDED TO INCLUDE SCHOOL BOARD MEMBERS (In the REAAs School Board members are not considered municipal officials.)

MOSS -- School Bd. and other officials should have a chance to rebutt charges. School Bd. Ass'n. requests this. Gives incumbent a chance. New items are statement by official being recalled; affidavit of circulator.

Basic authority for Recall provisions in State Constitution:
Article XI Section 8 : All elected public officials, in the State, except jujudicial officers, are subject to recall by the voters of the State or political subdivision from which elected. Procedures and grounds for recall shall be prescribed by the legislature.

CS FOR HOUSE BILL NO. 245

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to recall of public officials; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 15.45.480 is amended to read:

Sec. 15.45.480. FILING APPLICATION. The recall of the governor or a member of the state legislature is proposed by filing an application with the lieutenant governor. The recall of the lieutenant governor is proposed by filing an application with the attorney general, who shall perform the duties imposed on the lieutenant governor in the recall of other elected state officials. A deposit of $100 must accompany the application. This deposit shall [WILL] be retained if a petition is not accepted [PROPERLY FILED]. If a petition is accepted, [PROPERLY FILED] the deposit shall be refunded.

* Sec. 2. AS 15.45.490 is amended to read:

Sec. 15.45.490. TIME OF FILING APPLICATION. No application may be filed during the first 120 days of the term of office of a [ANY] state public official subject to recall or within less than 180 days of the termination of the term of office of a state public official subject to recall.

* Sec. 3. AS 15.45.500 is amended to read:

Sec. 15.45.500. FORM OF APPLICATION. The application shall include (1) the name and office of the official [PERSON] to be recalled, (2) the grounds for recall described in particular in not more than 200 words, (3) a statement that the sponsors are qualified voters who signed

the application with the statement of grounds for recall included [ATTACHED], (4) the designation of a recall committee of three sponsors who shall represent all sponsors and subscribers in matters relating to the recall, (5) the appointment of at least 100 qualified voters who subscribe to the application as sponsors for purposes of circulation, and (6) the signatures and resident addresses of qualified voters equal in number to 10 per cent of those who voted in the preceding general election in the state or in the senate or electoral district of the official sought to be recalled.

* Sec. 4. AS 15.45.510 is repealed and re-enacted to read:

Sec. 15.45.510. GROUNDS FOR RECALL. Grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties.

* Sec. 5. AS 15.45.560 is repealed and re-enacted to read:

Sec. 15.45.560. PREPARATION OF PETITION. (a) If the lieutenant governor certifies the application, he shall prescribe the form of, and prepare, a petition containing

(1) the name and office of the official sought to be recalled;

(2) the statement of the grounds for recall included in the application;

(3) a space in which the official may make a statement of 200 words or less;

(4) the warning required in AS 15.45.570;

(5) sufficient space for signatures, resident addresses, and dates of signing; and

(6) other specifications prescribed by the lieutenant governor to assure proper handling and control.

(b) The lieutenant governor shall have a copy of the petition

served on the official subject to recall in the same manner as civil process. The official shall have 30 days after service of the petition to file a statement of 200 words or less with the lieutenant governor. If the statement of the official is received on time, the lieutenant governor shall have it set out on the petition. If no statement of the official is received on time, the lieutenant governor shall note that on the petition.

(c) The lieutenant governor shall prepare a number of petitions reasonably calculated to allow full circulation throughout the state or throughout the senate or election district of the official sought to be recalled. The lieutenant governor shall number each petition and shall keep a record of the petitions delivered to each sponsor.

* Sec. 6. AS 15.45.570 is amended to read:

Sec. 15.45.570. STATEMENT OF WARNING. Each petition and duplicate copy shall include a statement of warning that a person who signs a name other than his own to the petition, or who knowingly signs his name more than once for the same proposition <u>or question</u> at one election, or who signs the petition knowing he is not a qualified voter, upon conviction is punishable by a fine of not more than <u>$5,000</u> [$1,000] or by imprisonment for not more than one year, or by both.

* Sec. 7. AS 15.45.610 is amended to read:

Sec. 15.45.610. FILING OF PETITION. No petition may be filed within less than 180 days of the termination of the term of office of a state public official subject to recall. <u>A petition may be filed only by a member of the recall committee. A member of the recall committee</u> [THE SPONSOR] may file the petition only if signed by qualified voters equal in number to 25 per cent of those who voted in the preceding general election in the state or in the senate or election district of the official sought to be recalled.

* Sec. 8. AS 15.45.620 is repealed and re-enacted to read:

Sec. 15.45.620. REVIEW OF PETITION. Within 30 days after the petition is filed, the lieutenant governor shall (1) review the petition, (2) certify on the petition whether it is accepted or rejected, and (3) notify the recall committee and the official subject to recall whether the petition is accepted or rejected.

* Sec. 9. AS 15.45.630 is amended to read:

Sec. 15.45.630. BASES FOR REJECTING [DETERMINING THE] PETITION [WAS IMPROPERLY FILED]. The lieutenant governor shall reject [NOTIFY THE COMMITTEE THAT] the petition [WAS IMPROPERLY FILED] if he determines that (1) there is an insufficient number of qualified subscribers, or (2) the petition was filed within less than 180 days of the termination of the term of office of the official subject to recall.

* Sec. 10. AS 15.45.640 is repealed and re-enacted to read:

Sec. 15.45.640. SUPPLEMENTED PETITION. (a) If the petition is rejected because of insufficient signatures, it may be supplemented by additional signatures within 20 days after the recall committee is notified of rejection, so long as the supplemented petition is filed within 180 days of the termination of the term of office of the official subject to recall. If the petition was rejected because it was filed too late, the lieutenant governor shall file the rejected petition as a public record. If no supplemented petition is filed on time, the lieutenant governor shall file the rejected petition as a public record.

(b) Within 10 days after a supplemented petition is filed, the lieutenant governor shall (1) review the supplemented petition, (2) recertify on the supplemented petition whether it is accepted or rejected, and (3) notify the recall committee and the official subject to recall whether the supplemented petition is accepted or rejected. The lieutenant governor shall file a rejected supplemented petition as a

public record.

* Sec. 11. AS 15.45.650 is amended to read:

Sec. 15.45.650. CALLING SPECIAL ELECTION. If the lieutenant governor accepts [DETERMINES] the petition [IS PROPERLY FILED] and if the office is not vacant, he shall prepare the ballot and shall call a special election to be held on a date not less than 60, nor more than 90, days after the date that notification is given that the petition was accepted [PROPERLY FILED]. If a primary or general election is to be held no less than 60, nor more than 90, days after the date that notification is given that the petition was accepted [PROPERLY FILED], the special election shall be held on the date of the primary or general election.

* Sec. 12. AS 15.45.660 is repealed and re-enacted to read:

Sec. 15.45.660. FORM OF RECALL BALLOTS. A recall ballot contains:

(1) the grounds as stated in the recall petition;

(2) the official's statement contained on the recall petition or, if none, the official's statement of 200 words or less, if that statement is filed with the lieutenant governor for publication and public inspection within 10 days after notification to the official that the recall petition was accepted;

(3) the following question: "Shall (name of person) be recalled from the office of (office)? Yes [ ] No [ ]".

* Sec. 13. AS 29.28.130 is amended to read:

Sec. 29.28.130. RECALL. An elected official of a home rule or general law municipality may be recalled by the voters after he has served 120 days [SIX MONTHS] in office.

* Sec. 14. AS 29.28 is amended by adding new sections to read:

Sec. 29.28.142. FILING APPLICATION. The recall of a municipal official is proposed by filing an application with the municipal clerk.

A deposit of $100 must accompany the application. This deposit shall be retained if a petition is not accepted. If a petition is accepted, the deposit shall be refunded.

Sec. 29.28.144. TIME OF FILING APPLICATION. An application may not be filed during the first 120 days of the term of office of a municipal official or within less than 180 days of the termination of the term of office of a municipal official.

Sec. 29.28.146. FORM OF APPLICATION. The application shall include

(1) the name and office of the official to be recalled;

(2) the grounds for recall described in particular in not more than 200 words;

(3) a statement that the sponsors are qualified voters of the municipality who signed the application with statement of grounds for recall included; and

(4) the designation of a recall committee of three sponsors who shall represent all sponsors and subscribers in relation to the recall.

Sec. 29.28.148. DESIGNATION OF SPONSORS. The qualified voters of the municipality who subscribe to the application are designated as sponsors. The recall committee may designate additional sponsors by giving written notice to the municipal clerk of the names and resident addresses of those so designated.

Sec. 29.28.152. MANNER OF NOTICE. Notice on all matters pertaining to the application and petition may be served on any member of the recall committee in person or by first class mail addressed to him as indicated on the application.

Sec. 29.28.154. REVIEW OF APPLICATION. The municipal clerk shall review the application and shall either certify it or notify the recall

committee of the grounds of refusal.

Sec. 29.28.156. BASES OF DENIAL OF CERTIFICATION. The municipal clerk shall deny certification if he determines that (1) the application is not substantially in the required form, (2) the application was filed during the first 120 days of the term of office of the official subject to recall or within less than 180 days of the termination of the term of office of the official subject to recall, (3) the person named in the application is not subject to recall, or (4) there is an insufficient number of qualified subscribers.

Sec. 29.28.158. PREPARATION OF PETITION. (a) If the municipal clerk certifies the application, he shall prescribe the form of, and prepare, a petition containing

(1) the name and office of the official sought to be recalled;

(2) the statement of the grounds for recall included in the application;

(3) a space in which the official may make a statement of 200 words or less;

(4) the warning required in AS 29.28.162;

(5) sufficient space for signatures and resident addresses; and

(6) other specifications prescribed by the municipal clerk to assure proper handling and control.

(b) The municipal clerk shall have a copy of the petition served on the official subject to recall in the same manner as civil process. The official shall have 20 days after service of the petition to file a statement of 200 words or less with the municipal clerk. If the statement of the official is received on time, the municipal clerk shall have it set out on the petition. If no statement of the official is received

on time, the municipal clerk shall note that on the petition.

(c) The municipal clerk shall prepare a number of petitions reasonably calculated to allow full circulation throughout the municipality. The municipal clerk shall number each petition and shall keep a record of the petitions delivered to each sponsor.

Sec. 29.28.162. STATEMENT OF WARNING. Each petition and duplicate copy shall include a statement of warning that a person who signs a name other than his own to the petition, or who knowingly signs his name more than once for the same question at one recall election, or who signs the petition knowing he is not a qualified voter, upon conviction is punishable by a fine of not more than $5,000 or by imprisonment for not more than one year, or by both.

Sec. 29.28.164. CIRCULATION BY SPONSOR. A petition may be circulated only by a sponsor and only in person throughout the municipality represented by the official sought to be recalled.

Sec. 29.28.166. MANNER OF SIGNING AND WITHDRAWING NAME FROM PETITION. A qualified voter of the municipality may subscribe to the petition by signing his name and resident address. A person who has signed the petition may withdraw his name only by giving written notice to the municipal clerk before the date the petition is filed.

Sec. 29.28.168. CERTIFICATION OF SPONSOR. Before being filed, each petition shall be certified by an affidavit by the sponsor who personally circulated the petition. The affidavit shall state in substance that (1) the person signing the affidavit is a sponsor, (2) the person is the only circulator of that petition or copy, (3) the signatures were made in his actual presence, and (4) to the best of his knowledge, the signatures are those of the persons whose names they purport to be. In determining the sufficiency of the petition, the municipal clerk may not count subscriptions on petitions not properly

certified.

Sec 29.28.172. FILING OF PETITION. A petition may not be filed within less than 180 days of the termination of the term of office of a municipal official subject to recall. A petition may be filed only by a member of the recall committee. A member of the recall committee may file the petition only if it contains the signatures and resident addresses of a number of qualified voters of the municipality as prescribed in AS 29.28.070(b) for initiative and referendum.

Sec. 29.28.174. REVIEW OF PETITION. Within 30 days after the petition is filed, the municipal clerk shall (1) review the petition, (2) certify on the petition whether it is accepted or rejected, and (3) notify the recall committee and the official subject to recall whether the petition is accepted or rejected.

Sec. 29.28.176. BASES FOR REJECTING PETITION. The municipal clerk shall reject the petition if he determines that (1) there is an insufficient number of qualified subscribers, or (2) the petition was filed within less than 180 days of the termination of the term of office of the official subject to recall.

Sec. 29.28.178. SUPPLEMENTED PETITION. (a) If the petition is rejected because of insufficient signatures, it may be supplemented by additional signatures within 20 days after the recall committee is notified of rejection, so long as the supplemented petition is filed within 180 days of the termination of the term of office of the official subject to recall. If the petition was rejected because it was filed too late, the municipal clerk shall file the rejected petition as a public record. If no supplemented petition is filed on time, the municipal clerk shall file the rejected petition as a public record.

(b) Within 10 days after a supplemented petition is filed, the municipal clerk shall (1) review the supplemented petition, (2) re-

certify on the supplemented petition whether it is accepted or rejected, and (3) notify the recall committee and the official subject to recall whether the supplemented petition is accepted or rejected. The municipal clerk shall file a rejected supplemented petition as a public record.

* Sec. 15. AS 29.28.210(2) is amended to read:

(2) the official's statement contained on the recall petition or, if none, the official's [OFFICER'S] statement of 200 words or less, if that [THE] statement is filed with the municipal clerk for publication and public inspection within 10 [20] days after notification to the official that the recall petition was accepted [BEFORE THE ELECTION];

* Sec. 16. AS 29.28 is amended by adding new sections to read:

Sec. 29.28.260. INSUFFICIENCY OF GROUNDS, APPLICATION, OR PETITION. A recall submitted to the voters may not be held void because of the insufficiency of the grounds, application, or petition by which the submission was procured.

Sec. 29.28.270. JUDICIAL REVIEW. A person aggrieved by a determination made by the municipal clerk may bring an action to have the determination reviewed within 30 days of the date on which notice of determination was given by any appropriate remedy in the superior court.

Sec. 29.28.280. IMPROPER SUBSCRIPTION TO PETITION. A person who signs a name other than his own to a recall petition, who knowingly signs his name more than once for the same question at one recall election, or who signs the petition knowing he is not a qualified voter of the municipality is guilty of a misdemeanor.

* Sec. 17. The following laws are repealed: AS 15.45.680; AS 29.28.150 - 29.28.180; and 29.28.240.

* Sec. 18. This Act takes effect January 1, 1980.

AMENDMENT

Offered in the HOUSE

By the Community and Regional Affairs Committee

TO: DRAFT CS FOR HOUSE BILL NO. 245

Page 5, between lines 22 and 23:

Insert the following:

* Sec. 15. AS 15.45 is amended by adding new sections to read:

Sec. 15.45.730. ADDITIONAL TIME AFTER NOTIFICATION BY MAIL. When notice is given by mail under AS 15.45.470 - 15.45.740, that notice is complete upon mailing. If a person has a right or is required to so some act within a prescribed period after being notified, and the notice is given to him by mail, three days shall be added to the prescribed period.

Sec. 15.45.740. FILING AS PUBLIC RECORD. When an application, petition, or supplementary petition is filed under AS 15.45.470 - 15.45.74, the lieutenant governor shall file it as a public record, regardless of whether it is accepted or rejected.

Page 10, between lines 26 and 27:

Insert the following:

Sec. 29.28.290. ADDITIONAL TIME AFTER NOTIFICATION BY MAIL. When notice is given by mail under AS 29.28.130 -- 29.28.300, that notice is complete upon mailing. If a person has a right or is required to do some act within a prescribed period after being notified, and the notice is given to him by mail, three days shall be added to the prescribed period.

Sec. 29.28.300. FILING AS PUBLIC RECORD. When an application, petition, or supplementary petition is filed under AS 29.28.130

- 29.28.300, the municipal clerk shall file it as a public record, regardless of whether it is accepted or rejected.

shall be suspended pending the referendum on the ordinance. During the period of suspension the assembly or council may not enact an ordinance substantially similar to the suspended ordinance but may repeal the suspended ordinance.

(c) If a majority of those voting favor the referendum legislation, it remains in effect. If a majority rejects the legislation, it is repealed. A municipal charter may be amended as provided in the charter or by initiative and referendum as provided in §§ 60—110 of this chapter. (§ 2 ch 118 SLA 1972; am § 10 ch 147 SLA 1972)

Effect of amendment. — The 1972 amendment, effective September 10, 1972, inserted "assembly or" in the last sentence of subsection (b).

Sec. 29.28.110. Effect. (a) The assembly or council may not, within two years, act in any way to modify or negate the effect of a successful initiative or referendum. If an ordinance against which a referendum is directed has been repealed by the assembly or council after a petition has been filed but before the referendum, the council or assembly may not enact substantially similar legislation for a period of one year after repeal.

(b) An unsuccessful initiative or referendum precludes the filing of a new petition for the same purpose sooner than six months after voter disapproval of the initiative or referendum. (§ 2 ch 118 SLA 1972)

Article 3. Recall.

Section	Section
130. Recall	200. Election
140. Grounds	210. Form of recall ballots
150. Petition	220. Election procedure
160. Examination for sufficiency	230. Majority required
170. Supplemental petition	240. Effect
180. New petition	250. Election of successor
190. Submission	

Sec. 29.28.130. Recall. An elected official of a home rule or general law municipality may be recalled by the voters after he has served six months in office. (§ 2 ch 118 SLA 1972)

Section applies to city school board member.—A member of a city school board is an elected public official of an incorporated municipality, within the meaning of this section, to the same extent as a city councilman, and thus is subject to the recall provisions contained in this section. Blue v. Stockton, Sup. Ct. Op. No. 15 (File No. 7), 355 P.2d 395 (1960).

Sec. 29.28.140 Grounds. Grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties. (§ 2 ch 118 SLA 1972)

Sec. 29.28.150. Petition. (a) A petition seeking recall of one or more municipal officials is filed with the municipal clerk. The petition shall contain

(1) the signatures and resident addresses of a number of voters as prescribed in § 70(b) of this chapter for initiative and referendum;

(2) the date each voter signed the petition; and

(3) a statement of the grounds of the recall stated with particularity as to specific instances.

(b) A petition for recall must be filed with the clerk within 60 days after the date of the earliest signature on the petition. (§ 2 ch 118 SLA 1972)

Sec. 29.28.160. Examination for sufficiency. The municipal clerk shall review the petition for content and signatures and shall certify on the petition within 10 days of the filing date whether it is accepted or rejected. Until the petition is accepted, a petition signer may withdraw his signature upon written application to the clerk. (§ 2 ch 118 SLA 1972)

Sec. 29.28.170. Supplemental petition. (a) If the petition is rejected because of insufficient signatures, it may be supplemented by additional signatures within 10 days after the date of rejection. If the petition is insufficient for any other reason, it shall be rejected and filed as a public record.

(b) Within 10 days after supplementary filing, the clerk shall recertify the petition. If it is still insufficient, the petition is rejected and filed as a public record. (§ 2 ch 118 SLA 1972)

Sec. 29.28.180. New petition. Failure to secure sufficient signatures does not preclude the filing of a new recall petition. However, a new petition may not be filed sooner than six months after a petition is rejected. (§ 2 ch 118 SLA 1972)

Sec. 29.28.190. Submission. If a recall petition is sufficient, the clerk shall immediately submit it to the assembly or council. (§ 2 ch 118 SLA 1972)

Sec. 29.28.200. Election. (a) If a regular election occurs within 75 days of the submission, the assembly or council shall submit the recall at that election.

(b) If no regular election will occur within 75 days, the assembly or council shall hold a special election within 75 days of submission.

(c) If a vacancy occurs in the office after a recall petition is filed, the petition shall not be submitted to the voters. (§ 2 ch 118 SLA 1972)

Sec. 29.28.210. Form of recall ballots. A recall ballot contains:

(1) the grounds as stated in the recall petition;

(2) the officer's statement of 200 words or less, if the statement is filed with the clerk for publication and public inspection within 20 days before the election;

(3) the following question: "Shall (name of person) be recalled from the office of (office)? Yes [ ] No [ ]". (§ 2 ch 118 SLA 1972)

Sec. 29.28.220. Election procedure. Procedures for conducting a recall election are those of a regular election. (§ 2 ch 118 SLA 1972)

Sec. 29.28.230. Majority required. A majority vote on the question is required to recall an officer. (§ 2 ch 118 SLA 1972)

Sec. 29.28.240. Effect. If an incumbent is not recalled at the recall election, a petition to recall the same incumbent may not be filed sooner than six months after the recall election. (§ 2 ch 118 SLA 1972)

Sec. 29.28.250. Election of successor. If the voters recall an officer, the clerk shall conduct an election for a successor to fill the unexpired term. The election shall be held at least 10 but not more than 45 days from the date of the recall election. However, if a regular or special election occurs within 75 days of the recall election, the successor to the recalled official shall be chosen at that regular or special election. The procedures and requirements for the regular election for the office from which the incumbent is recalled apply to the election conducted under this section. (§ 2 ch 118 SLA 1972)

The Honorable Bill Parker
Alaska State House of
Representatives
Pouch V, State Capitol
Building
Juneau, AK 99811

Dear Representative Parker:

I am writing in support of H.B. 245 relating to recall of elected local officials.

I believe that there is an urgent need for an orderly process by which public officials may be recalled. The present process leaves too much to the imagination of the petitioners and the signers. Some guidelines must be set to allow public officials to do their job in the best interest of the people without fear of a small group being able to mount a recall based on other than factual evidence.

Your consideration of my view is appreciated.

Sincerely,

Glen Chowning

UPPER RAILBELT
SCHOOLBOARD RECALL PETITION

We, the undersigned registered voters of the Upper Railbelt School District (REAA #14), do request an immediate recall election of Upper Railbelt School Board Seats held by Incumbents Ed Frye, Gary Crabb, and Ruby John. The Incumbents have consistently ignored the will of the majority of the voters when presented to the Board on signed petitions and in public hearin . The Incumbents have created dissension and turmoil within the Dist.ict by taking an arbitrary and uncompromising stand that has had a distinct negative impact on school operation. In addition, a new position of Assistant Superintendent has been approved by the Board; also the new school budget has allocated funds for a computer that we feel is unwarranted and reflects fiscal irresponsibility on the part of Incumbents in view of our small District having a total enrollment of approximately 380 students taught by 28 teachers. Our aim is to correct the incompetency of the School Board.

Date of first circulation: March 26, 1977

SHALL ED FRYE BE RECALLED FROM THE OFFICE OF THE UPPER RAILBELT REGIONAL SCHOOL BOARD, SEAT A?

Yes ☐ **No** ☐

Grounds set forth in the recall petition for the recall of Ed Frye are as follows:

(1) a new position of Assistant Superintendent has been approved by the Board;

(2) the new school budget has allocated funds for a computer.

Statement by Ed Frye: The office of the Attorney General has stated "It matters not under the law whether the charges are right, wrong, ridiculous, incredulous, or discriminatory." I firmly believe these charges to be wrong, ridiculous, incredulous and discriminatory. In the normal course of Board action, All members of the Board voted to hire an **Administrative Assistant** and All members of the Board voted to allocate funds for the **Study** of the **possible purchase** of a computer. If these two (2) Board actions cited, constitute the grounds for the Recall of only three members of the School Board without being wrong, ridiculous, incredulous and discriminatory, then my sense of values and "due process" are wrong, and I should be recalled. However, I feel the Board has taken normal Board action in matters concerning the running of the School District, and the Administration and the Office of the Attorney General, may "stick it in their ear."

RECALL PETITION for JULIAN PAUL WEIR, Board Member

We, the undersigned, being registered voters residing in the Copper River School District do hereby Petition for the recall of Mr. Julian Paul Weir, School Board Member and Chairman of the Copper River School Board. The grounds for seeking recall are misconduct in office, incompetence and failure to perform prescribed duties as more specifically set forth below.

1. Julian Paul Weir has, as Chairman of the Copper River School Board, held a Board meeting without giving proper notice thereof to the public or to all the Board members.

2. Julian Paul Weir has consistently throughout his term as Chairman and Board member abused the use of executive sessions and has conducted illegal discussions on topics not permitted in executive sessions thereby prohibiting proper public involvement.

3. Julian Paul Weir has actively prevented access to the public to public records such as the taped record of Board meetings.

4. Julian Paul Weir has consistently as a Board Member and Chairman of the Copper River School District Board encouraged and participated in the violation of the Copper River Valley Teachers Association Contract with the District.

5. Julian Paul Weir has constantly changed the Board meeting operating procedures without notice to the public in order to prevent public involvement and discussion.

6. Julian Paul Weir did on the 3 rd day of January, 1978 deliberately prevent and deny public input at the Board meeting.

7. Julian Paul Weir has consistently failed to perform his prescribed duties and has failed to act in the common interest of the students and parents of the District.

All of the foregoing has occurred during the term that Julian Paul Weir has served in office which term exceeds six months.

SAMPLE BALLOT

REAA No. 17 - Copper River
Recall Election

April 18, 1978

Mark only by use of cross marks, "X", checks, or plus signs. Marks must be inside or touching the square so as to indicate the intent of the voter.
Erasures and corrections will invalidate only that part of the ballot in which they appear.
If you spoil or mar your ballot, you may return it to the election judge and receive another ballot. Your spoiled ballot will be destroyed in your presence.

The following grounds have been submitted in petition for the recall of Julian Paul Weir from his elected office of Copper River Regional School Board, Seat C.

1. Julian Paul Weir has, as Chairman of the Copper River School Board, held a Board meeting without giving proper notice thereof to the public or to all the Board members.

2. Julian Paul Weir did on the 3rd day of January, 1978, deliberately prevent and deny public input at the Board meeting.

The following is Julian Paul Weir's rebuttal of the above grounds:

1. I have never called a meeting of the Board, all meetings are set by policy motions, the first Tuesday of each month. All special meetings and work sessions are voted by the Board as to when and where they are to be held. To my knowledge, neither did Mr. Roberson call any meetings. It is, I believe, a power of the chairman to call special meetings, but none were called by myself or Mr. Roberson.

2. Untrue. If you will take the time to check the minutes, the tapes, and or check with someone who was at the meeting, you will find that at least five people spoke out in opposition and that only four spoke in favor of the policy. Also, if you check further, I chose people from the audience who had not previously, to my knowledge, spoken before on this policy. In fact, I even let a person from Anchorage speak who, perhaps, I shouldn't have as he allegedly represented a group in direct opposition to our policy.

SHALL JULIAN PAUL WEIR BE RECALLED FROM THE OFFICE OF COPPER RIVER SCHOOL BOARD, SEAT C?

YES ☐ NO ☐

RECALL PETITION

SAM AGUIAR, School Board Member

We, the undersigned, being registered voters residing in the Copper River School District do hereby Petition for the recall of Mr. Sam Aguiar, School Board Member of the Copper River School Board. The grounds for seeking recall are misconduct in office, incompetence and failure to perform prescribed duties as more specifically set forth below.

1. Sam Aguiar has, as a Board Member of the Copper River School Board, participated in a Board meeting called without giving proper notice thereof to the public or to all the Board members.

2. Sam Aguiar has consistently throughout his term as Board Member participated in the abuse of the use of executive session and has participated in illegal discussions on topics not permitted in executive sessions thereby prohibiting proper public involvement.

3. Sam Aguiar has consistently as a Board Member of the Copper River School Board encouraged and participated in the violation of the Copper River Valley Teachers Association contract with the District.

4. Sam Aguiar has participated in the constant change of the Board meeting operating procedures without notice to the public in order to prevent public involvement and discussion.

5. Sam Aguiar did on the 3 rd day of January, 1978 participate in and lead the deliberate prevention and denial of public input at the Board meeting.

6. Sam Aguiar has consistently failed to perform his prescribed duties and has failed to act in the common interest of the students and parents in the District.

All of the foregoing has occurred during the term that Sam Aguiar has served in office which term exceeds six months.

Recall Election

April 18, 1978

Mark only by use of cross marks, "X", checks, or plus signs. Marks must be inside or touching the square so as to indicate the intent of the voter.
Erasures and corrections will invalidate only that part of the ballot in which they appear.
If you spoil or mar your ballot, you may return it to the election judge and receive another ballot. Your spoiled ballot will be destroyed in your presence.

The following grounds have been submitted in petition for the recall of Manuel F. (Sam) Aguiar from his elected office of Copper River Regional School Board, Seat A:

1. Manuel F. (Sam) Aguiar has, as a Board Member of the Copper River School Board, participated in a Board meeting called without giving proper notice thereof to the public or to all the Board members.

2. Manuel F. (Sam) Aguiar did on the 3rd day of January, 1978, participate in and lead the deliberate prevention and denial of public input at the Board meeting.

The following is Manuel F. (Sam) Aguiar's rebuttal of the above grounds:

The charges against me are not true. They are merely an effort to unseat me on a wave of emotion caused by the Boards passing of the Morality Policy.

I believe the sponsers of the recall have badly underestimated the intelligence of the people of our valley and their basic honesty.

I feel comfortable with my fate in hands such as yours.

SHALL MANUEL F. (SAM) AGUIAR BE RECALLED FROM THE OFFICE OF COPPER RIVER SCHOOL BOARD, SEAT A?

For the purpose of voting on the recall of J. Paul Weir, Seat C and Manuel F. (Sam) Aguiar, Seat A.

The boundaries of the _____ Precinct, Copper River Regional Educational Attendance Area are described as follows:

The polling place is _____.

Dated this _____ day of _____ 1978.

LOWELL THOMAS, JR.
Lieutenant Governor

Copies of this Notice shall be posted in at least 3 conspicuous places in the precinct not less than 10 days before the election.

Juneau, Alaska

WE, the below signed registered voters residing in REAA #4, known as the Lower Kuskokwim School District, do hereby petition for the recall, or removal, of JOERENE HOUT from the LKSD Board. We do so for the general ground of "FAILURE TO PERFORM PRESCRIBED DUTIES." We charge that Ms. Hout has failed to perform many of the duties prescribed for board members, as stated in the LKSD Board Handbook. We feel that Ms. Hout's performance has brought about a lack of confidence in her ability and willingness to fairly represent the interests and concerns of the children, parents, and communities of this District.

It is a Board member's duty to "Seek to learn the will of the people served by the School District and, within State requirements and societal needs, represent their interest in actions taken by the Board." (LKSD Board Handbook Article III, section 8, item 2.) It is a further duty to "Represent the interests of all those being served by the School District, rather than representing any portion thereof." (item 3.) Related duties state that Board members are to "Represent the Board and the School District in such a way as to promote interest, involvement, and support among the public" (item 4); "Work harmoniously with other Board members without trying either to dominate the Board or to neglect one's share of the necessary work" (item 6); "Vote and act in Board meetings for the total good of the School District and the diverse groups it serves" (item 7); and "Accept the prevailing vote on each issue and give support to implementing the resulting policy as long as it is in force" (item 8).

We list below specific instances in support of the general charge of Ms. Hout's "FAILURE TO PERFORM PRESCRIBED DUTIES," any one of which alone would be sufficient to require her removal from the LKSD Board.

1. Ms. Hout approved the sending to Washington, in mid-August, 1977, of a bilingual education plan which had not been presented to the public or approved by the Board. Furthermore, she did not report this action either to the public or to the Board, despite the fact that a public hearing and a meeting of the Board were held on August 18 and 19. In taking this action, Ms. Hout demonstrated a total lack of concern for the will of the people and their plea for information on, and input to, bilingual-bicultural education. (items 2, 3, 4, and 7.)

2. Ms. Hout received much testimony at the August 18, 1977 public hearing, regarding the strong wishes of the people for a Class A lunch program. This program was supported in public testimony at a later Board meeting in Kwigillingok on October 26th by a local nutritionist from the Yukon-Kuskokwim Health Corporation, and resolutions in its favor were passed by the Bethel Community School Committee and the Association of Village Council Presidents. Despite overwhelming public demand for this program, Ms. Hout has spoken against it in three Board meetings. In refusing to support this program and to enable the District to qualify for federal funding provided for it, Ms. Hout did not act in the interests of the children or parents of this District. (items 2, 3, 4, and 7.)

CONTINUED

3. Under public pressure in the form of a petition bearing over 700 signatures of parents in this District, Ms. Hout voted for a terminal one year contract for District Superintendent Weinberg. The Board vote was unanimous. However, Ms. Hout has failed to implement this decision in her position as Chairperson of the LKSD Board by not soliciting, or asking for, applicants for the Superintendent's position. The hiring of a superintendent on time is one of the most important legal duties of the Board. Instead of seeking qualified applicants, Ms. Hout, at a Board meeting in Kipnuk on September 13, 1977, supported a $10,000 (or 25%) raise and increased benefits for Superintendent Weinberg. In failing to seek qualified applicants for the Superintendent's position, and supporting a raise for a Superintendent who has drawn much public criticism, Ms. Hout has shown a complete disregard for the will and best interests of the people in this District. (items 2, 3, 4, 7, and 8.)

4. During the past year, Ms. Hout has answered public requests for information with arrogance, withheld information to which the public was entitled, and misstated Board actions, reasons for Board action, and information on which Board actions were based. At Board meetings, Ms. Hout has not served as a neutral Chairperson. She has been rude and hostile to persons who have tried to speak to the Board who have opinions apparently different from her own, and she has spoken strongly for or against business being conducted without giving up chairing the meeting. Ms. Hout's conduct as a whole has served to discourage the free sharing of ideas and the taking of different positions by other Board members and of the public. (items 2, 3, 4, and 6.)

For the above reasons, we petition for the recall of Joerene Hout from the LKSD Board. We ask that you give this matter your prompt attention.

N° 00000

FOLD BALLOT TO THIS LINE

STATE OF ALASKA

SAMPLE BALLOT

REAA No. 4 - Lower Kuskokwim

Recall Election

April 18, 1978

Mark only by use of cross marks, "X", checks, or plus signs. Marks must be inside or touching the square so as to indicate the intent of the voter.

Erasures and corrections will invalidate only that part of the ballot in which they appear.

If you spoil or mar your ballot, you may return it to the election judge and receive another ballot. Your spoiled ballot will be destroyed in your presence.

The following grounds have been submitted in petition for the recall of Joerene Hout from her elected office of Lower Kuskokwim School District School Board, Seat F:

1. "Ms. Hout approved the sending to Washington, in mid-August, 1977, of a bilingual education plan which had not been presented to the public or approved by the Board. Furthermore, she did not report this action either to the public or to the Board, despite the fact that a public hearing and a meeting of the Board were held on August 18, and 19. In taking this action, Ms. Hout demonstrated a total lack of concern for the will of the people and their plea for information on, and input to, bilingual-bicultural education."

2. "Ms. Hout received much testimony at the August 18, 1977 public hearing, regarding the strong wishes of the people for a Class A lunch program. This program was supported in public testimony at a later Board meeting in Kwigillingok on October 26th by a local nutritionist from the Yukon-Kuskokwim Health Corporation, and resolutions in its favor were passed by the Bethel Community School Committee and the Association of Village Council Presidents. Despite overwhelming public demand for this program, Ms. Hout has spoken against it in three Board meetings. In refusing to support this program, and to enable the District to qualify for federal funding provided for it, Ms. Hout did not act in the interests of the children or parents of this District."

3. "Under public pressure in the form of a petition bearing over 700 signatures of parents in this District, Ms. Hout voted for a terminal, one year contract for District Superintendent Weinberg. The Board vote was unanimous. However, Ms. Hout has failed to implement this decision in her position as Chairperson of LKSD Board by not soliciting, or asking for, applicants for the Superintendent's position. The hiring of a superintendent on time is one of the most important legal duties of the Board. Instead of seeking qualified applicants, Ms. Hout, at a Board meeting in Kipnuk on September 13, 1977, supported a $),000 (or 25%) raise and increased benefits for Superintendent Weinberg. In failing to seek qualified applicants for the Superintendent's position, and supporting a raise for a Superintendent who has drawn such public criticism, Ms. Hout has shown a complete disregard for the will and best interests of the people in this District."

The following is Joerene Hout's rebuttal of the above grounds:

Joerene Hout has demonstrated her interests and concern for the Lower Kuskokwim School District and has, through University classes, workshops, and inservice board training, acquired the training and skills necessary to fulfill the prescribed duties of a school board member.

1. Ms. Hout is a strong supporter of parental rights in decisions that affect children and did not approve sending a bilingual plan to Washington D.C. last August.

2. Ms. Hout voted for a Class A lunch program at the September 13, 1977 Board meeting.

3. On August 19, 1977 the Board went on record that the decision regarding the Superintendent's contract would be made after evaluations were done. Ms. Hout acted within the limits set by the School Board.

BETWEEN THE HOURS OF 8:00 A.M. AND 8:00 P.M.

For the purpose of voting on the recall of Joerene Hout, Seat F.

The boundaries of the _____ Precinct, Lower Kuskokwim Regional Educational Attendance Area are described as follows:

The polling place is _____.

Dated this _____ day of _____ 1978.

LOWELL THOMAS, JR.
Lieutenant Governor

Copies of this Notice shall be posted in at least 3 conspicuous places in the precinct not less than 10 days before the election.

Sec. 29.28.050. Election contest and appeal. (a) The assembly or council may provide by ordinance the time and procedure for the contest of an election.

(b) Unless otherwise provided by ordinance, an election may be contested only upon the filing, before or at the time of the first canvass of ballots by the assembly or council, by a person qualified to vote in the municipality of his written affidavit specifying with particularity the grounds for the contest or invalidity of the election.

(c) Unless otherwise provided by ordinance, the assembly or council shall declare the election results at the first meeting to canvass the election and record the results in the minutes of that meeting.

(d) The contestant shall pay all costs and expenses incurred in a recount of an election demanded by the contestant if the recount fails to reverse any result of the election or the difference between the winning and a losing vote on the result contested is more than two per cent.

(e) No person may appeal or seek judicial review of a city or borough election for any cause or reason unless the person is qualified to vote in the municipality, has exhausted his administrative remedies before the assembly or council and has commenced, within 10 days after the assembly or council has finally declared the election results, an action in the superior court in the judicial district in which the municipality is located. If no such action is commenced within the 10-day period, the election and election results shall be conclusive, final and valid in all respects. (§ 2 ch 118 SLA 1972)

Article 2. Initiative and Referendum.

Section	Section
60. Reservation of powers	75. Protest
62. Petition	77. New petition
65. Contents of petition	80. Presentation of initiative
70. Required signatures	90. Presentation of referendum
73. Sufficiency of petition	110. Effect

Sec. 29.28.060. Reservation of powers. The powers of initiative and referendum are reserved to the residents of municipalities except the powers do not extend to matters restricted by § 7, art. XI, of the state constitution. (§ 2 ch 118 SLA 1972)

Borough voters may use an initiative to acquire an areawide power for a borough which cities refuse to transfer. 1965 Op. Att'y Gen., No. 6.

Sec. 29.28.062. Petition. A petition for initiative or referendum is filed with the municipal clerk and an initiative petition must be filed not less than 90 days before the next regular election. (§ 2 ch 118 SLA 1972)

Sec. 29.28.065. Contents of petition. A petition for an initiative or referendum shall

(1) embrace only a single comprehensive subject;

(2) set out fully the ordinance or resolution sought by the petition;

(3) state upon the petition, when circulated, the date of first circulation of the petition;

(4) contain the statement, when circulated, that the signatures on the petition must be secured within 90 days from the date of the first circulation;

(5) have the required signatures, dates of signatures and resident addresses of the signers. (§ 2 ch 118 SLA 1972)

Sec. 29.28.070. Required signatures. (a) The necessary signatures on a petition shall be secured within 90 days from the date of the first circulation of the petition. The petition shall be signed in ink or indelible pencil.

(b) Every petition for either the initiative or referendum in the government of a municipality shall be signed by a number of qualified voters residing within the territorial limits of the municipality, or, if the act sought to be initiated or referred pertains exclusively to the area outside cities or to a service area, by a number of qualified voters residing within the area outside cities or within the service area, as the case may be, equal to the following per cent of the total number of votes cast at the last general election in the city or borough or borough area concerned, or special election called for the purpose of electing city or borough officers:

(1) 25 per cent, when a city or borough has fewer than 7,500 persons, or

(2) 15 per cent, when a city or borough has 7,500 persons or more.

(c) When signing a petition each voter shall write or print after his signature the date of signing the petition and his resident address.

(d) Illegible signatures unless accompanied by a legible printed name may be rejected by the municipal clerk.

(e) A petition signer may withdraw his signature upon written application to the clerk within seven days after the petition has been filed with the clerk. (§ 2 ch 118 SLA 1972)

Sec. 29.28.073. Sufficiency of petition. (a) Within 10 days from the filing date, the municipal clerk shall certify on the petition whether or not it is sufficient.

(b) If the petition is insufficient, it may be amended or supplemented within 10 days after the date on which the petition is rejected as insufficient.

(c) Within 10 days after supplementary filing the clerk shall recertify the petition. If it is still insufficient, the petition is rejected and filed as a public record. (§ 2 ch 118 SLA 1972)

Sec. 29.28.075. Protest. If the municipal clerk certifies the petition is insufficient, a signer of the petition may file a protest with the municipal executive within seven days after the certification and the municipal executive shall present the protest at the next regular meeting to the assembly or council which shall hear and decide the protest. (§ 2 ch 118 SLA 1972)

Sec. 29.28.077. New petition. Failure to secure sufficient signatures does not preclude the filing of a new initiative or referendum petition. However, a new petition may not be filed sooner than six months after a petition is rejected. (§ 2 ch 118 SLA 1972)

Sec. 29.28.080. Presentation of initiative. (a) When a petition seeks enactment of an ordinance or resolution within the powers of the assembly or council and not otherwise restricted by § 60 of this chapter, the clerk shall present it to the assembly or council at its next meeting after certification. The assembly or council may reject the petition if the subject matter of the initiative or referendum is within the restrictions of § 60 of this chapter.

(b) Unless the petition is granted within 30 days of its submission to the assembly or council, the clerk shall, with the assistance of the municipal attorney, prepare an ordinance or resolution to implement the petition and shall submit it to the voters at the next regular election. The ordinance or resolution shall be published in full in the notice of election but may be summarized on the ballot to indicate clearly the proposal submitted.

(c) If a majority of those voting favor the proposal, it becomes effective when the election results are officially declared.

(d) The assembly or council may at any time not less than 10 days from the date of election adopt an ordinance or resolution to implement the petition. In that event an election shall not be held. (§ 2 ch 118 SLA 1972)

Sec. 29.28.090. Presentation of referendum. (a) When a petition seeks a referendum vote on an ordinance or resolution, the clerk shall submit the ordinance to the voters of the municipality at the next regular or special election. If no regular or special election occurs within 75 days of the filing of a sufficient petition with the clerk, the assembly or council shall hold a special election within 75 days of filing.

(b) If a sufficient petition for referendum is filed within 30 days after final passage of the ordinance, or before the effective date of the ordinance, the ordinance against which the petition is filed

shall be suspended pending the referendum on the ordinance. During the period of suspension the assembly or council may not enact an ordinance substantially similar to the suspended ordinance but may repeal the suspended ordinance.

(c) If a majority of those voting favor the referendum legislation, it remains in effect. If a majority rejects the legislation, it is repealed. A municipal charter may be amended as provided in the charter or by initiative and referendum as provided in §§ 60—110 of this chapter. (§ 2 ch 118 SLA 1972; am § 10 ch 147 SLA 1972)

Effect of amendment — The 1972 amendment, effective September 10, 1972, inserted "assembly or" in the last sentence of subsection (b).

Sec. 29.28.110. Effect. (a) The assembly or council may not, within two years, act in any way to modify or negate the effect of a successful initiative or referendum. If an ordinance against which a referendum is directed has been repealed by the assembly or council after a petition has been filed but before the referendum, the council or assembly may not enact substantially similar legislation for a period of one year after repeal.

(b) An unsuccessful initiative or referendum precludes the filing of a new petition for the same purpose sooner than six months after voter disapproval of the initiative or referendum. (§ 2 ch 118 SLA 1972)

Article 3. Recall.

Section	Section
130. Recall	200. Election
140. Grounds	210. Form of recall ballots
150. Petition	220. Election procedure
160. Examination for sufficiency	230. Majority required
170. Supplemental petition	240. Effect
180. New petition	250. Election of successor
190. Submission	

Sec. 29.28.130. Recall. An elected official of a home rule or general law municipality may be recalled by the voters after he has served six months in office. (§ 2 ch 118 SLA 1972)

Section applies to city school board member.—A member of a city school board is an elected public official of an incorporated municipality, within the meaning of this section, to the same extent as a city councilman, and thus is subject to the recall provisions contained in this section. Blue v. Stockton, Sup. Ct. Op. No. 15 (File No. 7), 365 P.2d 395 (1960).

Sec. 29.28.140. Grounds. Grounds for recall are misconduct in office, incompetence, or failure to perform prescribed duties. (§ 2 ch 118 SLA 1972)

Sec. 29.28.150. Petition. (a) A petition seeking recall of one or more municipal officials is filed with the municipal clerk. The petition shall contain

(1) the signatures and resident addresses of a number of voters as prescribed in § 70(b) of this chapter for initiative and referendum;

(2) the date each voter signed the petition; and

(3) a statement of the grounds of the recall stated with particularity as to specific instances.

(b) A petition for recall must be filed with the clerk within 60 days after the date of the earliest signature on the petition. § 2 ch 118 SLA 1972)

Sec. 29.28.160. Examination for sufficiency. The municipal clerk shall review the petition for content and signatures and shall certify on the petition within 10 days of the filing date whether it is accepted or rejected. Until the petition is accepted, a petition signer may withdraw his signature upon written application to the clerk. (§ 2 ch 118 SLA 1972)

Sec. 29.28.170. Supplemental petition. (a) If the petition is rejected because of insufficient signatures, it may be supplemented by additional signatures within 10 days after the date of rejection. If the petition is insufficient for any other reason, it shall be rejected and filed as a public record.

(b) Within 10 days after supplementary filing, the clerk shall recertify the petition. If it is still insufficient, the petition is rejected and filed as a public record. (§ 2 ch 118 SLA 1972)

Sec. 29.28.180. New petition. Failure to secure sufficient signatures does not preclude the filing of a new recall petition. However, a new petition may not be filed sooner than six months after a petition is rejected. (§ 2 ch 118 SLA 1972)

Sec. 29.28.190. Submission. If a recall petition is sufficient, the clerk shall immediately submit it to the assembly or council. (§ 2 ch 118 SLA 1972)

Sec. 29.28.200. Election. (a) If a regular election occurs within 75 days of the submission, the assembly or council shall submit the recall at that election.

(b) If no regular election will occur within 75 days, the assembly or council shall hold a special election within 75 days of submission.

(c) If a vacancy occurs in the office after a recall petition is filed, the petition shall not be submitted to the voters. (§ 2 ch 118 SLA 1972)

Sec. 29.28.210. Form of recall ballots. A recall ballot contains:

(1) the grounds as stated in the recall petition;

(2) the officer's statement of 200 words or less, if the statement is filed with the clerk for publication and public inspection within 20 days before the election;

(3) the following question: "Shall (name of person) be recalled from the office of (office)? Yes [ ] No [ ]". (§ 2 ch 118 SLA 1972)

Sec. 29.28.220. Election procedure. Procedures for conducting a recall election are those of a regular election. (§ 2 ch 118 SLA 1972)

Sec. 29.28.230. Majority required. A majority vote on the question is required to recall an officer. (§ 2 ch 118 SLA 1972)

Sec. 29.28.240. Effect. If an incumbent is not recalled at the recall election, a petition to recall the same incumbent may not be filed sooner than six months after the recall election. (§ 2 ch 118 SLA 1972)

Sec. 29.28.250. Election of successor. If the voters recall an officer, the clerk shall conduct an election for a successor to fill the unexpired term. The election shall be held at least 10 but not more than 45 days from the date of the recall election. However, if a regular or special election occurs within 75 days of the recall election, the successor to the recalled official shall be chosen at that regular or special election. The procedures and requirements for the regular election for the office from which the incumbent is recalled apply to the election conducted under this section. (§ 2 ch 118 SLA 1972)

Chapter 33. Areawide Borough Powers and Duties.

Article
1. Scope (§ 29.33.010)
2. Assessment and Collection of Taxes (§ 29.33.030)
3. Education (§ 29.33.050)
4. Planning, Platting and Zoning (§§ 29.33.070—29.33.245)
5. Additional Areawide Powers (§§ 29.33.250—29.33.290)

Article 1. Scope.

Section
10. Scope of areawide powers

Sec. 29.33.010. Scope of areawide powers. (a) Boroughs shall exercise the powers as specified and in the manner specified in this

Sec. 15.45.470. Provision and scope for use of recall. The governor, the lieutenant governor, and members of the state legislature are subject to recall by the voters of the state or the political subdivision from which elected. (§ 9.71 ch 83 SLA 1960)

Am. Jur. reference. — 28 Am. Jur., Initiative, Referendum and Recall, §§ 47 to 66.

Sec. 15.45.480. Filing application. The recall of the governor or a member of the state legislature is proposed by filing an application with the lieutenant governor. The recall of the lieutenant governor is proposed by filing an application with the attorney general, who shall perform the duties imposed on the lieutenant governor in the recall of other elected state officials. A deposit of $100 must accompany the application. This deposit will be retained if a petition is not properly filed. If a petition is properly filed the deposit shall be refunded. (§ 9.72 ch 83 SLA 1960; am § 24 ch 125 SLA 1962)

Sec. 15.45.490. Time of filing application. No application may be filed during the first 120 days of the term of office of any state public official subject to recall. (§ 9.73 ch 83 SLA 1960)

Sec. 15.45.500. Form of application. The application shall include (1) the name and office of the person to be recalled, (2) the grounds for recall described in particular in not more than 200 words, (3) a statement that the sponsors are qualified voters who signed the application with the statement of grounds for recall attached, (4) the designation of a recall committee of three sponsors who shall represent all sponsors and subscribers in matters relating to the recall, (5) the appointment of at least 100 qualified voters who subscribe to the application as sponsors for purposes of circulation, and (6) the signatures and addresses of qualified voters equal in number to 10 per cent of those who voted in the preceding general election in the state or in the senate or electoral district of the official sought to be recalled. (§ 9.74 ch 83 SLA 1960)

Sec. 15.45.510. Grounds for recall. The grounds for recall are (1) lack of fitness, (2) incompetence, (3) neglect of duties, or (4) corruption. (§ 9.75 ch 83 SLA 1960)

Sec. 15.45.520. Manner of notice. Notice on all matters pertaining to the application and petition may be served on any member of the recall committee in person or by mail addressed to a committee member as indicated on the application. (§ 9.76 ch 83 SLA 1960)

Sec. 15.45.530. Notice of the number of voters. The lieutenant governor, upon request, shall notify the recall committee of the official number of persons who voted in the preceding general election in the state or in the senate or election district of the official to be recalled. (§ 9.77 ch 83 SLA 1960)

Sec. 15.45.540. Review of application. The lieutenant governor shall review the application and shall either certify it or notify the recall committee of the grounds of refusal. (§ 9.78 ch 83 SLA 1960)

Sec. 15.45.550. Bases of denial of certification. The lieutenant governor shall deny certification if he determines that (1) the application is not substantially in the required form, (2) the application was filed during the first 120 days of the term of office of the official subject to recall or within less than 180 days of the termination of the term of office of any official subject to recall, (3) the person named in the application is not subject to recall, or (4) there is an insufficient number of qualified subscribers. (§ 9.79 ch 83 SLA 1960)

Sec. 15.45.560. Preparation of petition. If the lieutenant governor certifies the application, he shall prescribe the form of, and prepare, a petition containing (1) the name and office of the person to be recalled, (2) the statement of the grounds for recall included in the application, (3) the statement of warning required in § 570 of this chapter, (4) sufficient space for signatures and addresses, and (5) other specifications prescribed by the lieutenant governor to assure proper handling and control. Petitions, for purposes of circulation, shall be prepared by the lieutenant governor in a number reasonably calculated to allow full circulation throughout the state or throughout the senate or election district of the official sought to be recalled. The lieutenant governor shall number each petition and shall keep a record of the petitions delivered to each sponsor. (§ 9.80 ch 83 SLA 1960)

Sec. 15.45.570. Statement of warning. Each petition and duplicate copy shall include a statement of warning that a person who signs a name other than his own to the petition, or who knowingly signs his name more than once for the same proposition at one election, or who signs the petition knowing he is not a qualified voter, upon conviction is punishable by a fine of not more than $1,000 or by imprisonment for not more than one year, or by both. (§ 9.81 ch 83 SLA 1960)

Sec. 15.45.580. Circulation by sponsor. The petitions may be circulated only by a sponsor and only in person throughout the state or senate or election district represented by the official sought to be recalled. (§ 9.82 ch 83 SLA 1960)

Sec. 15.45.590. Manner of signing and withdrawing name from petition. Any qualified voter may subscribe to the petition by signing his name and address. A person who has signed the petition may withdraw his name only by giving written notice to the lieutenant governor before the date the petition is filed. (§ 9.83 ch 83 SLA 1960)

Sec. 15.45.600. Certification of sponsor. Before being filed, each petition shall be certified by an affidavit by the sponsor who personally circulated the petition. The affidavit shall state in substance that (1) the

person signing the affidavit is a sponsor, (2) the person is the only circulator of that petition or copy, (3) the signatures were made in his actual presence, and (4) to the best of his knowledge, the signatures are those of the persons whose names they purport to be. In determining the sufficiency of the petition, the lieutenant governor shall not count subscriptions on petitions not properly certified. (§ 9.84 ch 83 SLA 1960)

Sec. 15.45.610. Filing of petition. No petition may be filed within less than 180 days of the termination of the term of office of a state public official subject to recall. The sponsor may file the petition only if signed by qualified voters equal in number to 25 per cent of those who voted in the preceding general election in the state or in the senate or election district of the official sought to be recalled. (§ 9.85 ch 83 SLA 1960)

Sec. 15.45.620. Review of petition. Within 30 days of the date of filing, the lieutenant governor shall review the petition and shall notify the recall committee and the person subject to recall whether the petition was properly or improperly filed. (§ 9.86 ch 83 SLA 1960)

Sec. 15.45.630. Bases for determining the petition was improperly filed. The lieutenant governor shall notify the committee that the petition was improperly filed if he determines that (1) there is an insufficient number of qualified subscribers, or (2) the petition was filed within less than 180 days of the termination of the term of office of the official subject to recall. (§ 9.87 ch 83 SLA 1960)

Sec. 15.45.640. Submission of supplementary petition. Upon receipt of notice that the filing of the petition was improper, the committee may amend and correct the petition by circulating and filing a supplementary petition within 20 days of the date that notice was given, if filed within less than 180 days of the termination of the term of office of the person subject to recall. (§ 9.88 ch 83 SLA 1960)

Sec. 15.45.650. Calling special election. If the lieutenant governor determines the petition is properly filed and if the office is not vacant, he shall prepare the ballot and shall call a special election to be held on a date not less than 60, nor more than 90, days after the date that notification is given that the petition was properly filed. If a primary or general election is to be held not less than 60, nor more than 90, days after the date that notification is given that the petition was properly filed, the special election shall be held on the date of the primary or general election. (§ 9.89 ch 83 SLA 1960; am § 37 ch 69 SLA 1970)

Legislative committee report. — For report on ch. 69, SLA 1970 (HB 564), see 1970 House Journal Supplement No. 2, p. 7.

Sec. 15.45.660. Preparation of ballot. The ballot shall be designed with the question of whether the public official shall be recalled, placed on the ballot in the following manner: "Shall *(name of official)* be

recalled from the office of . . . . .?". Provision shall be made for marking the question "Yes" or "No." (§ 9.90 ch 83 SLA 1960)

Sec. 15.45.670. Conduct of special election. Unless specifically provided otherwise, all provisions regarding the conduct of a general election shall govern the conduct of a special election for the recall of a state public official, including but not limited to, provisions concerning voter qualification; provisions regarding duties, powers, rights and obligations of the lieutenant governor, of other election officials, and of cities and organized boroughs; provision for notification of the election; provision for the payment of election expenses; provisions regarding employees being allowed time from work to vote; provisions for counting, canvassing, and certification of returns; provision for the determination of votes and of recount contests and court appeal; and provisions for absentee voting and the use of voting machines. (§ 9.91 ch 83 SLA 1960)

Sec. 15.45.680. Display of bases for and against recall. The lieutenant governor shall provide each election board in the state or in the senate or election district of the person subject to recall with 10 copies of the statement of the grounds for recall included in the application and 10 copies of the statement of not more than 200 words made by the official subject to recall in justification of his conduct in office. The person subject to recall may provide the lieutenant governor with his statement within 10 days after the date the lieutenant governor gave notification that the petition was properly filed. The election board shall post three copies of the statements for and against recall in three conspicuous places in the polling place. (§ 9.92 ch 83 SLA 1960)

Sec. 15.45.690. Certification of election results. If a majority of the votes cast on the question of recall favor the removal of the official, the lieutenant governor shall so certify and the office is vacant on the day after the date of certification. (§ 9.93 ch 83 SLA 1960)

Sec. 15.45.700. Filling vacancy. A vacancy caused by a recall is filled as a vacancy caused by any other means is filled. (§ 9.94 ch 83 SLA 1960)

Sec. 15.45.710. Insufficiency of grounds, application, or petition. No recall submitted to the voters shall be held void because of the insufficiency of the grounds, application, or petition by which the submission was procured. (§ 9.95 ch 83 SLA 1960)

Sec. 15.45.720 Judicial review. Any person aggrieved by a determination made by the lieutenant governor may bring an action to have the determination reviewed within 30 days of the date on which notice of determination was given by any appropriate remedy in the superior court. (§ 9.96 ch 83 SLA 1960)

Moss introduced Bob Lohr .

Bob Lohr, Director of Upper Tanana Development Corp. Tok.
Bill attempts to deal with impact of construction in unorganized boroughs. Proposed a strategy for dealing with the impact. Defines planning necessary and sets standards.
Suggests some amendments in bill (see attached)
No fiscal impact to state.
Sees that Legislature has a role in socio/economic impact in communities.

Pat Conheady DNR. Dept. Supports bill. It spells out those things already being done.

Discussion follows on Metcalfe's suggested amendment related to "superior public interest of the state".
Amendment accepted.

- ✓ Bob Lohr, Director of Upper Tanana Development Corporation in Tok
- ✓ Dept. of Natural Resources (Pat Conheady)

According to Bob Lohr, it is not now clear in the regulations that this kind of socio-economic plan can be required. Federal regulatory people not sure it can be required under our exisiting statutes. Open endedness of regulations now in effect has been protested by Northwest. No minimum standards have been set by the State.

DNR -- will support bill.

HOUSE BILL NO. 293

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Right-Of-Way Leasing Act; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.35.010(a) is amended to read:

(a) The natural resources of this state in crude oil and natural gas and in its land for transportation of these resources and their products by pipeline toward markets both in and out of the state are capable of making a significant contribution to the general welfare of the people of this state. It is the policy of this state that the development, use, and control of a pipeline transportation system be directed to make the maximum contribution to the development of the human resources of this state, the increase in the standard of living for all of its residents, the advancement of existing and potential sectors of its economy, the strengthening of free competition in its private enterprise system, and the careful protection of its incomparable natural environment and the unique lifestyle of its people, including all measures reasonably required to assure that potential adverse impacts are minimized by adequate planning.

* Sec. 2. AS 38.35.100(a) is amended to read:

(a) The commissioner shall promptly determine, on an application filed with him under AS 38.35.050, whether the applicant is fit, willing and able to perform the transportation or other acts proposed in a manner that will be required by the present or future public interest. In making a determination the commissioner shall consider whether ~~or not~~

the applicant has demonstrated that

(1) the proposed use of the right-of-way will unreasonably conflict with existing uses of the land involving a superior public interest;

(2) the applicant has the technical and financial capacity to protect state and private property interests;

(3) the applicant has the technical and financial capability and has developed a plan adequate to take action to the extent reasonably practical to

(A) prevent any significant adverse environmental impact, including but not limited to, erosion of the surface of the land and damage to fish and wildlife and their habitat;

(B) undertake any necessary restoration or revegetation; [AND]

(C) protect the interests of individuals living in the general area of the right-of-way, especially those who rely on fish, wildlife and biotic resources of the area for subsistence purposes;

(D) provide local impact information and planning assistance for communities affected by the pipeline project; and

(E) avoid or minimize adverse impacts and maximize positive local and regional social impacts caused by the construction, operation, maintenance and termination of the pipeline.

(4) the applicant has the financial capability to pay reasonably foreseeable damages for which he may become liable on claims arising from the construction, operation, maintenance or termination of the pipeline.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

IN THE HOUSE BY MOSS AND ROGERS

HOUSE BILL NO. 293

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Right-Of-Way Leasing Act; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.35.010(a) is amended to read:

(a) The natural resources of this state in crude oil and natural gas and in its land for transportation of these resources and their products by pipeline toward markets both in and out of the state are capable of making a significant contribution to the general welfare of the people of this state. It is the policy of this state that the development, use, and control of a pipeline transportation system be directed to make the maximum contribution to the development of the human resources of this state, the increase in the standard of living for all of its residents, the advancement of existing and potential sectors of its economy, the strengthening of free competition in its private enterprise system, and the careful protection of its incomparable natural environment and ~~the unique lifestyle~~ of its people, including ~~all~~ measures reasonably required to assure that potential adverse impacts are minimized by adequate planning.

* Sec. 2. AS 38.35.100(a) is amended to read:

(a) The commissioner shall promptly determine, on an application filed with him under AS 38.35.050, whether the applicant is fit, willing and able to perform the transportation or other acts proposed in a manner that will be required by the present or future public interest. In making a determination the commissioner shall consider whether ~~or not~~

the applicant has demonstrated that

(1) the proposed use of the right-of-way will unreasonably conflict with existing uses of the land involving a superior public interest;

(2) the applicant has the technical and financial capacity to protect state and private property interests;

(3) the applicant has the technical and financial capability and has developed a plan adequate to take action to the extent reasonably practical to

(A) prevent any significant adverse environmental impact, including but not limited to, erosion of the surface of the land and damage to fish and wildlife and their habitat;

(B) undertake any necessary restoration or revegetation; [AND]

(C) protect the interests of individuals living in the general area of the right-of-way, especially those who rely on fish, wildlife and biotic resources of the area for subsistence purposes;

(D) provide local impact information and planning assistance for communities affected by the pipeline project; and

(E) avoid or minimize adverse impacts and maximize positive local and regional social impacts caused by the construction, operation, maintenance and termination of the pipeline.

(4) the applicant has the financial capability to pay reasonably foreseeable damages for which he may become liable on claims arising from the construction, operation, maintenance or termination of the pipeline.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

INDIVIDUALS CONTACTED:

Rep. Anderson
Municipal League

WITNESSES TESTIFYING:

Anderson -- The concept of a minimum entitlement also appears in HB 192. As fate of HB 192 was in question, Anderson is introducing idea as a separate bill. Anderson doesn't think that HB 300 would pass without the conditions sugggested by Dept. of C&RA as the administration would not be supporting the bill without these conditions. The conditions for receipt of the $25,000 are also included in HB 192 (Revenue Sharing).

Anderson describes conditions as outlined in HB 192. Suggests that the basic entitlement provisions would allow villages to hire someone to work on getting additional grants monies to the villages.

Anderson urges adoption of a CS for HB300 with the discussed restrictions.

McCarter -- The Dept. of C&RA is supportive of this bill with the restrictions contained in HB192. There is no tax base in these communities and the minimum entitlement is seen as "seed money".

#4 which requires codification of ordinances should perhaps be deleted from the conditions.

Also, the provision in the enumerated for compliance "during the fiscal year prededing" could be handled by a change of "tense" in the regulations or by rewording in the bill so that communities would not have to have had compliance in order to receive monies.

Parr -- Are these requirements in the existing statutes meaningful or not? Doesn't understand why the Dept. is so willing to waive them.

COMMITTEE ACTION: No action taken.

TAPE # 7 SIDE 1 Sections 933-1520

McCarter -- Communities would get the $25,000 minimum and then whatever else would be coming to them through the existing revenue sharing program. The presence of a "clerk" (who might be funded from the $25,000) often makes or breaks the community in terms of its ability to organize.

Standards are presently on the books which must be met before incorporation can take place.

The former classification of "third class city" (villages) provided for just the basic "town meeting". McCarter recommends that minimum entitlement be granted to see if it helps 2nd class cities get off the ground.

Chitwood -- The Municipal League is in favor of the minimum entitlements only if the distribution to the other cities is not reduced.

Dear Carl:

I have introduced a bill that would grant a minimum of $25,000.00 to each municipality of the State. The bill is in House Community and Regional Affairs and I have been unable to move it at this writing.

I am hopeful that this policy will be adopted next year if it doesn't move this year.

Any help you can give to the House CRA committee members to justify the need would be appreciated.

Very Sincerely,

Nels

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Under the FY 79 State Revenue Sharing Program, 74 municipalities received less than $25,000. A total of $1,034,936 would be required to increase each of these municipality's entitlement to $25,000. In FY 80, it is anticipated that 10 municipalities not participating in the FY 79 program will submit applications. These are small cities providing few services, therefore, they would no doubt receive the minimum grant proposed by House Bill No. 300.

$1,034,936	Increases FY 79 participants' entitlements to $25,000
250,000	Payments to applicants not participating in FY 79 program
$1,284,936	Anticipated FY 80 Need

(continued)

IV. DATE 3-7-79 PREPARED BY for Mary Foster

cc: Budget and Management
Prime Sponsor (First Legislator Named)

33 001 (Rev. 10/78)

III. ANALYSIS (continued)

In FY 81, it is hoped that five more municipalities will submit revenue sharing applications; and provision is made to pay these new applicants the minimum grant.

$1,284,936
125,000
$1,409,936

This would bring the number of participants in the State Revenue Sharing Program as close to 100% of all municipalities as can be realistically expected.

House Bill No. 300 does not provide for a cost-of-living adjustment to the minimum grant.

Full funding was assumed when these figures were prepared. However, if the revenue sharing appropriation is insufficient to fund at 100% for any fiscal year, the proration factor can be applied to the above amounts.

302

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

April 27, 1979

The Honorable Bill Parker
Chairman
House Community and Regional
Affairs Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

RE: HOUSE BILL NO. 302

At the request of your staff, we have reviewed House Bill No. 302. We have four major concerns with the concepts contained in this legislation.

1) The idea of taxpayers residing in an area of a borough receiving few services, helping pay for a higher level of service in another area of the borough, appears to be unfair. It is difficult to justify a system requiring these taxpayers to finance services provided to others, even though this bill requires voter approval. High millage service areas, generally speaking, are those with concentrated populations and, therefore, concentrated voter power. It would not be difficult to obtain voter approval for an ordinance reducing the millage in highly populated areas at the expense of less populated areas receiving only minimal services. As the bill is drafted, only an areawide vote is required.

2) In order for a borough to provide the same level of service areawide, and fund service areas as contemplated by this proposed legislation, substantial millage increases would be required on an areawide basis or, ultimately, the tax base would have to be significantly increased. Again voter approval would not necessarily be an obstacle because the concentrated population centers would more than likely receive an actual decrease in millage, again at the expense of residents in the less populated areas receiving few services.

3) There could be a fiscal impact on the State if those boroughs that collect substantial oil and gas revenues and have substantial numbers of service areas were to fund those service areas by an areawide millage. The two boroughs with the greatest ability to impact State revenue collections would be the Kenai Peninsula Borough and Fairbanks North Star Borough. The following examples assume total conversion to areawide millages and are based on 1978 millage rates and values.

Example #1 - The Kenai Peninsula Borough currently levies an areawide millage of 4.50 mills; additionally, it levies additional service area millages of as much as 16.5 mills more in some areas. State assessed oil and gas properties (AS 43.56) are in areas with low millage. If this bill were to pass and one areawide rate were levied to maintain the current level of services, we estimate that rate would have to be raised to be 6.22 mills. The State of Alaska currently levies 20 mills on all state assessed oil and gas property and credits owners of this property for local property taxes paid. Any increase in local taxes on State assessed oil and gas property results in an equal decrease in State revenue. Therefore, the provision that would provide a boroughwide levy for local services could, we estimate, decrease State revenue $518,827.

Example #2 - Fairbanks North Star Borough currently levies 7.20 mills areawide and has service areas that levy as much as 8.50 mills more. Again, assuming an areawide levy to maintain current service levels, an areawide millage rate of 10.13 would be required. Applying this new millage rate to State assessed oil and gas property in this borough results in an estimated increase in local taxes from this source in the amount of $1,655,816. This, of course, would be a direct reduction in State revenues.

4) There have been several bills introduced this session that will either create or extend exemptions from property taxes (HB 103, HB 314, and SB 64, etc.). The impact of these decreases in tax base would be magnified. To illustrate this concern, assume passage of one of those bills. If the optional $10,000 residential exemption were increased to $50,000 and opted for by the Kenai Peninsula Borough and also assuming complete funding of all services at the current level by areawide levy, then the following would occur. An areawide levy of 7.22 mills and a reduction of millage from current rates of approximately 60% in cities and increase of approximately 60% in many areas outside of cities. As an example of the tax increase in low service areas under these conditions; currently the local oil and gas property owners pay $2,289,026 to the borough. Under the assumed conditions they would pay $3,269,724. Again, the difference of $971,698 is a loss of revenue to the State. This same relationship could be transferred to every non-residential property located in less populated areas of the borough.

Although expression of these concerns necessitated some assumptions, we feel these assumptions are a realistic analysis of the possible results of implementation of this legislation.

The Department appreciates the opportunity to comment.

Sincerely,

Don Argetsinger

Don Argetsinger

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 19, 1979

SUBJECT: HB 302 - Appropriations and grants to service areas

TO: Representative Bill Parker

FROM: Billy G. Berrier BGB
Director
Division of Legal Services

As you requested, I have reviewed the letter from Mr. Hartig relating to this bill. Art. X, sec. 5 of the constitution is a grant of power, not a limitation of power. Under the uniformity of taxation, principle courts have frequently held that differential taxation based on difference in service rendered is unconstitutional. The effect, and intended effect as the Constitutional Convention minutes make clear, is to allow differential taxation which is not otherwise allowed. There is no limitation expressed in the section nor do I think a limitation that no method of funding special services other than from taxes, charges or assessments within the service area may be implied.

He also cites Concerned Citizens of South Kenai Peninsula v. Kenai Peninsula Borough, 527 P.2d 447 (Alaska 1974). That case upheld the creation of a hospital service area by the borough. The court does hold that:

> Substantive due process is denied when a legislative enactment has no reasonable relationship to a legitimate governmental purpose. It is not a court's role to decide whether a particular statute or ordinance is a wise one; the choice between competing notions of public policy is to be made by elected representatives of the people. The constitutional guarantee of substantive due process assures only that a legislative body's decision is not arbitrary but instead based upon some rational policy.

> A court's inquiry into arbitrariness begins with the presumption that the action of the legislature is proper. The party claiming a denial of substantive due process has the burden of demonstrating that no rational basis for the challenged legislation exists. This burden is a heavy one, for if any conceivable legitimate public policy for the enactment is apparent on its face or is offered by those defending the enactment, the opponents of the measure must disprove the factual basis for such a justification.

Although in later cases, most specifically in State v. Erickson, 574 P.2d 1 (Alaska 1978) our court has adopted a less deferential approach, a reasonable basis test will still be applied. Since grants from a unit of government with a broader tax base to a unit with a narrower base is today a commonplace feature of government, in my opinion a reasonable basis exists.

Representative Bill Parker
Community & Regional
Affairs Committee, Chairman
Pouch V
Juneau, AK 99811

Re: H.B.-302 "An act relating to appropriations and grants from boroughs to service areas and cities; and providing for an effective date."
Our Reference 844-19.3

Dear Representative Parker:

On behalf of my client, the City of Kodiak, Alaska, I want to express an opposition to the passage of H.B.-302 introduced on February 26, 1979 and sponsored by Representatives Hugh Malone and Margaret Branson.

The bill proposes to amend Chapter 29 of the Alaska Statutes to provide that boroughs may, by ordinance and after holding an areawide election on the question, authorize appropriations from areawide taxes or other areawide revenues to finance all or part of a special service.

The City's opposition to this proposed legislation is based upon several grounds. First, it is questionable that the legislation, if passed in its present form, is constitutional. Article X, Section 5, of the Constitution of Alaska provides:

> " Service areas to provide special services within an organized borough may be established, altered, or abolished by the assembly, subject to the provisions of law or charter. A new service area shall not be established if, consistent with the purposes of the article, the new

> service can be provided by an existing service area, by incorporation as a city, or by annexation to a city. The assembly may authorize the levying of taxes, charges, or assessments within a service area to finance the special services." (Emphasis added.)

The language is clear that the assembly's taxing authority is limited to that area encompassed within the established special service area. (See also Concerned Citizens of South Kenai Peninsula v. Kenai Peninsula Borough et al. 527 P2d. 447).

In addition to the constitutional prohibition against such taxing authority, it should be noted that the proposed authority if authorized, would not foster or encourage the contemplated substitution of city government for borough authority, when it would be proper to do so, but instead would continue to encourage competing and often overlapping and duplicate governmental services.

Also, such areawide taxation, because the tax base is often within the city, would have the effect of placing the tax burden on the city residents without providing accompanying benefits.

Your consideration of the City of Kodiak's opposition to this legislation will be appreciated and should any hearings on the legislation be scheduled, I would appreciate being notified so that I might have the opportunity to be present and to testify on behalf of my client.

Very truly yours,

COLE, HARTIG, RHODES,
NORMAN & MAHONEY

Article 2. Service Areas.

Section
90. Service areas

Sec. 29.63.090. Service Areas. (a) Service areas to provide special services within a borough may be established, operated, altered or abolished by the assembly by ordinance. Special services include services not provided on an areawide basis within the borough or the borough area outside cities or a higher or different level of service than that provided on an areawide basis or in the borough area outside cities. In a first class borough the assembly may exercise within a service area any power granted a first class city by general law; in a second class borough an exercise of the powers must be approved by a majority of the qualified voters residing within the service area and voting on the question at a regular or special election.

(b) The assembly may levy or authorize the levying of taxes, charges, or assessments in service areas to finance the special services.

(c) The assembly may provide for appointed or elected boards to supervise the furnishing of special services in service areas.

(d) A new service area may not be established if, consistent with the purposes of art. X of the state constitution, the new service can be provided by an existing service area, by annexation to a city, or by incorporation as a city.

(e) The assembly may exercise or delegate to a service area any powers which may be exercised by a first class borough in the area outside cities. In a second class borough, each exercised or delegated power must be approved by a majority vote at a regular or special election held within the service area. The rate of taxation and the issuance of bonds are subject to assembly approval. (§ 2 ch 118 SLA 1972)

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Malone - Representing District 18 in sponsorship of HB 314. Recommends that in line 14 the "or" be removed. The bill adds an option for local government to structure its taxes. The Kenai Assembly has requested the exemption.

Malone opposes the recommendation of the Dept.of C&RA that the State offset the amount of the exemption by reimbursing it to the municipality.

Exemptions allowed in the residential real property tax are limited. In 1973 the allowable exemption was at a higher level than the current $10,000.

*Malone will try to obtain the current cost of the existing $10,000 exemption in the Kenai Peninsula.

Parr - Suggests amendment which would provide that the state's revenues from oil and gas property tax would not be diminished as a result.

Malone - Not sure how Parr's suggestion for an amendment would be enforced. It may be hard to establish a connection between the exemption and how much property tax is offset..the mill rate could be lowered.

Don't want to apply limitation on assessment.Could extend to include all classes of property including oil and gas.

Intent is not to have state reimburse.

Branson - Questions what the implications of HB 314 for service areas.

Malone - Will get that information.

Metcalfe - What would be the effect on the owner of a $100,000 house?

Doesn't want any inequities and concerned that the proposed

COMMITTEE ACTION. No Action. Bill rescheduled for hearing on 1/25/80.

TAPE # 1 SIDE 1 Sections $$) *&#

bill would create such inequities by subsidizing the lower cost property owners.

Malone - It is necessary to find out what the percentage of other property which could be taxed it.
Data re who would end up paying taxes that the exempt group was not paying would be necessary. Malone contends that since this exemption is optional for the municipality that it should be acceptable to all.

Palmer McCarter, Dept. C&RA
Terry Early, State Assessor
Opposed to HB 314. Ordinarily the Dept. supports local control but this bill expands the inequity of the $10,000 exemption. Most municipalities can't afford this and the three boroughs and the city which has opted for the exemption have pipeline revenues.
Early and McCarter referred to a study prepared by the Dept. at the request of the House C&RA Committee(see in folder) for reference of the Committee.

Parr - Pointed out that if the other municipalities reappraised, they also could afford to take the exemption. It may be they didnt want to exempt for people who couldn't afford.
t
Branson - Would borough as well as city taxes be effected?

There was discussion of the amount of money that would actually be lost to the state if there was an exemption.

O'Connell - Indicated that other segments of the community, such as the small business man would be effected if the exemption were put into effect.

Parr - Suggests that an alternative approach might be to use the real property tax as a credit on personal income tax. This method wouldn't favor one area over anouther.

March 25, 1980

Mr. Dave Walsh, President
Alaska Municipal League
c/o Pouch 6-650
Anchorage, Alaska 99502

Dear Dave:

The ability for municipalities to have a fair and equitable tax base is absolutely critical to healthy local government. I would like to urge the Alaska Municipal League, possibly in conjunction with the Alaska Native Foundation, RuralCap and others, to undertake, prior to next session, a major review of the kind and amount of taxes that the various classes of municipalities can levy and collect. The current Legislature is addressing House Bill 192, dealing with municipal revenue sharing, and Senate Bill 199, dealing with the school foundation program. These two areas provide major cornerstones for municipal school revenues. A third cornerstone, real and personal property tax, is currently faced with possible erosion and decreased credibility.

The Senate Community and Regional Affairs Committee has some twelve bills pending which impact the municipal property tax by allowing certain classes of exemptions, imposing restrictions, etc. Some, but not all, of these bills allow the municipalities to be reimbursed for the changes in their ability to levy and collect real and personal property taxes. Certainly the bills carry a major fiscal impact. I am enclosing a summary of the bills currently before my Committee. Many other tax bills affecting municipalities are before the Legislature, such as changes in the amount of sales tax which can be levied in certain municipalities and elimination of the business inventory tax.

Relating specificially to real and property taxes, it seems to me that policies must be established regarding possible exemption. If such policies are not developed, we will create a hodgepodge of a program that will serve no one well. For example, should we consider exemptions on a need basis rather than exemptions for special groups of people? Should there be equality for a whole group, rather than special interest exemptions within a group? What kind of things would be better left to grant and aid programs as opposed to exemptions in the property tax approach?

The Department of Community and Regional Affairs recently completed a study of the exemption problem. Their study gives a synopsis of information developed that deals with major exemption problems, and in some cases, suggests several options that might be taken. Their broad policy statement favors few, if any, additional exemptions, and they feel that any exemption program should meet the following criteria: "any exemption granted should be either for public property or for sufficient public good to justify a transfer of burden to the balance of the community." They recognize that the credibility of property tax has been questioned continually and with increasing intensity these past few years, and that many taxpayers feel that they are paying more than their fair share.

The state has recognized certain senior citizens' exemptions, as a matter of public policy. These exemptions support a policy of encouraging age diversity in Alaskan society, show esteem for and gratitude to the pioneers of the state and give a method of helping many to afford to stay in our state, rather than have to leave family, and friends to begin a life in another state, where it might be cheaper to live. The senior citizens who are on a fixed income and cannot absorb property taxes increased by inflation certainly are in need of assistance. However, some bills are now reaching into special groups within the senior citizens; for example, allowing for surviving spouses 55 and older of those senior citizens who qualified for real property exemption to continue to benefit from the exemption. But, what about other senior citizens within that same age group who might have just as much, or a greater need for exemptions? Disabled veterans are another group being suggested for special exemptions, but what about the equity question of all other disabled people in our State? Other questions of equity need to be considered.

Each piece of proposed legislation offers a shift in public policy -- new groups which deserve special treatment, new funding approaches, and so forth. However, sound public policy decisions can be made only within the context of effects or impacts on local governments and the general public. How can we create a new special exemption, for example, unless we are certain of municipalities fiscal needs, alternative revenue sources and the impact of using those other sources?

Again, I would urge the Alaska Municipal League to take a leadership position in review of the municipal property tax, as well as the broader impact of local municipalities being able to raise adequate revenues to fund needed municipal services. I would be most pleased to have your response as to whether you feel the Alaska Municipal League finds merit

in this proposal, and if so, I sincerely hope the league will analyze the kind and amount of taxes that the various classes of municipalities can and should levy and collect.

