We feel that the negotiations table is a proper setting to discuss these duties and requirements placed upon teachers that have been narrowly construed to be policy matters rather than conditions pertaining to the fulfillment of our professional duties.

ANALYSIS OF HOUSE BILL 453

Department of Labor
Office of the Commissioner
Phone: 465-2700

April 19, 1979

Title: "An Act relating to labor relations between school boards and other public employers and their employees."

This legislation would make it mandatory for all school boards to permit their non-certificated employees to enter into collective bargaining and they would be covered by the Public Employment Relations Act. This bill would cover persons that have been barred form entering into collective bargaining under present law. The Department of Labor acts as the Labor Relations Agency for all public employees except State employees and would have to take on the added duties for these employees to conduct elections, hold hearings and settle grievances throughout the state.

Section 1. AS 14.20.550 sets out what the school board must negotiate with the certified teachers on, and (b) gives the Department of Labor the authority to settle any disagreements over working conditions if the certificated employees and school boards cannot agree.

Section 2. AS 23.40.100(b) makes it mandatory that no representation be placed on the initial election ballots, for elections conducted under the Public Employment Relations Act.

Section 3. AS 23.40.200(c) prohibits non-certificated employees of school boards from engaging in a strike.

Section 4. AS 23.40.250(5) and (6): (5) takes away the exemption for non-certificated school board employees. (6) makes a school board a public employer under PERA.

Section 5. AS 23.40.250 defines school board for PERA.

Section 6. makes it mandatory for school boards to permit their non-certificated employees to enter into collective bargaining covered by the Public Employment Relations Act.

Section 7. Any collective bargaining agreement already entered into are not covered by these laws.

Fiscal Impact - The bill would require one new position with adequate funding for additional travel and other non-personal services expenses.

Conflicting Bills - Senate Bill 213

Departmental Position - Neutral

CITY AND BOROUGH OF JUNEAU SCHOOL DISTRICT
P.O. BOX 808 • DOUGLAS, ALASKA 99824

February 5, 1980

The Honorable Mike Miller
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Miller:

The Juneau School Board wishes to go on record as being opposed to House Bill 453 and House Bill 487 for the following reasons and respectfully request that you do not support them.

House Bill 453 provides the right to strike to all employees of the School District, and in addition, provides mandatory bargaining to all employees with broad interpretations to what must be bargained. At the present time the Juneau School District negotiates with their classified employees so the legislation is not necessary, and above all, should not include the right for any employees to strike. Please remember that school boards in Alaska cannot raise money on their own, but must come to the Borough Assembly or Legislature for additional revenue. A striking action against the Board allows them no additional revenue with which to resolve the strike. Therefore, educational programs are cut back.

House Bill 487 on binding arbitration removes the decision making authority from the elcted representatives of the people. Instead of leading to a solution of the problem by serious negotiations by both parties to avoid arbitration, often one or the other parties will hold out for arbitration. Historically arbitrators split the difference and everyone holds out with extreme offers as tactical maneuvers.

It is our opinion that the State Board of Education request to the Governor to form a Blue Ribbon Committee to seek the best alternative to the serious problems of negotiation should be honored. Passage of legislation before the study would be premature.

With the legislatures having second thoughts over the collective bargaining of State employees and contemplating some modifications, it seems appropriate to allow a study of the problems to take place before enacting legislation that may not serve any useful purpose.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The Department must assume that all non-certificated employees of school boards will enter into collective bargaining. It would require travel to all areas of the state to conduct elections, hold hearings, resolve grievances and unfair labor practices.

It would require the addition of one W/H Investigator I, Range 16, stationed in Juneau. $15,000.00 in additional travel funds to travel to all of the remote areas, $10,000.00 contractual for legal services for the Attorney General's Office, and additional printing costs. $200.00 for commodities and $1,000.00 for equipment; this would include a desk at $329.71, chair $135.63, bookcase $102.04, calculator $209.50 and recorder $223.00.
6% inflation factor used in expenditure analysis.

Representative William Akers
Pouch V-State Capitol
Juneau, Alaska 99811

Dear Billy:

I have heard about HB 489 which would require School Boards to bargain with classified employees.

We here do this already. Every year our certified and classified staffs negotiate an annual agreement with the Shcool Board. Obviously we are in favor of both classified and certified employees negotiating with the School Board.

Our negotiations with both groups is held within the parameters of the recent Alaska Supreme Court decision which outlines negotiable and non-negotiable items for certified public school teachers in Alaska.

We would very definitely oppose any legislation which would give our certified staff the right to strike. I understand this is what some of the House HESS Committee would like to see happen since they are talking about placing these employees under the State Public Employees Relations Act.

With every best wish, I remain,

Yours sincerely,

Walter E. Brown

February 4, 1980

The Honorable Thelma Buchholdt
Alaska State House of Representatives
Pouch V, State Capitol Building
Juneau, Alaska 99811

Dear Representative Buchholdt:

The Kodiak Island Borough School District opposes the passage of HB 487 providing for binding arbitration in teacher negotiations. Neither binding arbitration or right to strike laws are the only solution to solving collective bargaining issues. It has been proven that good faith negotiations, presently provided for in State law, do work. Salaries for teachers in Alaska are comparable with other states that provide for both more restrictive and more liberal solutions to collective bargaining. In fact, we question that binding arbitration or the right to strike is a solution at all. They both create problems for local citizens by removing the right to locally determine the fate of their schools, and in the case of a strike, cause an unnecessary division in the parents, students and other constituents of the local district. The point is--education is a local responsibility. State law should not provide for outside third-parties to mandate local outcomes and remove the control of schools from local citizens.

As we stated earlier, the collective bargaining process (good faith negotiations) as it exists now, works. Currently, elected board representatives and representatives of teacher groups can and do sit down to work out mutually acceptable agreements. The give and take of negotiations provides an acceptable process which does function adequately. Can teachers honestly say that the negotiations process, as provided in Alaska State law, does not give them with a wage commensurate with teachers throughout the nation, and in keeping with other Alaskan professionals? We think not.

The law protects the teacher's right to a job by provisions for continuing the contract. The law protects the citizen's rights by mandating local control. Teachers and elected Boards have the responsibility to negotiate. Providing for binding arbitration or the right to strike will erode and eventually destroy that process.

We urge you to reject any proposals that provide for State laws which result in the abdication by local boards and teacher associations of their collective responsibility to negotiate.

Sincerely,

John E. Anttonen

JOHN E. COFFEE
SUPERINTENDENT

January 30, 1980

Representative Thelma Buchholdt
AK State House of Representatives
Pouch V, State Capitol Building
Juneau, AK 99811

Dear Representative Buchholdt:

I am writing because of my concern about two pieces of legislation that are before your H. E. S. S. Committee at this time. They are H.B. 487 and H.B. 453. The passage of these bills would result in the following:

(1) give teachers the right to strike
(2) allow school district classified employees the right to organize and strike
(3) expand what is bargainable
(4) provide binding arbitration in teacher bargaining

I believe that these bills together constitute a tremendous threat to local decision making and the local school board's right to operate a district responsibly and make some final decisions.

Binding arbitration would effectively place decision making authority in the hands of an entity outside the school district. This would be in direct contradiction to the local control theory of government. School boards are elected by law to manage the affairs of the district. They are, further, required by law to bargain in good faith on various items. This is currently done throughout the State. The result has been, generally, the highest paid teachers in the nation, working, in my view, in some of the best working conditions in the nation. I would refer you to the 1978-79 Alaska Association of School Boards publication entitled Survey of School District Budgeted Revenues, Expenditures, and Employee Benefits. It is my view that teacher unions are doing very well without having further advantages of binding arbitration, expanded bargainable items, and the right to strike.

In Sitka, we have recently received an advisory arbitrator's report that the Board has approved and that the teacher's union will vote on

soon. Hopefully, this will be the culmination of negotiations that began in November of 1978. If the report is accepted we will have a beginning teacher salary here of over $20,000. and a top salary of over $36,000.

The school boards I have worked for in Juneau and Sitka have been made up of reasonable people whose main motives have been to serve the community they represent. Final decision making authority on items that are bargainable must not be taken away from such local officials and given to an outside arbitrator.

I am hopeful that the representative of the Alaska School Board's Association, Mr. Robert Greene, and the respresentative of the Alaska Association of School Administrators, Dr. Cliff Hartman, will be listened to carefully by the H. E. S. S. Committee when they discuss the ramifications of these proposed bills. It is vital that such legislation not become law.

Sincerely,

John E. Coffee, Superintendent
Sitka Borough School District

Re: HB 487, Relating to Arbitration and Teacher Negotiations

Dear Representative Buchholdt:

The following comments regarding HB 487 (Arbitration and Teacher Negotiations) are submitted on behalf of the Lower Kuskokwim School District.

HB 487 would mandate that binding arbitration be utilized as the final step in employment contract negotiations between teacher bargaining groups and local school boards. The issue of binding arbitration, of course, has been fervently (and often emotionally) debated over the last few years, with the Anchorage teachers' strike of last Fall serving to punctuate emphatically the need for some orderly and reasoned approach to the problems of collective bargaining impasse. In fact, the path of resolution followed by the Superior Court in Anchorage in responding to that strike seems to indicate that, in the absence of a legislative framework for resolution of bargaining impasses, the courts will take it upon themselves to act as binding arbitrators, rather than permit the civil disobedience and disruption which can arise in teacher strikes. The task, therefore, becomes one of identifying alternative solutions to the impasse problem and analyzing their respective merits in the light of the various policy considerations which impact upon labor relations between public schools and their teacher employees.

Binding arbitration as proposed in HB 487 is one possible solution. However, until this approach can be examined and analyzed in comparison with other approaches to bargaining impasse, there is no assurance that this impasse resolution mechanism is the most appropriate one for education in Alaska. The state Board of Education recently adopted a resolution requesting the Governor to appoint a panel to study and develop alternative solutions to the bargaining impasse problem, and we understand that this panel will be appointed in the very near future. Consequently, we would suggest that further consideration on HB 487 be delayed until the Governor's panel has had an opportunity to

carry out its tasks and report back with its findings and recommendations. Once this has been accomplished, your committee could review the available alternatives and decide which of them most closely fits within the various policy considerations which are important to it in the area of education.

With respect to the particular approach to bargaining impasse proposed by HB 487, we have a couple of comments. First of all, it is not clear from the bill precisely what elements of the collective bargaining process are intended to be subject to binding arbitration. For instance, while it seems clear that binding arbitration would apply to disputes concerning salary and other financial benefits of teachers, it is not clear whether items regarding working conditions which do not directly involve financial considerations would also be subject to binding arbitration. Further, would the bill require that those items of negotiations which are not mandatory subjects of bargaining nonetheless be subject to binding arbitration? We would certainly hope not. Similarly, we also wonder whether the bill would require that disputes over questions of precise contract language be subject to binding arbitration, rather than just the general outlines of disputed proposals. Clarification of these kinds of questions seems vital if the impasse resolution procedure adopted by the Legislature, whatever its form, is to have any hope of achieving its desired effect.

Our second main point with respect to HB 487 deals with subparagraph (c) of proposed AS 14.20.585. That provision is apparently intended to preclude arbitrators from making awards which would result in increased costs to a school district. That goal, of course, has much to recommend it. However, from a practical point of view, it would be very difficult, if not impossible, to establish that a particular award would actually increase the cost of school district operations so as to require a municipality to increase its local tax rate or to require increased state funding for a regional educational attendance area, since the argument can always be made that additional costs in one area of operations can always be absorbed by reducing planned expenditures in some other area of the budget.

Sincerely yours,

LOWER KUSKOKWIM SCHOOL DISTRICT

TESTIMONY OF LORI SEARS, NEA-ALASKA BEFORE THE JOINT MEETING OF THE HESS COMMITTEE - April 7, 1979

Working Conditions for Teachers

As a result of the narrow view School Boards are taking on items that are negotiable and the 1977 Supreme Court decision, we are seeking the inclusion of working conditions as negotiable items between teachers and their school boards.

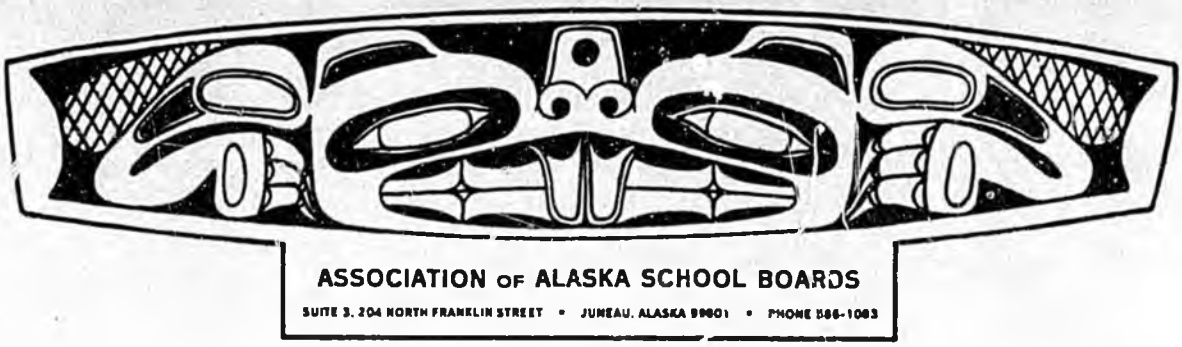
The recent DOE Task Force report on Regional High Schools cited the high teacher turnover, among other things, as an interruption in the educational process of rural children. We believe that that high turnover, in part, is due to teachers not being properly informed of the demands placed upon them that are beyond the normal duties of a classroom teacher.

Many accept a teaching position and then discover their duties include additional non-instructional duties that have not been spelled out in the teaching contract or the negotiated agreement. Some of the activities required of teachers by districts are:

- Repair and maintain the school's generators
- Be present at all Community School Committee meetings, Parent advisory meetings for: Indian Education, Johnson O'Malley, Title I and Special Ed
- Supervise and handle paperwork (tends to be massive) for: janitors, cooks, and aides
- Supervise lunch hours
- Provide/supervise community recreation and/or activities like: town movies, dances, PE activities in the gym
- Emergency repairs to schools (if the roof leaks, fix it)
- Haul freight to school from airport or river

In our urban areas, the greatest working condition is the number of students one is required to teach without regard for the type of student who is to be instructed. With mainstreaming of the exceptional child being an intregal part of our classrooms, teachers are finding classloads to be excessive when three or four severely handicapped youngsters are placed in already crowded classrooms. We support the education of all exceptional children in the least restrictive environment, but we do not feel proper attention has been given to the problems the classroom teacher faces when mainstreaming is done without regard to class size.

We feel that the negotiations table is a proper setting to discuss these duties and requirements placed upon teachers that have been narrowly construed to be policy matters rather than conditions pertaining to the fulfillment of our professional duties.



ASSOCIATION OF ALASKA SCHOOL BOARDS
SUITE 3, 204 NORTH FRANKLIN STREET • JUNEAU, ALASKA 99801 • PHONE 586-1083

FOUR BARGAINING PRINCIPLES

1. Collective bargaining is not a process whereby the general form, quantity or quality of publicservices are to be, or should be, determined. It is not a process for the management of public services.

2. Collective bargaining is not a device to determine public policy except as it may be used to determine the wages and economic benefits that are to be provided for public employees.

3. Collective bargaining is not, nor should it be, a substitute for the proper functioning of a representative government.

4. Collective bargaining should not be permitted to constrain the proper functioning of representative government.

THE RIGHTS OF PUBLIC EMPLOYEES TO STRIKE Vs. THE RIGHTS OF THE PUBLIC.

Because of the basic nature of public services wherein there is no real alternative choice to the established public service, special consideration must be afforded to the protection of both the interests of the general public and the interests of the public employees.

The interests of the general public dictate that any accommodation for collective bargaining and strikes in the public services... ..especially in the public schools... must carefully weigh, and balance, the desire of the employees to organize, bargain and strike against the rights of the public to expect the continued and uninterrupted provision of the public services that public policy has determined should exist. For example, permitting legalized strikes by public employees so upsets the process that the general public cannot withstand the imbalance of power that so results.

IOWA—

Personnel of the board shall be employed pursuant to the provisions of chapter 19A.

5. Members of the board and other employees of the board shall be allowed their actual and necessary expenses incurred in the performance of their duties. All expenses and salaries shall be paid from appropriations for such purposes and the board shall be subject to the budget requirements of chapter 8.

Referred to in sec. 20.3(5)

20.6 General powers and duties of the board. The board shall:

1. Administer the provisions of this chapter.

2. Collect, for public employers other than the state and its boards, commissions, departments, and agencies, data and conduct studies relating to wages, hours, benefits and other terms and conditions of public employment and make the same available to any interested person or organization.

3. Maintain, after consulting with employee organizations and public employers, a list of qualified persons representative of the public to be available to serve as mediators and arbitrators and establish their compensation rates.

4. Hold hearings and administer oaths, examine witnesses and documents, take testimony and receive evidence, issue subpoenas to compel the attendance of witnesses and the production of records, and delegate such power to a member of the board, or persons appointed or employed by the board, including hearing officers for the performance of its functions. The board may petition the district court at the seat of government or of the county wherein any hearing is held to enforce a board order compelling the attendance of witnesses and production of records.

5. Adopt rules in accordance with the provisions of chapter 17A as it may deem necessary to carry out the purposes of this chapter.

20.7 Public employer rights. Public employers shall have, in addition to all powers, duties, and rights established by constitutional provision, statute, ordinance, charter, or special act, the exclusive power, duty and the right to:

1. Direct the work of its public employees.

2. Hire, promote, demote, transfer, assign and retain public employees in positions within the public agency.

3. Suspend or discharge public employees for proper cause.

4. Maintain the efficiency of governmental operations.

5. Relieve public employees from duties because of lack of work or for other legitimate reasons.

6. Determine and implement methods, means, assignments and personnel by which the public employer's operations are to be conducted.

7. Take such actions as may be necessary to carry out the mission of the public employer.

8. Initiate, prepare, certify and administer its budget.

9. Exercise all powers and duties granted to the public employer by law.

20.8 Public employee rights. Public employees shall have the right to:

1. Organize, or form, join, or assist any employee organization.

2. Negotiate collectively through representatives of their own choosing.

3. Engage in other concerted activites for the purpose of collective bargaining or other mutual aid or protection insofar as any such activity is not prohibited by this chapter or any other law of the state.

4. Refuse to join or participate in the activities of employee organizations, including the payment of any dues, fees or assessments or service fees of any type.

Referred to in sec. 20.10

20.9 Scope of negotiations. The public employer and the employee organization shall meet at reasonable times, including meetings reasonably in advance of the public employer's budget-making process, to negotiate in good faith with respect to wages, hours, vacations, insurance, holidays, leaves of absence, shift differentials, overtime compensation, supplemental pay, seniority, transfer procedures, job classifications, health and safety matters, evaluation procedures, procedures for staff reductions, in-service training and other matters mutually agreed upon. Negotiations shall also include terms authorizing dues checkoff for members of the employee organization and grievance procedures for resolving any questions arising under the agreement, which shall be embodied in a written agreement and signed by the parties. If an agreement provides for dues checkoff, a member's dues may be checked off only upon the member's written request and the member may terminate the dues checkoff at any time by giving thirty days' written notice. Such obligation to negotiate in good faith does not compel either party to agree to a proposal or make a concession.

Nothing in this section shall diminish the authority and power of the merit employment department, board of regents' merit system, educational radio and television facility board's merit system, or any civil service commission established by constitutional provision, statute, charter or special act to recruit employees, prepare, conduct and grade examinations, rate candidates in order of their relative scores for certification for appointment or promotion or for other matters of classification, reclassification, or appeal rights in the classified service of the public employer served.

All retirement systems shall be excluded from the scope of negotiations.

Referred to in secs. 20.10, 20.17

20.10 Prohibited practices.

1. It shall be a prohibited practice for any public employer, public employee or employee organization to willfully refuse to negotiate in good faith with respect to the scope of negotiations as defined in section 20.9.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 455

"An Act relating to state aid to school districts and regional educational attendance areas which provide instruction in special education on a year-round basis; and providing for an effective date."

Like regular education programs, special education programs are of approximately nine (9) months duration. This bill would allow additional State funds to school districts that provide year-round special education services.

It is widely known that many children (and in particular handicapped children) regress in their development during the three-month period when services are not provided. Even though the Department of Health and Social Services (Handicapped Children's Program in the Division of Public Health) currently provides selected services during the summer months, there are usually gaps or breaks in the continuity of services under the present makeshift approach.

The Department recognizes the need for year-round special educational services and recommends that the priority for services should be directed toward the more severely handicapped students. In addition, the Department recommends that year-round education be provided for a student only when the service is written into the student's individual education plan.

The Department supports the passage of House Bill #455.

HB
479

Rural Alaska
Community Action Program, Inc.

February 1, 1980

Thelma Buchholdt, Chairperson
House Health, Education &
Social Services Committee
Pouch V
Juneau, AK 99811

Dear Representative Buchholdt:

We have reviewed with interest two bills pertaining to alcohol and drugs that have or will be coming before your committee: namely, HB 479 and the bill drafted by Governor Hammond's office (draft dated 8/27/79). We have also followed the testimony before the House HESS Committee and find ourselves in agreement with much of what was said about the seriousness of drug and alcohol problems, and the need to establish stiffer penalties for those who participate in illegal traffic and/or use of these substances.

Rather than comment on the pharmacological classification and the method by which substances have been classified and penalties proposed, we want to make some general statements concerning this problem.

1. For several years RurAL CAP has advocated enforcement of existing laws against illegal drug/alcohol traffic yet so far no legal or effective means has been established to support those villages whose Councils vote "dry" in enforcing their communities decision.

2. We support Governor Hammond in his classification of alcohol as a controlled substance equivalent to marjiuana.

3. Proposed legislation speaks to the need to "prevent and deter abuse", but makes no statement as to how such education will be carried out or how it will be funded. There is little point in paying lip service to education. Neither bill speaks to the need for alternatives to imprisonment. We see real need for legislation to provide a means to educate the convicted offender in a positive alternative lifestyle rather than simply sentencing him/her to jail.

Administration • P.O. Box 3-3908, Anchorage, Alaska 99501 • (907) 279-2511

5. Both bills propose to set up controlled Substances Committees, but these committees seem to be mainly designed to hold public hearings and decide on classification or re-classification of abused substances. The Parr bill specifically excludes alcohol from the considerations of this committee, yet alcohol for many people is as addictive and abused as the opium derivatives.

We would like to see your committee and other legislative committees consider these points and, if they do not seem to belong in this type of legislation, work towards some sort of legislation (including funding) which will. It will do little good to mount a massive criminal detection and prosecution program against substance abuse unless some provision is made for realistic statewide education, treatment, and enforcement, especially in rural areas, and for rehabilitation of convicted offenders. By the time most substance abuses reach this point, they are no longer using alcohol and other drugs because they want to but because they are dependent on them. Mere enforced abstinence during incarceration is not enough to change their way of dealing with problems.

Sincerely,

Robert A. Lohr

January 2, 1980

Honorable Thelma Buchholdt, Chairwoman
Health, Education & Social Services Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt,

On 1-17-80, I had the privilege of attending a teleconference conducted by your committee on HB 479. It was very encouraging to hear the testimony and the obvious interest with which it was received by yourself and your committee.

As I was unable to testify because of prior scheduling commitments, the following comments are made for your consideration:

1) The designation of possession quantity differentiations, for most substances, other than marijuana, is unrealistic. An example would be that 1/4 ounce of cocaine 50-60% pure would be equivalent to 1 ounce in normal street usage purity. This also applies to other chemical drugs versus marijuana where a quantity designation in Statute may be appropriate. The amount of a chemical drug in possession, purity, and intended use (sale versus individual use) are matters more readily addressed at sentencing than by Statutory proscription.

2) The attempt to address this type of issue, reducing possessions in samll quantities of the narcotic drugs to misdemeanors, by Statute, also created the expressions of "liberalism" that was heard throughout the conference on this Bill.

While your committee is faced with hard decisions in addressing this area of social policy enforcement in face of considerable social change, further studies of this and other proposed bills are necessary. I do not feel this Bill, in the area just discussed, reflects the mainstream of citizen opinion on the issues.

Having reveiwed, at some length, this Bill, Senate Bill 65, and the Governor's proposed legislation, in light of my experience in dealing with this issue in the Kenai area, I believe the proposed legislation of the Governor's to be more reflective of the majority of public opinion on the issues while still giving recognition to social realities.

Thank you for your time and consideration of these remarks.

Respectfully,

Chief Richard A. Ross

MEMORANDUM January 28, 1980

TO: Representative Charles Parr

FROM: Jack Fargnoli, Issues Analyst
House Research Agency

RE: Research Request No. 23
(Drug Possession and Sales: Hawaii)

Prosecutor Lee Nakamura of the Prosecutor's Office, Department of the Attorney General in Honolulu, confirmed in a January 25 telephone conversation that the purity or concentration of controlled substances is not addressed specifically in Hawaii statutes and that, further, it is not considered as a factor in enforcement or in judicial proceedings. The purity or concentration of a drug is not used as the basis for determining the "amount" of a drug held in possession, as described in the Hawaii statutes; nor is it used as a basis in decisions to prosecute or in setting criminal sentences. However, occasionally a decision not to proceed with prosecution is reached in cases where extremely small, i.e., "trace," amounts of a controlled substance have been found in a mixture.

Mr. Nakamura informed us that all decisions to prosecute in Hawaii drug cases are made on a case by case basis, and that to date the question of drug purity has not produced any problems (or even been raised as an issue) in the federal courts. Should the courts object in the future, he said, adjustments would be made in the statutes; he did not view this as likely to occur, however.

Please let us know if you have any additional questions.

RE: Relationship of Drug and Alcohol Use to Crime

Our new felony sentencing data, which includes most felony convictions in all ten Superior Court locations from July, 1976 to July, 1979, contains information from presentence reports about drug and alcohol use. The information includes (1) indications of past (or ongoing) drug and/or alcohol addiction, (2) drug and/or alcohol use at the time of the offense, and (3) the defendant's record of previous (or current) treatment for drug and/or alcohol problems. This memorandum outlines some preliminary findings regarding relationships between drug and alcohol use and crime.

Table I below indicates that a significant positive relationship exists between drug or alcohol addiction and severity of the defendant's prior record. Specifically, those defendants identified by the presentence reporter as having had alcohol or drug problems also had substantially more serious criminal histories than those without such problems.

TABLE I

Severity of Prior Record By Drug/Alcohol Addiction (N=1669)

	Drug Addiction History	Alcohol Addiction History	Neither	
No Prior Record	12.8%	14.0%	49.6%	
Misdem. Only	37.6%	52.0%	30.7%	
One Prior Felony	35.2%	21.1%	13.7%	significant at .001
Two/more Felonies	24.3%	12.9%	6.1%	(missing cases=232)
	100.0% (218)	100.0% (450)	100.0% (1001)	

The above contingency distributions indicate that defendants with no histories of drug or alcohol problems were four times more likely to have been first offenders than those with a history of drug/alcohol abuse. Nearly half (49.6%) of those with no histories of substance abuse were first offenders, compared to 12.8% and 14.0%, respectively, for those with drug and alcohol problems. At the other end of the scale, those with a drug or alcohol problem were substantially more likley to have prior felony convictions than those with no such history. These observed differences are statistically significant at the .001 level which means that there is only one chance in a thousand that the differences were due to chance.

Table I indicates the overall relationship between prior record and drug/alcohol use for all defendants without regard to the type (or class) of their offense. Table A, in the appendix to this memorandum sets forth the relationship between these two variables for each of five broad classes of offense -- violent felonies, property felonies (burglary, larceny, etc.), frauds/forgeries/embezzlements, drug crimes, and "morals" offenses. An examination of these tables reveals that the relationship observed in Table I persists among all offense classes.

As noted above, our data also includes information on drug or alcohol use at the time of the offense. Table II, below, indicates the proportion of cases in which the defendant was reported to have used drugs, drugs in combination with alcohol, or alcohol alone at the time of his offense, for each of four classes of offenses (drug offenses are eliminated from this aspect of the analysis).

TABLE II

Frequency of Use of Drugs and Alcohol
At Time of Offense for Four Offense Classes

	Used Drugs	Used Drugs & Alcohol	Used Alcohol
Violent Offenses	3.2% (19)	4.9% (29)	56.3% (330)
Property Offenses	4.0% (29)	4.4% (32)	39.2% (286)
Forgery/Fraud Offenses	2.7% (7)	0.6% (2)	9.1% (24)
"Morals" Offenses	1.1% (1,	9.9% (9)	46.2% (42)

Table II shows that a defendant was much more likely to have been under the influence of alcohol than drugs at the time of the offense. The magnitude of alcohol use is staggering in comparison with drugs. It should be mentioned, however, that the relative difficulty in detecting drug intoxication as compared with alcohol use probably accounts for at least a portion of the difference.

Existing Alaska Drug Law--Penalites for certain offenses.

1. Delivery to Minors.

   A. Heroin (Schedule I)*-- first: 10-30 years; $5000 to $10,000.
   second: 15-30 years; up to $25,000.
   third:life

   B. Cocaine (Schedule II) -- same as heroin

   C. Marijuana (Schedule VI) -- 0-life; $25,000.

   D. Amphetamines(Schedule II) -- 0-life; $25,000

   E. Hallucinogens (Schedule II) -- 0-life; $25,000

---

2. Distribution of Controlled Substances.

   A. Heroin (Schedule I) -- first: 2-10 years; $5000
   second: 10-20 years; $7500
   third: 20-40 years; $10,000

   (note: these are the same penalties as provided for the possession of heroin.)

   B. Cocaine (Schedule II) -- first: 2-10 years; $5000
   second: 10-20 years; $7500
   third: 20-40 years; $10,000

   (note: these are the same penalties as provided for the possession of heroin or cocaine and also the same as the penalties as provided for the sale of heroin.)

   C. Marijuana (Schedule VI) -- first: 0-25 years; $20,000.
   second: 0-life; $25,000.

   (these are the same penalties as provided for the sale of hallucinogens.)

   D. Amphetamines (Schedule II) -- first: 0-25 years; $20,000
   second: 0-life; $ 25,000

   E. Hallucinogens (Schedule II) -- first: 0-25 years; $20,000
   second: 0-life; $25,000

*Note: Existing Alaska law does not break out various drugs into schedules. Schedule notations on this memo are denoted for purposes of comparing penalties under existing law with those proposed in HB 479.

3. Possession of Controlled Substances.

A. Heroin (Schedule I) -- first: 2-10 years; $5000
second: 10-20 years; $7500
third: 20-40 years; $10,000

B. Cocaine (Schedule II) -- first: 2-10 years; $5000
second: 10-20 years; $7500
third: 20-40 years; $10,000

C. Hallucinogens (Schedule II) -- Misdemeanor
0-1 year; $1000

D. Amphetamines (Schedule II) -- Misdemeanor
0-1 year; $1000

3. Possession of Controlled Substances.

A. Heroin (Schedule I) -- first: 2-10 years; $5000
second: 10-20 years; $7500
third: 20-40 years; $10,000

B. Cocaine (Schedule II) -- first: 2-10 years; $5000
second: 10-20 years; $7500
third: 20-40 years; $10,000

C. Hallucinogens (Schedule II) -- Misdemeanor
0-1 year; $1000

D. Amphetamines (Schedule II) -- Misdemeanor
0-1 year; $1000

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The bill as presently written does not address public health concerns. Therefore, we see minimal impact on our Department. Also our Division of Corrections reports that there is little likelihood of serious impact on prison population in the State apart from the more general impact of the presumptive provisions of the Criminal Code revision. The Department believes it would be extremely difficult to predict the effects of these provisions with any degree of reliability. If the bill were amended in line with the recommendations set forth in the attached department position paper, there would be a fiscal impact on our department and a revised fiscal note would be prepared and submitted.

RE: Relationship of Drug and Alcohol Use to Crime

Our new felony sentencing data, which includes most felony convictions in all ten Superior Court locations from July, 1976 to July, 1979, contains information from presentence reports about drug and alcohol use. The information includes (1) indications of past (or ongoing) drug and/or alcohol addiction, (2) drug and/or alcohol use at the time of the offense, and (3) the defendant's record of previous (or current) treatment for drug and/or alcohol problems. This memorandum outlines some preliminary findings regarding relationships between drug and alcohol use and crime.

Table I below indicates that a significant positive relationship exists between drug or alcohol addiction and severity of the defendant's prior record. Specifically, those defendants identified by the presentence reporter as having had alcohol or drug problems also had substantially more serious criminal histories than those without such problems.

TABLE I

Severity of Prior Record By Drug/Alcohol Addiction (N=1669)

	Drug Addiction History	Alcohol Addiction History	Neither	
No Prior Record	12.8%	14.0%	49.6%	
Misdem. Only	37.6%	52.0%	30.7%	
One Prior Felony	25.2%	21.1%	13.7%	significant at .001
Two/more Felonies	24.3%	12.9%	6.1%	(missing cases=232)
	100.0% (218)	100.0% (450)	100.0% (1001)	

The above contingency distributions indicate that defendants with no histories of drug or alcohol problems were four times more likely to have been first offenders than those with a history of drug/alcohol abuse. Nearly half (49.6%) of those with no histories of substance abuse were first offenders, compared to 12.8% and 14.0%, respectively, for those with drug and alcohol problems. At the other end of the scale, those with a drug or alcohol problem were substantially more likley to have prior felony convictions than those with no such history. These observed differences are statistically significant at the .001 level which means that there is only one chance in a thousand that the differences were due to chance.

Table I indicates the overall relationship between prior record and drug/alcohol use for all defendants without regard to the type (or class) of their offense. Table A, in the appendix to this memorandum sets forth the relationship between these two variables for each of five broad classes of offense -- violent felonies, property felonies (burglary, larceny, etc.), frauds/forgeries/embezzlements, drug crimes, and "morals" offenses. An examination of these tables reveals that the relationship observed in Table I persists among all offense classes.

As noted above, our data also includes information on drug or alcohol use at the time of the offense. Table II, below, indicates the proportion of cases in which the defendant was reported to have used drugs, drugs in combination with alcohol, or alcohol alone at the time of his offense, for each of four classes of offenses (drug offenses are eliminated from this aspect of the analysis).

TABLE II

Frequency of Use of Drugs and Alcohol
At Time of Offense for Four Offense Classes

	Used Drugs	Used Drugs & Alcohol	Used Alcohol
Violent Offenses	3.2% (19)	4.9%(29)	56.3% (330)
Property Offenses	4.0%(29)	4.4%(32)	39.2%(286)
Forgery/Fraud Offenses	2.7%(7)	0.8%(2)	9.1%(24)
"Morals" Offenses	1.1%(1)	9.9%(9)	46.2%(42)

Table II shows that a defendant was much more likely to have been under the influence of alcohol than drugs at the time of the offense. The magnitude of alcohol use is staggering in comparison with drugs. It should be mentioned, however, that the relative difficulty in detecting drug intoxication as compared with alcohol use probably accounts for at least a portion of the difference.

APPENDIX

TABLE A

SEVERITY OF PRIOR RECORD BY PAST
DRUG/ALCOHOL USE FOR EACH OFFENSE CLASS

I. Violent Felonies (N=586)

	Past Drug Problem	Past Alcohol Problem	Neither
No Priors	9.3%	16.0%	47.1%

Matrix - Drug Bills

	HB 65 (1979)	Federal Controlled Substances Act	HB 549 (1978)	Recommendation of Criminal Code Revision Commission	Existing Law	Uniform Act	Hawaii
Responsibility for rescheduling, deleting, and adding controlled substances.	Legislature	Attorney General upon recommendation of Secretary of HEW.	Commissioner of Health and Social Services upon advice of Controlled Substances Advisory Committee.	Commissioner of Health and Social Services consistent with advice of Controlled Substances Advisory Committee.	Legislature and Commissioner of Health & Social Services.	Recommends that classification be made by "appropriate person or agency."	Legislature upon advice of state advisory committee on drug abuse.
Criteria for deciding whether drug should be controlled.	Not specified.	Eight factors, including: (1) potential for abuse (2) pharmacological effect (3) risk to public health (4) risk of psychic or physiological dependence.	Factors listed are basically identical to federal act but also include: (1) probable physical and impact of widespread abuse of substance (2) susceptibility of segments of population	Factors listed are basically identical to HB 549.	Not specified.	Factors listed are similar to Federal Act, HB 549, and recommendation of Criminal Code Revision Commission.	Factors listed are similar to Federal Act, HB 549, and recommendation of Criminal Code Revision Commission.
Criteria for deciding in which schedule drug should be classified.	Not specified.	Five schedule tests are specified - factors are: (1) potential for abuse; (2) accepted medical use; and (3) psychological or physical dependence.	Criteria for deciding whether drug should be controlled are examined in determining "danger or probable danger of the substance." Drugs with highest danger are classified in most serious schedule. Drugs with less danger are classified in successively less serious schedules.	Adopts approach identical to HB 549.	Not specified.	Schedule tests similar to Federal Act.	Schedule tests similar to Federal Act.

	SB 65 (1979)	Federal Controlled Substances Act	HB 542 (1978)	Recommendation of Criminal Code Revision Commission	Existing Law	Uniform Act	Hawaii
Increased penalties for large scale drug trafficking.	"Continuing criminal enterprise" provision provides for increased penalties for defendant convicted of drug felony involving five or more persons if defendant is an organizer and obtains substantial income from activity.	SB 65 provision is taken from 10 USC §848.	Presumptive sentencing in criminal code provides that presumptive sentence may be increased if defendant is part of an organization which brings controlled substances into state or defendant has brought large amounts of controlled substances into state.	Did not consider. However, criminal code provides that if defendant was a member of a group of five or more persons and offense was committed to further goals of group, presumptive sentence may be increased to statutory maximum.	None	Not specifically, but second and subsequent offenses result in authorized sentences being doubled.	Not specifically, but increased sentences are authorized for second and subsequent offenses.
Authorization of unannounced entries into buildings pursuant to warrant.	"No-knock" allowed if probable cause shown that if notice is given (1) drugs will be easily destroyed; or (2) safety of officer in danger; and (3) court has authorized "no-knock" entry.	SB 65 provision is taken from 18 USC §879.	None	None	None	None	None

PENALTIES	SB 65 (1979)	Federal Controlled Substances Act	HB 549 (1978)	Recommendation of Criminal Code Revision Commission	Existing Law	Uniform Act	Hawaii
Delivery of heroin to minor	0-life/$25,000	0-30/$50,000 - first 0-45/$75,000- second	0-20/$20,000 7 years presumptive for first 10-1/2 years presumptive for second 14 years presumptive for third.	Sale to minor is an aggravating factor at sentencing which increases the presumptive sentence up to the statutory maximum for an ordinary sale.	10-30/$5,000-$10,000 - first 15-30/$25,000-second life - third	If defendant is 18 or older and minor is 16 or under and three years his junior, authorized penalties are doubled.	If minor is three years defendant's junior - 20 years/ $10,000.

DIVISION 10. UNIFORM CONTROLLED SUBSTANCES ACT

CHAPTER 1. GENERAL PROVISIONS AND DEFINITIONS

11000. This division shall be known as the "California Uniform Controlled Substances Act."

11001. Unless the context otherwise requires, the definitions in this chapter govern the construction of this division.

11002. "Administer" means the direct application of a controlled substance, whether by injection, inhalation, ingestion, or any other means to the body of a patient for his immediate needs or to the body of a research subject by any of the following:

(a) A practitioner or, in his presence, by his authorized agent.

(b) The patient or research subject at the direction and in the presence of the practitioner.

11003. "Agent" means an authorized person who acts on behalf of or at the direction of a manufacturer, distributor, or dispenser. It does not include a common or contract carrier, public warehouseman, or employee of the carrier or warehouseman.

11004. "Attorney General" means the Attorney General of the State of California.

11005. "Board of Pharmacy" means the California State Board of Pharmacy.

11006. "Chief" means the Chief of the Bureau of Narcotic Enforcement of the State Department of Justice.

11006.5. "Concentrated cannabis" means the separated resin, whether crude or purified, obtained from marijuana.

11007. (a) Except for the purposes of Chapter 4 (commencing with Section 11150) of this division, "controlled substance" means a drug, substance, or immediate precursor which are included in Schedules I through V, inclusive, pursuant to Chapter 2 (commencing with Section 11053).

(b) As used in Chapter 4 (commencing with Section 11150) of this division and any provisions of this division specifying penalties for offenses defined in Chapter 4 (commencing with Section 11150), except for those offenses which are punishable under Section 11371, "controlled substance" means any drug, substance, or immediate precursor which is included in one of the five schedules contained in the Federal Controlled Substances Act (Title II, P.L. 91-513), as such schedules may be revised from time to time to add, delete, or transfer substances from one schedule to another, whether by congressional enactment or by administrative rule of the United States Attorney General adopted pursuant to Section 201 of such act. Whenever reference is made in Chapter 4 (commencing with Section 11150) of this division to a controlled substance classified in a particular schedule, the reference shall be deemed to be to a federal

controlled substance classified in the designated federal schedule, as such schedules may be so revised from time to time.

11008. "Customs broker" means a person in this state who is authorized to act as a broker for any of the following:

(a) A person in this state who is licensed to sell, distribute, or otherwise possess any controlled substance.

(b) A person in any other state who ships any controlled substance into this state.

(c) A person in this state or any other state who ships or transfers any controlled substance through this state.

11009. "Deliver" or "delivery" means the actual, constructive, or attempted transfer from one person to another of a controlled substance, whether or not there is an agency relationship.

11010. "Dispense" means to deliver a controlled substance to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, furnishing, packaging, labeling, or compounding necessary to prepare the substance for that delivery.

11011. "Dispenser" means a practitioner who dispenses.

11012. "Distribute" means to deliver other than by administering or dispensing a controlled substance.

11013. "Distributor" means a person who distributes. The term distributor also includes warehousemen handling or storing controlled substances and customs brokers.

11014. "Drug" means (a) substances recognized as drugs in the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, or official National Formulary, or any supplement to any of them; (b) substances intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in man or animals; (c) substances (other than food) intended to affect the structure or any function of the body of man or animals; and (d) substances intended for use as a component of any article specified in subdivision (a), (b), or (c) of this section. It does not include devices or their components, parts, or accessories.

11015. "Federal bureau" means the bureau of Narcotics and Dangerous Drugs of the United States Department of Justice, or its successor agency.

11016. "Furnish" has the same meaning as provided in Section 4048.5 of the Business and Professions Code.

11017. "Manufacturer" has the same meaning as provided in Section 4034 of the Business and Professions Code.

11018. "Marijuana" means all parts of the plant Cannabis sativa L., whether growing or not; the seeds thereof; the resin extracted from any part of the plant; and every compound, manufacture, salt, derivative, mixture, or preparation of the plant, its seeds or resin. It does not include the mature stalks of the plant, fiber produced from the stalks, oil or cake made from the seeds of the plant, any other compound, manufacture, salt, derivative, mixture, or preparation of the mature stalks (except the resin extracted therefrom), fiber, oil, or cake, or the sterilized seed of the plant which is incapable of germination.

11019. "Narcotic drug" means any of the following, whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(a) Opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate.

(b) Any salt, compound, isomer, derivative, or preparation thereof which is chemically equivalent or identical with any of the substances referred to in subdivision (a), but not including the isoquinoline alkaloids of opium.

(c) Opium poppy and poppy straw.

(d) Coca leaves and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, isomer, derivative, or preparation thereof which is chemically equivalent or identical with any of these substances, but not including decocainized coca leaves or extractions of coca leaves which do not contain cocaine or ecgonine.

11020. "Opiate" means any substance having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having addiction-forming or addiction-sustaining liability. It does not include, unless specifically designated as controlled under Chapter 2 (commencing with Section 11053) of this division, the dextrorotatory isomer of 3-methoxy-n-methylmorphinan and its salts (dextromethorphan). It does include its racemic and levorotatory forms.

11021. "Opium poppy" means the plant of the species Papaver somniferum L., except its seeds.

11022. "Person" means individual, corporation, government or governmental subdivision or agency, business trust, estate, trust, partnership, or association, or any other legal entity.

11023. "Pharmacy" has the same meaning as provided in Section 4035 of the Business and Professions Code.

11024. "Physician," "dentist," "podiatrist," "pharmacist," and "veterinarian" mean persons who are licensed to practice their respective professions in this state.

11025. "Poppy straw" means all parts, except the seeds, of the opium poppy, after mowing.

11026. "Practitioner" means any of the following:

(a) A physician, dentist, veterinarian, podiatrist, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1, of Division 1, or registered

nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, scientific investigator, or other person licensed, registered or otherwise permitted to distribute, dispense, conduct research with respect to or to administer a controlled substance in the course of professional practice or research in this state.

(b) A pharmacy, hospital, or other institution licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to or to administer a controlled substance in the course of professional practice or research in this state.

11027. "Prescription" means an oral order for a controlled substance given individually for the person for whom prescribed, directly from the prescriber to the furnisher or indirectly by means of a written order of the prescriber.

11028. "State bureau" means the Bureau of Narcotic Enforcement of the State Department of Justice.

11029. "Production" includes the manufacture, planting, cultivation, growing, or harvesting of a controlled substance.

11030. "Ultimate user" means a person who lawfully possesses a controlled substance for his own use or for the use of a member of his household or for administering to an animal owned by him or by a member of his household.

11031. "Wholesaler" has the same meaning as provided in Section 4038 of the Business and Professions Code.

11032. Whenever reference is made to the term "narcotics" in any provision of law outside of this division, unless otherwise expressly provided, it shall be construed to mean controlled substances classified in Schedules I and II, as defined in this division. Whenever reference is made to "restricted dangerous drugs" outside of this division, unless otherwise expressly provided, it shall be construed to mean controlled substances classified in Schedules III and IV. Whenever reference is made to the term "marijuana" in any provision of law outside of this division, unless otherwise expressly provided, it shall be construed to mean marijuana as defined in this division.

Chapter 2. Standards and Schedules

11053. The controlled substances listed or to be listed in the schedules in this chapter are included by whatever official, common, usual, chemical, or trade name designated.

SCHEDULE I

11054. (a) Except for purposes of Chapter 4 (commencing with

Section 11150) of this division, the controlled substances listed in this section are included in Schedule I.

(b) Any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers, unless specifically excepted, whenever the existence of these isomers, esters, ethers and salts is possible within the specific chemical designation:

(1) Acetylmethadol.
(2) Allylprodine.
(3) Alphacetylmethadol.
(4) Alphameprodine.
(5) Alphamethadol.
(6) Benzethidine.
(7) Betacetylmethadol.
(8) Betameprodine.
(9) Betamethadol.
(10) Betaprodine.
(11) Clonitazene.
(12) Dextromoramide.
(13) Dextrorphan.
(14) Diampromide.
(15) Diethylthiambutene.
(16) Dimenoxadol.
(17) Dimepheptanol.
(18) Dimethylthiambutene.
(19) Dioxaphetyl butyrate.
(20) Dipipanone.
(21) Ethylmethylthiambutene.
(22) Etonitazene.
(23) Etoxeridine.
(24) Furethidine.
(25) Hydroxypethidine.
(26) Ketobemidone.
(27) Levomoramide.
(28) Levophenacylmorphan.
(29) Morpheridine.
(30) Noracymethadol.
(31) Norlevorphanol.
(32) Normethadone.
(33) Norpipanone.
(34) Phenadoxone.
(35) Phenampromide.
(36) Phenomorphan.
(37) Phenoperidine.
(38) Piritramide.
(39) Proheptazine.
(40) Properidine.
(41) Propiram.
(42) [illegible]oramide.
(43) [illegible]ridine.

(c) Any of the following opium derivatives, their salts, isomers and salts of isomers, unless specifically excepted, whenever the existence of these salts, isomers and salts of isomers is possible within the specific chemical designation:

(1) Acetorphine.
(2) Acetyldihydrocodeine.
(3) Benzylmorphine.
(4) Codeine methylbromide.
(5) Codeine-N-oxide.
(6) Cyprenorphine.
(7) Desomorphine.
(8) Dihydromorphine.
(9) Etorphine.
(10) Heroin.
(11) Hydromorphinol.
(12) Methyldesorphine.
(13) Methyldihydromorphine.
(14) Morphine methylbromide.
(15) Morphine methylsulfonate.
(16) Morphine-N-oxide.
(17) Myrophine.
(18) Nicocodeine.
(19) Nicomorphine.
(20) Normorphine.
(21) Phoclodine.
(22) Thebacon.

(d) Any material, compound, mixture, or preparation which contains any quantity of the following hallucinogenic substances, their salts, isomers and salts of isomers, unless specifically excepted, whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) 3,4-methylenedioxy amphetamine.
(2) 5-methoxy-3,4-methylenedioxy amphetamine.
(3) 3,4,5-trimethoxy amphetamine.
(4) Bufotenine.
(5) Diethyltryptamine.
(6) Dimethyltryptamine.
(7) 4-methyl-2,5-dimethoxyamphetamine.
(8) Ibogaine.
(9) Lysergic acid diethylamide.
(10) Marijuana.
(11) Mescaline.
(12) Peyote.
(13) N-ethyl-3-piperidyl benzilate.
(14) N-methyl-3-piperidyl benzilate.
(15) Psilocybin.
(16) Psilocyn.
(17) Tetranydrocannabinols.

SCHEDULE II

11055. (a) Except for purposes of Chapter 4 (commencing with Section 11150) of this division, the controlled substances listed in this section are included in Schedule II.

(b) Any of the following substances, except those narcotic drugs listed in other schedules, whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by combination of extraction and chemical synthesis:

(1) Opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, with the exception of naloxone hydrochloride (N-allyl- 14-hydroxy-nordihydromorphinone hydrochloride), but including the following:

(i) Raw opium.
(ii) Opium extracts.
(iii) Opium fluid extracts.
(iv) Powdered opium.
(v) Granulated opium.
(vi) Tincture of opium.
(vii) Apomorphine.
(viii) Codeine.
(ix) Ethylmorphine.
(x) Hydrocodone.
(xi) Hydromorphone.
(xii) Metopon.
(xiii) Morphine.
(xiv) Oxycodone.
(xv) Oxymorphone.
(xvi) Thebaine.

(2) Any salt, compound, isomer, derivative, or preparation thereof which is chemically equivalent or identical with any of the substances referred to in paragraph (1), but not including the isoquinoline alkaloids of opium.

(3) Opium poppy and poppy straw.

(4) Coca leaves and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of these substances, but not including decocainized coca leaves or extractions which do not contain cocaine or ecgonine.

(c) Any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, whenever the existence of these isomers, esters, ethers and salts is possible within the specific chemical designation:

(1) Alphaprodine.
(2) Anileridine.
(3) Bezitramide.
(4) Dihydrocodeine.
(5) Diphenoxylate.
(6) Fentanyl.

(7) Isomethadone.
(8) Levomethorphon.
(9) Levorphanol.
(10) Metazocine.
(11) Methadone.
(12) Methadone—intermediate, 4-cyano-2-dimethyl-amino-4,4-diphenyl butane.
(13) Moramide—intermediate, 2-methyl-3-morpho-lino-1,1-diphenyl-propane-carboxylic acid.
(14) Pethidine.
(15) Pethidine—intermediate—A, 4-cyano-1-methyl-4-phenyl-piperidine.
(16) Pethidine—intermediate—B, ethyl-4-phenylpi-peridine-4-carboxylate.
(17) Pethidine—intermediate—C, 1-methyl-4-phenylpiperidine-4-carboxylic acid.
(18) Phenazocine.
(19) Piminodine.
(20) Racemethorphan.
(21) Racemorphan.
(d) Any material, compound, mixture, or preparation which contains any quantity of the following substances having a potential for abuse associated with a stimulant effect on the central nervous system:
(1) Amphetamine, its salts, optical isomers, and salts of its optical isomers.
(2) Phenmetrazine and its salts.
(3) Any substance which contains any quantity of methamphetamine, including its salts, isomers, and salts of isomers.
(4) Methylphenidate.

SCHEDULE III

11056. (a) Except for purposes of Chapter 4 (commencing with Section 11150) of this division, the controlled substances listed in this section are included in Schedule III.
(b) Unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a potential for abuse associated with a depressant effect on the central nervous system:
(1) Any substance which contains any quantity of a derivative of barbituric acid, or any salt of a derivative of barbituric acid, except those substances which are specifically listed in other schedules.
(2) Chlorhexadol.
(3) Glutethimide.
(4) Lysergic acid.
(5) Lysergic acid amide.
(6) Methaqualone and its salts.
(7) Methyprylon.
(8) Phencyclidine.

(9) Sulfondiethylmethane.
(10) Sulfonethylmethane.
(11) Sulfonmethane.
(c) Nalorphine.
(d) Any material, compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, or any salts thereof:
(1) Not more than 1.8 grams of codeine, or any of its salts, per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium.
(2) Not more than 1.8 grams of codeine, or any of its salts, per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.
(3) Not more than 300 milligrams of dihydrocodeinone, or any of its salts, per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium.
(4) Not more than 300 milligrams of dihydrocodeinone, or any of its salts, per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.
(5) Not more than 1.8 grams of dihydrocodeine, or any of its salts, per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.
(6) Not more than 300 milligrams of ethylmorphine, or any of its salts, per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more ingredients in recognized therapeutic amounts.
(7) Not more than 500 milligrams of opium per 100 milliliters or per 100 grams, or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.
(8) Not more than 50 milligrams of morphine, or any of its salts, per 100 milliliters or per 100 grams with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

SCHEDULE IV

11057. (a) Except for purposes of Chapter 4 (commencing with Section 11150) of this division, the controlled substances listed in this section are included in Schedule IV.
(b) Any material, compound, mixture, or preparation which contains any quantity of the following substances having a potential for abuse associated with a depressant effect on the central nervous system:
(1) Barbital.
(2) Chloral betaine.
(3) Chloral hydrate.
(4) Ethchlorvynol.
(5) Ethinamate.
(6) Methohexital.
(7) Meprobamate.

(8) Methylphenobarbital.
(9) Paraldehyde.
(10) Petrichloral.
(11) Phenobarbital.

SCHEDULE V

11058. (a) Except for purposes of Chapter 4 (commencing with Section 11150) of this division, the controlled substances listed in this section are included in Schedule V.

(b) Any compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, which also contains one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation, valuable medicinal qualities other than those possessed by the narcotic drug alone:

(1) Not more than 200 milligrams of codeine, or any of its salts, per 100 milliliters or per 100 grams.

(2) Not more than 100 milligrams of dihydrocodeine, or any of its salts, per 100 milliliters or per 100 grams.

(3) Not more than 100 milligrams of ethylmorphine, or any of its salts, per 100 milliliters or per 100 grams.

(4) Not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atrophine sulfate per dosage unit.

(5) Not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

CHAPTER 3. REGULATION AND CONTROL

Article 1. Reporting

11100. (a) Any manufacturer, wholesaler, retailer, or other person who sells, transfers, or otherwise furnishes any of the following substances to any person in this state shall submit a report to the State Department of Justice of all such transactions.

(1) Phenyl-2-propanone
(2) Methylamine
(3) D-lysergic acid
(4) Ergotamine Tartrate
(5) Diethyl malonate
(6) Malonic acid
(7) Ethyl malonate
(8) Barbituric acid
(9) Piperidine

(b) The Department of Justice may adopt rules and regulations in accordance with Chapter 4.5 (commencing with Section 11371) of Division 3 of Title 2 of the Government Code that add substances to subdivision (a) if the substance is a precursor to a controlled substance and delete substances from subdivision (a). However, no regulation adding or deleting a substance shall have any effect beyond March 1 of the year following the calendar year during which the regulation was adopted.

(c) This section shall not apply to any of the following:

(1) Any pharmacist or other authorized person who sells or furnishes such substance upon the prescription of a physician, dentist, podiatrist, or veterinarian.

(2) Any physician, dentist, podiatrist, or veterinarian who administers or furnishes such substance to his patients.

(3) Any manufacturer or wholesaler licensed by the Board of Pharmacy who sells, transfers, or otherwise furnishes such substance to a licensed pharmacy, physician, dentist, podiatrist, or veterinarian.

(d) Any manufacturer, wholesaler, retailer, or other person who sells, transfers, or otherwise furnishes any substance listed in subdivision (a) to a person in this state shall, within 72 hours thereafter, submit a report of such transaction to the Department of Justice. However, the Department of Justice may authorize the submission of such reports on a monthly basis with respect to repeated, regular transactions between the furnisher and the recipient involving the same substance if the Department of Justice determines that; (1) a pattern of regular supply of such substance exists as between the manufacturer, wholesaler, retailer, or other person who sells, transfers, or otherwise furnishes such substance and the recipient of the substance, and (2) the recipient has established a record of utilization of such substance for lawful purposes.

11101. The State Department of Justice shall provide a common reporting form for the substances in Section 11100 which contains at least the following information:

(a) Name of the substance.
(b) Quantity of the substance sold, transferred, or furnished.
(c) The date the substance was sold, transferred, or furnished.
(d) The name and address of the person buying or receiving such substance.
(e) The name and address of the manufacturer, wholesaler.

11102. The Department of Justice may adopt all regulations necessary to carry out the provisions of this part.

11103. The theft or loss of any substance regulated pursuant to Section 11100 discovered by any licensee or any person regulated by the provisions of this chapter shall be reported to the Department of Justice within three days after such discovery.

Any difference between the quantity of any substance regulated pursuant to Section 11100 received and the quantity shipped shall be reported to the Department of Justice within three days of the receipt of actual knowledge of the discrepancy.

Any report made pursuant to this section shall also include the name of the common carrier or person who transports the substance and date of shipment of the substance.

Article 2. Licenses: Customs Brokers and Warehouses

11120. Upon application, the Board of Pharmacy may issue a customs broker's license. Such license authorizes the transfer of a controlled substance to persons who are licensed to sell, distribute, or otherwise possess such controlled substance. The holder of such a license may receive, possess, export, and transfer such controlled substances to such persons.

11121. A customs broker in this state shall not ship or transfer any controlled substance to any of the following persons:

(a) Any person in this state who is not licensed or authorized to sell, distribute, or otherwise possess the controlled substance.

(b) Any person in any other state who is not licensed or authorized by such state to sell, distribute, or otherwise possess the controlled substance.

(c) Any person in a foreign jurisdiction who does not have a legitimate reason to possess the controlled substance.

11122. (a) A controlled substance shall be stored only in a warehouse which is licensed by the Board of Pharmacy.

(b) This section shall not apply to any of the following persons:

(1) Any pharmacy or other person who is licensed or authorized by this state to sell or furnish the controlled substance upon the written prescription of a physician, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1.

(2) Any physician, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 who possesses a controlled substance for administration to his patients.

(3) Any licensed laboratory in this state which is authorized to receive and use the controlled substance.

(4) Any licensed hospital in this state.

(5) Any person who obtains the controlled substance upon the prescription of a physician, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 for his personal use.

(6) Any agent or employee of any licensed manufacturer or wholesaler who possesses the controlled substance for display purposes or furnishes such controlled substances as a sample at no cost to a licensed pharmacist, physician, dentist, podiatrist, or veterinarian, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1.

(7) A manufacturer licensed pursuant to Section 26685 of this code or Section 4084 or 4084.6 of the Business and Professions Code.

(8) A wholesaler licensed pursuant to Section 4084 or 4084.6 of the Business and Professions Code.

11123. (a) Upon application, the Board of Pharmacy may issue a license to store controlled substances to a warehouseman who maintains a warehouse suitable for the proper storage of the controlled substances.

(b) The Board of Pharmacy shall by regulation establish security measures in order to prevent unauthorized persons from gaining access to any area, place or premises in which controlled substances are stored, kept or maintained. Prior to the issuance of a license under this article, the Board of Pharmacy shall inspect an applicant's establishment to determine compliance with security regulations adopted by the Board of Pharmacy.

(c) As a condition to the granting of the license, the warehouseman shall agree to comply with the provisions of this division and any rules and regulations which are adopted by the Board of Pharmacy.

11124. On or before the effective date of this chapter, each licensed warehouseman shall make a complete and accurate record of all stocks of such controlled substances on hand. Thereafter, a current inventory shall be kept and preserved for at least two years from the date of making such inventory. Records and inventories shall contain such information as shall be provided by the rules and regulations promulgated by the Board of Pharmacy.

Such records shall be submitted in summary form to the Board of Pharmacy on or before July 1, 1973, and every two years thereafter.

The Board of Pharmacy shall have the right to inspect such records at the business office of the licensee at any time during business hours.

11125. Each warehouseman who applies for a license to store a controlled substance shall execute and file with the Board of Pharmacy a bond to the state as a condition to the granting of the license. The bond shall secure the faithful performance of the warehouseman of his obligations under the laws of the state and the rules and regulations which are adopted pursuant to this division and such additional obligations which he may assume under a contract with the depositor of the drug. The Board of Pharmacy may prescribe the form, amount, terms, and conditions of the bond.

11126. Any person who is injured by the breach of any obligation secured by the bond which is executed and filed pursuant to Section 11125 may sue on the bond in his own name in any court of competent jurisdiction to recover any damages he may have sustained by such breach.

11127. (a) The provisions of this article shall apply only to licenses issued by the Board of Pharmacy for customs brokers and warehouses which store controlled substances.

(b) The Board of Pharmacy shall have authority to issue licenses for customs brokers and warehouses which store controlled substances. Such licenses shall be issued in accordance with the provisions of this chapter and regulations adopted by the board pursuant thereto. All licenses issued by the Board of Pharmacy shall expire one year from the date of issue. Licenses may be renewed upon application and payment of the renewal fees if the application for renewal is made within the 30-day period prior to the date of expiration. Persons whose licenses have expired shall immediately cease the activity requiring a license, but the Board of Pharmacy shall accept applications for renewal during the 30-day period following the date of expiration if they are accompanied by the new license fee. In no case shall a license be renewed where the application is received more than 30 days after the date of expiration.

(c) Each application for a new or renewal license shall be accompanied by a fee which shall be fixed by the Board of Pharmacy at an amount not to exceed two hundred dollars ($200). The application shall be made upon a form furnished by the Board of Pharmacy. It shall contain such information concerning the background of the applicant and his experience which the Board of Pharmacy may prescribe, in addition to any other information required by law.

11128. (a) Licenses issued by the Board of Pharmacy shall not be transferable.

(b) In the event of a change of name, not involving a change of ownership, or a change of address of the licensee, the license shall be returned to the board for cancellation, and a new license application form shall be submitted. The Board of Pharmacy shall cancel the returned license and issue a new license for the unexpired term without fee.

11129. (a) Any license issued may be suspended or revoked by the Board of Pharmacy. The Board of Pharmacy may refuse to issue a license to any applicant for the reasons set forth in subdivision (b).

The proceedings under this chapter shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the Board of Pharmacy shall have all the powers granted therein.

(b) The Board of Pharmacy may deny a license if the applicant does or has done any of the following:

(1) Fails to meet the qualifications established by the Board of Pharmacy pursuant to this chapter for the issuance of the license applied for.

(2) Was previously the holder of a license issued under this chapter which has been revoked and never reissued or was suspended and the terms of the suspension have not been fulfilled.

(3) Has committed any act which, if committed by any licensee, would be grounds for the suspension or revocation of a license issued pursuant to this chapter.

(4) Has committed any act involving dishonesty, fraud, or deceit whereby another is injured or the applicant has benefited.

(5) Has acted in the capacity of a licensed person under this division without having a license therefor.

(6) Has entered a plea of guilty or nolo contendere to, or been found guilty or convicted of, a felony or a crime involving moral turpitude and the time for appeal has elapsed or the judgment of conviction has been affirmed on appeal, irrespective of an order granting probation following the conviction or suspending the imposition of sentence, or of a subsequent order under the provisions of Section 1203.4 of the Penal Code allowing the person to withdraw his plea of guilty and to enter a plea of not guilty, setting aside the plea or verdict of guilty, or dismissing the accusation, information, or indictment.

(7) Violated any of the provisions of this division.

11130. The Board of Pharmacy may suspend, revoke, or take other disciplinary action against a license as provided in this chapter if the licensee does any of the following:

(a) Violates any section of this division which relates to his licensed activities.

(b) Is convicted of any felony.

(c) Violates any of the regulations promulgated by the Board of Pharmacy pursuant to this chapter.

(d) Has misrepresented a material fact in obtaining a license.

(e) Aids or abets an unlicensed person to evade the provisions of this division.

(f) Fails to make and keep records showing his transactions as a licensee, or fails to have such records available for inspection by the Board of Pharmacy for a period of not less than three years after completion of any transaction to which the records refer, or refuses to comply with a written request of the Board of Pharmacy to make such records available for inspection.

(g) Violates or attempts to violate the provisions of this division relating to the particular activity for which he is licensed.

(h) Fails to send a copy of the monthly reporting form to the Board of Pharmacy as required by the provisions of this chapter.

11131. A plea or verdict of guilty or a conviction following a plea of nolo contendere is deemed to be a conviction within the meaning of this chapter. The Board of Pharmacy may order the license suspended or revoked, or may decline to issue a license, when the time for appeal has elapsed, the judgment of conviction has been affirmed on appeal, or an order granting probation is made suspending the imposition of sentence, irrespective of a subsequent order under the provisions of Section 1203.4

of the Penal Code allowing such person to withdraw his plea of guilty and to enter a plea of not guilty, setting aside the verdict of guilty, or dismissing the accusation, information, or indictment.

11132. The Board of Pharmacy may take disciplinary action against any licensee, after a hearing as provided in this chapter, by any of the following:

(a) Imposing probation upon terms and conditions to be set forth by the Board of Pharmacy.

(b) Suspending the license.

(c) Revoking the license.

11133. The expiration or suspension of a license by operation of law or by order or decision of the board or a court, or the voluntary surrender of a license by a licensee, shall not deprive the Board of Pharmacy of jurisdiction to proceed with any investigation of, or action or disciplinary proceedings against, the licensee, or to render a decision suspending or revoking the license.

11134. All accusations against licensees shall be filed within three years after the act or omission alleged as the ground for disciplinary action.

11135. When any license has been revoked or suspended following a hearing under the provisions of this chapter, any additional license issued under this chapter in the name of the licensee may also be revoked or suspended by the Board of Pharmacy.

11136. After suspension of the license upon any of the grounds set forth in this chapter, the Board of Pharmacy may reinstate the license upon proof of compliance by the applicant with all provisions of the decision as to reinstatement. After revocation of a license upon any of the grounds set forth in this chapter, the license shall not be reinstated or reissued within a period of one year after the effective date of revocation.

CHAPTER 4. PRESCRIPTIONS

Article 1. Requirements of Prescriptions

11150. No person other than a physician, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 shall write a prescription.

11150.5. The provisions of this chapter shall be applicable to controlled substances subject to the Federal Controlled Substances Act (Title II, P.L. 91-513), as provided in subdivision (b) of Section 11007. References in this chapter to controlled substances classified in a particular schedule shall be [illegible] than a reference to the schedules set forth in Chapter 2 (commencing with Section 11053) of this division.

11151. A prescription written by an unlicensed person lawfully practicing medicine pursuant to Section 2147.5 of the Business and Professions Code, shall be filed only at a pharmacy maintained in the hospital which employs such unlicensed person.

11152. No person shall write, issue, fill, compound, or dispense a prescription that does not conform to this division.

11153. The responsibility for the proper prescribing and dispensing of controlled substances is upon the practitioner, but a corresponding liability rests with the pharmacist who fills the prescription. An order purporting to be a prescription issued to an addict or habitual user of controlled substances, which is not in the course of professional treatment nor part of an authorized methadone maintenance program, for the purpose of providing the user with controlled substances, sufficient to keep him comfortable by maintaining his customary use, is not a prescription within the meaning and intent of this division; and the person filling such an order, as well as the person issuing it, may be charged with violation of the law.

11154. Except in the regular practice of his profession, no person shall prescribe, administer, dispense, or furnish, a controlled substance to or for any person who is not under his treatment for a pathology or condition other than addiction to a controlled substance, except as provided in this division.

11155. Any physician, who by court order or order of any state or governmental agency, or who voluntarily surrenders his controlled substance privileges, shall not possess, administer, dispense, or prescribe a controlled substance unless and until such privileges have been restored, and he has obtained current registration from the appropriate federal agency as provided by law.

11156. No person shall prescribe for or administer, or dispense a controlled substance to an addict or habitual user, or to any person representing himself as such, except as permitted by this division.

11157. No person shall issue a prescription that is false or fictitious in any respect.

11158. Except as provided in Section 11159, no controlled substance classified in Schedule II shall be dispensed without a prescription meeting the requirements of this chapter. Except as provided in Section 11159 or when dispensed directly to an ultimate user by a practitioner, other than a pharmacist or pharmacy, no controlled substance classified in Schedule III, IV, or V may be dispensed without a prescription meeting the requirements of this chapter.

Except as otherwise prohibited or limited by law, a practitioner specified in Section 11150, may administer controlled substances in the [illegible]

11159. An order for controlled substances for use by a patient in a county or licensed hospital shall be exempt from all requirements of this article, but shall be in writing on the patient's record, signed by the prescriber, dated, and shall state the name and quantity of the controlled substance ordered and the quantity actually administered. The record of such orders shall be maintained as a hospital record for a minimum of seven years.

11161. Prescription blanks shall be issued by the Department of Justice in serially numbered groups of 100 forms each in triplicate, and shall be furnished free of cost to any person authorized to write a prescription, and such prescription blanks shall not be transferable. Any person possessing any such prescription blank otherwise than as herein provided is guilty of a misdemeanor.

11162. The prescription blanks shall be printed on distinctive paper, serial number of the group being shown on each form, and also each form being serially numbered.

11163. Not more than one such prescription group shall in any case be issued or furnished by the Department of Justice to the same prescriber at one time.

11164. Except as provided in Section 11167, no person shall prescribe a controlled substance, nor shall any person fill, compound, or dispense such a prescription unless it complies with the requirements of this section.

(a) Each prescription for a controlled substance classified in Schedule II which is a narcotic drug shall be wholly written in ink or indelible pencil in the handwriting of the prescriber upon the official prescription form issued by the Department of Justice. Such prescriptions shall be prepared in triplicate, signed and dated by the prescriber, and shall contain the name and address of the person for whom the controlled substance is prescribed, the name and quantity of the controlled substance prescribed, directions for use, and the address, category of professional licensure, and the federal controlled substance registration of the prescriber. The original and one copy of such a prescription shall be delivered to the pharmacist filling the prescription. The original shall be retained by the pharmacist and the copy, properly endorsed by him, shall be transmitted to the Department of Justice at the end of the month in which the prescription was filled.

(b) Each prescription for a controlled substance classified in Schedule II which is not a narcotic drug or for a controlled substance classified in Schedule III, IV, or V, except as authorized by subdivision (c), shall be subject to the following requirements:

(1) The prescription shall be signed and dated by the prescriber and shall contain the name of the person for whom the controlled substance is prescribed, the name and quantity of controlled substances prescribed, and directions for use. With respect to prescriptions for controlled substances classified in Schedule II or III which are not narcotic drugs, the signature, date, and information required by this paragraph shall be

wholly written in ink or indelible pencil in the handwriting of the prescriber.

(2) In addition, the prescription shall contain the name, address telephone number, category of professional licensure, and federal controlled substance registration number of the prescriber. The information required by this paragraph shall be either preprinted upon the prescription blank, typewritten, rubber stamped, or printed by hand.

(3) The prescription shall also contain the address of the person for whom the controlled substance is prescribed. If the prescriber does not specify such address on the prescription, the pharmacist filling the prescription or an employee acting under his direction shall write or type the address on the prescription.

(c) Any controlled substance classified in Schedule III, IV, or V may be dispensed upon an oral prescription, which shall be reduced to writing by the pharmacist filling the prescription or by such other person as is expressly authorized by provisions of the Business and Professions Code. The date of issue of the prescription and all the information required for a written prescription by subdivision (b) shall be included in such written record of the prescription. Pursuant to authorization of the prescriber, any employee of the prescriber on his behalf may orally transmit a prescription for a controlled substance classified in Schedule IV or V, if within a reasonable time thereafter the prescriber transmits to the pharmacist filling the prescription written evidence of the employee's authorization, and in such cases the written record of the prescription required by this subdivision shall also specify the name of the employee of the prescriber transmitting the prescription.

11165. Each written prescription for a controlled substance or for any material, compound, mixture, or preparation containing one or more controlled substances shall be set forth on a separate prescription blank.

11166. No person shall fill a prescription for a controlled substance classified in Schedule II which is tendered to him after the seventh day following the date of issue. No person shall knowingly fill a forged or altered prescription for a controlled substance except for the addition of the address of the person for whom the controlled substance is prescribed as provided by paragraph (3) of subdivision (b) of Section 11164.

11167. In the event of an epidemic or accident or calamity, any controlled substance classified in Schedule II may be dispensed upon an oral prescription if failure to issue such a prescription might result in loss of life or intense suffering. Prior to filling such a prescription, the pharmacist shall reduce it to writing. The date of issue of the prescription and all the information required for a written prescription by Section 11164 shall be included in such written record of the prescription.

Additionally, in such an emergency a prescriber may issue a written prescription for a controlled substance classified in Schedule II which is a narcotic drug upon a form other than the official prescription form issued by the Department of Justice. However, such a prescription shall in all other respects comply with the requirements of subdivision (a) of

Section 11164.

When an emergency oral or written prescription is issued pursuant to this section, the prescriber shall within 72 hours submit the prescription in the form required by Section 11164 to the pharmacy or pharmacist filling the prescription. If the prescriber does not provide such a prescription within 72 hours, the pharmacist filling the emergency prescription shall immediately so inform the Department of Justice.

11168. The prescription book containing the prescriber's copies of prescriptions issued shall be retained by the prescriber which shall be preserved for three years.

11169. When codeine, or dihydrocodeinone or tincture opii camphorata (paregoric) is not combined with other medicinal ingredients, it shall be prescribed on the official triplicate blanks.

11170. No person shall prescribe, administer, or furnish a controlled substance for himself.

11171. No person shall prescribe, administer, or furnish a controlled substance except under the conditions and in the manner provided by this division.

11172. No person shall antedate or postdate a prescription.

11173. (a) No person shall obtain or attempt to obtain controlled substances, or procure or attempt to procure the administration of or prescription for controlled substances, (1) by fraud, deceit, misrepresentation, or subterfuge; or (2) by the concealment of a material fact.

(b) No person shall make a false statement in any prescription, order, report, or record, required by this division.

(c) No person shall, for the purpose of obtaining controlled substances, falsely assume the title of, or represent himself to be, a manufacturer, wholesaler, pharmacist, physician, dentist, veterinarian, registered nurse, physician's assistant, or other authorized person.

(d) No person shall affix any false or forged label to a package or receptacle containing controlled substances.

11174. No person shall, in connection with the prescribing, furnishing, administering, or dispensing of a controlled substance, give a false name or false address.

11175. No person shall obtain or possess a prescription that does not comply with this division, nor shall any person obtain a controlled substance by means of a prescription which does not comply with this division or possess a controlled substance obtained by such a prescription.

11179. A person who fills a prescription shall keep it on file for at least three years from the date of filing it.

11180. No person shall obtain or possess a controlled substance obtained by a prescription that does not comply with this division.

Article 2. Prescriber's Record

11190. Every practitioner, other than a pharmacist, who issues prescription, or dispenses or administers a controlled substance classifie in Schedule II shall make a record that, as to the transaction, shows all the following:

(a) The name and address of the patient.

(b) The date.

(c) The character and quantity of controlled substances involved.

The prescriber's record shall show the pathology and purpose for whic the prescription is issued, or the controlled substance administere prescribed, or dispensed.

11191. The record shall be preserved for three years.

Every person who violates any provision of this section is guilty of misdemeanor.

11192. In a prosecution for a violation of Section 11190, proof that defendant received or has had in his possession at any time a greate amount of controlled substances than is accounted for by any recor required by law or that the amount of controlled substances possessed b a defendant is a lesser amount than is accounted for by any recor required by law is prima facie evidence of a violation of the section.

Article 3. Copies of Prescriptions

11195. Whenever the pharmacist's copy of a controlled substan prescription is removed by a peace officer, agent of the Attorney Gener or inspector of the Board of Pharmacy, or investigator of the Division Investigation of the Department of Consumer Affairs for the purpose investigation or as evidence, the officer or inspector or investigator sh give to the pharmacist a receipt in lieu thereof.

Article 4. Refilling Prescriptions

11200. No person shall refill a controlled substance prescription mo than six months after the date thereof or cause such a prescription to refilled more than five times, unless renewed by the prescriber. N prescription for a Schedule II substance may be refilled.

11201. A prescription for a controlled substance, except tho appearing in schedule II, may be refilled without the prescribe authorization if the prescriber is unavailable to authorize the refill and in the pharmacist's professional judgment, failure to refill the prescripti might present an immediate hazard to the patient's health and welfare might result in intense suffering. The pharmacist shall refill only reasonable amount sufficient to maintain the patient until the prescrib can be contacted. The pharmacist shall note on the reverse side of t prescription the date and quantity of the refill and that the prescriber w not available and the basis for his judgment to refill the prescripti

without the prescriber's authorization. The pharmacist shall inform the patient that the prescription was refilled without the prescriber's authorization, indicating that the prescriber was not available and that, in the pharmacist's professional judgment, failure to provide the drug might result in an immediate hazard to the patient's health and welfare or might result in intense suffering. The pharmacist shall inform the prescriber within a reasonable period of time. Prior to refilling a prescription pursuant to this section, the pharmacist shall make every reasonable effort contact the prescriber.

The prescriber shall not incur any liability as the result of a refiling of a prescription pursuant to this section.

Article 5. Pharmacists' Records

11205. The owner of a pharmacy or any person who purchases a controlled substance upon federal order forms as required pursuant to the provisions of the Federal "Comprehensive Drug Abuse Prevention and Control Act of 1970," (P.L. 91-513, 84 Stat. 1236), relating to the importation, exportation, manufacture, production, compounding, distribution, dispensing, and control of controlled substances, and who sells controlled substances obtained upon such federal order forms in response to prescriptions shall maintain and file such prescriptions in a separate file apart from noncontrolled substances prescriptions. Such files shall be preserved for a period of three years.

11206. The prescription file shall constitute a record that as to the transactions shall show all of the following:

(a) The name and address of the patient.

(b) The date.

(c) The character, quantity, and directions for use of the controlled substance involved.

(d) The name, address, telephone number, category of professional licensure, and the federal controlled substance registration number of the prescriber.

11207. No person other than a registered pharmacist under the laws of this state or an intern pharmacist, as defined in Section 4038.1 of the Business and Professions Code, who is under the personal supervision of a pharmacist, shall compound, prepare, fill or dispense a prescription for a controlled substance.

11208. In a prosecution under this division, proof that a defendant received or has had in his possession at any time a greater amount of controlled substances than is accounted for by any record required by law or that the amount of controlled substances possessed by the defendant is a lesser amount than is accounted for by any record required by law is prima facie evidence of guilt.

Chapter. 5. Use of Controlled Substances

Article 1. Lawful Medical Use Other Than Treatment of Addicts

11210. A physician, surgeon, dentist, veterinarian, or podiatrist, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 may prescribe for, furnish to, or administer controlled substances to his patient when the patient is suffering from a disease, ailment, injury, or infirmities attendant upon old age, other than addiction to a controlled substance.

The physician, surgeon, dentist, veterinarian, or podiatrist, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 shall prescribe, furnish, or administer controlled substances only when in good faith he believes the disease, ailment, injury, or infirmity, requires such treatment.

The physician, surgeon, dentist, veterinarian, or podiatrist, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 shall prescribe, furnish, or administer controlled substances only in such quantity and for such length of time as are reasonably necessary.

11211. In order to provide a supply of controlled substances as may be necessary to handle emergency cases, any hospital which does not employ a resident pharmacist and which is under the supervision of a licensed physician, may purchase controlled substances on federal order forms for such institution, under the name of such hospital, such supply to be made available to a registered nurse for administration to patients in emergency cases, upon direction of a licensed physician.

11213. Persons who, under applicable federal laws or regulations, are lawfully entitled to use controlled substances for the purpose of research, instruction, or analysis, may lawfully obtain and use for such purposes such substances as are defined as controlled substances in this division, upon approval for use of such controlled substances in bona fide research, instruction, or analysis by the Research Advisory Panel established

pursuant to Sections 11480 and 11481.

Such research, instruction, or analysis shall be carried on only under the auspices of the head of a research project which has been approved by the Research Advisory Panel pursuant to Section 11480 or Section 11481. Complete records of receipts, stocks at hand, and use of these controlled substances shall be kept.

Article 2. Treatment of Addicts for Addiction

11215. Except as otherwise provided in this section, any narcotic controlled substance employed in treating an addict for addiction shall be administered by a physician, or by a registered nurse acting under his instruction. When acting under the direction of a physician, any psychiatric technician licensed pursuant to Chapter 10 (commencing with Section 4500) of Division 2 of the Business and Professions Code or any vocational nurse licensed pursuant to Chapter 6.5 (commencing with Section 2840) of Division 2 of the Business and Professions Code, or any pharmacist licensed pursuant to Chapter 9 (commencing with Section 4000) of Division 2 of the Business and Professions Code may administer methadone or other controlled substances orally in the treatment of an addict for addiction to a controlled substance.

11216. Except as otherwise provided in Section 11215, no physician or other person shall order, permit, or direct any person other than a registered nurse, or other physician, to administer a narcotic controlled substance to a person being treated for addiction to a controlled substance.

11217. No person shall treat an addict for addiction to a narcotic drug which is an opiate except in one of the following:

(a) An institution approved by the State Department of Health, and where the patient is at all times kept under restraint and control.

(b) A city or county jail.

(c) A state prison.

(d) A facility designated by a county and approved by the State Department of Health pursuant to Division 5 (commencing with Section 5000) of the Welfare and Institutions Code.

(e) A state hospital.

(f) A county hospital.

Methadone in the continuing treatment of addiction to a controlled substance shall be used only in those programs approved by the state department pursuant to Section 4351 of the Welfare and Institutions Code on either an inpatient or outpatient basis, or both.

This section does not apply during emergency treatment, or where the patient's addiction is complicated by the presence of incurable disease, serious accident, or injury, or the infirmities of old age.

Neither this section nor any other provision of this division shall be construed to prohibit the maintenance of a place in which persons seeking [illegible] and endeavor

that no person is treated for addiction in such place by means of administering, furnishing, or prescribing of controlled substances. The preceding sentence is declaratory of preexisting law. Every such place shall register with, and be approved by, the state department.

Neither this section or any other provision of this divison shall be construed to prohibit short-term methadone detoxification treatment in a controlled setting approved by the director and pursuant to rules and regulations of the director. Facilities and treatment approved by the director under this paragraph shall not be subject to approval or inspection by the Board of Medical Examiners of the State of California nor shall persons in such facilities be required to register with, or report the termination of residence with, the police department or sheriff's office.

11217.5. Notwithstanding the provisions of Section 11217, a licensed physician and surgeon may treat an addict for addiction in any office or medical facility which, in the professional judgment of such physician and surgeon, is medically proper for the rehabilitation and treatment of such addict. Such licensed physician and surgeon may administer to an addict under his direct care, those medications and therapeutic agents which, in the judgment of such physician and surgeon, are medically necessary, provided that nothing in this section shall authorize the administration of any narcotic drug.

11218. A physician treating an addict for addiction shall not prescribe for or furnish the addict more than any one of the following amounts of controlled substances during each of the first 15 days of such treatment:

(a) Eight grains of opium.
(b) Four grains of morphine.
(c) Six grains of Pantopon.
(d) One grain of Dilaudid.
(e) Four hundred milligrams of isonipecaine (Demerol).
(f) One hundred eighty millgrams of methadone.

11219. After 15 days of treatment the physician shall not prescribe or furnish to the addict more than any one of the following amounts of controlled substances during each day of such treatment:

(a) Four grains of opium.
(b) Two grains of morphine.
(c) Three grains of Pantopon.
(d) One-half grain of Dilaudid.
(e) Two hundred milligrams of isonipecaine (Demerol).
(f) One hundred eighty milligrams of methadone.

11220. At the end of 30 days from the first treatment, the prescribing or furnishing of controlled substances, except methadone, shall be discontinued.

11221. The physician prescribing, furnishing, or administering narcotic controlled substance in the treatment of an addict for addiction [illegible] days after the first treatment report by registered

over his signature, to the Attorney General stating the name and address of the patient, and the name and quantities of narcotic controlled substances prescribed.

The report shall state the progress of the patient under the treatment.

The physician shall in the same manner further report on the 15th day of the treatment and on the 30th day of the treatment, and thereafter shall make such further reports as are requested in writing by the Attorney General.

11222. In any case in which a person is taken into custody by arrest or other process of law and is lodged in a jail or other place of confinement, and there is reasonable cause to believe that such person is addicted to a controlled substance, it is the duty of the person in charge of the place of confinement to provide the person so confined with medical aid as necessary to ease any symptoms of withdrawal from the use of controlled substances.

In any case in which a person, who is participating in a methadone maintenance program, is incarcerated in a jail or other place of confinement, he shall, in the discretion of the director of such program, be entitled to continue in such program until conviction.

Article 3. Physicians' Reports

11230. A physician prescribing or furnishing a controlled substance classified in Schedule II to an habitual user shall within five days after first prescribing or furnishing the controlled substance personally report in writing by registered mail, over his signature, to the Attorney General.

The report shall contain all of the following:

(a) Name of the patient.
(b) Address of the patient.
(c) Character of the injury or ailment.
(d) Quantity and kind of controlled substance used.
(e) A statement as to whether or not the patient is an addict.

11231. The physician shall upon request in writing from the Attorney General furnish any additional reports upon the treatment of the user as the Attorney General may request in writing.

Article 4. Veterinarians

11240. No veterinarian shall prescribe, administer, or furnish a controlled substance for himself or any other human being.

11241. A prescription written by a veterinarian shall state the kind of animal for which ordered and the name and address of the owner or person having custody of the animal.

Article 5. Sale Without Prescription

11250. No prescription is required in case of the sale of controlled

substances at retail in pharmacies by pharmacists to any of the following:

(a) Physicians.
(b) Dentists.
(c) Podiatrists.
(d) Veterinarians.
(e) Pharmacists acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurses acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistants acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1.

In any sale mentioned in this article, there shall be executed any written order that may otherwise be required by federal law relating to the production, importation, exportation, manufacture, compounding, distributing, dispensing, or control of controlled substances.

11251. No prescription is required in case of sales at wholesale by pharmacies, jobbers, wholesalers and manufacturers to any of the following:

(a) Pharmacies as defined in the Business and Professions Code.
(b) Physicians.
(c) Dentists.
(d) Podiatrists.
(e) Veterinarians.
(f) Other jobbers, wholesalers or manufacturers.
(g) Pharmacists acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurses acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistants acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1.

11252. All wholesale jobbers, wholesalers, and manufacturers, mentioned in this division shall keep, in a manner readily accessible, the written orders or blank forms required to be preserved pursuant to federal law relating to the production, importation, exportation, manufacture, compounding, distributing, dispensing, or control of controlled substances.

11253. The written orders or blank forms shall be preserved for at least three years after the date of the last entry made.

11255. The taking of any order, or making of any contract or agreement, by any traveling representative or employee of any person for future delivery in this state of any controlled substance constitutes a sale within the meaning of this division.

11256. Within 24 hours after any purchaser in this state gives any order for a controlled substance classified in Schedule II to, or makes any

contract or agreement for purchases from or sales by, an out-of-state wholesaler or manufacturer of any controlled substances for delivery in this state, the purchaser shall forward to the Attorney General by registered mail a true and correct copy of the order, contract, or agreement.

Chapter. 6. Offenses and Penalties

Article 1. Offenses Involving Controlled Substances Formerly Classified as Narcotics

11350. Except as otherwise provided in this division, every person who possesses (1) any controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or (2) any controlled substance classified in Schedule III, IV, or V which is a narcotic drug, unless upon the written prescription of a physician, dentist, podiatrist, or veterinarian licensed to practice in this state, shall be punished by imprisonment in the state prison.

11351. Except as otherwise provided in this division, every person who possesses for sale (1) any controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or (2) any controlled substance classified in Schedule III, IV, or V which is a narcotic drug, shall be punished by imprisonment in the state prison for two, three, or four years.

11352. Except as otherwise provided in this division, every person who transports, imports into this state, sells, furnishes, administers, or gives away, or offers to transport, import into this state, sell, furnish, administer, or give away, or attempts to import into this state or transport (1) any controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or (2) any controlled substance classified in Schedule III, IV, or V which is a narcotic drug, unless upon the written prescription of a physician, dentist, podiatrist, or veterinarian licensed to practice in this state, shall be punished by imprisonment in the state prison for three, four or five years.

11352.5. The court shall impose a fine not exceeding fifty thousand dollars ($50,000), in the absence of a finding that the defendant would be incapable of paying such a fine, in addition to any term of imprisonment provided by law for any of following persons:

(1) Any person who is convicted of violating Section 11351 of the Health and Safety Code by possessing for sale one-half ounce or more of a substance containing heroin.

(2) Any person who is convicted of violating Section 11352 of the Health and Safety Code by selling or offering to sell one-half ounce or more of a substance containing heroin.

(3) Any person convicted of violating Section 11351 of the Health and Safety Code by possessing heroin for sale or convicted of violating Section 11352 of the Health and Safety Code by selling or offering to sell heroin, and who has one or more prior convictions for violating Section 11351 or Section 11352 of the Health and Safety Code.

11353. Every person 18 years of age or over who in any voluntary manner solicits, induces, encourages, or intimidates any minor with the intent that the minor shall knowingly violate any provision of this chapter or Section 11550 with respect to (1) a controlled substance which is specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055 or, (2) any controlled substance classified in Schedule III, IV, or V which is a narcotic drug, who hires, employs, or uses a minor to knowingly and unlawfully transport, carry, sell, give away, prepare for sale, or peddle any such controlled substance, or who unlawfully sells, furnishes, administers, gives, or offers to sell, furnish, administer, or give, any such controlled substance to a minor shall be punished by imprisonment in the state prison for a period of three, four, or five years.

11354. (a) Every person under the age of 18 years who in any voluntary manner solicits, induces, encourages, or intimidates any minor with the intent that the minor shall knowingly violate any provision of this chapter or Section 11550, who hires, employs, or uses a minor to knowingly and unlawfully transport, carry, sell, give away, prepare for sale, or peddle (1) any controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055 or (2) any controlled substance classified in Schedule III, IV, or V which is a narcotic drug, or who unlawfully sells, furnishes, administers, gives, or offers to sell, furnish, administer, or give, any such controlled substance to a minor shall be punished by imprisonment in the state prison.

(b) This section is not intended to affect the jurisdiction of the juvenile court.

11355. Every person who agrees, consents, or in any manner offers to unlawfully sell, furnish, transport, administer, or give (1) any controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (10), (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055 or, (2) any controlled substance classified in Schedule III, IV, or V which is a narcotic drug to any person, or offers, arranges, or negotiates to have any such controlled substance unlawfully sold, delivered, transported, furnished, administered, or given to any person and then sells, delivers, furnishes, transports, administers, or gives, or offers, arranges, or negotiates to have sold, delivered, transported, furnished, administered, or given to any person any other liquid, substance, or material in lieu of any such controlled substance shall be punished by imprisonment in the county jail for not more than one year, or in the state prison.

11356. As used in this article "felony offense," and offense "punishable as a felony" refer to an offense for which the law prescribes imprisonment in the state prison as either an alternative or the sole penalty, regardless of the sentence the particular defendant received.

Article 2. Marijuana

11357. (a) Except as authorized by law, every person who possesses any concentrated cannabis shall be punished by imprisonment in the county jail for a period of not more than one year or by a fine of not more than five hundred dollars ($500), or by both such fine and imprisonment, or shall be punished by imprisonment in the state prison.

(b) Except as authorized by law, every person who possesses not more than one avoirdupois ounce of marijuana, other than concentrated cannabis, is guilty of a misdemeanor and shall be punished by a fine of not more than one hundred dollars ($100). Notwithstanding other provisions of law, if such person has been previously convicted three or more times of an offense described in this subdivision during the two-year period immediately preceding the date of commission of the violation to be charged, the previous convictions shall also be charged in the accusatory pleading and, if found to be true by the jury upon a jury trial or by the court upon a court trial or if admitted by the person, the provisions of Sections 1000.1 and 1000.2 of the Penal Code shall be applicable to him, and the court shall divert and refer him for education, treatment, or rehabilitation, without a court hearing or determination or the concurrence of the district attorney, to an appropriate community program which will accept him. If the person is so diverted and referred he shall not be subject to the fine specified in this subdivision. If no community program will accept him, the person shall be subject to the fine specified in this subdivision. In any case in which a person is arrested for a violation of this subdivision and does not demand to be taken before a magistrate, such person shall be released by the arresting officer upon presentation of satisfactory evidence of identity and giving his written promise to appear in court, as provided in Section 853.6 of the Penal Code, and shall not be subjected to booking.

(c) Except as authorized by law, every person who possess more than one avoirdupois ounce of marijuana, other than concentrated cannabis, shall be punished by imprisonment in the county jail for a period of not more than six months or by a fine of not more than five hundred dollars ($500), or by both such fine and imprisonment.

11358. Every person who plants, cultivates, harvests, dries, or processes any marijuana or any part thereof, except as otherwise provided by law, shall be punished by imprisonment in the state prison.

11359. Every person who possesses for sale any marijuana, except as otherwise provided by law, shall be punished by imprisonment in the state prison.

11360. (a) Except as otherwise provided by this section or as

authorized by law, every person who transports, imports into this state, sells, furnishes, administers, or gives away, or offers to transport, import into this state, sell, furnish, administer, or give away, or attempts to import into this state or transport any marijuana shall be punished by imprisonment in the state prison for a period of two, three or four years.

(b) Except as authorized by law, every person who gives away, offers to give away, transports, offers to transport, or attempts to transport not more than one avoirdupois ounce of marijuana, other than concentrated cannabis, is guilty of a misdemeanor and shall be punished by a fine of not more than one hundred dollars ($100). In any case in which a person is arrested for a violation of this subdivision and does not demand to be taken before a magistrate, such person shall be released by the arresting officer upon presentation of satisfactory evidence of identity and giving his written promise to appear in court, as provided in Section 853.6 of the Penal Code, and shall not be subjected to booking.

11361. Every person 18 years of age or over who hires, employs, or uses a minor in unlawfully transporting, carrying, selling, giving away, preparing for sale, or peddling any marijuana, who unlawfully sells, furnishes, administers, gives, or offers to sell, furnish, administer, or give any marijuana to a minor, or who induces a minor to use marijuana in violation of law shall be punished by imprisonment in the state prison for a period of three, four, or five years.

11361.5. (a) Records of any court of this state, any public or private agency that provides services upon referral under Section 1000.2 of the Penal Code, or of any state agency or local public agency pertaining to the arrest or conviction of any person for a violation of subdivision (b) or (c) of Section 11357 or subdivision (c) of Section 11360, shall not be kept beyond two years from the date of such a conviction, or from the date of the arrest if there was no conviction. It shall be the duty of each court and each such agency having custody of such records to provide for the timely destruction thereof in accordance with the provisions of subdivision (c). The requirements of this subdivision shall not apply to records of any conviction occurring prior to January 1, 1976, or records of any arrest not followed by a conviction occurring prior to such date.

(b) This subdivision shall be applicable only to records of convictions and arrests not followed by conviction occurring prior to January 1, 1976, for any of the following offenses:

(1) Any violation of Section 11357 or a statutory predecessor thereof.

(2) Unlawful possession of a device, contrivance, instrument or paraphernalia used for unlawfully smoking marijuana, in violation of Section 11364, as it existed prior to January 1, 1976, or a statutory predecessor thereof,

(3) Unlawful visitation or presence in a room or place in which marijuana is being unlawfully smoked or used, in violation of Section 11365, as it existed prior to January 1, 1976, or a statutory predecessor thereof.

(4) Unlawfully using or being under the influence of marijuana, in violation of Section 11550, as it existed prior to January 1, 1976, or a

statutory predecessor thereof.

Any person subject to such an arrest or conviction may apply to the Department of Justice for destruction of records pertaining thereto if two years or more have elapsed since the date of the conviction, or since the date of the arrest if not followed by a conviction. The application shall be submitted upon a form supplied by the Department of Justice and shall be accompanied by a fee, which shall be established by the department in such amount as will defray the cost of administering this subdivision and costs incurred by the state under subdivision (e), but which shall not exceed thirty-seven dollars and fifty cents ($37.50). The application form shall be made available at every local police or sheriff's department and from the Department of Justice and may require such information as the department determines is necessary for purposes of identification.

The department may request, but not require, the applicant to include a self-administered fingerprint upon the application. If the department is unable to sufficiently identify the applicant for purposes of this subdivision without such fingerprint or without additional fingerprints, it shall so notify the applicant and shall request the applicant to submit such fingerprints as may be required to effect identification, including a complete set if necessary, or, alternatively, to abandon the application and request a refund of all or a portion of the fee submitted with the application, as provided in this section. If the applicant fails or refuses to submit fingerprints in accordance with the department's request within such reasonable time as shall be established by the department or if the applicant requests a refund of the fee, the department shall promptly mail a refund to the applicant at the address specified in the application or at such other address as may be specified by the applicant. However, if the department has notified the applicant that election to abandon the application will result in forfeiture of a specified amount which is a portion of the fee, the department may retain such portion of the fee as the department may determine will defray the actual costs of processing the application, provided, the amount of such portion retained shall not exceed ten dollars ($10).

Upon receipt of a sufficient application, the Department of Justice shall destroy records of the department, if any, pertaining to such arrest or conviction in the manner prescribed by subdivision (c) and shall notify the Federal Bureau of Investigation, the law enforcement agency which arrested the applicant, and, if the applicant was convicted, the probation department which investigated the applicant and the Department of Motor Vehicles, of the application. Each state or local agency receiving such a notice from the Department of Justice shall destroy records of such agency, if any, pertaining to the arrest or conviction specified in the notice, in the manner prescribed by subdivision (c). The application form and the notices from the department to the agencies specified in this subdivision shall be destroyed by the department or agency, as the case may be, at the time the other records of the arrest or conviction are destroyed.

(c) Destruction of records of arrest or conviction pursuant to subdivision (a) or (b) of this section shall be accomplished by permanent

obliteration of all entries or notations upon such records pertaining to the arrest or conviction, and the record shall be prepared again so that it appears that the arrest or conviction never occurred. However, where (1) the only entries upon the record pertain to such arrest or conviction and (2) the record can be destroyed without necessarily effecting the destruction of other records, then the document constituting the record shall be physically destroyed.

(d) Notwithstanding subdivision (a) or (b), written transcriptions of oral testimony in court proceedings and published judicial appellate reports shall not be subject to the provisions of this section. Additionally, no records shall be destroyed pursuant to subdivision (a) if the defendant or a codefendant has filed a civil action against the peace officers or law enforcement jurisdiction which made the arrest or instituted the prosecution and if the agency which is the custodian of such records has received a certified copy of the complaint in such civil action, until the civil action has finally been resolved. Immediately following the final resolution of the civil action, records subject to subdivision (a) of this section shall be destroyed pursuant to subdivision (a) if more than two years has elapsed from the date of the conviction or arrest without conviction.

(e) Costs incurred by local agencies in complying with the provisions of subdivision (b) shall be reimbursed as provided in Section 2231 of the Revenue and Taxation Code.

11361.7. (a) Any record subject to destruction or permanent obliteration pursuant to Section 11361.5, or more than two years of age, of a record of a conviction for an offense specified in subdivision (a) or (b) of Section 11361.5 which became final more than two years previously, shall not be considered to be accurate, relevant, timely, or complete for any purposes by any agency or person. The provisions of this subdivision shall be applicable for purposes of the Privacy Act of 1974 (5 U.S.C. Section 552a) to the fullest extent permissible by law, whenever any information or record subject to destruction or permanent obliteration under Section 11361.5 was obtained by any state agency, local public agency, or any public or private agency that provides services upon referral under Section 1000.2 of the Penal Code, and is thereafter shared with or disseminated to any agency of the federal government.

(b) No public agency shall alter, amend, assess, condition, deny, limit, postpone, qualify, revoke, surcharge, or suspend any certificate, franchise, incident, interest, license, opportunity, permit, privilege, right, or title of any person because of an arrest or conviction for an offense specified in subdivision (a) or (b) of Section 11361.5, or because of the facts or events leading to such an arrest or conviction, on or after the date the records of such arrest or conviction are required to be destroyed by subdivision (a) of Section 11361.5, or two years from the date of such conviction or arrest without conviction with respect to arrests and convictions occurring prior to January 1, 1976. As used in this subdivision, "public agency" includes, but is not limited to, any state, county, city and county, city, public or constitutional corporation or entity, district, local or regional politic

subdivision, or any department, division, bureau, office, board, commission or other agency thereof.

(c) Any person arrested or convicted for an offense specified in subdivision (a) or (b) of Section 11361.5 may, two years from the date of such a conviction, or from the date of the arrest if there was no conviction, indicate in response to any question concerning his prior criminal record that he was not arrested or convicted for such offense.

(d) The provisions of this section shall be applicable without regard to whether destruction or obliteration of records has actually been implemented pursuant to Section 11361.5.

11362. As used in this article "felony offense," and offense "punishable as a felony" refer to an offense for which the law prescribes imprisonment in the state prison as either an alternative or the sole penalty, regardless of the sentence the particular defendant received.

Article 3. Peyote

11363. Every person who plants, cultivates, harvests, dries, or processes any plant of the genus Lophophora, also known as peyote, or any part thereof shall be punished by imprisonment in the county jail for a period of not more than one year or the state prison.

Article 4. Miscellaneous Offenses and Provisions

11364. It is unlawful to possess an opium pipe or any device, contrivance, instrument or paraphernalia used for unlawfully injecting or smoking (1) a controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055 or (2) a controlled substance which is a narcotic drug classified in Schedule III, IV or V.

11365. It is unlawful to visit or to be in any room or place where any controlled substances which are specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or which are narcotic drugs classified in Schedule III, IV, or V, are being unlawfully smoked or used with knowledge that such activity is occurring.

11366. Every person who opens or maintains any place for the purpose of unlawfully selling, giving away, or using any controlled substance which is (1) specified in subdivision (b) or (c) of Section 11054, specified in paragraph (10), (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or (2) which is a narcotic drug classified in Schedule III, IV, or V, shall be punished by imprisonment in the county jail for a period of not more than one year or the state prison.

11367. All duly authorized peace officers, while investigating violations of this division in performance of their official duties, and any person working under their immediate direction, supervision or instruction, ar immune from prosecution under this division.

11368. Every person who forges or alters a prescription or who issue or utters an altered prescription, or who issues or utters a prescriptio bearing a forged or fictitious signature for any narcotic drug, or wh obtains any narcotic drug by any forged, fictitious, or altered prescriptior or who has in possession any narcotic drug secured by such forgec fictitious, or altered prescription, shall for the first offense be punished b imprisonment in the county jail for not less than six months nor more tha one year, or in the state prison.

11369. When there is reason to believe that any person arrested fo violation of Section 11350, 11352, 11353, 11355, 11357, 11360, 11361, 1136 11366, 11368 or 11550, may not be a citizen of the United States, th arresting agency shall notify the appropriate agency of the United State having charge of deportation matters.

11370. (a) Any person convicted of violating Section 11350, 1135 11355, 11357, 11359, 11360, 11361, 11363, 11366, or 11368, or of committin any offense referred to in those sections, shall not, in any case, be grante probation by the trial court or have the execution of the sentence impose upon him suspended by the court, if he has been previously convicted c any offense described in subdivision (c).

(b) Any person who was 18 years of age or over at the time of th commission of the offense and is convicted for the first time of sellin furnishing, administering, or giving a controlled substance which is (1 specified in subdivision (b) or (c) of Section 11054, specified in paragrap (11), (12), or (17) of subdivision (d) of Section 11054, or specified i subdivision (b) or (c) of Section 11055, or, (2) which is a narcotic dru classified in Schedule III, IV, or V, to a minor or inducing a minor to us such a controlled substance in violation of law shall not, in any case, b granted probation by the trial court or have the execution of the sentenc imposed upon him suspended by the court.

(c) Any previous conviction of any of the following offenses, or of a offense under the laws of another state or of the United States which, committed in this state would have been punishable as such an offens shall render a person ineligible for probation or suspension of sentenc pursuant to subdivision (a) of this section:

(1) Any felony offense described in this division involving a controlle substance specified in subdivision (b) or (c) of Section 11054, specified i paragraph (10), (11), (12), or (17) of subdivision (d) of Section 11054, o specified in subdivision (b) or (c) of Section 11055.

(2) Any felony offense described in this division involving a narcoti drug classified in Schedule III, IV, or V.

11371. Any person who shall violate any of the provisions of Sectio 11152, 11153, 11154, 11155, or 11156 with respect to (1) a controlle substance specified in subdivision (b) or (c) of Section 11054, specified i paragraph (10), (11), (12), or (17) of subdivision (d) of Section 11054, o specified in subdivision (b) or (c) of Section 11055, or (2) a controlle

substance which is a narcotic drug classified in Schedule III, IV, or V, or who in any voluntary manner solicits, induces, encourages or intimidates any minor with the intent that such minor shall commit any such offense, shall be punished by imprisonment in the state prison or in a county jail not exceeding one year, or by a fine not exceeding twenty thousand dollars ($20,000), or by both such fine and imprisonment.

11371.1. Any person who shall violate any of the provisions of Section 11173 or 11174 with respect to (1) a controlled substance specified in subdivision (b) or (c) of Section 11054, specified in paragraph (10), (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or (2) a controlled substance which is a narcotic drug classified in Schedule III, IV, or V, or who in any voluntary manner solicits, induces, encourages or intimidates any minor with the intent that such minor shall commit any such offense, shall be punished by imprisonment in the state prison or in a county jail not exceeding one year.

11372. In addition to the term of imprisonment provided by law for persons convicted of violating Section 11350, 11351, 11352, 11353, 11355, 11359, 11360, or 11361 of this code, the trial court may impose a fine not exceeding twenty thousand dollars ($20,000) for each such offense. In no event shall such fine be levied in lieu of or in substitution for the term of imprisonment provided by law for any of such offenses.

11373. Whenever any person is granted probation by the trial court after conviction for possession of any controlled substance classified in Schedule I or II, such trial court shall, as a condition of probation, order such person to secure education or treatment from a local community agency designated by such court, if such service is available and the person is likely to benefit from the service.

If such defendant is a minor, the trial court shall also order his parents or guardian to participate in such education or treatment to the extent the court determines will aid the education or treatment of the minor.

If a minor is found by a juvenile court to have been in possession of any controlled substance classified in Schedule I or II, in addition to any other order it may make, such juvenile court shall order the minor to receive education or treatment from a local community agency designated by such court, if such service is available and the person is likely to benefit from the service, and it shall also order his parents or guardian to participate in such education or treatment to the extent the court determines will aid the education or treatment of the minor.

11374. Every person who violates or fails to comply with any provision of this division, except one for which a penalty is otherwise in this division specifically provided, is guilty of a misdemeanor punishable by a fine in a sum not less than thirty dollars ($30) nor more than five hundred dollars ($500), or by imprisonment for not less than 15 nor more than 180 days, or by both.

Article 5. Schedules III, IV, and V

11376. Whenever any person is granted probation by the trial cou after conviction for possession of any controlled substance which is (classified in Schedule III, IV, or V and which is not a narcotic drug or (which is specified in subdivision (d) of Section 11054, except paragrap (10), (11), (12), and (17) of such subdivision, or specified in subdivisic (d) of Section 11055, such trial court shall, as a condition of probatio order such person to secure education or treatment from a loc community agency designated by such court, if such service is availat and the person is likely to benefit from the service.

If such defendant is a minor, the trial court shall also order his pare or guardian to participate in such education or treatment to the extent t court determines will aid the education or treatment of the minor.

If a minor is found by a juvenile court to have been in possession of a such controlled substance, in addition to any other order it may ma such juvenile court shall order the minor to receive education treatment from the local community agency designated by such court such service is available and the person is likely to benefit from the servi and it shall also order his parents or guardian to participate in s education or treatment to the extent the court determines will aid education or treatment of the minor.

11377. (a) Except as otherwise provided in Article 8 (commenc with Section 4211) of Chapter 9 of Division 2 of the Business Professions Code, every person who possesses any controlled substa which is (1) classified in Schedule III, IV, or V, other than any substa specified in paragraph (6) of subdivision (b) of Section 11056, and wl is not a narcotic drug or (2) which is specified in subdivision (d) of Sec 11054, except paragraphs (10), (11), (12), and (17) of such subdivisio specified in subdivision (d) of Section 11055, unless upon the prescrip of a physician, dentist, podiatrist, or veterinarian, or pharmacist ac within the scope of a project authorized under Article 18 (commen with Section 429.70) of Chapter 2 of Part 1 of Division 1, or regist nurse acting within the scope of a project authorized under Artic (commencing with Section 429.70) of Chapter 2 of Part 1 of Division physician's assistant acting within the scope of a project authorized u Article 18 (commencing with Section 429.70) of Chapter 2 of Part Division 1 licensed to practice in this state, shall be punishe imprisonment in the county jail for a period of not more than one yc the state prison.

(b) Except as otherwise provided in Article 8 (commencing Section 4211) of Chapter 9 of Division 2 of the Business and Profe Code, every person who possesses any controlled substance specifi paragraph (6) of subdivision (b) of Section 11056, unless upo prescription of a physician, dentist, podiatrist, or veterinaria pharmacist acting within the scope of a project authorized under A 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Di registered nurse acting within the scope of a project auth

under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 licensed to practice in this state, shall be punished by a fine of not exceeding five hundred dollars ($500), or by imprisonment in the county jail for not exceeding six months, or by both such fine and imprisonment.

11378. Except as otherwise provided in Article 8 (commencing with Section 4211) of Chapter 9 of Division 2 of the Business and Professions Code, every person who possesses for sale any controlled substance which is (1) classified in Schedule III, IV, or V and which is not a narcotic drug or (2) which is specified in subdivision (d) of Section 11054, except paragraphs (10), (11), (12), and (17) of such subdivision, or specified in subdivision (d) of Section 11055, shall be punished by imprisonment in the state prison.

11379. Except as otherwise provided in Article 8 (commencing with Section 4211) of Chapter 9 of Division 2 of the Business and Professions Code, every person who transports, imports into this state, sells, manufactures, compounds, furnishes, administers, or gives away, or offers to transport, import into this state, sell, manufacture, compound, furnish, administer, or give away, or attempts to import into this state or transport any controlled substance which is (1) classified in Schedule III, IV, or V and which is not a narcotic drug or (2) which is specified in subdivision (d) of Section 11054 except paragraphs (10), (11), (12), and (17) of such subdivision, or specified in subdivision (d) of Section 11055, unless upon the prescription of a physician, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or registered nurse acting within the scope of a project authorized under Article 15 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 licensed to practice in this state, shall be punished by imprisonment in the state prison for a period of two, three, or four years.

11380. (a) Every person 18 years of age or over who violates any provision of this chapter involving controlled substances which are (1) classified in Schedule III, IV, or V and which are not narcotic drugs or (2) which are specified in subdivision (d) of Section 11054, except paragraphs (10), (11), (12), and (17) of such subdivision, or specified in subdivision (d) of Section 11055, by the use of a minor as agent, who solicits, induces, encourages, or intimidates any minor with the intent that the minor shall violate any provision of this article involving such controlled substances or who unlawfully furnishes, offers to furnish, or attempts to furnish such controlled substances to a minor shall be punished by imprisonment in the state prison for a period of three, four or five years.