Sincerely yours,

Arliss Sturgulewski

Taxes (home improvement exemption)

SENATE BILL NO. 138, by Senators Bradley and Stimson. Relates to establishment of tax exemption for home improvements. Amends AS 29.53 by adding section which provides that the "value of an alteration, repair, renovation, addition to, or improvement of an existing structure which is used by a taxpayer as his personal residence is exempt from assessment for purposes of levy and collection of property taxes under this chapter....." Repeals AS 29.53.025(f) & (g) relating to current exemptions for improvements. Provides Act effective January 1, 1979.

Introduced February 13 and referred to Community & Regional Affairs, then to Finance.

Veterans (disabled) (property tax exemption)

SENATE BILL NO. 154, by Senator Bradley. Amends AS 29.53.020(e) to include disabled veterans of any age to section which exempts persons 65 or over from payment of property tax. Applies to resident veterans, honorably separated from service whose service-related disability has been rated at 50% or more. Provides Act effective January 1, 1980.

Introduced February 13 and referred to Community & Regional Affairs, then to Finance.

Residential Property Ta.. (partial exemption)

SENATE BILL NO. 29[illegible], by Senator Stimson. Adds to list of exemptions from municipal property tax in AS 29.53.020(a) "the real property owned and occupied as a permanent place of abode by a resident, not exceeding $25,000 in value." Provides state shall reimburse a borough or city for revenues lost. Repeals AS 29.53.025(a) which allows municipalities to exclude or exempt or partially exempt residential property from taxation by ordinance ratified by voters, the exemption not to exceed $10,000 per residence. Provides Act effective January 1, 1981.

Introduced January 14 and referred to Community and Regional Affairs and then to Finance.

Property Tax (municipal) reduction of)

SENATE BILL NO. 299, by Senator Kerttula. Amends AS 29.53.050(a) (Tax Limitation on Municipalities) to read: "A (NO) municipality may not levy and tax for any purpose in excess of nine-tenths of one (THREE) percent of the assessed valuation of property within the municipality in any one year." Provides Act effective 1/1/81.

Introduced January 14 and referred to Community and Regional Affairs.

Property Tax (disabled Vets exempt)

SENATE BILL NO. 360, by Senators Sumner and Hackney, by request. Exempts from municipal property tax the real property owned and occupied as a permanent place of abode by a disabled veteran. Provides exemption is allowed to veteran "for a percentage of the assessed value of the real property which is the same as his percentage of disability as established by his service disability rating." Provides Act effective January 1, 1981.

Introduced January 24 and referred to Community and Regional Affairs and Finance.

Fire Prevention

SENATE BILL NO. 370, by Senators Colletta and Bradley. Adds to AS 29.53.020 (Municipal Property Tax - Required Exemptions) "Two

percent of the assessed value of a structure is exempt from taxation if the structure contains fire protection systems in operating condition incorporated as a fixture or part of the structure. The exemption is limited to 1) an amount equal to two percent of the value of the structure based on the assessment for 1981, if fire protection systems are a fixture of the real property on January 1, 1981; or an amount equal to two percent of the value of the structure as of January 1 following the installation of the fire protection systems as fixtures of the structure after January 1, 1981.

Introduced January 31 and referred to Community & Regional Affairs.

Sr. Citizens Tax Exemp. (surviving spouse)

SENATE BILL NO. 427, by Senators Ferguson, Ray, Sackett, Meland, Colletta, Sumner, Kerttula, Hohman, Mulcahy and Bradley. Amends AS 29.53.020(e) relating to municipal property tax exemption for senior citizens by adding: "The real property exempt from taxation under this subsection continues to be exempt if owned and occupied as a permanent place of abode by the surviving spouse of the resident, if the surviiving spouse is 55 years or older and has a gross annual income of less than $20,000. Does not provide for effective date.

Introduced February 12 and referred to Community and Regional Affairs, then to Finance.

Property Tax Exemptions (for energy

SENATE BILL NO. 431, by the Rules Committee by request of the Legislative Council by request. Adds new section to AS 29.53 (Municipal Assessment & Taxation) which exempts from municipal property tax "The value of an alternation or improvement of an existing structure that reduces energy consumption in the structure." Section applies to mobile homes also. Provides Act effective January 1, 1981.

Introduced February 12 and referred to Community and Regional Affairs, then to Finance.

Municipal Property Taxes (exemp. sr. citizens--personal property)

SENATE BILL NO. 456, by Senators Stimson and Bradley. Amends Municipal Assessment and Taxation (AS 29.53), required exemptions (020) by stating that the property of certain residents of the state is exempt and further states that "(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over, and the personal property owned by a resident 65 years of age or over, is exempt from taxation of the assessed value of the (REAL) property." Deletes reference to "real" property throughout and repeals AS 29.53.020(i) which defines "real property" as property including, but not limited to mobile homes whether classified as real or personal property for municipal tax purposes. Provides Act takes effect January 1, 1981.

Introduced February 18 and referred to Community & Regional Affairs, then to Finance.

Property Tax (residential-partial exem. from assess)

SENATE BILL NO. 465, by Senators Ferguson, Colletta, Fahrenkamp and Sumner. Exempts from general taxation (Municipal Assessment and Taxation, required exemptions--AS 29.53.020(a)) "(7) the real property owned and occupied as a permanent place of abode by a resident, not exceeding $85,000 in value." Exempts real property owned and occupied by a resident 65 years of age or over from

taxation of the assessed value of property which exceeds $85,000 in value. Repeals AS 29.53.025(a) (Municipal Assessment and Taxation. Optional Exemptions and exclusions. Section (a) states: "Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election."), and amends AS 29.53.020(g) (relating to reimbursement of borough or city for revenue lost by exemption) by deletion of language stating that upon proper application an individual would have been granted an exemption. Provides Act takes effect January 1, 1981.

Introduced February 18 and referred to Community and Regional Affairs, then to Finance.

Municipal Property Tax (exempting business inventory)

SENATE BILL NO. 510, by the Rules Committee by Request (for the Interim Tax Policy Committee). Exempts business inventory from municipal property tax levy and provides for reimbursement to municipalities of tax revenues lost by operation of the exemption. Reimbursement made on the basis of the application of the tax rate of the borough or city to the value of business inventory reported to the state by businesses for the purpose of taxation under the Alaska Net Income Tax Act, and subject to legislative appropriation to the Department of Community and Regional Affairs for the purpose. State Departments may adopt regulations to carry out the provisions of chapter. Repeals sections of Municipal Assessment and Taxation (AS 29.53) relating to assessment of business inventory and reassessment in the case of cessation of business during the tax year. Provides Act takes effect January 1, 1980.

Introduced March 5 and referred to Community and Regional Affairs, then to Finance.

Betty Warren, Chairman
Governor's Committee on Aging
Box 116
Kenai, Alaska 99611

Dear Betty:

Enclosed are copies of letters I recently sent to Dave Walsh, President of the Alaska Municipal League, and to Governor Jay Hammond regarding tax exemptions from the municipal property tax. It seems to me that your Committee on Aging would have interest in taking a good look at the issue raised in my letters, particularly as they relate to older Alaskans.

With the pending change before the legislature, regarding the continuat tion of your Committee on Aging and the possible Older Alaskans Commission, I wanted to be sure to touch all bases. If you feel the issues raised have merit for consideration by your committee, I would be very delighted to have whatever follow-up information you might develop. You might wish to contact Dave Walsh to give input to the work that the Municipal League will be doing over the next year.

Thank you for your consideration of this material, and I do look forward to hearing from you.

Kindest personal regards,

Arliss Sturgulewski

April 2, 1980

Jay S. Hammond, Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Jay:

Re: Senior Citizens Tax Exemption from Municipal Property Tax

The legislature has under consideration, SB 328, which would establish an Older Alaskans Commission. In the event this legislation is adopted, I would like to bring to them, through you, a matter for their review and, hopefully, recommendations to the next session of the legislature. I am bringing this matter to the attention of your Advisory Committee on Aging.

The Senate Regional and Community Affairs Committee has had over twelve bills pending which impact the municipal property tax by allowing certain classes of exemptions, imposing restrictions, etc. Some, but not all, of these bills allow the municipalities to be reimbursed for the changes in their ability to levy and collect real and personal property taxes. Since real and property taxes create such a major corner stone of tax revenue source for municipalities, I have asked the Alaska Municipal League to look into the matter of establishing policies regarding possible exemptions. We will create a hodgepodge of a program in the absence of such policy. Dave Walsh, Chairman of the Alaska Municipal League, has indicated to me that the League will undertake such a study. However, I feel it would be important that a commission, dealing particularly with older Alaskans' needs, undertake a study of that part of the real and personal property tax which deals with older Alaskans.

The state has recognized certain senior citizens' exemptions as a matter of public policy. These exemptions support a policy of encouraging age diversity in Alaskan society, they show esteem for and gratitude to the pioneers of the state, and give a method of helping many to afford to stay in the state, rather than to leave family and friends to begin a life in another state where it might be cheaper to live. The senior citizens who are on a fixed income and cannot absorb property taxes increased by inflation certainly are in need of assistance. However, some bills are now reaching into special groups within the senior citizens; for example, allowing for surviving spouses 55 and older of those citizens who qualified for real property exemption to continue to benefit from the exemption. But, what about other senior citizens with the

same age group who might have just as much, or a greater need for exemptions?

Disabled veterans are another group being suggested for special exemptions, but what about the equity question of all other disabled people in our state? Other questions of equity need to be considered. Each piece of proposed legislation that we have considered offers a shift in public policy. New groups which deserve special treatment, new funding approaches, etc. However, sound public policy decisions can be made only within the context of effects or impacts on the general public, and certainly on local governments.

The Department of Community and Regional Affairs recently completed a study of the exemption problem. Their study gives a synopsis of information developed that deals with major exemption problems, and in some cases, suggests several options that might be taken. Their broad policy statement favors few, if any, additional exemptions, and they feel that any exemption program should meet the following criteria: "any exemption granted should be either for public property or for sufficient public good to justify a transfer of burden to the balance of the community." They recognize that the credibility of property tax has been questioned continually and with increasing intensity these past few years, and that many taxpayers feel that they are paying more than their fair share.

Again, I think the matter of senior citizens exemptions merits consideration by the Older Alaskans Commission. If such a commission is established by the legislature I would appreciate it if you would approach them on this subject.

Sincerely,

Arliss Sturgulewski

Optional Residential Exemptions

By: Terry L. Earley
State Assessor

AS 29.53.025 "Optional exemptions and exclusions. (a) Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election. An exclusion or exemption authorized by this section may not exceed $10,000 for any one residence."

The second sentence was added by the Legislature in 1973 and took effect January 1, 1974. Prior to that time there was no limit.

Currently there are four municipalities who have opted for this exemption. They are the North Slope Borough, Kenai Peninsula Borough, Fairbanks North Star Borough, and the City of Valdez.

It is very apparent that only those municipalities with relatively high natural resource wealth have opted for this exemption. It seems a reasonable assumption that if the $10,000 limit were raised that only the above mentioned municipalities would take advantage of it.

The following paragraphs outline the expected effect if the $10,000 limit were increased.

The North Slope Borough would implement the exemption to the maximum extent possible as soon as possible. Due to the limits on taxation placed by AS 29.53.045 and AS 29.53.050 the additional exemptions would result in no loss in revenue to the borough. The limitation option currently selected by the North Slope Borough allows them to levy taxes on a value of $966,973,385 (225%; times an average per capita value statewide of 53,354; times a population of 8055). Under the current procedures this value consists of 5.75% locally assessed property and 94.25% state assessed oil and gas property. If the Optional Residential Exemption limit were raised the allowable value would remain the same. The percentage of locally assessed would decrease and the state assessed would increase. For every one thousand dollars the limit was raised the net loss to the State General Fund would be $15,320.

The Kenai Peninsula Borough would also opt for any increase allowable to the maximum extent allowed. There was an advisory vote on the question of raising the exemption to $50,000 two years ago. The voters in Kenai indicated a strong desire to have the limit increased to $50,000.

The anticipated fiscal effect in this case would be a direct reduction of operating revenues to all the municipalities in the Kenai Peninsula Borough. A probable result of that reduction would be a millage increase. This millage increase would partially negate the increase in exemption. A millage increase would be a direct tax increase to non-residential property. Over 60% of the value in Kenai is non-residential property and 21% is state assessed oil and gas property. Due to the fact that the state levies 20 mills minus the local levy the state would also lose revenue in the Kenai Peninsula Borough. For every one mill increase State General Fund revenue would be decreased by $44,462.

The Fairbanks North Star Borough would probably not opt for an increase in the residential exemption at this time.

The City of Valdez would implement the exemption to the fullest extent possible. Valdez is in nearly the same situation as North Slope. Implementation of an increased residential exemption would result in a revenue loss to the state of $6,028 for every additional 1,000 dollars that the exemption limit is raised.

Combining the possible revenue losses in all of these municipalities results in approximately $32,500 in total State General Fund revenue lost for every $1,000 the limit is increased. That is by no means a large or significant impact. It does however, only benefit a very select group of municipalities and residents thereof.

It would seem to make more sense to grant property tax relief in a form that would benefit the population in general.

During the 1978 session there were two separate bills that addressed the residential exemption question.

House Bill No. 103, sponsored by Representative Randolph and currently referred to the House Finance Committee, seeks to increase the amount optionally exemptable to $50,000.

House Bill No. 314, sponsored by Representative Malone and currently in the House Community and Regional Affairs Committee, seeks to optionally allow either the residential exemption up to $50,000 or a personal property exemption up to $10,000.

In order to make this type of tax relief available to the majority of the residents of the state it would be necessary to attach a reimbursement (by the state) to the municipalities which neither of the above mentioned bills does. This would be the only way the majority of municipalities could afford this exemption. Although relatively expensive this would be one method of property tax relief that would benefit nearly all the residents of the state.

The most progressive form of property tax relief is an approach called a "circuit breaker". This type of reform prevents property taxes from becoming disproportionate to a person's income.

I have attached some comments prepared by this office concerning the proposed $50,000 limit and a copy of a paper entitled "An Examination of Property Tax Exemptions", that was prepared at the request of the House Community and Regional Affairs Committee.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill allows municipalities the option to either, 1) allow a $50,000 residential property exemption (current statute allows $10,000 residential property exemption) or, 2) allow a $10,000 personal property exemption. Currently, AS 29.53.025(d) permits municipalities now exempting personal property to continue to do so, this bill will not affect this option.

The fiscal note for HB 103 (HB 103 increases the $10,000 residential property exemption to $50,000) estimates a loss of $850,000 in state oil and gas tax revenues.

Due to the municipal options available in this bill, a meaningful estimate of the reduction in state oil and gas tax revenues cannot be provided.

(Continued on following page)

IV. DATE March 16, 1979 PREPARED BY Terry L. Earley, State Assessor
AGENCY Department of Community & Regional Affairs
PHONE 465-4730

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 10/78)

Analysis (Continued from previous page)

However, state oil and gas revenues could be reduced in two ways. The first revenue reduction would be in those municipalities currently limited by statutory property tax limits due to local oil and gas tax revenues. If, due to the exemptions contained in this bill, these municipalities choose to reduce local tax revenues, the same municipalities could increase local oil and gas revenues in proportion to the local decrease. This has the effect of reducing state oil and gas revenue.

The second revenue reduction would come from municipalities that choose to increase local mill rates to offset revenue losses generated by the optional exemptions allowed by this bill. Should the local tax base include oil and gas tax revenues, the effect would be to increase the local share, and to decrease the state share, of oil and gas tax revenues.

C&RA hearing on HB 314

Hugh Malone, bill sponsor	Mr. Malone was questioned as to the amount of tax base in the Kenai borough related to the oil industry. He stated that approx. 50% was not oil related. He added that the statewide property tax extends to oil, exploration and transportation but does not extend to refining. The bill would not affect the amount of revenue the state receives.
Charlie Parr	Mr. Parr wanted to know how much of the 1.8 billion tax base (Kenai borough, referred to information supplied by Malone's office) is affected by 20 mill statewide property tax.
Arness assessor(?) for Kenai Borough	400 million is affected by 20 mill property tax.
Malone	If the present tax exemption ($50,000 proposed in 314) were applied, Malone said there would probably be a loss of revenue of one-half million dollars. He added that an increase in the millage rate would make it a 20-25% loss.
Branson	Mrs. Branson noted some would not pay property tax at all.
Malone	Mr. Malone stated the exemption could be extended to all real and personal property; "A soak the rich approach, but that's basically what all property tax does."
Parr	Mr. Parr wondered where the initial $10,000 exemption came from. He said that property values have gone up tremendously (since the exemption first went into effect) and could see the justification for wanting to raise it, but questioned the $50,000 figure.

Branson	Mrs. Branson wanted to know if it wouldn't make more sense to lower the assessment of property.
Malone	Malone said no, that that action would affect the millage rate. He added that the original aim of the bill was to provide a degree of tax relief on residential property, and that there was merit in having the assessor appraise the property at market value.
	Malone said he agreed that (314) wasn't a comprehensive reform of the property tax system, in that it didn't get at the basic question of equity across the state. He siad it was designed to provide a little break for people. "To be plain, I don't think comprehensive legislation will pass this session. (314) doesn't make a bad situation that much better, but it does make it a little better. That's as much as I can say about the bill."
O'Connell	Mr. O'Connell asked what the rationale was for not enlarging the range of the bill, extanding beyond residential property.
Malone	Mr. Malone didn't have objections of the extension, but he didn't plan to add to the 1973 law change.
Parr	Mr. Parr requested an estimate of the increase in assessed valuation statewide since the $10,000 limit was put in statewide.
Metcalfe	Mr. Metcalfe also wanted C&RA to find what affect the legislation would have on owners of $50,000, 100,000 and $150,000 homes.

Optional Residential
Exemptions

By: Terry L. Earley
State Assessor

Reference is made to the memorandum to you dated December 24, regarding a $60,000 optional residential exemption. It has come to my attention that there was a mistake made in the statewide cost of such a program.

On the last page of that memorandum, under line item "Total Revenue Loss", there should have been a deduction for non-residential properties. If this deduction had been correctly made, the final analysis of "Statewide Cost Per $1,000 of Exemption" would have been $1,627,5 . This figure coincides with the one used in preparing the fiscal analysis for S.B. 296, (mandatory $25,000 residential exemption with state reimbursement).

I am sorry for any inconvenience this oversight on our part may have caused you.

Dear Mr. Hurlbert:

The purpose of this letter is to provide information you requested on House Bill 331 and the need for comprehensive planning in the City of McGrath.

McGrath has been growing fairly rapidly (at an average of about 4% a year) since 1970. Present population is estimated at 328; the city's population was 279 in 1970. The community's strategic location on the upper Kuskokwim River has been largely responsible for its development into a regional center for transportation, education and related services. As you are well aware, there have been considerable mineral and other resource exploration and development activities in the surrounding area. An FAA station and a BLM facility are located within the community and the U.S. Fish and Wildlife Service is considering McGrath as headquarters site for the proposed Innoko Wildlife Refuge. A HUD/BIA housing project is nearly completed.

This development has highlighted a variety of issues that should be addressed in a rational and comprehensive manner. A long-range comprehensive plan is needed to deal with the issues of: municipal land reconveyances for community expansion under Section 14(c)(3) of the Alaska Native Claims Settlement Act; housing; utilities; land use; and economic development. The plan is needed in order to establish a firm basis and continuing process for guiding development in McGrath.

By means of a $12,600 planning contract ($8,400 federal grant and $4,200 local contribution) administered through the Community Planning Division in our Department, the city has begun work on several elements of a comprehensive plan. Elements which will be completed by June 30, 1979, the expiration date for the grant, include: (1) the development of base maps; (2) a survey of residents concerning their opinions about goals and objectives for the community; and (3) a housing inventory. Additional funding of $30,000 to $40,000 will be necessary to complete the comprehensive plan. The community, with our assistance and encouragement,

has applied for an $18,000 planning grant from the Farmers Home Administration. At the present time, it is uncertain whether the Farmers Home Administration will award McGrath the planning grant it has requested. In conclusion, House Bill 331 would assure McGrath of the additional funding it needs to complete work already under way on its comprehensive plan.

We hope this information is useful to you; if you require further clarification, please feel free to contact us and we will assist as much as we are able.

Sincerely,

Lee McAnerney

WITNESSES TESTIFYING:

Ginney Chitwood, Municipal League

Favors giving option of going with 40% majority. Other bills would have repealed 40% requirement altogether. What is 40%--how is it determined? This is addressed in HB 341. Low voter turnout is a key feature of the runoff elections. Therunoff rarely changes the outcome of the original election. There is an overshadowing of state and federal campaigning when a runoff is being held. Anchorage would not be affected by this as their charter requires a runoff.

Parker suggests deleting ("unless Council or Assembly provides otherwise by ordinance")

Branson thinks that the mayor should have to be elected with the 40% support.

Chitwood- Individual municipalities could deal with this point. Initiative and referendum powers are protection for the public on this point.

O'Connell sees a certain threat to the integity of an election which is based on the fact that everyone had a chance to vote and the majority elects.

It is decided that the option is acceptable if the opt-out ordinance is ratified by the public through the ordinance process. CS incorporating this concept is passed out of committee.

COMMITTEE ACTION: CS passed out by Committee.

Re: HB342 & HB900

Ms. Lisa Rudd, Chair
Committee on Community &
Regional Affairs
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Ms. Rudd:

Subject: Recordation of Property Splits Not Approved by Platting Authority

This is a follow up to Marilyn Miller's contact with you concerning the need for legislation to carry out the position of the Alaska Municipal League that proof of approval by the local platting authority should be required prior to the biling of an instrument affecting the boundaries of land.

A serious problem has arisen because Statutes do not prohibit the recording of property splits which have not been approved.

AS 29.33.190(b) provides as follows: "No person may record a plat or seek to have a plat recorded unless it bears the approval of the platting board. A person who knowingly violates this requirement is punishable upon conviction by a fine of not more than $500." This Borough is not anxious to prosecute persons who knowingly or unknowingly violate the State Statutes requiring platting authority approval of property splits. More importantly, such prosecution does not resolve the multitude of problems which stem from such recordation. Here's an example of what happens:

The owner of a 20 acre tract describes by aliquot parts 5 acres of the 20 acres and sells the 5 acres. The 5 acres may or may not be physically accessible or legally accessible.

A subsequent owner wants to split the 5 acres into 1 acre parcels. He cannot do so because the 5 acre parcel is illegally created and not recognized by the Platting Board. The new owner then has to retrace the proper platting procedure (or get a waiver of platting requirements under AS 29.33.170). It may or may not be possible for the original 5 acre split to be done in conformance with platting requirements.

A big hassle results.

Sec. 40.10.030. Certificate in form required for acknowledgment inside state. A certificate of acknowledgment of a deed or other instrument acknowledged outside the United States before any officer mentioned in § 10 of this chapter shall be valid if in the same form as now is or hereafter may be required by law for an acknowledgment within the state. (§ 23-2-3 ACLA 1949)

Sec. 40.10.040. Construction of chapter. This chapter shall be interpreted and construed as to effect its general purpose to make uniform the laws of those states and territories which enact it. (§ 23-2-4 ACLA 1949)

Sec. 40.10.050. Short title. This chapter may be cited as the Uniform Foreign Acknowledgment Act. (§ 23-2-5 ACLA 1949)

Chapter 15. Subdivisions and Dedications.

Article
1. Recording of Plats (§§ 40.15.010—40.15.060)
2. Control of Plats, Subdivisions and Dedications (§§ 40.15.070—40.15.130)
3. Vacation and Change of Plats and Streets (§§ 40.15.140—40.15.180)
4. General Provisions (§ 40.15.190)

Article 1. Recording of Plats.

Section
10. Approval and recording of subdivisions
20. Plats to be acknowledged and contain certificate that taxes and assessments are paid
30. Dedication of streets, alleys and thoroughfares
40. Certified copy of plat is evidence
50. Recorded plats legalized
60. Missing plats

Sec. 40.15.010. Approval and recording of subdivisions. Before the lots or tracts of any subdivision or dedication may be sold or offered for sale, the subdivision or dedication shall be submitted for approval to the authority having jurisdiction, as prescribed in this chapter. The regular approval of the authority shall be shown on it or attached to it and the subdivision or dedication shall be filed for record in the office of the recorder. The recorder shall not accept a subdivision or dedication for filing unless it shows this approval. If no platting authority exists as provided in §§ 70—130 of this chapter, lands may be sold without approval. (§ 1 (ch I) ch 115 SLA 1953; am § 1 ch 95 SLA 1955; am § 67 ch 69 SLA 1970)

Cross reference. — For sections dealing with inspection of public records and their use as evidence, see AS 09.25.110 and AS 09.25.120.

Effect of amendment. — The 1970 amendment deleted "platting board or" preceding "platting authority" in the last sentence.

Legislative committee report. — For report on ch. 69, SLA 1970 (HB 564), see 1970 House Journal Supplement No. 2, p. 7.

Approved plat must be filed for recording. — This section and AS 40.15.020 are sufficient authority to require the recorder to file for recording a plat when properly approved. Tullinen v.

Malone's suggested amendments (3/28/79 Hearing)

* Jan. 1, 1980 should be the effective date. This would give people an opportunity to know what is happening and to be aware that there would be a new method of enforcement of land exchanges.

* Transitional language should grandfather in existing subdivisions.

* Delete lines 20-21 of p. 1. It should read:
"The recorder may not accept a deed or contract of sale unless it exhibits evidence of subdivision approval given by the municipality , or by a certified waiver of the requirement of the plat approval under AS 29.33.170"

Rep. Carney's suggested amendment to the bill:

Sec. 29.33.170 (2) eliminate "and that the land is divided into four or fewer parcels;"(See attached statutes)

Dear Representatives:

I have just become aware of House Bill number 342, "An Act relating to approval and recording of subdivisions;". I strongly disapprove of the propcsed amendments to the act and urge that you do everything within your power to defeat the act.

As most of you know, I have nearly thirty years experience as a title examiner for title companies both in the State of Oregon and Alaska, I have practiced law in the State of Alaska since 1970 and I am now presently a member of the Fairbanks North Star Borough Planning and Zoning Commission. I consider the act not only inherently unworkable, but it also imposes an impossible burden on the recorders office. Furthermore I consider the proposed amendment completely reprehensible with respect to a free people's right to own and deal with their real estate.

It is my observation since being a member of the Planning and Zoning commission that the present provisions for subdividing, and/or waiving of subdivision regulations is being observed by the landowners of this area. However, I am certainly not in favor of the bureaucracy imposing itself to a greater degree by further restricting the private right of landowners to freely exchange and sell their real estate. Nor do I consider that the collective wisdom of an appointed bureaucracy can, or should, replace the wisdom of the individual property owners.

I have long been critical of many of the provisions of the present Subdivision Act. Particularly am I critical of the present definition of a subdivision. It is overly simplified and inartfully drafted; therefore, it is overly restrictive in its application. It is my opinion the legislature could well propose a more artful definition of a subdivision which would relieve much of the onerous burden from land owners, as well as relieving some of the more time consuming aspects of its administration by the planning and zoning commission.

Very truly yours,

Doris Loennig

DATE: April 3, 1979

FILE NO. 1979 Legislature - HB 342

SUBJECT: Proposed committee substitute for HB 342

Bill Parker, Chairman
House Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Parker,

I understand your committee is considering a possible committee substitute for House Bill 342 which deals with the approval and recording of subdivisions. The proposed committee substitute would delete the present language in the bill which deals with the requirement for an affidavit of the grantor or maker and would substitute for that requirement the requirement that the deed or contract merely exhibit evidence of subdivison approval. This approach, unfortunately, will not accomplish what was originally aimed at in the bill as introduced. It was the purpose of the bill as drafted to require the grantor to make an affirmative statement, under oath, that the instrument to be recorded did not have the effect of subdividing land unless the instrument contained the approval of the local platting authority. This would force the grantor or maker of the instrument to focus his or her attention on the requirement that no subdivison be created without local platting approval. It would also permit criminal sanctions to be taken against the person who makes a false statement in such an affidavit.

Under the language in the proposed committee substitute, neither of these effects would be obtained. A person owning a lot in an approved subdivision could create an unlawful subdivision and never be aware of it nor make any false affidavit. For example, if a person owns lot 7, block A of the Riverdale Subdivision, he or she could create an unlawful subdivision by conveying an unsubdivided part of that lot as follows:

> The northern one-half of lot 7, block B of the Riverdale Subdivision as shown on Plat No. 76-24, recorded on June 14, 1976 in the Juneau Recording District, First Judicial District, Juneau, Alaska.

The foregoing description would meet the requirements of the proposed committee substitute and is probably the way such a

conveyance would be described. Note that it contains ample evidence of subdivision approval, even though the unlawful subdivision created by this description is not approved. There is no way for the recording clerk to determine whether the instrument creates an unlawful subdivision and the instrument would be recordable.

Also, there are many subdivisions which occurred prior to the requirement for plat approval. These older subdivisions have been validated by statute and by ordinance and are lawful. Under the proposed language, however, a conveyance of such property could not be made inasmuch as it would not be possible to exhibit evidence of subdivision approval given by the municipality.

I urge you to pass out House Bill 342 as introduced as the language in the committee substitute appears to provide no more protection than already exists in the present statute.

Very truly yours,

Gerald L. Sharp
City-Borough Attorney

Dear Sir:

The enclosed information was sent to Richard Winchell, Deputy Director, Division of General Services and Supply, Department of Administration, last year when HB 900 was introduced.

Since HB 342 is virtually the same, this information is to inform you of the impact of this bill on the Recorder's Office as well as the honest Alaskan citizenry.

Sincerely,

Javan M. Beitinger

Anchorage

HB 900

HB 900 has been introduced to amend A.S. 40.15.010.

The addition of the words "or conveyed" and "a plat of" are desirable.

However, the addition of the penultimate sentence in the section is without merit. This would place a burden on the approximate 40,000 deeds to be recorded annually, of which a minute fraction may be conveyances of illegal subdivisions. The requirement would apply to obviously legal subdivisions. It would increase the work of the Recording Section by the addition of another requirement to be reviewed before accepting a document. If the approval, affidavit, or certificate necessitates another piece of paper, then it too must be recorded, indexed, microfilmed, etc. and the grantee must pay $2 more for the service.

A.S. 29.33.190 already provides a $500 penalty for selling land in an unapproved subdivision and the platting board ". . . may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action. . .". The political subdivisions get copies of every recorded conveyance and can easily determine if an illegal subdivision has been established. They can take legal action against the few offending parties.

What does the affidavit provide? The law already says that you shall not sell illegally subdivided land and provides a penalty. Does the affidavit add perjury to the offense? If the political subdivisions are not willing to enforce the existing statutes, what good will more laws be? Why should all of the legal deeds and honest people be burdened because the platting boards won't prosecute the offenders?

It is not mandatory that a conveyance be recorded (A.S. 34.15.290) so it would still be the platting board's responsibility to act.

Deeds are not filed, they are recorded. (Filing applies to documents held by the Recorder. Recording applies to documents which are indexed, copied and returned to their owners.)

Last, and very important, the District Recorders should not be used as enforcement agencies when the purpose of the recording function is to be a place of public record.

WE DIDN'T RECEIVE ANY TWX REGARDING NOME, BETHEL OR HB900.

MY ORIGINAL ESTIMATE OF COST OF HB900 DIDN'T CONSIDER THE DIFFICUTLY OF APPORTIONING PARTS OF EMPLOYEES. BASED ON STATEWIDE COSTS THE $32,000 WOULD BE 100, $25,800; 300, $4,800 AND 400, $1,400. HOWEVER, THIS MEANS ONE EMPLOYEE MORE FOR ANCHORAGE, ONE-HALF FOR FAIRBANKS AND ONE-QUARTER FOR PALMER, ALL RANGE 8. I WOULD LIKE TO AMEND COST ESTIMATE FOR 100 TO $32,200 MAKING TOTAL COST $38,300. THIS IS BASED ON 20,000 ADDITIONAL DOCUMENTS WHICH IS ONLY A GUESS.

board. The board shall state on its record and in writing to the applicant its reason for disapproval of a plat.

(b) The platting board shall submit an approved plat to the district recorder in compliance with AS 40.15.010—40.15.020. (§ 2 ch 118 SLA 1972)

Sec. 29.33.170. Waiver in certain cases. (a) The platting authority shall, in individual cases, waive the preparation, submission for approval, and recording of a plat upon satisfactory evidence that

(1) each tract or parcel of land will have adequate access to a public highway or street;

(2) each parcel created is five acres in size or larger and that the land is divided into four or fewer parcels;

(3) the conveyance is not made for the purpose of, or in connection with, a present or projected subdivision development;

(4) no dedication of a street, alley, thoroughfare or other public area is involved or required.

(b) In other cases the platting authority may waive the preparation, submission for approval, and recording of a plat, if the transaction involved does not fall within the general intent of §§ 29.33.150—29.33.240 of this chapter and AS 40.15 if it is not made for the purpose of, or in connection with, a present or projected subdivision development and no dedication of a street, alley, thoroughfare, park or other public area is involved or required. (§ 2 ch 118 SLA 1972)

Sec. 29.33.180. Information required. A plat shall show initial point of survey, original or reestablished corners and their descriptions, and actual traverse showing area of closure and all distances, angles and calculations required to determine initial point, corners and distances of the plat, as well as other information which may be required by ordinance. (§ 2 ch 118 SLA 1972)

Sec. 29.33.190. Penalties. (a) The owner or agent of the owner of land located within a subdivision who transfers, sells, or enters into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and recorded, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500 for each lot or parcel transferred, sold, or included in a contract to be sold. The platting board may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action.

(b) No person may record a plat or seek to have a plat recorded unless it bears the approval of the platting board. A person who knowingly violates this requirement is punishable upon conviction by a fine of not more than $500 (§ 2 ch 118 SLA 1972)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to approval and recording of subdivisions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 40.15.010 is amended to read:

Sec. 40.15.010. APPROVAL AND RECORDING OF SUBDIVISIONS. Before the lots or tracts of any subdivision or dedication may be sold, [OR] offered for sale, or conveyed, the subdivision or dedication shall be submitted for approval to the authority having jurisdiction, as prescribed in this chapter. The regular approval of the authority shall be shown on it or attached to it and the subdivision or dedication shall be filed for record in the office of the recorder. The recorder may [SHALL] not accept a plat of a subdivision or dedication for filing unless it shows this approval. The recorder may not accept a deed or contract of sale unless it is accompanied by this approval, or unless the deed or contract of sale exhibits a recorder's file number, a plat approval number, or other evidence of subdivision approval given by the municipality, or by a certified waiver of the requirement of plat approval under AS 29.33.170. If no platting authority exists as provided in AS 40.15.070 - 40.15.075, lands may be sold without approval.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Re: HB342 fld
HB900

Ms. Lisa Rudd, Chair
Committee on Community &
Regional Affairs
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Ms. Rudd:

Subject: Recordation of Property Splits Not Approved by Platting Authority

This is a follow up to Marilyn Miller's contact with you concerning the need for legislation to carry out the position of the Alaska Municipal League that proof of approval by the local platting authority should be required prior to the biling of an instrument affecting the boundaries of land.

A serious problem has arisen because Statutes do not prohibit the recording of property splits which have not been approved.

AS 29.33.190(b) provides as follows: "No person may record a plat or seek to have a plat recorded unless it bears the approval of the platting board. A person who knowingly violates this requirement is punishable upon conviction by a fine of not more than $500." This Borough is not anxious to prosecute persons who knowingly or unknowingly violate the State Statutes requiring platting authority approval of property splits. More importantly, such prosecution does not resolve the multitude of problems which stem from such recordation. Here's an example of what happens:

The owner of a 20 acre tract describes by aliquot parts 5 acres of the 20 acres and sells the 5 acres. The 5 acres may or may not be physically accessible or legally accessible.

A subsequent owner wants to split the 5 acres into 1 acre parcels. He cannot do so because the 5 acre parcel is illegally created and not recognized by the Platting Board. The new owner then has to retrace the proper platting procedure (or get a waiver of platting requirements under AS 29.33.170). It may or may not be possible for the original 5 acre split to be done in conformance with platting requirements.

A big hassle results.

The grantee suffers. An extraordinary amount of staff time is required to clean up the mess. The grantor who violated the platting requirements has long since sold the other 15 acres and flown to Hawaii. He does not suffer. The platting statutes are circumvented.

The proposed legislation would provide an effective means of getting compliance to Statutes which require platting authority approval of all property splits. We do not now have an effective means.

I hope you will see fit to get such legislation introduced so that Boroughs can more effectively carry out their platting mandate.

Very truly yours,

Wesley M. Howe
Borough Manager

WMH:er

cc: Alaska Municipal League

Malone's suggested amendments (3/28/79 Hearing)

* Jan. 1, 1980 should be the effective date. This would give people an opportunity to know what is happening and to be aware that there would be a new method of enforcement of land exchanges.

* Transitional language should grandfather in existing subdivisions.

* Delete lines 20-21 of p. 1. It should read:
"The recorder may not accept a deed or contract of sale unless it exhibits evidence of subdivision approval given by the municipality , or by a certified waiver of the requirement of the plat approval under AS 29.33.170"

Rep. Carney's suggested amendment to the bill:

Sec. 29.33.170 (2) eliminate "and that the land is divided into four or fewer parcels;" (See attached statutes)

Sec. 40.10.030. Certificate in form required for acknowledgment inside state. A certificate of acknowledgment of a deed or other instrument acknowledged outside the United States before any officer mentioned in § 10 of this chapter shall be valid if in the same form as now is or hereafter may be required by law for an acknowledgment within the state. (§ 23-2-3 ACLA 1949)

Sec. 40.10.040. Construction of chapter. This chapter shall be interpreted and construed as to effect its general purpose to make uniform the laws of those states and territories which enact it. (§ 23-2-4 ACLA 1949)

Sec. 40.10.050. Short title. This chapter may be cited as the Uniform Foreign Acknowledgment Act. (§ 23-2-5 ACLA 1949)

Chapter 15. Subdivisions and Dedications.

Article
1. Recording of Plats (§§ 40.15.010—40.15.060)
2. Control of Plats, Subdivisions and Dedications (§§ 40.15.070—40.15.130)
3. Vacation and Change of Plats and Streets (§§ 40.15.140—40.15.180)
4. General Provisions (§ 40.15.190)

Article 1. Recording of Plats.

Section
10. Approval and recording of subdivisions
20. Plats to be acknowledged and contain certificate that taxes and assessments are paid
30. Dedication of streets, alleys and thoroughfares
40. Certified copy of plat is evidence
50. Recorded plats legalized
60. Missing plats

Sec. 40.15.010. Approval and recording of subdivisions. Before the lots or tracts of any subdivision or dedication may be sold or offered for sale, the subdivision or dedication shall be submitted for approval to the authority having jurisdiction, as prescribed in this chapter. The regular approval of the authority shall be shown on it or attached to it and the subdivision or dedication shall be filed for record in the office of the recorder. The recorder shall not accept a subdivision or dedication for filing unless it shows this approval. If no platting authority exists as provided in §§ 70—130 of this chapter, lands may be sold without approval. (§ 1 (ch I) ch 15 SLA 1953; am § 1 ch 95 SLA 1955; am § 67 ch 69 SLA 1970)

Cross reference. — For sections dealing with inspection of public records and their use as evidence, see AS 09.25.110 and AS 09.25.120.

Effect of amendment. — The 1970 amendment deleted "platting board or" preceding "platting authority" in the last sentence.

Legislative committee report. — For report on ch. 69, SLA 1970 (HB 564), see 1970 House Journal Supplement No. 2, p. 7.

Approved plat must be filed for recording. — This section and AS 40.15.020 are sufficient authority to require the recorder to file for recording a plat when properly approved. Tullinen v.

Sec. 40.10.030. Certificate in form required for acknowledgment inside state. A certificate of acknowledgment of a deed or other instrument acknowledged outside the United States before any officer mentioned in § 10 of this chapter shall be valid if in the same form as now is or hereafter may be required by law for an acknowledgment within the state. (§ 23-2-3 ACLA 1949)

Sec. 40.10.040. Construction of chapter. This chapter shall be interpreted and construed as to effect its general purpose to make uniform the laws of those states and territories which enact it. (§ 23-2-4 ACLA 1949)

Sec. 40.10.050. Short title. This chapter may be cited as the Uniform Foreign Acknowledgment Act. (§ 23-2-5 ACLA 1949)

Chapter 15. Subdivisions and Dedications.

Article
1. Recording of Plats (§§ 40.15.010—40.15.060)
2. Control of Plats, Subdivisions and Dedications (§§ 40.15.070—40.15.130)
3. Vacation and Change of Plats and Streets (§§ 40.15.140—40.15.180)
4. General Provisions (§ 40.15.190)

Article 1. Recording of Plats.

Section
10. Approval and recording of subdivisions
20. Plats to be acknowledged and contain certificate that taxes and assessments are paid
30. Dedication of streets, alleys and thoroughfares
40. Certified copy of plat is evidence
50. Recorded plats legalized
60. Missing plats

Sec. 40.15.010. Approval and recording of subdivisions. Before the lots or tracts of any subdivision or dedication may be sold or offered for sale, the subdivision or dedication shall be submitted for approval to the authority having jurisdiction, as prescribed in this chapter. The regular approval of the authority shall be shown on it or attached to it and the subdivision or dedication shall be filed for record in the office of the recorder. The recorder shall not accept a subdivision or dedication for filing unless it shows this approval. If no platting authority exists as provided in §§ 70—130 of this chapter, lands may be sold without approval. (§ 1 (ch I) ch 115 SLA 1953; am § 1 ch 95 SLA 1955; am § 67 ch 69 SLA 1970)

Cross reference. — For sections dealing with inspection of public records and their use as evidence, see AS 09.25.110 and AS 09.25.120.

Effect of amendment. — The 1970 amendment deleted "platting board or" preceding "platting authority" in the last sentence.

Legislative committee report. — For report on ch. 69, SLA 1970 (HB 564), see 1970 House Journal Supplement No. 2, p. 7.

Approved plat must be filed for recording. — This section and AS 40.15.020 are sufficient authority to require the recorder to file for recording a plat when properly approved. Tullinen v.

Richard Bradley, Director of Division of General Services, Dept. of Admin.
Bev Mueller, Recorder

The administration is opposed to the bill. Enforcement is already provided and it should not be the recorder's office which serves this function.

Parr--Doesn't see listing the circumstances under which recorders may or may not record as enforcement.

Ginny Chitwood - Municipal League

Doesn't see this as bringing enforcement into the hands of the recorder's office. Grandfather provisions are already in effect to a certain extent in that existing parcels are grandfathered in when subdivision ordinances are adopted by municipalities.

The basic problem this bill addresses is that land is being exchanged without being recorded.

Hugh Malone - There have been illegal subdivisions created since municipal ordinances were adopted. Those should be dealt with by a grandfathering provision. Otherwise, there will be a cloud on transactions.

Rep. Pat Carney - speaks to his suggested amendment. Sees this as an acceptable redefining of the subdivision definition.

Malone -- Doesn't see bill as essential . Thinks that the administration could handle the problem by regulations.

Carney - Sees that state will be in violation of the 4 parcel division of land waiver when disposing of state lands.

COMMITTEE ACTION: No action. Definition of subdivision might be considered in interim study.

Malone
C&RA

WITNESSES TESTIFYING:

Malone -- The bill aids in better compliance with state laws. Parcels are now created and transferred in violation of local law. Background of problem discussed.

* Jan 1, 1980 should be the effective date. This would give people an opportunity to know what is happening and to be aware that there would be a new method of enforcement of land exchanges.

*Transitional language should grandfather in existing subdivisions.

*Delete lines 20-21 of p. 1. It should read:"The recorder may not accept a deed or contract of sale unless it exhibits evidence of subdivision approval given by the municipality, or by a certified waiver of the requirement of the plat approval under AS 29.33.170."

* Suggested amendments to the bill

Parr- Some subdivisions created in the early 1900's which were not under subdivisions regulations might be sold today. How would this be dealt with. Malone sees this covered under the proposed transitional provision which would grandfather in this type of land.

Metcalfe-- Perhpas a title company, as well as the recorder's office, should be involved. Malone-Title Companies now routinely exempt illegally created lots.
Malone--The procedure should be a simple as possible.

COMMITTEE ACTION:Rep. Carney appointed as sub-committee to study the bill.

TAPE # 5 SIDE 2 Sections 797-1055

Questions related to HB 342

eliminate the reference on p. 1 line 20 re "recorder's file number" (how is it used? Does a recorder always use a file number?

Chenoweth -- The use of the term conveyed, is intended to cover all transactions of real estate which would pass land from one individual to another. Close the door on handing land from one person to another.

Juneau, Alaska 99811

Dear Representative Parker,

I understand your committee is considering a possible committee substitute for House Bill 342 which deals with the approval and recording of subdivisions. The proposed committee substitute would delete the present language in the bill which deals with the requirement for an affidavit of the grantor or maker and would substitute for that requirement the requirement that the deed or contract merely exhibit evidence of subdivison approval. This approach, unfortunately, will not accomplish what was originally aimed at in the bill as introduced. It was the purpose of the bill as drafted to require the grantor to make an affirmative statement, under oath, that the instrument to be recorded did not have the effect of subdividing land unless the instrument contained the approval of the local platting authority. This would force the grantor or maker of the instrument to focus his or her attention on the requirement that no subdivison be created without local platting approval. It would also permit criminal sanctions to be taken against the person who makes a false statement in such an affidavit.

Under the language in the proposed committee substitute, neither of these effects would be obtained. A person owning a lot in an approved subdivision could create an unlawful subdivision and never be aware of it nor make any false affidavit. For example, if a person owns lot 7, block A of the Riverdale Subdivision, he or she could create an unlawful subdivision by conveying an unsubdivided part of that lot as follows:

> The northern one-half of lot 7, block B of the Riverdale Subdivision as shown on Plat No. 76-24, recorded on June 14, 1976 in the Juneau Recording District, First Judicial District, Juneau, Alaska.

The foregoing description would meet the requirements of the proposed committee substitute and is probably the way such a

conveyance would be described. Note that it contains ample evidence of subdivision approval, even though the unlawful subdivision created by this description is not approved. There is no way for the recording clerk to determine whether the instrument creates an unlawful subdivision and the instrument would be recordable.

Also, there are many subdivisions which occurred prior to the requirement for plat approval. These older subdivisions have been validated by statute and by ordinance and are lawful. Under the proposed language, however, a conveyance of such property could not be made inasmuch as it would not be possible to exhibit evidence of subdivision approval given by the municipality.

I urge you to pass out House Bill 342 as introduced as the language in the committee substitute appears to provide no more protection than already exists in the present statute.

Very truly yours,

Gerald L. Sharp
City-Borough Attorney

HB 900

HB 900 has been introduced to amend A.S. 40.15.010.

The addition of the words "or conveyed" and "a plat of" are desirable.

However, the addition of the penultimate sentence in the section is without merit. This would place a burden on the approximate 40,000 deeds to be recorded annually, of which a minute fraction may be conveyances of illegal subdivisions. The requirement would apply to obviously legal subdivisions. It would increase the work of the Recording Section by the addition of another requirement to be reviewed before accepting a document. If the approval, affidavit, or certificate necessitates another piece of paper, then it too must be recorded, indexed, microfilmed, etc. and the grantee must pay $2 more for the service.

A.S. 29.33.190 already provides a $500 penalty for selling land in an unapproved subdivision and the platting board ". . . may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action. . .". The political subdivisions get copies of every recorded conveyance and can easily determine if an illegal subdivision has been established. They can take legal action against the few offending parties.

What does the affidavit provide? The law already says that you shall not sell illegally subdivided land and provides a penalty. Does the affidavit add perjury to the offense? If the political subdivisions are not willing to enforce the existing statutes, what good will more laws be? Why should all of the legal deeds and honest people be burdened because the platting boards won't prosecute the offenders?

It is not mandatory that a conveyance be recorded (A.S. 34.15.290) so it would still be the platting board's responsibility to act.

Deeds are not filed, they are recorded. (Filing applies to documents held by the Recorder. Recording applies to documents which are indexed, copied and returned to their owners.)

Last, and very important, the District Recorders should not be used as enforcement agencies when the purpose of the recording function is to be a place of public record.

Dear Representatives:

I have just become aware of House Bill number 342, "An Act relating to approval and recording of subdivisions;". I strongly disapprove of the proposed amendments to the act and urge that you do everything within your power to defeat the act.

As most of you know, I have nearly thirty years experience as a title examiner for title companies both in the State of Oregon and Alaska, I have practiced law in the State of Alaska since 1970 and I am now presently a member of the Fairbanks North Star Borough Planning and Zoning Commission. I consider the act not only inherently unworkable, but it also imposes an impossible burden on the recorders office. Furthermore I consider the proposed amendment completely reprehensible with respect to a free people's right to own and deal with their real estate.

It is my observation since being a member of the Planning and Zoning commission that the present provisions for subdividing, and/or waiving of subdivision regulations is being observed by the landowners of this area. However, I am certainly not in favor of the bureaucracy imposing itself to a greater degree by further restricting the private right of landowners to freely exchange and sell their real estate. Nor do I consider that the collective wisdom of an appointed bureaucracy can, or should, replace the wisdom of the individual property owners.

I have long been critical of many of the provisions of the present Subdivision Act. Particularly am I critical of the present definition of a subdivision. It is overly simplified and inartfully drafted; therefore, it is overly restrictive in its application. It is my opinion the legislature could well propose a more artful definition of a subdivision which would relieve much of the onerous burden from land owners, as well as relieving some of the more time consuming aspects of its administration by the planning and zoning commission.

Very truly yours,

Doris Loennig

Opposed strongly to the bill. Definition of a "village" is not clear. If 25 adults were living in an area, could they be considered a social unit? Objects to an advisory body being given veto power over an elected body.

Parr questions exactly what lands the bill is supposed to refer to. If is all community grant lands or just Forest Service allotments? If it is just the latter, language should be added which would specify this.

Don Argetsinger and Veronica Clark , Dept. of C&RA
Supports concept of advisory committee. However, it appears that statutory powers are being extended beyond the scopy they should be. There are technical problems with the bill which would make it confusing to implement. Petition process not clear. What number of residents would cause it to be set up? Term "village" is a problem. Perhaps "incorporated and Unincorporated" could be distinction. Assembly should probably have override powers.

Village defination needs work.. It is suggested that this concept be included in the local government interim study.

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Brian Shortell -Public Defender

The proposed law would clarify the stututes. Prior to '75 the municipalities assumed court costs for the defense of criminal cases prosecuted under municipal law. The system of accounting was said to be too cumbersome for the numicipalities. the impact of the trasferral to the state P D. office has been tremendous. The Anchorage P.D. office is in a desparate situation as the P.D. office had been underfunded from the beginning. Survival of Anchorage office depends on something being done to remedy the situation. Statute should be clarified to make clar that the court costs and defense costs are not the same.

1971 -- Alexander vs. City of Anchoarge
1973 - State vs. City of Anchorage
AS 22.15.270 Outlines defense court costs.

Misdemeanors classified as defendable by Public Defender if the penalty involves jail time. A person is entitled to defense if: he could lose a license; jail is a possibility; the fine is heavy enough to connote criminality.

Expenses vary from community to community.. P.D. office was funded for one lawyer and 1 sectretary. Attorneys now have to handle 70-90 cases. If bill passes, Shortell would either contract with the municipalities to perform services or would bill for services performed.

Parr:Parr- Municipal tax payers should pay for enforcement of their own laws. Presecution and defense should be municipal costs.

O'Connell - Definition of indigency is the main problem.

Present law requires that a person make repayment to the state if they are found not be be indigent.

COMMITTEE ACTION:

Passed out of committee.

TAPE # 7 SIDE 2 Sections 1236=1732

Lee Sharp, Attorney City/Borough Juneau

1. Municipalities should be able to define "indigency" for themselves if they are to be responsible for costs.

2. Repayment provision is not currently being enforced by the AG. If it isn't being enforced for the state, the municipalities would not be repaid either.

3.Supreme Court ruled that costs included P.D., jury fees, court room, etc.

4. If the municipality decides the costs are too great, they will ask the state to proscecute. So the state would then be paying for both the defense and the prosecution.

5. There is a danger that the indigent would not get the best possible defense as that state might "paper to death" and the municipalitiy would be in the position of pushing for dismissal to cut costs.

Sharp- The basic problem is the definition of indigency.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Since July 1, 1976 the Public Defender Agency has been charged with the defense of indigents charged with violations of municipal ordinances. Out of necessity, the age has assumed this obligation using existing personnel and resources. For FY 79 two additional positions were authorized in HB 909; one Attorney III for 6 months and one Legal Secretary for 7 months.
Transferring the responsibility for indigent defense to the municipalities is not expected to reduce the case load of the Public Defender Agency, as it is assumed the municipalities would continue to contract with this agency for such services. Any such receipts would be deposited in the general fund.

HB 3

March 12, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III sec. 18, of the Alaska Constitution, I am transmitting a bill transferring to municipalities the cost of providing defense counsel to indigents charged with violation of municipal ordinances.

In the past, the cost of judicial services, including the cost of defending indigent defendants, was borne by the municipality which filed the charges against the person under municipal ordinance. Because it was difficult, if not impossible, for the court system to precisely apportion the cost of judicial services, legislation was passed in 1976 amending AS 22.15.270 to have the state bear those costs. However, the transfer of responsibility for providing defense counsel for indigents charged with violations of municipal ordinances has imposed a substantial burden on the Public Defender Agency. These defense costs, unlike normal court operating costs, are easily identifiable. This bill would transfer back to the municipality bringing the charge against the indigent the responsibility for paying those costs, and thus more fairly allocate the costs to the user of the services.

Sincerely,

S/JSH

Jay S. Hammond
Governor

HB
383

DEVELOPMENT CITIES

See continuation of this #0733 CRA Files 7/1/78

Chapter 22 includes maximum participation by state agencies in ... review, guidance, financial and program assistance, but gives major control to the development city. The development city has all the powers of a regular general law city of its particular class.

There is no clear designation of the responsibilities of the developer, financial or otherwise, except that he must present an approved local hire agreement as a prerequisite to incorporation, and he must show satisfactory contracts for company products to show that the whole project should succeed.

State participation:

1) Council, membership includes Commissioner of DC&RA
Members appointed by Governor and serve at his pleasure.

2) State review of preliminary planning.
(Doesn't say anything about consistency with state regulations, though I suppose that is implied.
Doesn't say anything about the final comprehensive plan.
Doesn't say who will pay for either the preliminary plan or the comprehensive plan. Just says the city shall do it. So, it seems within the city's perrogative to approach the state for at least partial funding.)

3) State review of contracts for sale of company products before city can proceed with capital plans. This seems to be the major limitation on the city.

4) State to participate in local hire agreement with developer
e.g., recruitment, vocational training, relocation assistance...

5) State agencies to look out for funds to help finance city's capital improvement program.

6) Revenue sharing program, state land selection.

Major control and options to City:

1) Time limits provided forall state action, but none designated for city.

2) All provisions of Title 29 apply where consistent with Chapt. 22
Thus city has all the powers and perogatives of a general law city.

3) Council acts as own housing and urban renewal authority.

4) At least 2 council members represent the developer.

Differences from regular cities:

1) Council is 5 members instead of 6 or 7
Appointed by governor - 1 mbr = Commissioner of DC&RA
- 4 public members

2) Exec. Dir. appointed by Council instead of Mayor
Has all powers of executive under Title 29
so he can be manager and mayor

The Development City concept by itself changes the values and practices that have built our free enterprise system.

In the past, the self sufficient family farm has been accepted as the necessary first step to developing an economy in undeveloped land.

The Development Cities Act, on the other hand, allows major developers to control and develop large resources with no concern or participation to the family unit who seeks (now more than ever) the security and satisfaction of being self supporting and controlling their own destiny.

My wife and I on that basis alone object to development cities entirely.

In my presentation this morning, however, I will approach the Act solely from the viewpoint of protecting Alaska interest within the Development City context.

The law in general must separate clearly the city and the developer and their relationship to each other, allowing the city to be an entity in itself, open to the general public and commerce.

29-10-220 LEGISLATIVE FINDING

We now have new information from Afognak City's first attempt. This information has created new questions that are not adequately dealt with under the existing law. It is my opinion that law as it is written is grossly deficient in protecting Alaska's interest and dealing with social and economic needs of our State.

29-18-230 to 29-18-340

This section of the law deals with procedures of the petitioner which must be made to include financial investigation of the petitioners over the previous ten years in order to develop a reasonable assurance that the petitioner has the management experience, stability and capital to execute such an undertaking to a desirable conclusion.

29-18-340 DEVELOPMENT CITY COUNCIL

It is clear that the governor has complete control of the city, with the city council serving at his pleasure. The city council members do not have to be residents during the first five years. A developing city is going to need a city council which is present and public to deal effectively with actual growth and need of a city just getting off the ground. Further, after being appointed, the city council should serve at no one's pleasure other than their public, and all members elected after they have their first forty permanent residents with specific language used to tie down who and who is not a permanent resident.

It is important here to look down the road a bit and realize the power that would be given the governor if, perhaps, ten to fifteen of these cities are being developed and all at the control of one governor, with the possibility of major developers coming

into the State with only one person's consideration. This is clearly not in the public interest.

A city council must live in the development city and be available to the public. The law as it reads now doesn't even say the city council has to be in Alaska. This means that a citizen would be required to pay long distance rates to talk to his appointed rulers.

29-18-380 PROCEDURES

This allows no public participation of any kind. It has been suggested that the meetings be put on public address systems, but this would still severely hamper the needed exchange between the community and its appointed rulers.

29-18-390 DEVELOPMENT OF CITY CAPITAL IMPROVEMENT FUND

This should be clarified to specific purposes and be implemented in stages as required by specific development. For example, the needs for fun in a paper stage will be different from those of implementation.

29-18-400(4)

This section should read "appointed' from the public by the governor, not "nominated by the developer".

20-18-360(2) POWERS AND DUTIES

This section isolates the development city from existing borough planning if one exists. Therefore, there is no recourse for the general geographic area and existing economy to participate in decisions that might affect them, i.e., offshore experimental drilling facility in Afognak Bay, which is a reasonable assumption if Afognak City is there with the dock facility which the Afognak Native Corporation plans to build. The impact would certainly affect all of Kodiak Island Borough.

29-18-430 REVENUE BOND

Some consideration must be given to existing residence. In the initial petition, the eighty-five of us presently living there became 1/85 of the taxable tax base and 1/85 of the liability of a $2 million project. ANCSA 21(d) states that Native lands are not taxable and (22) miscellaneous states that no liens, exclusions or judgments of any kind can be executed within twenty years.

Further, each revenue bond must show its relevance to the city sector as opposed to corporation development. This particular train of thought should be questioned throughout the Act. Our purpose and tax dollars should be spent to aid in the cost of the city, and not in the development of the resource. In a case where the purpose of a facility services both, the cost should be divided between the city and the developer proportionally.

EXAMPLE

If a city dock that would serve the city alone could be built for $500, but to meet the needs of the developer must now cost $2,000. The developer should have to generate $1500 capital outside of the bonds. My concern here is the tax liability of the bond on the city should the industry fail to be profitable and the collateral not redeemable as under ANCSA (22) or not of sufficient value to satisfy its creditors. It appears to me that if the debts are kept reasonable that city could possibly survive the loss of its major developer by participating in existing economics such as fishing. On the other hand, if town liabilities are allowed to far exceed those of a realistic population projections ability to handle the city would most probably end up a ghost with many

citizens losing their shirts, as well as their dreams.

29-18-450 APPLICABILITY OF OTHER PROVISION OF THIS TITLE

This paragraph was not applied nor adhered to in Community and Regional Affairs' administration of the Act as it applied to the Afognak City's first petition, though it sheds a lot of light on the intent and composition of the Act. In its sweeping centralization, however, it creates contradiction within the law itself.

EXAMPLE

29-18-050(8) THE PROVISION FOR A FIRST CLASS CITY INCORPORATION

The signature and residence address of 50 permanent resident voters within the proposed municipality, which with eighty-five residents as applicable and Title 29-18-240 are both in Chapter 18. Hence, 29-18-240 has to be improved and clarified giving guidelines for public participation under a democratic government, as the character of its location changes from unpopulated - no existing economy - to populated with existing economies population and borough government.

First and most important, there is no provision under the law that necessitates the establishment of public sector. There must be land made available to the general public and general business community.

This land must in no way be controlled by the developers other than its original planning and zoning. Land should be sold at a fixed percentage above cost and a provision requiring development within a given time to discourage land speculation. My concern here is that the law permits the possibility of Alaska's future growth to be exactly like Prudho Bay, where a group of corporations owns

all the land and commerce. Any city in Alaska must be open to the public at the public's own discretion. Finally, I feel the State or petitioner should advertise the new city to the national business community, asking for their economic participation in fields other than that of the founding developer. For example, offshore oil exploration drilling support facilities and bottom-fishing processors are very real possibilities in the Afognak City and would go a long way in ensuring orderly development of well planned, diversified and economically sound new cities necessary to support the sound development of the State resources by both private and public sector.

CONCLUSION

In conclusion it is extremely important to consider our states goals and values as we now look at our future.

International bankers and multinational corporation have acted and planned far in advance of the political concepts of the nation_ state by cutting off our states opportunity to procceed in its family oriented past by completely stopping land transfer to public and regulating every thing from limited entry to placer mining out of reach of most of the general public. They now have created a state of mind in Alaska that believes our only future is to develop on a big scale with major multinational corporation, If we go that route the future is clear. If the only future development in Alaska is with big corporation then we will be allowing our main stream economy to be controlled by multinational corporations.

It is my opinion that we should quard our six trillion dollars of natural resource like a miser, his purse only developing them in as much as its allows us to develop a free enterprise family oriented economy in aquaculure, farming, musk ox, reindeer and small mining.

What we need is a development of family oriented business act and not a development cities act.

Presumption that 1 would be no residents.
Conflict b/c Boro planning powers / Settlement Cities Act could be applied differently in unorganized borough.
Corporation towns (concept)
Definition - "permanent" residents must be clarified

(2) act of the legislature. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in paragraph (1).

Sec. 29.18.250. Petition for incorporation. A development city incorporation petition proposed by an industrial developer shall include the following information about the proposed city:

(1) class,

(2) name,

(3) boundaries,

(4) composition of the council,

(5) maps, documents, preliminary economic development projections, preliminary population projections, outline of the industrial developer's investigative and development expenditures and its proposed capital program, and other information required by the Department of Community and Regional Affairs to show that the proposed city meets the standards for incorporation,

(6) the proposed agreement required under § 330 of this chapter. (§ 19 ch 118 SLA 1972; am §§ 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in paragraph (5).

Sec. 29.18.260. Review. The Department of Community and Regional Affairs shall review the petition for content and shall return deficient petitions for correction and completion. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.270. Investigation. If the petition contains the required information, the Department of Community and Regional Affairs shall investigate the proposal to determine whether the development expenditures and proposed capital program by the developer serve the public interest and demonstrate a probability of being carried forward to a successful conclusion. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.280. Report. (a) The Department of Community and Regional Affairs shall report its findings to the Local Boundary Commission with its recommendations regarding the incorporation within 60 days of receipt of the petition for incorporation.

(b) The Local Boundary Commission shall review the petition and the findings and recommendations of the Department of Com-

460. Definition

Revisor's note (1972).—Provisions virtually identical to §§ 220—460 of this chapter were originally enacted as AS 29.76, in ch. 106, SLA 1972. Also see ch. 110, SLA 1972, which incorporated the development city of Lost River.

Sec. 29.18.220. Legislative findings. The legislature finds that the development of natural resources in isolated and relatively unpopulated areas requires a policy and procedure which will provide planning, financial and other assistance necessary for encouraging orderly development of well-planned, diversified and economically sound new cities necessary to support the sound development of the state's resources by both the private and public sector. It is the purpose of §§ 220—460 of this chapter to set out the mutual responsibilities of the private and public sectors to achieve these objectives with a view to securing information valuable to future legislatures so that general legislation applicable to the establishment of development cities may be perfected. (§ 19 ch 118 SLA 1972)

Sec. 29.18.230. Development cities. Subject to reclassification under § 400(c) of this chapter, a development city is a city of the class designated by the Department of Community and Regional Affairs. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.240. Incorporation. An area not served by an existing municipality which is not reasonably practicable to be served by an existing municipality may be incorporated as a development city by

(1) petition of the industrial developer to the Department of Community and Regional Affairs to be acted on by the Local Boundary Commission; or

munity and Regional Affairs within 60 days of receiving them. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in subsections (a) and (b).

Sec. 29.18.290. Decision on development city incorporation. (a) The Local Boundary Commission may reject a petition for incorporation if it finds that

(1) the area proposed for incorporation is served by an existing municipality or could be served by an existing municipality;

(2) it is improbable that the proposed development will take place;

(3) the program and activities contemplated by this chapter may be undertaken through expansion of the corporate limits of an existing city and then declares that city to be a development city for the purpose of preferential designation under §§ 10 and 340—460 of this chapter;

(4) the program and activities contemplated by this chapter may be undertaken by establishing a service area within an existing organized borough for a development project, and declares the service area to be eligible for preferential designation under §§ 410 and 450 of this chapter;

(5) the proposed development does not serve the public interest.

(b) If the Local Boundary Commission finds that a service area within an organized borough is to be designated for preferential treatment under (a) (4) of this section, the assembly may undertake the project in the manner of a development city and shall present to the Local Boundary Commission a contractual agreement outlining responsibilities assumed by the borough and the industrial developer to implement the proposed development program.

(c) The assembly may decline findings under (b) of this section to establish a service area and in the alternative request the Local Boundary Commission to approve incorporation of a development city.

(d) The Local Boundary Commission may dissolve a development city established under § 20 of this chapter if subsequent to its incorporation

(1) the major economic development projected does not occur within a period of five years; and

(2) if the development project had been reviewed as a new project the Local Boundary Commission determines it would have rejected the petition on the basis that it is improbable the proposed development would have taken place.

(e) A commission decision under this section may be appealed under the Administrative Procedure Act (AS 44.62). (§ 19 ch 118 SLA 1972)

Sec. 29.18.300. Preliminary planning. The city shall prepare and submit to the state preliminary plans in advance of completion of the final basic comprehensive plan for the city. The preliminary plans shall include

(1) maps, documents, preliminary economic development projections, preliminary population projections, outline of the industrial developer's investigative and development expenditures and its proposed capital program, and other information required by reviewing agencies of the state;

(2) a report on the physical and biological character of the proposed city's site and a land and water use plan and the design and siting of the community to be developed based upon these natural factors. (§ 19 ch 118 SLA 1972)

Sec. 29.18.310. Review and report. (a) The division of planning and research, in conjunction with the Departments of Community and Regional Affairs, Natural Resources, and Environmental Conservation and other departments as determined appropriate by the division of planning and research, shall review the preliminary planning and additional data may be requested.

(b) The division of planning and research shall coordinate the preparation of a report and recommendations, if any, which shall be submitted to the governor within 60 days of receipt by the state of the preliminary plans from the city. The city may proceed to the completion of the final basic comprehensive plan upon satisfying any specific recommendations contained in the report.

(c) During the course of planning toward completion of the basic comprehensive development plan the division of planning and research and the Department of Community and Regional Affairs shall be kept currently informed and the final plan shall be subject to review and recommendation by the division of planning and research, which shall act in its coordinating capacity to secure review by the Department of Environmental Conservation and other state agencies as appropriate. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, in subsection (a), deleted "Local Affairs Agency and the" following "conjunction with the" and inserted "Community and Regional Affairs" following "Departments of." In subsection (c), the amendment substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.320. Limitation. The city may not proceed with commitment of funds or formal undertakings for physical development until it has a signed contract or contracts for sale of the company's products in quantities shown in the economic data and submitted by the company to be adequate to sustain an economically viable operation. The company may submit alternative valid evidence that the projected operation will proceed. The company shall notify the

Department of Community and Regional Affairs of the meeting of this requirement. Unless the Department of Economic Development makes a determination that the data is insufficient, the city may proceed. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the third sentence.

Sec. 29.18.330. Local hire. In consideration of the incorporation of a development city under this chapter, the major developer shall enter into an agreement with the appropriate agencies of the state concerning

(1) establishing and maintaining an approved Department of Labor on-the-job training program to qualify Alaska residents lacking in the requisite technical skills of the activities to be undertaken;

(2) establishing resident hire goals in terms of per cent of employees at the end of the first year, second year and third year of operation;

(3) establishing the responsibilities of the various state agencies towards providing technical assistance, manpower procurement, relocation assistance, job opportunity services to residents in the area, supplemental vocational training, and the scope of effort each state agency has in this regard with specific commitments in terms of numbers of residents, time schedule and dollar value of training;

(4) establishing the penalties and conditions of noncompliance with the agreement. (§ 19 ch 118 SLA 1972)

Sec. 29.18.340. Development city council. The council of a development city has five members consisting of the commissioner of the Department of Community and Regional Affairs, or his designee, and four public members designated by the governor. The governor shall appoint no fewer than two public members from a list of nominees designated by the major developer providing the industrial base of the city as measured by employment and capital investment. The council shall serve at the pleasure of the governor. The designated councilmen need not be residents of the city during its development stage. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, in the first sentence, substituted "commissioner" for "director" following "consisting of the" and substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.350. Filling a vacancy. If a vacancy occurs in the council as constituted under § 340 of this chapter, the applicable appointing authority shall designate the replacement during the development stage of the city. (§ 19 ch 118 SLA 1972)

Sec. 29.18.360. Powers and duties of council. During the development stage the council of a development city may

(1) exercise the powers and duties of a school board if the city is located outside an organized borough;

(2) exercise the powers and duties of a planning commission under AS 29.33.080, except that during the first five years or until the development city has 400 permanent residents, zoning and zoning changes will be reviewed and approved by the division of planning and research and the Department of Environmental Conservation. (§ 19 ch 118 SLA 1972)

Sec. 29.18.370. Powers and duties of development city executive director. During the development stage the council shall appoint an executive director of the development city, who may be one of its members, to serve at the pleasure of the council. The executive director shall have the powers and duties of all executive and administrative city officials set out in this title in order to develop the city under a comprehensive community development plan. (§ 19 ch 118 SLA 1972)

Sec. 29.18.380. Procedures. During the development stage, the council may provide for conference telephone or radiophone meetings at times determined by the council and shall determine its own rules and order of business. (§ 19 ch 118 SLA 1972)

Sec. 29.18.390. Development city capital improvement funds. All state agencies shall, where appropriate, adopt procedures to insure that, during the development stage, the needs of a development city are carefully considered in the allocation of funds available for capital improvement projects where those funds have not otherwise been committed by the legislature. (§ 19 ch 118 SLA 1972)

Sec. 29.18.400. Transition. (a) When a development city has 400 permanent residents elections shall take place according to the following schedule:

(1) in the first year two additional councilmen who shall be city residents elected for three-year terms;

(2) in the second year two councilmen who shall be city residents elected for three-year terms to replace one of the councilmen nominated by the industrial developer and one of the public members designated by the governor;

(3) in the third year two councilmen who shall be city residents elected for three-year terms to replace the commissioner of the Department of Community and Regional Affairs and one of the councilmen nominated by the industrial developer;

(4) in the fourth year a mayor who shall be a city resident elected for a three-year term to replace the remaining councilman nominated by the industrial developer.

(b) At the time of the election under (a)(4) of this section, or any time after it, the electorate may exercise the right to become a home rule city as authorized under this title.

(c) If, within a period of five years from the incorporation of a development city, the number of permanent residents does not reach 400, the Department of Community and Regional Affairs shall order an election for city officials and designate a successor class of city based on population as provided in this title. If the department designates a successor class of city, the provisions of this title relating to that class of city apply, and the city shall be reclassified accordingly. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "commissioner of the Department of Community and Regional Affairs" for "local affairs director" in paragraph (3) of subsection (a). The amendment also substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the first sentence of subsection (c) and substituted "department" for "agency" in the second sentence of that subsection.

Sec. 29.18.410. Housing powers. From the time of the appointment of the first city council and for a period of 10 years following the first election of councilmen, the council may act as its own housing and urban renewal authority if such powers have been granted to cities under applicable provisions of law. (§ 19 ch 118 SLA 1972)

Sec. 29.18.420. Land selection. (a) The Department of Natural Resources shall attempt to secure the transfer of the available federally owned land located within the boundaries of a development city into state ownership. After the transfer, a development city may select 10 per cent of the vacant, unappropriated, unreserved state land located within its boundaries. Nothing in this section affects a valid existing claim, location, or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way or other purposes or affects the rights of an owner, claimant, locator, or entryman to the full use and enjoyment of the land so occupied.

(b) If land desired by the development city is unsurveyed at the time of its selection, the Department of Natural Resources shall survey or approve a survey by the city of the exterior boundaries of the area requested without interior subdivision and shall issue a patent for the selected area in terms of the exterior boundary survey. The cost of the survey is borne by the city. If land desired by the city has been surveyed at the time of its selection, the

boundaries of the areas requested must conform to the public land subdivisions established by the approval of the survey. Land selected by the city under this section is patented to the city by the Department of Natural Resources.

(c) After the selection of the land by the development city but before the issuance of final patent, the city may execute conditional leases and make conditional sales of selected land. (§ 19 ch 118 SLA 1972)

Sec. 29.18.430. Revenue bonds. Revenue bonds may be issued by a development city under the provisions of AS 29.58.200—29.58.220. However, no vote of the people is required to issue revenue bonds during the development stage. During the development stage revenue bonds may be issued by a majority vote of the city council. (§ 19 ch 118 SLA 1972)

Sec. 29.18.440. Shared revenue. A development city is entitled to shared revenue and other state funds on the same basis as a city or organized borough of the first class or, if reclassified under § 400(c) of this chapter, on the basis of the reclassification. During the development stage the Department of Community and Regional Affairs may establish an assumed population figure which shall be used to determine shared revenue based on population on per capita grants. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the second sentence.

Sec. 29.18.450. Applicability of other provisions of this title. All applicable provisions of this title consistent with the provisions of this chapter apply to development cities. Provisions of this chapter prevail over other provisions of this title which are inconsistent. (§ 19 ch 118 SLA 1972)

Sec. 29.18.460. Definition. In this chapter "development stage" means that period of time extending from the date of incorporation of a development city until such time as the city may attain a population of 400 permanent residents, or five years from the date of incorporation, whichever is earlier. (§ 19 ch 118 SLA 1972)

FURTHER REFERRALS: Judiciary

MEMBERS PRESENT:

Bill Parker	X	Pat Carney	X
Margaret Branson	X	Charlie Parr	X
Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	X

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

Branson - Offered revised work draft for consideration by the Committee. Reviewed basic concepts of HB384.

Parr-- Suggests elimination of "elected by or appointed from" p. 2 lines 2-3. Or strike "by" and "from"

Chitwood - Municipal League has no position on the bill but suggests retaining options for municipalities to choose their own method of representation.

Palmer McCarter - Dept. of C&RA supports the concepts in the bill. Also supports options for method of local government representation.. Weighted voting needs to be removed. Court decision has declared institutionalized representation unconstitutional.

Eleven members on an Assembly should be adequate. Kenai is the only general law municipality which exceeds this number.

Questions raised as to the need for separate classifications for voter approval. (p. 2 lines 26-29)

COMMITTEE ACTION: Action to be continued.
4/27/79 HB384 Basically incorporated into H CSSB 137

TAPE # 7 SIDE 2 Sections 633-1150

Margaret.

As soon as my Committee gets its draft ord. I will forward it to you. We are addressing most of these questions. I hope that we make good progress.

IN THE HOUSE BY BRANSON

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the composition and apportionment of borough assemblies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.23 is amended by adding new sections to read:

Sec. 29.23.021. ASSEMBLY COMPOSITION AND APPORTIONMENT. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If a borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with AS 29.23.-C23 and prescribed by charter or ordinance.

The constitutional question has never been tested. Personally I don't think weighted voting will fly.

(c) An assembly may not provide for weighted voting.

Sec. 29.23.023. COMPOSITION AND REPRESENTATION REQUIREMENTS FOR GENERAL LAW BOROUGHS. (a) The assembly of a general law borough may not be composed of more than 11 members. OK To Large Now

(b) The assembly of a general law borough shall provide, by ordinance, that members of the borough assembly are

(1) elected at large by all qualified voters of the borough;

(2) elected at large by all qualified voters of the borough but required to live within an election district or zone established by

the borough for the election of borough assembly members; or

(3) elected by and from election districts or zones established by the borough for the election of borough assembly members.

(c) A member of the assembly of a general law borough may not be elected or appointed by and from the council of a city in the borough.

Sec. 29.23.025. ASSEMBLY RECOMPOSITION AND REAPPORTIONMENT. (a) Not later than July 31, 1981, and, thereafter, within four months after the official report of a federal decennial census, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 - 29.23.023.

(b) If the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021 - 29.23.023, the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may change the composition of the assembly.

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 borough voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly shall make the determination requested.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. The vote on an ordinance submitted to the voters shall be tabulated in two separate classifications. One classification shall consist of all votes cast in

Could be a stand alone. But is restrictive for one segment of population if they feel strongly about

the first class and the home rule cities in the borough. The other classification shall consist of all votes cast in the remaining areas of the borough. In order for the ordinance to be approved it must receive majority approval in each classification.

(e) Within four months of a determination by the assembly that the current apportionment does not meet the standards of AS 29.22 021 - 29.23.025; the assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the four month time period, an ordinance providing for reapportionment has not been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 - 29.23.023.

(f) A reapportionment ordinance, or a determination of the borough assembly that applicable standards do not require adoption of a change in apportionment, is subject to judicial review.

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which follows approval of a reapportionment ordinance.

* Sec. 2. AS 29.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021; 29.23.025 - 29.23.050 (composition and apportionment of borough assembly; borough assembly recomposition and reapportionment; assembly representation)

* Sec. 3. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council, but the number of members of a borough assembly may not exceed 11; CK.

* Sec. 4. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. Assemblymen are selected for three-year terms and until their successors are selected and have

qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. [HOWEVER, IF UNDER A BOROUGH APPORTIONMENT CITY COUNCILMEN ARE APPOINTED AS ASSEMBLYMEN OR ELECTED TO DUAL ASSEMBLY-COUNCIL SEATS, THEY MAY NOT BE REPLACED UNTIL THEIR ASSEMBLY TERM EXPIRES AS PROVIDED BY CITY CHARTER OR ORDINANCE, OR THEY CEASE TO BE A MEMBER OF EITHER THE ASSEMBLY OR COUNCIL.] The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs.

* Sec. 5. AS 29.23.020 is repealed.

* Sec. 6. This Act takes effect January 1, 1981.

KENAI PENINSULA BOROUGH
BOX 850 • SOLDOTNA, ALASKA 99669
PHONE 262-4441

DON GILMAN
MAYOR

April 11, 1979

Hon. Bill Parker, Chairman
House Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Re: HB 343 and HB 384

Dear Mr. Parker:

Attached is an excerpt of the Kenai Peninsula Borough assembly minutes of April 3, 1979.

Please note the assembly opposes both bills.

Yours very truly,

Frances Brymer

(Mrs) Frances Brymer,
Borough Clerk

enc.

fb

(c) OEDP (Fischer/Moses)

Mr. Fischer reported the General Committee met and although the economic status of the borough is in a low, there is more activity in Seward than any other area. Mayor O'Reilly of Kenai reported there may be a chopstick factory in Kenai which will employ 40 people.

Mr. Moses reported Mr. Don Wold, Director, Alaska Royalty Oil Board, stated that Bonner and Moore is the consultant helping the Royalty Board in promotion and development program of a petrochemical industry. He indicated the first step to consider before inviting the petrochemical industry to the community is for that community to know what it wants and be ready to accept the consequences. The next step is to do the research then contact local oil companies for their help. It seems that community leaders talk too much and act too little.

(d) Finance Committee

Mr. McCloud reported the committee discussed the school budget and will have recommendations by the next meeting. The personal property taxes were also discussed. The recommendation on Ord. 79-13 is to postpone until further study.

(e) Solid Waste (no report)

(f) Roads and Trails Committee

Mr. Long reported the committee met last night and discussed the proposed legislation. At a future date, Mr. Bob Hadline, Regional Engineer from Anchorage, will be meeting with the committee and he will travel over some of the roads to be improved.

(g) Ports and Harbors Committee

Mr. Arness reported the committee has not had a meeting, but he had previously reported a representative of Woodward-Clyde would be present April 17 to make a presentation. Due to illness this representative will make his presentation May 1 instead.

(h) Local Affairs Committee

Mr. Campbell reported the work on the service area board's responsibilities and duties has been completed. The ordinance will be introduced April 17. It will be sent to all service area board members and at the public hearing anyone may make comment.

It is expected the attorneys on reapportionment will be at the next meeting of the committee on April 17.

(i) Legislative Overview Committee

Mr. Long reported HB 343 and 384 were included in the packet for study. The committee would like to receive recommendations from the asrembly to present to the legislature on these bills.

ASSEMBLYMEMBER CORR MOVED THE ASSEMBLY GO ON RECORD AS OPPOSING HB 343 AND 384.

Mr. Campbell reported he has sent Mrs. Branson his comments on the reapportionment bill and cautioned her that the assembly is addressing many of these points. It may well be that from

the legal advice received, the assembly may have to seriously consider some of these points as an avenue to provide proper apportionment.

On HB 343, Mr. Campbell did not feel the assembly could or would mandate the control of land to a village of at least 25 persons.

Mr. Arness stated that by looking at districting of the state legislature, it is obvious it does not work well. As an example, he cited the case of the senator representing the Seward area while residing in Palmer.

Mrs. Dimmick did not believe a bill which was as poorly written as HB 343 would go anywhere. It could be very detrimental to various areas of the state.

Mr. Campbell requested division of the question.

QUESTION WAS CALLED ON OPPOSING HB 343 AND THE MOTION PASSED BY A VOTE OF 106.83 "YES" TO 7.5 "NO"; Campbell voting negatively.

QUESTION WAS CALLED ON OPPOSING HB 384 AND THE MOTION PASSED BY A VOTE OF 196.83 "YES" TO 7.5 "NO"; Campbell voting negatively.

J. MAYOR'S REPORT

(a) Tentative General Government Budget FY 1979-80

Mayor Gilman reported the tentative budget is submitted at this time to assist in examining the status of the School District and General Government proposed FY 1979-80 budgets. The general government budget has not been entirely finalized, however, the data reflects where the borough stands at this time in projecting for the coming year.

K. SCHOOL CONSTRUCTION REPORT

(a) Furniture and Equipment List (Anchor Point Elem., Seward and Soldotna High Schools (Appv. 3-19-79)

ASSEMBLYMEMBER LONG MOVED TO APPROVE THE FURNITURE AND EQUIPMENT LISTS FOR ANCHOR POINT ELEMENTARY, SEWARD AND SOLDOTNA HIGH. VOTE WAS UNANIMOUS.

(b) Memo 79-63 "Minor Capital Projects Report

During the discussion of the memo, Mrs. Douglas objected to the system of budgeting items such as the $90,000 designated for relocating 6 portables and then finding only two portables need to be moved; also budgeting for paving hockey rinks that will not be paved. Then the borough decides to take these funds, which should have been returned to the general fund and plans to build a teacherage at English Bay. She protested this type of budgeting procedure and committing $125,000 to building a teacherage that the assembly has heard nothing about.

Mrs. Dimmick asked about problems with the roof of the new addition at Tustumena and Mr. Hakert explained there are design problems at the Sterling and Tustumena Schools. These are mainly caused by the addition of insulation which the borough requested and this in turn caused some glaciering and other roof problems. The administration will meet with the architect on defects in the design which may have been his responsibility.

90. [Repealed]
100. [Repealed]

HB 384

Sec. 29.23.010. General power. The legislative power of a borough is vested in the assembly. (§ 2 ch 118 SLA 1972)

Establishment of department and procedures for exercise of areawide power. — The establishment of a department and of standards and procedures to be used in the exercise of an areawide power is a task for the borough assembly, in which is vested the general legislative power. 1962 Op. Att'y Gen., No. 9.

The borough assembly may set up a board of health as an advisory board and be substantially guided by such a board of health in its exercise of the public health power, as long as the borough assembly is the body finally expressing the public health power. 1962 Op. Att'y Gen., No. 9.

Borough chairman cannot serve on borough assembly. — To permit the borough chairman to serve on the borough assembly would constitute a clear violation of this section, and would violate the common law prohibition against holding incompatible offices. 1963 Op. Att'y Gen., No. 27.

But positions of borough assemblyman and school board representative can be served concurrently. — A person elected to the positions of borough assemblyman and borough school board could properly exercise the powers, privileges and duties of both offices concurrently. 1963 Op. Att'y Gen., No. 27.

Sec. 29.23.020. Composition, apportionment, and reapportionment. (a) The assembly shall be composed of the number of members and be apportioned in a manner set out in the incorporation petition approved by the voters or, if a borough is already incorporated, the assembly shall be composed and apportioned in a manner prescribed by charter or ordinance. Assembly composition and apportionment, including voting procedures based on the apportionment, may be prescribed in any manner consistent with the equal representation standards of the Constitution of the United States.

(b) Within six months of October 14, 1972, and thereafter within six months of the official report of a federal decennial census and issuance of any supplementary data to the report necessary to

establish population distribution within the borough, the ass shall

(1) determine and declare by resolution whether the existi assembly apportionment meets the standards designated under (a) of this section;

(2) if the existing apportionment does not meet the designated standards, provide by ordinance for reapportionment and, if it chooses, changes in assembly composition, in accordance with the designated standards;

(3) submit the ordinance to borough voters for approval or rejection as provided in (c) of this section.

(c) The vote on an ordinance submitted under (b) (3) of this section shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and the home rule cities of the borough. The other classification shall consist of all votes cast in the remaining areas of the borough. In order for the ordinance to be approved it must receive majority approval in each classification. If, at the end of the time period prescribed in (b) of this section, no ordinance has been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards designated in (a) of this section.

(d) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide for its reapportionment and, if it chooses, a change in assembly composition, whenever, on the basis of federal census reports or other reliable population data, it determines that the existing apportionment does not meet the standards for apportionment designated in (a) of this section. The assembly is required to determine whether the standards are being met upon petition of 50 borough voters. The petition must include reliable evidence that the existing apportionment of the assembly does not meet the designated standards. Reapportionment under this section shall be implemented by ordinance or by act of the Department of Community and Regional Affairs in the same manner as prescribed for reapportionment in (c) of this section.

(e) Members of the assembly are selected according to assembly composition and apportionment set out in the incorporation petition approved by the voters or subsequently provided in accordance with this section. A change in assembly composition or apportionment under this section shall be effective beginning with the next regular election to the assembly.

(f) Assembly or Department of Community and Regional Affairs determinations or reapportionments made under this section are subject to judicial review. The running of time periods specified

in (b) of this section shall be tolled until a final judgment is rendered in an action brought under this subsection.

(g) This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 12 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Cross reference.—See Editor's note to AS 29.18.120.

Effect of amendments. — The first 1972 amendment rewrote this section.

The second 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the last sentence of subsections (c) and (d), and in the first sentence of subsection (f).

This section provides a convenient method for reapportioning whenever necessary. 1965 Op. Att'y Gen., No. 5.

It does not indicate what population data may be used by the reapportioning agency. 1965 Op. Att'y Gen., No. 5.

However, the agency may use population data other than official census figures in reapportioning seats or votes. 1965 Op. Att'y Gen., No. 5.

The only limit imposed by this section is that a reapportionment plan may not take effect until the next assembly election. 1965 Op. Att'y Gen., No. 5.

Sec. 29.23.030. Election and appointment.

Repealed by § 16 ch 118 SLA 1972.

Cross reference.—See Editor's note to AS 29.18.120.

Editor's note.—The repealed section derived from § 2, ch. 118, SLA 1972.

Sec. 29.23.040. Regular term of office. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. However, if under a borough apportionment city councilmen are appointed as assemblymen or elected to dual assembly-council seats, they may not be replaced until their assembly term expires as provided by city charter or ordinance, or they cease to be a member of either the assembly or council. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 13 ch 118 SLA 1972)

Cross reference.—See Editor's note to AS 29.18.120.

Effect of amendment. — The 1972 amendment rewrote this section.

Editor's note.—Section 20, ch. 118, SLA 1972, provides: "The terms of elected officials who are incumbents on September 10, 1972, are not affected by this Act. Their terms expire as provided before enactment of this Act."

Sec. 29.23.050. Qualifications. A resident of the borough is eligible to be an assemblyman if he is a borough voter. An assemblyman who ceases to be a borough voter immediately forfeits his office. An assemblyman elected from or selected to represent a borough area less than the borough area at large and who becomes a resident of another area may continue to serve only until the next regular election. The assembly may by ordinance establish residence requirements for assemblymen not exceeding three years.

Chapter 23. Municipal Officers and Employees.

Article 1. Borough Assembly.

Sec. 29.23.010. General power.

Lack of a valid legislative body would not prevent the valid incorporation of a municipality. This conclusion is bolstered by noting that Alaska's newly-enacted Municipal Government Code has completely separated the statutes relating to the incorporation procedure from those relating to the borough's legislative body. Jefferson v. State, Sup. Ct. Op. No. 1084 (File No. 2000), 527 P.2d 37 (1974).

The incorporation of a municipality is a process both conceptually and functionally distinct from that of establishing a legislative body for that corporation. Jefferson v. State, Sup. Ct. Op. No. 1084 (File No. 2000), 527 P.2d 37 (1974).

Sec. 29.23.020. Composition, apportionment, and reapportionment.

Section supersedes home-rule enactments. — By AS 29.13.100 the legislature has specifically provided that this section supersedes existing and prohibits future home-rule enactments which provide otherwise. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Section is ambiguous as to when voter ratification of subsequent apportionment plan required. — This section is ambiguous as to whether there must be voter ratification of an apportionment plan when the existing plan has not been determined to be unconstitutional. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Such ratification is required when existing plan not found unconstitutional. — Voter ratification of a subsequent apportionment plan is required when the existing plan has not been determined to be unconstitutional. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Authority to alter apportionment, etc., when apportionment is unconstitutional. — The assembly is required to take action when it determines that the apportionment of its assembly fails to meet the standards of the equal protection clause of the United States Constitution. Under those circumstances, authorization is granted to the assembly to make changes in its composition as well as to make the necessary reapportionment. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

But section is ambiguous as to authority when apportionment not found unconstitutional. — This section is ambiguous as to whether the assembly may alter either its apportionment or composition when the existing arrangement has not been found by the assembly to be unconstitutional. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

This section may have several referents: (a) that the make-up of the assembly may initially be composed and apportioned in a manner prescribed by the charter or ordinance, (b) that there may be changes made in the composition and apportionment by charter or ordinance at any time or (c) such changes may only be made in the manner spelled out in subsections (b) and (d) of this section which mandate such changes when the assembly apportionment fails to meet equal representation standards. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

The words in subsection (a), "... If a borough is already incorporated, the assembly shall be composed and apportioned in a manner prescribed by charter or ordinance," while not ambiguous in themselves, refer to several different possible applications. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

This particular ambiguity is best resolved in favor of the assembly having the power of reapportion itself or alter its composition even when there has been no determination of unconstitutionality. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Section is ambiguous as to when election required for reapportionment. — Taking in conjunction this section's silence

as to whether an election is required for reapportionment with its silence on the power of the assembly to reapportion in the absence of a determination of unconstitutionality, the supreme court found ambiguity exists as to whether an election is required. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

The legislature intended that all reapportionment ordinances be submitted to the electorate. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974).

Sec. 29.23.060. Procedure.

Cross reference.
As to abstaining from official action when there is a conflict of interests, see AS 29.23.555.

Article 2. Borough Executive and Administrator.

Section
130. Power generally

Sec. 29.23.130. Power generally.

(b) A borough voter is eligible to be borough mayor. The assembly may by ordinance establish residence requirements for candidates for borough mayor not exceeding three years.

(e) A borough adopting a manager plan may, by agreement with a city, enter into a contract providing for the manager of a city located within the borough to serve also as borough manager. A city adopting a manager plan may, by agreement with a borough, enter into a contract providing for the manager of a borough within which the city is located to serve also as city manager. Appointment and service of the manager shall be as otherwise provided for managers in §§ 130 — 150 and §§ 450 — 470 of this chapter. Nothing in this subsection affects the authority of the assembly or council to provide for other dual officeholding if the dual offices held are compatible or otherwise to appoint officers and employees in accordance with law.
(am § 1 ch 6 SLA 1975; am § 1 ch 63 SLA 1976)

Effect of amendments. — The 1975 amendment, effective February 17, 1975, added subsection (e).

The 1976 amendment added the second sentence of subsection (b).

As the rest of the section was not affected by the amendments, it is not set out.

Article 3. City Council.

Section
200. Composition, eligibility, election and term

Presented by: Committee of The Whole
Introduced: 07-20-78
Referred to:
Public Hearing: 08-03-78

ORDINANCE OF THE CITY AND BOROUGH OF JUNEAU ALASKA

Serial No. 78-25

AN ORDINANCE ESTABLISHING PROCEDURES FOR THE REAPPORTIONMENT OF ASSEMBLY SEATS AND DETERMINING THE ELECTION OF CANIDATES IN MULTI-MEMBER DISTRICTS

Section 1. This ordinance is of a general and permanent nature and shall become a part of the city and borough code.

Section 2. City and Borough of Juneau Title 11 is amended by adding a new chapter 30 reading as follows:

CHAPTER 11.30
ASSEMBLY REAPPORTIONMENT

Section 010. Definitions. (a) "Adequate census" shall be the decennial census of the United States or such other similar, comprehensive census or data as may be performed or collected more frequently by the United States, the state or the municipality which has been determined by the assembly by motion to indicate that there is a representational disparity between assembly districts of greater than 15% and to be an adequate basis for establishing appropriate districts. Except for the United States decennial census, census data must be less than 2 years old when presented to the assembly or when filed with the clerk if filed as a part of a petition under section 30.

(b) "Commission" shall be the commission appointed by the assembly or the court as provided in this chapter for the purpose of reapportioning the assembly.

(c) "Date of the determination of an adequate census" and similar terms mean the day upon which the assembly determines that a report of population distribution within the city and borough and/or other data or materials constitute an adequate census as defined in section 10 of this chapter or is the date of its receipt at a regular or special meeting of the findings, conclusions and order of the court under section 30 (c) of this chapter.

(d) "Employee of the municipality" includes all persons whose salary is paid out of appropriations made by the assembly.

Section 020. Voluntary Census Determination. The assembly may, on its own motion or the request of any resident or local organization, consider whether a designated report of

population distribution and/or other data constitutes an adequate census as defined in section 10 of this chapter.

Section 030. Census Determination Upon Petition. (a) Upon the receipt of a valid petition signed by municipal voters equal to 25% of those who voted in the last regular municipal election requesting the assembly determine certain population and/or other data to be a census as defined in section 10 of this chapter, the assembly shall, within 30 days of receipt of the petition hold a public hearing on the question and at the same or a later meeting determine whether the material accompanying the petition and any other material presented at the hearing or any combination of materials before the assembly constitutes an adequate census as defined in section 10 of this chapter.

(b) If within 60 days of the receipt of a valid petition, the assembly has not made a final determination of whether the materials before it constitute an adequate census as defined in section 10 of this chapter or if the assembly has determined that such materials do not constitute an adequate census, one or more persons who signed the petition may appeal to the Superior Court the assembly's negative determination or its failure or refusal to decide. The question on appeal shall be whether the population report and other materials filed with the petition, and offered at the hearing if a hearing was held, constitute an adequate census as defined in section 10 of this chapter.

(c) If the court finds in favor of the appellants, it shall enter its findings of fact and conclusions of law and shall order reapportionment to proceed under the ordinance as if the assembly itself had determined the relevant materials constitute an adequate census as defined in section 10 of this chapter.

(d) No petition shall be valid unless it contains sufficent signatures which conform to the requirements for signatures for city and borough initiative and referendum petitions. The petition shall be filed with the clerk and shall be accompanied by all materials and data which the petitioners believe constitute an adequate census. The data and materials need not accompany the petitions while being circulated for signatures. Signatures must be gathered within 6 months of the date of filing. No petition shall be valid if filed with the clerk within 4 years of an election at which a reapportionment was implemented. Each page of the petition shall contain a petition request reading substanially as follows: "The undersigned qualified municipal voters petition the Assembly of the City and Borough of Juneau to determine that the materials and data filed with this petition show a representational disparity between assembly districts of greater than 15% and that the materials and data are also an adequate basis for establishing appropriate districts and otherwise meet the requirements of an adequate census as

defined in City and Borough of Juneau Ordinance CBJ 11.30 and that the assembly proceed with reapportionment."

Section 040. Assembly Reapportionment. The assembly shall cause to be introduced an ordinance reapportioning the assembly in accordance with the standards provided in this chapter within 90 days of the date of determination of an adequate census.

Section 050. Appointment of Reapportionment Commission by Assembly. The assembly shall appoint a reapportionment commission immediately upon:

(1) The failure of the assembly to introduce a reapportionment ordinance within 90 days of its determination of an adequate census, or

(2) the failure of the assembly to adopt a reapportionment ordinance within 120 days after its determination of an adequate census, or

(3) a determination by the assembly that it should be reapportioned by a commission.

Section 060. Appointment of Reapportionment Commission by Court. The Superior Court having jurisdiction over the city and borough of Juneau may appoint a reapportionment commission upon the petition of any resident of the city and borough and upon a showing that:

(1) the assembly has failed or refused, for any reason, to introduce a reapportionment ordinance within 90 days of the determination of an adequate census or to adopt a reapportionment ordinance within 120 days of such determination, or

(2) the effect of an adopted reapportionment ordinance has been suspended or defeated by recision, reconsideration or other act of the assembly during the 30 day period between the adoption of the ordinance and the date upon which it becomes effective and such suspension or defeat has continued more than 180 days after the determination of an adequate census.

Section 070. Reapportionment Commission Composition, Functions and Duties. (a) The reapportionment commission appointed by the assembly or by the court under this chapter shall consist of three persons who are qualified municipal voters, none of whom may be an employee of the municipality or a member of the assembly or any municipal commission, committee or board created by ordinance, charter or statute. The commission shall meet within 30 days of the appointment of the third member and shall elect from its membership a chairman, vice-chairman, and secretary and shall adopt rules of procedure to govern the conduct of its meetings.

(b) The manager or his designee shall provide all support needed for the commission in the execution of its duties. Costs incurred by the commission shall be borne by the municipality. All purchases of goods and services in support of commission activities shall be accomplished by the manager or his designee in accordance with applicable ordinances. The assembly, by resolution, may provide for the payment of an honorarium, per diem, or compensation to members of the commission.

(c) The commission shall, within 90 days of its first meeting, adopt and transmit to the assembly, a resolution for the reapportionment of the assembly. The resolution shall be accompanied by a comprehensive report by the commission supporting its plan, which summarizes the public testimony before the commission, and which addresses the factors considered by the commission in reaching its decision. The commission shall hold at least one public hearing to receive public suggestions for reapportionment schemes prior to its proposing a plan and shall hold at least one public hearing for the purpose of receiving public comment on the reapportionment plan proposed by the commission. The first public hearing on the proposed reapportionment plan shall be held not less than two weeks nor more than four weeks after the publication by the commission of its proposed reapportionment plan and notice of the hearing. After the first public hearing on the proposed reapportionment plan, the commission may, by resolution, adopt its proposed plan with or without modification.

(d) Unless extended by the assembly by motion, the term of the commission shall expire 15 days after receipt by the assembly of both the reapportionment resolution and report adopted by the commission.

Section 080. Status of Commission Reapportionment Plan. (a) The reapportionment plan adopted by resolution by the commission shall be deemed to be an assembly-instituted plan, whether the commission is appointed by the assembly or the court.

(b) The assembly may change a commission adopted plan only by ordinance.

Section 090. Effective Date of Reapportionment. (a) A reapportionment by ordinance shall become effective on the day the ordinance takes effect.

(b) A reapportionment by commission shall become effective upon the date the commission delivers its reapportionment resolution and report to the assembly at a regular or special assembly meeting.

(c) If a reapportionment plan must be reviewed and approved by an agency of the State of Alaska or the United States before such reapportionment may take effect, the assembly shall cause the reapportionment ordinance or resolution and supporting data to be submitted to the appropriate agency immediately upon assembly adoption or receipt. Notwithstanding paragraphs (a) and (b) of this section, a reapportionment subject to state or federal review shall not take effect until the day of the meeting at which the assembly receives notice of agency approval or the day the assembly determines the agency no longer has authority to disapprove the reapportionment or it is otherwise deemed by agency inaction to be approved.

(d) A reapportionment which has become effective shall be implemented at the next regular municipal election at which assemblymen are elected which occurs 90 or more days after the reapportionment becomes effective and which is not less than the fifth regular election following the last election at which a reapportionment was implemented.

Section 100. Reapportionment Standards, Methods and Goals. (a) Reapportionment shall be for assemblyman residency purposes only. Election of assemblymen shall be at large.

(b) The assembly or commission shall give consideration to the following factors when establishing a reapportionment plan:

(1) overall population distribution, which shall be the primary factor and which shall be utilized to insure that the one person one vote standard applicable to such municipal apportionment is met,

(2) available demographic factors which affect voter behavior shall be utilized to insure that the voting strength of racial and political elements of the voting population are not minimized or cancelled out,

(3) the policy expressed by the voters in adopting a charter for the unification of all local governments in 1970,

(4) clarity of boundaries,

(5) the geographic extent of different local government functions and concerns and the extent of common municipal interests to insure that each assembly district is compact, contiguous and contains a population with common municipal interests and concerns; provided, compactness and contiguity need not exist where it is shown that common municipal interests are better served by combining areas which are not compact or are not contiguous,

(6) boundaries of historically recognized or newly developed communities within the city and borough,

(7) other appropriate factors.

(c) Reapportionment may be accomplished by the creation of new districts, the creation of one or more multi-member districts, the deletion of existing districts, the modification of existing district boundaries, or any combination of the foregoing.

Section 110. Content of Plan. A reapportionment plan, whether by ordinance or commission resolution, shall,

(1) describe the boundaries of each district,

(2) designate the number of seats to which residents of each district are to be elected, and

(3) designate the length of the initial term for each seat in order to minimize and make more uniform the number of seats open for election within the entire city and borough and within multi-member districts at any subsequent election.

Section 120. Effect of Plan on Incumbents. The term of an assemblyman representing a district which will be changed in size or shape or which will lose one or more seats shall end on the date of the election at which the reapportionment plan is implemented. The addition of one or more seats to a district which will not be changed in size or shape shall not affect the term of an incumbent elected from that district.

Section 3. CBJ 29.05.060 is hereby repealed and reenacted to read as follows:

CBJ 29.05.060 Candidate Districts. (a) School board candidates shall run and be elected at large.

(b) Candidates for the office of mayor shall run and be elected at large.

(c) Candidates for the office of assemblyman shall be elected at large but shall be residents of the district from which they run.

(d) In any election of school board members or any election of assembly members involving a multi-member district, the candidates receiving the highest number of votes shall be deemed elected to the vacant seats. If vacancies exist on the school board or within a multi-member assembly district for seats with different terms, the candidate receiving the

highest number of votes shall be deemed elected to the seat with the longest term and the candidate who was elected with the fewest number of votes shall be deemed elected to the seat with the shortest term; seats for other terms of different lengths shall be similarly determined in accordance with the number of votes received.

Adopted this 3rd day of August, 1978.

Public Hearing:

ORDINANCE OF THE CITY AND BOROUGH OF JUNEAU, ALASKA

Serial No. 79-1

AN ORDINANCE AMENDING CBJ 11.10.030
TO REAPPORTION THE SEATS ON THE ASSEMBLY

WHEREAS, the assembly, by Ordinance 78-25, has established a procedure for the reapportionment of assembly seats, and

WHEREAS, the assembly has examined the current voter registration records of each precinct within the City and Borough of Juneau, an extrapolation of population from such figures and an estimate of population made from other sources by the Planning Department of the City and Borough of Juneau, and

WHEREAS, the assembly, on December 21, 1978 determined that the data therein constitutes an adequate census as defined in CBJ 11.30.010 and

WHEREAS, the assembly deems it appropriate to reapportion itself by ordinance, and

WHEREAS, the assembly has considered the standards, methods and goals of reapportionment as set forth in CBJ 11.30.100 and finds that the standards will be best met and an appropriate balance of the goals expressed therein will be achieved by retaining the existing election district boundaries and moving one seat from District No. 1 to District No. 3,

NOW THEREFORE BE IT ENACTED by the assembly of the City and Borough of Juneau, Alaska:

Section 1. Classification. This ordinance is of a general and permanent nature and shall become a part of the city and borough code.

Section 2. Amendment of Section. CBJ 11.10.030(b) is amended to read as follows:

> (b) Other assemblymen shall be elected at large by the qualified voters of the municipality and shall each be residents of individual districts as follows:
>
> > (1) Three assemblymen shall be residents of District No. 1;

(2) One assemblyman shall be a resident of District No. 2;

(3) Four assemblymen shall be residents of District No. 3;

Section 3. Amendment of Section. CBJ 11.10.030(c) is amended to read as follows:

(c) the term of office of the Mayor and other assemblymen shall be three years and shall begin immediately following the certification of the election at which they were elected; provided, at the election at which the reapportionment set forth in Ordinance Serial No. 79-1 is implemented, in District No. 1, one seat shall be for an initial term of one year, one seat shall be for an initial term of two years and one seat shall be for an initial term of three years; the new seat in District No. 3 shall be for an initial term of three years.

Section 4. Addition of New Section. There is adopted a new section CBJ 11.10. 030(d) reading as follows:

(d) The boundaries of the election districts shall be as follows:

(1) District No. 1 consists of the former City of Juneau including West Juneau.

(2) District No. 2 consists of all of Douglas Island which is not a part of District No. 1.

(3) District No. 3 consists of the remaining area within the boundaries of the City and Borough of Juneau.

Section 5. Renumbering of Existing Section. Existing section CBJ 11.30.030(d) is renumbered as (e).

Adopted this 18th day of January, 1979.

OPTOMETRISTS
611 WILLOUGHBY AVENUE • JUNEAU, ALASKA 99801

March 23, 1979

Rep. Parker, Chairman
Community & Regional Affairs
Pouch V
Juneau, Alaska 99811

Re: House Bill 417

Dear Rep. Parker:

I'd like to make a suggestion concerning an amendment on H.B. 417, relating to state shared revenues for support of medical and dental services in rural areas etc. A better title for the bill might be "Relating to An Act Relating to State Shared Revenues for the Support of Health Care Services in Rural Areas." The reason for this suggested title change is that many health care services are provided by practitioners other than physicians and dentists. My profession is a prime example of this and if this bill were enacted with the present language it would deprive citizens in these areas of the services of an optometrist. I'd also like to suggest that on page 2, line 16, define health care provider as a person licensed to provide health care in the state of Alaska. This would also allow doctors of optometry and other licensed health care practitioners to provide services under this legislation. If the writers of the legislation intended for just medical and dental services, then it would be my suggestion that these services be limited to conditions that are not treated by other health care providers. If this is the case, it would seem that the legislation is short sighted because one of the most common problems in remote areas of Alaska is the lack of adequate vision care services. The P.H.S. has put two optometrists on their staff in the past ten years to help alleviate this situation and an optometrist is now on the staff of the Yukon Kuskokwim Health Corp. also as an attempt to help alleviate this very serious problem. I would be interested in the progress of this bill and would appreciate it if you could give me a call at my office at 586-2501, if and when hearings are to be held. Thank you for your consideration.

Yours very truly,

Roy A. Box, O.D.

HOUSE BILL NO. 429

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the levy or property taxes by municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.170(b) is amended to read:

(b) The manager of a borough which has adopted a manager plan, or the mayor of a borough which has not adopted a manager plan, shall, on or before May 15, present to the assembly an estimate of the tax rate which, if applied to the value of taxable property within the borough during the current assessment year, would yield the same amount of revenue received from the levy and collection of ad valorem taxes during the preceding assessment year. A tax rate which is higher than the estimated tax rate presented by the mayor or manager may be imposed only if the assembly first advertises its intention to impose the higher tax rate by mailing to every owner of real property in the borough a notice of the proposed higher tax rate which describes the reasons for or purpose of the higher tax rate, provides notice of the time and place of a hearing on the proposed budget, and gives the name of the assembly member from the district in which the property owner resides. The assembly shall annually determine the rate of levy before June 15. By July 1 the tax collector shall mail tax statements setting out the levy, dates when taxes are payable and delinquent, and penalties and interest.

* Sec. 2. This Act takes effect January 1, 1981.

C&RA Committee hearing HB 574 January 28, 1980

Pappy Moss, witness	Mr. Moss said his bill was asking for an addition of a 20 X 40 storeroom for a crisis center. He said that Delta Junction had several fires lats year where the people were "burnt out," and that the community need to have a storage facility for there belongings. Moss said he hoped to finish the building by the end of the construction season this year.
Parr	Mr. Parr wanted to know the population of Delta Junction.
Moss	Mr. Moss said the population of the town was about 800; 3,052 people lived in the area. He added that there were 100 senior citizens that would be served by the community center.
Parr	Mr. Parr asked if Delta Junction was a first or second class city.
Moss	Mr. Moss thought it wassseconд class. He said there had been many problems trying to organize the borough, and thought the interim study had done some good. Said the potential for DJ was tremendous.
Parr	Mr. Parr wanted to know what structures Delta Jct. had either paid for or owned.
Moss	Mr. Moss said none, that the community had no tax structure, but that local labor had been used in construction.
Metcalfe	Mr. Metcalfe said he thought it would be a good idea to hold the requested funds out as a "carrot" to convince the people to organize as a borough.
Moss	"I'm sure the infinate wisdom of this committee will prevail."

HB 574----2

Parr	Mr. Parr noted th[illegible]e money for the facility should co[illegible] from the office of the aging.
Palmer McCarter, C&RA	Mr. McCarter said that it boiled down to the fact that this was one of 56 capitol improvement projects passed last year, and the money was needed to get the building off the ground...needed to make it whole. He said that at one time the plan had been to pay off the architect and go to a pre-engineered building. McCarter said he was concerned there was no local money going in, but if additional funds were needed, he strongly supported it.
Parr	Mr. Parr wondered if the architect wasn't ripping the community off. He noted payment was for $37,500, yet he thought standard pmt. was 15%. The amount was more than the standard architect fee.
O"Connell	Mr. O'Connell said he wouldn't object to giving the money, but wanted to find out if cash was being squandered on the architect.
Moss	Moss said he would find out about that.
Branson	Mrs. Branson expressed concern that the plan for the building would change a few more times.
Moss	Mr. Moss said he didn't think that would happen. He said he would provide the committee with the information it needed: architect fee, plans, sq.footage, and the background of the project.

City of Delta Junction

Box 229

Delta Junction, Alaska 99737

The North End of the Alaska Highway

January 14, 1980

Representative Pappy Moss
District 19
Pouch V
Juneau, Alaska 99811

Dear Pappy;

Per our telephone conversation of today (January 14, 1980) the city is submitting the following list for consideration for FY81.

Multi-purpose facility $75,000.00
Senior/youth activities

1. addition 20x40 to house crisis center store room (this is for persons who are burnt out and other disasters.
2. garage for 2 vehicles, plus tool stall and arctic enterance.
3. vehicle for seniors (van for transportation of persons) plus radio (CB/VHF) and storage fuel tank.

Library $10,000.00

1. arctic enterance and replace front door.
2. storm windows and storm door for back.
3. repair railing on back door.
4. insulate underneath building and wrap pipes.
5. pressure check all pipes a plumbing and repair leaks.
6. antifreeze in heating system.
7. alarm system for low temperatures.
8. library book shelving.
9. typewriter.

Park $50,000.00

1. fencing (900 ft).

2. bleachers (2 sets)
3. back stop (baseball) 2 each.
4. maintenance equipment (mower, bush cutters etc.).
5. construction of restrooms.
6. cement slab for concession stand (14x60).
7. clearing.
8. baseball diamond, hockey rink, picnic area and exercise path.

Streets $100,000.00

1. new construction.
2. upgrading and improvements
3. streets signs (name).

Sanitary landfill site $30,000.00

1. fencing (state requires fencing around new site) for 40 acres.

Cemetery $20,000.00

1. clearing and improving.

The total the city is requesting is $300,000.00. Your help in these areas would be greatly appreciated. We all know how much you have helped us to date and thank you.

Sincerely

Estelle Schrumpf
city clerk

ROBERT H MACHADO
Mile 1414 Alaska Highway
Delta Junction, Alaska 99737

Representative H "Pappy" Moss
Delta Junction

Nov 7, 1979

As a non-elected spokesman for your constituents in this area, I have a few items for your consideration, and perhaps legislation, if you choose. As you know, I am on the building committee for the Delta Seniors, and am the President of the Delta Historical Society. My comments are after research into the subjects covered:

1. Planning for the Community Recreation Building is well under way--before construction starts, the Architect, Charles Bettisworth, requires $37,500 to firm up plans and for insurance. His first sketch was for a single-floor slab-on-grade building, which cannot be built here, due to the base gravel lying seven feet under river silt of poor compaction quality. This means that a basement is required, and expenditure of more money than provided in your line-itemed funding. May we try for another $75,00? This would repay the architect fees, and give $37,500 toward the basement, and perhaps a garage, which would be used for a Senior Citizen Bus, if you could get that at a later time.

2. You attended a meeting on the treatment of the Bison Range, and Bison in the area--during which many citizens stated the irresponsible overlooking of the Delta Land Management Agreement by Bob Palmer, in placing Agricultural Project Lands on the South side of the Alaska Highway, where it would interfere with the proper management of Bison Migration within the refuge. Unit A of the Barley Project is South of the Highway--I wrote Governor Hammond about this, and suggested that Mr Walsky be transplanted to 2,000 acres ON the Barley Project. Another transgression is planned in the same manner, but this time by Bob La Rocche, who is disposing of 1200 acres to the public, but only TWO 600 acre farms--South of the Highway, Known as the "Six Creeks area" for sale soon. May I suggest that it be revised in to smaller plots for the red-meat potential of feed-lotting, but not the possibility of turning this into Barley Project, and thus shutting out the bison herd one more time?

3. Reference Rika's Landing, which has been proceeding toward restoration. Part of the plans the Historical Society had was the building of a boat landing and ramp just North of the Roadhouse. A safer area would be provided for launching, due to the extreme speed of the Tanana River at the Bridge where the present Public Area is located--if a motor were to malfunction in the first fourteen (14) seconds, the boat can be crushed against the bridge footings. It was with this in mind that the Rika location was promulgated. The State is proceeding with restoration feasibility studies under the Direction of Bob Mitchell, but funds will be needed forthe Landing, and more cleanup before the Site can be opened to the Public as a Historical Site and the Ramp and Picnic Grounds could be used to partially support the enterprise.

4. Question could be raised as to the hiring practices of the Delta Coop and the Barley Project. Out-of-State persons have been selected, and no local advertising for positions made, which precludes the opportunity for local hire of talent which does exist in this area.

Thank you for consideration,

Robert H Machado

TO: Jack Chenoweth
FROM: Marjorie Gorsuch MG
DATE: 3/22/80
RE: Committee Substitutes

Jack,

The Committee has approved the work draft copies of CSHB 886, CSHB 581 as prepared. Please have them run off as finals.

Also approved was the work draft for CSHB580 with the following change

p. 2 Line 8 Change 120 days to 180 days

p. 2 Lines 22-25 Eliminate this (b)

p. 3 Line 11 Eliminate "or the commissioner may request proposals on his own initiative"

p. 7 Lines 28 & following
There was a question of whether or not this wording was necessary and if (b) on p. 8 lines 3-8 didn't suffice?

p. 2 Lines 11-14 Change to "The commissioner shall, upon request, hold public hearings in each of the regional educational attendance areas and may, after such hearings establish boundaries other than the boundaries of a regional educational attendance area for an unorganized borough under AS 29,03.011.
The rest of this section p. 2 lines 14-21 would remain as in CS.

CS FOR HOUSE BILL NO. 580

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to unorganized boroughs, establishing unorganized boroughs, establishing a program of planning assistance for unorganized boroughs, authorizing adoption of home rule charters by unorganized boroughs, and directing submission of recommendations concerning adjustment of the boundaries of service areas of the unorganized borough; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature finds that the single unorganized borough of the state has proven unworkable in accommodating demands from its residents for change and recognizes that a more systematic approach to the planning and delivery of services for residents of this area is necessary. In providing, in this Act, for identifying a common set of boundaries by which to subdivide the state's single unorganized borough into multiple unorganized boroughs, it is the purpose of the legislature to extend the opportunity to residents of unorganized boroughs to assist in planning and program development by

(1) preparing regional planning studies; and

(2) broadening the range of methods by which residents may incorporate a regional government.

* Sec. 2. INTENT. In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to

regions within unincorporated areas be made only within the boundaries for unorganized boroughs established under AS 29.03.011 - 29.03.021, added by sec. 3 of this Act.

* Sec. 3. AS 29.03 is amended by adding new sections to read:

Sec. 29.03.011. ESTABLISHMENT OF UNORGANIZED BOROUGHS. Except as the boundaries are adjusted as provided in AS 29.03.021, the geographic area within each regional educational attendance area established under AS 14.08.031 is, effective 120 days after the effective date of this Act, established as an unorganized borough.

Sec. 29.03.021. ADJUSTMENT OF BOUNDARIES BY COMMISSIONER. (a) The commissioner of community and regional affairs shall, after public hearings in regional educational attendance areas, establish boundaries other than the boundaries of a regional educational attendance area for an unorganized borough under AS 29.03.011. In making adjustments, the commissioner shall consider

(1) the standards applicable to the incorporation of boroughs under AS 29.18.030;

(2) the regional boundaries adopted by the Native regional corporations established under the Alaska Native Claims Settlement Act; and

(3) census divisions of the state used for the 1980 census.

(b) The commissioner of community and regional affairs may not establish boundaries so that an unorganized borough includes territory within more than one Native regional corporation established under the Alaska Native Claims Settlement Act.

* Sec. 4. AS 44.47 is amended by adding a new section to read:

Sec. 44.47.085. ASSISTANCE FOR REGIONAL PLANNING PROGRAMS IN THE UNORGANIZED BOROUGH. (a) The commissioner may contract with a municipality, a group of municipalities, or one or more [nonprofit

corporations organized under the laws of the state, to prepare a regional planning program for an unorganized borough.

(b) The commissioner may contract for the preparation of only one regional planning program for each unorganized borough. The commissioner may contract only if he is satisfied that the party with whom he contracts is capable of preparing a regional planning program that considers the entire population of the unorganized borough.

(c) A municipality, group of municipalities, or one or more nonprofit corporations interested in preparing a regional planning program for an unorganized borough may ask the commissioner to request proposals or the commissioner may request proposals on his own initiative. The residents of an unorganized borough may petition the commissioner to request proposals for preparation of a regional planning program, and the commissioner shall request proposals if the petition is signed by a number of qualified voters equal to not less than 15 percent of the number of votes cast in the unorganized borough at the last state general election.

(d) A request for proposal made under this section shall be advertised. The advertisement of a request for a proposal for the preparation of a regional planning program for the unorganized borough shall outline the work to be completed, and contain other information which the commissioner believes will inform the public of the work to be completed under the contract, and which will assist him in evaluating proposals received. The commissioner shall advertise for a period of not less than 45 days by public notice announcements provided to newspapers and radio and television stations.

(e) After receiving the proposals for preparation of a regional planning program, the commissioner shall evaluate them. The commissioner may refuse all proposals and readvertise, or may accept a pro-

posal and enter into a contract as provided in (f) of this section.

(f) A contract entered into under this section shall

(1) require that the regional planning program include

(A) an analysis and recommendations concerning incorporation of a borough government for all or a portion of the unorganized borough;

(B) an evaluation of the economic development potential of the unorganized borough;

(C) a recommendation concerning capital facility needs of the unorganized borough;

(D) an examination of demographic, social and environmental factors affecting the unorganized borough;

(E) an examination of

(i) interrelationships among the regional educational attendance area, the coastal resource service area, and any other regional entity responsible for services in the unorganized borough; and

(ii) the interrelationships between the governments of cities within the unorganized borough and regional entities listed in (i) of this subparagraph; and

(F) a process for implementing the recommendations made as part of the regional planning program;

(2) provide

(A) a mechanism for securing public participation in the regional planning program;

(B) that the regional planning program be completed not later than the June 30 following the third anniversary of the date of the contract; and

(C) that payment for work performed under the contract

is subject to legislative appropriation to the account established in (g) of this section.

(g) There is established in the Department of Community and Regional Affairs the unorganized borough regional planning account. The account shall be administered by the commissioner and shall be used to pay for contracts entered into under this section.

(h) During each fiscal year, the commissioner may not pay to a contractor under a contract authorized by this section more than $25,000 plus $25 per capita for each person residing within the unorganized borough for which the regional planning program is to be prepared, as determined by the commissioner.

(i) In this section, "unorganized borough" means a subdivision established under AS 29.03.011 - 29.03.021.

* Sec. 5. AS 29 is amended by adding a new chapter to read:

CHAPTER 19. DIRECT INCORPORATION OF A HOME RULE BOROUGH.

Sec. 29.19.010. INCORPORATION. (a) The residents of an unorganized borough established in accordance with AS 29.03.011 - 29.03.021 may apply for the incorporation of a home rule borough. The petition for borough incorporation shall be filed with the Department of Community and Regional Affairs and shall include the information and signatures required by AS 29.18.050. Petitions for incorporation filed under this section shall be processed, reviewed and determined in accordance with AS 29.18.060 - 29.18.090.

(b) A petition submitted under (a) of this section shall

(1) specify the number of members of the charter commission, but the number of members may not exceed 15;

(2) describe the manner of election of members of the charter commission; if election is to be by district, a description of the boundaries of each district shall be included in or attached to the

petition;

(c) If the petition submitted under (a) of this section requests election of charter commission members on a basis other than at large within the unorganized borough, the manner of election of the members of the commission shall conform to standards applicable to the composition and apportionment of legislative bodies which are imposed by art. I, sec. 1 of the state constitution.

(d) The standards applicable to the incorporation of an organized borough under art. X, sec. 3 of the state constitution and AS 29.18.030 apply to the incorporation of an unorganized borough under this section.

Sec. 29.19.020. CHARTER ELECTION. (a) If the Local Boundary Commission accepts the petition filed under AS 29.19.010, it shall immediately notify the lieutenant governor. Within 30 days after notification, the lieutenant governor shall order an election within the proposed home rule borough to determine whether the voters will elect a charter commission, and to determine the persons elected to serve on the charter commission.

(b) Charter commission candidates are nominated by petition signed by at least 50 registered voters residing within the unorganized borough. The lieutenant governor shall allow not less than 20 or more than 30 days during which candidates for the charter commission may present nominating petitions.

(c) The election on the question of election of a charter commission and the determination of persons elected to serve on the charter commission shall be held not less than 60 or more than 75 days after the date of the election order.

Sec. 29.19.030. PREPARATION OF CHARTER. (a) If, at the election called by the lieutenant governor under AS 29.19.020, a majority of the voters favors election of a charter commission, the persons receiving

the highest number of votes cast at that election constitute the charter commission. The charter commission shall prepare a proposed charter and submit it to the Department of Community and Regional Affairs within one year of the first meeting of the charter commission. The commissioner of community and regional affairs shall review the proposed charter for compliance with laws applicable to home rule municipalities and, if it complies, request the lieutenant governor to submit the proposed borough incorporation petition and proposed home rule charter to residents of the proposed home rule borough. If the proposed charter does not comply with law, the commissioner of community and regional affairs shall return the proposed charter to the charter commission with a statement of the legal deficiencies.

(b) Within 90 days of the receipt of the statement of the commissioner of community and regional affairs indicating that the proposed home rule charter does not comply with law, the charter commission may prepare and submit to the commissioner an amended charter which meets the objections to the original proposed charter.

(c) Only one original and one amended charter may be submitted to the commissioner of community and regional affairs under this section.

Sec. 29.19.040. RATIFICATION OF CHARTER. The lieutenant governor shall order an election on the question of whether the unorganized borough shall be incorporated as a home rule borough in accordance with the charter approved by the commissioner of community and regional affairs. The proposed charter shall be posted throughout the proposed borough by the lieutenant governor before the election is held. The election shall be held not less than 60 or more than 90 days following the election order.

Sec. 29.19.050. RESULTS OF RATIFICATION ELECTION. (a) If a majority of the votes cast by the qualified voters of the proposed

borough is against the incorporation of a borough under the proposed home rule charter, the proposal is defeated.

(b) If a majority of the votes cast by the qualified voters of the proposed borough favors incorporation of the borough under the proposed home rule charter, the lieutenant governor shall declare that the unorganized borough in which the election was held is incorporated as an organized borough and a municipal corporation in accordance with the provisions of the home rule charter. The lieutenant governor shall provide for the election of the officers provided for in the charter.

(c) The election and qualification of officers under (b) of this section shall be completed by the lieutenant governor in accordance with AS 29.18.120 and the provisions of the home rule charter of the borough.

Sec. 29.19.060. RESUBMISSION OF CHARTER. If a proposed charter is rejected, the charter commission shall prepare, adopt and submit a second proposed charter to the voters within one year of the date of the charter election held under AS 29.19.040. If the second proposed charter is rejected, the charter commission is dissolved.

Sec. 29.19.070. VOTERS, ELECTIONS, COSTS, AND VACANCIES. (a) A person is qualified to vote in an election authorized by AS 29.19.010 - 29.19.060 if he is qualified to vote in state elections and if he is a resident of the unorganized borough proposed for incorporation as a home rule borough.

(b) The lieutenant governor shall conduct elections authorized by AS 29.19.010 - 29.19.060 substantially in the manner provided in the Alaska Election Code (AS 15.05 - 15.60), and shall certify the results of all elections under this chapter. Costs of elections under this chapter shall be paid by the office of the lieutenant governor.

(c) Costs of charter preparation under this chapter shall be paid by the Department of Community and Regional Affairs.

(d) The commissioner of community and regional affairs shall appoint a registered voter of the unorganized borough for which a charter is being prepared to fill a vacancy occurring on the charter commission established under this chapter.

Sec. 29.19.080. APPLICABILITY OF TRANSITIONAL PROVISIONS. The provisions of AS 29.18.130 - 29.18.180 apply to home rule boroughs incorporated under this chapter.

Sec. 29.19.090. STATUS OF HOME RULE BOROUGHS. (a) A home rule borough incorporated under this chapter may exercise all powers granted a first class borough.

(b) For purposes of acquisition of areawide powers, the provisions of AS 29.38.010 apply to a home rule borough incorporated under this chapter unless otherwise specifically provided in the charter of the borough.

* Sec. 6. AS 29.03.010 and 29.03.020 are repealed.

* Sec. 7. UNORGANIZED BOROUGH SERVICE AREAS. (a) The commissioner of education shall recommend to the legislature, not later than January 31, 1981, whether changes should be made in the boundaries of a regional educational attendance area organized under AS 14.08 to conform the boundaries of the regional educational attendance area to an unorganized borough of which it is a part.

(b) The Alaska Coastal Policy Council shall recommend to the legislature, not later than January 31, 1981, whether changes should be made in the boundaries of an existing coastal resource service area organized under AS 46.40 to conform the boundaries of the coastal resource service area to an unorganized borough of which it is a part.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.10.-070(c).

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 580

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to unorganized boroughs, establishing unorganized boroughs, establishing a program of financial assistance for the preparation of regional plans by unorganized boroughs, permitting adoption of home rule charters by unorganized boroughs, and directing submission of recommendations concerning adjustment of the boundaries of service areas of the unorganized borough; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature finds that the single unorganized borough of the state has proven unworkable in accommodating demands from its residents for change and recognizes that a more systematic approach to the planning and delivery of services for residents of this area is necessary. In providing, in this Act, for identifying a common set of boundaries by which to subdivide the state's single unorganized borough into multiple unorganized boroughs, it is the purpose of the legislature to extend the opportunity to residents of unorganized boroughs to assist in planning and program development by

(1) preparing regional plans; and

(2) broadening the range of methods by which residents may incorporate a regional government.

* Sec. 2. INTENT. In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to

regions within unincorporated areas be made only within the boundaries for unorganized boroughs established under AS 29.03.011 - 29.03.021, added by sec. 3 of this Act.

* Sec. 3. AS 29.03 is amended by adding new sections to read:

Sec. 29.03.011. ESTABLISHMENT OF UNORGANIZED BOROUGHS. Except as the boundaries are adjusted as provided in AS 29.03.021, the geographic area within each regional educational attendance area established under AS 14.08.031 is, effective 180 days after the effective date of this Act, established as an unorganized borough.

Sec. 29.03.021. ADJUSTMENT OF BOUNDARIES BY COMMISSIONER. The commissioner of community and regional affairs may establish boundaries other than the boundaries of a regional educational attendance area for an unorganized borough under AS 29.03.011. If requested by residents of an unorganized borough, the commissioner shall hold at least one public hearing within each regional educational attendance area before establishing boundaries for unorganized boroughs under this section. In establishing boundaries under this section, the commissioner shall consider

(1) the standards applicable to the incorporation of boroug under AS 29.18.030;

(2) the regional boundaries adopted by the Native regional corporations established under the Alaska Native Claims Settlement Act and

(3) census divisions of the state used for the 1980 census.

* Sec. 4. AS 44.47 is amended by adding a new section to read:

Sec. 44.47.085. ASSISTANCE FOR REGIONAL PLANS IN THE UNORGANIZED BOROUGH. (a) The commissioner may contract with a municipality, a group of municipalities, or one or more regional Native corporations organized as nonprofit corporations under the laws of the state to

prepare a regional plan for an unorganized borough.

(b) The commissioner may contract for the preparation of only one regional plan for each unorganized borough. The commissioner may contract only if he is satisfied that the party with whom he contracts is capable of preparing a regional plan that considers the entire population of the unorganized borough.

(c) When a municipality, group of municipalities, or one or more regional Native nonprofit corporations proposes to prepare a regional plan for an unorganized borough, the commissioner shall request proposals for preparation of a regional plan. The residents of an unorganized borough may petition the commissioner to request proposals for preparation of a regional plan, and the commissioner shall request proposals if the petition is signed by a number of qualified voters equal to not less than 15 percent of the number of votes cast in the unorganized borough at the last state general election.

(d) A request for proposal for preparation of a regional plan for an unorganized borough made under (c) of this section shall be advertised. The commissioner shall advertise for a period of not less than 45 days by public notice announcements provided to newspapers and radio and television stations. The advertisement of a request for a proposal for the preparation of a regional plan shall

(1) invite a municipality, group of municipalities or regional Native nonprofit corporation to submit a proposal for the preparation of a regional plan;

(2) outline the work to be completed; and

(3) contain other information which the commissioner believes will inform the public of the work to be completed under the contract, and which will assist him in evaluating proposals received.

(e) After receiving the proposals for preparation of a regional

plan, the commissioner shall evaluate them. In evaluating the proposals, the commissioner may request advice from residents of an unorganized borough for which the regional plan is proposed. The commissioner may refuse all proposals and readvertise, or may accept a proposal and enter into a contract as provided in (f) of this section.

(f) A contract entered into under this section

(1) shall require that the regional plan include

(A) an analysis and recommendations concerning incorporation of a borough government for all or a portion of the unorganized borough;

(B) an evaluation of the economic development potential of the unorganized borough;

(C) a recommendation concerning capital facility needs of the unorganized borough;

(D) an examination of demographic, social and environmental factors affecting the unorganized borough;

(E) an examination of

(i) interrelationships among the regional educational attendance area, the coastal resource service area, and any other regional entity responsible for services in the unorganized borough; and

(ii) the interrelationships between the governments of cities within the unorganized borough and regional entities listed in (i) of this subparagraph; and

(F) a process for implementing the recommendations made as part of the regional plan;

(2) shall provide

(A) a mechanism for securing public participation in the preparation of the regional plan;

(B) that the regional plan be completed not later than the June 30 following the third anniversary of the date of the contract; and

(C) that payment for work performed under the contract is subject to legislative appropriation to the account established in (g) of this section;

(3) may permit the contractor to subcontract parts of the work to be performed to one or more subcontractors.

(g) There is established in the Department of Community and Regional Affairs the unorganized borough regional planning account. The account shall be administered by the commissioner and shall be used to pay for contracts entered into under this section.

(h) During each fiscal year, the commissioner may not pay to a contractor under a contract authorized by this section more than $25,000 plus $25 per capita for each person residing within the unorganized borough for which the regional plan is to be prepared, as determined by the commissioner.

(i) In this section, "unorganized borough" means a subdivision established under AS 29.03.011 - 29.03.021.

* Sec. 5. AS 29 is amended by adding a new chapter to read:

CHAPTER 19. DIRECT INCORPORATION OF A HOME RULE BOROUGH.

Sec. 29.19.010. INCORPORATION. (a) The residents of an unorganized borough established in accordance with AS 29.03.011 - 29.03.021 may apply for the incorporation of a home rule borough. The petition for borough incorporation shall be filed with the Department of Community and Regional Affairs and shall include the information and signatures required by AS 29.18.050. Petitions for incorporation filed under this section shall be processed, reviewed and determined in accordance with AS 29.18.060 - 29.18.090.

(b) A petition submitted under (a) of this section shall

(1) specify the number of members of the charter commission, but the number of members may not exceed 15; and

(2) describe the manner of election of members of the charter commission; if election is to be by district, a description of the boundaries of each district shall be included in or attached to the petition.

(c) If the petition submitted under (a) of this section requests election of charter commission members on a basis other than at large within the unorganized borough, the manner of election of the members of the commission shall conform to standards applicable to the composition and apportionment of legislative bodies which are imposed by art. I, sec. 1 of the state constitution.

(d) The standards applicable to the incorporation of an organized borough under art. X, sec. 3 of the state constitution and AS 29.18.030 apply to the incorporation of an unorganized borough under this section

Sec. 29.19.020. CHARTER ELECTION. (a) If the Local Boundary Commission accepts the petition filed under AS 29.19.010, it shall immediately notify the lieutenant governor. Within 30 days after notification, the lieutenant governor shall order an election within the proposed home rule borough to determine whether the voters will elect a charter commission, and to determine the persons elected to serve on the charter commission.

(b) Charter commission candidates are nominated by petition signed by at least 50 registered voters residing within the unorganized borough. The lieutenant governor shall allow not less than 20 or more than 30 days during which candidates for the charter commission may present nominating petitions.

(c) The election on the question of election of a charter com-

mission and the determination of persons elected to serve on the charter commission shall be held not less than 60 or more than 75 days after the date of the election order.

Sec. 29.19.030. PREPARATION OF CHARTER. (a) If, at the election called by the lieutenant governor under AS 29.19.020, a majority of the voters favors election of a charter commission, the persons receiving the highest number of votes cast at that election constitute the charter commission. The charter commission shall prepare a proposed charter and submit it to the Department of Community and Regional Affairs within one year of the first meeting of the charter commission. The commissioner of community and regional affairs shall review the proposed charter for compliance with laws applicable to home rule municipalities and, if it complies, request the lieutenant governor to submit the proposed borough incorporation petition and proposed home rule charter to residents of the proposed home rule borough. If the proposed charter does not comply with law, the commissioner of community and regional affairs shall return the proposed charter to the charter commission with a statement of the legal deficiencies.

(b) Within 90 days of the receipt of the statement of the commissioner of community and regional affairs indicating that the proposed home rule charter does not comply with law, the charter commission may prepare and submit to the commissioner an amended charter which meets the objections to the original proposed charter.

Sec. 29.19.040. RATIFICATION OF CHARTER. The lieutenant governor shall order an election on the question of whether the unorganized borough shall be incorporated as a home rule borough in accordance with the charter approved by the commissioner of community and regional affairs. The proposed charter shall be posted throughout the proposed borough by the lieutenant governor before the election is held. The

election shall be held not less than 60 or more than 90 days following the election order.

Sec. 29.19.050. RESULTS OF RATIFICATION ELECTION. (a) If a majority of the votes cast by the qualified voters of the proposed borough favors incorporation of the borough under the proposed home rule charter, the lieutenant governor shall declare that the unorganized borough in which the election was held is incorporated as an organized borough and a municipal corporation in accordance with the provisions of the home rule charter. The lieutenant governor shall provide for the election of the officers provided for in the charter.

(b) The election and qualification of officers under (a) of this section shall be completed by the lieutenant governor in accordance with AS 29.18.120 and the provisions of the home rule charter of the borough.

Sec. 29.19.060. RESUBMISSION OF CHARTER. If a proposed charter is rejected, the charter commission shall prepare, adopt and submit a second proposed charter to the voters in accordance with AS 29.19.030 - 29.19.050. The second proposed charter shall be submitted to the voters within one year of the date of the charter election held under AS 29.-19.040. If the second proposed charter is rejected, the charter commission is dissolved.

Sec. 29.19.070. VOTERS, ELECTIONS, COSTS, AND VACANCIES. (a) A person is qualified to vote in an election authorized by AS 29.19.010 - 29.19.060 if he is qualified to vote in state elections and if he is a resident of the unorganized borough proposed for incorporation as a home rule borough.

(b) The lieutenant governor shall conduct elections authorized by AS 29.19.010 - 29.19.060 substantially in the manner provided in the Alaska Election Code (AS 15.05 - 15.60), and shall certify the results of all elections under this chapter. Costs of elections under this

chapter shall be paid by the office of the lieutenant governor.

(c) Costs of charter preparation under this chapter shall be paid by the Department of Community and Regional Affairs.

(d) The commissioner of community and regional affairs shall appoint a registered voter of the unorganized borough for which a charter is being prepared to fill a vacancy occurring on the charter commission established under this chapter.

Sec. 29.19.080. APPLICABILITY OF TRANSITIONAL PROVISIONS. The provisions of AS 29.18.130 - 29.18.180 apply to home rule boroughs incorporated under this chapter.

Sec. 29.19.090. STATUS OF HOME RULE BOROUGHS. (a) A home rule borough incorporated under this chapter shall exercise all powers required of a borough under AS 29.33.

(b) For purposes of acquisition of areawide powers, the provisions of AS 29.38.010 apply to a home rule borough incorporated under this chapter unless otherwise specifically provided in the charter of the borough.

* Sec. 6. AS 29.03.010 and 29.03.020 are repealed.

* Sec. 7. UNORGANIZED BOROUGH SERVICE AREAS. (a) The commissioner of education shall recommend to the legislature, not later than January 31, 1981, whether changes should be made in the boundaries of a regional educational attendance area organized under AS 14.08 to conform the boundaries of the regional educational attendance area to an unorganized borough of which it is a part.

(b) The Alaska Coastal Policy Council shall recommend to the legislature, not later than January 31, 1981, whether changes should be made in the boundaries of an existing coastal resource service area organized under AS 46.40 to conform the boundaries of the coastal resource service area to an unorganized borough of which it is a part.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Alaska State Legislature

House of Representatives

Committee on

Community & Regional Affairs

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

TO: Senator Arliss Sturgulewski
FROM: Rep. Bill Parker
DATE: 2/12/80
RE: HB 580, HB 582

* In addition to the points covered in the attached memo, the Committee raised the following issues for discussion:

HB 580

* p. 3 Lines 7-29 This section was questioned in general. It was felt that in every instance in the bill, reference should be made to the legislature rather than to the Legislative Council (see p. 3 line 10). The section should be rewritten to direct that the Governor review requests from state agencies for exemptions to AS 44.17.110. The legislature would then be empowered to override such exemptions and modifications.

* The repealers are to be checked with legislative legal staff.

* After discussion of the census lines, it was determined that mention should be made of these boundaries, along with those of the ANCSA, on page 2.

* Use of the term "substantially" (p. 6 line 17) was questioned. McCarter suggested that this was legally applied as there may be technical difficulties in complying with all the requirements of the election code if there are no election clerks in the areas.

HB 582

* If the term "may" (p. 2 line 26) is changed to "shall", the reference to housing (p. 3 line 1) should be eliminated.

* p. 2 lines 5-6. The legal meaning of the term "advertise" will be checked to see if it is adequate and "by any means which he believes will provide adequate notice etc." will be eliminated.

HB 583-586 will be reviewed Feb. 13

RE: Local Government Study
Legislation

Dear Arliss:

I have reviewed with great interest the legislation resulting from the local government study that you co-chaired. I believe that the legislation your committee has proposed, which I have seen in the form of House Bills 580-586, successfully addresses deficiencies in the State's municipal law that were pointed out during the course of the committee's study. As one who has had some experience practicing municipal law in Alaska, I believe that the amendments proposed in these bills make important improvements in the statutes governing Alaska's municipalities. If passed, these bills will create a better statutory framework for both urban and rural local government, affording needed flexibility to meet unique community needs.

I also would like to offer the following comments and suggestions regarding the specifics of these bills. These address technical matters which, I believe, may be resolved easily while preserving the desirable policy thrust of the legislation as proposed.

HB 580

29.03.021--If the commissioner adjusts boundaries, when does the establishment of an unorganized borough that is the subject of such an adjustment become effective? Some languge positively declaring the establishment of unorganized boroughs with adjusted boundaries, similar to that in 29.03.011, might be helpful.

GARRETT, KLINKNER & BENDELL
ATTORNEYS AT LAW
900 WEST FIFTH AVENUE, SUITE 540
ANCHORAGE, ALASKA 99501
(907) 276-2221

44.17--A specific requirement that districting be reflected, to the extent feasible, in agency budgets commencing with a specified fiscal year, might help move the districting process along.

29.19.020--What are the requirements for the nominating petitions referred to in this section? They might be made analogous to those in AS 29.13.020.

29.19.030--What happens if the commission fails to complete a charter in one year, or if it fails to modify a proposed charter within 90 days of rejection by the commissioner of community and regional affairs. If such a failure terminates the existence of the commission and its authority to act, the statute should so specify.

Disputes may arise as to whether particular charter provisions conform to state law. Several cases (for example, the one involving the Anchorage Charter's Notice of Claims Provision) have been litigated over this issue. A provision in Chapter 29.19 providing for judicial review of a charter rejection, the parties who may seek such review, and the procedure after such review has been completed, would be helpful.

29.19.040--Should there be a time limitiation for the ordering of an election after it has been requested by the commissioner of community and regional affairs?

29.19.070--This section may cause problems. Stating that the referenced sections apply may be interpreted to mean that other statutes not mentioned do not apply-for example, the part of AS 29.18 pertaining to land selection.

HB 585

As 29.08.010 also should be amended to read:

> A home rule municipality is a municipal corporation and political subdivision and is an organized borough [of the first class] or a city of the first class which has adopted a home rule charter. It has all legislative powers not prohibited by law or charter.

Since both first and second class boroughs may adopt a charter rule under this bill (and under HB 530, too, as I

GARNETT, KEINKNER & BENDELL
ATTORNEYS AT LAW
900 WEST FIFTH AVENUE, SUITE 540
ANCHORAGE, ALASKA 99501
(907) 276-2221

will discuss below), AS 29.08.010 should be consistent with that change.

STATUS OF HOME RULE BOROUGHS CREATED UNDER HB 580 OR 585

The creation of home rule boroughs under either bill creates a conceptual problem. While this problem in no way detracts from the substantive merits of this legislation, it should be addressed, and one of several policy solutions adopted.

Title 29 presently provides for first and second class boroughs. The principal distinction between them arises in AS 29.38, which specifies how first and second class boroughs, respectively, exercise non-areawide powers. First class boroughs are authorized to exercise any general law municipal power on a non-areawide basis, AS 29.38.010. Second class boroughs are limited to those powers conferred at incorporation, by AS 29.48.020, or approved at an election, AS 29.38.020-050. The labeling of a borough as "first class" or "second class" is basically shorthand for this distinction.

As HB 580 and 585 now stand, a home rule borough formed under either of those bills need not conform to the first class/second class borough distinction in AS 29.38. A new borough charter could adopt as its authority to exercise non-areawide powers one of the alternatives specified in AS 29.38, or develop its own approach, for example, by making the exercising of some, but not all non-areawide powers subject to voter approval. All of these options are open because AS 29.38 does not govern home rule boroughs, see AS 29.13.100. Since Title 29 refers throughout to "first and second class boroughs", it is important that the types of boroughs that may be created (a policy question) and the title's nomenclature (a housekeeping matter that should be resolved after the policy has been determined), be consistent.

There are several possible approaches to this problem:

1. Require each new home rule borough formed under HB 580 or HB 585 to designate itself either a first class or second class borough, by adopting the corresponding authority to exercise non-areawide powers under AS 29.38.

2. The same as (1) above, but in addition specify that a home rule borough formed under HB 585

GARNETT, KLINKNER & BENDELL
ATTORNEYS AT LAW
900 WEST FIFTH AVENUE, SUITE 540
ANCHORAGE, ALASKA 99501
(907) 276-2221

remains a second class borough governed by AS 29.38.020-050.

3. Provide that home rule boroughs formed under HB 580, HB 585, or both, may determine by charter the scope of their authority to exercise non-areawide powers, and are not limited to the two options provided in AS 29.38.

If (1) or (2) above is adopted, the present nomenclature is sufficient. If (3) is adopted, references to "first and second class boroughs" must be modified to take account of the hybrid home rule boroughs that may be created. In this case, if the legislation abolishing third class boroughs passes, a reference to "organized boroughs" would be sufficient. In the classification of boroughs there would be three distinct classes: home rule, first class, and second class.

Thank you for your consideration.

Yours truly,

Thomas F. Klinkner

HB 580, unorganized boroughs and state agencies

This responds to your request for comments on HB 580, relating to unorganized boroughs and state agencies. Our comments follow:

1. AS 29.03.021 refers to an indefinite, undefined "commissioner." Its imprecision makes it a fitting precursor of the things to come.

2. AS 44.17.110 requires "agencies" (whatever that means, the University? the judiciary? ASHA?) to administer their "programs" (whatever that means, activities? goals? budgets?) on the "basis of" (whatever that means, pursuant to? in accordance with? coterminus with? by?) "districts," a superfluous and ultimately confusing synonym for organized boroughs, unorganized boroughs, and unified municipalities. The districts will bear only a partial relationship to many agency activities and no relationship to others. Any reporting, programming, planning, or coordinating on this basis will be correspondingly incomplete, misleading, and wasteful. Worse, because humans are rationalizing animals, bureaucrats will try to rationalize their agency's activities with the bill's requirements for administration on the basis of the districts rather than on the basis of actual needs. If a given amount of agency activity is programmed for the Kenai, rather than for southcentral, then Kenai will get the action regardless of the need.

3. AS 44.17.120 provides for the legislature to make exemptions but does not say how. Presumably, if experience is a guide, exemptions will be made by concurrent resolution on an ad hoc basis. That is not a legislative function under the constitution. In addition, not specifying how to make an exemption raises problems of equal treatment.

4. AS 29.19.010 -- 070 provides for the incorporation of unorganized boroughs as home rule boroughs. Under the present municipal code, only first class municipalities may adopt home rule charters. A sense of symmetry (and of

[illegible] the range of methods by which residents may

fairness) commands that the good citizens of our second and third class boroughs be afforded an equal opportunity. Indeed, in Alaska, the equal protection clause may dictate that result.

The Alaska courts operate on the basic premise that laws governing the administration of government are commands which may be invoked by anyone who feels adversely affected by an agency action which is arguably not consistent with the law. E.g., United States Smelting, Refining & Mining Co. v. Local Boundary Comm'n., 489 P.2d 140 (Alaska 1971) (standards for annexation); State v. Aleut Corp., 541 P.2d 730 (Alaska 1975)(consultation on land disposal); Coghill v. Boucher, 511 P.2d 1297 (Alaska 1973)(early count of votes). The result is that vague and indefinite statutes, such as this bill, which may or may not require an agency to do something or to refrain from doing something are imposed to prevent the agency's doing anything on totally unexpected grounds and for totally unexpected reasons. The agency cannot be sure, or even reasonably comfortable about, what it is supposed to do, but the courts will tell it.

In United States Smelting, a boundary change recommended by the Local Boundary Commission in accordance with powers vested in it by the constitution was held invalid because the commission had not adopted standards which were required by a statute but which were in no way required by the constitution. In Aleut Corp., a land sale was enjoined (even though a complaint was never filed) on the grounds that the statute required consultation with traditional tribal councils when it referred to local planning authorities. In Coghill, early release of election returns was enjoined on the grounds that it could only be authorized by regulations adopted under the Administrative Procedure Act.

Under AS 44.17.110 as proposed by this bill all the "agencies" of the state government must somehow gear their programs to the districts, i.e., to organized boroughs and unified municipalities and to the unorganized boroughs the bill would establish. What that means, no one knows. Presumably, the current land disposal program must be organized on that basis in order to plan and report on that basis. Presumably, criminal prosecutions must also be on that basis. What happens if the agency fails to comply is anyone's guess. Presumably, land disposals can be enjoined and criminal prosecutions halted. Obviously, the statistics on elections will be way out of line. Campaign disclosure and lobbyists reports will be equally so. Fish and game

statistics do not have a prayer.

The only cure for these uncertainties is either (1) make the use of districts discretionary with the agency, or (2) rewrite section 44.17.110 to be precise. The latter is impossible because no one really knows what result precisely is intended. Accordingly, it must be made a matter of discretion. If it is made discretionary, section 44.17.-120 should be eliminated. If it is not, the bill, if it passes, should be vetoed.

RWP/pjg

[illegible] the range of methods by which residents may

CSHB 580

"AN ACT RELATING TO UNORGANIZED BOROUGHS, ESTABLISHING UNORGANIZED BOROUGHS, ESTABLISHING A PROGRAM OF PLANNING ASSISTANCE FOR UNORGANIZED BOROUGHS, AUTHORIZING ADOPTION OF HOME RULE CHARTERS BY UNORGANIZED BOROUGHS, AND DIRECTING SUBMISSION OF RECOMMENDATIONS CONCERNING ADJUSTMENT OF THE BOUNDARIES OF SERVICE AREAS OF THE UNORGANIZED BOROUGH"

BOUNDARIES

The bill divides the unorganized borough into "unorganized boroughs" using the boundaries of the Regional Educational Attendance Areas (REAAs). Public hearings are held, upon request, in each REAA by the Commissioner of Community and Regional Affairs and provision is made for adjustment of the boundary lines.

REGIONAL PLANNING

Each unorganized borough is eligible for regional planning program funds to study the economic, social, and environmental conditions of the area and the interrelationships between governmental units along with an examination of the feasibility of borough organization. No one is required to either undertake a study or form a borough. $25,000 plus $25 per capita is available to each unorganized borough for each of three years for regional planning programs.

HOME RULE

Title 29 is amended allowing for the incorporation, by petition to the Local Bounday Commission, of unorganized boroughs as home rule municipalities and the adoption by vote of the people of a home rule charter. Nothing in the bill requires the incorporation of a home rule borough or borough of any class. Rather, this section broadens the options currently available to residents in the unorganized borough.

CSHB 581

"AN ACT RELATING TO THE RESPONSIBILITIES OF EXECUTIVE DEPARTMENTS OF STATE GOVERNMENT FOR CERTAIN STATE PROGRAMS"

This bill addresses certain responsibilities of executive departments important to the implementation of CSHB 580. State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted. Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

Alaska's Constitution establishes the policy of maximum self government for the people. This policy has been implemented through creation of boroughs and cities in urban areas and in some rural communities. However, the vast bulk of Alaska lacks any basis for self-government, and the people do not even have the means for planning and participating in the affairs of their own region. It is this problem that provided the principal focus for the interim work of the Senate and House Community and Regional Affairs Joint Local Government Study of 1979.

Legislative proposals of the Joint Committee were derived from (1) a series of studies and analyses sponsored by the Committee, (2) a two-day symposium designed to define issues and problems and suggest policies and directions, and (3) a series of public hearings held throughout rural parts of the state.

The Joint Committee found wide consensus in favor of a maximum measure of self-determination and self-rule, and establishment of regional units throughout the state to provide a basis for planning and program coordination. At the same time, the people do not want to rush into formal governmental organization; nor do they want it mandated.

Accordingly, the Joint Committee has developed an evolutionary approach that will provide people in rural areas with the means for self-government without forcing anything upon them prematurely. Choices and initiatives are left with each region.

HB 580 and HB 581 are two of the bills developed by the Joint Committee.

Juneau, Alaska 99811

CSSB 348

This bill provides for sub-state regional units, called "unorganized boroughs," to be established in the unorganized borough. The Commissioner of Community and Regional Affairs is directed, after public hearings, to determine appropriate boundaries, initially based on REAA boundary lines. Provisions are made for the adjustment of boundary lines.

Each "unor-anized borough" will be eligible for regional planning program funds to assist in determinations of the economic, social, and environmental conditions of the area and the interrelationships between governmental levels, with an examination of the potential and need for borough organization. No one is required to either undertake the study or to form a borough. The planning program and future organization, if any, is up to the local area. Each year, for 3 years, $25,000 plus $25 per capita is available to each unorganized borough for regional planning.

A new chapter is added to AS 29 which allows for incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule boroughs and the adoption by election of a home rule charter. Dual majority votes are required for passage of the home rule charter.

CSSB 349

This bill addresses certain responsibilities of executive departments important to the implementation of CSSB 348.

State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted.

Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery

PEOPLES VIEW

SB 348 or HB 580 goes into effect - 7-1-

Boundaries
- Within 120 days/REAA boundaries are established creating unorganized boroughs boundaries
- Objections/or problem areas - public hearings / Commissioner C/RA can establish other boundaries

QUESTION? Any Local Boundary Commission Involvement?

Regional Planning Program

Proposal request
- Munic., a group of munic, or 1 or more nonprofits interested in preparing may ask Commissioner/C/RA to request proposal (RFP
- Commissioner may request
- 15% voters petition request (voted in last election)

Advertising - proposal
- Commissioner C/RA - 45 or more days Advertising required.

Proposal Acceptance/Rejection
- Commissioner C/RA

NOTE: Commissioner can issue only one contract per unorganized borough
Contractor cannot receive more than $25,000 plus $25 per person in area

ABOVE TWO CAN BE MANDATED

Home Rule Borough

Petition (by residents of Charter Commission)
- filed with Dept. C/RA (must specify number of members - cannot be more than 15-
(must state format for election of members - if district (give boundaries) or at large (be within St. Constit. guidelines)
- if Local Boundary accepts - the L.B. C. will notify Lt. Gov.

Charter Commission
- Lt. Gov. has 30 days to order election - election must be held between 60-75 days from order.
- Charter Commission candidates submit petitions signed by 50 voters to Lt. Gov. within 20/30 days
- Election - if Charter Commission is favored, persons receiving highest no. of votes gets elected

Duties
- prepares proposed Charter and submits to C/RA within 1 year of Charter Commission (if rejected Charter Commission has 90 days to resubmit amend. charters
- C/RA reviews proposed charter and requests Lt. Gov. / election

Election
- Lt. Gov. submits election order on proposed borough incorp. petit plus proposed home rule charter within 60-90 days
- if Charter rejected at election, get one chance for amendment - to be resubmitted within one year. Rejected again=Commissi dissolves)

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

March 21, 1980

The Honorable Bill Parker
Chairman
House Community & Regional
Affairs Committee
Room 112 - Capitol Building
Juneau, Alaska 99811

Dear Mr. Parker:

Re: House Bill No. 580

House Bill No. 580, an Act establishing boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs, was introduced in the House on January 21, 1980 and was referred to the House Community & Regional Affairs and Finance Committees.

For the consideration of the House Community & Regional Affairs Committee, I am enclosing a copy of a Fiscal Note prepared by Joseph K. Donohue, Deputy Commissioner, Department of Revenue concerning the proposed legislation.

Sincerely,

R. D. Stevenson

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY 80 - Reflects travel expenses, notice requirements, and supplies needed for public hearings on drawing boundary lines that differ from REAA's in the unorganized borough.

FY 81 - 85 - Reflects the addition of 3 Local Government Specialists (Range 17), a Clerk Typist III (Range 8) and Clerk Typist II (Range 7) to assist unorganized boroughs in becoming home rule boroughs. Seven proposed regions are presumed to be likely candidates for the home rule option. These areas are 1) Yukon Flats (REAA 13), 2)REAA 12, 3) NANA region (REAA 1), 4) Petersburg/Wrangell (part of REAA 19), 5) Prince of Wales Island (part of REAA 19), 6) The Aleutian Chain (parts of REAA's 8 and 10), and 7)Prince William Sound (REAA 21). It is anticipated that if this bill passes this session the bulk of the activity will take place during FY 81 and FY 82 and will begin to lessen gradually through FY 85 as the newly incorporated boroughs become more self-sufficient.

The high travel cost during FY 81 reflects the need to administer both of the main

IV. DATE 1-21-80 PREPARED BY Doug Griffin Doug Griffin

AGENCY Community & Regional Affairs

Original: Legislative Finance PHONE 465-4736

activities in the bill: drawing the boundaries for the unorganized boroughs and assisting the seven areas previously mentioned in drawing up home rule charters.

The Local Boundary Commission's involvement in the incorporation of home rule boroughs under Section 4 of this bill is not budgeted for in this fiscal note. The annual appropriation received by the LBC to perform its constitutional and statutory duties may be adequate to cover the expenses incurred due to passage of this bill. If these expenses cannot be met by the LBC's annual appropriation there should be adequate lead time to secure additional funding so that the Commission may adequately participate in the borough incorporation process.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
It may be anticipated that the residents of an unorganized borough established under this bill will apply for the incorporation of a home rule borough, especially if they are so located that they would encompass the Trans-Alaska Pipeline corridor. In this case the borough would be able to impose a substantial property tax on property assessed and taxable by the state under AS 43.56. Municipal taxes levied on this type of property are a direct credit against state taxes. It is estimated that the FY 81 loss to state revenues could potentially be $25.05 million. This analysis does not include the possible effects of a gasline startup in the early 1980's.

There are no administrative costs associated with the proposed bill for the Department of Revenue.

Bill No. HB 580 (SB 348) Date February 4, 1980

Title An Act Establishing Unorganized Boroughs... Contact: Judy DuBois
John Post

The Department of Labor finds no fault with the purpose of this bill. Section 2 provides for the establishment of unorganized boroughs within the geographical boundries of the rural educational attendance areas (REAAs) and the adjustment of their boundaries. The bill also requires the collection of data and information about state programs with reference to a set of boundaries adopted for use by all state agencies. (Section 3). Included is a section that authorizes the adoption of home rule charters by unorganized boroughs. (Section 4).

Currently all areas of the state not part of an organized borough are classified as a single unorganized borough. Essentially this bill allows for the subdivision of this single unorganized borough into several unorganized boroughs with the option of becoming incorporated home rule boroughs.

The area of immediate interest to the Department is Section 3, which amends AS 44.17. When combined with the Provisions of Section 2 where the Commissioner of C&RA may establish/adjust the boundaries of unorganized boroughs, the bill has the potential of disrupting critical data collection and analysis. This is not only a matter of potential file revision and duplication at great cost, but also a matter of potential invalidation of or rendering useless time series of data which are key elements in any serious evaluation or planning effort. The bill, if adopted would have serious implications for the Department.

The Department of Labor (Research & Analysis) collects and disseminates data in a geographical format based on census divisions. The boundaries for the census divisions evolved from election district boundaries and the boundaries of organized boroughs. The census areas have been reclassified for the 1980 census in a plan that treats the unorganized borough similar to that described in this bill. Each organized borough in the state will coincide with a census area while the remaining sections of the state are divided into areas and subareas based on Native corporation boundaries and REAAs. This plan was adopted by the Governor's Committee on the census in conjunction with the U.S. Census Brueau. The census area concept geographically divides the state into 23 major areas and 24 subareas. Certain data collected by the Department of Labor which is required and funded by federal agencies must be transmitted to those agencies in the census area format, i.e., ES-202 employment and earnings employer reports, labor force estimates, population figures, and others. The impact of this bill on the department would be substantial. Adoption of a new geographical classification scheme would alter the census area agreement between the Governor's Census Committee and the U.S. Census Bureau. It would be necessary to convert the geographical coding of 10,000 employer files, 50,000 UI claimant files and upwards of 60,000 job applicant files.

At a minimum, an amendment to Section 2 emphasizing correlation of boundaries with the latest Census areas and subareas (or divisions), is essential to good planning and administration over time; or an amendment to Section 3 allowing census area or subarea information (aggregated to approximate unorganized/organized boroughs) to be sufficient for reporting requirements.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY 80 - Reflects travel expenses, notice requirements, and supplies needed for public hearings on drawing boundary lines that differ from REAA's in the unorganized borough.