(b) Nothing contained in this section shall apply to a registered pharmacist furnishing controlled substances pursuant to a prescription.

11381. As used in this article "felony offense" and offense "punishable as a felony" refer to an offense for which the law prescribes imprisonment in the state prison as either an alternative or the sole penalty, regardless of the sentence the particular defendant received.

11382. Every person who agrees, consents, or in any manner offers to unlawfully sell, furnish, transport, administer, or give any controlled substance which is (1) classified in Schedule III, IV, or V and which is not a narcotic drug, or (2) which is specified in subdivision (d) of Section 11054, except paragraphs (10), (11), (12), and (17) of such subdivision, or specified in subdivision (d) of Section 11055, to any person, or offers, arranges, or negotiates to have any such controlled substance unlawfully sold, delivered, transported, furnished, administered, or given to any person and then sells, delivers, furnishes, transports, administers, or gives or offers, or arranges, or negotiates to have sold, delivered, transported, furnished, administered, or given to any person any other liquid, substance, or material in lieu of any such controlled substance shall be punished by imprisonment in the county jail for not more than one year or in the state prison.

11382.5. All controlled substances in Schedules I, II, III, IV, and V, in solid or capsule form, except for such controlled substances in the possession or inventory of a wholesaler, retailer, or pharmacist on January 1, 1975, shall not be sold, furnished, or distributed in this state unless they have on the controlled substance if in solid form, or on the capsule if in capsule form, an identifying device, insignia, or mark of the manufacturer of such controlled substance. However, the exception for such controlled substances in the possession or inventory of a wholesaler, retailer, or pharmacist shall not be available to any wholesaler, retailer, or pharmacist under the control or jurisdiction of a manufacturer of controlled substances.

This section shall not apply to a pharmacist who, in accordance with applicable state law, compounds such controlled substance in the course of his practice as a pharmacist for direct dispensing by him upon a prescription of any person licensed to prescribe such controlled substances.

Article 6. Precursors of Methamphetamine and Phencyclidine

11383. (a) Any person who possesses both methylamine and phenyl-2-propanone (phenylacetone) at the same time with the intent to manufacture methamphetamine is guilty of a felony and shall be punished by imprisonment in the state prison for not less than one year nor more than five years.

(b) Any person who possesses both piperidine and cyclohexanone at the same time, or a combination product thereof, with intent to manufacture phencyclidine (PCP) is guilty of a felony and shall be punished by imprisonment in the state prison for not less than one ye

nor more than five years.

(c) For purposes of this section, possession of immediate precursors sufficient for the manufacture of methylamine, phenyl-2-propanone, piperidine, or cyclohexanone shall be deemed to be possession of such a derivative substance. Additionally, possession of any compound or mixture containing piperidine or cyclohexanone shall be deemed to be possession of such substance.

(d) The provisions of subdivisions (a), (b), and (c) shall not apply to drug manufacturers licensed by this state or persons authorized by regulation of the Board of Pharmacy to possess such combination of substances.

11384. The Board of Pharmacy shall, by regulation, authorize such persons to possess any combinations of substance specified in subdivision (a) or (b) of Section 11383 as it determines need and will use such substance for a lawful purpose.

Chapter 7. Bureau of Narcotic Enforcement

11450. The Attorney General may, in conformity with the State Civil Service Act, Part 2 (commencing with Section 18500), Division 5, Title 2 of the Government Code, employ such agents, chemists, clerical, and other employees as are necessary for the conduct of the affairs of the Department of Justice in carrying out its responsibilities specified in this division.

11453. The Department of Justice may employ a physician to interview and examine any patient for whom any controlled substance classified in Schedule I, II, or III has been prescribed or to whom any such controlled substance has been furnished or administered, or who is an habitual user of such a controlled substance, or who has a previous addiction record to a substance listed as a controlled substance classified in Schedules I, II, or III.

The patient shall submit to the interview and examination and shall not in any manner hinder or impede it.

The physician employed by the Department of Justice to conduct the interview and examination shall report the results of the examination and inverview to the department.

The physician so employed may testify in any action brought under this division or in any hearing before the State Board of Medical Examiners or the State Board of Osteopathic Examiners and his testimony is not privileged.

Every person who violates any provision of this section is guilty of a misdemeanor.

11454. The Attorney General and the agents appointed by him, when authorized so to do by the Attorney General, may expend such sums as the Attorney General deems necessary in the purchase of controlled [illegible] and in the employment of operators to obtain

The sums so expended shall be repaid to the officer making the expenditures upon claims approved by the Attorney General and subject to postaudit by the Department of Finance. The claims when approved shall be paid out of the funds appropriated or made available by law for the support or use of the Department of Justice.

Chapter 8. Seizure and Disposition

11470. The following are subject to forfeiture:

(a) All controlled substances which have been manufactured, distributed, dispensed, or acquired in violation of this division.

(b) All raw materials, products and equipment of any kind which are used, or intended for use, in manufacturing, compounding, processing, delivering, importing, or exporting any controlled substance in violation of this division.

(c) All property which is used, or intended for use, as a container for property described in subdivision (a) or (b).

(d) All books, records, and research products and materials, including formulas, microfilm, tapes, and data which are used, or intended for use, in violation of this division.

(e) The interest of any registered owner of a boat, airplane, or any vehicle other than an implement of husbandry, as defined in Section 36000 of the Vehicle Code, or a vehicle which may be lawfully driven upon the highway with a class 3 or class 4 license, as prescribed in Section 12804 of the Vehicle Code, used, in direct relation to the particular offense for which the owner or defendant is arrested and convicted, to unlawfully transport for sale any controlled substance.

11471. Property subject to forfeiture under this division may be seized by the Attorney General upon process issued by any court having jurisdiction over the property. Seizure without process may be made if any of the following situations exist:

(a) The seizure is incident to an arrest or a search under a search warrant.

(b) The property subject to seizure has been the subject of a prior judgment in favor of the state in a criminal injunction or forfeiture proceeding based upon this division.

(c) The Attorney General has probable cause to believe that the property is directly or indirectly dangerous to health or safety.

(d) The Attorney General has probable cause to believe that the property was used or is intended to be used in violation of this division.

11472. In the event of seizure pursuant to Section 11471, proceedings under Section 11473 shall be instituted promptly.

11473. Controlled substances and any device, contrivance, instrument or paraphernalia used for unlawfully using or administering a controlled substance, which are possessed in violation of this division, may be seized by any peace officer and in the aid of such seizure a search warrant may be [illegible] prescribed by law.

11474. All seizures under provisions of this chapter, except seizures of vehicles, boats, or airplanes, shall, upon conviction of the owner or defendant, be ordered destroyed by the judge of the court in which conviction was had and the judge shall turn all such evidence over to the Attorney General for destruction or disposition.

11474.5. All seizures of controlled substances, instruments, or paraphernalia used for unlawfully using or administering a controlled substance which are in possession of any city, county, or state official as the result of a case in which no trial was had or in a case which has been disposed of by way of dismissal or otherwise than by way of conviction, shall be turned over to the Attorney General for destruction or disposition under order of the court.

11475. Controlled substances listed in Schedule I that are possessed, transferred, sold, or offered for sale in violation of this division are contraband and shall be seized and summarily forfeited to the state. Controlled substances listed in Schedule I, which are seized or come into the possession of the state, the owners of which are unknown, are contraband and shall be summarily forfeited to the state.

11476. Species of plant from which controlled substances in Schedules I and II may be derived which have been planted or cultivated in violation of this division, or of which the owners or cultivators are unknown, or which are wild growths, may be seized and summarily forfeited to the state.

11477. The failure, upon demand by the Attorney General, or his authorized agent, of the person in occupancy or in control of land or premises upon which the species of plants are growing or being stored, to produce an appropriate registration, or proof that he is the holder thereof, constitutes authority for the seizure and forfeiture of the plants.

11478. The Attorney General may dispose of controlled substances, other than heroin or smoking opium, by gift to the medical superintendent of state prisons or state hospitals, for medical purposes. Marijuana shall be provided by the Attorney General to the heads of research projects which have been registered by the Attorney General, and which have been approved by the Research Advisory Panel pursuant to Section 11480.

The head of the approved research project shall personally receipt for such quantities of marijuana and shall make a record of their disposition. The receipt and record shall be retained by the Attorney General. The head of the approved research project shall also, at intervals and in the manner required by the Research Advisory Panel, report the progress or conclusions of the research project.

11479. Notwithstanding the provision of Sections 11474 and 11475, at any time after receipt by a publicly operated criminalistic laboratory of a suspected controlled substance for analysis, the person in charge of the laboratory may without a court order destroy that amount of the suspected controlled substance which exceeds 10 pounds in gross weight. Destruction shall not take place pursuant to this section until all of the following requirements are satisfied:

(a) A random sampling of the suspected controlled substance has been taken.

(b) The analysis of the random sampling has been completed.

(c) Photographs have been taken of the suspected controlled substance to be destroyed.

(d) The chief has approved a written request of the publicly operated criminalistic laboratory for the destruction of the suspected controlled substance. Such request shall specify the total weight of the suspected controlled substance, the total weight of such substance to be destroyed, and the total weight of such substance not to be destroyed.

(e) Not less than 30 days prior to the destruction of the suspected controlled substance, written notice shall be given to the defendant's attorney of record or, if the defendant has no attorney of record, to the defendant, stating the information contained in the request submitted to the chief pursuant to subdivision (d) and the date proposed for destruction of the suspected controlled substance, stating that destruction of such suspected controlled substance has been approved by the chief, and stating that any request to have samples taken from the whole mass of the suspected controlled substance must be done prior to the date proposed for such destruction.

11480. The Legislature finds that there is a need to encourage further research into the nature and effects of marijuana and hallucinogenic drugs and to coordinate research efforts on such subjects.

There is a Research Advisory Panel which consists of a representative of the State Department of Health, a representative of the California State Board of Pharmacy, a representative of the Attorney General, a representative of the University of California who shall be a pharmacologist or physician or a person holding a doctorate degree in the health sciences, a representative of a private university in this state who shall be a pharmacologist or physician or a person holding a doctorate degree in the health sciences, a representative of a statewide professional medical society in this state who shall be engaged in the private practice of medicine and shall be experienced in treating controlled substance dependency, and a representative appointed by and serving at the pleasure of the Governor, who shall hold a doctorate degree in the health sciences and shall have experience in drug abuse or controlled substance research. The Governor shall annually designate the private university and the professional medical society represented on the panel. Members of the panel shall be appointed by the heads of the entities to be represented, and they shall serve at the pleasure of the appointing power.

The panel shall annually select a chairman from among its members.

The panel may hold hearings on, and in other ways study, research projects concerning marijuana or hallucinogenic drugs in this state. Members of the panel shall serve without compensation, but shall be reimbursed for any actual and necessary expenses incurred in connection with the performance of their duties.

The panel may approve research projects, which have been registered by the Attorney General, into the nature and effects of marijuana or hallucinogenic drugs, and shall inform the Attorney General of the head of such approved research projects which are entitled to receive quantities of marijuana pursuant to Section 11478.

The panel may withdraw approval of a research project at any time, and when approval is withdrawn shall notify the head of the research project to return any quantitites of marijuana to the Attorney General.

The panel shall report annually to the Legislature and the Governor whose research projects approved by the panel, the nature of each research project, and, where available, the conclusions of the research project.

11481. The Research Advisory Panel may hold hearings on, and in other ways study, research projects concerning the treatment of abuse of controlled substances.

The panel may approve research projects, which have been registered by the Attorney General concerning the treatment of abuse of controlled substances and shall inform the chief of such approval. The panel may withdraw approval of a research project at any time and when approval is withdrawn shall so notify the chief.

The panel shall, annually and in the manner determined by the panel, report to the Legislature and the Governor those research projects approved by the panel, the nature of each research project, and where available, the conclusions of the research project.

11483. No provision of this division shall be construed to prohibit the establishment and effective operation of a methadone maintenance treatment program approved pursuant to Section 4351 of the Welfare and Institutions Code.

11485. When controlled substances have been seized pursuant to this division and the defendant or owner has escaped from custody and is a fugitive from justice, they shall upon demand of the Attorney General be turned over to it for safekeeping until such time as the owner or defendant is apprehended and prosecuted for violation of this division.

11486. When controlled substances have been seized pursuant to this division and the case has been disposed of by way of dismissal or otherwise than by way of conviction, they shall by order of the court, be turned over to the Attorney General unless the court finds that the controlled substances were lawfully possessed by the defendant.

11487. Each city, county, or state agency coming into possession of a controlled substance pursuant to the provisions of this chapter shall report semiannually to the Attorney General the amounts, kind, and disposition of controlled substances so seized.

The reports provided for by this section shall be in a form and contain such information as determined necessary by the Attorney General.

The Attorney General shall issue an annual report to the Governor and [illegible] correlating and summarizing the reports provided for by this section.

This section shall remain in effect only until January 1, 1980, and as of such date is repealed, unless a later enacted statute, which is chaptered before January 1, 1980, deletes or extends such date.

11490. Any peace officer of this state, upon making or attempting to make an arrest for a violation of Section 11351, 11352, 11355, 11359, 11360, 11378, or 11379, insofar as the offense involves sale, transportation for sale, or possession for sale, may seize any vehicle, boat, or airplane used to unlawfully transport for sale any controlled substance. If he does not hold the vehicle, boat, or airplane for evidence, he shall immediately deliver such vehicle, boat, or airplane to the State Department of Justice to be held as evidence until a forfeiture has been declared or a release ordered; otherwise he shall return the vehicle, boat, or airplane to the registered owner.

11491. (a) Within 15 days after such seizure, if the Department of Justice determines that the factual circumstances do not warrant that the vehicle, boat, or airplane come within subdivision (e) of Section 11470, or if for any other reason it decides not to seek forfeiture, it shall return the vehicle, boat, or airplane to the arresting officer who shall return it to the registered owner. If the Department of Justice does not return the vehicle, boat, or airplane to the arresting officer, it shall cause an investigation to be made as to any claimant to the vehicle, boat, or airplane whose right, title, interest, or lien is of record in the Department of Motor Vehicles or appropriate federal agency. Except as provided in subdivision (b), if the department finds that any person, other than the registered owner, is the legal owner thereof, and such ownership interest did not arise subsequent to the date and time of arrest or seizure of the vehicle, boat, or airplane, it shall forthwith send a notice of the seizure to such legal owner at his address appearing on the records of the Department of Motor Vehicles or appropriate federal agency. Notice of seizure and intended forfeiture proceedings shall be filed with the county clerk and shall be served on all owners whose interest will be affected thereby.

(b) A bona fide purchaser without notice of the arrest or seizure whose interest was acquired subsequent to the arrest or seizure shall be entitled to participate in the forfeiture proceedings to establish his claim.

(c) An assignee, purchaser, or holder in due course who had notice of the arrest or seizure at the time he acquired his interest and who sells, assigns, or conveys such interest is guilty of a fraudulent conveyance as provided for in Section 531 of the Penal Code, and civilly liable under Section 3439.07 of the Civil Code.

11491.1. Actual notice shall be given to each owner whose right, title or interest is of record in the Department of Motor Vehicles or appropriate federal agency, by mailing a copy of the notice by registered mail to the address as given upon the records of the Department of Motor Vehicles or appropriate federal agency; and to each owner whose name and address is known, to the last known address of the owner.

All other owners, whose addresses are unknown, but who are believed

to have an interest in the vehicle, boat, or airplane, by one publication in a newspaper of general circulation in the county where the seizure was made.

All notices shall set forth the time within which an answer is required to be filed pursuant to Section 11491.2.

11491.2. Within 10 days after receipt of actual notice or within 30 days of the publication of the notice, any owner of any right, title, or interest in, or lien upon, a seized vehicle, boat, or airplane may file a verified answer to the fact of the use of the vehicle, boat, or airplane alleged in the notice of seizure and of the intended forfeiture proceeding; and any person holding a valid lien, mortgage, security interest, or interest under a conditional sales contract may file a verified answer to the facts set forth in the notice and setting forth, if such be the fact, that he acquired his interest prior to the date of seizure without actual knowledge that the vehicle, boat, or airplane was to be used in the manner set forth in subdivision (e) of Section 11470.

11491.3. No extensions of time shall be granted for the purpose of filing the answer.

11491.4. If, at the end of the times set forth in Section 11491.2, there is no verified answer on file, the court, upon motion, shall declare the vehicle, boat, or airplane forfeited to the state upon conviction as provided in Section 11492. Notwithstanding any other provision of law, a certified copy of said declaration of forfeiture, duly filed with the Department of Motor Vehicles or appropriate federal agency, shall constitute authority for the state to convey clear title to the vehicle, boat, or airplane to any purchaser thereof in the manner provided in Sections 11493.1 and 11494.

11491.5. If a verified answer is filed, the forfeiture proceeding shall be set for hearing on a day not less than 30 days therefrom, and the proceeding shall have priority over other civil cases.

11491.6. Notice of the hearing shall be given in the same manner as provided in Section 11491.1.

11491.7. At the hearing, the state shall have the burden of establishing beyond a reasonable doubt that the owner of the vehicle, boat, or airplane, or the owner of an interest in such vehicle, boat, or airplane, consented to the use of such vehicle, boat, or airplane with the knowledge that it would be used for a violation of this chapter.

11492. No legal or registered title or interest in the vehicle, boat, or airplane shall be affected by the forfeiture decree under this article unless the state has proved that the owner of such interest consented to the use of such vehicle, boat, or airplane with knowledge that it was used for the purpose charged. No forfeiture shall be ordered unless and until a conviction is had for an offense set forth in Section 11490.

11493. The forfeiture hearing may be continued until after a verdict of guilt on the related charges has been decided. The forfeiture hearing shall be conducted in accordance with Sections 600 to 630, inclusive, of the Code of Civil Procedure if a trial by jury, and by Sections 631 to 636, inclusive, of the Code of Civil Procedure if by court. Unless the court or jury finds that the vehicle, boat, or airplane was used in violation of this chapter, the court shall order the vehicle, boat, or airplane released to the person entitled thereto.

If the court or jury finds that the vehicle, boat, or airplane was used in violation of this chapter, but does not find that a person holding a valid lien, mortgage, security interest, or interest under a conditional sales contract acquired his interest with actual knowledge that the vehicle, boat, or airplane was to be used for a purpose for which forfeiture is permitted, and if the amount due him is equal to, or in excess of, the appraised value of the vehicle, boat, or airplane, the court shall order the vehicle, boat, or airplane released to him. If the amount due him is less than the appraised value of the vehicle, boat, or airplane, he may pay to the Department of General Services the amount of the registered owner's equity, which shall be deemed to be the difference between the appraised value and the amount of the lien, mortgage, security interest, or interest under a conditional sales contract. Upon such payment, the state shall relinquish all claims to the vehicle, boat, or airplane. If the holder of the interest elects not to make such payment to the Department of General Services, the vehicle, boat, or airplane shall be deemed forfeited to the Department of General Services and the ownership certificate shall be forwarded. Appraised value is to be determined as of the date judgment is entered on a wholesale basis either by agreement between the legal owner and the Department of General Services, or if such persons cannot agree, then by the inheritance tax appraiser for the county in which the action is brought.

11493.1. If the amount due to a person holding a valid lien, mortgage, security interest, or interest under a conditional sales contract is less than the value of the vehicle, boat, or airplane, and the person elects not to make payment to the Department of General Services, the vehicle, boat, or airplane shall be sold at public auction by the Department of General Services.

11494. The Department of General Services shall publish a notice of the sale by one publication in a newspaper published and circulated in the city, community, or locality where the sale is to take place.

11495. In all cases where a vehicle, boat, or airplane seized by the Department of Justice is forfeited to the state and turned over to and sold by the Department of General Services, the proceeds of the sale shall be distributed as follows, in the order indicated:

(a) To the bona fide or innocent purchaser, conditional sales vendor, or mortgagee of the vehicle, boat, or airplane, if any, up to the amount of his interest in the vehicle, boat, or airplane, when the court declaring the forfeiture orders a distribution to such person.

(b) The balance, if any, to accumulate, and from time to time, as the proceeds become sufficient, to be distributed:

1. To the Department of General Services for all expenditures made or

incurred by it in connection with the sale, including expenditure for any necessary repairs, storage, or transportation, of any vehicle, boat, or airplane seized under this article.

2. To the Attorney General for all expenditures made or incurred by him in connection with the forfeiture proceedings of any vehicle, boat, or airplane seized under this article, including, but not limited to, expenditures for witness fees, reporters' fees, transcripts, printing, traveling, and investigation.

3. To the state for all expenditures for traveling, investigation, storage, and other expenses made or incurred by the Department of Justice after the seizure, and in connection with the forfeiture of any vehicle, boat, or airplane seized under this article.

4. The remainder, if any, to the State Treasury, for credit to the General Fund.

11498. The provisions of this division relative to forfeiture of vehicles, boats, or airplanes shall not apply to a common carrier, or to an employee acting within the scope of his employment in the enforcement of this division.

Chapter 9. Collection and Disposition of Fines

11500. The district attorney, or any person designated by him, of the county in which any violation of this division is committed shall conduct all actions and prosecutions for the violation.

However, the Attorney General, or special counsel employed by the Attorney General for that purpose, may take complete charge of the conduct of such actions or prosecutions. The Attorney General may fix the compensation to be paid for the service and may incur such other expense in connection with the conduct of the actions or prosecutions as he may deem necessary. No attorney employed as special counsel shall receive as compensation more than three thousand five hundred dollars ($3,500) in any one year.

11501. The State of California, or any political subdivision thereof, may maintain an action against any person or persons engaged in the unlawful sale of controlled substances for the recovery of any public funds paid over to such person or persons in the course of any investigation of violations of this division. All proceedings under this section shall be instituted in the superior court of the county where the funds were paid over, where the sale was made, or where the defendant resides. Notwithstanding Section 483.010 of the Code of Civil Procedure, in any action under this section, a writ of attachment may be issued, without the showing required by Section 485.010 of the Code of Civil Procedure, in the manner provided by Chapter 5 (commencing with Section 485.010) of Title 6.5 of Part 2 of the Code of Civil Procedure to attach any funds paid over or any other funds on the defendant's person at the time of his arrest.

11502. All moneys, forefeited bail, or fines received by any court under this division shall as soon as practicable after the receipt thereof be deposited with the county treasurer of the county in which such court is situated. Amounts so deposited shall be paid at least once a month as follows: 75 percent to the State Treasurer by warrant of the county auditor drawn upon the requisition of the clerk or judge of said court to be deposited in the State Treasury on order of the State Controller; and 25 percent to the city treasurer of the city, if the offense occurred in a city, otherwise to the treasurer of the county in which the prosecution is conducted.

Any money deposited in the State Treasury under the provisions of this section which is determined by the State Controller to have been erroneously deposited therein shall be refunded by him, subject to approval of the State Board of Control prior to the payment of such refund, out of any money in the State Treasury which is available by law for such purpose.

11503. Judges and magistrates who collect fines or forfeitures under this division shall keep a record thereof, and, upon the imposition of any such fine or forfeiture, shall at least monthly transmit a record of it to the county auditor. The county auditor shall transmit a record of the imposition, collection and payment of such fines or forfeitures to the State Controller at the time of transmittal of each warrant to the State Treasurer pursuant to this article.

11504. When an imprisonment has been imposed for a violation of this division, and before the termination of the sentence, the defendant is released by the vacation of the sentence of imprisonment and the imposition of a fine or forfeiture instead, the fine or forfeiture shall be recorded and accounted for in the same manner as though it had been imposed in the first instance.

11505. Whenever a fine has been imposed for violation of this division, and before the full payment of the fine a sentence of imprisonment is imposed instead, the imprisonment shall be recorded and accounted for to the county auditor.

11506. The State Controller shall check the reports and records received by him with the transmittals of fines and forfeitures and whenever it appears that fines or forfeitures have not been transmitted the county auditor shall and the State Controller may bring suit to enforce their collection or transmittal, or both.

11507. The official bond of any judge or magistrate is liable for his failure to transmit the fines or forfeitures imposed by him under this division.

11508. The records kept by a judge or magistrate under this division are open to public inspection, and may be checked by the State Controller, the Attorney General, the district attorney of the particular county, or the state bureau.

Chapter 10. Control of Users of Controlled Substances

Article 1. Addicts

11550. No person shall use, or be under the influence of any controlled substance which is (1) specified in subdivision (b) or (c) of Section 11054, specified in paragraph (11), (12), or (17) of subdivision (d) of Section 11054, or specified in subdivision (b) or (c) of Section 11055, or (2) which is a narcotic drug classified in Schedule III, IV, or V, excepting when administered by or under the direction of a person licensed by the state to dispense, prescribe, or administer controlled substances. It shall be the burden of the defense to show that it comes within the exception. Any person convicted of violating any provision of this section is guilty of a misdemeanor and shall be sentenced to serve a term of not less than 90 days nor more than one year in the county jail. The court may place a person convicted hereunder on probation for a period not to exceed five years and shall in all cases in which probation is granted require as a condition thereof that such person be confined in the county jail for at least 90 days. In no event does the court have the power to absolve a person who violates this section from the obligation of spending at last 90 days in confinement in the county jail.

11551. (a) Whenever any court in this state grants probation to a person who the court has reason to believe is or has been a user of controlled substances, the court may require as a condition to probation that the probationer submit to periodic tests by a city or county health officer, or by a physician and surgeon appointed by the city or county health officer with the approval of the Attorney General, to determine, by whatever means is available, whether the probationer is addicted to a controlled substance.

In any case provided for in this subdivision, the city or county health officer, or the physician and surgeon appointed by the city or county health officer with the approval of the Attorney General shall report the results of the tests to the probation officer.

(b) In any case in which a person is granted parole by a county parole board and the person is or has been a user of controlled substances, a condition of the parole may be that the parolee undergo periodic tests as provided in subdivision (a) and that the county or city health officer, or the physician and surgeon appointed by the city or county health officer with the approval of the Attorney General, shall report the results to the board.

(c) In any case in which any state agency grants a parole to a person who is or has been a user of controlled substances, it may be a condition of the parole that the parolee undergo periodic tests as provided in subdivision (a) and that the county or city health officer, or the physician and surgeon appointed by the city or county health officer with the approval of the Attorney General, shall report the results of the tests to such state agency.

(d) The cost of administering tests pursuant to subdivisions (a) and (b) shall be a charge against the county. The cost of administering tests pursuant to subdivision (c) shall be paid by the state.

(e) The state department, in conjunction with the Attorney General, shall issue regulations governing the administering of the tests provided for in this section and providing the form of the report required by this section.

11552. In any case in which a person has been arrested for a criminal offense and is suspected of being addicted to a controlled substance, a law enforcement officer having custody of such person may, with the written consent of such person, request the city or county health officer, or physician appointed by such health officer pursuant to Section 11551, to administer to the arrested person a test to determine, by whatever means is available whether the arrested person is addicted to a controlled substance, and such health officer or physician may administer such test to such arrested person.

11553. The fact that a person is or has been, or is suspected of being, a user of marijuana is not alone sufficient grounds upon which to invoke Section 11551 or 11552.

This section shall not be construed to limit the discretion of a judge to invoke Section 11551 or 11552 if the court has reason to believe a person is or has been a user of narcotics or drugs other than marijuana.

11554. The rehabilitation of persons addicted to controlled substances and the prevention of continued addiction to controlled substances is a matter of statewide concern. It is the policy of the state to encourage each county and city and county to make use, whenever applicable, of testing procedures to determine addiction to controlled substances or the absence thereof, and to foster research in means of detecting the existence of addiction to controlled substances and in medical methods and procedures for that purpose.

11555. The Attorney General is directed to promote and sponsor the use by agencies of local government of the provisions of this article. The Attorney General may assist such agencies to establish facilities for, and to train personnel to conduct testing procedures pursuant to Section 11551, and may conduct demonstrations thereof for limited periods. For these purposes the Attorney General may procure such medical supplies, equipment, and temporary services of physicians and qualified consultants as may reasonably be necessary. Subject to the availability of funds appropriated for the purpose, the Attorney General may contract with any county or city and county which undertakes to establish facilities and a testing program pursuant to Section 11551, and such contract may provide for payment by the state of such costs of initially establishing and demonstrating such program as the Attorney General may approve.

Article 2. Controlled Substances Treatment Control Units

11560. The Department of Corrections and the Department of the Youth Authority are authorized to establish controlled substances

treatment control units in state correctional facilities or training schools or as separate establishments for such study, research, and treatment as may be necessary for control of the addiction or imminent addiction to controlled substances of persons committed to the custody of the Director of Corrections or the Director of the Youth Authority.

11561. When the Adult Authority concludes that there are reasonable grounds for believing that a man on parole is addicted to, or is in imminent danger of addiction to, controlled substances it may issue an order to detain or place such person in a controlled substance treatment control unit for a period not to exceed 90 days. Such order shall be a sufficient warrant for any peace officer or employee of the Department of Corrections to return to physical custody any such person. Detention pursuant to such order shall not be deemed a suspension, cancellation or revocation of parole until such time as the Adult Authority so orders pursuant to Section 3060 of the Penal Code. A parolee taken into physical custody pursuant to Section 3060 of the Penal Code may be detained in a controlled substance treatment control unit established pursuant to this article.

11562. When the Youth Authority concludes that there are reasonable grounds for believing that a person committed to its custody, and on parole, is addicted to, or is in imminent danger of addiction to, controlled substances, it may issue an order to detain or place such person in a controlled substance treatment control unit for not to exceed 90 days. Such order shall be a sufficient warrant for any peace officer or employee of the Department of the Youth Authority to return to physical custody any such person. Detention pursuant to such order shall not be deemed a suspension, cancellation, or revocation of parole unless the Youth Authority so orders pursuant to Section 1767.3 of the Welfare and Institutions Code.

With the consent of the Director of Corrections, the Director of the Youth Authority may, pursuant to this section, confine the addicted or potentially addicted person, over 18 years of age, in a controlled substance treatment control unit established by the Department of Corrections.

11563. When the California Women's Board of Terms and Parole concludes that there are reasonable grounds for believing that a woman on parole is addicted to, or is in imminent danger of addiction to, controlled substances, it may issue an order to detain or place such person in a controlled substance treatment control unit for a period not to exceed 90 days. Such order shall be a sufficient warrant for any peace officer or employee of the Department of Corrections to return to physical custody any such person. Detention pursuant to such order shall not be deemed a suspension, cancellation or revocation of parole until such time as the board so orders pursuant to Section 3060 of the Penal Code. A parolee taken into physical custody pursuant to Section 3060, 6043, or 6044 of the Penal Code may be detained in a controlled substance treatment control unit established pursuant to this article.

11564. The authority granted to the Adult Authority and the Youth Authority in no way limits Sections 3060 and 3325 of the Penal Code.

Article 3. Abatement

11570. Every building or place used for the purpose of unlawfully selling, serving, storing, keeping, or giving away controlled substances as defined in this division, and every building or place wherein or upon which such acts take place, is a nuisance which shall be enjoined, abated, and prevented, whether it is a public or private nuisance.

11571. Whenever there is reason to believe that such a nuisance is kept, maintained or exists in any county, the district attorney of the county, in the name of the people, shall, or any citizen of the state resident in the county, in his own name, may, maintain an action to abate and prevent the nuisance and perpetually to enjoin the person conducting or maintaining it, and the owner, lessee, or agent of the building or place, in or upon which the nuisance exists, from directly or indirectly maintaining or permitting the nuisance.

11572. Unless filed by the district attorney, the complaint in the action shall be verified.

11573. If the existence of the nuisance is shown in the action to the satisfaction of the court or judge, either by verified complaint or affidavit, the court or judge shall allow a temporary writ of injunction to abate and prevent the continuance or recurrence of the nuisance.

11574. Except when it is granted on application of the people of the state, on granting the temporary writ the court or judge shall require a written undertaking on the part of the applicant, with sufficient sureties, to the effect that he will pay to the defendant enjoined such damages, not exceeding an amount to be specified, as the defendant sustains by reason of the injunction if the court finally decides that the applicant was not entitled to it.

11575. The action shall have precedence over all other actions, except criminal proceedings, election contests, hearings on injunctions, and actions to forfeit vehicles under this division.

11576. If the complaint is filed by a citizen it shall not be dismissed by him or for want of prosecution except upon a sworn statement made by him and his attorney, setting forth the reasons why the action should be dismissed, and by dismissal ordered by the court.

11577. In case of failure to prosecute the action with reasonable diligence, or at the request of the plaintiff, the court, in its discretion, may substitute any other citizen consenting thereto for the plaintiff.

11578. If the action is brought by a citizen and the court finds there was no reasonable ground or cause for the action, the costs shall be taxed against him.

11579. If the existence of the nuisance is established in the action, an

order of abatement shall be entered as part of the judgment in the case, and plaintiff's costs in the action are a lien upon the building or place. The lien is enforceable and collectible by execution issued by order of the court.

11580. A violation or disobedience of the injunction or order for abatement is punishable as a contempt of court by a fine of not less than two hundred dollars ($200) nor more than one thousand dollars ($1,000), or by imprisonment in the county jail for not less than one nor more than six months, or by both.

11581. If the existence of the nuisance is established in the action, an order of abatement shall be entered as a part of the judgment, which order shall direct the removal from the building or place of all fixtures, musical instruments, and other movable property used in conducting, maintaining, aiding, or abetting the nuisance and shall direct their sale in the manner provided for the sale of chattels under execution.

The order shall provide for the effectual closing of the building or place against its use for any purpose, and for keeping it closed for a period of one year, unless sooner released, as provided in this division.

11582. While the order of abatement remains in effect, the building or place is in the custody of the court.

11583. For removing and selling the movable property, the officer is entitled to charge and receive the same fees as he would for levying upon and selling like property on execution; and for closing the premises and keeping them closed, a reasonable sum shall be allowed by the court.

11584. The proceeds of the sale of the movable property shall be applied as follows:

First—To the fees and costs of the removal and sale.

Second—To the allowances and costs of closing and keeping closed the building or place.

Third—To the payment of the plaintiff's costs in the action.

Fourth—The balance, if any, to the owner of the property.

11585. If the proceeds of the sale of the movable property do not fully discharge all of the costs, fees, and allowances, the building and place shall then also be sold under execution issued upon the order of the court or judge and the proceeds of the sale shall be applied in like manner.

11586. If the owner of the building or place has not been guilty of any contempt of court in the proceedings, and appears and pays all costs, fees, and allowances that are a lien on the building or place and files a bond in the full value of the property, to be ascertained by the court, with sureties, to be approved by the court or judge, conditioned that he will immediately abate any such nuisance that may exist at the building or place and prevent it from being established or kept thereat within a period of one year thereafter, the court, or judge may, if satisfied of his good faith, order the building or place to be delivered to the owner, and the order of abatement canceled so far as it may relate to the property.

The release of property under the provisions of this division does not release it from any judgment, lien, penalty, or liability to which it may be subject.

11587. Whenever the owner of a building or place upon which the act or acts constituting the contempt have been committed, or the owner of any interest therein, has been guilty of a contempt of court, and fined in any proceedings under this division, the fine is a lien upon the building or place to the extent of his interest in it.

The lien is enforceable and collectible by execution issued by order of the court.

Article 4. Registration of Controlled Substance Offenders

11590. (a) Any person who, on or after the effective date of this section, is convicted in the State of California of any offense defined in Section 11350, 11351, 11352, 11353, 11354, 11355, 11357, 11358, 11359, 11360, 11361, 11363, 11366, 11368, or 11550, or any person who is, on or after such date, discharged or paroled from a penal institution where he was confined because of the commission of any such offense, or any person who is, on or after such date, convicted in any other state of any offense which, if committed or attempted in this state, would have been punishable as one or more of the above-mentioned offenses, shall within 30 days after the effective date of this section or within 30 days of his coming into any county or city, or city and county in which he resides or is temporarily domiciled for such length of time, register with the chief of police of the city in which he resides or the sheriff of the county if he resides in an unincorporated area.

(b) Any person who, on or after the effective date of this section is convicted in any federal court of any offense which, if committed or attempted in this state would have been punishable as one or more of the offenses enumerated in subdivision (a) shall within 30 days after the effective date of this section or within 30 days of his coming into any county or city, or city and county in which he resides or is temporarily domiciled for such length of time, register with the chief police of the city in which he resides or the sheriff of the county if he resides in an unincorporated area.

(c) This section does not apply to a conviction of a misdemeanor conviction under Section 11357 or 11360.

11591. Every sheriff or chief of police, upon the arrest for any of the controlled substance offenses enumerated in Section 11590, or Section 11364, insofar as that section relates to paragraph (9) of subdivision (d) of Section 11654, of any school employee, shall do either of the following:

(1) If such school employee is a teacher in any of the public schools of this state, he shall immediately notify by telephone the superintendent of schools of the school district employing such teacher and shall immediately give written notice of the arrest to the Commission for Teacher Preparation and Licensing and to the superintendent of schools in the county wherein such person is employed. Upon receipt of such

notice, the county superintendent of schools shall immediately notify the governing board of the school district employing such person.

(2) If such school employee is a nonteacher in any of the public schools of this state, he shall immediately notify by telephone the superintendent of schools of the school district employing such nonteacher and shall immediately give written notice of the arrest to the governing board of the school district employing such person.

(3) If such school employee is a teacher in any private school of this state, he shall immediately notify by telephone the private school authority employing such teacher and shall immediately give written notice of the arrest to the private school authority employing such teacher

11592. Any person who, on or after the effective date of this section is discharged or paroled from a jail, prison, school, road camp, or other institution where he was confined because of the commission or attempt to commit one of the offenses described in Section 11590 shall, prior to such discharge, parole, or release, be informed of his duty to register under that section by the official in charge of the place of confinement and the official shall require the person to read and sign such form as may be required by the Department of Justice, stating that the duty of the person to register under this section has been explained to him. The official in charge of the place of confinement shall obtain the address where the person expects to reside upon his discharge, parole, or release and shall report such address to the Department of Justice. The official in charge of the place of confinement shall give one copy of the form to the person, and shall send two copies to the Department of Justice, which, in turn, shall forward one copy to the appropriate law enforcement agency having local jurisdiction where the person expects to reside upon his discharge, parole, or release.

11593. Any person who, on or after the effective date of this section is convicted in the State of California of the commission or attempt to commit any of the above-mentioned offenses and who is released on probation or discharged upon payment of a fine shall, prior to such release or discharge, be informed of his duty to register under Section 11590 by the court in which he has been convicted and the court shall require the person to read and sign such form as may be required by the Department of Justice, stating that the duty of the person to register under this section has been explained to him. The court shall obtain the address where the person expects to reside upon his release or discharge and shall report within three days such address to the Department of Justice. The court shall give one copy of the form to the person, and shall send two copies to the Department of Justice, which, in turn, shall forward one copy to the appropriate law enforcement agency having local jurisdiction where the person expects to reside upon his discharge, parole, or release.

11594. The registration required by Section 11590 shall consist of (a) a statement in writing signed by such person, giving such information as may be required by the Department of Justice, and (b) the fingerprints and photograph of such person. Within three days thereafter the registering law enforcement agency shall forward such statement, fingerprints and photograph to the Department of Justice.

If any person required to register hereunder changes his residence address he shall inform, in writing within 10 days, the law enforcement agency with whom he last registered of his new address. The law enforcement agency shall, within three days after receipt of such information, forward it to the Department of Justice. The Department of Justice shall forward appropriate registration data to the law enforcement agency having local jurisdiction of the new place of residence.

All registration requirements set forth in this article shall terminate five years after the discharge from prison, release from jail or termination of probation or parole of the person convicted. Nothing in this section shall be construed to conflict with the provisions of Section 1203.4 of the Penal Code concerning termination of probation and release from penalties and disabilities of probation.

Any person required to register under the provisions of this section who shall knowingly violate any of the provisions thereof is guilty of a misdemeanor.

The statements, photographs and fingerprints herein required shall not be open to inspection by the public or by any person other than a regularly employed peace or other law enforcement officer.

11595. The provisions of former Article 6 (commencing with Section 11850) of Chapter 7 of Division 10 of this code, which is repealed by the act that adds this article, including Section 11850 as amended by Chapter 796 of the Statutes of 1972, shall remain in effect as to any person who comes within such provisions.

Notwithstanding Section 9605 of the Government Code, the changes which are made in former Section 11850 by Chapter 796 of the Statutes of 1972 shall be effective and operative for the purposes of this section.

CHAPTER 11. EDUCATIONAL PROGRAMS

11600. The Attorney General, the Board of Pharmacy, and other agencies shall carry out educational programs designed to prevent and deter misuse and abuse of controlled substances. In connection with these programs, he may do all of the following:

(a) Promote better recognition of the problems of misuse and abuse of controlled substances within the regulated industry and among interested groups and organizations.

(b) Assist the regulated industry and interested groups and organizations in contributing to the reduction of misuse and abuse of controlled substances.

(c) Consult with interested groups and organizations to aid them in solving administrative and organizational problems.

(d) Assist in the education and training of state and local law enforcement officials in their efforts to control misuse and abuse of controlled substances.

abuse of controlled substances. In connection with the research, and in furtherance of the enforcement of this division, he may do all of the following:

(a) Develop new or improved approaches, techniques, systems, equipment and devices to strengthen the enforcement of this division.

(b) Enter into contracts with public agencies, institutions of higher education, and private organizations or individuals for the purpose of conducting demonstrations or special projects which bear directly on misuse and abuse of controlled substances.

11602. The Attorney General may enter into contracts for educational and research activities without performance bonds.

11603. The Attorney General, with the approval of the Research Advisory Panel, may authorize persons engaged in research on the use and effects of controlled substances to withhold the names and other identifying characteristics of individuals who are the subjects of the research. Persons who obtain this authorization are not compelled in any civil, criminal, administrative, legislative, or other proceeding to identify the individuals who are the subjects of research for which the authorization was obtained.

11604. The Attorney General, with the approval of the Research Advisory Panel, may authorize the possession and distribution of controlled substances by persons engaged in research. Persons who obtain this authorization are exempt from state prosecution for possession and distribution of controlled substances to the extent of the authorization.

Chapter 12. State Office of Narcotics and Drug Abuse

11640. The Legislature hereby finds and declares that it is essential to the health and welfare of the people of this state that action be taken by state government to effectively and economically utilize federal and state funds for narcotic and drug abuse prevention, care, treatment and rehabilitation services. To achieve this, it is necessary that:

(a) Existing fragmented, uncoordinated, and duplicative narcotic and drug abuse programs be molded into a comprehensive and integrated statewide program for the prevention of narcotic and drug abuse and for the care, treatment, and rehabilitation of narcotic addicts and drug abusers.

(b) Responsibility and authority for planning programs and activities for prevention, care, treatment, and rehabilitation of narcotic addicts be concentrated in one agency. It is hereby declared to be the intent of the Legislature to assign responsibility and grant authority for planning narcotic and drug abuse prevention, care, treatment, and rehabilitation programs to a state agency whose functions shall be subject to periodic review by the Legislature and appropriate federal agencies.

11641. There is in the Health and Welfare Agency the State Office of Narcotics and Drug Abuse. This office shall be under the control of an executive officer known as the director. The director shall be appointed by, and hold office at the pleasure of, the Governor.

11642. The director may appoint:

(a) An assistant director.

(b) Such other employees as may be necessary for the proper discharge of the duties of his office.

11643. The duties of the State Office of Narcotics and Drug Abuse are:

(a) To coordinate state and local narcotics and drug abuse preventive, care, treatment, and rehabilitation programs.

(b) Consult with state and local health planning bodies and encourage and promote effective use of facilities, resources, and funds in the development of integrated, comprehensive local programs for the prevention, care, treatment, and rehabilitation of narcotics and drug abuse.

(c) Develop and implement a comprehensive and uniform plan for the prevention, care, treatment, and rehabilitation of narcotics and drug abuse throughout the state.

(d) Consult with federal, state, and local agencies involved in the provision and delivery of services of prevention, care, treatment, and rehabilitation of narcotics and drug abuse.

(e) Provide technical assistance, guidance, and information to local governments and state agencies with respect to the creation and implementation of programs and procedures for dealing effectively with narcotics and drug abuse prevention, care, treatment, and rehabilitation.

(f) Establish goals and priorities for all state agencies providing narcotic and drug abuse services. All state governmental units operating drug programs or administering or subventing state or federal funds for drug programs shall annually set their program priorities and allocate funds in coordination with the State Office of Narcotics and Drug Abuse.

(g) Identify, in conjunction and cooperation with the Department of Finance, all funds made available to the state by the federal government, the state, public agencies, and other sources which can be used in the prevention, care, treatment, and rehabilitation of narcotics and drug abuse.

(h) In the same manner and subject to the same conditions as other state agencies, develop and submit annually to the Department of Finance a program budget for the statewide narcotics and drug abuse program, including not only expenditures proposed to be made under this division, but also expenditures proposed to be made under any related program or by any other state agency, incidental to the prevention, control, and treatment of narcotics and drug abuse. The office may require state departments to contract with it for services to carry out provisions of this division.

(i) To coordinate all narcotics and drug abuse services and related programs conducted by state agencies with the federal government, and shall ensure that there is no duplication of such programs among state agencies and that all agreements, contracts, plans, and programs proposed to be submitted by any such agency, other than the Regents of the University of California, to the federal government in relation to narcotic

and drug abuse related problems shall first be submitted to the State Office of Narcotics and Drug Abuse for review and approval.

(j) To enter into such agreements and contracts with any person, agency, corporation, or other legal entity and such other actions as are necessary to carry out the purposes of this division. The office may require state departments to contract with it for services to carry out the provisions of this division.

(k) To accept and expend grants, gifts, and legacies of money, and with the consent of the Department of Finance, to accept, manage, and expend grants, gifts, and legacies of other properties in furtherance of the purposes of this division.

11645. Notwithstanding any other provision of law, the State Department of Health may provide advance payment of federal funds, to the extent permitted by the federal contract with the State Office of Narcotics and Drug Abuse and the interagency agreement between the state office and the state department, to private nonprofit or county drug abuse treatment and prevention programs which are under subcontract with the state department or which are under Division 5 (commencing with Section 5000) of the Welfare and Institutions Code.

CHAPTER 13. MISCELLANEOUS

11650. (a) Prosecution for any violation of law occurring prior to effective date of this division is not affected or abated by this division. If the offense being prosecuted is similar to one set out in Chapter 5 (commencing with Section 11350) of this division, then the penalties under Chapter 5 (commencing with Section 11350) apply if they are less than those under prior law.

(b) Civil seizures or forfeitures and injunctive proceedings commenced prior to effective date of this division are not affected by this division.

(c) All administrative proceedings pending under prior laws which are superseded by this division shall be continued and brought to a final determination in accord with the laws and rules in effect prior to effective date of this division. Any substance controlled under prior law which is not listed within Schedules I through V, is automatically controlled without further proceedings and shall be listed in the appropriate schedule.

(d) This division applies to violations of law, seizures and forfeiture, injunctive proceedings, administrative proceedings and investigations which occur on or after the effective date of this division.

11651. Any orders and regulations promulgated pursuant to any law affected by this division and in effect on the effective date of this division, not in conflict with this division, continue in effect until modified, superseded, or repealed.

EXCERPTS FROM CALIFORNIA WELFARE AND INSTITUTIONS CODE RELATING TO DRUG ADDICTS

Division 3. Narcotic Addicts

CHAPTER 1. COMMITMENT AND TREATMENT OF NARCOTIC ADDICTS

Article 1. Administration

3000. It is the intent of the Legislature that persons addicted to narcotics, or who by reason of repeated use of narcotics are in imminent danger of becoming addicted, shall be treated for such condition and its underlying causes, and that such treatment shall be carried out for nonpunitive purposes not only for the protection of the addict, or person in imminent danger of addiction, against himself, but also for the prevention of contamination of others and the protection of the public. Persons committed to the program provided for in this chapter who are uncooperative with efforts to treat them or are otherwise unresponsive to treatment nevertheless should be kept in the program for purposes of control. It is the further intent of the Legislature that persons committed to this program who show signs of progress after an initial or subsequent periods of treatment and observation be given reasonable opportunities to demonstrate ability to abstain from the use of narcotics under close supervision in outpatient status outside of the rehabilitation center provided for in Chapter 2 (commencing with Section 3300) of this division. Determinations of progress of persons committed to the program should be based upon criteria to be established by the Director of Corrections with the advice of clinically trained and experienced personnel.

The enactment of the preceding provisions of this section shall not be construed to be evidence that the intent of the Legislature was otherwise before such enactment.

3001. The narcotic detention, treatment and rehabilitation facilities referred to herein shall be one within the Department of Corrections whose principal purpose shall be the receiving, control, confinement, employment, education, treatment and rehabilitation of persons under the custody of the Department of Corrections or any agency thereof who are or have been addicted to narcotics or who by reason of repeated use of narcotics are in imminent danger of becoming addicted.

3002. Every person committed pursuant to this chapter or from Chapter 11 (commencing with Section 6399) of Title 7 of the Penal Code who escapes or attempts to escape from lawful custody is guilty of a crime punishable by imprisonment in the state prison. This section does not apply to unauthorized absence from a halfway house.

3003. The Director of Corrections may enter into agreements with

of narcotics in imminent danger of addiction, further proceedings shall be conducted in compliance with Sections 3104, 3105, 3106, and 3107.

If, after a hearing, the judge finds that the defendant is a narcotic addict, or is by reason of the repeated use of narcotics in imminent danger of becoming addicted to narcotics, he shall make an order committing such person to the custody of the Director of Corrections for confinement in the facility until such time as he is discharged pursuant to Article 5 of this chapter, except as this chapter permits earlier discharge. In any case to which Section 3052 applies, the judge may request the district attorney to investigate the facts relevant to the advisability of commitment pursuant to this section. In unusual cases, wherein the interest of justice would best be served, the judge may, with the concurrence of the district attorney and defendant, order commitment notwithstanding Section 3052. If, upon the hearing, the judge shall find that the defendant is not a narcotic addict and is not in imminent danger of becoming addicted to narcotics, he shall so certify and return the defendant to the department of the superior court which directed the filing of the petition for such further proceedings on the criminal charges as the judge of such department deems warranted.

If a person committed pursuant to this section is dissatisfied with the order of commitment he may within 10 days after the making of such order file a written demand for a jury trial in compliance with Section 3108.

3052. (a) Sections 3050 and 3051 shall not apply to persons convicted of, or who have been previously convicted of murder, assault with intent to commit murder, attempt to commit murder, kidnapping, robbery, burglary in the first degree, mayhem, a violation of Section 245 or a violation of any provision of Chapter 1 (commencing with Section 261) of Title 9 of Part 1 of the Penal Code (but excepting subdivision 1 of Section 261) any felonies involving bodily harm or attempt to inflict bodily harm or any offense set forth in Article 1 (commencing with Section 11500) or 2 (commencing with Section 11530) of Chapter 5 of Division 10 of the Health and Safety Code, or in Article 4 (commencing with Section 11710) of Chapter 7 of such Division 10 for which the minimum term prescribed by law is more than five years in state prison.

(b) Notwithstanding the provisions of subdivision (a) of this section or Section 3053, the fact a person comes within Section 1203.07 P.C. does not mean that he may not be committed and treated.

3053. If at any time following receipt at the facility of a person committed pursuant to this article, the Director of Corrections concludes that the person, because of excessive criminality or for other relevant reason, is not a fit subject for confinement or treatment in such narcotic detention, treatment and rehabilitation facility, he shall return the person to the court in which the case originated for such further proceedings on the criminal charges as that court may deem warranted.

3054. A person committed to the custody of the Director of Corrections pursuant to this article is not required to register pursuant to

Article 6 (commencing with Section 11850) of Chapter 7, Division 10 of the Health and Safety Code.

Article 3. Involuntary Commitment of Persons Not Charged With a Crime

3100. Anyone who believes that a person is addicted to the use of narcotics or by reason of the repeated use of narcotics is in imminent danger of becoming addicted to their use or any person who believes himself to be addicted or about to become addicted may report such belief to the district attorney, under oath, who may, when there is probable cause, petition the superior court for a commitment of such person to the Director of Corrections for confinement in the narcotic detention, treatment and rehabilitation facility. As used in this article the term "person" includes any person who is released on probation by any court of this state.

3100.6. Any peace officer or health officer who has reasonable cause to believe that a person is addicted to the use of narcotics or by reason of the repeated use of narcotics is in imminent danger of becoming addicted to their use may take the person, for his best interest and protection, to the county hospital or other suitable medical institution designated by the board of supervisors of the county.

Upon written application of the peace officer or health officer, the physician or superintendent in charge of the designated hospital or institution may admit the person believed to be addicted to the use of narcotics or in imminent danger of becoming addicted to their use. The application shall state the circumstances under which the person's condition was called to the officer's attention, shall state the date, time and place of taking the person into custody and shall state the facts upon which the officer has reasonable cause to believe that the person is addicted to the use of narcotics or by reason of the repeated use of narcotics is in imminent danger of becoming addicted to their use. The application shall be signed by the officer, and a copy of the application shall be presented to the person prior to his admittance to the hospital or institution.

Within 24 hours of admittance, a physician shall conduct an examination to determine whether the person is addicted to the use of narcotics or by reason of the repeated use of narcotics is in imminent danger of becoming addicted to their use and may provide the person with medical aid as necessary to ease any symptoms of withdrawal from the use of narcotics.

If, after examination, the physician does not believe that the person is addicted to the use of narcotics or by reason of the repeated use of narcotics is in imminent danger of becoming addicted to their use, he shall immediately report his belief to the physician or superintendent in charge of the hospital or institution, who shall discharge the person immediately.

If, after examination, the physician believes that further examination is necessary to determine whether the person is addicted to the use of narcotics or by reason of the repeated use of narcotics is in imminent danger of addiction to their use, he shall prepare an affidavit which states

Section 3050, 3051, 3106.6 or 3102, who shall testify as to the result of the examination, unless the presence of the physicians is waived and it is stipulated that their affidavit or report may be received in evidence.

3106.5. If the court determines that the person is not addicted to the use of narcotics, or in imminent danger of addiction, the petition shall be denied. If the court determines that the person is addicted to the use of narcotics or is by reason of the repeated use of narcotics in imminent danger of addiction, the court shall order the person committed to the custody of the Director of Corrections, until such time as he is discharged in accordance with Article 5 of this chapter, except as provided in Section 3109.

3107. Hearing may be waived by consent of the person, expressed in open court or in writing by the person after the arraignment required by Section 3104 and after consultation with counsel.

3108. If the person so committed or any friend in his behalf is dissatisfied with the order of commitment, he may within 10 days after the making of such order, file a written demand that the question of his addiction or imminent danger of addiction be tried by a jury in the superior court of the county in which he was committed. Thereupon, the court shall cause a jury to be summoned and to be in attendance at a date stated, not less than 4 days nor more than 30 days from the date of the demand for a jury trial. The court shall submit to the jury the question: Is the person addicted to the use of narcotics or is he by reason of the repeated use of narcotics in imminent danger of addiction? The order of commitment entered pursuant to Sections 3050, 3051, or 3106.5 shall not be read to the jury, nor alluded to in such trial. The trial shall be had as provided by law for the trial of civil cases and the petition shall be dismissed unless a verdict that the person is addicted or in imminent danger of addiction is found by at least three-fourths of the jury.

The person committed shall be awarded all his constitutional rights including, but not limited to, his right to counsel, his right to notice of the nature of the proceedings brought against him, his right to the process of the court to compel the attendance of witnesses in his behalf, and his right to be confronted with witnesses.

3109. If at any time following receipt at the facility of a person committed pursuant to this article, the Director of Corrections concludes that such person is not, because of excessive criminality or for other relevant reason, a fit subject for confinement or treatment in a facility of the Department of Corrections, he may order such person discharged.

3110. A person committed to the custody of the Director of Corrections pursuant to this article is not required to register pursuant to Article 6 (commencing with Section 11850) of Chapter 7, Division 10 of the Health and Safety Code.

3111. In the performance of acts and duties required by this article, [illegible] as is provided for public officers in Sections 820.2 and 821.6 of the Government Code.

Article 4. Release in Outpatient Status

3150. (a) There is in the state government a Narcotic Addict Evaluation Authority, hereafter referred to in this article as the "authority." The authority shall be composed of four members, each of whom shall be appointed by the Governor, for a term of four years and until the appointment and qualification of his successor. Members shall be eligible for reappointment. The chairman of the authority shall be designated by the Governor from time to time. The terms of the members first appointed to the authority shall expire as follows: one on January 15, 1965, one on January 15, 1966, one on January 15, 1967, and one on January 15, 1968. Their successors shall hold office for terms of four years, each term to commence on the expiration date of the term of the predecessor. The Governor shall fill every vacancy for the balance of the unexpired term. Insofar as practicable, persons appointed to the authority shall have a broad background in law, sociology, law enforcement, medicine, or education, and shall have a deep interest in the rehabilitation of narcotic addicts.

(b) Each member of the authority shall devote such time to the duties of his office as required for performance of his duties and shall be entitled to an annual salary of nine thousand five hundred dollars ($9,500) for attendance upon business of the authority. The chairman shall be entitled to an annual salary of ten thousand dollars ($10,000). In addition, each member shall be allowed actual expenses incurred in the discharge of his duties, including travel expenses.

(c) The authority shall maintain its headquarters at the California Rehabilitation Center and shall be provided with necessary office space, equipment and services from funds appropriated to the California Rehabilitation Center.

(d) The authority shall meet at the center or its branches at such times as may be necessary for a full and complete study of the cases of all patients who are certified by the Director of Corrections to the authority as having recovered from addiction or imminent danger of addiction to such an extent that release in an outpatient status is warranted. Other times and places of meetings may also be fixed by the authority. Where the authority performs its functions by meeting en banc in either public or executive sessions to decide matters of general policy, at least three members shall be present, and no such action shall be valid unless it is concurred in by a majority vote of those present. The authority may meet and transact business in panels. Each authority panel shall consist of at least two members of the authority. Two members of the authority shall constitute a quorum for the transaction of business of a panel. No action shall be valid unless concurred in by a majority of the members present.

(e) Members of other similar boards may be assigned to hear cases and make recommendations to the authority. Such recommendations shall be [illegible] policies established by a majority of the [illegible]

membership of the authority.

3151. After an initial period of observation and treatment of six months, and subject to the rules and policies established by the Director of Corrections, whenever a person committed under Article 2 or Article 3 of this chapter has recovered from his addiction or imminent danger of addiction to such an extent that, in the opinion of the Director of Corrections, release in an outpatient status is warranted, the director shall certify such fact to the authority. If the director has not so certified within the preceding 12 months, in the anniversary month of the commitment of any person committed under this chapter his case shall automatically be referred to the authority for consideration of the advisability of release in outpatient status. Upon any such certification by the director or such automatic certification, the authority may release such person in an outpatient status subject to all rules and regulations adopted by the authority and subject to all conditions imposed by the authority, whether of general applicability or restricted to the particular person released in outpatient status, and subject to being retaken and returned to inpatient status as prescribed in such rules, regulations, or conditions. The supervision of such persons while in an outpatient status shall be administered by the Department of Corrections. Such persons are not subject to the provisions of Penal Code Section 2600.

A single member of the authority may by written or oral order suspend the release in outpatient status of such a person and cause him to be retaken, until the next meeting of the authority. The written order of any member of the authority shall be a sufficient warrant for any peace officer to return such persons to physical custody.

It is hereby made the duty of all peace officers to execute any such order in like manner as ordinary criminal process.

3152. The rules for persons in outpatient status shall include but not be limited to close supervision of the person after release from the facility, periodic and surprise testing for narcotic use, counseling and return to inpatient status at the California Rehabilitation Center or its branches at the discretion of the authority, if from the reports of agents of the Department of Corrections or other information including reports of law enforcement officers as to the conduct of the person, the authority concludes that it is for the best interests of the person and society that this be done.

3153. The Director of Corrections is authorized to establish one or more halfway houses in large metropolitan areas as pilot projects in order to determine the effectiveness of such control on the addict's rehabilitation, particularly upon his release from the narcotic detention and treatment facility. Rules and regulations governing the operation of such halfway houses shall be established by the Director of Corrections and shall provide for control of the earnings of persons assigned to such halfway houses during their residence there, from which shall be deducted such charges for maintenance as the Director of Corrections may prescribe.

3154. A person released in an outpatient status from the California Rehabilitation Center may, with the approval of the Department of Corrections and the Narcotic Addict Evaluation Authority, voluntarily participate in a methadone maintenance project approved under Section 4351.

Participation in a methadone maintenance project shall not be construed to break the abstention from the use of narcotics for the purpose of Section 3200.

3155. In addition to any other payment to which he is entitled by law, each person who has been committed to the custody of the Director of Corrections pursuant to this chapter shall, upon his release, be paid the sum of two hundred dollars ($200), from such appropriations that may be made available for the purposes of this section.

The director may prescribe rules and regulations (a) to limit or eliminate any payments provided for in this section to persons who have not been confined at least six consecutive months prior to their release in instances where the director determines that such a payment is not necessary for the rehabilitation of the prisoner, and (b) to establish procedures for the payment of the sum of the two hundred dollars ($200) within the first 60 days of a prisoner's release.

The provisions of this section shall not be applicable if the person is released to the custody of another state or to the custody of the federal government.

Article 5. Discharge of Narcotic Addicts

3200. If at any time the Director of Corrections is of the opinion that a person committed pursuant to Article 3 of this chapter while in outpatient status has abstained from the use of narcotics for at least two consecutive years and has otherwise complied with the conditions of his release, or that an outpatient from the California Rehabilitation Center participating in a methadone program pursuant to Section 3154 has abstained from the use of narcotics for at least three consecutive years while on such program and has otherwise complied with the conditions of his release, he shall recommend to the Narcotic Addict Evaluation Authority that such person be discharged from the program. If the authority concurs in the opinion of the director, it shall discharge such person from the program.

If at any time the director is of the opinion that a person committed pursuant to Article 2 of this chapter while in outpatient status has abstained from the use of narcotics for at least two consecutive years and has otherwise complied with the conditions of his release, or that an outpatient from the California Rehabilitation Center participating in a methadone program pursuant to Section 3154 has abstained from the use of narcotics for at least three consecutive years while on such program and has otherwise complied with the conditions of his release, he shall so advise the Narcotic Addict Evaluation Authority. If the authority concurs in the opinion of the director it may file with the superior court of the county

in which the person was committed a certificate alleging such facts and recommending to the court the discharge of the person from the program. The authority shall serve a copy of such certificate upon the district attorney of the county. Upon the filing of such certificate, the court shall discharge the person from the program and may dismiss the criminal charges of which such person was convicted. Where such person was certified to the superior court from a municipal or justice court, the person shall be returned to such court, which may dismiss the original charges. In any case where the criminal charges are not dismissed and the person is sentenced thereon, time served while under commitment pursuant to Article 2 of this chapter shall be credited on such sentence. Such dismissal shall have the same force and effect as a dismissal under Section 1203.4 of the Penal Code, except the conviction is a prior conviction for purposes of Division 10 of the Health and Safety Code.

This section shall apply to persons convicted pursuant to the provisions of Section 1203.07 of the Penal Code, whether or not such person is on inpatient or outpatient status with the California Rehabilitation Center, if such person has been committed for a minimum period of 20 months.

3201. If a person committed pursuant to this chapter has not been discharged from the program prior to expiration of seven years, the Director of Corrections shall, on the expiration of such period, return him to the court from which he was committed, which court shall discharge him from the program and order him returned to the court in which criminal proceedings were adjourned, or the imposition of sentence suspended, prior to his commitment or certification to the superior court; or, if he was committed pursuant to Article 3, shall discharge him. If, however, it appears to the director that such person gives promise that, if his time on the program were extended, he could complete three consecutive years of abstinence from narcotics, the director shall return him to the court from which he was committed, with the recommendation that an extension not to exceed three years be ordered. The court may order such extension. If it declines to do so, it shall, if the person was committed pursuant to Article 3, discharge him, or, if he was committed pursuant to Article 2, return the person to the court in which criminal proceedings were adjourned, or the imposition of sentence suspended, prior to his commitment or certification to the superior court.

If an extension of the commitment is ordered pursuant to the preceding provisions of this section, the person must be returned to the court and discharged from the program on or before the expiration of 10 years from the date of the original commitment.

Any other provision of this chapter notwithstanding, in any case in which a person was committed pursuant to Article 3 as a result of such person's having requested the district attorney to file a petition for his commitment, such person must be discharged no later than two years and six months after his commitment.

No person committed pursuant to Chapter 11 (commencing with Section 6399) of Title 7 of Part 3 of the Penal Code, before the effective [illegible] to the program for

any longer period than the term of his commitment under the law as it read at the time he was committed.

Nothing in this chapter shall preclude a person who has been discharged from the program from being recommitted under the program, irrespective of the periods of time of any previous commitments.

CHAPTER 2. CALIFORNIA REHABILITATION CENTER

3300. There is hereby established an institution and branches under the jurisdiction of the Department of Corrections, to be known as the California Rehabilitation Center. Branches may be established in existing institutions of the Department of Corrections or of the Department of the Youth Authority, in halfway houses as described in Section 3153, in such other facilities as may be made available on the grounds of other state institutions, and in city and county correctional facilities where treatment facilities are available. Branches shall not be established on the grounds of such other institutions in any manner which will result in the placement of patients of such institutions into inferior facilities. Branches placed in a facility of the State Department of Health shall have prior approval of the Director of Health. The branches in the Department of the Youth Authority shall be established on order of the Secretary of the Human Relations Agency and shall be subject to the administrative direction of the Director of the Youth Authority. Branches placed in city or county facilities shall have prior approval of the legislative body of the city or county.

Persons confined pursuant to this section in branches established in city and county correctional facilities shall be housed separately from the prisoners therein, and shall be entitled to receive treatment substantially equal to that which would be afforded such persons if confined in the main institution of the California Rehabilitation Center.

3301. The principal purpose of the California Rehabilitation Center shall be the receiving control, confinement, employment, education, treatment and rehabilitation of persons under the custody of the Department of Corrections or any agency thereof who are addicted to the use of narcotics or are in imminent danger of becoming so addicted.

3302. The Director of Corrections shall acquire, or construct, and equip, in accordance with law, suitable buildings, structures and facilities for the California Rehabilitation Center.

3303. The Director of Corrections shall make rules and regulations for the government of the California Rehabilitation Center and the management of its affairs.

3304. A superintendent shall be appointed for the California Rehabilitation Center pursuant to Section 6050 of the Penal Code, and the Director of Corrections shall appoint, subject to civil service, such other officers and employees as may be necessary.

[illegible] control of the

Rehabilitation Center and the responsibility for the care, custody, training, discipline, employment and treatment of the persons confined therein are vested in the Director of Corrections. The provisions of Part 3 of the Penal Code apply to said institution as a prison under the jurisdiction of the Department of Corrections and to the persons confined therein insofar as such provisions may be applicable.

3306. The Director of Corrections may authorize the temporary removal from the California Rehabilitation Center or any of its branches under the jurisdiction of the Department of Corrections of any person confined therein. The director may require that such temporary removal be under custody Unless the person is removed for medical treatment, the removal shall not be for a period longer than three days. The director may require the person to reimburse the state, in whole or in part, for expenses incurred by the state in connection with such temporary removal other than for medical treatment.

Under specific regulations established by the director for the selection of confined persons, the director may authorize assignment to conservation camp programs.

EXCERPTS FROM CALIFORNIA VEHICLE CODE RELATING TO DRUG ADDICTS

12805. Grounds requiring refusal of license

The department shall not issue or renew a driver's license to any person:

(a) Who is not of legal age to receive such license.

(b) Who, because of excessive and continuous use of alcoholic liquors, is incapable of safely operating a motor vehicle, or who is addicted to the use of, or is an habitual user of, any drug to a degree that the person is rendered incapable of safely operating a motor vehicle.

(c) Who is insane or feebleminded or an idiot or an imbecile.

(d) Who has a disorder characterized by lapses of consciousness.

(e) Who is unable as shown by examination to understand traffic signs or signals or who does not have a reasonable knowledge of the provisions of this code governing the operations of vehicles upon the highways.

(f) When it appears by examination or other evidence that such person is unable to operate a motor vehicle upon a highway safely because of physical or mental defect or lack of skill.

(g) Who is unable to read and understand simple English used in highway traffic and directional signs. The provisions of this subdivision shall not apply to any person holding an operator's or chauffeur's license issued by this state and valid on September 11, 1957.

(h) Who holds a valid driver's license issued by a foreign jurisdiction unless he surrenders that license to the department.

(i) Who has ever held, or is the holder of a license to drive issued by another state, territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico, and such license has been suspended by reason, in whole or in part, of a conviction of a traffic violation until the suspension period has terminated, except as provided in subdivision (b) of Section 12806.

(j) Who has ever held, or is the holder of a license to drive issued by another state, territory, or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico, and such license has been revoked by reason, in whole or in part, of a conviction of a traffic violation until the revocation has been terminated or after the expiration of one year from the date the license was revoked, whichever occurs first, except as provided in subdivision (b) of Section 12806.

12806. Grounds not requiring refusal

(a) Any physical or mental defect of the applicant which in the opinion of the department does not affect the applicant's ability to exercise reasonable and ordinary control in operating a motor vehicle upon the highway shall not prevent the issuance of a license to the applicant.

(b) An applicant addicted to the use of narcotic drugs who is participating in a methadone maintenance program approved pursuant to Article 3 (commencing with Section 4350) of Chapter 3 of Part 1 of

subject to reasonable terms and conditions of probation if such drug usage does not affect the applicant's ability to exercise reasonable and ordinary control in operating a motor vehicle upon the highway.

(c) Any suspension or revocation by a state which is not a party to the Driver License Compact provided for in Chapter 6 (commencing with Section 15000) of Division 6 shall not prevent the issuance of a license to the applicant if in the opinion of the department it will be safe to issue such license.

12807. Additional grounds for refusal

The department shall not issue or renew a driver's license to any person:

(a) When a license previously issued to the person under this code has been suspended until the expiration of the period of the suspension, unless cause for suspension has been removed.

(b) When a license previously issued to the person under this code has been revoked until the expiration of one year after the date of the revocation, except where a different period of revocation is prescribed by this code, or unless the cause for revocation has been removed.

(c) When the department has received a notice pursuant to subdivision (a) of Section 40509, unless the department has received a certificate as provided in that subdivision.

(d) When the department has been notified by a court that the licensee has failed to pay a lawfully imposed fine within the time authorized by the court for any violation which is required to be reported pursuant to Section 1803.

12809. Grounds permitting refusal

The department may refuse to issue or renew a driver's license to any person:

(a) If the department is satisfied that the applicant is not entitled to the license under this code.

(b) If the applicant has failed to furnish the department the information required in the application or reasonable additional information requested by the department.

(c) If the department determines that the applicant has made or permitted unlawful use of any driver's license.

(d) If the department determines that such person has knowingly used a false or fictitious name in any application for a license or has impersonated another in making application or in taking any test, or has knowingly made a false statement or knowingly concealed a material fact, or otherwise committed any fraud in any such application.

(e) If the department determines that the applicant is a negligent or incompetent operator of a motor vehicle.

(f) If the applicant is convicted of any offense involving the transportation for purpose of sale, or the transportation for compensation, [illegible] Division 10 (commencing with Section

involved the use or operation of a motor vehicle.

If, however, the driving privilege of the applicant is on probation for a cause related to the use or possession of a narcotic controlled substance, the department may refuse to issue or renew a driver's license to such applicant if the applicant is subsequently convicted of any offense involving the use or possession of a narcotic controlled substance, whether or not the commission of such offense involved the use or operation of a motor vehicle.

The maximum period of time for which the department may refuse to issue or renew a driver's license to any person pursuant to this subdivision shall be three years from the date of conviction.

(g) If the applicant fails or refuses to surrender to the department upon its lawful demand, a nonresident minor's certificate which has been canceled.

12810. Traffic violation point count and negligent operation defined

In determining the violation point count, any conviction of failure to stop in the event of an accident resulting in damage to property or otherwise failing to comply with the requirements of Section 20002, or driving a motor vehicle while under the influence of intoxicating liquor or any drug, or under the combined influence of intoxicating liquor and any drug, or of reckless driving shall be given a value of two points and any other traffic conviction involving the safe operation of a motor vehicle upon the highway shall be given a value of one point; provided, that conviction for only one violation arising from one occasion of arrest or citation shall be counted in determining the violation point count for the purposes of this section.

Any person whose driving record shows a violation point count of four or more points in 12 months, six or more points in 24 months or eight or more points in 36 months shall be prima facie presumed to be a negligent operator of a motor vehicle.

Any accident in which the operator is deemed by the department to be responsible shall be given a value of one point.

In applying the provisions of this section to a driver, the department shall give due consideration to the amount of use or mileage traveled in the operation of a motor vehicle.

13201. Certain misdemeanors and drug use

A court may suspend the privilege of any person to operate a motor vehicle, for a period not exceeding six months, upon conviction of any of the following offenses:

(a) Failure of the driver of a vehicle involved in an accident to stop or otherwise comply with the provisions of Section 20002.

(b) Reckless driving proximately causing bodily injury to any person under Section 23104.

(c) Failure of the driver of a vehicle to stop at a railway grade crossing

(d) Driving while addicted to the use, or under the influence of, any drug under subdivisions (a) or (c) of Section 23105.

13201.5 Driving while under the influence

A court may suspend the privilege of any person to operate a motor vehicle, for a period not exceeding six months, upon conviction of driving while under the influence of intoxicating liquor or under the combined influence of intoxicating liquor and any drug.

13202. Illegal narcotics

(a) A court may suspend or order that the department revoke in which case the department shall revoke the privilege of any person to operate a motor vehicle upon conviction of any narcotic controlled substance offense as defined in Division 10 (commencing with Section 11000) of the Health and Safety Code when the use of a motor vehicle was involved in, or incidental to, the commission of the offense.

(b) A court shall order that the department revoke and the department shall revoke the privilege of any person to operate a motor vehicle upon conviction of a violation of Section 11350, 11351, 11352, 11353, 11357, 11359, 11360, or 11361 of the Health and Safety Code when a motor vehicle was involved in, or incidental to, the commission of such offense.

(c) The period of time for suspension or the period after revocation during which the person may not apply for a license shall be determined by the court, but in no event shall such period exceed three years from the date of conviction.

13209. Record of prior conviction

Before sentencing a person upon a conviction of driving a motor vehicle while under the influence of intoxicating liquor or any drug, or under the combined influence of intoxicating liquor and any drug, other than under Section 23101 or 23106, the court shall obtain from the department a record of any prior convictions of that person for traffic violations. The department shall furnish such record upon the written request of the court.

Notwithstanding the provisions of Section 1449 of the Penal Code, in any such criminal action the time for pronouncement of judgment shall not commence to run until the time that the court receives the record of prior convictions from the department.

13210. Procedure upon first conviction

Notwithstanding any other provision of this code, whenever any person is convicted for the first time of driving a motor vehicle while under the influence of intoxicating liquor or any drug, or under the combined influence of intoxicating liquor and any drug, other than under Section 23101 or 23106, the court shall order the department to suspend the person's driving privilege unless the person shows good cause why such order should not be made. If the court does not order such suspension, the court may limit the person's driving privilege as a condition of probation without notifying the department of such condition.

13352. Influence of liquor or drugs

The department shall, except for a conviction or finding described in subdivision (a) where the court does not order the department to suspend, immediately suspend or revoke the privilege of any person to operate a motor vehicle upon receipt of a duly certified abstract of the record of any court showing that the person has been convicted of driving a motor vehicle while under the influence of intoxicating liquor or any drug, or while under the combined influence of intoxicating liquor and any drug, or in violation of subdivision (c) of Section 23105, or upon receipt of a report of a judge of the juvenile court, a juvenile traffic hearing officer, or a referee of a juvenile court showing that the person has been found to have committed the offense of operating a vehicle while under the influence of intoxicating liquor or any drug, or while under the combined influence of intoxicating liquor and any drug, or in violation of subdivision (c) of Section 23105. The suspension or revocation shall be as follows:

(a) Upon a first such conviction or finding, other than under Section 23101 or 23106 such privilege shall be suspended for a period of six months, if the court orders the department to suspend such privilege.

(b) Upon a first such conviction or finding under Section 23101 or 23106 such privilege shall be suspended for one year and shall not be reinstated until such person gives proof of ability to respond in damages as defined in Section 16430.

(c) Upon a second conviction or finding of driving a motor vehicle while under the influence of intoxicating liquor or any drug, or under the combined influence of intoxicating liquor and any drug, or in violation of subdivision (c) of Section 23105, or any combination of such convictions or findings within five years, such privilege shall be suspended for one year and shall not be reinstated unless and until such person gives proof of ability to respond in damages as defined in Section 16430.

(d) Upon a second such conviction or finding under Section 23101 or 23106 within three years, such privilege shall be permanently revoked.

(e) Upon a third or subsequent conviction or finding of driving a motor vehicle while under the influence of intoxicating liquor or any drug, or under the combined influence of intoxicating liquor and any drug, or in violation of subdivision (c) of Section 23105, or any combination of such convictions or findings within seven years such privilege shall be revoked and shall not be reinstated for a period of three years and until such person files proof of ability to respond in damages as defined in Section 16430.

For the purposes of subdivision (c), (d), and (e), the finding of the juvenile court judge, the juvenile traffic hearing officer, or the referee of a juvenile court, specified in the first paragraph of this section shall also be considered a conviction.

Each judge of a juvenile court, juvenile traffic hearing officer, or referee of a juvenile court shall immediately report such findings to the department.

13300. Investigations by the department

The department may conduct an investigation to determine whether the privilege of any person to operate a motor vehicle should be suspended or revoked or whether terms or conditions of probation should be imposed upon receiving information or upon a showing by its records:

(a) That the licensee has been involved as a driver in any accident causing death or personal injury or serious damage to property.

(b) That the licensee has been involved in three or more accidents within a period of 12 consecutive months.

(c) That the licensee is a reckless, negligent, or incompetent driver of a motor vehicle.

(d) That the licensee has permitted an unlawful or fraudulent use of his driver's license.

(e) That any ground exists for which a license might be refused. The receipt by the department of an abstract of the record of conviction of any offense involving the use or possession of narcotic controlled substances under Division 10 (commencing with Section 11000) of the Health and Safety Code shall be a sufficient basis for an investigation by the department to determine whether grounds exist for which a license might be refused.

23101. Influence of alcohol or alcohol and drugs causing death or injury

(a) It is unlawful for any person, while under the influence of intoxicating liquor, or under the combined influence of intoxicating liquor and any drug, to drive a vehicle upon a highway and when so driving do any act forbidden by law or neglect any duty imposed by law in the driving of such vehicle, which act or neglect proximately causes bodily injury to any person other than himself.

(b) It is unlawful for any person, while under the influence of intoxicating liquor, or under the combined influence of intoxicating liquor and any drug, to drive a vehicle other than on a highway and when so driving do any act, or neglect any duty imposed by law, which act or neglect proximately causes death or bodily injury to any person other than himself.

(c) Any person convicted under this section shall be punished by imprisonment in the state prison, or in the county jail for not less than 90 days nor more than one year and by fine of not less than two hundred fifty dollars ($250) nor more than five thousand dollars ($5,000).

23102. Influence of alcohol or alcohol and drugs

(a) It is unlawful for any person who is under the influence of intoxicating liquor, or under the combined influence of intoxicating liquor

and any drug, to drive a vehicle upon any highway.

(b) It is unlawful for any person who is under the influence of intoxicating liquor, or under the combined influence of intoxicating liquor and any drug, to drive a vehicle upon other than a highway.

The department shall not be required to provide patrol or enforce the provisions of this subdivision.

(c) Any person convicted under this section shall be punished upon first conviction by imprisonment in the county jail for not less than 48 hours nor more than six months or by fine of not less than two hundred fifty dollars ($250) nor more than five hundred dollars ($500) or by both such fine and imprisonment. If, however, any person so convicted consents to, and does participate and successfully completes, a driver improvement program or treatment program for persons who are habitual users of alcohol, or both such programs, as designed by the court the court shall punish such person by a fine of not less than one hundred fifty dollars ($150) nor more than five hundred dollars ($500) or by imprisonment in the county jail for not less than 48 hours nor more than six months or by both such fine and imprisonment.

(d) Any person convicted under this section shall be punished upon second or any subsequent conviction, within five years of a prior conviction, by imprisonment in the county jail for not less than 48 hours nor more than one year and by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000). A conviction under this section shall be deemed a second conviction if the person has previously been convicted of a violation of Section 23101.

(e) If any person is convicted of a second or subsequent offense under this section within five years of a prior conviction and is granted probation it shall be a condition of probation that such person be confined in jail for at least 48 hours but not more than one year and pay a fine of at least two hundred fifty dollars ($250) but not more than one thousand dollars ($1,000).

(f) In no event does the court have the power to absolve a person who is convicted of a second or subsequent offense under this section within five years of a prior conviction from the obligation of spending at least 48 hours in confinement in the county jail and of paying a fine of at least two hundred fifty dollars ($250), except as provided in subdivision (g).

(g) Except in unusual cases where the interests of justice demand an exception, the court shall not strike a prior conviction of an offense under this section for purposes of sentencing in order to avoid imposing as part of the sentence or term of probation the minimum time in confinement in the county jail and the minimum fine, as provided in subdivision (f).

When such a prior conviction is stricken by the court for purposes of sentencing, the court shall specify the reason or reasons for such striking order.

On appeal by the people from such an order striking such a prior conviction it shall be conclusively presumed that such order was made only for the reasons specified in such order and such order shall be reversed if there is no substantial basis in the record for any of such reasons.

(h) The court may order that any person convicted under this section who is punished by imprisonment in jail, be imprisoned on days other than days of regular employment of the person, as determined by the court.

(i) If the person convicted under this section is under the age of 21 years and the vehicle used in any such violation is registered to such person, the vehicle may be impounded at the owner's expense for not less than one day nor more than 30 days.

(c) In any case, the court may order suitable treatment for the person, in addition to imposing any penalties required by this code.

23105. Influence of drug or addiction

(a) It is unlawful for any person who is under the influence of any drug to drive a vehicle upon any highway.

(b) It is unlawful for any person who is under the influence of any drug to drive a vehicle upon other than a highway.

The department shall not be required to provide patrol or enforce the provisions of this subdivision.

(c) It is unlawful for any person who is addicted to the use of any drug, except such a person who is participating in a methadone maintenance treatment program approved pursuant to Article 3 (commencing with Section 4350) of Chapter 1 of Part 1 of Division 4 of the Welfare and Institutions Code, to drive a vehicle upon any highway.

(d) Any person convicted under this section shall be punished upon a first conviction by imprisonment in the county jail for not less than 48 hours nor more than six months or by fine of not less than two hundred fifty dollars ($250) nor more than five hundred dollars ($500) or by both such fine and imprisonment. If, however, any person so convicted consents to participate, and does participate and successfully completes, a driver improvement program or a treatment program for persons who are habitual users of drugs, or both such programs, as designated by the court, a court shall punish such person by a fine of not less than one hundred fifty dollars ($150) nor more than five hundred dollars ($500) or by imprisonment in the county jail for not less than 48 hours nor more than six months or by both such fine and imprisonment.

(e) Any person convicted under this section shall be punished upon a second or any subsequent conviction, within five years of a prior conviction, by imprisonment in the county jail for not less than 48 hours nor more than one year and by a fine of not less than two hundred fifty dollars ($250) nor more than one thousand dollars ($1,000). A conviction under this section shall be deemed a second or subsequent conviction if the person has previously been convicted of a violation of driving a vehicle while under the influence of intoxicating liquor or any drug, or under the combined influence of intoxicating liquor and any drug.

(f) If any person is convicted of a second or subsequent offense under this section within five years of a prior conviction and is granted probation, it shall be a condition of probation that such person be confined in jail for at least 48 hours but not more than one year and pay a fine of at least two hundred fifty dollars ($250) but not more than one thousand dollars ($1,000).

(g) In no event does the court have the power to absolve a person who is convicted of a second or subsequent offense under this section within five years of a prior conviction from the obligation of spending at least 48 hours in confinement in the county jail and of paying a fine of at least two hundred fifty dollars ($250) except as provided in subdivision (h).

(h) Except in unusual cases where the interests of justice demand an exception, the court shall not strike a prior conviction of an offense under this section for purposes of sentencing in order to avoid imposing as part of the sentence or term of probation the minimum time in confinement in the county jail and the minimum fine, as provided in subdivision (g).

When such a prior conviction is stricken by the court for purposes of sentencing, the court shall specify the reason or reasons for such striking order.

On appeal by the people from such an order striking such a prior conviction it shall be conclusively presumed that such order was made only for the reasons specified in such order and such order shall be reversed if there is no substantial basis in the record for any of such reasons.

(i) The court may order that any person convicted under this section who is punished by imprisonment in jail, be imprisoned on days other than days of regular employment of the person, as determined by the court.

(j) If the person convicted under this section is under the age of 21 years and the vehicle used in any such violation is registered to such person, the vehicle may be impounded at the owner's expense for not less than one day nor more than 30 days.

23106. Influence of drugs causing injury

(a) It is unlawful for any person, while under the influence of any drug, to drive a vehicle upon a highway and when so driving do any act forbidden by law or neglect any duty imposed by law in the driving of such vehicle, which act or neglect proximately causes bodily injury to any person other than himself.

(b) It is unlawful for any person, while under the influence of any drug, to drive a vehicle other than on a highway and when so driving do any act, or neglect any duty imposed by law, which act or neglect proximately causes bodily injury to any person other than himself.

(c) Any person convicted under this section shall be punished by imprisonment in the state prison, or in the county jail for not less than 90 days nor more than one year and by fine of not less than two hundred fifty dollars ($250) nor more than five thousand dollars ($5,000).

23107. Defense to drug violations

The fact that any person charged with a violation of Section 23105 or 23106 is or has been entitled to use such drug under the laws of this state shall not constitute a defense against any violation of the sections.

EXCERPTS FROM BUSINESS AND PROFESSIONS CODE

Article 6. Hypodermics

4140. Permit to sell and dispense; renewal; transfer

The board may, upon written application, on a form furnished by the board, and in its discretion, issue a permit to any person, permitting and authorizing such person to sell and dispense hypodermic syringes and hypodermic needles for the purposes and uses specified by the board.

Separate certificates, licenses, permits or registrations, shall be required for each of the premises of any business establishment having more than one location. Such certificate, license, permit or registration shall be renewed annually, on or before January 1 of each year and shall not be transferable.

No person shall furnish, by sale or otherwise, any hypodermic syringe or hypodermic needle if he has not obtained a permit from the board, unless he is authorized to furnish a hypodermic syringe or hypodermic needle without a permit from the board, or unless he is otherwise exempted from such requirement.

4140.5. Nonresident hypodermic needle or syringe distributor's license; renewal; application; discipline; doing business in state

(a) A nonresident distributor of hypodermic needles or syringes doing business in this state that has not obtained a certificate, license, permit, registration, or exemption from the board and that sells or distributes hypodermic needles or syringes in this state through any person or medium other than a wholesaler which has obtained a certificate, license, permit, registration, or exemption pursuant to the provisions of this chapter or through a selling or distribution outlet which is licensed as a wholesaler pursuant to the provisions of this chapter, shall not conduct the business of selling or distributing hypodermic needles or syringes in this state without obtaining a nonresident hypodermic needle or syringe distributor's license from the board.

Separate certificates, licenses, permits or registrations shall be required for each of the premises of any business establishment having more than one location. Such certificate, license, permit or registration shall be renewed annually on or before January 1 of each year and shall not be transferable.

(b) Applications for a nonresident hypodermic needle or syringe distributor's license under this section shall be made on a form furnished by the board. The board may require such information as the board deems is reasonably necessary to carry out the purposes of the section.

(c) The board may deny, revoke, or suspend such nonresident distributor's license for any violation of this chapter.

(d) The Legislature, by enacting this section, does not intend a license pursuant to this section to serve as

4140.7. Confiscation of hypodermic needles or syringes not in possession of authorized person

All stocks of hypodermic needles or hypodermic syringes shall be confiscated if found upon any premises which are not in the possession of the person who was issued a permit under Section 4140, unless he is excepted therefrom.

4141. Record of furnishing

Any furnishing of a hypodermic syringe or hypodermic needle without a prescription shall at the time of furnishing be recorded in a book by the furnisher. The record of furnishing shall consist of the date and hour of such furnishing, the type or kind, size, and quantity of syringe or needle furnished, the purpose and use for which such needle or syringe was obtained, the signature of the furnisher, and the signature and address of the person to whom the needle or syringe was furnished. Such record book shall be available for inspection by any authorized officer of the law.

4142. Exceptions

The provisions of this article with reference to hypodermic syringes and needles do not apply to the sale at wholesale by pharmacies, drug jobbers, drug wholesalers and drug manufacturers or manufacturers and dealers in surgical instruments to pharmacies, physicians, dentists, podiatrists, veterinarians, or persons to whom a permit has been issued.

4143. Unlawful possession; exceptions; disposition of used needle or syringe

(a) It is unlawful for any person to have in his possession or under his control any hypodermic needle or hypodermic syringe.

(b) The provisions of this section do not apply to persons who have acquired possession and control of a hypodermic needle or hypodermic syringe in accordance with the provisions of this code authorizing and regulating the furnishing, possession and use of such needles and syringes.

Any used hypodermic needle or hypodermic syringe which is to be disposed of shall be destroyed in such a manner as to render such unit or units unfit for reuse in any manner. Such destruction may include, but is not limited to, grinding and disposal in sewerage systems where such disposal is authorized by the appropriate agency with jurisdiction over such sewerage system.

4145. Sale restrictions; exceptions

No hypodermic needle or hypodermic syringe shall be sold at retail except upon the prescription of a physician and surgeon, dentist, veterinarian, or podiatrist, or pharmacist acting within the scope of a prescription [illegible] conforming with Section 429.70) of Chapter [illegible] Safety Code [illegible]

acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70 of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code.

4147. Authority to furnish without prescription; requirements

Notwithstanding any other provision of law, a pharmacist or physician may, without a prescription or a permit, furnish hypodermic needles and syringes for human use in the administration of insulin or adrenalin, a pharmacist or veterinarian may, without a prescription or a permit, furnish hypodermic needles and syringes for use on poultry or animals, and a person may, without a prescription or permit, obtain hypodermic needles and syringes from a pharmacist or physician for human use in the administration of insulin or adrenalin, or from a pharmacist, veterinarian, or permit holder, for use on poultry or animals, if all of the following requirements are met:

a. No needle or syringe shall be furnished to a person who is unknown to the furnisher and unable to properly establish his identity.

b. The furnisher, at the time the furnishing occurs makes a record of the furnishing in the manner required by Section 4141.

4148. Inapplicability of Sections 4141 and 4147 to industrial uses

The provisions of Sections 4141 and 4147 shall not apply to the furnishing or obtaining of hypodermic syringes or hypodermic needles for uses which the board determines are industrial. Notwithstanding any other provision of law, a person may obtain hypodermic syringes or needles, without prescription or permit, for such industrial uses.

Article 8. Dangerous Drugs

4211. Dangerous drug

"Dangerous drug" means any drug unsafe for self-medication, except preparations of drugs defined in subdivisions (e), (f), (h), and (i) hereof, designed for the purpose of feeding or treating animals (other than man) or poultry, and so labeled, and includes the following:

(a) Any hypnotic drug "Hypnotic drug" includes acetylurea derivatives, barbituric acid derivatives, chloral, paraldehyde, sulfomethane derivatives, or any compounds or mixtures or preparations that may be used for producing hypnotic effects.

(b) Aminopyrine, or compounds or mixtures thereof.

(c) Amphetamine, desoxyephedrine, or compounds or mixtures thereof except preparations for use in the nose and unfit for internal use.

(d) Cinchophen, neocinchophen, or compounds or mixtures thereof.

(e) Diethyl-stilbestrol, or compounds or mixtures thereof.

(f) Ergot, cotton root, or their contained or derived active compounds or mixtures thereof.

(g) Oils of croton, rue, savin or tansy or their contained or derived compounds or mixtures thereof.

(h) Sulfanilamide or substituted sulfanilamides, or compounds or mixtures thereof, except preparations for topical application only containing not more than five percent (5%) strength.

(i) Thyroid and its contained or derived active compounds or mixtures thereof.

(j) Phenylhydantoin derivatives.

(k) Any drug which bears the legend: "Caution: federal law prohibits dispensing without prescription;" or, any device which bears the statement: "Caution: federal law restricts this device to sale by or on the order of a _____," the blank to be filled in with the designation of the practitioner licensed to use or order use of the device. However, this section, nor any other provision of law, shall not prohibit the sale of such devices to skilled nursing facilities or intermediate care facilities licensed pursuant to Chapter 2 (commencing with Section 1250) of Division 2 of the Health and Safety Code.

(l) Hypnotic drugs when combined and compounded with nonhypnotic drugs.

(m) Any narcotic antagonist drug which has been found by the federal government to have currently accepted medical use in treatment in the United States and to have no potential for abuse or abuse liability.

4213. Administer

"Administer," as used in this article, means the furnishing by a physician and surgeon, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code to his patient of such amount of drugs or medicines referred to in this article as are necessary for the immediate needs of the patient.

4227. Furnishing or dispensing drug without prescription; exceptions

(a) No person shall furnish any dangerous drug except upon the prescription of a physician, dentist, podiatrist or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized un

Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code.

(b) The provisions of this section do not apply to the furnishing of any dangerous drug by a manufacturer or wholesaler or pharmacy to each other or to a physician, dentist, podiatrist or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or to a laboratory under sales and purchase records that correctly give the date, the names and addresses of the supplier and the buyer, the drug and its quantity.

(c) A registered pharmacist, or a person exempted pursuant to Section 4050.7, may distribute dangerous drugs and devices directly to hemodialysis patients pursuant to regulations promulgated by the board. The board shall promulgate such regulations as are necessary to insure the safe distribution of such drugs and devices to hemodialysis patients without interruption of supply including, but not limited to, the following: vendor licensing, records and labeling, patient receipts, patient training, report records, specific product and quantity limitations, verification order forms, reports and supplies, adequate establishment facilities, and reports to the board. A person who violates a regulation promulgated pursuant to this subdivision shall be liable upon order of the board to surrender this personal license. These penalties shall be in addition to penalties which may be imposed pursuant to Sections 4389 and 4350.5. If the board finds any hemodialysis drugs or devices distributed pursuant to this subdivision to be ineffective or unsafe for the intended use, the board may institute immediate recall of any or all of such drugs or devices distributed to individual patients.

(d) Home hemodialysis patients who receive any drugs or devices pursuant to subdivision (c) shall have completed a full course of home training given by a renal dialysis center accredited by the State Department of Health. The physician and surgeon prescribing the hemodialysis products shall submit proof satisfactory to the manufacturer or wholesaler that the patient has completed such program.

4223. Container labels

(a) Except as provided in subdivision (b) of this section, no person shall dispense any dangerous drug upon prescription except in a container correctly labeled with the information required by Sections 4047.5 and 4048.

(b) Physicians, dentists, podiatrists, and veterinarians, and pharmacists acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurses acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistants acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, may personally furnish any dangerous drug prescribed by them to the patient for whom prescribed, provided that such drug is properly labeled to show all information required in Sections 4047.5 and 4048 except the prescription number.

4229.5. Refilling prescription when prescriber is unavailable

A prescription for a dangerous drug may be refilled without the prescriber's authorization if the prescriber is unavailable to authorize the refill and if, in the pharmacist's professional judgment, failure to refill the prescription might present an immediate hazard to the patient's health and welfare or might result in intense suffering. The pharmacist shall refill only a reasonable amount sufficient to maintain the patient until the prescriber can be contacted. The pharmacist shall note on the reverse side of the prescription the date and quantity of the refill and that the prescriber was not available and the basis for his judgment to refill the prescription without the prescriber's authorization. The pharmacist shall inform the patient that the prescription was refilled without the prescriber's authorization, indicating that the prescriber was not available and that, in the pharmacist's professional judgment, failure to provide the drug might result in an immediate hazard to the patient's health and welfare or might result in intense suffering. The pharmacist shall inform the prescriber within a reasonable period of time. Prior to refilling a prescription pursuant to this section, the pharmacist shall make every reasonable effort to contact the prescriber.

The prescriber shall not incur any liability as the result of a refilling of a prescription pursuant to this section.

4230. Possession of drug without prescription

No person shall have in possession any preparation included in subdivision (a) or (c) of Section 4211 except that furnished to such person upon the prescription of a physician, dentist, * * * podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code. The provisions of this section do not apply to the possession of any drug defined in subdivision (a) or (c) of Section 4211 by a manufacturer or wholesaler or a pharmacy or physician or * * * podiatrist or dentist or veterinarian or laboratory or [illegible] authorized [illegible]

18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code when in stock in containers correctly labeled with the name and address of the supplier or producer.

4231. Inspection of stock

All stock of any dangerous drug of a manufacturer, wholesaler, pharmacy, physician, dentist, podiatrist, or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, laboratory, shipments through a customs broker or carrier shall be at all times during business hours open to inspection by authorized officers of the law.

4232. Inspection of records; current inventory; offenses

All records of manufacture and of sale, purchase or disposition of dangerous drugs shall be at all times, during business hours, open to inspection by authorized officers of the law, and shall be preserved for at least three years from the date of making. A current inventory shall be kept by every manufacturer, wholesaler, pharmacy, physician, dentist, podiatrist or veterinarian, or pharmacist acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or registered nurse acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, or physician's assistant acting within the scope of a project authorized under Article 18 (commencing with Section 429.70) of Chapter 2 of Part 1 of Division 1 of the Health and Safety Code, laboratory, clinic, hospital, institution, or establishment holding a currently valid and unrevoked certificate, license, permit, registration or exemption under Division 2 (commencing with Section 1200) of the Health and Safety Code or under Part 3 (commencing with Section 1620) of Division 2 of, Chapter 2 (commencing with Section 2390) of Division 3 of, or Part 2 (commencing with Section 5699) of Division 6 of, the Welfare and Institutions Code who maintains a stock of dangerous drugs.

Any person who fails, neglects, or refuses to maintain such records or who, when called upon by an authorized officer or a member of the board, fails, neglects or refuses to produce such records within a reasonable time,

or who willfully produces or furnishes records which are false, is guilty of a misdemeanor.

4235. Violation; offense

Every person who violates any provision of this article other than Section 4230 or Section 4227 insofar as sections relate to any preparation included in subdivision (a) or (c) of Section 4211, is guilty of a misdemeanor.

4390. Forgery of prescription; offense; punishment

Every person who signs the name of another, or of a fictitious person, or falsely makes, alters, forges, utters, publishes, passes, or attempts to pass as genuine, any prescription for any drugs is guilty of a forgery and upon conviction thereof shall be punished by imprisonment in the state prison, or by imprisonment in the county jail for not more than 1 year.

Every person who has in his possession any drugs secured by such forged prescription shall be punished by imprisonment in the state prison for not less than one year nor more than six years, or by imprisonment in the county jail for not more than one year.

4390.5. False representation as physician to obtain prescription drugs

Every person who, in order to obtain any drug or poison, falsely represents himself to be a physician or other person who can lawfully prescribe such drug, or falsely represents that he is acting on behalf of a person who can lawfully prescribe such drug or poison, in a telephone communication with a registered pharmacist, shall be punished by imprisonment in the county jail for not more than one year.

EXCERPTS FROM THE PENAL CODE

CHAPTER 4.5. PEACE OFFICERS

830.3. Particular officers

(a) The Deputy Director, assistant directors, chiefs, assistant chiefs, special agents, and narcotics agents of the Department of Justice, and such investigators who are so designated by the Attorney General, are peace officers.

The authority of any such peace officer extends to any place in the state as to a public offense committed or which there is probable cause to believe has been committed within the state.

(b) Any inspector or investigator regularly employed and paid as such in the office of a district attorney is a peace officer.

The authority of any such peace officer extends to any place in the state:

(1) As to any public offense committed, or which there is probable cause to believe has been committed, within the county which employs him; or

(2) Where he has the prior consent of the chief of police, or person authorized by him to give such consent, if the place is within a city or of the sheriff, or person authorized by him to give such consent, if the place is within a county; or

(3) As to any public offense committed or which there is probable cause to believe has been committed in his presence, and with respect to which there is immediate danger to person or property, or of the escape of the perpetrator of such offense.

CHAPTER 5c. CITATIONS FOR MISDEMEANORS

853.5. Infractions; release procedures

Except as otherwise provided by law, in any case in which a person is arrested for an offense declared to be an infraction, the person may be released according to the procedures set forth by this chapter for the release of persons arrested for an offense declared to be a misdemeanor.

853.6. Notice to appear; contents; bail; warrant

(a) In any case in which a person is arrested for an offense declared to be a misdemeanor and does not demand to be taken before a magistrate, such person may, instead of being taken before a magistrate, be released according to the procedures set forth by this chapter. If the arresting officer or his superior determines that the person should be released, such officer or superior shall prepare in duplicate a written notice to appear in court, containing the name and address of such person, the offense charged, and the time and place where and when such person shall appear in court. If the person is not released prior to being booked and the officer in charge of the booking determines that the person should

be released, such officer or superior shall prepare such written notice to appear in court.

(b) Unless waived by the person, the time specified in the notice to appear must be at least five (5) days after arrest.

(c) The place specified in the notice shall be the court of the magistrate before whom the person would be taken if the requirement of taking an arrested person before a magistrate were complied with, or shall be an officer authorized by such court to receive a deposit of bail.

(d) The officer shall deliver one copy of the notice to appear to the arrested person, and the arrested person, in order to secure release, must give his written promise so to appear in court by signing the duplicate notice which shall be retained by the officer. Thereupon the arresting officer shall forthwith release the person arrested from custody.

(e) The officer shall, as soon as practicable, file the duplicate notice with the magistrate specified therein. Thereupon the magistrate may fix the amount of bail which in his judgment, in accordance with the provisions of Section 1275 of the Penal Code, will be reasonable and sufficient for the appearance of the defendant and shall indorse upon the notice a statement signed by him in the form set forth in Section 815a of this code. The defendant may, prior to the date upon which he promised to appear in court, deposit with the magistrate the amount of bail thus set. Thereafter, at the time when the case is called for arraignment before the magistrate, if the defendant shall not appear, either in person or by counsel, the magistrate may declare the bail forfeited, and may in his discretion order that no further proceedings shall be had in such case, unless the defendant has been charged with violation of Section 374b or 374c of this code or of Section 13002 of the Health and Safety Code, or a violation punishable under Section 5008.7 of the Public Resources Code, and he has previously been convicted of a violation of such section or punishable under such section, except in cases where the magistrate finds that undue hardship will be imposed upon the defendant by requiring him to appear, the magistrate may declare the bail forfeited and order that no further proceedings shall be had in such case.

Upon the making of such order that no further proceedings be had, all sums deposited as bail shall forthwith be paid into the county treasury for distribution pursuant to Section 1463 of this code.

(f) No warrant shall issue on such charge for the arrest of a person who has given such written promise to appear in court, unless and until he has violated such promise or has failed to deposit bail, to appear for arraignment, trial or judgment, or to comply with the terms and provisions of the judgment, as required by law.

(g) The officer shall indicate on the notice to appear whether he desires the arrested person to be booked as defined in subdivision 21 of Section 7 of this code. In such event, the magistrate shall, before the proceedings are finally concluded, order the defendant to be booked by the arresting agency.

(h) A peace officer may use the written notice to appear procedure set forth in this section for any misdemeanor offense in which the officer has [illegible] Section 836 or in which he has taken custody

of a person pursuant to Section 847.

(i) If the arrested person is not released pursuant to the provisions of this chapter prior to being booked by the arresting agency, then at the time of booking the arresting officer, the officer in charge of such booking or his superior officer, or any other person designated by a city or county for this purpose shall make an immediate investigation into the background of the person to determine whether he should be released pursuant to the provisions of this chapter. Such investigation shall include, but need not be limited to, the person's name, address, length of residence at that address, length of residence within this state, marital and family status, employment, length of that employment, prior arrest record, and such other facts relating to the person's arrest which would bear on the question of his release pursuant to the provisions of this chapter.

(j) Whenever any person is arrested by a peace officer for a misdemeanor, other than an offense described in subdivision (b) of Section 11357 or subdivision (c) of Section 11360 of the Health and Safety Code, and is not released with a written notice to appear in court pursuant to this chapter, the arresting officer shall indicate, on a form to be established by his employing law enforcement agency, which of the following was a reason for such nonrelease:

(1) The person arrested was so intoxicated that he could have been a danger to himself or to others.

(2) The person arrested required medical examination or medical care or was otherwise unable to care for his own safety.

(3) The person was arrested for one or more of the offenses listed in Section 40302 of the Vehicle Code.

(4) There were one or more outstanding arrest warrants for the person.

(5) The person could not provide satisfactory evidence of personal identification.

(6) The prosecution of the offense or offenses for which the person was arrested or the prosecution of any other offense or offenses would be jeopardized by immediate release of the person arrested.

(7) There was a reasonable likelihood that the offense or offenses would continue or resume, or that the safety of persons or property would be imminently endangered by release of the person arrested.

(8) The person arrested demanded to be taken before a magistrate or refused to sign the notice to appear.

(9) Any other reason, which shall be specifically stated on the form by the arresting officer.

Such form shall be filed with the arresting agency as soon as practicable and shall be made available to any party having custody of the arrested person, subsequent to the arresting officer, and to any person authorized by law to release him from custody before trial.

Chapter 2.5. Special Proceedings in Narcotics and Drug Abuse Cases

1000. (a) This chapter shall apply whenever a case is before any court upon an accusatory pleading for violation of Section 11350, 11357, 11361,

11365, 11377, or 11550 of the Health and Safety Code, or Section 11358 of the Health and Safety Code if the marijuana planted, cultivated, harvested, dried, or processed is for personal use, or Section 381 or subdivision (f) of Section 647 of the Penal Code, if for being under the influence of a controlled substance, or Section 4230 of the Business and Professions Code, and it appears to the district attorney that, except as provided in subdivision (b) of Section 11357 of the Health and Safety Code, all of the following apply to the defendant:

(1) The defendant has no conviction for any offense involving controlled substances prior to the alleged commission of the charged divertible offense.

(2) The offense charged did not involve a crime of violence or threatened violence.

(3) There is no evidence of a violation relating to narcotics or restricted dangerous drugs other than a violation of the sections listed in this subdivision.

(4) The defendant's record does not indicate that probation or parole has ever been revoked without thereafter being completed.

(5) The defendant's record does not indicate that he has been diverted pursuant to this chapter within five years prior to the alleged commission of the charged divertible offense.

(6) The defendant has no prior felony conviction within five years prior to the alleged commission of the charged divertible offense.

(b) The district attorney shall review his file to determine whether or not paragraphs (1) to (6), inclusive, of subdivision (a) are applicable to the defendant. If the defendant is found ineligible, the district attorney shall file with the court a declaration in writing or state for the record the grounds upon which the determination is based, and shall make this information available to the defendant and his attorney.

1000.1. (a) If the district attorney determines that this chapter may be applicable to the defendant, he shall advise the defendant and his attorney in writing of such determination. This notification shall include:

(1) A full description of the procedures of diversionary investigation.

(2) A general explanation of the roles and authorities of the probation department, the district attorney, the community program, and the court in the diversion process.

(3) A clear statement that the court may decide in a hearing not to divert the defendant and that he may have to stand trial for the alleged offense.

(4) A clear statement that should the defendant fail in meeting the terms of his diversion, or should he be convicted of a misdemeanor which reflects the divertee's propensity for violence, or should the divertee be convicted of any felony, he may be required, after a court hearing, to stand trial for the original alleged offense.

(5) An explanation of criminal record retention and disposition resulting from participation in the diversion and the divertee's rights relative to answering questions about his arrest and diversion following successful completion of the diversion program.

(b) If the defendant consents and waives his right to a speedy trial the district attorney shall refer the case to the probation department. The probation department shall make an investigation and take into consideration the defendant's age, employment and service records, educational background, community and family ties, prior controlled substance use, treatment history, if any, demonstrable motivation and other mitigating factors in determining whether the defendant is a person who would be benefited by education, treatment, or rehabilitation. The probation department shall also determine which community programs the defendant would benefit from and which of those programs would accept the defendant. The probation department shall report its findings and recommendation to the court.

(c) No statement, or any information procured therefrom, made by the defendant to any probation officer or drug treatment worker, which is made during the course of any investigation conducted by the probation department or drug treatment program pursuant to subdivision (b), and prior to the reporting of the probation department's findings and recommendations to the court, shall be admissible in any action or proceeding brought subsequent to the investigation.

No statement, or any information procured therefrom, with respect to the specific offense with which the defendant is charged, which is made to any probation officer or drug program worker subsequent to the granting of diversion, shall be admissible in any action or proceeding.

In the event that diversion is either denied, or is subsequently revoked once it has been granted, neither the probation investigation nor statements or information divulged during that investigation shall be used in any sentencing procedures.

1000.2. The court shall hold a hearing and, after consideration of the probation department's report and any other information considered by the court to be relevant to its decision, shall determine if the defendant consents to further proceedings under this chapter and waives his right to a speedy trial and if the defendant should be diverted and referred for education, treatment, or rehabilitation. If the court does not deem the defendant a person who would be benefited by diversion, or if the defendant does not consent to participate, the proceedings shall continue as in any other case.

At such time that a defendant's case is diverted, any bail bond or undertaking, or deposit in lieu thereof, on file by or on behalf of the defendant shall be exonerated, and the court shall enter an order so directing.

The period during which the further criminal proceedings against the defendant may be diverted shall be for no less than six months nor longer than two years. Progress reports shall be filed by the probation department with the court not less than every six months.

1000.3. If it appears to the probation department that the divertee is performing unsatisfactorily in the assigned program, or that the divertee is not benefiting from education, treatment, or rehabilitation, or that the divertee has engaged in criminal misconduct which reflects the divertee's pro-

to the divertee, the court shall hold a hearing to determine whether the criminal proceedings should be reinstituted. If the court finds that the divertee is not performing satisfactorily in the assigned program, or that the divertee is not benefiting from diversion, or the court finds that the divertee has been convicted of a crime as indicated above, the criminal case shall be referred back to the court for resumption of the criminal proceedings. If the divertee has performed satisfactorily during the period of diversion, at the end of the period of diversion, the criminal charges shall be dismissed.

1000.4. This chapter shall remain in effect until January 1, 1979, and on such date is repealed.

1000.5. Any record filed with the Department of Justice shall indicate the disposition in those cases diverted pursuant to this chapter. Upon successful completion of a diversion program the arrest upon which the diversion was based shall be deemed to have never occurred. The divertee may indicate in response to any question concerning his prior criminal record that he was not arrested or diverted for such offense. A record pertaining to an arrest resulting in successful completion of a diversion program shall not, without the divertee's consent, be used in any way which could result in the denial of any employment, benefit, license, or certificate.

1203.03. (a) In any case in which a defendant is convicted of an offense punishable by imprisonment in the state prison, the court, if it concludes that a just disposition of the case requires such diagnosis and treatment services as can be provided at a diagnostic facility of the Department of Corrections, may order that defendant be placed temporarily in such facility for a period not to exceed 90 days, with the further provision in such order that the Director of the Department of Corrections report to the court his diagnosis and recommendations concerning the defendant within the 90-day period.