FY 81 - 85 - Reflects the addition of 3 Local Government Specialists (Range 17), a Clerk Typist III (Range 8) and Clerk Typist II (Range 7) to assist unorganized boroughs in becoming home rule boroughs. Seven proposed regions are presumed to be likely candidates for the home rule option. These areas are 1) Yukon Flats (REAA 13), 2) REAA 12, 3) NANA region (REAA 1), 4) Petersburg/Wrangell (part of REAA 19), 5) Prince of Wales Island (part of REAA 19), 6) The Aleutian Chain (parts of REAA's 8 and 10), and 7) Prince William Sound (REAA 21). It is anticipated that if this bill passes this session, the bulk of the activity will take place during FY 81 and FY 82 and will begin to lessen gradually through FY 85 as the newly incorporated boroughs become more self-sufficient.

CSHB 580/CSSB 348 (continued)

The high travel cost during FY 81 reflects the need to administer both of the main activities in the bill: drawing the boundaries for the unorganized boroughs and assisting the seven areas previously mentioned in drawing up home rule charters.

There will be no fiscal impact in Sec. 4 of this bill until there is an appropriation (CSHB 886) for regional plans. The Department does anticipate the following additional cost at such time as appropriations are made.

Staff to monitor and oversee contracts.

Personnel			42,156
Local Government Specialist IV (Range 19)			32,934
Benefits @ 28% base pay			9,222
Travel 10 trips @ 600			6,000
Contractural			2,700
Communications	1,000		
Printing and Advertising	200		
Office Space 100 Sq. ft. @ 1.25 x 12	1,500		
Commodities			300
Equipment (one time only)			700
		TOTAL	51,856

Summarization of:

Need for a Regional Planning Model
The AHTNA Region

INTRODUCTION:

As Exhibit A (Need for a Regional Planning Model) aptly demonstrates there is an urgent need for a mechanism to coordinate and integrate developmental plans, and service delivery by federal and state agencies within the AHTNA Region.

There is presently no such mechanism to coordinate inter-agency services, or the great variety of developmental schemes which are involved within, or directly and significantly impact the Region.

Some of the major forces which will impact the Region result from ANCSA d-2 stipulations, national park plans for the McKinley-Wrangell reserves, Northwest Gasline construction, state and Native land conveyances, Susitna-Salmon Gulch hydroelectric projects, mineral, oil and gas exploration/production. Additionally, the emergence of Valdez as a deepwater port of entry to interior Alaska can be anticipated to have highly significant socio-political, and economic impacts on the AHTNA Region.

It is evident that these forces involve federal, state, local and private interests, which at this time act upon the Region in their own interests absent any mechanism for coordination and integration. The immediate remedy must therefore be the urgent and timely establishments of such a mechanism.

I will send you a copy

The Regional Planning Model (Exhibit A) provides the basis for the establishment of an effective coordinating and integrating mechanism.

OBJECTIVES OF THE MODEL:

The central objectives to be realized through model formulation are as follows:

1) To provide a mechanism of implementation that will guide and direct the drafting of a regional cooperative planning organization for the area, and develop guidelines for future permanent government structure.

2) The implementation of such an organization will allow for the development and management of integrated programs, services, facilities in community development, economic growth, infrastructure and land use planning. Special attention and reference are given to social, physical, and economic issues influencing the Region. Particular emphasis will be given to the development and implementation of appropriate projects, and in the preparation of proposals for grant applications.

3) Planned and coordinated management of the region's resources is intended to approach maximum utilization/enjoyment of the resources for those who reside within, as well as those who visit the area.

4) Because citizen participation and inter-agency coordination are the essential elements that will determine the success of this innovative planning model, citizen input will be maximized during the project development.

PROGRAM PROCEDURAL FORMAT:

Upon sufficient funding, endorsement and conceptual initiation of the program, the following outlines the intended course of action, approximately one year's time:

1. Organize board of directors and/or coordinating committee.

2. Establish staff personnel for administrative organization.

3. Contact all interested/participating persons and agencies for initial introduction, review and opinion.

4. Formulate preliminary model and structural organization with state and federal agencies participation.

5. Develop and hold information workshops on local coordination and self determination. These workshops will be held in the AHTNA Region.

6. Revise and review process as needed.

7. Maintain channels of advice and opinion with state legislators and agencies.

8. Formulate mode of implementation system design for primary model alternates.

9. Provide preliminary cost analyses of necessary operational and related support facilities as required.

10. Establish communication methodology for dissemination of priority recommendations and support data to all vested parties and concerned agencies.

11. Obtain conceptual endorsement and support for model and program format, submit to proper govermental agencies for review and endorsement. Review and revise as necessary.

12. Upon endorsement and acceptance of program, organize preliminary plans for initiation of established implementation stage.

13. Begin implementation stage.

GENERAL PROCESS OF PROGRAM EVALUATION:

1. Maintain periodic citizen and agency workshops as required.

2. Establish internal review process for program consistency.

3. Review and audit program efficiency.

PRELIMINARY BUDGETARY CONSIDERATIONS:

The following estimates are anticipated expenses for program development and organization during the initial stage (estimated one year duration):

Office equipment, supplies, printing and space rental	
Equipment, supplies, printing	$ 10,000
Rental of office @ $500/mo.	6,000
Administrative Costs	
Staff	50,000
Support consultant fees (as required)	15,000
Travel and coordinating expenses (village people, others)	10,000
Miscellaneous and contingency costs	9,000
Aggregate Funding Required	$100,000

Dear Arliss,

I enjoyed testifying yesterday and hope that some of my comments were useful to you. I'm sure some of them were redundant.

In follow up on my question as to whether there are, or you contemplate, any statutorily required functions of a home rule borough, I'm afraid the citation you gave me - 29.33.010(b) - does not go to my question. Let me try again:

The present practice is for boroughs or cities only to go for home rule after having already established and maintained a fairly sophisticated form of local government, those forms having been required under statute to carry out certain functions. The presumption is that those functions would continue under home rule. However, I do not think there are any particular functions statutorily required of home rule goverments. That means, I think, that an unorganized borough seeking home rule status could, if it wished, perform only the function of, say, fire protection in a service area, and still be a home rule government. In other words, it would be very much like the third class boroguhs you seek to eliminate.

Perhaps (quite likely, in fact) I am missing something in the present law. Or perhaps the result I outlined above is exactly the result you want. I don't see too much wrong with it, in fact. But I was just wondering if you had thought about it.

Love to see the Senate debating!

As you say, regards to a goodwoman!

Summarization of:

Need for a Regional Planning Model
The AHTNA Region
Dr. L. Selkregg - February 1980

INTRODUCTION:

A catalyst is needed to integrate and coordinate developmental plans emerging within the AHTNA-Copper River Region.

The concern for local autonomy and regional coordination of these plans encouraged the AHTNA Regional Corporation and Copper River Native Association to further investigate feasible alternate mechanisms that will provide for orderly and planned implementation.

Therefore, upon their commission, an inventory analysis of existing and impending institutional, economic and social issues that will influence the future of the region was developed. Additional data gaps and informational deficiencies were identified as they related to the pertinent issues.

Consolidation of questions, facts and recommendations is the central format of the text "Need for a Regional Planning Model - The AHTNA Region" by Dr. L. Selkregg, 2-1980.

The absence of any such regional government (Exh. A) along with the enormity of impending developmental issues within the Unorganized Borough, indicate the degree of urgency for current action.

CENTRAL ISSUE:

There is presently no existing organizational mechanism to coordinate inter-agency services and development schemes that are involved within the region.

The number of agencies and entities concerned are as diverse as those central institutions that spawned them. Federal, state, local and private interests are represented in a myriad of departments and commissions.

Major forces of impending change are evidenced in ANCSA d-2 stipulations, national park plans for McKinley-Wrangell reserves, Northwest Gasline construction, state and Native land conveyances, Susitna-Salmon Gulch hydroelectric projects, mineral, oil and gas exploration/production in conjunction with the emergence of Valdez as a deepwater port of entry to Interior Alaska are a few of the primary and significant projects that will have an impact on the area.

The absence of any such coordinating mechanism, in view of the potential regional projects and diverse institutional/private interests within the region, suggests the need to act now.

The Regional Planning Model text provides preliminary information and structural analysis that can lead to a feasible solution.

OBJECTIVES OF MODEL:

The central objectives intended to be realized through model formulation are as follows:

1) To provide a mechanism of implementation that will guide and direct the drafting of a regional cooperative planning organization for the area, and develop guidelines for future permanent government structure.

2) The implementation of such an organization will allow for the development and management of integrated programs, services, facilities in community development, economic growth, infrastructure and land use planning. Special attention and reference are applied to the social, physical and economic issues pertaining to the people of the region. These are the people for whom the model is developed.

3) Planned and coordinated management of the region's resources is intended to approach maximum utilization/enjoyment of the resources for those who reside within, as well as those who visit the area.

Citizen participation and inter-agency coordination are the essential elements that will determine the success of this innovative planning model.

PROGRAM PROCEDURAL FORMAT:

Upon sufficient funding, endorsement and conceptual initiation of the program, the following outlines the intended course of action, approximately one year's time:

1. Organize board of directors and/or coordinating committee.

2. Establish staff personnel for administrative organization (approximately three individuals of expertise with consultant support upon need).

3. Contact all interested/participating persons and agencies for initial introduction, review and opinion.

4. Formulate preliminary model and structural organization with state and federal agencies participation.

5. Develop and hold information workshops on local coordination and self determination.

6. Revise and review process as needed.

7. Maintain channels of advice and opinion with state legislators and agencies.

8. Formulate mode of implementation system design for primary model alternates.

9. Provide preliminary cost analysis of necessary operational and related support facilities as required.

10. Establish communication methodology for dissemination of priority recommendations and support data to all vested parties and concerned agencies.

11. Obtain conceptual endorsement and support for model and program format, submit to proper governmental agencies for review and endorsement. Review and revise as necessary.

12. Upon endorsement and acceptance of program, organize preliminary plans for initiation of established implementation stage.

13. Begin implementation stage.

GENERAL PROCESS OF PROGRAM EVALUATION:

1. Maintain periodic citizen and agency workshops as required.

2. Establish internal review process for program consistency.

3. Review and audit program efficiency.

PRELIMINARY BUDGETARY CONSIDERATIONS:

The following estimates are anticipated expenses for program development and organization during the initial stage (estimated one year duration):

Office equipment, supplies, printing and space rental

Equipment, supplies, printing	$ 10,000
Rental of office @ $500/mo.	6,000

Administrative Costs

Staff @ 3 qualified individuals	50,000
Support consultant fees (as required)	15,000
Travel and coordinating expenses	10,000
Miscellaneous and contingency costs	9,000
Aggregate Funding Required	$100,000

TESTIMONY

MEMORANDUM State of Alaska

TO: John Halterman, Deputy Director
Division of Policy Development
& Planning
Office of the Governor

DATE: February 21, 1980

FILE NO: 100H

TELEPHONE NO: 465-3900

FROM: Ron Lynd, Deputy Commissioner
Administration
Department of Transportation
& Public Facilities

SUBJECT: HB 580 - State Program Line to Follow Standardized Boundaries

The impact of HB 580 upon Department of Transportation & Public Facilities (DOT/PF) for planning and management cannot be adequately assessed without a clearer idea of what is envisioned by the bill. However, a simplified reading of AS 44.17.110 would indicate that all statistics, planning, and information (including financial) would need to be on the basis of districts designated by AS 44.17.100. This would be a considerable shift from the alignments now used. While not impossible, it would be very time consuming and, in my view, counter productive until a clear picture of the benefits expected are outlined.

I would suggest that instead of passage of this bill, which mandates all information along these predetermined lines, funding be made available to one central group to identify the results desired, their benefits, and the costs associated with providing the information. If the bill were passed as it now stands, it would have a financial impact on DOT/PF because it would be necessary for us to revise our financial reporting and planning data processing systems to track the information by the new districts. We would also need to prepare our transportation plans in much finer detail, which would increase their cost.

In summary, I believe that there would be merit in a system which allowed extraction of statistical and program information in a manner which would make it compatable. I am not sure this bill has the best approach. If a central geographic coding were agreed to and sufficient data processing support provided, agencies could supply raw data by location, which is more specific than by district. Then when it would be beneficial to do planning on a district basis, it could be done, or if it were more reasonable to do the planning on a larger basis without reference to district, that could also be done.

EDWARD HOFFMAN'S STATEMENT ON PROPOSED LEGISLATION ON

THE UN-ORGANIZED BOROUGH

THIS STATEMENT I MUST MAKE CLEAR IS NOT ONLY MADE AS CHAIRMAN OF THE BOARD OF THE ASSOCIATION OF VILLAGE COUNCIL PRESIDENTS, BUT IT REFLECTS THE VIEWS OF OTHER CONCERNED CITIZENS AND ORGANIZATIONS WHO HAVE SPENT CONSIDERABLE HOURS IN ANALYZING THESE BILLS.

FIRST, THOSE OF US IN THIS REGION WOULD LIKE TO IMPRESS ON THE LEGISLATURE SEVERAL POINTS:

1. WE CONSIDER THE ISSUES RAISED BY SENATE BILL 348 TO SENATE BILL 354 TO BE OF PARAMOUNT IMPORTANCE TO OURSELVES AND OUR CHILDREN AND WE CONSIDER THIS QUESTION OF GOVERNMENT TO BE THE SINGLEMOST IMPORTANT ISSUE WE WILL BE ADDRESSING IN THE 1980'S.

2. WE ARE DETERMINED TO RESOLVE THIS ISSUE BY 1983. IF THE OPPORTUNITY IS GIVEN TO US.

3. THE BILLS BEING PROPOSED ARE AN EXCELLENT STARTING POINT BUT PREMATURE IN THAT NO SERIOUS STUDIES HAVE BEEN MADE BY THE PEOPLE OF THIS REGION ON THE ISSUE THEREBY MAKING ACCEPTANCE OR REJECTION OF THE CONCEPTS PROPOSED IMPOSSIBLE.

AFTER CURSORY ANALYSIS OF THE PROPOSED BILLS, THESE ARE OUR VIEWS ON EACH:

1. SENATE BILL 348 IS NOT AN ANSWER TO LOCAL GOVERNMENT IN RURAL ALASKA AS IT SIMPLY CUTS THE EXISTING UN-ORGANIZED BOROUGH INTO ADMINISTRATIVE UNITS WITHOUT PROVIDING FOR LEGISLATIVE AND ENFORCEMENT POWERS BY RURAL ALASKANS. IN ESSENCE THIS BILL WOULD MERELY EXTEND THE GOVERNOR'S PLANNING POWERS TO THE LOCAL LEVEL, WHICH IS IN ITSELF A GOOD IDEA, BUT DOES NOT REQUIRE HARD AND FAST BOUNDARIES AS PROPOSED. THIS BILL MERELY FORMALIZES THE "ADVISOR" ROLE RURAL ALASKANS HAVE BEEN PLAYING FOR OVER 20 YEARS. WE FIND HOWEVER THAT THE CONCEPT ALLOWING FOR AN UNORGANIZED BOROUGH TO INCORPORATE INTO A HOME RULE BOROUGH A GOOD ONE AND ARE SUPPORTIVE OF THE CONCEPT. WE FEEL STRONGLY HOWEVER THIS LEGISLATION IS PREMATURE AS IT IS NOT BASED ON FACTS VERIFIABLE BY EXPERIENCE OR SERIOUS STUDY, AND AS SUCH SHOULD NOT BE PASSED BY THE LEGISLATURE.

2. SENATE BILL 348 HAS IN IT CERTAIN DESIRABLE ELEMENTS IF WE COULD STAY AWAY FROM SENATE BILL 348 AND THE BOUNDARIES IT PURPORTS TO CREATE. THIS BILL WOULD BE ACCEPTABLE IF THE PRINCIPLE OF LOCAL SELF-DETERMINATION IS RESPECTED AND IT WILL NOT BE IF A CONTRACTOR WERE HIRED BY THE COMMISSIONER AND RESPONSIBLE TO HIM TO DETERMINE THE ISSUE WITHOUT THE ACTUAL INVOLVEMENT OF THE LOCAL ELECTORATE. WHAT WE FIND DESIRABLE HOWEVER IS THE LEGISLATURE APPROPRIATING FUNDS TO REGIONAL ORGANIZATION FOR PURPOSES OF STUDY AND PLANNING, BUT SB 349 IS NOT ACCEPTABLE AS PRESENTLY DRAFTED AS IT GIVES TO A CONTRACTOR DECISIONS THAT ARE, AND MUST BE, RESERVED FOR THE LOCAL PEOPLE.

3. SB 350 GIVES TO THE GOVERNOR DECISIONS WHICH SHOULD BE MADE BY THE ELECTORATE AND RECIPIENTS OF STATE SERVICES. THE GOVERNOR CANNOT EVALUATE HIS OWN PERFORMANCE. WE RECOMMEND NO PASSAGE.

4. SB 351 IS ACCEPTABLE AND DESIRABLE AS THE AID PROPOSED IS NEEDED BY RURAL MUNICIPAL GOVERNMENT.

5. SB 352 IS AN EXCELLENT HOUSEKEEPING TOOL FOR THE LEGISLATURE AS LONG AS IT DOES NOT ELEVATE MONETARY CONSIDERATIONS ABOVE HUMAN NEEDS AND AS LONG AS THE LEGISLATURE DOES NOT ALLOW MONEY TO FOREGO ITS CONSTITUTIONAL RESPONSIBILITIES.

6. SB 353 IS AN ACCEPTABLE BILL AS LONG AS IT INCLUDES SECOND CLASS CITIES.

7. SB 354 IS ACCEPTABLE.

IN CLOSING, THOSE OF US IN THIS REGION WOULD LIKE TO REITERATE TO THE MEMBERS OF THE COMMITTEE THAT THE BILLS DEALING WITH THE UNORGANIZED BOROUGH ARE ALL PREMATURE AS WE ALL, INCLUDING THE LEGISLATURE, DO NOT KNOW WHAT WE ARE TALKING ABOUT. WE ALL HAVE NO BASIS TO SUPPORT THESE BILLS AS WE HAVE NOT DETERMINED FOR OURSELVES AS VOTERS AND RESIDENTS OF THIS AREA OF 56 VILLAGES, AS TO WHAT IT IS WE WOULD LIKE TO DO BECAUSE WE HAVE NOT STUDIED THE ISSUE, NOR HAVE WE CONSULTED WITH OUR VILLAGES. WE ALSO CANNOT RULE OUT INCORPORATING INTO MUNICIPAL GOVERNMENTS UNDER EXISTING LAWS SIMPLY BECAUSE WE HAVE NOT SERIOUSLY STUDIED THE ISSUE.

WE FELL THAT UNTIL WE HAVE STUDIED THIS ISSUE THAT THE STATE LEGISLATURE SHOULD NOT PRE-EMPT OUR RIGHTS TO SELF-DETERMINATION, THE VERY REASON WHY WE HAVE LOCAL GOVERNMENTS. WHAT WE WOULD LIKE THE LEGISLATURE TO DO IS TO PROVIDE FUNDS FOR US TO STUDY OUR OPTIONS AND PROVIDING AN EFFECTIVE DATE AS TO OUR DECISION. WE SHOULD AT LEAST BE GIVEN THIS OPPORTUNITY. AT PRESENT WE ALL DO NOT KNOW WHAT WE ARE TALKING ABOUT, AND FOR WE AND THE LEGISLATURE TO MAKE DECISIONS AT THIS TIME WOULD BE IRRESPONSIBLE. WE ALSO HAVE A RESPONSIBILITY TO OUR VILLAGE PEOPLE WHO TODAY DO NOT EVEN KNOW WHAT WE ARE TALKING ABOUT. GIVE US MONEY TO INFORM THEM OF THEIR OPTIONS AND THIS ARGUMENT WILL NO LONGER HOLD WATER. THEN AND ONLY THEN CAN WE MAKE OUR DECISION, AND WE WILL.

Bill No. HB 580 (SB 348) Date February 4, 1980

Title An Act Establishing Unorganized Boroughs... Contact: Judy DuBois
John Post

The Department of Labor finds no fault with the purpose of this bill. Section 2 provides for the establishment of unorganized boroughs within the geographical boundries of the rural educational attendance areas (REAAs) and the adjustment of their boundaries. The bill also requires the collection of data and information about state programs with reference to a set of boundaries adopted for use by all state agencies. (Section 3). Included is a section that authorizes the adoption of home rule charters by unorganized boroughs. (Section 4).

Currently all areas of the state not part of an organized borough are classified as a single unorganized borough. Essentially this bill allows for the subdivision of this single unorganized borough into several unorganized boroughs with the option of becoming incorporated home rule boroughs.

The area of immediate interest to the Department is Section 3, which amends AS 44.17. When combined with the Provisions of Section 2 where the Commissioner of C&RA may establish/adjust the boundaries of unorganized boroughs, the bill has the potential of disrupting critical data collection and analysis. This is not only a matter of potential file revision and duplication at great cost, but also a matter of potential invalidation of or rendering useless time series of data which are key elements in any serious evaluation or planning effort. The bill, if adopted would have serious implications for the Department.

The Department of Labor (Research & Analysis) collects and disseminates data in a geographical format based on census divisions. The boundaries for the census divisions evolved from election district boundaries and the boundaries of organized boroughs. The census areas have been reclassified for the 1980 census in a plan that treats the unorganized borough similar to that described in this bill. Each organized borough in the state will coincide with a census area while the remaining sections of the state are divided into areas and subareas based on Native corporation boundaries and REAAs. This plan was adopted by the Governor's Committee on the census in conjunction with the U.S. Census Brueau. The census area concept geographically divides the state into 23 major areas and 24 subareas. Certain data collected by the Department of Labor which is required and funded by federal agencies must be transmitted to those agencies in the census area format, i.e., ES-202 employment and earnings employer reports, labor force estimates, population figures, and others. The impact of this bill on the department would be substantial. Adoption of a new geographical classification scheme would alter the census area agreement between the Governor's Census Committee and the U.S. Census Bureau. It would be necessary to convert the geographical coding of 10,000 employer files, 50,000 UI claimant files and upwards of 60,000 job applicant files.

At a minimum, an amendment to Section 2 emphasizing correlation of boundaries with the latest Census areas and subareas (or divisions), is essential to good planning and administration over time; or an amendment to Section 3 allowing census area or subarea information (aggregated to approximate unorganized/organized boroughs) to be sufficient for reporting requirements.

POSITION PAPER/Department of Labor

(1)

Present: Co-Chairmen Senator Arliss Sturgulewski and Representative Bill Parker
Senator Terry Stimson, Repre. M. Branson, Sen. T. Kelly and Sen. B. Mulcahy

Anchorage/ Sig Strandberg, Local Boundary Commission

I have a few general comments on the House Bills 580-586. The Local Boundary Commission just received these bills through the mail so we haven't had an opportunity to meet and forumulate any consensus of opénions, but I'll suggest a few comments that I think will general position of the Boundary Commission and rather than separate my own opinions from those. HB 580 relating to the establishment of organized boroughs. I think this is a bill long overdue and I think the Boundary Commission itself would indicate that point of view. Obviously the purpose seems to be several fold, as to the conforming of the State (budget?) as to the various regions of the State, I think all of us applaud the attempt to try and get a better system as to where the State dollars are going and for what particular purpose. The Local Boundary Commission introduction in to the scheme of things, according to this bill, I think does occur at the proper point, where the unorganized boroughs seem to incorporate as municipalities. I'll look through my notes here real quick. I think I should perhaps limit the Boundary Commission's comments to those I've just given on that particular bill. We, of course, don't have any comments on HB 581, relating to the Division of Policy, Development and Planning, Office of the Governor. My own comment on that is that it certainly does tie in very well with HB 580. HB 582, an act establishing a program for planning assistance, an excellent bill, and I think the Boundary Commission would agree to that. IF there is one thing that we haven't accumulated over the years that we have had our organized boroughs ...., it's information from areas beyond the Fairbnks, Anchorage, and Southeastern urbanized areas. My own comment accumulating information through planning studies is that if you are ever going to determine the economic viability of an organized local government, in a given rural

(2)

area, I think on a Statewide basis, we ought to move ahead to map (mass?) the unorganized borough areas as to the location of an ownership of parcels of private property. I think that this is the necessary precedent to ... activities that addresses the formation of organized boroughs. That is, the unorganized boroughs established by HB 580. This program ought to be started immediately because it is going to take a long time, once boroughs are formed out in the more rural areas we will know what the tax base is. I think we all realize it is limited. A lot of communities are living hand-to-mouth so to speak, and can't afford a large mill rate, but the purpose is to identify how narrow that tax base is out there so that the State can possibly formulate legislation to help support the purpose of local government in these areas. HB 583, State aid to local governments, $25,000 adjusted to cost of living differential certainly will come in handy ~~for~~ to all local governments who are weathering heavy inflation and I think that $25,000 will be well received. HB 584, an act eliminating 3rd Class Boroughs, looking back over the past decade, I believe we had one 3rd Class Borough that was formed as a result of the 3rd class borough legislation of, I believe, 1968. There have been no other takers. It's a very narrow constitutional form of local government in this State, and I think that its elimination probably is in our best interest in order that we have a system of local government that encourages planning on a regional basis. I think that the Boundary Commission would share that point of view. HB 585, incorporation of second class boroughs as Home Rule Boroughs, I have got to think about this one for awhile, and I think the Boundary Commission would like to consider that before making any formal comment. HB 586, an act requiring fiscal notes. This is a piece of legislation that is long overdue as well, and it ties into the fiscal needs of rural areas, where they might want to incorporate as an organized borough. Obviously, within a narrow tax base, if a responsibility is thrust upon them that they cannot fund, we could have some serious problems unless we

are aware the Executive Branch and the Legislative Branch is aware of ahead of time of the cost implications.

Soldotna, Borough Mayor Don Gilman, Kenai Peninsula Borough

Good afternoon, Madam Chairman. I have the bills of the Senate version of the bills, so I'll be referring to the Senate numbers, and try to keep them in numerical sequence. SB 348, while it does not have much to do with the second class borough, which we are, you know, I would like to make some comments that deal with the service area, or special area concept. Having had some experience in the Kenai, with overlapping and proliferation of service areas, there are some built in preps that people can get into. And Senator, as you know, in the Alaska Coastal Management Act, there are special areas called Coastal Resource Districts, which are now under way and being formed by the vote of the people in those areas, and they are not necessarily, or would they become co-terminus with an REAA as this would indicate here, as one of the potentials? I feel that there should be some way built into SB 348 that Coastal Resource Districts should become a part of this bill, so that we don't end up down on the line someplace with 2 or 3 overlapping districts. If you could have, for instance, a planning area as you have defined here that is not necessarily the same size as an REAA, and you could also have a narrower coastal district, which might end up with 3 overlapping districts with 3 different boards and it will do nothing but complicate the issue. I don't have any specific suggestions of how that's done, but I think it is something that needs to be looked at. Other than that, I would just like to remark that if the unorganized boroughs go along the REAA lines, it is interesting to note that the only difference, and the only ingredient left out between the second class boroughs and these unorganized boroughs is the subject of investment? and collection of taxes. As you know, the 3 powers of the second class boroughs mandated to per-

form is education, planning and taxation. That would be all the comments I would have on both SB 348 and 349. Unless there are questions, I would go to areas.

Scn. Sturgulewski.

Mr. Mayor, I would like to make a comment. You raised a very good point regarding, we don't want to create legislation that in turn causes for boundaries that are not co-terminus and one of the things that we have noted and there will be a Committee Substitute on it, the, there is no mechanism for boundary adjustments in the coastal district plan and in the REAA, and so we will be addressing just what you are talking about, because there are some from testimony received apparently some of the REAA's would needing perhaps some minor adjustment in boundaries. And the issue has been raised by Senator Mulcahy, and others, so we will be modifying that language to speak to that issue and I do not have a specific answer for you right now, but I do appreciat that.

Mayor Gilman

Thank you. Anything I can do as Chairman of the Coastal Policy Council, please feel free to call on me. Again, not that I have any grand design for how it should work. Next, SB 350, we really have no comment on and we think that's (48) an internal process between the Legislature and the Governor's Office. In SB 351, as we read it, the $25,000 would be an additional to all cities and boroughs regardless of what the class is, and we thank you for that kind thought and additional money, and we would not be opposed to that at all. We are strongly in favor of SB 352. Not that that concept hasn't been rolling around for some time, this really does strengthen it, and of course both the local municipalities and the Legislature are always concerned about actions which may crop up, or cause problems at the local level and not only problems, but money? problems

(5)

where there is, certain legislation would pass on to the local government fiscal responsibilities that we really are not aware of, so we are strongly in favor of SB 352. SB 353, I don't think, there will be some time before the Kenai Borough, a second-class borough would be considered ... in a Charter as a Home Rule municipality, but we are in favor of that, because it just gives us just that many more options in terms of expense and municipal services or expenses? as they are needed. SB 354, elimination of the 3rd class borough, we have no official position on this because there is ... at this point. In fact there is a movement led by one assemblyman to place on the ballot, the question of whether the Kenai Peninsula would become a 3rd Class Borough. For your information, that's primarily viewed with problems that crop up with planning and zoning authorities and the issue of who controls what, between the assembly and the school board. The one factor that seems to be a major consideration in the 3rd class status if it were to be placed before the voters, is, of course, in question, that the Alaska Division of Lands becomes the planning authority and basically can enact building ordinances in what is now ~~what is~~ called the 3rd class borough, and that of course, people who land in the 2nd class borough don't relish the idea of working with the Division of Lands as a planning authority. And that basically are our comments on these series of bills.

Kotzebue/ Pam Herman from Manuluk

Good afternoon. My name is Pam Herman. I am a planner with the Maneeluk manpower which is the employment and training arm of the Maneeluk Association. I am mostly to offer testimony in support of SB 351, which provides a basic entitlement to 2nd Class city in our region. We have 11 2nd class cities incorporated in this region. Our CETA program has about $1 million this year and that's about a 50% cut from last years level of $2 million.. With that ~~money~~ funding, we operate

(b)

a city administrator, a city clerk employment training program. The reason that we are supporting SB 351, is reaction to pretty much of a crisis situation that exists in the villages right now. The City Administrator-City Clerks of this region are responsible under the direction of their City Council for operating municipal electric utilities, sewer and water facilitie, 2 or more public buildings in each village, roads, trails and airport runways. They are responsible for providing 24 hours a day law enforcement, many of the villages have jails, recoration programs and they also have special funding capital projects, like REAA, RDA, Public Health Service. In addition to that, they have CETA funds to manage, and they get funds from .. and sales tax. State Federal revenue sharing money that the villages have been receiving generally go to pay fuel bills to keep the public buildings from freezing up in the winter time and for other basic costs not ususally including personnel costs. Almost all of the village employees in this region are, not counting Kotzebue, are funded through CETA, either by Muneekluk Manpower, or from the Division of Community and Regional Affairs in Nome. This is despite the fact that CETA (47) funds are not intended to provide basic support in municipalities. It is very clear in the CETA legislation that is not an appopriate use of the money. A fluctuating funding level with CETA is subject to, or partly designed specifically to preclude dependents on CETA funds for the operation of basic municipal services. About the most that any municipality in this region receives of St-Fed. revenue sharing is about $12-15,000 a year, and that's for the larger villages, so there is no way they pick up those personnel costs on their revenue sharing .... We have about 65 employees in the villages, to give you an idea of the number, earning between $10-$12,000 a year salaries, which by the way, is just about enough to support someone living a subsistence lifestyle that is, someone who spends a great deal of their time out out gathering food. The $10,000 income in villages is really insufficient to buy their own, Food because of the cost of living out there. The $12,000 a year that the City Administrators

(7)

receive, pays them for operating municipalities that provide all of these services, with as many as 8 different funding sources. These willing and able, but basically untrained personnel are expected to manage all of these operations and comply with all the various funding requirements of these different agencies, different recording procedures and application procedures. In addition, to that the length of time CETA allows that person to participate in only 18 months, so that by the time someone has finally learned how to do all these things, they are no longer eligible for CETA, and they have to find another City Administrator to take over and start from the ground up again. For this reason, we are strongly in support of any kind of of basic entitlement that would provide the villages with enough of a budget so that they hire trained personnel, or provide their current personnel, with adequate training to do an efficient job of operating a village. I think that most people in the states should realize that the well-being of the entire State of Alaska is very dependent on the well-being of the rural residents. It's when things get bad in the villages, they are going to be reflected in a lot of.. urban areas, a lot social problems that don't have to be the case, if we just have an adequate municipal system set up in the region and bush. For that reason, we are in support of SB 351, although we would like to see a larger amount of money made availabe; but this is at least a start. Thank you for this opportunity.

Bethel/ Edward Hoffman? Sr.

Here is my statement. My name is Edward Hoffman, Sr.. (See written testimony)

One last question - I don't what you to get the best? of us in our region, that's why we had this statement prepared for you. Or, otherwise, you are doing a good job.

WE FEEL THAT UNTIL WE HAVE STUDIED THIS ISSUE THAT THE STATE LEGISLATURE SHOULD NOT PRE-EMPT OUR RIGHTS TO SELF-DETERMINATION, THE VERY REASON WHY WE HAVE LOCAL GOVERNMENTS. WHAT WE WOULD LIKE THE LEGISLATURE TO DO IS TO PROVIDE FUNDS FOR US TO STUDY OUR OPTIONS AND PROVIDING AN EFFECTIVE DATE AS TO OUR DECISION. WE SHOULD AT LEAST BE GIVEN THIS OPPORTUNITY. AT PRESENT WE ALL DO NOT KNOW WHAT WE ARE TALKING ABOUT, AND FOR WE AND THE LEGISLATURE TO MAKE DECISIONS AT THIS TIME WOULD BE IRRESPONSIBLE. WE ALSO HAVE A RESPONSIBILITY TO OUR VILLAGE PEOPLE WHO TODAY DO NOT EVEN KNOW WHAT WE ARE TALKING ABOUT. GIVE US MONEY TO INFORM THEM OF THEIR OPTIONS AND THIS ARGUMENT WILL NO LONGER HOLD WATER. THEN AND ONLY THEN CAN WE MAKE OUR DECISION, AND WE WILL.

2. SENATE BILL 348 HAS IN IT CERTAIN DESIRABLE ELEMENTS IF WE COULD STAY AWAY FROM SENATE BILL 348 AND THE BOUNDARIES IT PURPORTS TO CREATE. THIS BILL WOULD BE ACCEPTABLE IF THE PRINCIPLE OF LOCAL SELF-DETERMINATION IS RESPECTED AND IT WILL NOT BE IF A CONTRACTOR WERE HIRED BY THE COMMISSIONER AND RESPONSIBLE TO HIM TO DETERMINE THE ISSUE WITHOUT THE ACTUAL INVOLVEMENT OF THE LOCAL ELECTORATE. WHAT WE FIND DESIRABLE HOWEVER IS THE LEGISLATURE APPROPRIATING FUNDS TO REGIONAL ORGANIZATION FOR PURPOSES OF STUDY AND PLANNING, BUT SB 349 IS NOT ACCEPTABLE AS PRESENTLY DRAFTED AS IT GIVES TO A CONTRACTOR DECISIONS THAT ARE, AND MUST BE, RESERVED FOR THE LOCAL PEOPLE.

3. SB 350 GIVES TO THE GOVERNOR DECISIONS WHICH SHOULD BE MADE BY THE ELECTORATE AND RECIPIENTS OF STATE SERVICES. THE GOVERNOR CANNOT EVALUATE HIS OWN PERFORMANCE. WE RECOMMEND NO PASSAGE.

4. SB 351 IS ACCEPTABLE AND DESIRABLE AS THE AID PROPOSED IS NEEDED BY RURAL MUNICIPAL GOVERNMENT.

5. SB 352 IS AN EXCELLENT HOUSEKEEPING TOOL FOR THE LEGISLATURE AS LONG AS IT DOES NOT ELEVATE MONETARY CONSIDERATIONS ABOVE HUMAN NEEDS AND AS LONG AS THE LEGISLATURE DOES NOT ALLOW MONEY TO FOREGO ITS CONSTITUTIONAL RESPONSIBILITIES.

6. SB 353 IS AN ACCEPTABLE BILL AS LONG AS IT INCLUDES SECOND CLASS CITIES.

7. SB 354 IS ACCEPTABLE.

IN CLOSING, THOSE OF US IN THIS REGION WOULD LIKE TO REITERATE TO THE MEMBERS OF THE COMMITTEE THAT THE BILLS DEALING WITH THE UNORGANIZED BOROUGH ARE ALL PREMATURE AS WE ALL, INCLUDING THE LEGISLATURE, DO NOT KNOW WHAT WE ARE TALKING ABOUT. WE ALL HAVE NO BASIS TO SUPPORT THESE BILLS AS WE HAVE NOT DETERMINED FOR OURSELVES AS VOTERS AND RESIDENTS OF THIS AREA OF 56 VILLAGES, AS TO WHAT IT IS WE WOULD LIKE TO DO BECAUSE WE HAVE NOT STUDIED THE ISSUE, NOR HAVE WE CONSULTED WITH OUR VILLAGES. WE ALSO CANNOT RULE OUT INCORPORATING INTO MUNICIPAL GOVERNMENTS UNDER EXISTING LAWS SIMPLY BECAUSE WE HAVE NOT SERIOUSLY STUDIED THE ISSUE.

EDWARD HOFFMAN'S STATEMENT ON PROPOSED LEGISLATION ON

THE UN-ORGANIZED BOROUGH

THIS STATEMENT I MUST MAKE CLEAR IS NOT ONLY MINE AS CHAIRMAN OF THE BOARD OF THE ASSOCIATION OF VILLAGE COUNCIL PRESIDENTS, BUT IT REFLECTS THE VIEWS OF OTHER CONCERNED CITIZENS AND ORGANIZATIONS WHO HAVE SPENT CONSIDERABLE HOURS IN ANALYZING THESE BILLS.

FIRST, THOSE OF US IN THIS REGION WOULD LIKE TO IMPRESS ON THE LEGISLATURE SEVERAL POINTS:

1. WE CONSIDER THE ISSUES RAISED BY SENATE BILL 348 TO SENATE BILL 354 TO BE OF PARAMOUNT IMPORTANCE TO OURSELVES AND OUR CHILDREN AND WE CONSIDER THIS QUESTION OF GOVERNMENT TO BE THE SINGLEMOST IMPORTANT ISSUE WE WILL BE ADDRESSING IN THE 1980'S.

2. WE ARE DETERMINED TO RESOLVE THIS ISSUE BY 1983. IF THE OPPORTUNITY IS GIVEN TO US.

3. THE BILLS BEING PROPOSED ARE AN EXCELLENT STARTING POINT BUT PREMATURE IN THAT NO SERIOUS STUDIES HAVE BEEN MADE BY THE PEOPLE OF THIS REGION ON THE ISSUE THEREBY MAKING ACCEPTANCE OR REJECTION OF THE CONCEPTS PROPOSED IMPOSSIBLE.

AFTER CURSORY ANALYSIS OF THE PROPOSED BILLS, THESE ARE OUR VIEWS ON EACH:

1. SENATE BILL 348 IS NOT AN ANSWER TO LOCAL GOVERNMENT IN RURAL ALASKA AS IT SIMPLY CUTS THE EXISTING UN-ORGANIZED BOROUGH INTO ADMINISTRATIVE UNITS WITHOUT PROVIDING FOR LEGISLATIVE AND ENFORCEMENT POWERS BY RURAL ALASKANS. IN ESSENCE THIS BILL WOULD MERELY EXTEND THE GOVERNOR'S PLANNING POWERS TO THE LOCAL LEVEL, WHICH IS IN ITSELF A GOOD IDEA, BUT DOES NOT REQUIRE HARD AND FAST BOUNDARIES AS PROPOSED. THIS BILL MERELY FORMALIZES THE "ADVISOR" ROLE RURAL ALASKANS HAVE BEEN PLAYING FOR OVER 20 YEARS. WE FIND HOWEVER THAT THE CONCEPTS ALLOWING FOR AN UNORGANIZED BOROUGH TO INCORPORATE INTO A HOME RULE BOROUGH A GOOD ONE AND ARE SUPPORTIVE OF THE CONCEPT. WE FEEL STRONGLY HOWEVER THIS LEGISLATION IS PREMATURE AS IT IS NOT BASED ON FACTS VERIFIABLE BY EXPERIENCE OR SERIOUS STUDY, AND AS SUCH SHOULD NOT BE PASSED BY THE LEGISLATURE.

22-26

Fairbanks/ Chris Anderson

My name is Chris Anderson, I am representing Tanana Chiefs Conference and would like to take this opporunity to thank you for the time that you have here, to look over these 6 or 12 bills that are before your Jt. Committee. I have prepared before me right now. I hope to rush through and following this hopefully, if there is time enough for Ray Kent and Willams to expand from the same organization, would like to expand upon the general ideas that I have from the prepared statement. The issue of local government in rural Alaska are complexed. The Jt. Senate-House Community & Regional Affairs Committee has made an admirable attempt to deal with this issue. HB 580-586 and SB 348-354 represent the colination of this groups remarkable effort to solicite the input of rural Alaska residents. We support the basic concepts of this legislation. For example, SB 348, or HB 580, prior State agencies utilized standardized service districts based on the Native regional corporation boundaries. Basic concept is crucial for effective delivery of State services. Often village projects require a high degree of intergrated coordination. When these agencies have different service centers, it is possible to achieve this needed coordination. It is, therefore, quite clear that standardized boundaries are necessary. But mere standarization of ~~boundaries does not guarantee~~ agency service district boundaries does not guarantee does not guarantee that the agency will be more responsive to local desires and needs. In the past we have proposed home rule unorganized boroughs. It is a concept designed to implement the Constitutional mandates that the Legislature "shall provide for the perforance of services deemed necessary or advisable in unorganized boroughs, along with maximum local participation or responsibilities." ... possible to create a home rule unorganized borough by adopting home rule charters, creating

assemblies, the unorganized boroughs, would in effect be organized. This is unacceptable simply because the unorganized boroughs, which are by-passed by pipeline development generally fail to meet borough incorporation standards. This concept seems impossible to fully implement the Constitutional mandate for the local participation in the local government for the unorganized borough. We believe, however, that the Alaska State Constituion can easily solve the problem it? creates. Specifically, Art. 10 thru 13? along as the State and the local government ... contacts, or agreements, or joint administration of ... and power. We wish to propose that the bill be amended to explicitly to allow the creation of consortium of local government on a regional basis within the unorganized borough. The consortium would do 2 things. First, they would provide some coordinated administration of local government by studying costs and sharing staff, the consortium would provide effective local government, or the ... government that exists now cannot operate. Secondly, the consortium that address regional concerns, provide a form for expressing those concerns and advise state agencies on a regional needs and desires. Consortium method would operate through existing local government and increase local action of state agencies. Rather than increase new layers of government, which we observed.... Often local governments and state agencies are not coordinated. Most noteably, State land disposal involves ..... State law generally favors local control, or at least local input in the organized areas of the State. The unorganized areas of the State, however, State agencies seem to .. This exists in spite of the constitutional problem of maximine local participation. The proposed bill fails to change the situation in the unorganized borough. We, therefore, move that some mechanism be inserted into the bill to provide for subsequent participation. Three alternatives exist. 1. An administrative restraint may be placed on the agency's action. Specifically, consortiums agree to agency actions and plans within the region. Asking such content basically would have to show in a lodally or mutual administrative hearing

that action represented is in the best interest of the State, requires the ... The second alternative would be a planning restraint on the agency. The consortiums would produce regional plans (for which the agency would comply?) Absent compliants, the agencies must get a waiver from the consortium, or create local neutral hearings. Thirdly, a political mechanism would be established. State law could require issues to have local plans actions approved by the local hearing officer, and he will hear it, to allow consortiums and residents the opportunity to have input, hopefully influence agency action in the area. These proposals would certainly improve local participation to the unorganized borough, but the ultimate goal is maximize local participation for ..... this means borough incorporation. As we noted above, ... incorporation is not possible for an area that does not meet incorporation standards. This does not mean, however, that the local governments can increase their involvement to service delivery. We, therefore, propose that the bills be amended to eventually allow the consortium to directly contact state services on a regionalized and areawide basis. Prior to this contact, the consortium would be required to undergo a planning process, much like that proposed in HB 582, or SB 350. The plan would have to 1) analysis the feasibility of rural incorporation versus the consortium contacting 2) make recommendations concerning incorporation, or in the alternative 3) assess base service delivery and make recommendations for possible future consortium concept. During the interim period, the proposed base level revenue sharing is 25,000 per community should be authorized. This constitutes state moeny for a consortium, for the borough, for consortium preparing for either the contracting or incorporation; but the consortium contact, under legislative scrutiny would provide an effective alternative for incorporation for those areas which fail to meet incorporation standards. It should be the Legislature's responsibility to recognize the service delivery in the unorganized borough. Finally, it would allow maximum

local participation in such service deliveries, as required by the Constitution. There is no reason why proposed consortiums cannot also involve communities having traditional or reorganized state government. Most of these communities predominently ... Native communities, and as such the Native government is truly represented. Included in the .. governments additional..... by the local government. Additionally we will provide a mechanism whereby the villages, state directly coordinate and complement their respective programs. Similiarly there is no reason these communities should not participate base level community revenue sharing. The theory of revenue sharing is to ~~increase~~ decrease the municipal dependents on local taxation. The central government collects taxes, and redistributes taxes to local government. Individuals living in the unorganized borough communities or equally .... state taxes, yet the government is not eligible for state revenue sharing. Finally, if revenue sharing is ... consortium on a contracting of a corporation operation, the communities cooperation and involvement will be necessary in order to ..... on an areawide basis. Thank you.

~~Rittingham/~~

SIDE TWO // TAPE 1.

Nome/ Bob Blodgett, Teller

Thank you very much, Sen. Sturgulewski. I just returned from a lengthy visit down in the developed areas of the North American Continent, and I only have had a brief time to browse through the legislation, HB 580-586. While I am not totally negative to this legislation, I am a long ways to being positive. I feel that the timing for introducing this legislation is awkward, in that this legislative session will sine die and there will be a new Legislature next year. Therefore, there will not be any opportunity for this legislation to be carried over legislation, which will deny us, the birds in the bush that are affected by this legislation an opportunity to study it in depth and in length and hold community meetings throughout the unorganized borough area,

or within the REAA areas, if you may. Now the least government, is the best government. Now in this area, borough government, at this time, is a way of government that this bush area can ill afford. We don't have an economic base at this time to support it. Now on other hand, perhaps other bush areas, organized within the REAA, may have a viable economic base that can adapt itself
44 - to borough government. It would be an initial unorganized borough status based on the REAA boundary system. I feel, however, that the maxivilian? philosophy to divide and conquer is being thrust upon us by establishing unorganized borough areas in the 21 REAAs. These are small unorganized borough areas cannot draw any more water than political cow tows? in a broken pump. I envision, and another approach to my envision, a large borough enbracing the area from the Canadian border westward including St. Lawrence Is. northward from the south bank of the Yukon River to the Beaufort Sea. I have no obversion to having borough assemblymen elected from communities throughout this vast area, represent me. We have some extremely competent people spread out through this area that could do a very fine job. We don't have the economic base otherwise, after all 70% of the revenues of the State, are generated from Prudhoe Bay, and then when the JUT CC? comes on and the North Basin comes on and the bottom fishery comes on, well then that economic base will be stretched further out, and then .... at some later date, afford us the opportunity to further the luxury of this additional way of government. I have no quarrel with our State Legislature serving as our borough assembly as provided by the Constitution. This borough government can hopefully divest many of the village corporations of their land. If the people are willing to borough, organized borough government, as a result of the establishment of the unorganized boroughs, then this whole thing is really going to make a big fat picnic for the professional planner. The contract planner that lives in the urban areas, that knows as much about us out here, as we know about them in their lifestyle. Twenty years after conveyance of D-2 Key? Title lands to our village corporations, then these key title lands can

become subject to taxation and the deep sea title lands have not been developed so that they bring a monetary return in paying those taxes, then the taxes are in default and the land will be taken away from our people. I object to paving the way to do that yet. We are having a lot of growing pains out here, learning how to function and people are having problems right now functioning village corporations. A number of our regional corporations have got problems, village corporations and regional corporations are working very diligently to overcome their problems, and I think that this would be another stumbling block in our way to divert the people's time away from addressing the problems already concerned with. Now as far as the REAA, who school boards go, the REAA school boards I recognize, I am very aware basically presently and am now serving as member after sitting on the sidelines and watching it for 3 years. The school boards are knocking their hearts out to develop a strong viable educational program to fulfill the needs of our people in their respective areas. There are too many legislators from the urban areas today, who do not know about rural Alaska. And I am not condemning them for this, not at all. On the other hand, we have legislators from rural areas that don't know what they really need to know about the metropoleon areas of the state. So, therefore, I feel that very strong alliance does not have to be placed in the rationale and the prudent ...knowledge of rural legislators, and we have very good rural legislators. They are getting . to the people. If they are not, we'd get rid of them. They wouldn't be there. I was there one time, and I'm gone. Maybe that tells you something. I don't know. Anyway, I urge you folks to give us an opportunity to study this intent, particularly in our communities, and evaluate and get some input back to you from the grass roots where the people will be affected by this. I thnak you for your courtesy and giving this opportunity to testify. I really urge that we be given the opportunity to participate in these teleconferences from the bush areas with telephone service so we don't have to spend $34 to fly in

(43)

to testify and $44 to fly back and spend a whole day, or get weathered in and spend several days in doing so, and I feel you get a broader input from more people out here in rural Alaska, that's very important. Thank you.

Juneau/ Mayor Hollowell? Haines

Thank you. I have a prepared statement which I will leave with you. I only have one copy. (See Statement)

Anchorage/ Liza Rudd

Thank you very much Madam Chair. Good Afternoon all of you. It's good talking to you. I want to begin first by expressing my pleasure that you have taken on this very difficult task of trying to deal with the development of local government in the rural areas, and express how impressed I am with what you have achieved. In general, I am very much in line with your thinking in all of the bills that have introduced only some comments possibly on .. and a few that you could call on nitpicking type comments, that I'd like to make as I go through the bills with you; but as I say, in general, I think it is very much in line with what is needed in the development of rural, local self-government. SB 348, I have a question, or comment that maybe there is no need for, but if you provide for unorganized boroughs to go directly to home rule status, does that mean that a home rule borough, incorporated under that provisions, does not have to provide any particular governmental service? In other words, it doesn't have to provide planning and zoning, or it doesn't have to provide education, it doesn't have.. itself, because of the provision of a home-rule boundary. Boroughs, of course, can do anything that is not forbidden by state government, so I'm wondering if that is your intention, it will be free to do anything not forbidden by State law, but doesn't have to provide any service at all?

Senator Sturgulewski

Liza, why don't you go ahead with your testimony and we'll do a little quick checking on it. That issue was raised and frankly just yesterday, and I haven't had time to research it, so if you'll continue on, I'll check and get back on that.

Liza, I'll raise some questions, but I don't expect
Liza Rudd- I'll raise some questions, but I don't expect answers because I know you've got lots of people and I just raise them so that you will aware and if you think they are worth looking into, then you go ahead, but I don't expect any answers to these questions. On Line 19 & 20 - SB 348 - the encouraging of the development of regional responsibilities of planning and implementation of these services, that seems to me to be ... for what you are really saying which is providing for these corporations of home rule boroughs by unorganized boroughs. And, I think if that's what you are really talking about, and it certainly is according to the title of your bill, then that's what you should say and in fact you should probably put it first rather than last under the pertinent section. On page 3, SB 348, Line 17, Sec. B, boundaries may be modified by the Legislature, the last sentence there the agency requesting modification of the boundaries shall submit to the Legislative Council - I wonder how this relates to the responsibities of DPDP on the outline of SB 350, and whether or not this provision, in this bill might not be looked at as pat? by the Govenor's Office. I wonder if the Governor's Office might not want agencies independently going to the Legislative Council and asking for suggested boundaries.

Sen. Sturgulewski. The answer is right. That issue has been raised and it will be addressed.

Lize Rudd - O.K. maybe I should just shut up. I think everybody's .., or has already thought of. On page 5, (c), I'm wondering why you only-

42 ~ already thought of. On page 5, (C), I'm wondering why you only provide for one shot at a charter, instead of two, as other boroughs have. You know, when we unified here, in Anchorage, each charter commission got a chance to write the charter once and then if defeated, write it again; and that's not provided under this method of incorporation, and maybe you've thought why, but I was just wondering why. On page 6, line 16, (B?) the word substantially, I don't know if that's usual, but it seems to me that the Lt. Governor should provide the elections in the manner provided in the election code, rather than substantially in ..... ON line 26 there, the repealers, these 2 repealers refer to the powers of home rule boroughs and general .. municipalities, and I under stand the reason for repealing it, but I think you still need it on, do you not the statement that a home rule municipality can perform any functions not forbidden by State law, and you also need a state law that says general long? municipality purposes provides purposes, provided under state law, and if you repeal those 2 sections without reinstating those statements, I think something is missing in the law. SB 349 - it seems to me again there is a mutual fear that maybe this Act should be named something like the assistant to the study of the feasibility of borough incorporation, rather than talking about planning assistance, because the minute I got down to the section dealing with regional management programs, I asked myself the question, who will manage what? It doesn't say. It just says for the purpose of preparing the management program for an unorganized borough, and it doesn't say who is going to manage it, or what they are going to manage, and so on. If you are talking about ~~adding~~ managing the delivery of state services in the unorganized borough, that should be .. but it seems that is not what you are talking about, because when you get over later, you are talking about this contract, the only thing required of the contract, is the analysis and recommendation concerning the incorporation of a borough government. So that seems to be the real purpose of this bill, is to provide for assistance to groups in order to plan for the incorporation of a borough, and I think that should be

straight forwardly stated. Page 3, the provision under (H), that no more than $25,000 per year, plus $25 per capita .. under contract, I don't understand the reason for the limitation there. On SB 350, I have no particular comments. SB 351, I'm glad to see that - that's an idea that's been around the Legislature. As I recall, we added it to the revenue sharing bill ...Legislature.....so am on to that idea. The fiscal note bill - no comments - it seems like a ver y good idea. SB 353, an act relating, pretty straight forward and goes along with all the rest, SB 354 - it seems to me on page 2, Section 6, provides - if Jack Chenowetheiis
Chenoweth is there, he'll recognize my concern with the division of planning ... unorganized borough, I don't like the idea of ... It seems to me it provides disincentive to the incorporation of boroughs, as the Division of Lands provides that service anyway. So, I have that problem. I have always wanted to take ... In addition, I have a question as to whether or not this power by the Division of Lands, how it relates to the management plan that is going to be developed, and would it not be better if the Dept. C/RA ... involve managing and planning in the unorganized borough. Would it not be better, if any state agency must do planning and zoning, platting in the unorganized boroughs, should it not be done by the Dept. of C/RA, since they are going to be taking on, under your bill, some rather other heavy planning responsibilities in the unorganized borough. And the same goes for the .... planning and zoning powers that belongs to the Division of Lands. On the last page, 4, under repealers, section 29.080.040 J - relates to other 1st and 2nd class boroughs also, so possibly you shouldn't repeal it completely, I don't remember that section just now, so I don't recall my question, but I felt as though an outright repealer would do away with the provision that should be ..... And while I was looking at the repealers, I noticed that in 38.050, 378 ..... that you might want to include in these bills. And those are my comments on the specific bills. They seem to address some concerns. My

2 primary concerns have been first of all, that St. government has assumed more and more local government services, what are traditional ... unorganized borough, both in funding and deliveries, and the more this is done, the less you will find those areas are going to be wanting to establish their own boroughs and this leads to a great deal of dissatisfaction because ... and dependent ..... And the other concern, is of course the reluctant ..... to assume the financial responsibilities for local government, and I would like to see you address that somehow, by possibly putting in somewhere that when a tax base of an area ..... reaches a certain level, that that area must assume a certain level of financial responsibilities, for the delivery of local government.... for that area, I think that sounds rather cold hearted, but I don't think there is ever going to be a willingness to assume that financial burden unless it's made clear in the State law that the state expects areas to assume as much of the management responsibility as they can. Of course, in order to that we must identify with the tax base in the unorganized borough, and I think that is vital, aside from any other work that might be done in development of local government, even if we should do none .....

Senator Kelly Liza, could you identify that last provision you are talking about please? You really struck a chord here, with me in any case.

Lize Rudd

You mean about assuming responsibility? Well, it's not in any of your bills, it's a concern that I have, but, there is not, there is a pretty reluctant, perfectly understandable on the part of the people who are already receiving what are traditionally local government services from the State. And there are many areas in the unorganized borough that are receiving what are traditionally

40?

local government services from the state, and of course, they are receiving them "free", that is they are using state money rather than local money to pay for it, so those areas it seems to me are going to be very reluctant to take on local gov[illegible]ment responsibilities when they can already receive a lot of those services from the state. So I would like to see somewhere in the law in one of these bills, a statement that when a local area tax base has reached a certain level, then that area must assume some financial responsibility. Of course, not all, ... but some requirement of financial responsibility for the administration.

Sen Sturgulewski - We do have information on the home rule limitations. According to AS.29.33.010 (B) they would need among the other conditions to have the areawide borough powers, so that would include those mandatory functions. I appreciate your testimony and if you have any that can be telecopies down, it would certainly help us - you have a lot of background and made some very comments that will help us, and I do appreciate that.

Kotzebue, Jeff Smith / Maneeluk Assoc.

K

Madam Chairman. I would like to testify on 3 bills. The first one being SB 348. Although we would prefer that the issue of establishing regional unorganized boroughs be addressed in 2 & 3 years after the completion of the regional strategy plan, I would like to stree that these lines be compatible with the Nena Regional REAA. In regards to SB 349, we support the establishment of a program for planning assistance in the unorganized boroughs more than any of the other bills presented in this legislative package. Our experience over the last 2 years in the development of the NANA regional strategy plan, has been to involve the residents of these different community ... region in the planning process of the state-federal agency. Because there are many problems that we can't resolve at the regional level, we would like to see

other regions become involved and we know that the other regions are going to find similar problems reoccuring and will provide a greater statement of needs for the resolution of problems at the state and federal level. For example, of these problems, are few local solutions to energy problems, state and wage requirements?.of construction costs, alcoholism, etc. Other regional strategy .. working together will clarify the wide expanse of these problems. A useful form for the resolution of these problems could be places like the state and federal rural development task force, legislative committees, and other joint state and federal task forces. SB 351, again we have to consider this piece of legislation to be a .... for the survival of the small municipalities of the state. They can not longer rely on external funding like CETA to provide the core administration for the municipalities. We feel that through this legislation will provide them the ability to have a well trained administrator who can coordinate the different services and activities of the municipality and can provide for the future expansion and can look at the other programs available to provide continuity and stability to the delivery of these services. Thank you for letting me testify.

Bethel, Carl Jack

First of all,I would like to thank the Committee for giving the opportunity to be involved in these teleconferences. First of all, would like to reiterate the statement that was made by Mr. Hoffman, Chairman of the Board, on the bills that are up for consideration right now. SB 348 - main concern here is the boundary question, the comment on this the boundaries established under the Claims Settlement Act, for the option for the provision to be done after the full study is completed as proposed by the chairman of the Board. SB 349 - We feel that it is salageable although its part of 348, but the concern here is again the underlying question of the continued absence of local government. We feel that the powers that will be given to the Commissioner, will certainly make the Commissioner a czar. WE won't

foreclose complete endorsement of the bill, with some modification. On SB 351, line 10, proposed amendment to that is take ... city or organized borough - replace or with "and" so the city has organized borough of any class entitled to etc., etc. SB 352, one of our concerns is line 22 thru line 25, where the Community & Regional Affairs shall prepare the fiscal notes on behalf of municipalities . We do have some concerns on that, in this regard, developing municipalities. Those are the specific comments that I have. I understand that there is supposed to be additional hearings on the 14th, and at that time, we will provide final comments. Question, when are you going to work on Committee Substitutes?

Sen. Sturgulewski - We have that scheduled for 14th in the Senate, 11th and 13th HS. 8:30 a.m.. Since we are limited to teleconference time, they will not be teleconferenced, but work is going forward. As you know, there is some sense of urgency to move forward to the next committee of referral, so I would appreciate whatever you can get to us as quickly as possible.

Fairbanks/ Ray Kent

Thank you Madam Chairman. I, too, would like to thank you for this opportunity. My testimony follows on the heels of the policy statement as stated by Chris Anderson previously. I would like to take a moment to go through the legislation. We too are not totally opposed to the legislation, with amendments, and we also agree pretty strongly with Mr. Hoffman. The position basically needs to be a much stronger involvement of rural government, i.e., Native traditional IRA? government outside the organized first and second class cities. SB 348 - I restate the purpose, again as testified to previously, the purpose seems to be to create service districts for the delivery of state services. However, the act itself does affect establish and probably will involve into boundaries or future rural governments, so in this regards, we would like to have included in the statement

of purpose, a statement to the effect that the service districts will be developed in a manner that will facilitate potential delivery of services by local .... We also would like to state boroughs? must be established for administration of local government and any look at these boundaries should take that into consideration. It seems that the Commissioner has a great deal of discretion in recommending changes. We would suggest that on page 2, line 7, that the language unless the inclusion of the territory is reasonably necessary for efficient administration of programs and services by state agencies be deleted. We feel that the boundaries should be limited to those Native corporation, but there is no provision for .... boundaries.. No mention is made in the proposed legislation concerning the involvement for Native or traditional government in the establishment of boundaries, and some combination should need to be made to recognize those needs and interests. On page 3, we are concerned about the appeals process. We feel that there should be some changes made in the appeals process to accommodate a normal administrative appeal that would perhaps stand in the Legisalture and/or the courts. We would also like to be sure that the appeals process would be initiated by both the interested government in the region as well as the Commissioner. Page 4, as also mentioned previously, the question of definition of home rule borough - as I understand the bill, home rule borough means, as stated in current enacted law,which provides mandatory provision of services, we would like to consider perhaps an alternative to that, which would allow the government to develop basic comments, financial capability to provide services, perhaps not mandate the provision of services that are not financially supportive of autonomy. Half way down the page, charter election component provides for ... election for charter commission, is in fact ... it's our feeling that the charter commission should consist of two graphically repre-senttive members, rather than members at large, which could set up a stage for domination by a local community on this particular .. Then again, as

previously stated, let them decide a need for a second chance, they can't. The finding of the charter commission to the agency? I refer now to page 5, bottom, where there seems to be no ability for the charter commission to bring back a second review for the proposed charter. SB 349 - we like the concept contracting for planning the administration and the delivery of government services, however, we feel that the Commissioner's discretion should be limited, and that the Commissioner should not be able to contract without the consent of some locally representive group in the initiation of this kind of activity is described as a one shot deal, and some areas of the State, it would be premature, and it is our feeling that it would be necessary to limit that ability for it initially to come from the local region, rather than the Commissioner. SB 350 - we have no partic

region, rather than the Commissioner. SB 350 - we have no particular comments. SB 351 - we have a lot of conern about this particular piece of legislation. It seems to discriminate against those communities that are not organized as 2nd class cities; i.e., traditional and Native governments, those just as much in need of funding as are the cities. We would recommend that additional language be added to include those villages. We feel that to not include them would be disriminatory, and we recommend "do not pass" on this bill unless those are included. SB 352 - have no comments. SB 354- no comments. SB 353 - as discussed previously the question of percentage or the numbers of peopel need to initiate the action, and after discussing that further with our people, we would like to reserve comment on that. That's the end of my testimony. Thank you.

Nome/ Andy Edge?, Nome City Manager

thank you Madam Chairman. First I would like to thank the Legislature for the provision of this service, and the legislative office you have opened here in Nome, and more particularly ..... of TAPE I, Side 2..

I would like to say first that sure the organized boroughs have been slow in implementation in rural Alaska; but the Legislature, who by law, is the establishment for the unorganized borough, for the first time seems to want to move toward this suggested local control. But like my old, old, acquaintance and very dear friend, whose my next door neighbor when I'm living over in Bethel, Lidia? Lady? Hoffman?, I would like to caution that haste makes waste. In going through the bills, I have cut my comments down considerably, so 348 and 349 needs more time, more study and more involvement on the local level; and less of the (tail wagging the doll?) 350, the same, needs lots of work, especially in the line of the people involved. You know, it's fine, committees come into our area for hearings, most of the ones that came in the past 6 or 8 months, just haven't given enough notice, and haven't provided for a consolitated hearing, one that we get together and talk about it a little before hand and then come in with a consolidated viewpoint, one that would include all of the villages, all of the organizations. 351, 352, I see no harm or objections to either one of these. 353, needs more work, again, to include consolidation hearings in the areas involved. In the passage, at this time, of any of these bills, I feel that we are invading self-determination and the rights of the local people to determine their own destiny. I speak very strongly against allowing a single board as cited in HB 584, I think, to express the views of both borough management and borough schools, or one board acting as both boards. It puts up a couple of interesting questions in the absence of Nome, which has a council, which has a school board, how does it tie in and mold with the borough board and REAA school board? I don't quite understand that. I am certain that it is taken into consideration. And, finally, Madam Chairman, and to my many friends in Juneau, I would like to remind them that my annual birthday party will be on the 26th of February, and this year will be held here in Nome, and those of you can make the party, are surely welcome.

Sen. Sturgulewski - the quesions you raised, Andy, on SB 354, or HB 584 are really right on, and that's one of the reasons we are recommending elimination of that kind. Some of the issues you have raised, seem to be causing some problem. I would hope that you take another look at the bills. As a matter of fact, the issue has been raised several times. We feel these are leading toward self-determination by an area. That's the whole intent. For instance, SB 350 changes nothing in the amount of services, etc., going toward rural Alaska. What it does do, is say that the State needs to start to recognize some common boundaries out there, so there can be a greater coordination of services. That is the intent. I would be very happy to discuss that issue with you, and I am very appreciative of your general comments.

Andy Edge - final comment - only that involve the people. I realize the unorganized borough has been here a long, long time and that nothing has been done about it, but in our haste to correct this, let me caution, a little more involvement. There are people out in our area that just don't know, and what you don't know, you go back to the oldest rule in politics - what you don't know, vote no, and we advise no.

Haines - Dave Olerud

I want to thank you for the opportunity to make a few comments on my experience with 3rd class boroughs. At the present time I am a businessman in Haines. I have had the experiences of serving as a borough Mayor, I have served on the City Council, as well as other organizations within the area of Haines. It seems as though, it always boil down that we, in Haines, are a little bit of the exception to the rule. We are the ones with a 3rd class borough and listening today to the teleconferences going throughout the St. of Alaska, we are also without that. But you knows, the 3rd class borough is something we should look at very carefully because of discrimination. Let me just make a few comments and salvage as much

time as possible. First of all, from the experience that I have had with 3rd class borough, and with government per se, I feel very strongly that the local government is the most important aspect of government for the people in the State of Alaska. We have to have the power reverting back to the people in the rural areas, or into the local government. I feel very strongly that over the years I have served on local governments, that a government should be very similar to a shoe on the foot. It would be very disastrous on the part of a parent to take look at a shoe on a foot, and let that shoe last for many, many years, without changing that shoe. It is quite obvious that that child is going to grow up and that shoe is going to start pinching. I feel very strongly that local government should be such that it can adjust to the realities developing within a community. Now, a 3rd class borough in Haines is not a just reality to the community. It is great as far as the school is concerned and as far as collecting taxes for that purpose is concerned. But going beyond this point, when our community develops to the point where, proportionally we are going to develop sooner or later, our population is increasing, and we are going to have to face the fact that our government, the 3rd class borough, is not going to do the job. I'll give you an example of where it will not do the job. With the last 5 years we've had a negative influence on our economy. We have seen our tax base erode by several millions of dollars, primarily because utilizational resource from the timber has not been made available to our community. 3rd class borough can do nothing but collect taxation. To stimulate the economy, to provide for the services that are desperately needed, schools, etc., it can do nothing. Basically, as a taker of a tax, but it cannot do anything to stimulate a tax base the prime sector that is so desperately needed. .... that the State of Alaska decrees that there should be land classifications, land claims. Well, the 3rd class boroughs .... regimented to schools and collecting of taxes. We turned to the State, Dept. of Natural Resources not necessarily interested in what

happens as far as classification and the will of the local people. We fought a little over a year, a year and a half, to have a classification through the State Dept. of Natural Resources as to the people of Haines situation. It was a very sobering experience. Anything I would like to emphasize - what is a 3rd class borough, what is it really? Because of necessity, since 1968 when the 3rd class borough came into existence, to serve our people, we have in a sense made a lasting cause under the 3rd class borough. It has been stretched to fit the needs of the people, even though possibly it is stretching the legality of the 3rd class borough, it has been stretched to the point that what we have, a lot of times, classified in a sense a monster. We have done things that basically we were not entitled to, the State of Alaska has allowed us to, we have asked them what can we do with roads and trails, they say it possibly could be construed as education we have asked them what to do about a multitude of problems and anywhere from boat harbors to museums, to culteral facilities, so the 3rd class borough of Haines has been stretched. But not only has it been stretched in the lasting sense, but it also has created a monster in our city, because a city is like a parent, as a last resort. Any time you have trouble and the child can't take care of it, you go back to the parent and the parent must accept the responsibility. Our city has been pulled to many extremes, primarily because the areawide government has not been able to adjust to the needs of it. The only thing that I find negative, is that I do not like in a sense where government mandates government. I believe the people should have enough common sense to adjust to the realities of the situation and do what is necessary. Bill 354 mandates within so many years, I believe by 1984, that the 3rd class borough will cease to exist. I would hope that this group that is working very diligently to set up an efficient government in the unorganized areas, and organized areas in the State of Alaska could possible have the intentional fortitude to make decisions that could possible be unpopular to certain segments but is necessary for a more viable rural area.

Sen. Sturgulewski - what are you suggesting?

Sen. Sturgulewski - what are you suggesting?

Mr. Olerud - What I am suggesting is possibly that I do not envy your position that you are taking at the present time because the 3rd class borough is a reality because the State government did not have the intestional fortitude of a long time ago to say now that we should be a second class borough. We were left in limbo, and because we were left in limbo, we have created many problems for the State Legislature, which has been ..... I feel very stongly now that we should as a community of Haines evaluate very carefully, a little pressure from the State would not hurt at all, I do not feel it will be necessary to mandate anything. I believe the local community in Haines will be able to take care of the problems that are coming up, if we get rid of the hysteria. At the present time we have so many traumatic things pressed upon the people of Haines, particularly the economy, long-range timber planning, etc., from this, I believe, we have become very strong in a sense. I think we are capable tackling the problem of local government to provide a decent counterpart.

Sen. Sturgulewski I appreciate your comments. I might suggest, just from some comments made when the bill was introduced that people from both sides of the aisle in Haines might wish to communicate with their Senator and representatives from their area as to their feeling on the 3rd class borough. I doappreciate your taking the time to give us your comments, and I know you'll be watching the legislation carefully.

Mr. Olerud - just a follow-up. I state now it is very nice to see that - SB 352 - it is nice to see that the State Legislature is looking at the financial ~~responsibility~~ of a particular bill in relationship to the local comm.

responsibility of a particular bill in relationship to the local communities, and I am also very negative when it comes to saying it is nice that the Legislature spends money on behalf of the local community. I feel in a sense that the majority of the money should come from the local community, but you have allocated monies on SB 351, that would be very beneficial. Now we talked the other day in relationship to implementation of these acts. Now can a 3rd class borough, in a sense, be given funds to go through the research necessary to go into a second class borough, first class borough, or what it may need. In here we have, I believe, a clear indication if you are in an unclassed area, there is financial assistance, aid, in coming to a decision as to what type of government is best for our people. I would like to make sure, now, that the 3rd class borough is included in this necessary and to do the research to move from a 3rd class to a 2nd class or whatever the people decide.

Sen. Sturgulewski - that is a good point. I appreciate that. Thank you very much for your testimony.

Anchorage/ Pat Keprcellie/ Rural Cap

Thank you for the opportunity to come in on the local government legislative package. I am from Ruralcap, and in the interst of timing to the primarily comments, and they incorporate those of Bob D..., deputy director. On behalf of Ruralcap, I urge you to schedule additional hearings on these bills during the week of March 17. The Rural Citizens Participation Conference will be meeting in Juneau that week and many of the delegates would like to testify directly on these bills after they have had a chance to study the committee substitutes thoroughly. ... developed as been a model one. Starting from the August 1979 Symposium on local government through an extensive schedule of hearings throughout rural Alaska, and finally to the draft legislation. Along these same lines, SB 348 should require State agencies to provide for public participation before

making any decisions that affect the district. The Legislative Local Government Study's final report on self government, which ought to be local invovlement. SB 349 - no provisions in A 1 and 2, requiring either group to involve anyone or any organizatic· in the region being studied, we should reiterate people's concern for more local involvement, it's lacking in that bill. 349, it provides for assistance for developing regional management programs in unorganized boroughs, but in the report the priorities seem to revert, in the Local Government STudy's Final Report, under regional strategy and planning studies, it says the strategy study fund will provide assistance for regional studies that will address economic, social and .... class for the unorganized boroughs, and provide the means from which the people in each region can participate with government in establishing policies and programs for the region. Then it says studies will also address the feasibility and viability of organized boroughs incorporations. In the bill, it seems to be reversed. Copies, which are optional, includes the ones listed first and the importance are economic development and potential, determination of housing and capital facility needs, and examination of ... graphic social and environmental factors. ..... important in planning a regional management program. The requirement to provide a analysis and recommndation concerning the incorporation of a borough government is the main required topic. That requires a conclusion which cannot intelligently be reached without considering the factors, which are currently optional. That is why they should be required in all contracts. The optional topic should be required, but where this information is available, it should be included in the report, because that 3B/ information is necessary to provide residing in the boroughs with the tools they need to make and form their opinion as to their own development. The bills in this package, especially SB 349 and 348 should be consolidated. SB 349 ought to be passed first. If it doesn't pass, than neither should SB 348. State financial support of a regional strategy planning cost for rural Alaska ought to happen before boundaries are drawn.

Sen Sturgulewsi - Thank you Pat. The point you make is very good on the optional part really being necessary as a precondition to doing the regional government. I appreciate those comments and they are valid.

Kotzebue/ Bert Griff?, NANA Regional Corp.

Thank you Madam Chairman. I would like to make a regeneralized short statement on three Senate Bills. SB 351 - state aid to local government. I, myself, have been involved in local government, and I understand perfectly this grant, because revenue sharing a lo of times has been supplemented by bingo games, raffles, and volunteers. We've been in the red several times, and this affects the delivery of services in critical times, just the absence of needed police protection during the time when we don't have the financial status to continue this service. In the past the cost of energy, transportation, electricity have gone up in substantially increases while the revenue sharing remains relatively the same. My point is keeping in mind the inflationary factor. SB 351 - this should include, if it doesn't, the unincorporated villages also. We support also SB 348, if the legislation includes language to insure that option on whether to organize as a borough is given, and not mandated. Remote areas such as ours, do not have a tax base as yet to support the local according to fiscal needs of operating a borough, and it might take years before our area to get up to that point. I would say Kotzebue, for instance, right now income per capita is well under $3,000 per year and even right now some of the villages have problems in supporting local sales tax. When other regions plan in incoporate into a borough then perhaps this should be assured that additional funds be available to form the borough. We also support the boundaries and this will conform to REAA and ....., our regional boundary. We also support 349, planning process basically educate both the federal and state agencies, as well as the local villages. It will be beneficial ..... planning process. That's all I have now. Thank you.

Sen. Sturgulewsi - Thank you very much for your testimony. I do want to assure you because I think it is a terribly important comment, that we are talking about voluntary as opposed, in other words it is optional to move ahead into the regional strategy, it's optional and up to the people of the area to move toward organized government. There are no mandatory features and I think that is a very important thing that needs to be reiterated. There is quite a difference between mandating areas to move ahead, and having the option to do so.

Bethel/ Ken Proll, City Manager of St. Mary's

I am Ken Proll, currently the City Manager of St. Mary's and I think I can speak on behalf of the Council when we say we can support some of the earlier statements of Eddy Hoffman. But I think for just right now, I would like to just specifically focus a little on SB 351. We, of course, support it, and we think the funds provided in this bill will significantly help the rural communities in the Yukon Kuskokwim-Delta. I did have 2 stylistic changes, one Carl Jackson pointed out earlier. We would like to see the "or" in line (10?) changed to "and" and also line 11, where it reads, a borough of any class
33 which is entitled to state aid under AS 43.18.010 - I have that statute before me right now, and it does set up several categories, under which municipalities can (compete?) A - have to have power to provide certain services and exercise that power. Many of the rural communities out here do not have the power to provide some of the services that are set out here 43.18.010 - some of those powers like police, fire, pollution control, parks recreation and planning - it is not really clear from this bill whether municipalities have to have the power and exercise all the powers under the category listed under43.18.010, or whether a municipality simply exercises power under only one of those categories, it will then qualify for the $25,000, and the legislative intent seems to be a little unclear and I would suggest a change in line 11 to read borough of any class that is entitled to state aid

under any of the provisions of AS 43.18.010 - which would seem to make it clear that rural communities will be included udner this bill. That's all I have. Thank you for the opportunity.

Sen. Sturgulewski - Thank you. That brings out a new point and we will check that out. It's my feeling that the fact of incoporation is adequate to meau that those would come and it is not dependent on the provision of any powers.

Fairbanks/ William C. William, Tanana Chiefs

Thank you Madam Chairman. I am glad to hear some of the comments coming from rural Alaska and the impact they see these bills having. I have one short statement and then I'll go into some comments and clarification on some of our issues. This statement I am about to make came out of a specific mountain time, a circular which comes rural organizations and communities in the West Coast. It seems to be quite pertinent that we are not the only ones having these kinds of problems of local control. The title of it is The Case for Citizen Involvement. Development will occur in rural areas regardless of anything we do, because of population pressure, and economic necessities. Impacts of development may or may not be desireable ~~to an~~ From a viewpoint of area rural residents. We need to question who will decide the nature and kind of development which takes place, and how the voice of the Council can be heard. There are a number of possible actors in the rural development decision making process, government agencies, local elected officials, property owners, corporate boards, environmentalists, and rarely the folks at large are involved. Conflicts which procede development decisions often pit exploiters against preservation. Regardless of which side wins, the primary impact of most development decisions will be on the (post?) In general, they hear about it after the fact. At best their voice is given by the clamor of strong vested interests. In the past few years there has been substantial movement from cities in the rural areas. In addition

to impact of business and industrial development, many of the ~~officials~~ individuals are seeking simpliar, more self-sufficient humane lives in the country. Some state and federal programs are supporting population ... as a solution to urban problems. This solution may satisfy the long ter. state interest, but in the short term, it places a tremendous burden on units of local government. Local government based in the past in protecting traditional lifestyle and values while expanding essential services. The factors which bring city folk to rural Alaska are those which kept rural folks at home. Coutinued quality of rural life is an issue which must concern the forces of rural economic development. Yet this quality is endangered by development. Since rural areas are bearing the
32 brunt of problems created by change, it seems the State and Federal agencies must provide support for local government. Local government needs help in shaping community attitude, building long-range plans, and providing services which should be planned in advance of development. In generally conditions have forced local government to react rather than anticipate and correct events. Local direction should start in the school, city civic groups, media and with the local officials themselves. ~~Now the agency is~~ I would hate to see us ~~building (b nds?)~~ a fence around rural Alaska to keep the vibration out, but I would also hate to see .... migrants bring the birds they are escaping with them. I would much rather share the beauty of life we enjoy. I think it can be done, but it won't happen if we fail to make the effort to involve, inform and listen to the people. My constituency is mostly left out of the decision making process. Rural Alaskans are seldom the movers or shakers of public policy. yet no ecnomic development decision should be made without an analysis of its affect on these people. The environmental impact statements are generally required before development takes place. It is time we gave people impact statement consideration. We may play a role in development, but we can't stop it. Our option is to shape and direct it by defining our goals and developing concessions as to what our communities ought to look like 5, 10, and 20 years from now. There are vast resources in the rural regions to be developed

managed, conserved or locked up. Special interests are present and prepared to do battle in each situation. The majority of folk are on sidelines vaguely aware of development impact. It is our challenge to involve them in the decisions that'll affect their lives. It is quite interesting to note that we are having the same problems, same concerns in rural Alaska, that were stated in this circular. I have changed some of the titles to say Alaska state and Alaska rural residents, names of different organizations, entities in the circular. Again, some of the basic concerns outlined by Chris Anderson, and Ray Kent. Again, I would like to reiterate in SB 351, there is no provision in this bill for funding for communities that aren't organized under State law. I think this is totally unfair. These communities are having the same problems that the organized communities are, they are taxed just like everybody else, but they don't have the benefit of receiving those taxes back in any kind of a plan now authorized by the State. I think in those instances where a lot of our communities are organized, the organization is just in name only and not in process or actuality. I think it was something told a lot of our communities, because it was told it was a good idea. I think the same thing is happening in this legislation now, with 348. You say it is an option. But a lot of the rural people aren't looking at it as a option. They read these bills and sometimes they are quite confused because it looks like the State is trying to force organized government on them. We have been into this type of activity now in trying to develop strategy planning. I heard somebody comment they would like see 349 introduced prior to 348, and I think that makes a lot of good sense. Without proper planning, without proper communication with the rural folks, it makes no sense to even pass 348. With that, I'll end my comments.