(b) The Director of the Department of Corrections shall, within the 90 days, cause defendant to be observed and examined and shall forward to the court his diagnosis and recommendation concerning the disposition of defendant's case. Such diagnosis and recommendation shall be embodied in a written report and copies of the report shall be served only upon the defendant or his counsel, the probation officer, and the prosecuting attorney by the court receiving such report. After delivery of the copies of the report, the information contained therein shall not be disclosed to anyone else without the consent of the defendant. After disposition of the case, copies of the report, except the one delivered to the defendant or his counsel, shall be filed in a sealed file and shall be available thereafter only to the defendant or his counsel, the prosecuting attorney, the court, the probation officer, or the Department of Corrections.

(c) Notwithstanding subdivision (b), the probation officer may retain a copy of the report for the purpose of supervision of the defendant if the defendant is placed on probation by the court. The report and information contained therein shall not be disclosed to

else without the written consent of the defendant. Upon the completion or termination of probation, the copy of the report shall be returned by the probation officer to the sealed file prescribed in subdivision (b).

(d) The Department of Corrections shall designate the place to which a person referred to it under the provisions of this section shall be transported. After the receipt of any such person, the department may return the person to the referring court if the director of the department, in his discretion, determines that the staff and facilities of the department are inadequate to provide such services.

(e) The sheriff of the county in which an order is made placing a defendant in a diagnostic facility pursuant to this section, or any other peace officer designated by the court, shall execute the order placing such defendant in the center or returning him therefrom to the court. The expense of such sheriff or other peace officer incurred in executing such order is a charge upon the county in which the court is situated.

(f) It is the intention of the Legislature that the diagnostic facilities made available to the counties by this section shall only be used for the purposes designated and not in lieu of sentences to local facilities.

(g) Time spent by a defendant in confinement in a diagnostic facility of the Department of Corrections pursuant to this section or as an outpatient or inpatient of the California Rehabilitation Center shall be credited on the term of imprisonment in state prison, if any, to which defendant is sentenced in the case.

(h) In any case in which a defendant has been placed in a diagnostic facility pursuant to this section and, in the course of his confinement, he is determined to be suffering from a remediable condition relevant to his criminal conduct, the department may, with the permission of defendant, administer treatment for such condition. If such treatment will require a longer period of confinement than the period for which defendant was placed in the diagnostic facility, the Director of Corrections may file with the court which placed defendant in the facility a petition for extension of the period of confinement, to which shall be attached a writing signed by defendant giving his consent to the extension. If the court finds the petition and consent in order, it may order the extension, and transmit a copy of the order to the Director of Corrections.

1203.07. (a) Notwithstanding the provisions of Section 1203, probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, any of the following persons:

(1) Any person who is convicted of violating Section 11351 of the Health and Safety Code by possessing for sale one-half ounce or more of a substance containing heroin.

(2) Any person who is convicted of violating Section 11352 of the Health and Safety Code by selling or offering to sell one-half ounce or more of a substance containing heroin.

(3) Any person convicted of violating Section 11351 of the Health and Safety Code by possessing heroin for sale or convicted of violating Section 11352 of the Health and Safety Code by selling or offering to sell heroin, and who has one or more prior convictions for violating Section 11351 or

Section 11352 of the Health and Safety Code.

(b) The existence of any fact which would make a person ineligible for probation under subdivision (a) shall be alleged in the information or indictment, and either admitted by the defendant in open court, or found to be true by the jury trying the issue of guilt or by the court where guilt is established by plea of guilty or nolo contendere or by trial by the court sitting without a jury.

I About the Controlled Substances Board

The Controlled Substances Board is a six-member statutory Board, created in 1969 to administer portions of the Uniform Controlled Substances Act. The Board is Wisconsin's scheduling authority and it issues controlled substances possession authorizations for researchers, teaching institutions, analytical laboratories and other special applications. The Board is advisory to the State Methadone Authority and conducts regular symposia to focus attention on specialized drug abuse topics. Symposia have been held on methadone, narcotic antagonists, the role of law in the social control of drugs, and on distribution patterns of prescription amphetamines.

Membership of the Board includes:

- Darold A. Treffert, M.D.; psychiatrist member, and Chairman; Director, Winnebago Mental Health Institute.

- Karl Marquardt, R.Ph., Vice Chairman; Executive Secretary of the Pharmacy Examining Board and representing Chairman D. Jack Myers.

- Donald E. Percy, Secretary, Department of Health and Social Services.

- John W. Calhoun, Assistant Attorney General; representing Attorney General Bronson LaFollette.

- Donald Willett, Director, Bureau of Laboratory Services, Department of Agriculture, Trade and Consumer Protection; representing Secretary Gary Rohde.

- June Dahl, Ph.D., pharmacologist member; Assistant Professor of Pharmacology, University of Wisconsin.

The Board is attached to the Department of Health and Social Services. Staff services are provided by the Bureau of Alcohol and Other Drug Abuse, Larry W. Monson, ACSW, Director.

Special Meeting

Usage Patterns of Schedule II
Sedative-Hypnotics in Wisconsin and the U.S.

Wednesday, March 21, 1979
Training Center, Gordon Hall
Winnebago Mental Health Institute
Winnebago, Wisconsin

PROGRAM

9:00 Registration

9:30 Welcome, Background, Introductory Remarks

- Darold A. Treffert, M.D.
  Chairman, Controlled Substances Board
  Director, Winnebago Mental Health Institute

- Larry W. Monson, ACSW
  Director, Bureau of Alcohol and Other Drug Abuse

- Robert T. Angarola
  Assistant Director, Domestic Policy Staff, The White House

10:30 Distribution Patterns of Sedative-Hypnotics in Wisconsin and the U.S.

- David E. Joranson, MSSW
  Drug Abuse Program Policy Specialist
  Bureau of Alcohol and Other Drug Abuse

12:00 Lunch

1:00 Reactor Panel and Discussion of Data, Implications for Wisconsin Policy and Programs

- Paul Bjerke
  Pharmacy Examining Board

- Ralph Paulick
  Wisconsin Pharmacy Association

- Darold Treffert, M.D.
  President-elect, State Medical Society

- Rudolph W. Link, M.D.
  Medical Examining Board

3:30 Adjourn

III Participants

1. Lee Ames; Upjohn Co.; Chicago, Illinois
2. Gary Andersen; U.S. Drug Enforcement Administration; Milwaukee, Wisconsin
3. Robert Angarola; Domestic Policy Staff, The White House; Washington, D.C.
4. Dan Bay; Unified Health Services Board of Outagamie County; Appleton, Wisconsin
5. Paul Bjerke; Pharmacy Examining Board; Madison, Wisconsin
6. Herb Boll; Brown County Mental Health Center; Green Bay, Wisconsin
7. Debi Bowen, MSSW; Bureau of Alcohol and Other Drug Abuse; Madison, Wisconsin
8. Dick Briggs; Brown County
9. Gail Briggs; Outagamie County
10. John W. Calhoun; Controlled Substances Board and Department of Justice; Madison, Wisconsin
11. Paul Cushman, Jr., M.D.; Department of Pharmacology, Medical College of Wisconsin and Wisconsin Alcoholism and Drug Abuse Research Institute; Milwaukee, Wisconsin
12. June Dahl, Ph.D.; Controlled Substances Board and Department of Pharmacology, University of Wisconsin; Madison Wisconsin
13. Frank Dolejsi; Crime Lab; Madison, Wisconsin
14. Scott Ewert; Alcohol and Drug Council of Kenosha County; Kenosha, Wisconsin
15. James A. Ferguson, DVM, Ph.D.; Office of Medical and Professional Affairs, National Institute on Drug Abuse; Washington, D.C.
16. Ron Frederick; Kenosha County Comprehensive Board; Kenosha, Wisconsin
17. Susan Fredlund; Department of Public Instruction; Madison, Wisconsin
18. Karen Gillespie; PraCon Incorporated; Vienna, Virginia
19. Mark Goff; Mental Health Planning Council; Milwaukee, Wisconsin
20. James Halikas, M.D.; Wisconsin Alcoholism and Drug Abuse Research Institute; Milwaukee, Wisconsin
21. J. J. Hannon; U.S. Drug Enforcement Administration; Chicago, Illinois
22. E. Johnson, M.D.; Brown County Mental Health Center; Green Bay, Wisconsin
23. David Joranson, MSSW; Bureau of Alcohol and Other Drug Abuse; Madison, Wisconsin
24. Paul Keys; Division of Community Services; Madison, Wisconsin
25. Allen Liegel; Department of Pharmacy, University of Wisconsin; Madison, Wisconsin
26. Rudolph Link, M.D.; Medical Examining Board; Madison, Wisconsin
27. Karl Marquardt, R. Ph.; Controlled Substances Board; Madison, Wisconsin
28. Philip McCullough, ACSW; Bureau of Alcohol and Other Drug Abuse; Madison, Wisconsin
29. Larry Monson, ACSW; Bureau of Alcohol and Other Drug Abuse; Madison, Wisconsin
30. Jack Myers; Pharmacy Examining Board; Madison, Wisconsin
31. Tony Novello; Sandoz; Cleveland, Ohio
32. James Pacella; U.S. Drug Enforcement Administration; Washington, D.C.
33. Ralph Paulick; Wisconsin Pharmaceutical Association; Madison, Wisconsin
34. Liz Plotkin, MSSW; Bureau of Alcohol and Other Drug Abuse; Madison, Wisconsin
35. Mary Reddin; Medical Examining Board; Madison, Wisconsin
36. Paul Schanen; Brown County Mental Health Center; Green Bay, Wisconsin
37. Darold Treffert, M.D.; Controlled Substances Board and Winnebago Mental Health Institute; Winnebago, Wisconsin
38. Alan White; Division of Health; Madison, Wisconsin
39. Donald Willett; Controlled Substances Board and Department of Agriculture, Trade and Consumer Protection; Madison, Wisconsin

IV Summary of Introductory Remarks

Darold A. Treffert, M.D.
Chairman, Controlled Substances Board
Director, Winnebago Mental Health Institute

Dr. Treffert described the Controlled Substances Board (CSB) and introduced the Board members. He briefly discussed the Board's last symposium which was on amphetamine usage in Wisconsin.

The scope of sedative-hypnotic usage was then reviewed. Sedative-hypnotics are largely taken for insomnia, by 15-20 million Americans. Dr. Treffert reviewed statistics on the reduction of these prescriptions in recent years. A large quantity of these controlled substances are diverted onto the street - "this is our concern today"; although fifty percent of these street drugs are stolen, the other half is from doctors' diversionary practices.

Barbiturates are a poor choice for inducing sleep. They produce a non-physiologic sleep, nightmares and agitation ("REM rebound" effect). Additionally, these drugs interfere with liver enzyme production. On the other hand, the benzodiazepines induce a more natural sleep and the likelihood of physical dependence is much less.

Dr. Treffert concluded by posing several questions to be explored today:

* Is there a problem with Schedule II sedative hypnotics in Wisconsin?
* If yes, is it widespread or limited to a few practitioners and pharmacists?
* Is diversion a large problem?
* Should the "remedy" be legislation, regulation or education?

Larry W. Monson, ACSW
Director, Bureau of Alcohol and Other Drug Abuse, Division of Community Services, Department of Health and Social Services (Single State Agency for Alcohol and Drug Abuse.)

Mr. Monson described the functions of the Bureau of Alcohol and Other Drug Abuse (BAODA), including the staff services it provides to CSB.

Mr. Monson commended the CSB and especially recognized Darold Treffert, Karl Marquardt and John W. Calhoun for their dedicated service on the Board since its beginnings.

The cooperative working relationship between federal and Wisconsin alcohol and other drug authorities was described and commended. Examples cited were the CSB monitoring of licit drug distribution as well as its monitoring of methadone maintenance programs in conjunction with BAODA and federal agencies. Gary Andersen, U.S. Drug Enforcement Administration, was introduced and recognized for his assistance with the sedative-hypnotic data.

Robert T. Angarola
Assistant Director, Domestic Policy Staff
The White House

Mr. Angarola discussed the drug problem from a federal perspective. He stated that the federal government is concerned with three areas of drug abuse policy: (1) international issues, (2) health issues (National Institute on Drug Abuse) and (3) enforcement (Drug Enforcement Administration).

In the White House, there is high interest on drug issues. One problem mentioned in President Carter's August 1977 message to Congress was physician overprescribing of barbiturates and other sedative-hypnotics.

Heroin, barbiturates and sedative-hypnotics are the major drug problems - these account for 90% of drug-related deaths. The White House has seen a curbing of the heroin problem and this success has led to optimism as far as sedative-hypnotic issues.

According to Mr. Angarola, the key to working through these problems is to work with the states (e.g., state-level regulatory boards). It is important to identify problem practitioners and investigate where necessary. Under the Controlled Substances Act, the major responsibility for regulation at the retail level lies with the states. Therefore, it is up to the federal government to work with the states, providing information, resources and training.

Ninety-eight percent of the time, drug prescribing problems are not an enforcement/criminal issue, but an education or regulatory issue. Some physicians and pharmacists are not keeping up with advancements in this area. An interagency group (including representatives of the Food and Drug Administration, National Institute on Drug Abuse, American Medical Association, Pharmaceutical Manufacturers Association and others) was formed to work together to promote the education of professionals and the strengthening of regulatory boards as well as professional groups (i.e., encouraging peer pressure measures). (David Joranson, BAODA, was present at one of these meetings.)

Wisconsin is a forerunner in getting people together in a non-threatening way and is to be commended for this; at the federal level, there seems to be distrust between regulatory and health professionals. Wisconsin amphetamine activity has acted as a basis for the actions taken by other states. Mr. Angarola stated that this is why he came to this Special Meeting. Wisconsin can and will serve as a model for utilizing Drug Enforcement Administration information. Wisconsin is unique as a state putting forth effort into this area

James A. Ferguson, D.V.M., Ph.D., Deputy Director
Office of Medical and Professional Affairs
National Institute on Drug Abuse

Mr. Ferguson expressed how impressed he is with Wisconsin's use of this data. He reviewed the National Institute on Drug Abuse (NIDA) report "Sedative-Hypnotic Drugs: Risks and Benefits".

Mr. Ferguson stated that prescriptions for all sedative-hypnotics is showing a decrease (except Flurazepam, or Dalmane) from 1977 to 1978. From 1971 to

1978, the number of prescriptions decreased 82% for barbiturate sedative-hypnotics and decreased 67% for nonbarbiturate sedative-hypnotics.

The increase in the number of sedative-hypnotic prescriptions has been halted and the trend is now downward; in Wisconsin, even Dalmane prescriptions are leveling off. This data is encouraging.

Far too many Americans use sedative-hynotics and for too long. There are "placebo effect" problems with barbiturates due to their known ineffectiveness over a period of time.

The NIDA report recommends a national education campaign for physicians and the public rather than taking these drugs off the market.

V Distribution Patterns of Sedative Hypnotics -

David E. Joranson, MSSW
Drug Abuse Program Policy Specialist
Bureau of Alcohol and Other Drug Abuse

"The Controlled Substances Board's first such data analysis project was in 1977, initially on purchases of but one amphetamine product - Biphetamine 20 - for only one strength - 20 milligrams - and for a period of one year.

Today's analysis is considerably more comprehensive and includes all products, and strengths in each general category of [illegible]al, pentobarbital, secobarbital and methaqualone, for a two year period. These drugs make up the class of Schedule II sedative-hypnotics that have high abuse potentials and accepted medical uses.

Most of today's materials and analysis have been developed using existing resources, specifically those of the Controlled Substances Board and the Bureau of Alcohol and Other Drug Abuse. Considerable time was spent in understanding, analyzing and preparing the data. I want to recognize the very valuable assistance contributed by Liz Plotkin and Debi Bowen.

The maps you will see were prepared by the University of Wisconsin Cartography Laboratory, on a small purchase order approved for this purpose by our Division Administrator, Dr. Len Ganser. In all, these maps cost approximately $600.

I want to emphasize the extremely valuable role of the Drug Enforcement Administration in providing this data, especially the special runs that Jim Pacella has provided us. Jim is head of the ARCOS unit in Washington, D.C.

Finally, I want to thank Gary Andersen, Compliance Investigator of the Milwaukee Resident Office of DEA for his ongoing assistance in analyzing and interpreting ARCOS information for the State of Wisconsin. The relation between Wisconsin and the Compliance and Regulatory functions of DEA is exemplary.

I want to caution everyone, including the press, that the following presentations must not be used as the exclusive basis for drawing conclusions as to the legitimacy of the use of drugs in any area of Wisconsin.

This presentation will be, for most of you, the first time you have ever seen such a detailed picture of these distribution patterns. You will see some unusual concentrations of certain drugs. We will look to our reactor panel this afternoon for insights into what these data mean, what positive trends and problems they see, and what actions may be needed, either of an educational, regulatory or enforcement nature - or, no action may be the best course in some instances. You will receive a copy of this presentation in the next few weeks.

There is a fair amount of material to present, so I would ask that we hold our discussion until this afternoon, but if you have clarification questions, please stop me.

In the distribution system for controlled substances, there are three possible distribution points which occur at the end of the system, at the community level, just before the drugs reach the ultimate user or consumer. The pharmacy distributes mainly to outpatient or nursing home patients, upon the order or prescription of a practitioner licensed to practice. The hospital distributes to inpatients or outpatients, also at the order of a practitioner. The practitioner may distribute to patients directly. This is called dispensing. All three, the pharmacy, hospital and practitioner order their drugs from the manufacturer or the distributor of their choice. For Schedule II drugs, a separate registration number must be obtained from DEA, and then all purchases are made on a triplicate order form, one copy of which finds its way back to Washington, D.C. and is programmed into ACROS. It is the analysis of these purchases that is the subject of this presentation.

I will follow a sequence in the presentation. First, I will describe the national pattern of distribution. Then, we'll move to the Wisconsin picture. For Wisconsin, I'll show you what accounts for the peaks of high per capita distribution by presenting profiles of the high purchases made by pharmacies, hospitals, or practitioners. Then I'll summarize the whole pattern, and go on to the next drug. I should point out that each area of high purchasing tends to draw attention as an area worthy of further study. There may or may not be any problem, however.

Let's start by looking at amobarbital. No United States distribution was prepared because, unfortunately, the aggregate data included dexamyl which is much more an amphetamine product even though it contains amobarbital.

(Mr. Joranson then presented charts, maps and graphs on distribution of amobarbital. They appear at the end of this section.)

Hospital total purchases were 31,500 dosage units, by 49 hospitals (of a total of 178 hospitals in Wisconsin). One hospital purchased 11,900, which was the highest hospital purchase. The average purchase was 642 dosage units.

Practitioner total purchases were 24,800 dosages, by 21 practitioners; 26% of these purchases come to zip area 549, the Fox River Valley, to two practitioners who dispense amobarbital. The average practitioner purchase was 1,180 dosages.

In Summary, the 1976-77 decrease of 37.8% for amobarbital in Wisconsin (including dexamyl) exceeds the national average decrease of 26.1% (also includes dexamyl). Decreases are largely among pharmacies, reflecting a decrease in physician prescribing. Hospital and practitioner purchases are decreasing too.

Questions are raised about: the high pharmacy purchases in northern Wisconsin; one large hospital utilization; and several large practitioner purchases. Compared to the upcoming description of other drugs, the overall baseline for distribution of amobarbital is low, but punctuated by several high peaks.

Now lets go to pentobarbital. Again, the national aggregate data is not presented because of the inclusion of veterinary use of pentobarbital.

(Mr. Joranson then presented charts, maps and graphs on distribution of pentobarbital. They appear at the end of this section.)

Hospitals total purchases of pentobarbital were 151,575 dosages by 118 hospitals, the largest purchase was 6,600 and the average was 1,284 dosages. Total purchases were nearly 5 times greater than hospital purchases of amobarbital. The average hospital purchase was twice as high as for amobarbital.

Practitioner total purchases were 138,600 dosages by 64 practitioners. The average purchase was 2,166, almost twice as high as the hospital average purchase. The highest purchase was 24,000 dosages.

In Summary, the 1976-77 decrease of 14.3% for pentobarbital in Wisconsin is less than the average national decrease of 23.7%. (These figures include pentobarbital for veterinary use.) Pharmacy decreases, which do not include veterinary use, dropped 31% during the same period, and is probably more accurate in describing Wisconsin's trend in prescribing pentobarbital. Overall purchases of pentobarbital are about 3 times as high as amobarbital.

Questions are raised about: a few moderately high pharmacy purchases; some high hospital utilization; and a very large practitioner purchase.

For secobarbital a national distribution is available, because the data is not "contaminated" by drugs of other classes or intended for non-human uses.

(Mr. Joranson presented the U.S. distribution of secobarbital; a U.S. surface map, and a rank order list, both of which appear at the end of this section.)

Within this distribution, Wisconsin ranks number 35. This means there are 34 states that have a higher per capita distribution of secobarbital than Wisconsin.

(Mr. Joranson then presented charts, maps and graphs of distribution of secobarbital in Wisconsin. They appear at the end of this section.)

The pharmacy purchases do not by themselves explain the high peaks, so we looked at practitioner purchases of secobarbital in the 549 area. (See Zip 549 graph of practitioner purchases of secobarbital.) Then, remembering earlier large amobarbital and pentobarbital purchases by practitioners in 549, we decided to aggregate all practitioner purchases. (See Zip 549 practitioner purchases of amobarbital, pentobarbital and secobarbital.)

Hospital total purchases were 167,550 dosages by 124 hospitals, average 1,351 dosages. Total purchases, number of hospitals and average purchases were all slightly ahead of pentobarbital.

Practitioner total purchases were 144,300 dosages by 64 practitioners. The average purchase was 2,255. The number of practitioners was equal to those purchasing pentobarbital, while total purchases and average purchases were slightly ahead of pentobarbital. There were several high purchases of 20,000 and 18,000 dosages, which you just saw aggregated in the zip area 549 graph.

In Summary, the 1976-77 trend in Wisconsin shows secobarbital decreasing by almost 40% compared to a national average decrease of 21%. Large decreases occured in pharmacy, hospital and practitioner purchases.

Questions are raised by: high pharmacy purchases in 532 Milwaukee area; several high pharmacy purchases, especially in the northwest; hospital utilization; and very high practitioner purchases in the 549 area, particularly when aggregated with amobarbital and pentobarbital.

For methaqualone, a national distribution is available too.

(Mr. Joranson presented the U.S. distribution of methaqualone, a U.S. surface map and a rank order list, both of which appear at the end of this section.)

Within this distribution, Wisconsin ranks number 33. This means there are 32 states that have a higher per capita distribution of methaqualone than Wisconsin.

(Mr. Joranson then presented charts, maps and graphs of distribution of methaqualone in Wisconsin. They appear at the end of this section.)

Fifty-one hospitals purchased 30,300 dosages for an average of 594 dosages. There was one large hospital purchase of 5,400 dosages.

Eighteen practitioners purchased 8,800 dosages for an average of 489. There were no notably high purchases, however dentists are among those purchasing methaqualone.

In Summary, the 1976-77 trend in Wisconsin shows methaqualone decreasing by 25% compared to a national average decrease of 21%. In spite of large increases in 537 pharmacy purchases, the state-wide trend appears to be declining rapidly enough to produce an overall state decrease. Questions are raised by the high prescribing of methaqualone in 537."

Mr. Joranson closed his remarks by again cautioning everyone not to draw conclusions solely on the basis of this data and urged the adoption of these techniques as a tool for problem analysis on a wider scale.

VII Summary of Reactor Panel Afternoon General Discussion

Reactor Panel:
- Darold Treffert, M.D., State Medical Society
- Rudolph Link, M.D., Medical Examining Board
- Paul Bjerke, Pharmacy Examining Board
- Ralph Paulick, Wisconsin Pharmaceutical Association
- Moderator: Karl Marquardt, R.Ph., Controlled Substances Board

Dr. Treffert's reactions to the morning presentation were in regard to the role the State Medical Society (SMS) should take (and is taking) as far as its physician members and the sedative-hypnotic issue. The three areas the SMS can take a part are:

(1) Education - post-graduate alcohol and other drug abuse education for physicians, including contemporary approaches to insomnia
(2) Encoragement of peer review/self-regulation as far as ethical considerations of prescribing sedative hypnotics
(3) Specification of the indications for sedative-hypnotics.

Dr. Link explained that 1/3 of the Medical Examining Board (MEB) cases presently under investigation are related to prescribing of controlled substances. The MEB requires continuing medical education for physicians. Dr. Link would like to see the MEB assist the SMS in determining the appropriate uses of barbiturates (e.g., for epilepsy).

Several of the peaks seen in the data presented are already being looked into by the MEB. However, due process requires very careful investigation before legal action is taken.

Dr. Link asked the audience if anyone could tell him the proper medical usage of methaqualone. There seemed to be consensus that one could not be determined.

The Pharmacy Examining Board (PEB) is also a state regulatory board. Mr. Bjerke thinks the PEB should examine the top five pharmacies that distribute secobarbital. The pharmacist, like the physician, has a responsibility here; the pharmacist should not fill prescriptions known to be improperly prescribed or abused. For example, a pharmacist should not refill methaqualone prescriptions after two months. The "physician-patient-pharmacist" relationship is very important.

Mr. Bjerke stated that the medical practitioner should follow the same dispensing rules as does the pharmacist and the PEB should have the authority to conduct audits on dispensing physicians. This would probably eliminate the few practitioners involved in this unprofessional activity, he said.

According to Mr. Bjerke, the dispensing physicians should be examined just as pharmacies are investigated.

Mr. Paulick, Wisconsin Pharmaceutical Association, expressed his support of the PEB in their concern about these drugs and the continued monitoring of pharmacies.

A two-hour open discussion followed.

Mr. Angarola and Dr. Treffert explored the use of peer pressure and education of physicians.

Ms. Reddin (MEB) responded to Mr. Bjerke's remarks, and agreed that the PEB should regulate physician dispensing. She then asked about the legitimate medical use of barbiturates. Dr. Link explained that barbiturates are not effective except for short periods of time. Dr. Treffert and Dr. Link explained that this is a complex question. Some prescribe these drugs for insomnia and anxiety, and anesthesia is a common usage.

Mr. Marquardt stated that this is a much more complex problem than the amphetamine issue where obesity was clearly not considered a proper indication for amphetamines.

The complexity of this problem was reiterated by Dr. Dahl. She said that there are honest differences of opinion over the barbiturates and the other sedative-hypnotics; some success with the barbiturates has been observed. However, physicians must take a closer look at complaints of, for example, insomnia - if upon closer examination the patient complains of early morning awakening, the problem may be depression which calls for other treatment. Dr. Dahl also said that the sleep laboratory data unfortunately is obtained from an artificial situation.

Dr. Ferguson explained that Dalmane is the only sedative-hypnotic effective over a longer period of time. He also pointed out that the discoveries of practitioners are often not published or disseminated, so some known information may not be available to us.

Dr. Halikas referred to pages 4-5 of the NIDA report which describes the use of the central nervous system depressants for insomnia and emphasized the importance of diagnosis preceeding treatment.

Dr. Dahl said that people must realize that anxiety and insomnia are normal reactions to some life situations. We are indoctrinated to turn to pills when something ails us and we need to realize that pharmacological solutions are not always necessary.

In conjunction with this, Dr. Ferguson pointed out that insomnia is a symptom, not a disease.

Dr. Cushman referred to page 93 of the NIDA report and noted the high purchase records. Dr. Ferguson explained that it is very difficult to relate Drug Abuse Warning Network (DAWN) data to prescription data. Dr. Cushman said it would be interesting to know if this same tendency is showing up at medical examiners. Dr. Ferguson then said that it is difficult to tell if the reduction of sedative-hypnotic cases at medical examiners is because of less use or less availability.

One drug abuse population that is presently underserved is women. Mr. Joranson brought up the benefits to women if less sedative-hypnotics are being prescribed. Dr. Treffert agreed that women will benefit more from a decline in use; however, he pointed out that more women are affected by this problem because there is an over-representation of women in the medical system. Dr. Ferguson agreed that the data regarding women and drug abuse must be evaluated carefully.

Mr. Liegel suggested that these drugs should not be stocked in oral dosage units in hospitals. For accreditation, hospitals must have pharmacy and therapeutics committees which monitor issues as this.

Dr. Link emphasized the importance of education for physicians and consumers, while Dr. Cushman and Dr. Dahl told of the importance of pharmokinetics. Dr. Halikas would like to see continuing medical education (CME) credits specifically required in alcohol and other drug abuse.

Mr. Hannon commended the CSB for its extensive efforts on this and other projects.

Dr. Treffert brought up the regulatory implications of the data presented. Dr, Link emphasized the need for this sound data, rather than heresay, before the MEB can revoke licenses.

Dr. Cushman pointed out that there are a variety of ways in which people decide what drugs to take and not to take, especially through media.

The problems of "package inserts" were discussed by Dr. Ferguson and Dr. Treffert.

Then, Dr. Treffert discussed the addicted physician. The practicing of prescribing for self and family is now illegal. Mr. Marquardt explained that there are federal and state regulations that prohibit anything other than prescribing in the "usual course of professional practice" and that it is up to the state regulatory boards to interpret the meaning of this. It was stated that a person may just go to a different pharmacy if a pharmacist hesitates to fill a prescription. Mr. Bjerke stated that the PEB should come out with a statement as to what action should be taken if unprofessional conduct is suspected by a pharmacist in regard to prescribing practices. Mr. Paulick explained that pharmacists are reluctant to not fill a prescription but when they have a rather good idea that something wrong is going on, they will call a physician.

Mr. Angarola said that at the federal level, a reduction has already been seen and cooperation exists, so the U.S. Food and Drug Administration will not be scheduling hearings on barbiturates in the near future. Previous to this, Dr. Treffert recommended not interfering since the use of barbiturates is decreasing anyway - there's been a 30% drop in the last year.

Mr. Angarola stated that the President's message expressed that these drugs have a high abuse potential. They are so dangerous that this is why so much time is being spent on them.

Dr. Dahl asked if abuse of methaqualone would continue if it is banned, because of drugs coming in form other countries. Mr. Andersen said that this would probably be the case.

Mr. Ferguson stated that a special NIDA panel on sedative-hypnotics was unwilling to recommend that any of these drugs be banned.

Dr. Treffert summarized the afternoon discussion. He said that there are still questions as to the extent of use, though it is known that this is decreasing. Dr. Treffert emphasized the importance of education and persuasion - or prosecution if necessary. Bans are not necessary at this point, he concluded, but he added that this could change. The Medical Society will continue to accelerate education, knowledge and awareness of barbiturates and sedative-hypnotics.

Dr. Treffert stated that the CSB will continue its annual symposiums, but that the topic of the next one is not yet known. His overall feeling from this meeting was that state agencies seem to be working well together.

Dr. Treffert expressed his appreciation to the federal representatives present.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 479

"An act revising the drug laws of the state."

The Department of Health and Social Services endorses and supports the concept of the need to revise and update Chapter 17: Controlled Substances Act. The Department is pleased with the bill's similarity of the schedule of controlled substances in H.B. 479 with its federal counterpart.

The bill though appears to lack recognition of the public health aspects of drug addiction and use. Therefore, the Department would recommend that H.B. 479 could be strengthened by consideration of the following:

1. The bill does not address the matter of treatment. There is little doubt that many of the offenders who would be prosecuted under this legislation would be abusers of drugs in need of help. It would be appropriate to include provisions for such treatment of offenders while they are incarcerated and specially for counselling and treatment services after their confinement is completed. At present the Department of Health and Social Services, Division of Corrections, has little in the way of effective drug abuse treatment, due in part to fiscal contraints.

2. Include a mechanism whereby persons arrested under this act would be afforded an opportunity for pre-sentence screening and diagnosis to determine if habitual or chronic drug abuse or addiction was a contributing factor in the commission of the person's offense. If indicated, and depending upon the severity of the offense, and prior criminal record, the offender may be afforded treatment as a part of his or her sentence at some point while the person is in the custody of the State of Alaska.

3. Since data prepared in conjunction with the development of the Drug Abuse State Plan indicates Alaskans suffer more health problems and death from the abuse of prescription drugs rather than illicit drugs, perhaps H.B. 479 should set forth policies regarding monitoring the distribution of prescription drugs in Alaska paid by the State under Medicaid and General Relief-Medical programs to look for patterns of abuse or improper distribution. The states of Washington, California, Wisconsin, and Illinois have instituted such programs with significant success. Although the institution of such a system could possibly be done by administrative means, the Department sees placing it in law as an advantage for funding and enforcement purposes.

4. Since ethanol C_2H_5OH is the drug present in beverage alcohol - beer, wine, and liquor; and data indicates that alcohol abuse is

POSITION PAPER/Department of Health & Social Service

the major contributing factor to human suffering, and social costs in Alaska, consideration may be given to its inclusion in H.B. 479 as a Schedule VI Substance. Although regulation of beverage alcohol presently exists in Title 04, the educative value of its mention in the Controlled Substances Act as a potentially harmful drug appears worthwhile.

It would be desirable from the standpoint of public health be to include the recommendations listed above.

Possession of Methaqulones (Parr Sch. II)	0-1 yr. / $1000	0-1 yr. / $5000 1st. 0-2 yr. / $10,000 2nd. If no prior convictions conditional discharge is permitted.			Misdemeanor	same as Amphetamines
Possession of Valium (Parr Sch. IV)	0-1 yr. / $1000	0-1 yr. / $5000 1st. 0-2 yr. / $10,000 2nd. If no prior convictions conditional discharge is permitted.			Misdemeanor	If 400 caps or more: 20 yrs / $10,000 If 50 caps. or more: 10 yrs. / $10,000 If less than above: 1 yr. / $1000

Penalties	SB 65 (1979)	Federal Controlled Substances Act	H.B. 549 (1978)	Existing AK. LAW	Uniform Act	Hawaii Law
Possession of Hash, Hash oil (Parr Sch. IV) (Hawaii-Sch. III)		0-1 yr. / $5000 1st. 0-2 yr. / $10,000 2nd. If no prior convictions conditional discharge is permitted.	0-1 yr. / $2000 $1,000 presumptive sentence		Misdemeanor	If 400 or more cans OR 1 oz or more: 20 yrs / $ 1/4,000 If 50 or more cans or 1/8 oz or more: 10 yrs / $10,000 If less than above: 1 yr. / $1000

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF MENTAL HEALTH AND DEVELOPMENTAL DISABILITIES

POUCH H 04 – JUNEAU 99811

January 23, 1980

Honorable Thelma Buchholdt
House of Representatives
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Document# 2-80

Dear Ms. Buchholdt:

I have compared the drugs listed in House Bill 479 and compared them to FDA Regulations 4/1/79, Chapter II, Drug Enforcement Administration, Department of Justice, § 1308.02, pages 85-90. You will find in the left hand margin of House Bill 479 where the drug is listed in the Federal Schedule if there is a difference. Best wishes in your hearings on House Bill 479.

Sincerely yours,

Verner Stillner, M.D., M.P.H.
Director

VS:prp

cc: Hoyt D. Beirne, Commissioner
Department of Health & Social Services

Enclosure

06-8100L.H

name, address, and official title of the person or agency to whom the controlled drugs are to be delivered, including the name and quantity of the substances desired and the purpose for which intended. The delivery of such controlled drugs shall be ordered by the Administrator, if, in his opinion, there exists a medical or scientific need therefor.

SPECIAL EXEMPT PERSONS

§ 1307.31 Native American Church.

The listing of peyote as a controlled substance in Schedule I does not apply to the nondrug use of peyote in bona fide religious ceremonies of the Native American Church, and members of the Native American Church so using peyote are exempt from registration. Any person who manufactures peyote for or distributes peyote to the Native American Church, however, is required to obtain registration annually and to comply with all other requirements of law.

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

GENERAL INFORMATION

Sec.
1308.01 Scope of Part 1308.
1308.02 Definitions.
1308.03 Administration Controlled Substances Code Number.
1308.04 Submission of information by manufacturers.

SCHEDULES

1308.11 Schedule I.
1308.12 Schedule II.
1308.13 Schedule III.
1308.14 Schedule IV.
1308.15 Schedule V.

EXCLUDED NONNARCOTIC SUBSTANCES

1308.21 Application for exclusion of a nonnarcotic substance.
1308.22 Excluded substances.

EXEMPT CHEMICAL PREPARATIONS

1308.23 Exemption of certain chemical preparations; application.
1308.24 Exemption chemical preparations.

EXCEPTED STIMULANT OR DEPRESSANT COMPOUNDS

Sec.
1308.31 Application for exception of a stimulant or depressant compound.
1308.32 Excepted compounds.

HEARINGS

1308.41 Hearings generally.
1308.42 Purpose of hearing.

NOMENCLATURE CHANGES: 38 FR 26609, Sept. 24, 1974.

GENERAL INFORMATION

§ 1308.01 Scope of Part 1308.

Schedules of controlled substances established by section 202 of the Act (21 U.S.C. 812), as they are changed, updated, and republished from time to time, are set forth in this part.

§ 1308.02 Definitions.

As used in this part, the following terms shall have the meanings specified:

(a) The term "Act" means the Controlled Substance Act (84 Stat. 1242; 21 U.S.C. 801) and/or the Controlled Substances Import and Export Act (84 Stat. 1285; 21 U.S.C. 951).

(b) The term "hearing" means any hearing held pursuant to this part for the issuance, amendment, or repeal of any rule issuable pursuant to section 201 of the Act.

(c) The term "isomer" means, except as used in § 1308.11(d), the optical isomer. As issued in § 1308.11(d), the term "isomer" means the optical, position or geometric isomer.

(d) The term "interested person" means any person adversely affected or aggrieved by any rule or proposed rule issuable pursuant to section 201 of the Act.

(e) The term "proceeding" means all actions taken for the issuance, amendment, or repeal of any rule issued pursuant to section 201 of the Act, commencing with the publication by the Administrator of the proposed rule, amended rule, or repeal in the FEDERAL REGISTER.

(f) Any term not defined in this section shall have the definition set forth in section 102 and 1001 of the Act (21 U.S.C. 802 and 951) and § 1301.02 of this chapter

§ 1308.03 Administration Controlled Substances Code Number.

(a) Each controlled substance, or basic class thereof, has been assigned a "Administration Controlled Substances Code Number" for purposes of identification of the substances or class on certain Certificates of Registration issued by the Administration pursuant to § 1301.44 of this chapter and on certain order forms issued by the Administration pursuant to § 1305.05(d) of this chapter. Certain applicants for registration must include the appropriate numbers on the application as required in § 1301.32(d) and applicants for procurement and/or individual manufacturing quotas must include the appropriate number on the application as required in §§ 1303.12(b) and 1303.22(a).

(b) Except as stated in paragraph (a) of this section, no applicant or registrant is required to use the Administration Controlled Substances Code Number for any purpose.

§ 1308.04 Submission of information by manufacturers.

(a) Each person who manufactures, packages, repackages, labels, relabels, or distributes under his own label any product (including any compound, mixture, or preparation, diagnostic, reagent, buffer, or biological) containing any quantity of any controlled substance (whether such product is itself controlled or is excepted, exempted, or excluded from some or all controls pursuant to § 1308.21-24 or § 1308.31-32) shall submit information required in paragraph (b) of this section for each such product being manufactured or sold on July 1, 1972. The information should be submitted by registered mail, return receipt requested, to the Assistant Director for Scientific Support, Attention: Label Project, Drug Enforcement Administration, Department of Justice, Washington, D.C. 28083, by August 31, 1972. In the case of new products manufactured after July 1, 1972, or new dosage forms or other unit forms manufactured after July 1, 1972, or changes in information submitted by August 31, 1972, the registrant shall submit the information regarding such item within 30 days after the date on which the manufacture commences or information change occurs. In the case of products, the manufacture of which is discontinued after July 1, 1972, the registrant shall submit notice of such discontinuance within 30 days after the date on which manufacture ceases. In the case of products the manufacture of which was discontinued before July 1, 1972, which are still being sold, the registrant shall submit a notice of such discontinuance with his initial submission.

(b) Two labels or other documents reflecting the following information shall be submitted with reference to each dosage form or other unit form of each item containing any quantity of any controlled substance:

(1) The trade name, brand name, or other commercial name of the product;

(2) The generic or chemical name and quantity of each active ingredient, including both controlled and noncontrolled substances (if any of this information is a proprietary trade secret, please indicate those portions);

(3) The National Drug Code Number assigned to the product, if any; and

(4) The weight (in metric measure) of each dosage unit or the weight (in metric measure) of the controlled substance per 100 grams of finished product for all items containing any quantity of any narcotic controlled substance in solid dosage forms.

SCHEDULES

§ 1308.11 Schedule I.

(a) Schedule I shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the DEA Controlled Substances Code Number set forth opposite it.

(b) Opiates. Unless specifically excepted or unless listed in another schedule, any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers, whenever the existence of such isomers, esters, ethers, salts is possible within the specific chemical designation:

(1) Acetylmethadol	9601
(2) Allylprodine	9602
(3) Alphacetylmethadol	9603
(4) Alphameprodine	9604
(5) Alphamethadol	9605
(6) Benzethidine	9606
(7) Betacetylmethadol	9607
(8) Betameprodine	9608
(9) Betamethadol	9609
(10) Betaprodine	9611
(11) Clonitazene	9612
(12) Dextromoramide	9613
(13) Diampromide	9615
(14) Diethylthiambutene	9616
(15) Dioxaphetyl butyrate	9168
(16) Dimenoxadol	9617
(17) Dimepheptanol	9618
(18) Dimethylthiambutene	9619
(19) Dioxaphetyl butyrate	9621
(20) Dipipanone	9622
(21) Ethylmethylthiambutene	9623
(22) Etonitazene	9624
(23) Etoxeridine	9625
(24) Furethidine	9626
(25) Hydroxypethidine	9627
(26) Ketobemidone	9628
(27) Levomoramide	9629
(28) Levophenacylmorphan	9631
(29) Morpheridine	9632
(30) Noracymethadol	9633
(31) Norlevorphanol	9634
(32) Normethadone	9635
(33) Norpipanone	9636
(34) Phenadoxone	9637
(35) Phenampromide	9638
(36) Phenomorphan	9647
(37) Phenoperidine	9641
(38) Piritramide	9642
(39) Proheptazine	9643
(40) Properidine	9644
(41) Propiram	9649
(42) Racemoramide	9645
(43) Trimeperidine	9646

(c) *Opium derivatives.* Unless specifically excepted or unless listed in another schedule, any of the following opium derivatives, its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Acetorphine	9319
(2) Acetyldihydrocodeine	9051
(3) Benzylmorphine	9052
(4) Codeine methylbromide	9070
(5) Codeine-N-Oxide	9053
(6) Cyprenorphine	9054
(7) Desomorphine	9055
(8) Dihydromorphine	9145
(9) Drotebanol	9335
(10) Etorphine (except hydrochloride salt)	9056
(11) Heroin	9200
(12) Hydromorphinol	9301
(13) Methyldesorphine	9302
(14) Methyldihydromorphine	9304
(15) Morphine methylbromide	9305
(16) Morphine methylsulfonate	9306
(17) Morphine-N-Oxide	9307
(18) Myrophine	9308
(19) Nicocodeine	9309
(20) Nicomorphine	9312
(21) Normorphine	9313
(22) Pholcodine	9314
(23) Thebacon	9315

(d) *Hallucinogenic substances.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation, which contains any quantity of the following hallucinogenic substances, or which contains any of its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation (for purposes of this paragraph only, the term "isomer" includes the optical, position and geometric isomers):

(1) 4-bromo-2,5-dimethoxy-amphetamine Some trade or other names: 4-bromo-2,5-dimethoxy-α-methylphenethylamine; 4-bromo-2,5-DMA	7391
(2) 2,5-dimethoxyamphetamine Some trade or other names: 2,5-dimethoxy-α-methylphenethylamine; 2,5-DMA	7396
(3) 4-methoxyamphetamine Some trade or other names: 4-methoxy-α-methylphenethylamine, paramethoxyamphetamine, PMA	7411
(4) 5-methoxy-3,4-methylenedioxy-amphetamine	7401
(5) 4-methyl-2,5-dimethoxy-amphetamine Some trade and other names: 4-methyl-2,5-dimethoxy-α-methylphenethylamine; "DOM"; and "STP"	7395

(8) 3,4 - methylenedioxy amphetamine 7400
(7) 3,4,5-trimethoxy amphetamine 7390
(8) Bufotenine 7433
Some trade and other names: 3 - (β - Dimethylaminoethyl)- 5 - hydroxyindole, 3-(2-dimethylaminoethyl) - 5 - indolol, *N, N* - dimethylserotonin, 5 - hydroxy - *N,N* - dimethyltryptamine, mappine.
(9) Diethyltryptamine 7434
Some trade and other names: *N,N*-Diethyltryptamine, DET.
(10) Dimethyltryptamine 7435
Some trade or other names: DMT.
(11) Ibogaine 7260
Some trade and other names: 7 - Ethyl - 6,6β,7,8,9,10,12,13 - octahydro - 2 - methoxy 6,9-methano-5H-pyrido [1', 2':1,2] azepino [5,4-b] indole; Tabernanthe iboga.
(12) Lysergic acid diethylamide 7315
(13) Marihuana 7360
(14) Mescaline 7381
(15) Peyote 7415
Meaning all parts of the plant presently classified botanically as *Lophophora williamsii Lemaire*, whether growing or not, the seeds thereof, any extract from any part of such plant, and every compound, manufacture, salts, derivative, mixture, or preparation of such plant, its seeds or extracts.

(Interprets 21 U.S.C. 812(c), Schedule I(c) (12))
(16) N-ethyl-3-piperidyl benzilate 7482
(17) N-methyl-3-piperidyl benzilate 7484
(18) Psilocybin 7437
(19) Psilocyn 7438
(20) Tetrahydrocannabinols 7370
Synthetic equivalents of the substances contained in the plant, or in the resinous extractives of *Cannabis*, sp. and/or synthetic substances, derivatives, and their isomers with similar chemical structure and pharmacological activity such as the following:
Δ1 cis or trans tetrahydrocannabinol, and their optical isomers
Δ6 cis or trans tetrahydrocannabinol, and their optical isomers
Δ3,4 cis or trans tetrahydrocannabinol, and its optical isomers
(Since nomenclature of these substances is not internationally standardized, compounds of these structures, regardless of numerical designation of atomic positions covered.)
(21) Ethylamine analog of phencyclidine 7455
Some trade or other names: N-ethyl-1-phenylcyclohexylamine), (1-phenylcyclohexyl)ethylamine, N-(1-phenylcyclohexyl)ethylamine, cyclohexamine, PCE.
(22) Pyrrolidine analog of phencyclidine 7458
Some trade or other names: 1-(1-phenylcyclohexyl) pyrrolidine, PCPy, PHP.
(23) Thiophene analog of phencyclidine 7470
Some trade or other names: 1-(1-(2-thienyl)-cyclohexyl) piperidine, 2-thienyl analog of phencyclidine, TPCP, TCP.

(c) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) mecloqualone 2572

[39 FR 22141, June 20, 1974, as amended at 40 FR 19613, May 7, 1975; 40 FR 28611, July 8, 1975; 41 FR 4016, Jan. 28, 1976; 41 FR 43401, Oct. 1, 1976; 42 FR 15679, Mar. 23, 1977; 43 FR 43295, Sept. 25, 1978]

§ 1308.12 Schedule II.

(a) Schedule II shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the Controlled Substances Code Number set forth opposite it.

(b) Substances, vegetable origin or chemical synthesis. Unless specifically excepted or unless listed in another schedule, any of the following substances whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(1) Opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

1 Raw opium 9600
2 Opium extracts 9610
3 Opium fluid extracts 9620
4 Powdered opium 9639
5 Granulated opium 9640
6 Tincture of opium 9630
7 Codeine 9050
8 Ethylmorphine 9190
9 Etorphine hydrochloride 9059
10 Hydrocodone 9193
11 Hydromorphone 9150
12 Metopon 9260
13 Morphine 9300
14 Oxycodone 9143
15 Oxymorphone 9652
16 Thebaine 9333

(2) Any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of the substances referred to in paragraph (b) (1) of this section, except that these substances shall not include the isoquinoline alkaloids of opium.

(3) Opium poppy and poppy straw.

(4) Coca leaves (9040) and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of these substances, except that the substances shall not include decocainized coca leaves or extraction of coca leaves, which extractions do not contain cocaine (9041) or ecgonine (9180).

(5) Concentrate of poppy straw (the crude extract of poppy straw in either liquid, solid or powder form which contains the phenanthrine alkaloids of the opium poppy), 9670.

(c) Opiates. Unless specifically excepted or unless in another schedule any of the following opiates, including its isomers, esters, ethers, salts and salts of isomers, esters and ethers whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation, dextrorphan excepted:

(1) Alphaprodine	9010
(2) Anileridine	9020
(3) Bezitramide	9800
(4) Dihydrocodeine	9120
(5) Diphenoxylate	9170
(6) Fentanyl	9801
(7) Isomethadone	9226
(8) Levomethorphan	9210
(9) Levorphanol	9220
(10) Metazocine	9240
(11) Methadone	9250
(12) Methadone-Intermediate, 4-cyano-2-dimethylamino-4,4-diphenyl butane	9254
(13) Moramide-Intermediate, 2-methyl-3-morpholino-1, 1-diphenylpropane-carboxylic acid	9802
(14) Pethidine (meperidine)	9230
(15) Pethidine-Intermediate-A, 4-cyano-1-methyl-4-phenylpiperidine	9232
(16) Pethidine-Intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate	9233
(17) Pethidine - Intermediate - C, 1-methyl- 4 - phenylpiperidine- 4 -carboxylic acid	9234
(18) Phenazocine	9715
(19) Piminodine	9730
(20) Racemethorphan	9732
(21) Racemorphan	9733

(d) *Stimulants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system:

(1) Amphetamine, its salts, optical isomers, and salts of its optical isomers	1100
(2) Methamphetamine, its salts, isomers, and salts of its isomers	1105
(3) Phenmetrazine and its salts	1631
(4) Methylphenidate	1724

(e) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Amobarbital	2125
(2) Methaqualone	2565
(3) Pentobarbital	2270
(4) Phencyclidine	7471
(5) Phencyclidine immediate precursors:	
(a) 1-phenylcyclohexylamine	7460
(b) 1-piperidinocyclohexanecarbonitrile(PCC)	8603
(6) Secobarbital	2315

[39 FR 22142, June 20, 1974, as amended at 40 FR 6780, Feb. 14, 1975; 40 FR 10456, Mar. 6, 1975; 41 FR 26568, June 28, 1976; 41 FR 43401, Oct. 1, 1976; 42 FR 15680, Mar. 23, 1977; 43 FR 21325, May 17, 1978]

§ 1308.13 Schedule III.

(a) Schedule III shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the DEA Controlled Substances Code Number set forth opposite it.

(b) *Stimulants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including its salts, isomers (whether optical, position, or geometric), and salts of such isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

40-051 O—79—7

(1) Those compounds, mixtures, or preparations in dosage unit form containing any stimulant substances listed in schedule II which compounds, mixtures, or preparations were listed on August 25, 1971, as excepted compounds under § 308.32, and any other drug of the quantitative composition shown in that list for those drugs or which is the same except that it contains a lesser quantity of controlled substances 1405
(2) Benzphetamine 1228
(3) Chlorphentermine 1645
(4) Clortermine 1647
(5) Mazindol 1605
(6) Phendimetrazine 1615

(c) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system:

(1) Any compound, mixture or preparation containing:
(i) Amobarbital 2125
(ii) Secobarbital 2315
(iii) Pentobarbital 2270

or any salt thereof and one or more other active medicinal ingredients which are not listed in any schedule.

(2) Any suppository dosage form containing:
(i) Amobarbital 2125
(ii) Secobarbital 2315
(iii) Pentobarbital 2270

or any salt of any of these drugs and approved by the Food and Drug Administration for marketing only as a suppository.

(3) Any substance which contains any quantity of a derivative of barbituric acid or any salt thereof 2100
(4) Chlorhexadol 2510
(5) Glutethimide 2550
(6) Lysergic acid 7300
(7) Lysergic acid amide 7310
(8) Methyprylon 2575
(9) Sulfondiethylmethane 2600
(10) Sulfonethylmethane 2605
(11) Sulfonmethane 2610

(d) Nalorphine 9400.

(e) *Narcotics drugs.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, or any salts thereof:

(1) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium 9803
(2) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, noncarcotic ingredients in recognized therapeutic amounts 9804
(3) Not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium 9805
(4) Not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts 9806
(5) Not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts 9807
(6) Not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9808
(7) Not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9809
(8) Not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9810

[39 FR 22142, June 20, 1974, as amended at 41 FR 43401, Oct. 1, 1976; 43 FR 3359, Jan. 25, 1978]

§ 1308.14 Schedule IV.

(a) Schedule IV shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the DEA Controlled Substances Code Number set forth opposite it.

(b) *Narcotic drugs.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, or any salts thereof:

(1) Not more than 1 milligram of difenoxin (DEA Drug Code No. 9618) and not less than 25 micrograms of atropine sulfate per dosage unit.

(c) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Barbital	2145
(2) Chloral betaine	2460
(3) Chloral hydrate	2465
(4) Chlordiazepoxide	2744
(5) Clonazepam	2737
(6) Clorazepate	2768
(7) Diazepam	2765
(8) Ethchlorvynol	2540
(9) Ethinamate	2545
(10) Flurazepam	2767
(11) Lorazepam	2885
(12) Mebutamate	2800
(13) Meprobamate	2820
(14) Methohexital	2264
(15) Methylphenobarbital (mephobarbital	2250
(16) Oxazepam	2835
(17) Paraldehyde	2585
(18) Petrichoral	2591
(19) Phenobarbital	2285
(20) Prazepam	2764

(d) *Fenfluramine.* Any material, compound, mixture, or preparation which contains any quantity of the following substances, including its salts, isomers (whether optical, position, or geometric), and salts of such isomers, whenever the existence of such salts, isomers, and salts of isomers is possible:

(1) Fenfluramine	1670

(e) *Stimulants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including its salts, isomers (whether optical, position, or geometric), and salts of such isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Diethylpropion	1610
(2) Phentermine	1640
(3) Pemoline (including organometallic complexes and chelates thereof)	1530

(f) *Other substances.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture or preparation which contains any quantity of the following substances, including its salts:

(1) Dextropropoxyphene (alpha - (+) - 4 - dimethylamino-1, 2 - diphenyl - 3 - methyl - 2 - propionoxybutane)	8121
(2) Pentazocine	9709

[39 FR 22143, June 20, 1974; 40 FR 4150, Jan. 28, 1975, as amended at 40 FR 24001, June 4, 1975; 41 FR 43402, Oct. 1, 1976; 41 FR 55176, Dec. 17, 1976; 42 FR 8636, Feb. 11, 1977; 42 FR 54546, Oct. 7, 1977; 43 FR 38383, Aug. 28, 1978; 44 FR 2170, Jan. 10, 1979]

§ 1308.15 Schedule V.

(a) Schedule V shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section.

(b) Narcotic drugs containing nonnarcotic active medicinal ingredients. Any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs or salts thereof, which shall include one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by the narcotic drug alone:

(1) Not more than 200 milligrams of codeine per 100 milliliters or per 100 grams.

(2) Not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams.

(3) Not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams.

(4) Not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit.

(5) Not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

(6) Not more than 0.5 milligram of difenoxin (DEA Drug Code No. 9618) and not less than 25 micrograms of atropine sulfate per dosage unit.

(c) Loperamide 8125.

[39 FR 22143, June 20, 1974, as amended at 42 FR 25499, May 18, 1977; 43 FR 38383, Aug. 28, 1978]

EXCLUDED NONNARCOTIC SUBSTANCES

§ 1308.21 Application for exclusion of a nonnarcotic substance.

(a) Any person seeking to have any nonnarcotic substance which may, under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301), be lawfully sold over the counter without a prescription, excluded from any schedule, pursuant to section 201(g) (1) of the Act (21 U.S.C. 811 (g) (1)), may apply to the Administrator, Drug Enforcement Administration, Department of Justice, Washington, D.C. 20537.

(b) An application for an exclusion under this section shall contain the following information:

(1) The name and address of the applicant;

(2) The name of the substance for which exclusion is sought; and

(3) The complete quantitative composition of the substance.

(c) Within a reasonable period of time after the receipt of an application for an exclusion under this section, the Administrator shall notify the applicant of his acceptance or nonacceptance of his application, and if not accepted, the reason therefore. The Administrator need not accept an application for filing if any of the requirements prescribed in paragraph (b) of this section is lacking or is not set forth as to be readily understood. If the applicant desires, he may amend the application to meet the requirements of paragraph (b) of this section. If the application is accepted for filing, the Administrator shall issue and publish in the FEDERAL REGISTER his order on the application, which shall include a reference to the legal authority under which the order is issued and the findings of fact and conclusions of law upon which the order is based. This order shall specify the date on which it shall take effect. The Administrator shall permit any interested person to file written comments on or objections to the order within 60 days of the date of publication of his order in the FEDERAL REGISTER. If any such comments or objections raise significant issues regarding any finding of fact or conclusion of law upon which the order is based, the Administrator shall immediately suspend the effectiveness of the order until he may reconsider the application in light of the comments and objections filed. Thereafter, the Administrator shall reinstate, revoke, or amend his original order as he determines appropriate.

(d) The Administrator may at any time revoke any exclusion granted pursuant to section 201(g) of the Act (21 U.S.C. 811(g)) by following the procedures set forth in paragraph (c) of this section for handling an application for an exclusion which has been accepted for filing.

§ 1308.22 Excluded substances.

The following nonnarcotic substances which may, under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301), be lawfully sold over the counter without a prescription, are excluded from all schedules pursuant to section 201(g) (1) of the Act (21 U.S.C. 811(g) (1)):

To: Representative Charlie Parr, Chairman
House Judiciary Committee
From: Margaret W. Berck, Administrative Assistant
House Judiciary Committee
Date: August 2, 1979

OVERVIEW OF HB 479

Introduction

Generally, the bill incorporates the basic principles established in the Federal Controlled Substances Act of 1970 and the Uniform Controlled Substances Act adopted for consideration by the various states by the Uniform Commissioners of State Laws. Similar drug legislation has been passed by some 44 states.

The basic goals and elements of this legislation are: (1) to list all the substances which require control and to divide them into several categories according to their dangers to society; (2) to establish a committee to factually determine the need for adjusting these schedules when, for example, new scientific information becomes available and/or new substances are discovered; (3) to provide the most serious penalties for illicit trafficking in drugs, particularly in connection with distribution to minors while classifying simple use possession of all substances as a misdemeanor; (4) closely regulate the legitimate drug industry to prevent diversion of controlled substances into illicit markets; and (5) promote research into drug issues in general and education of society on the dangers of drug abuse.

HB 479 differs from the federal and model state legislation in two primary respects. First, in determining the penalty to be given in either a possession or distribution offense, the quantity of the controlled substances involved is a decisive factor. The larger the amount possessed or distributed, the higher the penalty. In addition, the bill does not establish a separate offense for possession with intent to distribute. Because of difficulties of proof, the offense of intent to sell was eliminated in favor of establishing varying penalties based on the amount of the controlled substance possessed. Second, HB 479 sets out slang terms for included controlled substances to help lay persons understand the legislation. However, the use of slang terms has no effect on the prosecution of a particular drug offense. Another key feature of HB 479 is the fact that it ties its terminology and penalty system into the new criminal code.

Key Provisions

1. Controlled Substances Advisory Committee: HB 479 establishes a committee in the Department of Law with the [illegible] as Chairman. This provision follows

the federal law in which a similar committee is established in the U.S. Justice Department with the U.S. Attorney General serving as Chairman. Under HB 479, other members of the committee are the Commissioner of Public Safety, the Commissioner of Health and Social Services, a private pharmacist and a private criminal defense attorney, both of which are to be appointed by the governor.

Decisions of the committee are subject to close legislative scrutiny. Any regulation sought to be adopted by the committee would have to be submitted to the legislature which then would have 56 days to annul the proposed regulation through the passage of a bill. Without passage of a bill by both the House and Senate, the proposed regulation would become effective. However, once a proposed regulation was annuled by the legislature, the committee would be prohibited from raising the same issue again for three years. Finally, any change in the scheduling of controlled substances contained in the federal law would not automatically become law in the State of Alaska. In cases of changes in the federal schedules, the state advisory committee would have to hold hearings to determine whether a similar change would be appropriate for Alaska. And if the committee adopted the federal alteration, the proposed regulation would have to receive the same legislative oversight as outlined previously.

2. Criteria for Scheduling of Substances: HB 479 establishes six categories of controlled substances. These categories are enumerated as Schedule I through Schedule VI. Except for Schedule VI, which includes only marijuana, each schedule contains numerous substances. The most dangerous substances are contained in Schedule I, less dangerous substances are contained in Schedule II, and so on down to Schedule VI. The schedule assigned to a particular controlled substance is significant in determining the penalty for any drug offense. The higher the schedule, the greater the penalty.

Since future adjustments to the schedules are to be determined by the advisory committee with legislative oversight, HB 479 sets forth specific criteria for making such decisions. The bill specifies the "danger or probable danger" of any substances as the predominant criteria with a number of sub-criteria similar to but more inclusive than those in the uniform act. But unlike the uniform act, which follows a medical classification system HB 479 adopts a more simple public safety classification system much like the State of Hawaii.

Under this classification system, a separate schedule was created for marijuana. Such an approach was thought more logical than the five-schedule system utilized in the federal and uniform act, in which marijuana, heroin and LSD are contained in the same schedule because they lack any acceptable medical use. But because of this placement, both the federal and uniform acts must ultimately distinguish among the narcotic,

non-narcotic and hallucinogenic substances contained in the same schedule. However, in the public safety classification approach, the necessity of further classifying substances into such categories is avoided. Aside from these variations, the schedules provided in HB 479 are substantially the same as those established in the federal and uniform acts.

3. Offenses and Penalties: HB 479 establishes four basic drug offenses, including distribution of a controlled substance to a minor, manufacturing of a controlled substance, distribution of a controlled substance to an adult and possession of a controlled substance. Additionally, the bill creates certain other offenses such as possession of marijuana while operating a motor vehicle, maintaining a shop or airplane for use in drug trafficking and obtaining possession of a controlled substance by misrepresentation or fraud.

The most severe penalties contained in HB 479 would be levied against those over 18 years of age who distribute controlled substances to anyone under 18, reflecting society's special interest in protecting the young from those who encourage or induce them to experiment with drugs. In each category, the offense of distributing to a minor receives the most serious sanctions, except that the recipient must be at least three years younger than the distributor. The three-year difference was included to prevent imposition of stiffer penalties in a case where, for example, a 19-year-old college student gives marijuana cigarettes to his 17-year-old room-mate. In this situation, it was felt there was not the element of seduction so often found in cases where the distributor and recipient were far apart in age.

Both the federal law and the uniform act include the offense of manufacturing a controlled substance together with distribution and possession with intent to distribute a controlled substance for penalty purposes. Hence, the penalty is the same with regard to manufacturing or distributing a particular substance. However, HB 479 treats the manufacturing offense separately and subjects manufacturing to stiffer penalties because of the particular dangers associated with illicit drug laboratories and the substances involved. But in order to justify these heavier penalties, the offense of manufacturing set forth in HB 479 is limited to those who manufacture for other than their own personal use. The offense, however, does include cultivation of marijuana for other than personal use.

Under HB 479 the offenses of distribution to an adult and simple possession have varying penalties dependant upon the amount of the controlled substance involved in the offense. Current Alaska law, the Federal Controlled Substances Act, and the Uniform Act make no such differentiations. The approach taken in HB 479 attempts to provide some indicia of the defendant's role in the drug world. This approach permits more severe sanctions to be applied to the drug dealers involved in large scale trafficking operations. A similar

emphasis is also achieved by making simple possession of small amounts of each particular controlled substance a misdemeanor. Under both the Federal Controlled Substances Act and the Uniform Act, simple possession of any amount of a controlled substance is a misdemeanor. Unlike those acts, HB 479 establishes both felony and misdemeanor offenses for simple possession dependant upon the amount of the controlled substance involved in the offense.

4. Regulation of Legitimate Drug Industry: HB 479 requires the same reporting information by the drug industry as currently mandated by the federal law. Even though it was felt that the state has an interest in obtaining even more information, it was not believed necessary to demand additional reporting requirements. Under HB 479, reporting information must be submitted to the Commissioner of Health and Social Services. Existing Alaska law lodges regulatory responsibility with the Commissioner of Health and Social Services for depressant, hallucinogenic and stimulant drugs and gives the Board of Pharmacy responsibility for narcotic drugs. It was felt that this monitoring could more efficiently be done by one agency.

Dear Dr. Beirne,

I am writing to express my appreciation for the remarks you made to the legislature on HB-479. Your desire to include provisions for treatment and rehabilitation services to those incarcerated for drug related offenses in this bill has my full support.

An effective program of diagnosis, counseling and rehabilitation would provide a valuable supplement to the states effort to control the problems of drug abuse.

Sincerely,

Robert Buttcane

House Bill 479

I would like to begin by saying that House bill 479 is, in my opinion, a superior bill to the present legislation concerning drugs in this state. However being better does not make it perfect and I feel that there are ambiguities and inconsistencies and in my opinion outright mistakes in this bill. I will try to address these in the order they appear in the bill.

It is my understanding of the bill that the classification of drugs into sections 1-6 basically follows guidelines and standards set up by the Federal Government. However I feel that there is something inconsistent about classifying the compound T.H.C. as as schedule II substance and hashish as a schedule IV substance when marijuana is classified as a schedule VI substance. This apperas to be the only case in which the derivitives of a ~~drug~~ substance are classified as more dangerous than the ~~compound~~ substance they are derived from.

Also it would appear that marijuana is classed by itself as the least dangerous of classified substances. However I have with me an article which appeared in the Fairbanks Daily News Miner only tuesday of this week which indicates that in the minds of many of our countrys best medical people, marijuana may be much more dangerous that some people now contend. Wouldn't it be much better to classify it as a more dangerous drug until we know for sure? And at least as dangerous as T.H.C., the active compound found in marijuana?

Thirdly, while the stated goal of this bill is to provide more stringent penalties for distribution of drugs. It classifies distribution of small amounts of marijuana in the most common amount found in the distribution of this drug as only a class B misdemeaner essentially giving the common pusher a free hand.

Fourth, it is the stated purpose and accomplished fact of this bill to make possesion of small amount of any drug a misdemeanor. I don't think I need to remind our legislators of the effect the common possesion of drugs by large segments of a society has on the socicty as a whole. They need only look to countries where the possesion of drugs has been tolerated in the past to see this effect. Do we really wish this sort of thing on ourselves as a whole? At least when a substance is controlled its effects can be contained in a small segment of society.

This bill also makes it completely legal, as I read it, for a person to possess any amount of marijuana up to one pound. I don't know if Mr. Parr was aware of how much a pound of marijuana is when he wrote this bill, but it is my understanding that this is far more than what the average user of marijuana would consume in a month. Ladies and Gentlemen, few of us keep more food in our homes than we can consume in a month, yet this bill makes it legal to keep more of a drug classed as dangerous in our homes that would be consumed in a month. Does this seem resonable or responsible?

On the hunorous side, it might be noted that while this bill would make it legal to posses up to a pound of marijuana - if a person who did so owned a home where he kept said marijuana (section 17. 17. 380) makes owning that home a felony. Another inconsistency.

Sixth. This bill makes the possesion or use of any amount of marijuana while operating a vehicle illegal and this is good. However, I believe more strict penalties should be designated for this and it should at least carry the same mandatory sentencing as OMVI does.

Seventh. While this bill does make the public display or use of marijuana and the possesion of it by a minor illegal, in neither case does it classify the violation or provide a penalty for it. To me this is like telling your child not to do something but not punishing him when he does. Or perhaps a better illustration would be to compare it to Salt 2.

In conclusion let me reiterate that while we feel that this bill is better than the drug laws we have at present we still feel that if we are to prevent the moral degeneration of our society, we must have more stringent penalties for the possesion and distribution of all drugs.

Doctors debate marijuana dangers

By JANET STAIHAR
Associated Press Writer

WASHINGTON—People who smoke marijuana are endangering their brain, lungs and reproductive and immune systems, says a Columbia University medical professor. But a Harvard professor argues frequent marijuana use does not seriously damage the mind or body.

The two were appearing today before a Senate subcommittee, examining the health effects of marijuana.

The hearing of the Judiciary Committee's subcommittee on criminal justice was called by Sen. Charles McC. Mathias Jr., R-Md., who is re-evaluating his past support for a Senate move to lessen the criminal penalties for marijuana possession. A Mathias spokesman, asking not to be named, said the senator feels that in the past few years, there has been new medical evidence on marijuana's health hazards.

Dr. Gabriel G. Nahas, professor of anesthesiology at the Columbia University College of Physicians and Surgeons, said in prepared testimony that marijuana harms the brain, the reproductive system, the lungs and the body's immune system.

"In man, marijuana smoking decreases sperm production . . . and is associated with an increased incidence of abnormal forms of sperm," said Nahas.

"In women," he said, "marijuana smoking is associated with a higher incidence of shorter menstrual cycles . . . and a cycle without an ovum."

Nahas said children and teen-agers are the most vulnerable to marijuana's harmful effects because their brain and hormone system are still developing.

The Columbia doctor said at least five groups of people should be warned against using marijuana: people with lung or heart disorders, adolescents, women of child-bearing age, epileptics, and people with a tendency toward schizophrenia and mental illness.

But Dr. Lester Grinspoon, associate professor of psychiatry at Harvard Medical School, said, "The chronic use of marijuana does not do serious damage to the body or mind."

In prepared testimony, he said marijuana is "markedly safe" compared with alcohol and drugs. He also discounted reseachers who say it permanently alters the mind or personality.

The Senate will likely vote this year on an overall proposal to revise the federal criminal code, part of which contains a section softening the penalties for the possession of small amounts of marijuana.

Under current law, possession of small amounts of marijuana is punishable by up to a year in prison plus a $5,000 fine for the first offense. Subsequent offenses may bring up to two years in prison and a maximum $10,000 fine.

MRS. BUCHHOLDT/MR. CHATTERTON

I WAS THE THIRD FAIRBANKS PERSON TO TESTIFY AT THE HEARING TODAY, AND I MUST APOLOGIZE FOR MY INCOHERENT TESTIMONY. I'M NEW AT SPEAKING, BUT I WILL SOON BE BETTER.

THERE ARE SEVERAL PROVISIONS IN THIS BILL THAT I WOULD LIKE TO ADDRESS. FIRST, I DO NOT LIKE THE IDEA OF GRADUATING SENTENCES TO MATCH GROWING STOCKPILES OF DRUGS. IS IT REALLY RESPONSIBLE TO SAY THAT 'X' AMOUNT IS REAL BAD, BUT THAT 'Y' AMOUNT IS JUST BAD. YOU ARE DEALING WITH THE LIMITS A ILLEGAL OPERATION WILL OPERATE IN. THAT OPERATION WILL NOT CEASE, BUT WILL CHOOSE THE AVENUE OF LEAST RESISTANCE. I WOULD LIKE TO SEE THE SOURCE OF THE PRODUCT DRIED UP, WITHOUT TO MUCH HARM TO THE CONSUMER.

I RECOMMEND THAT THERE SHOULD LEGALLY BE TWO AMOUNTS ASSIGNED TO A GIVEN DRUG. ONE AMOUNT BEING DEFINED AS THE AMOUNT OF NORMAL CONSUMPTION AND THE OTHER BEING DEFINED AS ANY AMOUNT OVER THE PREVIOUS AMOUNT. A BY-PRODUCT OF THIS SYSTEM IS THE FACT THAT A PERSON WOULD NO LONGER HAVE TO PROVE INTENT TO SALE. A PERSON ARRESTED WITH ANY AMOUNT OVER THE AMOUNT OF CONSUMPTION WOULD BE GUILTY OF A CLASS C FELONY. WITH THE STIPULATION THAT THAT PERSON SERVE A MANDATORY FIVE YEARS. A PERSON ARRESTED WITH THE DEFINED AMOUNT OF CONSUMPTION WOULD RECEIVE A LIGHT SENTENCE, SAY A CLASS B MISDEMEANOR. A SECOND OFFENDER WOULD HAVE TO DEALT WITH HARSHER IN BOTH CASES. I REALIZE THAT THIS MAY SOUND SOMEWHAT HYPOCRITICAL IN VIEW OF THE ABOVE PARAGRAPH. BUT I DO NOT HONESTLY PERCEIVE OF A ORGANIZATION PUSHING A PRODUCT ONE OR TWO PILLS AT A TIME. HOPEFULLY, AS A BY-PRODUCT OF INCREASED RESTRICTIVENESS AND THE SLOWER TIME OF MOVEMENT FOR THE PRODUCT, THE COST WOULD ALSO RISE. THIS COULD FORCEFULLY ASSIST SOME OF OUR GOOD PEOPLE OUT OF THE DRUG CULTURE.

SECONDLY, I WOULD LIKE TO ADDRESS SEC. 17.17.200. THIS MINOR PROVISION IS DEFINITELY A PAPER TIGER. THIS BILL, UNDER SECTION 17.17.900 DEFINES A

OUR CURRENT DRUG PROBLEM COULD BE A BY-PRODUCT OF THE BIGGEST PROBLEM THAT OUR INCREASED TECHNOLOGY HAS GIVEN US....TIME.

IN CLOSING, LET US LOOK TO THE FUTURE. DOES NOT THE USE OF DRUGS TO ESCAPE REALITY REVEAL A DETERIORATION OF OUR SOCIETY. IS IT INDICATIVE OF A WEAKENING OF OUR NATIONS CHARACTER AND FORTITUDE, NOT ALONE TURNING AWAY FROM OUR CREATOR DRUG ABUSE IS NOT ENLIGHTENMENT, IT IS ESCAPISM. TO PUT IT IN PERPESTIVE, MY QUESTION IS, WHAT HAPPENS AFTER I EXERCISE MY RIGHT TO INGEST A DRUG? DO I STILL KNOW THE DISTINCTION BETWEEN GOOD AND EVIL NOW THAT MY JUDGEMENT IS IMPAIRED? AM I EVEN CAPABLE OF DETERMINING IF MY JUDGEMENT IS IMPAIRED? YET, IF I'M NOT CAPABLE OF REASON AND JUDGEMENT, THEN I'M NO LONGER SUPERIOR TO A COMMON ANIMAL. IN OUR HEARTS WE KNOW THE ANSWER.

THE LORD GAVE US A DECENT PLACE TO LIVE, LET US KEEP IT THAT WAY.

SINCERELY,

RIC L. ADAMS

415 LAKEVIEW TRAILER COURT
FAIRBANKS, ALASKA 99701
HOME PHONE #456-8078

THANKFULLY IT IS NOT NEEDED, THE OFFENSES ARE DEFINED BY THE AMOUNTS IN PREVIOUS PROVISIONS.

I DO HAVE TWO OTHER RECOMMENDATIONS: ONE; A RIDER, SIMILAR TO PRESENT FISH AND GAME REGULATIONS, BE INSERTED TO ALLOW FOR FORFEITURE OF PERSONAL PROPERTY THAT WAS USED WHILE ENGAGED IN ILLEGAL DRUG ACTIVITIES. TWO; A SECOND RIDER, SIMILAR TO SEC. 17.12.120, REHABILITATION, BUT REVISED TO ADDRESS ONLY ADDICTS SERVING THEIR DRUGS. THIS PROVISION SHOULD ALLOW FOR A MEDICALLY PROVEN ADDICT TO BE PUT IN THE CARE OF A DRUG REHABILITATION CENTER. UPON GRADUATION, SAID PERSON SHOULD BE REWARDED WITH THE ERASING OF THE RECORD OF THE ARREST THAT ORIGINALLY PUT HIM IN THE CENTER. THIS PERSON WOULD THEN HAVE THE HELP NEEDED TO BREAK HIS HABIT IF HE WANTED TO. IF NOT, SAID PERSON IS A THREAT AND SHOULD BE DEALT WITH ACCORDINGLY.

IN RETROSPECT LET ME SAY THAT WHEN I SPEAK OF DRUGS I INCLUDE MARIJUANA. I RECOGNIZE THAT GRASS IS THE LESSER OF THE EVILS. AT ONE TIME IN MY LIFE I SMOKED QUITE A BIT OF GRASS, AND PLAYED WITH OTHER DRUGS AS WELL. TO ANSER MR. CHATTERTON'S QUESTION, A OUNCE IS WHAT WE WOULD ALWAYS BUY FOR PERSONAL USE. WHEN WE WOULD GET LOW ON OUR SUPPLY WE WOULD BUY ANOTHER OUNCE, ECT.

THE BIGGEST EVIL IN MARIJUANA IS ITS WIDESPREAD ACCEPTANCE AND THE PROBLEMS OF ENFORCEMENT THAT ACCOMPANY THAT ACCEPTANCE. I BELIEVE THAT GRASS IN ITSELF IS NO GREAT DANGER, BUT IT PUTS YOU IN A ENVIRONMENT WITH DIFFERENT PEOPLE WHO COULD BE A DANGER TO YOU. MRS. JAN TAYLOR'S TESTIMONY ABOUT THE CHILD WHO HAD STARTED TO SMOKE GRASS AND THE RESULTING DROP IN HIS ACADEMIC ACHIEVEMENT, IS INDICATIVE OF WHAT I'M TRYING TO SAY. I DO NOT BELIEVE THAT THE GRASS ITSELF WAS THE CAUSE OF HIS LOWER SCORES, BUT THE ATTITUDE THAT COMES WITH THE DRUG. FOR LACK OF A BETTER DEFINITION, I WILL CALL IT A SEMI-REBELLIOUS, CARE-FREE ATTITUDE. THE SWORD OF PEER PRESSURE CUTS A BIG SWATH AMONG PEOPLE. PEOPLE DO NOT NEED GRASS AND IT SHOULD BE ABOLISHED.

MINOR AS A PERSON UNDER 18 YEARS OF AGE. WE CAN ALMOST REST EASY, KNOWING THAT A INTELLIGENT DISTRIBUTOR CAN FIND SOMEONE IN HIS SUB-CULTURE OF A AGE YOUNG ENOUGH TO NOT ONLY SUPERSEDE THIS PARER BARRIER, BUT TO DO IT LEGALLY. HERE AGAIN IS IT RESPONSIBLE TO SAY, (FOR EXAMPLE) THAT IT IS WRONG FOR A 30 YEAR OLD MAN TO SELL DRUGS TO A HIGH SCHOOL STUDENT. BUT THEN TURN A-ROUND AND ALLOW THIS SAME 30 YEAR OLD MAN DELEGATE HIS OBJECTIVE TO SOMEONE YOUNGER.

I HAVE A RECOMMENDATION, WE SHALL DRAW A LINE. FIRST, LET US REDEFINE THE AGE OF A MINOR. THIS NEW BRACKET WOULD BE "UNDER 19 YEARS OF AGE". HOPE-FULLY THIS WOULD PLACE ALL HIGH SCHOOL STUDENTS IN THE CATEGORY OF MINOR FOR THE CONSIDERATION OF THIS CHAPTER. NOW, ANY ADULT, SELLING TO ANY MINOR A CONTROLLED SUBSTANCE, WILL BE GUILTY OF A CLASS B FELONY. WITH A RIDER STIPULATING A MANDATORY 7 YEARS.

WE MUST REMEMBER THAT THE YOUTH MARKET IS A GROWING (sic) MARKET. HABITS AND PREFERENCES DEVELOPED NOW CAN LAST A LIFETIME. IT MUST BE STOPPED.

THIRD, I WOULD LIKE TO ADDRESS SEC. 17.17.400 OFFENSES DEFINED BY AMOUNTS. IN RESPECT TO THIS BILL, THIS PROVISION DEFINITELY NEEDS CLARIFICATION. YOU CANNOT PLEAD A LOWER CLASS OF OFFENSE THAN THAT OFFENSE WHICH IS ESTAB-LISHED BY THE EVIDENCE. BECAUSE IT IS THE EVIDENCE THAT ESTABLISHES THE OFFENSE, PERIOD. AND IN DIRECT REBUTTAL TO THE WORDING OF THAT SECTION, IF A LOWER CLASS OF OFFENSE IS ESTABLISHED BY THE EVIDENCE, THE AMOUNT IN QUESTION (READ EVIDENCE) CANNOT BE LARGER THAN THE AMOUNT WHICH WOULD MAKE THE OFFENSE A HIGHER CLASS OF OFFENSE, BECAUSE IT ESTABLISHED THE LOWER CLASS OF OFFENSE. (IN THE FIRST PLACE). I HAD THE HARDEST TIME TRYING TO LOGICALLY DECIPHER THIS PROVISION UNTIL I REALIZED THAT IT IS IMPOSSIBLE. THIS PROVISION MUST BE ABOLISHED, IF FOR NO OTHER REASON THAN THE CONFUSION IT WILL INITIATE.

MEMORANDUM

February 26, 1980

TO: Representative Thelma Buchholdt
Chairperson, HESS

Committee Members Munson, Hurlbert, Miles, Barnes, Beirne and Chatterton

FROM: Jan Erickson, Issues Analyst

RE: California Drug Laws
Research Request No. 47

Enclosed please find as requested a summary of the California drug laws (California Uniform Controlled Substances Act, Sections 11000 - 11835, with amendments). Schedules for the drugs as well as key definitions are included with the attached relevant statutes.

A summary of the 1972 act is also included for comparison with the amended version of 1977-78. The amendments significantly alter the earlier act insofar as penalties are often not specified, nor is there much distinction for repeat offenses. Additional minor amendments from 1979 are being sent from the California Attorney General's office. (A single reference copy of the Act and amendments has been placed with the staff for your use.)

If you should have any questions concerning these materials, please do not hesitate to contact me.

JE/bf
Encls.

CALIFORNIA UNIFORM CONTROLLED SUBSTANCES ACT

PENALTIES FOR CERTAIN OFFENSES*

Brief Summary

1. Unlawful Possession.

   A. Heroin -- (HS 11350) — Punishment by imprisonment, no specified terms. No distinction as to repeat offenders. Fine: up to $50,000.

   B. Cocaine -- (HS 11350) — Punishment by imprisonment, no specified terms. No distinction as to repeat offenses and penalties.

   C. Marijuana -- (HS 11357) — Possession of any amount of concentrated cannabis, not less than one year in county jail or $500 fine or both. Possession of less than 1 oz. of marijuana $500 fine and release, repeat offenders rehabilitated.

   D. Amphetamines -- (HS 11377) — Not more than 1 year county jail or state prison.

   E. Barbiturates -- (HS 11377) — Not more than 1 year county jail or in state prison.

2. Unlawful Possession for Sale.

   A. Heroin -- (HS 11351) — Punishment by imprisonment for 2, 3 or 4 years. No distinction for repeat offenses and specific penalties. Fine of up to $50,000.

   B. Cocaine -- (HS 11351) — Punishment by imprisonment for 2, 3, or 4 years. No distinction for repeat offenses.

   C. Marijuana -- (HS 11359) — Punished by imprisonment, no specified terms.

   D. Amphetamine -- (HS 11378) — Punishment by imprisonment, no specific terms.

   E. Barbiturate -- (HS 11378) — Punished by imprisonment, no specified terms.

3. Unlawful Transportation, Sale, Administration, etc.

   A. Heroin -- (HS 11352) — Punished by imprisonment for 3, 4, or 5 years. Fine of up to $50,000 imposed in addition.

   B. Cocaine -- (HS 11352) — Punishment by imprisonment for 3, 4, or 5 years.

   C. Marijuana -- (HS 11360) — Punishment by imprisonment for any amount 2, 3 or 4 years. Less than 1 oz. fine of $100 and released.

* In addition to terms of imprisonment, trial court may impose a fine up to $20,000 for each offense under Sections 11350, 11351, 11353, 11355, 11359, 11360, 11361.

3. Unlawful Transportation, Sale, Administration, etc. (Con't.)

D. Amphetamines -- (HS 11352) Same as barbiturates.

E. Barbiturates -- (HS 11379) Punishment by imprisonment 2, 3, or 4 years.

4. Adult Influence a Minor.

A. Heroin -- (HS 11353) Punishment by imprisonment, no specified terms.

B. Cocaine -- (HS 11353) Same as heroin.

C. Marijuana -- (HS 11361) Punishment by imprisonment for 3, 4, or 5 years.

D. Amphetamines -- (HS 11380) Punishment by imprisonment 3, 4, or 5 years.

E. Barbiturates -- (HS 11380) Punishment by imprisonment 3, 4, or 5 years.

5. Miscellaneous.

Minor Influence a Minor -- (HS 11354) Punishment by imprisonment - no specified terms. (Jurisdiction maintained in juvenile court.)

Paraphernalia -- (HS 11364) Unlawful to possess instrument, paraphernalia, etc. for injection or smoking substances. No penalty prescribed.

Education -- (HS 11376) Trial court shall as condition of probation for anyone convicted of possession of controlled substance, Sched. I & II, order education or treatment. In case of juveniles, parents or guardians to participate.

Unlawful Presence -- (HS 11365) Unlawful to visit or be present in any room where any controlled substance or narcotic drugs are being unlawfully smoked or used. No penalty specified.

(1972 Act below, significantly modified in 1977)

CALIFORNIA UNIFORM CONTROLLED SUBSTANCES ACT

PENALTIES FOR CERTAIN OFFENSES*

Brief Summary

1. Unlawful Possession.

A. Heroin -- (HS 11350)	First: 2-10, elig. parole/release after 2 yrs. Second: 5-20, elig. parole/release after 5 yrs. Third or more: 15-life, elig. parole after 15 yrs.
B. Cocaine -- (HS 11350)	First: 5-15, elig. parole/release after 2½ yrs. Second: not less than 10, elig. parole/release 6 yrs Third or more: not less than 15 yrs., elig. parole/release after 15 yrs.
C. Marijuana -- (HS 11357)	First: Possession of any amount, not less than 1 yr. in county jail or more than 10 in state prison. Second: 2-20 , elig. parole/release after 2 yrs. Third or more: 5-life, elig. parole/release 5 yrs.
D. Amphetamines-- (HS 11377)	First: Not more than 1 yr., county jail, to 10 yrs. state prison. Second: 2-20, elig. parole/release after 5 yrs.
E. Barbiturates -- (HS 11377)	First: Not more than 1 yr. county jail, to 10 yrs. in state prison. Second: 2-20, elig. parole /release after 2 yrs.

2. Unlawful Possession for Sale.

A. Heroin -- (HS 11351)	First: 5-15, elig. parole /release after 2½ yrs. Second: not less than 10, elig. parole /rel. 6 yrs. Third or more: not less than 15 yrs., elig. parole /release after 15 yrs.
B. Cocaine -- (HS 11351)	Same as heroine.
C. Marijuana -- (HS 11359)	First: 2-10, elig. parole/release after 2 yrs.. Second:5-15, elig. parole/release after 3 yrs. Third or more: 10-life, elig. parole/release 6 yrs
D. Amphetamine -- (HS 11378)	Same as barbiturates.
E. Barbiturate -- (HS 11378)	First: 2-10, elig. parole / release after 2 yrs. Second: 5-15, elig. parole /release after 3 yrs. Third or more: 10-life, parole /release after 6 yrs

3. Unlawful transportation, sale, administration, etc.

A. Heroin -- (HS 11352)	First: 5-life, elig. parole/release after 3 yrs. Second: 10-life, elig. parole/release after 10 yrs Third or more: 15-life, elig. parole/release 15 yr
B. Cocaine (HS 11352)	Same as heroin.

*In addition to terms of imprisonment, trial court may impose a fine up to $20,000 for each offense under Sections 11350, 11351, 11353, 11355, 11359, 11360, 11361.

3. Unlawful transportation, sale, administration, etc. (Con't.)

C. Marijuana -- (HS 11360)	First: 5-life, elig. parole/release after 3 yrs. Second: 5-life, elig. parole/release after 5 yrs. Third or more: 10-life, elig. parole/release after 10 yrs.
D. Amphetamines -- (HS 11352)	Same as barbiturates.
E. Barbiturates -- (HS 11379)	First: 5-life, elig. parole/release after 3 yrs. Second: 5-life, elig. parole/release after 5 yrs. Third or more: 10-life, elig. parole/release after 10 yrs.

4. Adult Influence a Minor.

A. Heroine -- (HS 11353)	First: 10-life, elig. parole/release after 5 yrs. Second: 10-life, elig. parole/release after 10 yrs. Third or more: 15-life, elig. parole/release after 15 yrs.
B. Cocaine -- (HS 11353)	Same as heroin.
C. Marijuana -- (HS 11361)	First: 10-life, elig. parole/release after 5 yrs. Second: 10-life, elig. parole/release after 10 yrs. Third or more: 15-life, elig. parole/release after 15 yrs.
D. Amphetamines -- (HS 11380)	First: 10-life, elig. parole/release after 5 yrs. Second: 10-life, elig. parole/release after 10 yrs. Third or more: 15-life, elig. parole/release after 15 yrs.
E. Barbiturates -- (HS 11380)	First: 10-life, elig. parole/release after 5 yrs. Second: 10-life, elig. parole/release after 10 yrs. Third or more: 15-life, elig. parole/release after 15 yrs.

5. Miscellaneous.

Minor Influence A Minor--

Specified controlled Substances and Narcotic Drugs (HS11354)	First: Not less than 5 yrs. Second: Not less than 10 yrs. (Jurisdiction maintained in juvenile court.)
Paraphernalia -- (HS 11364)	Unlawful to possess instrument, paraphernalia, etc. for injection or smoking substances. No penalty prescribed.
Education -- (HS 11376)	Trial court shall as condition of probation for anyone convicted of possession of controlled substance, Sched. I & II, order education or treatment. In case of juveniles, parents or guardians to participate.
Unlawful Presence -- (HS 11365)	Unlawful to visit or be present in any room where any controlled substance or narcotic drugs are being unlawfully smoked or used. No penalty specified.

HOUSE BILL 479 REVISION STATE DRUG LAWS

The advisory committee is composed of five members. I suggest two additional members for better representation: #6 Physician Appointed by Govenor

#7 Citizen Appointed by Govenor

The majority of the Committee have special expertise in dealing with drugs. A public member would insure an opportunity for Citizen participation.

We cannot understand what the author had in mind when he wrote this bill. It's okay for adults to have a pound of marijuana and children cannot. If this bill passes, it tells children it's alright for parents to sneak out and find his pusher, obtain at least a pound of marijuana, then sneak home again and then the parent is legal. Again it's obvious misinterpretation by young people. One ounce of marijuana will provide 40 to 50 marijuana cigarettes.

This bill makes possession of one fourth ounce of cocaine a misdemeanor. I can not believe anyone would give a serious thought to passing a law like this. We have had two suicides of 17 and 18 year olds, cocaine connected. Cocaine should continue to be a felony.

We feel the penalties in this bill changed on each classification from the criminal code detracts and will continue to be confusing. We also feel when a person is convicted of a drug related arrest of furnishing, they should not be able to bail out of jail.

The Citizens of Kodiak feel the intent of a drug bill should discourage narcotics trafficking. Therefore, we recommend you do not pass House Bill No. 479.

I sincerely believe if you give a pass on House Bill No. 479 you will set a course that will profoundly affect the quality of life for hundreds of your fellow Alaskans.

Commissioner Nicke testimony on HB479 Dept of Public Safety

I appreciate the opportunity to give testimony before this Committee concerning the importance of revising the State's Drug Laws.

Our Department's statutory responsibilities deal primarily with the enforcement activity of Legislation passed by you. My testimony today is directed at that aspect of HB 479.

I am very encouraged at this Bills attempt to modernize Alaska's Drug Laws. The consolidation of existing laws and tying those into the sentencing structure of the new Criminal Code are major steps in discouraging illicit drug trafficking and the use of drugs. There has obviously been a great deal of work and expertise in developing this bill.

There are certain provisions on HB 479 that I would like to address from strictly a law enforcement view.

In HB 479 the responsibility for scheduling/rescheduling controlled substances is vested in a controlled substances committee.

The criteria whether a drug should be controlled basically follows the Federal Controlled Substances Act, which I feel could be greatly improved upon if additional criteria were added. Such as, the relationship between the use of the substance and other criminal activity including:

Whether a persons ingaged in illicit trafficking are also engaged in other criminal activities.

Whether the nature of the relative profitability of the substance encourages illicit trafficking in the substance.

Whether the commission of other crimes is one of the effects of the use of the substance.

Whether addiction to the substance relates to the commission of other crimes related to the continued use of the substance.

We feel strongly that this additional criteria should be used in controlling and scheduling drugs. Where drugs are placed on the schedule which ties them to the sentencing scheme, directly affects the use and trafficking of drugs.

There is a direct relationship between use, abuse, and other criminal activities. For instance, as the popularity of cocaine as a recreational drug increased so did our homicide rate. From 1976 through 1979 we are aware of 29 homicide cases in Alaska, directly related to drug trafficking with cocaine being the primary drug involved.

The penalty provisions of the Bill appear reasonable. However, I am concerned with the manner in which possession of specific amounts are tied to the penalty provisions.

In the Bill it refers to exact amounts, be it in the form of capsules, tablets, syrettes, or bulk. But as I read the Bill it does not address the size of the container, or the purity of the substance. This raises

some very interesting problems in prosecuting defendants, which will be addressed by the Department of Law. It raises some serious problems for the enforcement person, such as, field testing for small amounts, expending our limited resources on apprehending drug traffickers where there are only trace amounts involved. Such as, the State vs. Davis Stone. Case

HB 479 makes the possession of 0 to ~~29~~ 25 capsules, etc. or 1/8th or less of an ounce of heroin a misdemeanor. If the contents of the 25 capsules is more than 1/8th of an ounce, is it still a misdemeanor? 1/8th of an ounce of pure herion would produce approximately 1/2 pound of heroin for street use, worth between 36/40 K. Another example is cocaine, 1/4 oz. of pure coke in possession would produce 1 oz. for street use or 28 slips or approximately 56 hits. In the past, we have found that persons trafficking drugs are as versed in the law as we are, and will adjust their business accordingly. So, may I suggest that we will seldom find a vendor with more than enough in their possession, at first blush anyway, to warrant a felony charge. I believe the same holds true for any substance contained in Schedule I or II as presently written in HB 479.

In summary, I would like to again express my thoughts, or concern if you will, over certain provisions in HB 479.

1. The criteria for deciding whether a drug should be controlled and the criteria for deciding in which Schedule a drug should be classified should include factors concerning the relationship between use of the drug and other criminal activities.
2. The association between penalties and specific amounts of controlled substances listed in Schedule I and II creates serious if not

insurmountable problems for law enforcement.

I would like to mention that Governor Hammond will introduce to this Legislature a Drug Bill which addresses the concerns expressed by me today.

AKEELA HOUSE

January 25, 1990

Thelma Buchholdt, Chairman
House H.E.S.S. Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Chairman Buchholdt and other Committee members;

In regard to HB 479, you have already heard from AKEELA HOUSE via teleconference public testimony. This letter reiterates the basic points which we wished to make at that time:

1.) Sec. 17.17.010 outlines the creation and composition of a Controlled Substances Advisory Committee. It is our belief that this Committee should include an expert in the field of addiction rehabilitation, someone with a professional background and a successful track record in getting criminal abusers back into society as law-abiding citizens. The occupational history of this person might include counseling, psychology, or administrative work in such a program. Such a person could assist the Committee in determining the association between specific drugs, use and abuse patterns, and criminal or anti-social behavior, as well as the general mechanics of the considerations spelled out in Sec. 17.17.020 (c).

2.) Sec. 17.17.020 (e) states that the Controlled Substances Advisory Committee has no jurisdiction over alcohol. It is our hope that this provision will be given careful reconsideration by you. There is no question that alcohol is Alaska's most serious drug problem and that tighter controls on alcohol as a substance should be investigated. The physical, psychological, and social damage resulting from alcohol is many times greater than all other controlled substances combined. The situation, if left unaddressed, is especially dangerous for our native populations; the latest statistics strongly indicate that our native people will join the ranks of the Mandans and other extinct groups of indigenous Americans if measures are not taken, soon, to reverse the trend of alcoholism, alcohol-related deaths, and infant alcohol syndrome.

3.) Sec. 17.17.780 refers to education. We ask the Committee to consider strengthening this section to include <u>rehabilitation</u> as an alternative to or in addition to use-related incarceration and fines. We respectfully remind the Committee of the success rate of our kind

(Continued)

P. O. Box 8-9049 / Anchorage, Alaska 99508
Residential (907) 272-4476 / Outpatient (907) 276-1276

of program (@ 60%) versus the success rate of the corrections system (@ 20-30%), as well as the cost difference between our program and the prisons. We believe that the taxpayer realizes a more efficient use of public monies and a more crime-free society over all when every option and avenue of genuine rehabilitation is utilized.

Also, puruant to a request by members of your committee, AKEELA HOUSE staff has obtained copies of SB 65 and HB 101, and reviewed these bills. Our observations are:

1.) That HB 479 evidences greater care in preparation, pharmacology, and ascertaining the sociological implications of substance abuse. The language of this bill, also, is easier for the layman to understand.

2.) SB 65 and HB 101--the two are for all practical purposes identical--make no reference to rehabilitation or education and do not provide for an advisory board to respond to new developments such as: the discovery and entry into the market of new substances, new research data about existing substances, or ongoing social realities of substance use/abuse. These bills appear to have been written to address the concerns only of some law enforcement personnel without considering the impact and implications to the social order as a whole; and because of the complexity of language, these bills present a greater risk of being disproportionately applied to less advantaged members of the Alaskan population than does HB 479.

3.) The difference in penalties dictated between the various bills will probably have no impact on the problem of substance abuse as it currently exists. No evidence exists to suggest that the degree of punishment has any measurable impact on illicit use of controlled substances.

We appreciate being given the chance to present our views to the Committee. If you would like us to make any further comments, we will be glad to do so.

Yours for a drug-free lifestyle,

Sincerely,

J. C. Joe DiMatteo

MEMORANDUM January 28, 1980

TO: Representative Charles Parr

FROM: Jack Fargnoli, Issues Analyst
House Research Agency

RE: Research Request No. 23
(Drug Possession and Sales: Hawaii)

Prosecutor Lee Nakamura of the Prosecutor's Office, Department of the Attorney General in Honolulu, confirmed in a January 25 telephone conversation that the purity or concentration of controlled substances is not addressed specifically in Hawaii statutes and that, further, it is not considered as a factor in enforcement or in judicial proceedings. The purity or concentration of a drug is not used as the basis for determining the "amount" of a drug held in possession, as described in the Hawaii statutes; nor is it used as a basis in decisions to prosecute or in setting criminal sentences. However, occasionally a decision not to proceed with prosecution is reached in cases where extremely small, i.e., "trace," amounts of a controlled substance have been found in a mixture.

Mr. Nakamura informed us that all decisions to prosecute in Hawaii drug cases are made on a case by case basis, and that to date the question of drug purity has not produced any problems (or even been raised as an issue) in the federal courts. Should the courts object in the future, he said, adjustments would be made in the statutes; he did not view this as likely to occur, however.

Please let us know if you have any additional questions.

RE: HOUSE JUDICIARY COMMITTEE DATA REQUEST

This memo is in response to the House Judiciary Committee's request of October, 1979 for empirical information regarding drug offenses. The data upon which this analysis is predicated consists of 1901 felony convictions rendered in all ten Superior Court locations from July, 1976 to July, 1979. The first part of the analysis concerns the relationship of drug and alcohol use to crime. The request deals in part with the use of cocaine in relation to other criminal behavior. Unfortunately, our data sources (including court case files and presentence reports) did not include systematic information concerning the specific type of past drug use. We do have general information, however, concerning drug and/or alcohol addiction and heavy drug use. The analysis here presented should facilitate some understanding of the relationship of drug/alcohol use and crime. The request also concerned the relationship between the use of one drug, particularly marijuana, and other drugs. Again, our data is not amenable to this issue.

The second part of this analysis concerns the range of drug quantities typically involved in sale and possession offenses and corresponding penalties.

I. RELATIONSHIP OF DRUG AND ALCOHOL USE TO CRIME

Our new felony sentencing data contains information from presentence reports about drug and alcohol use. The information includes (1) indications of past (or ongoing) drug and/or alcohol addiction, (2) drug and/or alcohol use at the time of the offense, and (3) the defendant's record of previous (or current) treatment for drug and/or alcohol problems.

Table I, below, indicates that a significant positive relationship exists between drug or alcohol addiction and severity of the defendant's prior record. Specifically, those defendants identified by the presentence reporter as having had alcohol or drug problems also had substantially more serious criminal histories than those without such problems.

TABLE I

Severity of Prior Record By Drug/Alcohol Addiction (N=1669) *

	Drug Addiction History	Alcohol Addiction History	Neither
No Prior Record	12.8%	14.0%	49.6%
Misdem. Only	37.6%	52.0%	30.7%
One Prior Felony	25.2%	21.1%	13.7%
Two/More Felonies	24.3%	12.9%	6.1%
	100.0% (218)	100.0% (450)	100.0% (1001)

Significant at .001

*(There were 232 cases for which information of past drug/alcohol use was unavailable.)

The above contingency distributions indicate that defendants with no histories of drug or alcohol problems were four times more likely to have been first offenders than those with a history of drug/alcohol abuse. Nearly half of those with no histories of substance abuse were first offenders, compared to 12.8% and 14.0%, respectively, for those with drug and alcohol problems. At the other end of the scale, those with a drug or alcohol problem were substantially more likely to have prior felony convictions than those with no such history. These observed differences are statistically significant at the .001 level which means that there is only one chance in a thousand that the differences were due to chance.

Table I represents the overall relationship between prior record and drug/alcohol use for all defendants without regard to the type (or class) of their offense. Table A, in the appendix to this memorandum sets forth the relationship between these two variables for each of five broad classes of offense--violent felonies, property felonies (burglary, larceny, etc.), frauds/forgeries/embezzlements, drug crimes, and "morals" offenses. An examination of these tables reveals that the relationship observed in Table I persists among all offense classes.

As noted above, our data also includes information on drug or alcohol use at the time of the offense. Table II, below, indicates the proportion of cases in which the defendant was reported to have used drugs, drugs in combination with alcohol, or alcohol alone at the time of his offense, for each of four classes of offenses (drug offenses are eliminated from this aspect of the analysis).

TABLE II

Frequency of Use of Drugs and Alcohol
At Time of Offense for Four Offense Classes*

	Total Cases	Used Drugs	Used Drugs & Alcohol	Used Alcohol
Violent Offenses	(N=586)	3.2% (19)	4.9% (29)	56.3% (330)
Property Offenses	N=729)	4.0% (29)	4.4% (32)	39.2% (286)
Forgery/Fraud Offenses	(N=264)	2.7% (7)	0.8% (2)	9.1% (24)
"Morals" Offenses	(N=91)	1.1% (1)	9.9% (9)	46.2% (42)

* (Percents indicate proportion of all cases within class.)

Table II shows that alcohol use is much more often associated with criminal behavior than is drug use. The magnitude of alcohol use is staggering in comparison with drugs. It should be mentioned, however, that the relative difficulty in detecting drug intoxication as compared with alcohol use probably accounts for at least a portion of the difference.

II. DRUG QUANTITIES AND SENTENCES FOR SALE AND POSSESSION

Table III, below, reflects a distribution of drug types and amounts for possession and sale offenses. The proportion of cases within each amount-group receiving probation (or no active jail sentence) and the corresponding mean sentence (computed only for those with an active sentence) is also included.

TABLE III

Quantities and Sentences for
Possession and Sale Offense Convictions

	N of Cases	Proportion Probation	Mean* Sentence (In Months)	
I. POSSESSION OF NARCOTIC				
TYPE AND AMOUNT OF DRUG:				
Cocaine - Less than 1 gm.	15	53.3%	3.24	(7)
- 1 to 14 gms.	12	75.0%	15.00	(3)
- Over 14 gms.	7	57.1%	24.08	(3)
Heroin - Less than 1 gm.	6	33.3%	24.75	(4)
- 1 to 7 gms.	6	33.3%	54.00	(4)
- Over 7 gms.	5	20.0%	124.50	(4)
	N=51			
II. SALE OF NARCOTIC				
TYPE AND AMOUNT OF DRUG:				
Cocaine - Less than 1 gm.	11	36.4%	8.34	(7)
- 1 to 14 gms.	40	40.0%	26.58	(24)
- Over 14 gms.	10	20.0%	39.85	(8)
Heroin - Less than 1 gm.	2	0.0%	30.00	(2)
- 1 to 14 gms.	9	33.3%	46.00	(6)
- Over 14 gms.	4	25.0%	24.00	(3)
	N=76			
III. POSSESSION SALE HDS **				
TYPE AND AMOUNT OF DRUG:				
Cocaine - Over 14 gms.	(1)	0.0%	36.00	(1)
Marijuana - Over 2 #s	(10)	50.0%	16.80	(5)
	N=11			

TABLE III (CON'T)

IV. SALE OF HDS

	N of Cases	Proportion Probation	Mean* Sentence (In Months)
TYPE AND AMOUNT OF DRUG:			
Marijuana - Less than 2 oz.	4	0.0%	15.25 (4)
- 2 oz. to 2 #	8	87.5%	48.00 (1)
- Over 2 #	6	33.3%	34.00 (4)
Amph-Barb.- Less than 100	2	0.0%	7.00 (2)

- Over 1000	1	0.0%	1.00 (1)
Hallu-			
cinogens - Less than 20	7	57.1%	6.11 (3)
- 20 - 99	--	--	--
- Over 100	1	0.0%	12.00 (1)
	N=30		

* Mean sentences calculated excluding straight probation, or no time to serve.
** Three cases involving amphetamines or hallucinogens not included.

According to Table III, of N=51 convictions for Possession of a Narcotic (A.S. 17.10.200), 15 involved less than 1 gram of cocaine. Of these 15 cases, 53.3% received straight probation (or no active jail sentence). The mean sentence for the 7 defendants actually sentenced to jail time was 3.24 months.

Among narcotic offenses, cases involving heroin generally received longer (mean) sentences and were less likely to receive probation than those involving cocaine. Offenses involving cocaine received more severe penalties when the conviction was for sale rather than possession.

The opposite was true for heroin: possession offenses were sentenced more severely than sale offenses. This was especially surprising because often the amounts of heroin possessed were equal to or smaller than the amounts sold, but the sentences imposed were still longer.

Pouch V
State Capitol
Juneau, Alaska 99811

M E M O R A N D U M February 28, 1980

TO: Charlie Parr, Chairman, House Judiciary Committee

FROM: Margaret W. Berck, Staff

SUBJECT: Sectional Analysis of HB 479

I. STANDARDS AND PROCEDURES.

*Section 1

Sec. 17.17.010. This section establishes a Controlled Substances Advisory Committee in the Department of Law. The members of the Committee are the Attorney General, Commissioners of Health and Social Services and Public Safety, a pharmacist and a criminal defense attorney. The latter two members are appointed by the Governor. All members serve without pay, but are entitled to travel expenses and per diem.

Sec. 17.17.020. This section defines the authority of the Controlled Substances Advisory Committee. The Committee is empowered to add, delete or re-schedule substances. All such actions must be adopted under the Administrative Procedures Act and in accord with the "public safety" criteria contained in this section. Should there be a change in the Federal schedules, the Committee is required to consider a similar change to Alaska law. The Committee is free to determine that such a Federal change is not warranted in Alaska, but must report such a decision, together with findings of fact, to the Lieutenant Governor.

Decisions by the Committee have no legal effect until the Legislature is given an opportunity to review them. Committee decisions must be submitted to the Legislature within the first 10 days of a session. The Legislature must act by the 56th day of the session if it wants to annul a proposal. All legislative annulments must take place in the form of a bill. Should the Legislature reject a proposal by

the Committee, the Committee cannot re-assert such a proposal to the Legislature for three years.

The Committee has no authority over tobacco or alcohol.

Sec. 17.17.030. This section provides that the inclusion of slang terms for drugs to assist the layperson in identifying controlled substances, has no bearing or effect in a criminal prosecution.

Sec. 17.17.040 - Sec. 17.17.090. These sections establish six schedules of controlled substances. The most dangerous substances are contained in Schedule I, while the least dangerous, marijuana, is contained in Schedule VI.

II. OFFENSES AND PENALTIES.

Sec. 17.17.200. This section creates a criminal offense and provides penalties for distributing a controlled substance to a minor. Although the penalties vary depending upon the schedule classification of the particular controlled substance distributed, all violations of this section would constitute a felony.

This section is designed to impose stiffer penalties on those persons over 18 years of age who distribute controlled substances to persons under 18 years of age. However, the recipient must be at least three years younger than the distributor before this section comes into effect. If the three-year age differential does not exist, the distributor would be subject to prosecution under the general distribution offenses.

This scheme was taken from the Uniform Controlled Substances Act and their rationale is as follows: "The three-year age differential is included to prevent imposition of the stiffer penalties in a case such as where a 19-year-old college student distributes two or three marijuana cigarettes to his 17-year-old roommate. In this situation, there is not the element of seduction so often found in cases where the distributor and recipient are far apart in age."

Sec. 17.17.210. This section creates a criminal offense and provides penalties for manufacturing a controlled substance. Although the penalties vary depending upon the schedule classification of the particular controlled substance manufactured, all violations of this section would constitute a felony. The definition of "manufacture" (Sec. 17.17.900(14))

includes propagation of certain of the substances, such as marijuana. In order to comply with the Alaska Constitution as interpreted in Ravin, and in order to justify the stiffer penalties for this offense, the definition of "manufacture" excludes manufacturing for personal use. A person manufacturing controlled substances for his personal use would be subject to prosecution under possession offenses.

Sec. 17.17.220 - Sec. 17.17.270. These sections create a criminal offense and provide penalties for distributing a controlled substance. Separate sections are provided for each schedule classification. Penalties vary depending upon the schedule classification and the amount involved. Despite penalty variations, distribution of any amount of a Schedule I, II, III, or IV substance would constitute a felony offense. Distributions of small amounts of a Schedule V or a Schedule VI substance would constitute a Class A misdemeanor. Furthermore, a "non-remuneration defense" is provided for the distribution of an ounce or less of a Schedule VI substance (marijuana). If the distributor is successful in providing that such a distribution was made for no remuneration to a person 18 years of age or older, the penalty is reduced from a Class A misdemeanor to a Class B misdemeanor. This provision is compatible with Federal law which provides that a person who distributes a small amount of marijuana for no remuneration is guilty of a misdemeanor rather than a felony. (21 USCA 841) Furthermore under Federal law (21 USCA 844), if such a person has never been previously convicted of a drug offense, the court may place the person on probation and subsequently dismiss the criminal charge against the person if he does not violate his parole. Under this Federal provision, the person would not acquire a criminal record.

Sec. 17.17.280 - Sec. 17.17.330. These sections create a criminal offense and provide penalties for possessing a controlled substance. Separate sections are provided for each schedule classification. Penalties vary depending upon the schedule classification and the amount involved. Possession of small amounts of any substance would constitute a Class A misdemeanor. This provision is compatible with Federal law which establishes misdemeanor penalties for simple possession of any controlled substance. Unlike the Federal law, however, HB 479 would establish felony offenses for the possession of large amounts of any controlled substance. This scheme was adopted in HB 479, in order to facilitate the capture of drug dealers who are not caught in the act of distribution. Traditionally, these individuals have been prosecuted under a "possession with intent to sell" offense. But due to the difficulties in prosecuting "intent to sell"

offenses, HB 479 eliminates that type of offense and looks strictly to the amount possessed in determining appropriate penalties.