Nome/ Kalleb Bengowee?, _____, Inc.

Thank you. I'll quickly go through some of the comments on the proposed bills Senate version - SB 348, Art.2, ~~on question of~~ collection of data information, I think there should be some provision on part 4, for that information presented to the Governor

and the Legislature, some provision for public hearings since this information will be used for the consideration of the State budget and other considerations. 31 Therefore, it makes it very important that the people be involved in either of the development or the final estimation relating to the state government. The information collected by these agencies should be reviewed by the ... prior to presentation to the Legislature. Also, on Section, on the .... and exemptions? modification, part B, where it says that the boundaries of the district may be modified by the Legislature, I don't feel that the State agencies should have this power to modify any boundaries. They are set to serve the people, or they should not be served at their pleasure. On ... elections, I think there should be some provisions, for incorporation of a charter for some public hearing for that particular part. It currently just goes from the .. provision 2, C & RA for ....advise with the laws of the State of Alaska. I think there should be provisions for the public will have input into the charter. Also on the 90 day, on some of the days that are on this particular bill, I think some of them are a little short, you probably should read between 30 and 60 days, and also 60 to 90 days, particularly in the rural areas where it is sometimes difficult to get people involved, especially where you have short notice. And then on page 5 part B, 90 days may be a little short on the compliance with the laws of C/RA feel the commissioner have met. Again, I would like to reiterate that we have some problems as this is a step toward of organizing boroughs by provision of the area, you create natural areas that would become boroughs, whether it may be necessary or not. SB 349, I think the provision of requiring a recommendation for, they should be formation for incorporation .....something that I don't feel comfortable with, and also although identified in this particular bill, I .. whether a portion of the area to be organized in a borough or not. There seems to be some conflicting portions in this particular bill. On SB 350, ... sounds fine, but I think that's a little unrealistic to all theinformation to the Governor concerning whether the state agency(?) can comply with it o r not. On

SB 351 - we support this bill although I would like to point out that some of the municipalities governments have asked me (active?) and therefore they would be presently surprised if they get a check for $25,000. SB 352 - I think this might create a monster for the Legislature, but if they want to do this, its fine with me. I think the bill is good, but I think it may place a burden on the Legislature. SB 353 - no comments. SB 354, section applied to the Div. of Lands having the .... authority, I particularly have SOME problems with it and it will only say? see the coastal management programs available for the districts which may not be necessary and also on a continual? assembly or a seat of borough government and school board again would create some problems in some of the areas. I thank you for this opportunity.

Sen. Sturgulewsky---Thank you, I would like to point out to you that in fact the Div. of Lands currently has the planning and planning power in the unorganized boroughs, and this would not change the status, but it was necessary to retain that section because of doing away with the home rule boroughs, I mean 3rd class boroughs. They have the zoning power, I'm sorry, not the planning, so it's not adding to what they have. They already have that power. That is one of the major we've looked at. The whole thing of the coastal resource districts, there are problems in those areas that are not organized in the governments that have the ability to enforce the plan. Right now the only authority lies in the Div. of the Department of Natural Resources. So that is an area of concern.

Juneau/ Roger Allington

Madam Chairman, I'll make this very brief. Speaking basically as a former assemblyman and former Coastal and Policy Council member, and officially as a citizen, basically I support the package from the activities of those two bodies, and would make a couple of minor comments. One has to do with boundaries, and from our work with the Coastal Policy Council in setting up the coastal boundaries, I suggest that to the extent possible, the boundaries

be left as flexible for as long as possible, because as these plans were developed under SB 349 comes down, I think there is going to be some changes indicated. However, I should also indicate that to the extent possible, the boundaries should be coincident with the school board boundaries that exist, coastal resource boundaries that exist, and because we are talking about private lands that are basically within Native regional corporations, to that extent they should be .... addressed already. 349 appears to put into the rest of the State some of the activities that were already taken into consideration as far as planning is concerned in the coastal areas. I would concur with the comments Jan. 31, 1981, for SB 350 is probably tight. I believe under the Coastal Mgmt. Act the DPDP was required to make sure that all departments had their regulations in line with coastal mgmt. regulations by a time certain, and I don't recall the time certain, but if it hasn't passed, it is darn close to being passed, and I don't believe that's been done. The net result is having an unrealistic time frame, it doesn't get done and that means it just doesn't get done. SB 352, I appreciate the fiscal notes on the bills that relate to municipalities, to the extent that it is possible to do it. I would suggest that this be amended to require fiscal notes on departmental regulations that affect municipalities also, and I believe there is a bill in to accommodate that. A brief statement on the 3rd class borough. We know from coastal management we have a void up there, we're not exactly sure how to handle it. [Side 2 Tape II] .... management and I see that this bill is written in such a way that it gives the Commissioner more discretion and I think that's desireable, at this point.

Anchorage/ Ron Mallott

Hello, Ron Mallott here currently attending merely as an interest as a student on state and local government. I believe I will be addressing SB 351 primarily in conjunction with much of the testimony I've heard today, I have heard a lot of pros and cons, in favor of and opposition to the various bills, which reminds me and I

should remind us all that the State Dept. C/RA should have been aware of all of these pros and cons prior to the proposed bills and that their groundwork should have included people like I believe I heard Kalob Vangowee mentioning that, the people should be reached, and their consideration should be incorporated into any legislative bill even if it is a proposal. As an individual I question the constitutionality of compelling unorganized boroughs to become organized. I view the issues placed at large in the form of legislation for their consideration a form of blackmail, or the majority population ruling the lessor population. Organization of unorganized boroughs for cities prior to the resolvement of the D-2 issue, is questionable. Nobody knows what is coming or going. Identification of transient residents may need to consider an evaluation of necessities of organization of boroughs or cities, the same as they should be considered relating to regional educational attendance areas, as it is very clear also the question of transient, who is going to or coming from the educational facilities in any organized or unorganized city or borough. There is a lot more I could say, but I think I would rather listen than speak. Thank you.

Sen. Sturgulewski - Thank you very much, I appreciate your comments. I want
29 you to know that were extensive hearings made, and that's why we are having a teleconference, and as I indicated, we have mailed out many, many copies of the report, there has been a sincere effort to not do this simply with a (fly up?) It is not the Department, it is the Joint Committees of the Legislature that have carried on this study, and we're certainly attempting to be responsivle to the many interests that we do hear. I would like to repeat, as I think it is absolutely vital, that this is not a mandatory provision. We had a mandatory borough act that formed, with one exception the North Slope Borough, formed the current existing boroughs out there, Haines too was an example. This is not a mandatory bill, it is very important that that distinction be made because that is something we heard loud and clear. The people want to move ahead

at their pace and this particular bill, these set of bills, do make those provisions that people are not forced to move ahead. Hopefully it will cut out duplication of service delivery on the part of the State, but it adds no powers that presently do not exist.

Kotzebue/ Mr. Gene Moore, City Manager

Windmill report. SB 348 sets up the first step of an organization, getting them to be organized boroughs, and we realize here in Kotzebue and the NANA region that we are unique . We've done a lot of planning and looking at this. But I don't think ~~you~~ we really need SB 348, because if we do decide to become organized, we have the provisions already in the fold, and anyone else has those. I am certainly glad to hear that this is not a mandatory bill as everyone else has been led to believe it would be. We hope that no one will be the language in there that it be mandatory, because we all know the lessor amount of government, we have the better government it will be. The planning bills we strongly support as you know we have the regional strategy plan performed here in the region and I think that the whole state, particularly the unorganized borough, needs planning but, the one provision I heard today, particulary SB 350 - looks to me like this is something to tell your commissioners there in Juneau to do and not have to spend time enacting a bill. We can do coordinating out here. I think maybe need to talk to the commissioners in Juneau and not have a bill to reflect all the local governments ... probably lies in the state .. coordinating with .. We all know that happens in the state. SB 351 - I spoke on this when you were up for hearing here, and one gentlemen spoke awhile ago about the $25,000 , was it really needed. I think this is additional state aid and not something that everybody gets, because everyone would get $25,000 plus any other services performed, Alaska Statutes 43.18.10. This $25,000 plus cost of living in addition to services they now perceive from revenue sharing . strongly urge as told to the people at the hearing here that we have a small village of ... Ft. Buck? less than $6,000

a year, and that's not enough to pay for the paper work that takes place. SB 352, if I'm understanding what it is saying, I think it could be cut down and made real short. No mandating improvements that you can't provide the money for, don't put a new burden on the small municipalities, or large ones, either one
/.. when the money stops coming from the state on these programs, the program stops. A short answer to it. SB 353 really have no problem other than I think you ~~could~~ should include alternate .....incorporation, second class borough, I think everyone should have the choice of making self-determination and shouldn't be put to the expense of going through first class borough and first class city study, they should have the option of going from such class organization city or borough to home rule. Planning another ... expense wise

28

election, ballots, hearings required .... take care of all of this by changing that all municipalities have the option to go straight from second class city or borough to home rule system of borough. I appreciate the opportunity to make these comments to the Committee. I know you've done a lot of work on them and I think more work still needs to be done before it's total accurate.

Sen. Sturgulewski - I think I need to make something clear, because I don't want to leave anything that creates more confusion. When I talk in terms of mandating boroughs, a form of government, but it does call for a drawing of lines in SB 348, and I just don't want to have given a false impression on that.

Mr.Moore Yes. We understand that you are drawing lines, and we don't have any objection to your drawing lines, as long as they don't ~~mean a whole lot~~ Put a (-) on to us.

Fairbanks Wolfgang(Falk?)

Anchorage/ Dave Walsh

Chairman of the Anchorage Municipality. I am just glad I made it back in time. I'm also speaking on behalf of the Alaska Municipal League today, of which I am President this year. We have not taken formal Municipal League action on these proposed bills, but I imagine that we will at our next Board meeting tentively scheduled at the end of this month, or beginning of March. I have gone through the bills, I have the Senate verious in front of me. In general, I think they are excellent. A marvelous effort these past few months to put this together and I would heartedly endorse the bills as an individual and also as an assemblyperson. And as President, hopefully in the next couple of weeks we will provide you with formal resolution from the Board. SB 348 - Two conceptual problems, generally - not as the bill is written, but perhaps the effect of it, and what could result from overreaching administrative approach. By that I certainly don't mean to imply the current Administration, because ..... (interference - mike change required)... The two conceptual problems that I have with it is that I think there is the natural tendency that once the lines are drawn, it'll make those lines concrete and make it very difficult to change and I would hate to see that happen with this approach, because I think it as a first step, it is excellent, but whether the lines that will be drawn as a result of this bill would be or should be finalized, is another question completely. It is more the problem of human inertia I think, than the bill itself. I would suggest that legislative history? or committee reasoning ... contain some pretty definite language that the lines are not meant to be set in concrete or meant to endure forever, but are essentially the first drawing of what we would hope to be a fluid approach, until the final local governmental lines in the state are established. The second problem that I see is again, not the legislation itself, but ... is that these districts essentially become an administrative tool to provide local government services through a state function. In other words, you would have the potential for the ... or co-termi

co-terminus boundaries with different ... for example in Anchorage, take Anchorage as a proposed district, would not like to see the situation arise where there were several district administrators that could have much influence or powers as the local elected representatives here. I don't think that's as much a problem in Anchorage, Fairbanks, Juneau or Ketchikan. It might be in other areas of the state. In terms of specific amendments, and these are somewhat .. and obviously as a result of my local government ... On page 3, SB 348, subparagraph 4, from municipal point of view, I think we would like to see .... (stop for static again)

Page 3, paragraph 4, my personal preference would be if it was spelled out in the legislation the part of the function would be to provide information to

27 to local government units that may exist in the larger state and service area that approach. Other than that, I think 348 is excellent. Amendment to Ch. 19, Sec. 29.19 etc. are excellent. I think it is a very fine workable approach. SB 349, I also think this is excellent. You know the League has a membership that not only includes the largest municipality, but is made up by 1/3 degree from the municipalities that are rural in nature. In fact the majority of the vote in any municipal league .... by those who are not in organized borough, and on their behalf, I would say that I think 349 is very good. In terms of 350, I would tackle? .. what Don Gilman said at the beginning, and I would have no comment of value on behalf of the League ... state matter, which had .. personally, I like it, any time the system can get support? report directly from the Legislature I think that's a positive thing. In terms of 351, I can't give.. but I think For the League that is an excellent approach, particularly to ... The lady from Kotzebue testified earlier at the hearing. I think this will provide a valuable service to the rural second class dity. SB 352 is I think the best of the package. I think ... the fiscal note requirement is something that that local government has .. for a long time. I'm sure you are all aware a lot of times the Federal government mandates programs for the state, and local government that is beyond

our ability to finance and I think this approach insures that that same kin d of problem is not going to arise in regard to ... SB 353, I'm also very much in favor of.... SB 354, I don't think the League would want to take any official position, and I certainly wouldn't personally. As Don Gilman noted previously, there is some controversy in the Kenai Borough and in other areas of the state in regards to the elimination of the 3rd class borough and so I would suggest you go directly to them for input and their viewpoint. In summary, I would say thank you in behalf of local government for. I think this is marvelous and would be glad to support it. That concludes my testimony.

Fairbanks/ Allen Busbee(?)

I would like to give testimony on HB 584, and I'm with the Salcha .. With our detachment from the North Star Borough, we have been looking over forms of government to replace what we now have. We aren't satisfied with a second class borough dur to the fact that we are a rural area..... a third class borough in reviewing what we have to chose from, fits our area more so than anything else. We find that the eliminating of it would be harmful to our community and other outlying rural and bush areas. As far as third class borough not having any planning and zoning, Salcha area is planning and has tried to develop this area for its need and has resisted in some aspects in doing through government agencies. I would like to recommend that legislators drop this bill and if they want to help the unorganized boroughs, maybe they could form a (4th?) class borough.

Sen. Sturgulewski. Thank you very much. Just out of general interest, have you petitioned the Local Boundary Commission for the deannexation, I'm just curious as to what is happening right now.

profit regional corporation and other agencies have gotten in the act by certain limited services that are typically provided on a municipal basis. The third reason, in many cases is just an inadequate tax base. In some areas of the state, there is just nothing there to tax, so there is very little in the way of support for local government, so they can form a local government all they'd like, but they wouldn't be able to support that local government, if they had the inclination; and finally probably the biggest reason, at least in my opinion, was the disincentives. The biggest one is school financing in many cases its been proven that to form of local government you actually lose money, on a regional basis. The state financing program is a disincentive, so there would have to be at leeast a equalization formula so there is no disincentive formation of regional government and that's probably the biggest stumbling block is state educational financing.

Sen. Sturgulewski - I would like to point out, as Iam sure you are aware, there is a report out now and that matter is before the House Finance and it does address that in lieu of, and we gave testimony this summer, and whether that concept will go through, but I certainly agree with you.

Mr. Aronson - very briefly, my summary would be that basically the concept of regional government, whatever you want to call it

Mr. Busbee - We have submitted a petition to the Boundary Commission and they will be reviewing it the 29th of this month, and I assume they will be setting the date for a public hearing inhouse and conduct further ....

Juneau/ Bruce Aronson

My name is Bruce Aronson, I'm City Manager of Petersburg. A little bit of background, I worked for Dept. C/RA for 4 years, my speciality would be the time law creating the recent school districts in 1975, so I have a little bit of interest in this bill, plus also being a Manager of a City in an unorganized. The package of bills is of great interest to the City of Petersburg. Very briefly, II would like to address the bills and general concepts of regional government. First question, why do we have regional governments? Whether you call it organized or unorganized boroughs, or whatever. I think the obvious answer is to provide areawide municipal services, including education, police, fire, planning, municipal services, on a regional basis. Another question would be do boroughs serve a useful purpose in Alaska? I think an examination many people would have to agree, that a borough would serve, whether organized or unorganized, does serve a useful purpose, if it is approriate to the region, and is properly structured, as the right formation and representation and provides the services required. Another question would be, why haven't additional boroughs been formed? I think the latest account is 11, and it has been at 11 for many years, it seems like. I think in my mind, 1) is that regional types agencies have been formed in lieu of boroughs to address regional type problems, for regional school districts REAAs formation provides local control educational services. Another reason why we don't have additional boroughs, would be municipal services are provided by other agencies. For example, the State Troopers here in Juneau provide municipal type police services here in the valley, so there is no incentive to provide those basic services that the state agencies provide. Also a non-

Anchorage, Alaska 99501

Dear Tom:

Thank you very much for your comments regarding the Local Government Study. Our final report is due out very soon and I will see that you are added to this mailing list. Overall, I am pleased with the results of this study. Although the proposals may seem modest, they seem to follow well the constitional directions set for local governments and certainly can bring some cohesiveness and coordination to the delivery of services to rural Alaska. Your indepth comments and support can certainly help in seeing that this needed legislation is adopted by this session of the Legislature.

Your voice adds to a growing chorus speaking to the need for thorough technical revision of Title 29 of the Alaskan Statutes. When a certain number of amendments have been made to the Statutes, a recommendation is made for a revision of the Title. This is the case, as I understand it, with Title 29 and the recommendation is being made that Title 29 be the next title to be revised. I have had preliminary discussions with Representative Bill Parker regarding this and with several other interested parties, such as the Alaska Municipal League. One possible approach might be the establishment of a short-term committee composed of chairs of the Senate and House Community and Regional Affairs, Mr. Jack Chenoweth, from the Legislative Legal Department, other attorneys who are familiar with working on the Statutes, and other interested persons. I would see this as a working group that would produce revisions to Title 29 for introduction to the next Legislature. It seems to me there needs to be a careful delineation of the so-called housekeeping aspects and other issues that may be of major policy impact. For example, issues dealing with service areas, annexation procedures, etc., may take some special review and consideration.

I will discuss this matter further with Mrs. Ginny Chitwood, Alaska Municipal League, and with Representative Bill Parker as to possible methods for best proceeding with the revision of Title 29. I am sending copies of this letter to a number of people in hopes that both you, Tom, and the ones receiving copies will send me their thoughts and comments as to how best to proceed. It would be very helpful to have some input as to the number of policy issues, in addition to overall revisions that may well need to be addressed. Again, thank you for your interest and I will look forward to hearing from you further on this.

Sincerely,

Arliss Sturgulewski

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M January 14, 1980

SUBJECT: Identification of administrative regional units as "unorganized boroughs." (Work Order Nos. ~~7569~~ 7655, ~~7570~~ 7656 and ~~7571~~ 7657)

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee

Representative Bill Parker, Chairman
House Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

The designation of administrative regions as "unorganized boroughs" in the context of these bills is wrong as a matter of legislative drafting and contrary to provisions of the state's constitution.

As a drafting matter, this Agency has consistently tried to describe single purpose subdivisions of the state's unorganized borough fairly and accurately. Responsibility for schools and for resource planning in the state's coastal zone was transmitted to single-purpose unorganized borough "service areas" consistent with the directive of the constitution and state statute that "service areas" be used to accommodate provision of "special services". While uneasy with adaption of an organized borough mechanism for use in the unorganized borough, at least the choice of nomenclature fairly served to describe what was in the works. The terminology did serve to inform the citizens of the state fairly and fully of the status of the new subdivision. The choice of "unorganized borough" in this bill does not, as a matter of bill drafting, fairly describe the nature of the subdivision or unit that is being established in the accompanying bills. The "unorganized borough" authorized in these bills is clearly a single-purpose entity <u>not</u> characterized (as were earlier "service areas") by regional public participation and direction. These "unorganized boroughs" are confined to assist <u>state</u> planning efforts. "Unorganized borough" is a defective nomenclature that does not accurately identify the result embodied in the legislation.

The Constitution, at Article X, sec. 6, suggests that the term "unorganized borough" be used in conjunction with a scheme by which services are to be performed in areas not within incorporated areas, indicating that the legislature "[allow] for maximum local participation and responsibility." Since "service areas" have been used to describe the devices adopted for "special services" in the unorganized borough, and since the principal bill of the three accompanying this memo does not address "local participation and responsibility" for a function or service, use of the term "unorganized borough" -- which at least implies a delivery of multiple services with local participation and responsibility -- to describe an entity the sole purpose of which is to redirect the nature of state agency efforts is inconsistent with applicable constitutional directive.

The choice of terms in this regard is not insignificant. Fulfillment of the constitutional directive with respect to formation of unorganized boroughs -- "maximum local participation and responsibility" -- suggests to me that the three bills as presented are incomplete: the unorganized borough bill should also make provision for accommodation of existing services which involve local participation and responsibility, and, accordingly, should include transitional provisions by which the current service area responsibilities for single purpose subjects (i.e. education and coastal management planning) are folded into these new "unorganized boroughs." Your selection of the term "unorganized borough" almost certainly requires that, if adopted, the continued use of "service areas" of the unorganized borough as the structure to transfer responsibility for a service from a state agency to an entire region is no longer appropriate; hereinafter, bills drafted making such a transfer must make use of these new "unorganized boroughs."

Sen. Arliss Sturgulewski

Rep. Bill Parker

January 15, 1980

to Arliss S. and Bill P, CRA committees

from Vic Fischer

re Jack Chenoweth's 1/14/80 comments on "unorganized borough" nomenclature

Jack takes the position that use of 'unorganized borough' in proposed bills is wrong from standpoint of legislative drafting and contrary to provisions of state constitution.

I defer to Jack with respect to legislative drafting.

However, I cannot accept Jack's position regarding what the constitutional provisions would require.

Jack's argument revolves around section 6, Article X provision of services in the unorgani-ed borough with maximum local participation and responsibility. To deal with this matter, however, one has to look at section 3 as well as 6, plus keep in mind what the constitutional intent was as set forth quite clearly in the convention record.

The key to the issue is sec. 3: it provides that the entire state be subdivided into boroughs. Whether organized or organized, they are to meet criteria of population, geography. economy, transportation, etc. Each borough - unorganized as well as organized -- shall embrace an area and population with common interests.

The problem today is that the existing unorganized borough is patently illegal under the constitution. It does not meet the criteria or standards set forth in ~~xxxxxxxxx~~ section 3 for both organized and unorganized boroughs.

The constitution and the constitutional record are very clear that the intent was to divide the entire state into regions, using standards currently being applied to organized boroughs only. The intent always was to have regional units that would be able to move from totally unorganized status to whatever degree of organization might be appropriate.

Unlike Jack, I don't believe that sec. 6 "suggests" that the term unorganized borough be used in conjunction with service schemes entailing maximum local involvement. Note that sec 6 states: "The legislature shall provide for the performance of services it deems necessary or advisable in unorganized boroughs," then adding "allowing for maximum local participation and responsibility." ~~Xxxx~~ he proviso is not the other way around: it does not say that only where local participation is provided can the state provide services. Thus, the state is to provide services it decides upon, with whatever local participation is a-propriate. The principal purpose of the and proviso is to make sure that local participation be provided to maximum extent possible. And I think that the regional strategy planning provisions lay the basis for truly major local participation in all services being provided by the state in the particular region.

Note also that the first sentence of sec. 6 refers to "unorganized boroughs", using the plural -- another indication that the regional concept is basic to article X and that the present single unorganized borough is counter to both constitutional language and intent.

Thus I agree with Jack fully that the choice of terms is not insignificant. It's just that we end up on opposite sides!

The designation of regional unorganized borough would, in my opinion, carry out the mandate of the constitution. Maybe a bit late, but not too late. I do believe it should be handled now, without perpetuating an illegality and incongruity that was perpetrated twenty years ago. (By the way, this whole matter is discussed in greater detail in our draft/unpublished study on regional government in Alaska.)

I do not think that establishing unorganized boroughs would create any problem whatsever with services areas, REEAs or CMSAs. Some appropriate language can assure that their status is preserved. In doing so, the legislature would simply be exercizing its authority and jurisdiction under sec. 6. The process of folding existing service areas need be no more complex than legislative action long ago providing that independent school districts be part of organized boroughs. Since unorganized boroughs would not, under proposed legislation, have their own governing body or facsimile thereof, the relationship between the service areas and state government need not change in any way whatsoever.

Ok?

ATTORNEY GENERAL

SUBJECT: Proposed legislation on unorganized boroughs

By:
Rodger W. Pegues
Assistant Attorney General

This responds to your request for our review of the draft bill on this subject.

Because the bill is a working draft, we will not discuss technical matters but rather will limit our review to the bill's basic aims and mechanisms.

The bill has two basic purposes: (1) Provide some reasonably systematic means of obtaining popular review of state agency operational and construction programs in rural areas on a regional basis. (2) Provide a means for incorporating home rule boroughs on a regional basis in presently unincorporated areas. The latter presents no legal problems. The former does.

The basic legal problem is that the bill, perhaps inadvertently, gives any assembly a pocket veto power over the use of any appropriation which "affects" residents of its unorganized borough. For example, the appropriations for the criminal justice system affect residents of rural Alaska. Under AS 37.07.080(b) as it would be amended by the bill, if the assembly of an unorganized borough does not comment and make recommendations on, say, the State Troopers operations plan, no appropriation in support of the plan could be expended. (We doubt if the draftsmen intended this result, but that is it.) A pocket veto of this dimension would not only be unacceptable as a matter of public policy but also as a matter of constitutional law. The governor's power to budget and to supervise the executive simply cannot be made subject to a veto without offending the constitution.

Even if the language here (lines 2-16 at page 7) were revised to eliminate the pocket veto, it is still overly broad. The appropriation for the Department of Law's civil division in the Juneau office, for example, "affects residents of the unorganized borough" because the office routinely writes legal opinions and memoranda of advice -- as well as providing oral advice -- upon which other state agencies rely in administering their programs. If unorganized boroughs are to be brought into the process of preparing the state's budget, the language must be made much more

precise than this. (That raises a related question: Legal questions aside, what is the rational basis for bringing unorganized boroughs into the budget process but not the cities and organized boroughs?)

As a practical matter, is there a reasonable way to bring the unorganized boroughs into the budget process as proposed in the bill? Assuming that it is constitutionally permissible to require this review and consultation, can it be accomplished with a favorable cost-benefit ratio? How many specialists will have to be hired by the state to translate the agency budget proposals into the bill's narratives for the assemblies to review? How many more specialists will be required to consider the assembly comments? How will proof of that review and consideration be made? By written decisions? Oral?

Given that not everyone can understand budget documents -- even if translated into a "narrative summary" as the bill proposes -- how much review and comment of practical value can reasonably be expected? Assuming that a worthwhile review can be made, how will comments be prepared and how will recommendations be made? The paperwork involved for both the state agencies and the assemblies becomes readily manageable only if there is an administrative staff on hand to do it. Given the massive amount of budget material which would have to be reviewed and the limited time available in which to review it, a large administrative staff would be required in each unorganized borough.

The REAA's (and the regional corporation's) boundaries are not coterminous with regional boundaries for budget purposes. As a result, even if the bill's language were made more precise so as to delimit the reviews to budget items for expenditures actually within an unorganized borough, the risk of error and confusion would remain great, with attendant uncertainty for spending appropriated moneys. The risk grows still greater when the review extends to budget items spent elsewhere but which affect residents of an unorganized borough.

In sum, the proposal for review and comment on the budget requires a great deal of work before it will become reasonably feasible. An appropriation for the Department of Law's civil divi[illegible] "affects

The proposal to include unorganized boroughs which have established assemblies with those entities (municipalities and village councils) which review proposed public

works projects appears to be feasible. However, if a village is within an unorganized borough which has an assembly, review by the latter should suffice, and there should not be a requirement to have review by both, any more than there is to have review by both an organized borough and a city within it.

Finally, while the stated concern here is to move away from the development of overlapping, duplicative special districts, this bill merely adds another layer. Apparently, there is an underlying hope or mild expectation that, eventually, home rule boroughs will be incorporated, thereby succeeding to and consolidating the unorganized boroughs, the REAAs, and the coastal resource service areas. Given, however, that the special districts have 100 percent state financing and that the organized boroughs do not, the hope is wishful and the expectation unrealistic.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M December 21, 1979

SUBJECT: Elimination of Third Class Boroughs
(Work Order Number 7574)

TO: Community and Regional Affairs Committee
Attn: Marge Gorsuch
Administrative Assistant

FROM: Thomas A. Sofo
Legislative Counsel TAS

In the draft of the bill to eliminate third class boroughs it was necessary to revise statutes that used the term "third class borough" which were outside the municipal code (AS 29). In particular, attention should be given to AS 14.-12.110 which is contained in that title of the Alaska Statutes reserved for education. Although AS 14.12.110 does address a topic related to education, i.e. the composition of school boards, it also quite clearly expands the potential power of the borough assembly without any parallel provision in the municipal code. It might be desirable to add such a provision to AS 29 so that reference to that title in order to examine the powers of the borough assembly would reveal this potential dual function.

TAS:ljb

Enclosure

House/Senate Bill Number or Statute	Activity	Time Required
H B 560 S B 348 pg 1	Each REAA becomes an unorganized borough 7 0	Effective 120 days after the passage of the Act.
H B 560 S B 348 pg 1-2	Commissioner reviews the boundaries of unorganized boroughs, amends them if necessary, and certifies the boundaries.	Estimates time to complete this task in 180 days.
H B 561 S B 349 pg 1	A municipality, group of municipalities, a nonprofit corporation, or the Commissioner proposes that a management plan be prepared for an unorganized borough.	This may occur at any time.
H B 561 S B 349 pg 1	Commissioner reviews the request for a management plan and accepts or rejects it.	Estimated time to complete this task is 30 days.
H B 561 S B 349 pg 1	Commissioner advertises for proposals to prepare a management plan for the unorganized borough.	The proposed act requires that requests for proposals be advertised for at least 15 days. Estimated time to complete this task is 60 days
H B 561 S B 349 pg 2	Commissioner reviews proposals and awards a contract.	Estimated time to complete this is 60 days.
H B 561 S B 349 pg 2-3	Management plan is prepared.	A maximum of 4 years is allowed to prepare the management plan. The Department may not pay more than $25,000 plus $25 per resident each year for preparation of the management plan.
H B 560 S B 348 pg 3	Residents of the unorganized borough petition for the election of a charter commission and incorporation as a home rule borough.	This activity may occur at any time.
AS 29.18.060	Department reviews the petition and determines its sufficiency.	Estimated time to complete this task in 30 days.
29.18.070	The Department investigates the proposal and prepares and submits a report with recommendations to the Local Boundary Commission.	Estimated time to complete this task is 120 days.
AS 29.18.080	The Local Boundary Commission conducts public hearings throughout the unorganized borough.	Estimated time to complete this task is 90 days.

AS 29.18.090	The Local Boundary Commission conducts a decisional meeting and enters a decision to accept the petition. The Commission could, if the area did not meet borough incorporation standards, reject the petition. A formal statement of decision is issued and sent to the Lieutenant Governor.	Estimated time to complete this 30 days.
H B 560 S B 348 pg 4	The Lieutenant Governor issues an order calling for the election of a charter commission.	The order must be issued within 30 days of receipt of notice that the LBC has accepted the petition.
H B 560 S B 348 pg 4	Local residents submit nominating petitions for the charter commission to the Lieutenant Governor	20 - 30 days are allowed for this activity.
H B 560 S B 348	Lieutenant Governor conducts an election.	The election is held not less than 60 or more than 75 days after the date of the election order.
H B 560 S B 348 pg 5	Charter commission prepares and submits a charter to the Commissioner.	One year is allowed for this activity.
H B 560 S B 348 pg 5	Community and Regional Affairs reviews the petition and accepts it. If the charter is legally deficient it is returned to the Charter Commission which has 90 days to submit a revised charter.	Estimated time to complete this task is 60 days.
H B 560 S B 348 pg 5	Community and Regional Affairs notifies the Lieutenant Governor of the acceptance of a charter. Lieutenant Governor orders an election held to consider adoption of the charter and incorporation as a home rule borough.	Estimated time to complete this task is 30 days.
H B 560 S B 348 pg 5	Lieutenant Governor conducts an election to consider approval of the charter and and incorporation as a home rule borough.	The election must be held 60 to 90 days after the date of the election order.
H B 560 S B 348 pg 6	If incorporation is approved the Lieutenant Governor issues an order calling for a second election to elect borough assembly members, a mayor, and any other elected officials called for by the charter.	Estimated time to complete this task is 30 days.

Third Open Letter to All
Legislators of the State of Alaska

January 28, 1980

RE: Borough Powers (HBs 580, 581, 582, 584, 585 and 586)

Dear Legislator:

On January 21, 1980, the above named bills were introduced by the Rules Committee and referred to the Community and Regional Affairs Committee. These bills are interrelated and if enacted will eliminate the Borough System. The little bit of freedom reserved by the Alaska voters over local government and of local self-determination as demanded by the Alaska Constitution Article X, will be replaced by a state socialistic dictatorship under the Governor and the Department of Community and Regional Affairs.

HB 580, if enacted, will generally speaking, establish each existing regional educational attendance area (school district) as an unorganized borough and will provide for their direct incorporation as a Home Rule Borough.

HB 581, if enacted, will authorize the Office of the Governor to study and to report to the legislature recommendations requiring legislation regarding development and implementation of state services to districts. (Each existing borough and unified municipality and each unorganized borough will be considered a State Service District if HB 580 is enacted.)

HB 582, if enacted, will provide public tax dollars to a municipality or a non-profit corporation to prepare the management program for the unorganized boroughs.

HB 584 will, if enacted, eliminate the Third Class Borough.

HB 585, if enacted, will provide for direct incorporation as a Home Rule Borough for the Second Class Borough. (Last session as part of HB 66 legislation was slipped in giving the Second Class Borough powers of a First Class Borough without the consent of the voters. Presently I am challenging this legislation at the Superior Court of Alaska.)

HB 586, if enacted, will give the Department of Community and Regional Affairs sole authority to prepare a statement of expenditures or appropriations to be made by any municipality, necessitated by enactment of State legislation. In other words, the legislature may impose any State provided service on any municipality and make that municipality pay for the same, and only the Department of Community and Regional Affairs will be authorized to prepare a statement or note of the anticipated cost to be born by the people of the municipality affected.

All these bills are monuments of a state socialistic dictatorship, impairing and denying the people of Alaska rights guaranteed under both the U. S. Constitution and the Alaska Constitution. They are violating the principals of providing for maximum local self-government as set forth under Article X of the Alaska Constitution and they are ignoring the limitations of power to the legislature as set forth under Article II of the Alaska Constitution.

These bills cannot be legally enacted without first changing the Constitution of Alaska. Therefore, I urge you to devote your efforts that HBs 580, 581, 582, 584, 585 and 586 will die in committee.

Very truly yours,

Wolfgang Falke

Dear Committee Members:

Enclosed please find a copy of my forth open letter to all legislators, which, together with my third open letter of which you have received a copy (I hope), I hereby formally ask to be entered as testimony at your next committee meeting. I hope there will be a chance for the committee to consider my suggestions and objections.

I appreciate very much the opportunity to participate in your last weeks teleconference and to listen to the problems faced elsewhere in our State. I am sure I did not address all the questions you may have regarding my comments and I would sincerely appreciate if you could drop me a short line with the specific questions why you think the law must be changed and amended to better solve the "problems", and state the problem. I will respond at once.

I thank you for your kind consideration of my comments.

Very truly yours,

Wolfgang Falke

Fourth open letter to all
Legislators of the State of Alaska

February 12, 1980

Re.: Borough powers (HBs 580, 581, 582, 584, 585, 586, and the corresponding bills in the Senate)

Dear Legislator:

This letter is written in opposition to the above named bills, which will, if enacted, eliminate the borough system. Thereby the opportunity for maximum local self-government as mandated by the Alaska Constitution, article X, will no longer be provided for.

If the sole purpose for this legislation is, (as I have perceived from listening to verbal testimony by members of the Joint Senate & House Community & Regional Affairs Commettee) to streamline delivery of State provided services and to encourage local participation in the process, then nothing would prevent the legislature from simply amending present law to the extent that the existing regional school boards may also act as Regional Health and Welfare Boards. The providing of municipal services to any area of the State where people may desire them is very adequately covered by existing law in Title 29, Alaska Statutes.

Under AS 14.08.41 regional educational attendance areas were established to provide for education in the unorganized borough and to "establish and maintain a system of public schools open to all children of the State" as set forth in the Alaska Constitution, article 7. Each regional educational attendance area is operated on an areawide basis under the management and control of an elected regional school board. If a higher or different level of education than that provided by the State is desired in any part of a regional educational attendance area, or if a municipal service is desired by the people in any part thereof outside first or second class cities, the legislature

may act as the assembly for the unorganized borough and may establish, alter, or abolish service areas for that purpose (AS 29.03.020). The regional school board has no taxing authority and the Division of Lands has the zoning authority in the unorganized borough (AS 38.05.037), except that first class cities shall and second class cities may provide for planning, platting and zoning.

A Third Class Borough is an organized borough and a municipal corporation; it provides for the most local control under State law. A third class borough has an elected assembly which also serves as school board. The presiding officer of a third class borough assembly is both president of the school board and borough executive (AS 29.41.020). The presiding officer is elected from among and by the assembly and has no veto power. A third class borough is a general law municipality (AS 29.08.030) and is granted the powers applicable to all municipalities under chapter 48 of title 29. It must exercise the mandatory areawide powers of education and tax assessment and collection and may assume any municipal powers granted under chapter 48, title 29, by voter approval and may exercise the same on a service area basis only (AS 29.41.010). Planning, platting and zoning powers may be assumed after approval by a majority of the voters of the entire borough and may be exercised on a service area basis. First class cities shall and second class cities may provide for planning, platting and zoning. The State has no zoning authority within a third class borough (AS 38.05.037) except within any portion covered by the Alaska Coastal Management Program, if the municipality has not done so. The State Division of Lands may provide for platting:

> "...for only the purpose of hearing and acting on petitions for the change and vacation of plats" (AS 40.15.075).

The third class borough may well be considered the ideal form of maximum local self-government to facilitate organization of large and sparsely populated areas, such as encompassed by many of the existing regional educational attendance areas.

> "All political power is inherent in the people. All government originates with the people, is founded upon their will only, and is instituted solely for the good of the people as a whole." (Alaska Constitution, article 1, section 2)

In other words all rights of self-determination are originally retained by the people. The State assumed only the rights enumerated in the constitution of Alaska through voter approval and assumed at the same time the obligation to fulfill the responsibilities enumerated in the same. Article VII of the Alaska Constitution requires the State to provide for education, protection of public health and welfare. Article X of the Alaska Constitution requires the State to provide for maximum local self-government and to divide the State into boroughs, organized and unorganized, and that the legislature shall classify boroughs and prescribe their powers and functions and methods by which they may be organized, incorporated, reclassified and dissolved.

The legislature did that; it established 3 classes of organized boroughs and provided for their reclassification, and it did provide for regional educational attendance areas operated by elected school boards. The borough system as enacted provides for maximum local self-government on one hand and for stringent municipal rule on the other, thereby satisfactorily accommodating the needs of the various population centers as well as the sparsely populated areas of the State. The unorganized borough with its multitude of first and second class cities is evidence for the success of the local government system.

As private ownership of land will increase, population centers of various character will develop and thereby will demand increasingly more and different kind of municipal services. The third class borough will undoubtedly fill the need for a first step to organize local municipal government. The Haines third class borough very successfully proves its purpose. The majority of the people of Haines prefer to retain their right of self-determination as evidenced in recent elections by voter rejection of reclassification proposals to a different class. It also reflects their desire and need for self-determination regarding planning and zoning, the power which the people of Haines prefer to retain as evidenced in a recent election. Of course their are always people who prefer a stronger form of local government. In the case of Haines those people are in the minority, but very vocal in favor of HB 584, a bill calling for the elimination of the third class borough. On the other hand in many second class boroughs evidence is apparent of the dominence of the populated center areas over the outlying areas; specifically, over dictatorial zoning administration unjustly denying the less populated

areas their rights to self-determination. Serious attempts have been made and are currently contemplated for putting the question of reclassification to third class status for all or part of some second class boroughs on the ballot.

This flexibility of municipal government organization is absolutely necessary to insure orderly and diversified development in the future; the only way to achieve prosperity to the people and establish a sound economy. For these reasons, and because the Alaska Constitution demands it, I urge you to defeat the above named bills in committee.

Unfortunately most of the citizens of Alaska are not aware of the legislation under consideration and therefore the input you receive reflects mostly that of special interests, such as existing government bodies and government related or dependent groups, who will benefit from this legislation at the expense of the majority of the people. The current administration and the Department of Community and Regional Affairs in particular are consistently opposing and rejecting the third class borough form of local government. This is evidenced by the misleading and false statements found in the recent Yukon Flats Regional Government Study, such as: "A third class borough is little more than a local school board which must levy taxes to support its educational programs. Because it lacks planning authority, it cannot deal with important issues such as planning for public facilities, providing utility services, and planning for growth and development which best fits local needs and desires." This is of course not so. Education is provided and paid for by the State, the third class borough government can do all the planning it needs or wants to do and can establish any municipal service such as utilities, roads, fire protection, recreation, water, sewer, garbage collection, and so on, on a service area basis with the consent of the voters. In the unorganized borough, where most communities at present are not connected by road, the third class borough should be the form of government most attractive for the people to adopt.

The Joint Senate & House Community & Regional Affairs Committee's final report of the Local Government Study - 1979 states: "Creation of the Rural Education Attendance Areas throughout Alaska eliminated the purpose of the third class borough, which has education as its only authorized substantive function." This statement reflects total misinterpretation

of the law and displays arrogance and disrespect for the principals of the right for self-determination of the Alaska people as set forth in their Constitution. Agency representatives as well as members of the legislative local government study committee expressed verbally before public hearings such misinterpretations of the law purely for the benefit of enhencing the power to special interest groups and government bodies. The evidence of their misrepresentations warrants serious consideration of a legislative investigation into the misuse of power and funds by the Department of Community and Regional Affairs. The Department has worked purposely against implementation of the law as prescribed by Alaska Statutes and has unlawfully propagandized misleading facts to influence public opinion in order to change law and thereby enhence the selfserving powers to that department.

Present law very adequately serves the needs for organized and unorganized local government. Education is very well provided to the unorganized borough through the elected school boards of the Regional Educational Attendance Areas. In the same way health and welfare services could be administered by the State. If special services are desired in specific areas, first and second class cities may provide for the local needs of such services or the legislature may act as the assembly for the unorganized borough and establish service areas to satisfy those needs. A third class borough may be formed in which the assembly is also the school board and may, in addition to the mandatory functions of administering education and tax assessment and collection, exercise any or all additional municipal functions, including planning, platting and zoning, on a service area basis, after voter approval. If the need for areawide exercise of the additional services should arise or be desired, the people may by majority vote reclassify or incorporate with the powers of a borough of the second or first class, or as a home rule or unified municipality, as prescribed by law.

No purpose is cited for the enactment of the above named bills under consideration which could not be implemented under present law. The proposed legislation will substantially eliminate the opportunity for local self-government and thereby impair and deny the people of Alaska the right of self-determination as set forth under the Constitution.

These bills are contrary to the best interest of the people as a whole. Therefore they should die in committee, and in any case must never be enacted.

Very truly yours,

Wolfgang Falke

Bob Lohr, Deputy Director, RuralCap

- Voluntary process contained in HB 580 should be emphasized repeatedly. Not intent to promote mandatory boroughs and this should be continuously emphasized. Insert wherever reasonable (p. 1 line 19)
  Overkill the voluntary aspects of the bill.
  Does boundary drawing encourage borough formation? This is a question which will be raised.
- p. 2 line 8 120 days not long enough
- The boundaries which are developed should be provisional for the duration of the plnaning process.
- p. 4 Add to planning process
  financing issue not addressed.
- Expressed concern tht REAA boundaries might not meet borough boundary standards.
- p. 3 line 29 Add that the commissioner would "seek public participation in the evaluation process.

Suggests that wording used in the development of coastal resource service districts could be used, i.e., by resolution by a majority of villages or petition of 15%--to ask for funds for study. Whatever entity receives the money should be representative of the community. People are deciding what should take place. People want to evaluate.

Questioned if enough money was being appropriated in HB 886? Palmer McCarter explained that the estimate was that 3-4 regions might request funding during a given year.

Spud Williams - Citizens' Participation Conference re HB 580

- No phase between organized and unorganized status of regions. Will be spending alot of money to develop plans and a "planning commission" of sorts will have been established and yet then there will be no mechanism for local followthrough.
  What will be done with the plans? p. 5 line 14

(see p. 2)

COMMITTEE ACTION: No action. Scheduled for hearing 3/21/80

TAPE # SIDE ____ Footage ____ Cassette Tape #

There will be no way to implement the recommendations of the study. There should be a phasing process allowing for planning and zoing powers. There is a need to implement what we are planning for. Allow enough time to see what works in eahc area. Check for legitimacy of planning instrument.

There should be a provision for review of the exemption provision * in HB 851 every 3 years or after provisional boundaries have been made final.

State should recognized IRA Councils as a new class of city. *

Revenue sharing for IRAs and recognition of IRAs for revenue sharing purposes has been raised by Saxman. Legal reserarch is being done in conjuntion with the Tanana Chiefs which addresses this question, according to Palmer McCarter.

Lohr pointed out that there are a number of native villages which prehaps need modification from the requirement that Native Reigonal Corporation Boundary lines be respected: Mentasa, Cantwell, Lime Village. Suggests that perhaps there should be listed in the bill. *

580-

BILL NUMBER AND TITLE: CS HB 580/581 Establishing Unorganized Boroughs Responsibilities of DPDP

ORIGINAL SPONSOR: _____ OTHER SPONSORS: _____

RECEIVED FROM: _____ FURTHER REFERRALS: _____

HEARING DATE: 3/17/80

MEMBERS PRESENT:

Bill Parker		Pat Carney	X
Margaret Branson	X	Charlie Parr	X
Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	

CSHB 580
Bob Lohr, Ruralcap

Substantial improvement over original bills. Requests that action be deferred until Thursday when RuralCap Citizens' Participation Conference will have final position paper developed. RuralCap believes it is desirable to combine the drawing of the boundary lines with the planning fund for the unorganized boroughs as is done in CSHB 580. Likes the addition of the word "shall" in page 4 line 5 as was recommended during RuralCap testimony.

Parr - Suggests that the assistance being given in Sec. 44.47.085 P. 3) is really for "planning" rather than for "management" programs and suggests that this be reworded.

CSHB 581
Bob Lohr - Sees the effective dates as the key in this bill and states that the lag time between creation of the unorganized boroughs and the use of these new boundary lines by the state is too long. Also suggests that the exemption language be tightened in Sec. 44.17.130 (1) and (2)(A). Concerned that in (1) that the whole Dept. of Admin. might be exempted or that certain important programs might be exempted. Lohr sees (A) as overly broad with the current wording. Resource information will be main conern after local governments are formed. Lohr expressed concern re how agencies might combine "one or more home rule boroughs, general law boroughs, unified municipalities, and unorganized boroughs" (p. 2 lines 27-29)
p. 2 line 3 Lohr suggests that it be stated that this exemption not be renewable.
p. 2 line 5 It appears that a higher standard is implied with the use of "substantially" re increased workload and a similar higher standard should be applied to "additional expense" and "decreased efficiency".

COMMITTEE ACTION:

TAPE # SIDE _____ Footage _____

HB 580

Palmer McCarter, Director Division of Local Assistance
DC&RA
p. 3 Line 4 Questions inclusion of nonprofit in this section and suggests that it should be "corporation" while the idea of "nonprofit" should be included in (c) of this section. Asks whether DC&RA would be able to contract with a consultant with the given language? The language of A should be consistent with C. A consultant shouldn't be able to initiate a study.

Parr - Questions if ISIGR would be able to do a study under the existing wording and states that it should not preclude a group such as that which has substantial expertise.

McCarter - Suggests that corporation of whatever type should be able to do study. Should go back to the notion of nonprofit corp. as being among those who can request.

Parr - The people or C&RA should be the only ones who can request the study.

Branson - suggests that this section be reorganized to put (c) first and (a) in place of (c).

Parr - There is a need to address just the constitutional standards for borough incorporation as few REAAs would meet these standards.

Jeff Smith- Maneluk, Planning Director
Concurs with Parr that what is being addressed is a "planning" strategy. Local control should be of prime importance and it would be a mistake to allow a private consultant to request that a study be done.
Smith discussed some of the history of the NANA regional strategies and the current state of the effort.

HB 581
Jay Moor DPDP
Logical sequence of bill is good. Section 1 Requires that basic program data and information conform to specific boundaries. Feels that certain happenings in state government will be complimentary to proposdal in CSHB581:
1. automation of state budget
2. State library mandate for the data access center
3. ALARS system of Natural Resources
4. Management by objective approach

Parr - Will all of these systems be compatible?

Moor - Change wording on p. 1 line 21 to read:
(1) Information which may be required by the Office of the Governor for purposes of modeling the geographic distribution of the state's population, economic activities and public services."

Parr - Suggests that the intent in Section 1 (p. 1 lines 12-18) is not clearly stated and should instead be rewritten to be similar to statement on p. 2 lines 19-26.

Question is raised as to when the effective date of the ~~exeption~~ exemption will be? Will it be from the effective date of this section?

Parr - Suggests eliminating everything on p. 3 line 14 after the word "public".

RE: Local Government Study
Legislation

Dear Arliss:

I have reviewed with great interest the legislation resulting from the local government study that you co-chaired. I believe that the legislation your committee has proposed, which I have seen in the form of House Bills 580-586, successfully addresses deficiencies in the State's municipal law that were pointed out during the course of the committee's study. As one who has had some experience practicing municipal law in Alaska, I believe that the amendments proposed in these bills make important improvements in the statutes governing Alaska's municipalities. If passed, these bills will create a better statutory framework for both urban and rural local government, affording needed flexibility to meet unique community needs.

I also would like to offer the following comments and suggestions regarding the specifics of these bills. These address technical matters which, I believe, may be resolved easily while preserving the desirable policy thrust of the legislation as proposed.

HB 580

29.03.021--If the commissioner adjusts boundaries, when does the establishment of an unorganized borough that is the subject of such an adjustment become effective? Some languge positively declaring the establishment of unorganized boroughs with adjusted boundaries, similar to that in 29.03.011, might be helpful.

GARNETT, KLINKNER & BENDELL
ATTORNEYS AT LAW
900 WEST FIFTH AVENUE, SUITE 540
ANCHORAGE, ALASKA 99501
(907) 276-2221

44.17--A specific requirement that districting be reflected, to the extent feasible, in agency budgets commencing with a specified fiscal year, might help move the districting process along.

29.19.020--What are the requirements for the nominating petitions referred to in this section? They might be made analogous to those in AS 29.13.020.

29.19.030--What happens if the commission fails to complete a charter in one year, or if it fails to modify a proposed charter within 90 days of rejection by the commissioner of community and regional affairs. If such a failure terminates the existence of the commission and its authority to act, the statute should so specify.

Disputes may arise as to whether particular charter provisions conform to state law. Several cases (for example, the one involving the Anchorage Charter's Notice of Claims Provision) have been litigated over this issue. A provision in Chapter 29.19 providing for judicial review of a charter rejection, the parties who may seek such review, and the procedure after such review has been completed, would be helpful.

29.19.040--Should there be a time limitiation for the ordering of an election after it has been requested by the commissioner of community and regional affairs?

29.19.070--This section may cause problems. Stating that the referenced sections apply may be interpreted to mean that other statutes not mentioned do not apply-for example, the part of AS 29.18 pertaining to land selection.

HB 585

As 29.08.010 also should be amended to read:

> A home rule municipality is a municipal corporation and political subdivision and is an organized borough [of the first class] or a city of the first class which has adopted a home rule charter. It has all legislative powers not prohibited by law or charter.

Since both first and second class boroughs may adopt a charter rule under this bill (and under HB 530, too, as I

GARNETT, KLINKNER & BENDELL
ATTORNEYS AT LAW
500 WEST FIFTH AVENUE, SUITE 540
ANCHORAGE, ALASKA 99501
(907) 276-2221

will discuss below), AS 29.08.010 should be consistent with that change.

STATUS OF HOME RULE BOROUGHS CREATED UNDER HB 580 OR 585

The creation of home rule boroughs under either bill creates a conceptual problem. While this problem in no way detracts from the substantive merits of this legislation, it should be addressed, and one of several policy solutions adopted.

Title 29 presently provides for first and second class boroughs. The principal distinction between them arises in AS 29.38, which specifies how first and second class boroughs, respectively, exercise non-areawide powers. First class boroughs are authorized to exercise any general law municipal power on a non-areawide basis, AS 29.38.010. Second class boroughs are limited to those powers conferred at incorporation, by AS 29.48.020, or approved at an election, AS 29.38.020-050. The labeling of a borough as "first class" or "second class" is basically shorthand for this distinction.

As HB 580 and 585 now stand, a home rule borough formed under either of those bills need not conform to the first class/second class borough distinction in AS 29.38. A new borough charter could adopt as its authority to exercise non-areawide powers one of the alternatives specified in AS 29.38, or develop its own approach, for example, by making the exercising of some, but not all non-areawide powers subject to voter approval. All of these options are open because AS 29.38 does not govern home rule boroughs, see AS 29.13.100. Since Title 29 refers throughout to "first and second class boroughs", it is important that the types of boroughs that may be created (a policy question) and the title's nomenclature (a housekeeping matter that should be resolved after the policy has been determined), be consistent.

There are several possible approaches to this problem:

1. Require each new home rule borough formed under HB 580 or HB 585 to designate itself either a first class or second class borough, by adopting the corresponding authority to exercise non-areawide powers under AS 29.38.

2. The same as (1) above, but in addition specify that a home rule borough formed under HB 585

GARNETT, KLINKNER & BENDELL
ATTORNEYS AT LAW
900 WEST FIFTH AVENUE, SUITE 540
ANCHORAGE, ALASKA 99501
(907) 276-2221

remains a second class borough governed by AS 29.38.020-050.

3. Provide that home rule boroughs formed under HB 580, HB 585, or both, may determine by charter the scope of their authority to exercise non-areawide powers, and are not limited to the two options provided in AS 29.38.

If (1) or (2) above is adopted, the present nomenclature is sufficient. If (3) is adopted, references to "first and second class boroughs" must be modified to take account of the hybrid home rule boroughs that may be created. In this case, if the legislation abolishing third class boroughs passes, a reference to "organized boroughs" would be sufficient. In the classification of boroughs there would be three distinct classes: home rule, first class, and second class.

Thank you for your consideration.

Yours truly,

Thomas F. Klinkner

The Honorable Robert F. Messegee, Mayor
City of Skagway
P.O. Box 415
Skagway, Alaska 99840

Dear Mayor Messegee:

It was good to meet you when you were in Juneau at the Mayor's Conference recently.

As I mentioned, Senator Arliss Sturgulewski's staff informed me that the joint House and Senate Community and Regional Affairs Committees will be discussing the Skagway annexation on February 29, 1980, from 8 to 10 a.m. in room 11? of the Capitol Building. I informed both the House and Senate committees that you would be willing to come down and present testimony if nesessary; therefore, I am sure you will be hearing from the committees in that regard.

Sincerely yours,

Marie Pignalberi
Deputy Commissioner

Representative Bill Parker
Pouch V
Juneau, Alaska 99811

Dear Fellow Countryman:

The Executive Committee met last Wednesday and Thursday, February 27 & 28th, 1980. One of the times discussed was the unorganized borough.

I realize from meeting with you previously tha the unorganized Borough concept was created to help offset the peopulation explosion of the State of Alaska. (Anchorage, Fairbanks). The committee's concerns about the unorganized borough concept are the following:

1. When the State turns over its services to the unorganized borough does annual operating budgets need to have approval of the legislature?

With reapportionment coming up, most of the legislators will be from the Urban Areas. The Executive Committee's concern is budget cuts. The current bill should contain provisions to insure that operations of each unorganized borough would not be shortchanged.

2. Taxes. This isprobably the issue that would immediately turn off the bush residents. Perhaps a provision that would put a ceiling on the amount of taxes that can be collected when the borough decides to levy property taxes. What they are afraid of is losing property because someone did not pay taxes on his boat or property. Some ideas tossed around were $50,000 deductible for each household, and a limit of 10 mils tax levy.

Bristol Bay Native Association would be very much interested if these items can be addressed in the original bill.

Hopefully, I will be down Juneau, if so, I'll make it a point to look you both up.

Sincerely yours,

BRISTOL BAY NATIVE ASSOCIATION

RE: Opposition to SB 343, 349, 350, 351, 352, 353, 354.

Dear Senator Sturgulewski:

The intent behind some of these bills could be for the good of the people but in their present state they are very premature. In reviewing SB 343 and 349, I find that these bills need more time and study on a local level. SB 349 should be introduced prior to 343 before any type of movement is made to basically organize the unorganized borough, which SB 343 is trying to do. In SB 349 the state should not have the authority to contract, as this is a breakdown of local government in itself. In looking over the proposed boundaries for the unorganized boroughs, I find these boundaries to be grossly out of proportion and there is no way for there to be a true local government in these areas. I realize that in the future the boundaries could be changed, but feel that this might not be possible due to improper planning and the development of a standardized system that could not afford the change.

The State Constitution provides adequate means and types of municipal governments for communities to choose from in order to have a local government body. I find that changing these procedures in order to reach a higher form of government more easily could allow the majority to bedominated by a minority and/or special interest groups or people concentrated in one area.

SB 350 needs a lot of work. The State is acting as the local government and there is no provision for input from residents in the area affected.

SB 351 relating to state aid to local government has good potential but discriminates toward communities that are not recognized municipalities who need the aid just as bad. A community needing some financial assistance might form a municipal government in order to receive this aid but it not be in the best interest of the community.

SB 352. The concept of this bill is good but it does not provide for input from the municipality to assist in the preparation of the note or statement.

In SB 353 you are again trying to make a short cut to a higher form of government. If this type of government is wanted by the majority, then it is easy enough for them to attain it under

present law. This bill has not been exposed to the voters so they are not aware of the side effects it could have on their community. For these reasons alone the bill should not pass. It truly needs to be studied by the people with more input from them before passage.

SB 354. I strongly oppose this bill and have given my reason to you already in writing and in testimony. With SB 348, 349, and 353 providing for more options to choose from, I find an attempt to eliminate third class boroughs a step backwards. I fail to see any gain by this act.

Very truly yours,

Allen J. Busby

Jay Moor - DPDP

Sees prime target as service agencies. There are 3/4 ways to establish boundaries (1) by fiat (2) develop through compromise with agencies (3) objective approach-look at clientale (4) develop geocoding system. Collect information this way then build boundaries on an ad hoc basis.

Arbitrary may not be worst. State agency needs, however, should be secondary to needs of people being served. Management by objective should be considered. Agencies can ask for variances under bill and that might moot the effectiveness.

John Post, Dept. of Labor

1980 census boundaries are similar to those in HB580. Census areas and subareas (23 major areas and 24 subareas) should be taken into consideration in the creation of boundaries.

Palmer McCarter, Dept. C&RA

Dept. strongly supports. Active in working with the committee. This is a compromise bill and takes a significant step in providing some organization in the unorganized boroøugh. Questions is appeals on boundaries would go to the legislature or rather to the Governor? Suggests that appeals should go to the Governor. Otherwise, one might be jumping the normal chain of command. And the legislature could act if the Governor isn't acting responsibly.

Refers to a comment made by Parr re constitutional borough standards and indicates that this concern is met by the reference to Title 29 in the bill.

It would appear that the Dept. of C&RA would be responsible for costs associated with drafting and preparation of charter.

Asks how REAAs would be altered if it is necessary. Not sure that a process exists to do this in the bill.

Chitwood - 1 yr. as unrealistic for charter preparation.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY 80 - Reflects travel expenses, notice requirements, and supplies needed for public hearings on drawing boundary lines that differ from REAA's in the unorganized borough.

FY 81 - 85 - Reflects the addition of 3 Local Government Specialists (Range 17), a Clerk Typist III (Range 8) and Clerk Typist II (Range 7) to assist unorganized boroughs in becoming home rule boroughs. Seven proposed regions are presumed to be likely candidates for the home rule option. These areas are 1) Yukon Flats (REAA 13), 2)REAA 12, 3) NANA region (REAA 1), 4) Petersburg/Wrangell (part of REAA 19), 5) Prince of Wales Island (part of REAA 19), 6) The Aleutian Chain (parts of REAA's 8 and 10), and 7)Prince William Sound (REAA 21). It is anticipated that if this bill passes this session the bulk of the activity will take place during FY 81 and FY 82 and will begin to lessen gradually through FY 85 as the newly incorporated boroughs become more self-sufficient.

The high travel cost during FY 81 reflects the need to administer both of the main

Budget and Management

activities in the bill: drawing the boundaries for the unorganized boroughs and assisting the seven areas previously mentioned in drawing up home rule charters.

The Local Boundary Commission's involvement in the incorporation of home rule boroughs under Section 4 of this bill is not budgeted for in this fiscal note. The annual appropriation received by the LBC to perform its constitutional and statutory duties may be adequate to cover the expenses incurred due to passage of this bill. If these expenses cannot be met by the LBC's annual appropriation there should be adequate lead time to secure additional funding so that the Commission may adequately participate in the borough incorporation process.

RE: CS HB 580

Questions re CS HB 580 Work Draft:

Is the Purpose, as written, adequate for what we are doing now in this bill, that is : Establishing unorganized boroughs; allowing for direct incorporation of a home rule borough; and including the substance of CS HB 582 work draft which provides for a program of planning assistance for the unorganized boroughs?

p. 2 Work Draft
Should wording on lines 27-29 be included now that we are dealing with service delivery in HB 581?

Sould CSHB 582 be included at the end of p. 2 or should it be at the end of HB 580?

p. 4 We should deal with the questions raised by Lisa Rudd and Klinkner in this rewrite.

p. 5 line 16- Is 1 year long enough?

p. 6 lines 2,3 Is there any conflict between this section and Sec. 29.19.060 (p. 6 lines 25-29)?

p. 7 Is there any need to adjust the dates on lines 18,24 now that DPDP is talking about data collection by July 1, 1981 and implementation by July 1, 1982.

Jack, I will talk with you about CSHB 581 on Monday.

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 580

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing unorganized boroughs, amending the responsibilities of executive departments for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature finds that the single unorganized borough of the state has proven unworkable in accommodating demands from its residents for change and recognizes that a more systematic approach to the planning and delivery of services for residents of this area is necessary. In providing, in this Act, for the identifying of a common set of boundaries by which to subdivide the state's single unorganized borough into multiple unorganized boroughs, it is the purpose of this legislation

(1) to facilitate planning and program development by coordinating delivery of services and the collection of data; and

~~(2)~~ to extend the opportunity to residents of unorganized boroughs to assist in planning and program development by

~~(A) preparing regional management studies; and~~

(B) broadening the range of methods by which residents may incorporate a regional government.

* Sec. 2. INTENT. In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to

regions within unincorporated areas be made only within the appropriate boundaries for unorganized boroughs established under AS 29.03.011 - 29.03.021, added by sec. 3 of this Act.

* Sec. 3. AS 29.03 is amended by adding new sections to read:

Sec. 29.03.011. ESTABLISHMENT OF UNORGANIZED BOROUGHS. Except as the boundaries are adjusted as provided in AS 29.03.021, the geographic area within each regional educational attendance area established under AS 14.08.031 is, effective 120 days after the effective date of this Act, established as an unorganized borough.

Sec. 29.03.021. ADJUSTMENT OF BOUNDARIES BY COMMISSIONER. (a) The commissioner of community and regional affairs may, after public hearings in regional educational attendance areas, establish boundaries other than the boundaries of a regional educational attendance area for an unorganized borough under AS 29.03.011. In making adjustments, the commissioner shall consider

(1) the standards applicable to the incorporation of boroughs under AS 29.18.030;

(2) the regional boundaries adopted by the Native regional corporations established under the Alaska Native Claims Settlement Act;

(3) the boundaries of regional educational attendance areas and coastal resource service areas; and

(4) census divisions of the state applicable to the 1980 census.

(b) The commissioner of community and regional affairs may not establish boundaries for an unorganized borough which include territory within more than one Native regional corporation established under the Alaska Native Claims Settlement Act unless the inclusion of the territory is reasonably necessary for the efficient administration of programs and services by state agencies.

Should CS HB 582 be here?

CHAPTER 19. DIRECT INCORPORATION OF A HOME RULE BOROUGH.

Sec. 29.19.010. INCORPORATION. (a) The residents of an unorganized borough established in accordance with AS 29.03.011 - 29.03.021 may apply for the incorporation of a home rule borough. The petition for borough incorporation shall be filed with the Department of Community and Regional Affairs and shall include the information and signatures required by AS 29.18.050. Petitions for incorporation filed under this section shall be processed, reviewed and determined in accordance with AS 29.18.060 - 29.18.090.

(b) A petition submitted under (a) of this section shall

(1) specify the number of members of the charter commission, but the number of members may not exceed 15;

(2) describe the manner of election of members of the charter commission; if election is to be by district, a description of the boundaries of each district shall be included in or attached to the petition;

(c) The standards applicable to the incorporation of an organized borough under art. X, sec. 3 of the state constitution and AS 29.18.030 apply to the incorporation of an unorganized borough under this section. Equal protection standards of the state constitution apply to the election of members of the charter commission under this section.

Sec. 29.19.020. CHARTER ELECTION. If the Local Boundary Commission accepts the petition filed under AS 29.19.010, it shall immediately notify the lieutenant governor. Within 30 days after notification, the

Some mention of home rule boroughs as first class as to functions/powers which must be exercised?

lieutenant governor shall order an election within the proposed home rule borough to determine whether the voters will elect a charter commission, and to determine the persons elected to serve on the charter commission. The lieutenant governor shall provide not less than 20 or more than 30 days during which candidates for the charter commission may present nominating petitions. The election on the question of election of a charter commission and the determination of persons elected to serve on the charter commission shall be held not less than 60 or more than 75 days after the date of the election order.

Sec. 29.19.030. PREPARATION OF CHARTER. (a) If, at the election called by the lieutenant governor under AS 29.19.020, a majority of the voters favors election of a charter commission, the persons receiving the highest number of votes cast at that election constitutes the charter commission. The charter commission shall prepare a proposed charter and submit it to the Department of Community and Regional Affairs within one year of the first meeting of the charter commission. The commissioner of community and regional affairs shall review the proposed charter for compliance with laws applicable to home rule municipalities and, if it complies, request the lieutenant governor to submit the proposed borough incorporation petition and proposed home rule charter to residents of the proposed home rule borough. If the proposed charter does not comply with law, the commissioner shall return the proposed charter to the charter commission with a statement of the legal deficiencies.

(b) Within 90 days of the receipt of comments from the commissioner of community and regional affairs with respect to provisions of a proposed home rule charter which are not in compliance with the laws applicable to home rule municipalities, the charter commission may prepare and submit to the commissioner an amended charter which meets

the objections in the original proposed charter.

(c) Only one original and one amended charter may be submitted to the commissioner of community and regional affairs under this section.

Sec. 29.19.040. RATIFICATION OF CHARTER. The lieutenant governor shall order an election on the question of whether the area shall be incorporated as a home rule borough in accordance with the charter approved by the commissioner of community and regional affairs. The proposed charter shall be posted throughout the proposed borough by the lieutenant governor before the election is held. The election shall be held not less than 60 or more than 90 days following the election order.

Sec. 29.19.050. RESULTS OF RATIFICATION ELECTION. (a) If a majority of the votes cast by the qualified voters of the proposed borough is against the incorporation of a borough under the proposed home rule charter, the proposal is defeated.

(b) If a majority of the votes cast by the qualified voters of the proposed borough favors incorporation of the borough under the proposed home rule charter, the lieutenant governor shall declare that the unorganized borough in which the election was held is incorporated as an organized borough and a municipal corporation in accordance with the provisions of the home rule charter. The lieutenant governor shall provide for the election of the officers provided for in the charter.

(c) The election and qualification of officers under (b) of this section shall be completed by the lieutenant governor in accordance with AS 29.18.120 and the provisions of the home rule charter of the borough.

Sec. 29.19.060. RESUBMISSION OF CHARTER. If a proposed charter is rejected, the charter commission shall prepare, adopt and submit a second proposed charter to the voters within one year of the date of the charter election held under AS 29.19.040. If the second proposed charter is rejected, the charter commission is dissolved.

Sec. 29.19.070. VOTERS, ELECTIONS AND COSTS. (a) A person is qualified to vote in an election authorized by AS 29.19.010 - 29.19.060 if he is qualified to vote in state elections and if he is a resident of the unorganized borough proposed for incorporation as a home rule borough.

(b) The lieutenant governor shall conduct elections authorized by AS 29.19.010 - 29.19.060 substantially in the manner provided in the Alaska Election Code (AS 15.05 - 15.60), and shall certify the results of all elections under this chapter. Costs of elections under this chapter shall be paid by the office of the lieutenant governor.

(c) Costs of charter preparation under this chapter shall be paid by the Department of Community and Regional Affairs.

Sec. 29.19.080. APPLICABILITY OF GENERAL TRANSITIONAL PROVISIONS. The provisions of AS 29.18.130 - 29.18.180 apply to home rule boroughs incorporated under this chapter.

* Sec. 6. AS 29.03.010 and 29.03.020 are repealed.

* Sec. 7. UNORGANIZED BOROUGH SERVICES AREAS. (a) The commissioner of education shall report to the legislature, not later than January 31, 1981, recommending whether changes should be made in the boundaries of a regional educational attendance area organized under AS 14.08 to conform the boundaries of the regional educational attendance area to an unorganized borough of which it is a part.

(b) The Alaska Coastal Policy Council shall report to the legislature, not later than January 31, 1981, recommending whether changes should be made in the boundaries of an existing coastal resource service area organized under AS 46.40 to conform the boundaries of the coastal resource service area to an unorganized borough of which it is a part.

* Sec. 8. This Act takes effect immediately in accordance with AS 01.10.070(c).

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY 80 - Reflects travel expenses, notice requirements, and supplies needed for public hearings on drawing boundary lines that differ from REAA's in the unorganized borough.

FY 81 - 85 - Reflects the addition of 3 Local Government Specialists (Range 17), a Clerk Typist III (Range 8) and Clerk Typist II (Range 7) to assist unorganized boroughs in becoming home rule boroughs. Seven proposed regions are presumed to be likely candidates for the home rule option. These areas are 1) Yukon Flats (REAA 13), 2) REAA 12, 3) NANA region (REAA 1), 4) Petersburg/Wrangell (part of REAA 19), 5) Prince of Wales Island (part of REAA 19), 6) The Aleutian Chain (parts of REAA's 8 and 10), and 7) Prince William Sound (REAA 21). It is anticipated that if this bill passes this session, the bulk of the activity will take place during FY 81 and FY 82 and will begin to lessen gradually through FY 85 as the newly incorporated boroughs become more self-sufficient.

The high travel cost during FY 81 reflects the need to administer both of the main activities in the bill: drawing the boundaries for the unorganized boroughs and assisting the seven areas previously mentioned in drawing up home rule charters.

There will be no fiscal impact in Sec. 4 of this bill until there is an appropriation (CSHB 886) for regional plans. The Department does anticipate the following additional cost at such time as appropriations are made.

Staff to monitor and oversee contracts.

Personnel		42,156
Local Government Specialist IV (Range 19)		32,934
Benefits @ 28% base pay		9,222
Travel 10 trips @ 600		6,000

The Committee reviewed the proposed amendments (see attached) developed in response to the Citizens' Participation Conference RuralCap Local Government Workshop recommendations as contained in the Executive Summary (March 17-20, 1980), "Juneau 1980". CPC addressed each of the recommendations in a public hearing with the committee previously held on March 19, 1980.

Committee took action as follows:
Approved:
p. 2 Line 8 Change 120 to 180 days
p. 2 Lines 11-14 Hearings would be held "upon request" of those in the region

The Committee considered and rejected inclusion of the other proposed amendments and approved a CS with the amendments as noted.

COMMITTEE ACTION: CS passed out with changes as noted above.

TAPE # 5 SIDE 2 Footage 0-878

PROPOSED AMENDMENTS TO
CS HB580

p. 1 Line 9 — Insert "voluntary" before adoption

p. 2 Line 8 — Change 120 to 180 days

p. 2 Lines 11 - 14 — The Commissioner of community and regional affairs shall hold public hearings in each of the regional educational attendance areas and may, after such hearings, establish boundaries other than the boundaries of a regional educational attendance area for an unorganized borough under AS 29.03.011.

p. 2 Line 27 & following — Assistance for Regional Planning Programs In the Unorganized Borough would be rewritten as follows:

(a) Upon request, funds shall be made available by the Commissioner of Community and Regional Affairs to a municipality, group of municipalities, non-profit corporation or non-profit corporations which represent the majority of the residents of the unorganized borough for the preparation of a regional planning study. A request may also be made by residents of an unorganized borough upon petiton to the Commissioner signed by a number of qualified voters equal to not less than 15% of the number of votes cast in that unorganized borough at the last state general election.
A grant will be made by the commissioner upon a finding that the municipality, group of municipalities, or non profit corporation(s) propose a study that considers the entire population of the area. Funds will be provided for only one regional planning program for each unorganized borough.

(b) Grants made in (a) may be, at the discretion of the group selected by the commissioner be further subcontracted for planning studies. If the selected representative group wishes to contract for the preparation of a regional planning study, they shall request the Department of Community and Regional Affairs to advertise a request for proposals for the preparation of the regional planning study outlining the work to be completed and containing other information which the commissioner believes will inform the public of the work to be completed under the contract. The commissioner shall advertise for a period of not less than 45 days by public notice announcements provided to newspapers and radio and television stations.

(c) A contract entered into under this section shall

(See rest of CSHB580 p. 4)

Following sections will be renumbered as appropriate.

p. 7 Line 28

This section will be rewritten to reflect that a majority of the votes cast within the incorporated cities of the unorganized borough and a majority of those cast in the areas outside of the incorporated cities must support the charter for passage.

The Workshop participants formed into two groups. One group examined the package of Bills proposed by the Joint Interim Committee. The other group looked at alternative approaches including the relationship of the Planning Process to Regional Government, options for contracting with non-profit corporations for the delivery of services and other concerns.

The full group agreed to use CSHB 580 as the vehicle for comments. Participants acknowledged the extensive work that has gone into the development of this Bill, but felt that any legislation dividing up the unorganized borough is so fundamental and so important to residents of rural Alaska that additional public involvement beyond that which has occurred already is essential before final boundaries are drawn. The changes that Workshop participants suggested are outlined below.

3. RECOMMENDATION OF BILLS CONSIDERED:

The Committee Substitute for House Bill 580 ("An Act relating to unorganized boroughs, establishing unorganized boroughs, establishing a program of planning assistance for unorganized boroughs, authorizing adoption of home rule charters by unorganized boroughs, and directing submission of recommendations concerning adjustment of the boundaries of service areas of the unorganized borough") is by far the most important and far-reaching Bill that the Workshop considered. The following amendments to the Bill were recommended:

1. The voluntary nature of the process needs to be re-emphasized in the wording of the Bill. The intent language of the Bill should include a statement that it is not the intent of this Legislation to assist in any way a move toward imposition of mandatory boroughs at a later date

2. The establishment of boundaries for unorganized boroughs is very important, and should be done more deliberately, with more checks and balances than provided for in the present version. The effective date of the boundaries should be more than 120 days after enactment of this Legislation People need more time than that to comment on the appropriateness of the boundaries. Hearings should be held in all proposed unorganized boroughs to explain the options the Legislation provides, and not simply discuss proposed boundaries.

   The boundaries that are established should remain provisional until the planning programs (provided for later in this Bill) are completed. The Regional Educational Attendence Area boundaries are ac-

ceptable as a starting point for this planning process, but a mechanism must be provided to adjust them if the regional planning programs determine them to be inappropriate in certain areas.

As drafted, the Bill would not allow an "unorganized borough" to include communities located outside of the boundaries established by the Alaska Native Claims Settlement Act, even though such communities may have been placed within the boundaries of Regional Education Attendance Areas established pursuant to SB 35. At least three such communities were identified (Mentasta, Lime Village, and Cantwell) by delegates. The Committee recommends that hearings be held in those three communities and in all other communities similarly situated in order that local desires may be honored.

3. The assistance provided for management programs in the original Committee Substitute should be amended to refer to planning programs. The language in the Bill is really talking about a planning program, and the title should reflect this. (The most recent Committee Substitute has already adopted this suggestion.)

4. The Workshop felt that local initiation of, and participation in, the selection of a contractor for the regional planning program is absolutely essential, and should be required in all cases. In order for any planning exercise to be legitimate, the active involvement of those on whose behalf the plan is drawn up is required.

5. Since the boundaries proposed in recommendation #2 are provisional, the regional planning program contract should require an additional element; the appropriateness of the provisional boundaries.

6. Onee the regional planning program is conducted, provisions should be made for an optional election to form a planning service area to continue planning and to implement the plan, without requiring the formation of organized borough government.

s Bill is recommended to the Citizen's Participation Con-ence as the highest possible priority for passage.

Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	

Also present were: Sen. Arliss Sturgulewski

Bob Lohr, Deputy Director, RuralCap

Voluntary process contained in HB 580 should be emphasized repeatedly. Not intent to promote mandatory boroughs and this should be continuously emphasized Insert wherever reasonable (p. 1 line 19)
Overkill the voluntary aspects of the bill.
Does boundary drawing encourage borough formation? This is a question which will be raised.
p. 2 line 8 120 days not long enough
The boundaries which are developed should be provisional for the duration of the plnaning process.
p. 4 Add to planning process

Expressed concern tht REAA boundaries might not meet borough boundary standards.
p. 3 line 29 Add that the commissioner would "seek public participation in the evaluation process.

Suggests that wording used in the development of coastal resource service districts could be used, i.e., by resolution by a majority of villages or petition of 15%--to ask for funds for study.
Whatever entity receives the money should be representative of the community. People are deciding what should take place. People want to evaluate.

Questioned if enough money was being appropriated in HB 886? Palmer McCarter explained that the estimate was that 3-4 regions might request funding during a given year.

Spud Williams - Citizens' Participation Conference re HB 580
No phase between organized and unorganized status of regions.
Will be spending alot of money to develop plans and a "planning commission" of sorts will have been established and yet then there will be no mechanism for local followthrough.
What will be done with the plans? p. 5 line 14

(see p. 2)

COMMITTEE ACTION: No action. Scheduled for hearing 3/21/80

TAPE # SIDE ____ Footage _____ Cassette Tape #

There will be no way to implement the recommendations of the study. There should be a phasing process allowing for planning and zoing powers. There is a need to implement what we are planning for. Allow enough time to see what works in eahc area. Check for legitimacy of planning instrument.

There should be a provision for review of the exemption provision in HB 851 every 3 years or after provisional boundaries have been made final.

Stace should recognized IRA Councils as a new class of city.

Revenue sharing for IRAs and recognition of IRAs for revenue sharing purposes has been raised by Saxman. Legal reserarch is being done in conjuntion with the Tanana Chiefs which addresses this question, according to Palmer McCarter.

Lohr pointed out that there are a number of native villages which prehaps need modification from the requirement that Native Reigonal Corporation Boundary lines be respected: Mentasa, Cantwell, Lime Village. Suggests that perhaps there should be listed in the bill.

		Ray Metcalfe	

CSHB 580
Bob Lohr, Ruralcap

Substantial improvement over original bills. Requests that action be deferred until Thursday when RuralCap Citizens' Participation Conference will have final position paper developed. RuralCap believes it is desirable to combine the drawing of the boundary lines with the planning fund for the unorganized boroughs as is done in CSHB 580. Likes the addition of the word "shall" in page 4 line 5 as was recommended during RuralCap testimony.

Parr - Suggests that the assistance being given in Sec. 44.47.085 P. 3) is really for "planning" rather than for "management" programs and suggests that this be reworded.

CSHB 581
Bob Lohr - Sees the effective dates as the key in this bill and states that the lag time between creation of the unorganized boroughs and the use of these new boundary lines by the state is too long. Also suggests that the exemption language be tightened in Sec. 44.17.130 (1) and (2)(A). Concerned that in (1) that the whole Dept. of Admin. might be exempted or that certain important programs might be exempted. Lohr sees (A) as overly broad with the current wording. Resource information will be main conern after local governments are formed. Lohr expressed concern re how agencies might combine "one or more home rule boroughs, general law boroughs, unified municipalities, and unorganized boroughs" (p. 2 lines 27-29)
p. 2 line 3 Lohr suggests that it be stated that this exemption not be renewable.
p. 2 line 5 It appears that a higher standard is implied with the use of "substantially" re increased workload and a similar higher standard should be applied to "additional expense" and "decreased efficiency".

COMMITTEE ACTION:

TAPE # _____ SIDE _____ Footage _____

HB 580

Palmer McCarter, Director Division of Local Assistance
DC&RA
p. 3 Line 4 Questions inclusion of nonprofit in this section and suggests that it should be "corporation" while the idea of "nonprofit" should be included in (c) of this section. Asks whether DC&RA would be able to contract with a consultant with the given language? The language of A should be consistent with C. A consultant shouldn't be able to initiate a study.

Parr - Questions if ISIGR would be able to do a study under the existing wording and states that it should not preclude a group such as that which has substantial expertise.

McCarter - Suggests that corporation of whatever type should be able to do study. Should go back to the notion of nonprofit corp. as being among those who can request.

Parr - The people or C&RA should be the only ones who can request the study.

Branson - suggests that this section be reorganized o put (c) first and (a) in place of (c).

Parr - There is a need to address just the constitutional standards for borough incorporation as few REAAs would meet these standards.

Jeff Smight- Maneluk, Planning Director
Concurs with Parr that what is being addressed is a "planning" strategy. Local control should be of prime importance and it would be a mistake to allow a private consultant to request that a study be done.
Smith discussed some of the history of the NANA regional strategies and the current state of the effort.

HB 581
Jay Moor DPDP
Logical sequence of bill is good. Section 1 Requires that basic program data and information conform to specific boundaries. Feels that certain happenings in state government will be complimentary to proposdal in CSHB581:
1. automation of state budget
2. State library mandate for the data access center
3. ALARS system of Natural Resources
4. Management by objective approach

Parr - Will all of these systems be compatible?

Moor - Change wording on p. 1 line 21 to read:
(1) Information which may be required by the Office of the Governor for purposes of modeling the geographic distribution of the state's population, economic activities and public services."

Parr - Suggests that the intent in Section 1 (p. 1 lines 12-18) is not clearly stated and should instead be rewritten to be similar to statement on p. 2 lines 19-26.

Question is raised as to when the effective date of the ~~exeption~~ exemption will be? Will it be from the effective date of this section?

Parr - Suggests eliminating everything on p. 3 line 14 after the word "public".

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

TO: Jack Chenoweth
FROM: Rep. Parker/Senator Sturgulewski
DATE: 2/14/80
RE: Committee Substitutes for HB 580 (SB 348) and HB 582 (SB 349)

HB 580 (SB 348) Establishing Unorganized Boroughs

P. 1 Rewrite the Purpose section of the bill as follows:

PURPOSE:

The legislature recognizes that a more systematic approach to the future of the unorganized borough is necessary. In order to accomodate future changes when desired by local residents, the state has an obligation to provide a framework within which structured change may occur. To this end, this Act provides for a common set of boundaries in the unorganized borough which divide the state's unorganized borough into unorganized boroughs. This division will facilitate planning and programming by regional management studies and by coordinating data collection and state delivery of services. Additionally, the Act allows for direct incorporation of a home rule borough by the residents of an unorganized borough thereby broadening the regional government options available.

INTENT:

In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to regions within unincorporated areas be made only within the appropriate boundaries for unorganized boroughs established under AS 29.03.011 - 29.03.021, added by section 3 of this Act.

p.3 Exemptions and Modifications

In every instance in the bill, reference will be to the legislature rather than to the Legislative Council.

The section on exemptions and modifications will be rewritten to direct that the Governor review requests from state agencies for exemptions to AS 44.17.110. The legislature would then be empowered to override such exemptions and modifications.

Additional wording will be added to the bill specifying that the Commissioner of Education and the Director of the Division of Policy Development and Planning would also report on their ability to conform the boundaries of the REAAs and Coastal Resource Service Areas to those of the unorganized boroughs.

p. 4 Lines 17-18 Committee Substitue would provide that the voters will elect a charter commission of not more than 15 members with the method of election determined in the petition and reviewed.

p. 5 The section will be amended toprovide that if the proposed charter is rejected, the charter commission shall prepare, adopt, and submit a proposed charter to the voters at a general or special election held within one year of the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved. This procedure would follow that currently used in unification procedures.

DATE: 2/11/80
RE: Proposed Committee Substitute Amendments for Interim Legislative Package

HB 580 (SB 348) Establishing Unorganized Boroughs

p.1 Line 13-20 — The "Purpose" Section will be rewritten to reflect the intent of the legislation from the point of view of the people affected, rather than from a state service delivery perspective, i.e., these unorganized boroughs provide the framework within which maximum local participation and responsibility can occur and will be used for planning and programming purposes (regional strategy studies, coordination of services, coordiatnion of services, data collection, and achieving equity in allocation of state resources.

The Committee Substitute would also make note in the "Purpose" of the provisions of Chapter 19 of HB 580 (SB 348) which allow for direct incorporation of a home rule borough and of the additional flexibility this option provides for residents of unorganized boroughs.

p.2 Line 10 — Additional wording will be added to the bill dealing with the alteration of Regional Educational Attendance Area (REAA) and Coastal Resource Service Area boundaries to bring them into compliance with the unorganized borough boundaries established by HB 580 (SB 348).

p.3 Line 7 — This section will be rewritten to direct that the Governor would review requests from state agencies for exemptions to AS 44.17.110 (use of unorganized boroughs boundaries for data collection, program planning and coordinating, etc.) Further referral on the state agency use of different boundaries would

be to the Legislative Council.

p. 4 Lines 17-18 — Committee Substitute would provide that the voters will elect a "geographically representative" charter commission. The number of members on the commission would not be specified. This change would also be reflected on p. 4 line 27.

p. 5 Line 17-18 — This section will be amended to provide that if the proposed charter is rejected, the charter commission shall prepare, adopt, and submit a proposed charter to the voters at a general or special election held within one year of the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved. This procedure would follow that currently used in unification procedures.

HB 582 (SB 349) Establishing a program of planning assistance for unorganized boroughs

p. 1 — The Committee Substitute would add wording addressing who may request that a management program be developed for an unorganized borough and would include (1) a municipality or group of municipalities (2) a nonprofit corporation or non profit corporations organized under the laws of the state (3) and by petition by 15% of the voters living within the unorganized borough.

p. 1 Line 16 — Number (2) would be amended to read: "a nonprofit corporation or nonprofit corporations organized under the laws of the state.

p. 2 — A Committee Substitute would require that a contract entered into under AS44.47.085 (f) shall (rather than "may" line 26) include the four enumerated points listed on p. 2 lines 28-29, p. 3 lines 1-6. Additionally, the contract would have to specify the process to be used for regional public participation and representation in the development of the study.

p. 2 Line 15 — Add that the report would also generally address the interrelationships of:
(a) the school board for the regional educational attendance area;
(b)the coastal resource service area board, if one has been established under AS 46.40,100-46.40.160;
(c) any other regional entity responsible for services; and
(d) the governments of cities located within that unorganized borough

HB 583 (SB 351) State aid to local governments

The Committee Substitute would provide that a municipality qualifying for revenue sharing would receive a minimum payment of $25,00 plus an area cost of living differential for each fiscal year.

HB 585 (SB 353) Incorporation of second class boroughs as home rule boroughs

This bill would be amended to allow that a first class municipality or second class borough might adopt a home rule charter after petiton by 15% of the voters who voted in the last regular election of the municipality.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M January 18, 1980

SUBJECT: Alteration of Work Orders Nos. 7656 and 7657 relating to unorganized boroughs.

TO: Representative Bill Parker

FROM: John B. Chenoweth
Legislative Counsel

In response to Margo Waring's memo --

Item 1:

Work Order No. 7657: Page 1, following line 20: Insert *Sec. 2 to read:

> *Sec. 2. INTENT. In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to regions within unincorporated areas be made only within the appropriate boundaries for unorganized boroughs established under AS 29.03.011 - 29.03.021, added by section 3 of this Act.

Item 4 is covered by AS 29.03.021.

Item 6: The previous language, precluding subdivision of areas within REAA's into smaller unorganized boroughs, read:

> "Sec. . COMBINING OF SERVICE AREAS TO ESTABLISH UNORGANIZED BOROUGHS. The commissioner may, after public hearings in the areas affected, constitute the geographic area within two or more regional educational attendance areas as a single unorganized borough. . . ."

The provision was modified to the language you have in the bill (Work Order No. 7657) in response to Marge's December 8th memo and verbal clarification of some of the points in that memo.

* * *

Item 5:

Work Order No. 7656: Page 2, following line 14, insert new paragraph "(2)" to read:

(2) require that if the report does not favor incorporation of a borough, the report include an analysis and recommendations concerning a representative advisory body for the unorganized borough and an analysis and recommendations defining the relationship between that body and

(A) the school board for the regional educational attendance area;

(B) the coastal resource service area board, if one has been established under AS 46.40.110 - 46.-40.160;

(C) any other regional entity responsible for services; and

(D) the governments of cities located within that unorganized borough.

* * *

Item 2 of Margo's memo is, I think, answered by the suggested language prepared in response to item 5 in that these regional strategy contracts may not run longer than 3 - 4 years.

Item 3 in that memo was not to be acted on.

Bob Lohr, RuralCap

Effective dates are seen as the key in the CS. Concerned about lag between formation and time state agencies begin to use consistent boundaries. Exemption language tightened. Concerned that there is an encouragement of the status quo if there is any delay. Asks if the Dept. of Administration is exempt? P. 3 line 29 is overly braod in terminology. Resource information will be a main conern after local governments are formed.

*p. 2 line 3 Don't allow for renewal of exemption. p. 2 line 5 A higher standard is indicated by "significant".

Palmer McCarter, Dept. C&RA

Discusses particular points of HB580.related to who may contract to do planning studies.

Jeff Smith, Planning Director, Haneluk

Address HB580.

Jay Moor, DPDP

Likes the logical sequence of CSHB581. Section 1 requires assessment on the basis of local government units. (1) automation of state budget (2) state library is mandated to have data access center.(3) ALARS (4) Mangaement by objective --all of these four efforts would be compatible with CSHB581.
Suggests omiting DPDP reference on pl. 1 line 22 as reference isn't in statutes. Strike "demographic" information used for modeling, etc.

Question related to exemption for 1 yr. from passage till 1982. It the 1 years from the effective date of this particular section? p. 2 line 2,3 p. 3 line 14 Strike everything after "public".

CSHB 581

"AN ACT RELATING TO THE RESPONSIBILITIES OF EXECUTIVE DEPARTMENTS OF STATE GOVERNMENT FOR CERTAIN STATE PROGRAMS"

This bill addresses certain responsibilities of executive departments important to the implementation of CSHB 580. State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted. Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

Alaska's Constitution establishes the policy of maximum self government for the people. This policy has been implemented through creation of boroughs and cities in urban areas and in some rural communities. However, the vast bulk of Alaska lacks any basis for self-government, and the people do not even have the means for planning and participating in the affairs of their own region. It is this problem that provided the principal focus for the interim work of the Senate and House Community and Regional Affairs Joint Local Government Study of 1979.

Legislative proposals of the Joint Committee were derived from (1) a series of studies and analyses sponsored by the Committee, (2) a two-day symposium designed to define issues and problems and suggest policies and directions, and (3) a series of public hearings held throughout rural parts of the state.

The Joint Committee found wide consensus in favor of a maximum measure of self-determination and self-rule, and establishment of regional units throughout the state to provide a basis for planning and program coordination. At the same time, the people do not want to rush into formal governmental organization; nor do they want it mandated.

Accordingly, the Joint Committee has developed an evolutionary approach that will provide people in rural areas with the means for self-government without forcing anything upon them prematurely. Choices and initiatives are left with each region.

HB 580 and HB 581 are two of the bills developed by the Joint Committee.

CSHB 580

"AN ACT RELATING TO UNORGANIZED BOROUGHS, ESTABLISHING UNORGANIZED BOROUGHS, ESTABLISHING A PROGRAM OF PLANNING ASSISTANCE FOR UNORGANIZED BOROUGHS, PERMITTING ADOPTION OF HOME RULE CHARTERS BY UNORGANIZED BOROUGHS, AND DIRECTING SUBMISSION OF RECOMMENDATIONS CONCERNING ADJUSTMENT OF THE BOUNDARIES OF SERVICE AREAS OF THE UNORGANIZED BOROUGH"

BOUNDARIES

The bill divides the unorganized borough into "unorganized boroughs" using the boundaries of the Regional Educational Attendance Areas (REAAs). Public hearings are held, upon request, in each REAA by the Commissioner of Community and Regional Affairs and provision is made for adjustment of the boundary lines.

REGIONAL PLANNING

Each unorganized borough is eligible for regional planning program funds to study the economic, social, and environmental conditions of the area and the interrelationships between governmental units along with an examination of the feasibility of borough organization. No one is required to either undertake a study or form a borough. $25,000 plus $25 per capita is available to each unorganized borough for each of three years for regional planning programs.

HOME RULE

Title 29 is amended allowing for the incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule municipalities and the adoption by vote of the people of a home rule charter. Nothing in the bill requires the incorporation of a home rule borough or borough of any class. Rather, this section broadens the options currently available to residents in the unorganized borough.

Voluntary process contained in HB 580 should be emphasized repeatedly. Not intent to promote mandatory boroughs and this should be continuously emphasized. Insert wherever reasonable (p. 1 line 19)
Overkill the voluntary aspects of the bill.
Does boundary drawing encourage borough formation? This is a question which will be raised.
p. 2 line 8 120 days not long enough
The boundaries which are developed should be provisional for the duration of the plnaning process.
p. 4 Add to planning process

Expressed concern tht REAA boundaries might not meet borough boundary standards.
p. 3 line 29 Add that the commissioner would "seek public partici pation in the evaluation process.

Suggests that wording used in the development of coastal resource service districts could be used, i.e., by resolution by a majority of villages or petition of 15%--to ask for funds for study. Whatever entity receives the money should be representative of the community. People are deciding what should take place. People want to evaluate.

Questioned if enough money was being appropriated in HB 886? Palmer McCarter explained that the estimate was that 3-4 regions might request funding during a given year.

Spud Williams - Citizens' Participation Conference re HB 580
No phase between organized and unorganized status of regions.
Will be spending alot of money to develop plans and a "planning commission" of sorts will have been establish[illegible]d yet then there will be no mechanism for local follow[illegible].
What will be done with the plans? p. 5 line [illegible]4

(see p. 2)

COMMITTEE ACTION: No action. Scheduled for hearing 3/21/80

TAPE # SIDE _____ Footage _____ Cassette Tape #

There will be no way to implement the recommendations of the study. There should be a phasing process allowing for planning and zoing powers. There is a need to implement what we are planning for. Allow enough time to see what works in eahc area. Check for legitimacy of planning instrument.

There should be a provision for review of the exemption provision in HB 851 every 3 years or after provisional boundaries have been made final.

State should recognized IRA Councils as a new class of city.

Revenue sharing for IRAs and recognition of IRAs for revenue sharing purposes has been raised by Saxman. Legal reserarch is being done in conjuntion with the Tanana Chiefs which addresses this question, according to Palmer McCarter.

Lohr pointed out that there are a number of native villages which prehaps need modification from the requirement that Native Reigonal Corporation Boundary lines be respected: Mentasa, Cantwell, Lime Village. Suggests that perhaps there should be listed in the bill.

			Ray Metcalfe

CSHB 580
Bob Lohr, Ruralcap

Substantial improvement over original bills. Requests that action be deferred until Thursday when RuralCap Citizens' Participation Conference will have final position paper developed. RuralCap believes it is desirable to combine the drawing of the boundary lines with the planning fund for the unorganized boroughs as is done in CSHB 580. Likes the addition of the word "shall" in page 4 line 5 as was recommended during RuralCap testimony.

Parr - Suggests that the assistance being given in Sec. 44.47.085 P. 3) is really for "planning" rather than for "management" programs and suggests that this be reworded

CSHB 581
Bob Lohr - Sees the effective dates as the key in this bill and states that the lag time between creation of the unorganized boroughs and the use of these new boundary lines by the state is too long. Also suggests that the exemption language be tightened in Sec. 44.47.130 (1) and (2)(A). Concerned that in (1) that the whole Dept. of Admin. might be exempted or that certain important programs might be exempted. Lohr sees (A) as overly broad with the current wording. Resource information will be main conern after local governments are formed. Lohr expressed concern re how agencies might combine "one or more home rule boroughs, general law boroughs, unified municipalities, and unorganized boroughs" (p. 2 lines 27-29)
p. 2 line 3 Lohr suggests that it be stated that this exemption not be renewable.
p. 2 line 5 It appears that a higher standard is implied with the use of "substantially" re increased workload and a similar higher standard should be applied to "additional expense" and "decreased efficiency".

COMMITTEE ACTION:

TAPE # _____ SIDE _____ Footage _____

HB 580

Palmer McCarter, Director Division of Local Assistance
DC&RA
p. 3 Line 4 Questions inclusion of nonprofit in this section and suggests that it should be "corporation" while the idea of "nonprofit" should be included in (c) of this section. Asks whether DC&RA would be able to contract with a consultant with the given language? The language of A should be consistent with C. A consultant shouldn't be able to initiate a study.

Parr - Questions if ISIGR would be able to do a study under the existing wording and states that it should not preclude a group such as that which has substantial expertise.

McCarter - Suggests that corporation of whatever type should be able to do study. Should go back to the notion of nonprofit corp. as being among those who can request.

Parr - The people or C&RA should be the only ones who can request the study.

Branson - suggests that this section be reorganized to put (c) first and (a) in place of (c).

Parr - There is a need to address just the constitutional standards for borough incorporation as few REAAs would meet these standards.

Jeff Smitht- Maneluk, Planning Director
Concurs with Parr that what is being addressed is a "planning" strategy. Local control should be of prime importance and it would be a mistake to allow a private consultant to request that a study be done.
Smith discussed some of the history of the NANA regional strategies and the current state of the effort.

HB 581
Jay Moor DPDP
Logical sequence of bill is good. Section 1 Requires that basic program data and information conform to specific boundaries. Feels that certain happenings in state government will be complimentary to proposdal in CSHB581:
1. automation of state budget
2. State library mandate for the data access center
3. ALARS system of Natural Resources
4. Management by objective approach

Parr - Will all of these systems be compatible?

Moor - Change wording on p. 1 line 21 to read:
(1) Information which may be required by the Office of the Governor for purposes of modeling the geographic distribution of the state's population, economic activities and public services."

Parr - Suggests that the intent in Section 1 (p. 1 lines 12-18) is not clearly stated and should instead be rewritten to be similar to statement on p. 2 lines 19-26.

Question is raised as to when the effective date of the ~~exeption~~ exemption will be? Will it be from the effective date of this section?

Parr - Suggests eliminating everything on p. 3 line 14 after the word "public".

C&RA Committe hearing HB 581 January 28, 1980

Jay Moore, planner for DPDP	Mr. Moore said the DPDP had been working on a 'management by objectives' process; that system really depends on good information coming back from client groups, which means the groups should be identical in geographic area. DPDP has been trying to define local boundaries, and trying to develop a geocoding system--- codes used by all agancies through a computerized system. The question is, what are the optimum boundaries that serve the state best, and what will provide the people with the best system of services.
Parker	Mr. Parker clarified that geocoding meant programming by computer so information can be retreived by goegraphic locale.
Parr	Mr. Parr wanted to know if DPDP would have anything to do with setting boundaries.
Moore	Mr. Moore said that they would not, however they would be able to make suggestions. They recommended that the state adhere to REAA boundaries unless an area could show why that should not be done.
Parr	Mr Parr wanted to know who would define boundaries.
Moore	Mr. Moore said the boundaries would be defined by legislation.
Parr	Mr. Parr did not think the Constitution intended education to be the prime determinant of local boundaries (REAAs).
Parker	Mr. Parker said the REAAs were the most popular boundaries at the state and local level. They seemed to be the most sensible.

Moore	Mr. Moore expressed concern that 581 was extremely ambiguous, and suggested an elaboration as to why geocoding was needed. He added that varience from REAA boundaries will probably be asked by quite a few other agencies . and interagency coordination should be stressed.
Parr	Mr. Parr thought it would be best if variences were not alloweed at all. Instead, he suggested that the matter rest with the local boundary commission.
Parker	Mr. Parker asked why the local boundary commission would be involved at all.
Parr	Mr. Parr stated that once the boundaries are established, there should be no more debate about it.
McCarter	McCarter said chat the REAAs would be used as building blocks only. He thought it was appropriate for the C&RA to establish the borough boundaries, but didn't think it was appropriate to call in the local boundary commission, as they are called in when a local area is establishing a constitution.
Parr	Mr. Parr said he wouldn't vote for a bill that called for overlapping boundaries.

TO: Senator Arliss Sturgulewski
FROM: Rep. Bill Parker
DATE: 2/4/80
RE: Joint Committee Legislative Package

The following are the substantive points raised during the informal review of the Legislative Package by the House C&RA Committee. Please note that the Committee did not review HB 582 relating to the Program of Planning Assistance as our hearing schedule did not allow enough time although we scheduled it on two successive days.

HB 580 Establishing Unorganized Boroughs

Jay Moore, DPDP testified that although there are a number of ways to establish boundaries, the mandated approach may not be inappropriate. The positive advantage is that it will happen immediately. However, there may be a problem in allowing modifications to the boundaries once they are established, as allowed for in Sec. 44. 14.120. DPDP has a concern that the provisions of this section might not necessarily put the agency needs secondary to the needs of the people being served and it is the Division's concern that this is what should be done.

John Post, Chief Research & Analysis, Dept. of Labor
The importance of the census boundaries adopted by the Federal Government for 1980 should not be understated. Post expressed concern that if Labor had to meet the new unorganized borough boundaries it would be very difficult and very costly to come up with the employment, unemployment and population figures for the unorganized borough areas where they did not follow the area and subarea boundaries of the census boundaries. The Native Regional Corporation boundaries are the outer limits of the census boundaries.

Palmer McCarter, Director Div.Local Government Assistance,
Dept. C&RA
McCarter questions whether appeals on boundary adjustments should go to the Legislative Council and suggests that instead the appeal be to the Governor. Perhaps the legislature could have the final appeal if the Governor isn't acting responsibly.

McCarter also questions how an REAA could be altered if necessary (there is an existing REAA which overlaps two Regional Corporation boundaries and this is not allowed in HB580). Perhaps a process for changing the REAA boundaries where necessary should be included in the bill.

After the hearing, Ginny Chitwood of the Alaska Municipal League pointed out that HB 580 limits the charter writing period to 1 year and questioned if that was enough time. Also, she was concerned that unlike the provisions for unifying a municipality, there was no provision for drafting a second charter if the first one failed.

HB 581 Establishing the Responsibilities of the Division of Policy Development and Planning

Jay Moore, DPDP
Expressed concern that HB 581 was ambiguous and suggested an elaboration as to why geocoding was needed.
He also felt that variance from REAA boundaries would probably be requested by a large number of agencies and that interagency coordination should be stressed.

HB 584 Eliminating the THird Class Borough

Rep. Charlie Parr expressed reservations about the bill saying that the C&PA department talks about giving local government flexibility and yet if the third class borough is eliminated, and the people don't want to form a second class borough, there is no alternative for them. Parr said that in his district it was planning and zoning powers that people were afraid of. Third class boroughs were restricted to service areas in this regard. Also, Parr felt that in unorganized boroughs the Div. of Lands would have zoning powers and the divisions's "shoddy track record" made it a poor option. "My bias is that we ought to have a mandatory borough act, but I think we should have a third class borough option." Parr felt the step from unorganized to second calss was too large a jump. He feels there should be a proven overriding and compelling state argument against allowing the third class borough to exist if it is going to be eliminated.

HB 585 Incorporation of Second Class Boroughs

Rep. Charlie Parr questions Line 20 of the bill and the requirement that it would take only 10 percent of the voters to petition for reclassification. Wonders if the expense of an election is justified for such a small percentage of the voters. Parr also questions Line 14 which would allow for the election to be either "special" or "regular". He is not sure it would be advisable to have a special election because of the expense and because there would not apepar to be any urgency in such a reclassification. (After clarification by Ginny Chitwood, Parr drops concerns related to the timing of the election feeling perhaps it should be left up to the municipality).

Palmer McCarter, Dept. of C&RA pointed out that initiative and referendum require 25% of the voters when the city or borough has fewer than 7,500 persons or 15% when a city or borough has 7,500 persons or more. Unification requires 25% of the voters inside and outside of the city.

Rep. Charlie Parr suggests amending the percent of petitioners (line 20) to 15%. Committee concurs.

HB 586 Requiring Fiscal Notes for Bills Affecting a Municipality

Rep. Parr raises question of whether this bill is intended to deal with just "significant" impacts. Palmer McCarter, Dept. of C&RA, responded that this would be his interpretation. Perhaps the word "major" expenditure could be added on line 15. McCarter stressed that the fiscal impact figure would be an estimate.

HB 583 State Aid to Local Governments

Palmer McCarter, Dept. C&RA, testified that the Dept. opposes the bill as presently written. Although they support the $25,000 as a base figure in revenue sharing, they believe it is too costly for the state to provide that amount in addition to the entitlements.

CSSB 348

This bill provides for sub-state regional units, called "unorganized boroughs," to be established in the unorganized borough. The Commissioner of Community and Regional Affairs is directed, after public hearings, to determine appropriate boundaries, initially based on REAA boundary lines. Provisions are made for the adjustment of boundary lines.

Each "unor-anized borough" will be eligible for regional planning program funds to assist in determinations of the economic, social, and environmental conditions of the area and the interrelationships between governmental levels, with an examination of the potential and need for borough organization. No one is required to either undertake the study or to form a borough. The planning program and future organization, if any, is up to the local area. Each year, for 3 years, $25,000 plus $25 per capita is available to each unorganized borough for regional planning.

A new chapter is added to AS 29 which allows for incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule boroughs and the adoption by election of a home rule charter. Dual majority votes are required for passage of the home rule charter.

CSSB 349

This bill addresses certain responsibilities of executive departments important to the implementation of CSSB 348.

State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted.

Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery

PROPOSED
ADMINISTRATIVE ORDER NO. _____

The proliferation of district boundaries used by governmental agencies in Alaska is confusing, prohibits efficient delivery of services to citizens and, therefore, prevents the federal, state and local governments from fulfilling their responsibilities to Alaskans.

The Division of Policy Development and Planning in my office has conducted a study of region and district usage in the state and has recommended two sets of state subdivisions for various governmental purposes. These districts do not meet every specific need but represent a compromise between the many boundaries heretofore established.

It is my intention to have state government comply to the highest degree possible with these regions and districts and to urge federal and local governments to also conform to these boundaries. Through this cooperative effort we should be able to assure Alaskans of maximum value from their public programs.

Therefore, under authority of article III, section 1, Alaska Constitution, it is ordered that all agencies in the executive branch of the state government, conducting business at the local level through districts or regions, and planning future programs requiring a regional approach, use the regions and districts designated by this order, or use the census divisions and REAA's.

The following constitute State Planning Regions:

REGION I	Census Division 040, Barrow
REGION II	Census Division 140, Kobuk; and 130, Nome
REGION III	Census Divisions 090, Fairbanks; 240 Southeast Fairbanks; 250, Upper Yukon; and 290, Yukon-Koyukuk
REGION IV	Census Divisions 010, Aleutian Islands; 050, Bethel; 060, Bristol Bay Borough; 070, Bristol Bay; 160, Kuskokwim; and 270, Wade Hampton
REGION V	Census Divisions 020, Anchorage; 080, Cordova-McCarthy; 120, Kenai-Cook Inlet; 150, Kodiak; 170, Matanuska-Susitna; 210, Seward; and 260, Valdez-Chitina-Whittier

REGION VI — Census Divisions 030, Angoon; 100, Haines; 110, Juneau; 130, Ketchikan; 190, Outer Ketchikan; 200, Prince of Wales; 220, Sitka; 230, Skagway- Yakutat; and 280, Wrangell-Petersburg

The following constitute Substate Districts:

All Unified Home Rule Municipalities:

City and Borough of Juneau
City and Borough of Sitka
Municipality of Anchorage

All Organized Boroughs:

Bristol Bay Borough
Fairbanks North Star Borough
Haines Borough
Kenai Peninsula Borough
Ketchikan Gateway Borough
Kodiak Island Borough
Matanuska-Susitna Borough
North Slope Borough

The following districts of the Unorganized Borough:

District A	REAA #1
District B	REAA's #11, 12, 13 & 14
District C	REAA #2
District D	REAA's #15 & 16
District E	REAA #3
District F	REAA's #4 & 5
District G	REAA #17
District H	REAA's #8, 9 & 10
District J	REAA's #6 & 7
District K	REAA's #21 & #18 west of Dry Bay
District L	REAA #18 east of Dry Bay
District M	REAA's #19 & 20

Special exemptions may be granted to those agencies whose use of specific region or district boundaries would bring undue expense, hardship, or decreased efficiency to the operation of that agency. Exemptions will be granted by my office on a region-by-region or district-by-district basis. Agencies seeking exemption because of special circumstances shall submit to my office:

1. A map depicting those regions or districts which can be used and those where a modification from State Planning Regions or Substate Districts is essential;

2. An identification of statutes, federal regulations or guidelines, personnel difficulties, workload difficulties, or existing investments in field facilities which justify delay in adoption of the state regions and districts specified in this order; and

3. A timetable for eventual agency conformance with this order.

Each agency shall furnish my Office of Budget and Management with region or district map for each program submitted for funding which is administered on a regional or district basis.

Within one year from the date of this order, my Division of Policy Development and Planning shall review conformance to this order by state agencies and any exceptions which may have been granted and recommend the regions and districts for permanent status or recommend any changes that may be desirable.

REPORT NO. 2

IN THE SENATE: Honorable Clem V. Tillion, President

Senator Colletta, Majority Leader
Senator Bradley, Majority Caucus Chairman
Senator Kerttula, Minority Leader
Senator Ferguson, Minority Whip
Senator Rodey, Minority Caucus Chairman

INTRODUCTION OF BILLS (Senate)

Unorganized Boroughs (establishment)

SENATE BILL NO. 348, by the Rules Committee by request of the Legislative Council (for the C&RA Interim Joint Local Government Study). Purpose "is to provide for the division of the state's single unorganized borough into unorganized boroughs to accomodate the delivery of services and programs by state agencies within common boundaries and to require the collection of data and information about state programs with reference to a set of boundaries adopted for use by all state agencies for the purpose of improving the delivery of state services and encouraging the development of regional responsibilities for the planning and implementation of these services."

Repeals statutes relating to unorganized boroughs (AS 29.03) and adds sections which establish, within 120 days of effective date of act, unorganized boroughs within boundaries of each Regional Education Attendance Area established under AS 14.08.031. Provides boundaries may be adjusted by Commissioner of Community & Regional Affairs.

Adds new sections to AS 44.17 (Admin. of Departments) which relate to collection of data and information about state services in districts. Districts are boroughs or unified municipalities and unorganized boroughs.

Adds new Ch. to AS 29 which allows for incorporation, by petition to Local Boundary Commission, of unorganized boroughs as home rule boroughs. Provides for charter elections of petition accepted. Provides Act effective immediately. Identical to HB 580, this report.

Introduced January 21 and referred to Community & Regional Affairs and Finance.

Unorganized Boroughs (planning assistance)

SENATE BILL NO. 349, by the Rules Committee by request of the Legislative Council (for the C&RA Committee Interim Joint Local Government Study). Adds new section to AS 44.47 which allows the Commissioner of Dept. of Community & Regional Affairs to contract with a municipality or group of municipalities or with a non-profit corporation for purpose of preparing a management program for an unorganized borough (only one contract for each unorg. borough). Outlines contract requirements and establishes the Unorganized Borough Planning Account in Dept. of C&RA. Limits contract awards to maximum of $25,000 plus $25 per capita. Effective on effective date of a version of SB 348. Identical to HB 582.

Introduced January 21 and referred to Community & Regional Affairs and Finance.

D.P.D.P. (responsibilities)

SENATE BILL NO. 350, by the Rules Committee by request of the Legislative Council (for the C&RA Committee Interim Joint Local Government Study). Directs the Division of Policy Development and Planning to "study and report to the legislature, not later than January 31, 1981, as to the conformity by state agencies, boards and commissions with the program requirements under AS 44.17.100 - 44.17.120, [enacted by SB 348] including but not limited to recommendations which require legislation and for the development and implementation of a master geographical coding system to report on the coordination of delivery of state services by districts." AS 44.17.100-120 relate to collection by state agencies of information about state services in districts.

Effective on effective date of a version of SB 348. Identical to HB 581.

Introduced January 21 and referred to Community & Regional Affairs and Finance.

State Aid to Local Governments

SENATE BILL NO. 351, by the Rules Committee by request of the Legislative Council (for the C&RA Committee Interim Joint Local Government Study). Provides for an additional State Aid to Local Government entitlement (AS 43.18) of $25,000 for each fiscal year for cities or organized boroughs of any class that qualify under provisions of chapter. Entitlement shall be adjusted to include area cost-of-living differential. Provides Act effective July 1, 1980. Identical to HB 583.

Introduced January 21 and referred to Community & Regional Affairs and Finance.

Fiscal Notes (for bills affecting municipalities)

SENATE BILL NO. 352, by the Rules Committee by request of the Legislative Council (for the C&RA Committee Interim Joint Local Government Study). Adds to AS 24.30.035 (Fiscal Notes on Bills): "If enactment of the bill would require an expenditure or appropriation by any municipality, a fiscal note shall be attached to the bill containing an estimate of the amount of the total expenditure or appropriation which would be required during each of the first three fiscal years by all affected municipalities." Also adds: "The fiscal note or statement...shall be prepared by the Department of Community and Regional Affairs, but that department may

MEMORANDUM State of Alaska

Department of Transportation
& Public Facilities

SUBJECT: HB 580 - State Program Line to Follow Standardized Boundaries

The impact of HB 580 upon Department of Transportation & Public Facilities (DOT/PF) for planning and management cannot be adequately assessed without a clearer idea of what is envisioned by the bill. However, a simplified reading of AS 44.17.110 would indicate that all statistics, planning, and information (including financial) would need to be on the basis of districts designated by AS 44.17.100. This would be a considerable shift from the alignments now used. While not impossible, it would be very time consuming and, in my view, counter productive until a clear picture of the benefits expected are outlined.

I would suggest that instead of passage of this bill, which mandates all information along these predetermined lines, funding be made available to one central group to identify the results desired, their benefits, and the costs associated with providing the information. If the bill were passed as it now stands, it would have a financial impact on DOT/PF because it would be necessary for us to revise our financial reporting and planning data processing systems to track the information by the new districts. We would also need to prepare our transportation plans in much finer detail, which would increase their cost.

In summary, I believe that there would be merit in a system which allowed extraction of statistical and program information in a manner which would make it compatable. I am not sure this bill has the best approach. If a central geographic coding were agreed to and sufficient data processing support provided, agencies could supply raw data by location, which is more specific than by district. Then when it would be beneficial to do planning on a district basis, it could be done, or if it were more reasonable to do the planning on a larger basis without reference to district, that could also be done.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

* DPDP has requested in its FY 81 budget, two positions which would have, as a part of their responsibilities, the development of a common geo-coding system for state agencies and the development and implementation of a process for reviewing state service delivery locations. Evaluation of agency service delivery conformity with district boundaties and evaluation of boundary variance requests (a change in wording of the bill is suggested) would fall within the purview of the latter responsibility. These were tasks independently identified during the formulation if DPDP budget and the increases have been shown only once, in the Division budget.

MEMORANDUM

TO: John Halterman, Acting Director
Division of Policy Development
and Planning

DATE: January 25, 1980

FILE NO:

TELEPHONE NO:

FROM: Jay Mopr

SUBJECT: SB 350/HB 581 "...relating to the responsibilities of the Division of Policy Development and Planning

This requires DPDP to produce a report on the subject of agencies' conformity with program requirements of another bill. That bill (I don't have the number) establishes districts throughout Alaska and requires agencies to collect data, develop program planning, coordinate planning and agency activities with other agencies, and provide information on the basis of the districts. The districts are to coincide with the REAA boundaries except where individual commissioners have determined that other boundaries would be more applicable to program requirements and have requested a variance from the Legislative Council.

In reporting on conformity with these provisions, DPDP is to make recommendations which require legislation and, apparently, which relate to the development and implementation of a master geographical coding system. It is not clear from the grammar of these bills that the coding system is to be anything more than a way to report on the coordination of delivery of state services by districts.

The bill should be written to separate the coding system from the conformity issue, since basic coordination among agencies by district will come largely from adherence to a commonly adopted coding system. That system, by itself will help to insure conformity and may necessarily precede conformity.

Although DPDP may undertake evaluations of programs involving more than one agency (AS 44.19), we would not be able to do the conformance evaluation without addition of one full-time position requested in our budget as a Range 18A. The person filling that position should be prepared to do continuing analysis of program district boundaries and service delivery patterns. The bill referred to in SB 350 allows agencies to determine unilaterally the need for boundary variances, submitting requests for variance to the Legislative Council. Such variances are clearly of interagency importance; especially so since the Governor's policy to develop efficient and effective service delivery suggests that space sharing and co-delivery of services may be, overall, more effective than when each agency attempts to minimize its own costs without regard for other agencies. DPDP should commence the design and implementation of a master geocoding system--not just the evaluation of how to do it.

The only other reservation I have about the bill is that it refers to a set of pre-determined service delivery boundaries, deviation from which must be justified. This may be a good strategy where programs stand by themselves, but as mentioned above where some programs gain in effectiveness by association with others, there is no guarantee that the synergies of program delivery will be looked at. We had originally proposed that those synergies by investigated and district boundaries be determined on the basis of program clientele needs and other commonalities among programs.

I would add to the current version only the safeguard that someone be assigned the authority for insuring participation and coordination among agencies in evaluating any one agency's request for variance. To do this, someone must develop a comprehensive inventory of service delivery needs and a location model that will compute the economic and social tradeoffs of any agency's proposal for variance from established service delivery boundaries. The position we have requested would do this.

I recommend the language and grammar of the bill be edited to include the points noted above: a) DPDP will report on agencies' conformity in delivering services by district and in collecting data by district; b) DPDP will develop and implement a master geographical coding system for data collection and service delivery, and c) DPDP will have the authority to coordinate among agencies in determining the impacts of boundary variance requests.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

an Act entitled: "An Act amending the responsibilities of executive departments of the state government for certain state programs; and providing for an effective date."

T ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.17 is amended by adding new sections to read:

ARTICLE 2. PLANNING AND MANAGEMENT OF STATE SERVICES.

Sec. 44.17.100. PROGRAM DATA AND INFORMATION. (a) A principal department of the executive branch of the government, including a board or commission assigned to a department for administrative purposes, shall collect and make available for display data and information and process and analyze statistics about its programs on the basis of home rule and general law boroughs, unified municipalities, and unorganized boroughs.

(b) The information, data and statistics required to be collected by this section include but are not limited to,

Use Margo's "data" definition plus "demographics info"

Add DRDP (b) 1, 2
(c) 1, 2
(d) Temporary exemption up to 1 yr.
(AK) 1, 2, 3

(c) In carrying out the provisions of (b) of this section, the Division of Policy Development and Planning shall consider, among other things,

(1) applicable new technologies for data and information referencing;

(2) existing and developing state, local, and federal management and program information systems; and

(3) the need for continued use by agencies of existing program and administrative boundaries.

omit

(d) A temporary exemption from (a) of this section may be granted for up to three years by the governor to an agency if the expense, hardship, or decreased efficiency in the development and operation of an agency program outweighs the public benefit derived from adherence to its provisions. The agency requesting the exemption shall submit to the governor

(1) a written statement naming the program for which the exemption is sought and explaining the reasons for seeking the exemption;

(2) an evaluation of the practicality of conforming to the approved data and information referencing system within a three year period; and

(3) an evaluation of impacts of the proposed exemption on the data and information collection activities of other agencies.

(e) The governor shall report to the legislature each temporary program exemption approved by him under (d) of this section.

Education

Sec. 44.17.100. DATA AND INFORMATION

(a) Effective June 30, 1981, all principal departments of the executive branch of the government, including boards and commissions assigned to departments for administrative purposes, shall, in planning, developing, implementing, and reporting program activities, provide data and information, classified by home rule and general law boroughs, unified municipalities, and unorganized boroughs. these data + info will be data base used as basis for agency prog. planning & budgeting

(b) To provide for coordination and exchange of data and information among all agencies of government, the Division of Policy Development and Planning shall, by December 31, 1980,

(1) evaluate the structural suitability, capability, and cost of alternative data and information referencing systems; and

(2) recommend to the governor for approval a system for data and information referencing to be adopted within 180 days of the governor's approval by each of the principal departments of the executive branch of government, including boards and commissions assigned to departments for administrative purposes. The recommended system shall be capable of classifying data and information by home rule and general law boroughs, by unified municipalities, and by unorganized boroughs. The recommended system shall allow for cross-referencing of data and information among the principal departments of the executive branch of government.

including a geo-coding system

Budgetary info

* Sec. 2. AS 44.17 is amended by adding new sections to read:

Sec. 44.17.110. PROGRAM MANAGEMENT. (a) A principal department of the executive branch of the government, including a board or commission assigned to a department for administrative purposes, shall provide for the management and administration of its program activities, by adjusting the ~~boundaries~~ geographical lines within which those programs are ~~conducted~~ provided to correspond to one or more home rule and general law boroughs, unified municipalities, and unorganized boroughs.

(b) For purposes of this section, management and administration of program activities of a department, board or commission includes

(1) the development of program plans;

(2) the initiation or completion of activities consistent with those program plans; and

(3) coordination of program planning with the plans and activities of other agencies, municipalities and the federal government.

Sec. 44.17.120. REPORTING OF SERVICE COSTS. (a) A principal department of the executive branch of the government, including a board or commission assigned to a department for administrative purposes, shall provide information indicating the [redacted] costs of providing for the delivery of services for each municipality and unorganized borough adopted by the department under AS 44.17.110(a) for the management and administration of its program. The information shall be provided to

(1) the division of budget and management in the Office of the Governor, for its use in making recommendations for the program budget of a department, board or commission;

(2) the legislature, for its use in consideration of the state budget and other legislation which extends stat services; and

(3) the public, upon request to the department, board or commission.

(b) In this section, "~~[illegible]~~ costs" means: Those costs directly ~~[illegible]~~ related to providing a service, i.e. program expenses not including general administrative & support costs.

Sec. 44.17.130. EXEMPTION. The provisions of AS 44.17.110 - 44.17.120 do not apply to

(1) a program of an executive department, board or commission which provides professional or technical support services for another state department, board or commission, as determined by the governor; and

(2) a program for which exemption is specifically requested by the department, board or commission, and granted by the governor, ~~because~~ if the program concerns the conservation or development of a natural resource. and if non-exemption would prove to be a severe and substantiated hindrance to proper performance of the agencies' statutory responsibility.

* Sec. 3. RESPONSIBILITIES OF THE DIVISION OF POLICY DEVELOPMENT AND PLANNING. The division of policy development and planning shall study and report to the legislature, not later than July 1, 1983, as to the conformity by state agencies, boards and commissions with the program requirements under AS 44.17.100 - 44.17.120, including but not limited to,

~~(1)~~ alternatives and recommendations for improving coordination of delivery of programs which provide direct services to people, for which an exemption has not been granted under AS 44.17.130; ~~and~~

(2) recommendations which require legislation for the development and implementation of a master geographical coding system to report on the coordination of delivery of state services.

* Sec. 4. Section 1 of this Act takes effect July 1, 1981. OK?

Check to be sure that all [illegible] is [illegible]

* Sec. 5. Section 2 of this Act takes effect July 1, 1982.

* Use of bill rather than resolution p.4 (l.1-4)

IN THE HOUSE

CS FOR HOUSE BILL NO. 581

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing unorganized boroughs, amending the responsibilities of executive departments for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date."

Rewrite [illegible] suggested [illegible]

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature finds that the single unorganized borough of the state has proven unworkable in accommodating demands from its residents for change and recognizes that a more systematic approach to the planning and delivery of services for residents of this area is necessary. In providing, in this Act, for the identifying of a common set of boundaries by which to subdivide the state's single unorganized borough into multiple unorganized boroughs, it is the purpose of this legislation

(1) to facilitate planning and program development by coordinating delivery of services and the collection of data; and

(2) to extend the opportunity to residents of unorganized boroughs to assist in planning and program development by

~~(A) preparing regional management studies; and~~

(B) broadening the range of methods by which residents may incorporate a regional government.

* Sec. 2. INTENT. In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to

* Sec. 4. AS 44.17 is amended by adding new sections to read:

ARTICLE 2. COLLECTION OF DATA AND INFORMATION ABOUT STATE SERVICES.

Sec. 44.17.100. DATA AND INFORMATION. (a) A principal department of the executive branch of the government, including a board or commission assigned to a department for administrative purposes, shall provide for the administration of its program activities by

(1) collecting data, processing and analyzing statistics, and providing information about programs on the basis of home rule and general law boroughs, unified municipalities, and unorganized boroughs;

(2) developing program planning for home rule and general law boroughs, unified municipalities and unorganized boroughs;

(3) coordinating program planning for agency activities with the plans and activities of other agencies, municipalities, and federal departments and agencies; and

(b) To provide for coordination and exchange of data and information among all agencies of government, the Division of ~~Policy Development and~~ Planning shall, by December 31, 1980,

(1) evaluate the structural suitability, capability, and cost of alternative data and information referencing systems; and

(2) recommend to the governor for approval a system for data and information referencing to be adopted within 180 days of the governor's approval by each of the principal departments of the executive branch of government, including boards and commissions assigned to departments for administrative purposes. The recommended system shall be capable of classifying data and information by home rule and general law boroughs, by unified municipalities, and by unorganized boroughs. The recommended system shall allow for cross-referencing of data dnd information among the principal departments of the executive branch of government.

(c) In carrying out the provisions of (b) of this section, the Division of Policy Development and Planning shall consider, among other things,

(1) applicable new technologies for data and information referencing;

(2) existing and developing state, local, and federal management and program information systems; and

OMIT (3) the need for continued use by agencies of existing program and administrative boundaries.

(d) A temporary exemption from (a) of this section may be granted for up to three years by the governor to an agency if the expense, hardship, or decreased efficiency in the development and operation of an agency program outweighs the public benefit derived from adherence to its provisions. The agency requesting the exemption shall submit to the governor

(1) a written statement naming the program for which the exemption is sought and explaining the reasons for seeking the exemption;

(2) an evaluation of the practicality of conforming to the approved data and information referencing system within a three year period; and

(3) an evaluation of impacts of the proposed exemption on the data and information collection activities of other agencies.

(e) The governor shall report to the legislature each temporary program exemption approved by him under (d) of this section.

Add a new subsection at the end of Sec. 44.17.100 as follows:

The failure of a state agency to comply with the requirements of this section does not invalidate an action taken or proposed to be taken by a state agency.

SUMMARY

(1) RELATED BILLS (SIMILAR OR CONFLICTING) Unknown

(2) OTHER AGENCIES AFFECTED BY BILL Other regulatory agnecies of the State

(2) a. ORGANIZATIONAL SUPPORT FOR BILL	(2) b. ORGANIZATIONAL OPPOSITION TO BILL
None known	None known

(3) PROGRAM EFFECTS OF BILL Data and information acquisition and organization. For the purposes of this Department, we are extremely concerned about the impact of Sec. 1 (Purpose) and 44.17.110. These would seem to require that we base our biological data gathering (i.e., our management programs) on districts established by the Commissioner of Community and Regional Affairs, essentially the political divisions of the State. If such a requirement is established, it would necessitate a complete revamping of our data gathering and management systems, would seriously disrupt the continuity of data collected since Statehood, and would make no sense biologically. In all probability, it would require the keeping of biological and management data under two sets of criteria simultaneously, adding a considerable cost.

(4) FISCAL IMPACT: ☐ NONE ☒ FISCAL ANALYSIS ATTACHED

(5) AMENDMENTS PROPOSED:

Amend to exclude the Department of Fish and Game from provisions of 44.17.110.

(6) COMMENTS:

We recognize that this Act may be beneficial to local and state government when applied to some other state agencies. We emphasize that it would cause chaos if applied to fish and game management in the State. We realize that Section 44.17.120 may provide an exemption for this Department, but we would strongly prefer that the Department be specifically exempted by statute if this bill is adopted.

AMENDED TITLE

AN ACT RELATING TO THE RESPONSIBILITIES OF THE DIVISION OF PUBLIC DEVELOPMENT AND PLANNING, OFFICE OF THE GOVERNOR; AND PROVIDING FOR AN EFFECTIVE DATE.

HB 582 (SB 349) Establishing a program of planning assistance for unorganized boroughs

p. 1 — The Committee Substitute would add wording addressing who may request that a management program be developed for an unorganized borough and would include: (1) a municipality or group of municipalities (2) a nonprofit corporation or corporations organized under the laws of the state (3) and by petition by 15% of the voters living within the unorganized borough

p. 1 Line 16 — Number (2) would be amended to read: "a nonprofit corporation or nonprofit corporations organized under the laws of the state.

p. 2 — A Committee Substitute would require that a contract entered into under AS 44.47.085 ff) shall (see present "may" on line 26) include the four enumerated points listed on p. 2 lines 28-29, p. 3 lines 1-6. Additionally, the contract would have to specify the process to be used for regional public participation and representation in the development of the study.

p. 2 Line 15 — Add that the report would also generally address the interrelationships of:
(a) The school board for the regional educational attendance area;
(b) the coastal resource service area board, if one has been established under AS 46.40.100-46.40.160;
(c) any other regional entity responsible for services; and
(d) the governments of cities localted within that unorganized borough

p.3 Exemptions and Modifications

In every instance in the bill, reference will be to the legislature rather than to the Legislative Council.

The section on exemptions and modifications will be rewritten to direct that the Governor review requests from state agencies for exemptions to AS 44. 110. The legislature would then be empowered to override such exemptions and modifications.

Additional wording will be added to the bill specifying that the Commissioner of Education and the Director of the Division of Policy Development and Planning would also report on their ability to conform the boundaries of the REAAs and Coastal Resource Service Areas to those of the unorganized boroughs.

p. 4 Lines 17-18 Committee Substitue would provide that the voters will elect a charter commission of not more than 15 members with the method of election determined in the petition and reviewed.

p. 5 The section will be amended toprovide that if the proposed charter is rejected, the charter commission shall prepare, adopt, and submit a proposed charter to the voters at a general or special election held within one year of the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved. This procedure would follow that currently used in unification procedures.

RE: Joint Committee Legislative Package

The following are the substantive points raised during the informal review of the Legislative Package by the House C&RA Committee. Please note that the Committee did not review HB 582 relating to the Program of Planning Assistance as our hearing schedule did not allow enough time although we scheduled it on two successive days.

Rewriting of purpose

HB 580 Establishing Unorganized Boroughs

Jay Moore, DPDP testified that although there are a number of ways to establish boundaries, the mandated approach may not be inappropriate. The positive advantage is that it will happen immediately. However, there may be a problem in allowing modifications to the boundaries once they are established, as allowed for in Sec. 44. 17.120. DPDP has a concern that the provisions of this section might not necessarily put the agency needs secondary to the needs of the people being served and it is the Division's concern that this is what should be done.

Modifications cannot have been affected after REAA formations

John Post, Chief Research & Analysis, Dept. of Labor
The importance of the census boundaries adopted by the Federal Government for 1980 should not be understated. Post expressed concern that if Labor had to meet the new unorganized borough boundaries it would be very difficult and very costly to come up with the employment, unemployment and population figures for the unorganized borough areas where they did not follow the area and subarea boundaries of the census boundaries. The Native Regional Corporation boundaries are the outer limits of the census boundaries.

Palmer McCarter, Director Div.Local Government Assistance,
Dept. C&RA
McCarter questions whether appeals on boundary adjustments should go to the Legislative Council and suggests that instead the appeal be to the Governor. Perhaps the legislature could have the final appeal if the Governor isn't acting responsibly.

McCarter also questions how an REAA could be altered if necessary (there is an existing REAA which overlaps two Regional Corporation boundaries and this is not allowed in HB580). Perhaps a process for changing the REAA boundaries where necessary should be included in the bill.

After the hearing, Ginny Chitwood of the Alaska Municipal League pointed out that HB 580 limits the charter writing period to 1 year and questioned if that was enough time. Also, she was concerned that unlike the provisions for unifying a municipality, there was no provision for drafting a second charter if the first one failed.

HB 581 Establishing the Responsibilities of the Division of Policy Development and Planning

Jay Moore, DPDP
Expressed concern that HB 581 was ambiguous and suggested an elaboration as to why geocoding was needed.
He also felt that variance from REAA boundaries would probably be requested by a large number of agencies and that interagency coordination should be stressed.

HB 584 Eliminating the THird Class Borough

Rep. Charlie Parr expressed reservations about the bill saying that the C&RA department talks about giving local government flexibility and yet if the third class borough is eliminated, and the people don't want to form a second class borough, there is no alternative for them. Parr said that in his district it was planning and zoning powers that people were afraid of. Third class boroughs were restricted to service areas in this regard. Also, Parr felt that in unorganized boroughs the Div. of Lands would have zoning powers and the divisions's "shoddy track record" made it a poor option. "My bias is that we ought to have a mandatory borough act, but I think we should have a third class borough option." Parr felt the step from unorganized to second calss was too large a jump. He feels there should be a proven overirding and compelling state argument against allowing the third class borough to exist if it is going to be eliminated.

HB 585 Incorporation of Second Class Boroughs

Rep. Charlie Parr questions Line 20 of the bill and the requirement that it would take only 10 percent of the voters to petition for reclassification. Wonders if the expense of an election is justified for such a small percentage of the voters. Parr also questions Line 14 which would allow for the election to be either "special" or "regular". He is not sure it would be advisable to have a special election because of the expense and because there would not apepar to be any urgency in such a reclassification. (After clarification by Ginny Chitwood, Parr drops concerns related to the timing of the election feeling perhaps it should be left up to the municipality).

Palmer McCarter, Dept. of C&RA pointed out that initiative and referendum require 25% of the voters when the city or borough has fewer than 7,500 persons or 15% when a city or borough has 7,500 persons or more. Unification requires 25% of the voters inside and outside of the city.

Rep. Charlie Parr suggests amending the percent of petitioners (line 20) to 15%. Committee concurs.

HB 586 Requiring Fiscal Notes for Bills Affecting a Municipality

Rep. Parr raises question of whether this bill is intended to deal with just "significant" impacts. Palmer McCarter, Dept. of C&RA, responded that this would be his interpretation. Perhaps the word "major" expenditure could be added on line 15. McCarter stressed that the fiscal impact figure would be an estimate.

HB 583 State Aid to Local Governments

Palmer McCarter, Dept. C&RA, testified that the Dept. opposes the bill as presently written. Although they support the $25,000 as a base figure in revenue sharing, they believe it is too costly for the state to provide that amount in addition to the entitlements.

RE: Proposed Committee Substitute Amendments for Interim Legislative Package

HB 580 (SB 348) Establishing Unorganized Boroughs

p.1 Line 13-20 — The "Purpose" Section will be rewritten to reflect the intent of the legislation from the point of view of the people affected, rather than from a state service delivery perspective, i.e., these unorganized boroughs provide the framework within which maximum local participation and responsibility can occur and will be used for planning and programming purposes (regional strategy studies, coordination of services, coordiatnion of services, data collection, and achieving equity in allocation of state resources.

The Committee Substitute would also make note in the "Purpose" of the provisions of Chapter 19 of HB 580 (SB 348) which allow for direct incorporation of a home rule borough and of the additional flexibility this option provides for residents of unorganized boroughs.

p.2 Line 10 — Additional wording will be added to the bill dealing with the alteration of Regional Educational Attendance Area (REAA) and Coastal Resource Service Area boundaries to bring them into compliance with the unorganized borough boundaries established by HB 580 (SB 348).

p.3 Line 7 — This section will be rewritten to direct that the Governor would review requests from state agencies for exemptions to AS 44.17.110 (use of unorganized boroughs boundaries for data collection, program planning and coordinating, etc.) Further referral on the state agency use of different boundaries would

be to the Legislative Council.

(11)

p. 4 Lines 17-18

Committee Substitute would provide that the voters will elect a "geographically representative" charter commission. The number of members on the commission would not be specified. This change would also be reflected on p. 4 line 27.

OK

Substantially same as complying w/ repeal statute method of election be changed, Com. to amend, Com. should be requested RLHB

p. 5 Line 17-18

This section will be amended to provide that if the proposed charter is rejected, the charter commission shall prepare, adopt, and submit a proposed charter to the voters at a general or special election held within one year of the date of the first charter election. If the second proposed charter is also rejected, the charter commission shall be dissolved. This procedure would follow that currently used in unification procedures.

OK

Inordinate use of "district" a drafting problem

Separate - do we still want service areas allowed?

HB 582 (SB 349) Establishing a program of planning assistance for unorganized boroughs

p. 1 — The Committee Substitute would add wording addressing who may request that a management program be developed for an unorganized borough and would include (1) a municipality or group of municipalities (2) a nonprofit corporation or non profit corporations organized under the laws of the state (3) and by petition by 15% of the voters living within the unorganized borough.

p. 1 Line 16 — Number (2) would be amended to read: "a nonprofit corporation or nonprofit corporations organized under the laws of the state.

p. 2 — A Committee Substitute would require that a contract entered into under AS44.47.085 (f) shall (rather than "may" line 26) include the four enumerated points listed on p. 2 lines 28-29, p. 3 lines 1-6. Additionally, the contract would have to specify the process to be used for regional public participation and representation in the development of the study.

p. 2 Line 15 — Add that the report would also generally address the interrelationships of:
(a) the school board for the regional educational attendance area;
(b)the coastal resource service area board, if one has been established under AS 46.40,100-46.40.160;
(c) any other regional entity responsible for services; and
(d) the governments of cities located within that unorganized borough

Supplement AS4.10.200 Use Requirement

p. 2 lines 4-7 Use of term adjacent - does it adequately cover? Eliminate by any means which the Legislature will provide adequate notice

p. 2 line 26 Use of "shall"; Then Eliminate "knowing" on p. 3 l. 1

* Appropriation bill — Rule right? Ok for the Harding for purpose —

FROM: Rep. Bill Parker
DATE: 2/12/80
RE: HB 580, HB 582

* In addition to the points covered in the attached memo, the Committee raised the following issues for discussion:

HB 580

* p. 3 Lines 7-29 This section was questioned in general. It was felt that in every instance in the bill, reference should be made to the legislature rather than to the Legislative Council (see p. 3 line 10). The section should be rewritten to direct that the Governor review requests from state agencies for exemptions to AS 44.17.110. The legislature would then be empowered to override such exemptions and modifications.

* The repealers are to be checked with legislative legal staff.

* After discussion of the census lines, it was determined that mention should be made of these boundaries, along with those of the ANCSA, on page 2.

* Use of the term "substantially" (p. 6 line 17) was questioned. McCarter suggested that this was legally applied as there may be technical difficulties in complying with all the requirements of the election code if there are no election clerks in the areas.

HB 582

* If the term "may" (p. 2 line 26) is changed to "shall", the reference to housing (p. 3 line 1) should be eliminated.

* p. 2 lines 5-6. The legal meaning of the term "advertise" will be checked to see if it is adequate and "by any means which he believes will provide adequate notice etc." will be eliminated.

HB 583-586 will be reviewed Feb. 13

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM January 18, 1980

SUBJECT: Alteration of Work Orders Nos. 7656 and 7657 relating to unorganized boroughs.

TO: Representative Bill Parker

FROM: John B. Chenoweth
Legislative Counsel

In response to Margo Waring's memo --

Item 1:

Work Order No. 7657: Page 1, following line 20: Insert *Sec. 2 to read:

OK

> *Sec. 2. INTENT. In providing for the division of the state's unorganized borough into unorganized boroughs, it is the intent of the legislature that all future transfers of functions or services from state agencies to regions within unincorporated areas be made only within the appropriate boundaries for unorganized boroughs established under AS 29.03.011 - 29.03.021, added by section 3 of this Act.

Item 4 is covered by AS 29.03.021.

Item 6: The previous language, precluding subdivision of areas within REAA's into smaller unorganized boroughs, read:

> "Sec. . COMBINING OF SERVICE AREAS TO ESTABLISH UNORGANIZED BOROUGHS. The commissioner may, after public hearings in the areas affected, constitute the geographic area within two or more regional educational attendance areas as a single unorganized borough. . . ."

The provision was modified to the language you have in the bill (Work Order No. 7657) in response to Marge's December 8th memo and verbal clarification of some of the points in that memo.

* * *

Item 5:

Work Order No. 7656: Page 2, following line 14, insert new paragraph "(2)" to read:

(2) require that if the report does not favor incorporation of a borough, the report include an analysis and recommendations concerning a representative advisory body for the unorganized borough and an analysis and recommendations defining the relationship between that body and

(A) the school board for the regional educational attendance area;

(B) the coastal resource service area board, if one has been established under AS 46.40.110 - 46.-40.160;

(C) any other regional entity responsible for services; and

(D) the governments of cities located within that unorganized borough.

* * *

Item 2 of Margo's memo is, I think, answered by the suggested language prepared in response to item 5 in that these regional strategy contracts may not run longer than 3 - 4 years.

Item 3 in that memo was not to be acted on.

JBC:ljb

2/11
to Bill

Re HB 580
348

Purpose:

better wording

Rewrite 4 -
as Model framework
for future
not just services

#1

#2 ok

PURPOSE: The purpose of this Act is to provide for the division of the state's single unorganized boro into unorganized boroughs which may, in the future, provide a framework for maximum local participation and responsibility. To facilitate that purpose and for the purpose of providing coordinated services and coordinated data collection, a set of boundaries adopted for use by state agencies is mandated. It is the further intent of this legislation that all future state developed planning or service delivery boundaries conform to the boundaries established by this Act so that future local governments, if desired by the population, can subsume both these functions and use data and information collected.

INTENT: The legislature recognizes that a more systematic approach to the future of the unorganized borough is necessary. In order to accomodate future changes when desired by local residents, the state has an obligation to provide for a framework in which structured change may occur. To this end, this Act provides for a common set of boundaries in the unorganized borough which divide the state's single unorganized boro into unorganized boros. This division will facilitate planning and programming by coordinating state delivered services, coordinating data collection, regional strategy studies. It is the further intent of this Act that all future state developed planning or program boundaries conform to the boundaries established by this Act so that future local governments, if desired by local residents, can subsume functions and use data and information collected according to defined boundaries.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A. Using current per diem and travel rates inflated 25% for 1983.

B. Recommendations required of DPDP by this bill will result from intensive field survey of data needs, data sources and systems adequacies in Anchorage, Fairbanks, Juneau and other centers.

1. The work will be done under contract; supervision provided by person filling position requested in the Division's FY81 budget.
2. Travel for contract supervisor to interview potential contractors and to monitor field work. Contractual for field interviews of state, local and federal data and information users and providers, evaluation of data systems, evaluation of system operation (FY83), equipment purchase of CRT and line printer for central access to and monitoring of data system during evaluation.
3. 88.0 is for evaluation and recommendation of the referencing system; 25.0 is for contractual and travel for evaluation and report on improvement of agency progra coordination. These evaluations will result in a cost analysis for compliance t agencies with t ections 1-4 of this bill.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

POUCH B
JUNEAU, ALASKA 99811

February 1, 1980

Ms. Theresa Peoples
Local Government Training Coordinator
A.V.C.P. Employment & Training
P. O. Box 848
Bethel, Alaska 99559

Dear Ms. Peoples:

RE: STATE REVENUE SHARING PROGRAM

The concerns expressed in your letter of January 22, 1980 are appreciated. The Department of Community & Regional Affairs recognizes the limited revenue sources available to most second class cities, including the amount of State shared revenue these cities can generate. To improve this situation, we support legislation that would provide for a minimum grant of $25,000 under the State Revenue Sharing Program. This annual payment would not be dependent on municipal services provided by the applicant, and any city or borough could apply for this minimum grant in lieu of the per capita, per mile and per facility payments currently authorized. The grant would hopefully be used to pay the salary of a permanent, experienced city clerk or administrator.

Currently, there are several bills pending in the legislature that would establish the $25,000 minimum grant. H. B. 300 introduced last year by Representative Nels Anderson provides for a minimum entitlement to the current municipal services revenue sharing program. H. B. 192 introduced last year by Representative Terry Gardiner would repeal the existing revenue sharing program and replace it with a formula based on a municipality's tax effort compared to its taxable wealth. A minimum grant of $25,000 has been attached to this formula. This Department supports the concept proposed by both bills. Copies are enclosed for your information.

Another related bill, H. B. 583 introduced this year, would entitle every municipality to $25,000 in addition to the amount it receives under the municipal services revenue sharing program. The Department is opposed to this approach as it would grant the additional $25,000 to those cities and boroughs already receiving substantial revenue sharing funds.

It is important to remember that insufficient funding would result in prorated entitlements. In other words, due to prorationing, a city could receive less than $25,000 even if one of these bills were to become law.

It is suggested that the cities in the A.V.C.P. Region contact their legislators to voice their support for H. B. 300 which provides the $25,000 minimum entitlement, and for H. B. 192 which generally provides more revenue sharing dollars to poorer rural communities. We envision this grant as a partial solution, at least, to the problems of a poor revenue/tax base and high administrator turnover in most second class cities.

The #3 concern in your letter addressing needs for improved judicial services is one well recognized by this Department. We hoped that improvements in this area can be made through further efforts by the Executive and Legislative branches of State government.

Sincerely,

Palmer McCarter
Director

DEPT. OF COMMUNITY
AND REGIONAL AFFAIRS

Palmer McCarter, Director
Division of Local Government
& Assistance
Department of Community &
Regional Affairs
Pouch B
Juneau, Alaska 99811

Dear Mr. McCarter:

Thank you for your response to my letter.

At my last meeting with the City Administrators the questions/concerns were in the following areas:

a. State Construction Aid
b. Land Use Planning
c. Transportation Facilities
d. Health Facilities
e. Preparing for a Census

In addition the following have been brought to my attention:

1. Second class cities, whose population is less than 200 are barely functioning with the existing State Revenue Sharing Formulas. In the A.V.C.P. Region, 98% of the Second Class Cities and their residents are economically disadvantaged, and therefore are not in any position to levy and collect local taxes.
2. The existing State Revenue Sharing has no provisions for City Administrators/Managers. As there are no local taxes, there are no funds to hire a City Administrator/Manager. For the last four years, Yupiktak Bista Manpower through CETA grants have employed City Administrators. A.V.C.P. Employment & Training finds that there are many disadvantages, for one, the present system lacks continuity. The Second Class Cities are involuntarily experiencing key staff turnovers. As the result of the turnovers/terminations we are constantly training new City Administrators.

3. The State of Alaska and the Alaska Statues lacks and does not provide for any judicial system for Second Class Cities. The second Class Cities are finding themselves handicapped when ordinances are adopted for collection of fines and/or punishments.

We will be most happy for your time and assistance.

Thank you.

Sincerely,
AVCP Employment & Training

RE: Issues raised re Local Government Package not acted upon by House C&RA Committee

HB 584 (SB 354) Eliminating the Third Class Borough

Stephanie Scott, Administrative Secretary for the Borough of Haines, raised the question of the need for financial support if Haines reclassification is mandated. I am directing calls on this bill to your committee since I believe the House bill is dead--Charlie Parr has indicated HB 584 will not be heard by his Committee.

The Haines City Council also has apparently recently passed a resolution in support of HB 584 (SB 354)

Minutes for C&RA meeting 25 January 1980

HB 584

Parker	Intent of bill is to provide for elimination of third class borough because , from a "pure government" standpoint, it would be cleaner and better not to have them. Organized borough also needs overhaul, but Parker wasn't sure legislature can handle it at this time.
Palmer McCarter (C&RA)	Mr. McCarter presented a brief history of the third class borough statutes, pointing out that the state's only third class borough, Haines, opted for that status only because they wanted to keep their independent school district w/o becoming a second class borough; essentially, 68 legislation provided the option. McCarter also pointed out that wihtout exception whenthe Department has asked groups if they wanted to go to third class status they have said that it did not provide the type of government they wanted. Dept. argues for maximum local control, yet 3rd class is very restrictive, and therefore should be eliminated.
Parr	Mr. Parr said his bill changed certain 3rd class statues because of a '76 Fairbanks initiative to go from second class to third class (the measure failed in popular vote). The bill provided for planning and zoning on a service area basis only. "The reason I've always had trouble with this proposal is, the talk in the department is to give all the flexibility they can to local government. So if the people want something between a second class borough or no government at all, why shouldn't they have it?" So long as it doesn't hurt the state.
McCarter	Mr. McCarter gave an example of REAA 12. They would be held to be a third class borough, when in fact they are only an independent school district; that violates the intent of the act.
Parr	Mr. Parr said that, in his district, it was planning and zoning powers that people were afraid of. Third class boroughs were restricted to service ares in this regard.
Parker	"Couldn't they become second class boroughs and simply zone unrestricted?"
Parr	Mr. Parr said he believed it didn't happen that way, that zoning boards usually prefered to clamp restrictions on areas where ever they could.

Parr — Mr. Parr felt another problem would be that, in unorganized boroughs, the Division of Lands would have zoning powers, and the division's "shoddy track record" made it a poor option."My bias is, we ought to have a mandatory borough act, but I think we should have the third class borough option." Mr. Parr felt the step from unorganized to second class was too large a jump.

Parker — Mr. Parker asked if passage of this legislation would put the legislature on record as giving Division of Lands more power? Or, where in the state would such actually be the case?

Parr — Mr. Parr wasn't sure, but reiterated his fear that the division would get more planning and zoning power.

McCarter — Mr. McCarter said he understood that if the borough is not exercising its zoning power, then the Division definately had the option, and that the decision should be left up to the local assembly, not somebody else.

Parr — "Lots of voters are dissatisfied with second class boroughs; in Fairbanks, the desire was for less government." Mr. Parr stated he had voted against the Fairbanks initiative replacing a second class borough with a third class borough. "But if I had been in some other place, I might (want) a third class borough. With this bill, what might happen is we're telling people if they become second class and don't like it, you can't go down a level. Why should they be denied? You've got to prove an overriding and compelling state argument (against it)."

McCarter — Mr. McCarter stated that third class boroughs had no area-wide powers except taxation and schools.

Parr — Parr thought those powers could be exercised.

McCarter — Mr. McCarter stated that, unofficially, Haines supports the repeal of third class boroughs, and would rather have the state do it so they don't have to deal with it at the local level.

Parker — (stating Parr's position) There must be a compelling state reason for taking away the option. (paraphrasing McCarter's position) The Department of C&RA believes that, as a practical matter, the third class borough

doesn't work as an option. They are, in fact, glorified school districts.
Mr. Parker then asked Mr. Parr if he thought any region might want to become a third class borough.

Parr — Mr. Parr said he didn't know, but within his experience, in his own borough where the budget is mostly education, it made a lot of sense (to have third class boroughs). "People are afraid of being taxed. Under the third class set-up, there are no reasons for taxation.

CITY OF HAINES
TELEPHONE (907) 766-2231 – POST OFFICE BOX 576 HAINES, ALASKA

February 6, 1980

To Whom It May Concern:

Re: Senate Bill No. 354
House Bill No. 584
An Act Eliminating Third Class Boroughs

The City of Haines has experienced frustrations with the Third Class Haines Borough in much the same vein that cities in the unorganized borough have experienced with the areas outside their corporate boundaries. For many years the City of Haines provided the following services at no cost or at subsidized rates to the Borough residents outside the City boundaries:

1. Fire protection
2. Emergency medical
3. Emergency police
4. Boat harbors
5. Road maintenance
6. Day care facilities
7. Parks

The City provided these services because the Borough has only the powers of "education and tax assessment and collection." In addition, on many occasions when controversial issues arose concerning the entire Haines Borough (e.g., Haines-Skagway Land Use Plan and Udall's HR 39, Section 308 Eagle Study for the Chilkat Valley) the burden fell on the City of Haines to represent the interests of the entire Borough because the Haines Borough lacked planning authority. Yet at the most recent municipal election held October 2, 1979, 77.3% of the Borough residents who live outside the City and who voted, rejected the opportunity for area-wide planning powers.

In the face of potential liabilities and financial constraints, the City Council recently decided that effective July 1, 1980, the City will place a moratorium on all services outside the City for which the City has no legal authority to proceed on an extraterritorial basis and/or for which the City is not compensated. As a consequence of this action, the Haines Borough Assembly has scheduled a

special election for March 4, 1980, to provide the people outside the City with the opportunity to establish five additional service areas. Currently, the Haines Borough has one service area to provide fire protection to the residents immediately outside the City boundaries.

In your deliberations on the subject Bills, I think it is also important that you be made aware of the legal opinion prepared by Rodger Pegues, Assistant Attorney General (copy attached) regarding powers of a Third Class Borough. In essence the opinion states that while the Third Class Borough Assembly is unable to provide noneducationally related services and facilities without voter authority, these same individuals by donning the hats of the Haines School Board can "provide for any number of educationally related facilities and services, e.g., libraries, swimming pools, playgrounds, gymnasiums, museums, cultural centers, and the like and to make them available to the public generally." The opinion, unfortunately, fails to define the scope of "education".

Sincerely,

Jon D. Halliwill

SUBJECT: Provision of library, museum, and cultural center by third class borough

You have asked whether, in the light of subsequent statutory amendments, we wish to reconsider our memorandum of advice of March 11, 1969, in which we concluded that a third class borough may provide for a library.

We believe that, acting in its capacity as an organized borough, a third class borough could provide additional services solely by the methods prescribed by AS 29.41.010(b), i.e., by popular ratification and in service areas only. However, in its capacity as a school district and as a part of its educational program, a third class borough has ample power under title 14 to provide for libraries, museums, and cultural centers and to make them available to the public at large as well as to students.

If our earlier memorandum has a fault, it is that it failed to emphasize the dual role played by the borough assembly as local governing body and as school board, AS 29.41.020, and the resulting consequences. While the assembly as an assembly might have no power to provide for a library until authorized to do so by the electorate, the assembly as a school board has ample power to provide for any number of educationally related facilities and services, e.g., libraries, swimming pools, playgrounds, gymnasia, museums, cultural centers, and the like and to make them available to the public generally. It can even get state matching money to support many of these activities. We do not perceive the 1977 amendments to the Municipal Code's provisions on third class boroughs as in any way affecting their powers and functions as school districts.

Ms. Stephanie Scott
Administrative Secretary
Haines Borough
Haines, Alaska

Dear Stephanie,

Enclosed you will find the material relative to the Local Government Study which we discussed, including: 200 copies ofHHB 584; copies of the local government study report; and a press release on the legislative package.

Additionally, I have attached a oppy of the House C&RA schedule for public hearings. You will note that HB 584 has been scheduled for Feb. 13 because of the legislative holiday on Feb. 15. The Senate C&RA Committee has informed me that they will hear SB 354 (identical to HB 584) on Feb. 14 at 1:30 P.M. in the Butrovich Room of the Capitol Building.

Thank you for your interest and we continue to be available for any comments or questions you may have.

Yours truly,

(for Rep. Bill Parker)

Sen.Arliss Sturgulewski
Chairperson
Community and Regional Affairs
State Senate
Pouch V
Juneau,Alaska

Dear Senator Sturgulewski:

I am writing in support of HB 584 which would eliminate the Third Class Borough. Over the last 30 years I have been on the School Board add involved with all the complications of the Special School District which finally became a "second thumb" under the State Constitution, i.e.a Third Class Borough. As the constitution required a limited strata of government, there should have never been a Third Class Borough. The making of such a formof government was a method to get out of a responsibility. I am happy to see the Legislature finally take on this change.

I'm enclosing a copy of the local paper which shows how a Third Class Borough , but adding on service district after service district,until it is in effect a Second Class Borough, or better. When a Fire District was setup several years ago, the Borough could not even get candidates to fill the require positions for the District. However, more areas are seeing that they can save considerable insurance by being under a Fire District, and now adding a medical service area. HOWEVER, what is heppening is that the Borough Government is duplicating the City Government.

It is understanable that many people in the outlying area do not want to have zoning and planning because they do not want to be restricted. The result is many shacks, impoperly subdivided lands, poor water and sewer control and in some areas, lacking of garbarge control. The "hue and cry" is "we don't want more government", but these people accept all the services available by the City without paying anything for such service.

It is almost impossible to explain to some that they will only pay for what they get. They do not pay for City sidewalks, road maintenance etc. If they do not have water and sewer, they do not pay for this utility. We have the possibility of industrial development in the outreach area and should that happen under our present type Borough government, a hodgepodge of growth will develope. Of course, these developers see a great advantages of low taxations so side in with those who don't want any control on their own interests,even tho against the developers.

I hope that when this bill(or a Sen.companion bill) comes up for a hearing that I will have the opportunity to testify. Thank you.

Sincerely,

Carl W.Heinmiller

FROM THE DESK OF JUDGE CARL HEINMILLER
HAINES, ALASKA

Feb.6th

Dear Bill:

This is a MUST...we are getting in more trouble every year. we have some people subdividing in the worst possible way...plus garbage dumps..shacks etc.

The hot shot developers who want to mine..and the lgggers..want low taxes.. so are oddly enuf, lined up with the no growth people(or the shackers). The City is getting stuck with more and more services, which, while they could refuse ..such as fire serve, it is very difficult. someone burns out and then arrive in town for help etc.

I'd like to testify on this bill whenever it come up..

Regards,

Carl

The Honorable Charlie Parr
State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Parr:

The Alaska Municipal League 1980 Policy Statement contains the following language on third class boroughs. "The League supports elimination of language from the Alaska Statutes which would allow for the future creation of third class boroughs. Any existing third class borough would be allowed to continue in existence until such time as it reclassifies. The League believes that a third class borough, as currently defined in statute, does not meet standards for a general purpose local government."

The third class borough filled the gap caused by the abolishment of the old independent school districts. Subsequent creation of rural education attendance areas, however, obviates the need for an entity, such as the third class borough, to provide local control over local educational districts.

In practice, the Haines Borough has encountered difficulties with the system under which it functions. For example, it is faced with a multitude of land use problems over which it has no statutory authority. In addition, the general local government problems that came before the assembly, and that in most cases cannot legally be resolved by the assembly, are interfering with that body's ability to perform its major function - running the Haines schools.

The League, therefore, is in favor of abolishing the third class borough form because it doesn't meet the maximum local self-government criteria set out in the Constitution, and from a practical point of view it doesn't seem to work.

Sincerely,

Ginny Chitwood

Juneau, Alaska 99811

Dear Palmer:

I am enclosing two sets of correspondence concerning two "gray" areas for the third class Haines Borough:

1) Our relationship to the management and disposal of land received from the state through the municipal entitlement procedures; and

2) The status of the present "chairman" of the Haines Borough Assembly and School Board.

I know this is a very busy time of year for you but if you would look into both of these areas for me I would appreciate it very much. My basic concern with the question of the chairman is how do we elect a borough mayor at large and still maintain our present form of apportionment and representation? It would be nice to be able to deal with this issue this October before dealing with the new forms of representation and possible reapportionment as laid out in the 1979 amendments.

Sincerely yours,

Stephanie

RE: Opposition to H.B. 584

Dear Sir:

Concerning H.B. 584, "An Act eliminating third class borough", I oppose the bill. I understand a third class borough to be the simplest form of government for residents in a community to have in order for them to have a strong local government. It provides direct power to the people in which they have more direct power than people in a first or second class borough. I realize that the legislators understand the power of a third class borough, but I feel it is not as well understood by the people in general and that it is being misrepresented to the people. To think that in order to have a strong local government that it must be a large standardized complex governing body is, I feel, erroneous. When you have a complex government, people naturally tend to reject or lose the incentive to provide for themself, due to high taxes and the forced understanding that the government knows what is best for you. To imply that a person does not know how to govern himself is a direct insult to their intelligence.