In order to comply with the Alaska Constitution as interpreted in Raven, possession of less than a pound of marijuana by an adult would not constitute a criminal offense.

Sec. 17.17.340. This section makes it a Class B misdemeanor to possess any amount of marijuana in your immediate control while operating a motor vehicle, vessel, or aircraft. Under existing law, the maximum punishment for this type of offense is a $1,000 fine. Under HB 479 an offender is subject to a 90 day jail sentence, or a $1,000 fine, or both.

Sec. 17.17.350. This section makes it a violation (a fine of up to $300) to display or use any amount of marijuana in a public place.

Sec. 17.17.360. This section makes it unlawful for a minor to possess any amount of marijuana. A minor who violates this section is guilty of a violation.

Sec. 17.17.370. This section is directed at the legitimate drug industry. It makes it a Class B misdemeanor for a person to refuse or fail to make or keep all records required by this Act.

Sec. 17.17.380. This section also is directed at the legitimate drug industry. It makes it a Class C felony to do any of the following: (1) to keep or maintain any structure for storing or selling controlled substances in violation of this Act; (2) to use a registration number that is ficticious, revoked or suspended; (3) to obtain a controlled substance by fraud, forgery or deception; (4) to make, distribute, or possess a die to print a trademark upon a drug or container so as to render a drug a counterfeit substance; and (5) to furnish false or fraudulent information on any record required to be made and kept by this Act.

Sec. 17.17.390. This section provides for the creation of a three-year felony offense for certain possession and distribution offenses. In order to graduate the penalties in relation to type of offense, substance classification and quantities, an additional felony offense to those established in the new criminal code was required.

Sec. 17.17.400. This section provides that in those offenses which require the consideration of an amount for determining

appropriate penalties, it is no defense to a prosecution that the amount was in fact larger than that required for the offense charged.

Sec. 17.17.410. This section provides that a penalty imposed under this law is in addition to other civil or administrative penalties imposed by law.

Sec. 17.17.420. This section prohibits the prosecution of an individual under this law, if the individual's act constituted an offense under Federal law or the law of another state and the individual was convicted or acquitted under those laws.

III. REGULATION OF MANUFACTURE, DISTRIBUTION AND DISPENSING OF CONTROLLED SUBSTANCES

Sec. 17.17.550. This section empowers the Commissioner of Health and Social Services to adopt regulations under the Administrative Procedure Act and to establish reasonable fees relating to the regulation of the legitimate drug industry.

Sec. 17.17.560. This section requires any person who manufactures, distributes, or dispenses controlled substances in this State to register annually with the Commissioner of Health and Social Services. Certain individuals, such as employees of registered dispensers or common carriers, need not register. Furthermore, the commissioner may inspect the establishment of a registrant or applicant.

Sec. 17.17.570. This section establishes the standards whereby the Commissioner of Health and Social Services may grant or deny registration. A person is entitled to registration if he complies with Federal registration requirements.

Sec. 17.17.580. This section establishes the standards whereby the Commissioner of Health and Social Services may revoke or suspend a registration to manufacture, distribute, or dispense a controlled substance.

Sec. 17.17.590. This section provides for the due process rights of an individual whose registration is the subject of a denial, suspension, or revocation. Prior to taking action, the Commissioner of Health and Social Services must serve the individual with a factual statement on which the proposed action is based. The individual is entitled to an adjudication under the Administrative Procedure Act. The commissioner may suspend the registration during the administrative proceedings only if he finds there is an imminent danger to the public.

Sec. 17.17.600. This section requires a registrant to keep and maintain records in conformance with the requirements of Federal law and with the additional requirements the commissioner may adopt.

Sec. 17.17.610. This section provides that the distribution of controlled substances must conform to Federal requirements regarding order forms and prescriptions.

IV. ENFORCEMENT AND ADMINISTRATION.

Sec. 17.17.750. This section requires the Commissioner of Public Safety, the Attorney General, and all law enforcement officers of the State to cooperate with drug enforcement agencies of the United States and other states.

Sec. 17.17.760. This section provides for the forfeiture of various items of property utilized in violation of this Act. Aircraft, motor vehicles and vessels are not subject to forfeiture if their use was committed by a person other than the owner or secured party unless such owner or secured party was privy to the violation.

Such property may be forfeited to the state upon a criminal conviction of the defendant or upon a judgment of a court in a civil proceeding against the property.

The property may be seized by the Commissioner of Public Safety upon an order issued by a court finding that probable cause exists that the property is subject to forfeiture. Seizure without a court order may be made if: (1) it is incident to a valid arrest or valid search warrant; (2) it has been the subject of a prior judgment in favor of the State in either a criminal or civil proceeding; or (3) there is probable cause that the property was or is being used in a drug violation and the property is easily movable. Property seized under this last provision, may not be held over 48 hours or until an order may be applied for and issued by a court, whichever is earlier.

Property forfeited under this section shall be disposed of according to court order.

Sec. 17.17.770. This section provides that the burden of proof is on the State to prove by clear and convincing evidence that the property in question is subject to forfeiture. Liability is not imposed upon a State or local officer engaged in the lawful performance of his duties.

Sec. 17.17.780. This section requires the Commissioner of Health and Social Services to provide educational programs designed to prevent and deter abuse of controlled substances. Additionally, the commissioner shall encourage research on controlled substances.

V. GENERAL PROVISIONS.

Sec. 17.17.900. This section provides the definitions of various terms used in this Act.

Sec. 17.17.990. This section provides that the Act may be cited as the Controlled Substances Act.

*Section 2 and *Section 3.

These sections amend existing statutes that refer to current drug titles that would be repealed by this Act.

*Section 4.

This section amends AS 12.55.155(c) to provide additional aggravating sentencing factors to be utilized in drug offenses. These additional factors are: (1) smuggling a controlled substance into the State; (2) the commission of an offense involving large quantities of controlled substances; and (3) the commission of an offense involving the distribution of a controlled substance adulterated with a toxic substance.

*Section 5.

This section amends AS 12.55.155(d) to provide additional mitigating sentencing factors to be employed in drug offenses. Those additional factors are: (1) the commission of an offense involving small quantities of controlled substances; (2) the commission of an offense involving the distribution of a controlled substance for no remuneration to a personal acquaintance 19 years of age or older; and (3) the commission of an offense involving the possession of a controlled substance for personal use in the defendant's home.

*Section 6.

This section amends existing law regarding the duties of the Department of Health and Social Services.

Section 7.

This section provides for the continuation of various proceedings commenced prior to the effective date of this Act.

*Section 8.

This section provides for the continuation of orders and regulations not in conflict with this Act until modified, superseded, or repealed.

*Section 9.

This section provides for the repeal of existing drug statutes.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M March 19, 1980

SUBJECT: CS for HB 479

TO: Representative Thelma Buchholdt, Chairman
House Health, Education and Social Services
Committee
Attn: Shannon Garrett, A.A.

FROM: Thomas A. Sofo
Legislative Counsel

The attached committee substitute for House Bill 479 contains the additions which you requested from the governor's bill (HB 628). There are several problems which remain in this most recent version of the bill. First, it should be noted that the "advisory" committee which we have created seems to possess some powers in excess of those typically held by a committee whose function is merely advisory. The committee substitute allows the advisory committee to adopt regulations at least so far as they pertain to the addition of controlled substances to the various schedules in this Act. This quasi-lawmaking authority probably serves to take the committee out of the advisory category.

Secondly, the membership of the committee includes a legislator. Although that legislator is a non-voting member, there are several potential problems raised by his presence on the committee. There is the practical problem of having the governor appoint a legislator to such a committee. There is possibly a more serious problem of constitutional dimensions in having a legislator serve on a committee which exercises executive functions. Even though he may not be drawing a salary or allowed to vote on committee business, the presence of a legislator on such a committee is open to attack on the grounds that his mere presence alone will in some way affect the decisions which the committee reaches. If this were not so, we would not have placed such an individual on the committee. There is also a possible additional argument regarding the constitutional provision against dual office holding by legislators. The latter concern may be satisfied by reference to the fact that the legislator will not be drawing any salary for his service on the committee.

I would suggest that the committee consider changing the title of this advisory committee by deleting the adjective "advisory". The bill would also be stronger if we could eliminate the legislative member on the committee. I would be happy to discuss the above points with you at your convenience.

IN THE HOUSE BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 479

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act revising the drug laws of the state."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 17 is amended by adding a new chapter to read:

CHAPTER 17. CONTROLLED SUBSTANCES ACT.

ARTICLE 1. STANDARDS AND PROCEDURES.

Sec. 17.17.010. CONTROLLED SUBSTANCES ADVISORY COMMITTEE. (a) There is created within the Department of Law the Controlled Substances Advisory Committee, composed of

(1) the attorney general or his designee;

(2) the commissioner of health and social services or his designee;

(3) the commissioner of public safety or his designee;

(4) a pharmacist appointed by the governor;

(5) an attorney appointed by the governor;

(6) a physician appointed by the governor;

(7) a psychiatrist appointed by the governor;

(8) a member of the legislature appointed by the governor;

(9) a member of the general public appointed by the governor.

(b) The attorney general, the commissioner of health and social services, and the commissioner of public safety, and the legislator serve ex officio and are nonvoting members of the committee. The members appointed by the governor serve terms of four years and until their successors are appointed and qualify, except that the attorney initially appointed under (a)(5) of this section serves a term of three years and

until his successor is appointed and qualifies.

(c) The members receive no compensation for their service on the committee but are entitled to travel expenses and per diem under AS 39.-20.180.

(d) The committee shall meet at the call of the attorney general. Three voting members constitute a quorum. The committee may adopt bylaws for its proceedings.

Sec. 17.17.020. AUTHORITY TO SCHEDULE CONTROLLED SUBSTANCES. (a) The committee may recommend to the legis the addition and deletion of by regulation adopted under the Administrative Procedure Act (AS 44.62) add substances to the schedules in AS 17.17.-040 - 17.17.090. The committee may not delete substances from those schedules or reclassify substances from one schedule to another. In making a recommendation determination regarding the addition or deletion of a substance, the committee shall assess the danger or probable danger of the substance by considering the following:

(1) the actual or probable abuse of the substance, including

(A) its history and current pattern of abuse;

(B) the scope, duration, and significance of abuse; and

(C) the degree of actual or probable detriment which may result from abuse of the substance;

(D) the probable physical and social impact of widespread abuse of the substance;

(2) the biomedical hazard of the substance, including

(A) its pharmacology: the effects and modifiers of effects of the substance;

(B) its toxicology: the acute and chronic toxicity, interaction with other substances whether controlled or not, and liability to psychological or physiological dependence;

(C) its risk to public health and the particular suscepti

bility of segments of the population;

(3) whether the substance is an immediate precursor of a substance already controlled under this chapter;

(4) the current state of scientific knowledge regarding the substance;

(5) the relationship between the use of the substance and other criminal activity including

(A) whether persons engaged in illicit trafficking of the substance are also engaged in other criminal activity;

(B) whether the nature and relative profitability of the substance encourage illicit trafficking in the substance;

(C) whether the commission of other crimes is one of the effects of the use of the substance;

(D) whether addiction to the substance relates to the commission of crimes to support the continued use of the substance.

(b) If, after considering the factors set out in (a) of this section, the committee finds that a substance should be added to or deleted from a schedule, the committee shall adopt a regulation in accordance with its findings. request the H.C. and CCU to prepare legislation

(c) The committee shall advise the governor and the legislature as to the need to add delete or reschedule substances in the schedules in AS 17.17.040 -17.17.090. In making recommendations regarding a substance, the committee shall assess the danger or probable danger of the substance by considering the factors set out in (a) of this section.

(d) If the committee designates a substance as an immediate precursor of a controlled substance, substances which are precursors of the controlled precursor are not subject to control solely because they are precursors of the controlled precursor.

(e) By the 30th day of each legislative session, the committee shall prepare and present to the governor and the legislature a report

discussing the actions of the committee during the preceding year. If the committee has ~~adopted~~ recommended a regulation adding a controlled substance, the report shall include the committee's findings of fact and other supporting information it considers appropriate.

(f) The committee has no authority over tobacco or over intoxicating liquor as defined in AS 04.20.010.

Sec. 17.17.030. NOMENCLATURE. The controlled substances listed in the schedules in AS 17.17.040 - 17.17.090 or in the regulations adopted under this chapter are included by whatever official, common, usual, chemical, or trade name designated. In some instances, slang terms are listed after a controlled substance. In a prosecution or other proceeding under this chapter, it is not a defense and it is immaterial that a slang term is listed after more than one controlled substance, that a slang term listed after a controlled substance is inaccurately applied to that controlled substance, that no slang term is listed after a controlled substance, or that slang terms other than those listed apply in fact to a controlled substance.

Sec. 17.17.040. SCHEDULE I. (a) A substance shall be placed in Schedule I if it is found under AS 17.17.020 to have the highest degree of danger or probable danger.

(b) Unless specifically excepted or unless listed in another schedule, Schedule I controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers, (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a

combination of extraction and chemical synthesis:

(1) opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

(A) raw opium (slang terms: op, pen yan, hop, tar, black stuff);

(B) opium extracts;

(C) opium fluid extracts;

(D) powdered opium;

(E) granulated opium;

(F) tincture of opium;

(G) codeine (slang term: school boy);

(H) ethylmorphine;

(I) etorphine hydrochloride;

(J) hydrocodone;

(K) hydromorphone;

(L) metopon;

(M) morphine (slang terms: cube, first line, hocus, Miss Emma, morph, morpho, morphy, mud, white stuff, hard stuff, M, unkie);

(N) oxycodone;

(O) oxymorphone;

(P) thebaine;

(2) any salt, compound, derivative, or preparation of these which is chemically equivalent or identical with any of the substances referred to in (1) of this subsection, except that these substances do not include the isoquinoline alkaloids of opium;

(3) opium poppy and poppy straw;

(4) concentrate of poppy straw (the crude extract of poppy straw in liquid, solid, or powder form which contains the phenanthrine alkaloids of the opium poppy);

(5) acetylmethadol;

(6) allylprodine;

(7) alphacetylmethadol;

(8) alphameprodine;

(9) alphamethadol;

(10) anileridine;

(11) alphaprodine;

(12) benzethidine;

(13) betacetylmethadol;

(14) betameprodine;

(15) betamethadol;

(16) betaprodine;

(17) clonitazene;

(18) dextromoramide;

(19) diampromide;

(20) diethylthiambutene;

(21) difenoxin;

(22) dimenoxadol;

(23) dimepheptanol;

(24) dimethylthiambutene;

(25) dioxaphetyl butyrate;

(26) dipipanone;

(27) ethylmethylthiambutene;

(28) etonitazene;

(29) etoxeridine;

(30) furethidine;

(31) hydroxpethidine;

(32) ketobemidone;

(33) levomoramide;

(34) levophenacylmorphan;

(35) morpheridine;

(36) noracymethadol;

(37) norlevorphanol;

(38) normethadone;

(39) norpipanone;

(40) phenadoxone;

(41) phenampromide;

(42) phenomorphan;

(43) phenoperidine;

(44) piritramide;

(45) proheptazine;

(46) properidine;

(47) propiram;

(48) racemoramide;

(49) trimeperidine;

(50) acetorphine;

(51) acetyldihydrocodeine;

(52) benzylmorphine;

(53) codeine methylbromide;

(54) codeine-N-oxide;

(55) cyprenorphine;

(56) desomorphine;

(57) dihydromorphine;

(58) drotebanol;

(59) etorphine;

(60) heroin (slang terms: big H, boy, brown, brown sugar, caballo, Chinese red, chiva, crap, doojee, H, Harry, horse, junk, Mexican mud, powder, scag, smack, stuff, thing, joy powder, white stuff, sugar, hairy, skag, schmeck);

(61) hydromorphinol;

(62) methyldesorphine;

(63) methyldihydromorphine;

(64) morphine methylbromide;

(65) morphine methylsulfonate;

(66) morphine-N-oxide;

(67) myrophine;

(68) nicocodeine;

(69) nicomorphine;

(70) normorphine;

(71) pholcodine;

(72) thebacon;

(73) alpheprodine;

(74) anileridine;

(75) bezitramide;

(76) dihydrocodeine;

(77) diphenoxylate;

(78) fentanyl;

(79) isomethadone;

(80) levomethorphan;

(81) levorphanol;

(82) metazocine;

(83) methadone;

(84) methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane;

(85) moramide-intermediate, 2-methyl-3-morpholino-1, 1-diphenylpropane-carboxylic acid;

(86) pethidine (meperidine);

(87) pethidine-intermediate-A, 4-cyano-1-methyl-4-phenylpiperidine;

(88) pethidine-intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate;

(89) pethidine-intermediate-C, 1-methyl-4-phenylpiperidine-4-carboxylic acid;

(90) phenazocine;

(91) piminodine;

(92) racemethorphan;

(93) racemorphan.

Sec. 17.17.050. SCHEDULE II. (a) A substance shall be placed in Schedule II if it is found under AS 17.17.020 to have a degree of danger or probable danger lower than Schedule I controlled substances but higher than Schedule III controlled subtances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule II controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) cocaine and any compound, derivative, or preparation of coca leaves produced directly or indirectly by extraction from coca

leaves, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, including the isomers, salts, and salts of isomers of cocaine and other derivatives of coca leaves whenever the existence of such isomers and salts is possible, but does not include decocainized coca leaves or extractions of coca leaves which do not contain cocaine or ecogonine (slang terms: Bernice, bernies, big C, blow, C, coke, dream, flake, girl, gold dust, heaven dust, nose candy, paradise, rock, white, happy dust, speedballs, snow birds, Cecil, stardust, Corine, Carrie, dust, Burese);

(2) 4-bromo-2,5-dimethoxy-amphetamine, also known as bromo-2, 5-dimethoxy-a-methylphenethylamine and 4-bromo-2,5-DMA;

(3) 2,5-dimethoxyamphetamine, also known as 2,5-dimethoxy-a-methylphenethylamine and 2,5-DMA;

(4) 4-methoxyamphetamine, also known as 4-methoxy-a-methylphenethylamine and paramethoxyamphetamine, PMA;

(5) 5-methoxy-3,4-methylenedioxy-amphetamine;

(6) 4-methyl-2,5-dimethoxy-amphetamine, also known as 4-methyl-2,5-dimethoxy-a-methylphenethylamine (slang terms: DOM, MDA, STP, serenity, tranquility, and peace, cone drug);

(7) 3,4-methylenedioxy amphetamine;

(8) 3,4,5-trimethoxy amphetamine;

(9) bufotenine, also known as 3-(b-dimethylaminoethyl)-5-hydroxyindole and 3-(2-dimethylaminoethyl)-5-indolol and N,N-dimethylserotonin and 5-hydroxy-N,N-dimethyltryptamine and mappine;

(10) diethyltryptamine, also known as N,N-diethyltryptamine and DET;

(11) dimethyltryptamine, also known as DMT (slang terms: businessman's special, lunch-hour trip);

(12) ibogaine, also known as 7-ethyl-6,6,B,7,8,9,10,12,13-

octahydro-2-methoxy-6,9-methano-5H-pyrido [1', 2':1,2] azepino [5,4-b] indole and Tabernanthe iboga;

(13) lysergic acid diethylamide (slang terms: Alice D, acid, beast, big D, blue cheer, blue heaven, blue mist, brown dots, California sunshine, chocolate chips, coffee, contact lens, cupcakes, haze, mellow yellows, microdots, orange mushrooms, orange wedges, Owsley, paper acid, royal blue, strawberry fields, sugar, sunshine, the hawk, wedges, white lightning, window pane, yellows, cubes, 25, Lucy in the sky with diamonds);

(14) mescaline (slang terms: mesc, mescal, moon);

(15) peyote, meaning all parts of the plant presently classified botanically as Lophophora williamsii Lemaire, whether growing or not, the seeds of the plant, any extract from any part of the plant, and every compound, manufacture, salts, derivative, mixture, or preparation of the plant, its seeds, or extracts (slang terms: buttons, cactus, mescal buttons, mesc, mescal, plants);

(16) N-ethyl-3-piperidyl benzilate;

(17) N-methyl-3-piperidyl benzilate (slang term: LBJ);

(18) psilocybin (slang terms: magic mushroom, mushroom);

(19) psilocyn (slang terms: magic mushroom, mushroom);

(20) chemically synthesized tetrahydrocannabinols, also known as THC;

(21) thiophene analog of phencyclidine, also known as: 1-[1-(2-thienyl) cyclohexyl] piperidine and 2-thienyl analog of phencyclidine and TPCP;

(22) phencyclidine, also known as PCP (slang terms: angel dust, DOA (Dead On Arrival), hog, killer weed (when combined with marijuana or other plant material), peace pill);

(23) mecloqualone;

(24) amphetamine, its salts, optical isomers, and salts of its optical isomers (slang terms: beans, bennies, black beauties, blackbirds, black Mollies, bumblebees, cartweels, chalk, chicken powder, copilots, crank, crossroads, crystal, dexies, double cross, eye openers, hearts, jelly beans, lightning, meth, minibennies, nuggets, oranges, pep pills, speed, roses, thrusters, truck drivers, turnabouts, uppers, ups, wake-ups, peaches, whites, browns, greenies, bombido, jugs, bottles, lid proppers, football, coast-to-coast, L.A. turnabouts);

(25) methamphetamine, its salts, isomers, and salts of its isomers (slang terms: bombido, crystal, meth, speed, splash);

(26) phenmetrazine and its salts;

(27) methylphenidate;

(28) methaqualone (slang terms: ludes, quas, quads, soapers, sopes);

(29) amobarbital (slang terms: barbs, block busters, Christmas trees, downers, green dragons, peanuts, sleeping pills, stumblers, goofballs, goofs, tuinal, tuies, rainbow, double trouble, red and blues);

(30) secobarbital (slang terms: barbs, block busters, Christmas trees, downers, green dragons, peanuts, sleeping pills, stumblers, goofballs, goofs, tuinal, tuies, rainbow, double trouble, red and blues, reds, red birds, red devils, seccy, pink, seggy, pink ladies, marshmallow reds, Mexican reds);

(31) pentobarbital (slang terms: barbs, block busters, Christmas trees, downers, green dragons, peanuts, sleeping pills, stumblers, goofballs, goofs, yellow jackets, yellows, nimbys, nimbies, nobbies).

Sec. 17.17.0[illegible]. SCHEDULE III. (a) A substance shall be placed in Schedule III if it is found under AS 17.17.020 to have a degree of

danger or probable danger lower than Schedule II controlled substances but higher than Schedule IV controlled substances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule III controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) benzphetamine;

(2) chlorphentermine;

(3) clortermine;

(4) mazindol;

(5) phendimetrazine;

(6) any compound, mixture, or preparation containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances combined with one or more other active medicinal ingredients which are not listed in any classification in this section;

(7) any suppository dosage form containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances which are approved by the federal Food and Drug Administration for marketing only as a suppository;

(8) any substance, having a depressant effect on the central nervous system, which contains any quantity or derivative of barbituric acid or any salt of these;

(9) chlorhexadol;

(10) glutethimide (slang terms: C.D., cibas);

(11) lysergic acid;

(12) lysergic acid amide;

(13) methyprylon;

(14) sulfondiethylmethane;

(15) sulfonethylmethane;

(16) sulfonmethane;

(17) nalorphine;

(18) any material, compound, mixture, or preparation containing limited quantities of any of the following substances or any of their salts:

(A) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium;

(B) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(C) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium;

(D) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(E) not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized thera-

peutic amounts;

(F) not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(G) not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(H) not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

Sec. 17.17.070. SCHEDULE IV. (a) A substance shall be placed in Schedule IV if it is found under AS 17.17.020 to have a degree of danger or probable danger lower than Schedule III controlled substances but higher than Schedule V controlled substances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule IV controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) barbital;

(2) chloral betaine;

(3) chloral hydrate (slang terms: knockout drops, Mickey

Finn, Mickey, Peter);

(4) chlordiazepoxide;

(5) clonazepam;

(6) clorazepate;

(7) diazepam;

(8) ethchlorvynol;

(9) ethinamate;

(10) flurazepam;

(11) lorazepam;

(12) mebutamate;

(13) meprobamate;

(14) methohexital;

(15) methylphenobarbital (mephobarbital);

(16) oxazepam;

(17) paraldehyde;

(18) petrichloral;

(19) phenobarbital;

(20) prazepam;

(21) pentazocine;

(22) fenfluramine;

(23) diethlpropion;

(24) phentermine;

(25) pemoline, including organometallic complexes and chelates thereof;

(26) dextropropoxyphene (alpha-(+)-4-dimethylamino-1,2-diphenyl-3-methyl-2-propionoxybutane);

(27) hashish and hashish oil (slang terms: black Russian, hash, kif, quarter moon, soles).

Sec. 17.17.080 SCHEDULE V. (a) A substance shall be placed in

Schedule V if it is found under AS 17.17.020 to have a degree of danger or probable danger lower than Schedule IV controlled substances but higher than Schedule VI controlled substances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule V controlled substances include loperamide and any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis. Schedule V controlled substances include the following controlled substances, otherwise listed in AS 17.17.040(b), when they are combined in the following portions with one or more nonnarcotic active medicinal ingredients in sufficient portion to confer upon the compound mixture preparation valuable medicinal qualities other than those possessed by the Schedule I controlled substance:

(1) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;

(2) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;

(3) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;

(4) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;

(5) not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

Sec. 17.17.090. SCHEDULE VI. (a) A substance shall be placed in Schedule VI if it is found under AS 17.17.020 to have the lowest degree of danger or probable danger.

(b) Schedule VI controlled substances include marijuana (slang terms: Acapulco gold, broccoli, bush, dry high, gage, ganga, grass, griffo, hay, hemp, herb, J, Jay, Jane, Mary Jane, mota, mutah, Panama red, pod, pot, reefer, sativa, smoke, stick, tea, weed, stuff, rope, joints, Texas tea, goof butt, jive, sweet lunch, stinkweed, locoweed, mezz, Mary Waner, Indian hay, fu, bobo bush).

ARTICLE 2. OFFENSES AND PENALTIES.

Sec. 17.17.200. DISTRIBUTING A CONTROLLED SUBSTANCE TO A MINOR. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a controlled substance to a minor who is three or more years younger than the person.

(b) A person who violates this section with respect to

(1) a Schedule I controlled substance is guilty of an unclassified felony;

(2) a Schedule II controlled substance is guilty of a class A felony;

(3) a Schedule III controlled substance is guilty of a class A felony;

(4) a Schedule IV controlled substance is guilty of a class B felony;

(5) a Schedule V controlled substance is guilty of a class B felony;

(6) a Schedule VI controlled substance is guilty of a class B felony.

Sec. 17.17.210. MANUFACTURING a controlled substance. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to manufacture a con-

trolled substance.

(b) A person who violates this section with respect to

(1) a Schedule I controlled substance is guilty of a class A felony;

(2) a Schedule II controlled substance is guilty of a class A felony;

(3) a Schedule III controlled substance is guilty of a class B felony;

(4) a Schedule IV controlled substance is guilty of a class B felony;

(5) a Schedule V controlled substance is guilty of a class C felony;

(6) a Schedule VI controlled substance is guilty of a class C felony.

Sec. 17.17.220. DISTRIBUTING A CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a controlled substance.

(b) A person is guilty of

(1) a class A felony if he knowingly distributes a Schedule I controlled substance;

(2) a class A felony if he knowingly distributes a Schedule II controlled substance;

(3) a class B felony if he knowingly distributes a Schedule III controlled substance;

(4) a class C felony if he knowingly distributes a Schedule IV controlled substance;

(5) a class C felony if he knowingly distributes a Schedule V controlled substance.

Sec. 17.17.230. DISTRIBUTING A SCHEDULE VI CONTROLLED SUBSTANCE.

(a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule VI controlled substance.

(b) A person is guilty of a class C felony if he violates this section by knowingly distributing one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule VI controlled substance.

(c) A person is guilty of a class A misdemeanor if he violates this section by knowingly distributing one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than two ounces containing a Schedule VI controlled substance. However, in a prosecution under this subsection, it is a defense which reduces the crime to a class B misdemeanor that the preparations, compounds, mixtures, or substances containing a Schedule VI controlled substance were of an aggregate weight of one ounce or less and that the distribution was made for no remuneration to a person 18 years of age or older. As used in this subsection, "defense" has the meaning ascribed to it in AS 11.81.900(b).

Sec. 17.1[illegible].240. POSSESSION OF CONTROLLED SUBSTANCES. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule I controlled substance. A person is guilty of

(1) a class A felony if he knowingly possesses

(A) 100 or more capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(i) one ounce or more containing heroin or morphine or any of their respective alkaloids or salts; or

(ii) two ounces or more containing a Schedule I controlled substance other than heroin or morphine or any of their

respective alkaloids or salts;

(2) a class B felony if he knowingly possesses

(A) 50 or more but fewer than 100 capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(i) one-fourth ounce or more but less than one ounce containing heroin or morphine or any of their respective alkaloids or salts; or

(ii) one-half ounce or more but less than two ounces containing a Schedule I controlled substance other than heroin or morphine or any of their respective alkaloids or salts;

(3) a class C felony if he knowingly possesses

(A) 25 or more but fewer than 50 capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(i) one-eighth ounce or more but less than one-fourth ounce containing herion or morphine or any of their respective alkaloids or salts; or

(ii) one-fourth ounce or more but less than one-half ounce containing a Schedule I controlled substance other than heroin or morphine or any of their respective alkaloids or salts;

(4) a class A misdemeanor if he knowingly possesses a Schedule I controlled substance in a smaller amount than the ranges specified in (3) of this subsection.

(b) Except as authorized in this chapter, it is unlawful for a

person knowingly to possess a Schedule II controlled substance. A person is guilty of

(1) a class A felony if he knowingly possesses

(A) 200 or more capsules, tablets, ampules, or syrettes containing a Schedule II controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule II controlled substance;

(2) a class B felony if he knowingly possesses

(A) 100 or more but fewer than 200 capsules, tablets, ampules, or syrettes containing a Schedule II controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more but less than two ounces containing a Schedule II controlled substance;

(3) a class C felony if he knowingly possesses

(A) 50 or more but fewer than 100 capsules, tablets, ampules, or syrettes containing a Schedule II controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-fourth ounce or more but less than one-half ounce containing a Schedule II controlled substance;

(4) a class A misdemeanor if he knowingly possesses a Schedule II controlled substance in a smaller amount than the ranges specified in (3) of this subsection.

(c) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule III controlled substance. A person is guilty of

(1) a class B felony if he knowingly possesses

(A) 400 or more capsules, tablets, ampules, or syrettes containing a Schedule III controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule III controlled substance;

(2) a class C felony if he knowingly possesses

(A) 100 or more but fewer than 400 capsules, tablets, ampules, or syrettes containing a Schedule III controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more but less than two ounces containing a Schedule III controlled substance;

(3) a class A misdemeanor if he knowingly possesses a Schedule III controlled substance in a smaller amount than the ranges specified in (2) of this subsection.

(d) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule IV controlled substance. A person is guilty of

(1) a class C felony if he knowingly possesses

(A) 400 or more capsules, tablets, ampules, or syrettes containing a Schedule IV controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule IV controlled substance;

(2) a class C felony if he knowingly possesses

(A) 100 or more but fewer than 400 capsules, tablets, ampules, or syrettes containing a Schedule IV controlled substance;

or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more but less than two ounces containing a Schedule IV controlled substance;

(3) a class A misdemeanor if he knowingly possesses a Schedule IV controlled substance in a smaller amount than the ranges specified in (c) of this section.

(e) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule V controlled substance. A person is guilty of

(1) a class C felony if he knowingly possesses

(A) 400 or more capsules or tablets containing a Schedule V controlled substance; or

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a Schedule V controlled substance;

(2) a class A misdemeanor if he knowingly possesses a Schedule V controlled substance in a smaller amount than the ranges specified in (1) of this subsection.

Sec. 17.17.250. POSSESSION OF A SCHEDULE VI CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule VI controlled substance.

(b) A person who knowingly (1) uses a Schedule VI controlled substance in a public place, (2) possesses more than an ounce of a Schedule VI controlled substance in a public place, (3) possesses any amount of a Schedule VI controlled substance while operating a motor vehicle or airplane, or (4) while under the age of 18 possesses or uses any amount of a Schedule VI controlled substance, is, upon conviction, guilty of a misdemeanor punishable by a fine of not more than $1,000.

(c) A person 18 years of age or older who violates this chapter by possession of any amount of marijuana in other than a public place, when his possession is for his own use, or by possession of one ounce or less of marijuana in a public place, is punishable by a civil fine of not more than $100. Punishment under this subsection shall be initiated only by civil complaint or citation. The court may establish procedures for payment of fines by mail.

(d) In this section, "public place" means a place which is either in public ownership or a place available to public access including public streets, sidewalks, carriers and business establishments.

Sec. 17.17.260. FAILURE TO MAKE, KEEP, OR FURNISH REQUIRED INFORMATION. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to refuse or fail to make, keep, or furnish a record, notification, order form, statement, invoice, or information required under this chapter.

(b) A person who violates this section is guilty of a class B misdemeanor.

Sec. 17.17.270. MISCELLANEOUS OFFENSES. (a) Except as authorized in this chapter, it is unlawful for a person

(1) knowingly to keep or maintain a store, shop, warehouse, dwelling, building, vehicle, vessel, aircraft, or other structure or place which is used for keeping or selling controlled substances in violation of this chapter;

(2) to use in the course of the manufacture or distribution of a controlled substance a registration number which is ficticious, revoked, suspended, or issued to another person;

(3) to obtain possession of a controlled substance by misrepresentation, fraud, forgery, or other deception;

(4) to make, distribute, or possess a punch, die. plate,

stone, or other thing designed to print, imprint, or reproduce the trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of the foregoing upon a drug or container or labeling so as to render a drug a counterfeit substance;

(5) to furnish false or fraudulent material information in, or omit material information from, an application, report, record, or other document required to be kept or filed under this chapter.

(b) A person who violates this section is guilty of a class C felony.

Sec. 17.17.280. OFFENSES DEFINED BY AMOUNTS. Whenever a provision of this chapter defining an offense requires a determination of an amount, it is not a defense to the lowest class of offense established by the evidence that the amount in question was larger than the amount which would make the offense a higher class of offense, and a person may be charged and convicted accordingly.

Sec. 17.17.290. PENALTIES UNDER OTHER LAWS. A penalty imposed for a violation of this chapter is in addition to, and not in place of, a civil or administrative penalty or sanction otherwise authorized by law.

ARTICLE 3. REGULATION OF MANUFACTURE, DISTRIBUTION, AND DISPENSING OF CONTROLLED SUBSTANCES.

Sec. 17.17.550. REGULATIONS. The commissioner shall adopt regulations under the Administrative Procedure Act (AS 44.62) which are necessary for the administration of AS 17.17.550 - 17.17.610 and may charge reasonable fees relating to the registration and control of the manufacture, distribution, and dispensing of controlled substances in this state.

Sec. 17.17.560. REGISTRATION REQUIREMENTS. (a) A person who manufactures, distributes, or dispenses a controlled substance in this state or who proposes to engage in the manufacture, distribution, or

dispensing of a controlled substance in this state, shall annually register with the commissioner in accordance with regulations adopted under AS 17.17.550.

(b) A person registered by the commissioner under AS 17.17.550 - 17.17.610 to manufacture, distribute, or dispense controlled substances, including any such activity in the conduct of research, may possess, manufacture, distribute, or dispense those substances to the extent authorized by his registration and in conformity with the other provisions of AS 17.17.550 - 17.17.610.

(c) The following persons need not register and may lawfully possess controlled substances under this chapter:

(1) an agent or employee of a registered manufacturer, distributor, or dispenser of a controlled substance if the possession is incidental to the agent's or employee's acting in the usual course of business or employment;

(2) a common or contract carrier or warehouseman, or his employee, whose possession of a controlled substance is in the usual course of business or employment;

(3) a person in possession of a controlled substance under an order of a registered practitioner.

(d) The commissioner may, by regulation, waive the requirement for registration of certain manufacturers, distributors, or dispensers if he finds it consistent with the public health and safety.

(e) A separate registration is required for each principal place of business or professional practice where the applicant manufactures, distributes, or dispenses controlled substances.

(f) The commissioner may inspect the establishment of a registrant or applicant for registration in accordance with his regulations.

Sec. 17.17.570. REGISTRATION. (a) The commissioner shall

register an applicant to manufacture, distribute, or dispense controlled substances included in the schedules in AS 17.17.040 - 17.17.090 unless he finds that the registration would be inconsistent with the public interest. In determining the public interest, the commissioner shall consider

(1) maintenance of effective controls against diversion of controlled substances into other than legitimate medical, scientific, or industrial channels;

(2) compliance with applicable state and local law;

(3) any conviction of the applicant under federal or state laws relating to controlled substances;

(4) past experience in the manufacture or distribution of controlled substances, and the existence in the applicant's establishment of effective controls against diversion;

(5) furnishing by the applicant of false information in an application filed under this chapter;

(6) suspension or revocation of the applicant's federal registration to manufacture, distribute, or dispense controlled substances as authorized by federal law; and

(7) any other factors relevant to the public health and safety.

(b) A practitioner registered under federal law to manufacture, distribute, or dispense controlled substances is exempt from registration under this section.

Sec. 17.17.580. REVOCATION AND SUSPENSION OF REGISTRATION. (a) A registration under AS 17.17.570 to manufacture, distribute, or dispense a controlled substance may be suspended or revoked by the commissioner upon a finding that the registrant

(1) has furnished false or fraudulent material information in

an application filed under this chapter;

(2) has been convicted of a felony under state or federal law relating to a controlled substance; or

(3) has had his federal registration to manufacture, distribute, or dispense controlled substances suspended or revoked.

(b) The commissioner may limit the revocation or suspension of a registration to the particular controlled substance with respect to which grounds for revocation or suspension exist.

(c) If the commissioner suspends or revokes a registration, all controlled substances owned or possessed by the registrant at the time of suspension or the effective date of the revocation order may be placed under seal. A disposition may not be made of substances under seal until the time for taking an appeal has elapsed or until all appeals have been concluded unless a court, upon application, orders the sale of perishable substances and the deposit of the proceeds of the sale with the court. Upon a revocation order becoming final, all controlled substances are forfeited to the state.

(d) The commissioner shall promptly notify the Drug Enforcement Administration of all orders suspending or revoking registration and all forfeitures of controlled substances.

Sec. 17.17.590. ORDER TO SHOW CAUSE. (a) Before denying, suspending or revoking a registration, or refusing a renewal of registration, the commissioner shall serve upon the applicant or registrant an order to show cause why registration should not be denied, revoked, or suspended, or why the renewal should not be refused. The order to show cause shall contain a statement of the basis for it and shall call upon the applicant or registrant to appear before the commissioner at a time and place not less than 30 days after the date of the service of the order, but in the case of a refusal of renewal of registration the show

cause order shall be served not later than 30 days before the expiration of the registration. These proceedings shall be conducted under the administrative adjudication provisions of the Administrative Procedure Act (AS 44.62.330 - 44.62.630) without regard to criminal prosecution or other proceeding. Proceedings to refuse renewal of registration do not abate the existing registration, which remains in effect pending the outcome of the administrative hearing.

(b) The commissioner may, without an order to show cause, suspend a registration simultaneously with the institution of proceedings under AS 17.17.580 if he finds that there is an imminent danger to the public health or safety which warrants this action. The suspension shall continue in effect until the conclusion of the proceedings, including judicial review of the proceedings, unless sooner withdrawn by the commissioner or dissolved by a court of competent jurisdiction.

Sec. 17.17.600. RECORDS OF REGISTRANTS. A person registered to manufacture, distribute, or dispense controlled substances under this chapter shall keep records and maintain inventories in conformance with the record-keeping and inventory requirements of federal law and with additional regulations the commissioner may adopt.

Sec. 17.17.610. ORDER FORMS; PRESCRIPTIONS. (a) A controlled substance may be distributed by one registrant to another registrant only if the distribution is in accordance with federal requirements for order forms.

(b) A controlled substance may not be dispensed by a practitioner except in accordance with federal requirements regarding prescriptions for controlled substances; however, a controlled substance may be dispensed directly by a practitioner, other than a pharmacist, to an ultimate user without a prescription.

ARTICLE 4. ENFORCEMENT AND ADMINISTRATION.

Sec. 17.17.750. ENFORCEMENT COOPERATION. It is the duty of the commissioner of public safety, officers of the division of state troopers, officers appointed to enforce criminal law in this state or another state, local government law enforcement officers, the attorney general, and all prosecuting attorneys to enforce all provisions of this chapter and to cooperate with agencies charged with enforcement of the laws relating to controlled substances of the United States, of this state, and of all other states.

Sec. 17.17.760. FORFEITURES. (a) The following are subject to forfeiture:

(1) a controlled substance which has been manufactured, distributed, acquired, or possessed in violation of this chapter;

(2) raw materials, products, and equipment which are used in manufacturing or distributing a controlled substance in violation of this chapter;

(3) property which is used as a container for property described in (1) or (2) of this subsection;

(4) conveyances, including aircraft, vehicles, or vessels which are used to transport or in any manner to facilitate transportation of property described in (1) or (2) of this subsection for the purpose of sale or receipt, except

(A) a conveyance is not subject to forfeiture under this section if its use in violation of this chapter was committed by a person other than the owner of the conveyance and the owner was not privy to the violation;

(B) a forfeiture of a conveyance encumbered by a bona fide security interest at the time of seizure is subject to the interest of the secured party if its use in violation of this chapter was committed by a person other than the secured party and

the secured party was not privy to the violation;

(5) all books, records, and research products and materials, including formulas, microfilm, tapes, and data which are used in violation of this chapter.

(b) Property listed in (a) of this section may be forfeited to the state upon conviction of the defendant of a violation of this chapter or upon judgment of a court of competent jurisdiction in a civil proceeding in rem that an item is subject to forfeiture.

(c) Property subject to forfeiture under this section may be seized by the commissioner of public safety upon an order issued by the court having jurisdiction over the property upon a showing of probable cause that the property is subject to forfeiture. Seizure without a court order may be made if

(1) the seizure is incident to a valid arrest or a search under a valid search warrant;

(2) the property subject to seizure has been the subject of a prior judgment in favor of the state in a criminal proceeding or a civil proceeding in rem based upon this chapter;

(3) there is probable cause that the property was or is being used in violation of this chapter and the property is easily movable.

(d) Property seized under (c)(3) of this section may not be held over 48 hours or until an order may be applied for and issued by a court, whichever is earlier.

(e) Property seized or detained under this section is in the custody of the Department of Public Safety subject only to the orders and decrees of the court having jurisdiction over the forfeiture proceedings. If property is seized under this section, the Department of Public Safety may

(1) place the property under seal;

(2) remove the property to a place designated by the court; or

(3) take custody of the property and remove it to an appropriate location for disposition in accordance with law.

(f) Property forfeited under this section shall be disposed of according to court order. The court may order the Department of Public Safety to

(1) destroy property harmful to the public;

(2) sell the property and use the proceeds for payment of all proper expenses of the proceedings for forfeiture and sale, including expenses of seizure and custody and court costs;

(3) take custody of the property and use it in the enforcement of this chapter or transfer it to another agency of the state for a use designated by the court in furtherance of the administration of justice;

(4) take custody of the property and remove it for disposition in accordance with law; or

(5) forward it to the Drug Enforcement Administration for disposition.

(g) For purposes of this section, an attempt under AS 11.31.100 or a solicitation under AS 11.31.110 to commit a crime defined by this chapter is considered a violation of this chapter.

Sec. 17.17.770. BURDEN OF PROOF; LIABILITIES. (a) It is not necessary for the state to negate an exemption or exception in this chapter in a complaint, information, indictment, or other pleading under this chapter. However, once a person asserts an exemption or exception under this chapter, the burden is upon the state to disprove the existence of the exemption or exception by clear and convincing evidence.

(b) In a civil proceeding in rem under AS 17.17.760, the burden is

upon the state to prove by clear and convincing evidence that the item in question is subject to forfeiture.

(c) Liability is not imposed by this chapter upon an authorized state or local officer engaged in the lawful performance of his duties.

Sec. 17.17.780. EDUCATION AND RESEARCH. (a) The commissioner shall carry out educational programs designed to prevent and deter abuse of controlled substances. In connection with these programs, the commissioner may

(1) promote better recognition of the problems of abuse of controlled substances within the regulated industry and among interested groups and organizations;

(2) assist the regulated industry and interested groups and organizations in contributing to the reduction of abuse of controlled substances;

(3) consult with interested groups and organizations to aid them in solving administrative and organizational problems;

(4) evaluate procedures, projects, and techniques conducted or proposed as part of educational programs on abuse of controlled substances;

(5) disseminate the results of research on abuse of controlled substances to promote a better public understanding of the problems which exist and their solutions; and

(6) assist in the education and training of state and local law enforcement officials in their efforts to prevent abuse of controlled substances.

(b) The commissioner shall encourage research on controlled substances and may

(1) establish methods to assess the effects of controlled substances and identify and characterize those with potential for abuse;

(2) undertake research to

(A) develop new or improved approaches, techniques, systems, equipment, and devices to strengthen the enforcement of this chapter;

(B) determine patterns of abuse of controlled substances and their social effects;

(C) improve methods for preventing, predicting, and understanding the abuse of controlled substances;

(3) enter into contracts with public agencies, institutions of higher education, and organizations or individuals for conducting research on abuse of controlled substances and for performing related educational activities.

ARTICLE 5. GENERAL PROVISIONS.

Sec. 17.17.900. DEFINITIONS. As used in this chapter, unless the context requires otherwise,

(1) "administer" means the direct application of a controlled substance, whether by injection, inhalation, ingestion, or any other means, to the body of a patient or research subject by

(A) a practitioner or, in his presence, by his authorized agent, or

(B) the patient or research subject at the direction and in the presence of a practitioner;

(2) "agent" means an authorized person who acts on behalf of or at the direction of a manufacturer, distributor, or dispenser; "agent" does not include a common or contract carrier, public warehouseman, or employee of the carrier or warehouseman;

(3) "commissioner" means the commissioner of health and social services;

(4) "committee" means the Controlled Substances Advisory

Committee;

(5) "controlled substance" means a drug, substance, or immediate precursor included within any of the schedules in AS 17.17.-040 - 17.17.090;

(6) "counterfeit substance" means a controlled substance which, or the container or labeling of which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, number, or device, or any likeness to it, of a manufacturer, distributor, or dispenser other than the person who in fact manufactured, distributed, or dispensed the substance;

(7) "deliver" or "delivery" means the actual, constructive, or attempted transfer from one person to another of a controlled substance, whether or not there is an agency relationship;

(8) "dentist" means a person authorized by law to practice dentistry in this state;

(9) "dispense" means to deliver a controlled substance to an ultimate user or research subject by a practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for that delivery;

(10) "distribute" means to deliver, other than by administering or dispensing, a controlled substance;

(11) "drug"

(A) means

(i) substances recognized as drugs in the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, or official National Formulary, or any supplement to any of them;

(ii) substances intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in

humans or animals;

(iii) substances, other than food, intended to affect the structure or any function of the body of humans or animals; and

(iv) substances intended for use as a component of any article specified in (i), (ii), or (iii) of this subparagraph;

(B) does not include devices or their components, parts, or accessories;

(12) "hashish" means the resin produced by the plant (genus) Cannabis;

(13) "hashish oil" means the viscous liquid concentrate of tetrahydrocannabinols extracted from hashish;

(14) "immediate precursor" means a substance which the Controlled Substances Advisory Committee has found to be and is by regulation designated as the principal compound commonly used or produced primarily for use, and which is an immediate chemical intermediary used or likely to be used, in the manufacture of a controlled substance, the control of which is necessary to prevent, curtail, or limit manufacture;

(15) "manufacture" means the production, preparation, propagation, compounding, conversion, or processing of a controlled substance, either directly or indirectly by extraction from substances of natural origin or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, and includes any packaging or repackaging of the substance or labeling or relabeling of its container, except that this term does not include the preparation or compounding of a controlled substance by an individual for his own use or the preparation, compounding, packaging, or labeling of a controlled substance

(A) by a practitioner as an incident to his administering or dispensing a controlled substance in the course of his professional practice, or

(B) by a practitioner, or by his authorized agent under his supervision, for the purpose of, or as an incident to, research, teaching, or chemical analysis and not for sale;

(16) "marijuana" means the leaves, stems, flowers, and seeds of the plant (genus) Cannabis, whether growing or not, but does not include the resin or oil extracted from any part of the plant, or any compound, manufacture, salt, derivative, mixture, or preparation from the resin or oil, including hashish and natural or synthetic tetrahydrocannabinol; it does not include the mature stalks of the plant, fiber produced from the stalks, oil or cake made from the seeds of the plant, any other compound, manufacture, salt, derivative, mixture, or preparation of the mature stalks, fiber, oil or cake, or the sterilized seed of the plant which is incapable of germination;

(17) "minor" means a person who is under 18 years of age;

(18) "opiate" means a substance having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having addiction-forming or addiction-sustaining liabilty; it does not include, unless specifically designated as controlled under AS 17.17.020, the dextrorotatory isomer of 3-methoxy-n-methylmorphinan and its salts (dextromethorphan); it does include its racemic and levorotatory forms;

(19) "opium poppy" means the plant of the species Papaver somniferum L., except its seeds;

(20) "poppy straw" means all parts, except the seeds, of the opium poppy, after mowing;

(21) "practitioner" means

(A) a physician, dentist, veterinarian, scientific investigator, or other person licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state;

(B) a pharmacy, hospital, or other institution licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state;

(22) "production" includes the manufacture, planting, cultivation, growing, or harvesting of a controlled substance;

(23) "ultimate user" means a person who lawfully possesses a controlled substance for his own use, for the use of a member of his household, or for administering to an animal owned by him or a member of his household.

Sec. 17.17.990. SHORT TITLE. This chapter may be cited as the Controlled Substances Act.

* Sec. 2. AS 08.64.380(3)(B) is amended to read:

(B) habitual overuse of alcoholic beverages or <u>controlled substances as defined in AS 17.17</u> [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUGS, AS DEFINED IN AS 17.12.150(3), OR ADDICTION TO THE USE OF NARCOTIC DRUGS AS DEFINED IN AS 17.10.230(13)];

* Sec. 3. AS 08.80.470 is amended to read:

Sec. 08.80.470. CONSTRUCTION. Nothing in this chapter amends, modifies, repeals or otherwise changes any provision of the <u>Controlled Substances Act (AS 17.17)</u> [UNIFORM NARCOTIC DRUG ACT (AS 17.10)] or the Alaska Food, Drug and Cosmetic Act (AS 17.20).

* Sec. 4. AS 12.30.040(b) is amended to read:

(b) Notwithstanding the provisions of (a) of this section, if the

offense a person has been convicted of is murder in the first degree (as defined in AS 11.41.100), kidnapping (as defined in AS 11.41.300), sexual assault in the first degree (as defined in AS 11.41.410(a)(1) and (2)), robbery in the first degree (as defined in AS 11.41.500), or distributing a Schedule I controlled substance to a minor (as defined in AS 17.17.200(b)(1)), or an offense that involves the manufacture, distribution, or possession with intent to manufacture or distribute a Schedule I or II controlled substance in violation of AS 17.17.-210.(b)(1) and (2)or 17.17.220(b)(1) and (2) under circumstances manifesting an intent to distribute the substance as part of a commercial enterprise [FIRST DEGREE MURDER, ARMED ROBBERY, KIDNAPPING, OR RAPE (AS DEFINED IN AS 11.15.130)], he may not be released on bail either before sentencing or pending appeal.

* Sec. 5. AS 12.45 is amended by adding a new section to read:

Sec. 12.45.155. LABORATORY REPORT OF CONTROLLED SUBSTANCE. (a) In a prosecution under AS 17.17.200 - 17.17.250, a complete copy of an official laboratory report from the Department of Public Safety or a laboratory operated by another law enforcement agency is prima facie evidence of the content, identity, and weight of the substance. The report must be signed by the person performing the analysis and must state that the substance which is the basis of the alleged offense has been weighed and analyzed. It must also state with specificity findings as to the content, weight, and identity of the substance.

(b) A notarized statement executed by the signer of the report provided for in (a) of this section must be attached to the report. The statement must set out the identity of the signer and include a statement that he is an employee of the laboratory issuing the report and that performing the analysis is a part of his regular duties. The statement must also include an outline of his education, training, and

experience for performing an analysis. The signer shall attest that scientifically accepted tests were performed with due caution, and that the evidence was handled in accordance with established and accepted procedures while in the custody of the laboratory.

(c) The prosecuting attorney shall serve a copy of the report on the attorney of record for the accused, or on the defendant if he has no attorney, no later than 10 days before a proceeding in which the report is to be used against the accused. However, at a preliminary hearing or grand jury proceeding the report may be used without having been previously served upon the accused.

(d) The accused or his attorney may demand the testimony of the person signing the report, by serving a written demand showing cause, upon the prosecuting attorney within seven days from receipt of the report.

(e) A report issued for use under this section must contain notice of the right of the accused to demand the testimony of the person signing the report.

* Sec. 6. AS 12.55.035(b)(1) is amended to read:

(1) $75,000 for murder in the first or second degree, [OR] kidnapping, or distributing a Schedule I controlled substance to a minor as defined in AS 17.17 200(b)(1);

* Sec. 7. AS 12.55.125(b) is amended to read:

(b) A defendant convicted of murder in the second degree, [OR] kidnapping, or distributing a Schedule I controlled substance to a minor as defined in AS 17.17.200(b)(1) shall be sentenced to a definite term of imprisonment of at least five years but not more than 99 years.

* Sec. 8. AS 12.55.155(c) is amended by adding new paragraphs to read:

(15) the defendant is convicted of an offense specified in AS 17.17 and the offense involved the delivery of a controlled substance

under circumstances manifesting an intent to distribute the substance as part of a commercial enterprise;

(16) the defendant is convicted of an offense specified in AS 17.17 and the offense involved the smuggling of a controlled substance into the state;

(17) the defendant is convicted of an offense specified in AS 17.17 and the offense involved the distribution of a controlled substance that had been adulterated with a toxic substance.

* Sec. 9. AS 12.55.155(d) is amended by adding new paragraphs to read:

(13) the defendant is convicted of an offense specified in AS 17.17 and the offense involved small quantities of a controlled substance;

(14) the defendant is convicted of an offense specified in AS 17.17 and the offense involved the distribution of a controlled substance, other than a Schedule I controlled substance, to a personal acquaintance who is 18 years of age or older for no profit;

(15) the defendant is convicted of an offense specified in AS 17.17 and the offense involved the possession of a small amount of a controlled substance for personal use in the defendant's home.

* Sec. 10. AS 44.29.020 is amended to read:

Sec. 44.29.020. DUTIES OF DEPARTMENT. The Department of Health and Social Services shall administer the state programs of public health and social services, including: (1) maternal and child health services; (2) preventive medical services; (3) public health nursing services; (4) sanitation and engineering services; (5) nutrition services; (6) health education; (7) laboratories; (8) mental health treatment and diagnosis; (9) management of state institutions; (10) medical facilities; (11) old age assistance; (12) aid to dependent children; (13) aid to the blind; (14) child welfare services; (15) general relief; (16) licensing and

supervision of child care facilities; [AND] (17) probation and parole supervision; and (18) control of drug abuse in accordance with AS 17.17.

* Sec. 11. (a) Prosecution for a violation of law occurring before the effective date of this Act is not affected or abated by this Act. If the offense being prosecuted is similar to one defined in AS 17.17, then the penalties under AS 17.17 apply if they are less than those under the prior law.

(b) Civil seizures or forfeitures and injunctive proceedings begun before the effective date of this Act are not affected by this Act.

(c) Administrative proceedings pending under laws which are superseded by this Act shall be continued and brought to a final determination in accordance with the laws in effect before the effective date of this Act.

(d) The commissioner of health and social services shall permit a person who owns or operates an establishment engaged in the manufacture, distribution, or dispensing of a controlled substance on or before the effective date of this Act and who is registered or licensed by the state to register under AS 17.17.

(e) This Act applies to violations of law, seizures and forfeitures, injunctive proceedings, administrative proceedings, and investigations which occur on or after the effective date of this Act.

* Sec. 12. Orders issued and regulations adopted under a law affected by this Act and in effect on the effective date of this Act and not in conflict with this Act continue in effect until modified, superseded, or repealed.

* Sec. 13. AS 17.10; AS 17.12; and AS 17.15 are repealed.

AS MR HICKEY SAID, HE HAS BEEN WORKING WITH THE SECRETARY AND PRESIDENT OF THE BOARD OF PHARMACY OVER THE WEEKEND, AND SINCE I ASSUME THAT THE RESULTS ARE INCORPORATED IN THE MATERIAL HE HAS JUST HANDED OUT, MY TESTIMONY WILL BE BRIEF.

WE FEEL THAT THE CRIMINAL PORTIONS OF THE BILL SHOULD BE MOVED TO CHAPTER 11, AND THE MEDICAL PORTIONS SHOULD REMAIN IN CHAPTER 17.

WE RECOMMEND THAT SECT ARTICLE 3 BE CHANGED TO READ: THE STATE BOARD OF PHARMACY SHALL ADMINISTER THIS CHAPTER AND CONTROLLED SUBSTANCES SCHEDULES FOR LEGITIMATE MEDICAL PROFESSIONS WHO QUALIFY UNDER FEDERAL REGISTRATION REQUIREMENT SHALL BE THE FEDERAL UNIFORM CONSTROLLED SUBSTANCE ACT OF 1970 WITH AMENDMENTS. IF ANY SUBSTANCE IS DESIGNATED RESCHEDULED OR DELETED AS A CONTROLLED SUBSTANCE UNDER FEDERAL LAW AND NOTICE THEREOF IS GIVEN TO THE BOARD, THE SUBSTANCE SHALL BE SIMILARLY CONTROLLED UNDER THIS CHAPTER AFTER EXPIRATION OF 30 DAYS FROM PUBLICATION IN THE FEDERAL REGISTER OF A FINAL ORDER DESIGNATING A SUBSTANCE AS A CONTROLLED SUBSTANCE OR RESCHEDULING OR DELETING A SUBSTANCE.
THIS DOES NOT EXTEND TO DISTILLED SPIRITS OR TOBACCO.

EXCEPTION: PROVIDED THAT A PROFESSIONAL PRACTITIONER LICENSED IN ALASKA UNDER THE PROFESSIONAL LICENSING ACTS SHALL NOT BE REQUIRED TO BE REGISTERED UNDER THIS CHAPTER ALSO UNLESS SPECIFIC EXEMPTION IS DENIED UNDER ADMINISTRATIVE PROCEDURES ACT FOR VIOLATION OF ANY PROVISIONS OF THIS CHAPTER.

Introduced: 4/26/79
Referred: Health, Education & Social Services and Judiciary

IN THE HOUSE BY PARR

HOUSE BILL NO. 479

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act revising the drug laws of the state. for prosecution purp

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS ~~17~~ 11 is amended by adding a new chapter to read:

CHAPTER ~~17~~ 11. Alaska CONTROLLED SUBSTANCES ACT.

ARTICLE 1. STANDARDS AND PROCEDURES.

Sec. ~~17.17~~ 11.010. CONTROLLED SUBSTANCES ADVISORY COMMITTEE. (a) There is created within the Department of Law the Controlled Substances Advisory Committee, composed of

(1) the attorney general or his designee;

(2) the commissioner of health and social services or his designee;

(3) the commissioner of public safety or his designee;

(4) a pharmacist appointed by the governor;

(5) an attorney experienced in criminal defense appointed by the governor.

(b) The attorney general, the commissioner of health and social services, and the commissioner of public safety serve ex officio. The members appointed by the governor serve terms of four years and until their successors are appointed and qualify, except that the attorney initially appointed under (a)(5) of this section serves a term of three years and until his successor is appointed and qualifies.

(c) The members receive no compensation for their service on the committee but are entitled to travel expenses and per diem under AS 39.-20.180.

(d) The committee shall meet at the call of the attorney general. Three members constitute a quorum. The committee may adopt bylaws for its proceedings.

Sec. ~~17~~ 11.17.020. AUTHORITY TO SCHEDULE CONTROLLED SUBSTANCES. (a) The Controlled Substances Advisory Committee may adopt regulations under the Administrative Procedure Act (AS 44.62) which add, delete, or reschedule substances in the Alaska schedules in AS ~~17.17.040 - 17.17.090~~ 11. The committee shall prescribe the effective date of a regulation adopted under this section. This date may not be sooner than the 56th day of the next regular session of the legislature following adoption of the regulation. Within 10 days after the convening of a regular session of the legislature, the committee shall submit to the legislature the regulations adopted under this section which have not taken effect and shall submit findings of fact and other information which it considers appropriate. Notwithstanding AS 44.62.320, a regulation adopted under this section may not be annulled by resolution. A regulation adopted under this section which is annulled by statute may not be readopted within three years after its annulment.

(b) If a substance is added, deleted, or rescheduled as a controlled substance under federal law and notice of the designation is given to the Department of Law, the committee shall give notice under AS 44.62.190 of proposed adoption of a regulation making a corresponding change in Alaska law and shall hold a hearing under AS 44.62.210. If the committee decides not to adopt the regulation, it shall file a notice of that decision and findings of fact with the lieutenant governor.

(c) In making a determination regarding the addition, deletion, or rescheduling of a substance under this section, the committee shall assess the danger or probable danger of the substance after considering

(1) the actual or probable abuse of the substance, including

(A) its history and current pattern of abuse;

(B) the scope, duration, and significance of abuse; and

(C) the degree of actual or probable detriment which may result from the abuse of the substance;

(2) the biomedical hazard of the substance, including

(A) its pharmacology: the effects and modifiers of effects of the substance;

(B) its toxicology: the acute and chronic toxicity, interaction with other substances, whether controlled or not, and liability to form or sustain psychological or physiological dependence;

(C) the risk to public health and particular susceptibility of segments of the population; and

(D) the existence of therapeutic alternatives for substances which are or may be used for medical purposes;

(3) the probable physical and social impact of widespread abuse of the substance;

(4) whether the substance is an immediate precursor of a substance already controlled under this chapter;

(5) the current state of scientific knowledge regarding the substance.

(d) If the committee designates a substance as an immediate precursor, substances which are precursors of the controlled precursor are not subject to control solely because they are precursors of the controlled precursor.

(e) The committee has no authority over tobacco or over intoxicating liquor as defined in AS 04.20.010.

Sec. ~~17.17.030.~~ // NOMENCLATURE. The controlled substances listed

in the schedules in AS ~~17.17.040~~ 11 ~~17.17.090~~ or the regulations adopted under this chapter are included by whatever official, common, usual, chemical, or trade name designated. In some instances, slang terms are listed after a controlled substance. In a prosecution or other proceeding under this chapter, it is not a defense and it is immaterial that a slang term is listed after more than one controlled substance, that a slang term listed after a controlled substance is inaccurately applied to that controlled substance, that no slang term is listed after a controlled substance, or that slang terms other than those listed apply in fact to a controlled substance.

Sec. ~~17.17.040~~ 11. SCHEDULE A (a) A substance shall be placed in Schedule I if it is found under AS ~~17.17.020~~ to have the highest degree of danger or probable danger.

(b) Unless specifically excepted or unless listed in another schedule, Schedule I controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers, (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

(A) raw opium (slang terms: op, pen yan, hop, tar, black stuff);

(B) opium extracts;

(C) opium fluid extracts;

(D) powdered opium;

(E) granulated opium;

(F) tincture of opium;

(G) codeine (slang term: school boy);

(H) ethylmorphine;

(I) etorphine hydrochloride;

(J) hydrocodone;

(K) hydromorphone;

(L) metopon;

(M) morphine (slang terms: cube, first line, hocus, Miss Emma, morph, morpho, morphy, mud, white stuff, hard stuff, M, unkie);

(N) oxycodone;

(O) oxymorphone;

(P) thebaine;

(2) any salt, compound, derivative, or preparation of these which is chemically equivalent or identical with any of the substances referred to in (1) of this subsection, except that these substances do not include the isoquinoline alkaloids of opium;

(3) opium poppy and poppy straw;

(4) concentrate of poppy straw (the crude extract of poppy straw in liquid, solid, or powder form which contains the phenanthrine alkaloids of the opium poppy);

(5) acetylmethadol;

(6) allylprodine;

(7) alphacetylmethadol;

(8) alphameprodine;

(9) alphamethadol;

(10) benzethidine;

(11) betacetylmethadol;

(12) betameprodine;

(13) betamethadol;

(14) betaprodine;

(15) clonitazene;

(16) dextromoramide;

(17) diampromide;

(18) diethylthiambutene;

(19) difenoxin;

(20) dimenoxadol;

(21) dimepheptanol;

(22) dimethylhiambutene;

(23) dioxaphetyl butyrate;

(24) dipipanone;

(25) ethylmethylthiambutene;

(26) etonitazene;

(27) etoxeridine;

(28) furethidine;

(29) hydroxpethidine;

(30) ketobemidone;

(31) levomoramide;

(32) levophenacylmorphan;

(33) morpheridine;

(34) noracymethadol;

(35) norlevorphanol;

(36) normethadone;

(37) norpipanone;

(38) phenadoxone;

(39) phenampromide;

(40) phenomorphan;

(41) phenoperidine;

(42) piritramide;

(43) proheptazine;

(44) properidine;

(45) propiram;

(46) racemoramide;

(47) trimeperidine;

(48) acetorphine;

(49) acetyldihydrocodeine;

(50) benzylmorphine;

(51) codeine methylbromide;

(52) codeine-N-oxide;

(53) cyprenorphine;

(54) desomorphine;

(55) dihydromorphine;

(56) drotebanol;

(57) etorphine;

(58) heroin (slang terms: big H, boy, brown, brown sugar, caballo, Chinese red, chiva, crap, doojee, H, Harry, horse, junk, Mexican mud, powder, scag, smack, stuff, thing, joy powder, white stuff, sugar, hairy, skag, schmeck);

(59) hydromorphinol;

(60) methyldesorphine;

(61) methyldihydromorphine;

(62) morphine methylbromide;

(63) morphine methylsulfonate;

(64) morphine-N-oxide;

(65) myrophine;

(66) nicocodeine;

(67) nicomorphine;

(68) normorphine;

(69) pholcodine;

(70) thebacon;

(71) alphaprodine;

(72) anileridine;

(73) bezitramide;

(74) dihydrocodeine;

(75) diphenoxylate;

(76) fentanyl;

(77) isomethadone;

(78) levomethorphan;

(79) levorphanol;

(80) metazocine;

(81) methadone;

(82) methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane;

(83) moramide-intermediate, 2-methyl-3-morpholino-1, 1-diphenylpropane-carboxylic acid;

(84) pethidine (meperidine);

(85) pethidine-intermediate-A, 4-cyano-1-methyl-4-phenylpiperidine;

(86) pethidine-intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate;

(87) pethidine-intermediate-C, 1-methyl-4-phenylpiperidine-4-carboxylic acid;

(88) phenazocine;

(89) piminodine;

(90) racemethorphan;

(91) racemorphan.

Sec. ~~17.17.050.~~ 17.17.040 ~~SCHEDULE II~~ SCHEDULE B. (a) A substance shall be placed in schedule II if it is found under AS 17.17.020 to have a degree of danger or probable danger lower than Schedule I controlled substances but higher than Schedule ~~III~~ C controlled subtances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule ~~II~~ B controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) coca leaves and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, derivative, or preparation of these which is chemically equivalent or identical with any of these substances, except that the substances do not include decocainized coca leaves or extractions of coca leaves, which extractions do not contain cocaine or ecgonine (slang terms: Bernice, bernies, big C, blow, C, coke, dream, flake, girl, gold dust, heaven dust, nose candy, paradise, rock, white, happy dust, speedballs, snow birds, Cecil, stardust, Corine, Carrie, dust, Burese);

(2) 4-bromo-2,5-dimethoxy-amphetamine, also known as bromo-2, 5-dimethoxy-a-methylphenethylamine and 4-bromo-2,5-DMA;

(3) 2,5-dimethoxyamphetamine, also known as 2,5-dimethoxy-a-methylphenethylamine and 2,5-DMA;

(4) 4-methoxyamphetamine, also known as 4-methoxy-a-methylphenethylamine and paramethoxyamphetamine, PMA;

(5) 5-methoxy-3,4-methylenedioxy-amphetamine;

(6) 4-methyl-2,5-dimethoxy-amphetamine, also known as 4-methyl-2,5-dimethoxy-a-methylphenethylamine (slang terms: DOM, MDA, STP, serenity, tranquility, and peace, cone drug);

(7) 3,4-methylenedioxy amphetamine;

(8) 3,4,5-trimethoxy amphetamine;

(9) bufotenine, also known as 3-(b-dimethylaminoethyl)-5-hydroxyindole and 3-(2-dimethylaminoethyl)-5-indolol and N,N-dimethylserotonin and 5-hydroxy-N,N-dimethyltryptamine and mappine;

(10) diethyltryptamine, also known as N,N-diethyltryptamine and DET;

(11) dimethyltryptamine, also known as DMT (slang terms: businessman's special, lunch-hour trip);

(12) ibogaine, also known as 7-ethyl-6,6,B,7,8,9,10,12,13-octahydro-2-methoxy-6,9-methano-5H-pyrido [1', 2':1,2] azepino [5,4-b] indole and Tabernanthe iboga;

(13) lysergic acid diethylamide (slang terms: Alice D, acid, beast, big D, blue cheer, blue heaven, blue mist, brown dots, California sunshine, chocolate chips, coffee, contact lens, cupcakes, haze, mellow yellows, microdots, orange mushrooms, orange wedges, Owsley, paper acid, royal blue, strawberry fields, sugar, sunshine, the hawk, wedges, white lightning, window pane, yellows, cubes, 25, Lucy in the sky with diamonds);

(14) mescaline (slang terms: mesc, mescal, moon);

(15) peyote, meaning all parts of the plant presently classi-

fied botanically as Lophophora williamsii Lemaire, whether growing or not, the seeds of the plant, any extract from any part of the plant, and every compound, manufacture, salts, derivative, mixture, or preparation of the plant, its seeds, or extracts (slang terms: buttons, cactus, mescal buttons, mesc, mescal, plants);

(16) N-ethyl-3-piperidyl benzilate;

(17) N-methyl-3-piperidyl benzilate (slang term: LBJ);

(18) psilocybin (slang terms: magic mushroom, mushroom);

(19) psilocyn (slang terms: magic mushroom, mushroom);

(20) chemically synthesized tetrahydrocannabinols, also known as THC;

(21) thiophene analog of phencyclidine, also known as: 1-[1-(2-thienyl) cyclohexyl] piperidine and 2-thienyl analog of phencyclidine and TPCP;

(22) phencyclidine, also known as PCP (slang terms: angel dust, DOA (Dead On Arrival), hog, killer weed (when combined with marijuana or other plant material), peace pill);

(23) mecloqualone;

(24) amphetamine, its salts, optical isomers, and salts of its optical isomers (slang terms: beans, bennies, black beauties, blackbirds, black Mollies, bumblebees, cartweels, chalk, chicken powder, copilots, crank, crossroads, crystal, dexies, double cross, eye openers, hearts, jelly beans, lightning, meth, minibennies, nuggets, oranges, pep pills, speed, roses, thrusters, truck drivers, turnabouts, uppers, ups, wake-ups, peaches, whites, browns, greenies, bombido, jugs, bottles, lid proppers, football, coast-to-coast, L.A. turnabouts);

(25) methamphetamine, its salts, isomers, and salts of its isomers (slang terms: bombido, crystal, meth, speed, splash);

(26) phenmetrazine and its salts;

(27) methylphenidate;

(28) methaqualone (slang terms: ludes, quas, quads, soapers, sopes);

(29) amobarbital (slang terms: barbs, block busters, Christmas trees, downers, green dragons, peanuts, sleeping pills, stumblers, goofballs, goofs, tuinal, tuies, rainbow, double trouble, red and blues);

(30) secobarbital (slang terms: barbs, block busters, Christmas trees, downers, green dragons, peanuts, sleeping pills, stumblers, goofballs, goofs, tuinal, tuies, rainbow, double trouble, red and blues, reds, red birds, red devils, seccy, pink, seggy, pink ladies, marshmallow reds, Mexican reds);

(31) pentobarbital (slang terms: barbs, block busters, Christmas trees, downers, green dragons, peanuts, sleeping pills, stumblers, goofballs, goofs, yellow jackets, yellows, nimbys, nimbies, nobbies).

Sec. ~~17.17.060~~ 11. SCHEDULE ~~III~~ C. (a) A substance shall be placed in Schedule ~~III~~ S if it is found under AS ~~17.17.020~~ 11 to have a degree of danger or probable danger lower than Schedule II controlled substances but higher than Schedule ~~IV~~ 3 controlled substances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule ~~III~~ D controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a

combination of extraction and chemical synthesis:

(1) benzphetamine;

(2) chlorphentermine;

(3) clortermine;

(4) mazindol;

(5) phendimetrazine;

(6) any compound, mixture, or preparation containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances combined with one or more other active medicinal ingredients which are not listed in any classification in this section;

(7) any suppository dosage form containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances which are approved by the federal Food and Drug Administration for marketing only as a suppository;

(8) any substance, having a depressant effect on the central nervous system, which contains any quantity or derivative of barbituric acid or any salt of these;

(9) chlorhexadol;

(10) glutethimide (slang terms: C.D., cibas);

(11) lysergic acid;

(12) lysergic acid amide;

(13) methyprylon;

(14) sulfondiethylmethane;

(15) sulfonethylmethane;

(16) sulfonmethane;

(17) nalorphine;

(18) any material, compound, mixture, or preparation containing limited quantities of any of the following substances or any of their salts:

(A) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium;

(B) not more than 1.8 grams of codeine per 100 milli liters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(C) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium;

(D) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(E) not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(F) not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(G) not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(H) not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic

ingredients in recognized therapeutic amounts.

Sec. ~~17.17.070~~ 11 D. SCHEDULE ~~IV.~~ (a) A substance shall be placed in Schedule ~~IV~~ D if it is found under AS ~~17.17.020~~ 11 to have a degree of danger or probable danger lower than Schedule ~~III~~ D controlled substances but higher than Schedule ~~V~~ E controlled substances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule IV controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) barbital;

(2) chloral betaine;

(3) chloral hydrate (slang terms: knockout drops, Mickey Finn, Mickey, Peter);

(4) chlordiazepoxide;

(5) clonazepam;

(6) clorazepate;

(7) diazepam;

(8) ethchlorvynol;

(9) ethinamate;

(10) flurazepam;

(11) lorazepam;

(12) mebutamate;

(13) meprobamate;

(14) methohexital;

(15) methylphenobarbital (mephobarbital);

(16) oxazepam;

(17) paraldehyde;

(18) petrichloral;

(19) phenobarbital;

(20) prazepam;

(21) pentazocine;

(22) fenfluramine;

(23) diethlpropion;

(24) phentermine;

(25) pemoline, including organometallic complexes and chelates thereof;

(26) dextropropoxyphene (alpha-(+)-4-dimethylamino-1,2-diphenyl-3-methyl-2-propionoxybutane);

(27) hashish and hashish oil (slang terms: black Russian, hash, kif, quarter moon, soles).

Sec. ~~17.17.080.~~ SCHEDULE V. (a) A substance shall be placed in Schedule V if it is found under AS 17.17.020 to have a degree of danger or probable danger lower than Schedule IV controlled substances but higher than Schedule VI controlled substances.

(b) Unless specifically excepted or unless listed in another schedule, Schedule V controlled substances include loperamide and any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from

substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis. Schedule V controlled substances include the following controlled substances, otherwise listed in AS 17.17.040(b), when they are combined in the following portions with one or more nonnarcotic active medicinal ingredients in sufficient portion to confer upon the compound mixture preparation valuable medicinal qualities other than those possessed by the Schedule I controlled substance:

(1) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;

(2) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;

(3) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;

(4) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;

(5) not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

Sec. ~~17.17.~~090. SCHEDULE ~~VI.~~ (a) A substance shall be placed in Schedule ~~VI~~ if it is found under AS ~~17.17.~~020 to have the lowest degree of danger or probable danger.

(b) Schedule VI controlled substances include marijuana (slang terms: Acapulco gold, broccoli, bush, dry high, gage, ganga, grass, griffo, hay, hemp, herb, J, Jay, Jane, Mary Jane, mota, mutah, Panama red, pod, pot, reefer, sativa, smoke, stick, tea, weed, stuff, rope, joints, Texas tea, goof butt, jive, sweet lunch, stinkweed, locoweed, mezz, Mary Waner, Indian hay, fu, bobo bush).

ARTICLE 2. OFFENSES AND PENALTIES.

Sec. ~~17.17.~~200. DISTRIBUTING A CONTROLLED SUBSTANCE TO A MINOR.

(a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a controlled substance to a minor who is at least three years his junior.

(b) A person who violates this section with respect to

(1) a Schedule I controlled substance is guilty of a class .. felony;

(2) a Schedule II controlled substance is guilty of a class A felony;

(3) a Schedule III controlled substance is guilty of a class A felony;

(4) a Schedule IV controlled substance is guilty of a class B felony;

(5) a Schedule V controlled substance is guilty of a class C felony;

(6) a Schedule VI controlled substance is guilty of a class C felony.

Sec. 17.17.210. MANUFACTURING. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to manufacture a controlled substance.

(b) A person who violates this section with respect to

(1) a Schedule A controlled substance is guilty of a class A felony;

(2) a Schedule B controlled substance is guilty of a class A felony;

(3) a Schedule II controlled substance is guilty of a class B felony;

(4) a Schedule IV controlled substance is guilty of a class B felony;

(5) a Schedule V controlled substance is guilty of a class C

felony;

(6) a Schedule F controlled substance is guilty of a class C felony.

Sec. ~~17.17.~~11.220. DISTRIBUTING A SCHEDULE ~~I~~ A CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule I controlled substance.

(b) A person is guilty of a class A felony if he violates this section by knowingly distributing

(1) 50 or more capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(A) one-eighth ounce or more containing heroin or morphine or any of their respective alkaloids or salts; or

(B) one-half ounce or more containing a Schedule I controlled substance other than heroin or morphine or any of their respective alkaloids or salts.

(c) A person is guilty of a class B felony if he violates this section by knowingly distributing a Schedule I controlled substance in a smaller amount than the ranges specified in (b) of this section.

Sec. ~~17.17.~~11.230. DISTRIBUTING A SCHEDULE B CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule B controlled substance.

(b) A person is guilty of a class A felony if he violates this section by knowingly distributing

(1) 50 or more capsules, tablets, ampules, or syrettes containing a Schedule B controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight or one-half ounce or more containing a

Schedule ~~II~~ controlled substance.

(c) A person is guilty of a class B felony if he violates this section by knowingly distributing a Schedule II controlled substance in a smaller amount than the ranges specified in (b) of this section.

Sec. ~~17.17~~.240. DISTRIBUTING A SCHEDULE ~~III~~ CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule III controlled substance.

(b) A person is guilty of a class B felony if he violates this section by knowingly distributing

(1) 50 or more capsules, tablets, ampules, or syrettes containing a Schedule III controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more containing a Schedule III controlled substance.

(c) A person is guilty of a class C felony if he violates this section by knowingly distributing a Schedule III controlled substance in a smaller amount than the ranges specified in (b) of this section.

Sec. ~~17.17~~.250. DISTRIBUTING A SCHEDULE IV CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule IV controlled substance.

(b) A person is guilty of a class C felony if he violates this section by knowingly distributing

(1) 50 or more capsules, tablets, ampules, or syrettes containing a Schedule IV controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more containing a Schedule IV controlled substance.

(c) A person who violates this section by knowingly distributing a Schedule IV controlled substance in a smaller amount than the ranges

specified in (b) of this section is guilty of a class C felony and is punishable as provided in AS 12.55 except that a term of imprisonment, if imposed, may not exceed three years and a fine, if imposed, may not exceed $10,000.

Sec. ~~17.17~~ 11.260. DISTRICTING A SCHEDULE ~~V~~ E CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule V controlled substance.

(b) A person who violates this section by knowingly distributing (1) 50 or more capsules or tablets containing a Schedule ~~V~~ E controlled substance or (2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more containing a Schedule ~~V~~ E controlled substance is guilty of a class C felony and is punishable as provided in AS 12.55 except that a term of imprisonment, if imposed, may not exceed three years and a fine, if imposed, may not exceed $10,000.

(c) A person who violates this section by knowingly distributing a Schedule ~~V~~ E controlled substance in a smaller amount than the ranges specified in (b) of this section is guilty of a class A misdemeanor.

Sec. ~~17.17~~ 11.270. DISTRIBUTING A SCHEDULE ~~VI~~ F CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to distribute a Schedule ~~VI~~ F controlled substance.

(b) A person is guilty of a class C felony if he violates this section by knowingly distributing one or more preparations, compounds, mixtures, or substances of an aggregate weight of 2.2 pounds or more containing a Schedule ~~VI~~ F controlled substance.

(c) A person who violates this section by knowingly distributing one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half pound or more but less than 2.2 pounds containing a Schedule ~~VI~~ F controlled substance is guilty of a class C

felony and is punishable as provided in AS 12.55 except that a term of imprisonment, if imposed, may not exceed three years and a fine, if imposed, may not exceed $10,000.

(d) A person is guilty of a class A misdemeanor if he violates this section by knowingly distributing one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than one-half pound containing a Schedule ~~VI~~ F controlled substance. However, in a prosecution under this subsection, it is a defense which reduces the crime to a class B misdemeanor that the preparations, compounds, mixtures, or substances containing a Schedule ~~VI~~ F controlled substance were of an aggregate weight of one ounce or less and that the distribution was made for no remuneration to a person 18 years of age or older. As used in this subsection, "defense" has the meaning ascribed to it in AS 11.81.900(b).

Sec. ~~17.17~~ 11.280. POSSESSION OF A SCHEDULE ~~I~~ A CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule ~~I~~ A controlled substance.

(b) A person is guilty of a class A felony if he violates this section by knowingly possessing

(1) 100 or more capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(A) one ounce or more containing heroin or morphine or any of their respective alkaloids or salts; or

(B) two ounces or more containing a Schedule I controlled substance other than heroin or morphine or any of their respective alkaloids or salts.

(c) A person is guilty of a class B felony if he violates this

section by knowingly possessing

(1) 50 or more but fewer than 100 capsules, tablets, ampules, or syrettes containing a Schedule ~~I~~ 4 controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(A) one-fourth ounce or more but less than one ounce containing heroin or morphine or any of their respective alkaloids or salts; or

(B) one-half ounce or more but less than two ounces containing a Schedule I controlled substance other than heroin or morphine or any of their respective alkaloids or salts.

(d) A person is guilty of a class C felony if he violates this section by knowingly possessing

(1) 25 or more but fewer than 50 capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(A) one-eighth ounce or more but less than one-fourth ounce containing herion or morphine or any of their respective alkaloids or salts; or

(B) one-fourth ounce or more but less than one-half ounce containing a Schedule I controlled substance other than heroin or morphine or any of their respective alkaloids or salts.

(e) A person is guilty of a class A misdemeanor if he violates this section by knowingly possessing a Schedule I controlled substance in a smaller amount than the ranges specified in 3 (d) of this section.

Sec. ~~17~~ 11.17.290. POSSESSION OF A SCHEDULE ~~II~~ CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule ~~II~~ 3 controlled substance.

(b) A person is guilty of a class A felony if he violates this section by knowingly possessing

(1) 200 or more capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule I controlled substance.

(c) A person is guilty of a class B felony if he violates this section by knowingly possessing

(1) 100 or more but fewer than 200 capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more but less than two ounces containing a Schedule I controlled substance.

(d) A person is guilty of a class C felony if he violates this section by knowingly possessing

(1) 50 or more but fewer than 100 capsules, tablets, ampules, or syrettes containing a Schedule I controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-fourth ounce or more but less than one-half ounce containing a Schedule I controlled substance.

(e) A person is guilty of a class A misdemeanor if he violates this section by knowingly possessing a Schedule II controlled substance in a smaller amount than the ranges specified in (d) of this section.

Sec. ~~17.17.~~300. POSSESSION OF A SCHEDULE ~~III~~ C CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule C controlled substance.

(b) A person is guilty of a class B felony if he violates this section by knowingly possessing

(1) 400 or more capsules, tablets, ampules, or syrettes containing a Schedule ~~III~~ C controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule III controlled substance.

(c) A person is guilty of a class C felony if he violates this section by knowingly possessing

(1) 100 or more but fewer than 400 capsules, tablets, ampules, or syrettes containing a Schedule ~~III~~ C controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one-half ounce or more but less than two ounces containing a Schedule ~~III~~ C controlled substance.

(d) A person is guilty of a class A misdemeanor if he violates this section by knowingly possessing a Schedule ~~III~~ C controlled substance in a smaller amount than the ranges specified in (c) of this section.

Sec. ~~17.17~~ 11.310. POSSESSION OF A SCHEDULE ~~IV~~ D CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule ~~IV~~ D controlled substance.

(b) A person is guilty of a class C felony if he violates this section by knowingly possessing

(1) 400 or more capsules, tablets, ampules, or syrettes containing a Schedule ~~IV~~ D controlled substance; or

(2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of two ounces or more containing a Schedule ~~IV~~ D controlled substance.

(c) A person who violates this section by knowingly possessing (1) 100 or more but fewer than 400 capsules, tablets, ampules, or syrettes containing a Schedule IV controlled substance or (2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

one-half ounce or more but less than two ounces containing a Schedule IV controlled substance is guilty of a class C felony and is punishable as provided in AS 12.55 except that a term of imprisonment, if imposed, may not exceed three years and a fine, if imposed, may not exceed $10,000.

(d) A person is guilty of a class A misdemeanor if he violates this section by knowingly possessing a Schedule IV controlled substance in a smaller amount than the ranges specified in (c) of this section.

Sec. 17.17.320. POSSESSION OF A SCHEDULE V CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess a Schedule V controlled substance.

(b) A person who violates this section by knowingly possessing (1) 400 or more capsules or tablets containing a Schedule V controlled substance or (2) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a Schedule V controlled substance is guilty of a class C felony and is punishable as provided in AS 12.55 except that a term of imprisonment, if imposed, may not exceed three years and a fine, if imposed, may not exceed $10,000.

(c) A person is guilty of a class A misdemeanor if he violates this section by knowingly possessing a Schedule V controlled substance in a smaller amount than the ranges specified in (b) of this section.

Sec. 17.17.330. POSSESSION OF LARGE AMOUNTS OF A SCHEDULE VI CONTROLLED SUBSTANCE. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to possess one or more preparations, compounds, mixtures, or substances of an aggregate weight of one pound or more containing a Schedule VI controlled substance.

(b) A person who violates this section by knowingly possessing one or more preparations, compounds, mixtures, or substances of an aggregate weight of 2.2 pounds or more containing a Schedule VI controlled sub-

stance is guilty of a class C felony and is punishable as provided in AS 12.55 except that a term of imprisonment, if imposed, may not exceed three years and a fine, if imposed, may not exceed $10,000.

(c) A person is guilty of a class A misdemeanor if he violates this section by knowingly possessing one or more preparations, compounds, mixtures, or substances of an aggregate weight of one pound or more but less than 2.2 pounds containing a Schedule ~~VI~~ F controlled substance.

Sec. ~~17.~~ 11 17.340. POSSESSION OF A SCHEDULE ~~VI~~ F CONTROLLED SUBSTANCE WHILE OPERATING A MOTOR VEHICLE, VESSEL, OR AIRCRAFT. (a) It is unlawful for a person to operate a motor vehicle, vessel, or aircraft with any amount of a Schedule ~~VI~~ F controlled substance in his immediate control.

(b) A person who violates this section is guilty of a class B misdemeanor.

Sec. ~~17.~~ 11 17.350. PUBLIC DISPLAY OR USE OF A SCHEDULE ~~VI~~ F CONTROLLED SUBSTANCE. (a) It is unlawful for a person to display or use any amount of a Schedule ~~VI~~ F controlled substance in a public place. As used in this subsection, "public place" has the meaning ascribed to it in AS 11.81.900(b).

(b) A person who violates this section is guilty of a violation.

Sec. ~~17.~~ 11 17.360. ~~POSSESSION~~ F OF A SCHEDULE ~~VI~~ CONTROLLED SUBSTANCE BY A MINOR. (a) It is unlawful for a minor knowingly to possess any amount of a Schedule ~~VI~~ F controlled substance.

(b) A person who violates this section is guilty of a violation.

Sec. ~~17.~~ 11 17.370. FAILURE TO MAKE, KEEP, OR FURNISH REQUIRED INFORMATION. (a) Except as authorized in this chapter, it is unlawful for a person knowingly to refuse or fail to make, keep, or furnish a record, notification, order form, statement, invoice, or information required

Maybe in both 11&17

under this chapter.

(b) A person who violates this section is guilty of a class B misdemeanor.

Sec. 17.17.380. MISCELLANEOUS OFFENSES. (a) Except as authorized in this chapter, it is unlawful for a person

(1) knowingly to keep or maintain a store, shop, warehouse, dwelling, building, vehicle, vessel, aircraft, or other structure or place which is used for keeping or selling controlled substances in violation of this chapter;

(2) to use in the course of the manuf. ture or distribution f a controlled substance a registration number which is ficticious, revoked, suspended, or issued to another person;

(3) to obtain possession of a controlled substance by misrepresentation, fraud, forgery, or other deception;

(4) to make, distribute, or possess a punch, die, plate, stone, or other thing designed to print, imprint, or reproduce the trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of the foregoing upon a drug or container or labeling so as to render a drug a counterfeit substance;

(5) to furnish false or fraudulent material information in, or omit material information from, an application, report, record, or other document required to be kept or filed under this chapter.

(b) A person who violates this section is guilty of a class C felony.

Sec. 17.17.390. LIMITATION ON PRESUMPTIVE SENTENCING. If, in a prosecution under AS 17.17.250(c), 17.17.260(b), 17.17.270(c), 17.17.-310(c), 17.17.320(b), or 17.17.330(b), a defendant is subject to presumptive sentencing under AS 12.55.125(e), the presumptive term to which he is subject may not be adjusted so as to result in a term of imprisonment

of more than three years.

Sec. ~~17~~ 11.17.400. OFFENSES DEFINED BY AMOUNTS. Whenever a provision of this chapter defining an offense requires a determination of an amount, it is not a defense to the lowest class of offense established by the evidence that the amount in question was larger than the amount which would make the offense a higher class of offense, and a person may be charged and convicted accordingly.

Sec. ~~17~~ 11.17.410. PENALTIES UNDER OTHER LAWS. A penalty imposed for a violation of this chapter is in addition to, and not in place of, a civil or administrative penalty or sanction otherwise authorized by law.

Sec. ~~17~~ 11.17.420. BAR TO PROSECUTION. If a violation of this chapter is a violation of a federal law or the law of another state, a conviction or acquittal under federal law or the law of another state for the same conduct is a bar to prosecution in this state.

ARTICLE 3. REGULATION OF MANUFACTURE, DISTRIBUTION, AND DISPENSING OF CONTROLLED SUBSTANCES.

Sec. 17.17.550. REGULATIONS. The ~~commissioner~~ Board of Pharmacy shall adopt regulations under the Administrative Procedure Act (AS 44.62) which are necessary for the administration of AS 17.17.550 - 17.17.610 and may charge reasonable fees relating to the registration and control of the manufacture, distribution, and dispensing of controlled substances in this state.

Sec. 17.17.560. REGISTRATION REQUIREMENTS. (a) A person who manufactures, distributes, or dispenses any controlled substance in this state or who proposes to engage in the manufacture, distribution, or dispensing of a controlled substance in this state, shall annually register with the ~~commissioner~~ Bd Pharm in accordance with regulations adopted under AS 17.17.550.

(b) A person registered by the ~~commissioner~~ Bd Pharm under AS 17.17.550 -

17.17.610 to manufacture, distribute, or dispense controlled substances, including any such activity in the conduct of research, may possess, manufacture, distribute, or dispense those substances to the extent authorized by his registration and in conformity with the other provisions of AS 17.17.550 - 17.17.610.

(c) The following persons need not register and may lawfully possess controlled substances under this chapter:

(1) an agent or employee of a registered manufacturer, distributor, or dispenser of a controlled substance if the possession is incidental to the agent's or employee's acting in the usual course of business or employment; Sampling of C.S.

(2) a common or contract carrier or warehouseman, or his employee, whose possession of a controlled substance is in the usual course of business or employment;

(3) a person in possession of a controlled substance under an order of a registered practitioner.

(d) The ~~commissioner~~ Board may, by regulation, waive the requirement for registration of certain manufacturers, distributors, or dispensers if he finds it consistent with the public health and safety,

(e) A separate registration is required for each principal place of business or professional practice where the applicant manufactures, distributes, or dispenses controlled substances.

(f) The ~~commissioner~~ Board may inspect the establishment of a registrant or applicant for registration in accordance with his regulations.

Sec. 17.17.570. REGISTRATION. (a) The ~~commissioner~~ Board shall register an applicant to manufacture, distribute, or dispense controlled substances included in the schedules in AS ~~17.17.070 - 17.17.090~~ Reg. Schedules unless he finds that the registration would be inconsistent with the public interest. In determining the public interest, the ~~commissioner~~ Bd shall consider

(1) maintenance of effective controls against diversion of controlled substances into other than legitimate medical, scientific, or industrial channels;

(2) compliance with applicable state and local law;

(3) any conviction of the applicant under federal or state laws relating to controlled substances;

(4) past experience in the manufacture or distribution of controlled substances, and the existence in the applicant's establishment of effective controls against diversion;

(5) furnishing by the applicant of false information in an application filed under this chapter;

(6) suspension or revocation of the applicant's federal registration to manufacture, distribute, or dispense controlled substances as authorized by federal law; and

(7) any other factors relevant to the public health and safety.

(b) A practitioner registered under federal law to manufacture, distribute, or dispense controlled substances in the conduct of research may be issued a registration to manufacture, distribute, or dispense those substances in the conduct of research in this state upon furnishing the ~~commissioner~~ Board with evidence of the federal registration. if auth to conduct research/dispense in AK.

(c) Compliance by a manufacturer or distributor with the provisions of the federal law respecting registration, excluding fees, entitles him to be registered under this chapter.

Sec. 17.17.580. REVOCATION AND SUSPENSION OF REGISTRATION. (a) A registration under AS 17.17.570 to manufacture, distribute, or dispense a controlled substance may be suspended or revoked by the ~~commissioner~~ Bd of Pharm upon a finding that the registrant or EXEMPTION from REGISTRATION

(1) has furnished false or fraudulent material information in

an application filed under this chapter;

(2) has been convicted of a felony under state or federal law relating to a controlled substance; or

(3) has had his federal registration to manufacture, distribute, or dispense controlled substances suspended or revoked.

(b) The ~~commissioner~~ Bd Pharm may limit the revocation or suspension of a registration to the particular controlled substance with respect to which grounds for revocation or suspension exist.

(c) If the ~~commissioner~~ Bd suspends or revokes a registration, all controlled substances owned or possessed by the registrant at the time of suspension or the effective date of the revocation order may be placed under seal. A disposition may not be made of substances under seal until the time for taking an appeal has elapsed or until all appeals have been concluded unless a court, upon application, orders the sale of perishable substances and the deposit of the proceeds of the sale with the court. Upon a revocation order becoming final, all controlled substances are forfeited to the state.

(d) The ~~commissioner~~ Bd shall promptly notify the Drug Enforcement Administration of all orders suspending or revoking registration and all forfeitures of controlled substances.

Procedure for Denial, Suspension or Revocation of Reg.

Sec. 17.17.590. ORDER TO SHOW CAUSE. (a) Before denying, suspending or revoking a registration, or refusing a renewal of registration, the ~~commissioner~~ Bd shall serve upon the applicant or registrant an order to show cause why registration should not be denied, revoked, or suspended, or why the renewal should not be refused. The order to show cause shall contain a statement of the basis for it and shall call upon the applicant or registrant to appear before the ~~commissioner~~ Bd at a time and place not less than 30 days after the date of the service of the order, but in the case of a refusal of renewal of registration the show

cause order shall be served not later than 30 days before the expiration of the registration. These proceedings shall be conducted under the administrative adjudication provisions of the Administrative Procedure Act (AS 44.62.330 - 44.62.630) without regard to criminal prosecution or other proceeding. [Proceedings to refuse renewal of registration do not abate the existing registration, which remains in effect pending the outcome of the administrative hearing.]

(b) The ~~commissioner~~ Bd may, without an order to show cause, suspend a registration simultaneously with the institution of proceedings under AS 17.17.580 if ~~he~~ it finds that there is an imminent danger to the public health or safety which warrants this action. The suspension shall continue in effect until the conclusion of the proceedings, including judicial review of the proceedings, unless sooner withdrawn by the ~~commissioner~~ Bd or dissolved by a court of competent jurisdiction.

Sec. 17.17.600. RECORDS OF REGISTRANTS. A person registered or exempted from Reg to manufacture, distribute, or dispense or administer controlled substances under this chapter shall keep records and maintain inventories in conformance with the record-keeping and inventory requirements of federal law and with additional regulations the ~~commissioner~~ Bd may adopt.

Sec. 17.17.610. ORDER FORMS; PRESCRIPTIONS. (a) A controlled substance may be distributed by one registrant to another registrant only if the distribution is in accordance with federal requirements for order forms.

(b) A controlled substance may not be dispensed by a practitioner except in accordance with federal requirements regarding prescriptions for controlled substances; however, a controlled substance may be dispensed directly by a practitioner, other than a pharmacist, to an ultimate user without a prescription, in conformance with applicable labeling Reg. AS 8.80.90

ARTICLE 4. ENFORCEMENT AND ADMINISTRATION.

Different Wording

Sec. 17.17.750. ENFORCEMENT COOPERATION. It is the duty of the commissioner of public safety, officers of the division of state troopers, officers appointed to enforce criminal law in this state or another state, local government law enforcement officers, the attorney general, and all prosecuting attorneys to enforce all provisions of this chapter and to cooperate with agencies charged with enforcement of the laws relating to controlled substances of the United States, of this state, and of all other states.

Sec. 17.17.760. Seizure FORFEITURES. (a) The following are subject to forfeiture:

(1) a controlled substance which has been manufactured, distributed, acquired, or possessed in violation of this chapter;

(2) raw materials, products, and equipment which are used in manufacturing, (Compounding) or distributing a controlled substance in violation of this chapter;

(3) property which is used as a container for property described in (1) or (2) of this subsection;

(4) conveyances, including aircraft, vehicles, or vessels which are used to transport or in any manner to facilitate transportation of property described in (1) or (2) of this subsection for the purpose of sale or receipt, except

(A) a conveyance is not subject to forfeiture under this section if its use in violation of this chapter was committed by a person other than the owner of the conveyance and the owner was not privy to the violation;

(B) a forfeiture of a conveyance encumbered by a bona fide security interest at the time of seizure is subject to the interest of the secured party if its use in violation of this chapter was committed by a person other than the secured party and

the secured party was not privy to the violation;

(5) all books, records, and research products and materials, including formulas, microfilm, tapes, and data which are used in violation of this chapter.

(b) Property listed in (a) of this section may be forfeited to the state upon conviction of the defendant of a violation of this chapter or upon judgment of a court of competent jurisdiction in a civil proceeding in rem that an item is subject to forfeiture.

(c) Property subject to forfeiture under this section may be seized by the commissioner of public safety upon an order issued by the court having jurisdiction over the property upon a showing of probable cause that the property is subject to forfeiture. Seizure without a court order may be made if

(1) the seizure is incident to a valid arrest or a search under a valid search warrant;

(2) the property subject to seizure has been the subject of a prior judgment in favor of the state in a criminal proceeding or a civil proceeding in rem based upon this chapter;

(3) there is probable cause that the property was or is being used in violation of this chapter and the property is easily movable.

(d) Property seized under (c)(3) of this section may not be held over 48 hours or until an order may be applied for and issued by a court, whichever is earlier.

(e) Property seized or detained under this section is in the custody of the Department of Public Safety subject only to the orders and decrees of the court having jurisdiction over the forfeiture proceedings. If property is seized under this section, the Department of Public Safety may

(1) place the property under seal;

PAGE 36

MISSING FROM FILE

upon the state to prove by clear and convincing evidence that the item in question is subject to forfeiture.

(c) Liability is not imposed by this chapter upon an authorized state or local officer engaged in the lawful performance of his duties.

Sec. 17.17.780. EDUCATION AND RESEARCH. (a) The ~~commissioner~~ Bd shall carry out educational programs designed to prevent and deter abuse of controlled substances. In connection with these programs, the commissioner may

(1) promote better recognition of the problems of abuse of controlled substances within the regulated industry and among interested groups and organizations;

(2) assist the regulated industry and interested groups and organizations in contributing to the reduction of abuse of controlled substances;

(3) consult with interested groups and organizations to aid them in solving administrative and organizational problems;

(4) evaluate procedures, projects, and techniques conducted or proposed as part of educational programs on abuse of controlled substances;

(5) disseminate the results of research on abuse of controlled substances to promote a better public understanding of the problems which exist and their solutions; and

(6) assist in the education and training of state and local law enforcement officials in their efforts to prevent abuse of controlled substances.

(b) The commissioner shall encourage research on controlled substances and may

(1) establish methods to assess the effects of controlled substances and identify and characterize those with potential for abuse;

(2) undertake research to

(A) develop new or improved approaches, techniques, systems, equipment, and devices to strengthen the enforcement of this chapter;

(B) determine patterns of abuse of controlled substances and their social effects;

(C) improve methods for preventing, predicting, and understanding the abuse of controlled substances;

(3) enter into contracts with public agencies, institutions of higher education, and organizations or individuals for conducting research on abuse of controlled substances and for performing related educational activities.

ARTICLE 5. GENERAL PROVISIONS.

Sec. 17.17.900. DEFINITIONS. As used in this chapter, unless the context requires otherwise,

(1) "administer" means the direct application of a controlled substance, whether by injection, inhalation, ingestion, or any other means, to the body of a patient or research subject by

(A) a practitioner or, in his presence, by his authorized agent, or PA

(B) the patient or research subject at the direction and in the presence of a practitioner;

(2) "agent" means an authorized person who acts on behalf of or at the direction of a manufacturer, distributor, or dispenser; "agent" does not include a common or contract carrier, public warehouseman, or employee of the carrier or warehouseman;

(3) "commissioner" means the commissioner of health and social services; B to Pharm

(4) "controlled substance" means a drug, substance, or

immediate precursor included within any of the Fedl schedules in AS ~~17.17.040 - 17.17.( )~~;

(5) "counterfeit substance" means a controlled substance which, or the container or labeling of which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, number, or device, or any likeness to it, of a manufacturer, distributor, or dispenser other than the person who in fact manufactured, distributed, or dispensed the substance;

(6) "deliver" or "delivery" means the actual, constructive, or attempted transfer from one person to another of a controlled substance, whether or not there is an agency relationship;

(7) "dentist" means a person authorized by law to practice dentistry [in this state;]

(8) "dispense" means to deliver a controlled substance to an ultimate user or research subject by a practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for that delivery;

(9) "distribute" means to deliver, other than by administering or dispensing, a controlled substance;

(10) "drug"

(A) means

(i) substances recognized as drugs in the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, or official National Formulary, or any supplement to any of them;

(ii) substances intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals;

(iii) substances, other than food, intended to affect

SB 11

the structure or any function of the body of humans or animals; and

(iv) substances intended for use as a component of any article specified in (i), (ii), or (iii) of this subparagraph;

(B) does not include devices or their components, parts, or accessories;

(11) "hashish" means the resin produced by the plant (genus) Cannabis;

(12) "hashish oil" means the viscous liquid concentrate of tetrahydrocannabinols extracted from hashish;

(13) "immediate precursor" means a substance which the Controlled Substances Advisory Committee has found to be and is by regulation designated as the principal compound commonly used or produced primarily for use, and which is an immediate chemical intermediary used or likely to be used, in the manufacture of a controlled substance, the control of which is necessary to prevent, curtail, or limit manufacture;

17 (14) "manufacture" means the production, preparation, propagation, compounding, conversion, or processing of a controlled substance, either directly or indirectly by extraction from substances of natural origin or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, and includes any packaging or repackaging of the substance or labeling or relabeling of its container, except that this term does not include the preparation or compounding of a controlled substance by an individual for his own use or the preparation, compounding, packaging, or labeling of a controlled substance

(A) by a practitioner as an incident to his administering or dispensing a controlled substance in the course of his

professional practice, or

(B) by a practitioner, or by his authorized agent under his supervision, for the purpose of, or as an incident to, research, teaching, or chemical analysis and not for sale;

-17 (15) "marijuana" means the leaves, stems, flowers, and seeds of the plant (genus) Cannabis, whether growing or not, but does not include the resin or oil extracted from any part of the plant, or any compound, manufacture, salt, derivative, mixture, or preparation from the resin or oil, including hashish and natural or synthetic tetrahydrocannabinol; it does not include the mature stalks of the plant, fiber produced from the stalks, oil or cake made from the seeds of the plant, any other compound, manufacture, salt, derivative, mixture, or preparation of the mature stalks, fiber, oil or cake, or the sterilized seed of the plant which is incapable of germination;

(16) "minor" means a person who is under 18 years of age;

(17) "opiate" means a substance having an addiction-forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having addiction-forming or addiction-sustaining liabilty; it does not include, unless specifically designated as controlled under AS 17.17.020, the dextrorotatory isomer of 3-methoxy-n-methylmorphinan and its salts (dextromethorphan); it does include its racemic and levorotatory forms;

(18) "opium poppy" means the plant of the species Papaver somniferum L., except its seeds;

(19) "poppy straw" means all parts, except the seeds, of the opium poppy, after mowing;

(20) "practitioner" means

(A) a physician, dentist, veterinarian, scientific investigator, or other person licensed, registered, or otherwise

permitted to distribute, dispense, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state;

(B) a pharmacy, hospital, or other institution licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state;

(21) "production" includes the manufacture, planting, cultivation, growing, or harvesting of a controlled substance;

(22) "ultimate user" means a person who lawfully possesses a controlled substance for his own use, for the use of a member of his household, or for administering to an animal owned by him or a member of his household.

Sec. 17.17.990. SHORT TITLE. This chapter may be cited as the Controlled Substances Act.

* Sec. 2. AS 08.64.380(3)(B) is amended to read:

(B) habitual overuse of alcoholic beverages or <u>controlled substances as defined in AS 17.17</u> [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUGS, AS DEFINED IN AS 17.12.150(3), OR ADDICTION TO THE USE OF NARCOTIC DRUGS AS DEFINED IN AS 17.10.230(13)];

* Sec. 3. AS 08.80.470 is amended to read:

Sec. 08.80.470. CONSTRUCTION. Nothing in this chapter amends, modifies, repeals or otherwise changes any provision of the <u>Controlled Substances Act (AS 17.17)</u> [UNIFORM NARCOTIC DRUG ACT (AS 17.10)] or the Alaska Food, Drug and Cosmetic Act (AS 17.20).

* Sec. 4. AS 12.55.155(c) is amended by adding new paragraphs to read:

(15) the offense is defined in AS 17.17, and the commmission of the offense involved smuggling controlled substance into this state;

(16) the offense is defined in AS ~~17~~ 11.17, and the commission of the offense involved large quantities of a controlled substance;

(17) the offense is defined in AS 17.17, and the commission of the offense involved the distribution of a controlled substance adulterated with a toxic substance.

* Sec. 5. AS 12.55.155(d) is amended by adding new paragraphs to read:

(13) the offense is defined in AS ~~17~~ 11.17, and the commission of the offense involved small quantities of a controlled substance;

(14) the offense is defined in AS ~~17~~ 11.17, and the commission of the offense involved the distribution of a controlled substance for no remuneration to a personal acquaintance 19 years of age or older;

(15) the offense is defined in AS ~~17~~ 11.17, and the commission of the offense involved the possession of a controlled substance for personal use in the defendant's home.

* Sec. 6. AS 44.29.020 is amended to read:

Sec. 44.29.020. DUTIES OF DEPARTMENT. The Department of Health and Social Services shall administer the state programs of public health and social services, including: (1) maternal and child health services; (2) preventive medical services; (3) public health nursing services; (4) sanitation and engineering services; (5) nutrition services; (6) health education; (7) laboratories; (8) mental health treatment and diagnosis; (9) management of state institutions; (10) medical facilities; (11) old age assistance; (12) aid to dependent children; (13) aid to the blind; (14) child welfare services; (15) general relief; (16) licensing and supervision of child care facilities; [AND] (17) probation and parole supervision; and (18) control of drug abuse in accordance with AS ~~17~~ 11.17. Not 17

* Sec. 7. (a) Prosecution for a violation of law occurring before the effective date of this Act is not affected or abated by this Act. If the

offense being prosecuted is similar to one defined in AS 17.17, then the penalties under AS 17.17 apply if they are less than those under prior law.

(b) Civil seizures or forfeitures and injunctive proceedings commenced before the effective date of this Act are not affected by this Act.

(c) All administrative proceedings pending under prior laws which are superseded by this Act shall be continued and brought to a final determination in accord with the laws and rules in effect before the effective date of this Act.

Bd of Pharm

(d) The commissioner of health and social services shall initially permit persons to register under AS 17.17 who own or operate an establishment engaged in the manufacture, distribution, or dispensing of a controlled substance before the effective date of this Act and who are registered or licensed by this state.

(e) This Act applies to violations of law, seizures and forfeitures, injunctive proceedings, administrative proceedings, and investigations which occur on or after the effective date of this Act.

* Sec. 8. Orders issued and regulations adopted under a law affected by this Act and in effect on the effective date of this Act and not in conflict with this Act continue in effect until modified, superseded, or repealed.

* Sec. 9. AS 17.10; AS 17.12; and AS 17.15 are repealed.

May be some others.

IV. DATE 1/28/80 PREPARED BY William D. Thomson, Deputy Commissioner
AGENCY Department of Education
PHONE 465-2800

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/79)

ASSOCIATION OF ALASKA SCHOOL BOARDS
SUITE 3, 204 NORTH FRANKLIN STREET • JUNEAU, ALASKA 99801 • PHONE 586-1083

FOUR BARGAINING PRINCIPLES

1. Collective bargaining is not a process whereby the general form, quantity or quality of publicservices are to be, or should be, determined. It is not a process for the management of public services.

2. Collective bargaining is not a device to determine public policy except as it may be used to determine the wages and economic benefits that are to be provided for public employees.

3. Collective bargaining is not, nor should it be, a substitute for the proper functioning of a representative government.

4. Collective bargaining should not be permitted to constrain the proper functioning of representative government.

THE RIGHTS OF PUBLIC EMPLOYEES TO STRIKE Vs. THE RIGHTS OF THE PUBLIC.

Because of the basic nature of public services wherein there is no real alternative choice to the established public service, special consideration must be afforded to the protection of both the interests of the general public and the interests of the public employees.

The interests of the general public dictate that any accommodation for collective bargaining and strikes in the public services... ..especially in the public schools... must carefully weigh, and balance, the desire of the employees to organize, bargain and strike against the rights of the public to expect the continued and uninterrupted provision of the public services that public policy has determined should exist. For example, permitting legalized strikes by public employees so upsets the process that the general public cannot withstand the imbalance of power that so results.