Working with the Salcha Secession Group, which is trying to detach from the Fairbanks North Star Borough, we are looking for a local government plan which will fit our needs. According to AS 29.03.030, there are five general law municipalities to choose from or become and Unorganized Borough. The residents of Salcha are looking at adopting a third class borough. I believe it will meet our needs better than the second class which now exists. Before the FNSB was formed, Salcha was a growing farming community in which the people were self providing. The community was involved in building a community hall; they were responsible for the establishment of the Salcha Elementary school; and provided the bus service for the elementary and high school students. Salcha residents brought power to the community and tried to build a Farmers loop road. When the taxation started, it was a financial strain to the Salcha farmers who were just making ends meet. The borough went so far as to tax potatoes in their root cellars. Some residents had to dismantle buildings on their farms because they could not afford to pay the taxes. All of this in order to provide services that already exist and these services are still mainly funded by the original source.

When the borough was being formed, Salcha tried to be excluded. At that time it was known that the FNSB could not provide for Salcha and it still cannot in the best interest of the borough

residents and the State of Alaska. If Galena were allowed to detach and form its own third class borough, the people would have the direct power to provide for themselves again. By eliminating third class borough, I find this an act of breaking down true local government powers of the people of Alaska. This especially applies to Alaskans of rural and bush Alaska who might choose this type of local government in order to meet their needs.

I am in strong opposition to House Bill 584 and cannot stress to you the importance of this bill being defeated.

Very truly yours,

Allen J. Busby

POSITIONS None

FULL TIME						
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

AS 29.18.180(a) states that boroughs that reclassify are entitled to an organizational grant of $25,000. This bill would force one existing third class borough to reclassify and thereby entitle it to a $25,000 grant. No other municipality is affected by the bill.

FY 83 is the estimated year of reclassification, although it could conceivably take place any time between FY 80 and FY 85.

Dear Bill:

I would like to take this time to personally thank you and your staff for taking time from your busy schedule to meet with myself and Mr. Harold Napoleon, regarding the bills concerning the unorganized boroughs which are under consideration by your committee.

It has become apparent that there are many interests which involved in the consideration of these bills and AVCP would like to reiterate it's position that it may be premature for this legislature to pass these legislations, at this legislative session. However, AVCP herewith submit to you and your committee for consideration that in lieu of the passage of these bills, that AVCP would be more than willing to be the demonstration area for the impact study to determine whether such a governemnt can be established within the AVCP Region. That is to say, we would like to see legislative appropriating funds to AVCP to conduct an impact study to determine whether a borough government is feasible within the AVCP Region and for the legislature to give us, at the minimum of two (2) years to complete the study, at which time a decision will then be made the electorate with the AVCP Region. Furthermore, we submit to you and your committee for consideration that the external boundaries of such a governmental unit be that of the external boundaries of the regional corporations established under Public Law 92-203, and any subdivision to be determined by the impact study.

Again, thank you for taking time to meet with us to discuss this vital issue of concern to the people of the AVCP Region.

Sincerely,

Carl Jack

The Honorable Bill Parker
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Re: House Bill No. 584

Dear Representative Parker:

I am really concerned with Senate Bill No. 354. This bill was introduced without any regard for the constituency within the Haines Third Class Borough. In my opinion, the Community and Regional Affairs, disregard for public opinion by not holding a public hearing at Haines, Alaska, advising the intent to repeal Third Class Boroughs, is an act of disdain.

I trust you will give this bill your full consideration before bringing it out of committee.

Before repealing Third Class Boroughs, there should be research as to the benefit for small communities and the State. It gives any small community self government, with taxable power for education allowing them revenues for extra curriculum not furnished by the State. A government without all the restrictions of platting and zoning and this should remain within the Third Class Borough and should not be authorized to the Division of Lands. Let's not get into a bureaucratic government. The people should retain the right for platting and zoning. They can do this now by districts and if they want area wide powers, they can always reclassify to a Second Class Borough, but leave it to a vote of the people, not as a mandate from the legislature.

In my opinion, the Third Class Borough statute is very feasible to the State of Alaska, but has been opposed by Community and Regional Affairs from enactment.

I was active in the Haines Borough Government for the first ten years, assemblyman for six years, and Assessor for nine years. In every contact with the Community and Regional Affairs, we were ridiculed for remaining a third class borough. We were contacted by residents in Tok and Glenallen, Alaska. The C.R.A. representative returning to Juneau through Haines was very jubilant. He had convinced both towns not to proceed.

It would be interesting to know how many small communities have been discouraged to self government as a Third Class Borough, by Community and Regional Affairs, and why?

In Conclusion: I wish to emphasize that the Haines Borough has been very successful and satisfied; any change to reclassify has been voted down heavily; financially we are solvent, our local effort for the 1978-79 budget was $242,296.

Again I say Statute of Third Class Borough's should not be repealed. We the people should retain our rights for self government by popular vote.

Sincerely,

Raymond R. Smith, Sr.

Juneau, Aka. 99811

Dear Representative, Bill Parker,

Haines is the one really peaceful place, where life is not a hassell. I believe, being a 3rd. class borough has a lot tc do with this.

I really hope we won't be forced to cope with the problems & pressures of a 2nd. class borough.

We really need to preserve more of our fertile soil for agriculture. Much has already been burried under blacktopping, housing & shopping centers. Our nation will indeed starve, if we don't put a damper on this. What good are houses & markets, if there is not food to support life. Crazy, isn't it?

We now realize, a nation is only as strong as it's ability to produce & utalize it's food resources.

We are responsible for our actions & our Gvt. policies, which in turn effect the entire world. We are in a big enough mess, so let us not make matters worse, by forcing our community to become a 2nd. class, instead of the present 3rd. class borough?

Please vote NO on House Bill #584.

Sincerely,

Louise Homstad

Fourth open letter to all
Legislators of the State of Alaska

February 12, 1980

Re.: Borough powers (HBs 580, 581, 582, 584, 585, 586, and the corresponding bills in the Senate)

Dear Legislator:

This letter is written in opposition to the above named bills, wh will, if enacted, eliminate the borough system. Thereby the oppor tunity for maximum local self-government as mandated by the Alask Constitution, article X, will no longer be provided for.

If the sole purpose for this legislation is (as I have perceived from listening to verbal testimony by members of the Joint Senate & House Community & Regional Affairs Committee) to streamline del ery of State provided services and to encourage local participati in the process, then nothing would prevent the legislature from s ply amending present law to the extent that the existing regional school boards may also act as Regional Health and Welfare Boards. The providing of municipal services to any area of the State wher people may desire them is very adequately covered by existing law in Title 29, Alaska Statutes.

Under AS 14.08.41 regional educational attendance areas were esta lished to provide for education in the unorganized borough and to "establish and maintain a system of public schools open to all ch dren of the State" as set forth in the Alaska Constitution, artic Each regional educational attendance area is operated on an areaw basis under the management and control of an elected regional sch board. If a higher or different level of education than that prov by the State is desired in any part of a regional educational att ance area, or if a municipal service is desired by the people in part thereof outside first or second class cities, the legislatur

may act as the assembly for the unorganized borough and may establis alter, or abolish service areas for that purpose (AS 29.03.020). The regional school board has no taxing authority and the Division of La has the zoning authority in the unorganized borough (AS 38.05.037), except that first class cities shall and second class cities may pro vide for planning, platting and zoning.

A Third Class Borough is an organized borough and a municipal corpo- ration; it provides for the most local control under State law. A th class borough has an elected assembly which also serves as school bo The presiding officer of a third class borough assembly is both pres dent of the school board and borough executive (AS 29.41.020). The p siding officer is elected from among and by the assembly and has no power. A third class borough is a general law municipality (AS 29.08 and is granted the powers applicable to all municipalities under cha ter 48 of title 29. It must exercise the mandatory areawide powers o education and tax assessment and collection and may assume any munic powers granted under chapter 48, title 29, by voter approval and may exercise the same on a service area basis only (AS 29.41.010). Plann platting and zoning powers may be assumed after approval by a majori of the voters of the entire borough and may be exercised on a servic area basis. First class cities shall and second class cities may pro for planning, platting and zoning. The State has no zoning authority within a third class borough (AS 38.05.037) except within any portio covered by the Alaska Coastal Management Program if the municipalit has not done so. The State Division of Lands may provide for plattin

> "...for only the purpose of hearing and acting on peti- tions for the change and vacation of plats" (AS 40.15.075).

The third class borough may well be considered the ideal form of max mum local self-government to facilitate organization of large and sparsely populated areas, such as encompassed by many of the existin regional educational attendance areas.

> "All political power is inherent in the people. All govern- ment originates with the people, is founded upon their will only, and is instituted solely for the good of the people as a whole." (Alaska Constitution, article 1, section 2)

In other words all rights of self-determination are originally retain by the people. The State assumed only the rights enumerated in the co stitution of Alaska through voter approval and assumed at the same ti the obligation to fulfill the responsibilities enumerated in the same Article VII of the Alaska Constitution requires the State to provide education, protection of public health and welfare. Article X of the Alaska Constitution requires the State to provide for maximum local s government and to divide the State into boroughs, organized and unorg ized, and that the legislature shall classify boroughs and prescribe their powers and functions and methods by which they may be organized incorporated, reclassified and dissolved.

The legislature did that; it established 3 classes of organized borou and provided for their reclassification, and it did provide for regio educational attendance areas operated by elected school boards. The borough system as enacted provides for maximum local self-government one hand and for stringent municipal rule on the other, thereby satis factorily accommodating the needs of the various population centers a well as the sparsely populated areas of the State. The unorganized bo with its multitude of first and second class cities is evidence for t success of the local government system.

As private ownership of land will increase, population centers of var character will develop and thereby will demand increasingly more and different kind of municipal services. The third class borough will un doubtedly fill the need for a first step to organize local municipal government. The Haines third class borough very successfully proves i purpose. The majority of the people of Haines prefer to retain their right of self-determination as evidenced in recent elections by voter rejection of reclassification proposals to a different class. It also reflects their desire and need for self-determination regarding plann and zoning, the power which the people of Haines prefer to retain as evidenced in a recent election. Of course their are always people who prefer a stronger form of local government. In the case of Haines tho people are in the minority, but very vocal in favor of HB 584, a bill calling for the elimination of the third class borough. On the other hand in many second class boroughs evidence is apparent of the domine of the populated center areas over the outlying areas; specifically, dictatorial zoning administration unjustly denying the less populated

areas their rights to self-determination. Serious attempts have been made and are currently contemplated for putting the question of reclassification to third class status for all or part of some second class boroughs on the ballot.

This flexibility of municipal government organization is absolutely necessary to insure orderly and diversified development in the future the only way to achieve prosperity to the people and establish a soun economy. For these reasons, and because the Alaska Constitution deman it, I urge you to defeat the above named bills in committee.

Unfortunately most of the citizens of Alaska are not aware of the leg lation under consideration and therefore the input you receive reflec mostly that of special interests, such as existing government bodies government related or dependent groups, who will benefit from this legislation at the expense of the majority of the people. The current administration and the Department of Community and Regional Affairs i particular are consistently opposing and rejecting the third class borough form of local government. This is evidenced by the misleading and false statements found in the recent Yukon Flats Regional Governm Study, such as: "A third class borough is little more than a local sc board which must levy taxes to support its educational programs. Beca it lacks planning authority, it cannot deal with important issues such as planning for public facilities, providing utility services, and planning for growth and development which best fits local needs and desires." This is of course not so. Education is provided and paid fo by the State, the third class borough government can do all the planni it needs or wants to do and can establish any municipal service such utilities, roads, fire protection, recreation, water, sewer, garbage collection, and so on, on a service area basis with the consent of th voters. In the unorganized borough, where most communities at present are not connected by road, the third class borough should be the form government most attractive for the people to adopt.

The Joint Senate & House Community & Regional Affairs Committee's fin report of the Local Government Study - 1979 states: "Creation of the Rural Education Attendance Areas throughout Alaska eliminated the purp of the third class borough, which has education as its only authorized substantive function." This statement reflects total misinterpretatio

of the law and displays arrogance and disrespect for the principals of the right for self-determination of the Alaska people as set forth in their Constitution. Agency representatives as well as members of the legislative local government study committee expressed verbally before public hearings such misinterpretations of the law purely for the bene of enhencing the power to special interest groups and government bodies The evidence of their misrepresentations warrants serious consideratio of a legislative investigation into the misuse of power and funds by t Department of Community and Regional Affairs. The Department has worke purposely against implementation of the law as prescribed by Alaska Statutes and has unlawfully propagandized misleading facts to influenc public opinion in order to change law and thereby enhence the selfserv powers to that department.

Present law very adequately serves the needs for organized and unorgan local government. Education is very well provided to the unorganized borough through the elected school boards of the Regional Educational Attendance Areas. In the same way health and welfare services could be administered by the State. If special services are desired in specific areas, first and second class cities may provide for the local needs o such services or the legislature may act as the assembly for the unorg ized borough and establish service areas to satisfy those needs. A th class borough may be formed in which the assembly is also the school b and may, in addition to the mandatory functions of administering educa and tax assessment and collection, exercise any or all additional muni pal functions, including planning, platting and zoning, on a service area basis, after voter approval. If the need for areawide exercise of the additional services should arise or be desired, the people may by majority vote reclassify or incorporate with the powers of a borough o the second or first class, or as a home rule or unified municipality, prescribed by law.

No purpose is cited for the enactment of the above named bills under consideration which could not be implemented under present law. The proposed legislation will substantially eliminate the opportunity for local self-government and thereby impair and deny the people of Alask the right of self-determination as set forth under the Constitution.

These bills are contrary to the best interest of the people as a whole. Therefore they should die in committee, and in any case must never be enacted.

Very truly yours,

Wolfgang Falke

Dear Committee Members:

Enclosed please find a copy of my forth open letter to all legislato which, together with my third open letter of which you have received copy (I hope), I hereby formally ask to be entered as testimony at y next committee meeting. I hope there will be a chance for the commit to consider my suggestions and objections.

I appreciate very much the opportunity to participate in your last weeks teleconference and to listen to the problems faced elsewhere in our State. I am sure I did not address all the questions you may have regarding my comments and I would sincerely appreciate if you could drop me a short line with the specific questions why you think the law must be changed and amended to better solve the "problems", and state the problem. I will respond at once.

I thank you for your kind consideration of my comments.

Very truly yours,

Wolfgang Falke

WITNESSES TESTIFYING:

Discussion centered around the suggestion, previously made by Rep. Parr, to change the petitioning amount required to 15%.

Ginny Chitwood, Ak. Municipal League, questioned if the Committee had considered including second class cities and enabling them to adopt home rule as well.

After discussion of including second class cities, Rep. Branson pointed out that such an addition would be a piece meal approach to revising Title 29 and that she objected to this approach.

Sam Coxson, Mgr. of Whittier, testified that he would support allowing second class municipalities to write home rule charters as Whittier is second class and might want to reclassify as some time.

Rep. Parker stated that it was beyond the scope of what was originally being proposed to include second class cities and it was the concensus of the group that it would not be included.

The Committee also decided to leave the 10% petitioning requirement intact.

COMMITTEE ACTION: Bill passed out to Rules.

WITNESSES TESTIFYING:

Chairman Parker distributed copies of the Final Report of the Interim Study Committee and announced that the Committee has scheduled the Local Government Study Legislative Package for an informal review by the Committee members before hearing the bills via teleconference on Feb. 6-7.

Parr - Questions Line 20 and the requirement that it would take only 10 percent of the voters to petition for reclassification. Wonders if the expense of an election is justified for such a small percentage of the voters. Parr also questions Line 14 which would allow for the election to be either "special" or "regular". He is not sure it would be advisable to have a special election because of the expense and because there would not appear to be any urgency in such a reclassification (Parr dropped concern re timing of election after Ginny Chitwood of the Municipal League clarified that that type of decision is usually left to the local governing body)

Chitwood Clarified the charter commission process as it would function in this bill.

McCarter McCarter pointed out that initiative and referendum require 25% of the voters when the city or borough has fewer than 7,500 persons or 15% when a city or borough has 7,500 persons or more. Unification requires 25% of the voters inside and outside of the city.

(*Check--would it be up to the petitioners and possible for them to amend date of election in petiotn?

COMMITTEE ACTION:
Completed review of bill. Concensus on Parr's amendment.

TAPE # 1 SIDE 1 Sections 873-1111

Parr — Suggests amending the petitioning amount to 15%. Committee concurs.

HOUSE BILL NO. 585

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the incorporation of second class boroughs as home rule boroughs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.13.010 is amended to read:

Sec. 29.13.010. MUNICIPAL CHARTER ADOPTION. A first class municipality or second class borough may adopt a charter for its own government. A home rule municipality may amend its charter or adopt a new one. A charter is framed by a charter commission of seven members chosen by the municipal voters at a regular or special election. A candidate for the commission must be a qualified voter of the municipality and a resident of the municipality for three years immediately preceding the election. A charter commission election is called by filing a petition with the borough assembly or the city council, or by resolution of the borough assembly or city council. The petition must be signed by a number of municipal voters equal to 10 percent of the votes cast in the last regular election of the municipality.

070 (C) Charter submitted First class/home rule & amending

Home rule bill proposed

By The Associated Press

The House has passed and sent to the Senate a bill to allow second class boroughs to move to home rule status.

The bill, HB585, was introduced by a joint House-Senate interim committee that this summer studied local government needs for organized and unorganized boroughs in Alaska. The bill passed 37-1 on Tuesday.

Another piece of legislation still pending would allow unorganized boroughs to also move to home rule status, which allows a charter to be developed so that local government can be tailored to the area it serves.

Currently, municipalities and boroughs must be first class before they can adopt a home rule charter.

Committee members said the bill passed on Tuesday makes it easier for local government to respond to local needs. Home rule status allows the local government to adopt ordinances and enact powers unless they are expressly prohibited in the Alaska Constitution.

Several other measures pending in the House and the Senate deal with unorganized boroughs, which committee members say have become laced with "spaghetti-like" boundaries.

SUBJECT: FCCS HB 585

TO: Members of the Free Conference Committee

FROM: John B. Chenoweth
Legislative Counsel

I do not want the members laboring under a false assumption. The referendum requirements requisite to levy or adjustment of levy of a sales tax imposed by AS 29.53.420, amended by * Sec. 4 of the attached bill, are not binding on home rule cities or home rule boroughs as a matter of state law. Local charter provisions may so require, but AS 29 does not.

JBC:ljb

Enclosure

Excused: 0 HB 611

Absent: 4 Hohman, Kelly, Sackett, Sumner am

and so, the effective date clause was adopted.

STANDING COMMITTEE REPORTS

The Commerce Committee considered SENATE BILL NO. 587 (relating to professional geologists) and recommends it be replaced with COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 587 and reports it back as follows: Senator Bradley, Chairman and Senator Stimson signed "do pass". Senators Kelly, Sturgulewski and Ferguson signed "no recommendation". SB 587

SENATE BILL NO. 587 was referred to the Rules Committee.

CONSIDERATION OF THE CALENDAR CONTINUED

Senator Colletta moved and asked unanimous consent that HOUSE BILL NO. 1021 (granting authority to the Alaska Renewable Resources Corporation to exceed investment limits by investing $3,500,000 in Ball Brothers, Inc) be held until later today. Without objection, it was so ordered. HB 1021

HOUSE BILLS IN SECOND READING

2d SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 585 (relating to municipalities, amending AS 29 to provide for the incorporation of home rule boroughs; and increasing the limit on the rate of sales tax which may be levied by municipalities) which had been held from June 2 was before the Senate at this time with amendment No. 1 pending. 2d SCS HB 585

Senator Ray moved and asked unanimous consent to withdraw amendment No. 1. Without objection, it was so ordered.

2d SCS HB 585 Senator Ray offered the following amendment No. 2:

Page 2, line 7: add (e) Any proposal increasing or decreasing the levy or collection of taxes referred to in (a) shall be approved by a majority vote of the people voting on the proposal at a regular, special or general election.

2d SCS HB 585 am S Senator Ray moved and asked unanimous consent for the adoption of amendment No. 2. Senator Ziegler objected, then withdrew his objection. There being no further objection, amendment No. 2 was adopted.

Senator Colletta moved and asked unanimous consent that the Rules be suspended and 2d SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 585 amended Senate be considered engrossed, advanced to third reading and placed on final passage. Without objection, it was so ordered.

2d SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 585 amended Senate was read the third time.

The question being: "Shall 2d SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 585 amended Senate (relating to municipalities, amending AS 29 to provide for the incorporation of home rule boroughs; and increasing the limit on the rate of sales tax which may be levied by municipalities) pass the Senate?" The roll was taken with the following result:

2D SCS HB 585 AM S 3RD

Yeas:	15	Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Ferguson, Hackney, Kerttula, Meland, Mulcahy, Ray, Stimson, Sturgulewski, Tillion, Ziegler
Nays:	0	
Excused:	0	
Absent:	5	Hohman, Kelly, Rodey, Sackett, Sumner

and so, 2d SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 585 amended Senate, passed the Senate.

INDIVIDUALS CONTACTED:

WITNESSES TESTIFYING:

There was discussion among the committee members of the desirability of a further referral of the bill to Finance Committee. Concerns were expressed:

1. that a fiscal note would have to be prepared even if the amounts were minimal
2. it would be difficult and costly for DC&RA to have to contact all municipalities in the state (the Dept. responded that the fiscal note would be "general" and might be developed to relate to categories of cities (first, second, home rule, etc.)
3. there was concern that the next step might be, as in other states, that once the costs to the municipality are identified, the municipalities might want the state to pick up the costs (16 states currently are required to reimburse and 4 others require fiscal notes)
4/ ways of tying the development of the fiscal note to some meaningful figure might be to calculate if it would require a certain % expenditure of the municipal budget; or if it would result in an increase in local taxes. The committee then determined that it would take substantial work on the part of the Dept. C&RA to determine this as well.

Rep. Parr pointed out that the Municipal League does keep the legislature informed re the costs of legislation for municipalities now. Chitwood responded that the League only represents 1/3 of the incorporated cities and she did not feel that the legislature necessarily wanted to rely solely on the information of a lobbyist.

COMMITTEE ACTION: Took no action on the bill

Alaska Municipal League

Re: HB 586

The Alaska Municipal League supports HB 586, Fiscal Notes. Fiscal notes estimate the effect on the expenditures or revenues of a local government of implementing or complying with a proposed state law. These notes can provide information for both legislators and local representatives on the effect of state law on localities. Presently, twenty five states provide some type of formal procedures for attaching fiscal notes to pending legislation affecting state finances. Twenty two states have enacted fiscal note procedures covering proposed legislation affecting local governments.

The following material is attached for your information:
Information bulletins from the Advisory Commission on Intergovernmental Relations

Procedures now in effect in Nevada, California and Connecticut.

Thank you for your courteous consideration of this matter.

FISCAL NOTES ON LOCAL GOVERNMENT LEGISLATION IN OTHER STATES

State of California

Procedure: Any legislation which would impact a local government as to loss of revenue is assigned to a legislative fiscal committee by the Rules Committee. In the House it is the "Ways and Means Committee"; in the Senate it is the "Finance Committee". The committee secretary requests a fiscal note from the Dept. of Finance and the Legislative Analyst Division. Other agencies also get involved depending on the policy.

Opinion of Efficacy:

The staff of the California Legislative Analyst Division feels the system is working very well.

Fiscal Impact: Since fiscal notes are also prepared on legislation with only state impact and the process has been going on for a considerable time now, the staff could not make a determination as to how many people were employed because of local government fiscal notes. The process was originally established as part of the legislative rules.

# #

State of Connecticut

Procedure: The passage of a bill in Connecticut differs from Alaska. First, the bill is proposed to a committee in rough form. Then it is worked on by that committee which formulates language. Then, it is sent to the Legislative Commission Office where the bill is put into legal language. At that time the Legislative Commission Office furnishes a list of bills which have possible fiscal impact to the Office of Fiscal Analysis. Staff members determine fiscal impact by contacting the individual communities or other agencies, depending onthe nature of the bill.

Opinion of Efficacy: The staff of the Office of Fiscal Analysis feels the system is working well with only minor difficulties. Sometimes the major source for information on which to base the fiscal impact is not all that good. This year, in order to overcome any difficulties with the collection of data from the municipalities, the state will begin working closely with the Connecticut Conference of Municipalities. CCM will play a major role by being a liaison between the state and the municipalities and will expedite the gathering of more reliable information.

Fiscal Impact: The Office of Fiscal Analysis added four persons to their staff in order to accomplish the added responsibilities. Fiscal notes on local government legislation went into effect in 1979.

# #

(con't)

FISCAL NOTES ON LOCAL GOVERNMENT LEGISLATION IN OTHER STATES

State of Nevada

Procedure: Fiscal notes are required on local government legislation if there is more than $2,000 of impact. This figure is determined by the bill drafters with the cooperation of the Nevada Legislative Council Bureau. It is an arbitrary level, most bills would have more impact than $2,000.

The Bureau contacts municipalities who estimate the impact on their communities. There is a ten day limit on fiscal notes for state legislative impact, set by law, so a ten day limit has been arbitrarily set for local government fiscal notes also.

Opinion of Efficacy: The Bureau staff feels the system is working well. If, in minor instances, the Bureau feels a local government is "overestimating" or "underestimating" because of political pressures, or if the local government is uncooperative, the staff will go to other agencies to collect the needed data.

Fiscal Impact: No additional personnel has been added to the Bureau's office staff for this task. It is being handled by one person. It began in 1979.

# #

Alaska State Legislature

Senate

Committee on Community & Regional Affairs

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

March 8, 1980

TO: Senator John Sackett
Senate Finance

FROM: Senator Arliss Sturgulewski

On March 6 the Senate Community and Regional Affairs Committee passed out SB 352 with a unanimous do-pass. The next committee of referral is Senate Finance. There has been growing interest in many states to have state legislatures more aware of the financial implications of their actions on local governments. Alaska seems to be no exception to that interest. For example, Senators Hackney, Ziegler and Kelly introduced SB 309, An Act requiring the preparation of a local government impact statement. That bill is currently before Community and Regional Affairs. Substitute language is currently being prepared that could either be attached to SB 292 as amended, An Act requiring fiscal notes to be prepared for regulations having fiscal impact, or could be considered as a committee substitute for SB 309. Senate Bill 309 speaks to the impact of changes in regulations as they might impact local governments; while SB 352 speaks to impacts of particular bills that could cause a financial impact on local communities.

During the committee meetings we spent considerable time discussing how legislation should be written to require a fiscal note showing municipal impact. I'm sending along materials submitted by the Alaska Municipal League that might help the Senate Finance Committee when it considers this bill. We discussed utilizing more specific language, such as consideration only of major impacts. However, testimony by the Community and Regional Affairs Department indicated they were comfortable with the wording of the bill and would of course be prepared to carry out the legislation if it should pass. There is a fiscal note accompanying SB 352.

I would be very happy to work with you or designated staff in the event you feel tnis legislation needs further refinement or discussion. I strongly support this bill and would appreciate your support and assistance. Thanks, John.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

To prepare fiscal notes on all bills relating to municipalities would require an additional Local Government Specialist (Range 17). The figures above are based on the bill being passed at the end of the current session and the position becoming effective in January 1981 for the next legislative session.

Personal services costs are based on a Range 17 position with 28% added for benefits plus 8% each additional year for inflation.

Contractual costs are primarily for long distance telephone calls. The one time equipment cost is for a desk, phone, etc.

BULLETIN No. 79-3 April 1979

STATE MANDATES

IN BRIEF

State mandates tend to impose state priorities on local governments. Many mandates require local governments to make organizational changes, provide more services, tell them how to relate to other local governments, or to their own personnel. While they sometimes create a benefit for the local government, more often mandates impose additional costs, especially when they are not accompanied by adequate state financial assistance.

To alleviate some of the difficulties inherent in state mandating of local expenditures, the Advisory Commission on Intergovernmental Relations has recommended that states define and catalog state-initiated mandates, and that they provide reimbursement for mandates which require local governments to provide additional services, exempt property from the tax base, or impose unnecessarily costly personnel requirements. In addition, the Commission has recommended that state legislation and proposed administrative regulations contain an explicit "fiscal note" setting out any financial cost impact on local governments. Copies of the model legislation are attached.

State Mandates: An Overview

A state mandate can be defined as any state constitutional, statutory, or administrative action that expands or limits local government expenditure requirements. These mandates are frequently used to achieve uniform service levels and more professional standards for employees, but they are often the basis for imposing special interest demands as well. There are state mandates on public library hours, park and recreational programs, and local payments for regional public transit systems. Mandates are enacted on special education programs, local retirement systems, labor relations procedures, and salary and wage levels.

A 1976 ACIR survey of state mandates found they were most prevalent in four areas: 45 states mandated solid waste disposal standards; 45 states mandated special education programs; 42 states set standards for workmen's compensation for local personnel other than police, fire and education; 35 or more states had provisions on retirement systems. 1/

Not surprisingly, a survey of attitudes of local officials toward mandates revealed considerable opposition toward them. Although much of this disgruntlement can be alleviated with full or partial reimbursement of additional costs resulting from the mandates, 26% of the state municipal league representatives felt state mandates were inappropriate even if they were fully reimbursed.

The current financial stress being felt at all levels of government -- stemming from mounting inflation rates, a slowing of federal aid growth, and the growing popularity of tax and expenditure limits -- has made state mandates a problem that many local government officials insist must be rectified.

Current Trends

To date, ten states have acted to regulate state mandates by restricting their use or requiring that localities be fully or partially reimbursed for additional costs imposed by mandates. In 1978, four states enacted reimbursement measures to apply on proposed new mandates. Tennessee, Michigan, and Hawaii voters approved constitutional measures requiring the state to share or

fully fund costs associated with state-imposed mandates. Florida's reimbursement procedure is statutory.

Tennessee's constitutional revision provides that no law of general application shall impose increased expenditure requirements on cities or counties unless the General Assembly provides that the state share in the cost.

In Michigan, the state is prohibited from "requiring any new or expanded activities by local governments, reducing the proportion of state spending in the form of aid to local governments or shifting the tax burden to local governments" without full state financing.

Hawaii's constitution now provides the state must "share in the cost of any new programs or increased services which the legislature requires that counties provide."

The Florida statute calls for full reimbursement when (1) a state general law requires municipalities or counties to perform an activity or provide a service or facility which requires the expenditure of additional funds; or (2) a state law grants an exemption or changes the manner by which local property is assessed, or alters authorization to levy local taxes. Partial state reimbursement is to be provided for any state general law which establishes a service or activity which meets both state and local objectives.

Of the six additional states that require state compensation for certain types of mandates, two are statutory and four constitutional:

-- By statute, California calls for full reimbursement for costs to local governments incurred by state-imposed mandates;

-- Montana law calls for either compensation or authorization of additional local taxation to cover the additional costs; and

-- Alaska, Louisiana, Maine and Pennsylvania have constitutional provisions calling for local reimbursement limited to certain types of state mandates.

Fiscal Notes

One step in the direction of state reimbursement is the provision of fiscal notes on state legislation. Fiscal notes estimate the effect on the expenditures or revenues of a local government of implementing or complying with a proposed state law, joint resolution, regulation, rule, order, or administrative action. These notes can serve as a brake on state legislative activity affecting local governments and provide information for both legislators and local representatives on the effect of state law on localities.

Presently, 25 states provide some type of formal procedures for attaching fiscal notes to pending legislation affecting state finances. These procedures vary considerably in their comprehensiveness and applicability. They generally do not extend to agency rules or governor's orders and are not tabulated at the end of the fiscal year.

In 1978, four states enacted fiscal note procedures covering proposed legislation affecting local governments: Connecticut, Georgia, Nevada, and Rhode Island. South Carolina established a fiscal note procedure in both houses of the legislature by rule. Wisconsin and Missouri provided for fiscal notes to be attached to proposed administrative rules and regulations affecting local governments.

Fiscal notes have recently become especially important because more local governments have begun asking for, and more states have begun providing, reimbursement for state mandated programs and services.

Recent State Activity

In this Bulletin, we will look at the state mandating/fiscal note processes in three states: California, Florida and Montana.

California

California's statutes are the most comprehensive of the existing state laws on state reimbursement for mandated costs imposed on local governments. Chapter 1406 of the California statutes of 1972, better known as SB 90, requires that local governments be reimbursed for costs incurred in providing state-mandated services. SB 90 imposed property tax limits on local governments as part of the state's response to Serrano v. Priest, a landmark California Supreme Court case which held that the state's school finance system was unconstitutional under the state's equal protection clause because it made the quality of education a function of local school district's taxable wealth.

The state's commitment to reimburse encompasses local costs that result from new state-mandated programs, increased service levels, and costs previously incurred at local option that have been subsequently mandated by the state. State administrative or executive orders mandating local costs are also to be reimbursed.

To be exempt from SB 90's reimbursement requirements, legislation must contain a disclaimer describing the rationale for nonreimbursable status. Problems have arisen with the initial use of disclaimers, mainly because a 2/3 vote of the legislature is required for all appropriations legislation to be approved. This provides an incentive to determine some reason for a disclaimer. In the first five years of the program, only 76 of the 1,400 bills that imposed state mandates contained appropriations to reimburse local governments. Some disclaimers were based on negligible cash cost to the local governments. Other bills containing disclaimers gave no reason for the exemption.

The legislative council's office identifies bills containing mandates and they are sent to the Local Mandated Program Unit where an estimate of the costs to localities is prepared. If a disclaimer is attached, the bill is sent to the Finance Committee which approves or disapproves the disclaimer.

In 1977 California enacted legislation to deal with many of the problems that have arisen in the wake of SB 90. The legislation changed the minimum threshold for submission of claims by local governments, expanded the grounds for appeal for reimbursement, and required the California Department of Finance to review all non-reimbursed statutes adopted after 1972. Most importantly, local governments are given the right to appeal bills that mandate costs but which contain either a disclaimer or no appropriation.

Florida

In 1978 Florida enacted a bill stating that any statute requiring "municipalities or counties to administer any program or provide any service or facility [to] include an economic impact statement estimating total costs and [to] provide a method of financing such program or service." The measure requires the legislature to finance activities, services, or facilities when both state and local objectives are being served. General laws under which the required expenditure of additional local funds is incidental to the main purpose of the law are exempted.

Reimbursement can be provided by one of three methods: additional state funds, specific authority to the county or municipality to levy a special tax, or through other sources provided by law. Other state or federal revenues shared with or granted to municipalities or counties are not to be reduced, supplanted, or adversely affected because of this reimbursement.

This act can be superceded or modified by subsequent legislation only when the legislation states specifically that it is so doing, and a reason for the change is stated.

Montana

Montana's legislature passed state mandating legislation in 1974. The law requires the state to authorize local governments to increase local tax levies or provide state funding for the mandate. Any law intended to require local governments to exceed their statutory levy authority can be vetoed by local governments. However, the law does not apply to expenses incurred by local governments that are incidental to the main purpose of the law.

The Montana experience has been uneven so far. Although most of the legislation passed since 1974 has included a statement to the effect that local governments may pay for mandates with money from general funds, in March 1976 the Montana Attorney General ruled that additional taxing authority was not conferred on local governments. Therefore, where an all purpose levy is used, the 65 mill limit cannot be exceeded. Jurisdictions have been told, however, they can abandon the all purpose levy and utilize separate levies until the legislature either raises the limit or exempts additional functions from inclusion in the all purpose levy.

The problems caused by this Attorney General's decision have caused Montana's reimbursement system to be unacceptable to many local governments. Until the legislature works out these mandate funding problems, there will continue to be state expansions into the local government arena without sufficient compensating funding.

State Mandates and Fiscal Notes - A Model

The Advisory Commission on Intergovernmental Relations has reviewed the status of state mandating across the country and the problems associated with this practice, and has made a number of

recommendations 2/ for remedial action. In order to facilitate state consideration of these recommendations, the Commission has drafted a model bill on state mandates based upon the California statute, which requires that state mandates legislation contain appropriations to pay for the cost of new programs or expanded service levels or increased personnel or retirement benefits. A catalog of mandates is to be completed, by the state and an appeals procedure for inadequate funding should be put in place.

An ACIR model bill, on fiscal notes, based on Arkansas and Maryland statutes, requires an explicit note on the financial impact of state legislative action on local governments to be included with a bill during its movement through the legislature.

The two model bills were drafted as part of the "State Initiatives in Local Financial Management Capacity-Building Project" underway at the Commission thanks to a grant by the Department of Housing and Urban Development. A package of 19 model financial management bills has been drafted. Taken as a whole, these bills suggest an approach to state-local relations that would give greater freedom to local governments while providing more consistent and better defined state assistance. The package of bills is available from ACIR, 1111 20th Street, N.W., Washington, D.C. 20575.

4.103 Legislative Notes on The Fiscal Impact on Local Governments Of State Legislative Action[1]

State legislative action often affects the expenditures and revenues of state government and local governments. The attachment of estimates of such costs (fiscal notes) to bills as they move through the legislative process assures a legislator's knowledge of the fiscal impact of the new or expanded programs being authorized or the requirements being imposed. It also enables interested citizens to fix responsibility for increased governmental costs and taxes. The Advisory Commission on Intergovernmental Relations, therefore, has recommended that, as a counterpart of a package providing citizens complete information about fiscal affairs, states include, with all major state legislation and proposed administrative regulations affecting local government revenues or expenditures, an explicit note setting out the fiscal impact on those local governments of the legislation or regulations.

The great majority of states provide some formal or informal procedure for attaching fiscal notes to pending legislation affecting state finances. Only 22, however, apply a similar procedure for legislation affecting local governments. Among the latter, only nine require the procedure as a matter of statutory law, most such fiscal note procedures have been established by joint rules of the legislature. Moreover, very few states require the attachment of fiscal notes to proposed administrative rules or regulations.

Attachment of fiscal notes adds a new dimension to the legislative process—an increased sense of responsible questioning and examination on the part of state legislators. With knowledge of the estimated cost of proposed legislation, they must accept responsibility for their acts. The taxpaying public is bound to benefit—either in tax savings or in more considered public programs, or both.

As states move toward reimbursement of local governments for mandated programs, the attachment of fiscal notes becomes an essential part of any such procedure. The fiscal note will provide a basis for estimating the cost of such reimbursement and then initiating the actual reimbursement process.[2]

The following suggested legislation requires that fiscal notes be attached to legislation or administrative actions affecting local governments. It comprises a full fiscal note procedure and can be made to apply to legislation affecting state government. States that already have adequate state fiscal note legislation may simply wish to use the applicable local government provisions as amendatory to their present statutes. Requiring fiscal notes on legislation affecting local governments may also be handled through legislative rules or resolutions, rather than by statute.

The suggested bill is based on Arkansas and Maryland statutes (Act 221, 1977 Session, and An-

[1]Derived from ACIR, *State Limitations on Local Taxes and Expenditures*, A-64, Washington, DC, U.S. Government Printing Office, February 1977; and *State Mandating of Local Expenditures*, Report A-67, Washington, DC, U.S. Government Printing Office, September 1977.

notated Code, Art. 40, secs. 63-7-A, respectively).

Section 1 states the title of the act.

Section 2 states the findings and purpose of the legislation.

Section 3 defines a fiscal note.

Section 4 requires that fiscal notes be attached to all bills and resolutions with a fiscal impact on local governments.

Section 5 provides a parallel requirement for administrative rules and actions.

Section 6 specifies the information to be contained in a fiscal note.

Section 7 designates the official responsible for preparing the fiscal note or for determining that a fiscal note is not necessary and directs the official to obtain the advice and assistance of local government officials, when appropriate.

Sections 8 and 9 provide for revision of notes and replacement of waivers with notes if bills and resolutions are amended to change their fiscal impact.

Section 10 requires that fiscal notes be made available for public inspection.

Sections 11 and 12 are separability and effective date clauses.

[AN ACT REQUIRING THE ATTACHMENT OF FISCAL NOTES TO PROPOSED LEGISLATION AFFECTING LOCAL GOVERNMENT FINANCES]

(Be it enacted, etc.)

SECTION 1. *Short Title.* This act may be cited as the "[*State*] Local Government Fiscal Notes Act."

SECTION 2. *Findings and Purpose.*

(a) The [*legislature*] finds that many [local political subdivisions] of this state are adversely affected by the fiscal effects of rules, orders of regulatory bodies, and acts of the [*legislature*]. In many instances, neither the [*legislature*] nor the affected local governments are fully aware of the extent of the fiscal consequences of proposed laws or administrative actions. The [*legislature*] finds also that awareness on the part of legislators and interested citizens of the fiscal impact of proposed administrative actions and laws can result in tax savings or in more considered programs, or both.

(b) It is the purpose of this act to require the attachment of a fiscal note to each proposed law, joint resolution, regulation, rule, order, or administrative law presumed to have a fiscal impact on the [local political subdivisions] of this state.

SECTION 3. *Fiscal Note Defined.* For purposes of this act, "fiscal note" means a realistic statement of the estimated effect on the expenditures or revenues of [local political subdivisions] of implementing or complying with a proposed law, joint resolution, regulation, rule, order, or administrative law.

SECTION 4. *Fiscal Note Required on Legislation.* Before any vote is taken in a committee of the [*legislature*] or on the floor of [*either house*] thereof, on any bill or joint resolution affecting the expenditures or revenues of a [local political subdivision], a fiscal note shall be filed with the chairman of the committee to which the bill or resolution was referred and the [*chief clerk of each house*]. Any representative of any [local political subdivision] requesting a copy of the fiscal note shall be furnished with a copy immediately upon request. The sponsor of the bill or resolution shall be responsible for causing copies of the fiscal note to be furnished as required by this act.

SECTION 5. *Fiscal Note Required on Administrative Actions.* No regulation, rule, order, or administrative law, or amendment to an existing regulation, rule, order, or administrative law which would affect the expenditures or revenues of any [local political subdivision] in this state shall be valid, unless 30 days prior to its adoption by the board, commission, agency, department, officer, or other authority of the government of the [*insert state*], except the [legislature, the courts, and the

Governor], such board, commission, agency, department, officer, or other authority shall file a fiscal note with the [*secretary of state*]. Any [local political subdivision] that will be affected by the proposed regulation, rule, order, administrative law, or amendment thereto shall, upon request, immediately be furnished with a copy of the fiscal note by the board, commission, agency, department, officer, or other authority.

SECTION 6. *Contents of Fiscal Note.* A fiscal note shall contain an estimate of the effect of the bill, joint resolution, or administrative action on the expenditures or revenues of [local political subdivisions] for the fiscal year in which the bill, joint resolution, or administrative action would become effective if enacted and for the next [four] succeeding fiscal years. If the effect of the bill, joint resolution, or administrative action is not expected to be totally evident within the applicable period, the estimate shall be projected beyond that period to include an estimate for the first fiscal year in which it is expected to be fully effective.

SECTION 7. *Preparation of Note or Waiver.* The [*chief fiscal officer*][1] [*legislative research director*] shall have the fiscal note prepared by his office or by other departments or agencies of state government. Where appropriate, he shall seek the advice and assistance of local government officials or their representatives. A waiver of the fiscal note shall be prepared by the [*chief fiscal officer*] [*legislative research director*] for any bill, joint resolution, or administrative action that does not have a direct effect upon the revenues or expenditures of [local political subdivisions]. If the fiscal note is not prepared by the [*chief fiscal officer*] [*legislative research director*], the department or agency of state government preparing the fiscal note shall be clearly indicated on the fiscal note along with the signature of the [*chief fiscal officer*] [*legislative research director*] or his authorized representative indicating that the [*chief fiscal officer*] [*legislative research director*] agrees with the fiscal impact estimate thereon.

SECTION 8. *Revision of Note.* A fiscal note that is attached to a bill or joint resolution shall be revised if an amendment is adopted that changes the fiscal effect of the bill or joint resolution, unless this requirement is waived by [the chairman of the committee to which the bill was referred,] the [*president of the senate*] or the [*speaker of the house*]; provided, however, that such waiver shall apply only to technical changes. The revised fiscal note shall be processed by the [*chief fiscal officer*] [*legislative research director*] and returned as quickly as possible to the committee, or the clerk of the [*house*], or [*secretary of the senate*] if one of the latter has the custody of the bill or joint resolution at that time.

SECTION 9. *Replacement of Waiver With Note.* A waiver of a fiscal note shall be replaced with a fiscal note if an amendment to a bill or joint resolution causes the bill or joint resolution to have an ef-

[1]Either the chief fiscal officer of the executive branch or of the legislature may be designated.

fect upon the revenues or expenditures of [local political subdivisions].

SECTION 10. *Retention of Copy of Fiscal Note or Waiver; Inspection; Publication of Note or Waiver in Journals; Matter of Public Record.*

(a) A copy of each fiscal note or waiver of a fiscal note shall be retained by the [*chief fiscal officer*] [*legislative research director*], and be reasonably available for public inspection, for [at least three years following its preparation] [the duration of the program]. The fiscal note or waiver of a fiscal note attached to any bill or joint resolution shall be published in the [journal of each house of the [legislature] [session laws for the legislative session in which the act to which it applies is enacted].

(b) A fiscal note, upon being filed as herein provided, is a public record within the meaning of the [*cite state freedom of information act*]

SECTION 11. *Separability.* [*Insert separability clause.*]

SECTION 12. *Effective Date.* [*Insert effective date.*]

4.116 State Mandates*

The constitutional fact of state supremacy over local governments—the latter being "creatures of the state"—provides the legislature and the courts with authority to issue directives to these local units. State-initiated mandates can be defined to include any state constitutional, statutory, or administrative action that places new fiscal or administrative requirements on local governments. While other definitions might be possible, no matter what definition is used, the main problem raised by mandates is that added costs are imposed on local government officials. Stated simply, state mandates substitute state objectives for local priorities.

Because of the imposed restrictions on local autonomy, few issues create more resentment among local officials than state mandates. While it is necessary that state governments have wide latitude in establishing statewide policies and programs, there is a substantial controversy on how far states should move into certain areas. The real question becomes: Can state mandates be sufficiently differentiated between an "appropriate" mandate, and an "inappropriate" mandate?

The use of mandates has increased in recent years for two notable reasons. First, state legislatures have been increasingly reluctant to raise state taxes in response to public demand for local services. Second, the courts have taken a more active role in ordering improvements in service standards. Consequently, state legislatures are sometimes tempted to mandate local service increases, with no state financing, and let local officials figure out how to pay for the mandates.

Several justifications are offered in defense of mandates: (1) to assure minimum statewide service levels or a more uniform level of service throughout the state; (2) to develop professional standards for employees; and (3) to implement state social or economic policy objectives.

It must be emphasized that there is little or no controversy over many state-initiated mandates, particularly those relating to the organization and procedures of local government. State mandates are justified to prescribe the form of local government, the holding of local elections, and the designation of public officers and their responsibilities. Due process and "safeguard-type" mandates are necessary to insure, for example, the equitable administration of justice and the tax laws as well as to protect the public from malfeasance. State mandates of a supervisory nature are also necessary to require localities to act or to refrain from acting so as to avoid injury to, or conflict with, neighboring jurisdictions.

Despite the controversy and interest in the mandating issue, there is still little information available on the scope of the practice. However, results of an ACIR survey indicate that among the most commonly mandated functions are special education

*Derived from ACIR, *State Mandating of Local Expenditures*, A-67, Washington, DC, U.S. Government Printing Office, September 1978; ACIR, *Labor Management Policies for State and Local Government*, A-35, Washington, DC, U.S. Government Printing Office, September 1969; ACIR, *The Role of the State in Strengthening the Property Tax*, A-17, Washington, DC, U.S. Government Printing Office, June 1963; and ACIR, *State-Local Taxation and Industrial Location*, A-30, Washington, DC, U.S. Government Printing Office, April 1967.

programs (45 states) and solid waste disposal standards (45 states). Workmen's compensation (for local personnel other than police, fire, and education) programs are mandated in 42 states, while various provisions of retirement systems are mandated in 35 or more states. Most controversial, however, are state mandates that extend to traditionally local programs—park and recreational activities, for example.

State controls over, and mandates upon, local governments are manifested in constitutional and statutory provisions and in judicial interpretations thereof. Some state constitutional provisions and state legislation are enacted for the purpose of restraining such state mandates. For example, four state constitutions—Alaska, Louisiana, Pennsylvania, and Tennesse—limit the power of the state legislature to impose mandates upon local governments.[1] But the Pennsylvania provision, after disavowing interference with internal affairs proceeds to mandate binding arbitration of firemen and policemen.[2]

Proponents of the constitutional approach argue that this is surest way to protect local autonomy. The constitutional amendment is preferable, they argue, because state statutes cannot bind future legislatures. On the other hand, opponents of constitutional restrictions stress that this approach removes the flexibility state legislatures need to meet unforeseen future demands swiftly and decisively.[3] Opponents also note that the constitutional route is slower than statutory action.

A third position advocates a constitutional provision which requires a two-thirds vote of both houses of the legislature before the state legislature may mandate local government expenditures without offsetting state financial aid. This provision is supported in some states on the ground that the proposed procedure is in conformity with the authorization procedure contained in the existing home rule amendment allowing the state legislature by a two-thirds vote to pass a special law, provided the Governor has recommended passage of the law.

Besides the constitutional provisions, some states have adopted statutes which require state compensation for future mandated local costs or revenue losses, or both.[4] To date, the California statutes are the most comprehensive of the existing state laws on state reimbursement for mandated costs to local government. Under the terms of Chap. 1406, 1972, California statutes adopted the principle of reimbursing local governments for the costs incurred in providing state-mandated services. The reimbursement provision is broad in scope and intent, but it should be noted that such reimbursement applies only to subsequent mandates, and not retroactively. The state government commitment to reimburse is not limited to specific areas of governmental activities; rather, it encompasses local costs that result from (1) new state-mandated programs; (2) increased service levels mandated for existing pro-

[1] *Constitution of the State of Alaska*, art. II, sec. 19, provides that "local acts necessitating appropriations by a political subdivision may not become effective unless approved by a majority of the qualified voters voting thereon in the subdivision affected." The constitution also forbids a political subdivision to contract a debt "unless authorized for capital improvements by its governing body and ratified by a majority vote of those qualified to vote and voting on the question." *Constitution of the State of Louisiana*, art. VI, sec. 14, provides that "No law requiring increased expenditures for wages, hours, working conditions, pension and retirement benefits, vacation, or sick leave benefits of political subdivision employees, except a law providing for civil service, minimum wages, working conditions and retirement benefits for firemen and municipal policemen, shall become effective until approved by ordinance enacted by the governing authority of the affected political subdivision or until the legislature appropriates funds for the purpose to the affected political subdivision and only to the extent and amount that such funds are provided." Art. II, sec. 24, of the *Tennessee Constitution* provides in part: "Laws imposing increased expenditures on local governments must provide method of funding, and, in case of bills of general application, provide state share in the cost."

[2] Art. III, sec. 31, of the *Constitution of the Commonwealth of Pennsylvania* provides: "The General Assembly shall not delegate to any special commission, private corporation or association, any power to make, supervise or interfere with any municipal improvement, money, property or effects, whether held in trust or otherwise, or to levy taxes or perform any municipal function whatever. Notwithstanding the foregoing limitation or any other provision of the Constitution, the General Assembly may enact laws which provide that the findings of panels or commissions, selected and acting in accordance with law for the adjustment or settlement of grievances or disputes or for collective bargaining between policemen and firemen and their public employers shall be binding upon all parties and shall constitute a mandate to the head of the political subdivision which is the employer, or to the appropriate officer if the Commonwealth is the employer, with respect to matters which can be remedied by administrative action, and to the lawmaking body of such political subdivision or of the Commonwealth, with respect to matters which require legislative action, to take the action necessary to carry out such findings."

[3] In reviewing the draft legislation, states will need to consider whether a constitutional amendment is necessary to make the legislation workable.

[4] *Revised Codes of Montana, Annotated*, sec. 43-517, provides that "Any law enacted by the legislature after July 1, 1974, which requires a local government unit to perform an activity or provide a service or facility which will require the direct expenditure of additional funds must provide a means to finance the activity service or facility." And further, that "the local government unit may refuse to administer or enforce any law which does not comply with the requirements of the section if that law requires any expenditure that would require the local government unit to exceed its statutory levy authority."

grams; and (3), by amendment, costs previously incurred at local option that have subsequently been mandated by the state. Mandated local costs arising from state administrative or executive orders are also to be reimbursed.

In drafting its recommended model bill, ACIR has concentrated on the reimbursement principle and suggests that it constitutes the core of any legislative proposal. The ACIR policy on state mandates rests on the belief that states mandating either new programs or increases in service levels, or personnel and retirement benefits should share in the cost that these programs impose on local governments.

The first step necessary to come to grips with the state mandating problem is a catalog or inventory of existing state mandates. The legislative or executive branch, or both jointly, should define and then catalog existing state-initiated mandates originating by legislation, executive order, or administrative rule and regulation. All state-initiated mandates adopted in the future should be added to the catalog, and the estimated costs imposed on local governments by all new mandates should be tabulated at the conclusion of each legislative session. After a catalog is created, the same reviewing body should categorize these mandated programs so that they may be fit into proper categories for reimbursement as discussed later. Most importantly, the catalog provides the indispensable first step necessary to rationalize mandates in terms of current policy concerns. (Some states may wish to institute some "sunset" procedure for mandates, once an accurate listing has been obtained.)

Secondly, to accomplish these policy objectives, state statutes should provide procedures and formulas for partial or full reimbursement to local governments, depending upon the category of the mandate. Drawing from the California statute, the following draft bill provides certain safeguards: (a) a fiscal note process to evaluate the cost of all mandates, and (b) a strict interpretation of state-initiated mandates.

Finally, in recognition of the potential for disagreement between state and local units of government as to the costs imposed by state-initiated mandates, the draft bill provides for an appeal and adjustment procedure through a state agency designated to resolve local governments' claims arising from inadequate state funding of the reimbursement provisions. Optional provisions are included to give the local government units the right to refuse to carry out a mandate not in compliance with the reimbursement policy and to appeal to the courts once administrative procedures have been exhausted.

Section 1 gives the short title of the bill.

Section 2 serves as a policy statement for the bill, including the recognition that state mandates have often produced confusing, inconsistent, and inequitable relationships between the state government and its local political subdivisions, and that to correct these problem areas a review of existing mandates should be undertaken with an eye to developing corrective actions to produce a consistent and equitable framework of state-local relations.

To establish a uniform basis for sifting through the historical record, the term "mandate" must be defined. *Section 3* of the bill defines a state mandate and the various categories of mandates. A broad rather than narrow definition is preferable in providing a basis for differential treatment of various types of mandates.[5] These definitions serve as a necessary prerequisite to any cataloging or reimbursement procedure, and constitute a first step of a review process of state mandates.

Section 4 of the suggested legislation calls for the legislative or executive branch, or both jointly, to catalog and publish descriptions of existing state-initiated mandates originating by legislation, executive order, or administrative rule and regulation. State mandates which are a result of federal legislative, executive, and court initiatives are also to be included in the catalog with appropriate annotation, as are all future state-initiated mandates. The estimated costs of all new state mandates imposed on local governments are to be tabulated at the conclusion of each legislative session.

Section 4 provides further that the catalog should indicate to which local government unit or official the mandate is directed, whether or not direct costs are attributable to the mandate and what those costs are, the extent of state financial participation in the mandate, and a description of the mandate and its source.

Section 5 requires that, in addition to any statutory requirements for evaluating the fiscal impact of proposed mandates, the state legislature and executive branch adopt, either by statute or rules of procedure, provisions for a statement of the statewide policy objective or objectives that require or justify the imposition of the proposed requirement upon the local government. The premise underlying this re-

[5] If the definition of mandates in general is narrowed at the outset, the door is closed to obtaining a complete inventory of mandates in effect and a subsequent delineation of "justified" and "unjustified" mandates.

quirement is that a good deal of irritation and friction concerning state-mandated costs imposed on local governments stem from the failure to articulate clearly the statewide policy objective.

Section 6 specifies the reimbursement share to be paid by the state government to the local unit for each category of mandate defined in *Section 3* of the bill. Briefly, subsection (b) calls for at least a 50% reimbursement of service mandates. Subsection (c) calls for a 100% reimburse nent of the loss of local revenue directly attributable to a mandated classification or exemption of property for purposes of ad valorem property taxation. Subsection (d) calls for reimbursement of personnel mandates to the full extent of increased costs incurred by local governments directly attributable to the mandate, with a few exceptions. Subsection (e) calls for a 100% reimbursement of local governmental costs directly attributable to a mandated increase in public employee retirement benefits. It should be noted that reimbursements are to be paid only for mandates effective subsequent to the effective date of this legislation.

Finally, subsection (a) of *Section 6* expressly relieves the state of reimbursement liability for mandates dealing with the organization and structure of local government, matters of due process, and interlocal equity as defined in *Section 3* of the bill. Subsection (f) provides that any proposal which creates or enlarges a state mandate shall bear either a proposed authorization for appropriation of an amount necessary for reimbursement or a disclaimer from reimbursement liability, stating the specific reason for such exclusion as provided in *Section 9*(a).

Section 7 deals with the situation where the state also places a lid on local expenditures or taxes and calls for local government units to have the authority necessary to levy taxes beyond the general limitations on local government taxes or expenditures when mandates are not reimbursed. As a practical matter, this authority can be restricted to those local costs that exceed $5,000 or 1% of the local operating budget. In this way, the financial bind of local officials will be eased while the state policy will be coordinated through a reconciliation of program objectives and the desire to restrain local government tax and expenditure growth.

Section 8 calls for the state agency charged with oversight of mandates to complete and submit to the Governor and the legislature, within three months of the publication of the catalog prescribed in *Section 4*, a review and report on mandates existing prior to the effective date of the act. This report is to include but not be restricted to matters relating to the history of the mandate, its costs, and extent of state reimbursement and whether the mandate continues to meet a statewide policy objective and whether reimbursement should be undertaken. The report is to include any other information or recommendations which the agency considers pertinent. The objective of this required review would be to highlight those mandates that no longer meet a current statewide policy objective, and at the same time to uncover mandates that continue to meet current statewide policy but need to be strengthened or changed if they are to be effective.

Once it has been determined that reimbursement is a desirable statewide policy, a mechanism for reviewing reimbursement applications and for paying reimbursements to the local unit must be established. *Section 9* of the bill sets forth this procedure. First, however, subsection (a) expressly lists several circumstances which shall exclude the state from reimbursement liability. Basically, these circumstances are those which impose little recognizable new duty on the local government, or impose only minimal new costs, or those which impose additional costs but also provide offsetting savings. Additionally, subsection (a) enables the legislature to disclaim reimbursement liability for a unique or compelling policy reason, provided the reason is stated within the proposed act establishing the mandate.

Subsections (b) and (c) of *Section 9* provides the procedures necessary for an estimation of reimbursement costs, application for reimbursement, and a disbursement procedure. Most importantly, subsection (b) calls for an estimate of mandated costs to be prepared by an agency of the state executive branch after consultation with the affected local government unit and for the estimate to be submitted to both houses of the legislature before consideration of the proposal. Subsection (c) calls for the local governmental unit affected by the mandate to submit an application for reimbursement with estimated costs within 60 days of its effective date, and for an agency of the executive branch to review this application and forward the application upon approval to the appropriate agency for reimbursement or to the legislature for a direct appropriation to the local units of government. It should be noted that all reimbursement procedures are subject to the right of the state to audit the records of any local government to verify the actual costs of the mandate and make changes if necessary. Subsection (d) of *Section 9* provides the local unit with the authority needed to appeal any adverse reimbursement decision to a designated state agency.

States having a general revenue sharing or per

capita aid program for local governments will arcady have established procedures for executive review, appeal, and reimbursement that can be adapted to accommodate mandate reimbursement application, review, and adjudication.

Some states may desire to make reimbursements a funtion of the legislature, through annual appropriations to the individual local units, following receipt of a recommended reimbursement schedule from the executive branch.

Recognizing that such an administrative appeals process may not be sufficient in some cases, an optional *Section 9* is included in the draft legislation calling for local governmental units to have the right (a) to initiate court action when the local unit feels there has been inadequate reimbursement or an improper decision as to whether a proposal involves state-mandated costs, or to enjoin the effect of the mandate until funds are available; and (b) to refuse to comply with the mandate.

[AN ACT RELATING TO STATE MANDATING OF LOCAL GOVERNMENT EXPENDITURES, SERVICES, STANDARDS, EMPLOYMENT CONDITIONS, AND RETIREMENT BENEFITS]

(Be it enacted, etc.)

SECTION 1. *Short Title.* This act may be cited as "The State Mandates Act."

SECTION 2. *Findings and Purpose.*

(a) The [*legislature*] finds that preceding actions of the state government in specifying the manner, standards, and conditions under which public services are rendered to citizens by the political subdivisions of this state on occasion have not resulted in equitable relationships between the state government and its local political subdivisions. Some of these actions have dealt in detail with the internal management of local governments, others have specified the establishment of new services and facilities without providing any new revenue sources or any financial participation by the state in meeting the additional costs; still others have specified the adoption of higher service standards without a full assessment of the impact upon local expenditures and tax rates.

(b) It is the purpose of this act

(1) to provide for the collection and periodic publication of information on existing and future state and federal mandates;

(2) to enunciate policies, criteria, and procedures to govern any future state-initiated specification of local government services, standards, employment conditions, and retirement benefits that has the effect of necessitating increased local government expenditures in such a way as to accommodate the constitutional obligations of the state government in addressing problems of statewide concern, while avoiding the imposition of state standards upon essentially local responsibilities without appropriate reimbursement or other appropriate fiscal participation on the part of the state government; and

(3) to provide for a review of existing mandates and an identification of the nature and magnitude of corrective actions needed to produce a consistent and equitable framework of state-local relations regarding mandated services, standards, and expenditures.

SECTION 3. *Definitions.*

(a) "Local government" means a city, [municipality,] county, township, town, [borough, village,] school district, or special district.

(b) "State mandate" means any state-initiated constitutional, statutory, or executive action that requires a local government to establish, expand, or modify its activities in such a way as to necessitate additional expenditures from local revenues, including any order issued by a state court except judgments in

eminent domain condemnation and tort liability proceedings, or proceedings relating to local government performance or nonperformance under any contract or agreement. State mandates may be reimbursable or nonreimbursable as provided in this act.

(c) "Local government organization and structure mandate" is a state mandate concerning such matters as

(1) the form of local government and the adoption and revision of local government charters,

(2) the establishment of multicounty districts, councils of governments, or other forms and structures for interlocal cooperation and coordination;

(3) the holding of local elections;

(4) the designation of public officers, and their duties, powers, and responsibilities; and

(5) the prescription of administrative practices and procedures for local governing bodies.

(d) "Due process mandate" is a state mandate concerning such matters as the

(1) administration of justice,

(2) notification and conduct of public hearings,

(3) procedures for administrative and judicial review of actions taken by local governing bodies, and

(4) protection of the public from malfeasance, misfeasance, or nonfeasance by local government officials.

(e) "Benefit spillover" is the process of accrual of social or other benefits from a governmental service to jurisdictions adjacent to, or beyond the jurisdiction providing the service.

(f) "Service mandate" is a state mandate as to creation or expansion of governmental services or delivery standards therefor and those applicable to services having substantial benefit spillover and consequently being wider than local concern; for purposes of this act, applicable services are

(1) elementary and secondary education,

(2) community colleges,

(3) public health,

(4) hospitals,

(5) public assistance,

(6) air pollution control,

(7) water pollution control,

(8) solid waste treatment and disposal,

(9) non-local public transportation, and

(10) [*other statewide or non-local services for which the state might be expected to establish levels or delivery standards.*]

A state mandate that expands the duties of a public official by requiring the provision of additional

services is a "service mandate" rather than a "local government organization and structure mandate."

(g) "Interlocal equity mandate" is a state mandate requiring local governments to act so as to benefit other local governments or to refrain from acting to avoid injury to, or conflict with, neighboring jurisdictions, including such matters as

(1) land use regulations,

(2) tax assessment procedures for equalization purposes, and

(3) environmental standards.

(h) "Tax exemption mandate"[1] is a state mandate that exempts privately owned property or other specified items from the local tax base, such as

(1) exemption of business inventories from the local property tax base, and

(2) exemption of food or medicine from the local sales tax.

(i) "Personnel mandate" is a state mandate concerning or affecting local government

(1) salaries and wages,

(2) employee qualifications and training (except when any civil service commission, professional licensing board, or personnel board or agency established by state law sets and administers standards relative to merit-based recruitment of candidates for employment or conducts and grades examinations and rates candidates in order of their relative excellence for purposes of making appointments or promotions to positions in the competitive division of the classified service of the public employer served by such commission, board, or agency).

(3) hours, location of employment, and other working conditions, and

(4) fringe benefits including insurance, health, medical care, retirement and other benefits.

SECTION 4. *Collection and Maintenance of Information Concerning State Mandates.*

(a) The [department of community affairs] [state comptroller] [*other agency in the executive branch of state government*] [*committee, agency, or office of the legislature*] shall be responsible for

(1) collecting and maintaining information on state mandates, including such information as may be required for effective implementation of the provisions of this act;

(2) reviewing local government applications for reimbursement submitted pursuant to this act;

(3) hearing complaints or suggestions from local governments and other affected organizations as to existing or proposed state mandates; and

(4) reporting periodically to the Governor and [*legislature*] regarding the administration of provisions of this act and changes proposed thereto.

(b) (1) Within [12 months] following the effective date of this act, the [*head of state agency*

[1]See suggested legislation *State Compensation Programs for State-Owned Property.*

specified in subsection (a) above] shall collect and tabulate relevant information as to the nature and scope of each existing state mandate, including but not necessarily limited to

(i) identity of type of local government and local government agency or official to whom the mandate is directed;

(ii) whether or not an identifiable local direct cost is necessitated by the mandate and the estimated annual amount;

(iii) extent of state financial participation, if any, in meeting such identifiable costs;

(iv) state agency, if any, charged with supervising the implementation of the mandate;

(v) a brief description of the mandate and a citation of its origin in statute or regulation.

(2) The resulting information shall be published in a catalog [available to legislators, state and local officials, and interested citizens]; as new mandates are enacted they shall be added to the catalog, and at the conclusion of [*each annual or biennial session of the legislature or other specified time*] the [*state executive or legislative agency*] shall list each new mandate enacted at the preceding legislative session, and the estimated additional identifiable direct costs, if any, imposed upon local governments.[2] A revised version of the catalog shall be published every [five] years, beginning with the publication date of the initial version.

(3) Information comparable to that described in subsection (1) above shall be collected by [*state agency*] regarding federal legislative, executive, and judicial mandates and shall be included in the initial and subsequent versions of the catalog.[3]

SECTION 5. *Specification of State Policy Objective.*

(a) Subsequent to the effective date of this act, any proposal for legislation submitted by the executive branch of the state government, any bill filed for introduction by a member of the [*legislature*], and any committee print of a new or amended bill that has the effect of creating or enlarging a state mandate upon local government as defined in Section 3(b) of this act shall include, in addition to the estimated additional costs to the affected local governments as provided under [*citation of any statute(s) requiring the attachment to proposed legislation of notes on local government fiscal impact*], a statement of the statewide policy objective or objectives that require or justify the imposition of the proposed requirements upon local government and the extent to which such policy objectives or objective cannot be achieved in the absence of such proposed requirements.[4]

(b) Subsequent to the effective date of this act, any executive order or administrative regulation

---

[2]See suggested legislation *Legislative Notes on the Fiscal Impacts on Local Governments of State Actions*. Also a provision might be included for differentiating between initial or first-year costs and subsequent annual operating costs.

[3]Federal mandates are so numerous and complex that states may wish to confine catalog coverage to certain major or other selected categories.

[4]In some states the substance of this subsection would be provided in the legislature's rule of procedure rather than by statute, at least with regard to the responsibilities imposed upon individual members or committees; alternatively such a rule might provide that consideration of a mandate bill would not be in order, absent the required statement of policy objective.

that creates or enlarges a mandate as defined in Section 3(b) of this act shall include a statement of the statewide policy objective or objectives as specified in subsection (a) above.

SECTION 6. *State Reimbursement to Local Government for Increased Costs Arising from Certain State Mandates.*

(a) Any increased costs accruing to local governments as a direct result of mandates dealing with the organization and structure of local government, due process mandates, and interlocal equity mandates as defined in subsections (c), (d), and (g) respectively, of Section 3 above, are not reimbursable by the state.

(b) At least [50%], but under no circumstances more than [100%] of the increase in costs of a local government directly attributable to a service mandate as defined in Section 3(f) enacted legislatively or established administratively subsequent to the effective date of this act shall be reimbursed by the state unless there is in existence at the time of such enactment a program of state aid for the service affected by the mandate whereunder the non-local share for any participating local government is [50%] or greater and where the increased costs arising under the mandate constitute allowable expenditures under the aid program. Where all or part of the increased costs are met through federal or other external aid, only the net increase to the local government shall be included in the base against which the amount of state reimbursement is to be computed.

(c) [100%] of the loss in revenue of a local government directly attributable to a mandated classification or exemption of property for purposes of ad valorem property taxation enacted subsequent to the effective date of this act shall be reimbursed by the state. The loss of revenue does not include potential revenue from property of a type which was not being assessed and taxed on January 1, [*insert year in which this act is to be effective*].][5]

(d) Except for a state mandate that places a floor under retirement benefits or that affects personnel qualifications for local employees, the salaries and wages of which are partially or wholly financed under a state aid program, any personnel mandate as defined in Section 3(i) above enacted legislatively or established administratively subsequent to the effective date of this act shall be reimbursed by the state to the extent of increased costs incurred by local governments directly attributable to such mandate.

(e) All of the increased costs of a local government directly attributable to a mandated increase in public employee retirement benefits enacted subsequent to the effective date of this act [and which has the effect of elevating retirement benefits of local government employees above an adequate level—to

---

[5]States may wish to provide total or partial reimbursement in case of mandated exemptions of business inventories (see ACIR, *State Legislative Program*, Vol. 3, M-94, *State and Local Revenues*, 3.107, pp. 49-52, Washington, DC, U.S. Government Printing Office, November 1975). See suggested legislation, *State Compensation Programs for State-Owned Property*.

costs above a 75% takehome salary replacement] shall be reimbursed by the state.[6]

(f) Subsequent to the effective date of this act, any proposal for legislation submitted by the executive branch of state government, any bill filed for introduction by a member of the [*legislature*], and any committee print of a new or amended bill that creates or enlarges a state mandate of the type specified in subsections (b), (c), (d), and (e) above, shall bear either a proposed authorization for appropriation of an amount necessary to provide the reimbursement specified above or a disclaimer from reimbursement liability, stating the specific reasons for such exclusion, as provided in Section 9(a) below.

SECTION 7. *Exemption from State-Imposed Limits of Taxes* [*and/or Expenditures*] *of Local Governments of Revenues Needed to Meet Increased Costs Directly Attributable to State Mandates.*

Execution of state mandates as defined in this act is hereby declared a public purpose of affected local governments in the [*insert name of state*], and where the increased local costs directly attributable to any nonreimburseable mandate as provided in Section (6) above exceeds [$5,000] [1% of the operating budget of the local government], the excess may be included in the [property tax levy] [fiscal year's operating expenditure] above and beyond the limitations set forth in [*cite applicable statutory provision setting general limitations upon local government tax rates or levies or upon expenditures*].

SECTION 8. *Review of Existing Mandates.*

(a) Concurrently with, or within [three] months subsequent to the publication of a catalog of state mandates as prescribed in Section 4(b) above, the [*state agency charged with oversight of mandates in Section 4(a)*] shall submit to the Governor and the [*legislature*] a review and report on mandates enacted prior to the effective date of this act and remaining in effect at the time of submittal of the report.

(b) The report shall include for each mandate the following:

(1) the factual information specified in Section 4(b) for the catalog;

(2) extent to which the enactment of the mandate was requested, supported, encouraged, or opposed by local governments or their respective organizations;

(3) whether or not the mandate continues to meet a statewide policy objective or has achieved the initial policy intent in whole or in part;

(4) amendments if any required to make the mandate more effective;

(5) whether the mandate should be retained or rescinded;

(6) whether state financial participation in helping meet the identifiable increased local costs arising from the mandate should be initiated, and if so, recommended ratios and phasing-in schedules; and

---

[6] In many states most local government retirement benefits have already reached what are regarded as adequate levels among retirement and actuarial experts (e.g. 75%-80% take-home salary replacement after meeting length of service requirements); many are beginning to exceed this level amid increasing concern about the financial soundness of local retirement systems. Each state will need to develop its own definition of "adequacy" with any mandated enrichments over that level subject to full or partial state reimbursement.

(7) any other information or recommendations which the [*state agency*] considers pertinent.

[(c) Any mandate not renewed, revised, or dealt with otherwise by the [*legislature*] shall terminate at the end of three years following the publication of the initial version of the catalog prescribed in Section 4(b).][7]

[(d) The [*appropriate committee of each house of the legislature*] shall review the report and shall initiate such legislation or other action as it deems necessary.]

SECTION 9. *Exclusions, Reimbursement Application, Review, Appeals, and Adjudication.*

(a) *Exclusions.* Any of the following circumstances inherent to, or associated with, a mandate shall exclude the state from reimbursement liability under this act. If the mandate

(1) accommodates a request from local governments [or organizations thereof];[8]

(2) results in no new governmental duties, including legislation or regulation permissive in nature;

(3) provides only clarifying or conforming, nonsubstantive changes in an earlier statute or regulation;

(4) imposes additional duties of a nature which can be carried out by existing staff and procedures at no appreciable net cost increase;

(5) creates additional costs but also provides offsetting savings resulting in no aggregate increase in net costs;

(6) imposes a cost that is wholly or largely recovered from federal, state, or other external financial aid;

(7) imposes additional net costs of less than [$1,000 for a single local government or 1/10 of a mill on the statewide aggregate local property tax base].

Additionally, the [*legislature*] may exclude a mandate from reimbursement liability for a unique or compelling policy reason, such reason to be stated in the act establishing the mandate.

(b) *Reimbursement Estimation and Appropriation Procedure.*

(1) When a bill is introduced in the [*legislature*], the [*legislative counsel or other office of the legislature*] shall determine whether such bill requires reimbursement to local governments pursuant to this act. The [*counsel or office*] shall make such determination known in the digest of the bill.

In making the determination required by this subsection the [*legislative counsel*] shall disregard any

[7] If a state desires to initiate a "sunset" procedure for forcing attention to mandates already on the books, the procedure should follow that set forth in the state's general "sunset" law, if one exists, additionally the legislature might find it preferable in consideration of workload to exclude "form and structure" and "due process" mandates from the scope of "sunset."

[8] A state mandate that arises as a direct result of a legislative provision sought by local governments probably should not require reimbursement. The wording of this exclusion depends upon the structure and process that underlies state legislation on local government affairs in a given state including such factors as: the extent to which such matters are handled by general law or as special legislation targeted by name or narrow population class to one or a few local governments; the nature of the local governments' request in a specific instance; nature of testimony given in support of the legislation; degree of unanimity of support among the individual local governments; and the role of state organizations of city or county officials and the scope and nature of the process by which the organizations establish positions in support of or opposition to specific legislative bills.

provision in a bill which would make inoperative the reimbursement requirements of Section 6 above, and shall make the determination irrespective of any such provision.

(2) Whenever the [*legislative counsel*] determines that a bill will require state reimbursement to a local government as provided in Section 6, the [*department of finance or other executive branch fiscal agency*], after consultation with the [*department of community affairs or the state agency designated in Section 4 and subsequently*] shall prepare estimates of the amount of reimbursement which will be required.[9] Such estimates shall be prepared for the [*respective committees of each house of the legislature*] which consider taxation and appropriation measures and shall be prepared prior to any hearing on such a bill by any such committee.

(3) The estimate required by subsection (2) above shall be the amount estimated to be required during the first fiscal year of a bill's operation in order to reimburse local governments pursuant to Section 6, for costs mandated by such bill. In the event that the operative date of such a bill does not begin on the first day of [*state fiscal year*], the estimate shall also include the amount estimated to be required for reimbursement for the next following full fiscal year. In the event that a bill is amended on the floor of [*either house*], whether by adoption of the report of a conference committee or otherwise, in such a manner as to require reimbursement pursuant to this act, the [*legislative counsel*] shall immediately inform, respectively, the [*Speaker of the House and the President of the Senate*] of such fact. Such notification from the [*legislative counsel*] shall be published in the journal of the [*respective houses of the legislature*].

(4) For the initial fiscal year, reimbursement funds shall be provided as follows:

(i) any statute mandating such costs shall provide an appropriation therefor, and

(ii) any executive order mandating such costs shall be accompanied by a bill to appropriate the funds therefor, or, alternatively an appropriation for such funds shall be included in the executive budget for the next following fiscal year.

In subsequent fiscal years, appropriations for such costs shall be included in the [executive budget] and general or supplemental appropriation bills.

(5) The amount appropriated for such purposes shall be [appropriated to the [*state fiscal agency*] for disbursement]. [appropriated directly to the local units of government pursuant to subsection (c) below].

(c) *Reimbursement Application and Disbursement Procedure.*

(1) For the initial fiscal year during which reimbursement is authorized, each local government believing itself to be entitled to reimbursement under this act shall submit to the [*department of community affairs*] [*state fiscal agency*] [*other appropriate state officials or agency*], within [60] days of

---

[9]Where the legislature has provided a fiscal note procedure (as referenced in footnote to *Section 4(b)(2)* above), somewhat different wording may be needed.

the operative date of the mandate a claim for reimbursement accompanied by its estimate of the increased costs required by the mandate for the balance of the fiscal year. [*The department of community affairs*] [*or other state executive agency*] shall review such claim and estimate and forward them with its comments to the [*state fiscal agency*]]. The [*department of finance*] [*or appropriate state fiscal agency*] shall [pay such claims from the funds appropriated pursuant to subsection (b) above, provided that it may

(i) audit the records of any local government to verify the actual amount of the mandated cost, and

(ii) reduce any claim determined to be excessive or unreasonable.] [submit to the [*legislature*] a schedule of recommended appropriation to respective units of local government.]

(2) For the subsequent fiscal years, local governments shall submit claims as specified above on or before [*date*] of each year. The [*state fiscal agency*] shall [pay] [recommend to the [*legislature*] the payment of] such claims from funds appropriated therefor, provided that it

(i) may audit the records of any local governments to verify the actual amount of the mandated cost,

(ii) may [reduce] [recommend to the [*legislature*] the reduction of] any claim, determined to be excessive or unreasonable, and

(iii) shall adjust the payment to correct for any underpayments or overpayments which occurred in the previous fiscal year.

(3) Any funds received by a local government pursuant to this act may be used for any public purpose.

(d) *Appeals and Adjudication.*

(1) Local governments may appeal determinations made by state officers acting pursuant to this act. The appeal must be submitted to the [*department of community affairs or other state agency designated in Section 4*] within [days] following the date of receipt of the determination being appealed. [The appeal must include evidence as to the extent to which the mandate has been carried out in an effective manner and executed without recourse to standards of staffing or expenditure higher than specified in the mandatory statute]. The [*state agency*], after reviewing the evidence submitted to it, [may increase or reduce the amount of a reimbursement claim] [shall submitt to the legislature any recommendations for change]. [The decision of the [*agency*] shall be final.] [*Some states, especially those already having boards of control or other adjudicatory body for review of claims against the state may wish to provide a second level of appeal*].

SECTION 10. *Refusal to Comply with Mandate and Judicial Review Thereof.*

[(a) An affected local government may, by resolution refuse to comply with or enforce any law not meeting the requirements of this act.[10] A copy of such resolution shall be transmitted within 24

hours to the [attorney general; Governor.]]

(b) [*A section that would permit a local government to initiate court action to determine whether or not an enacted statute or issued executive order correctly specifies that it does not involve any state-mandated costs, or if it involves such costs that there is an adequate appropriation available and that would require the court to enjoin the effect of the mandate until funds are available.*][11]

SECTION 11. *Effective Date.* [*Insert effective date.*]

SECTION 12. *Separability.* [*Insert separability clause.*]

---

[10]See *Revised Codes of Montana*, sec. 43-517, SB 231, Florida Senate, 1978, provided "The municipality or county may refuse to comply with, administer, or enforce any law which does not comply with the requirements of this section unless such law expressly supersedes or modifies this act. No subsequent legislation shall be deemed to supersede or modify any provision of this act, whether by implication or otherwise except to the extent that such legislation shall do so expressly; reasons for legislative deviations from this section shall be stated with particularity in the preamble of the act."