IOWA—

Personnel of the board shall be employed pursuant to the provisions of chapter 19A.

5. Members of the board and other employees of the board shall be allowed their actual and necessary expenses incurred in the performance of their duties. All expenses and salaries shall be paid from appropriations for such purposes and the board shall be subject to the budget requirements of chapter 8.

Referred to in sec. 20.3(5)

20.6 General powers and duties of the board. The board shall:

1. Administer the provisions of this chapter.

2. Collect, for public employers other than the state and its boards, commissions, departments, and agencies, data and conduct studies relating to wages, hours, benefits and other terms and conditions of public employment and make the same available to any interested person or organization.

3. Maintain, after consulting with employee organizations and public employers, a list of qualified persons representative of the public to be available to serve as mediators and arbitrators and establish their compensation rates.

4. Hold hearings and administer oaths, examine witnesses and documents, take testimony and receive evidence, issue subpoenas to compel the attendance of witnesses and the production of records, and delegate such power to a member of the board, or persons appointed or employed by the board, including hearing officers for the performance of its functions. The board may petition the district court at the seat of government or of the county wherein any hearing is held to enforce a board order compelling the attendance of witnesses and production of records.

5. Adopt rules in accordance with the provisions of chapter 17A as it may deem necessary to carry out the purposes of this chapter.

20.7 Public employer rights. Public employers shall have, in addition to all powers, duties, and rights established by constitutional provision, statute, ordinance, charter, or special act, the exclusive power, duty and the right to:

1. Direct the work of its public employees.

2. Hire, promote, demote, transfer, assign and retain public employees in positions within the public agency.

3. Suspend or discharge public employees for proper cause.

4. Maintain the efficiency of governmental operations.

5. Relieve public employees from duties because of lack of work or for other legitimate reasons.

6. Determine and implement methods, means, assignments and personnel by which the public employer's operations are to be conducted.

7. Take such actions as may be necessary to carry out the mission of the public employer.

8. Initiate, prepare, certify and administer its budget.

9. Exercise all powers and duties granted to the public employer by law.

20.8 Public employee rights. Public employees shall have the right to:

1. Organize, or form, join, or assist any employee organization.

2. Negotiate collectively through representatives of their own choosing.

3. Engage in other concerted activites for the purpose of collective bargaining or other mutual aid or protection insofar as any such activity is not prohibited by this chapter or any other law of the state.

4. Refuse to join or participate in the activities of employee organizations, including the payment of any dues, fees or assessments or service fees of any type.

Referred to in sec. 20.10

20.9 Scope of negotiations. The public employer and the employee organization shall meet at reasonable times, including meetings reasonably in advance of the public employer's budget-making process, to negotiate in good faith with respect to wages, hours, vacations, insurance, holidays, leaves of absence, shift differentials, overtime compensation, supplemental pay, seniority, transfer procedures, job classifications, health and safety matters, evaluation procedures, procedures for staff reductions, in-service training and other matters mutually agreed upon. Negotiations shall also include terms authorizing dues checkoff for members of the employee organization and grievance procedures for resolving any questions arising under the agreement, which shall be embodied in a written agreement and signed by the parties. If an agreement provides for dues checkoff, a member's dues may be checked off only upon the member's written request and the member may terminate the dues checkoff at any time by giving thirty days' written notice. Such obligation to negotiate in good faith does not compel either party to agree to a proposal or make a concession.

Nothing in this section shall diminish the authority and power of the merit employment department, board of regents' merit system, educational radio and television facility board's merit system, or any civil service commission established by constitutional provision, statute, charter or special act to recruit employees, prepare, conduct and grade examinations, rate candidates in order of their relative scores for certification for appointment or promotion or for other matters of classification, reclassification, or appeal rights in the classified service of the public employer served.

All retirement systems shall be excluded from the scope of negotiations.

Referred to in secs. 20.10, 20.17

20.10 Prohibited practices.

1. It shall be a prohibited practice for any public employer, public employee or employee organization to willfully refuse to negotiate in good faith with respect to the scope of negotiations as defined in section 20.9.

GREATER SITKA BOROUGH SCHOOL DISTRICT
ACCREDITED BY THE NORTHWEST ASSOCIATION OF SECONDARY SCHOOLS & COLLEGES

P. O. BOX 179 SITKA, ALASKA 99835

JOHN E COFFEE
SUPERINTENDENT

January 30, 1980

Representative Thelma Buchholdt
AK State House of Representatives
Pouch V, State Capitol Building
Juneau, AK 99811

Dear Representative Buchholdt:

I am writing because of my concern about two pieces of legislation that are before your H. E. S. S. Committee at this time. They are H.B. 487 and H.B. 453. The passage of these bills would result in the following:

(1) give teachers the right to strike
(2) allow school district classified employees the right to organize and strike
(3) expand what is bargainable
(4) provide binding arbitration in teacher bargaining

I believe that these bills together constitute a tremendous threat to local decision making and the local school board's right to operate a district responsibly and make some final decisions.

Binding arbitration would effectively place decision making authority in the hands of an entity outside the school district. This would be in direct contradiction to the local control theory of government. School boards are elected by law to manage the affairs of the district. They are, further, required by law to bargain in good faith on various items. This is currently done throughout the State. The result has been, generally, the highest paid teachers in the nation, working, in my view, in some of the best working conditions in the nation. I would refer you to the 1978-79 Alaska Association of School Boards publication entitled Survey of School District Budgeted Revenues, Expenditures, and Employee Benefits. It is my view that teacher unions are doing very well without having further advantages of binding arbitration, expanded bargainable items, and the right to strike.

In Sitka, we have recently received an advisory arbitrator's report that the Board has approved and that the teacher's union will vote on

soon. Hopefully, this will be the culmination of negotiations that began in November of 1978. If the report is accepted we will have a beginning teacher salary here of over $20,000. and a top salary of over $36,000.

The school boards I have worked for in Juneau and Sitka have been made up of reasonable people whose main motives have been to serve the community they represent. Final decision making authority on items that are bargainable must not be taken away from such local officials and given to an outside arbitrator.

I am hopeful that the representative of the Alaska School Board's Association, Mr. Robert Greene, and the respresentative of the Alaska Association of School Administrators, Dr. Cliff Hartman, will be listened to carefully by the H. E. S. S. Committee when they discuss the ramifications of these prooosed bills. It is vital that such legislation not become law.

Sincerely,

John E. Coffee, Superintendent
Sitka Borough School District

cc: Senator Pete Meland
Representative Richard Eliason

THE CORDOVA BOARD OF EDUCATION FEELS

THAT HOUSE BILLS 487 AND 453 CONTAIN ISSUES THAT SERIOUSLY REDUCE THE LOCAL SCHOOL BOARDS RIGHT TO MAKE DECISIONS,

THAT BINDING ARBITRATION IS NOT THE SOLUTION THAT WILL CURE THE ILLS OF THE NEGOTIATION PROCESS,

THAT THE INTENT OF AS14.20.550 THROUGH AS14.20.600 OF THE ALASKA SCHOOL LAW IS NOT TO ABROGATE THE LEGAL RESPONSIBILITIES, POWERS, OR DUTIES OF THE LOCAL SCHOOL BOARDS.

THAT THE INTENT OF THE LAW IS THAT SCHOOL BOARDS HAVE THE RIGHT TO MAKE FINAL DECISIONS ON POLICY AND EMPLOY EXCLUSIVE MANAGEMENT.

THE ISSUE OF ARBITRATION IS ADEQUATELY ADDRESSED IN AS14.20.530 AND FURTHER DEFINED UNDER CHAPTER 80 TITLE 4 EDUCATIONAL REGULATIONS.

JACK LAMB, PRESIDENT CORDOVA BOARD OF EDUCATION

CITY AND BOROUGH OF JUNEAU SCHOOL DISTRICT
P.O. BOX 808 • DOUGLAS, ALASKA 99824

February 5, 1980

The Honorable Thelma Buchholdt
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

The Juneau School Board wishes to go on record as being opposed to House Bill 453 and House Bill 487 for the following reasons and respectfully request that you do not support them.

House Bill 453 provides the right to strike to all employees of the School District, and in addition, provides mandatory bargaining to all employees with broad interpretations to what must be bargained. At the present time the Juneau School District negotiates with their classified employees so the legislation is not necessary, and above all, should not include the right for any employees to strike. Please remember that school boards in Alaska cannot raise money on their own, but must come to the Borough Assembly or Legislature for additional revenue. A striking action against the Board allows them no additional revenue with which to resolve the strike. Therefore, educational programs are cut back.

House Bill 487 on binding arbitration removes the decision making authority from the elected representatives of the people. Instead of leading to a solution of the problem by serious negotiations by both parties to avoid arbitration, often one or the other parties will hold out for arbitration. Historically arbitrators split the difference and everyone holds out with extreme offers as tactical maneuvers.

It is our opinion that the State Board of Education request to the Governor to form a Blue Ribbon Committee to seek the best alternative to the serious problems of negotiation should be honored. Passage of legislation before the study would be premature.

With the legislatures having second thoughts over the collective bargaining of State employees and contemplating some modifications, it seems appropriate to allow a study of the problems to take place before enacting legislation that may not serve any useful purpose.

The Juneau School District would appreciate your support on these two matters.

Sincerely,

Carole Burger

Carole Burger, President
Juneau School Board

Carl Rose
President
Skagway School Board
Skagway, Alaska

Dear Carl:

I have received your recent telegram. It will be entered into the record of the next House HESS Committee public hearing on HB 487 and HB 453. I would like to respond personally to your telegram with a few comments.

I do not believe that either bill would allow a teachers' union or the court system to totally regulate education in localities. The bills provide a framework for just settlement of negotiations between school boards and their employees. Each side would have an equal chance in negotiations and the outcome of negotiation would be decided by an independent, objective party. Thus, the bills would negate boards' power to refuse to negotiate with their employees, but they would not allow employees to automatically receive their demands. Rather, they would establish a structure for negotiation of those demands; each side would have an equal chance to get what it wants. Since the bills do not provide that all employee demands would be negotiable, the boards would retain total decision making power over certain issues. Moreover, the bills address collective bargaining and arbitration only, and do not attempt to reduce or even to address any of the local boards decision making rights in other areas.

The primary intent of the bills is to provide for final and

incontrovertible settlement of teacher-board disputes as quickly as possible. I believe the past history of teacher-board disputes demonstrates that to achieve final settlement in a timely manner, it is necessary that an outside observer be responsible for an ultimate decision instead of having one side or the other within the locality vested with this power.

I understand your position, but I believe that current law in this area is in need of revision.

Sincerely,

Thelma

Thelma Buchholdt
State Representative
District 9 (Spenard);
Chair, House HESS Committee

Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/79)

Minimum Fiscal Impact

Assumptions: 1. All additional teachers will enter on lowest salary placement with lowest benefit schedule ($20,000 + 15%)

2. Weighting factor average for special education students is absolute minimum (1.5)

3. Weighting adjustment accommodates all PTR reductions required by the bill, i.e., this fiscal note does not include the cumulative cost of dispersing mainstreamed special education students required by sec. 14.30.248 of the bill.

4. All present K-3 classes have a PTR of 1-20 or fewer. While we know this assumption is erroneous (Juneau's K-3 classes run between 1-19 and 1-30) we do not have data for all districts.

5. All districts will construct required classrooms during FY-81, and suitable excess space does not presently exist.

6. The Legislature will fully fun all costs of the bill during FY-81, rather than pick up debt retirement in third fiscal year.

7. Teachers will not negotiate lower special education PTRs, permitted by sec. 14.30.249(b) of the bill.

8. Adjustment of urban district PTR to state average will accommodate class size limitations imposed by the bill.

Teacher Costs

FY-79 Final ADM 87,300
FY-79 Classroom Teachers 5,057
FY-79 Special Ed. students 13,000
Adjusted Special Education Count (13,000 x 1.5) = 19,500
Total Adjusted ADM 93,800
Additional Teachers at state average (93,800 ÷ 17.3 - 5,057) = 365
Urban district PTR adjustment required to reduce PTRs to state average 500
Total Teacher cost (865 teachers x 23,000 minimum salary) = 19,895,000

Facility Costs
865 classrooms (minimum) x 900 square feet x $150 per square foot (minimum cost in state) = 116,775,000

Minimum Fiscal Impact (based upon assumptions) FY-81 $136,670,000

ASSOCIATION OF ALASKA SCHOOL BOARDS
SUITE 3, 204 NORTH FRANKLIN STREET • JUNEAU, ALASKA 99801 • PHONE 586-1083

May 20, 1980

The Honorable Thelma Buchholdt & Members
of House HESS Committee
Pouch V, State Capitol Building
Juneau, Alaska 99811

Dear Representative Buchholdt:

I am writing to express strong opposition to HB 488 regarding class size for several reasons which I will attempt to describe to you here.

One reason for AASB's opposition is the potential extreme high costs. I say potential because it is extremely difficult to assess the cost of the weighting factor and the impact on negotiating the number of exceptional children in a class. A number of school districts have attempted, however, to cost out the known quantities of the bill and I would like to share these with you.

Anchorage assesses its needs under the bill at requiring one hundred and seventy-four additional classroom teachers. They feel that they would have to construct approximately one hundred and fourteen additional teaching stations. Suffice it to say, it would certainly solve the school closure problem in Anchorage. This bill would use up all existing space available plus requiring approximately six additional schools at an estimated cost of $30 million.

Salaries for the additional teachers would require $5,863,800 if the figure of $33,700 per teacher is used to cover salary plus fringe benefits. No estimate is included here for increases in support services or materials required to enable these additional teachers to function. Nothing is included to cover the potential for negotiations to limit exceptional children in each class.

A conservative cost estimate for additional required support services would be an additional $3 million.

In summary, this bill has a potential impact well in excess of $38 million on Anchorage in the first year with an additional $10 million annually thereafter.

Kodiak reports requiring a minimum of $1.5 million in operating funds adding 43 additional classrooms and teachers. Construction costs were not reported.

Ketchikan did not do an in-depth study, but indicated a cost figure of approximately $1.5 million.

Delta Junction would need to add eight teachers to its existing 61 at a direct cost of $240,000 and would require five additional teaching stations at an estimated construction cost of a half million dollars.

The Matanuska-Susitna Borough School District estimates their needs at thirty-six added elementary teachers costing $1,195,992 for salary and fringe benefits with an additional thirty-six teachers in the secondary program for a total of 72 teachers costing $2,391,984. No support service costs were figured, but can be estimated at $1.5 million. Mat-Su's construction needs would require fifty-two additional classrooms.

School districts reviewing the bill expressed particular concern that the provisions contained therein would eliminate the concept of large group instruction. Traditionally band, chorus, P.E., and vocational classes such as typing are set up on a scale that exceeds the maximum 25 in secondary schools as proposed. This bill would essentially eliminate the effectiveness of the above-mentioned programs and require duplication of the schools most expensive facilities.

The section of the bill permitting the negotiation of the number of exceptional children in a single classroom has the greatest potential of all sections to create a problem, probably because of unknown factors. One potential might be to cause districts to be in violation of Federal Statute 94-142 requiring handicapped children be placed in the "least restrictive environment", i.e., the regular classroom. This section has the potential of making all other sections of the bill unnecessary.

In summary, it would appear that exclusive of construction costs required to provide additional teaching stations, this bill should require an average of 10 to 20 percent increases in school budgets at a conservative estimate of $30 million statewide.

The Association of Alaska School Boards would urge you to oppose passage of this legislation contained in HB 488.

Sincerely,

BOB GREENE

Robert C. Greene
Executive Secretary

To: House HESS Cmte
For: HEARING ON 22 MAY AT 1:30 PM
RE: HB488

GREATER SITKA BOROUGH SCHOOL DISTRICT

May 21, 1980

I wish to testify in opposition to House Bill #488. Should such a bill be passed it will have the effect of eroding local school board authority. Certainly such issues as size of classes are the kinds of decisions school boards are expected to make by their constituents who elect them. The portion of the bill that calls for weighted counts of special education students who are in regular classes for a portion of the day only has the effect of making a bad bill worse. School Districts in Alaska are by law obligated to adhere to the stringent special education laws embodied in P. L. 94-142 to insure that proper programs are being offered. This we are doing in most districts in a conscientious, effective manner in my view.

The various studies that have attempted to look at optimal class size have usually come to the conclusion that class size has very little to do with educational productivity. However, most school boards and school administrators still work hard to keep class sizes small. Average class sizes in most Alaska districts are very small. Such decisions should be made locally by the elected school board and must be based upon available funding and the wishes of local residents.

Special education accounting, necessarily, involves tremendous amounts of paperwork. H.B. #488 will simply compound that. It will also result in endless grievances from teachers regarding the various

GREATER SITKA BOROUGH SCHOOL DISTRICT

"weighted children" in their classes. I can anticipate being unable to add one more child to a class because we have reached the arbitrary, maximum number. I contend that this would be absolutely ridiculous! The teacher, with the help of the law, should not be dictating to the employer how many children will be assigned to his or her classroom.

This proposed bill will undoubtedly have the strong backing of teachers since it would reduce class size. It would also increase costs in many districts drastically and, in my view, result in no improvements for children. The worst feature is that school boards would be prohibited from making decisions that I contend only they should make.

John E. Coffee
Superintendent
Sitka School District

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

While we cannot estimate in an accurate fashion the impact of this bill, we can state that it likely would require additional classroom space construction and it would undoubtedly have a substantial impact on the number of teachers districts must employ to conform to the limitations of the bill. This is not a zero fiscal note, it is rather, merely impossible to estimate the true cost of the bill.

GOVERNOR'S COUNCIL FOR THE HANDICAPPED AND GIFTED
Meeting of January 24-25, 1980
Centennial Building
Sitka, Alaska

MINUTES

MEMBERS PRESENT:

Marsha Buck
Joe Betit
Alistair Chalmers
Ro Chatterton
Mike Cummings
Wes Doran
Bob Gregovich
Ludy Jacobs
Glenn Johnson
Joan Jordan
John Nuttal
Dave Spence
Carol Welsh
Blanche Walters (arrived Friday)
Caroline Wolf

STAFF PRESENT:

Dorothy Truran
Laurie Goggin

GUESTS:

Tom Buckner, representing the Office for Exceptional Children
Pat Young, representing Mike Morgan, Office of Vocational Rehabilitation
Dave Canterbury
Lizette Burns-Stiehr
Jane Brodie
Jeff Hubbard
Terry Coon, Director of Special Education, Sitka
John Coffee, Supt. of Schools, Sitka
Diane LeResche, DOE/OEC Gifted Programs
Sam Granato, Osborne/Granato Associates
Debra Gilbreath, Sitka School District
Roy Anderson, Alaska Resources for the Moderately/Severely Impaired
Janice Rhoades, G/T teacher, Sitka

The roll was called. Thirteen members were present and a quorum was established. Chairperson Marsha Buck welcomed members and introduced guests. The agenda was adopted. It was noted that Allan Korhonen and Vern Stillner of the Department of Health and Social Services would not be able to address the Council since bad weather caused their flight from Juneau to be cancelled. Carol Welsh informed members that Wanda Gnerich is in the hospital and unable to attend the meeting. Carol encouraged members to call or visit Wanda.

APPROVAL OF MINUTES

The minutes of the October, 1979 Council meeting were approved as amended. (Motion: Nuttal/Jordan)

[Attachment "A" - January Council meeting minutes]

COMMUNICATIONS

Pertinent information was available for members and guests at the display table.

Debra Gilbreath, Terry Coon, and Superintendent John Coffee were unable to address the Council in the morning. Arrangements were made to hear from them later during the meeting.

5. that the Council adopt the "State Plan Development Policies-January 1980" as amended. (Chalmers/Welsh) [Carried]

Laurie Goggin asked that Council members review the "State Plan Development Policies" information which was distributed during yesterdays meeting. She stated that basically the resolution sets down some statements about the expectations & relationship between the Council and various state agencies providing services to the developmentally disabled for the purpose of developing the state plan this year. Laurie briefly went over the resolution with the Council. Dot Truran advised that basically it just puts in writing the procedures that the Council has been following in developing the state plan over the last three years.

6. that the Council adopt the "Classification of Services into Federal Priority Areas - FY81-83 State Plan" as amended. (Chalmers/Jacobs) [Carried]

Alistair Chalmers pointed out the following amendments:

- Transportation and recreation were previously listed under "Support Services" for both children and adults. It was proposed that transportation and recreation be deleted under "Support Services" and inserted under the classification of "Alternative Community Living Arrangements" for both children and adults.
- Infant learning was unintentionally included under adults and this has been deleted.

Laurie Goggin advised that there is no intent to prioritize services in terms of the Council's activities. The only intent is to develop a "dictionary" to be used in developing the state plan that places the different services that we have called support, etc. into the new federal categories.

Membership and Nominating

7. that the nominations for Executive Committee member-at-large to fill the vacancy left by John Stamm be closed and that a unanimous ballot be cast for Dave Spence to fill that position. (Welsh/Betit) [Carried]

Legislative Committee

8. that the Council write a position against HB 488 and submit that position paper to the House HESS and Senate Committees and the Commissioner of Education. (Spence/Wolf) [Amended below]

Amendment #1

that the words "position paper" be deleted from Motion #8 and "written statement" inserted. (Welsh/Johnson) [See final motion below]

Final Motion

that the Council issue a statement in opposition to HB 488. (Spence/Wolf) [Carried]

Dave Spence advised that HB 488 is a one page bill now before the legislature which relates to class size and legislates maximum class size for regular education as well as special education. With regard to special education, it gives a weighting of handicaps - a formula by which only a limited number of exceptional children can be in any one classroom. It limits the number to four exceptional children as individuals or, if there is a weighting consideration, a multiply handicapped student would perhaps limited the number of exceptional children to less than four.

By legislating a maximum number of handicapped children to be served in any one classroom, teachers could then cite class size as a collective bargaining issue. The Legislative Committee feels that class size is not an appropriate factor to legislate because class size limitation has not been proven to be directly related to the quality of education.

John Nuttal feels its not wise for the Council to go on record opposing a maximum class size for special education children. He feels that if the Council states its opposition to limit special education class sizes, the Council will be negating its goal of increasing the quality of education to special education children. However, he stated that he does not agree with weighting children and does not feel that because a deaf child is placed in one class that two other children should be placed elsewhere. If that child is qualified to be in the classroom than he should be there, if not he shouldn't be there.

Marsha Buck advised that some school districts have policies which attempt to limit class size. According to state regulation, no special education teacher may work with more than 15 full time equivalency students. In regular education there are no set regulations at present.

Carol Welsh stated that she does not think the Council should oppose a realistic limitation on class sizes for exceptional children. The reason this bill is not one the Council should support is because it is a politically oriented bill with a hidden agenda which attempts to legislate class size so that teacher's unions can use such legislation as a bargaining lever. Carol stated that this bill definitely labels children. There are times when you have to label children according to their disabilities for reporting purposes, but to do it in the manner prescribed in this bill is unacceptable. For example, hyperactive children are given a weighted factor of 2.5 which is more than a deaf child who is weighted at 2.0.

Pat Young stated that he would like to have some limitation on class sizes so the teachers know what they have to deal with on a day-to-day basis.

Ludy Jacobs feels there should be some type of class size limitation based on the severity of handicap.

Carol Welsh pointed out that the problem with this bill is that it is poorly designed and poorly written and has other agendas built into it. These factors should be the reason for Council opposition.

Glenn Johnson pointed out that the bill also is discriminatory in that it sets a maximum limit of exceptional children in an integrated class at

four. Lizette Burns-Stiehr pointed out that the way the bill weighs children, an orthopedically handicapped and an emotionally disturbed child could not be in the same class. In some cases this weighting may work, but in rural areas the weighting should be individually determined and not legislated.

Dave Spence clarified that his motion simply stated that the Council opposes this bill and in speaking to the motion he gave some rationale that would presumably be built into such a statement on the bill as to why the Council was opposed to the bill.

John Nuttal does not feel the Council should say it has not been proven that maximum class size does not show better education. He feels that is a poor thing for the Council to go against.

Marsha Buck stated that if the motion passes, she would direct that the entire conversation just held be considered and included in the written statement.

9. that the Council's Position Paper favoring SB 339 and HB 572 be forwarded to the House and Senate Judiciary Committees and to the Commissioner of the Department of Health & Social Services. (Spence/Chatterton) [Carried]

Bob Gregovich questioned whether the fiscal impact was the same as last year - with most of the expenditures involving the Court System. Dot replied that the fiscal statement deals mostly with the cost of the public guardian function and that the Council has not dealt with the present court system costs for all the guardianship cases that presently come before the court system. That is an on-going cost of the Court System and we are not addressing that. We are addressing the fiscal impact of this bill which will not impact on the number of guardianship cases directly but will result in having a new office perform some duties that were not formerly performed by state government.

Dave Spence pointed out that the effect of this bill in establishing priorities for guardians and setting up an office of public guardian would give a mechanism to drum up support and public awareness for the need for those first five priorities of guardians. At the present time the problem is there, but there is no organized way to address it. This would at least establish one state position and get us further along the road of getting more people to come forward and volunteer to be guardians. The legislation structures the whole guardianship process so that you could get a partial guardianship and have guardianship tailored to the person's needs.

Discussion followed regarding the fiscal note on the bill. Dot suggested she and Dave Spence review the fiscal note and obtain information from Debbie Behr prior to submitting the attachments to the position paper.

Bob Gregovich reported that Debbie Behr has just assigned him the responsibility for doing the fiscal note and that much of the fiscal note will come from the information already available. He stated it is next to impossible to guess what the Court System is going to have as their fiscal note without doing their fiscal note for them. He feels the current fiscal note is

RE: HB488

My name is CarolWelsh from Sitka and I would like to offer testimony to the committee in opposition to HB 488. I address my objections from two perspectives: first, as a school board member; and second, as the parent of three developmentally disabled children, two of whom are adopted.

HB 488 is clearly an attempt to legislate class size and/or make it statutorily permissible to include class size as part of the bargaining process. I oppose both of these attempts to solve what is felt to be a problem for our educators.

Legislating class size not only removes fiscal and administrative responsibility from the LEA's, but also has the potential of financially hamstringing districts where space or budget restraints may develop, and in the event of unexpected enrollment increases.

As a parent, I would be quite wary of allowing class size to be part of the negotiating process especially when it may involve special education students. It has been my observation that MONEY is generally the ultimate item of concern at the bargaining table and I must voice my disapproval of my state government implying that it would be OK for retarded or otherwise handicapped children to be used as pawns and tradeoffs, especially when those involved in the bargaining process do not always have the sensitivity towards and understanding of special education needs and requirements.

The weighted average daily membership concept as suggested in HB 488 is not the answer to achieving appropriate integration procedures in our school districts. The weight schedule as outlined in this bill does not permit equitable class balance and I take great exception to children being statutorily classified by disability which implies that all children of a given disability learn, behave, and develop in the same way, at the same rate, and with the same expected outcomes. Placement in any classroom situation, whether it be integration into a regular classroom or a self-contained special education setting, must depend on the "unique needs of the individual child" as mandated by both P.L. 94-142 and Sec. 504 of the Vocational Rehabilitation Law Amendments of 1973. To categorize children by specific disability with a corresponding weight factor ignores the requirement of an individualized placement determination and would seem to be in violation of existing state and federal mandates. To me, this represents a gross example of stereotyping that could render an "appropriate" placement nearly impossible to achieve.

I feel it is important for all of us to be aware of the many problems that surround the education of exceptional children, especially in the areas of funding inequities, cost of related services, and the achieving of "least restrictive environment." It is understandable that regular classroom teachers feel threatened and overburdened at the prospect of having handicapped children returned to the "mainstream" of education. However, properly handled integration does not mean the indiscriminate dumping of of exceptional children into the regular classroom; if this is occuring, proper placement procedures are not being used very well. In addition, regular classroom teachers should rightfully expect and receive support services from special education in order to facilitate a good integration process for both them and the special education students being placed in their classrooms.

In conclusion, I feel HR 488 to be a self-serving piece of legislation that has the potential of causing more problems in special education than we are currently experiencing and does nothing to improve educational opportunities for children. The fiscal impact of this proposal would probably drive the cost of special education up considerably. It would seem far more prudent to have these and related problem areas in special education studied in depth with the purpose in mind of developing a future comprehensive piece of legislation that would be of benefit to all. Such an effort would be of even greater benefit if it were addressed jointly by the various entities currently dealing with special education issues.

Thank you.

Re: HB 540, Establishing the Alaska School Competitive Activities Fund

Dear Representative Buchholdt:

As you probably know, our firm represents a number of school districts around the state. When I was informed a few days ago by the committee that you would be taking up HB 540 on this date, I made attempts to contact our clients to determine their views with respect to the proposed bill.

In those cases where I was able to contact the superintendent of the district, it became clear that my call represented the first knowledge they had received concerning the proposal set out in HB 540. With regard to those superintendents that I was able to contact, none of them felt that they could take a position on behalf of their school boards until after the boards had had an opportunity to consider the proposal. A question did come up, however, as to the intended scope of the legislation. For instance, it is not clear from the bill whether the intent of the school competitive activities fund is to provide assistance to a school district for all its costs of travel associated with interscholastic activities, or only those travel costs associated with participation in statewide tournaments.

Consequently, I am unable to relay to your committee at this time the points of view of any of our client school districts on HB 540. With regard to the personal view points of the superintendents whom I was able to contact, I can only relay to you that those opinions were not uniform in nature. These opinions ranged from enthusiastic support for any legislation which would provide assistance to the district in meeting the high costs of travel associated with interscholastic activities, to the feeling that travel for interscholastic activities is just another element which should be taken into consideration in establishing the parameters of the public school foundation formula.

From a legal point of view, we have some concern that the legislation does not provide any standards by which the Alaska School Activities Association would make its determination as to the amount of payment to be made to the various school disticts. We would recommend that the legislation either set out the kinds of factors to be taken into consideration by the activities association in making allocations to the school districts, or, at a minimum, that the legislation direct the school activities association or the state Board of Education, which has oversight responsibilities for the activities association, to adopt regulations regarding the standards for allocation of monies from the school competitive activities fund.

Sincerely yours,

JOSEPHSON, TRICKEY & LORENSEN, INC.

A BILL

For an Act entitled: An Act creating a fund for High School Student travel to and from Alaska State Level competitive activities.

Be it enacted by the legislature of the State of Alaska:

Article 1. 14.07 is amended by adding a new section to read:

Sec. 14.07.0555. Alaska State School Competitive Activities Fund.

The legislature shall fund the cost of travel of high school students who participate in Alaska State Level competitive activities in the following manner.

(a) Only high school students grades nine (9) through twelve (12) are eligible for funding under this section.

(b) The number of students eligible for funding from each Alaska School Activities Association region in Alaska shall not exceed ten (10) percent of the registered high school student population in each region.

(c) The number of registered high school students in each region shall be determined on September 30 of each school year.

(d) The following competitive activities shall be funded under this Section: Honors Band, Choir, Orchestra, Cross-Country Running, Volleyball, Gymnastics, Swimming, Diving, Basketball, Cross-Country Skiing, Hockey, Wrestling, Forensics, Track and Field.

(e) The Alaska School Activities Association shall administer this program.

Information

Under current Alaska School Activities Association rules approximately 1800 Alaska High School students would be eligible for funding under this bill during the 1980-81 school year.

The cost of the program for FY '81 is estimated to be $340,000. Travel costs includes transportation, food and lodging.

There are approximately 26,000 high school students attending class in Alaska during the current (1979-80) school year. An estimated 18,300 student units will participate in interscholastic activities during the year. (Note a single student may equal a number of student units if he/she participates in more than one activity).

Funding for this program is seperate from the Public School Foundation Program.

The bill covers only high school student travel costs. Coaches, teachers, etc. travel expenses to state events are not covered. If they are to be included, travel costs will increase by approximately 10 percent.

The bill places an upper limit on the number of students who are eligible for state funding (10 percent). The bill does not prevent school districts from sending more students to state competition if ASAA rules allow and the school districts provide the extra money.

The Alaska School Activities Association is a non-profit state legislative-approved organization of member schools operating under the auspices of the State Department of Education and local school districts. The ASAA is the governing body within Alaska that regulates interschool competition and activities in music, speech and drama, and athletics. The activities eligible for funding under this bill are all the state level activities currently listed by the ASAA.

M E M O R A N D U M February 1, 1980

SUBJECT: Competitive activities fund aid to private schools. (House Bill 540)

TO: Representative Thelma Buchholdt
Chairman, House HESS Committee

FROM: Billy G. Berrier
Director
Division of Legal Services

You have asked whether payments for costs of travel for students of private schools for participation in competitive activities is unconstitutional.

In my opinion, this effect would not be held unconstitutional by our Supreme Court. In the only case in Alaska on point, our Supreme Court reached the opposite conclusion. However, a later decision has cast substantial doubt on the continued vitality of that case and apparently adopted a different test which would appear to support the constitutionality of inclusion of private schools in competitive activities fund distribution.

In 1961 our Court considered a class action concerning the constitutionality of transportation of private school students on public school buses. Section 1 of Article VII of the Alaska State Constitution provides:

> "SECTION 1. The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution."

In this case, Matthews v. Quinton, 362 P.2d 932 (Alaska 1961), the Court decided, over a strong dissent from Justice Dimond, that transportation of private school children represented a direct benefit to the school and was prohibited by the quoted section of the Constitution. (The case also considered the Organic Act which is not relevant here.)

While the facts in Matthews varied somewhat since that case concerned transportation to school while the bill relates to transportation to athletic events, the discussion was largely related to pupil transportation broadly. It would be difficult to distinguish the case on the factual differences although an argument could be made that transportation for out-of-town travel to competitive activities is not so directly related to the educational process as is transportation to the schools from the students' homes.

However, in 1979, the validity of the tuition grant program came before our Court. The same constitutional provision was in question. This case, Sheldon Jackson College v. State, 599 P.2d 127 (Alaska 1979), is not directly on point because of the substantial fact differences. The Court drew four generalizations from the authorities on the question saying:

> "First, constitutional provisions governing aid to private schools have generally been perceived as requiring neutrality rather than hostility from the state; thus the breadth of the class to which statutory benefits are directed is a critical area of judicial scrutiny. For example, though the police and fire protection afforded a private school may provide the school with quite direct benefits, as when a campus fire is extinguished, such benefits are provided without regard to status and affiliation, and have universally been presumed to be constitutional. Conversely, a benefit flowing only to private institutions, or to those served by them, does not reflect the same neutrality and non-selectivity.
>
> "A second central criterion in determining the constitutionality of a state aid program, is the nature of the use to which the public funds are to be put. As is apparent from the convention debate, the core of the concern expressed in the direct benefit prohibition involves government aid to education conducted outside the public schools. Though any state assistance that

> relieves the burden on a private school to provide for the health and welfare of its students will free the school to concentrate its funds on its private educational mission, numerous delegates voiced their understanding that the direct benefit clause would not bar such incidental support. An analogous distinction has frequently been drawn in establishment clause cases, where the pertinent inquiry is whether a statute impacts 'essentially secular educational functions' that are separable from the school's religious instruction.
>
> "Third, in determining whether a school is directly benefitted by public funds, a court must consider, though not in isolation, the magnitude of the benefit conferred. A trivial, though direct, benefit may not rise to the level of a constitutional violation, whereas a substantial, though arguably indirect, benefit may.
>
> "Finally, while a direct transfer of funds from the state to a private school will of course render a program constitutionally suspect, merely channeling the funds through an intermediary will not save an otherwise improper expenditure of public monies. The courts have expressly noted that the superficial form of a benefit will not suffice to define its substantive character."

In a footnote the Court questioned the continuing vitality of Matthews saying

> "In Matthews v. Quinton, 362 P.2d 932 (Alaska 1961); cert. denied, 368 U.S. 517, 82 S.Ct. 530, 7 L.Ed.2d 522 (1962), a statute enabling private school children living far from their schools to ride public school buses at public expense, was held violative of the direct benefit prohibition. We do not rely on Matthews in reaching today's decision, and thus have no occasion to overrule or re-affirm it. A substantial question, however, can be raised as to its continuing vitality in light of the analysis which we employ in the present opinion."

Based upon the principles set out, the Court found the tuition grant program a direct benefit to the school and therefore constitutionally prohibited.

Although Matthews was not overruled, the indication that the tests used in Sheldon Jackson will be the tests used in future cases even where a Matthews type situation is involved is quite strong.

Under this analysis, it appears this program is neutral; the class to which the benefit is provided is broad, covering all schools who are members of the Alaska School Activities Association which includes public and private schools.

There are differing views concerning the degree to which competitive activities are "educational." A strong argument could be made that travel for these activities is incidental rather than direct benefits.

The benefit is not trivial; but in relation to the whole program of the schools, payment of these travel costs would not appear so substantial as to transform an indirect benefit to a direct benefit.

Channeling the benefits through the Alaska school competitive activities fund would not save an otherwise improper program. Factually, this may, however, aid in showing the breadth of the class benefitted and the degree to which the activity is "educational" in the sense used here.

Although the law is not clearly settled here and any conclusion must be reached with caution, it is my opinion that under the tests set out in Sheldon Jackson, the Court would not find the program established by HB 540 unconstitutional.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 545

"An Act amending the child protection laws; and providing for an effective date."

House Bill No. 545 is comprised of nine sections, one of which amends 47.10.010, and seven of which amend 47.17, the child protection statute. Specific comments regarding each section follow:

Section 1. This amendment to 47.10.010(a)(2) provides for a new condition under which a child may be declared a child in need of aid (CINA). It reads as follows: (F) the child having suffered substantial mental or physical neglect as a result of conditions created by the child's parent, guardian or custodian.

While the Department supports adding mental harm to the conditions for CINA, a change is recommended in the wording, deleting physical neglect and reading instead: (f) the child having suffered substantial mental harm as a result of conditions created by the child's parent, guardian, or custodian. Physical neglect is already covered under AS 47.10.010(a)(2)(C) which states that there is "imminent and substantial risk that the child will suffer harm as a result of the actions done by or conditions created by his parent..."

The 1977 changes in the Children's Code were intended to clearly tie grounds for adjudication to the actual harm which would result to the child rather than to parental faults or habits. The Department favors keeping such a focus on the harms to the child.

Section 2. This amendment to 47.17.010 adds mental abuse to the harms which must be reported to the Department. It also deletes requiring the attention of a practioner of the healing arts from the phrase pertaining to the harms, moving that phrase to the requirement to report.

This amendment appears to be consistent with other proposed changes, and is supported by the Department.

Section 3. This amendment strengthens the present provisions indicating persons who are required to report by including school administrative staff members. The Department supports this section as worded because there have been known instances of failure to report by some school districts. This change would make school administrators mandatory reporters also.

Section 4. This amendment expands persons mandated to report to include individuals involved in day care and foster care. The Department supports this section as worded because persons who are involved in day care and foster care may be in a position to identify abuse or neglect which may not come to the attention of others.

JAN 28 1980
Management and Budget Section

POSITION PAPER/Department of Health & Social Services

Section 5. This amendment expands the definition of child abuse or neglect which must be reported to include mental injury or neglect. There are instances in which mental injury or neglect may be the only indications that a child is in need of protection. Generally, persons are so conservative in their reporting that children who are in danger of harm fail to be reported. This would make it more apparent that protection is called for in situations where the more obvious problem may be an emotional problem but where often physical harm also exists.

Section 6. This section amends the definition of child to mean a person under 18 years of age. This amendment will resolve present inconsistencies in age which exist between AS 47.17.070(1) and (2). Since age 18 was the age used in the latest statutory revision of 47.17, it would appear that this age was intended to apply. This is the age used in AS 47.10 also. The Department supports this change.

Section 7. This section amends 47.17.070 to define "mental injury or neglect" to mean "injury or neglect to the intellectual or psychological capacity of a child evidenced by a substantial impairment to the child's ability to function within the child's normal range of performance and behavior."

The Department has serious concerns about this definition because it does not take into account cultural factors which affect a child's performance on psychological tests which measure intelligence or "normal behavior." With this definition it would become quite easy to justify identifying many children who are not of the dominant culture as being abused or neglected.

We would prefer to see this statute be consistent with 47.10.010(a)(2)(B) which specifies that mental harm is "evidenced by failure to thrive severe anxiety, withdrawal, or untoward agressive behavior or hostility toward others."

Section 8. This section amends 47.17 be adding two sections. Section 47.17.064 permits a mandated reporter to take photographs of areas of trauma visible on a child and, if medically indicated, permits the taking of X-rays without parental permission. This amendment could be very useful in proving cases of physical abuse, and would generally have most utility where medical personnel are the first to suspect physical abuse. Under this proposed statute, a person required to report would be allowed to take photographs of bruised or fractured areas as well as to perform X-rays when either current or past fractures are suspected. Many severe cases of child battering show evidence, upon X-ray examination, of repeated fractures over several years which may have healed and which would not show up without radiological examination. The Department finds this to be a very significant strengthening of protection for vulnerable children.

Section 47.17.068 specifies that a person who is required to report abuse or neglect and who willfully or knowingly fails or refuses to report the harm is guilty of a class B misdemeanor. This is an important provision because under the current statute there is no sanction against ignoring or refusing to comply with the statute. The Department is aware of instances of severe physical abuse which have gone unreported because doctors or hospitals hesitated to get involved and knew there was no penalty for their not doing so.

POSITION PAPER/Department of Health & Social Services

The Department strongly supports both 47.17.064 and 47.17.068 as proposed.

Section 9. This section allows for an effective date of July 1, 1980, which appears to be a reasonable time for enactment.

Summary. In summary, the Department position is as follows:

Section 1. Supports, with amendment

Section 2. Supports

Section 3. Supports

Section 4. Supports

Section 5. Supports

Section 6. Supports

Section 7. Oppose as worded, amendment suggested

Section 8. Supports

Section 9. Supports

REPORTING CHILD ABUSE

Who Reports or Causes a Report to be made?

In each of the states in Region X, any citizen may report a suspected instance of child abuse or neglect. Each of the states, however, have designated certain people as being required to make reports.

ALASKA: Required (no stated penalty)

> In the performance of their professional duties, practitioners of the healing arts (chiropractors, dentists, health aides, nurses, optometrists, osteopaths, physical therapists, physicians, psychiatrists, psychologists, religious healing practitioners, and surgeons); social workers; school teachers; peace officers and officers of the Division of Corrections; and administrative officers of institutions.

IDAHO: Required (no stated penalty)

> Any physician, resident on a hospital staff, intern, nurse, coroner, school teacher, day care personnel, social worker, or other person having reasonable cause to believe that a child under the age of eighteen (18) has been abused or who observes the child being subjected to conditions or circumstances which would reasonably result in abuse, shall report.

OREGON: Required (penalty--misdemeanor, fine of $ 250)

> Physicians (including interns and residents); dentists; school employees; licensed practical or registered nurses; employees of the Department of Human Resources, county health departments, community mental health programs, county juvenile departments, or licensed child care agencies; peace officers; psychologists; clergymen; social workers; optometrists; chiropractors; certified providers of day care, foster care or employees thereof; attorneys.

WASHINGTON: Required (penalty--misdemeanor)

> Medical practitioners (licensed podiatrists, optometrists, chiropractors, registered or licensed nurses, dentists, osteopaths, surgeons, physicians, and religious healing practitioners); professional school personnel; social workers; licensed psychologists; pharmacists; employees of the Department of Social and Health Services.

What to Report?

ALASKA:

Abuse--Non-accidental infliction of injury or physical harm on a child's body.

Neglect--Failure to provide necessary food, care, clothing, shelter or medical attention for a child.

IDAHO:

Abuse--Any case in which a child has been the victim of conduct resulting in skin bruising, bleeding, malnutrition, sexual molestation, burns, fracture of any bone, subdural hematoma, soft tissue swelling, failure to thrive or death, and such condition or death not justifiably explained, or at variance with the history given for it, or if circumstances indicate it may not be the product of an accidental occurrence.

Neglect--Without proper parental care and control or subsistence, education, medical or other care necessary for well-being because of the conduct or omission of his/her parents, guardian or other custodian or their neglect or refusal to provide them; whose parents, guardian or other custodian are unable to discharge their duties to and for the child because of incarceration, hospitalization, or other physical or mental incapacity; who has been placed for care or adoption in violation of law.

Abandonment--Failure of parent to maintain a normal parental relationship with his child including but not limited to reasonable support or regular personal contact.

OREGON:

Any physical injury to a child which appears to have been caused by other than accidental means, including any injury which appears to be at variance with the explanation given of the injury; neglect which leads to physical harm; sexual molestation.

WASHINGTON:

Instances of non-accidental injury, neglect, death, sexual abuse, and cruelty to children by their parents, custodians or guardians, and instances where child is deprived of his/her right to conditions of minimal nurture, health and safety.

Definition of "Child"

ALASKA: Any person 16 years or under.

IDAHO: Any person under the age of 18.

OREGON: Any unmarried person under the age of 18.

WASHINGTON: Any person under the age of 18 and any developmentally disabled person, regardless of age.

How to Report?

ALASKA:

To whom? An immediate report should be made to nearest office of the Department of Health and Social Services. If unable to contact the nearest office and immediate action is necessary for the well-being of the child, a peace officer may be contacted and the situation reported to the Department at the earliest opportunity.

When? Immediately.

Information Required: Not specified.

IDAHO:

To whom? The proper law enforcement agency or, in the case of attending hospital or institutional staff, to the person in charge of the institution who shall make the necessary reports.

When? Within 24 hours.

Information required: Not specified.

OREGON:

To whom? The local office of the Children's Protective Services Division or the local law enforcement agency (city or municipal police department, county sheriff's office, Oregon State Police, or county juvenile department).

When? Immediately by phone or in person. Written reports are not required.

Information required: Names and addresses of the child and the adults responsible for her/his care, the child's age, nature and extent of the abuse (including any evidence of previous abuse), the explanation given for the abuse and any other information which might be helpful in establishing the cause of the abuse and the identity of the perpetrator of the abuse.

WASHINGTON:

To whom? Law enforcement agency or Department of Social and Health Services.

When? Immediately by phone (in writing, if requested).

Information required: Name, address and age of child; name and address of adult having custody; nature and extent of injury, neglect and/or sexual abuse; any evidence of previous injuries and their nature and extent; and any other information helpful to establish the cause of the injury and identity of perpetrator(s).

Delta/Greely School District REAA #15

Ft. Greely School
P.O. Box 229
Ft. Greely, Alaska 99790

907-872-3240

January 22, 1980

Frank R. Ferguson
Box 131
Kotzebue, Ak. 99752

Dear Sir:

We, the members of the Community School Committee, Ft. Greely, Alaska, are vitally concerned about the needs of the Ft. Greely School students. These needs were first identified in 1969 by Mr. William L. Stormer, Director of School Assistance in Federally Affected Areas, H.E.W. An extensive study was conducted by Mr. James Woofter, Acting Chief of School Construction, H.E.W., in 1975. This study delineated the necessary improvements needed to upgrade the Ft. Greely School. During 1976-78 time frame, the cause of school improvement at Ft. Greely has received continual "lip service" but little else in the way of positive action. (See Enclosure 1) Everyone from the Federal to the state level has recognized the problem but no one has done anything about it. The losers in this political battle are the children--civilian and military students who are receiving a substandard education because of defects in the present facility.

It is our belief that the modernization of the education facility at Adak Naval Station was a positive step in the right direction and it is our hope that it will serve as a model in the legislature's efforts to upgrade the Fort Greely facilities. As you know, the legislature, in its 1978 session, authorized the expenditure of two million dollars for the construction of elementary classrooms at Adak. That was the first time that state monies have been spent on a H.E.W. facility.

The Alaska Committee of the Northwest Association of Schools and Colleges has added further impetus to our situation (See Enclosure 2). Our conditional accreditation status specifically highlighted our three major problem areas.

I. The lack of an adequate gymnasium has forced the Ft. Greely School to satellite its Physical Education program onto the military at Ft. Greely. A stop-gap arrangement has

December 17, 1979

Mr. John Mikesell
Ft. Greely Junior High School
Delta Junction, Alaska 99737

Dear John:

The Northwest Association of Schools and Colleges has awarded Ft. Greely Junior High School approved w/c status for the 1979-80 school year. The Alaska Committee recognizes and commends your efforts in expanding the math curricula offerings. Expansions of this nature certainly provide enrichment to students.

The annual report indicates deviations in Standards III, IV and VI. We would encourage your continuing efforts in securing the necessary resources to eliminate the existing substandard conditions in the gymnasium, kitchen and library facilities.

If we can be of further assistance please contact us.

Sincerely,

Jeff G. Jeffers
Secretary-Treasurer

SUBJECT: Request for Assistance for Fort Greely School

Commander
172nd Infantry Brigade (Alaska)
Fort Richardson, Alaska 99505

1. A request for assistance has been received from Mr. Frank Brocato, Principal for the on base Fort Greely School, to obtain command support for needed school improvements.

2. The Fort Greely School is a Health, Education and Welfare School staffed by the State of Alaska. Funding for the schools physical plant is through H.E.W. and Congress. Fort Greely School serves all military dependents in grades Kindergarten through eight and local Delta Junction students in grades seven and eight.

3. The present physical plant does not meet needed requirements for physical education, auditorium space, or cafeteria facilities. Fort Greely facilities are utilized by the school on a mutual arrangement for athletic training and competition and auditorium space as an interim measure; however, post facilities for troop use are also limited and this arrangement imparts on post morale and efficiency. The hot lunch program served in most schools is not provided at Greely and a Class A soup and sandwich lunch is fed in lieu of. Construction of a school gymnasium and cafeteria is a vital requirement if the school is to meet the educational needs of our dependent children at Fort Greely.

4. Recommend this matter be addressed to the State Board of Education and Alaska Congressional Delegation for resolution.

General Frederick J. Kroesen
Commander
US Army Forces Command
Fort McPherson, Georgia 30330

Dear General Kroesen:

We need your help in getting the long-recognized needed improvements for the Fort Greely school off dead-center.

The Fort Greely School is a Health, Education and Welfare School staffed by the State of Alaska. Funding for the school's physical plant is through HEW and Congress. The school serves all military dependents in grades kindergarten through eight and local Delta Junction students in grades seven and eight.

I am told that Mr. William L. Stormer, Director for School Assistance in Federally Affected Areas, Department of Health, Education and Welfare (HEW) has been aware of the construction needs for the Fort Greely School since 1969. An extensive study was made in July 1975 by a team headed by Mr. James Wooster, then Acting Chief of School Construction of HEW. This study group recommended numerous construction needs to the Department. Despite numerous letters about the study 1976 to and by Senators Mike Gravel and Ted Stevens, Congressman Don Young, plus Mr. Stormer and others, little progress has been made in improving the Fort Greely School.

The present physical plant does not meet needed requirements for physical education, auditorium space, or cafeteria facilities. Fort Greely facilities are used by the school on a mutual arrangement for

athletic training and competition and auditorium space as an interim measure; however, post facilities for troop use are also limited, and this arrangement impacts on post morale and efficiency. The hot lunch program served in most schools is not provided at Greely and a Class A soup and sandwich lunch is fed in lieu of. Construction of a school gymnasium and cafeteria is a vital requirement if the school is to meet the educational needs of our dependent children at Fort Greely.

The long harsh winter environment, the relative isolation of Fort Greely, and the perception that nothing is being done to correct the problems have an adverse effect on the post population and the school staff.

Any help you can give us would be appreciated.

Sincerely,

JAMES G. BOATNER

William L. Stormer, Director
SAFA-U.S. Office of Education
400 Maryland Avenue, S. W., Room 2107
Washington, D. C. 20202

Dear Mr. Stormer:

The Alaska Department of Education considers the provision of adequate school facilities to be basic and essential to the successful delivery of educational programs, and to this end I wish to focus attention on the need for additional facilities at two of the on-base school locations in Alaska.

The absence of adequate physical education, auditorium, and cafeteria space at the Fort Greely School has been discussed by various federal and state officials for some ten years. The sharing of physical education and auditorium space with the troops causes obvious scheduling problems and leaves both students and the troops with less than sufficient space for these activities. The absence of a cafeteria has caused the school to offer only a soup and sandwich lunch program, while most schools of this size have a full hot lunch program. The Delta/Greely School District would offer a full hot lunch program if facilities were available.

Another on-base school which is lacking adequate facilities is at Adak. The elementary school is currently overcrowded, with many classes being held in portable units which have surpassed their useful life expectancy, especially considering the very harsh climate at Adak. The basement of the main school floods, and the building has many other deficiencies. The present site is very restricted in size, indicating need for a new site for the facility. I understand that the number of dependents at Adak will be increasing in the near future, which will further crowd the school.

The need for the above facilities is well documented, and I urge you to make these facilities a high priority for funding as soon as possible, so that these federally-dependent children will have adequate school buildings, thus enabling teachers and administrators to expend more of their time and resources toward education.

24 May 1978

Dear General Boatner:

I have forwarded your letter of 24 April 1978 regarding construction of a cafeteria and gymnasium for the Fort Greely dependent school, to the Chief of Staff, Army (copy inclosed).

I do not expect any immediate action on your request as the Department of Health, Education and Welfare (HEW) has a construction and repair backlog for dependent schools, including Fort Greely, in excess of $200 million. They expect only $16 million in Fiscal 1979 with which to attack the problem. I support Department of the Army's recommendation to the Secretary of HEW that the $16 million be spread among schools at five Army installations with an average daily attendance far exceeding building design capacities. Four of these are FORSCOM installations -- Forts Bragg, Campbell, Stewart and Riley. The $16 million, if spread among these installations, will only partially relieve the extreme inadequacy of facilities.

These schools have handled double sessions and severe overcrowding only because the installation commanders were able to furnish underutilized or excess Army buildings to house the extra students. I realize the extreme cold and isolation of Fort Greely may preclude your adoption of a similar interim solution for a cafeteria and gymnasium.

Even though I cannot give you a lot of hope for immediate resolution, I appreciate your letter which helps us to continue building a case for upgrading the inadequacy of dependent schools on military installations.

Sincerely,

FREDERICK J. KROESEN

30 JUN 1978

Dear General Boatner:

General Kroesen has asked me to keep you informed on the dependent school facilities situation.

In his letter of 24 May 1978, General Kroesen informed you that he had forwarded to General Rogers your letter of 24 April 1978 requesting assistance in upgrading the Fort Greely dependent school facility. General Rogers' reply, including correspondence from the Commissioner of Education to LTG Smith, is at inclosure 1.

In his letter, the Commissioner indicates a willingness to consider giving higher priority to upgrading our unsafe and inaccessible school facilities in Fiscal 1979 and 1980. This recognition of the problem can help the Fort Greely situation in the long run by reducing deplorable conditions at other military installations.

Currently the FY 79 Health, Education, and Welfare budget that will partially fund high priority construction is before the House Appropriation Committee and the Senate Appropriation Committee. I will keep you informed of progress that seems likely to impact upon your situation.

Sincerely,

Robert A. Holloman III

19 June 1978

SUBJECT: Fort Greely Dependent School Facilities

Commander
U.S. Army Forces Command
Fort McPherson, Georgia 30330

1. Reference your 24 May 78 letter concerning the need for additional facilities for the dependent school at Fort Greely, Alaska.

2. A copy of a recent letter from the Commissioner of Education on this subject is inclosed. For the past several months Army Staff members have had many discussions on the condition of these schools with staff members of the Senate and House Committees on Education and Labor, with staff members of the Office of Management and Budget, with civilian aides to the Secretary of the Army, and with members of Congress representing areas where the schools are located. In addition, this situation was mentioned in my posture statement submitted to the Congress with the President's budget for FY 79.

3. The situation at Fort Greely and other Army installations with regard to dependent schools maintained under Section 10, PL 81-815 is understood by the staff of Department of Health, Education and Welfare. We are advised that the recently completed survey of these facilities will reinforce requests to Congress for funds to correct unsatisfactory conditions at Section 10 schools.

4. When Congressional action on the FY 79 HEW appropriation is announced, we will ask the Secretary of Defense to chair an interdepartmental meeting on these schools. We hope to develop a memorandum of understanding with the Department of Health, Education and Welfare and the Office of Management and Budget on these schools and develop a strategy to solve the problems. Your Headquarters will be kept advised of progress and developments.

Department of the Army
Washington, D.C. 20310

Dear General Smith:

Secretary Califano has asked me to thank you for your letter concerning our mutual problem of dependent schools on Army installations.

The Secretary has recently forwarded to the Congress our completed indepth study of Section 10 facilities. I am enclosing a copy for your information. As we conducted the study, it became very evident to me that a number of the Section 10 facilities represented particularly deplorable life/safety conditions. These are the very same situations for which you indicated concern in your letter. I have recommended to the Secretary that we consider revising our current funding priority system to make possible the immediate funding of the projects. As you know, our current priority system places a higher priority on the funding of projects which have been accepted for transfer by a local education agency. Although we remain committed to a policy of local education agencies accepting responsibility for the education of military dependents whenever possible, insuring a safe and accessible educational environment must take priority. The change in the priority system (outlined on page 21 of the indepth study) would allow us to direct the limited funds that we have available in the manner which you requested.

With respect to the future appropriation picture for Section 10, we will review the cost estimates contained in the study in developing our Fiscal Year 1980 budget and in considering possible adjustments to out Fiscal Year 1979 budget. We will be sure to keep you and your staff officers apprised of our progress.

Sincerely,

CF: TAGO - Gen Smith is forwarding his ltr to

July 17, 1978

RECEIVED
JUL 28 1978

The Honorable Marshall Lind
Commissioner of Education
State of Alaska
Pouch F
Juneau, Alaska 99811

Dear Marshall:

Thank you for sending me the copy of your letter to Mr. Stormer, regarding the need for additional educational facilities at two of the on-base school locations in Alaska. Specifically Fort Greely and Adak.

After contacting Mr. Stormer's office, it is my understanding that under the present priority system there are seventeen projects with projected total costs of approximately $100 million which are above Adak and Greely in priority. I am, however, assured that a Mr. Chase has been in touch with your office and in fact has been in the state of Alaska and conducted on-site visits to both locations. Because of his awareness of the problems being faced in both locations, I am certain that wherever and whenever possible these schools will get additional funding to assist in financing their upgrading.

Once again, thank you for expressing your concerns to me in this regard. Should there be any other way in which I or any member of my staff might be of further assistance, please do not hesitate to let me know.

Best regards.

Sincerely,

Mike Gravel

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D. C. 20202

AUG 31 1972

Mr. Marshall L. Lind
Commissioner of Education
Department of Education
State of Alaska
Pouch F - Alaska Office Building
Juneau 99811

Dear Commissioner Lind:

This is in response to your letter concerning upgrading of school facilities at Fort Greeley and at Adak.

An in-depth study of school construction needs on Federal property, those under Section 10 of P.L. 81-815, including the facilities on Fort Greely and Adak Naval Station, was conducted by the United States Commissioner of Education. The findings of the study document a total estimated need of nearly $200 million for renovation, new facilities, or new construction to bring all of these facilities up to present law requirements and standards.

The school facilities needs suggested on Fort Greely were to provide 1) a kitchen facility; 2) a media center; 3) a physical activity area, and 4) correct all barrier-free design deficiencies and life safety code deficiencies. Those suggested for Adak Naval Station were to 1) construct a new elementary school; 2) repair and remodel the existing Adak school to serve as a Junior-Senior High School and 3) correct all barrier-free design deficiencies and all life safety code deficiencies. Cost estimates for the work at Fort Greeley are $1.9 million and at Adak, $13.3 million.

A number of construction needs established in the study are based on the serious nature of the life safety conditions in many of the section 10 schools, including Fort Greeley and Adak. The safety of children being educated in buildings under the cognizance of the U.S. Commissioner of Education is a prime concern. Secretary Richardson has stated publicly that meeting life safety and fire hazard access standards on Federal property is clearly a Federal responsibility and requires immediate attention.

On the basis of the Secretary's statement, therefore, we will use our appropriated Section 10 funds to bring as many of the Section 10 buildings up to those standards as soon as possible. The balance of the unobligated FY 78 funds will take care of about one-half of the facilities and the rest will be accomplished with FY 79 appropriations. The majority of the buildings in this category will require relatively minor repairs and upgrading.

Certain Section 10 facilities, however, cannot be made life safe. An example is old wooden buildings with "unacceptable burn rates." Therefore, construction of replacement facilities is required. Since the current regulatory priority system precludes the Commissioner from targeting money toward this effort, steps are being taken to revise the regulations When this is done and additional appropriations authorized, the needed construction can take place.

In keeping with Secretary Califano's directive, the facilities at Fort Greeley and Adak are scheduled to be adapted for the life safety and handicapped requirements in FY 79. The additions to the Fort Geeley building and the new construction and repair and remodeling at Adak are scheduled to occur after the emergency needs are met and additional funding is made available by the Congress.

We will keep you informed as we progress with this work.

Sincerely yours,

for William L. Stormer

William L. Stormer
Director, School Assistance
in Federally Affected Areas

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

3 OCT 1978

AFZT-PA-H

Honorable Jay S. Hammond
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

As my departure from Alaska nears, I feel obligated to ask for your help in getting state support for long-recognized and much-needed improvements for the Fort Greely School.

As you are probably aware, the Fort Greely School is a Health, Education and Welfare School staffed by the State of Alaska. Funding for the school's physical plant is through HEW and Congress. The school serves all military dependents in grades kindergarten through eight as well as local Delta Junction students in grades seven and eight.

A significant disparity exists between the Fort Greely and Delta Junction Schools. The Delta Junction School is adequate in all vital areas while the present Fort Greely School physical plant does not meet needed requirements for physical education, auditorium space, or cafeteria facilities. Through mutual agreement, Fort Greely facilities are used by the school for athletic training and competition and auditorium space as an interim measure. Post facilities for troop use, however, are limited and this arrangement impacts on post morale and efficiency. The hot lunch program served in most schools is not provided at Greely, and a Class A soup and sandwich lunch is fed in lieu of this. Construction of a gymnasium and cafeteria is a vital requirement if the school is to meet the educational needs of the children that use the school.

AFZT-PA-H
Honorable Jay S. Hammond

I am told that Mr. William L. Stormer, Director of School Assistance in Federally Affected Areas, Department of Health, Education and Welfare (HEW), has been aware of the construction needs for Fort Greely School since 1969. An extensive study was made in July 1975 by a team headed by Mr. James Woofter, then Acting Chief of School Construction of HEW. This study group recommended numerous construction needs to the Department. Despite numerous letters about the study in 1976 to and by Senators Mike Gravel and Ted Stevens, Congressman Don Young, plus Mr. Stormer and others, little progress has been made in improving the Fort Greely School. Earlier this year, I brought this matter to the attention of my commander at US Army Forces Command, Fort McPherson, Georgia, who in turn forwarded my letter to Headquarters, Department of the Army. I was informed that although our needs were recognized, the priority for limited HEW construction money was higher at other installations. I am prohibited by Army regulations, based on Federal statutes, from expending Army construction funds to improve the Fort Greely School. Colonel Bernard Jones, the representative on the State Board of Education, informs me that the Alaska State Commissioner on Education, Dr. Marshall L. Lind, visited the Fort Greely School this summer and has agreed to pursue a program to encourage state officials to upgrade the Fort Greely School even though it is an HEW facility. I am informed that the state has provided funds previously to upgrade other HEW school facilities in Alaska.

At the present time, I am convinced this is the only course of action that offers any possibility for near term upgrading. It is our hope that the state will eventually accept responsibility for the school from HEW.

I solicit whatever assistance you may deem appropriate to gain state financial assistance in upgrading the Fort Greely School.

My family and I have thoroughly enjoyed our assignment in Alaska and hope some day to return.

Sincerely,

JAMES G. BOATNER
Major General, USA

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

November 17, 1978

Major General James G. Boatner
Headquarters, 172d Infantry
Brigade (Alaska)
Fort Richardson, Alaska 99505

Dear General Boatner:

Your letter of October 3, 1978 concerning the construction needs at the Fort Greely School was appreciated.

The Alaska Department of Education and this office have been aware of the needs at Fort Greely for some time, and have recently been working toward acquiring the facilities from the Department of Health, Education and Welfare. As you have noted, federal funds have long been awaited, and the near term availability of such funding appears bleak in light of the nationwide demand for the limited congressional appropriations for this purpose.

Therefore, in an effort to upgrade the facilities to a status which is minimally acceptable under state codes, thereby clearing the path for state ownership, the Department of Education has requested $150,000 for code upgrade at Fort Greely as their Number Four statewide priority for FY-80. In addition, $2,500,000 has been requested for a multipurpose room/kitchen and an additional $300,000 for major maintenance.

I am expecting a funding level recommendation for FY-80 from the Budget Review Committee within a month. At that time we will be better prepared to say how many of the Department of Education's project requests this office will be able to recommend for legislative appropriation in FY-80. Unfortunately, the FY-80 funding level will be necessarily low, as our major construction programs are funded in odd-numbered fiscal years.

Dr. Marshall Lind, Commissioner of Education, has lent his support to the Fort Greely needs. The State Board of Education toured the facilities on September 8, 1978, at which time Colonel Bernard Jones stated his concerns for upgrading the facilities. Additional discussion of these needs took place at the October 19-20, 1978 State Board meeting in Anchorage.

Please be assured that I will give these needs my attention in preparing the FY-80 and future capital budgets.

I would like to take this opportunity to congratulate you on a most successful command assignment in Alaska, and to thank you for your contribution to the future of Alaska. Again, thank you for your support, and best wishes in your next assignment.

Sincerely,

Jay S. Hammond
Governor of Alaska

Re: Proposed Swimming Pool Complex - Kotzebue

Dear Frank:

As requested, we have prepared an exhibit demonstrating the cost effectiveness of utilizing this proposed pool as a sprinkler system water supply for all High School properties.

Assumptions made are those outlined in the exhibit: values, rates, continuing inflation.

Projecting rates ten years is extremely difficult, due to cyclic pricing changes within the insurance industry. Presently property rates are at bottom and the trend to increasing rates is expected.

Of the comparative rates shown in the exhibit, the "current rate" is subject to the pricing pressure to increase. Sprinklered rates tend strongly to remain stable.

Summarizing the estimated premium savings over ten years, if the High School properties were to be sprinklered:

Comparison	Savings
Standard Rate - Sprinklered Rate	$2,150,000
Current Rate - Sprinklered Rate	$1,075,000

These may be considered the minimum and maximum premium savings, with actual savings greater than the minimum due to expectations of increased pricing.

2525 C STREET, SUITE 507, ANCHORAGE, ALASKA 99503 • TELEPHONE (907) 279-0555 • TELEX 26-609

INSURANCE

We have noted major considerations other than premium savings. Those are property conservation; greatly reducing the probability of a major fire loss and life safety, a most important consideration.

Do let us know if we can be of additional assistance.

Sincerely yours,

Robert M. Cunningham
Senior Vice President

Cost Effectiveness Of Its Utilization as Sprinkler System Reservoir

Assumptions:

1. -Pool complex value $2,000,000.
   -Capacity 100,000 gallons +
   -To include necessary pumps for sprinkler system, and sprinkler system within pool building.
2. -Present value of High School Complex $15,000,000.
   -All to be sprinklered
3. Values will increase at 10 percent per year
4. Comparitive rates will remain stable.

Comparitive Rates:

Standard ISO Fire	$1.11
Current	.65
Estimated Sprinklered Rate	.20

Premium Savings If Sprinklered based on Comparitive Rates:

	High School Complex		Pool Complex	
Year	Standard Rate	Current Rate	Standard Rate	Current Rate
1	$135,000.	$67,500.	$18,000.	$9,000.
2	148,500.	74,250.	19,800.	9,900.
3	163,350.	81,675.	21.800.	10,900.
4	179,685.	89,840.	24,000.	12,000.
5	197,650.	98,830.	26,300.	13,200.
6	217,400.	108,700.	29,000.	14,500.
7	239,200.	119,580.	31,900.	16,000.
8	263,100.	131,540.	35,100.	17,500.
9	289,400.	144,690.	38,600.	19,300.
10	318,300.	159,160.	42,400.	21,200.
Total	$2,151,585.	$1,075,765.	$286,900.	$143,500.

2. Assumes 11% inflation in succeeding fiscal years (equipment considered as one-time item in FY 81).

Rationale

The magnitude of the number of projects requires one position for financial accounting of capital projects for rural schools. Such project funds would be transferred by reimbursable services agreement to the Department of Transportation/Public Facilities per the provisions of AS 35.15.080.

Project 29 - No cost for administration. Administered by Department of Education, Division of State Libraries/Museum per the provisions of AS 14.56.065.

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF REVENUE

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

February 6, 1980

The Honorable Thelma Buchholdt
Chairman
House Health, Education &
Social Services Committee
Room 112 - Capitol Building
Juneau, Alaska 99811

Dear Ms. Buchholdt:

Re: House Bill No. 561

House Bill No. 561, an Act providing for the issuance of general obligation bonds in the amount of $22,060,900 for the purpose of paying the cost of capital improvements for educational and library facilities, was introduced in the House on January 18, 1980 and was referred to the House Health, Education and Social Services Committee and the House Finance Committee.

For the consideration of the House Health, Education and Social Services Committee, I am enclosing a copy of a letter from Mr. Eric E. Wohlforth, Wohlforth and Flint, Anchorage, State Bond Counsel for the State Bond Committee which concerns in part House Bill No. 561.

Mr. Wohlforth also indicates that the amount of bonds authorized be rounded to the nearest $5,000. General obligation bonds of the State and nearly all other state and local governments are issued in the denomination of $5,000, the standard unit.

Using House Bill No. 561 as an example, this would result in issuing less than the total amount of bonds authorized or in issuing one odd bond in the denomination of $900 along with 4,412 bonds in the usual denomination of $5,000.

04-D2LH

Issuing a bond in an odd denomination requires extra time and expense and confusion in the printing of the one odd bond with all of its special coupons and all of the paying activities.

Sincerely,

R. D. Stevenson
Special Assistant

Re: Bond Bills - State Bond Committee - Our File No. 3610.

Dear Bob:

In H. B. 560 providing for the issuance of general obligations bonds in the amount of $18,100,000 for State facilities, I question the purpose of the bond issue which is stated as "paying the cost of energy conservation, code upgrade, and architectural barrier removal". These terms, no doubt, have meaning to architects or engineers but I think are not understandable to most of the general public. Accordingly, I would suggest the language be amended to words in more commonly accepted usage such as, for "code upgrade", if this is its meaning, "life and safety improvements to state facilities". I have no suggestion for "architectural barrier removal" as I do not know what is intended by this phrase.

In S. B. 343, "An Act providing for the issuance of general obligation bonds in the amount of $20,550,000 for the purpose of paying the costs of capital improvements for University of Alaska facilities", I question the item under Project entitled "(2) Perform major maintenance and repairs - Statewide - 950,000". Depending on the nature of the items in fact contemplated, this purpose may not be comprehended within the term "capital improvements" which is stated in the bond proposition.

In H. B. 561, "An Act providing for the issuance of general obligation bonds in the amount of $22,060,900 for the purpose of paying the cost of capital improvements for education and library facilities", I question the item under Project entitled "(7) Construct arctic entry and paint school - Nelson Island - 265,000". Painting would only, it seems to me, be an appropriate capital improvement in connection with the original construction of a building which may be the case here.

OVL

In this bond bill, as well as in S. B. 342 and H. B. 563, the amount of the bonds authorized should be rounded to the nearest $5,000.

Very truly yours,

WOHLFORTH & FLINT

By Eric E. Wohlforth

OBJ. NO(S)	OPERATING BUDGET BRU(S)	NAME(S)	BUDGET COMPONENT NUMBERS	START DATE	COMPLETION DATE
3.3 & 4.1		N/A	N/A	May, 1982	Dec., 1982

PROJECT NARRATIVE

I. Project Need Statement:
Present roof is beyond repair.

II. Project Description:
This project provides for a new roof to replace the existing roof.

III. Documentation of Estimated Capital Cost:
The figure of $200.0 was provided by the school district. This figure should be verified by a qualified engineer.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
1. Do nothing; rejected because of potential damage to facility by weather.
2. Postpone; rejected because of the effect of inflation on construction costs.

3.3 & 4.1		N/A	N/A	June, 1981	Jan., 1982

PROJECT NARRATIVE

I. Project Need Statement:
The existing school building is an old log structure which is substandard, and the proposed renovation is necessary to house adequately the elementary school program at this location.

II. Project Description:
Renovation of Kongignak Elementary School.

III. Documentation of Estimated Capital Cost:
Original cost estimate of $750.0 was given by the school district. The figure on 35a and 35b were given by DOT/PF Condition Survey.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
Do nothing or postpone; rejected because renovation is necessary in order to house adequately the elementary program and to protect the structure.

3.3 & 4.1		N/A	N/A	May, 1981	Dec., 1981

PROJECT NARRATIVE

I. Project Need Statement:
The original school was constructed many years ago by the BIA. The school consists of old buildings not connected together. They are substandard in size and in poor condition.

II. Project Description:
This project will provide a remodeled elementary building to house the K-8 program approximately 9750 sq. ft. single story wood frame construction.

III. Documentation of Estimated Capital Cost:
Original cost estimate of $3207.0 was provided by the school district. DOT/PF's LCC analysis gave the figure of $2491.0. The figures provided on 35a and 35b were given from a survey done by DOT/PF

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
1. Continue as is; rejected because of building condition and overcrowding.
2. Remodel existing; rejected because of costs.
3. Postpone; rejected becuase of effect of inflation on construction costs.

3.3 & 4.1		N/A	N/A	May, 1981	May, 1982

PROJECT NARRATIVE

I. Project Need Statement:
The present school facility does not adequately serve instructional program needs of the 65 student in K-12th grade at this location. Lacking sufficient space, program offersings are diminished.

II. Project Description:
The design and construction of a 14,825 square feet addition to the Cold Bay School to include classroom, library-media, vocational education, and multipurpose space.

III. Documentation of Estimated Capital Cost:
Original cost estimates of $2,965.0 was provided by the school district. The figure provided on 35a and 35b reflect DOT/PF's LCC analysis.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
Do nothing or postpone; rejected because the existing facility is so inadequate that a satisfactory elementary/secondary program cannot be offered at the present time.

The school program is designed to include the use of resources to be contained in the Library/Media Center.

II. Project Description:
This project will provide a single story, wood frame structure of 1100 square feet with equipment.

III. Documentation of Estimated Capital Cost:
Original cost estimate of $350.0 was provided by the school district. The figures provided on 35a and 35b reflect DOT/PF's LCC analysis.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
1. Do nothing; rejected because of need for center in conducting educational program.
2. Postpone; rejected because of the effect of inflation on building costs.

3.3 & 4.1		N/A	N/A	May, 1982	Dec., 1982

PROJECT NARRATIVE

I. Project Need Statement:
This facility was designed as an elementary school. A secondary program has been developed for implementation. The facilities require remodeling to provide space for the high school program.

II. Project Description:
This project will provide remodeling of existing space to accomodate, shop, science lab, business and math instructional areas.

III. Documentation of Estimated Capital Cost:
Original cost estimate of $1500.0 was provided by the school district. DOT/PF's LCC analysis provided the figure of $12211.0. The figures on 35a and 35b were provided by DOT/PF's Condition Survey.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
1. Do nothing; rejected because existing space is not adequate for secondary program.
2. Postpone; rejected because of the effect of inflation on construction costs.
3. Replace with new structure; rejected because remodeling existing structure will provide service needed.

35a PROPOSED CAPITAL PROJECT

REVISED DATE 11/26/79

PROJECT TITLE	LOCATION(S)	AREA SERVED	ELECTION DISTRICT(S)
Library Construction Grants	Local Communities	State	All

OBJ. NO(S)	OPERATING BUDGET BRU(S)	NAME(S)	BUDGET COMPONENT NUMBERS	START DATE	COMPLETION DATE
1,3		State Library	05-13-70-20	7/80	6-81

PROJECT NARRATIVE

I. Project Need Statement

Many communities throughout Alaska have inadequate or no community library facility. State grants matched by local communities under AS 14.56.065 and .240 enable communities to establish or to remodel facilities for public library use. Funds made available for grants through SLA 1974 chapter 116 have a current balance of $21,130. Needs exceed the balance available. As more communities are becoming aware of health, safety, and access requirements for public buildings and as more library-related programs are implemented, more communities are expressing a need for a community library facility which may be separate or part of another community facility such as a school, community college, or municipal building. Library - related programs include community college extension courses, literacy and G.E.D. programs, pre-school and public school education, satellite courses, Native Corporation training workshops, etc. All of these and regular information and recreation or cultural resources needs are part of community library services. Attached sheets contain a summary of community needs.

II. Project Description

The project consists of a variety of local projects to remodel or construct and equip community library facilities. Communities in applying for grants indicate project cost estimates, plans for service and operating funds as well as grant and local match funds needed and/or available. Projects may be in communities of less than 300 people if a need

3.3 & 4.1		N/A	N/A	June, 1981	August, 1982

PROJECT NARRATIVE

I. Project Need Statement:
No secondary school facility presently exists at this location, and the village has requested a secondary school program. The proposed building therefore, is needed in order to house this program.

II. Project Description:
Project is for the construction of a new secondary school facility for approximately 25 unhoused students, and will include classrooms, library-media center, multipurpose room, and related space.

III. Documentation of Estimated Capital Cost:
Original cost information, $3,350.0 was provided by the school district based on its cost-per-square-foot results for like facilities in the bidding on Chapter 131/76 and Chapter 134/78 schools in the region. The figures provided on 35a and 35b reflect the "Hootch" attorneys agreement.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
1. Rent or lease space; rejected because space is unavailable.
2. Use old BIA facility; rejected because of over-crowding and/or double-shifting.

PROJECT NARRATIVE

I. Project Need Statement:
This project was started with a combination of State and Federal funds. Revised cost estimates indicate a need for additional funding.

II. Project Description:
A single story wood framed elementary/secondary school to replace existing facility would provide for additional secondary program. Hootch Site.

III. Documentation of Estimated Cost:
The figure of $450.0 was provided by the district, architects, and engineers.

IV. Analysis of Estimate of Operational Expense:
The school is operated by the school district under A.S. 14.17, Public School Foundation Program, and therefore, the project will not impact operation expenses.

V. Identification of Alternatives Considered:
1. Do nothing; rejected because the project is part of a legal agreement.

Zharoff

Chiniak School
Construction

Kodiak Island
Regional Education Board

January 21, 1980

The Honorable Fred F. Zharoff
Alaska State House of Representatives
Pouch "V" State Capitol Building
Juneau, Alaska 99811

Dear Representative Zharoff:

I would like to take this opportunity to ask for your support of the "Proposal for Funding of a Combined Elementary/Secondary School Facility in Karluk, Alaska for Consideration at the 1980 State Legislative Session" in the name of the Kodiak Island Regional Education Board (REB). The REB unanimously approved a motion in support of this proposal at its January 17th and 18th 1980 meeting.

The REB is composed of the Advisory School Board/Indian Parent Committee Chairmen from six Native villages of Kodiak Island and the Indian Parent Committee from the City of Kodiak. This Board is elected by the parents of Native children in the schools of Kodiak Island Borough and represents the total Native community of Kodiak Island.

Your support of this proposal will greatly assist in providing a quality education for the children of Karluk.

Sincerely,

Nick Peterson, Sr.
Chairman
Kodiak Island
Regional Education Board

HOUSE BILL NO. 619

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities for construction of a school at Chiniak; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $3,300,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for payment as a grant to the Kodiak Island Borough for construction of a school at Chiniak.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

KODIAK ISLAND BOROUGH

The Honorable Mr. Fred Zharoff
Alaska State House of Representatives
POUCH V
Juneau, Alaska 99811

RE: Your request for information

Dear Mr. Zharoff,

The following Capital Improvement project recommedations reflect the opinions of the Kodiak Island Borough Administrative staff. Do to the short response time allowed we were unable to obtain project nonimations or priority rebuttal reflecting the opinions of the Borough Mayor and Assembly. However, Mayor Wallin has reviewed this letter and several projects reflect her opinions.

1. Akhiok Elementary School. The existing school at Akhiok was a temporary building designed to last for a few years. Thus far this temporary expedient has been used for ten (10) years. This building should be replaced by the State.

2. Cape Chiniak Elementary School. The existing facility at Chiniak is operating at capacity increased enrollment requires an increase in school facilities. The proposed Job Corp Center will create additional school facilities needs for faculty member's dependent children.

3. Kodiak Boat Harbor Facilities. It is imperative that new boat harbor facilities be constructed at Kodiak. We can not afford to wait for the U.S. Congress and Corps of Engineers to act, as they have been promising this facility for over a decade. To date all we have seen from Washington are revised reports and lots of political rhetoric. Unfortunately we can not moor boats in a harbor constructed on Congressional rhetoric.

   It is our feeling that low interest loans and direct construction grant aid will provide the most expeditious method of financing these urgently need harbor facilities. We will be happy to provide you with specific cost and need justification data prior to the January 1980 Legislative Session.

4. Rural Alaskan Economic Development. If we are to ultimately establishable economic stability in rural Alaska. The State should make low interest economic development loans available through the permanent fund or a revolving self perpetuating economic development fund.

5. Planning Grant Assistance. The State should provide 100% funding for the Planning grants when the issues have regional, State wide, or National significance such as the O.C.S. Planning Programs. We need plans prepared by and for the local Community rather than those prepared for us by Federal and State agencies. It has been our experience that the Federal and State planning considerations are not always the same as those of the local community. Since we have planning power and responsibility, provide us the funds to carry out those responsibilities. Funding levels for O.C.S. and Coastal Zone Programs should be at the 100% level with State agency coordination in work scoping project review.

6. MONASHKA DAM LOW INTEREST CONSTRUCTION LOANS AND DIRECT CONSTRUCTION GRANTS TO DAM CONSTRUCTION. STATE LEGAL ASSISTANCE IN RESOLVING LAND CLAIMS CONFLICTS IN WATER SHED AREA.

7. PAVE ROADS IN KODIAK URBAN AREA.

8. CONSTRUCT ROADS IN MONASHKA BAY, MILLER POINT AND RUSSIAN CREEK SUBDIVISION

9. PARKING LOT IMPROVEMENTS AT KODIAK COMMUNITY COLLEGE

April 8, 1979
Kodiak, Alaska

Representative Fred Zharoff
Pouch V
Juneau, Alaska

Dear Representative Zharoff

The citizens of Chiniak are in need of your assistance. We are facing a crisis situation at our school.

The Federal Government has leased the old Chiniak Tracking Station from Koniag and will open its doors as a job corp center on October 15th of this year. Staffing of the facility will require sixty persons, many of them professionals. The offspring of both the job corp personal and job corp students will be attending our Chiniak school. The center intends to hire as many local people as possible but even with that effort the impact will be great. David McGuigans, the director, is projecting an increase of twenty-five to thirty students for our school, and it may well be more.

Our present facilities are meager. They consist of an eight year old temporary unit, modest living quarters for our sole teacher and his wife, and a small storage/t.v. room which joins the two facilities. The above is located at mile 41 of the Chiniak Road on a ten are plot of borough owned land. The structure stands on a minimum ammount of gravel fill. The filled area also accommodates a driveway and a playground.

The present studentbody consists of fourteen children, kindergarden thru eighth grade, and that is all the facility can handle. What will we do with the twenty-five or thirty more children that arrive in the Fall?

For months the Chiniak commity has been working in earnest to solve this dilemma. We've been to the Kodiak School Board and school administration. We've talked to the Borough Assembly, Mayor Wallen, and job corp representatives. Theres been some press coverage and a Chiniak School open house was held to which all of the above persons were invited. The response of everyone we've talked to has been the same; There are no moneys anywhere to accommodate this influx of students. Our only headway came last week when Chiniak was included in an all-inclusive bond. If it is passed Chiniak will receive $150,000. The problem with the bond issue is that it may, or may not pass and of course it will not be in time to releive our predicament. If a permanent school is to be built it must be started immediately. It its to be an atco unit the order must be placed now. Additional land fill is required to accommodate either.

The job corp is a fine program and we are opt mistic about its addition to our community. But we wonder; Why was'nt an impact study done by the Ferderal Government? Why did'nt Govenor Hammond order one at the time he signed his support of the Chiniak sight?

We are a stable, wor ing, tax paying community who want good quality education and accommodations for our new neighbors children as well as our own. But we need your help. We need your support and advice. We have exhausted all local avenues in search of a building fund. There is none. It has become apparent that we both need, and are deserving of either State or Federal moanys to orb the impact on our school. How can such an application be made? Where do we find a commitment, a possitive action toward readying our school for Fall?

Your support and any insight or advice you have to offer will be greatly appreciated. Thank you for your attention.

Sincerely

Crystal A. Ranney

Dear Sir:

On behalf of the Chiniak Advisory School Board, I want to thank you for attending the special public meeting of October 24, 1979 at the Chiniak School.

Gary Shepard, Asst. Principal for Villiage Schools, has been assigned to put together a proposal to the State Board of Education and in turn will be submitted to the legislature for funding. The package will include a summary of our school and the Chiniak Community along with plans for new facilities.

Again we appreciate the time and effort you have shown. We will keep you aware of progress on our ever continuing problem.

Sincerely,

J. Clifford Stone
Secretary
Chiniak Advisory
School Board

Jan 22-80

Mr. Zharoff,

I am a concerned parent with a daughter presently going to the Chignik school. It is really a shame to see how run down + overcrowded this school has become. It is a small school + very much needed for our area as we are so far from Kodiak True we are on a road system but I believe there is also a limit of travel time a child is to be on a school bus. We need this school to eliminate a long hazardous + sometimes impossible drive to Kodiak. It is not unusual for my high school son to be on the road 2 hours + 45 min. a 50 mile trip. As you know the Jet Cargo will be in operation by the end of the year + this will drop at least 20 more school age children in our area. The Chignik elementary school cannot handle the growing amount of students, let alone a whole new group. I know there are native villages much smaller than our area which obtain funds for new schools & I'd sure like to know why we cannot get funds for a new Chignik elementary + high

school. The high school children who live out here now would gladly give up all the big school facilities to be able to attend school closer to home. My son has discussed quitting school just to eliminate that bus ride, & I would say the borough is contributing to lack of education in our case. The borough owns 10 acres the Chinook school presently sets on & that's where we'd like a new school built. If the state has 4½ billion dollars in excess, it would seem a very small thing to ask a new school for Chinook. We pay our taxes just like town & I don't feel we are asking too much to allow our elementary & high school children a decent education at a decent distance from home. Please help us get our school up to date & ready for the future.

Mr. Ed Grieser
Alaska State Department
of Education
Pouch F
Juneau, Alaska 99801

Dear Mr. Grieser:

I am writing to you concerning Steve Crawley, a student from Chiniak. Steve is a Junior at the high school here who must bus 90+ miles a day round trip to and from school. He would like to enter the Boarding Home Program and board in Kodiak while attending school. He inquired last year and this year and was refused because your office has maintained that an educational program was accessible to him.

It is my contention that the program is not as completely accessible as it should be. Steve must bus for two (2) hours to get to school and leave promptly at 3:30 p m. to bus two (2) hours to go home again. Inclement weather and road conditions tend to increase the busing time, leaves little time to study or for participation in other school activities, such as sports, that are an integral part of the high school's educational program. Therefore, Steve does not have access to the study time or extra-curricular activities that are available to other students at the high school. I feel that his request to be included in the State's Boarding Program is both justifiable and reasonable.

Sincerely,

April 9, 1979

Dr. John Anttonen, Superintendent
Kodiak Island Borough Schools
P.O. Box 886
Kodiak, Alaska 99615

Dear John:

I received a letter from Yvonne Zharoff of the Kodiak Area Native Association regarding Steve Crawley. We have not received any correspondence from your district regarding Mr. Crawley's participation in the Boarding Home Program.

Since regulations provide an option for parents of students who travel longer than 120 minutes per day, we would have no particular problem with allowing Steve to be in the Boarding Home Program for the next two months providing his parents request it. However, since your district is the recipient of the grant, do you wish this to happen and do you plan to request an amendment to your current program? If so, how much of an increase would you need? Is Steve the only secondary student who travels to Kodiak from Chiniak? It appears he is now riding on existing bus routes at no extra cost.

Please let me know the details of this situation as soon as possible.

Sincerely,

Kenneth C. Grieser

Dear Crystal:

Thank you for your letter of April 8, 1979, expressing your concerns about the Chiniak school in relationship to potential growth resulting from the Job Corp. program at the Chiniak tracking station.

I have been in contact with Dr. John Anttonen, Superintendent of Schools, and although monies are going to be very tight this year as far as construction is concerned, I am trying to see what I can do to alleviate any financial problems that the district might have in regards to upgrading and adding on to existing school structures at the Chiniak school. I will be in contact with Dr. Anttonen and request that he advise you of our progress. There are some monies available but they are very limited at this time.

Again, thank you for expressing your concern.

Sincerely,

Fred F. Zharoff

Dear Representative Zharoff

My name is Habibi Tafts and Iam in fourth grade at Chiniak School. Iam writing you This letter because Ifeel That we need a new and Larger School because our building is old, and falling apart. Our library is way to small. We have no clean water and when we have to go to The bath room we have to run out in The cold snow to The outhouse. And when we eat lunch we make a big mess for the Teacher. We dont have room for Games. SO That means we need a new Gym. And when it comes to going to school if is so cold that we have to wear our jackets and work. So What I am Talking about is That we need a new school.

Thank you

Dear Students:

Thank you for your letters and pictures supporting a new school for Chiniak. I would like to write a letter to each of you, but at the present time I am very busy trying to get legislation together to meet all of the needs of our area. I hope to be able to write each of you a letter as soon as I get all of the busy work out of the way.

I have introduced legislation which, if passed, will provide $3,300,000.00 for construction of a new school at Chiniak. This legislation is House Bill 619. I have included a copy for you in the enclosed folder. House Bill 619 has been referred to the House Health, Education and Social Services Committee with a second referrel to the House Finance Committee. I will use all of your letters and others that I have on file, as testimony when the bills come up for hearing in these committees.

Once again, thank you for your letters and pictures. If you have any other areas of concern, please do not hesitate to write again.

Sincerely yours,

Fred F. Zharoff

Dear Representative Buchholdt:

On behalf of Northern Alaska Health Resources Association (NAHRA), I am writing to encourage your support for HB 545, which would amend the child protection laws.

NAHRA's plans recommend prevention and intervention in cases of domestic violence and sexual assault, the development of mental health crisis intervention services, and the development of community mental health programs for children and adolescents.

Since HB 545 would extend the child protection laws to cover mental as well as physical abuse and neglect and would require reporting of such cases whether or not they require medical attention, we feel that passage of HB 545 would work toward improving the health and safety of Alaska's children. By so doing, HB 545 would help to implement NAHRA's plans, which were developed by the citizens of the northern region.

We urge you to join us in supporting HB 545. Please let us know your stance.

Sincerely,

J.B. Carnahan

Dear Thelma:

Enclosed is the proposal of the Anchorage Community College Women's Center Task Force. We have had excellent participation on the part of those community and campus leaders whom you met, and wherever we have spoken with people in Anchorage about the work of the Task Force, they have expressed enthusiastic support for the proposal.

Please let me know if you want someone to testify before the Finance Committee on this proposal. Members of the Task Force have volunteered to write and/or wire if you think such communications might be in order. We would need your advice on the timing involved, if you think the idea is a good one.

This proposal has been carefully studied by Dr. Ed Biggerstaff, ACC Campus President, and it carries with it his full approval and support. All of us who are involved with administration at ACC are deeply grateful to you for your interest in the needs for a Women's Center, and for your willingness to call these needs to the attention of our House Finance Committee. Please let me know if I may be of help in any way, at any time.

Sincerely,

Mary Hale

INTRODUCTION

For the past two years, a Women's Committee has served in an advisory capacity to the Campus President of Anchorage Community College, pointing up pertinent problems and providing assessments of crucial needs for additional programming and services for women on our campus. Upon the request of a number of women from the community at large, as well as the urging of staff, faculty, students and the Campus President at ACC, a Task Force was formed in the fall of 1979 to set forth plans for a Women's Center which would provide both programs and services needed by women of the Anchorage community, with a target date for beginning operation of July 1, 1980. The following proposal is the result of their planning efforts.

Funding for an adequate women's program has held top priority among administrators at ACC for the third year in a row. But due to less than maintenance budgeting and the moratorium that was placed on all new programming, no real progress has been made in meeting the special needs of women at ACC. The FY 81 budget, which goes into effect on July 1 of 1980, was submitted without a funding request for women's programs some eleven months prior to this date. We therefore respectfully request consideration of the attached budget as an addition to the regularly submitted budget from the University of Alaska.

Administration of the Women's Center is the responsibility of the Public Services Department of Anchorage Community College, directed by Mary Hale, Assistant to the Campus President. Physical facilities for this program have been reserved in the Campus Center, with the north lounge area designated for use of Center personnel and clientele. This particular area is most convenient to both campuses and is easily locatable by community people who enter through the south door to the Campus Center. The Food Service and other service areas within the Campus Center are conveniently close at hand.

The Master Plan for ACC, written last year with the help of ninety community leaders from every area of our Anchorage, calls for expanded services and classes for women. The Community Needs Assessment report, also published in 1978, highlights requests for increased number of classes for women during the early morning and evening hours. All planning and research at ACC has pointed up the need for a Women's Center, especially during the past three years, as our enrollment figures have underlined this need in their ever-growing margin of women students over the number of men now studying at ACC. For example, in 1978 women numbered 4,501, with 3,427 the count for men. This fall, based on statistics released as of November 26, 1979, the total number of students at ACC stands at 8.279 of which 4,959 are women and 3,320 are men. As the numbers of women students increase, needs for a special service center are growing and will continue to expand.

In last year's student newspaper, one student described the ACC campus as "the loneliest place in the world for a woman." We would like to change that scene in a number of ways: to help students feel welcome, non-threatened, with help available from professionals who can assist them with adequate testing, career counseling, academic advisement, tutorial support as needed, with information about other opportunities for women in Anchorage, and with child care referral help. We want to provide

A special appropriation of 138,000 for the Women's Center at the Anchorage Community College to

Introduction continued

opportunities for women to realize their full potential, to do the "catching up" which years of working only in the home have made necessary, to be able to gain in their job situations upward mobility which is now not usually possible, to be able to pursue that educational interest which will be enriching and fulfilling. We sincerely believe that a Women's Center, as described here, given adequate funding and astute administration with capable, sympathetic personnel, will accomplish these goals. We solicit your support for our purposes, which are:

A. To provide comprehensive educational programs for and about women, both on campus and in outreach locations within the Anchorage Community, and

B. To establish, maintain and coordinate services for women, such as financial aids, tutoring, testing, counseling, career advisement, referrals and placement.

OUR TARGET POPULATION

It is important to emphasize that the ACC Women's Center is planned not to duplicate services already available to women at the Alaska Women's Resource Center and at the YMCA, as well as in several churches and through at least one or more of our service clubs. Instead, the Center is considered as a source of services and specialized training not now available for all women in the Anchorage area. Coordination of programming with other local agencies is a requisite for the planning at ACC, and it is hoped that a number of workshops and conferences can be undertaken jointly with groups that are dedicated to serving women.

In the survey of homemakers just completed for the Alaska Commission on the Status of Women, one striking statistic is worthy of an underline: seventy-one per cent of the homemakers not now attending classes are interested in doing so! With so many thousands of Anchorage citizens already planning for their continuing education, the challenge is tremendous and the timing is now for establishing both programs and services which will serve well the needs of these women. The almost unanimous response of the homemakers surveyed to a question about how they would do things differently with their lives involved establishing a career earlier in life or having gone further with their education before marriage. By far the majority of these homemakers are interested in re-entry into education for the purpose of becoming trained for gainful employment.

There are also thousands of women who are already among the working population who are seeking additional education not just in order to advance along the job trail, but primarily for enrichment purposes. The ACC Educational Needs Survey of Federal Employees, made in August of 1979, reveals that 91.7% of employees responding indicated they wished to continue their education. 49.5% of these were women, giving as their reasons for seeking more education and training "to upgrade skills and move to more responsible jobs"(57%) and "to learn new skills and hopefully change occupations"(23.4%). Continuing, lifelong learning is one of the exciting ever-more-popular interests being developed by women of all ages, everywhere.

Our Target Population continued

While we know we cannot be all things to all women, we certainly hope to serve a variety of needs through the services and programs of the Center. We are aware of a great need for a professionally-done needs assessment among the women of Anchorage, after which the broad purposes of the Women's Center can certainly be modified to reflect more specific target populations, but until such time as we are aware of such needs for specialization, the Center would be administered to meet its two main, broad objectives as stated. Our target population is in fact the women of the Anchorage community.

PROGRAMS

Among others to be offered on the basis of proven need, here are suggestions of workshops, courses both for credit and non-credit, support programs and conferences which have been requested of the Women's Center:

Workshops

Time Management
Resume Writing and Job Interviews
Financial Opportunities in Anchorage
Career Opportunities in Non-Traditional Fields
Basic Life Skills

Courses

Suddenly Single
Oral History: Alaskan Women
Women and the Law of Alaska
Movement Therapy
Assertiveness Training

Conferences

On Re-entry: Job-related and Educational
Women in Science and Technology
Women Alone
How Women Can Advance in Employment
Parenting
Re-directed Homemakers

One major conference is planned annually, with outstanding Alaskan women as speakers and participants.

PERSONNEL

One full-time coordinator

One full-time administrative assistant

One half-time accounts clerk

Two assigned counselors (40%) from the ACC Counseling Center

One assigned counselor from the Educational Opportunities Center

Three part-time peer counselors to be trained by the ACC Counseling Center personnel, and specifically assigned to work with minority groups in the community, primarily in off-campus locations.

QUALIFICATIONS

Required: Baccalaureate degree

Paid or volunteer work experience in women's programs and/or organizations.

Supervisory work experience to include organizing, planning, budgeting, and implementing broad-aspect programs.

Preferred: Work/teaching experience in a post-secondary educational institution.

Formal training and/or work experience in individual advising and group process.

Master's Degree

GENERAL RESPONSIBILITIES

The Women's Center Coordinator is responsible for organizing, planning and implementing programs and services helpful to women on campus as well as in the community. In addition, the Coordinator performs such other tasks as may be required to accomplish institutional goals and objectives through the following specific responsibilities:

1. Reaching women in the community through presentations, workshops and publications, plus coordinating at least one annual conference;

2. Organizing and facilitating educational programs in conjunction with appropriate ACC departments with special attention to the needs of ethnic women;

3. Advising the Student Services personnel, faculty and staff regarding the special needs of women in such matters as orientation. admission, and financial aid;

4. Assisting the Learning Resources Center in establishing a specialized library for women;

5. Providing information about child care availability;

6. Assuming responsibility for development and management of the Women's Center, including the hiring and supervising of personnel;

7. Serving as an information officer for programs and services available to women in Anchorage;

8. Facilitating re-entry for returning women students;

9. Serving as an ex-officio member of advisory committees to women's programs;

Job Description continued

10. Developing faculty and staff in-service training on sex stereotyping;

11. Obtaining grant monies to enhance the opportunities for women at ACC;

12. Attending conferences on women's programs and services as approved;

13. Performing other duties related to the Women's Center and programs as assigned by the Director of Public Services or by the Campus President of ACC.

Proposed Salary	$25,812.00	base
	$ 5,704.45	benefits (22.1%)
	$ 1,806.84	COLA (7%)
TOTAL	$33,323.29	

QUALIFICATIONS

Required: A. A. degree or equivalent

Three to five years' general office experience, with one or more in a people-oriented environment.

Typing 50 wpm, ability to organize and maintain filing system, e telephone manner, ability to manage office with little supervis

Above-average public relations skills, including excellent wri en and verbal communications skills.

Preferred: Baccalaureate degree

Familiarity with community college system.

Familiarity with women's programs and organizations in Anchorage.

GENERAL RESPONSIBILITIES

1. Serving as receptionist, this person will be the initial contact for all people coming to and calling the Center, directing inquiries to the proper channels and disseminating information as needed.

2. Managing routine office work, assisting in writing reports, ordering supplies, handling correspondence.

3. Organizing and maintaining filing system, including library materials; working with the Learning Resources Center to establish a resource library for women.

4. Responsible for various duties as assigned by the Coordinator, in addition to managing day-to-day office functions.

JOB DESCRIPTION ACCOUNTS CLERK III (HALF-TIME POSITION)

QUALIFICATIONS

Required: High school graduation or the equivalent. Three-years' clerical accounts experience. Appropriate education beyond the high school level may be substituted for two years of the required experience. Knowledge of modern office practices, accounting procedures and business machines. Ability to work with little or no supervision, perform all accounting functions for the office efficiently and accurately; work with others in reconciling and correcting accounts.

Preferred: Two years' college; bookkeeping and accounting experience beyond the minimum requirements.

GENERAL RESPONSIBILITIES

1. Keeps all soft ledgers for the office.
2. Performs all Cost Center Clerk duties.
3. Orders all materials, processes purchase requisitions, check requests and other financial paperwork.
4. Maintains and checks financial records with status reports, and reports any irregularities.
5. Processes time sheets, receives and distributes checks.
6. Compiles fiscal reports for funding sources, keeps records of same.
7. Processes employee appointment proposals.
8. Performs other related duties as assigned.

TO WHOM IT MAY CONCERN:

The Alaska Women's Resource Center supports the concept of a Campus Women's Center at the Anchorage Community College. Staff members from the Alaska Women's Resource Center have participated in the planning of such a Center and would use it in the Information and Referral Program whenever possible.

At our Center, in trying to help women in the Displaced Homemaker's Program, it is found that most of these women do not have adequate educational background to apply for the jobs that are available. The Center would support efforts to counsel women to obtain this needed education, and to encourage the supportative services to remain in school.

Sincerely,

Helen Fisher, Director

To Whom It May Concern:

Women at Anchorage Community College have for several years been working as volunteers in an effort to establish a campus women's center. At several organizing meetings which I have attended in the past such needs as educational counseling, rap and reading rooms, skill-building classes, childcare, and roommate exchanges have been listed as prime needs of campus women.

Because each year campus women again express some combination of these needs as primary, I am pleased to see that the College has responded with a proposed program. I strongly recommend that it be given serious consideration, since it will provide a needed community service.

Sincerely yours,

Lynne Woods

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER / POUCH B—JUNEAU 99801

March 28, 1980

The Honorable Thelma Buchholdt, Chairman
Health, Education, & Social Services Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

RE: COMPANION BILLS SB 324 and HB 609 AMENDING THE FORMULA FOR THE SENIOR CITIZEN RENTER'S PROPERTY TAX EQUIVALENCY PAYMENT

The Department supports the conceptual formula which increases payment to Senior Citizen renters, as the increased payment will be more equitable with exemptions currently received by Senior Citizen homeowners.

However, as you consider this legislation, there are areas of concern we would like to bring to your attention. It is felt that, with your guidance, these concerns will not be compounded by the passage of this legislation.

The Department's concerns which we ask to be addressed are as follows:

A. ASHA & HUD Owned Housing: These housing projects are exempt from property taxes and consequently when rents are fixed, there is not a component included for property taxes. There are projects, however, which do make a payment in-lieu of property tax, but this payment is not an ongoing item. A large percentage of applicants in the program, as currently administered, reside in this type of housing.

B. Other Exempt Housing: State or municipal owned and operated facilities are also exempt from property tax. The rental fees for this type of housing, such as the Pioneer Homes, do not include a component for taxes.

Is it the intent of the legislature that Senior Citizens which reside in these types of facilities be eligible for reimbursement?

In addition to the types of facilities which should be included, there is also concern regarding the definition of "rent".

The term "rent" includes many items which may or may not be within the scope of intent of the legislature. A few of the items which some landlords include in rent are; utilities, trash collection, and an isolated case of dog-walking.

While a few items encountered in this program border on the absurd, there are some which appear to be unfair. A case in point is a rental fee for a Senior Citizen which includes utilities versus the Senior who pays utilities as a seperate item.

Guidance from the legislature would alleviate the concerns and help promote a more equitable and useful program.

Thank you in advance for your prompt attention to this matter.

Sincerely,

Lee

Lee McAnerney
Commissioner

HB
610

BACKGROUND ON HB 610 - 611/SB 326 -327: $1 million to Office on Aging

HB 610 is the appropriation bill, HB 611 is the authorization bill. The amount of the appropriation is $1 million. The provisions of the authorization bill are as follow:.

* The money goes to the Department of Administration for distribution by the Older Alaskans Commission.

* At least 60% of the money is to be distributed as community program grants. The balance is to be distributed for pilot projects.

- The purposes of the preceeding provisions are: (1) to supplement Older Americans Act federal dollars with state General Fund dollars; (2) to ensure that the majority of the new money goes to programs which have a demonstrated record of service to older Alaskans; (3) to provide a reasoned mechanism for providing funding for either new types of programs or programs in new communities.

* Any sponsor receiving any of these funds is required to make a contribution to the total cost of the project. The formula to be used is identical to one which passed into law last year for cultural facilities. It is an attempt to share the burden among all sponsors so that those with the least ability to provide local support are required to provide the least amount.

* The administrative requirements addressed in the bill are intended to insure program accountability.

* The types of programs which are eligible for funding are essentially those which are presently allowed under the Older Americans Act.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 610
(Identical to Senate Bill #327)

"An Act making a special appropriation to the Department of Administration, Older Alaskans Commission, for programs of benefit to older Alaskans."

House Bill 610 provides for $1 million dollars of state general funds in FY 81 to be appropriated to the Older Alaskans Commission (established by House Bill 618) in the Department of Administration. The additional monies would be utilized to provide grants for service programs of benefit to older Alaskans. The scope and design of these programs is elaborated in House Bill 611.

The Department of Health and Social Services recognizes that there are many services and programs needed by seniors that are currently not routinely provided at an adequate level by any public or private source. House Bill 610 would help to bridge that gap by providing funds for pilot projects to aid seniors and for expanded community grants.

The pilot project funds could be utilized to develop innovative programs that in the long run have a potential of cost-savings to the State and could be designed in such a way to fit the needs of Alaskan seniors. Such projects might be in the areas of home nursing, group homes or residential care as alternatives to costly institutionalization. Some funds might be earmarked for pilot projects to aid the quality of life for seniors. These might include low-cost denture program, training programs for those persons providing services to seniors (such as counselors) and other purposes.

The bill and its companion H.B. 611 would provide for increased community project grants. These funds could be used to cover rising costs of doing business by local senior centers to broaden the scope of existing senior center programs or to expand service into areas that are presently not served by any local program. We support the bill's requirement that sponsors receiving grants provide matching cash or in-kind funds based on ability to pay, as a condition to receiving the state grant funds.

The Department of Health and Social Services endorse the concept of providing for the ever increasing service needs of our seniors that cannot be supported by existing Aging funds. We would also like to refer the Committee to the Department's position paper on H.B. 618 - the creation of Older Alaskans Commission - and reconfirm our position that we do not believe it appropriate for the Commission to handle day-to-day grant management functions such as those anticipated by H.B. 610 and H.B. 611.

April 11, 1980

The Honorable Thelma Buchholdt, Chairman
House HESS Committee
Pouch V
Juneau, AK 99811

Dear Representative Buchholdt:

On behalf of the Northern Alaska Health Resources Association (NAHRA), I am writing to encourage your support of HB 611, which would authorize State aid for service programs for older Alaskans.

During the past several months, NAHRA has devoted a great deal of effort to planning for long term care services. In particular, we are encouraging the development of nutrition, recreation, information and referral, and home health services. However, none of those programs can be implemented successfully without State assistance.

Community program grants as proposed by HB 611 would allow continued operation of existing senior service programs at a time when federal cutbacks threaten their existence. Seed monies for pilot programs would facilitate start-up of services which might otherwise never develop, especially outside of Anchorage and Fairbanks. Because of these attributes, HB 611 is highly consistent with NAHRA's plans.

We urge your support of HB 611. Please inform us of your position.

Sincerely,

J.B. Carnahan
President

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 611

"An Act authorizing state aid for service programs for the benefit of older Alaskans."

House Bill 611 creates a state aid program for providing services to benefit older Alaskans. The program would be administered by the Older Alaskans Commission, (created by House Bill 618). House Bill 611 would provide for grants for pilot projects and community service programs. Each sponsor receiving a grant would be required to provide cash or in-kind match, as a condition of receiving state grant funds. The amount of the sponsor contribution would be based on the community's ability to pay, which is determined by property values and the population planned to be served by the grants. The cost of the grants provided for in H.B. 610 is $1 million dollars in state general funds in FY 81.

The Department of Health and Social Services recognizes that there are many programs and services needed by seniors that are currently not routinely provided by any public or private source. House Bill 610 would help bridge the gap by provided funds for pilot project to experiment on innovative and potential cost-saving ways to provide services to seniors and by providing funds for expanded commu ity service grants.

Potential Discussion Areas

1. With no requirement that the Commission consider geographical diversity of grant awards, it may be possible for the entire appropriation to go to a single area of the state, rather than be distributed equally throughout Alaska.

2. The Department of Health and Social Services prepares extensive needs assessments and state plans, especially in the areas of health and facility construction. It may be useful to include a requirement that the Commission utilize existing state plans and needs assessments in its evaluation of the merits of proposed projects.

3. The multitude of programs eligible for grants may provide a scattergun approach to service needs of seniors, rather than a clearly defined comprehensive look to solve a specific problem. For example, the needs for residential care in the state are great and could easily absorb the entire $1 million dollars appropriation. It may be useful for the bill to include a list of priorities to assist the Commission in its deliberations. Such as, in the first year, a priority might be funding projects that have potential of long run cost effectiveness and provide for increased self-sufficiency of seniors.

POSITION PAPER/Department of Health & Social Services

4. We can foresee that such an extensive grant program that covers a multitude of services will attract alot of interest from many parties. This would require the Commission to process and evaluate many grant applications. These extensive grant reviews and evaluation processes could serve to bog down the Commission. Since it plans to meet only six (6) times a year, necessary coordination of programs and providing advice to state departments may be potentially neglected, as a result.

The Department of Health and Social Services supports the concepts embodied in House Bill 611. We would also like to refer the Committee to the Department's position paper on H.B. 618 - the creation of the Older Alaskans Commission - and reconfirm our position that we do not believe it appropriate for the Commission to handle day-to-day management functions such as those anticipated by House Bill 610 and House Bill 611.

SUBJECT: HB 615 Senior Citizen Motor Vehicle Property Tax Exemption

The following comments have been prepared in response to the request for information concerning the senior citizen motor vehicle exemption. These comments also address HB 615 which is intended to correct problems within that program.

There are three major problems with the program as it is currently written. The following explain these problems and the solutions advanced by HB 615.

1. The property tax exemption should not be located in Title 28. It is important that all property tax exemptions be located together in Title 29.

Section 3 of HB 615 annuls the unsatisfactory section in Title 28 and places the statute with other mandatory exemptions in Title 29.

2. The current law does not provide for exemption of local property tax levies on vehicles. The exemption is solely for those municipalities that have chosen the option to have their vehicle tax collected by the state. To date, this includes Anchorage, Ketchikan, Matanuska-Susitna, and Petersburg.

Paragraph (j) of HB 615 exempts seniors from property tax on vehicles statewide.

3. There are three kinds of municipalities currently being paid for senior citizen vehicles within their jurisdiction. They are:

A. Those four previously mentioned that are actually exempting senior citizens through the state collection option.

These municipalities are reimbursed for revenue loss under the present law and will also be paid under HB 615.