CS FOR HOUSE BILL NO. 586

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act requiring fiscal notes for bills affecting a municipality."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 24.30.035 is amended to read:

Sec. 24.30.035. FISCAL NOTES ON BILLS. Before a bill is reported from the committee of first referral, there shall be attached to the bill a fiscal note containing an estimate of the amount of the appropriation increase or decrease which would result from enactment of the bill for the ensuing fiscal year and at least two succeeding fiscal years. If enactment of the bill would require a significant expenditure or appropriation by a municipality, a fiscal note shall be attached to the bill containing an estimate of the amount of the total expenditure or appropriation which would be required during each of the first three fiscal years by all affected municipalities. If [OR, IF] the bill has no fiscal impact, a statement to that effect shall be attached. The fiscal note or statement relating to a state program shall be prepared by the department or departments affected. The fiscal note or statement relating to municipalities shall be prepared by the Department of Community and Regional Affairs, but that department may obtain the assistance of any other state agency in the preparation of the note or statement. If the bill is presented by the governor for introduction in accordance with AS 24.30.060(b) and the uniform rules of the legislature, the fiscal note or statement shall be attached to the bill before the bill is introduced. An amendment or substitute bill proposed by a commit-

tee of referral that changes the fiscal impact of a bill shall be explained in a revised fiscal note or statement attached to the bill.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
To prepare fiscal notes on all bills relating to municipalities would require an additional Local Government Specialist III (Range 17) and a Clerk/Typist III (Range 8) - Personal Services costs are based on these figures plus 28% for benefits.

Contractual costs are for an additional 300 sq. feet of office space (.5), base telephone rate and long distance tolls for 1 (1.0), and Mag Card rental (3.3). Travel is figured at 1.5 per year. In many instances the LGS will need to go to the municipalities to research fiscal impact of bills. The commodities cost is for the costs of printing forms. All the above costs are increased at 8% a year for inflation.

The one time equipment cost is for desks, office equipment, etc. for two.

Legislators of the State of Alaska

March 25, 1980

Re.: CS for House Bill 586 and Senate Bill 352, "An Act requiring fiscal notes for bills affecting a municipality"

Dear Legislator:

> "The legislature shall pass no local or special act if a general act can be made applicable. ... Local acts necessitating appropriations by a political subdivision may not become effective unless approved by a majority of the qualified voters voting thereon in the subdivision affected." Alaska Constitution, Article II, Section 19.

The intent of the wording to be added to the law as evidenced in House Bill 586 and Senate Bill 352 ("If enactment of the bill would require a significant expenditure or appropriation by a municipality a fiscal note ..... shall be prepared by the Department of Community and Regional Affairs,") is in direct conflict with the intent of the Constitution of Alaska; Article II, Section 19 in particular. In other words, our elected Legislators intend to act contrary to the will of the people, and intend not to support and defend the Constitution of the State of Alaska as they have sworn by oath to do.

In my third open letter to all legislators dated Jan. 28, 1980, of which you received a copy, I stated that House Bill 586 expresses the intention of the legislature to impose any State provided servic to any municipality and to make that municipality pay for the same; that this is in violation of the principals of providing for maximum local (municipal) self-government as set forth under Article X of the Alaska Constitution; that this is ignoring the limitations of power to the legislature as set forth under Article II (Section 19) of the Alaska Constitution; and that therefore these bills cannot be legally enacted and should die in committee.

In my fourth open letter to all legislators, dated February 12, 1980 of which you also received a copy, I stated that the State assumed only the rights enumerated in the Constitution of Alaska through voter approval and assumed at the same time the obligation to fulfill the responsibilities enumerated therein. Article VII of the Constitution of the State of Alaska requires the State to provide for education, for protection of public health, and for welfare. It is selfexplanatory that the State must provide these services by raising the funds necessary to pay for them, and not by mandating State services upon the local municipality and thereby forcing the the people affected to pay for the "State provided" services.

Again, in spite of my warnings, on March 20, 1980 the Alaska House of Representatives passed CS for House Bill 586, "An Act requiring fiscal notes for bills affecting a municipality." It is now in the Senate Finance Committee.

At the tim the people of Alaska adopted by vote the Constitution of Alaska it was their will to retain the right of selfdetermination over local municipal governments, and that any additional municipal or special services must be approved by the voters of the locality affected. Even should the State fund a special municipal service 100%, it may not provide that service without the consent of the voters of that locality, wether it be a service area in the unorganized borough or a municipality of any kind. I am convinced that this attitude of the people of Alaska has not been changed since the adoption of our Constitution. I hesitate to speculate on the public's reaction when properly informed about this legislative shame in progress.

House Bill 586 and Senate Bill 352 considered by themselves may appear harmless at first glance, however if seen enacted together with House Bill 580 and Senate Bill 348 (each existing borough and unified municipality and each school district (REAA) called an "unorganized borough" will be an established State Service District), House Bill 581 and Senate Bill 350 (the Governor shall require legislation regarding development and implementation of State Service Districts), House Bill 582 and Senate Bill 349 (will provide public tax dollars to prepare a management (control) program for the "unorganized boroughs"), HB 584 and SB 354 (will eliminate the third class borough), and HB 585 and SB 353 (will confer first class status to second class boroughs), the true intentions of establishing a state socialistic dictatorship under the Governmor and the Department of Community and Regional Affairs become quite visible.

In many of my previous letters I urged you to let SBs 348, 349, 350, 352, 353 and 354, and HBs 580, 581, 582, 584, 585 and 586 die in committee. If these bills become law, the foundation for a Hitler Style state socialistic society will be laid!

Please, take a moment and think about this - before you vote again on this bill or any of the others I named.

Very truly yours,

Wolfgang Falke

C&RA Committee Hearing HB 594 January 28,1980

Pappy Moss, witness	Mr. Moss said the purpose of the bill was to cover expenses that weren't part of the Health Careers Program (an enrichment program for Native High School students interested in health careers. AFN pays for supplies and the program). Mr Moss noted that AFN was short in funding for the program by $29,104.
Parker	Mr. Parker siad he thought the Feds weren't giving as much to the program this year.
Moss	Moss said that was his understanding.
Ray Metcalfe	Mr. Metcalfe wanted to know if the program was originated by the AFN.
Moss	Moss said the program was, and that it was supported by Federal funds.
Metcalfe	Metcalfe said he felt that Native Land Claim Settlement Act was a chance for natives to "catch up" with the rest of the country, and that the money given by the Federal govt. was for that purpose.
Parr	Mr. Parr differentiated between money that went to for-profit and non-profit corporations.
Metcalfe	Metcalfe said he thought the money should come from the communities, and not from the state.
Moss	Mr. Moss tried to dispell the notion that there was "that much money out there (in the native communities)."
Parker	Mr. Parker said that it seemed like a nice program; but he wondered why it came up short this year.

Juneau, Alaska 99811

Parr	Mr. Parr noted that the cost came to about $1,500 per student.
Metcalfe	Mr. Metcalfe asked whare the money came from.
Moss	Mr. Moss said the money came from the AFN. He added that he would have people in town to testify about the bill next week.
Palmer McCarter, C&RA	Mr. McCarter said that C&RA supported the program. He pointed out that AFN was non-profit, and that it must seek out state and Federal grants. He said the program was available to students statewide. He felt the shortfall may have come because the feds calculated their grant to AFN based on lower 48 costs.
Parr	Mr. Parr said he knew a program that does exactly the same thing was being funded at U.A.F., and wondered why the state would want to spend money for the same thing
Metcalfe	Recommended passing the bill out with a letter pointing out that there was duplication between U.A.F. program and A.F.N. program.

BILL NUMBER AND TITLE: HB 625 Re appropriation/Fbks. Town & Village Association

ORIGINAL SPONSOR: Rogers, Smith, Moss
OTHER SPONSORS: _____
RECEIVED FROM: _____
FURTHER REFERRALS: Finance

HEARING DATE: 2/1/80

MEMBERS PRESENT:

Bill Parker	X	Pat Carney	X
Margaret Branson	X	Charlie Parr	X
Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	X

Rep. Brian Rogers, Sponsor

Discusses history of the Fbks.Town and Village Association and the general intent of the legislation.

Bill Wood, Bd. Member Fbks.Town & Village Association & Mayor of Fbks.

Discusses the representation drawn together by the Town&Village Ass'n. which draws on the leadership of 45 villages in the Doyon Region. The overall development plan created for the area originates at the "grass roots" level and the people. Generally discusses the activities of the Town & Village Ass'n.

Don Carlson, Mayor of Fbks. North Star Borough

Town and Village Ass'n. covers more than the North Star Borough area. Organization helps to meet the needs in the outlying areas as well. Cites Alaska Municipal League statement on economic development urging state support of such efforts. Sees a positivie effect of the activities of the Fbks. Town & Village Ass'n. on the economic development of communities.

Metcalfe - Would like to see this money going through revenue sharing programs rather than as special appropriation.

John Coghill, Mayor of Nanana

Supports HB625. The activities of the TVA cover a larger geographic area than the North Star Borough. Each village would benefit from this type of program but it is not feasible to develop such small scale programs. What is good for Fbks. is good for Nanana. Suggests that the money would strengthen the administration of the programs operated by TVA.

Carney - Asks if the group has received state funding in the past?
Coghill - TVA has depended heavily on the North Star Borough for funding in the past.
Metcalfe - Revenue sharing base would cover these needs. It appears that TVA efforts might be duplicative of those of DC&RAs.

COMMITTEE ACTION:

Bill passed out.

TAPE # 2 SIDE 1 Footage 0-899

Metcalfe - Suggests possibility of incorporating activities with those of Dept. of C&RA.
Coghill - Points out that some of the areas receiving help aren't organized municipalities at this time and therefore couldn't qualify under the revenue sharing program. The thrust for economic help is from the villages.

Jerry Smetzer, Executive Director, Ftks. Town & Village Ass'n.
Responds to Parr's questions re what the group has actually accomplished.: TVA worked to get a $250,000 storage building for Fort Yukon. Administrative staff had to work with the communities in a problem solving approach and in the case of the Fort Yukon project had to work on gaining title to the land for the city for the storage building. In Tok a Civic Center to house an Alcoholic center has been completed. There is alot of red tape in the development of capital projects. Responds to questioning re origin of requests for projects: sometimes the communities know what they need and want and sometimes that needs to be derived from dialogue. The Board meets twice a year and the attempt embodied in the bill is to have the state contribute as much to the efforts of the TVA as the federal government and the North Star Borough contribute.

Metcalfe -Suggests tht the group report on its relationship with the Dept. of C&RA during the next legislative session with its analysis of coordination of efforts and working relationship.
Smetzer - Would be happy to comply with that request.

Parker - Asks how figure for appropriation was arrived at?
Smetzer - Refers to travel costs and other costs associated with raising money.

Committee then proceeds to review HB 626 in conjunction with HB 625 .(See HB 626 Minutes)

Overall Economic Development Program Inc.

S.R. Box 5011

(907) 376-3105

March 17, 1980

The Honorable Representative Bill Parker
Chairman, Community & Regional Affairs
Pouch V
Juneau, AK 99811

Dear Sir:

With full consensus of the other local economic development organizations in the State, I strongly support your favorable position on HB 625 and HB 626 as a means of strengthening the economic base in the Interior.

Based on the record of success of Fairbanks Town and Village Association for Development, Inc. as an economic development entity functioning on the regional level, I feel that HB 625, HB 626, and SR 41 represent legislation which can most effectively stimulate the local economy.

Fairbanks, in January 1980, posted the second highest unemployment rate in the State with 13.5%. The Matanuska-Susitna Borough, by comparison, was number one in the State and the nation with 19.9% (Department of Labor figures). The need is evident.

Sincerely,

Donald F. Lyon
Executive Director

DFL:nb

PREFACE

The Fairbanks Town and Village Association is a non-profit Alaska Corporation formed in 1972 to conduct a long-range program of regional economic development in the Interior of Alaska. In 1974 the corporation was designated by the United States Department of Commerce as an Economic Development District under the authority of Title IV(b) of the Public Works and Economic Development Act of 1965.

The regional boundaries of the district as outlined on the map of Alaska are the same as the boundaries of Doyon, Ltd., a regional corporation created under the authority of the Alaska Native Claims Settlement Act of 1971. The boundaries encompass a geographic area of some 240,000 square miles. Physiographically diverse, the region includes most of the primary and tributary drainages of the Yukon River as it courses westerly through the Interior for 1,500 miles between the Brooks Range to the north and the Alaska Range to the south. Additionally the highest mountain in North America lies in the southwestern portion of the Interior. The mountain officially named Mount McKinley is traditionally and historically known by the Athapascan Indians of the Interior as Denali ... "The Great One".

The climate is classified as continental and is relatively arid. Though seasonal temperature extremes can occur the lack of wind and precipitation creates a generally mild sunny climate.

The second largest city in Alaska and the primary service, supply, research and administrative center for the north is Fairbanks, Alaska with a population in the metropolitan area of nearly 56,000. The municipal boundaries of the Fairbanks North Star Borough also shown on the map, encompass an area the size of the State of New Jersey.

The vast region surrounding Fairbanks is largely undeveloped and sparsely populated. There are about 50 small cities, villages and settlements scattered through the area, most with populations of 100-200 residents or less. The sub-regional supply, service, and administrative centers such as Tok, Nenana, Galena, McGrath and Fort Yukon have populations between 500 and 1,000.

Delta Junction, the site of a major agricultural development program has an area population of nearly 3,000.

amendment at their semi-annual meeting in March of 1979 allowing the Fairbanks Chamber of Commerce to appoint one Board member and they have done so.

The largest municipal government in the District is the Fairbanks North Star Borough. The heavily populated section of the Borough forms the District's primary growth center.

Since 1974, the Association has been evaluating the potential designation of secondary growth centers. There has been discussion of four possible secondary designations including Galena, McGrath, Fort Yukon and Tok. Officials in these communities, however, have not made requests for formal growth center designations.

Seventeen local governments in Interior Alaska are participating in the overall planning process of the Association through appointment of representative officials to serve on the Board of Directors. Twenty-one communities, however, are represented on the Board through appointment of at-large and organization appointments.

TABLE I

PARTICIPATING GOVERNMENTS AND ORGANIZATIONS

1. Municipalities with Representatives on the FTVAD Board:

Arctic Village	Fairbanks	Grayling	Nenana	Nulato	Tanana
Anvik	FNSB	Kaltag	Nikolai	Shageluk	
Delta	Fort Yukon	McGrath	North Pole	Takotna	

2. Other Communities with At-Large and Participating Organization Representatives on the Board:

Circle	Dry Creek	Healy Lake	Minto	Ruby	Tok

3. Participating Organizations with Representatives on the Board:

Tanana Chiefs Conference	Tok Chamber of Commerce
Upper Tanana Development Corporation	Fairbanks Chamber of Commerce

4. Organizations Eligible for Participation through Section 7 Bylaw Amendment in March, 1978:

Koyukon Development Corporation	Upper Tanana Development Corporation
Upper Yukon Development Corporation	

5. Organizations Eligible for Participation through Section 7 Bylaw Amendment in March, 1979:

Fairbanks Chamber of Commerce

6. Other Organizations Eligible for Participation:

National Association for the Advancement of Colored People

d. Citizen Participation

The activities of the Fairbanks Town and Village Association for Development, Inc. are governed by a 37-member Board of Directors. It is the Board's responsibility to adopt and implement an Overall Economic Development Program for the District. This program includes the determination of policy, identification of development goals, establishment of project priorities, and the creation of a development strategy to accomplish the District goals.

The Honorable Arliss Sturgelewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgelewski:

Thank you for the lunch and the opportunity to discuss the legislation on the unorganized borough.

As promised, though later than I had hoped, this letter at least briefly capsules the thinking of the FTVAD Board of Directors - and my own - on this legislative initiative.

We are pleased with the commitment and the initiative of the two CRA committees in dealing with the problems of the unorganized borough. We are particularly pleased with the recognition in SB 580 that a system of sub-state regional boundaries for the conduct of state administrative functions is essential. We support the effort you are putting into these bills and we urge you, Representative Bill Parker and the members of the two committees to continue your good work in this most difficult, complex and dynamic area of public policy.

At the mid-December annual meeting of our regional board of directors the board adopted a specific three part policy on State Decentralization which is relevant and provides the basis of my comments in this letter.

FTVAD policy on state decentralization is as follows:

1. The Governor should by Administrative Order immediately institute a common system of regional planning, development, and government administration boundaries within the legal boundaries formed by the twelve native regional corporations created under the authority of the Alaska Native Claims Settlement Act of 1971.

2. The Governor should by Executive Order begin immediately the decentralization of administrative decision making into these regions by divesting agencies of the state of their accumulations of centralized authority which were not explicitly granted by the constitution.

3. The Governor should by Executive Order begin immediately the democratization of the state's administration of planning, development, project recommendation and priority setting activities, and the delivery of needed government services within these regions by financing and contracting their provision through fiscally sound, locally controlled non-profit, quasi-governmental corporations conducting related activities."

The Board's policy, which was adopted unanimously, has been evolved over a period of several years. It represents our view of what the state must do if residents of the state's regions are to have any chance of guiding administrative actions by the state and the administrative allocation of resources by the state in a manner which will enable them to protect their most fundamental local concerns with their jobs, families, neighborhoods and communities.

You stated that some people were viewing the legislative proposals as a "first step" in what may require years to bring to fruition.

Actually the "first step" in Alaska was taken at the Constitutional Convention at the University campus in 1955. At that time the idea was developed that a state so vast and so diverse in its several major regions needed a unique and innovative system of strong local governments and associated regional institutions operating almost as a federation within the general sovereignty of the state. The idea was never developed beyond the organized borough concept in a limited geographic region authorized by Article X.

Since that time, some form of decentralized state administrative structure has been incorporated into the governing apparatus of at least 47 other states but never in the unorganized borough of Alaska.

The first step in this decentralizing process is the designation of sub-state regions by the state in order to bring some order into the otherwise chaotic jumble of administrative and functional boundaries created by individual agencies, boards, commissions, and almost anyone else able to claim some legitimate state purpose.

The sub-state regional system in these 47 states is so taken for granted nationally that the federal government has, for several years, required federal agencies with domestic responsibilities to conform their jurisdictional boundaries to the sub-state regions established by each state. The federal government cannot do this in Alaska, of course, because Alaska still has no official sub-state regions.

With the exception of SB 353 - which we support based on our Fairbanks experience - the other bills appear to be little more than housekeeping measures, and FTVAD has no particular comment on them.

Generally speaking we support the position of the Tanana Chiefs Conference on these bills.

If you have additional questions on my comments here, please call me.

Sincerely,

Jerry E. Smetzer
Executive Director

JES:rlf

cc: FTVAD Executive Committee Members

agency requests for bail outs should be taken to the courts. If extraordinary problems in the form of constitutional conflicts surface during the conforming period they can be considered during the legislative session which begins in January 1982.

The intent of the Data and Information section is not clear. What is clear based on our experience is that such a requirement will not work without an interagency convening and oversight authority designated by statute. What is also clear is that such an authority, if it is to serve a useful public purpose, has to have an independent arm's length relationship to the agencies it is to oversee. Finally the reference to federal agencies sounds good but it will not work either until the federal government has a functioning interagency convening authority within Alaska.

The federal government has no such authority because the state has never asked them to form one. The best method of accomplishing these purposes is to either designate existing independent quasi-governmental or non-profit public interest organizations within each region; or authorize their creation where they do not now exist ... as we suggest in Policy Statement #3.

FTVAD Policy Statement #3:

SB 349

Though there are a series of bail out provisions in this bill its primary purpose is to enable the Commissioner of DCRA to use contracting authority to encourage the formation of AS 29 municipalities. The most vital questions bearing on whether or not a government should be formed anywhere in the unorganized borough - economic development potentials, capital facility needs, fiscal relationship with both the federal and state government, the quality of the tax base, representation, etc. - should be raised by those who must live with the job, family and neighborhood concerns in their area, and the state finance the explorations of those concerns by the people themselves through their locally designated or elected representatives.

The issues bearing on the formation, function and structure of government in the unorganized borough are much too important to assign to any single agency of the state. If assurances are needed that such funds be limited to the investigation of questions bearing on the formation and financing of local government, then DCRA should be mandated to devise a standard methodology for the conduct of such studies by sponsoring residents of any area in the unorganized borough which proposed to form a local or regional government. The commissioner's authority can then be limited to determining the degree of compatibility with the standard methodology.

We would recommend that the committees give careful consideration to our third policy recommendation and re-write this bill accordingly.

I have included some specific comments on these bills and related them to our policy statements.

FTVAD Policy Statement #1:

HB 580/SB 348

If state designated sub-state regional boundaries are to be effective they must be negotiated and agreed upon by the residents most affected so that they will make sense physiographically and culturally.

To assure that these boundaries remain in effect long enough to allow the gradual evolution of new governing institutions, these boundaries should already be in existence and should have been created in response to something other than an initiative of government.

Finally they should be insulated and completely removed from the arbitrary actions of government officials to change them.

While the established boundaries of the Rural Education Attendance Areas (REAA) meet several of these tests they fail the most important test of all in that they were established and they exist only because of the government's responsibility for education. The REAA boundaries have no functional relationship to the main non-education interests of residents and are not relevant to the non-education functions of other state, local and federal agencies.

Only the native regional corporation boundaries established under the authority of the Alaska Native Claims Settlement Act of 1971 meet all these tests. The REAAs do not. It was for this reason that the jurisdictional boundaries of FTVAD were made in 1974 to conform to the regional boundaries of Doyon, Limited, and it is the rational behind our first policy statement.

Though we fully support the idea that each agency of the state should be required to conform its internal jurisdiction boundaries to the regional boundaries, we oppose the idea that an individual commissioner be given any discretion in designating boundaries or in making boundary adjustments. The loopholes and escape clauses in the Exemptions and Modifications sections are so broad in any case that they defeat the purposes of the preceding sections of the bill.

The kind of fundamental changes in agency/constituent practices, procedures and relationships that will be required with the designation of sub-state regions are going to be painful to those who have vested interests in the agency status quo, and they will surely object to the elimination of those loopholes.

All in all, over the longer run, the pain will be less if all agencies are required to begin conforming their boundaries within 90 or 120 days of enactment with completion mandated within 1½ years. In the meantime

Because of the general public confusion about the jurisdictional boundaries of state agencies the absence of formal regions is causing enormous problems. The costs of resolving these problems are being paid by taxpayers and by others outside the state's administrative apparatus. To say it may take years to establish these boundaries is bad news ... particularly for those of us who are trying to work productively in the complex area of intergovernmental relationships between local, state and federal agencies, where the state - the main player - has no policy, no procedure and no deliberative mechanism for the conduct of essential policy-making dialogue between state and non-state regional and local interests outside the second floor of the capitol building.

Though I am very pleased that SB 348 raises the issue of sub-state regional boundaries, I do agree with you that the legislature is not the proper place to establish them. We have always maintained that only the governor can do this and he must do it by executive order. FTVAD is now, by policy, saying that the situation has become so severe that he must do so immediately.

Based on our policy statements, we have a major problem with the general premise upon which this legislation has been prepared. It is obvious that the only system of self-government contemplated for the unorganized borough is that which has been defined in the Municipal Code. While we have no objection to the Municipal Code per se, nor do we have any complaints with the Code insofar as it is applied in the state's urban centers, we do object to the notion that it is, according to the legislation, the only acceptable method of government in the unorganized borough.

You may recall my comment about the social ferment that is presently occurring in the bush. This ferment is generating whole new ideas of self-reliance, self-government and the delivery of essential government services.

The fact that the legislation fails to recognize that this activity is occurring is my single greatest dissappointment with the legislation.

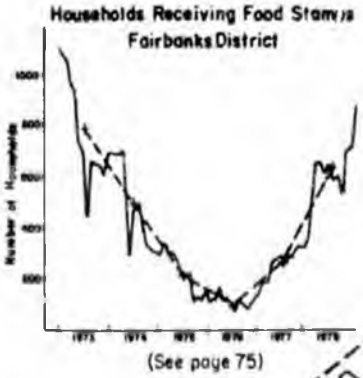
Failing to recognize or acknowledge this activity is not so bad in itself. The worst problem is that the incentives for self-government in the unorganized borough are limited to existing AS 29 municipalities or those groups which plan to form AS 29 municipalities.

Since the whole purpose of such a broadly based legislative initiative, I asume, is to recognize and address failures in the governing structure in the unorganized borough, my first working assumption would be that AS 29 municipalities themselves do not work there and should be replaced with something better. We do not mean to suggest, necessarily, that the legislation should propose any radical new forms of government. However, there have to be incentives for the exploration of alternatives to AS 29 as well as recognition that some alternatives exist already.

COMMUNITY INFORMATION REVIEW

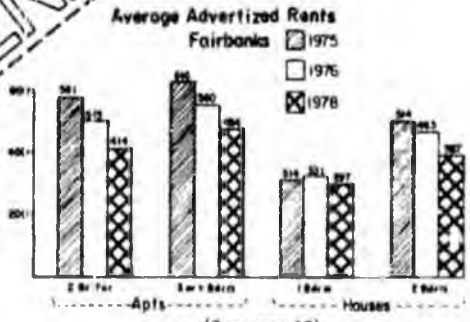
SOCIO-ECONOMIC CONDITIONS IN FAIRBANKS

March 1979
Volume II No. 1a



(See page 75)

1978 YEAR-END WRAP-UP



(See page 46)

The Fairbanks unemployment rate averaged 17.9% for 1978, while the 1978 labor force average declined 11% from its 1977 level.

Fairbanks business sales generally leveled off or declined for 1978, but fast food restaurant sales continued to grow and some other categories pulled out of earlier declines.

Violent crimes increased 8% to 10% in the Fairbanks area over 1977, but property crimes dropped 5% to 10%.

Public transit ridership rose 54% between February 1978 and February 1979, while transit revenues increased 53% in the same period.

INTRODUCTION

The Community Information Review is a new publication designed by the Community Information Center to present in a short, easily readable format the basic information contained in the more extensive Community Information Quarterly. By using the condensed format, we can greatly reduce printing costs and expand the dissemination of this information to the Fairbanks-area public. The Quarterly containing more detailed socio-economic data will continue to be available to the public.

We hope that this Review will be of interest and use to you. If you have questions and comments on this publication, please call us at 452-4761.

COMMUNITY INFORMATION CENTER

ADVISORY BOARD

Chairman: Dennis Weaver

Vice-Chairman: Rita Allee

Lottie Fleeks	Rhonda Mahaney
Bill Green	Bill Phillips
Don Hart	Wayne Thomas
Leslye Korvola	Lee Wareham

The Advisory Board meets regularly on the third Wednesday of the month at 7:30 p.m. in the basement conference room of the Borough's offices. The public is invited to attend and participate.

ACKNOWLEDGEMENTS

The Community Information Center staff would like to thank the many persons, businesses, government agencies, and organizations who provided information included in this report. We also acknowledge Marsha Bauman, Marilynn Forrest, Kathy Franz, Heide Sciore, and Patty Smith, for their assistance in the preparation of this report.

COST OF LIVING

Consumer Price Index

In January 1979, the Anchorage Consumer Price Index for All Urban Consumers (CPI-U) reached 198.1, or an increase of 10.5% from January 1978. The average increase between 1977 and 1978, however, was computed as 7.1% using a weighted formula. All major categories posted increases of 2.7% to 13.0% for the year.

The overall *food* category increased 13% from January 1978 to January 1979, with *food at home* rising 14.7% and *food away from home* increasing 10.0%. In the period November 1978 to January 1979 alone, *food away from home* increased 6.8%. The general *housing* category rose 11.8% from January 1978 to January 1979. Housing subcategories include *rental costs* (up 3.2%), *other rental costs* such as hotel and motel rates (up 13.7%), *homeownership costs* (up 16.7%), and *fuel and other utilities* (up 0.4%) whose low rate of increase moderated housing costs in general. Other major increases for the January 1978 to January 1979 period were posted by *transportation* (up 9.1%) and *medical care* (up 9.4%). *Apparel and upkeep* rose by 2.7% in the January to January period, but showed a 2.4% decrease from November 1978 to January 1979.

Consumer Price Index--What is it?

The Consumer Price Index is *a statistical measure of changes in prices of goods and services bought* by specific groups of people. The index, compiled by the U.S. Department of Labor, Bureau of Labor Statistics (BLS), is often referred to as the "cost of living" index. While the CPI attempts to measure price trends which are an indicator of cost of living changes, it does not indicate how much families actually spend to meet their living expenses. The CPI for one city is not comparable to a CPI for another city as a cost differential factor. Anchorage is the only place in Alaska which has a CPI. Presently, the BLS is collecting data in Fairbanks and a new CPI will be released bi-monthly starting in May 1979. The CPI for Fairbanks and Anchorage will not provide a cost differential indicator between the cities. However, it will allow a comparison between rates of change.

SOCIAL CONDITIONS

Crime

Violent crime decreased by 35% within the City of Fairbanks and by 29% in the Borough outside the city from 1976 to 1978. In the same two year period, robbery dropped 56% in the City and 85% in the Borough excluding the City of Fairbanks, while vehicle theft was down 44% and 36% in the two areas, respectively.

In the past year, however, violent crime has increased 10% in the City of Fairbanks and 8% in the Borough outside the city. Property crimes continued to drop in both the City and the Borough from 1977 to 1978. The property crime decrease was 5% for the City and 10% for the rest of the Borough.

* State troopers believe this figure is in error and should be higher.

Juvenile Offenses

Juvenile offenses, which declined in 1977 from 1976 levels, have recently begun to increase. All juvenile offenses, including those committed by males and females, rose 11% in 1978 compared to the previous year. Male juvenile offenses increased by 13% in that period, while female juvenile offenses registered a 6% rise. In the past twelve months, male juvenile offenses for larceny increased 50%, but burglary declined 23%. For female juveniles, runaway offenses jumped 21% in that period, and shoplifting increased 22% for all juveniles.

Households Receiving Food Stamps

The number of households receiving food stamps rose to a monthly average of 622 in 1978, compared to a 256 monthly average for 1977. The 1978 figure represents a 143% increase over 1977 and a 402% increase over the record low registered in 1976 during the oil line construction period. The highest level was reached in 1973 when a monthly average of 792 households received food stamps.

Air Quality--Carbon Monoxide

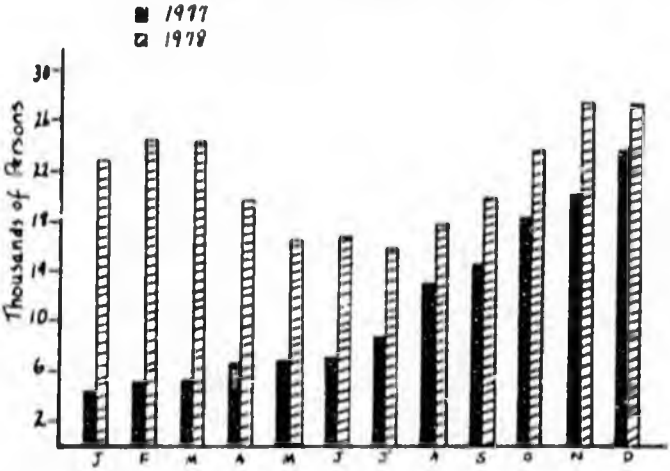
The number of days in the City of Fairbanks with 8-hour periods exceeding nine parts per million of carbon monoxide decreased by 45% in 1978, going from a total of 60 days in 1977 to 33 days in 1978. The 1978 figure also represents a 76% drop over the record high number of days registered in 1974. Similar declines occurred in the monthly maximum 8-hour averages for the City, where the 1978 average of 7.5 parts per million was a 40% decrease over the 1977 level and a 58% drop over the record high listed for 1974.

The improving air quality condition in Fairbanks for carbon monoxide emissions is attributed to more effective emission controls on more recently manufactured automobiles, better traffic flow patterns in the downtown area, and greater public awareness of the need to reduce carbon monoxide levels. The milder weather conditions of the past few winters have also helped to reduce the ambient carbon monoxide levels, although the extent of the weather's influence on carbon monoxide concentrations in Fairbanks is unknown.

Transit Operations

Borough transit ridership rose 54% in February 1979 compared to February of the previous year, setting a monthly record high of 37,803 passengers. Revenues for this period increased by 53%. Public transit service in the Borough was inaugurated in August 1976. Currently, five buses serve seven routes, covering 860 miles in the City and 500 miles in the rest of the Borough daily during February 1979.

PUBLIC TRANSIT--RIDERSHIP
Fairbanks North Star Borough
1977-1978, By Month



School Transportation

The number of students using school transportation in 1978/79 has remained at the previous school year level. This figure represents a 4% increase over the 4,821 students bused in 1973-74, but a 13% decrease from the 1975/76 level. Transportation costs per pupil, however, are 218% higher in the current year than in 1973/74 and 177% higher than in 1975/76.

HOUSING

New Housing Construction

New housing construction decreased by 49% in 1978, compared to 1977. The greatest part of this decline came in the multi-family category. The number of building permits issued for multi-family dwelling construction dropped 75% in 1978 compared to the previous year. Single family housing starts decreased by 12% for this period, indicating greater resilience. The dollar amount of building permits for new single family homes increased by approximately 2% over the 12-month period.

The decline in the number of building permits issued for new housing construction has occurred elsewhere in the state. The statewide totals are down 33% for 1978 compared to the previous year. Anchorage housing construction has decreased 33%; Juneau is down 18%; Kenai is down 40%; but Palmer is up 67%.

Houses Sold

In 1978 the average selling price of a home in the Fairbanks area was $71,276, up 6% from the 1977 average selling price of $67,105 according to a Community Information Center survey of a local appraisal firm. The average 1978 selling price of a two-bedroom home was $70,784 which is a 14% increase over the 1977 average price of $61,873. A three-bedroom home in 1978 sold for an average price of $74,239, a 10% increase of the 1977 average of $67,273.

Although these figures represent only a sample of homes sold and not the total sales, the number of homes selling for more than $100,000 increased significantly in the past year. In the 1977 sample, seven homes were listed as selling for $100,000 or more, whereas twenty-nine homes fell into this category in 1978. This represents a tripling of the number of homes sold at this dollar level and an increase of $100,000-plus home sales from 3% of the sample in 1977 to 9% in 1978.

SAMPLE OF HOUSES SOLD
Fairbanks North Star Borough
1977-1978

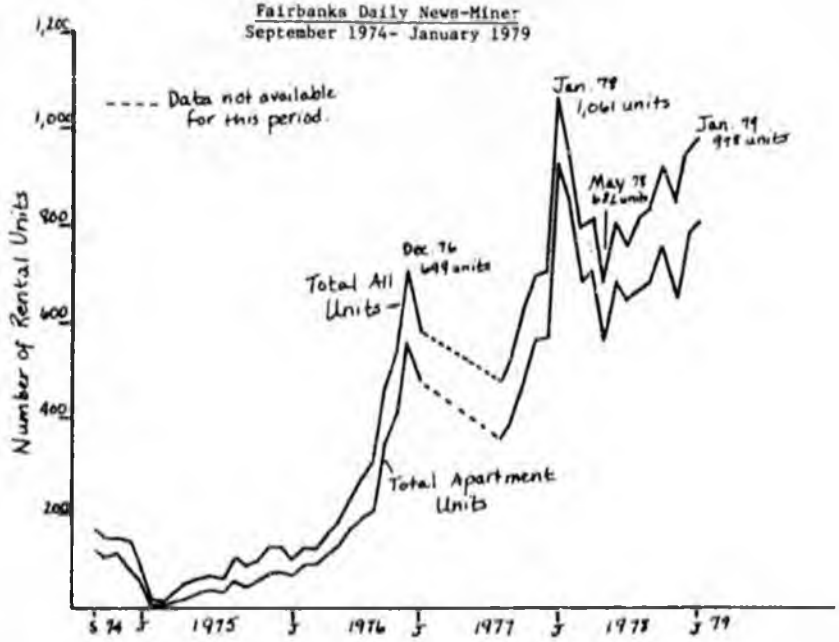
1978						
Total	25	109	165	21	6	326
Average	$41,345	$70,784	$74,239	$83,761	$39,000	$71,276

Rental Housing

A total of 978 housing units were advertised for rent in January 1979, according to a Community Information Center survey. January is traditionally the month with the highest number of available housing units, and although the January 1979 figure represents the second highest figure recorded, it also represents an 8% decline over the number of units advertised for rent in January 1978. The record high for January 1978 additionally marked the culmination of a major housing construction effort launched in 1977 to meet housing shortages resulting from the building of the trans-Alaska oil pipeline.

Of the January 1979 total, 797 units, or 81%, were apartments, which represents a 14% decline over the number of apartment units advertised in January of the preceding year. The number of houses for rent, however, increased in January to 119 units, or an increase of 65% over the number of rental houses for January of the previous year. The record number of houses advertised for rent was established at 122 in November 1978.

RENTAL HOUSING UNITS ADVERTISED
Fairbanks Daily News-Miner
September 1974- January 1979

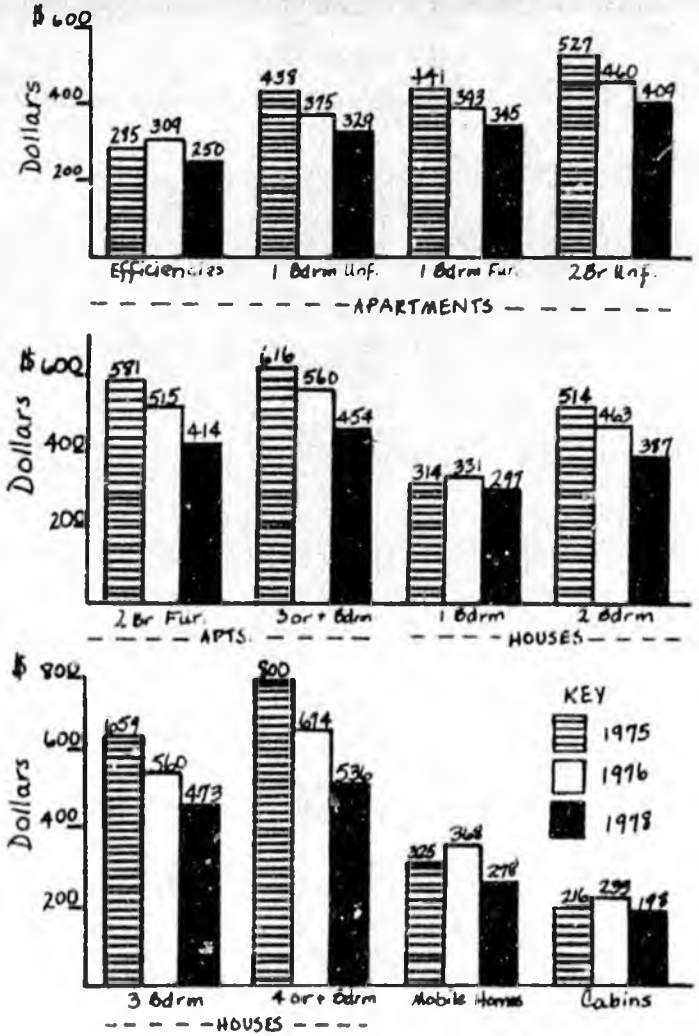


Rental Housing Costs

Rental costs have continued their downward slide through 1978, as compared to the previous year, based on a Community Information Center survey of housing units advertised for rent. Fourth quarter 1978 average rents were 4% to 16% lower than for the same quarter in 1977. Monthly rental costs for a two-bedroom house dropped to $387 for fourth quarter 1978, or 11% below the figure for the same period in 1977.

The steady decline in housing rental costs in the Fairbanks area results from the major construction effort launched to alleviate the housing shortages occurring during the oil pipeline period.

AVERAGE RENTS
Housing Units Advertised For Rent
Fairbanks Daily News-Miner
Fourth Quarter Comparisons
1975,1976, and 1978



Telephone Utilities

In the past ten years, the number of residential phones has increased 75% from 6,475 in 1969 to 11,345 in 1978. Business phones have increased 139% for the same period or 2,580 to 6,169. The number of coin-operated telephones in the Fairbanks Municipal Utilities System (MUS) has actually decreased from 168 in 1969 to 165 in 1978.

Residential private lines in MUS have decreased by 14% from 2,234 in 1973 to 1,930 in 1978. The Globe exchange, 452- and 456- numbers, represents 70% of the residential phones and 71% of the business phones of MUS. In residential

phones, Globe has 26% private lines, 33% 2-party lines, and 41% 4-party lines. The Greenwood exchange, 479- numbers, is comprised of 11% private lines, 30% 2-party lines, and 60% 4-party lines. MUS has upgraded all 8-party lines since 1973.

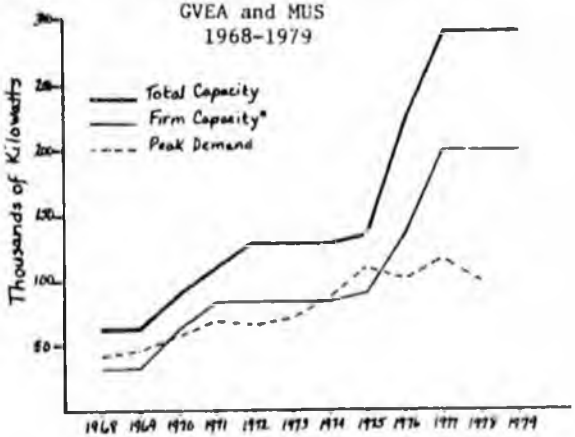
Electrical Utilities

Between 1973 and 1978, the number of electrical customers in Fairbanks rose 47% from 13,708 to 20,160. From 1976 to 1978 customers increased 13%. The growth is seen mainly in Golden Valley Electric Association (GVEA) where customers have increased by 76% from 8,355 in 1973 to 14,705 in 1978. During the same period MUS increased from 5,353 to 5,455, or a 2% growth. The increase in GVEA's residential customers reflects the large amount of new construction which occurred in the outlying areas. GVEA's commercial customer increase is more directly related to the pipeline since these include power to Pump Stations 8 and 9, the pipeyard, and the South Cushman complex.

The number of kilowatt hours (KWH) sold has increased 47% for residential and commercial users from 1973 to 1978. In 1978 GVEA sold 309.1 million KWH with 49% to residential and 51% to commercial users. MUS sold 120.2 million KWH in 1978, 23% of which goes to residential, 52% to commercial, 22% to governmental, and 3% to other utility users.

In 1978 MUS generated 98% of its electricity with coal while GVEA used coal for 65% of its power generation. The KW capacity of MUS and GVEA has remained constant since 1977 at 291,335 KW. The firm capacity (system capacity if the largest MUS and the largest GVEA units fail) is 201,335. This capacity exceeds the peak demand of recent years: 99,700 KW in 1978, 117,500 KW in 1977, and 101,420 KW in 1976.

TOTAL GENERATING CAPACITY
GVEA and MUS
1968-1979



Currently, electrical utility rates in Fairbanks per 1,000 KWH are $70.14 for MUS and $76.11 for GVEA. The heating requirements and costs for a typical home (as illustrated by a model by Axel Carlson, Cooperative Extension Service, University of Alaska, Fairbanks) show that coal is the most economical at a monthly average of $56.57; fuel oil is $91.52; and electricity is the most expensive at $264.51 (MUS) and $268.69 (GVEA).

EMPLOYMENT

Employment

During 1978 the average monthly nonagricultural employment was 21,585, an 11% decline from the 1977 monthly average of 24,238. However, between January 1978 and December 1978 the decline in employment was less than 1%. During 1978 nonagricultural employment averaged 9% construction, 13% transportation, 19% trade, 18% services and miscellaneous, and 34% government. Between January 1978 and December 1978, construction employment dropped 21%. During the same period trucking and warehousing rose by 33%, wholesale trade increased by 5%, retail trade by 6%, and government by 8%. (Nonagricultural wage and salary employment is an estimate of employment by place of work from survey data.)

Unemployment

The average 1978 jobless rate for Fairbanks was 17.9% which is 46% higher than the 1977 average of 12.3%. The number of persons unemployed in fourth quarter 1978 was 16.4% of the civilian labor force of 20,481. In December 1978 the unemployment rate was 16.4% compared to the January 1978 figure of 13.8% unemployed. In 1978 the highest monthly jobless rate was recorded in May at 20.7% followed closely by April at 20.2% and June at 19.5%

In January 1979 the unemployment rate was 16.4% with 3,276 persons unemployed out of a civilian labor force of 19,925. Please note that civilian labor force estimates ate blased on place of residence and vary slightly from nonagricultural wage and salary statistics which are estimates by place of work.)

Unemployment program claimants in Fairbanks have been declining since March 1978 except for a jump in November 1978. However, in 1978 an average of 78 persons a month are exhausting their extended unemployment benefits. The amount of unemployment benefits paid within the Fairbanks area in 1978 was $14.9 million, up 5% from 1977. During 1978 payments within the state of Alaska totalled $51.7 million up 3% from 1977, while payments made outside the state in 1978 decreased 35% from 1977 to $24.1 million.

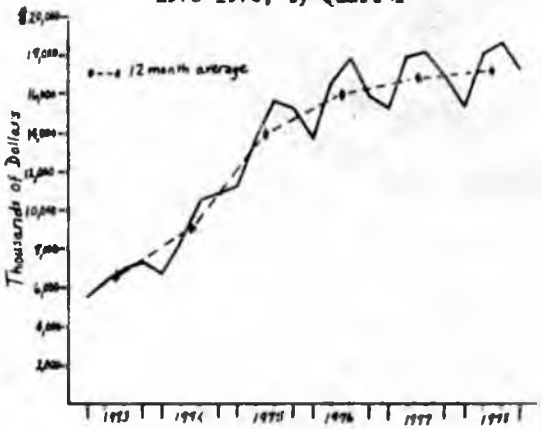
Union membership averaged 3?,973 for fourth quarter 1978, as reported voluntarily to the state Department of Labor starting in mid-1978.

THE ECONOMY

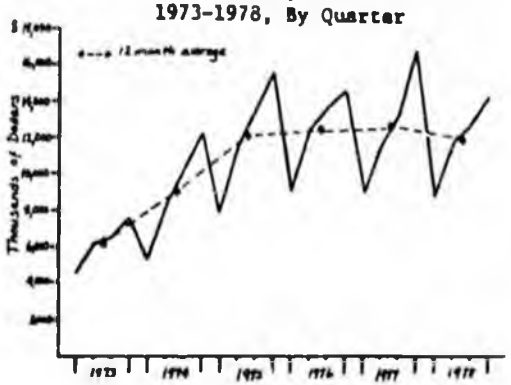
Retail Trade

Gross sales for selected businesses in the Fairbanks area generally leveled out or declined in 1978 compared to 1977. Major food stores registered a 3% increase for 1978 compared to the previous year, while auto dealers appear to have pulled out of an earlier decline to finish 1978 at the same level as the previous year. Fast-food restaurant sales, which had grown dramatically in the past two years, slowed to a 6% increase in 1978 over 1977. Hotels and motels have reversed earlier declines with 1978 totals 2% higher than the previous year. Declines in yearly totals were registered for department, drug, and furniture stores (down 5%), downtown bars (down 23%), office supply and related services (down 8%), and sporting goods stores (down 12%).

GROSS SALES FOR MAJOR FOOD STORES
Fairbanks, Alaska
1973-1978, By Quarter



GROSS SALES FOR MAJOR DEPARTMENT, DRUG, AND FURNITURE STORES
Fairbanks, Alaska
1973-1978, By Quarter



Airport Activity

The number of passengers and the level of operations (take-offs and landings) at the Fairbanks International Airport declined in 1978 compared to the previous year. Passengers decreased 6% to a yearly total of 512,395 and operations declined by 13% over this period. The amount of freight handled, however, increased by 2% for the year to a total of 156.5 million pounds, although this is 57% below the peak figure of 360.4 million pounds in 1975. In 1978, passengers, freight, and operations ran 55%, 67%, and 25% higher, respectively, than the pre-pipeline year of 1973.

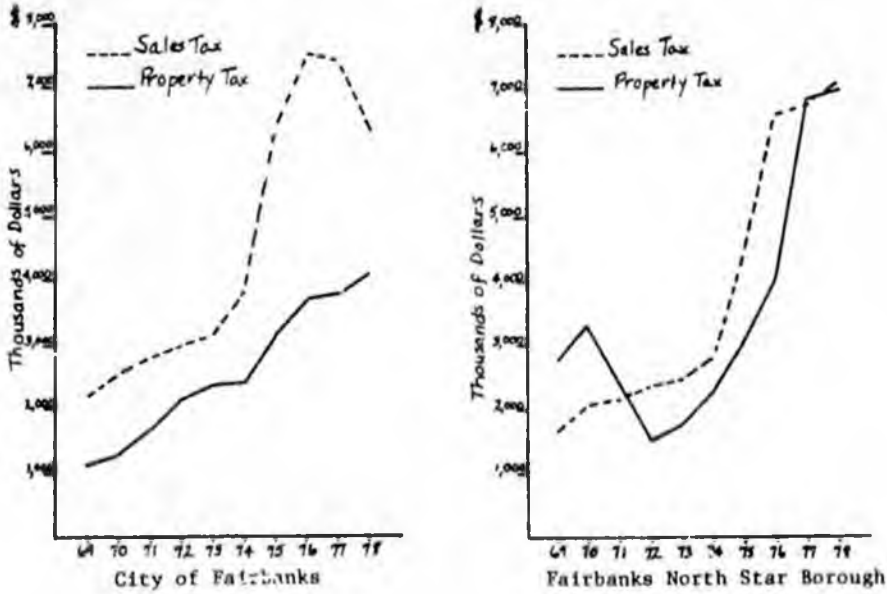
Property Tax and Sales Tax

Assessed valuation of property in the Borough increased 20% in 1978 to $1.63 billion compared to 1977's level of $1.36 billion. The greatest increase resulted in the City of North Pole which went from a pre-oil refinery assessment in 1977 of $11.4 million to $46.1 million in 1978, while the City of Fairbanks' assessed property value increased 15% in the year.

Borough-wide property tax mill rate was set at 7.2 mills. The lowest mill levy was 5.0 mills in 1971, while the record high of 16.5 was set in 1969.

Tax revenues for the Borough as a whole leveled off in 1978 compared to the previous year. Borough sales tax receipts increased by 5% and property taxes by 2% during this period. In the City of Fairbanks, property tax revenues increased 8%, but sales tax receipts declined 15% from 1977. 1976 represented the peak year for City of Fairbanks sales tax receipts, while property tax and sales tax revenues for the Borough have continued to increase slightly through 1978.

TAX REVENUE BY SOURCE
(In Thousands of Dollars)
City of Fairbanks and Fairbanks North Star Borough
Fiscal Years 1969-1978



Alaska Railroad Operations

During 1978, Alaska Railroad operations experienced a 17% decrease in revenues over the preceding year as well as a 7% decline in expenditures for the same period. The railroad's overall operational deficit increased by 185% to a loss of $5 million for the year, compared to 1975 when a record profit of $5.8 million was earned. Capital expenditures also declined 59% in 1978 compared to 1976's peak figure of $8.6 million. The number of passengers carried by the Railroad, however, rose 22% in 1978 to a record level of 126,277 persons.

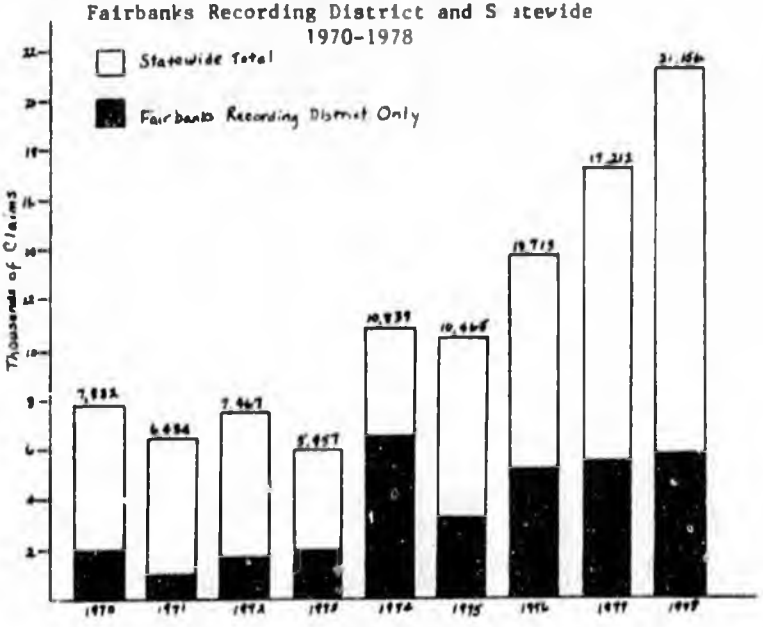
Mineral Production

The value of mineral production, excluding oil and gas, appears to have peaked for Alaska in 1976 at a level of $241.8 million. In 1977, that figure declined 14% to $207.8 million. Preliminary figures for 1978, which also include estimates by the Community Information Center, indicate a further decrease in the value of mineral production to as low as $158 million.

In 1977, sand and gravel production account for $170 million, or 82% of Alaska's total mineral output. A similar ratio appears to have continued in 1978, where $127 million of the estimated $158 million or 80% total mineral output was sand and gravel.

By comparison, mineral production in the Yukon Territory, Canada, was valued at $209.5 million in 1977 and reached an estimated $228.2 in 1978. The Yukon levels do not include sand and gravel. The value of production of metals and coal was 553% greater in 1977 and as much as 735% greater in 1978 for the Yukon than for Alaska.

NEW MINING CLAIMS
Fairbanks Recording District and Statewide
1970-1978



Active Mining Claims

The number of new and continuing mining claims in the Fairbanks District increased 6% in 1978 over the previous year to a total of 5,769 claims for the area. This figure represents a 12% decline from the 1974 peak year level of 6,554 new and continuing claims.

Statewide, active claims rose 17% to a total of 72,096 in 1978, which also constitutes a record number of claims for the state as a whole.

POPULATION

MAP OF FAIRBANKS METROPOLITAN AREAS
Showing Planning Areas

Population

According to estimates and projections prepared by the Borough Planning Department in June 1978, the population of the Fairbanks North Star Borough for 1978 stands at 60,845. An estimated 27,116 people reside in the City of Fairbanks and 33,729 live in the rest of the Borough.

These figures indicate a 13% decrease in the Borough's population from 1977 and a 16% drop from the Borough's peak population during oil pipeline construction in 1976. Current population estimates reflect, however, a 21% increase in 1978 over the 1973 pre-pipeline level of 50,450 persons.

PROJECT AND PROGRAM SUMMARY

Prepared by the staff
of the Fairbanks Town
and Village Association

JANUARY 1980

"Serving the People and Communities of Interior Alaska"

INTRODUCTION

As the economic condition of the Interior continues to be unsettled a broad consensus on a detailed strategy of economic diversification and resource development becomes increasingly urgent.

During 1978 and 1979 the Association, through the Board of Directors, the staff, and several citizens' advisory groups, has been involved with setting general goals, objectives, and specific tasks necessary for an intensive diversification and strengthening of the economic base of Fairbanks and the Interior of Alaska.

The first step in the strategy regional goals and objectives were established by the Board in December of 1978 followed, in March, 1979, by Board approval of a list of 24 specific tasks designed to carry out the goals and objectives. FTVAD staff is now raising the money necessary to carry out these tasks.

These decisions of the Board were published in The Overall Economic Development Program for Fairbanks and the Interior of Alaska ... Through 1981 in September of this year.

This pamphlet, the "Project and Program Summary" lists each of the 24 tasks with information on budget and staffing estimates, program and project calendars and current status as of the publication date.

The pamphlet is designed for regular updating and publication in order to keep the Board of Directors and other interested people and organizations advised of our development activities.

Naturally I hope each member of the Board will carefully review each of the tasks and offer comment, criticism and recommendations to myself and other members of the staff and Board.

If you need more information on the tasks please contact me.

Sincerely,

Jerry Smetzer
Executive Director

JES:bjs

DEFINITIONS

The 24 "tasks" described in this document are the working assignments for FTVAD staff as established by the Association's Board of Directors for the two-year period ending December 31, 1981.

In the "Budget and Staffing Estimate" four columns of numbers are presented which show staff estimates of additional financing over and above currently available financing necessary to fulfill the tasks.

"Activity codes" are used to describe the type of funds needed. The codes help us narrow the number of likely places to look for financing among several private foundations, and state, federal and local government agencies involved in economic development financing.

The codes are defined as follows:

Development funds are used to explore a concept to determine if there is existing work underway by other agencies, firms or organizations, and to develop a preliminary assessment of needs, expressions of organizational interest and identification of problems, opportunities and institutional obstacles.

Planning Funds are used when there is a need to organize the interests of several parties in a particular concept in order to establish common goals and objectives, a clearer definition of need, a catalogue of available resources and an identification of particular problems which require a more concentrated effort for solution.

Technical Assistance Funds are used to find technical solutions for well-defined problems in the way of a desirable project or program for which there is clearly insufficient current knowledge or an inadequate technical statement of need.

Capital Funds are used for design, development, engineering and architectural work, land acquisition and construction and equipping of facilities.

Comprehensive Funds will likely include all of the above activities, and may include other types of funds such as loan funds.

A summary of projected additional funds and staff by task and keyword code appears on pages 39 and 40 of this pamphlet.

MAJOR PROGRAM CATEGORY #1

ECONOMIC DEVELOPMENT

Regional Economic Development is a long term process of planning, promotion, project development, industrial recruiting, community development and institutional change organized and conducted for the primary purpose of strengthening the economic base of a region.

A strong regional economic base has two parts: 1) diversified export industries which bring money into the region; and 2) diversified import substitution industries which retain money in the region long enough to enable multipliers to spread economic benefits to the region's residents.

The Association's "region" is the Interior of Alaska, and the corporate purpose is economic development. The Economic Development category was established by the Board in order to provide general guidance for the conduct of the other six major program categories, and a method of relating goals and objectives in the other six major program categories to the primary purposes of the corporation.

Within the Economic Development Program six tasks have been established by the Association's Board of Directors for staff work through October, 1981.

These are listed by task number, keyword code, and page number below. Information about each task includes the budget and staffing estimate, program calendar and current project status.

Information about the goals and objectives of the Association's Economic Development Program can be found on pages 37 and 38 of The Overall Economic Development Program for Fairbanks and the Interior of Alaska ... Through 1981, published September, 1979.

TASK	KEYWORD CODE	PAGE NO.
Task #1	Economic Diversification Strategy	6
Task #2	Small Industries Development	7
Task #3	Business Loan Specialists	8
Task #4	Fairbanks Downtown Revitalization	9
Task #5	New Loan Funds	10
Task #6	Decentralization	11

MAJOR PROGRAM CATEGORY: Economic Development

GOAL A: Greater Economic Diversification

Objective: Development of greater public awareness of the economic needs of the District

Board Policy: Regional economic development policy has been adopted and an Economic Development Commission created to carry it out. Application has been made to EDA for a Title IX Strategy Grant for the coming year. We strongly urge EDA to approve the grant. FTVAD is particularly interested in the possibility of securing a Title IX revolving loan fund program if it is a recommendation of the Title IX Strategy Program.

Task #1: To work with the Title IX Task Force on Economic Development in order to add 3,000 permanent jobs to the Interior economy by 1983 thus reducing the unemployment rate in the Fairbanks Labor Market area to 5%.

KEYWORD: ECONOMIC DIVERSIFICATION STRATEGY

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Technical Assistance	50,000	5,000	$5,000

b. Program Calendar:

01/01/80 01/31/81

c. "Task" Status as of January, 1980:

EDA Title IX Strategy Development Grant approved - Economics Research Associates (ERA) of San Francisco contracted for the program. Program is underway with active investigations into each of seven "target areas". Additional funds to finance the strategy are being sought from the state Legislature and from private foundations. ERA is currently assembling and analyzing economic data for the region and will produce an "Economic Trend Memo" in February for review by the Task Force on Economic Development.

OEDP published - 150 copies distributed.

FTVAD brochure published - 1,000 copies distributed.

Tok Forum Report published - 425 copies distributed.

Minutes of Executive Committee and Board meeting published - 50 copies distributed by January 30, 1980.

FTVAD is requesting expedited consideration of a grant by the State of Alaska for $100,000 toward the annual operating costs of the development program. If approved the state will share the basic costs of the program equally with the borough and the federal Economic Development Administration.

MAJOR PROGRAM CATEGORY: Economic Development

GOAL: Greater Economic Diversification

Objective: Promotion of cottage industries and small industries within the District

Board Policy: The Board has created a committee to be chaired by Mellie Terwilliger of Tok and titled the Small Industries Committee to look into the problems and opportunities associated with home industries, appropriate technology, arts and crafts, local inventions, and energy conservation. The committee should, with staff assistance, prepare a brief report and a suggested program by early 1980, followed by a request for technical assistance funds from EDA.

Task #2: Assist 100 residents start new small businesses by 1983.

KEYWORD: SMALL INDUSTRIES DEVELOPMENT

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Development	125,000	25,000	2 man/yrs.

b. Program Calendar:

07/01/80 ---------- 07/31/85

c. "Task" Status as of January, 1980:

Joint proposal developed by FTVAD and Adult Learning Programs of Alaska Incorporated for a five-year program; first year budget $125,000. FTVAD/ALPA representatives have prepared a project "abstract" and have discussed possible financial support with the borough, the Office of the Governor and the Alaska Renewable Resources Corporation. Additional funds are being sought from private foundations.

MAJOR PROGRAM CATEGORY: Economic Development

GOAL A: Greater Economic Diversification

Objective: Develop new innovative financing programs to encourage small business enterprises and promote passage of legislation to assist new industry to become established.

Board Policy: FTVAD will develop the staff capability for greater use of business and industrial loan guarantee programs of state and federal governments.

Task #3: Add two business loan specialists to Fairbanks during 1980.

KEYWORD: BUSINESS LOAN SPECIALISTS

a. Budget and Staffing Estimates:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Development	100,000	20,000	2 man/yrs.

b. Program Calendar:

07/01/80 ---------- Continuous ----------

c. "Task" Status as of January, 1980:

Program development will depend on final EDA legislation adopted by Congress, the findings of the Title IX Task Force on Economic Development, and our discussions with state officials representing agencies involved with business loan, venture capital, and permanent fund programs.

See also Task #2 the Small Industry Development Program.

EDA legislation is still pending in Congress.

MAJOR PROGRAM CATEGORY: Economic Development
GOAL B: Greater Development of Tourism

Objective: Restore historic site identification and preservation program in Fairbanks and within Interior communities

Board Policy: Fairbanks' history is a major tourist attraction. Through local initiative and federal assistance programs such as the Community Development Block Grants, much has been accomplished toward the preservation of historical sites in Fairbanks, and the beautification and revitalization of downtown, and particularly, to develop a more attractive area for the expansion of office space and the development of a major hotel and convention center for tourists and for increasing numbers of international business travelers. One of several downtown revitalization projects now being discussed by the FNSB and the City of Fairbanks is the development of a joint municipal and school district office building. EDA Title I funds are viewed as a key to a comprehensive downtown revitalization program by the Title IX Task Force on Economic Development, and a project recommendation will be developed in the fall. The Association will work with the Alaska Native Tourism Association to assist in expanding tourism in rural communities that want tourism.

Task #4: Develop Fairbanks downtown revitalization policy and project priorities based on the preservation of Fairbanks' historic character.

KEYWORD: FAIRBANKS DOWNTOWN REVITALIZATION

NOTE: TANANA MISSION RESTORATION is a corollary project within this objective because of the historic character of the mission and its potential relationship to tourism in that community.

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Planning	50,000	10,000	1 man/yr.

b. Program Calendar:

01/01/80 ---------- 01/31/82

c. "Task" Status as of January, 1980:

Downtown revitalization is part of the Title IX Strategy Development Program and will be a major subject of investigation by Economics Research Associates. The City of Fairbanks has allocated $25,000 to supplement Title IX funds already allocated toward this effort. Discussions are being conducted by the Task Force on Economic Development, the City of Fairbanks, the Fairbanks North Star Borough, FTVAD and the Downtown Association. Currently ERA is preparing a memorandum concerning Downtown Revitalization as part of the Investment Strategy which will be available in early February.

The City of Tanana has requested FTVAD assistance in preserving the old mission church. FTVAD is conducting discussions with the Army, the Episcopal Church and the City of Tanana on this project.

We are seeking funds from private foundations for the Tanana Mission Project.

MAJOR PROGRAM CATEGORY: Economic Development

GOAL C: Improved Financial Services in the District

Objective: Promote the improvement of the availability of financing economic development throughout the district

Board Policy: The Association supports a strengthened role for the Economic Development District in the Interior of Alaska, particularly in its capability to use loan funds available for desirable economic development projects.

Task #5: FTVAD will act as a catalyst to develop $50,000,000 in new loan funds for Interior economic development by 1981.

KEYWORD: NEW LOAN FUNDS

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
D-Comp.	50,000,000	50,000	1 man/yr.

b. Program Calendar:

07/01/80 ---------- 01/31/82

c. "Task" Status as of January, 1980:

FTVAD has begun contacting state and federal agencies with loan authority and loan funds for economic development ventures, such as the Renewable Resources Development Corporation, State of Alaska Department of Commerce and Economic Development, federal EDA, SBA, and FmHA. FTVAD has also contacted over 30 private foundations for information on economic development financing. The Title IX Investment Strategy could result in a multi-million dollar revolving loan funds for economic development which will be available for economic development financing in the community in late 1980.

MAJOR PROGRAM CATEGORY: Economic Development

GOAL D: Increased Trade and Service Facilities in the District

Objective: Decentralize and improve government service delivery into the regional and sub-regional growth centers of the District

Board Policy: Federal Decentralization. FTVAD recommends that a single state Title V commission for Alaska headquartered in Fairbanks be established by the United States Department of Commerce under the authority of The Public Works and Economic Development Act of 1965 as amended.

State Decentralization 1) The Governor should by Administrative Order immediately institute a common system of regional planning, development, and government administration boundaries within the legal boundaries formed by the 12 native regional corporations created under the authority of the Alaska Native Claims Settlement Act of 1971.

2) The Governor should by Executive Order begin immediately the decentralization of administrative decision making into these regions by divesting agencies of the state of their accumulations of centralized authority which were not explicitly granted by the constitution.

3) The Governor should by Executive Order begin immediately the democratization of the state's administration of planning, development, project recommendation and priority setting activities, and the delivery of needed government services within these regions by financing and contracting their provision through fiscally sound, locally controlled non-profit, quasi-governmental corporations conducting related activities.

Local Decentralization. Efforts by the Tanana Chiefs Conference Office of Planning to establish sub-regional planning commissions in the Interior outside the Fairbanks North Star Borough will continue to be supported by FTVAD.

Task #6: Assist TCC with training sub-regional planning staffs in community capital improvement methodology in relation to established local economic development goals. Once such goals are established by rural communities, FTVAD will assist, on request, in project development and financing.

KEYWORD: DECENTRALIZATION

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Planning	20,000	4,000	¼ man/yr.

MAJOR PROGRAM CATEGORY: Economic Development

GOAL D: Increased Trade and Service Facilities in the District (Task #6 Cont.)

b. Program Calendar:

04/01/80 ---------- 04/31/82

c. "Task" Status as of January, 1980:

Federal Decentralization S.3626 contains authority for the creation of a single state Title V commission for Alaska. No action is expected in this session of Congress.

Local Decentralization Cooperative efforts between FTVAD and the Tanana Chiefs Conference are continuing on methods of integrating FTVAD's rural capital improvements methodology with comprehensive sub-regional planning activities with TCC.

Board policy on state decentralization has been conveyed to the Office of the Governor. FTVAD staff is seeking private foundation funds for an analysis of the administrative functions of state government to determine which of these functions should more appropriately be relocated and conducted in the Interior.

A special committee comprised of William Stringer, Fairbanks North Star Borough Assembly and Ron Punton, Fairbanks City Council has been formed to investigate this question, and prepare an appropriate resolution for adoption by both municipal governments.

MAJOR PROGRAM CATEGORY #2

TRANSPORT DEVELOPMENT

Fairbanks has always considered itself the supply and service center for Interior and Northern Alaska. The relationship between transportation system development and economic development is fundamental. Therefore, the development of improved transportation systems in the region will always be a priority activity of the Fairbanks Town and Village Association.

Interior and Northern Alaska rely almost entirely on aircraft for year round transport of goods, services and people. Air is supplemented by river and sea-going barge operations during the few summer months. Within this category of activity therefore, our goal is to improve these two dominant modes with freight, rail and public transportation facilities as well.

The relationship between Fairbanks and international air commerce has important implications and significant economic potential in service and supply necessary for development of northern Alaska and for tourism. Development of the potential of the Fairbanks International Airport is a major economic goal of the Fairbanks community.

Within the Transport Development Program three tasks have been established by the Association's Board of Directors for staff work through October, 1981.

These are listed by task number, keyword code, and page number below. Information about each task includes the budget and staffing estimate, program calendar and current project status.

Information about the goals and objectives of the Association's Transport Development Program can be found on pages 39 and 40 of The Overall Economic Development Program for Fairbanks and the Interior of Alaska ... Through 1981, published September, 1979.

TASK	KEYWORD CODE	PAGE NO.
Task #1	Fairbanks Airport Development	14
Task #2	Rural Airport Development	17
Task #3	Local Service Roads	18

MAJOR PROGRAM CATEGORY: Transport Development

Objective: Promote the improvement of multi-modal transportation systems consistent with the local community plans

Recommendation #1 of the Title IX Task Force on Economic Development:

DEVELOPMENT POLICY AND PROJECT PRIORITIES FOR THE FAIRBANKS INTERNATIONAL AIRPORT

Intensive development of the Fairbanks International Airport is essential in order to strengthen the economic base of Fairbanks and the interior region of Alaska. The full potential of Fairbanks as the supply, service and transportation center for the north depends on the success of development work at the airport, and can be accomplished best through continued cooperation by public and private interests;

Therefore, the undersigned believe that these cooperative efforts should be intensified, and have agreed that the following development priorities be pursued immediately. Further we respectfully request the active support and participation in this development effort by state and federal agencies and urge:

1. That the State of Alaska support the development of a Fairbanks Port Authority for financing, planning, operation, maintenance, and future development of the Fairbanks International Airport.

2. That the State of Alaska and affected agencies of the federal government support the designation by the U.S. Department of Commerce of a Foreign Trade Zone at the Fairbanks International Airport.

3. That design work on the bonded warehouse and related facilities essential to the operation of a Foreign Trade Zone and to the system of handling domestic air freight at Fairbanks begin immediately to enable a construction start no later than July 1, 1980.

4. That design work on expanded international passenger facilities including restaurant facilities at the terminal building begin immediately to enable a construction start no later than July 1, 1980.

5. That design work on a hydrant fueling system begin immediately to enable a construction start no later than July 1, 1980.

6. That all design work be conducted by means of a rigorous process which will assure full and complete participation by representatives of the community and by industrial, state and federal agency representatives with interests in the financing, operation, and maintenance of these facilities.

Finally, as Fairbanks residents, we recognize the need to establish a single point of contact for the development of public policy and the conduct of negotiations on behalf of the Fairbanks community during the next several months.

Therefore, we pledge our full support for the immediate creation of an interim Fairbanks International Airport Development Commission. The Commission, sponsored by local municipal and borough governments in full cooperation with civic and private sector interests, will be responsible for the conduct of this program until such time as a Port Authority has been created.

/s/ JOHN A. CARLSON, CHAIRMAN Title IX Task Force on Economic Development. Aug. 1, 1979

MAJOR PROGRAM CATEGORY: Transport Development (Task #1 Continued)

Task #1: FTVAD, as the administrator of the Title IX program, will with the guidance of the Task Force seek the implementation of Recommendation #1. More specifically, the Task Force has requested that FTVAD seek the development of a port authority and sponsor the request for designation of a Foreign Trade Zone.

KEYWORD: FAIRBANKS AIRPORT DEVELOPMENT

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Development	100,000	20,000	1 man/yr.

b. Program Calendar:

07/01/80 ---------- 01/31/82

c. "Task" Status as of January, 1980:

After five years of effort the following events have occurred since May, 1979:

May 1979: 55 international cargo flights began refueling at FAI.

July 1979: Governor Hammond approved an Airport Revenue Bond statute sponsored by Senator Fahrenkamp providing 8½ million dollars for a cargo facility, hydrant fueling system, terminal expansion, and ramp work at the airport.

August 1979: The Task Force on Economic Development unanimously approved Recommendation #1.

An Airport Development Commission has been formed, chaired by Terry Palczer. Members of the Committee include: Richard Wien; Gerry Meyers; Mike Ribar; and Don O'Connor.

October 1979: Airport Master Plan update begins.

November 1979: Japan Airlines signs two-year fuel supply contract with North Pole Refining; adds ten more transiting international cargo flights through Fairbanks; and, contingent on the development of appropriate international passenger handling facilities at the terminal, holds out the possibility of one or more daily jumbo passenger flights.

December 1979: Economics Research Associates advises on developing a port authority and foreign trade zone at Fairbanks.

A memorandum on the possible creation of a Foreign Trade Zone at the Fairbanks International Airport perhaps linked with the operation of the airport under a Fairbanks based port authority is anticipated within a few months.

MAJOR PROGRAM CATEGORY: Transport Development

Task #2: FTVAD will seek improvements at six rural airports based on the recommendations of the Rural Capital Improvements Program report during 1980.

KEYWORD: RURAL AIRPORT DEVELOPMENT

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Capital	500,000	12,500	⅛ man/yr.

b. Program Calendar:

04/01/80 04/30/81

c. "Task" Status as of January, 1980:

Proposals for rural airport improvements by the Office of the Governor and the Legislature are being analyzed to assure that rural interior airports are included where needed.

MAJOR PROGRAM CATEGORY: Transport Development

Objective: Improve local and district road systems.

Board Policy: During FY '79 three local service road projects were proposed for Anvik, Grayling and Holy Cross in the Lower Yukon River area. An adverse determination by the courts in December 1978 prevented the use of gravel necessary for these projects. FTVAD is working with the state to overcome the gravel problem. If a solution is found we urge EDA to finance a portion of the costs of these projects, with the State Department of Transportation and Public Facilities.

Task #3: Complete LSR&T program in Anvik, Grayling, Holy Cross by 1981.

KEYWORD: LOCAL SERVICE ROADS

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Capital	---	5,000	---

b. Program Calendar:

12/80 07/81
* --- *

c. "Task" Status as of January, 1980:

Inactive pending resolution of gravel ownership and/or change in DOTPF policy prohibiting use of LSR&T funds for gravel purchase.

Decision of Board on gravel purchase policy and use of LSR&T funds for purchase of rights-of-way has been referred to DOTPF Commissioner Robert Ward.

MAJOR PROGRAM CATEGORY #3

COMMUNITY FACILITIES DEVELOPMENT

In the small rural communities of Interior Alaska local facilities for community health, education, and public services are only marginally adequate and more often than not do not exist. Because public facilities - i.e. community owned and operated public facilities essential for needed public services - are essential for community growth and development as well as the regulation of growth and the protection of traditional community values, the Association has committed itself to a multi-year program of facility development in the 50 small cities, villages and settlements in the Interior of Alaska.

Because money for these facilities is scarce and the need overwhelming the method by which these needs are addressed and facilities financed becomes the major task. FTVAD has proposed a capital improvement project development program called the Multipurpose Community Center. The MPCC is not a predesigned facility. It is, rather, a process the community can use to overcome deficiencies in its existing buildings and facilities, and provide for needed new improved and expanded facilities. Ideally facilities which result from the MPCC process should be energy efficient, revenue producing, relatively maintenance free, and compatible with the community's goals and objectives.

Fourteen communities have requested FTVAD assistance in starting the MPCC process. A major unresolved problem with the MPCC is the absence of a methodology for combining the community's facility interest with the financing and design processes of state, federal and local governments. Overcoming this problem of conflicting institutional structures is a major objective in this category.

Within the Community Facilities Development Program five tasks have been established by the Association's Board of Directors for staff work through October, 1981.

These are listed by task number, keyword code, and page number below. Information about each task includes the budget and staffing estimate, program calendar and current project status.

Information about the goals and objectives of the Association's Community Facilities Development Program can be found on page 41 of The Overall Economic Development Program for Fairbanks and the Interior of Alaska ... Through 1981, published September, 1979.

TASK	KEYWORD CODE	PAGE NO.
Task #1	McGrath Multipurpose Building	20
Task #2	Fort Yukon Utility Building	21
Task #3	Fairbanks Downtown Revitalization	22
Task #4	Rural Capital Improvements	23
Task #5	Rural Capital Improvements	24

MAJOR PROGRAM CATEGORY: Community Facilities Development

Objective: Continued improvement and development of facilities to meet educational, cultural and recreational needs of District residents

Board Policy: After a year of discussions with community leaders about facility needs, the Association has compiled a list of about 100 needed projects. Additionally FTVAD - by means of a contract with DOTPF to identify code deficiencies in state buildings in the McGrath area - continuing to develop data necessary to justify an intensive facility financing program in the region. Two communities, McGrath and Fort Yukon, have facility proposals for which EDA financial participation is essential both for construction financing and for further development of a methodology for a multipurpose community center. Those are:

1. The McGrath Multipurpose Building
2. The Fort Yukon Warm Storage Facility

Task #1: Assure construction of McGrath MPCC facilities in 1980.

KEYWORD: McGRATH MULTIPURPOSE BUILDING

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Capital	500,000	12,500	¼ man/yr.

b. Program Calendar:

10/01/79 10/31/80

c. "Task" Status as of January, 1980:

Project is on schedule for a spring 1980 construction start.

MAJOR PROGRAM CATEGORY: Community Facilities Development

Task #2: Assure construction of Fort Yukon Warm Storage facility in 1980.

KEYWORD: FORT YUKON UTILITY BUILDING

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Capital	500,000	12,500	¼ man/yr.

b. Program Calendar:

10/01/79 10/31/80

c. "Task" Status as of January, 1980:

Project is on schedule for construction start in spring, 1980.

MAJOR PROGRAM CATEGORY: Community Facilities Development

Task #3: Cooperative public and private efforts to beautify and revitalize downtown Fairbanks will likely result in opportunities for expanded public works activity and related private investment in office space and tourism and convention facilities. The Title IX Task Force on Economic Development will consider revitalization projects and investments as part of its strategy program in coming months.

KEYWORD: FAIRBANKS DOWNTOWN REVITALIZATION

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Capital	10,000,000	100,000	2 man/yrs.

b. Program Calendar:

04/01/80 ---------- 04/30/83

c. "Task" Status as of January, 1980:

Economics Research Associates of San Francisco will develop, with the Task Force on Economic Development, the Downtown Association, the North Star Borough and FTVAD, a strategy and project priority schedule for downtown revitalization by April, 1980. A recommendation by ERA on the coordination of various activities affecting downtown Fairbanks is anticipated early in February.

MAJOR PROGRAM CATEGORY: Community Facilities Development

Task #4: Using funds available from the Farmers Home Administration of the U.S. Department of Agriculture develop an improved methodology for the coordination of design work for public facilities in small rural communities with local economic development goals in the following communities:

Anvik	Galena	Huslia	Nulato
Birch Creek	Grayling	McGrath	Ruby
Fort Yukon	Hughes	Minto	Shageluk
Delta Junction			Takotna

KEYWORD: RURAL CAPITAL IMPROVEMENTS

a. Budget and Staffing Estimate:

Activity Code	Estimated Additional Cost	Annual Management Cost	Program Staff Required
Technical Assistance	100,000	10,000	$10,000

b. Program Calendar:

04/01/80 * --------- * 04/30/81

c. "Task" Status as of January, 1980:

Bob Grove, former member of Weatherization and Housing Rehabilitation field crew and Field Supervisor for Iditarod Inventory and Condition Surveys began work as FmHA Program Coordinator on November 8, 1979.

Mr. Grove is currently working closely with the City of Fort Yukon and the City of Delta Junction on active capital projects proposed for construction in early 1980. Additionally, several meetings have been conducted in Fairbanks to discuss current CIP priorities with representatives of Anvik, Minto, Nulato, Shageluk and Takotna.