B. Municipalities that must, under current law, collect property tax from seniors locally. Under the current law the state is paying the municipality for the vehicle and then the senior citizen also must pay the tax.

HB 615 will allow this exemption and reimburse the municipality for revenue loss.

C. Several municipalities do not levy a tax on motor vehicles. Current law pays these municipalities in the absence of revenue loss.

HB 615 allows municipal reimbursement only for revenue loss, so municipalities that do not tax vehicles would not be paid.

HB 615 is currently in the House HESS Committee. The companion bill, SB 319, is in Senate Finance.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Reduces grant requirement for FY 81 from $150,000 to $120,000. There is no impact to administration.

Present law does not exempt seniors from ad valorem tax on their vehicles, just from state collected registration tax. This bill corrects the present law to exempt seniors from property tax on vehicles, statewide.

Present law pays municipalities that do not tax vehicles. This bill corrects law to only reimburse municipalities for revenue lost. This accounts for the reduced need for revenue to fund the program.

cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 10/78)

inter: House

Attached is proposed legislation for the motor vehicle exemption which the department feels is unacceptable in its present form for the following reasons:

1. The exemption should be located in Title 29 along with other prescribed property tax exemptions. Therefore, Section 3 of the proposed bill annulls the unsatisfactory section in Title 28.

2. The current law does not provide for exemption of local property tax levies on vehicles, only those levied through the state collection option are presently exempted.

Paragraph (j) of the proposed legislation provides exemption regardless of the collection procedure.

3. Three kinds of municipalities are currently being reimbursed:

    1. Those actually exempting seniors through the state collection option;
    2. Those that must, under the current law, collect ad valorem property tax from seniors locally; and
    3. Those that do not tax vehicles at all.

Paragraph (k) of the proposed bill allows reimbursement to municipalities only for revenue lost due to actual exemptions granted.

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
Senate Bill No. 319

"An Act relating to an exemption from municipal property taxation; and providing for an effective date."

The Department of Health and Social Services supports the intent of SB 319. The bill in its current form, however, seems to need clarification on two areas:

1) What happens in the case of a married couple? If both are 65 years of age or older, will they be entitled to exemptions on two vehicles?

2) What constitutes residency for purposes of this bill?

This bill will not impact on the Department of Health and Social Services but will impact on the Department of Community and Regional Affairs.

The Department of Health and Social Services recommends that Senate Bill 319 not be passed without revisions to address the above-stated concerns.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Reduces grant requirement for FY 81 from $150,000 to $120,000. There is no impact to administration.

Present law does not exempt seniors from ad valorem tax on their vehicles, just from state collected registration tax. This bill corrects the present law to exempt seniors from property tax on vehicles, statewide.

Present law pays municipalities that do not tax vehicles. This bill corrects law to only reimburse municipalities for revenue lost. This accounts for the reduced need for revenue to fund the program.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILL NO. 325
(Identical to House Bill #617)

"An Act providing for the issuance of general obligation bonds in the amount of $15,000,000 for the purpose of paying the cost of construction and development of senior citizen housing; and providing for an effective date."

The Department of Health and Social Services, Office on Aging supports the concept included in Senate Bill 325.

Our Office of Aging has found that there is a the need for senior housing. Seniors living on fixed income, from Old Age Assistance or a retirement program, cannot always afford to pay the current high cost of housing in many areas of Alaska. For example, a senior receiving the maximum monthly benefit under Old Age Assistance is eligible for $413 a month. That $413 must cover the costs of housing, fuel, food, transportation, clothing, and other necessities. Seniors report difficulties in making ends meet under such situation. Low cost housing program could serve to supplement their income.

Also, it may be appropriate for some of the housing dollars to be earmarked for residential care housing units as these could serve as an alternative to institutionalization in a nursing home. This could serve to provide care to seniors in the least restrictive setting possible and at a much lower cost.

HOUSE BILL NO. 617

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of $15,000,000 for the purpose of paying the cost of construction and development of senior citizen housing; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of construction, ~~and~~ development, and planning of senior citizen housing, general obligation bonds of the state in the principal amount of not more than $15,000,000 shall be issued and sold. The full faith, credit and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1980 Senior Citizen Housing Construction and Development Fund" shall be established, to which shall be credited the proceeds of the sale of the bonds described in sec. 1 of this Act except for the accrued interest and premiums. The amount of $15,000,000 is appropriated from the "1980 Senior Citizen Housing Construction and Development Fund" to the Department of Commerce and Economic Development, Alaska State Housing Authority, to be used for the purpose described in sec. 1 of this Act.

* Sec. 3. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $53,000 or as much of that amount as is

found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 4. The question whether the bonds authorized in this Act are to be issued shall be submitted to the qualified voters of the state at the next general election and shall read substantially as follows:

Proposition

State General Obligation Senior Citizen Housing Construction and Development Bonds $15,000,000

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $15,000,000 for the purpose of paying the cost of construction and development of senior citizen housing?

Bonds Yes [ ]

Bonds No [ ]

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

STATE OF ALASKA

JAY S. HAMMOND

ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

POUCH D — JUNEAU 99811

February 28, 1980

The Honorable Thelma Buchholdt, Chairperson
House Committee on Health, Education and Social Services
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

The following is in response to a request from the House Health, Education and Social Services Committee for a statement of position from the Alaska State Housing Authority (ASHA) regarding House Bill 617 entitled "An Act providing for the issuance of general obligation bonds in the amount of $15 for the purpose of paying the cost of construction and development of senior citizen housing; and providing for an effective date."

The Alaska State Housing Authority (ASHA) has been quite active in the construction and development of senior citizen housing in Alaska having produced within the last four years 360 units of housing for senior citizens in Anchorage, Fairbanks, Juneau, Ketchikan, Seward and Cordova. It is consistent with ASHA's enabling legislation to receive and administer the $15 million for the further development of senior citizen housing within the state.

The comments which follow should not be construed as opposition to the intent of HB 617 nor to the appropriation of funds to ASHA for the purpose stated. Our comments moreover simply concern the method of allocation of funds and their most efficient utilization for the development of senior citizen housing.

Section 1 of HB 617 authorizes the issuance of $15 million in general obligation bonds for the purpose of paying the cost of construction and development of senior citizen housing. Despite the past history of appropriation of funds to a corollary program of the Department of Community and Regional Affairs for the benefit of senior housing, the issuance of bonds, while consistent with prior actions, seems only to raise the cost of funds to the state and delay the utilization of those funds. The potential of direct appropriation rather than a general obligation bond issue might be considered.

Under Section 2 of HB 617, the provision is made for transfer of the funds from the "Senior Citizen Housing Construction and Development Fund" through the Department of Commerce and Economic Development to the Alaska State Housing Authority. There is a great potential for immediate benefit to the sponsors of elderly housing projects. After consultation with ASHA's bond counsel, we would therefore request the addition of the following

language to expedite the transfer and to more clearly state the intent of the legislation: "The entire sum of $15 million shall be disbursed upon request of the Alaska State Housing Authority after the adoption of regulations governing the use of the funds consistent with the purpose described in Section 1 of this act."

It is ASHA's esperience and our position that one of the most effective uses of the money is that it be used as "seed money" for attracting money available under Federal programs, or that it may be used in the form of direct grants or loans in order to pick up a commonly experienced "short fall" between the monies available for development and construction under federal programs and the actual cost of development and construction in the State of Alaska. Under this "seed money" mode of utilization, ASHA estimates that one state dollar shall attract approximately three to five federal dollars (or more) that might not otherwise be usable in the State of Alaska. Thus, ASHA would envision a program whereby loans and grants to the regional housing authorities or other nonprofit or municipal sponsors may be an appropriate method of utilizing these funds to most advantageously attract federal elderly housing dollars to the state, and address the needs of both the rural and urban communities.

Another issue to be addressed is a clear statement of legislative intent regarding any provisions for repayment. While the bill, on its face, appears to be a straight appropriations bill, questions regarding a requirement that the recipient agency of the funds eventually repay the money to the General Fund have arisen. Additionally, of concern to us is the question of whether the funds can be used to preserve failing projects.

To reiterate then, the appropriation of $15 million to the Alaska State Housing Authority can be utilized by ASHA and other nonprofit sponsors of senior citizen projects to further accommodate the housing needs of low and moderate income senior citizens in the urban and rural areas of the State of Alaska. It is appropriate to fully support the legislation. Subject to the concerns and suggestions stated in this position paper, we look forward to the bill's passage.

Sincerely,

ALASKA STATE HOUSING AUTHORITY

Harry F. Goldbar
Executive Director

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 618

"An Act establishing an Older Alaskans Commission; and providing for an effective date."

The Department of Health and Social Services strongly endorses the concept of a Commission to advise in planning and coordinating services for the elderly across all state departments to avoid duplication and service gaps. The Department of Health and Social Services has no objection to the Commission being placed in the Department of Administration if placement is acceptable to the Governor and the Department of Administration. To avoid management problems, though the staff should report to the Commissioner of the Department of Administration, and in turn to the Governor, who can require that recommendations be followed by the respective Commissioners.

The Department of Health and Social Services believes that the most appropriate purpose of that Commission as an initial step would be as an active functioning advisory board to recommend policy and administrative improvements. This Department cannot support at this time the Commission handling day to-day administrative functions, such as grant processing, contracting for services, and standard setting for levels of services.

The Department is also recommending changes to require that the Commission conform to all appropriate state and federal laws pertaining to the privacy and confidentiality of records and persons.

Our specific comments related to the bill are as follows:

Page 4 - Sec. 44.21.230 Powers and Duties (a)(1)-(7)

COMMENT: The Department believes the most appropriate purpose for this Commission is to advise, to recommend, and to inform about services to the elderly, rather than administer. We are also concerned about the executive director serving at the pleasure of a Commission and not reporting to the Commissioner of Administration and in turn to the Governor. We perceive possible management problems.

The following changes are therefore recommended:

Delete (4), (5), and (7).

Page 5 - Sec. 44.21.230 Power and Duties (b)

COMMENT: To bring the function of the Commission in line with our recommendations, the following changes are recommended:

POSITION PAPER/Department of Health & Social Services

Add a new subsection (2) and renumber accordingly:

(2) Request and receive audits from state agencies and local institutions concerned with the conditions and needs of older Alaskans.

(6) DELETE.

(7) Contract for consulting and research services to implement its advisory role. (necessary services)

(10) Recommend (set) standards for services for older Alaskans.

Page 5 - New Section:

We recommend that a new section be added prior to the Sec. 44.21.230 Definitions. That section would recognize that the Commission may have access to all records that are not protected by existing state or federal confidentiality and privacy laws and regulations.

Under Section 4 on bottom of page 5 and top of page 6, "ASSUMPTION OF PROGRAM RESPONSIBILITIES:"

As noted earlier, we do not think it appropriate that the Commission assume the responsibility for all programs, functions, and services now under the Office on Aging. We believe that removal of the Office on Aging at this time from the Department of Health and Social Services would fragment service delivery and hinder the provision of a continuum of care. We consider this to be counter-productive to the best interest of seniors and to the Commissioner's stated goals. Further, the bill is not explicit as to the disposition of current staff (employees) of the Office on Aging and Section 44.21.230(a)(4) pertaining to the employment of an executive director who serves at the pleasure of the Commission.

In conclusion, the Department of Health and Social Services recommends that H.B. 618 not be passed unless to above-stated amendments are included as language of the Act.

Approved by: Helen D. Beirne 1/29/80

Helen D. Beirne, Commissioner (DATE)
Department of Health and Social Services

The State of Alaska has been generous in the provision of services and benefits to its elderly population.

There is the Pioneers' Homes program for those older Alaskans who have lived in the state for longer than 15 years. It serves about 500 persons.

For those older Alaskans who have lived in the state for longer tha 25 years, there is the Alaska Longevity Bonus. This is worth $150 per month for about 7,500 persons.

There is the Property Tax Exemption for seniors who are homeowners, and a Renters' Rebate for seniors who rent. The homeowner program serves about 3,600 persons with an average benefit of $556; the renters' program serves about 1,050 persons with an average benefit of $268.

There is a Senior Housing program which has assisted in the construction of about 300 units of congregate housing with, perhaps, anothe 150 units soon to come on line. There's a Special Assessments program and a Winterization program.

The Office on Aging channels almost $6 million in Older Americans' Act monies into about two dozen local communities throughout the state for the benefit of older Alaskans. There is a Senior Community Employment Program which provides employment opportunities for about 91 persons over the age of 55.

There is a Homemakers program which assists about 350 persons; Medicaid which primarily is spent on about 400 persons in nursing homes; and General Relief Medical, of which seven percent of the budget is spent on the elderly.

For retired state employees and teachers, there is a good pension program. The University of Alaska offers free tuition to older Alaskans. Fish and Game provides free and permanent hunting and fishing licenses. The Marine Highway system offers free travel on the ferries for older Alaskans.

All totalled, in FY '80 the state plans to spend $57,917,156 for benefits and services for approximately 20,000 older Alaskans, half of whom are over the age of 65.

How is the money administered? Who makes the decisions affecting us older Alaskans? At present, we are in the hands of three or four different departments, half a dozen different divisions and at least 24 different program managers.

Why not a single agency - an Older Alaskans Commission to develop a coordinated, comprehensive plan to enhance all these programs? Why not take a step forward in kindness on behalf of the elderly who are frustrated by the fragmentation in the delivery of these services and the poor planning in the development of these benefits? Finding one's way around is exhausting.

And why not include on this commission informed, aggressive men and women over 60 and over 65 as knowledgeable advocates? Let older Alaskans monitor their own programs, not merely recommend.

Why not focus on quality care, standards and economical administration? All of us over 60 years of age have lived through the Great Depression and have learned how to cope. Who knows better than we, what we need?

Why not structure this Older Alaskans Commission to develop a community-based, home-centered network of services and benefits? We need a better delivery system, greater employment opportunities and more biomedical research on the aging process.

The state has been a great help to us, but why not let us help ourselves?

In December of 1979 President Carter stated, "It is very important that we recognize the need for the elderly people to have self-determination."

In November of 1979 Dr. Arthur Fleming (who is in his 70's) of the U.S. Commission on Civil Rights, decried the image of men and women considered "on the shelf" at age 60. He explained that non-involvement in the community and marketplace leads to physical, mental and spiritual deterioration. He predicted that legislation soon will remove all age barriers to employment.

Take advantage of us. Use us. Allow us to help you.

A majority of the 20,000 older Alaskans request our legislators and our governor to grant us self determination and our civil rights by creating an Older Alaskans Commission. Thank you.

Dove M. Kull

A majority of the 20,000 older Alaskans request our legislators and our governor to grant us self-determination and our civil rights by creating an Older Alaskans Commission. Thank you.

Dove M. Kull, M.S.W., A.C.S.W.

PROPOSAL: To establish an Older Alaskans Commission under the Office of the Governor.

* The commission would assume responsibility for all programs, functions and services of the Office on Aging and the Governor's Advisory Committee on Aging.

* Powers would include:

1) formulate a comprehensive state plan and annually analyze and evaluate services for older Alaskans;

2) make recommendations to the governor and the legislature;

3) aid in the development of local commissions; and

4) employ an executive director.

* To accomplish its duties, the commission would be able to do a number of things, the most important of which are:

1) review, evaluate and comment upon state programs concerned with the problems and needs of older Alaskans; and

2) set standards for levels of services for older Alaskans for programs administered by the commission.

* The commission would have 11 members: commissioners of Administration, Health & Social Services, and Community & Regional Affairs; the chairman of the Pioneers' Homes Advisory Board; and seven citizens, six of whom must be over the age of 60 and two of whom must be over the age of 65. Appointments would have to assure representation for low-income persons, minorities, urban, rural and geographic areas.

* The enabling legislation would also include a state policy in regard to older Alask

BACKGROUND:

* This commission is being proposed by the State Committee on Services to the Elderly a joint legislators/citizens committee established by the legislature during the 1979 interim. The committee's charge was to "consider the problems and make recommendations regarding improved delivery of benefits and services to elderly Alaskans."

* The assumptions upon which the committee acted are as follows:

1) the state presently provides more than 25 different services and benefits to senior citizens, administered by at least 11 different agencies;

2) the state presently spends over $50 million in General Fund monies for the benefit of approximately 20,000 Alaskans over the age of 60;

3) older Alaskans now facing the disabilities and financial limitations of their retirement years deserve the best the state can provide them; and

4) older Alaskans could perhaps be more conveniently, economically and effectively served by consolidating and coordinating the administration of these various state services and expenditures.

RATIONALE:

* Prior to the development of this proposal, the committee held four public hearings three meetings and two teleconferences. The committee had 96% attendence at the public hearings which drew 238 persons. (See summaries of public hearings for specific comments relating to the commission.)

* The committee has intentionally and continuously involved persons from the affected departments from the beginning of the developmental process, including Administration, Health & Social Services, Community & Regional Affairs, DOT/PF and the Office of the Governor

* The Older Alaskans Commission is intended to be the "single agency" responsible for policy development, planning and coordination of all state-operated services and benefits programs unique to citizens over the age of 60. To be effective in performing its duties - which reach across several departments - the committee believes the commission should be located under the Office of the Governor. To do otherwise would be to invite in-fighting between departments. Is it possible that the commissioner of one department would be happy to "take orders" from the commissioner of another department? The membership of the commission, and its placement, is designed to put everyone on an equal footing.

* Establishment of the commission would enable all departments involved to better coordinate and deliver services and benefits without causing any drastic shifts within the different administrative units. The only change in the staus quo would be the transfer of the Office on Aging from the Department of Health & Social Services to the commission under the Office of the Governor. The committee believes this is necessary for the following reasons:

1) To keep the commission and the Office on Aging separate would be duplicative since many of the functions of both would be identical. The idea is to reduce duplication and fragmentation of effort, not increase it. Older Alaskans want and need a "single agency" to whom to turn for information and assistance. The commission would be the focal pt

2) Including the Office on Aging's programs within the commission, under the Office of the Governor, would effectively remove any stigma of "welfare" which is presently associated with any and all programs within the Department of Health & Social Services.

3) The Department of Health & Social Services has not compiled a good record on programs for the aging. The Office on Aging is consistently given low budget priority, little direct support from the department, and interaction with the advisory committee has been effectively non-existent. If the department had been innovative with the Office on Aging, there would have been no need for our interim committee, much less the commission.

4) With the proposed abolition of the Governor's Advisory Committee on Aging, the commission would, because of the federal requirements of the Older Americans Act, have to have a special relationship with the Office on Aging anyway. In the past, the GACA has had responsibility for determining where and how the Older Americans Act monies are spent; this proposal would continue that practice of allowing citizen participation in the decision-making while enhancing the members' ability to do an effective job.

5) Under this proposal, the commissioner of Health & Social Services would have even greater involvement - as a member of the commission - with the functions of the Office on Aging than ever before.

6) Review of other states' statutes reveals that in those states which have some version of a Commission on Aging (Tennessee, Nebraska, Ohio, Alabama, Iowa, Indiana, Hawaii, California, West Virginia and Georgia), the majority of them are also designated as the state agency on aging.

7) In 1975 a bill similar to the one here proposed was before the legislature (SB 196). That bill would have created a Commission on Aging under the Office of the Governor. At that time, the position of the Department of Health & Social Services, according to the April 10, 1975 position paper signed by Commissioner Francis Williamson was:

> "This office recognizes the needs and desires to attempt to provide for the inclusion into a single new chapter within Alaska statutory law of a comprehensive and coordinated program pertaining to aging... positioning of the Commission on Aging in the Governor's Office will give this Commission visibility that the present Office on Aging lacks... Proposed Amendment 1: change title (from An Act creating the Commission on Aging) to 'Creating the Commission on Aging to replace the Office on Aging and transferring that Office to the Office of the Governor.' Rationale: This would remove the necessity of having two bodies...as the powers and duties of the Commission.., duplicate almost exclusively the work being performed presently by the staff of the Office on Aging."

I. TENNESSEE: (615) 741-2056/ talked to Ass't. Director Charles Durlind
- under the Governor
- * 13 members appointed by the Governor
- * created in 1963
- * policy-making body
- executive director chosen by commission with approval of Governor
- * 34 staff
- * meets 6 x's/year; "aren't rubber stamps"
- * heads of departments sit on commission as ex officio
- * makes recommendations to other agencies
- designated state agency for Older Americans Act
- there also exists an advisory committee; "rediculous" to have both; intend to try to do away with the advisory group; supposed to send me proposed legislation.

II. WEST VIRGINIA: (304) 348-3317/ talked to executive secretary of Executive Director (Marion Martin)
- * designated state agency for Older Americans Act
- * contracts for Title XX
- * heads of department sit on commission as ex officio - "very active; always come, in fact, one of those folks is the chairman of the commission; coordination is beautiful; the communication exists"
- * Executive Director is appointed by the commission
- under the Governor
- * meets four times/year
- * there also exists an advisory committee which is also quite active, but they don't have voting powers
- * suppossed to send 1978 Annual Plan; want me to keep in touch

III. NEBRASKA: (402) 471-2307/ talked with Sam Wareham, Coordinator of Programs
- * advisory; "not all that great"
- * 12 members appointed by the Governor
- * commission hires Executive Director; no final approval by Governor
- * there also exists an advisory committee and an interagency council; "too cumbersome"
- * designated state agency for Older Americans Act
- * under the Governor - "better than being under a department"
- * percent of elderly in Nebraska: 12%

IV. OHIO: (614) 466-5500/ talked to Martin Janis, Executive Director
- * designated state agency for Older Americans Act
- * genesis: started under Department of Mental Health, then became a commission, and next year will become a department
- * Executive Director is appointed by the Governor; has been a member of the cabinet for 13 years
- * 12 members meet once/month
- * there also exists an advisory committee which is responsible for making recommendations regarding OAA allocations; the commission then signs off on those recommendations
- * "the more participation by citizens the better"
- * commission administers, in addition to the OAA, other programs which have been funded to the commission by the legislature
- * commission doesn't run programs in other departments, but is charged with outreach for those programs which effect elderly
- * heads of departments sit on commission as non-voting members; generally send their designees
- * legislation requires all programs having impact on elderly to present new plans to commission

V. ALABAMA: (205) 832-6640/ talked with Frank Eliot, Deputy to Executive Director
* designated state agency for Older Americans Act
* Executive Director appointed by the Governor
* 16 members - advisory on everything but OAA; includes 4 legislators and heads of three departments
* there also exists an advisory committee, "but the commission could do it all"
* there also exists an Interagency Council - "doesn't do anything"
* under the Governor
* percent of elderly: 15%

VI. INDIANA: (317) 232-1190/ didn't get through; supposed to call back
* designated state agency for Older Americans Act

VII. IOWA: (515) 281-5187/ talked with Dr. Adams, Operations Manager
* 7 members and 4 legislators (non voting)
* designated state agency for Older Americans Act
* "policy-making"
* "be sure to clarify duties of Executive Director"
* there also exists an advisory committee which is "a frustration" because they also think they should be policy-making; "would like to gracefully do away with them"
* under the Governor
* policy-making to OAA, advisory to other departments, but "it works" because of good interpersonal interaction
* clout comes from other departments recognizing importance of annual report to the legislature
* is protesting requirement for additional advisory committee; says it is not required in 1978 Amendments to the Older Americans Act

VIII. HAWAII: (808) 548-2593/ talked with Charles Roylo, Grants Manager
* abolished commission in 1977; now is Executive Office on Aging under the Governor
* when they were a commission, heads of departments sat on the commission as ex officio, but it didn't work because they had no function
* appointees were "rubber stamps" for staff
* Executive Director appointed by the Governor
* primarily administers OAA
* supposed to send information to me

IX. GEORGIA: (404) 894-5333/ didn't get through
* designated state agency for Older Americans Act

X. CALIFORNIA: (916) 322-3887/ talked with John Riggle, Executive Director
* California also has a Department on Aging which is the designated state agency
* commission is the advisory committee for the OAA
* principle duty of commission is "principle advocate for older people"
* other duties - advise the Governor, legislature, other departments
* autonomous from the department on aging
* started out under Welfare, but independent
* Executive Director selected by the commission
* Interdepartmental Council on Aging meets regularly with Dep't and Comm.
* "Make sure your commission has staff; and that Executive Director is not administrat
* says there is a federal requirement for an advisory committee as well as commission
* Older Californians Act to be introduced in January
* supposed to send me information

1) Boards and Commissions with similarities to Older Alaskans Commission:

* Governor's Commission on the Administration of Justice - established in 1971, the commission is the state planning agency for a federal program (Criminal Justice Planning Agency). The AG selects the executive director with approval of governor. He may hire additional staff, all of whom are classified. The director is partially exempt. The commission administers $5.6 million, of which @ $400,000 is General Fund. There are about a dozen staff. It is presently in the governor's office, but is being mov into the Department of Law. It requires mandatory representatives from various agencies. (13 members - 7 public & 6 citizens) 44.19.746

* Alaska State Council on the Arts - established in 1966 under the Office of the Governor, members are appointed by the governor with consideration given to recommendatio of various civic groups. The governor designates the chairman and the vice-chairman. The chairman is the chief executive officer of the council. The chairman may employ additional personnel, for example, an executive director. It is the official agency of the state to receive and disburse funds made available through the National Endowment for the Arts. 44.19.900 (11 members - all citizens); receive @ $1 million in G.F.; (Governor @ $700,000 other funds (8 positions) find selects

* Alaska Coastal Policy Council - established in 1977 under the Office of the Governor, it has 16 members, including five commissioners. It has co-chairmen (one - works public and one state official), designated alternates, and uses the staff of DPDP for its own staff. It administers federal funds, develops standards even though the majori are public members. 44.19.891 (mets @ 12 times/yr) works well recommends legislation; good attendance of com. members administers $4.5 million ($200,000 G.F.)

* State Commission for Human Rights - established in 1963, it is a seven-member board appointed by the governor and confirmed by the legislature. The commission selects its own chairman and executive director. The latter must be approved by the governor. It is a $1 million operation with 24 positions. 18.80.010 all citizens

* Commission on the Conference of the Law of the Sea - The commission may hire an executive director without the approval of the governor. 44.19.789; est. 1972; com absorbed by fed

* State Board of Parole - five members appointed by the governor and confirmed by the legislature. The board picks its own executive director who serves at the pleasure of the governor. 33.15.010; under H&SS

* Alaska Commission on Post-secondary Education - established in 1974, the commission selects its own chairman and its own executive director, who serves at its pleasure. 14.40.903

* Alaska Public Broadcasting Commission - established in 1970, the commission selects its own chairman and hires the executive director. 14.58.010; confirmed by leg; regulatory

* Alaska Council on Science and Technology - seven-member council established in 1978, they hire executive director and staff. 44.19.191; all citizen

* Governor's Commission on the Status of Women - established in 1978, this nine-member commission selects its own chairman and hires its own executive director. 44.19.956 can administer federal grants; $150,000 budget

The Office of the Governor appears to have approximately 17 boards under it. 108

SENATE BILL 328

DEPARTMENT OF ADMINISTRATION COMMENTS

General support for concept

A. Endorse efforts to coordinate activities and information dissemination

B. Encourage increased interdepartment work on issue and programs related to aging

C. Support involvement of commissioners for key agencies affecting aging programs

D. Believe commission can provide positive direction

Recommended changes

A. Retain Office of Aging operational function in Department of Health and Social Services

1. To maintain administrative accountability in line to Governor

2. To maintain maximum cohesiveness of funding and planning in relationship to all social and health services program

3. To emphasize the broad review and comprehensive commission role rather than the operational, and

4. To allow experience as a commission to develop in order to determine the advisability of removing the Office of Aging functions to an autonomous commission.

B. Or, the commission could be designed to serve the requirements of the advisory capacity now performed by the Advisory Council on Aging, with Office of Aging remaining in DH&SS.

C. Or, if the Office of Aging is under the commission, then the administrators should have direct line reporting responsibility to the Commissioner of the department into which it is placed.

Detailed comments and suggestions can be provided by Department of Health and Social Services, Department of Administration, and Department of Community and Regional Affairs as changes are studied.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
The Older Alaskans Commission, which would be established by these bills, would provide statewide coordination for all efforts to provide services to the elderly of Alaska. As written, these bills would bring the Office on Aging into the Department of Administration as an agency directly operated by the Older Alaskans Commission. The Office on Aging is presently a part of the Department of Health and Social Services.

In order to accomplish the duties prescribed under Section 44.21.230, five new positions would be required:

Executive Director	(R24)
Clerk Typist III	(R8)
Accounting Clerk III	(R10)
Research Analyst III	(R18)
Planner IV	(R19)

IV. DATE 2/8/80 PREPARED BY George J. Michael
AGENCY Administration
PHONE 465-4401

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 10/78)

Also, included in the above computation of costs is $1,000,000 in grant funds which is proposed for the Older Alaskans Commission by S.B. 327/H.B. 610. It is assumed that these additional grant funds will be handled by the present Office on Aging staff, except for the additional Accounting Clerk which is included above.

The Governor's Advisory Board on Aging would be abolished and replaced by the Commission. Therefore, travel and per diem expense is included in above costing for the 11 member commission, plus the Executive Director and 2 meetings for the Planner.

Inflation is computed at 10% per year for years beyond FY 81. Inflation is included in all categories, including grants, except for one time purchases of equipment items. Items of equipment for years beyond FY 81 are for replacement of worn out office furnishings only.

FY81

Older Alaskans Commission

Office on Aging (19 positions) — $6,282,600

State $616,900

Fed. 5,665,700

JUSTIFICATION:

This position is needed to oversee and plan for the orderly review and evaluation of State programs concerned with the problems and needs of older Alaskans, and for making recommendations for improvement in these programs. This position is also instrumental in formulating a State plan, which may increase federal participation in funding services to the elderly. The position will supervise a Research Analyst II in collecting and analyzing facts and statistics which bear upon the well being of older Alaskans.

Karluk residents push for school replacement

by MIKE ROSTAD
staff writer

Karluk residents Jerry Sheehan and Ron Lind say their children are going to school in a building that's "deteriorating and extremely overcrowded." The men were in town last week to sit in on a Kodiak Borough assembly meeting regarding OCS (outer continental shelf), but they also took advantage of several opportunities to express their concerns about the school where 26 children, grades kindergarten through seven, are somewhat limited by the crowded environment.

Sheehan, chairman of the Karluk Advisory School Board, told Kadiak Times "inadequate space prohibits the children from learning, making it difficult for them to concentrate on their work." In some cases, says Sheehan, the teachers, Doug and Cindy Glynn, end up taking students into their home for classes in order to alleviate the problem.

Additional space is needed so that children

(Continued on Page 9)

KARLUK REPRESENTATIVES – Jerry Sheehan, left, and Ron Lind of Karluk say their children are going to a school that's deteriorating.

KARLUK

(Continued from Page 2)

can utilize materials that are primary tools in the Kodiak School District's curriculum, says Sheehan. "HILS (high intensity learning system) reading course is required, but Karluk is unable to utilize it fully," says Sheehan, explaining that there isn't enough space to store all of the material, and when it is used, there isn't enough room for students to work with it. Sheehan added that the "extremely recommended math program, which will eventually be required, isn't used at all because of lack of space."

Village school principal Mary Ann Kendall agrees the school is "jammed," she says, and needs upgrading. Kendall told Kadiak Times the 24' by 58' ATCO structure sold to the Borough to accommodate Karluk students after the destructive storm of Jan. 1978 when the residents had to be relocated about a mile away was supposed to last for 15 years, but it appears it has a two or three year expectancy, she adds.

Sheehan, who was invited by Kendall to attend a Borough work session Saturday to express the needs of Karluk, says Karluk will likely have more students next year and no one is graduating. He added there are other problems in the school besides crowded conditions. "The ceiling doesn't leak water,it drops water," he says, noting that at times 10 buckets are set up to catch the dripping water. Lind says that the stinking fumes emitted from the drying carpet is also a burden to students and teachers are expected to put up with.

The men say the students have been writing letters to Juneau, describing their plight. But they're not alone in their crusade. Jerry himself has written letters, and the Board has received positive response, he says. "The letters from Juneau are sympathetic about our situation and they're doing something about it," he says, explaining a proposal calling for a new school building is in the House. "It was felt by the administration that we'd have a better chance if our request was on the Governor's bond proposal," adds Sheehan.

Sheehan also expresses his concern regarding OCS. He's been hired as a CETA employee to work with Wayne Marshall of Kodiak Area Natives' Association, KANA, to do research and develop testimony to be delivered in Anchorage and Kodiak during the OCS hearings in March. Along with Marshall and Bob Peterson, Sheehan will be speaking in behalf of KANA which recommends "no sale" on sale 46.

Lind, a member of Overall Economic Development Program, will represent the village council of Karluk at the hearings. Lind told Kadiak Times the draft environmental impact statement doesn't address the collective effects of proposed oil sales on both sides of Kodiak Island, but only regards the issue of sale 46 on the island's eastern side.

Ron says, "All of the sudden people are starting to get concerned about what happens in the future. It's pretty spooky. I wouldn't want to see any of Alaska destroyed like in places where oil rigs have been put in," he says.

A Proposal for Funding of a Combined Elementary/Secondary School Facility in Karluk, Alaska

RATIONALE FOR THIS PROPOSAL

Early in January of 1978, the village of Karluk on the west coast of Kodiak Island was struck by a storm which breached the protective spit, eliminating foot travel between the two portions of the village on either side of the Karluk Lagoon. This storm had an impact on the operation of the Karluk Elementary school, since prior to the storm, approximately 14 new Karluk students had walked across the spit to attend school in the Old Karluk school structure, along with 8 other students from Old Karluk.

Governor Hammond declared Karluk a disaster, but funds were not provided for rectifying the school situation. Consequently, the Kodiak Island Borough is still struggling with inadequate solutions to the problem.

The primary rationale for this combined elementary/secondary facility for Karluk originates partially from the storm disaster which has since caused the Kodiak Island Borough to set up a temporary ATCO school structure in new Karluk and to relocate the entire Karluk community. By fall of 1981 this structure will be hopelessly inadequate spacially, with the anticipated student population of 29 students, grades K-8. Within three years, it is also anticipated that there will be 14 secondary school students in Karluk. (Currently 5 high school students are either in correspondence or attending the high school program in town.

A secondary rationale for this proposal is based on the State's commitment to the Molly Hootch case consent decree and subsequent State Board of Education regulations which now require local school districts to provide educational programs for secondary students in small rural communities. The Kodiak Island Borough School District, in order to meet that mandate and challenge, has initiated a small high school program in five Kodiak Island Villages, with Karluk being the sixth.

Karluk emerges as an emergency priority facility within the KIBSD, because of the inadequate space of the current temporary ATCO facility 24' x 58' (which will be impacted by an additional six first grade students next year), and its total lack of secondary space to accomodate the fourteen secondary students anticipated within the next three years. Consequently, the District is seeking consideration of Karluk in a direct legislative appropriation for a combined elementary/secondary facility. The District cites the storm disaster and the Hootch consent decree as justification for this request.

I. STATEMENT OF NEED

A. Student Population Increase

In a formal resolution dated November, 1979, written by the Karluk Advisory Board to the Kodiak Island Borough Board, the Karluk parents requested a permanent elementary/secondary facility for their rapidly increasing student population. (See Appendix A) The increase was caused partially by their "bottom heavy" elementary population which is rapidly moving up into the secondary level, as well as the relocation and consolidation of the Karluk community in New Karluk. The existing 24' x 58' ATCO Unit is deficient for the twenty three students which it houses this year, and twenty nine students are anticipated next year.

B. Instructional Delivery System Needs

In addition to student population increases, the unique instructional delivery system of this small elementary secondary school must be taken into consideration when defining space needs for a permanent facility.

1. The elementary delivery system is mainly individualized or small group instruction, which necessitates a large array of instructional materials utilized in a resource lab format. This has been proven to be the most effective delivery system for small rural elementary schools, yet it does demand a certain degree of space for materials display and storage.

2. The secondary delivery system is more specialized and thus require more specific kinds of space (i.e.) Vocational Shop, Academic Space, Physical Education areas and Home Economics space. Moreover, State fire codes and building codes place further restrictions on space utilization. At this point, these areas simply do not exist in the present 24' x 58' Karluk school structure

   (Subject Area grid for Village High Schools - Appendix B)

   (Also, Kodiak Small High School Programs - General Space Implications - Appendix C)

3. Because of the multi grade classroom organization, many materials are used on a cyclical two or three year basis, thus placing an increased need on dry storage space. The current Karluk structure is seriously overcrowded with students, thus allowing little or no space for storage of instructional materials.

SUMMARY OF THE GOALS OF THIS PROPOSAL

Major Goal

To seek financial assistance in providing adequate elementary and specific secondary space for Karluk school children.

1. Specifically, to have the Alaska State Legislature consider Karluk for a direct legislative appropriation.

2. To state and define the facility and instructional needs of the Karluk School and the KIBSD, and to offer cost estimates of these identified needs.

3. To provide additional relevant background information (e.g.) history of the Karluk school and the history of the small rural secondary curriculum project.

II. THE HISTORY OF THE KARLUK SCHOOL AND KARLUK VILLAGE RELOCATION PLAN

A. History of Karluk School

(See Appendix D for maps representing each phase.)

PHASE 1

Prior to the disaster of January, 1978, there was one school in Old Karluk which was a BIA type structure - single classroom with a small group room adjoining, and a teacherage. All twenty three students attended this school until the storm washed away the adjoining spit, preventing the students from New Karluk from walking to the Old Karluk School. Strong currents and low tides made passage by the boat across the lagoon erratic at best.

PHASE 2

For the duration of the 1978 school year, a very deficient temporary school was set up in New Karluk in a small rented house. One teacher crossed the lagoon every day to conduct classes for approximately seven students. Eight students from New Karluk were sent to Kodiak for the remainder of the school year.

PHASE 3

In early August, 1978, the Karluk Advisory Board declared that all fourteen K-8 students who lived in New Karluk wished to attend school locally. Arrangements were made by the school district to rent the Karluk Community Hall until a more permanent school could be set up. Because of lack of predictability in transporting a teacher across the lagoon (tides and weather) and because the majority of students (18) were now attending school in New Karluk, the school district added a third teacher who lived in New Karluk and declared New Karluk as a seperate attendance area.

PHASE 4

In September of 1978, the Kodiak Island Borough appropriated funds ($113,000.00) for the purchase and installation of an ATCO Unit and a supporting sewer, water and electrical system. The unit was constructed and furnished in Anchorage and then barged to Larsen Bay. The Borough then sub-contracted with the Pleas Construction Company to utilize their smaller barge to transport the unit from Larsen Bay to Karluk. This was necesitated by low tides in Karluk and deteriorating weather.

Phase 4 (cont'd)

The district received a firm written committment from the parents of the eighteen students in New Karluk stating that they would attend the new school as soon as it could be opened. Twenty three new HUD housing units had been completed near the New Karluk school site, and when the ATCO Unit was completely installed, the parents moved into the new HUD units, and the majority of the community was relocated in New Karluk. The Old Karluk School was kept open until May, 1979, because those parents chose to wait until summer to move across to their HUD homes in New Karluk. One family chose to remain in Old Karluk and use the correspondence.

PHASE 5

The ATCO Unit, a Borough-purchased teacher housing unit and a small generator shed are the school facilities operating in New Karluk at present.

B. The Karluk Village Relocation Plan

After the storm of January, 1978, Karluk was declared a disaster by Governor Hammond (H.R.C. 110 Karluk Disaster Bill). Immediate measures were taken to assist the village. Food and fuel were barged in; the post office was set up in a private home, and eroding banks were sand bagged to protect the community hall and homes.

The timeline of the village relocation plan gives a summary of events.

February - The site selected for the new village by the Karluk Village Council was surveyed for Archeological resources by the U.S. Public Health Service.

March 8 - The Alaska State Senate passed H.R.C. 110, the Karluk Disaster Bill. The Karluk Planning and Redevelopment Committee med in Kodiak. Each group reported on progress to date.

March 13 - Management and Planning Services was contracted with by the Kodiak Island Borough to prepare a plan for the village relocation.

March 22 - The Karluk Planning and Redevelopment Committee met in Kodiak. Preliminary concepts of the plan were presented.

March 25 - Several members of the committee visited Karluk. The preliminary concepts of the plan were presented to the Village Council for their reaction and comments.

March 31 - Based on the Karluk Village Council's comments, a revised plan was submitted to the Kodiak Island Borough for review.

April 5 - Representatives of the village met with Kodiak Island Borough ro review the plan.

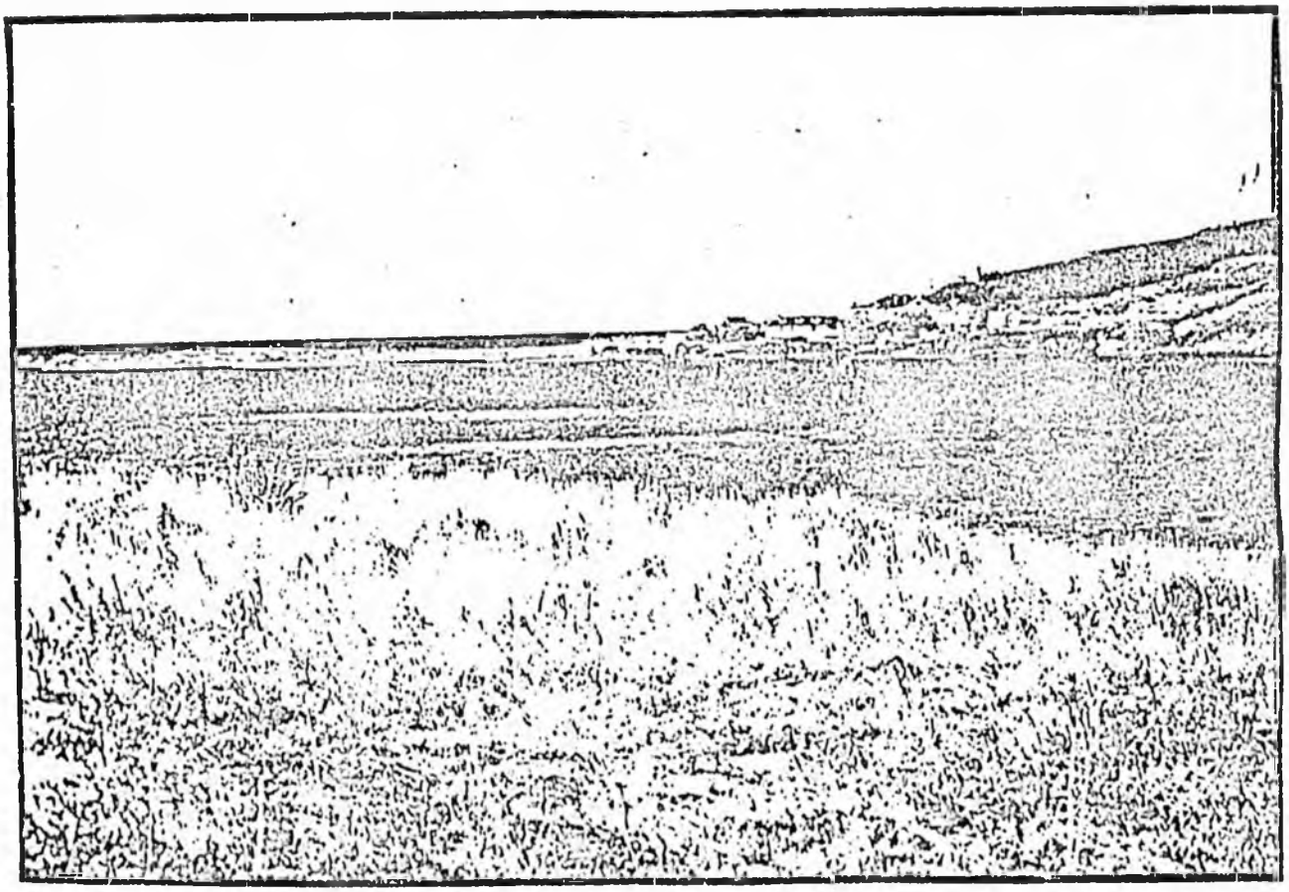
April 12 - The second version of the plan was presented to the Village Council at Karluk. They approved the plan which was then presented to the Kodiak Island Planning and Zoning Commission for their information.

The Karluk Village Subdivision Map shows a Tract reserved for the School, but no planning or facilities were provided through the Karluk Village Relocation Plan.

Page 23 of the Relocation Management Services Plan (1978) states:

"Funding for a new school at Karluk was not available this year. Until such funds are appropriated, the Kodiak Island Borough will provide relocatable units for a school facility at the new site."

The Kodiak Island Borough has been requested to provide a second ATCO Unit in Karluk to house the twenty nine students next year. There is still no indication of availability of funds for a permanent structure.



III. COMMUNITY PROFILE

A. Karluk Section

The village of Karluk is located at the mouth of the Karluk River on the west coast of Kodiak Island about 70 miles southwest of the City of Kodiak. The village of 100 people consists of two equally populated settlements lying on either side of the river: Old Karluk on the north and Karluk on the south. Before January 1978 the two Karluks were connected by a spit and a foot bridge.

Historical evidence indicates that the mouth of the river was populated several hundred years before the Russians arrived on Kodiak Island. Russian hunters established a trading post at Karluk in 1786. The abundance of salmon was undoubtedly one of the reasons for the original settlement; at one time the Karluk River had the largest red salmon run in the world. During the late 1800's and early 1900's a number of salmon processing plants were located on the Karluk spit. Over-fishing led to the closing of these facilities in the 1930's.

Fishing remains as the primary source of livelihood for the people at Karluk. As the Karluk Lagoon cannot accomodate larger commercial fishing vessels, the fishermen either fish out of small power boats and deliver their catch to floating processors, or go elsewhere and work on larger boats. Kodiak Island Seafoods, Inc. operates a major cannery at Larsen Bay to the east of Karluk. The Village Corporation of Karluk shares ownership of this facility with the village corporations of Larsen Bay and Old Harbor, and many Karluk residents either worth there or deliver fish to the cannery. The fishing season is short, lasting six to eight weeks. A small lodge in Old Karluk caters to sport fishermen who float the lake and river.

Development has been highly concentrated and consists mostly of houses - 17 in Old Karluk and 15 on the Karluk side. The condition of the houses ranges from excellent to poor; many houses are very old, having been occupied for generations. Some have been built from materials left from the Mutual Help Program. After the disaster the total was raised to 23 to replace threatened houses. These 23 units were completed by November, 1978, but without central electrification. A PHS sewer and water system is due to be completed by February, 1980. Most of the houses in Old and New Karluk are now deserted.

The deserted village had a combined grocery store and post office, a church, a community hall, and a school. The store and post office were located in an abandoned cannery building on the spit near the Karluk side. The church, built in 1888, is located on the bluff overlooking Karluk. The community hall, located in Karluk, had a large recreation room, and village's only telephone. Since the relocation the Karluk Community Hall has been closed down.

Karluk is most often reached by amphibious aircraft. there is a gravel and dirt airstrip on the south side of the lagoon; however, it is rarely used because of its poor condition. Karluk is due to receive a new airstrip this summer. Supply barges visit the village a few times a year, and occasional fishing boats stop.

Before the storm it was possible to walk between the two Karluks by foot bridge and spit. This was sometimes dangerous during high tides and storms, as driftwood would occasionally wash over the spit. Travel between the two villages now is by boat; and at low tide is difficult because of shallow, swift water and gravel bars.

Kodiak Island lies in the maritime climatic zone which is generally described as having "mild winters and cool summers". This description does not tell the whole truth.

Although the averages of Kodiak's weather do not appear unusually harsh, the extremes, variability, and unpredictability of the conditions can occur both in summer and winter. Wind speeds of 100 knots are not uncommon in intense storms. Although the variation between average winter and summer temperatures is only 25 degrees, temperatures of -12 degrees have been recorded. Precipitation varies between 40 and 80 inches a year and snowfall has been as low as 15.9 inches and as high as 178.1 inches. Foggy conditions occur between June and September. Kodiak Island's variable and extreme weather is a result of its location between the warm Japanese current and the colder Bering Sea.

B. Community Needs Assessment

Since the elementary and high school programs and general space implications for each school are the same, the only varients are the communities themselves, their own educational goals, and their particular needs. Therefore, this section describes the Karluk community.

In developing information for Karluk, public meetings were held to determine their overall educational goals and the growth they anticipated their community to experience. In short, the Karluk community developed much of this information. Other information was collected from the 1978 Needs Assessment conducted by Northwest Labs in every native village on Kodiak Island.

IV. SPACE NEEDS AND COSTS ESTIMATES FOR KARLUK ELEMENTARY/ SECONDARY PERMANENT FACILITY

This section outlines community growth and enrollment projections, along with current and future space needs for Karluk school. Gross cost estimates are presented which have been determined based on current building costs. (Estimates from Maynard and Partch Architectural Firm, Anchorage).

The Alaska State Guidelines for square footage estimates have been used in computing adequate space projections. Thus, this section attempts to give cost estimates that the Legislature should consider of this proposal is to be funded to meet the needs.

A. Community Growth and Enrollment Projections

As stated earlier in this proposal, Karluk had 23 new homes constructed in the fall of 1978. Along with the future economic plans of the Village Native Corporations, and with the possible impact of offshore oil development, this Kodiak Island Community is anticipated to grow. A new airstrip is scheduled to be built this summer which will really enhance the community's accessibility.

Village schools in general have experienced slight enrollment increases of the past few years, while urban areas, such as Kodiak, have declining enrollments. For these reasons, the growth rate of Karluk has been estimated at 22%. The growth and enrollment projections are displayed in Tables I and II. (See following pages for tables)

KARLUK

TABLE I, FUTURE COMMUNITY GROWTH AND ELEMENTARY AND HIGH SCHOOL ENROLLMENT PROJECTIONS

IV-C. SUMMARY OF SPACE AND FINANCIAL NEEDS

IV-C-1. SPACE NEEDS SUMMARY

TABLE IV, SPACE SUGGESTED BY THE ALASKA STATE DEPARTMENT OF EDUCATION FOR BOTH PRESENT AND PROJECTED ENROLLMENT FIGURES

Village	Total Present Space (Unusable for Future Needs)	Total Suggested Space for Current Enrollment	Total Suggested Space for Projected (1983-84 Enrollment)
Karluk	1,392	10,595	13,390

IV-C-2. FINANCIAL NEEDS SUMMARY

Table V displays the financial needs of Karluk School in order to meet present and guture space needs. This table was derived by taking the total needed square feet and multiplying them by current estimated cost per square foot of public building on Kodiak Island. (Square foot estimates obtained from Maynard & Partch Architectural Firm) Because Karluk is the most inaccessible village on the island, the square footage cost is considerably increased. This gives us the actual dollars needed for construction which then must have 20% added on for design, State Public Works and administration fees to construct the buildings. The inflationary cost per year is estimated at 18% above the amount listed for current costs.

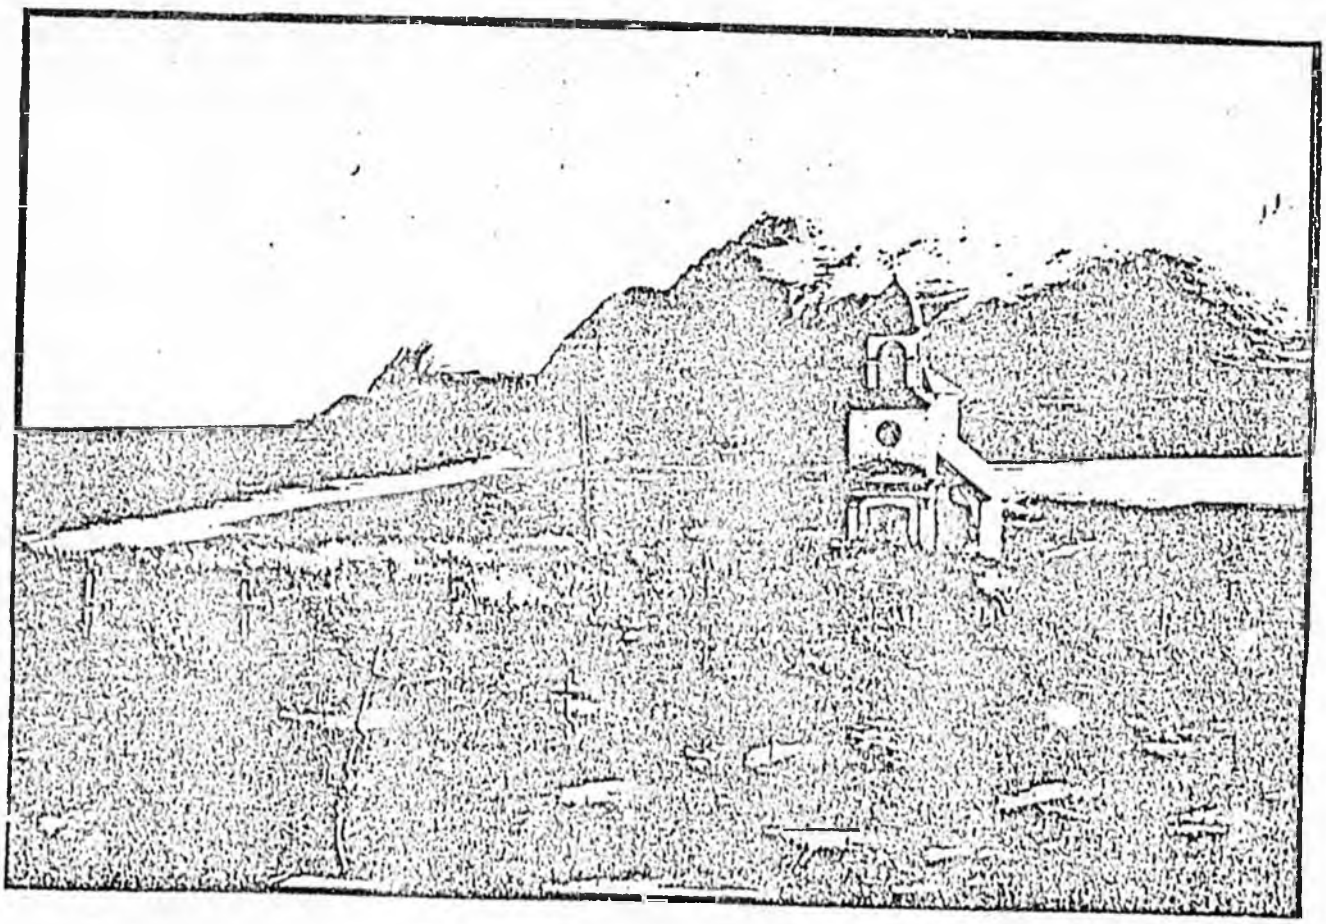
TABLE V, COSTS ESTIMATES FOR PRESENT AND PROJECTED SPACE BASED ON CURRENT ENROLLMENT

Present Square Feed Needed		Current Building Costs Per Square Foot		20% for Design & Administration Fees	Total Construction Plus Design & Administration
10,595	x	$188 = $1,991,860	x	20% = $398,372	$2,390,232
Projected Square Feed Needed					
13,390	x	$222 = $2,972,580	x	20% = $594,516	$3,567,096

**$188 per square foot plus 18% for 1 year inflationary costs = $222.

TABLE VI, TOTAL COST ESTIMATES FOR MEETING CURRENT AND FUTURE SPACE NEEDS IN KARLUK (ROUNDED OFF TO NEAREST $100,000)

FUNDS NEEDED TO MEET CURRENT SPACE NEEDS	FUNDS NEEDED TO MEET PROJECTED SPACE NEEDS
$2,400,000	$3,600,000



APPENDIX A

Karluk Advisory Board

RESOLUTION# _____ to the Kodiak Island School Board, made at the November 2nd meeting of the Karluk Advisory Board.

WHEREAS the Kodiak Island Borough School District has a commitment to equal educational opportunity in all of its K-12 programs; and

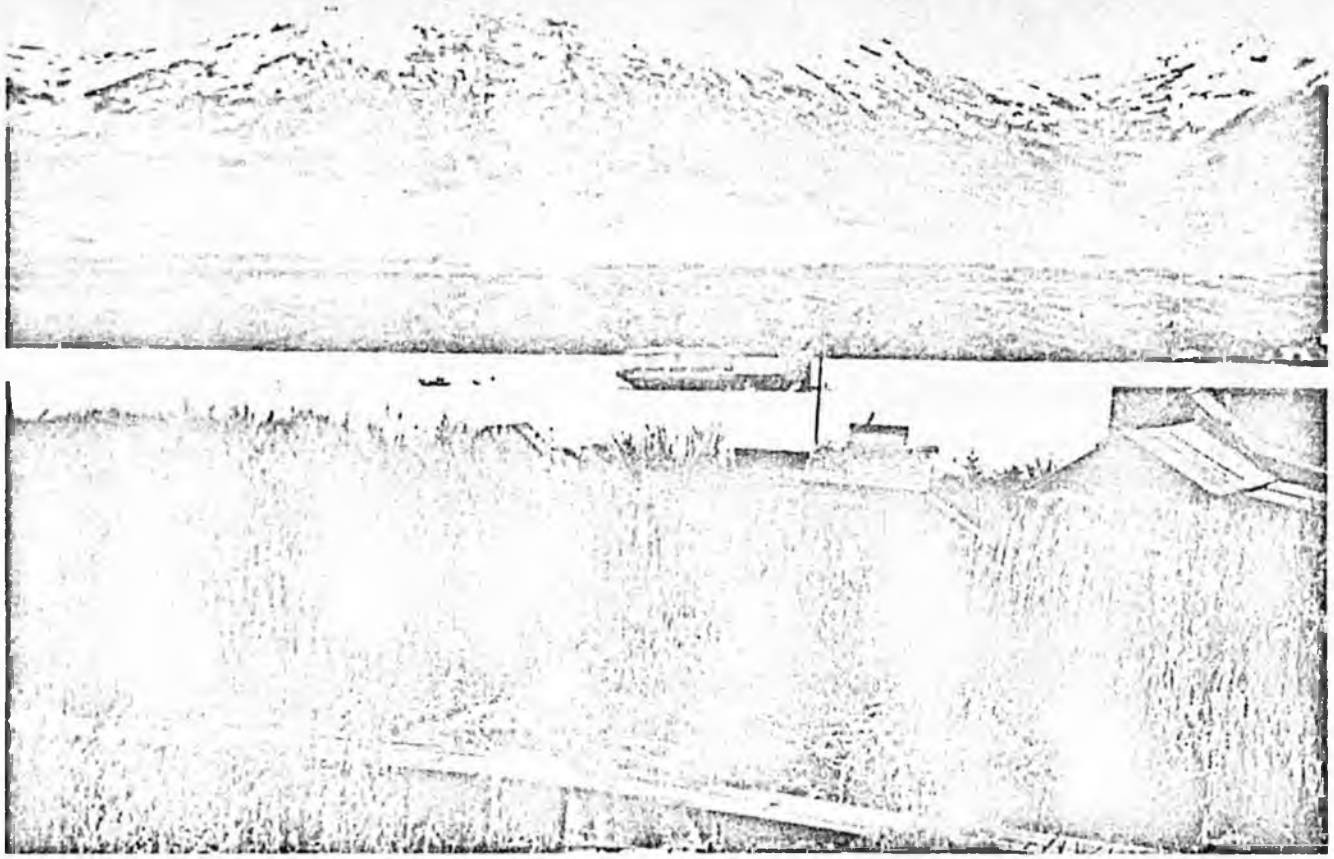
WHEREAS adequate school facilities constitute an essential component of any educational program; and

WHEREAS the Karluk school has been physically moved, divided and combined three times during the past two and one half years as a result of the Karluk bridge wash out and a relocated community; and

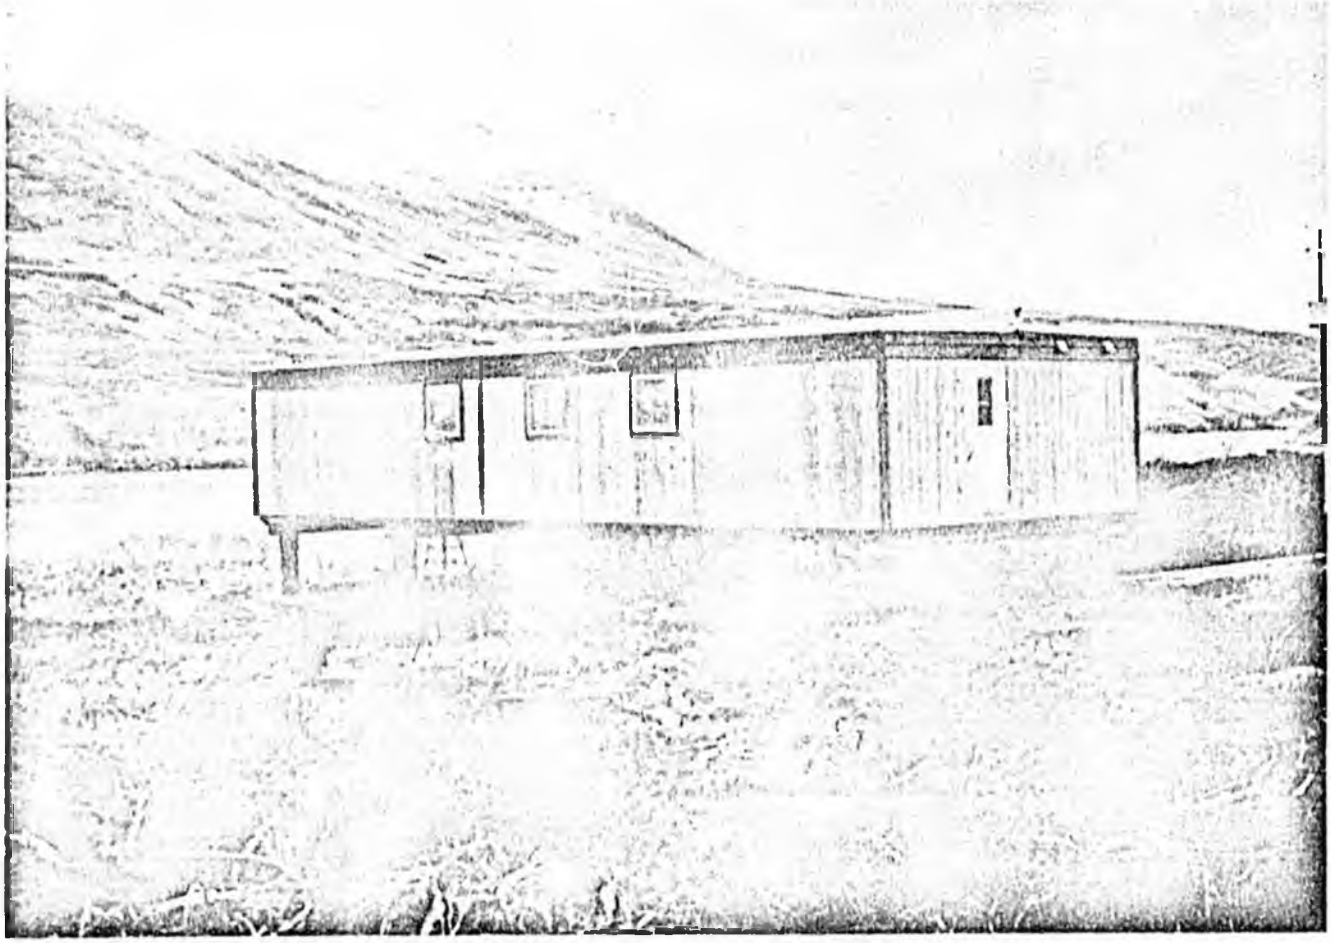
WHEREAS the Kodiak Island Borough School District and the Kodiak Island Borough Assembly did see fit to provide funding for the installation of a 20' X 42' temporary ATCO unit in December, 1978. From December of 1978 through May, 1979 this ATCO unit housed 18 students, while 8 students still attended school in the Old Karluk attendance area; and

WHEREAS the Kodiak Island Borough School District closed the Old Karluk school in May of 1979 and the Karluk parents all committed themselves to sending their children to the ATCO unit in the relocated village of Karluk; and

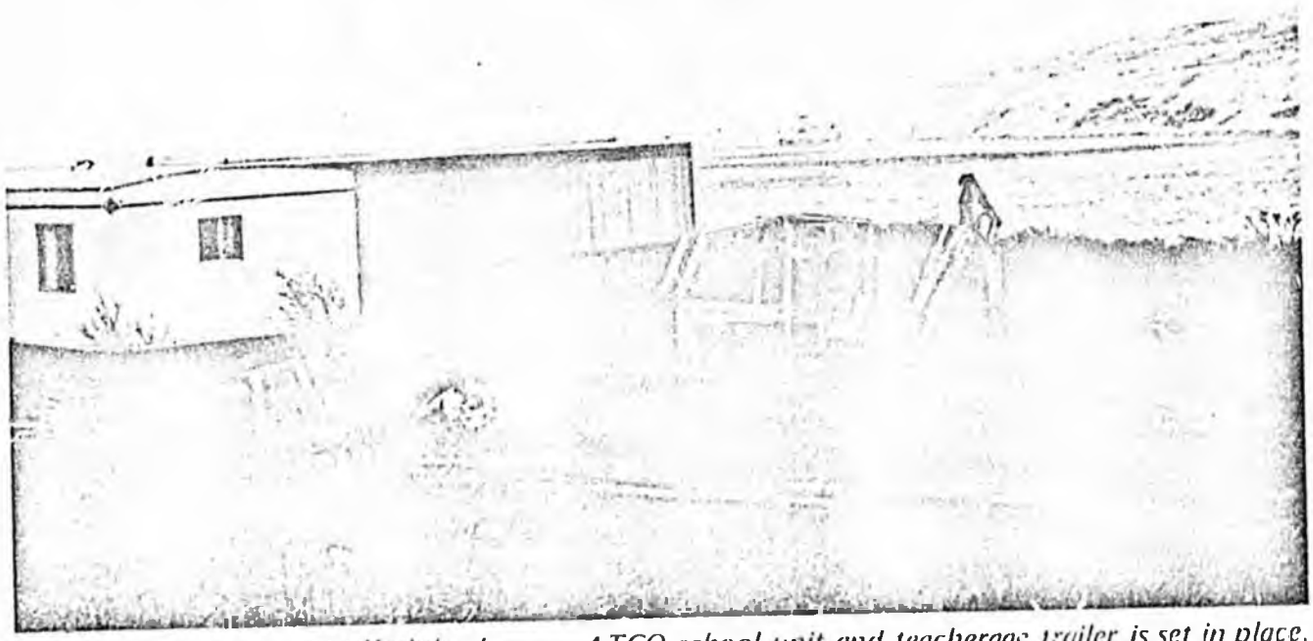
Whereas there are currently 26 students enrolled in the Karluk School, Grades K-8, with 6 of these students being Kindergarteners who attend school in a KANA rented facility, thus making teacher supervision difficult; and



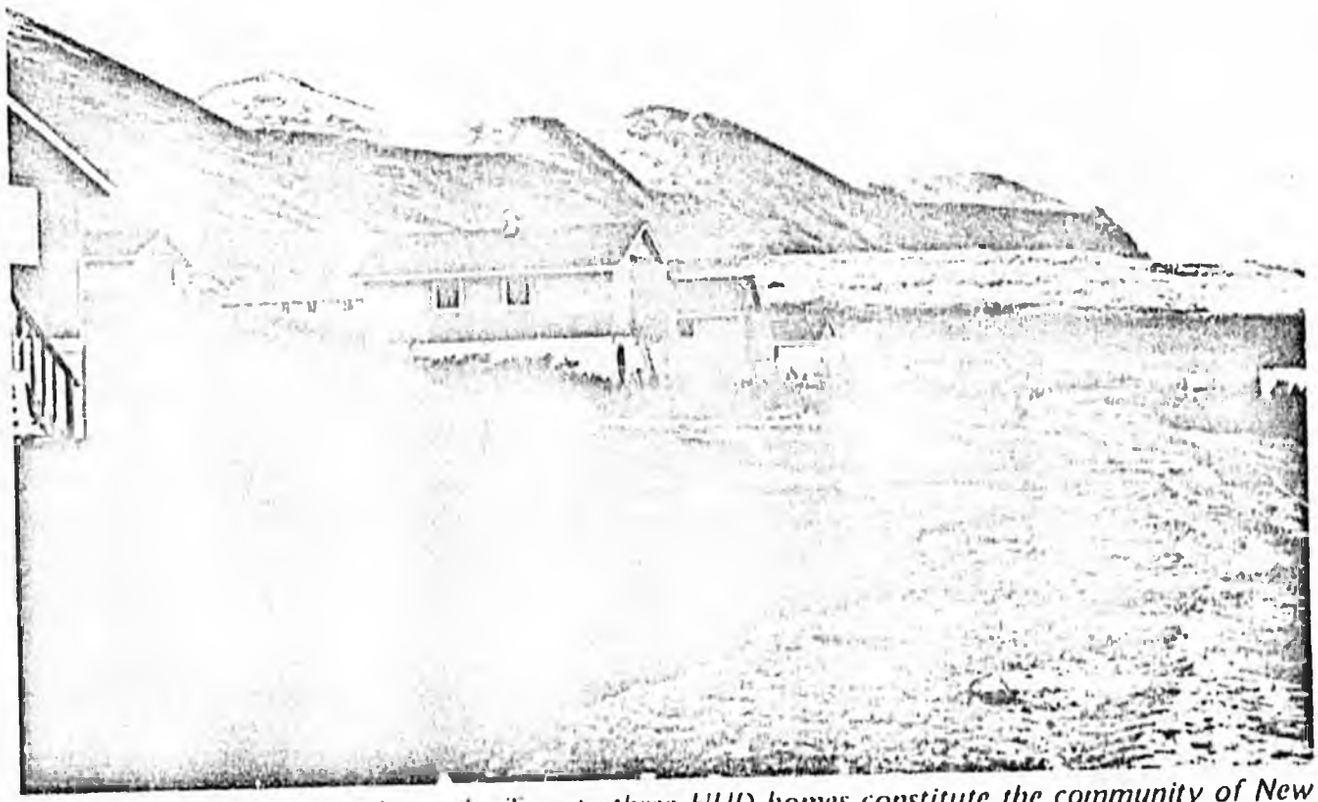
The Riley Pleas barge moves into the Karluk Lagoon loaded with the ATCO school unit. (October 1978)



The ATCO school unit is set on pilings at the New Karluk school site. (October 1978)



Looking out towards Old Karluk, the new ATCO school unit and teacherage trailer is set in place. (October 1978)



The village of Karluk is reloc d. Twenty-three HUD homes constitute the community of New Karluk. (November 1978)

WHEREAS in August of 1980, the projected enrollment for the ATCO unit is 29 (the 6 Kindergarteners will become first graders and 3 elementary correspondance students may plan to enter as regular students) and the square footage would be 18 sq. feet per student; and

WHEREAS the spacial deficiency and resulting noise problems would severly impede the delivery of an instructional program;

BE IT THEREFORE RESOLVED:

That the Kodiak Island Borough School District pursue funding for an additional temporary ATCO unit to meet Karluk students' emergency space needs for the 1980-81 school year and

That the Karluk School be assigned a high priority in the District's long range facilities planning document so that Karluk could expect a permanent elementary-secondary facility within the next 3 or 4 years, since the ATCO units provide a temporary solution only to our school space needs and since we anticipate 14 secondary students within those 3 or 4 years.

APPENDIX B

II-D. SUBJECT AREAS FOR THE VILLAGE HIGH SCHOOL PROGRAM

A) Subject Area Grid: The subject area grid is presented as a brief diagram of the educational program.

9th Grade	10th Grade	11th Grade	12th Grade
English (Reading)	English (Reading)	English	English
General Math	General Math	U.S. History	U.S. Govern. / Consumer Ed.
General Sciences	General Sciences	Reading	Reading
Social Studies/ AK. Land Claims/ Alaska Geography	Social Studies/ AK. Land Claims/ Alaska Geography	P.E. / Elective	P.E. / Elective
Vocational Educ.	Vocational Educ.	Elective	Elective
Elective	Elective	Elective	Elective
These subjects are taught with programmed, basic skills materials that students must complete.		The required subjects above will be programmed. However, the electives will be left up to the students based on the areas or jobs they may be interested in.	

APPENDIX C

II-E. Kodiak Small High School Programs - General Space Implications

Any new high school building in Kodiak Small Rural Villages must be designed to accomodate and facilitate the high school program that community people have stated they want in this document. Moreover, the design must also reflect the delivery system of the program as outlined in this section. Therefore, the following conclusion can be drawn regarding the space needs of the new facilities:

1. All five types of instructional areas: academic studies, laboratory sciences, physical education, vocational education, and other electives must be included in the building.
2. Because of limited funding and small numbers of teachers and students, as many of the different kinds of areas and spaces for specific subjects in those areas as possible must be designed for shared space. Some areas will have to accomodate two or more categories or kinds of activities.
3. The individualized delivery system of the program requires that all areas accomodate individualized study needs.
4. Since the core of the program delivery system is individualization, the center of all activities must be an area containing the library media center, and individual and small group study spaces known

as a learning resource center. All areas must have access to this area so that students can seek and select information, study books, audio-visual tapes, and work in small groups or individually on information relating to all subject areas.

5. Instructional area requirements are listed below:

a. Academic Studies Space:

1) Must have individual student study places to accomodate all students.

2) Must have general purpose classroom(s).

3) Must have a learning resource center with several individual places for students to view filmstrips, film loops, movies, micro-fish, videotapes, television, and also, listen to and/or record cassette tapes and records.

4) Must have teacher station(s) and preparation areas.

5) Must have areas for small group work, perhaps isolated to reduce noise levels.

b. Laboratory Science Space:

1) Must have direct access to learning resource center.

2) Must have sinks, ventilation, and areas to display materials as well as secured area for storing certain chemicals and equipment.

c. Physical Education Space:

1) Must have access, but perhaps not direct access, to learning resource center.

2) Must have large area for student activities to be utilized by elementary students, as well as the entire community.

3) Must be able to be secured from rest of building for community use.

4) Must contain basketball and volleyball courts and storage area for equipment.

5) May have bleacher seating to seat 75% of the community. (Suggest bleachers on rollers).

6) May have storeaway stage area with curtain.

7) Must have showers and lockers.

d. Vocational Education Space:

1) Must have access, not necessarily direct, to learning center.

2) Must accomodate such diverse space needs as: home sciences, welding, wood-working, mechanics etc..

3) May have localized, secured tool area.

4) Must have appropriate ventilation and fire safety requirments.

5) May be able to be secured from rest of building for possible community use.

e. Other Elective Areas:

1) Must have access to learning resource center.

2) May accomodate such activities as music and art.

It should be emphasized that some of the above areas will have to be combined in some manner to provide space for all areas needed.

HB 620

#

02172 NL ANCHORAGE ALASKA 68 02-11 355P AST

PMS REP ALVIN OSTERBACK

JUN 1990

WE WOULD LIKE TO EXPRESS OUR THANKS TO YOU FOR INTRODUCING HOUSE BILL 620 WHICH WOULD APPROPRIATE FUNDS TO THE DEPARTMENT OF TRANSPORTATION FOR CONSTRUCTION OF A SCHOOL AT KARLUK. WILL YOU BE TALKING TO THELMA BUCHHOLDT WITH THE INTENTION OF INCLUDING THIS INTO THE GOVERNORS BOND PROPOSAL PACKAGE? RECENT STORM DAMAGE TO THE TEMPORARY SCHOOL UNIT ROOF MAKES ACTION ON THE NEW SCHOOL PROPOSAL EVEN MORE CRITICAL.

KARLUK ADVISORY SCHOOL BOARD

Jerry Sheehan
Karluk Advisory School Board
Karluk, Alaska
99608

3/10/80

Dear Representative Buchholdt.

We hope that a hearing may be set up for HB 600 soon. We understand that Karluk is now on the Governors Bond Proposal also. We need a new school. If HB 600 can go through the legislative process, we can have a new school sooner than if the Governors Bond proposal is approved.

Enclosed are letters our children wrote to Juneau describing what they see, in their own words, as why we need a new school.

Also enclosed is a copy of the Kodiak Area Native Associations recent

(Rep. Thelma Buchholdt, pg)

newsletter, which endorses our school needs.

I will be in Juneau next week to attend the Citizens Participation Conference (Education) and I look forward to meeting you then.

Sincerely

Jerry Sheehan

Feb. 12 1980

Dear Alvin Osterback,

Greetings! How are you? I am just fine I am Tania Balleta I live in Kwajalein which is at the west side of Roi-Nam Island.

Kwajalein is made up of three separate islands you see Roi-Nam?

The bridge fell down during a storm two years ago! The church was built in 1888. There is 3 kids going to correspondence course and we not very happy being away from kids there our age.

I think you will be receiving a little from us. We do not like the lunches on the school!

I am in the sixth grade and would like to see Kwajalein get a new school and so would every body else. If you would like to see and see the school feel free!

Please Support us!

Turn this Paper over!

P.S.

Please Try To get the School in two more years!

Here is a poem for you!

What a School Means to Me!

Although I am just a sixth
grader with two more years to
go till I enter into high
school not knowing where I
will go.

I see high school student
passing off to school somewhere.
Most of them returning home again
mostly in disgrace.

I do not want to think of
the time to come for me to leave
home first to continue school elsewhere. The awful thought of returning
home in disgrace.

Love
Tonia Bolton

Please support the proposal for our school. The Elementary & Secondary Facility for Kenbridge. If we get it will surely help us out as to know we'll be attending there will be a comfortable thought!

Keep smiling
it makes people
wonder what you
been up to!

Feb. 6, 80

2-12-80

Dear

Hello, my name is Guy Balleto and I live in Karluk. Here we are in Karluk going to school in a box. We would really appreciate a new school. We would like to have a new school because in the last couple of years we moved to two different schools.

just in case you don't know, I reside on the island of Kodiak in Karluk. I sure wish we could get our new school next year sometime. If we are able to get it. will you please try to help us here in Karluk.

Guy Balleto

Kar

Dear ,

I am Philip Mccormick.
I Live in Karluk Alaska. a village on
Kodiak Island. karluk is a nice place to Fish.
Karluk needs a new school. we use to
go to school across river. That school
Is Bigger Then this school. the
school that we are in Has Leaks
In it. The school That we are in now is to
small. we Do not Have no room in The school.
We want a new school next year.

Philip Mccormick

Feb, 2, 1980

Dear

How are you doing? My name is Derk Youvella I live on Kodiak Island in a village called Karluk We would appciate a new school. Because the school is to small and there are leaks in the school. And we would like the school next year.

By Derk

Feb. 12-1980

Dear ,

My name is Katharine Yeronne Left. I am in the 6th grade and 11 years old. I live in Kalskag which is on Kodiak Island. I wrote this letter to tell you we need a new school. Every day we go to conversation in the teachers trailer. The little kids are to noisy it's hard to learn. And next year we are getting more small kids. So please help us. We sure need help. I sure wish you could come out here and I will show you around. Thank you hope you could come.

Left Katharine Yeronne.

Karluk Ak.

Dear

I am Darryl Squartsoff.
I Live in Karluk Alaska in a blue house.
We would appreciate it you would
give us a new school. Our school
is to buse in. We always have a
class in our teachers house. If you
would get us a new school send
it as soon as posable. So we
won't be so crowded. In 1977
we had a brige and a store
but a storm started and our
big wood stor was distroyed. Our
brige was down by the time
the storm was over. Our Store keeper
quit his job and left. This happend
On my brothers birthday he was 1.
Now he is 3 years old. We are
going to have a lot of kids
next year in this small school.
I hope we dont have to go
to school out side next year.
Hope you can help

FEBRUARY 12 1980

2-12-80

Dear

Hello my name is Emil Sugak. we would like a new school. I live in Kodiak Island. I would like you to come over when you get a chance to. are school leaks all over the place. I am in 3th grade. and i am 9. are villiage is called Karluk. What is your names. where do you live. I have a friend name Robin he is in 3th grade and he is 9. I dont have anything else to say.

Bye

February 1980

Dear

"Hello my name is Roben Squisoff. "We would like a new school. We got a small school. "Please send us a new school. "I live on Kodiak. "Island. "We would like you to come over and visit one day. The school shakes. I am in 7th grade I am nine years old. Who is your name. We got a school that is 18x40.

By By

Feb. 12, 1980

Dear Fred Zharoff,

Hello my name is Alicia Lynn Reft. I live in Karluk, Alaska it is a small village of about 80 to 100 people. There are 20 kids in the morning in school and 26 in the afternoon and we could not work well because the school is noisy. The school is so small we have to go do Comprehension in the teacher's house. I would sure appreciate it if you could help us get a new school for next year because next year we are going to have about 30 to 32 kids in the school. We used to live on the other side of the village. Over there we went to school the school is nice and big but right now we are over here in the small school and on the other side three kids are taking Correspondence course and they are going to go to school over here next year. But we could barely fit them in

Dear _____ Feb.-12-80

Hello! My name is Joyce Elaine Reft. I live in Karluk. Karluk is on Kodiak Island Alaska. There are twenty kids in school and twenty six in the afternoon. We are going to school in a small Atco. We have to have Comprehension in the teachers trailer, because we don't have enough room in our school. We are asking you people to help us get a bigger and new school. I am 12 years old and in the 7th grade. My Teachers name is Mr. Craig Flynn. Every Tom it rains our school we have to put pans in the middle of our school. We don't have any place to go any where. We have to wear Rubber instant soups. We would like to have you out here and will show you our small school. When it storms hard the whole school shakes. Next year there going to be more kids.

KANA NEWSLETTER

Volume 4- Number 3 FEBRUARY 1980

To promote pride on the part of the Natives of Alaska in their heritage & traditions; To preserve the customs, folklore & art of the Native races; To promote the physical, economic & social well-being of the Natives of Kodiak. To discourage & overcome racial prejudice & the inequities which such prejudice creates; To promote good government by reminding those who govern & those governed of their joint & mutual responsibilities.

THE VICE-PRESIDENT's VIEW

The residents of Kodiak Island should be well-aware of four bills presently before the Alaska State Legislature. All four will directly affect us. I urge your support of two of these bills - one providing for construction of a new school in Karluk and another providing for the installation of KMXT translators, and your active opposition to two other bills which repeal the limit seiner length and repeal prohibition of drum seining.

NEW SCHOOL FOR KARLUK

HB-620 was introduced in January by Representatives Osterback and Zharoff. This bill provides appropriation of $3,600,000 for construction of a new elementary-secondary school in Karluk. The funds would go directly to the Kodiak Island Borough for the construction project.

The village of Karluk needs your support. At this time, 27 students (Kindergarten through 8th grade) are attending classes in an ATCO unit. The conditions are very overcrowded and the various grade levels of the students make one-classroom teaching difficult.

Since Karluk is not included in the school construction bond issue this fall, legislative action is their only hope for a new school.

KMXT TO THE VILLAGES

In February, Representative Osterback introduced HB-548 to provide appropriation to install KMXT Radio translators between Kodiak and the villages of Old Harbor and Larsen Bay. The translators will extend KMXT's signal to these villages, bringing them public radio.

KMXT's staff and board have been working very hard for several years to extend their radio signal to all the Kodiak Island villages. This is the first of appropriating legislation to meet their goal and it needs our active support.

MORE GEAR, LARGER BOATS

Two bills before the Alaska State Legislature have the potential of adversely affecting salmon fishing on Kodiak Island and other areas of the states

HB-1, introduced by Representative Eliason, is an act relating to the length of salmon seine vessels. This bill repeals the maximum 58-foot keel. Allowing larger boats would have definite adverse effects on small boat fishing as practiced by the majority of Native fishermen on the Island. Larger vessels would result in increased cape fish-

(Continued on Page 2)

OIL - WHAT DO WE THINK

KANA and five villages are offering testimony this week at the Anchorage and Kodiak Public Hearings on the Draft Environmental Impact Statement (DEIS) for OCS Lease Sale No. 46.

KANA's testimony is supporting the No Sale option outlined in the DEIS statement. This formal position was reached by the KANA Board of Directors following staff and OEDP Committee analysis of the DEIS. The Board's support of the No Sale position was adopted for the following reasons: 1) The unavoidable adverse environmental impacts that will occur to the Island, particularly to its commercial fisheries, from the development and production of and/or natural gas from the sale area, 2) the adverse socio-economic effects that will occur, particularly to the subsistence/small boat rural lifestyle of the villages, 3) the non-compliance of conducting this sale in accordance with guidelines stated in the Bureau of Land Management/ Outer Continental Shelf Lands Act of 1953 as amended in 1978.

In addition, the villages of Akhiok, Karluk, Ouzinkie and Port Lions are supporting the No Sale options for similar reason. Old Harbor, however, is supporting the No Sale option prior to the lease sale occuring, but is requesting that it be considered as a potential location for the onshore facilities should oil development occur.

KANA's review process has focused on reviewing the numerous documents prepared in regard to Lease Sale No. 46, providing information to the Island's Native people on the probably impacts associated with the proposed sale, and to assist in advocating positions that the Island's villages have adopted. This effort has primarily occurred through working with the KANA Overall Economic Development and Planning Committee, a sub-committee comprised of one representative from each of the Island's six villages. The Committee's efforts have included meeting independently and with the Borough's OCS Advisory Council to become familiar with oil development.

NOTICE

The Eye Doctor from AMNC will be coming to Kodiak March 31st through April 4th. Anyone wishing to make an appointment, please contact Geraldine Squartsoff, the Kodiak Area Native Association Health Department, at 486-5725, extension 241.

NEWS BRIEF

Budget Request Affects Alaska

The President sent Congress his budget request for FY 1981 which includes for Alaska: $25.2 million for military construction; $83.1 million for the Coast Guard; $98.3 million for the FAA; $124 million for highways; $11.5 million for the Alaska Railroad; $1.1 million for mass transportation; $38.9 million for the BLM; $30.8 million for the BIA; $76.5 million for Interior; $1.7 million for Bureau of Mines; $19.9 million for Fish and Wildlife; and $19.9 million for the National Park Service.

FUEL ASSISTANCE AVAILABLE NOW

The Federal Fuel Assistance Program is designed to provide up to $350 credit for fuel to households whose income falls within the prescribed guidelines. The program is available to help with fuel bills, paid or unpaid, incurred since October 1, 1979. The money goes directly to the fuel company with which you deal. When you send in your application, enclose your fuel and utility bills, paid or unpaid, since October 1, 1979.

Income guidelines are as follows:

HOUSEHOLD SIZE	MONTHLY GROSS INCOME
1	$445
2	558
3	730
4	873
5	1,016
6	1,158

Some income, such as the Longevity Bonus, is not "counted against you," so even if you are somewhat above the guidelines, apply anyway. You may be eligible.

In Kodiak, applications are available at the Food Stamp office in the old Hospital Building and at KANA Social Services office.

In the villages, the fee agents or Council have forms available.

WELCOME ABOARD!

Interest and enthusiasm is evident as Gene Sharratt talks about his new job at KANA. That is High School Counselor funded through the JOM program. Gene replaces Yvonne Zharoff who recently resigned to accompany here husband, Representative Fred Zharoff to Juneau.

Gene is located at the Counseling office in the High School and is available to any Native student for counseling, scheduling or just a friendly chat.

Gene has been in Kodiak off and on since 1965. He is married and he and his wife Carol have one child, Sarah. He comes to us with a Master's degree from the Pacific Lutheran Universit and a teaching background.

Welcome aboard, Gene!

(Continued from Page 1) MORE GEAR, LARGER BOATS

eries, increased gear lengths, lead to higher prices for entry permits and in general, favor "outside" fishermen who are engage in large boat salmon fisheries in other areas.

A House concurrent resolution (No. 54) has been introduced by Osterback, Gardener, and Zharoff which requests the Board of Fisheries to adopt special regulations for the Kodiak and Shumigan Islands and Alaska Peninsula. The resolution imposes a fifty-foot limit for these areas. Although the resolution is an attempt to save these areas from eliminating the present maximum keel length limit, it does not carry the weight of law.

HB-791, introduced by Representative Gardiner, reinstates the use of a drum or a reel as legal gear in the purse seine fishery. As would occur from the removal of the maximum keel length limit, this bill would favor "outside" fishermen who already use power reels or drums as legal gear in "lower 48" salmon fisheries. Overall, the most apparent effects would be less fish for the inland bay small boat fishermen and increasing pressures to reduce the number of entry permits available for the Kodiak Island area. Although the bill is being considered during this legislative session, it would not take effect until January 1, 1984.

I urge you to contact our legislators, Senator Mulcahy, Representative Zharoff and Osterback, to voice your concern on these bills. Petitions have or will be circulated in each village regarding HB-1 and HB-791.

AKHIOK MEN AMONG PUBLIC SAFETY OFFICER GRADUATES

Eighteen men and women completed four weeks of intensive training as Village Public Safety Officers with their graduation from the Department of Public Safety Academy in Sitka on February 8th. Among the graduates were Mitch Simeonoff and Robert Simeonoff of Akhiok.

This Village Public Safety Officer training course included two weeks of training as emergency medical technicians, the same course given to all Alaska State Troopers; and two weeks training in law enforcement, boating and water safety, search and rescue operations and preparation of village ordinances relating to public safety.

Later this spring, these Village Public Safety Officers will receive an additional one-week training in fire fighting and fire prevention. This will be conducted by the State Fire Service Training Program of the Department of Education at the new Regional Fire Training Center in Anchorage.

This will be followed by continued on-the-job training by Alaska State Troopers. As Village Public Safety Officers, these men and women will be responsible for providing a wide range of public safety services in their respective communities. This includes law enforcement, emergency medical treatment, fire fighting and the development of fire fighting skills and fire prevention programs in the villages, development of boating and water safety programs and enforcement of boating safety in cooperation with the U.S. Coast Guard, development of search and rescue programs within the villages and assistance to the village councils in the adoption of village ordinances.

KODIAK TEAMS HEAD FOR NATIVE YOUTH OLYMPICS

Although the first Native Youth Olympics was held in the spring of 1971, Kodiak youths did not participate until 1978. Now, as they enter their third year of competition, their interest and enthusiasm is stronger than ever. Twenty-two students from the Kodiak area are expected to participate in the state-wide competition in Anchorage on March 7 & 8. Island-wide local competition was held in February to create our All-Star team going to Anchorage. The Akhiok competitors were weather out during the island competition and consequently will be taking their own team to Anchorage.

The competition evolved from twelve teams in 1971 to over eighteen last year. This year's Native Youth Olympics promises to be even larger and more competitive. Students from Nome and Sitka will make the trip to Anchorage to compete for Gold, Silver and Bronze medals in eight different events.

These events include stick pull, head pull, leg wrestling, kneel jump, toe kick, two-foot high toe kick, one-foot high toe kick and seal hop.

The members of this year's Kodiak Island team include Walter and Paul Kewan, Vickie Delgado, Melody Inman, David Bourdon, Lloyd Ashouwak, Susan Panamaroff, Leona Haakanson, Elaine Smileoff, Barbara Squartsoff and Judy Inga. The team is being coached by Sue Bolling, a fifth-grade teacher at Main Elementary School, and Gene Sharratt, JOM Counselor at the high school. (Names of the Akhiok team members are not available.)

GOOD LUCK TO ALL!

INDIAN CHILD WELFARE ACT - HOW IT AFFECTS ADOPTIONS

When the Indian Child Welfare Act went into effect in May 1979, it brought about changes in adoption procedures all over the United States. Some of the procedures were already required under Alaska State Law. Other changes go beyond Alaska State Law and take precedence over Alaska State Law.

There are two routes to adoption: one, in which parents' rights to a child are terminated or ended permanently without their consent; and two, in which the parents voluntarily decide and agree to relinquish or give up their rights to their child.

I. In situations in which parents' rights are terminated or ended without their consent, the following rules apply.

1. The party seeking to terminate or end the parents' right must notify the child's parent, custodian, and the child's tribe of the court proceeding, and they must notify the parents and the tribe that they have a right to intervene and take a part in the court proceeding, at any point in the proceeding. After receiving notice, the parent, custodian, or the tribe or village have ten days, plus an additional 20 days upon request, to prepare for the court proceedings.

2. If the identity or location of the parent or Indian custodian and the tribe cannot be determined, the Secretary of the Interior shall be requested to notify the child's parent, Indian custodian, and tribe.

3. The child and his parent or Indian custodian shall have the right to court-appointed legal counsel.

4. Where state law makes no provision for court-appointed counsel in removal, placement, or termination proceedings, the Secretary of Interior shall pay for that service.

5. Any party seeking to terminate or end parental rights without parental consent must satisfy the court that active efforts have been made to provide remedial services and rehabilitative programs designed to prevent the breakup of the Indian family and that these efforts have proved unsuccessful.

6. Parental rights cannot be ended without parental consent unless the court determines, supported by evidence beyond a reasonable doubt, including testimony of qualified expert witnesses, that the continued custody of the child by the parent or Indian custodian is likely to result in serious emotional or physical damage to the child. Expert witnesses include people knowledgeable about tribal or village culture and customs.

(Continued on Page 6)

MANPOWER ON THE GO

Our ever-changing manpower program is gearing into the spring and summer seasons with completion of the carpentry programs and planning for the Summer Youth projects.

The Title IID Carpentry program in Kodiak and Ouzinkie drew to a close at the end of February with the completion of the Ouzinkie Health Clinic and the near completion of the Medical/Dental Clinic on the first floor of the Donnelly Building (KANA offices). After a little more finish work is taken care of in the Medical/Dental Clinic, an opening date will be announced.

Debbie Hunter, Manpower Program Manager, has already started planning for our summer youth projects. There will be employment for youths in the six villages and in Kodiak. Any ideas for meaningful projects are being accepted now. Contact Debbie at 486-5726.

Three of our newest in-town CETA participants are Peter Chichenoff, Laurie Ann Simeanoff and Loretta Shangin. All three are students at the Kodiak High school and are employed by the YETP program.

Peter is working at Alaska Legal Services as a para-legal trainee. His interests lie in this field of work and he enjoys his job.

Laurie Ann is working as a Nurse's Aide Trainee at the Kodiak Island Hospital. Laurie is interested in attending Sheldon Jackson College this fall to become a Registered Nurse.

Loretta's interests lie in the dental assistant field and she will be working in the Dental Clinic located in the Donnelly Building.

Two new participants in the CETA Title VI program are Vickie Leslie and Sue Lukin.

Vickie is working as a Court Clerk Trainee at the State Court System and find this a perfect opportunity to make herself more aware of this field.

Sue is working at the Harbormaster's Office in a clerical position. She was not available when pictures were taken.

NOBODY CALLS ME "DOCTOR"

If he walks like a Doctor, talks like a Doctor, sees you when you're sick like a Doctor, sews you up when you're cut, like a Doctor, why does he have the letters "P.A." after his name and not "M.D.". . .like a Doctor should? These are questions many people ask when they first come in contact with the newest breed of mid-level medical practitioner the profession refers to as "P.A." or Physician's Assistant.

The basic answer to the above question is "he's not called a Doctor because he isn't a Doctor, but a member of a relatively new professional class of mid-level practitioners which also includes Nurse Practitioners and Pediatric Nurse Practitioners". These new mid-level practitioners fill a much-needed role in the overall health care picture by serving the needs of medically under-served areas such as the Alaska bush country, often working with Native people in remote, isolated sites which could not afford the cost of a physician.

The first "P.A." graduated from Duke University School of Medicine's Physician's Assistant Program in 1965. There were four men in that pioneering class, and all had been Navy Corpsmen with independent duty experience during the Vietnam conflict. The initial Duke program consisted of two intense calendar years of medical training which prepared them to function in a medical practice with a physician supervisor—performing many of the tasks formerly restricted only to physicians themselves. Now there are over 40 P.A. programs throughout the United States and over 12,000 P.A.'s practicing, with 1200 new graduates each year.

The role of "P.A.'s" has grown during the short fifteen-year history of the profession. Now these mid-level practitioners serve in clinics and hospitals around the country, and their services are barely distinguishable from those of their physician supervisors. Yet, that is the major difference between a P.A. and a Doctor. The P.A. must always be a dependent practitioner, under the direct or indirect supervision of a sponsoring physician. The medical education of a P.A., while intensive and thorough, is not the equivalent to that of his physician supervisor, so the supervision is not only necessary but appropriate. This need for supervision is the protective edge the patient is guaranteed when he visits his community P.A., who always knows his limitations, and the appropriate time to ask for help when those limitations are reached.

In effect, then, a patient can be assured of receiving the same high level of care from the P.A. as he would from the physician himself. The difference is that if a patient's problems cannot be diagnosed by the P.A., he consults with his supervising physician or refers the patient to his own physician for appropriate, higher-level care. Thus the patient always receives the appropriate level of care needed for the situation, and never gets "second-class" medical care and treatment.

P.A.'s are licensed by the state in which they practice and must have graduated from an American Medical Association-approved Physician's Assistant Program, and have met other, tough State standards. P.A.'s now have prescription-writing privileges in 15 states with more states passing such enabling legislation each year. They often work for specialists such as Orthopedic Surgeons or Cardiologists, and have staff privileges at hospitals wherever they live and work, but again—those privileges are always tied in with the privileges of the supervising physician.

In Kodiak, there are three Physician's Assistants and one Nurse Practitioner currently practicing with their "back-up" physicians. Three of these are in private practice and the fourth works for KANA as a member of the Itinerant Health Care Team, under the KANA Health Director. He is Ken Miller, P.A. Ken's sponsoring physician is Dr. Rud Wasson of the Island Medical-Dental Center now under construction in Kodiak. When that facility opens in June, another medical staff member will be coming aboard", with the addition of a family practice physician, who will also act as KANA's Medical Director.

Interviewed at KANA this week, Ken Miller says he is constantly on the look-out for Native youth and young adults who may show an interest in the Physician's Assistant career field. "I envision that in ten or fifteen years, most of the Native Corporation jobs now held by non-Native P.A.'s in Alaska will be filled byNativeswho have left home for a few years to take the needed training and have come back to practice," he said. Ken feels that the P.A. profession is largely overlooked by many Native youth who are not aware of its existence. "The training and experience we give our CHA's should make them ideal candidates for a P.A. or Nurse Practitioner career if they would be interested," he added. He said he is willing to counsel any Native youth interested in more details about becoming a P.A. or Nurse Practitioner.

So, while you may call him "Doc". . .he may, in fact, be a member of the newest breed of medical practitioner. . . the P.A. And if you notice your local P.A. grinning the week of March 6th, it's because Governor Hammond has proclaimed the days of March 6, 7, & 8 as "Physician's Assistant Recognition Days." It's a long way from 1965, when the first four Duke graduates were constantly asked, "What's a P.A.?"

II. In situations where parents Voluntarily Relinquish or give up their right to a child, the following rules apply.

1. The consent must be put in writing, and recorded before a judge of competent jurisdiction who will make sure that the parents understand exactly what they are doing.

2. No consent is valid for an infant until the infant is ten days old.

3. The consent of the parent or custodian can be withdrawn up until entry of the final decree of termination of rights or adoption.

4. After the entry of a final decree of adoption of an Indian Child in any State Court, the parent may withdraw consent upon the grounds that consent was obtained thru fraud or duress and may petition the court to overturn the decree. If the court finds that consent was obtained thru fraud or duress, the court shall overturn the decree and return the child to the parent. No adoption which has been effective for at least two years can be invalidated unless otherwise permitted by State Law.

III. Placement - Adoptive and Pre-Adoptive

The following placement preferences must be followed unless there is "good cause to the constrary." Good cause to the contrary means strong reasons not to follow the placement preferences in the law.

For the adoption placement, a preference will be given to:

1. a member of the child's extended family
2. other members of the Indian Child's tribe; or
3. other Indian families

For pre-adoptive placement (the waiting time before placement in the adoptive home), the child must be placed in the least restrictive setting which is most like a family and meets the child's needs. The child should also be placed reasonably close to his home.

The preferences for pre-adoptive placements are:

1. a member of the Indian child's extended family;

2. a foster home licensed, approved, or specified by the Indian child's tribe;

3. an Indian foster home licensed or approved by an authorized non-Indian licensing authority; or

4. an institution for children approved by an Indian tribe or operated by an Indian organization which has a program suitable to meet the Indian child's needs.

"Good cause" not to follow the placement preferences in the Law is based on one or more of the following considerations:

1. The request of the biological parents or the child when the child is of sufficient age.

2. The extraordinary physical or emotional needs of the child as established by testimony of a qualified expert witness.

3. The unavailability of suitable families for placement after a diligent search has been completed for families meeting the preference criteria.

4. The burden of establishing the existence of good cause not to follow the order of preferences, shall be on the party urging that the preferences not be followed.

The Child's tribe or village can establish a different order or preference by resolution, as long as the change is the least restrictive for the child and yet meets the child's needs.

The law says that, where appropriate, the preference of the parent and the child (if the child is of sufficient age) shall be considered. Also, if the parents' request confidentiality, this shall be taken into consideration.

A record of each such placement (pre-adoption), foster care, and adoption) shall be kept by the State showing how it made efforts to comply with the placement preferences. Such records shall be made available at any time at the request of the Secretary of the Interior or the Indian (Native) child's tribe (village).

When an Indian (Native) child who was adopted reaches the age of 18, the court shall inform him or her of his or her tribal affiliation and any such information as needed to protect the adopted child's right flowing from a tribal affiliation.

The provisions of the law do not apply to adoptions completed prior to May, 1979, except for an adopted child's right to find out about his or her tribal affiliation.

For any additional information or explanation on the Law, contact

DRUG LEGISLATION

HESS COMMITTEE

SUMMARY

STATE OF ALASKA/ Jay S. Hammond
Governor

Title 17 contains our current drug statutes Chapt 12 enacted in 1968

SUMMARY OF PROPOSED REVISION TO ALASKA'S DRUG LAWS

I. INTRODUCTION

House Bill 628 comprehensively revises, consolidates and modernizes the drug laws of Alaska. The bill is patterned after the Federal Controlled Substances Act of 1970 and the Uniform Controlled Substances Act. The Federal and Uniform Acts have served as models for the forty-four states that have recently revised their outdated drug laws.

The bill has two related but distinct objectives regarding the problem of drug abuse. The first is to discourage the illicit trafficking in and use of drugs by establishing rational and enforceable penalties for the illegal distribution and possession of controlled substances. The second is to insure that the legitimate handling of controlled substances by persons such as pharmacists and manufacturers is properly regulated to prevent diversion of drugs into illegal channels.

II. CLASSIFICATION OF CONTROLLED SUBSTANCES

Following the lead of the Federal and Uniform Acts, House Bill 628 classifies all controlled substances into schedules based on the relative danger of the substance. Six schedules are used with schedule I containing the most dangerous controlled substances. Schedules II, III, IV, V, and VI list controlled substances in descending order of relative dangerousness.

Heroin, for example, is classified as a schedule I controlled substance while cocaine is classified as a schedule II controlled substance. Valium is classified as a schedule IV controlled substance while marijuana and alcohol are classified as schedule VI controlled substances. The specific penalty for the illicit manufacture, distribution and possession of a particular controlled substance is determined by the scheduling of the drug.

III. CONTROLLED SUBSTANCES ADVISORY COMMITTEE

Following the recommendation of the Uniform Controlled Substances Act, the proposed bill establishes a Controlled Substances Advisory Committee.

The Committee proposed under the bill would be comprised of nine members having special expertise in dealing with the problems of drug abuse. Included as members are the Director of the Division of Public Health, a pharmacist, the Commissioner of Public Safety, the Attorney General, a physician and a law enforcment officer. A public member is also appointed by the governor to insure maximum opportunity for citizen participation.

While all controlled substances are initially classified into one of the six schedules by the bill, the Committee is given primary responsibility for adding controlled substances after public hearings as new information becomes available concerning the abuse of drugs. If a drug is added to the federal schedules the committee must within 60 days consider adding the drug to Alaska's controlled substances schedules. Additionally, the committee is charged with the responsibility to determine whether the deletion or rescheduling of controlled substances is required and to report its findings to the governor and the legislature.

IV. CRIMINAL PENALTIES

House Bill 628 classifies all offenses involving the abuse of Controlled Substances into six degrees of the crime Promoting a Controlled Substance. The bill reserves its stiffest penalties for persons engaged in the large scale distribution of controlled substances and the distribution of drugs to minors.

A. Promoting a Controlled Substance in the First Degree

Promoting a Controlled Substance in the First Degree is the most serious crime under the bill and is punishable by a mandatory term of imprisonment of at least five years and a maximum term of imprisonment of ninety-nine years. This penalty is identical to the penalties authorized in the new criminal code for the crimes of Kidnapping and Murder in the Second Degree.

This statute covers the distribution of a schedule I controlled substance (e.g., heroin) to a minor as well as ongoing large scale criminal enterprises involving the distribution of any controlled substance.

B. Promoting a Controlled Substance in the Second Degree

Promoting a Controlled Substance in the Second Degree is a class A felony which under the new criminal code is punishable by a maximum of twenty years imprisonment. This penalty is identical to the penalties authorized in the new criminal code for Manslaughter, Armed Robbery, and Rape.

The statute prohibits the manufacture or distribution of schedule I controlled substances (e.g., heroin) to any person as well as the distribution of a schedule II or III controlled substance (e.g., cocaine, LSD and hashish) to a minor.

C. Promoting a Controlled Substance in the Third Degree

Promoting a Controlled Substance in the Third Degree is a class B felony, punishable by a maximum penalty of ten

years under the new criminal code. This penalty is identical to the punishment authorized in the new criminal code for the crimes of Perjury and Burglary of a Dwelling.

The statute covers the manufacture and delivery of a schedule II or III controlled substance (e.g., cocaine and hashish), the distribution of a schedule IV or V controlled substance (e.g., valium) or marijuana to a minor, and the possession by an adult of a schedule I or II controlled substance (e.g., heroin or cocaine) in a school.

D. Promoting a Controlled Substance in the Fourth Degree

Promoting a Controlled Substance in the Fourth Degree, a class C felony, carries the same five year maximum penalty as Criminally Negligent Homicide and Riot under the new criminal code.

The statute covers seven forms of conduct including the distribution of any amount of marijuana, the possession of schedule I or II controlled substances (e.g., heroin and cocaine), the possession by an adult of schedule III, IV or V controlled substances or marijuana within the grounds of a school and the possession of one pound or more of marijuana under any circumstances.

The specific prohibition against possession of one pound or more of marijuana is included to resolve ambiguities created by the Supreme Court's decision in Ravin v. State regarding possession of small amounts of marijuana for personal use in the home. This has been a particular problem in dealing with situations involving the cultivation of large amounts of marijuana plants. Under House Bill 628 the possession of one pound or more of marijuana is presumed not to be for personal use and is classified as a felony.

Also included in the fourth degree crime are aggravated instances of bootlegging. While bootlegging of intoxicating liquor is ordinarily a misdemeanor under both present law and House Bill 628, the bill makes it a felony if the defendant has been previously convicted of bootlegging or has attempted to sell the intoxicating liquor to a minor or to more than one person.

E. Promoting a Controlled Substance in the Fifth Degree

Promoting a Controlled Substance in the Fifth Degree is a class A misdemeanor punishable by a maximum of one year in jail. It carries the same penalties as Resisting Arrest and Assault and Battery under the new criminal code.

The statute covers the unlawful possession of schedule III, IV or V controlled substances (e.g., hashish and valium),

the furnishing of intoxicating liquor to a person under 19 years of age, non-aggravated instances of bootlegging and the furnishing of false or fraudulent information in application, reports or records pertaining to controlled substances.

F. Promoting a Controlled Substance in the Sixth Degree

Promoting a Controlled Substance in the Sixth Degree, a class B misdemeanor punishable by a maximum sentence of 90 days imprisonment, carries the same penalty as the theft of a $20 pair of gloves and Prostitution under the new criminal code.

The statute prohibits various forms of conduct involving the possession of marijuana that is punishable by a maximum $1,000 fine but no jail time today. It covers the possession of marijuana in public, the possession of marijuana while operating a motor vehicle and the possession of marijuana by persons under 19 years of age.

V. INCREASED PENALTIES FOR REPEAT OFFENDERS

Because the sentencing provisions of House Bill 628 are keyed into the presumptive sentencing provisions of the new criminal code, a judge's discretion in sentencing a defendant with a prior felony conviction is substantially restricted. For example, if a defendant is being sentenced for Promoting a Controlled Substance in the Second Degree (e.g., Sale of Heroin) and has prior felony convictions for Burglary and Aggravated Assault, the sentencing judge will be unable to reduce the sentence below 7 1/2 years. Additionally, once sentenced, the defendant may not be paroled.

VI. FORFEITURE

The proposed bill contains detailed provisions providing for the forfeiture of items such as automobiles, airplanes and firearms that are used to facilitate illegal drug transactions. While heavily penalizing persons engaged in criminal activity, the bill contains provisions allowing innocent parties, such as a bank holding a security interest in an automobile, to protect their interest in the property.

VII. BAIL

The bill also contains an amendment of the present statute concerning release on bail which provides that a defendant may not be released on bail after conviction if the offense was Promoting a Controlled Substance in the First Degree or otherwise involved the manufacture, delivery or possession with intent to deliver a Schedule I or II controlled substance (e.g., heroin, cocaine, LSD) under circumstances manifesting an intent to distribute the substance as part of an ongoing commercial enterprise. This adds these offenses to Murder, Kidnapping and Rape for which bail may not be granted after conviction.

VIII. REGULATORY PROVISIONS

To insure that drugs destined for legitimate distribution and possession by manufacturers, doctors, researchers and pharmacists are not diverted to illegal use, the bill requires registration with the state of all persons legitimately in possession of controlled substances. An identical scheme for monitoring legitimate use of controlled substances is provided for by federal law.

To insure that pharmacists, doctors, researchers and manufacturers of controlled substances are not subject to conflicting state and federal requirements concerning registration and record keeping requirements, order forms and prescriptions, the bill specifically provides that compliance with federal requirements satisfies state law.

IX. LABORATORY REPORTS

The bill additionally contains a provision for streamlining trials by allowing for the introduction of a certified laboratory report at the time of trial as evidence of the chemical nature of a suspected controlled substance. A defendant who has been properly notified that this procedure will be followed may for good cause object to such a procedure and require the presence of the chemist who performed the analysis of the drug. This procedure will allow the chemist to remain in his laboratory performing analysis rather than repeating in a court what he has already stated in his report.

MAJOR FEATURES OF PROPOSED DRUG LEGISLATION

I. EXPRESSION OF LEGISLATIVE INTENT - PURPOSE OF BILL

- A. CONSOLIDATE AND MODERNIZE ALASKA'S DRUG LAWS ELIMINATING INCONSISTENCIES AND LOOPHOLES
- B. PROVIDE FOR UNIFORM PENALTY PROVISIONS ON THE BASIS OF THE SERIOUSNESS OF SUBSTANCES IN TERMS OF PUBLIC HEALTH AND SAFETY

II. TITLE 17: CONTROLLED SUBSTANCES ACT

- A. CRITERIA FOR CLASSIFICATION OF DRUGS SPECIFICALLY SET OUT
- B. CONTROLLED SUBSTANCES COMMITTEE
- C. SIX SCHEDULES FOR ALL DRUGS CLASSIFIED ON BASIS OF A DRUG'S DANGER UNDER THE CRITERIA SPECIFIED IN THE BILL
- D LEGITIMATE HANDLER'S REQUIREMENTS
- E. ADMINISTRATIVE AND ENFORCEMENT PROVISIONS
  1. COOPERATIVE LAW ENFORCEMENT AGREEMENTS
  2. COMPREHENSIVE FORFEITURE PROVISIONS
  3. EDUCATIONAL AND RESEARCH PROGRAMS

III. TITLE 11: SPECIFIC CRIMINAL OFFENSES - REORGANIZES ALL OFFENSES INTO A SINGLE CHAPTER IN THE CRIMINAL CODE

- A. BROKEN DOWN INTO SIX DEGREES OF THE CRIME "PROMOTI'G A CONTROLLED SUBSTANCE."
- B. KEYED INTO THE CLASSIFICATION PROVISIONS OF THE REVISED CRIMINAL CODE
- C. KEYED INTO THE PRESUMPTIVE SENTENCING PROVISIONS OF THE REVISED CRIMINAL CODE

IV. AMENDMENT TO BAIL STATUTE DENYING BAIL AFTER CONVICTION FOR SERIOUS DRUG OFFENSES

SCHEDULING EXAMPLES

SCHEDULE I - HEROIN, OPIUM, OPIATES, METHADONE

SCHEDULE II - COCAINE, LSD, MESCALINE, PCP, AMPHETAMINES AND THE MORE SERIOUS DEPRESSANTS SUCH AS METHAQUALONE

SCHEDULE III - MODERATELY SERIOUS STIMULANTS AND DEPRESSANTS, BARBITURATES, HASHISH AND HASHISH OIL

SCHEDULE IV - LESS SERIOUS STIMULANTS AND PRESCRIPTION DEPRESSANTS (e.g. VALIUM)

SCHEDULE V - SMALL AMOUNT OF CODEINE AND OPIUM IN MIXTURES HAVING MEDICINAL QUALITIES

SCHEDULE VI - MARIJUANA AND INTOXICATING LIQUOR

CHARTS

EXAMPLES OF CRIMES INCLUDED IN DRUG OFFENSES	SALE OF HEROIN TO A MINOR DRUG OFFENSES COMMITTED AS PART OF A CONTINUING CRIMINAL ENTERPRISE	SALE OF HEROIN SALE OF COCAINE OR HASHISH TO A MINOR	SALE OF COCAINE SALE OF MARIJUANA TO A MINOR	SALE OF MARIJUANA POSSESSION OF HEROIN, COCAINE, LSD, ETC.	POSSESSION OF HASHISH FURNISHING LIQUOR TO A MINOR	POSSESSION OF MARIJUANA IN PUBLIC POSSESSION OF MARIJUANA OR INTOXICATING LIQUOR BY PERSON UNDER 19	
COMPARISON WITH OTHER OFFENSES IN SAME CLASSIFICATION	MURDER IN THE FIRST DEGREE MURDER IN THE SECOND DEGREE KIDNAPPING	MANSLAUGHTER RAPE ARMED ROBBERY	THEFT IN THE FIRST DEGREE ($25,000+) EXTORTION BURGLARY OF A DWELLING PERJURY	THEFT IN THE SECOND DEGREE ($500-25,000) BURGLARY OF A BUILDING RIOT	THEFT IN THE THIRD DEGREE ($50-$500) ASSAULT AND BATTERY CRIMINAL NON-SUPPORT RESISTING ARREST	THEFT IN THE FOURTH DEGREE ($50 or LESS) CARRYING A CONCEALED WEAPON DISORDERLY CONDUCT PROSTITUTION	LITTERING GAMBLING (1st OFFENSE) SELLING OR GIVING TOBACCO TO A MINOR

PRESUMPTIVE SENTENCING PROVISIONS

OF REVISED CRIMINAL CODE

CLASS A FELONY - 0-20 YEARS/$50,000
10 YEAR PRESUMPTIVE FOR SECOND FELONY CONVICTION
15 YEAR PRESUMPTIVE FOR THIRD FELONY CONVICTION

CLASS B FELONY - 0-10 YEARS/$50,000
4 YEAR PRESUMPTIVE FOR SECOND FELONY CONVICTION
6 YEAR PRESUMPTIVE FOR THIRD FELONY CONVICTION

CLASS C FELONY - 0-5 YEARS/$50,000
2 YEAR PRESUMPTIVE FOR SECOND FELONY CONVICTION
3 YEAR PRESUMPTIVE FOR THIRD FELONY CONVICTION

CLASS A MISDEMEANOR - 0-1 YEAR/$5,000

CLASS B MISDEMEANOR - 0-90 DAYS/$1,000

VIOLATION - FINE UP TO $300

TERMS OF IMPRISONMENT AND AUTHORIZED FINES IN REVISED CRIMINAL CODE

	FIRST FELONY CONVICTION	SECOND FELONY CONVICTION	THIRD FELONY CONVICTION
"A" Felony	0-20 3-[6]*-20	5-[10]-20	7 1/2-[15]-20
"B" Felony	0-10	0-[4]-10	3-[6]-10
"C" Felony	0-5	0-[2]-5	0-[3]-5

MAXIMUM FINES - PERSONS

Murder or kidnapping	- $75,000
A, B, or C Felony	- $50,000
A misdemeanor	- $ 5,000
B misdemeanor	- $ 1,000
Violation	- $ 300

MAXIMUM FINES - ORGANIZATIONS

All offenses - $100,000 or
3 X pecuniary gain
- whichever is greater

KEY

Number in bracket is presumptive sentence. Number to left is lowest mitigated sentence. Number to right is highest aggravated sentence.

* Six year presumptive term applies if first A felony conviction, other than manslaughter, and defendant used or possessed a firearm during the offense or caused serious physical injury.

MAXIMUM TERMS OF IMPRISONMENT FOR MISDEMEANORS

A misdemeanor - 1 year

B misdemeanor - 90 days

2-1

IV. PENALTIES: POSSESSION OF CONTROLLED SUBSTANCES

	HB 628 (1980)	SB 65 (1979) HB 101(1979)	HB 479 (1979)	FEDERAL CONTROLLED SUBSTANCES ACT	EXISTING LAW
HEROIN	C Felony 0-5/$50,000 2 yr. presumptive if second felony conviction 3 yr. presumptive if third felony conviction Unless Possession involves any amount by someone 18 yrs of age within school grounds which raises the offense to a B felony	Felony-0-5/$5,000	A Felony 0-20/$50,000 if 100 or more capsules, tablets, ampules, syrettes, or one oz. or more B Felony 0-10/$50,000 if 50 to 100 capsules, etc. or 1/4 to one oz. C Felony 0-5/$50,000 if 25 to 50 capsules, etc. or 1/8 to 1/4 oz. A Misdemeanor 0-1/$5,000 if 0 to 25 capsules etc. or 0 to 1/8 oz. Presumptive sentencing on second or third felony	0-1/$5,000-First Offense 0-2/$10,000-Second Offense	2-10/$5,000 - First Offense 10-20/$7,500 - Second Offense 20-40/$10,000 - Third Offense
COCAINE & LSD	Same penalties as provided for possession of heroin including provision pertaining to possession within school grounds	Cocaine: Felony: 0-5/$5,000 LSD: Misdemeanor - 0-1/$5,000	A Felony 0-20/$50,000 if 200 or more capsules, tablets, ampules, syrettes or 2 oz. or more B Felony: 0-10/$50,000 if 100 to 200 capsules, etc. or 1/2 oz. to 2 oz. C Felony: 0-5/$50,000 if 50 to 100 capsules, etc. or 1/4 oz. to 1/2 oz. A Misdemeanor: 0-1/$5,000 is lesser than above Presumptive sentencing on 2nd or 3rd felony.	Cocaine: 0-1/$5,000 - First Offense 0-2/410,000 - Second Offense	Cocaine: Same penalty as provided for possession of heroin LSD: Misdemeanor - 0-1/$1,000
MARIJUANA	Possession of one lb. or more of marijuana is classified as a class C felony punishable the same as possession of heroin & cocaine. Possession of any amount of marijuana by someone 18 yrs of age within school grounds is also classified as class C felony. Possession in public, or while operating a propelled vehicle or possession by minor: class B misdemeanor 0-90 days/$1,000	Does not change existing law	C Felony 0-3/$10,000 if 2.2 lb or more Not subject to presumptive sentencing A Misdemeanor if 1/2 lb to 2.2 lb - 0-90 days/$1,000 B Misdemeanor if any amount while operating motor vehicle Violation ($300) if possession of any amount in public	0-1/$5,000 - First Offense	(A) Misdemeanor with $1,000 fine being the maximum penalty: (1) Use of marijuana in public place; (2) Possession of one ounce or more in public places; (3) Possession while operating a motor vehicle or airplane; (4) Possession while under 18 yrs of age (B) Possession for own use in other than public place or possession of one oz. or less in public place - maximum civil fine of $100

BILL

Introduced: 1/28/80
Referred: Health,Education &
Social Services and Judiciary

IN THE HOUSE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

HOUSE BILL NO. 628

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act consolidating and revising the laws relating to drug abuse and prohibitions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. DECLARATION OF LEGISLATIVE PURPOSE. (a) The purposes of this Act are to consolidate and revise Alaska's drug laws patterned after the Uniform Controlled Substances Act and the Federal Controlled Substances Act of 1970 and to enact uniform penalty provisions in conformity with the 1978 revision of Alaska's criminal code in order to more effectively combat illicit trafficking in controlled substances.

(b) Two distinct, but interrelated, concerns are addressed in this Act. The first concern is the detrimental effect on public safety created through illicit trafficking in and use of drugs. A second, but equally important, concern is the effect on public health created by the use and abuse of drugs. It is the intent of the legislature that, in addressing public safety concerns, uniform classification and penalty provisions be enacted which adopt an approach reflecting law enforcement problems unique to Alaska. It is also the intent of the legislature that in addressing public health concerns, a statutory scheme be enacted which is patterned after federal law and that the legitimate manufacture, distribution, prescription, and dispensing of controlled substances be subject to a regulatory scheme regarding registration, record keeping, order forms, and prescription requirements that is identical to that provided for under federal law.

* Sec. 2. AS 11 is amended by adding a new chapter to read:

CHAPTER 71. OFFENSES RELATING TO CONTROLLED SUBSTANCES.

Sec. 11.71.010. PROMOTING A CONTROLLED SUBSTANCE IN THE FIRST DEGREE. (a) Except as authorized in AS 17.30, a person commits the crime of promoting a controlled substance in the first degree if he

(1) delivers a schedule I controlled substance to a person under 18 years of age who is at least three years younger than he; or

(2) engages in a continuing criminal enterprise.

(b) For purposes of this section, a person is engaged in a "continuing criminal enterprise" if

(1) he commits a violation of this chapter which is punishable as a felony; and

(2) that violation is a part of a continuing series of violations of this chapter

(A) which he undertakes in concert with five or more other persons with respect to whom he occupies a position of organizer, supervisor, or any other position of management; and

(B) from which he obtains substantial income or resources.

(c) Promoting a controlled substance in the first degree is an unclassified felony and is punishable as provided in AS 12.55.

Sec. 11.71.020. PROMOTING A CONTROLLED SUBSTANCE IN THE SECOND DEGREE. (a) Except as authorized in AS 17.30, a person commits the crime of promoting a controlled substance in the second degree if he

(1) manufactures or delivers a schedule I controlled substance or possesses a schedule I controlled substance with intent to manufacture or deliver; or

(2) delivers a schedule II or III controlled substance to a person under 18 years of age who is at least three years younger than he.

(b) Promoting a controlled substance in the second degree is a class A felony.

Sec. 11.71.030. PROMOTING A CONTROLLED SUBSTANCE IN THE THIRD DEGREE. (a) Except as authorized in AS 17.30, a person commits the crime of promoting a controlled substance in the third degree if he

(1) manufactures or delivers a schedule II or III controlled substance or possesses a schedule II or III controlled substance with intent to manufacture or deliver;

(2) delivers a schedule IV or V controlled substance or marijuana to a person under 18 years of age who is at least three years younger than he; or

(3) being 18 years of age or older, knowingly possesses a schedule I or II controlled substance within the grounds of a public or private elementary, junior high, or secondary school.

(b) It is an affirmative defense to a prosecution under (a)(3) of this section that at the time of the possession the school was closed to any organized activity involving persons under 18 years of age. Nothing in this subsection precludes a prosecution under AS 11.71.040(a)(2).

(c) Promoting a controlled substance in the third degree is a class B felony.

Sec. 11.71.040. PROMOTING A CONTROLLED SUBSTANCE IN THE FOURTH DEGREE. (a) Except as authorized in AS 17.30, a person commits the crime of promoting a controlled substance in the fourth degree if he

(1) manufactures or delivers a schedule IV or V controlled substance or marijuana or possesses a schedule IV or V controlled substance or marijuana with intent to manufacture or deliver;

(2) knowingly possesses a schedule I or II controlled substance;

(3) being 18 years of age or older, knowingly possesses a schedule III, IV or V controlled substance or marijuana within the grounds of a public or private elementary, junior high, or secondary school;

(4) knowingly possesses one pound or more of marijuana under any circumstances;

(5) sells or offers for sale an intoxicating liquor in an area where a local option election has made these activities illegal, and

(A) has previously been convicted under AS 11.71.-050(a)(3);

(B) has engaged in conduct demonstrating an intent to sell or offer for sale intoxicating liquor to more than one person; or

(C) the sale or offer for sale was made to a person under 19 years of age or to an intoxicated person;

(6) knowingly keeps or maintains any store, shop, warehouse, dwelling, building, vehicle, boat, aircraft, or other structure or place which is used for keeping or selling controlled substances in violation of this chapter or AS 17.30;

(7) makes, delivers, or possesses any punch, die, plate, stone, or other thing designed to print, imprint, or reproduce the trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of the foregoing upon any drug, drug container, or labeling so as to render the drug a counterfeit substance; or

(8) obtains possession of a controlled substance by deception

(b) It is an affirmative defense to a prosecution under (a)(3) of this section that at the time of the possession the school was closed

to any organized activity involving persons under 18 years of age. Nothing in this subsection precludes a prosecution under (a)(4) of this section or under AS 11.71.050(a)(1) or AS 11.71.060(a)(1) or (3).

(c) Promoting a controlled substance in the fourth degree is a class C felony.

Sec. 11.71.050. PROMOTING A CONTROLLED SUBSTANCE IN THE FIFTH DEGREE. (a) Except as authorized in AS 17.30, a person commits the crime of promoting a controlled substance in the fifth degree if he

(1) knowingly possesses a schedule III, IV, or V controlled substance under any circumstances except as otherwise provided in this chapter;

(2) delivers an intoxicating liquor to a person under 19 years of age who is at least three years younger than he;

(3) sells or offers to sell an intoxicating liquor in an area where a local option election has made these activities illegal;

(4) uses in the course of the manufacture or distribution of a controlled substance a registration number which is fictitious, revoked, suspended, or issued to another person; or

(5) furnishes false or fraudulent information in or omits material information from any application, report, record, or other document required to be kept or filed under AS 17.30.

(b) It is a defense to a prosecution under (a)(2) of this section that the defendant was the parent or guardian of the person under 19 years of age.

(c) Promoting a controlled substance in the fifth degree is a class A misdemeanor.

Sec. 11.71.060. PROMOTING A CONTROLLED SUBSTANCE IN THE SIXTH DEGREE. (a) Except as authorized in AS 17.30, a person commits the crime of promoting a controlled substance in the sixth degree if he

(1) uses, displays, or possesses marijuana on a public street or sidewalk or on the premises of a public carrier or business establishment or in any other public place;

(2) knowingly possesses marijuana within his immediate control while operating a propelled vehicle;

(3) being under 19 years of age, knowingly possesses marijuana or an intoxicating liquor;

(4) fails to make, keep, or furnish any record, notification, order form, statement, invoice, or information required under AS 17.30; or

(5) refuses entry into any premises for an inspection authorized under AS 17.30.

(b) Promoting a controlled substance in the sixth degree is a class B misdemeanor.

Sec. 11.71.080. PENALTIES UNDER OTHER LAWS. A penalty imposed for violation of this chapter is in addition to, and not in place of, any other civil or administrative penalty or sanction otherwise authorized by law.

Sec. 11.71.090. BAR TO PROSECUTION. If a violation of this chapter is a violation of a federal law or the law of another state, a conviction or acquittal under federal law or the law of another state for the same act is a bar to prosecution in this state.

Sec. 11.71.100. DEFENSE EXEMPTED. In a prosecution for the knowing possession of a controlled substance under this chapter, it is not a defense that the substance was possessed in less than a usable quantity. It is sufficient to support a conviction that there is a sufficient quantity of the substance to permit proper identification and the proof of a knowing possession.

Sec. 11.71.110. LIABILITY OF PUBLIC SERVANTS. No liability is

imposed by this chapter upon a public servant acting within the scope and authority of his employment.

Sec. 11.71.900. DEFINITIONS. As used in this chapter

(1) "controlled substance" means a drug, substance, or immediate precursor included in the schedules in AS 17.30.040 -- 17.30.090;

(2) "counterfeit substance" means a controlled substance or the container or labeling of a controlled substance which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, number, or device of a manufacturer, distributor, or dispenser other than the person or persons who in fact manufactured, distributed, or dispensed the substance and which falsely purports or is represented to be the product of, or to have been distributed by, the other manufacturer, distributor, or dispenser;

(3) "cocaine" has the meaning ascribed to it in AS 17.30.-050(c);

(4) "deliver" or "delivery" means the actual, constructive, or attempted transfer from one person to another of a controlled substance whether or not there is an agency relationship;

(5) "drug" has the meaning ascribed to it in AS 17.30.-500(10);

(6) "hashish" means the dried, compressed, resinous product of the plant (genus) Cannabis;

(7) "hashish oil" means the viscous liquid concentrate of tetrahydrocannabinols extracted from the plant (genus) Cannabis;

(8) "immediate precursor" means a substance which is by statute or regulation designated as the principal compound commonly used or produced primarily for use, and which is an immediate chemical intermediary used or likely to be used in the manufacture of a con-

trolled substance, the control of which is necessary to prevent, curtail, or limit manufacture;

(9) "intoxicating liquor" includes whiskey, brandy, rum, gin, wine, ale, porter, beer, and all other spirituous, vinous, malt, and other fermented or distilled liquors intended for human consumption and containing more than one per cent alcohol by volume;

(10) "manufacture" has the meaning ascribed to it in AS 17.30.500(16);

(11) "marijuana" means the leaves, stems, flowers, and seeds of the plant (genus) Cannabis, whether growing or not; it does not include the resin or oil extracted from any part of the plant, or any compound, manufacture, salt, derivative, mixture, or preparation from the resin or oil, including hashish, hashish oil, and natural or synthetic tetrahydrocannabinol; it does not include the mature stalks of the plant, fiber produced from the stalks, oil or cake made from the seeds of the plant, any other compound, manufacture salt, derivative, mixture, or preparation of the mature stalks, fiber, oil or cake, or the sterilized seed of the plant which is incapable of germination;

(12) "schedule I controlled substance" means a controlled substance included in the schedule in AS 17.30.040;

(13) "schedule II controlled substance" means a controlled substance included in the schedule in AS 17.30.050;

(14) "schedule III controlled substance" means a controlled substance included in the schedule in AS 17.30.060;

(15) "schedule IV controlled substance" means a controlled substance included in the schedule in AS 17.30.070;

(16) "schedule V controlled substance" means a controlled substance included in the schedule in AS 17.30.080.

* Sec. 3. AS 12.30.040(b) is amended to read:

(b) Notwithstanding the provisions of (a) of this section, if the offense a person has been convicted of is murder in the first degree (as defined in AS 11.41.100), kidnapping (as defined in AS 11.41.300), sexual assault in the first degree (as defined in AS 11.41.410(a)(1) and (2)), robbery in the first degree (as defined in AS 11.41.500), or promoting a controlled substance in the first degree (as defined in AS 11.71.010), or an offense that involves the manufacture, delivery, or possession with intent to manufacture or deliver a schedule I or II controlled substance in violation of AS 11.71.020 or 11.71.030 under circumstances manifesting an intent to distribute the substance as part of a commercial enterprise [FIRST DEGREE MURDER, ARMED ROBBERY, KIDNAPPING, OR RAPE (AS DEFINED IN AS 11.15.130)], he may not be released on bail either before sentencing or pending appeal.

* Sec. 4. AS 12.45 is amended by adding a new section to read:

Sec. 12.45.155. LABORATORY REPORT OF CONTROLLED SUBSTANCE. (a) In a prosecution under AS 11.71.010 -- 11.71.060, a complete copy of an official laboratory report from the Department of Public Safety or a laboratory operated by another law enforcement agency is prima facie evidence of the content, identity, and weight of the substance. The report must be signed by the person performing the analysis and must state that the substance which is the basis of the alleged offense has been weighed and analyzed. It must also state with specificity findings as to the content, weight, and identity of the substance.

(b) A notarized statement executed by the signer of the report provided for in (a) of this section must be attached to the report. The statement must set out the identity of the signer and include a statement that he is an employee of the laboratory issuing the report and that performing the analysis is a part of his regular duties. The

statement must also include an outline of his education, training, and experience for performing an analysis. The signer shall attest that scientifically accepted tests were performed with due caution, and that the evidence was handled in accordance with established and accepted procedures while in the custody of the laboratory.

(c) The prosecuting attorney shall serve a copy of the report on the attorney of record for the accused, or on the defendant if he has no attorney, no later than 10 days before a proceeding in which the report is to be used against the accused. However, at a preliminary hearing or grand jury proceeding the report may be used without having been previously served upon the accused.

(d) The accused or his attorney may demand the testimony of the person signing the report, by serving a written demand showing cause, upon the prosecuting attorney within seven days from receipt of the report.

(e) Any report issued for use under this section must contain notice of the right of the accused to demand the testimony of the person signing the report.

* Sec. 5. AS 12.55.035(b)(1) is amended to read:

(1) $75,000 for murder in the first or second degree, [OR] kidnapping, or promoting a controlled substance in the first degree;

* Sec. 6. AS 12.55.125(b) is amended to read:

(b) A defendant convicted of murder in the second degree, [OR] kidnapping, or promoting a controlled substance in the first degree shall be sentenced to a definite term of imprisonment of at least five years but not more than 99 years.

* Sec. 7. AS 12.55.155(c) is amended by adding new paragraphs to read:

(15) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the delivery of a controlled substance

under circumstances manifesting an intent to distribute the substance as part of a commercial enterprise;

(16) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the smuggling of controlled substances into the state;

(17) the defendant is convicted of an offense specified in AS 11.71 and the offense involved large quantities of a controlled substance;

(18) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the distribution of a controlled substance that had been adulterated with a toxic substance.

* Sec. 8. AS 12.55.155(d) is amended by adding new paragraphs to read:

(13) the defendant is convicted of an offense specified in AS 11.71 and the offense involved small quantities of a controlled substance;

(14) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the distribution of a controlled substance, other than a schedule I controlled substance, to a personal acquaintance who is 19 years of age or older for no profit;

(15) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the possession of a small amount of a controlled substance for personal use in the defendant's home.

* Sec. 9. AS 17 is amended by adding a new chapter to read:

CHAPTER 30. CONTROLLED SUBSTANCES ACT.

ARTICLE 1. STANDARDS AND SCHEDULES.

Sec. 17.30.010. AUTHORITY TO SCHEDULE CONTROLLED SUBSTANCES. Intro C.P. Bill

(a) The commissioner shall administer this Act and may by regulation adopted under the Administrative Procedure Act (AS 44.62) add substances to the schedules in AS 17.30.040 -- 17.30.090. Each addition may not rescind delete or

shall be in accordance with the advice and determination of the Controlled Substances Advisory Committee established in AS 17.30.020. In making a determination regarding the addition of a substance, the committee shall assess the danger or probable danger of the substance by considering the following:

(1) the actual or probable abuse of the substance including:

(A) its history and current pattern of abuse;

(B) the scope, duration, and significance of abuse;

(C) the degree of actual or probable detriment which may result from abuse of the substance;

(D) the probable physical and social impact of widespread abuse of the substance;

(2) the biomedical hazard of the substance including:

(A) its pharmacology: the effects and modifiers of effects of the substance;

(B) its toxicology: the acute and chronic toxicity, interaction with other substances, whether controlled or not, and liability to psychological or physiological dependence;

(C) its risk to public health and the particular susceptibility of segments of the population;

(3) whether the substance is an immediate precursor of a substance already controlled under this chapter;

(4) the current state of scientific knowledge regarding the substance;

(5) the relationship between the use of the substance and other criminal activity including:

(A) whether persons engaged in illicit trafficking of the substance are also engaged in other criminal activity;

(B) whether the nature and relative profitability of

the substance encourages illicit trafficking in the substance;

(C) whether the commission of other crimes is one of the effects of the use of the substance;

(D) whether addiction to the substance relates to the commission of crimes to support the continued use of the substance.

(b) If, after considering the factors enumerated in (a) of this section, the committee finds that a substance should be added, the commissioner shall adopt a regulation in accordance with the committee's findings.

(c) The committee shall advise the governor of the legislature as to the need to delete or reschedule substances in the schedules in AS 17.30.040 -- 17.30.090. In making recommendations regarding a substance, the committee shall assess the danger or probable danger of the substance by considering the factors enumerated in (a) of this section.

(d) If the committee designates a substance as an immediate precursor of a controlled substance, substances which are precursors of the controlled precursor are not subject to control solely because they are precursors of the controlled precursor.

(e) By the 30th day of each legislative session, the commissioner shall prepare and present to the governor and the legislature a report discussing the actions of the committee during the preceding year. If the commissioner has adopted a regulation adding a controlled substance, the report shall include the committee's findings of fact and other supporting information it considers appropriate.

Sec. 17.30.020. CONTROLLED SUBSTANCES ADVISORY COMMITTEE. (a) There is created within the department the Controlled Substances Advisory Committee, consisting of

(1) the director of the division of public health;

(2) the director of the office of drug abuse;

(3) the commissioner of public safety or his designee;

(4) the attorney general or his designee;

(5) a psychiatrist appointed by the governor;

(6) a physician appointed by the governor;

(7) a pharmacist appointed by the governor;

(8) a peace officer appointed by the governor after consultation with the Alaska Association of Chiefs of Police; and

(9) a public member appointed by the governor.

(b) Members of the committee specified in paragraphs (a)(5)-(9) of this section serve terms of four years; except that of the members first appointed, two shall be appointed for terms of two years, two for terms of three years, and one for a term of four years. Committee members are not entitled to receive a salary but are entitled to per diem and travel expenses authorized by law for boards and commissions.

(c) The committee shall meet at the call of the commissioner, but in no event less than twice a year. Five members constitute a quorum. The committee may adopt bylaws for its proceedings. Before making a determination regarding the addition of a substance under AS 17.30.010, the committee, together with the commissioner, shall hold public hearings as provided for under AS 44.62.210.

(d) If a substance is added as a controlled substance under federal law and notice of the designation is given to the department, or the addition of a substance has been published in the Code of Federal Regulations, the committee shall, within 60 days, meet and consider making a corresponding addition in the schedules specified in AS 17.30.040 -- 17.30.090. If the committee decides not to include the change, it shall publish the reasons for that decision and afford all interested parties an opportunity to be heard. Following the

hearing, the committee shall announce its final decision.

Sec. 17.30.030. NOMENCLATURE. The controlled substances listed in the schedules in AS 17.30.040 -- 17.30.090 are included by whatever official, common, chemical, or brand name is designated.

Sec. 17.30.040. SCHEDULE I. (a) A substance shall be placed in schedule I if it is found under AS 17.30.010(a) to have the highest degree of danger or probable danger.

(b) Schedule I includes, unless specifically excepted or listed in another schedule, any of the following substances whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(1) opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

(A) raw opium;

(B) opium extracts;

(C) opium fluid extracts;

(D) powdered opium;

(E) granulated opium;

(F) tincture of opium;

(G) codeine;

(H) ethylmorphine;

(I) etorphine hydrochloride;

(J) hydrocodone;

(K) hydromorphone;

(L) metopon;

(M) morphine;

(N) oxycodone;

(O) oxymorphine;

(P) thebaine;

(2) any salt, compound, derivative, or preparation of a subincluded in (b)(1) of this section which is chemically equivalent or identical to any of the substances referred to in (b)(1) of this section, except that these substances do not include the isoquinoline alkaloids of opium;

( ) opium poppy and poppy straw;

( ) ncentrate of poppy straw which is the crude extract of poppy str n either liquid, solid, or powder form which contains the phennanth ne alkaloids of the opium poppy.

(c) Schedule I includes, unless specifically excepted or unless listed in another schedule, any of the following opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers, whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation, dextrorphan excepted:

(1) acetylmethadol;

(2) allylprodine;

( ) alphacetylmethadol;

(4) alphameprodine;

(5) alphamethadol;

(6) alphaprodine;

(7) anileridine;

(8) benzethidine;

(9) betacetylmethadol;

(10) betameprodine;

(11) betamethadol;

(12) betaprodine;

(13) bezitramide;

(14) clonitazene;

(15) dextromoramide;

(16) diampromide;

(17) diethylthiambutene;

(18) difenoxin;

(19) dihydrocodeine;

(20) dimenoxadol;

(21) dimepheptanol;

(22) dimethylthiambutene;

(23) dioxaphetyl butyrate;

(24) diphenoxylate;

(25) dipipanone;

(26) ethylmethylthiambutene;

(27) etonitazene;

(28) etoxeridine;

(29) fentanyl;

(30) furethidine;

(31) hydroxpethidine;

(32) isomethadone;

(33) ketobemidone;

(34) levomethorphan;

(35) levomoramide;

(36) levorphanol;

(37) levophenacylmorphan;

(38) metazocine;

(39) methadone;

(40) methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-

diphenyl butane;

(41) moramide-intermediate, 2-methyl-3-morpholinol, 1-diphenylpropane-carboxylic acid;

(42) morpheridine;

(43) noracymethadol;

(44) norlevorphanol;

(45) normethadone;

(46) norpipanone;

(47) pethidine, also known as meperidine;

(48) pethidine-intermediate-A, 4-cyano-1-methyl-4-phenyl-piperidine;

(49) pethidine-intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate;

(50) pethidine-intermediate-C, 1-methyl-4-phenyl-piperidine-4-carboxylic acid;

(51) phenadoxone;

(52) phenampromide;

(53) phenazocine;

(54) phenomorphan;

(55) phenoperidine;

(56) piminodine;

(57) piritramide;

(58) proheptazine;

(59) properidine;

(60) propiram;

(61) racemethorphan;

(62) racemoramide;

(63) racemorphan;

(64) trimeperidine.

(d) Schedule I includes, unless specifically excepted or unless listed in another schedule, any of the following opium derivatives, their salts, isomers, and salts of isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) acetorphine;

(2) acetyldihydrocodeine;

(3) benzylmorphine;

(4) codeine methylbromide;

(5) codeine-n-oxide;

(6) cyprenorphine;

(7) desomorphine;

(8) dihydromorphine;

(9) drotebanol;

(10) etorphine, except hydrochloride salt;

(11) heroin;

(12) hydromorphinol;

(13) methyldesorphine;

(14) methyldihydromorphine;

(15) morphine methylbromide;

(16) morphine methylsulfonate;

(17) morphine-n-oxide;

(18) myrophine;

(19) nicocodeine;

(20) nicomorphine;

(21) normorphine;

(22) pholcodine;

(23) thebacon

Sec. 17.30.050. SCHEDULE II. (a) A substance shall be placed

in schedule II if it is found under AS 17.30.010(a) to have a degree of danger or probable danger less than substances listed in schedule I, but higher than substances listed in schedule III.

(b) Schedule II includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation, which contains any quantity of the following hallucinogenic substances, or which contains any of its salts, isomers, or salts of isomers whenever the existence of such salts, isomers, or salts of isomers is possible within the specific chemical designation:

(1) 4-bromo-2, 5-dimethoxy-amphetamine, also known as 4-bromo-2,5-dimethoxy-a-methylphenethylamine and 4-bromo-2, 5-DMA;

(2) 2,5-dimethoxyamphetamine, also known as 2,5-dimethoxy-a-methylphenethylamine and 2,5-DMA;

(3) 4-methoxyamphetamine, also known as 4-methoxy-a-methylphenethylamine and paramethoxyamphetamine, PMA;

(4) 5-methoxy-3,4-methylenedioxy-amphetamine;

(5) 4-methyl-2,5-dimethoxy-amphetamine, also known as 4-methyl-2,5 - dimethoxy-a - methylphenethylamine, "DOM" and "STP";

(6) 3,4-methylenedioxy amphetamine;

(7) 3,4,5-trimethoxy amphetamine;

(8) bufotenine, also known as 3-(B-dimethylaminoethyl)-5-hydroxyindole, 3-(2-dimethylaminoethyl)-5-indolol, N, N-dime -thylserotoain, 5-hydroxy-N, N-dimethyltryptamin , and mappine;

(9) diethyltryptamine, also known as N,N-diethyltryptamine and DET;

(10) dimethyltryptamine, also known as DMT;

(11) ibogaine, also known as 7-ethyl-6, 6B, 7,8,9,10,12, 13-octahydro-2-methoxy-6, 9-methano-5H-pyrido [1',2': 1,2] azepino

[5,4-b] indole and tabernanthe iboga;

(12) lysergic acid diethylamide;

(13) mescaline;

(14) peyote, meaning all parts of the plant presently classified botanically as lophophora williamsii lemaire, whether growing or not, the seeds of the plant, any extract from any part of the plant, and every compound, manufacture, salts, derivative, mixture, or preparation of the plant, its seeds, or extracts;

(15) n-ethyl-3-piperdyl benzilate;

(16) n-methyl-3-piperdyl benzilate;

(17) psilocybin;

(18) psilocyn;

(19) ethylamine analog of phencyclidine, also known by some trade or other names as follows: N-ethyl-1-phenylcyclohexylamine (1-phenylcyclohexy) ethylamine, N-(1-phenylcyclohexy) ethylamine, cyclohexamine, PCE;

(20) pyrrolidine analog of phencyclidine, also known by some trade or other names as follows: 1-(1-phenylcyclohexyl)-pyrrolidine PCPy, PHP;

(21) thiophene analog of phencyclidine, also known as 1-[1-(2-thienyl) cyclohexl] piperidine and 2-thienyl analog of phencyclindine and TPCP.

(c) For purposes of (b) of this section only, the term "isomer" includes the optical, position and geometric isomers.

(d) Schedule II includes cocaine and any compound, derivative, or preparation of coca leaves produced directly or indirectly by extraction from coca leaves, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis, including the isomers, salts, and salts of isomers of cocaine and

other derivatives of coca leaves whenever the existance of such isomers and salts is possible, but does not include decocainized coca leaves or extractions of coca leaves which do not contain cocaine or ecgonine.

(e) Schedule II includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system, including their salts, isomers, and salts of isomers whenever the existence of these salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) amobarbital;

(2) mecloqualone;

(3) methaqualone;

(4) pentobarbital;

(5) phencyclidine, also known as PCP;

(6) phencyclidine immediate precursors

(A) 1-phenylcyclohexylamine;

(B) 1-piperidinocyclohexanecarbonitrile, also known as PCC;

(7) secobarbital.

(f) Schedule II includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system:

(1) amphetamine, its salts, optical isomers, and salts of its optical isomers;

(2) methamphetamine, its salts, isomers, and salts of its isomers;

(3) phenmetrazine and its salts;

(4) methylphenidate.

Sec. 17.30.060. SCHEDULE III. (a) A substance shall be placed in schedule III if it is found under AS 17.30.010(a) to have a degree of danger or probable danger less than the substances listed in schedule II but higher than substances listed in schedule IV.

(b) Schedule III includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including their salts, isomers whether optical, position, or geometric, and salts of these isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) benzphetamine;

(2) chlorphentermine;

(3) clortermine;

(4) mazindol;

(5) phendimetrazine.

(c) Schedule III includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system:

(1) any compound, mixture, or preparation containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances combined with one or more other active medicinal ingredients which are not listed in AS 17.30.040 -- 17.30.090;

(2) any suppository dosage form containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances approved by the federal Food and Drug Administration for marketing

only as a suppository;

(3) any substance which contains any quantity of a derivative of barbituric acid or any salt of these substances;

(4) chlorhexadol;

(5) glutethimide;

(6) lysergic acid;

(7) lysergic acid amide;

(8) methyprylon;

(9) sulfondiethylmethane;

(10) sulfonethylmethane;

(11) sulfonmethane.

(d) Schedule III includes nalorphine.

(e) Schedule III includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, or any of its salts:

(1) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium;

(2) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(3) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium;

(4) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(5) not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(6) not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(7) not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(8) not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(f) Schedule III includes hashish, hashish oil, and tetrahydrocannabinols.

Sec. 17.30.070. SCHEDULE IV. (a) A substance shall be placed in schedule IV if it is found under AS 17.30.010(a) to have a degree of danger or probable danger less than the substances listed in schedule III, but higher than the substances listed in schedule V.

(b) Schedule IV includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances, including their salts, isomers and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) barbital;

(2) chloral betaine;

(3) chloral hydrate;

(4) chlordiazepoxide;

(5) clonazepam;

(6) clorazepate;

(7) diazepam;

(8) ethchlorvynol;

(9) ethinamate;

(10) flurazepam;

(11) lorazepan;

(12) mebutamate;

(13) meprobamate;

(14) methohexital;

(15) methylphenobarbital, also known as mephobarbital;

(16) oxazepam;

(17) paraldehyde;

(18) petrichloral;

(19) pentobarbital;

(20) prazepam.

(c) Schedule IV includes any material, compound, mixture, or preparation which contains any quantity of the following substances, including their salts, isomers whether optical, position, or geometric, and salts of these isomers, whenever the existence of these salts, isomers, and salts of isomers is possible: fenfluramine.

(d) Schedule IV includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system, including their salts, isomers whether optical, position, or geometric, and salts of these isomers whenever the existence of these salts, isomers,

and salts of isomers is possible within the specific chemical designation:

(1) diethlpropion;

(2) phentermine;

(3) pemoline, including organometallic complexes and chelates of this substance.

(e) Schedule IV includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture or preparation which contains any quantity of the following substances, including their salts:

(1) dextropropoxyphene (alpha-(+)-4-dimethylamino-1,2-diphenyl-3-methyl-2-propionoxybutane);

(2) phentazocine.

(f) Schedule IV includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing limited quantities of any of the following substances or any salts of these substances: not more than 1 milligram of difenoxin and not less than 25 micrograms of atropine sulfate per dosage unit.

Sec. 17.30.080. SCHEDULE V. (a) A substance shall be placed in schedule V if it is found under AS 17.30.010(a) to have a degree of danger or probable danger less than substances listed in schedule IV, but higher than substances listed in schedule VI.

(b) Schedule V includes any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs or their salts which includes one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by schedule I substances alone:

(1) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;

(2) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;

(3) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;

(4) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;

(5) not more than 100 milligrams of opium per 100 milliliters or per 100 grams;

(6) not more than 0.5 milligrams of difenoxin and not lesss than 25 micrograms of atropine sulfate per dosage unit.

(c) Schedule V includes loperamide.

Sec. 17.30.090. SCHEDULE VI. (a) A substance shall be placed in schedule VI if it is found under AS 17.30.010(a) to have the lowest degree of danger or probable danger.

(b) Schedule VI includes:

(1) marijuana;

(2) intoxicating liquors.

Sec. 17.30.095. EXEMPTED DRUGS. A controlled substance the manufacture, distribution, dispensing, or possession of which is explicitly exempt from criminal penalty under federal law is exempt from the application of this chapter and AS 11.71. This exemption includes any substances which may, under the federal Food, Drug, and Cosmetic Act (21 U.S.C. sec. 301 et seq.) be lawfully sold over the counter without a prescription.

ARTICLE 2. REGULATION OF MANUFACTURE, DISTRIBUTION, PRESCRIPTION, AND DISPENSING OF CONTROLLED SUBSTANCES.

Sec. 17.30.150. REGULATIONS. The commissioner shall adopt regu-

lations under the Administrative Procedure Act (AS 44.62) which are necessary for the administration of this chapter, and may charge reasonable fees relating to the registration and control of the manufacture, distribution, and dispensing of controlled substances within the state.

Sec. 17.30.160. REGISTRATION REQUIREMENTS. (a) A person who manufactures, distributes, dispenses, or conducts research with a controlled substance within the state or who proposes to engage in the manufacture, distribution, or dispensing of a controlled substance within the state, shall annually register with the commissioner in accordance with regulations adopted under AS 17.30.150.

(b) Persons registered under this chapter to manufacture, distribute, dispense, or conduct research with controlled substances may possess, manufacture, distribute, dispense, or conduct research with those substances to the extent authorized by their registration and in conformity with the other provisions of this chapter.

(c) The following persons need not register under this chapter:

(1) an agent or employee of a registered manufacturer, distributor, dispenser, or researcher of a controlled substance if the possession is incidental to the agent's or employee's acting in the usual course of his business or employment;

(2) a common or contract carrier or warehouseman, or his employee, whose possession of a controlled substance is in the usual course of his business or employment;

(3) a person in possession of a controlled substance under a lawful order of a registered practitioner or in lawful possession of a schedule V substance.

(d) The commissioner may, by regulation, waive the requirement for registration of certain manufacturers, distributors, or dispensers

if he finds it consistent with the public health and safety.

(e) A separate registration is required for each principal place of business or professional practice where the applicant manufactures, distributes, or dispenses controlled substances.

(f) The commissioner may inspect the establishment of a registrant or applicant for registration in accordance with regulations adopted by the commissioner.

Sec. 17.30.170. REGISTRATION. (a) The commissioner shall register an applicant to manufacture, distribute, or dispense controlled substances listed in the schedules in AS 17.30.040 -- 17.30.090 unless he finds that the registration would be inconsistent with the public interest. In determining the public interest, the commissioner shall consider the following factors:

(1) maintenance of effective controls against diversion of controlled substances into other than legitimate medical, scientific, or industrial channels;

(2) compliance with applicable state and local law;

(3) any conviction of the applicant under federal or state laws relating to controlled substances;

(4) past experience in the manufacture or distribution of controlled substances and the existence in the applicant's establishment of effective controls against diversion of controlled substances into other than legitimate medical, scientific, or industrial channels;

(5) furnishing by the applicant of false information in an application filed under this chapter;

(6) suspension or revocation of the applicant's federal registration to manufacture, distribute, or dispense controlled substances as authorized by federal law; and

(7) any other factors relevant to and consistent with the

public health and safety.

(b) Practitioners registered under federal law to conduct research with controlled substances shall be issued a registration to conduct research with these substances within the state upon furnishing the commissioner with evidence of the federal registration.

(c) Compliance by manufacturers and distributors with the provisions of federal law pertaining to registration requirements, excluding fees, entitles them to be registered under this chapter.

Sec. 17.30.180. REVOCATION AND SUSPENSION OF REGISTRATION. (a) A registration under AS 17.30.170 to manufacture, distribute, dispense, or conduct research with a controlled substance may be suspended or revoked by the commissioner upon a finding that the registrant:

(1) has furnished false or fraudulent material information in an application filed under this chapter;

(2) has been convicted of a felony under state or federal law relating to a controlled substance; or

(3) has had his federal registration to manufacture, distribute, dispense, or conduct research with controlled substances suspended or revoked.

(b) The commissioner may limit the revocation or suspension of a registration to the particular controlled substance with respect to which grounds for revocation or suspension exist.

(c) If the commissioner suspends or revokes a registration, all controlled substances owned or possessed by the registrant at the time of suspension or the effective date of the revocation order may be placed under seal and placed in the custody of the Department of Public Safety subject only to the orders and decrees of a court having jurisdiction over the property. No disposition may be made of substances under seal until the time for taking an appeal has elapsed or until

all appeals have been concluded unless a court, upon application, orders the sale of perishable substances and the deposit of the proceeds of the sale with the court. Upon a revocation order becoming final, all controlled substances are forfeited to the state.

(d) The commissioner shall promptly notify the Drug Enforcement Administration of all orders suspending or revoking registrations and of all forfeitures of controlled substances.

Sec. 17.30.190. ORDER TO SHOW CAUSE. (a) Before denying, suspending, or revoking a registration, or refusing a renewal of a registration, the commissioner shall serve upon the applicant or registrant an order to show cause why a registration should not be denied, revoked, or suspended, or why a renewal should not be refused. The order to show cause shall contain a statement of the basis for it and shall require the applicant or registrant to appear before the commissioner at a time and place not less than 30 days after the date of service of the order. In the case of a refusal of renewal of registration the show cause order must be served not later than 30 days before the expiration of the registration. These proceedings must be conducted in accordance with procedures for administrative adjudication under AS 44.62.330 -- 44.62.630 without regard to criminal prosecution or other proceeding. Proceedings to refuse renewal of registration do not abate the existing registration which remains in effect pending the outcome of the administrative hearing.

(b) The commissioner may, without an order to show cause, suspend a registration simultaneously with the institution of proceedings under AS 17.30.180 if he finds that there is an imminent danger to the public health or safety which warrants this action. The suspension continues in effect until the conclusion of the proceedings, including judicial review of the proceedings, unless sooner withdrawn by the com-

missioner or dissolved by a court of competent jurisdiction.

Sec. 17.30.200. RECORDS OF REGISTRANTS. Persons registered to manufacture, distribute, dispense, or conduct research with controlled substances under this chapter shall keep records and maintain inventories in conformance with the record-keeping and inventory requirements of federal law.

Sec. 17.30.210. ORDER FORMS: PRESCRIPTIONS. (a) Controlled substances may be distributed by one registrant to another registrant only if the distribution is in accordance with federal requirements for order forms.

(b) No controlled substance may be dispensed by a practitioner except in accordance with federal requirements regarding prescriptions for controlled substances.

(c) If a controlled substance is classified in a schedule set out in AS 17.30.040 -- 17.30.090, or through regulation adopted in accordance with this chapter, that is different from its corresponding classification under federal law, the requirements of (a) and (b) of this section are determined by the classification of the substance under federal law.

Sec. 17.30.220. EXCLUSION. For purposes of AS 17.30.150 -- 17.30.220, "controlled substance" does not include intoxicating liquors.

ARTICLE 3. ENFORCEMENT AND ADMINISTRATIVE PROVISIONS.

Sec. 17.30.300. COOPERATIVE ARRANGEMENTS. The commissioner of public safety shall cooperate with other state agencies and federal agencies in the discharge of their responsibilities pertaining to illicit traffic in controlled substances and in suppressing the abuse of controlled substances. Under this section, the commissioner of public safety's powers include but are not limited to the following:

(1) arranging for the exchange of information among govern-

mental officials concerning illicit traffic in and abuse of controlled substances;

(2) coordinating and cooperating in training programs pertaining to controlled substances at both local and state levels; and

(3) cooperating with the Drug Enforcement Administration of the United States Department of Justice through the establishment of a centralized unit to accept, catalogue, file, and collect statistics, including records of persons who have violated the provisions of this chapter or AS 11.71 within the state and make the information available for federal, state, and local law enforcement purposes; the commissioner may not furnish the name or identity of a patient or research subject whose identity could not be obtained under AS 17.30.350(b).

Sec. 17.30.310. FORFEITURES. (a) The following are subject to forfeiture to the state:

(1) any controlled substance which has been manufactured, distributed, dispensed, or possessed in violation of this chapter or AS 11.71;

(2) raw materials, products, and equipment which are used or intended for use in manufacturing, distributing, compounding, processing, delivering, importing, or exporting a controlled substance in violation of this chapter or AS 11.71;

(3) any property which is used or intended for use as a container for property described in (1) or (2) of this subsection;

(4) any conveyance, including but not limited to aircraft, vehicles or vessels which have been used to transport or in any manner to facilitate transportation for purpose of sale or receipt of property described in (1) or (2) of this subsection; however,

(A) no conveyance is subject to forfeiture under this section if the owner of the conveyance establishes, by a prepon-

derance of the evidence, at a hearing before the court as a trier of fact that its use in violation of this chapter or AS 11.71 was committed by another person and that the owner was not a consenting party nor privy to the violation and took all reasonable means to ensure that the conveyance would not be used, and that no person who operated it would use it in violation of this chapter or AS 11.71;

(B) a forfeiture of a conveyance encumbered by a bona fide security interest at the time of seizure is subject to the interest of the secured party if the secured party establishes, by a preponderance of the evidence, at a hearing before the court as a trier of fact that its use in violation of this chapter or AS 11.71 was committed by another person and that the secured party was not a consenting party nor privy to the violation and took all reasonable means to ensure that the conveyance would not be used and that no person who operated it would use it in violation of this chapter or AS 11.71;

(5) any books, records, and research products and materials, including formulas, microfilm, tapes, and data which are used in violation of this chapter or AS 11.71;

(6) any money or negotiable instrument derived from activity prohibited by this chapter or AS 11.71; and

(7) any firearm used during or in furtherance of a violation of this chapter or AS 11.71.

(b) Property listed in (a) of this section may be forfeited to the state either upon conviction of the defendant of a violation of this chapter or AS 11.71, or upon judgment of a court of competent jurisdiction in a separate civil proceeding in rem that an item specified in (a) of this section was used in or in aid of a violation of

this chapter or AS 11.71.

(c) It is not a defense in an in rem proceeding brought under this section that a criminal proceeding is pending or has resulted in a conviction or acquittal for a violation of this chapter or AS 11.71, or that a criminal proceeding has been dismissed, or that the item has not been forfeited in any criminal proceeding, or that multiple actions are pending.

(d) Property subject to forfeiture under this section may be seized by a peace officer upon an order issued by a court having jurisdiction over the property upon a showing of probable cause that the property is subject to forfeiture under (a) of this section. Seizure without a court order may be made if

(1) the seizure is incident to a valid arrest or a search under a valid search warrant;

(2) the property subject to seizure has been the subject of a prior judgment in favor of the state in a criminal proceeding or civil proceeding in rem based upon this chapter or AS 11.71; or

(3) there is probable cause that the property was or is being used in violation of this chapter or AS 11.71 and the property is easily movable; property seized under this paragraph may not be held for more than 48 hours or until an order continuing the seizure may be applied for and issued by a court, whichever is earlier.

(e) Property taken or detained under (b) of this section is in the custody of the Department of Public Safety subject only to the orders and decrees of the court having jurisdiction over the forfeiture proceedings. If property is seized under this chapter, the Department of Public Safety may:

(1) place the property under seal;

(2) remove the property to a place designated by the court;

or

(3) take custody of the property and remove it to an appropriate location for disposition in accordance with law.

(f) Within 10 days of any seizure under this section, the state shall inventory the property seized and its contents and appraise the value of the items seized.

(g) Within 20 days of any seizure under this section, the state shall, by certified mail, notify any person known to have an interest in an item with an appraised value of $500 or more, or who is ascertainable from official registration numbers, licenses or other state, federal or municipal numbers on the item. Additionally, the state shall publish notice of forfeiture action of an item valued at $500 or more in a newspaper of general circulation in the judicial district in which the seizure was made, or if no newspaper is published in that district, in a newspaper published in the state and distributed in that district, four times during four consecutive calendar weeks, once during each week. The requirements of this subsection do not apply to the forfeiture of controlled substances which have been manufactured, distributed, dispensed, or possessed in violation of this chapter or AS 11.71, regardless of their value.

(h) Upon service or publication of notice of commencement of an action under this section, a person claiming interest in the property shall file within 20 days from the service or publication, a notice of claim setting out the nature of his interest, the date it was acquired, the consideration paid, and an answer to the state's allegations. If no claim and answer is filed within the time specified, the property described in the state's allegation must be ordered forfeited to the state without further proceedings or showings.

(i) Questions of fact or law raised by a notice of claim and

answer of any claimant in an action commenced under this section must be determined by the court sitting without a jury. Such a proceeding may, in the court's discretion, be held in abeyance until conclusion of any pending criminal charges against the claimant under this chapter or AS 11.71.

(j) A claimant under (h) of this section may at any time petition for release of a seized item as follows:

(1) to a court in which a seizure warrant has been issued;

(2) to a court in which a criminal or civil action alleging forfeiture of the item has been filed; or

(3) before an action is filed, or if no seizure warrant was issued, to a court in the district in which the violation took place.

(k) An item may not be released by the court under (j) of this section except upon an adequate assurance from the claimant that the item will remain subject to the court's jurisdiction and within the constructive custody of the state and

(1) a finding that the release is in the best interests of the state; or

(2) the posting of a bond equal to twice the assessed value of the item or the posting of other valid and equivalent security.

(l) A claimant may petition the court for sale of an item before final disposition. The court shall grant a petition for sale upon a finding that the sale is in the best interests of the state and the preservation and maintenance of the item seized. Proceeds from the sale plus interest to the date of final disposition shall thereafter be treated as the subject of the forfeiture action.

(m) Property forfeited under this section must be disposed of according to court order. The court may order the Department of Public Safety to

(1) destroy property harmful to the public;

(2) sell the property and use the proceeds for payment of all proper expenses of the proceedings for forfeiture and sale, including expenses of seizure, custody, and court costs;

(3) take custody of the property and use it in the enforcement of this chapter or AS 11.71, or transfer it to another agency of the state for a use designated by the court in furtherance of the administration of justice;

(4) take custody of the property and remove it for disposition in accordance with law; or

(5) forward it to the Drug Enforcement Administration for disposition.

(n) Upon a showing that a claimant is entitled to remittance in accordance with the provisions of this section, the court shall order that

(1) if the item may be used for a valid state function, it shall be delivered to the Department of Administration and that department shall remit to the claimant the value of the claimant's interest at the time of seizure; or

(2) the item may be sold at public auction to the highest bidder, the claimant having a right of first refusal, with proceeds used to satisfy the claimant's interest at the time of seizure and the balance deposited in the general fund.

(o) An offender who used an item subject to remission in violation of this chapter or AS 11.71 shall be assessed a fine at least equal to the cost of any lien payment or remittance made by the state plus the reasonable costs of the seizure.

(p) Any controlled substance manufactured, possessed, transferred, sold, or offered for sale in violation of this chapter or AS 11.71 is

contraband and must be seized and summarily forfeited to the state.

(q) Plants from which controlled substances may be derived and which have been planted or cultivated in violation of this chapter or AS 11.71, or which are wild growths, may be seized and summarily forfeited to the state.

Sec. 17.30.320. BURDEN OF PROOF. It is not necessary for the state to negate an exemption or exception provided for in this chapter in a complaint, information, indictment or other pleading or at a trial, hearing, or other proceeding under this chapter or AS 11.71. The defendant has the burden of proving by a preponderance of the evidence any exemption or exception claimed by him.

Sec. 17.30.330. JUDICIAL REVIEW. All final determinations, findings, and conclusions of the commissioner under this chapter or regulations adopted under it are final decisions of the matters involved. A person aggrieved by a decision may obtain review of the decision in the superior court in accordance with AS 44.62.560 -- 44.62.570. A person is not, however, entitled to a hearing de novo in the superior court.

Sec. 17.30.340. EDUCATION AND RESEARCH. (a) The commissioner shall carry out educational programs designed to prevent and deter abuse of controlled substances. In connection with these programs, the commissioner may:

(1) promote better recognition of the problems surrounding abuse of controlled substances within the regulated industry and among interested groups and organizations;

(2) assist the regulated industry and interested groups and organizations in contributing to the reduction of abuse of controlled substances;

(3) consult with interested groups and organizations to aid

them in solving administrative and organizational problems;

(4) evaluate procedures, projects and techniques conducted or proposed as part of educational programs on abuse of controlled substances;

(5) disseminate the results of research on abuse of controlled substances to promote a better public understanding of the problems which exist and their solutions; and

(6) with the cooperation of the Department of Law, assist in the education and training of state and local law enforcement officials in their efforts to prevent illicit traffic in and abuse of controlled substances.

(b) The commissioner shall encourage research on controlled substances and may:

(1) establish methods to assess the effects of controlled substances and identify and characterize those with potential for abuse;

(2) make studies and undertake research to:

(A) develop new or improved approaches, techniques, systems, equipment and devices to strengthen the enforcement of this chapter;

(B) determine patterns of abuse of controlled substances and their social effects; and

(C) improve methods for preventing, predicting and understanding the abuse of controlled substances;

(3) enter into contracts with public agencies, institutions of higher education, and private organizations or individuals for conducting research, demonstrations, or special projects which bear directly on abuse of controlled substances and for related research and educational activities.

Sec. 17.30.350. CONFIDENTIALITY. (a) Results, information, and evidence received from the Drug Enforcement Administration of the United States Department of Justice relating to the regulatory functions of this chapter, including results of inspections conducted by it may be relied on and acted on by the commissioner in the exercise of his regulatory functions under this chapter.

(b) A practitioner engaged in medical practice or research may not furnish the name or identity of a patient or research subject to the commissioner, and the practitioner may not otherwise disclose the name or identity of an individual that he is obliged to keep confidential unless compelled to disclose it within the context of a criminal investigation or proceeding.

ARTICLE 4. DEFINITIONS.

Sec. 17.30.500. DEFINITIONS. As used in this chapter

(1) "administer" means the direct application of a controlled substance, whether by injection, inhalation, ingestion, or any other means into the body of a patient or research subject by

(A) a practitioner or, in the practitioner's presence, by his authorized agent, or

(B) the patient or research subject at the direction and in the presence of a practitioner;

(2) "agent" means an authorized person who acts on behalf of or at the direction of a manufacturer, distributor, or dispenser; it does not include a common or contract carrier, public warehouseman, or employee of the carrier or warehouseman;

(3) "commissioner" means the commissioner of health and social services;

(4) "committee" means the Controlled Substances Advisory Committee established in AS 17.30.020;

(5) "controlled substance" means a drug, substance, or immediate precursor included in the schedules set out in AS 17.30.040 -- 17.30.090;

(6) "deliver" or "delivery" means the actual, constructive, or attempted transfer from one person to another of a controlled substance whether or not there is an agency relationship;

(7) "department" means the Department of Health and Social Services;

(8) "dispense" means to deliver a controlled substance to an ultimate user or research subject by or under the lawful order of a practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for that delivery; "dispenser" means a practitioner who dispenses;

(9) "distribute" means to deliver other than by administering or dispensing a controlled substance; "distributor" means a person who distributes;

(10) "drug"

(A) means

(i) substances recognized as drugs in the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, or official National Formulary, or any supplement to any of these publications;

(ii) substances intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals;

(iii) substances, other than food, intended to affect the structure or any function of the body of humans or animals; and

(iv) substances intended for use as a component

of any article specified in (i), (ii), or (iii) of this subparagraph;

(B) does not include devices or their components, parts, or accessories;

(11) "hashish" means the dried, compressed, resinous product of the plant (genus) Cannabis;

(12) "hashish oil" means the viscous liquid concentrate of tetrahydrocannabinols extracted from the plant (genus) Cannabis;

(13) "immediate precursor" means a substance which is by statute or regulation designated as the principal compound commonly used or produced primarily for use, and which is an immediate chemical intermediary used or likely to be used in the manufacture of a controlled substance, the control of which is necessary to prevent, curtail, or limit manufacture of that controlled substance;

(14) "judicial officer" means a justice of the supreme court, a judge of the superior court, a district judge, and a magistrate

(15) "intoxicating liquor" has the meaning ascribed to it in AS 11.71.200(9);

(16) "manufacture" means

(A) the production, preparation, propagation, compounding, conversion, growing, or processing of a controlled substance, either directly or indirectly by extraction from substances of natural origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis; however, the growing of less than one pound of marijuana is not manufacturing; and

(B) any packaging or labeling of a controlled substance including but not limited to acts done

(i) by a practitioner as an incident to his ad-

ministering or dispensing of a controlled substance in the course of his professional practice; or

(ii) by a practitioner, or by his authorized agent under his supervision, for the purpose of, or as an incident to, research, teaching, or chemical analysis and not for sale;

(17) "marijuana" has the meaning ascribed to it in AS 11.-71.200(11);

(18) "opiate" means a substance having an addiction forming or addiction sustaining capability similar to morphine or being capable of conversion into a drug having addiction forming or addiction sustaining capability; it does not include, unless specifically designated as controlled under AS 17.30.010, the dextrorotatory isomer of 3-methoxy-n-methylmorphinan and its salts (dextromethorphan); it does include its racemic and levorotatory forms;

(19) "opium poppy" means the plant of the species Papaver somnifern L., except its seeds;

(20) "poppy straw" means all parts, except the seeds, of the opium poppy, after mowing;

(21) "practitioner" means:

(A) a physician, dentist, veterinarian, scientific investigator, or other person licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or to administer a controlled substance in the course of professional practice or research in the state;

(B) a pharmacy, hospital or other institution licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to or to administer a controlled substance in the course of professional practice or research in the

state;

(22) "production" includes the manufacture, planting, cultivation, growing, or harvesting of a controlled substance;

(23) "ultimate user" means a person who lawfully possesses a controlled substance for his own use or for the use of a member of his household or for administering to an animal owned by him or by a member of the household.

Sec. 17.30.600. SHORT TITLE. This chapter may be cited as the Alaska Controlled Substances Act.

* Sec. 9. AS 08.64.380(3)(B) is amended to read:

(B) habitual overuse of alcoholic beverages or <u>controlled substances</u> [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUGS,] as defined in <u>AS 17.30</u> [AS 17.12.150(3), OR ADDICTION TO THE USE OF NARCOTIC DRUGS AS DEFINED IN AS 17.10.230(13)];

* Sec. 10. AS 08.80.260(2) is amended to read:

(2) selling, bartering, or making available <u>a controlled substance as defined in AS 17.30</u> [, MORPHINE, COCAINE OR OTHER, NARCOTIC] to a person addicted to the use of <u>a controlled substance</u> [DRUGS] except upon prescription issued by a licensed physician;

* Sec. 11. AS 08.80.260(9) is amended to read:

(9) violation of regulations pertaining to the provisions of adequate security for <u>controlled substances</u> [DANGEROUS DRUGS];

* Sec. 12. AS 08.80.470 is amended to read:

Sec. 08.80.470. CONSTRUCTION. Nothing in this chapter amends, modifies, repeals or otherwise changes any provision of the <u>Controlled Substances Act (AS 17.30)</u> [NARCOTIC DRUG ACT (AS 17.10)] or the Alaska Food, Drug and Cosmetic Act (AS 17.30).

* Sec. 13. AS 28.35.030(a) is amended to read:

(a) A person who, while under the influence of intoxicating

liquor, or other controlled substance listed [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUGS OR NARCOTIC DRUGS AS DEFINED] in AS 17.30.040 -- 17.30.090 [AS 17.10.230(13) AND AS 17.12.150(3)] operates or drives an automobile, motorcycle or other motor vehicle in the state, upon conviction, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both and the court shall impose a minimum sentence of imprisonment of not less than three consecutive days. Upon a subsequent conviction within five years after a conviction under this section, the court shall impose a minimum sentence of imprisonment of not less than 10 consecutive days. The execution of sentence may not be suspended nor may probation or parole be granted until the minimum imprisonment provided in this section has been served, nor may imposition of sentence be suspended, except upon the condition that the defendant be imprisoned for no less than the minimum period provided in this section [, NOR MAY THE PUNISHMENT PROVIDED FOR IN THIS SECTION BE REDUCED UNDER AS 11.05.150]. In addition, his operator's license shall be revoked in accordance with AS 28.15.210(c). In addition, a person convicted under this statute shall undertake, for a term specified by the court, that program of alcohol education or rehabilitation which the court, after consideration of any information compiled under (b) of this section, finds appropriate.

* Sec. 14. AS 44.29.020 is amended to read:

Sec. 44.29.020. DUTIES OF DEPARTMENT. The Department of Health and Social Services shall administer the state programs of public health and welfare, including: (1) maternal and child health services; (2) preventive medical services; (3) public health nursing services; (4) sanitation and engineering services; (5) nutrition services; (6) health education; (7) laboratories; (8) mental health treatment and

diagnosis; (9) management of state institutions; (10) medical facilities; (11) old age assistance; (12) aid to dependent children; (13) aid to the blind; (14) child welfare services; (15) general relief; (16) licensing and supervision of child care facilities; [AND] (17) probation and parole supervision; and (18) the Alaska Controlled Substances Act (AS 17.30).

* Sec. 15. (a) Prosecution for a violation of law occurring before the effective date of this Act is not affected or abated by this Act. Violation of any law repealed by this Act may still be prosecuted and brought to a final determination in accordance with the laws and regulations in effect at the time of the violation.

(b) Civil seizures or forfeitures and injunctive proceedings commenced before the effective date of this Act are not affected by this Act.

(c) All administrative proceedings pending under prior laws which are superseded by this Act shall be continued and brought to a final determination in accordance with the laws and rules in effect before the effective date of this Act.

(d) The commissioner of health and social services shall initially permit persons to register who own or operate an establishment engaged in the manufacture, distribution, or dispensing of a controlled substance before the effective date of this Act and who are registered or licensed by the state.

(e) This Act applies to violations of law, seizures and forfeitures, injunctive proceedings, administrative proceedings and investigations which occur following its effective date.

* Sec. 16. Orders issued and regulations adopted under a law affected by this Act and in effect on the effective date of this Act and not in conflict with this Act continue until modified, superseded or repealed.

* Sec. 17. AS 04.15.080, 04.15.110, 17.10, 17.12, and 17.15 are repealed.

* Sec. 18. This Act takes effect on July 1, 1980.

DRUGS OF ABUSE

Narcotics

Opium
and opium derivatives or
synthetic substitutes

The term *narcotic* in its medical meaning refers to opium and opium derivatives or synthetic substitutes.*

Narcotics are indispensable in the practice of medicine: they are the most effective agents known for the relief of intense pain. They are also used as cough suppressants as well as a remedy centuries old for diarrhea.

Under medical supervision narcotics are administered orally or by intramuscular injection. As drugs of abuse, however, they may be sniffed, smoked, or self-administered by the more direct routes of subcutaneous ("skin-popping") and intravenous ("mainlining") injection.

The relief of suffering, whether of physical or psychological origin, may result in a short-lived state of euphoria. The initial effects, however, are often unpleasant, leading many to conclude that those who persist in their illicit use may have latent personality disturbances. Narcotics tend to induce pinpoint pupils and reduced vision, together with drowsiness, apathy, decreased physical activity, and constipation. A larger dose may induce sleep, but there is an increasing possibility of nausea, vomiting, and respiratory depression--the major toxic effect of the opiates. Except in cases of acute intoxication, there is no loss of motor coordination or slurred speech as in the case of the depressants.

To the extent that the response may be felt to be pleasurable, its intensity may be expected to increase with the amount of the dose administered. Repeated use, however, will result in increasing tolerance: the user must administer progressively larger doses to attain the desired effect, thereby reinforcing the compulsive behavior known as drug dependence.

Physical dependence refers to an alteration of the normal functions of the body that necessitates the continued presence of a drug in order to prevent the withdrawal or abstinence syndrome, which is characteristic of each class of ad-

* Cocaine, ecgonine, and coca leaves, classified as narcotics under the CSA, are discussed in the section on stimulants, beginning on page 24.

dictive drugs. The intensity of physical symptoms experienced during the withdrawal period is related directly to the amount of narcotic used each day. Deprivation of an addictive drug causes increased excitability of those same bodily functions that have been depressed by its habitual use.

With the deprivation of narcotics, the first withdrawal signs are usually experienced shortly before the time of the next scheduled dose. Complaints, pleas, and demands by the addict are prominent, increasing in intensity and peaking from 36 to 72 hours after the last dose, then gradually subsiding. Symptoms such as watery eyes, runny nose, yawning, and perspiration appear about 8 to 12 hours after the last dose. Thereafter, the addict may fall into a restless sleep. As the abstinence syndrome progresses, restlessness, irritability, loss of appetite, insomnia, goose flesh, tremors, and finally yawning and severe sneezing occur. These symptoms reach their peak at 48 to 72 hours. The patient is weak and depressed with nausea and vomiting. Stomach cramps and diarrhea are common. Heart rate and blood pressure are elevated. Chills alternating with flushing and excessive sweating are also characteristic symptoms. Pains in the bones and muscles of the back and extremities occur as do muscle spasms and kicking movements, which may be the source of the expression "kicking the habit." At this time an individual may become suicidal. Without treatment the syndrome eventually runs its course and most of the symptoms will disappear in 7 to 10 days. How long it takes to restore physiological and psychological equilibrium, however, is unpredictable. For a few weeks following withdrawal the addict will continue to think and talk about his use of drugs and be particularly susceptible to an urge to use them again.

The withdrawal syndrome may be avoided by reducing the dose of narcotic over a one-to-three-week period. Detoxification of an addict can be accomplished quite easily by substituting oral methadone for the illicit narcotic and gradually reducing the dose. However, the addict's entire pattern of life is built around drug taking and narcotic dependence is never entirely resolved by withdrawal alone.

Since addicts tend to become preoccupied with the daily round of obtaining and taking drugs, they often neglect themselves and may suffer from malnutrition, infections, and unattended diseases or injuries. Among the hazards of narcotic addiction are toxic reactions to contaminants, such as quinidine, sugars, and talcum powder, as well as unsterile needles and injection techniques, resulting in abscesses, blood poisoning, and hepatitis. Since there is no simple way to determine the purity of a drug that is sold on the street, the potency is unpredictable. A person with a mild overdose may be stuporous or asleep. Larger doses may induce a coma with slow shallow respiration. The skin becomes clammy cold, the body limp, and the jaw relaxed; there is a danger that the tongue may fall back, blocking the air passageway. If the condition is sufficiently severe, convulsions may occur, followed by respiratory arrest and death. Specific antidotes for narcotic poisoning are available at hospitals.

Narcotics of Natural Origin

The poppy *Papaver somniferum* is the main source of the nonsynthetic narcotics. It was grown in the Mediterranean region as early as 300 B.C. and has since been cultivated in countries around the world, including Hungary, Yugoslavia, Turkey, India, Burma, China, and Mexico.

The milky fluid that oozes from incisions in the unripe seedpod has since ancient times been scraped by hand and air dried to produce opium gum. A more modern method of harvesting is by the industrial poppy straw process of extracting alkaloids from the mature dried plant. The extract may be in either liquid, solid, or powder form. Most poppy straw concentrate made available commercially is a fine brownish powder with a distinct odor.

More than 400 tons of opium or its equivalent in poppy straw concentrate are legally imported annually into the United States.

Opium

There were no legal restrictions on the importation or use of opium until the early 1900's. In those days patent medicines often contained opium without any warning label.

Poppy field

Incised seedpod

Scraping raw opium

Today there are state, federal, and international laws governing the production and distribution of narcotic substances, and there is little abuse of opium in the United States.

At least 25 alkaloids can be extracted from opium. These fall into two general categories, each producing markedly different effects. The first, known as the phenanthrene alkaloids, represented by morphine and codeine, are used as analgesics and cough suppressants; the second, the isoquinoline alkaloids, represented by papaverine (an intestinal relaxant) and noscapine (a cough suppressant), have no significant influence on the central nervous system and are not regulated under the CSA.

Although a small amount of opium is used to make antidiarrheal preparations such as paregoric, virtually all the opium imported into this country is broken down into its alkaloid constituents, principally morphine and codeine.

Morphine

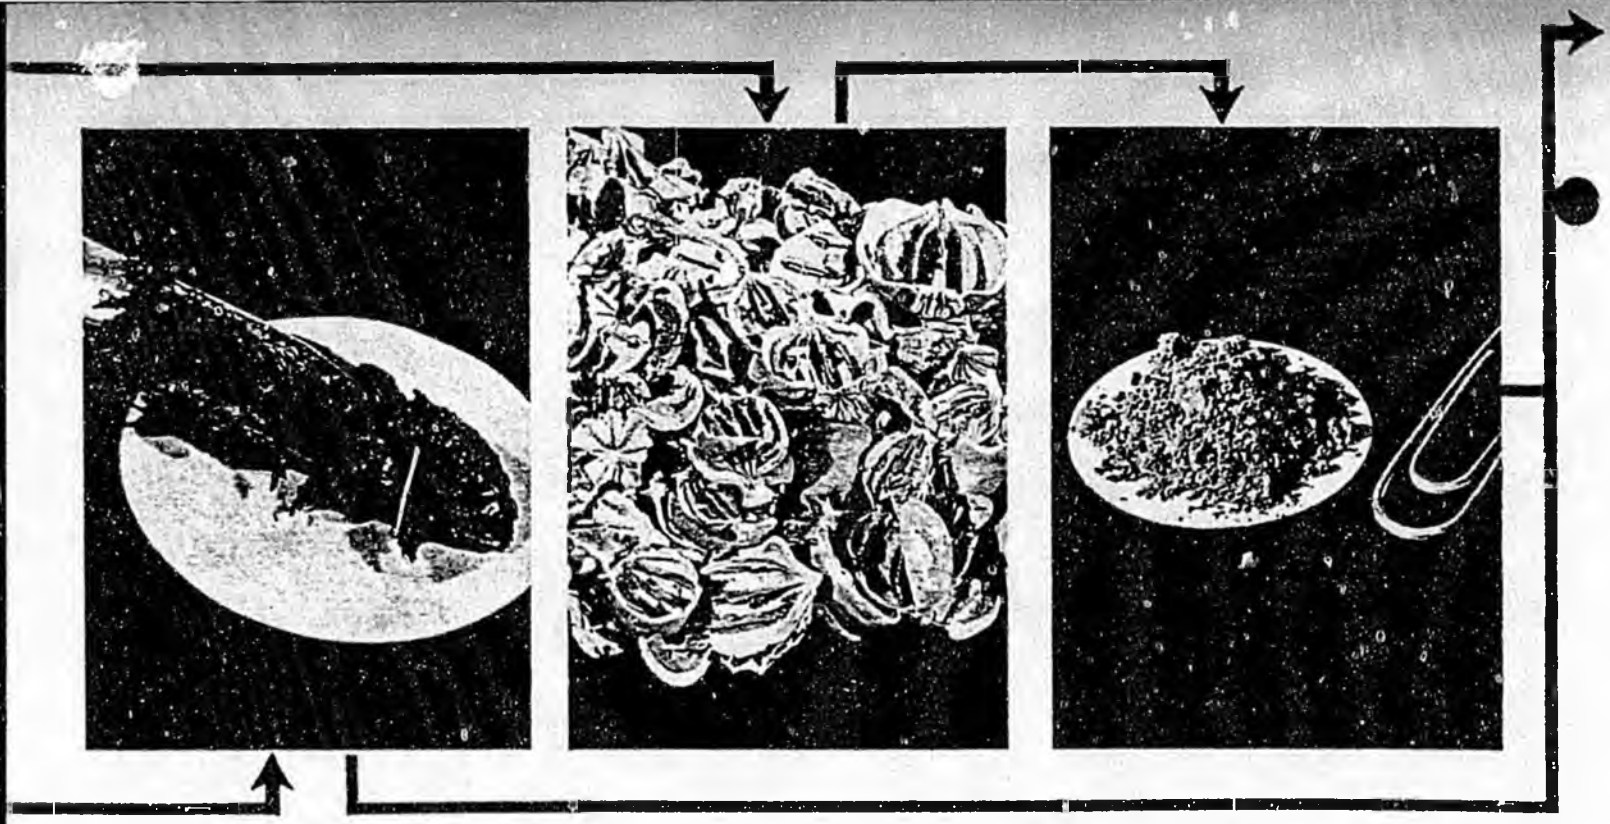
The principal constituent of opium, ranging in concentration from 4 to 21 percent, morphine is one of the most effective drugs known for the relief of pain. It is marketed in the form of white crystals, hypodermic tablets, and injectable preparations. Its licit use is restricted primarily to hospitals. Morphine is odorless, tastes bitter, and darkens with age. It may be administered subcutaneously, intramuscularly or intravenously, the latter method being the one most frequently resorted to by addicts. Tolerance and dependence develop rapidly in the user. Only a small part of the morphine obtained from opium is used medically. Most of it is converted to codeine and, secondarily, to hydromorphone.

Codeine

This alkaloid is found in raw opium in concentrations ranging from 0.7 to 2.5 percent. It was first isolated in 1832 as an impurity in a batch of morphine. Although it occurs naturally, most codeine is produced from morphine. As compared with morphine, codeine produces less analgesia, sedation, and respiratory depression. It is widely distributed in products of two general types. Codeine for the relief of moderate pain may consist of codeine tablets or be combined with other products such as aspirin or acetaminophen (Tylenol). Some examples of liquid codeine preparations for the relief of coughs (antitussives) are Robitussin AC, Cheracol, and elixir of terpin hydrate with codeine. Codeine is also manufactured to a lesser extent in injectable form for the relief of pain. It is by far the most widely used naturally occurring narcotic in medical treatment.

Thebaine

A minor constituent of opium, thebaine is the principal alkaloid



Opium gum *Poppy straw* *Poppy straw concentrate*

present in another species of poppy, *Papaver bracteatum*, which has been grown experimentally in the United States as well as in other parts of the world. Although chemically similar to both codeine and morphine, it produces stimulant rather than depressant effects. Thebaine is not used in this country for medical purposes, but it is converted into a variety of medically important compounds, including codeine, hydrocodone, oxycodone, oxymorphone, nalbuphine, naloxone, and the Bentley compounds. It is controlled in Schedule II of the CSA as well as under international law.

Semi-Synthetic Narcotics

The following narcotics are among the more significant synthetic substances that have been derived by modification of the chemicals contained in opium.

Heroin

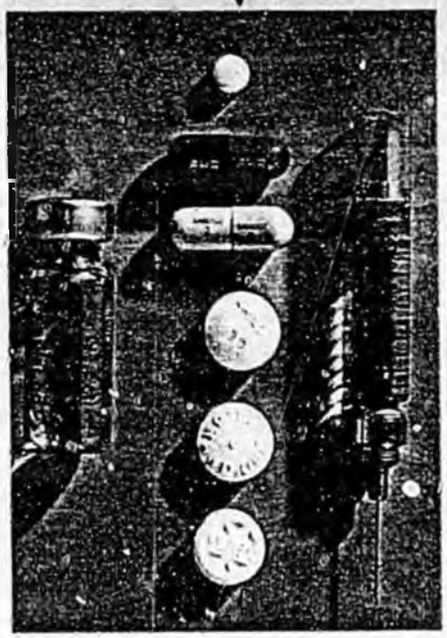
First synthesized from morphine in 1874, heroin was not extensively used in medicine until the beginning of this century. The Bayer Company in Germany first started commercial production of the new pain remedy in 1898. While it received widespread acceptance, the medical profession for years remained unaware of its potential for addiction. The first comprehensive control of heroin in the United States was established with the Harrison Narcotic Act of 1914. Pure heroin is a white powder with a bitter taste. Illicit heroin may vary in color from white to dark brown because of impurities left from the manufacturing process or the presence of additives such as food coloring, cocoa, or brown sugar. Pure heroin is rarely sold on the street. A "bag"—slang for a single dosage unit of heroin—may weigh about 100 mg, usually containing less than 5 percent heroin. To increase the bulk of the material sold to the addict, diluents are mixed with the heroin in ratios ranging from 9 to 1 to as much as 99 to 1. Sugars, starch, powdered milk, and quinine are among the diluents used.

Hydromorphone

Most commonly known as Dilaudid, hydromorphone is the second oldest semi-synthetic narcotic analgesic. Marketed both in tablet and injectable form, it is shorter acting and more sedative than morphine, but its potency is from two to eight times as great. It is therefore a highly abusable drug, much sought after by narcotic addicts, who usually obtain it through fraudulent prescription or theft. The tablets, stronger than available liquid forms, may be dissolved and injected.

Oxycodone

Oxycodone is synthesized from



Morphine

Codeine

Thebaine

Semi-Synthetic Narcotics

Heroin

Hydromorphone (Dilaudid)

thebaine. It is similar to codeine, but more potent and with a higher dependence potential. It is effective orally and is marketed in combination with other drugs such as Percodan for the relief of pain. Addicts take Percodan orally or dissolve tablets in water, filter out the insoluble material, and "mainline" the active drug.

Etorphine and Diprenorphine

Two of the Bentley compounds, these substances are both made from thebaine. Etorphine is more than a thousand times as potent as morphine in its analgesic, sedative and respiratory depressant effects. For human use its potency is a distinct disadvantage because of the danger of overdose. Etorphine hydrochloride (M99) is used by veterinarians to immobilize large wild animals. Diprenorphine hydrochloride (M50-50), acting as an antagonist, counteracts the effects of etorphine. The manufacture and distribution of both substances are strictly regulated under the CSA.

Synthetic Narcotics

In contrast to pharmaceutical products derived directly or indirectly from narcotics of natural origin, synthetic narcotics are produced entirely within the laboratory. A continuing search for a product that will retain the analgesic properties of morphine without the consequent dangers of tolerance and dependence has yet to yield a drug that is not susceptible to abuse. The two that are most widely available are meperidine and methadone.

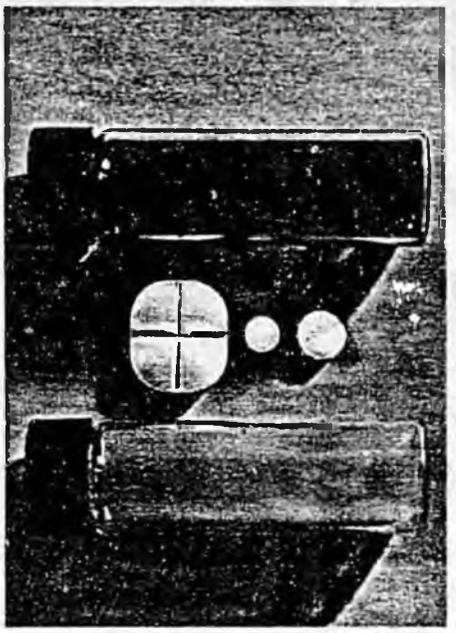
Meperidine (pethidine)

The first synthetic narcotic, produced originally a generation ago, meperidine is chemically dissimilar to morphine but resembles it in its analgesic potency. It is probably

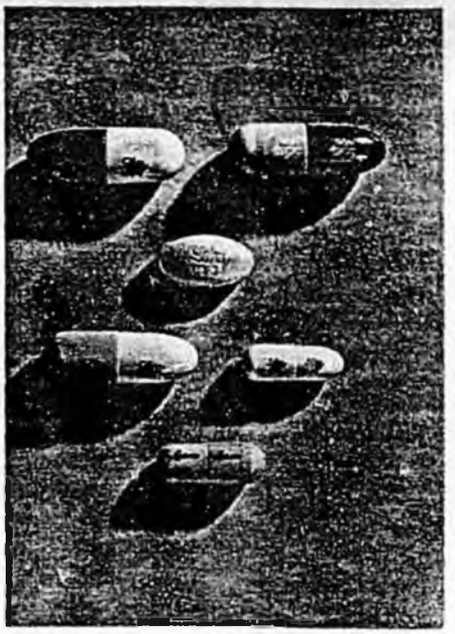
Thebaine derivatives

Diprenorphine (left) and etorphine

Meperidine



Methadone



Propoxyphene

the most widely used drug for the relief of moderate to severe pain. Available in pure form as well as in products containing other medicinal ingredients, it is administered either orally or by injection, the latter method being the most widely abused. Tolerance and dependence develop with chronic use, and large doses can result in convulsions.

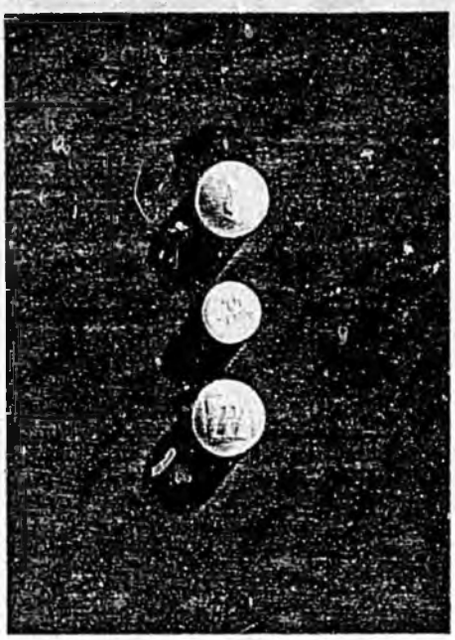
Methadone and Related Drugs

German scientists synthesized methadone during World War II because of a shortage of morphine. Although chemically unlike morphine or heroin, it produces many of the same effects. Introduced into the United States in 1947 as an analgesic and distributed under such names as Amidone, Dolophine, and Methadone, it became widely used in the 1960's in the treatment of narcotic addicts. The effects of methadone differ from morphine-based drugs in that they have a longer duration of action, lasting up to 24 hours, thereby permitting administration only once a day in heroin detoxification and maintenance programs. Moreover, methadone is almost as effective when administered orally as it is by injection. But tolerance and dependence may develop, and withdrawal symptoms, though they develop more slowly and are less severe, are more prolonged. Ironically, methadone, designed to control narcotic addiction, has emerged in some metropolitan areas as a major cause of overdose deaths.

Closely related chemically to methadone is the synthetic compound levo-alpha-acetylmethadol (LAAM), which has an even longer duration of action (from 48 to 72 hours), permitting a further reduction in clinic visits and the elimination of take-home medication. Its potential in the treatment of narcotic addicts is now under investigation. Another close relative of methadone is propoxyphene, first marketed in 1957 under the trade name of Darvon for the relief of mild to moderate pain. Less dependence-producing than the opiates, it is also less effective as an analgesic. Misuse of propoxyphene led to its placement in Schedule IV of the CSA in 1977.

Narcotic Antagonists

The deliberate effort to find an effective analgesic that is not dependence producing has led in recent years to the development of a class of compounds known as narcotic antagonists. These drugs, as the name implies, tend to block and reverse the effects of narcotics, and some of them may in future prove useful in checking recidivist tendencies of former addicts who have undergone treatment. Nalorphine, introduced into clinical medicine in 1951 and now under



Other synthetic narcotics: top to bottom, anileridine (Leritine), levorphanol (Levo-Dromoran), and pentazocine (Talwin)

Schedule III, is called a partial antagonist. In a drug-free individual, it produces morphine-like effects; whereas in an individual under the influence of narcotics, it counteracts these effects. Another partial antagonist is pentazocine (Talwin). Introduced as an analgesic in 1967, it was determined to be an abusable drug and placed under Schedule IV in 1979. Relatively pure antagonists have also been developed. Naloxone (Narcan), having no morphine-like effects, was removed from the CSA when introduced as a specific antidote for narcotic poisoning in 1971. A number of "pure" antagonists have since been developed that are longer lasting and effective when administered orally. One of them is Naltrexone, which was removed from control of the CSA in 1975, and which is now under evaluation to determine its utility in assisting post-narcotic addicts to remain drug free.

Drugs of Abuse

Substances regulated under the CSA as depressants have a high potential for abuse associated with both physical and psychological dependence.

Taken as prescribed by a physician, depressants may be beneficial for the relief of anxiety, irritability, and tension, and for the symptomatic treatment of insomnia. In excessive amounts, however, they produce a state of intoxication that is remarkably similar to that of alcohol.

As in the case of alcohol, these effects may vary not only from person to person but from time to time in the same individual. Low doses produce mild sedation. Higher doses, insofar as they relieve anxiety or stress, may produce a temporary sense of well-being; they may also produce mood depression and apathy. In marked contrast to the effects of narcotics, however, intoxicating doses invariably result in impaired judgment, slurred speech, and loss of motor coordination. In addition to the dangers of disorientation, resulting in a high incidence of highway accidents, recurrent users incur risks of long-term involvement with depressants.

Tolerance to the intoxicating effects develops rapidly, leading to a progressive narrowing of the margin of safety between an intoxicating and lethal dose. The person who is unaware of the dangers of increasing dependence will often increase the daily dose up to 10 or 20 times the recommended therapeutic level. The source of supply may be no further than the family medicine cabinet. Depressants are also frequently obtained by theft, illegal prescription, or purchase on the illicit market.

Members of the drug subculture often resort to the use of depressants as self-medication to soothe jangled nerves brought on by the use of stimulants, to quell the anxiety of "flashbacks" resulting from prior use of hallucinogens, or to ease their withdrawal from heroin. The dangers, it should be stressed, are compounded when depressants are used in combination with alcohol or other drugs. Chronic intoxication, though it affects every age group, is most common in middle age. The problem often remains unrecognized until

Depressants

In excessive amounts
they induce a state of intoxication
remarkably like that
of alcohol

the user exhibits recurrent confusion or an obvious inability to function. Depressants also serve as a means of suicide, a pattern particularly common among women.

As will be shown, the depressants vary with respect to their potential for overdose. Moderate depressant poisoning closely resembles alcoholic inebriation. The symptoms of severe depressant poisoning are coma, a cold clammy skin, a weak and rapid pulse, and a slow or rapid but shallow respiration. Death will follow if the reduced respiration and low blood pressure are not counteracted by proper medical treatment.

The abrupt cessation or reduction of high-dose depressant intake may result in a characteristic withdrawal syndrome, which should be recognized as a medical emergency more serious than that of any other drugs of abuse. An apparent improvement in the patient's condition may be the initial result of detoxification. Within 24 hours, however, minor withdrawal symptoms manifest themselves, among them anxiety and agitation, loss of appetite, nausea and vomiting, increased heart rate and excessive sweating, tremulousness and abdominal cramps. The symptoms usually peak during the second or third day of abstinence from the short-acting barbiturates or meprobamate; they may not be reached until the seventh or eighth day of abstinence from the long-acting barbiturates or benzodiazepines. It is during the peak period that the major withdrawal symptoms usually occur. The patient may experience convulsions indistinguishable from those occurring in grand mal epilepsy. More than half of those who experience convulsions will go on to develop delirium, often resulting in a psychotic state identical to the delirium tremens associated with the alcohol withdrawal syndrome. Detoxification and treatment must therefore be carried out under close medical supervision. While treatment techniques vary to some extent, they share common objectives: stabilization of the drug-dependent state to allay withdrawal symptoms followed by gradual withdrawal to prevent their recurrence.

Among the depressants that give rise to the general conditions described are chloral hydrate, a broad array of barbiturates, glutethimide, methaqualone, meprobamate, and the benzodiazepines.

Chloral Hydrate

The oldest of the hypnotic (sleep-inducing) drugs, chloral hydrate was first synthesized in 1862 and soon supplanted alcohol, opium, and cannabis preparations for inducing sedation and sleep. Its popularity declined after the introduction of the barbiturates, but chloral hydrate is still widely used. It has a penetrating, slightly acrid odor, and a bitter caustic taste. Its depressant effects, as well as resulting tolerance and dependence, are comparable to those of alcohol, and withdrawal symptoms resemble delirium tremens. Chloral hydrate is a liquid, marketed in the form of syrups and soft gelatin capsules. Cases of poisoning have occurred from mixing chloral hydrate with alcoholic drinks. Chloral hydrate is not a street drug of choice. Its main misuse is by older adults.

Barbiturates

Among the drugs most frequently prescribed to induce sedation and sleep by both physicians and veterinarians are the barbiturates. About 2,500 derivatives of barbituric acid have been synthesized, but of these only about 15 remain in medical use. Small therapeutic doses tend to calm nervous conditions, and larger doses cause sleep 20 to 60 minutes after oral administration. As in the case of alcohol, some individuals may experience a sense of excitement before sedation takes effect. If dosage is increased, however, the effects of the barbiturates may progress through successive stages of sedation, sleep, and coma to death from respiratory arrest and cardiovascular complications.

Barbiturates are classified as ultrashort, short, intermediate, and long-acting. The ultrashort-acting barbiturates produce anesthesia within one minute after intravenous administration. The rapid onset and brief duration of action make them undesirable for purposes of abuse. Those in current medical use are hexobarbital (Evipal), methohexital (Brevital), thiamylal (Surital), and thiopental (Pentothal).

Among the short-acting and intermediate-acting barbiturates are pentobarbital (Nembutal), secobarbital (Seconal), and amobarbital (Amytal)—three of the drugs in the depressant category most sought after by abusers. The group also

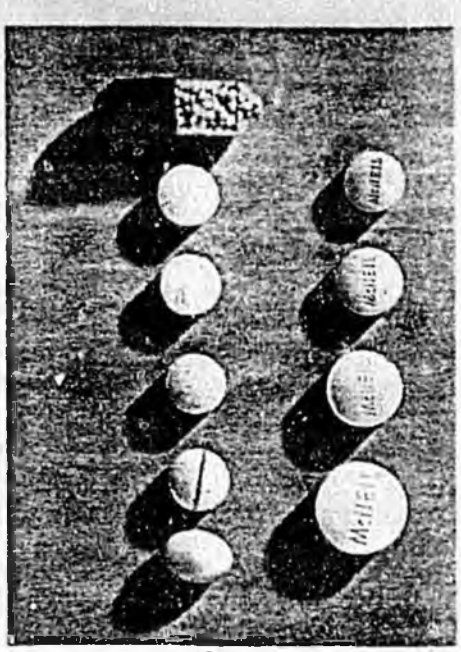
†Designated a narcotic under the CSA

Chloral hydrate

Barbiturates: top row, amobarbital; middle row, pentobarbital (in combination with carbromal in the capsule at center); bottom row, secobarbital (in combination with amobarbital in the red and blue capsule at left).



Barbiturates: phenobarbital (left column) and butabarbital

includes butabarbital (Butisol), butalbital (Lotusate), allobarbital (Dial), aprobarbital (Alurate), and vinbarbital (Delvinal). After oral administration the onset time of action is from 15 to 40 minutes and duration of action is up to 6 hours. Physicians prescribe short-acting barbiturates to induce sedation or sleep. Veterinarians use pentobarbital for anesthesia and euthanasia.

Long-acting barbiturates, which include barbital (Veronal), phenobarbital (Luminal), mephobarbital or methylphenobarbital (Mebaral), and metharbital (Gemonil), have onset times of up to one hour and durations of action up to 16 hours. They are used medicinally as sedatives, hypnotics, and anticonvulsants. Their slow onset of action discourages their use for episodic intoxication, and they are not ordinarily distributed on the illicit market except when sold as something else. It should be emphasized, however, that all barbiturates result in a buildup of tolerance, and dependence on them is widespread.

Glutethimide

When glutethimide (Doriden) was introduced in 1954, it was said to be a safe barbiturate substitute without an addiction potential. But experience has shown glutethimide to be another CNS depressant, having no particular advantage over the barbiturates and several important disadvantages. The sedative effects of glutethimide begin about 30 minutes after oral administration and last for 4 to 8 hours. Glutethimide is marketed as Doriden in 125, 250, and 500 mg tablets. Because the effects of this drug are of long duration, it is exceptionally difficult to reverse overdoses, which often result in death.

Methaqualone

Methaqualone is a synthetic sedative chemically unrelated to the barbiturates, glutethimide, or chloral hydrate. It has been widely abused because it was once mistakenly thought to be non-addictive and effective as an aphrodisiac. Actually, methaqualone has caused many cases of serious poisoning. It is administered orally. Large doses cause coma, which may be accompanied by thrashing movements or convulsions. Continued heavy use of large doses leads to tolerance and dependence. Methaqualone has been marketed in the United States under various brand names such as Quaalude, Parest, Optimil, Somnafac, and Sopor. Counterfeit Quaalude tablets, which do not necessarily contain methaqualone, are prevalent on the U.S. illicit market, similar in appearance to the 300 mg tablet for-

Glutethimide (top row) and meprobamate

Methaqualone

Benzodiazepines: from top to bottom row, diazepam, chlordiazepoxide, flurazepam, clonazepam, clorazepate, lorazepam, and oxazepam

merly distributed by Rorer. Mandrax is a European brand name for methaqualone in combination with an antihistamine. Mecloqualone, a chemical similar to methaqualone in all significant respects, is not legally sold in the United States and is in Schedule I of the CSA.

Meprobamate

Meprobamate, first synthesized in 1950, introduced the era of mild or "minor" tranquilizers. In the United States today more than 200 tons of meprobamate are distributed annually under its generic name as well as under brand names such as Miltown, Equanil, Kesso-Bamate, and SK-Bamate. Meprobamate is prescribed primarily for the relief of anxiety, tension, and associated muscle spasms. Its onset and duration of action are like those of the intermediate-acting barbiturates; it differs from them in that it is a muscle relaxant, does not produce sleep at therapeutic doses, and is relatively less toxic. Excessive use, however, can result in psychological and physical dependence. Mebutamate (Dormate), a drug similar to meprobamate in its chemical makeup and effects, is also regulated under the CSA.

Benzodiazepines

The benzodiazepine family of depressants relieve anxiety, tension, and muscle spasms, produce sedation, and prevent convulsions. These substances are marketed as mild or minor tranquilizers, sedatives, hypnotics, or anticonvulsants. Their margin of safety is greater than that of other depressants. Eight members of the group are currently marketed in the United States. They are chlordiazepoxide (Librium), clonazepam (Clonopin), clorazepate (Tranxene, Azene), diazepam (Valium), flurazepam (Dalmane), lorazepam (Ativan), oxazepam (Serax), and prazepam (Verstran). Librium and Valium are among the drugs most widely prescribed in this country. These drugs have a relatively slow onset but long duration of action. Prolonged use of excessive doses may result in physical and psychological dependence. Withdrawal symptoms develop approximately one week to 10 days after continual high doses are abruptly discontinued. The delay in the appearance of the abstinence syndrome is due to the slow elimination of the drug from the body. When these drugs are used to obtain a "high," they are usually taken in conjunction with another drug such as alcohol or marihuana.

Stimulants

Of all abused drugs
the most powerfully reinforcing,
they can lead to increasingly compulsive behavior

The two most prevalent stimulants are nicotine in tobacco products and caffeine, the active ingredient of coffee, tea, and some bottled beverages that are sold in every supermarket. When used in moderation, these stimulants tend to relieve fatigue and increase alertness. They are an accepted part of our culture.

There are, however, more potent stimulants that because of their dependence-producing potential are under the regulatory control of the CSA. These controlled stimulants are available on prescription for medical purposes; they are also clandestinely manufactured in vast quantities for distribution on the illicit market.

Users tend to rely on stimulants to feel stronger, more decisive, and self-possessed. Because of the cumulative effects of the drugs, chronic users often follow a pattern of taking "uppers" in the morning and "downers" such as alcohol or sleeping pills at night. Such chemical manipulation interferes with normal body processes and can lead to mental and physical illness.

Young people who resort to stimulants for their euphoric effects consume large doses sporadically, over weekends or at night, often going on to experiment with other drugs of abuse. The consumption of stimulants may result in a temporary sense of exhilaration, superabundant energy, hyperactivity, extended wakefulness and a loss of appetite; it may also induce irritability, anxiety, and apprehension. These effects are greatly intensified with administration by intravenous injection, which may produce a sudden sensation known as a "flash" or "rush." The protracted use of stimulants is followed, however, by a period of depression known as "crashing" that is invariably described as unpleasant. Since the depression can be easily counteracted by a further injection of stimulant, this abuse pattern becomes increasingly difficult to break. Heavy users may inject themselves every few hours, a process sometimes continued to the point of delirium, psychosis, or physical exhaustion.

Tolerance develops rapidly to both the euphoric and appetite suppressant effects. Doses large

enough to overcome the insensitivity that develops may cause various mental aberrations, the early signs of which include repetitive grinding of the teeth, touching and picking the face and extremities, performing the same task over and over, a preoccupation with one's own thought processes, suspiciousness, and a sense of being watched. Paranoia with auditory and visual hallucinations characterizes the toxic syndrome resulting from continued high doses. Dizziness, tremor, agitation, hostility, panic, headache, flushed skin, chest pain with palpitations, excessive sweating, vomiting, and abdominal cramps are among the symptoms of a sublethal overdose. In the absence of medical intervention, high fever, convulsions, and cardiovascular collapse may precede the onset of death. It should be added that physical exertion increases the hazards of stimulant use since accidental death is due in part to their effects on the cardiovascular and body temperature regulating systems. Fatalities under conditions of extreme exertion have been reported among athletes who have taken stimulants in moderate amounts.

If withdrawn from stimulants, chronic high-dose users exhibit profound depression, apathy, fatigue, and disturbed sleep for up to 20 hours a day. The immediate withdrawal syndrome may last for several days. There may also be a lingering impairment of perception and thought processes. Anxiety, an incapacitating tenseness, and suicidal tendencies may persist for weeks or months. Many experts now interpret these symptoms as indicating that stimulant drugs are capable of producing physical dependence. Whether the withdrawal syndrome is physical or psychological in origin is in this instance academic since the stimulants are recognized as among the most potent agents of reward and reinforcement that underlie the problem of dependence.

Cocaine

The most potent stimulant of natural origin, cocaine is extracted from the leaves of the coca plant *(Erythroxylon coca)*, which has been cultivated in the Andean highlands of South America since prehistoric times. The leaves of the plant are chewed in the region for refreshment and relief from fatigue, much as North Americans once chewed tobacco.

Pure cocaine, the principal psychoactive ingredient, was first isolated in the 1880's. It was used as an anesthetic in eye surgery for which no previously known drug had been suitable; it became particularly useful in surgery of the nose and throat because of its ability to constrict blood vessels and thus limit bleeding. Although many of its therapeutic applications are now obsolete, the legal use of cocaine in the United States has in recent years been increased by the introduction of a morphine-cocaine elixir designed to relieve the suffering associated with terminal illness. In England, where this mixture was developed at the Brompton Chest Hospital, the use of cocaine in treatment of the terminally ill was largely abandoned after it was determined that it contributed to disquieting hallucinations and nightmares.

Illicit cocaine is distributed as a white crystalline powder, often adulterated to about half its volume by a variety of other ingredients, the most common of which are sugars such as lactose, inositol, mannitol, and local anesthetics such as lidocaine. Since the cost of illicit cocaine is high, there is a tendency to adulterate the product at each level of distribution. The drug is most commonly administered by being "snorted" through the nasal passages. Symptoms of repeated use in this manner may resemble the congested nose of a common cold. Less commonly, for heightened effect, the drug is injected directly into the bloodstream. Unlike such drugs as LSD and heroin, cocaine is popularly accepted as a recreational drug, facilitating social interaction. It is erroneously reputed to be relatively safe from undesirable side effects. Because of the intensity of its pleasurable effects, cocaine has the potential for extraordinary psychic dependency, which is all the more deceptive in view of its reputation as the recreational drug of choice.

Recurrent users may resort to larger doses at shorter intervals until their lives are largely committed to their habituation. Anxiety, restlessness, and extreme irritability may indicate the onset of a toxic psychosis similar to paranoid schizophrenia. Tactile hallucinations so afflict some chronic users that they injure themselves in attempting to remove imaginary in-

Coca plant

Coca processing

Cocaine

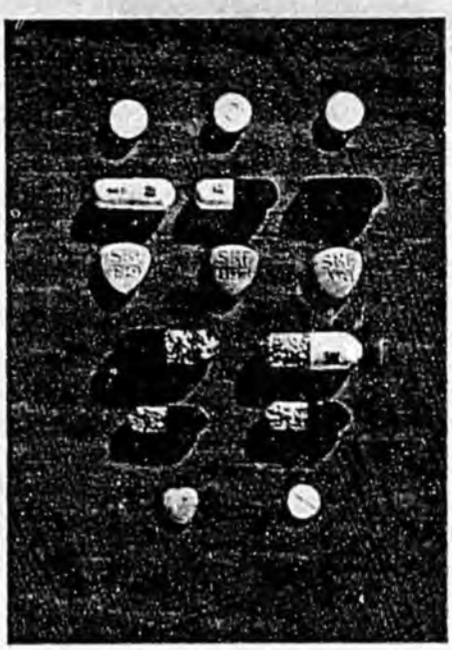
sects from under the skin. Others are persecuted by the fear of being watched and followed. Excessive doses of cocaine may cause seizures and death from respiratory failure.

Amphetamines

Amphetamine, dextroamphetamine, and methamphetamine are so similar in the effects they induce that they can be differentiated from one another only by laboratory analysis. Amphetamine was first used clinically in the mid-1930's to treat narcolepsy, a rare disorder resulting in an uncontrollable desire for sleep. After the introduction of the amphetamines into medical practice, the number of conditions for which they were prescribed multiplied as did the quantities made available. They were sold without prescription for a time in inhalers and other over-the-counter preparations. Abuse of the inhalers became popular among teenagers and prisoners. Housewives, students, and truck drivers were among those who used amphetamines orally in excessive amounts, and "speed freaks," who injected them, won notoriety in the drug culture for their bizarre and often violent behavior. Whereas a prescribed dose is between 2.5 and 15 mg per day, those on a "speed" binge have been known to inject as much as 1,000 mg every two or three hours. Recognition of the deleterious effects of these drugs and their limited therapeutic value has led to a marked reduction in their use by the medical profession. The medical use of amphetamines is now limited to narcolepsy, hyperkinetic behavioral disorders in children, and certain cases of obesity—as a short-term adjunct to a restricted diet for patients refractory to other forms of therapy. Their illicit use closely parallels that of cocaine in the range of its short-term and long-term effects. Despite broad recognition of the risks, clandestine laboratories produce vast quantities of amphetamines, particularly methamphetamine, for distribution on the illicit market.

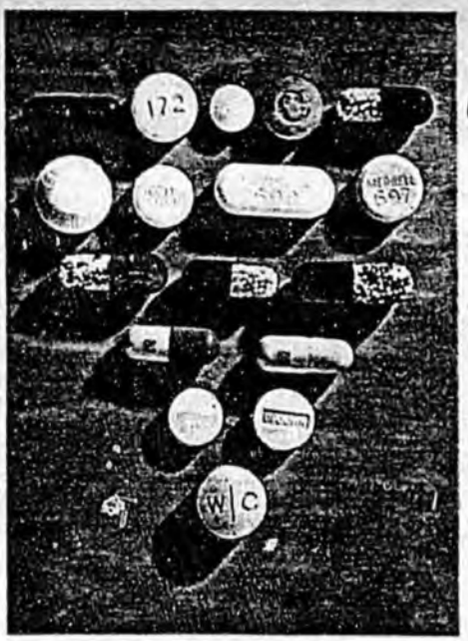
Phenmetrazine (Preludin) and Methylphenidate (Ritalin)

The medical indications, patterns of abuse, and adverse effects of phenmetrazine (Preludin) and methylphenidate (Ritalin) compare closely with those of the other stimulants. Phenmetrazine is medically used only as an appetite suppressant and methylphenidate mainly for treatment of hyperkinetic behavioral disorders in children. They have been subject to abuse in countries where freely available, as they are here in localities where medical practitioners write pre-



Methamphetamine (top row) and amphetamine. The tablets in the bottom row are of clandestine manufacture.

Phenmetrazine (left column) and methylphenidate



Other anorectic drugs: from top to bottom row, phendimetrazine, diethylpropion, phentermine (third and fourth rows), benzphetamine, and chlorphentermine

scriptions on demand. While the abuse of phenmetrazine involves both oral and intravenous use, most of that associated with methylphenidate results from injection after the drug in tablet form is dissolved in water. Complications arising from such use are common since the tablets contain insoluble materials which upon injection block small blood vessels and cause serious damage, especially in the lungs and retina of the eye.

Anorectic Drugs

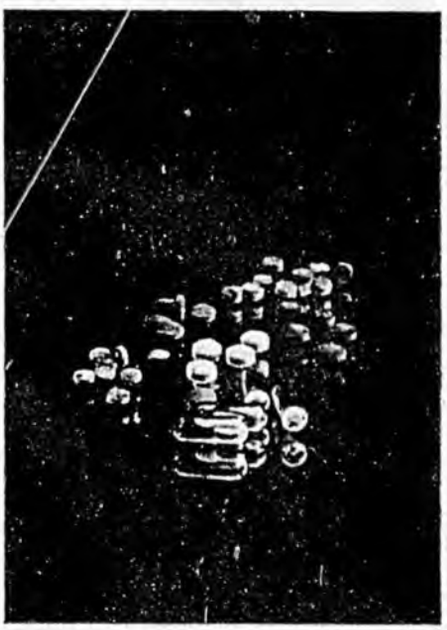
In recent years a number of drugs have been manufactured and marketed to replace amphetamines as appetite suppressants. These so-called anorectic drugs include benzphetamine (Didrex), chlorphentermine (Pre-Sate, etc.), clortermine (Voranil), diethylpropion (Tenuate, Tepanil, etc.), fenfluramine (Pondimin), mazindol (Sanorex), phendimetrazine (Plegine, Bacarate, Melfiat, Statobex, Tanorex, etc.), phentermine (Ionamin, Adipex-P, etc.). They produce many of the effects of the amphetamines but are generally less potent. Abuse patterns of some of them have not yet been established, but all are controlled because of the similarity of their effects to those of the amphetamines. Fenfluramine differs somewhat from the others in that at low doses it produces sedation.

Hallucinogens

Natural and synthetic substances that distort the perception of reality

Hallucinogenic drugs, both natural and synthetic, are substances that distort the perception of objective reality. They induce a state of excitation of the central nervous system, manifested by alterations of mood, usually euphoric, but sometimes severely depressive. Under the influence of hallucinogens, the pupils dilate, and body temperature and blood pressure rise. The senses of direction, distance, and time become disoriented. A user may speak of "seeing" sounds and "hearing" colors. If taken in a large enough dose, the drug produces delusions and visual hallucinations. Occasionally, depersonalization and depression are so severe that suicide is possible, but the most common danger is impaired judgment, leading to rash decisions and accidents. Persons in hallucinogenic states should therefore be closely supervised, and upset as little as possible, to keep them from harming themselves and others. Acute anxiety, restlessness, and sleeplessness are common until the drug wears off.

Long after hallucinogens are eliminated from the body, users may experience "flashbacks"—fragmentary recurrences of psychedelic effects—such as the intensification of a perceived color, the apparent motion of a fixed object, or the mistaking of one object for another. Recurrent use produces tolerance, which tends to encourage resorting to greater amounts. Although no evidence of physical dependence is detectable when the drugs are withdrawn, recurrent use tends to produce psychic dependence, varying according to the drug, the dose, and the individual user. It should be stressed that the hallucinogens are unpredictable in their effects each time they are used.



The abuse of hallucinogens in the United States reached a peak of popularity in the late 1960's, and a subsequent decline was attributed to broader awareness of their hazardous effects. Their abuse, however, re-emerged in the late 1970's.

Peyote and Mescaline

The primary active ingredient of the peyote cactus is the hallucinogen mescaline. It is derived

from the fleshy parts or buttons of this plant, which has been employed by Indians in Northern Mexico from the earliest recorded time as a part of traditional religious rites. The Native American Church, which uses peyote in religious ceremonies, has been exempted from certain provisions of the CSA. Peyote, or mescal buttons, and mescaline should not be confused with mescal, the colorless Mexican liquor distilled from the leaves of maguey plants. Usually ground into a powder, peyote is taken orally. Mescaline can also be produced synthetically. A dose of 350 to 500 mg of mescaline produces illusions and hallucinations lasting from 5 to 12 hours.

DOM, DOB, MDA, and MMDA

Many chemical variations of mescaline and amphetamine have been synthesized in the laboratory, certain of which at various times have won acceptance in the drug culture. DOM (4 -methyl -2, 5-dimethoxyamphetamine), synthesized in 1963, was introduced in 1967 into the Haight-Ashbury drug scene in San Francisco. At first named STP after a motor oil additive, the acronym was quickly reinterpreted to stand for "Serenity, Tranquility, and Peace." A host of related chemicals are illicitly manufactured, including DOB (4-bromo-2, 5-dimethoxyamphetamine), MDA (3, 4-methylenedioxyamphetamine), and MMDA (3-methoxy-4, 5-methylenedioxyamphetamine). These drugs differ from one another in their speed of onset, duration of action, potency, and capacity to modify mood with or without producing hallucinations. They are usually taken orally, sometimes "snorted," and rarely injected intravenously. Because they are produced in clandestine laboratories, they are seldom pure, and the dose in a tablet, in a capsule, or on a square of impregnated paper may be expected to vary considerably. The names of these drugs are sometimes used to misrepresent other chemicals.

Psilocybin and Psilocyn

Like the peyote cactus, Psilocybe mushrooms have been used for centuries in traditional Indian rites. When they are eaten, these "sacred" or "magic" mushrooms affect mood and perception in a manner similar to mescaline and LSD. Their active ingredients, psilocybin and psilocyn, are chemically related to LSD. They can now be made synthetically, but much of what is sold under these names on the illicit market consists of other chemical compounds.

LSD (LSD-25, lysergide)

LSD is an abbreviation of the German expression for lysergic acid diethylamide. It is produced from lysergic acid, a substance derived from the ergot fungus which grows on rye or from lysergic acid amide, a chemical found in morning glory seeds; both of these precursor chemicals are in Schedule III of the CSA. It was first synthesized in 1938. Its psychotomimetic effects were discovered in 1943 when a chemist accidentally took some LSD. As he began to experience the effects now known as a "trip," he was aware of vertigo and an intensification of light; closing his eyes, he saw a stream of fantastic images of extraordinary vividness accompanied by a kaleidoscopic play of colors. This condition lasted for about two hours.

Because of the extremely high potency of LSD, its structural relationship to a chemical which is present in the brain, and its similarity in effects to certain aspects of psychosis, LSD was used as a tool of research to study the mechanism of mental illness. It was later adopted by the drug culture. Although its popularity declined after the 1960's, there are indications that its illicit use is once again increasing.

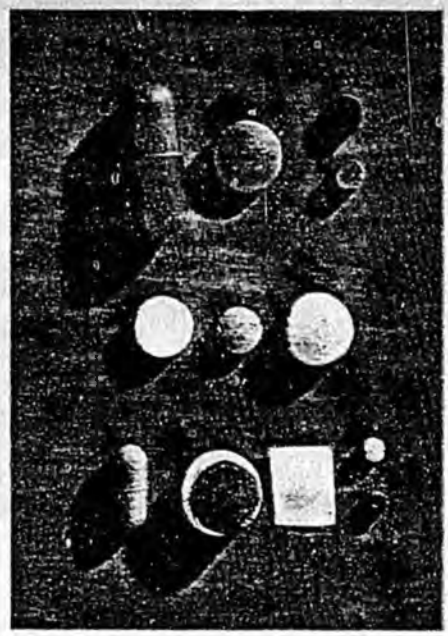
LSD is usually sold in the form of tablets, thin squares of gelatin ("window panes"), or impregnated paper ("blotter acid"). The average effective oral dose is from 30 to 50 micrograms, but the amount per dosage unit varies greatly. The effects of higher doses persist for 10 to 12 hours. Tolerance develops rapidly.

Phencyclidine (PCP) and Related Drugs

According to a consensus of drug treatment professionals, phencyclidine now poses greater risks to the user than any other drug of abuse.

Phencyclidine was investigated in the 1950's as a human anesthetic, but because of side effects of confusion and delerium its development for human use was discontinued. It became commercially available for use in veterinary medicine in the 1960's under the

Peyote cactus



Hallucinogens of clandestine manufacture

Psilocybe mushrooms

trade name Sernylan. In 1978, however, the manufacturer stopped production. That same year phencyclidine was transferred from Schedule III to Schedule II of the CSA, together with two previously unscheduled precursor chemicals.* Most if not all phencyclidine on the U.S. illicit market is produced in clandestine laboratories.

More commonly known as PCP, it is sold under at least fifty other names that reflect the range of its bizarre and volatile effects, including Angel Dust, Crystal, Supergrass, Killer Weed, Embalming Fluid, and Rocket Fuel; it is also frequently misrepresented as mescaline, LSD, or THC. In its pure form a white crystalline powder that readily dissolves in water, most PCP now contains contaminants resulting from its makeshift manufacture, causing the color to range from tan to brown and the consistency from a powder to a gummy mass. Although sold in tablets and capsules as well as in powder and liquid form, it is most commonly applied to a leafy material, such as parsley, mint, oregano or marihuana, and smoked.

The drug is as variable in its effects as it is in its appearance. A moderate amount often produces in the user a sense of detachment, distance, and estrangement from his surroundings. Numbness, slurred or blocked speech, and a loss of coordination may be accompanied by a sense of strength and invulnerability. A blank stare, rapid and involuntary eye movements, and an exaggerated gait are among the more common observable effects. Auditory hallucinations, image distortion as in a fun-house mirror, and severe mood disorders may also occur, producing in some acute anxiety and a feeling of impending doom, in others paranoi and violent hostility. PCP is uniqu among popular drugs of abuse i its power to produce psychoses ir distinguishable from schizophreni Although such extreme psychic re actions are usually associated wit repeated use of the drug, they hav been known to occur in some case after only one dose and to las or recur intermittently, long aft the drug has left the body.

Modification of the manufactu ing process may further yield chem ically related analogs, capable producing, so far as is known, sim lar psychic effects. Three of thes analogs have so far been encoun tered on the U.S. illicit marke where they have been sold PCP.* In view of the severe b havioral toxicity of phencyclidin

*The chemicals are 1-phenylcyclohexylamine and 1-piperidinocyclohexanecarbonitrile (PCC).

* The analogs are N-ethyl-1-phenylcycl hexylamine (PCE), 1-(1-phenylcyclohex pyrrolidine (PCPy; PHP), and 1-[1-(2-thien cyclohexyl]piperidine (TPCP, TCP).

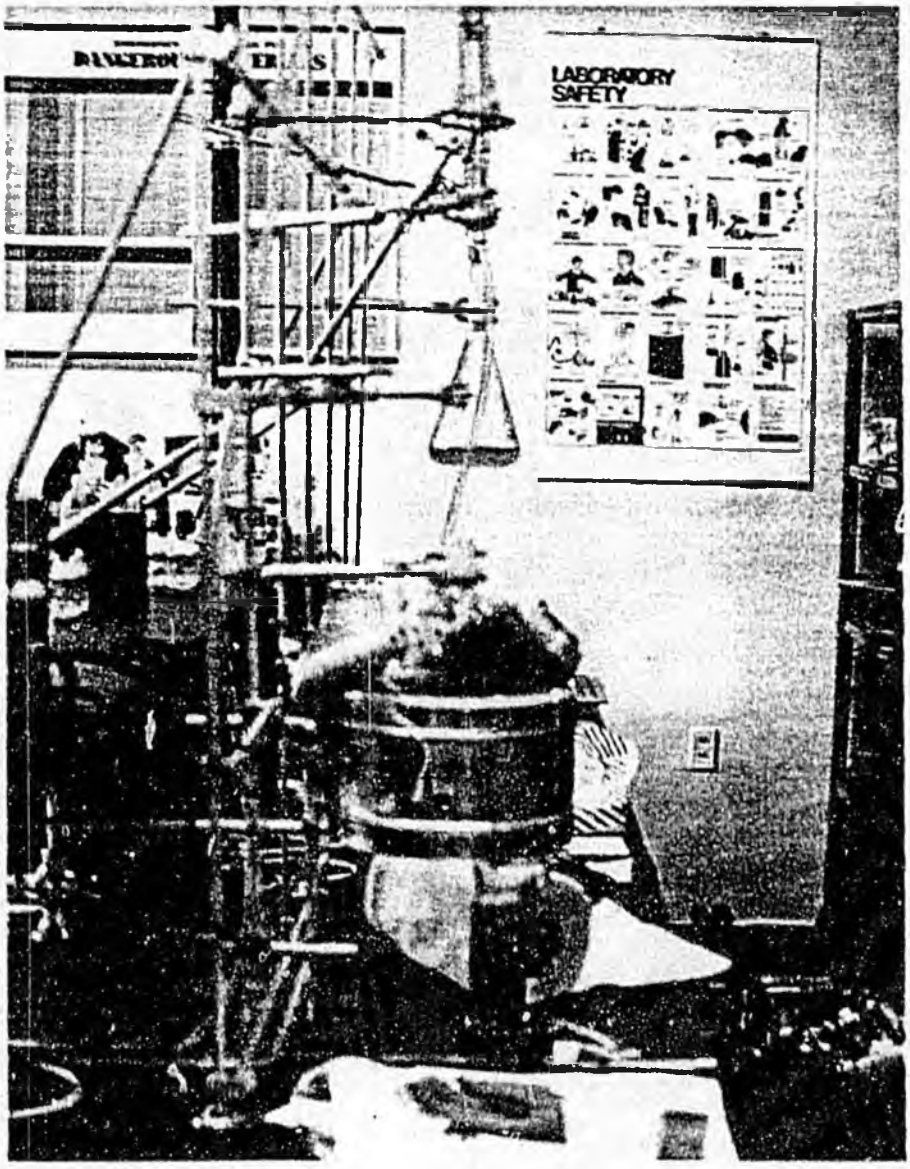
LSD

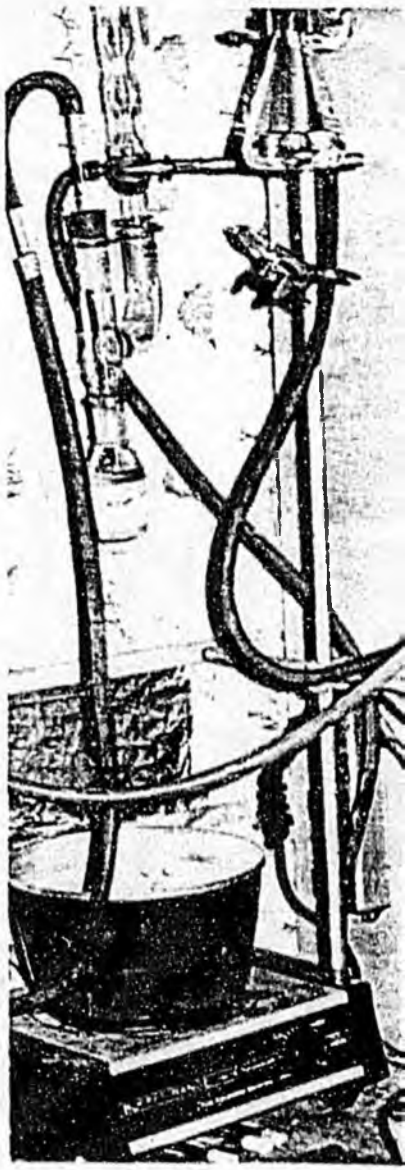
Phencyclidine (PCP)

and its analogs, the Congress in November 1978 passed legislation imposing penalties for the manufacture of these chemicals, or possession with intent to distribute them, more severe than for any other non-narcotic violation under the CSA. (For a first offense, a term of imprisonment of up to 10 years, a fine up to $25,000, or both; for a second offense, imprisonment up to 20 years, a fine of $50,000, or both.) Legislation was also passed which makes it mandatory to report all sales of the common precursor chemical piperidine, its salts, and acyl derivatives to the Drug Enforcement Administration.

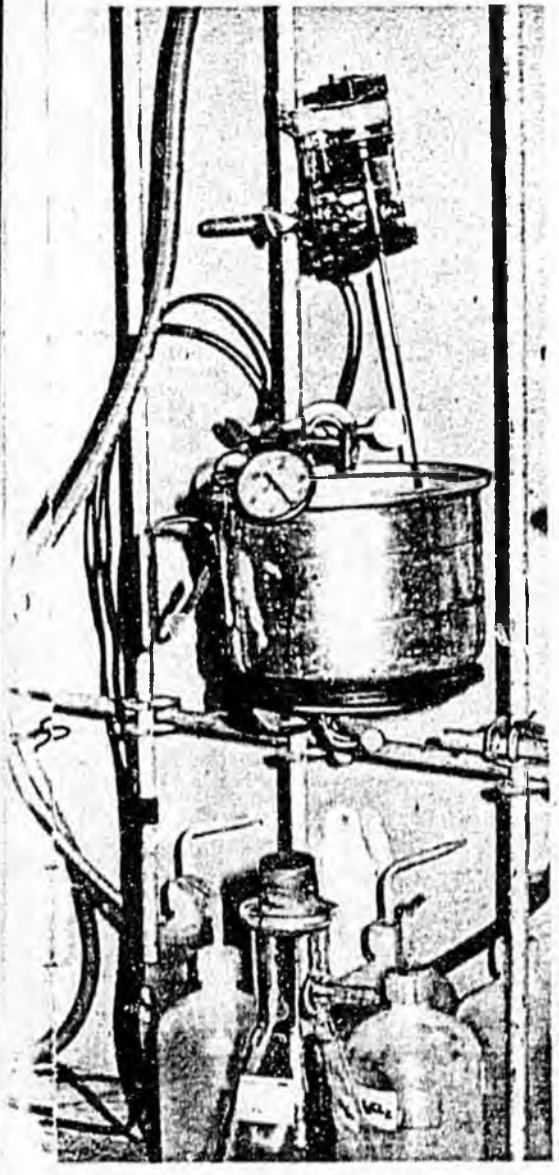
U.S. authorities seized a record number of clandestine drug laboratories in 1978. Seventy-eight of these laboratories were producing PCP. Methamphetamine was found in production at 69 others, one of which may be seen below in the photograph at the left. Despite the sophistication of equipment and easy availability of inexpensive chemicals obtainable through legitimate commercial channels, the clandestine drug industry is a high-risk enterprise, as the chart on the wall serves to remind the operator. This laboratory was

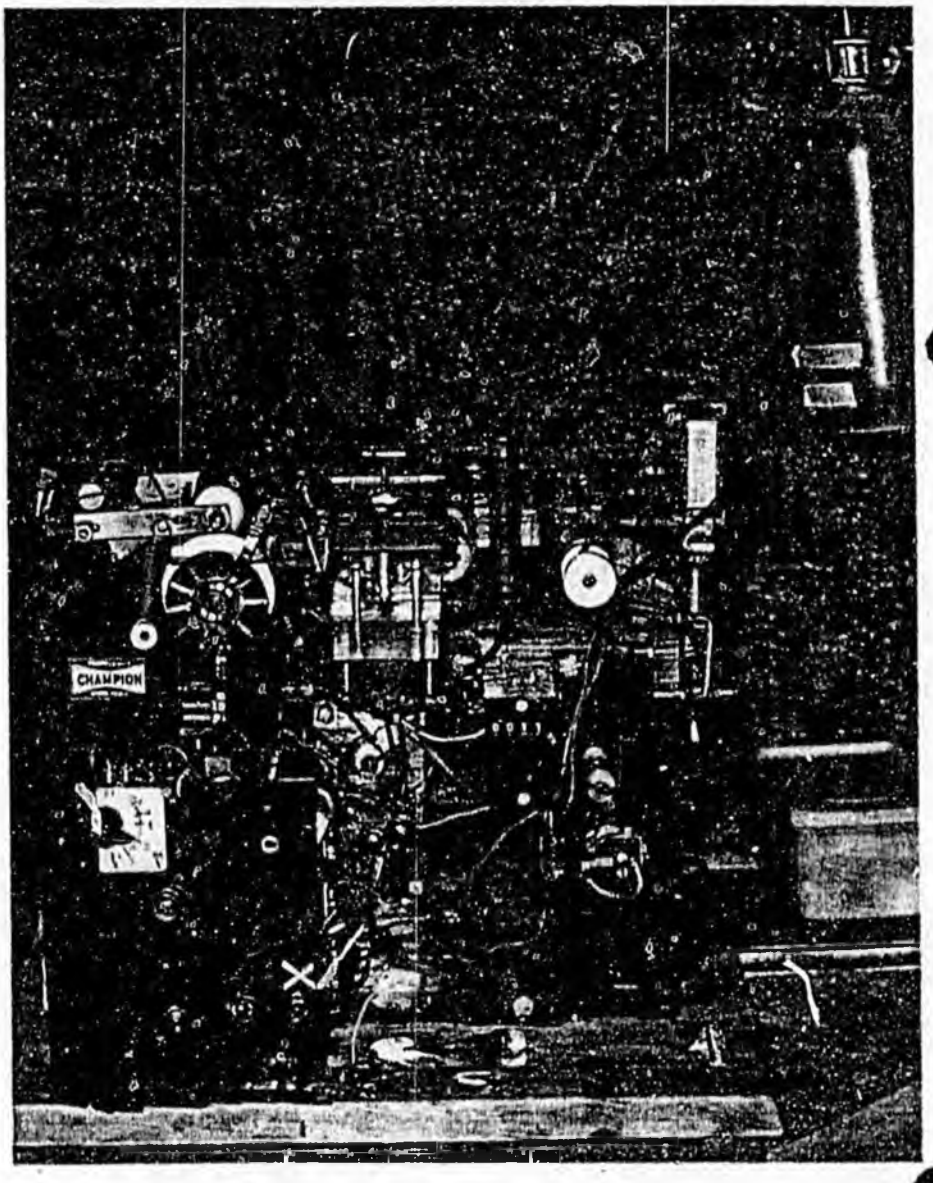
Clandestine Laboratories





seized by DEA in cooperation with the Cambridge, Massachusetts, Police Department. LSD was produced at the laboratory that is shown in the middle, located at a trailer park in Wappinger Falls, near Poughkeepsie, New York. Although the operator had no formal training in chemistry, his procedures were unusually efficient. All solvents were collected in cold traps and batched for later purification; all unreacted materials were removed for later use. The LSD was treated by a four-column chromatographic procedure, yielding a product of extremely high purity. An ingenious contraption, shown at the right, then processed it into precut strips of 100 dosage units of "blotter acid" apiece.





* Section 1. AS14.36.010 (b) is ammended to read:

(b) It is the intent of the legislature that

(1) a program of community school grants be established to provide assistance to local communities in the initial development, implementation and operation of community school programs;

(2) technical assistance, monitoring, training and coordination of statewide efforts to develop and operate community school programs be provided by the department;

(3) the community school program will become fully operational once a plan of operation has been approved by the commissioner; and

(4) evaluation of an approved plan of operation will be conducted by the department in cooperation with the school district. An annual report of all sites evaluated shall be presented by the Department of Education to the Legislature on or before the fifteenth day of the legislative session.

* Section 2. AS14.36.030 is repealed and re-enacted to read:

GRANTS FROM THE STATE. (a) A district operating a community school program under an approved plan of operation may receive an annual grant from the state of one percent of its public school foundation support or $10,000, whichever is greater.

(b) For each fiscal year beginning after June 30, 1980, a district operating an approved community school program under (a) of this section amy receive a further grant from the state equal to the amount allocated by the district to the support of the community school program from sources other than the grant provided under (a) of this section. Local match monies in the form of hard cash may come from any source the district deems appropriate. Local services or in-kind contributions which the district provides for the community schools program may consist

of district costs associated with energy, maintenance, administration, custodial services, telephone, postage and duplicating/ printing costs. Hard cash and in-kind contributions by the district shall be itemized under the community services section of the district's budget. The additional grant under this subsection may not exceed the amount received under (a) of this section.

Sec. 14.36.040. COMMUNITY SCHOOL PROGRAM, APPLICATION FOR GRANTS. Under regulations adopted by the state Board of Education, a district [LOCAL ATTENDANCE AREA] may submit to the commissioner [, THROUGH THE SCHOOL DISTRICT,] an application for a community school grant. An application shall include

(1) a comprehensive plan for the community school program, including, but not limited to, before and after school hours activities for both children and adults, continued education programs for children and adults, and cultural enrichment and recreational activities for citizens in the community;

(2) a provision for a community schools advisory council;

(3) provision for community school direction and coordination to include personnel requirements;

(4) an assurance that the community school program will be reasonably available to residents of all communities within the district [A STATEMENT AS TO THE NUMBER OF SCHOOLS TO BE OPERATED AS COMMUNITY SCHOOLS].

* Sec. 4. AS 14.36.050 is amended to read:

Sec. 14.36.050. APPLICATION REVIEW, DISPOSITION. The commissioner shall review and approve, disapprove or return to the [INITIATOR THROUGH THE] district [BOARD] for modification, an application for a community school program grant.

* Sec. 5. AS 14.36.070(5) is amended to read:

(5) "district" means a [SCHOOL] district of the state public school system as defined in AS 14.12.010 [OR THE STATE-OPERATED SCHOOLS];

* Sec. 6. AS 14.36.070(6) is repealed.

* Sec. 7. This Act takes effect July 1, 1980.

HB
629

THE LEGISLATURE OF THE STATE OF ALASKA
ELEVENTH LEGISLATURE

FISCAL NOTE

I. REQUEST
Bill/Resolution No. Committee Substitute for H.B. 629
Title An act relating to Community Schools
Requested by H.E.S.S. Committee Date February 28, 1980

II. FISCAL DETAIL
Agency Affected Education
Program Category Affected Foundation Support programs
BRU, Program, or Subprogram(s) Affected Community Schools
(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

		FY 80	FY 81	FY 82	FY 83	FY 84	FY 85
100	PERSONAL SERVICES		4.734.0	5065.4	5420.0	5799.4	6205.3
200	TRAVEL						
300	CONTRACTUAL						
400	COMMODITIES						
500	EQUIPMENT						
600	LAND & STRUCTURES						
700	GRANTS, CLAIMS, ETC.						
	TOTAL						

FUNDING (Thousands of Dollars)

GENERAL FUND		4.734.0	5065.4	5420.0	5799.4	6205.3
FEDERAL FUNDS						
OTHER (Specify Fund Source)						

POSITIONS

FULL TIME						
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY'81 cost reflects establishment of 10.0 base or one percent floor as contained in the proposed bill. For FY'82 and thereafter costs are reflected with a 7% inflationary cost factor.

The figures projected here do not take into consideration a possible change in the foundation support.

MINUTES
House HESS Committee Meeting
2/14/80

Members present:

Buchholdt, Chair
Miles
Chatterton
Hurlburt
Barnes

The meeting consisted of a hearing and mark-up session on HB 629.

106 Linda Layfied, Director of the Juneau Community Schools program voiced her support for the bill and described some of the various courses that are offered through Community Schools in Juneau.

The Chair suggested that the Committtee members go over the bill and suggest possible ways of improving it.

There followed a discussion of how evaluation should be written into the bill. It was finally decided that the Committee would wait for the recommendations of the DOE auditors currently evaluating the Community Schools program.

There was then discussion of a proposal of Rep. Munson to require documentation of local matching funds sources. Joe McGill, of DOE, said that he would get the commissioner's clarification on whether or not this was currently required under statute.

There was a discussion of what could constitute in kind contributions to the local match part of the funding. Rep. Chatterton suggested that supplies, energy costs, janitorial costs and other such services should be included in the definition of in-kind contributions. It was generally agreed that this would be good.

There was then a discussion of how the legislature could implement its intent that travel outside of the community not be included in the definition of community school courses that state money could be spent on. It was genreally agreed that the existing Title was specific enough, but that an additional DOE regulation would take care of the travel problem.

551 Rep. Chatterton moved for unanimous consent that staff be asked to prepare the language for an additional section in the bill to fund evaluation of the program by DOE and localities. The amendment would include a provision stating that the report must be submitted to the 12 Legislature by the 15th day of the Session. The motion passed.

747 Rep. Chatterton suggested another amendment to raise the state's contribution from 2% to 3% and to provide that the state would never pay more than a locality contributed to the community schools program. There was much discussion of this amendment, and general disagreement among the other Committee members with Rep. Chatterton's amendment. Rep. Chatterton withdrew the second part of his amendment, and eventually withdrew the first half of the amendment as well.

The Chair noted, as the meeting was coming to a close, that by Monday, she would try to have the auditor's report, and the language for amendments dealing with evaluation and a definition for in-kind contributions.

Rep. Chatterton asked that clarification of the percentage given by the state to localities after the third year of program operation also be provided.

The meeting was adjourned.

MINUTES
House HESS Committee
2/13/80

Members present:

Buchholdt, Chair
Munson
Chatterton
Barnes

1096 The meeting consisted of a teleconference on HB 629, a bill relating to the funding of community schools.
The following people gave the following testimony:

Dia. Carpenter, Bethel City Council

Ms. Carpenter expressed her strong support for community schools because the system is greatly responsive to community needs. In Bethel, it is a welcome relief from the trials of a long winter without much other recreation for leisure time. Ms. Carpenter stated that there was a need for continued funding from the state. Rep. Munson asked if Ms. Carpenter thought there was any overlap between the community schools and the community college systems. Ms. Carpenter stated that each system served different functions within the community.

Paul Sterling, President, Nome School Board

Mr. Sterling voiced a "yes" to HB 629, stating that the community school system "greatly enhanced community environment". Mr. Sterling also noted that state funding was needed to continue the community schools program.

Leroy Owens, Asst. Superintendent, Southwest Regional Schools (Dillingham)

Mr. Owens suggested that districts, especially REAAs, be allowed to incorporate community school funds with other funds provided under the Foundation Program so that together, the total amount of funds could be used to provide program services, based on the individual community's needs. He advocated this approach, he stated, because of a need for coordination among the various programs, and a need for long-range planning and direction of programs.

Mr. Owens' testimony prompted discussion about whether community schools funding should be considered a part of basic education, as some of the other programs that Mr. Owens was referring to, would be.

Mellissa Strombe, Northwest Artic School District

Ms. Strombe stated that HB 629 was "financially inadequate" for her district's needs since there would be no substantial increase in state funding for localities.

The Chair responded that the idea behind community schools was that the locality should provide more money, not the state. This prompted discussion about what the original concept of community schools had been, and what it was today.

Dr. Doug Dralle, Sitka Parks and Recreation

Dr. Dralle supported community schools because of their wide variety of courses and the large numbers of people that they serve.

Dennis Daggett. Kenai Community School Advisory Board

Mr. Daggett expressed his support for the bill, and asked the legislature not to cut back funding for Kenai. Under questioning, he noted that although Kenai is not presently contributing to the funding of community schools, it will be contributing one third of the cost next year.

Jennifer Baggett, Big Lake Comm. School Advisory Council (Wasilla)

Ms. Baggett stated that the state should provide total funding for community schools.

Karl Pojhola, Asst. Superintendent, Kodiak School District

Mr. Pojhola noted that it was not always easy to figure out where local funding dollars came from. There was plenty of money in the Kodiak community schools from Kodiak, but it was not easy to figure out exactly how much came from each local source.

Lisa Menter, Andy Preston, Joy Winneston, Desmond Miller (Sitka)

Ms. Menter and her students expressed their support for the bill.

Daryl Hargraves, Superintendent, Nome public schools

Mr. Hargraves voiced his support for the bill because community schools help other community groups provide their services to a locality, without increasing their funds.

Harry Purdy, Superintendent, Dillingham City schools

Mr. Purdy suggested that the Committee amend the bill to provide total funding for those community without the necessary resources to provide the locality's portion of the funding necessary to run the community school system.

Dan Harman (Sitka)

Mr. Harman stated that the community schools provided several opportunities for new learning and social experiences.

Ken Kassner, Homer Community Schools

Mr. Kassner noted that the community schools were "a terrific umbrella organization". He further noted that they had "injected vitality" into the community college system.

Nel Fite, Big Lake Comm. Sch. Advisory Council (Wasilla)

Ms. Fite noted her support for HB 629.

Ian Fulk, Kodiak Parks & Recreation Director

Mr. Fulk detailed the various sports programs offered in the Kodiak community schools.

Pauline Chanel, Bethel Advisory Board

Ms. Chanel voiced her support for the bill because it would help people of all ages in the community.

Karen Dimond, Sitka

Ms. Dimond noted that she and her friends "love community schools", and that almost everyone she knows derives some benefit from them.

Beverly Kroner, Director, Kenai Comm. School

Ms. Kroner urged "longterm baseline funding" for community shcools.

Gary Stevens, Kodiak Community College

Mr. Stevens noted that the level of cooperation between Kodiak community schools and the Kodiak Community College was very high.

Nix Charles, Jr. (Bethel)

Mr. Nix noted that the community schools program provides a very important use of local tv and radio, and gives people access to these community services.

Mary Holden, Kodiak local arts council

Ms. Holden noted that without community schools, Kodiak would loose alot of "great programs".

Julie Gorham, Kuskokwim Comm. College (Bethel)

Ms. Gorham voiced her support for HB 629.

Leut. John Schoenz, Kodiak

Lieut. Schoenz voiced his support for the bill.

new tape

Chuck Evans, Kodiak

Mr. Evans stated that community schools were the best program that he had seen in his 28 years in the "education business". He stated that a "firm support base" was needed so that localities would not have to worry each year about where there funding was coming from.

The meeting was adjourned.

THE LEGISLATURE OF THE STATE OF ALASKA
ELEVENTH LEGISLATURE

FISCAL NOTE

I. REQUEST

Bill/Resolution No. Committee Substitute for H.B. 629

Title An act relating to Community Schools

Requested by H.E.S.S. Committee Date April 21, 1980

II. FISCAL DETAIL

Agency Affected Education

Program Category Affected Foundation Support Programs

BRU, Program, or Subprogram(s) Affected Community Schools

(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

	FY 80	FY 81	FY 82	FY 83	FY 84	FY 85
100 PERSONAL SERVICES						
200 TRAVEL						
300 CONTRACTUAL						
400 COMMODITIES						
500 EQUIPMENT						
600 LAND & STRUCTURES						
700 GRANTS, CLAIMS, ETC.		3,021.3	3,281.3	3,511.0	3,756.8	$4,019.7
TOTAL						

FUNDING (Thousands of Dollars)

GENERAL FUND		3,021.3	3,281.3	3,511.0	3,756.8	$4,019.7
FEDERAL FUNDS						
OTHER (Specify Fund Source)						

POSITIONS

FULL TIME						
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY'81 cost reflects establishment of 10.0 base or .5 percent floor as contained in the proposed bill. FY'82 is based upon .5 percent of a 52 million dollar increase in the foundation support. FY'83, '84, '85, are based upon a 7% inflationary cost.

TRI-ANNUAL REPORT

Center: Alaska Department of Education

Report Period:
July-Oct. ____
Nov.-Feb. XXXXX
March-June ____

GOAL A TO DEVELOP A GREATER AWARENESS AND UNDERSTANDING OF COMMUNITY EDUCATION THROUGHOUT THE REGION

SA1. Present information about Community Education to different audiences upon request.

Verification: formal presentations about Community Education were made to the following audiences:

* Alaska Asscciation of School Administrators (10)
* Alaska School Boards Association (15)
* Mat-Su School Board (5)
* Copper River School Board (5)
* ACE Advisory Board

SA2. Present information about Community Education to university/community college classes, faculty members, and individual students at every opportunity.

Verification: Community Education information presented at:

* Sheldon Jackson College (1)
* University of Alaska, Juneau (2)
* Individual students (11)
* Alaska Pacific University (2)
* Copper River School District (15)

SA3. Assist in the development of conferences, seminars, or institutes to acquaint people with Community Education.

Verification: Assisted in planning and conducting:

* Inservice with Copper River School Board and Community

SA4. Distribute and/or display available Community Education materials as deemed appropriate.

Verification: The center has distributed some 425 individual pieces of written material pertaining to Community Education. Materials were also distributed at several Community Education workshops.

GOAL B TO PROVIDE CONSULTATION IN SUPPORT OF THE DEVELOPMENT AND/OR EXPANSION OF COMMUNITY EDUCATION PROGRAMS

SB1. Respond to requests for consultant assistance from communities, institutions, organizations, and agencies.

Verification: The center has answered requests for consultant services from nine (9) local communities and agencies/institutions.

Agencies/Institutions	Districts	
* Alaska Community Education Assoc.	* Fairbanks	* Sitka
* Alaska Pacific University	* Valdez	* Hydaburg
* University of Alaska	* Anchorage	
	* Cordova	
	* Copper River	
	* Mat-Su	
	* Klawock	

SB2. Assist in the development of new Community School programs.

Verification: Assisted in the development of Community School programs in the Bering Strait and Iditarod Districts.

SB3. Assist related agencies and organizations in the development of cooperative Community Education programs.

Verification: Assistance was given to:

* Delta/Greely District
* University of Alaska - Rural Education programs
* Fairbanks District
* Eagle River Community Schools
* Copper River District
* Prince William Sound Community College

SB4. Assist in the development and/or growth of the state Community Education Association.

* Continued provision of encouragement and/or direct assistance to the Alaska Community Education Association. Cooperation in production of state newsletter.

GOAL C TO DEVELOP, CONDUCT, AND/OR SUPPORT LOCAL, STATEWIDE, AND REGIONAL COMMUNITY EDUCATION TRAINING PROGRAMS AND RELATED NATIONAL TRAINING EFFORTS

SC1. Sponsor/co-sponsor inservice training sessions for practicing Community Educators in the state.

Verification: No activity this period.

SC2. Assist in the planning and implementation of training efforts facilitated by the Northwest Center as deemed appropriate.

Verification: No activity this period.

SC3. Provide special, individualized Community Education course offerings, including placements, readings, practicums, and internships for students as needed.

Verification: Assisted in course offerings:

* Through the University of Alaska
* Through Alaska Pacific University

SC4. Provide preservice training for Community School leaders.

Verification: Provided preservice training for:

* Community School Coordinators in Southwest REAA

SC5. Establish and/or maintain university/community college Community Education curricula.

Verification: Assisted in:

* Development of special topics at U. of A.
* Helped to maintain curricula at Alaska Pacific University

SC6. Disseminate information concerning state, regional, and national training opportunities.

Verification: Information for training opportunities was disseminated to:

* All Alaska Community Education personnel
* All Alaska Superintendents
* All Alaska Administrators
* All Alaska Community Education Association members

SC7. Provide a specialized training opportunity for a Center Trainee for a ~~3-9~~ 1-3 month period as deemed appropriate.

Verification: Facilitated the approval of traineeship for Robert Doyle, Supervisor of the Anchorage Community School program to spend two months at Alaska Center.

SC8. Provide other related orientation and training experiences as deemed appropriate.

Verification: Provided related orientation to:

* Alaska Department of Education personnel.

GOAL D TO PARTICIPATE IN COMMUNITY EDUCATION RELATED RESEARCH, EVALUATION, AND MATERIALS DEVELOPMENT ACTIVITIES

SD1. Assist in significant Community Education research, evaluation, and materials development efforts by students; independent research organizations; and, other Community Education affiliates.

Verification: Assisted in the Development of:

* Research activities of students at Alaska Pacific University

SD2. Conduct the annual Center evaluation.

Verification: No activity this period.

SD3. Respond to requests for Community Education evaluation assistance within the limits of available resources.

Verification: Assisted in the evaluation of the following programs:

* Mat-Su District
* Juneau
* Dillingham
* Kodiak
* Southwest
* Fairbanks
* Delta/Greely

SD4. Initiate and/or assist in the development of Community Education articles, booklets, and monographs for distribution.

Verification: Initiated the following:

* Prepared a pamphlet on Community Schools in Alaska.

SD5. Acquire pertinent media related to Community Education for addition to the Center's resource library.

Verification: Many articles, books and pamphlets for the center's resource library.

SD6. Assist the Northwest Center in assessing the Coalition's overall effectiveness for 1978-79.

Verification: The Alaska Representative has attended all formal coalition meetings.

SD7. Support those other research, evaluation, and materials development efforts which have a direct relationship to Community Education.

Verification: The Alaska Center has answered/responded to all assessment/inquiries from agencies/organization in Alaska and from the lower 48.

GOAL E TO ESTABLISH WORKING RELATIONSHIPS WITH OTHER AGENCIES TO EXTEND THE BASE FOR COMMUNITY EDUCATION OPERATIONS

SE1. Support the development and provision of Community Education related services in agencies/institutions within the state.

Verification: The following units in the Department have been provided support services:

* Adult Vocational Education
* Department of Public Information section
* Legislative Audit

SE2. Secure an increase in the dollar amount of local contributions to Center operations from all appropriate sources.

Verification: No change from last report. Center is currently seeking $4.7 million from the legislature for FY'81.

SE3. Become involved in activities of related groups as a member or resource person to strengthen cooperative relationships and improve mutual benefits.

Verification. Cooperative relationships were strengthened with:

* Alaska Community Education Association
* Anchorage Community College
* Alaska Adult Education Association

GOAL F TO MAINTAIN AND IMPROVE COMMUNICATIONS AND MANAGEMENT RELATED TO THE NORTHWEST COALITION

SF1. Prepare and submit appropriate articles on state Community Education developments to the Northwest Center for inclusion in the regional newsletter.

Verification: Appropriate articles have been submitted to the Northwest Center for issues of the "very latest".

SF2. Develop and/or assist in the distribution of a state Community Education newsletter.

Verification: Articles, information, resources, and state happenings have been submitted regularly to the State Association for inclusion in the PACE Setter newsletter, as well as the Southeast Alaska Community Education newsletter.

SF3. Prepare and submit tri-annual and annual reports to the Northwest Center within prescribed timelines.

Verification: Accomplished

SF4. Conduct the affairs of the Community Education Center in a manner consistent with its role as a representative of the state; Northwest Coalition; Charles Stewart Mott Foundation; and related national, state, and local agencies and/or organizations and the Community Education movement.

Verification: Process is continuous

SF5. Respond to all written, telephone, or walk-in inquiries and requests for information and/or assistance.

Verification: The center has responded to:

Written	Telephone	Walk-in Inquiries
All 36 Operational School Districts	Approximately 400 Calls	42 Walk-in individuals were supplied the information they requested

SF6. Develop and work with a Community Education Center Advisory Committee.

Verification: The Adult and Continuing Advisory Council serves as the State Community Education Advisory Committee. A major presentation was delivered to the council in January.

SF7. Co-sponsor the publication and distribution of a Directory of Community Education and Related Personnel Within the Northwest Coalition's Region.

Verification: Accomplished

GOAL G TO RESPOND TO REQUESTS FOR ASSISTANCE IN THE DEVELOPMENT AND/OR IMPROVEMENT OF SUPPORTIVE COMMUNITY EDUCATION LEGISLATION

SG1. Respond to all written requests for assistance in developing state and federal legislation supporting Community Education.

Verification: The Center has worked with the Alaska Association for Community Education, Representative Buchholdt's office, Senator Sackett's office and Legislative Affairs in preparation of the new Alaskan Bill. Testimony, at the request of the legislature, was given for H.B. 629.

SG2. Respond to all written requests to assist related agencies, organizations, and associations in the development of state legislation financially supporting Community Education.

Verification: Information concerning Alaska's legislation was sent to all states requesting it.

Proposed Amendment to HB 629

Sec. 5. AS 14.36.070 is repealed and re-enacted to read:

AS 14.36.070. DEFINITIONS.

(1)"community school program" is the delivery system, via the local schools, that helps meet the local needs, wants and concerns;

(2)"commissioner" means the Commissioner of Education

(3)"department" means the Department of Education

(4)"district means a city or borough school district, or a regional educational attendance area.

The public schools of Alaska have served as a focal point for a wide range of community activities.

It has been demonstrated since the earliest days of public education in Alaska that the community school can function as a community center to meet needs of people of all ages.

The demands of our times require that public officials and private citizens alike give serious attnetion to increased educational, vocational, cultural, community development and human services delivered in an efficient, coordinated fashion at the neighborhood level.

The community school concept supports the maximum use of our existing neighborhoold school facilities as the focal point for activities and services.

The members of the Alaska Assocaition for Communtiy Education, the Alaska Adult Education Association, the Alaska Association for Physical Health, Education, Recreation and Dance and Alaska Parks and Recreation Association will be meeting in Anchorage, Alaska during the period of October 15, 16, 17, 1980, in a joint effort to provide coordinated services to Alaska's communities.

Education

COMMUNITY SCHOOL WEEK OFFICIALLY DECLARED

Official Memorandum

By

Jay Hammond

Governor of Alaska

GREETINGS: Juneau, Alaska

The public schools of Alaska have served as a focal point for a wide range of community activities.

It has been demonstrated since the earliest days of puolic education in Alaska that the community school can function as a community center to meet needs of people of all ages.

The demands of our times require that public officials and private citizens alike give serious attention to increased educational, vocational, cultural, community development and human services delivered in an efficient, coordinated fashion at the neighborhood level.

The community school concept supports the maximum use of our existing neighborhood school facilities as the focal point for activities and services.

The members of the Alaska Association for Community Education, Alaska Adult Education Association and ~~Texas~~ Community Education Association will be meeting in ~~Arlington, Texas~~ Anchorage, Alaska, during the period of ~~April 30-May 3~~ October 13-17, 1980, in a joint effort to promote coordinated services.

THEREFORE, I, as Governor of Alaska do hereby designate the week of October 13-17, 1980, as

COMMUNITY Education WEEK

in Alaska

Alaska Recreation & Parks Assn., Alaska Assn. for Physical Health Educ., Rec. & Dance

In official recognition whereof, I hereby affix my signature this ..... day of ....., 19.....

Governor of Alaska

vary theme of conf. as name of week

MEETINGS, MEETINGS, MEETINGS: ARE THEY WORTH IT?

Many things are implied by the statement, "that was a good meeting." The meeting leader presented his material so people understood what he was trying to communicate. He was concise, on time, transmitted information so it could be understood and left the audience with a feeling their time was not wasted, that something was accomplished. In a word, productivity!

Too often you're likely to hear the opposite: "What a waste of time. He didn't really have anything new to say. I know less now than when I went into the meeting. What does he really want?" Some meeting leaders are better than others--no question about that. Their meetings produce results. This productivity makes the difference between a good meeting leader and a poor one.

The following suggestions for more effective meetings are given by the 3M Company in a latest issue of the Leaders Digest.

When to hold meetings: A well-planned business meeting is a management tool that can encourage good communication in any organization. And growth--both of individuals and organizations--often goes hand in hand with successful business meetings. Here are some very good reasons to hold a meeting.

1. *Discuss goals, sell your ideas.* Meetings provide an excellent environment for the give and take of goal-setting and for pre-selling decisions to those people responsible for executing them.
2. *Discover or solve problems.* Meeting groups can bring together bits and pieces of experience which may lead to the discovery and/or solution of a specific problem. An interplay of ideas, experience, insights, contradictions and facts often is the best way to achieve quick analysis of problems.
3. *Handle reports.* A reporting meeting should stimulate both thinking and discussion. It can lead to a common understanding of mutual problems by everyone present. Group presentations also can prompt meeting participants to be thoughtful and organized.
4. *Tell people what they're supposed to do . . . and how.* Good communication helps turn plans into positive action. People need direction and a meeting lets them know what they're to do and how to do it. And team spirit is generated when everyone knows what their role is.
5. *Explain plans and programs.* Meetings are great places to provide information. Rather than being just so many words on a piece of paper, information can be enhanced by the presenter's personality and by visual displays or projections. Key parts of the message can be emphasized more effectively and leave a more lasting influence upon the audience.
6. *Gather opinions and reach a consensus.* There are many situations in business where a quick group response is necessary. A meeting is useful when the participation of such a group is needed for gathering opinions and making a decision.
7. *Train people.* Every meeting has some training value for all participants. But meetings also can be directed very effectively and specifically toward training. Training will make people more valuable to themselves and to their organization.
8. *Build morale and keep things moving.* Meetings can help keep a group's attention and interest in focus. And this usually is essential in maintaining efficiency and meeting deadlines.

When not to hold meetings: Meetings are only one method of communication, a method that sometimes is overdone. Before you call a meeting, think of why you're doing it, who will be there and what you want as a result. Don't call a meeting if phone calls or memos will do the job. If key people cannot be present, you're wasting everyone else's time in a meeting. Don't call a meeting if you don't have enough time to prepare. You'll undermine the very thing you're trying to accomplish. Personality conflicts or the plans of higher management may make the meeting a waste of time. And the cost of holding a meeting just may be prohibitive.

Planning: When you plan meetings, establish your specific purpose and allocate enough time for each topic. Prepare an orderly agenda, but don't hold to it so tightly that people feel they shouldn't participate. Before the meeting, let participants know what it's about, what they're expected to contribute and how long it will last. If you have others on the agenda, be sure to have a walk-through rehearsal--if not a dress rehearsal--so each message is on target and on time. Be sure to specify when, where and who is to be at the meeting. Make sure you invite those who can attend, who have to carry out what's decided, who have good ideas, who can o.k. results and who can represent divergent views. Remember your purpose is productivity . . . which you'll undermine if the right people are not present or if someone on your agenda rambles on, wasting everyone's time.

existing statute, 14.36 provides for 4 years of funding:

year 1:	up to 1/2%	foundation	support
year 2:	1%	"	"
year 3:	1 1/2%	"	"
year 4:	2%	"	"

the funding was tied to the number of community schools in operation the formula is:

$$\frac{\text{no. of community schools}}{\text{no. of schools in district}} \times \text{foundation support} \times \%\ \text{which district receives in that year}$$

Last year, CS HB 394 extended the programs on their 4th year for one more year, at at least the same level of funding the program received in its 4th year

There are currently 21 districts which will be dropping off as of June 30, 1980 due to the formula in the Community School Act of 1975. (list included)

CS HB 629 provides for a state grant of 1% of the foundation support money or $10,000, whichever is greater, to all districts operating community schools.

In addition, the state will match, up to 1% of the foundation support money or $10,000, local effort (cash or in-kind)

The grant application must include an assurance that the community school program will be reasonably accessible to residents of all communities within a district which express an interest in having such a program. (in an REAA, that might mean having a program in each village that has a school; in a city like Juneau, it might mean operating a program downtown, in the valley and in Douglas.)

Community school programs will be evaluated by the Department at least once every 4 years; a report will be submitted to the Legislature annually.

There may be a problem here, as the bill does not address funding to the Department of Education for conducting the evaluations. They would like about $50,000 to do this.

The Department must provide training of personell and help the programs develop an internal monitoring system.

The fiscal note reflects 2% of the foundation support.

Proposed Amendments to the Community School Regulations

Procedures

1. Community Education office reviewed present regulations and made tentative changes.

2. Tentative changes in regulations mailed to 25 Community Education personnel and Superintendents plus 15 members of the Advisory Committee.

3. Advisory Committee met in Anchorage on March 20 and 21 in order to review field input and draft proposed amendments.

4. Proposed amendments circulated in the Department of Education for input and forwarded to Attorney General's Office.

5. Proposed amendments to the Commmunity Schools regulations presented to the State Board of Education for promulgation.

Actions Taken

Prior to the Advisory Committee meeting to review the proposed amendments of the Community School Regulation, copies of the regulations were mailed to the following people in order to solicit their opinions.

District	Person
Lake and Peninsula	Charles White
Klawock	Bill Suss
Annette Island	Larrae Rocheleau
Bering Strait	Carol Aylard
Copper River	Al Krinke
Cordova	Tom Church
Craig	Charla Argo Wright
Delta/Greely	Marty Wells, Jerry Story
Fairbanks	Bob Degraw
Haines	Vivian March, Allen Heinrich
Hoonah	Ken Wicks
Juneau	Linda Layfield
Kake	David Dillman
Kenai	Beverly Cronen, Dennis Daggett
Kodiak	Chuck Evans, Carl Pohjola
Lower Kuskokwim	Judy Farley
Mat-Su	Mike Woodhead, Bruce DeMond, Cindy Woodings
Nome	Bill Karp, Darrol Hargraves
Northwest Arctic	Melissa Strom
Sitka	John Coffee
Southwest Region	Margery Wosiski
Valdez	Jean Kalish
Yakutat	Liz Boario
Yukon-Koyukuk	Colin Baxter

From the above list, thirteen people responded and their input was given to the committee in either verbal or written form.

On March 20th, 21st, an Advisory Committee comprised of the following people was convened in Anchorage in order to draft the proposed amendments to the Community School regulations.

In Attendance

Name	Yes	No	District
Vicki Malone		X	ACE/R2R Advisory Committee
Darroll Hargraves		X	Nome
Bill Suss		X	Klawock
Charles White		X	Lake and Peninsula
Allan Heinrich	X		Haines
Dennis Daggett	X		Kenai
Jerry Story		X	Delta/Greely
Carl Pohjola		X	Kodiak
Jill Waters	X		Municipality of Anchorage
Greg Jefferies	X		Municipality of Anchorage
Alecia Iden	X		Volunteer
Sally Oberstein		X	Municipality of Anchorage
Mike Woodhead	X		Mat-Su
Marty Wells	X		Delta/Greely
Tom Morgan	X		SCRRC
John Warden	X		Northern Institute
Lee Clune	X		Fairbanks
Lyle Marchant	X		Trainee
Liz Hudson	X		Municipality of Anchorage
Tom Healey	X		Anchorage Community College
Joe Miguel	X		Department of Education
Kim Ratz	X		Department of Education

Upon conveneing, the above group of fifteen people stated: their expectations of the meeting; possible additions to the regulations; possible deletions to the regulations; clarification/modifications in regulations; the criterian for match and what the in-kind/match allowances should be. The suggestions of the committee are following.

Initial Expectations of Advisory Committee

Clarification on terms ("matching" definitions)

Clarification/comments on dollar amounts of new bill

Find out other peoples concerns

Need to know "what's going on"

Get input on training, etc.

Revisions of conflicts between administration styles and structures around the state.

Come up with a good set of regulations

"Clean up" grant application process

Coordination of agencies to avoid duplication

Understand and work with regulations

Simplify things so others can understand

Get personal changes in regulations

Addit.ons to Regulations

Use of money for plan ing/training

How to address training
- Paid Staff
- Volunteers

Coordinator between Community Schools and Community College/related agencies

Standardized data collect/report procedures

Define match/in-kind contributions

Grant review process

What happens if funding is less than needed for 1% ± match? - Pro-ration?

Volunteer management

Block grants to districts

"Process" goals and objectives

Delete from Regulations

Planning money has been deleted

Excessive final reporting procedures/requirements

Repetition in Sections 1 and 2

.020B 1-A, 1-B, 1-C
1-B and 1-F/1-C, 1-D
Definition between .020B-1 and B-2

Obligation to Commissioner to provide reports (section B)

Use of word "program" - Section 6, 7, 8

Clarify/Modify in Regulations

New schools - 3 year comprehensive plan

How will a new school be funded? Program expansion?

Coordinator between Community School/Community Education related agency/organization

Definition of Community Education

Local/Department of Education evaluation/reporting

Short term goals for first year also

Long range plans - define/clarify

Standardize data collection/report procedures

In-kind/local contribution

Repitition at certain questions

Process for re-submitting timeline

Carryover funds

Most local level of community involve?

"Reasonable" access to community

Three year plan of service

Definition of Community Schools

What is an advisory council

Criterian for Match

Has to be auditable

Has to be in direct support of program (energy/maintenance)

Cash only

Split match; in-kind/cash

Local tuition/class fees for match, support not use of class fees, but would support use of local charges as match.

Reinforces local commitment

Funds from other programs related to Community Education.

Locally raised funds exclusive of class costs that earmarked force.

In lieu of formal economic income based local tuition funds should be allowed as in-kind dollar match.

In-kind/Match Allowances

In-kind

Energy
Maintenance
Administration
Telephone
Postage
Related agency contribution/services

Not Allowable

Facility rentals

Cash

Other Education programs

The advisory committee then proceeded to go through the current regulations. The final attachments to this report are the current regulations and the proposed amendments to the Community School regulations which the committee would like the State Board of Education to consider. A copy of the current regulations and the proposed amendments are attached for your perusal.

CHAPTER 32.
COMMUNITY SCHOOLS

Section
10. Scope of state-assisted projects
20. Community education grant application
30. Definitions

4 AAC 32.010. SCOPE OF STATE-ASSISTED PROJECTS. (a) Community school grants are made to school districts for planning, establishing, expanding, improving or maintaining community education programs. Two types of grants will be made:

(1) planning grants will be made to help districts and communities to develop comprehensive community education programs;

(2) operational grants will be made to help districts operate community education programs.

(b) Grants are for a period of up to one year. Subsequent applications must be submitted and will be evaluated in the same manner as initial grant applications. (Eff. 3/12/76, Reg. 57; am 12/4/76, Reg. 60)

Authority: AS 14.07.060
AS 14.36.040

4 AAC 32.020. COMMUNITY EDUCATION GRANT APPLICATION. (a) The commissioner will, in the exercise of his discretion, award a planning grant to a district upon an application submitted to him which contains, in narrative form, the following:

(1) objectives for the planning process;

(2) procedures, strategies, and activities for accomplishing the objectives;

(3) a time-line for accomplishing the objectives;

(4) an evaluation design providing for the collection, verification and analysis of data to measure the extent to which the objectives are accomplished by the program;

(5) a proposed budget, indicating the amount of grant funds requested; and

(6) a commitment to report to the commissioner the results of the planning effort.

(b) The commissioner will, in the exercise of his discretion, award a grant for operating a community education program to a district upon an application submitted to him which contains at least the following:

(1) an overall long-range plan which contains provisions to fulfill the following elements of a community education program:

(A) service to an identified community or local attendance area;

(B) potential for accommodation of all age groups as well as specific groups will special needs;

(C) concentration of activities in one or more public facilities;

(D) identification and utilization of cultural, recreational and other existing and planned resources located outside those public facilities in which the activities are to be concentrated;

(E) systematic procedures for identifying and documenting, on a continuing basis, the needs, interests and concerns of the community served and for responding to those needs, interests and concerns;

(F) programs and activities which reflect the array of needs, interests and concerns of the community; and

(G) creation of an active community education council whose members are representative of the community to be served;

(2) projections for expected long-range growth and development in regard to the following aspects of the community education program:

(A) the K-12 regular school program;

(B) facility and resource use;

(C) extended activities for children and youth;

(D) opportunities for the involvement of adults in the community education program;

(E) delivery of various human services at the most local community level; and

(F) community development in general;

(3) a short-range, detailed program plan which includes the following:

(A) program objectives which state specific and measurable outcomes of the selected program components;

(B) procedures, strategies, and activities for accomplishing the program objectives;

(C) a time-line for accomplishing the program objectives; and

(D) an evaluation design providing for the collection, verification and analysis of data to measure the extent to which the program objectives are accomplished by the program;

(4) documentation of the involvement of persons broadly representative of the community to be served by the program in the preparation of the application, and provision for indicating the continued involvement of such persons with the program;

(5) information regarding the administration of the program, including but not limited to

(A) proposed organizational arrangements for program administration and qualifications and roles of staff who will administer the program;

(B) provisions for securing appropriate training, where required, of a short-term, inservice or preservice nature for administrators, staff, community members, and others who will plan and carry out programs;

(C) an organizational chart indicating the relationship between individuals groups and agencies affected by the plan; and

(D) a statement as to the proportion of the total school district which operates as distinct administrative units for community education purposes;

(6) a commitment by the applicant to collect and make available information which may be required by the commissioner in accordance with those reasonable time constraints which he may establish, for purposes of carrying out program evaluations;

(7) letters from agencies and organizations affected by the program indicating affiliation or cooperation with the applicant as indicated in the program design; and

(8) a budget statement indicating money to be provided during the period of the requested grant by various agencies, organizations and individuals to support community education in the community to be served by the program.

(c) As necessary, incomplete or inadequate applications will be returned to the applicant for modification. Unfunded applications will be reviewed with comments provided by the department for future use by the applicant. (Eff. 3/12/76, Reg. 57; am 12/4/76 Reg. 60)

Authority: AS 14.07.060
AS 14.36.040

4 AAC 32.030. DEFINITIONS. In this chapter, unless the context requires otherwise

(1) "community education" means a "community school program" as defined in AS 14.36.070;

(2) "district" means a city or borough school district, or a regional educational attendance area;

(3) "program" means a community education program which meets the requirements set forth in sec. 20 of this chapter;

(4) "public facility" means a facility owned or operated by the state, or a political subdivision of the state. (Eff. 3/12/76, Reg. 57)

Authority: AS 14.07.060
AS 14.36.040

CHAPTER 32
COMMUNITY SCHOOLS

Section
10. Scope of state-assisted projects
20. Community education grant application
30. Definitions

4 AAC 32.010. SCOPE OF STATE-ASSISTED PROJECTS. (a) Community school grants are made to school districts for planning, establishing, expanding, improving or maintaining community education programs.

(b) The initial grant application will be comprehensive in nature and is for a three year period. During years two and three of the grant application, updated short term goals and objectives for that year's program activity will be evaluated in the same manner as initial grant applications. Grants are for a period of up to one year.

4 AAC 32.020. COMMUNITY EDUCATION GRANT APPLICATION (a) The commissioner, in the exercise of his discretion will award a grant for operating a community education program to a district upon an application submitted to him which contains at least the following:

(1) an overall, long range plan that contains provisions to:

(A) identify the community or local attendance area;

(B) accommodate all age groups and groups with special needs;

(C) concentrate activities in one or more public facilities;

(D) identify and utilize human and physical resources other than those public facilities in which activit.es are concentrated;

(E) develop a systematic procedure for identifying;

(F) provide programs and activities that respond to identified community interests and needs;

(G) continue utilizing an active community council whose members are representative of the community to be served; and

(H) attract, train and maintain a group of volunteers to implement programs and activities.

(2) new or expanding programs shall develop a plan of action that includes provisions that:

(A) develop community understanding of community education/community schools;

(B) initiate and train a local community education council;

(C) assist in the definition of local programs;

(D) provide for the selection and training of community school personnel; and

(E) integrate community education/community schools programs within total district programs and services.

(3) a three year plan of service which projects expected long-range growth in the following program components:

(A) the K-12 regular school program;

(B) facility and resource use;

(C) extended activities for children and youth;

(D) opportunities for the involvement of adults in the community school program;

(E) delivery of various human resources at the most appropriate community level; and

(F) community development in general.

(4) an annual short range detailed program plan for each year of the three year plan which includes the following:

(A) specific and measurable objectives in each component area listed under number (3) above.

(B) the methods for accomplishing the objectives;

(C) a timeline for accomplishing the objectives; and

(D) an evaluation process which measures that the objectives were accomplished.

(5) documentation of how community representatives are involved in the preparation of the grant application and how community members continue to be involved in the program.

(6) information regarding the administration of the program:

(A) proposed organizational arrangements for program administration and qualifications and roles of staff who will administer the program;

(B) provisions for securing appropriate training, where required, of a short-term, inservice or preservice nature for administrators, staff, community members, and others who will plan and carry out programs;

(C) an organizational chart indicating the relationship between individuals, groups and agencies affected by the plan; and

(D) an assurance that the community school program will be reasonably available at the local level to all residents of the community who wish to be involved.

(7) a commitment by the applicant to collect and make available appropriate information which is required by the commissioner in accordance with those reasonable time constraints which he may establish, for purposes of carrying out evaluations;

(8) letters from community agencies and organizations with responsibilities to the same population indicating affiliation and the degree of present and planned cooperation with the applicant as indicated in the program design.

(9) (A) a budget statement indicating income from:

(1) basic community school state grant funds;

(2) funds in the form of local cash and/or inkind services used to match the receipt of additional state funds;

(3) additional community school state funds (items (6)B and C above are required only of the local district applies for matching funds); and

(4) a budget of planned expenditures for the grant period.

(B) at the discretion of the commissioner, grant applications shall be annually reviewed by a committee of community educators. Those districts which have an incomplete or an inadequate application shall have a minimum of three months to write and submit a revised application for approval.

4 AAC 42.030. DEFINITIONS. In this chapter, unless the context requires otherwise

(1) "community education" is the philosophical concept where a community maximizes its own potential to meet its needs, wants and concerns;

(2) "community school program" is the delivery system, via the local schools, that helps meet the local needs, wants and concerns;

(3) "district" means a city or borough school district, or a regional educational attendance area;

(4) "program" means a community education program which meets the requirements set forth in section 20 of this chapter;

(5) "public facility" means a facility owned or operated by the state, or a political subdivision of the state;

(6) "community development" means an ongoing process of community improvements, which includes both individual development as well as the promotion of the health, safety and well being of the community and its residents;

(7) "resources" means physical, financial and human contributions (paid and volunteer);

(8) "community council" means a group broadly representative of the community served, whose members may include program participants (e.g., youth, young adults, adults and senior citizens) and cooperating agencies and organizations;

(8) "in-kind monies" means for purposes of budget preparation, those district expenditures which are directly related to the operation of the community school. These in-kind monies will come from:

(A) energy;

(B) administration;

(C) custodial;

(D) maintenance;

(E) postage; and

(F) duplicating costs.

receive, in addition to funds provided under (a) of this section, a further grant of up to one per cent of that public school foundation support or their flat grant amount, whichever is the greater amount on an equal matching basis with the amount of match provided by them from state and local sources in support of the program. In the event that the Legislature does not appropriate the full amount the department shall prorate the grants on a proportional basis.

(c) Pursuant to section 1. AS14.36.010 (b) (4), the legislat · shall appropriate to the State Department of Education a sum equal to one per cent of the total state appropriation granted under section 2. AS14.36.030 (a) and (b)

(c) optional Pursuant to section 1. AS14.36.010 (b) (4), the State Department of Education shall retain and hold in abeyance a sum equal to one per cent of the total state appropriation granted under section 2, AS14.36.030 (a) and (b).

Sec. 14.36.040. COMMUNITY SCHOOL PROGRAM, APPLICATION FOR GRANTS. Under regulations adopted by the State Board of Education, a school district may submit to the commissioner an application for a community school grant.

Sec. 14.36.050 DEFINITIONS. In this chapter

(1) "board" means the governing body of a school district;

(2) "commissioner" means the commissioner of education;

(3) "community school program" means the composite of those educational, cultural, social and recreational services provided the citizens of a community, except those services normally provided through the regular instructional program;

(4) "department" means the Department of Education;

(5) "district" means a district of the state publ school system as defined in AS 14.12.010;

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the provisions of Title 24 of the Alaska Statutes and a special request of the Legislative Budget and Audit Committee, a review was conducted of the Department of Education's Community Schools Program to determine:

1. if the financial statements appearing in the State Annual Financial Report for Fiscal Year 1979 are fairly presented;

2. the compliance by the Department of Education with applicable State statutes and regulations governing fiscal activities and program operations; and

3. if the program was operated in an effective, efficient and economical manner.

Scope

The major areas reviewed were the agency's operations and management of the program. Our review consisted of analyzing and evaluating the following:

1. applicable statutes and regulations;
2. agency policies and procedures;
3. interviews with agency and other State personnel;
4. interviews with school district personnel - superintendents, Community Schools coordinators, teachers, etc.;
5. questionnaires sent to district community school coordinators, superintendents and school board members;
6. tests of records and documents of the Department of Education (DOE);
7. on-site visitations at two school districts.

Scope Constraint

Prior to FY '79, DOE had not collected, recorded and maintained pertinent files and statistics relating to the program.

ORGANIZATION AND FUNCTION

On June 3, 1975, the Alaska State Legislature passed the Community Schools Act, AS 14.36, to provide State leadership and financial support to encourage and assist local school districts in establishing community school programs. Community Schools is operated by the Department of Education as one component of the Adult Education and Vocational Training Program, and provides local community school programs with financial support through foundation program grants.

The Community Schools Program is designed to involve the citizens of the community and to make the school facilities available to all Alaskans for academic, cultural, recreational and social enrichment endeavors. The Program promotes a more efficient use of school facilities by utilizing school buildings and equipment beyond the normal school day.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Department of Education (DOE) should issue operating community schools grant funds in accordance with AS 14.36.030.

DOE was approving community schools grant funds based on the number of students in school sites with community school programs rather than the number of schools used for community school programs as specified in AS 14.36.030. As a result, approximately $268,000 were allocated to nine school districts in excess of their proper entitlement for FY '79 (see Schedule below).

DOE did use the proper formula (based on school sites) in calculating FY '80 district allocations. However, since DOE was directed to fund school district grants at or above the FY '79 funding level, four districts received a total of $200,000 above the calculated allotment for FY '80.

DOE should comply with the funding formula specified in AS 14.36.030 in awarding future community schools grants.

SCHEDULE OF DISTRICTS FUNDED IN EXCESS OF ENTITLEMENT

District/REAA	FY '79	FY '80
Anchorage	$ 74,509	$ 74,509
Fairbanks	73,282	68,404
Kenai	53,410	53,410
Mat-Su	5,282	-0-
Chatham	4,175	3,677
Delta Greeley	10,613	-0-
Kodiak	2,946	-0-
North Slope	18,474	-0-
Northwest Arctic	25,309	-0-
Total	$268,000	$200,000

Recommendation No. 2

DOE should strengthen grant reimbursement review procedures.

DOE paid school districts for reported community school expenditures even though the reimbursement requests showed violations of DOE established reimbursement criteria. We found:

1) a reimbursement for a line item expenditure exceeding the budgeted amount by $22,000;
2) a reimbursement based on purchase orders rather than actual disbursements;
3) fourteen (14) reimbursement requests signed by school district employees who were not on the authorized signature list of DOE. However, by contacting the districts involved, we learned that all but one of the employees were actually authorized by their local school boards.

In addition, a review of several school districts' audit reports showed that community school expenditures reimbursed did not agree to audited expenditures. For example, one school district had been reimbursed $20,531 more than the expenditures per the audit report. This was due, in part, to reimbursement procedures that allowed the school district to submit a detailed list of expenditures without requiring financial statements supporting the charges. It was also due to the school district not having established a separate fund for the community school grant.

Therefore, we recommend that DOE make a more thorough review of reimbursement requests. We also recommend that a review of the annual audit reports of the school districts be included as a part of the grant closeout procedure.

Recommendation No. 3

DOE should comply with Alaska Statutes by approving only one planning grant to establish a community school program in an attendance area.

DOE approved planning grants for attendance areas that had an established operating community school program. Some of these areas were in their third and fourth year of operating grants. However, AS 14.36.010 states, in part ". . . the community school program will become fully operational at the beginning of the second fiscal year following its authorization", and, in the opinion of our legal counsel, Legislative Affairs Agency, Division of Legal Services, the intent of the Legislature was to limit planning grants to the first year only.

Approving planning grants to districts with operating programs reduces the available planning grant funds for districts attempting to establish a community school program.

DOE should award future planning grants only for the purpose of establishing a community school program in attendance areas that have no operational program.

Recommendation No. 4

DOE should collect, record and maintain statistics of the community schools program.

DOE needs relevant facts and statistics for evaluating the effectiveness and progress of the community schools program. Many past statistics have not been collected and maintained, for both before and after State funding, such as:

1. number of attendance areas/school districts with community school programs;
2. amount of community resident involvement;
3. local and other funding involved; and
4. number of applications reviewed.

DOE should keep these and other records in order to support its budget request, evaluate its personnel and determine areas of need.

Recommendation No. 5

DOE should perform on-site evaluations of district community school programs.

DOE has not performed any on-site evaluations of the various districts' community school programs since 1977. These evaluations are necessary to properly manage the community schools program. The information generated points out the effectiveness, efficiency and economy of the program.

In addition, it provides monitoring of information submitted to DOE by the districts. For example, several school districts submitted grant applications indicating that all the schools in their district were being used for community school sites; however, the questionnaires returned by the community school coordinators showed less than 100% were being used for community school sites. Since the number of school sites used for community schools is the basis for funding, it is essential that information be accurate. On-site evaluations would provide information needed to evaluate the accuracy of the districts' reports. Therefore, we recommend the establishment of an on-site evaluation program.

STATE OF ALASKA

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

AUDIT DIVISION
POUCH W—ALASKA OFFICE BUILDING

FINANCE DIVISION
POUCH WF—STATE CAPITOL

JUNEAU, ALASKA 99811

February 13, 1980

Members of the
Legislative Budget and Audit Committee:

We have examined the Statement of Expenditures and Encumbrances Compared with Appropriations for Operating Programs for the State of Alaska, Department of Education, Community Schools Program, for the fiscal year ended June 30, 1979. Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the Statement of Expenditures and Encumbrances Compared with Appropriations for Operating Programs presents fairly the appropriations, expenditures, encumbrances, and closing balance of the State of Alaska, Department of Education, Community Schools Program, for the fiscal year ended June 30, 1979, in accordance with the accounting policies as stated in Note 1 on a basis consistent with the preceding year.

Note 1 - Summary of Significant Accounting Policies

Alaska Statute 37.05.150 requires the accounting policies of the State of Alaska to conform to generally accepted accounting principles. The following is a summary of the significant policies.

Basis of Accounting. The General Fund utilizes the modified accrual basis of accounting. Modifications in such method from the accrual basis are as follows:

1. Revenues are recorded as received in cash except for:

   (a) revenues susceptible to accrual; and

   (b) material revenues that are not received at the normal time of receipt.

2. Expenditures are recorded on accrual basis except for:

   (a) Certain types of expenses which are considered expenditures at time of purchase:

      (1) inventory type items;

      (2) prepaid expenses, such as insurance; and

      (3) interest on long-term debts.

   (b) Encumbrances which represent:

      (1) valid obligations accrued at June 30, 1979 and paid during the reappropriation period; and

      (2) purchase order and contract commitments at June 30, 1979, which were recorded by August 31, 1979.

General Fixed Assets. General fixed assets purchased are recorded as expenditures in the general or capital project fund at time of purchase. Such assets are capitalized at cost in the general fixed assets group of accounts. No depreciation has been provided on general fixed assets.

Note 2 - Community Schools Adjustment

This is the account for the grants awarded to the school districts for planning and operating community school programs. There are no costs included here for the State's administration of the program.

SUPPLEMENTAL INFORMATION

STATE OF ALASKA

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

AUDIT DIVISION
POUCH W—ALASKA OFFICE BUILDING

FINANCE DIVISION
POUCH WF—STATE CAPITOL

JUNEAU, ALASKA 99811

February 13, 1980

Members of the
Legislative Budget and Audit committee:

Our examination of the financial statements presented in the preceding section of this report was made primarily to form an opinion on such financial statements. The supplementary information, contained in the following pages, is not considered necessary for the fair presentation of the financial statements of the State of Alaska, Department of Education, Community Schools Program, but is presented as additional analytical data. However, the following information has not been audited by us, but was taken from records of the Department of Education, and, accordingly, we do not express an opinion on it.

Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit

STATE OF ALASKA
DEPARTMENT OF EDUCATION
SCHEDULE OF COMMUNITY SCHOOLS GRANTS BY DISTRICT
For the Fiscal Years Ended June 30, 1976, 1977, 1978, 1979 and 1980
(UNAUDITED)

	Actual Expenditures							Grant Amount

QUESTIONNAIRE SENT TO
COMMUNITY SCHOOL COORDINATORS

Name of Grantee: 34 School Districts

Type of Grant, July 1, 1978 - June 30, 1979

Planning [16]

Operational:
3 1st yr 10 2nd yr 10 3rd yr 11 4th yr

Background Information

1. How many schools are in your district? 292

2. How many schools are used as community education sites? 189 (64.7%) 25 districts use 100% of district schools.

3. How many community school coordinators do you have in your school district?

   a. Full-time 52

   b. Part-time 73

   c. How many hours per week (average)? 2-40 hrs

4. How many students (K-12) were enrolled in your school district in Fall of 1978?

   a. Elementary 44,232 b. Secondary 36,833 c. Total 81,065

5. What is the overall population of the community (or communities) within your district? 410,841

6. What are the major objectives of the community education program in your district? (Please check all that apply and place a "1" to the left of the most important.)

Applies	"1"	
33	9	Expanding the use of schools beyond normal school hours.
31	2	Providing educational services/programs to out-of-school youth and adults.
33	9	Providing low-cost cultural, recreational and social opportunities for all community members.
28	4	Increasing social interaction, ethnic intergration, and participation in school and other public decision-making processes.
33	4	Utilizing more fully human resources and community agencies for broad community purposes.
29	0	Providing additional benefits to regular instructional programs (K-12).
		Other(s) (specify):
3	1	a. Provide/develop advisory councils
8	0	b. Various other objectives

Facilities Used for Community Education (C.E.)

A. School Facilities

Type of Facility	No. In District	No. Used for C.E.	Most Frequent Response: Type of Program (Refer to Pg. 4 for Types)	Number Hours Used: Per Week	Per Year
1. Multi-purpose classroom	3003	407	Recreation - 21	1,700	65,534
2. Specialized classroom	375	186	Education Enrich.-21	1,827	33,873
3. Playground	191	99	Recreation - 21	688	17,018
4. Gymnasium	118	79	Recreation - 30	1,103	39,103
5. Shops (wood, auto, etc.)	126	62	Voc. Training - 18	297	5,388
6. Library	199	82	Education Enrich.-19	270	8,343
7. Auditorium	30	18	Social/Cultural - 8	44	561
8. Cafeteria	95	53	Social/Cultural - 12	179	3,116
9. Other	127	66	Recreation - 10	1,396	24,268

Please list the top ten groups who use the school facilities for community education activities (Examples include: Boy Scouts, senior citizen clubs, social clubs, religious groups, clinics, etc.):

1. City/Borough Parks & Recreation
2. Basketball Leagues
3. Scouting Organizations
4. Public Health Services;Red Cross
5. Native Organizations
6. Civic Organizations; Lions Club, etc.
7. PTA
8. State Agencies
9. Senior Citizens Groups
10. Miscellaneous

B. Other Community Facilities

Type of Facility	No. Used for C.E.	Most Frequent Response: Type of Program (Refer to Pg. 4 for Types)	Number Hours Used: Per Month	Per Year
1. Government Non-Recreational	78	Education-10 Social-10	540	4,376
Recreational	52	Recreation-16	592	10,377
2. Business	38	Education-5 Recrea.-5	247	1,805
3. Service Club	11	Recreation-4	54	538
4. Social Club	17	Recreation-6	347	3,393
5. Other (specify):	132	Recreation-10	1,403	14,707

Please list the top ten groups who use the above non-school facilities for community education activities:

1. City Borough Parks & Recreation
2. Native Organizations
3. Miscellaneous
4.
5.
6.
7.
8.
9.
10.

IMPACT ON K-12 PROGRAM

Is the community education program providing resources to the K-12 education program?

☐ Yes ☐ No

Activity	Elementary Students		Secondary Students		Total K-12 Students	
	#Activities	#Involved	#Activities	#Involved	#Activities	#Involved
1. Field Trips	95	2,979	22	574	117	3,553
2. Volunteer Aides	62	2,481	31	536	93	3,017
3. Tutorial Service	16	705	20	87	36	792
4. Volunteer Instructors	187	3,053	66	1,746	253	4,799
5. Other (specify):	120	6,242	77	3,186	197	9,428

PROGRAMS

Indicate below which types of programs are offered to each age group and how many persons participate (P = number of programs; S = number of students).

Community Education Programs Offered by School District	Children (Pre-School through Elementary)		Youth (Secondary)		Adults (Ages 18 through 60)		Senior Citizens (Over 60)		Mixed Ages (Children through Seniors)		Total All Age Groups	
	P	S	P	S	P	S	P	S	P	S	P	S
Education/Curriculum Enrichment	250	5,217	184	2,589	528	6,644	63	113	73	2,013	1,098	16,576

What innovative programs have been offered through your community school program (i.e., activities for the handicapped or senior citizens, etc.)? _____

Community Agencies' Involvement

Please list the community agencies which organized and/or sponsored the community education activities listed under PROGRAMS above, and indicate how the agency was involved.

Type of Agency	Most Frequent Response Type of Program(s) Organized/Sponsored		Did the Agency (please check): Make Facilities Available?	Make Instructors Available?	Contribute Money?	Contribute Material?
Health-Related Agencies	Education	17	10	14	1	13
Parks and Recreation Depts	Recreation	8	7	8	3	6
Legal Assistance	Education	4	1	4	0	3
Community/ Civic Groups	Social	11	5	6	9	7
Business and Industry	Social	6	2	4	2	1
Other Government Agencies	Education	11	8	7	1	8
Other (Specify):	Education	11	6	5	5	6

Community Residents' Involvement

The following question is designed to tell us how and in what areas community residents provide input to community education programs.

For example, assume the following: 1) The Community Schools Advisory Council is the primary vehicle (source) of input to setting priorities, and is the secondary input to program development; 2) the PTA is the primary vehicle for needs assessment and tertiary (third) for other support. Using P = primary vehicle for input, S = secondary vehicle for input, and T = tertiary vehicle for input, your answer would be marked as follows:

Vehicle for Community Residents' Input	Program Development	Needs Assessment	Program Evaluation	Setting Priorities	Other Support
Community Schools Advisory Council	S		P		
PTA		P			T

Using the above example, please indicate how the residents in your community provide input to the community education program:

Vehicle for Community Residents' Input	Program Development P	S	T	Needs Assessment P	S	T	Program Evaluation P	S	T	Setting Priorities P	S	T	Other Support P	S	T
Community Schools Advisory Council	21	8	2	20	5	1	23	4	2	25	3	1	8	4	4
PTA	1	2	3		1	1	0	3	1	1	3	3	0	2	2
Other Parent Advisory Groups	2	7	1	5	7	1	1	8	1	1	9	1	1	3	3
Block Clubs	1	2	1	1	0	1	0	1	2	0	1	1	0	1	1
Telephone Tree	0	5	2	1	2	2	2	1	1	0	2	1	2	2	4
Community Associations	6	10	3	3	6	3	4	5	2	2	9	2	5	3	2
Informal Network	7	12	3	9	8	4	4	11	4	2	14	5	2	4	6
Other (specify):	5	3	1	5	3	2	3	4	1	1	4	2	1	1	1

Technical Assistance and Funding

1. Have you asked for technical assistance from the State Department of Education?

23 Yes

In what areas (please check):	
Establishing program goals and objectives.	11
Local needs assessment.	6
Identification of existing resources.	4
Staffing patterns.	6
Budgeting.	13
Establishing methods of community feedback.	7
Preparation and filing of grant application.	20
Maintaining financial records.	4
Establishing communication and cooperative planning mechanisms.	10
Other (specify): Training, Planning Grant Assistance, Regulations Interpretation.	5

10 No

From what source(s) do you obtain technical assistance (please check where applicable)?	Paid	Non Paid
Direct contacts	9	7
Talent banks	1	7
Other agencies (please specify):	4	10

2. Did you receive technical assistance from the State Department of Education?

25 Yes 8 No

What was the quality of assistance (Check one)?	Excellent	Good	Fair	Poor
Establishing program goals and objectives.	15	6	1	0
Local needs assessment.	0	5	2	0
Identification of existing resources.	1	3	1	1
Staffing patterns.	1	2	4	0
Budgeting.	4	7	0	0
Establishing methods of community feedback.	3	3	1	0
Preparation and filing of grant application.	13	6	3	0
Maintaining financial records.	0	3	2	0
Establishing communication and cooperative planning mechanisms between districts.	6	4	4	0
Other (specify):	0	0	1	0

3. What program areas have suffered in the past because of cutbacks in State funding? Please specify:

Inadequate personnel to administer programs. Unable to expand and add programs where interest is shown.

4. What were the sources of funding for your community education program in Fiscal Years 1978 and 1979? (Enter dollar amount where applicable.)

Source	FY 1978	FY 1979
State Community School grant	$ 858,915	$ 1,137,099
Federal Community School grant	-0-	-0-
School District	486,053	517,300
Community Organizations	102,000	126,000
Other (specify): _____	650,289	851,016
_____		
_____		
Total Community Education Funding	$ 2,097,257	$ 2,631,415

5. Has an on-site evaluation of your community schools program been done by a representative of the State Department of Education?

3 Yes 31 No

When? 1977

Name of representative _____

Title of representative _____

6. Have your community school program accounting records been reviewed on-site by a representative of the State Department of Education? (Do not include annual audits by CPA firms.)

Yes 34 No

When? _____

Name of representative _____

What were the results of your audit or review? _____

7. What direction do you think the community education program in your district should take during the next few years? (Check all that apply.)

a. 4 Continue as it is now.

b. 24 Add new programs.

c. 1 Offer fewer programs.

d. 25 Serve more members of the community.

e. 0 Serve fewer members of the community.

f. 15 Other (please specify): _____

Comments: _____

QUESTIONNAIRE SENT TO SUPERINTENDENTS

Respondent Name: District Superintendents

School District: 26 School Districts

Telephone: _____

FOR SUPERINTENDENTS ONLY

Background Information

1. How many schools are in your district? 173

2. How many schools are used as community education sites? 136 (78.6%)

3. How many students (K-12) were enrolled in your school district in Fall of 1978?

   a. Elementary 13,539 b. Secondary 10,082 c. Total 23,621

4. What is the overall population of the community (or communities) within your district? 106,402

5. How closely have you supervised the Community Education Program in your district during the past years? (Please check the statement that best describes your actions.)

   3 Close supervision. Community Education was one of the programs I was most involved in. I attended most meetings and participated in all levels of decision-making.

   13 Moderate supervision. I provided general oversight of this project to about the same extent as I supervise other special programs in the district. I participated in many decisions, but delegated lesser decisions and activities to others.

   9 Indirect supervision. Community Education was not one of my major concerns last year. I delegated most decisions to appropriate personnel and participated only in overall matters of policy if they came up. Helps write grant application.

   1 Other (specify) Helps write grant application.

FOR ALL RESPONDENTS

6. How familiar are you with the State funded community schools program?

0	2	13	10
Not Familiar	Very Limited Familiarity	Moderately Familiar	Quite Familiar

1
No Respons

7. What are the major objectives of the community education program in your district? (Please check all that apply and place a "1" to the left of the most important.)

Applies	"1"	
23	4	Expanding the use of schools beyond normal school hours.
24	4	Providing educational services/programs to out-of-school youth and adults.
23	3	Providing low-cost cultural, recreational and social opportunities for all community members.
17	2	Increasing social interaction, ethnic integration, and participation in school and other public decision-making processes.
22	1	Utilizing more fully human resources and community agencies for broad community purposes.
17	0	Providing additional benefits to regular instructional programs (K-12).
		Other(s) (specify):
3	0	a. Promote School Usage-2; Mobilize Community-1;
		b. _____

8. Has the School Board made any policies relating to the community school program?

3 No

If no, have any policy changes ever been proposed?

0 Don't know

2 No

0 Yes

23 Yes

If yes, what have they done?

18 An official motion was passed endorsing the concept of Community Education (when passed? _____)

4 The School Board approved the present project, but is not on record as endorsing Community Education generally.

1 Other (specify)

Addressed in Policy

9. How actively did the following participate in conceiving or preparing the most recent (1979-1980) Community Education proposal?

	Don't know	Not active	Slightly active	Moderately active	Very active
a. School superintendent	0	2	6	8	10
b. School board	0	5	9	9	3

10. How actively did the following participate in the actual operation of the Community Education Program in 1978-1979?

	Don't know	Not active	Slightly active	Moderately active	Very active
a. School superintendent	2	4	5	10	5
b. School board	2	7	7	9	0

11. Both POSITIVE and NEGATIVE changes may result from the implementation of a Community Education Program. Changes, if any, will be realized to different extents in each community.

Please indicate how much change, either positive or negative, has occurred in your school district which you feel can be attributed to the Community Education Program.

The scale ranges from: +4 to -4 with 0 representing none. Then on both sides. 1 = a little change; 2 = moderate change; 3 = significant change; 4 = very significant change.

Circle the number which applies.

		NEGATIVE CHANGE	Average of Responses	POSITIVE CHANGE
a.	Community support for schools		+2.2	
b.	Attitudes of teachers and administrative staff toward community		+1.6	
c.	Self-help activities undertaken by the community		+1.3	
d.	Cooperation between schools and non-school governmental agencies		+2.4	
e.	Cooperation of schools with private agencies		+1.8	
f.	Services to the elderly		+0.9	
g.	School vandalism		+1.5	
h.	Participation of citizens in school decision-making		+1.6	
i.	Participation of citizens in non-school community decision-making		+1.2	
j.	Drug abuse		+0.9	

12. What is your overall impression of the community schools program?

Very Negative	Negative	No Opinion	Positive	Very Positive
0	2	0	12	12

Education program?

Very Negative	Negative	Neutral	Positive	Very Positive
0	0	3	13	10
-2	-1	0	+1	+2

14. How involved do you think citizens should be in the following?

Categories of Involvement	Not involved	Slightly involved	Moderately involved	Very involved
a. Developing school/district educational policy	2	3	9	12
b. Designing new courses, including goals and content	1	8	11	6
C. Serving as volunteers in the daily program	0	5	9	12
d. Assisting in district evaluation of programs	2	1	12	11

Have your attitudes toward any of the above changed in the past two years?

20 No

6 Yes. If yes, please circle the area of change and explain: _____

15. If state funding were terminated next year, to what extent do you think the Community Education Program would continue to operate?

6 Don't know

6 Program (and its services/activities) would be discontinued

13 Program would exist but would operate at reduced levels in terms of decreased numbers of areas served or decreased services/activities (With what funds? _____

_____)
(specify)

1 Program would operate in the same manner and to the same degree as it has operated (With what funds? _____

_____)
(specify)

0 Program would expand to include a larger service area or more services/activities (With what funds? _____

_____).
(specify)

16. Have you ever attended any community school conferences, workshops, or training sessions?

a. 12 No 13 Yes

If yes:

b. Was it in the past two years? 3 No 10 Yes

If yes:

c. Who was/were the sponsor(s)? Various Agencies

d. How valuable was/were the sessions?

0	0	3	5	2
of no value	of little value	of some value	quite helpful	critical to my efforts

e. Can you cite any specific examples of having done anything differently because of the training/assistance received?

1 No 8 Yes

If yes, what? (1) Policy Changes

(2) Use Community Surveys to Develop Program

(3) Utilize Volunteers

(4)

17. What suggestions can you make to the Alaska Legislature that would improve the effectiveness of Community Education programs?

Increase funding levels/change funding methods- 16

Provide continuous funding from year to year - 7

Reduce paperwork - 2

ADDITIONAL COMMENTS:

STATE OF ALASKA

JAY S. HAMMOND
GOVERNOR

DEPARTMENT OF EDUCATION

OFFICE OF THE COMMISSIONER
POUCH F-ALASKA OFFICE BUILDING
JUNEAU 99811

RECEIVED
MAR 10 1980
LEGISLATIVE
AUDIT

March 7, 1980

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, AK 99811

Dear Mr. Wilkerson:

Reference: Response to the Preliminary Audit of the Community School Program

The Department of Education staff and I have reviewed the above referenced report and offer the following commentary. First, under the Scope Constraint, the Department of Education has collected data on the FY'79 operational grants and will continue to do so in each subsequent year. Please see attachment A.

Recommendation #1

The Department of Education (DOE) should issue operating Community School grant funds in accordance with AS 14.36.030.

The Department of Education agrees with this recommendation. This specific recommendation was brought to the attention of the Department of Education prior to the issuance of the FY'80 grants. Hence the Department of Education has issued FY'80 grant monies in accordance with this recommendation.

Recommendation #2

DOE should strengthen the grant reimbursement procedures.

The Department of Education agrees with the audit recommendation; however, since the FY'78 grant reimbursements, the Department has strengthened the grant reimbursement process. The process of reimbursement requires the program manager to review all reimbursement requests. The administrative assistant to the Adult and Continuing Education Unit and the unit administrator review the requests, and the division accountant reviews the request before it is forwarded to fiscal for payment. During these reviews, line item expenditures, authorized signatures and other points are checked for compliance.

School Districts are not allowed to overexpend their line item budgets unless line item transfers are approved by the Department.

An effort will be made to review the annual district reports with the Community School reimbursement file. However, the annual district reports generally do not arrive in the Department of Education until December and January, while the Community School operational grants should be closed by December.

Recommendation #3

Department of Education should comply with Alaska Statutes by approving one planning grant to establish a Community School program in an attendance area.

The Department of Education does not agree with recommendation #3. Section 4 AAC 32.101. Scope of State Assisted Projects, published in Register 60, January 1977, p. 4-24, part A, (see attachment B), stipulates that Community School grants are made to school districts for planning, establishing, expanding, improving or maintaining community education programs.

While it is true that a "Community School program becomes fully operational at the beginning of the second fiscal year following its authorization," this does not take into account "expanding and improving" their programs.

Those districts which received planning grants during their third and fourth year of operation utilized said funds for expanding and improving their programs.

Recommendation #4

Department of Education should collect, record and maintain statistics on Community School programs.

The Department of Education agrees partly with recommendation #4. A systematic process of the collection of data relevant to the Community School programs in Alaska was begun in FY'79. (See attachment A, C & D). The figures on these attachments are not standardized.

Since the completion of the FY'79 operations grants, the districts which have operational grants now have to submit a narrative report and a statistical report with their final reimbursement request. The procedures for standardization of statistics is being finalized for FY'80.

Recommendation #5

Department of Education should perform on-site evaluations of district Community School programs.

The Department of Education concurs with recommendation #5. Although it is true that the Department of Education did not perform official

on-site monitoring trips during the period of time stated in the preliminary audit report; each technical assistance visitation was also an unofficial monitoring trip. We have now formalized the procedure beginning with FY'80 grant applications, a three year rotational schedule has been established. During FY'80, eleven (11) sites will be monitored. With the additional two (2) sites that the audit committee reviewed, thirteen (13) sites have been monitored. The remaining sites will be monitored during the next two years.

Finally we would clarify that the questionnaire, sent to community school coordinators and superintendents in the Supplemental Information Section, was not taken from the records of the Department of Education, Community School program, but was a survey which was conducted by legislative audit personnel.

I would like to thank you for the fine professional manner in which the members of your staff conducted themselves during the course of this audit.

Sincerely,

Marshall L. Lind
Commissioner

CHAPTER 32. COMMUNITY SCHOOLS

Section
10. Scope of state-assisted projects
20. Community education grant application
30. Definitions

4 AAC 32.010. SCOPE OF STATE-ASSISTED PROJECTS. (a) Community school grants are made to school districts for planning, establishing, expanding, improving or maintaining community education programs. Two types of grants will be made

(1) planning grants will be made to help districts and communities to develop comprehensive community education programs;

(2) operational grants will be made to help districts operate community education programs.

(b) Grants are for a period of up to one year. Subsequent applications must be submitted and will be evaluated in the same manner as initial grant applications. (Eff. 3/12/76, Reg. 57; am 2/4/76, Reg. 60)

Authority: AS 14.07.060
AS 14.36.040

4 AAC 32.020. COMMUNITY EDUCATION GRANT APPLICATION. (a) The commissioner will, in the exercise of his discretion, award a planning grant to a district upon an application submitted to him which contains, in narrative form, the following:

(1) objectives for the planning process;

(2) procedures, strategies, and activities for accomplishing the objectives;

(3) a time-line for accomplishing the objectives;

(4) an evaluation design providing for the collection, verification and analysis of data to measure the extent to which the objectives are accomplished by the program;

(5) a proposed budget, indicating the amount of grant funds requested; and

(6) a commitment to report to the commissioner the results of the planning effort.

(b) The commissioner will, in the exercise of his discretion, award a grant for operating a community education program to a district upon an application submitted to him which contains at least the following:

(1) an overall long-range plan which contains provisions to fulfill the following elements of a community education program:

(A) service to an identified community or local attendance area;

(B) potential for accommodation of all age groups as well as specific groups with special needs;

(C) concentration of activities in one or more public facilities;

(D) identification and utilization of cultural, recreational and other existing and planned resources located outside those public facilities in which the activities are to be concentrated;

(E) systematic procedures for identifying and documenting, on a continuing basis, the needs, interests and concerns of the community served and for responding to those needs, interests and concerns;

(F) programs and activities which reflect the array of needs, interests and concerns of the community; and

(G) creation of an active community education council whose members are representative of the community to be served;

(2) projections for expected long-range growth and development in regard to the following aspects of the community education program:

(A) the K–12 regular school program;

(B) facility and resource use;

(C) extended activities for children and youth;

(D) opportunities for the involvement of adults in the community education program;

(E) delivery of various human services at the most local community level; and

(F) community development in general;

(3) a short-range, detailed program plan which includes the following:

(A) program objectives which state specific and measurable outcomes of the selected program components;

(B) procedures, strategies, and activities for accomplishing the program objectives;

(C) a time-line for accomplishing the program objectives; and

(D) an evaluation design providing for the collection, verification and analysis of data to measure the extent to which the program objectives are accomplished by the program;

(4) documentation of the involvement of persons broadly representative of the community to be served by the program in the preparation of the application, and provision for indicating the continued involvement of such persons with the program;

(5) information regarding the administration of the program, including but not limited to

(A) proposed organizational arrangements for program administration and qualifications and roles of staff who will administer the program;

(B) provisions for securing appropriate training, where required, of a short-term, in-service or preservice nature for administrators, staff, community members, and others who will plan and carry out programs;

(C) an organizational chart indicating the relationship between individuals, groups and agencies affected by the plan; and

(D) a statement as to the proportion of the total school district which operates as distinct administrative units for community education purposes;

(6) a commitment by the applicant to collect and make available information which may be required by the commissioner in accordance with those reasonable time constraints which he may establish, for purposes of carrying out program evaluations;

(7) letters from agencies and organizations affected by the program indicating affiliation or cooperation with the applicant as indicated in the program design; and

(8) a budget statement indicating money to be provided during the period of the requested grant by various agencies, organizations and individuals to support community education in the community to be served by the program.

(c) As necessary, incomplete or inadequate applications will be returned to the applicant for modification. Unfunded applications will be reviewed with comments provided by the department for future use by the applicant. (Eff. 3/12/76, Reg. 57; am. 12/4/76, Reg. 60)

Authority: AS 14.07.060
AS 14.36.040

4 AAC 32.030. DEFINITIONS. In this chapter, unless the context requires otherwise

(1) "community education" means a "community school program" as defined in AS 14.36.070;

(2) "district" means a city or borough school district, or a regional educational attendance area;

(3) "program" means a community education program which meets the requirements set forth in sec. 20 of this chapter;

(4) "public facility" means a facility owned or operated by the state, or a political subdivision of the state. (Eff. 3/12/76, Reg. 57)

STATE OF ALASKA

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

AUDIT DIVISION
POUCH W —ALASKA OFFICE BUILDING

FINANCE DIVISION
POUCH WF—STATE CAPITOL

JUNEAU, ALASKA 99811

March 12, 1980

Members of the
Legislative Budget and Audit Committee:

We have reviewed the Department of Education's response to our Preliminary Report. Our comments follow:

Recommendation No. 3

The Department disagreed with our recommendation, and stated that the Community Schools' planning grants may be made to school districts for expanding and improving their programs whether they are in their first year or their fourth year of operation. However, the following is a quote from a letter dated January 2, 1980, from our legal counsel, Legislative Affairs Agency, Division of Legal Services:

> While conceding the community schools "planners" their due, I would caution that planning money is limited to one grant per "local attendance area." Neither the statute nor the department's regulations are clear on the point. However, the "Statement of intent" codified at AS 14.36.010(b) indicates legislative resolve that the "community school program will become fully operational at the beginning of the second fiscal year following its authorization." (Emphasis added.) A "local attendance area" may submit an application for a community schools grant, to include a request for support of a comprehensive plan for the community school program. . . ." If each local attendance area within a district may seek financial support for the development of the comprehensive plan for a community school program, where the legislation so clearly recognizes planning as a requisite to successful implementation and administration of a program and the legislature has taken the position that a supported program move into operation at the beginning of the second fiscal year, the net effect must be to limit the number of planning grants per "local attendance area" to one.

The House HESS Committee eliminated the requirement of initiation of an operational program at the start of the second fiscal year in its committee substitute. The House Finance Committee restored the provision, evidence that, while program planning was essential, it was the support of the development and implementation of an operating program which the legislature was seeking to support.

STATE OF ALASKA

MEMORANDUM

TO: The Honorable Thelma Bucholdt
The House of Representatives
Alaska State Legislature

DATE: January 28, 1980

FILE NO:

THRU: Commissioner Lind
Department of Education

TELEPHONE NO:

FROM: Joe Miguel, Supervisor
Community Education
Department of Education

SUBJECT: List of currently funded Operational Community School Districts which will not be funded in FY'80

At your reqeust, I am supplying your office with a list of school districts which are currently receiving grants from the State, but will be dropping off as of June 30, 1980, due to the formula in the Community School Act of 1975.

District	Funding Level	Year of Operation
Anchorage	256,646	5
Bristol Bay	8,465	4
Dillingham City	12,169	4
Fairbanks	96,803	4
Haines	11,958	5
Hoonah	7,020	4
Juneau	58,884	4
Kenai	106,570	5
King Cove	5,251	4
Klawock	5,200	4
Kodiak	50,823	4
Matanuska-Susitna	57,168	4
Nome	25,338	4
North Slope	50,535	4
Sitka	29,677	4
Valdez	21,848	4
Yakutat	5,472	4
Adak	16,850	4
Bering Straits	28,690	4
Delta/Greely	25,531	4
Southwest Region	33,670	4

MEMORANDUM State of Alaska

TO: Jan Sorice, Legislative Aide
Representative Buchholdt's Office

DATE: May 2, 1980

FILE NO:

TELEPHONE NO: 465-2800

FROM: Marshall L. Lind, Commissioner
Department of Education

SUBJECT: House Bill 629

In the event that the legislature does not fully fund House Bill 629, the Department of Education recommends the following methods for dispersal of funds to those districts with approved plans of service:

1. If less than 1% of the total foundation support is given to the bill for sections a and b, then .5% will be used in section a and the remaining amount will be prorated to the districts in section b.

2. If 1% of the total foundation support is given to the bill for sections a and b, then .5% will be used in section a and .5% in section b.

3. If 1.5% of the total foundation support is given to the bill for sections a and b, then section a will be fully funded at the 1% level and section b will be prorated at the .5% level.

4. If 2% of the total foundation support is given to the bill for sections a and b, then section a will be fully funded at the 1% level and section b will also be fully funded at the 1% level.

AACE Recommended House Bill No. 204

Amended

An Act

"An Act relating to community schools; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

CHAPTER 36. COMMUNITY SCHOOLS

Sec. 14.36.010. PURPOSE, INTENT. (a) The community school is an expression of the philosophy that the school, as the prime educational institution of the community, is most effective when it involves the people of that community in a program designed to fulfill their educational needs. The community school promotes a more efficient use of school facilities through an extension of buildings and equipment beyond the normal school day. The purpose of this chapter is to provide state leadership and financial support to encourage and assist local school districts in the establishment of community schools.

(b) It is the intent of the legislature that

(1) a program of community school grants be established to provide assistance to local communities in the initial development, implementation, and operation of community school programs;

(2) technical assistance, monitoring, training and coordination of statewide efforts to develop and operate community school programs be provided by the department; and

(3) the community school program will become fully operational once a plan of service has been approved by the commissioner.

(4) evaluation of approved programs and data collection will be conducted by the department.

Chapter 103

Sec. 14.36.020. COMMUNITY SCHOOLS GRANT FUND CREATED: LIMITATIONS ON USE. There is created a community schools grant fund as an account in the general fund. The fund shall be used to make community school grants to local attendance areas or school districts under this chapter. Legislative appropriations for community school grants shall be deposited in this fund.

Sec. 14.36.030. GRANTS (a) A district operating an approved community school program may elect to receive a grant of one per cent of its total public school foundation support or a flat grant, the amount of which is to be determined by the department.

(b) For fiscal years beginning after June 30, 1980, those districts may

NOV 26 1979

TO: REPS. BUCHHOLDT, BARNES, AND CHATTERTON

PETITION

We the undersigned members of Baxter Community School Association support the passage of House Bill 204 which provides for state grants to local community schools. We are convinced that HB 204 is critical to the continued operation of community schools in Anchorage and the rest of the state.

HB 204

STATE
of ALASKA

MEMORANDUM

TO: Honorable Thelma Buchholdt, Chairperson
H.E.S.S. Committee
Alaska State Legislature

DATE: March 20, 1979

FILE NO:

TELEPHONE NO:

Thru: William Thomson
Deputy Director
XXXX Department of Education

XXXXX

From: Joe Miguel, Supervisor
Community Education
Department of Education

Subject: Community Education Files

In order to avoid some areas of possible confusion when your committee reviews the Community Education files, I would like to bring the follcw-ing points to your attention:

1. When the districts apply for funds in early May of each year, they complete their budget sections utilizing the figure they would receive if they were fully funded.

   When the actual allocations are established, they are notified as to the pro-rated amount. They then complete a budget sheet re-flecting the correct amount.

   We have seen this as a duplication of effort. This year, the districts will only submit a budget sheet when they know the correct funding level.

   It is possible that more than one budget sheet will be found on the left hand side of the folders. The budget sheet which is signed off is the one which is currently being used.

2. It appears that the committee was interested in the travel section of the budgets. Please note that on the instructions to the review committee that they were asked to be very critical of large travel budgets.

3. When looking over the individual budget sheets please refer to the budget explanation section for a breakdown of each area of concern.

   The budget explanation section is usually following the budget line item sheet.

   If concerns are still voiced after reviewing the budget explanation section, it may be necessary to refer to the goals and objectives section of each individual grant.

4. The grant application process has been reviewed/evaluated by the department and individuals in the field. It was decided from this review to produce a new application form. This new form was sent to you with the Community Education files for FY79.

Please note that each of the items asked for on the new application form is an item from the Community Education regulations of the Law of 1975.

5. The piece of green shorthand notebook paper on the left hand side of the folder is meant to help keep me abreast of the payments that a district receives.

   The administrative assistant has a ledger of all Community Education grant payments which I check my records against and, of course, fiscal keeps the master sheets for both of us to check against. In this manner there are three sets of records to insure accuracy.

6. There should be a master review sheet on the left hand side of each folder. Please note that:

   a) The number of x's after pass/fail is not indicative of how strong or weak the application was.

   b) There is a difference between administrative support and community support.

   c) These are a compilation of comments made by the review committee members.

7. When reviewing the grant applications you will notice that there are approximately nine grants which are marked "fail."

   These (nine) grants are the ones that were not originally accepted by the review committee and were rewritten by the districts to correct the noted areas of deficiency.

   Once the areas of deficiency were corrected, the applications were approved and funded. Three other grant applications were not accepted, or corrected satisfactorily, and hence did not receive funding.

We hope these points clarify some questions you might have. If we can be of any assistance, please do not hesitate to contact us.

STATE
of ALASKA

MEMORANDUM

TO: The Honorable Thelma Buchholdt,
Chairperson
Health, Education and Social Services
Committee
House of Representatives
Alaska State Legislature

DATE: March 15, 1979

FILE NO:

TELEPHONE NO:

SUBJECT: FY'79 Community Education Grant Folders

XXXX

Thru: Marshall L. Lind, Commissioner
Department of Education

From: Joe Miguel, Supervisor
Community Education
Division of Educational Program Support
Department of Education

In accordance with the request of the H.E.S.S. Committee, I am forwarding to you the FY'79 Community Education operational grant folders for your perusal. As each folder is opened, you will notice the review sheets of the grant review committee on the left hand side, immediately followed by a letter of acceptance or rejection to the district. The review sheets objectively state the strengths and weaknesses of each grant request as they were reviewed by the committee of practitioners.

Also, on the left hand side are the actual grant applications, encumbrance sheets and report and records of local expenditures. It is important to note that the budget sheets need to be correlated with the budget explanation and the goals and objectives of the grant. The budget line item sheets do not give a true picture of why the monies are placed in each category.

When the Community Schools Act of 1975 was passed, there were no provisions for the handling of local education agency grants other than the procedures which were outlined by the Department of Education. In FY'78 the grant process was finalized and a yearly grant review committee was established. I have attached a list of the past review committee members for your perusal (attachment 1).

During FY'79 the actual grant application has been revised into a concise packet (attachment 2). The grant review committee will be chosen by April 1, and will review the grant applications for FY'80 on May 15 and 16.

4 AAC 05.070. PROGRAM PLANNING AND EVALUATION. (a) The chief school administrator of a school district shall develop and have approved by the governing body of that district, annually and no later than that body's first meeting in October, an education plan for each of the three years of operation after the effective date of this section: (i) for each school established under section 40 of this chapter, and (ii) for each school or partial program established on or after the commencement of the 1976-77 school year in communities not having a preexisting school or partial program of the same grades.

(b) An educational plan shall include as a minimum the following:

(1) A description of the process used by the school to secure community participation in program development and evaluation;

(2) A statement of philosophy and goals of the school;

(3) The program goals for each subject area;

(4) A description of each course or subject area, which shall include the following information:

(i) Course or subject area title;
(ii) Credit toward graduation awarded upon completion;
(iii) Whether course or subject area is required or elective;
(iv) General outline of topics to be covered;
(v) General description of types of teaching materials and instructional methods;
(vi) certificate type of instructor or supervisor;

(5) The number of instructional personnel of the school (including part-time);

(6) The operational budget for the school;

(7) The projected enrollment, by grade;

(8) The planned ~~term~~ time schedule for courses to be offered; and

(9) Such other information as the commissioner may from time-to-time require.

(c) As near as practicable to the close of each school year for which an educational plan must be developed under (a) of this section, but no later than the governing body's last meeting in the fiscal year, the chief school administrator shall prepare and submit to the governing body of the school district an evaluation of each new school operated by the district.

(d) The evaluation shall include a survey of parents in the community and students and teachers at the school, who shall be asked, at a minimum, whether they believe the school program as a whole is performing adequately, and whether they have suggestions for improving the school. All comments received shall accompany the evaluation. The evaluation shall specify each aspect of the school program which differed from the plan for the period evaluated and shall include such other information as the commissioner may from time-to-time require.

(e) The chief school administrator shall assure maximum ongoing local community participation in the development and preparation of each educational plan and evaluation required by this section. The chief school administrator or his/her designee shall involve local citizens (including members of the local school committee and students) during the initial drafting of the educational plan and evaluation. Local citizens shall be provided access to adequate information and materials to enable them to participate in the development of the plan and evaluation.

The chief school administrator or his/her designee shall conduct in the local community a public meeting on the draft plan for the school in that community after reasonable notice of the meeting has been given. The chief school administrator shall prepare the final plan taking into account the evaluation required by this section and the record of the public meeting. The chief school administrator shall submit a report to the governing body explaining any significant changes made in the draft plan, shall notify the local school committee of any such changes, and shall afford members of the community the opportunity to be heard by the governing body on the final plan.

(f) A copy of each plan and evaluation developed under this section must be maintained on file for public inspection in the school district office. No later than ten (10) days after (i) an educational plan has been approved by the governing body of the district, or (ii) an evaluation has been submitted to the governing body of the district, a copy of such plan or evaluation must be filed with the commissioner, Pouch F, Juneau, Alaska 99811 and furnished to the local school committee of the community to which the plan or evaluation relates.

(g) A school shall be operated to the extent practicable in conformity with the educational plan, provided that where significant departures from the plan appear to be necessary the plan may be modified during the school year in accordance with the procedures set forth in subsection (e).

(h) The commissioner will return incomplete or inadequate plans under this section to the chief school administrator for further development. After November 15, following adoption of this section, no public school foundation monies available under AS 14.17 will be distributed to a school district having a school for which a plan must be developed under (a) of this section if the school district is in material non-compliance with this section. "Material non-compliance" includes, but is not limited to, failure by the district to submit an educational plan which meets the criteria set forth in this section for each school for which a plan must be developed under subsection (a); failure to submit an evaluation; and failure to involve the local community in the development of the plan and evaluation.

(i) The chief school administrator may apply to the commissioner to shorten the period for compliance set forth in (a) of this section by one, two, or three years with respect to each school, upon a showing that the district has previously developed with local community participation as set forth in (e) of this section, an educational plan which meets the criteria in (b) of this section; has implemented such plan in the school; and has conducted with local community participation as set forth in (e) of this section an evaluation which meets the requirements in (d) of this section.

Ms. Lou Ann Gagne
400 W. 11th, Apt. 16
Anchorage, Alaska 99501

Dear Ms. Gagne:

This is in response to your recent telegram in which you expressed concern regarding HB-204.

The House HESS Committee did hold a hearing on the bill on February 23, 1979. At that time, Representative Buchholdt was called out of town on a family emergency, so was not present for our hearing.

HB-204 will be heard again in this committee. When it was heard, we received excellent testimony in support of the bill. There were question raised though, by committee members, as to the original intent of establishing community schools in 1975. Several committee members expressed their continued support for community schools, but until such time as we can reschedule the bill, we are holding it in committee.

Again, thank you for writing to let us know of your support.

Sincerely,

Cynthia L. Hill

CHUGIAK-EAGLE RIVER COMMUNITY SCHOOLS
Post Office Box [illegible] / Chugiak, Alaska 99567

February 22, 1979

Randy Phillips
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Randy,

As members of the Chugiak/Eagle River Community School Association and as private citizens, we would like to express our thanks for your thoughtfulness in sending us information concerning HB 204.

In our opinion HB 204 would solve a great many inequities found in the communities in bush Alaska. For too long these communities have not had the financial resources necessary for Community Education.

We are generally pleased with this proposed legislation (HB 204). Since our operation is 100% State funded, any legislation would have to be, in our opinion, fair, responsive and viable. It must be noted that while being funded 100% by State money we have had and continue to have the largest volunteer program in the Anchorage Bowl or the Mat/Su Valley area.

There are however certain additions we would like to see made (Our additions are double underlined).

* Sec 2. AS 14.36.030 Grants
  (b) For fiscal years beginning after June 30, 1980, and succeeding years, those districts which elect to a grant of one half of one percent of their total public school foundation support may receive.....

We would like the legislation to be explicit concerning future funding.

AND

* Sec 3. AS 14.36.040 Community Schools Program Application For Grants
  Under regulations adopted by the State Board of Education, a school district (local attendance), or service areas presently designated Community School by the Commissioner may submit to the Commissioner (through the school district) an application for a Community School grant....

IN THE HOUSE ~~SENATE~~

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

Second ~~THIRTY-FIRST~~ LEGISLATURE - First ~~SECOND~~ SESSION

A BILL

For an Act entitled: " An Act relating to grants for community schools programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.36.030 is amended to read:

Sec. 14.36.030. GRANTS. A district operating an approved community school program may receive a first-year grant up to one-half of one per cent of its public school foundation support, a second-year grant of up to one per cent of that support, a third-year grant of up to one and one-half per cent of that support, and a [FOURTH-YEAR] grant during the fourth and subsequent years of up to two per cent of that support. The support provided shall be in the proportion that the number of schools in each district that are operated as community schools is to the total number of schools in the district.

* Sec. 2. This Act takes effect July 1, 1979.

hb 204

February 13, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill relating to community schools. The bill would make a number of changes in AS 14.36 which deals with the community school program. Most of the proposed changes (secs. 1, 3, 4, 5, and 6) are relatively minor in nature and are designed to clarify or streamline the existing statutory program.

Section 2 of the bill proposes a new approach to state funding of community school programs by repealing and re-enacting AS 14.36.030 which deals with state grants for those programs. Under the proposed changes, a district could elect to receive either one-half of one per cent of its public school foundation support for the year or $10,000, effective with the beginning of FY 80. Additionally, districts electing the one-half of one per cent grant could also receive, effective with the beginning of FY 81, up to an additional one-half of one per cent on a dollar-for-dollar matching basis with funds allocated to the community school program by the district.

Sincerely,

5/JSH

Put in my
HB 304
file
Thanks
Thelma

March 12, 1979

Hon. Jay Hammond
Governor of Alaska

Dear Sir:

In support of HB204, I would request that you include an amendment to the bill as follows:

Implement part B of Section 14.36.030 in FY80.

This inclusion would provide eligibility for local districts to receive State matching funds in 1980.

Unless the proposed amendment is implemented, 23 Districts throughout the State would suffer a severe set-back in FY80 funding. To maintain the level of service and involvement Community Education must have full funding.

The Community of Sutton is fully in support of the Community Education process and to uphold the present level of programming such an amendment is necessary.

Sincerely,

Virginia Gallant

IDITAROD
Area School District

POST OFFICE BOX 105 • McGRATH, ALASKA 99627 • (907) 524-3599

April 2, 1979

Representative Vernon L. Hurlbert
1648 Court Building
Juneau, Alaska 99811

Dear Rep. Hurlbert:

Recently, when I was in the capitol for a few hours, I contacted several people in regard to Community Education Legislation. I was there with other people from this District. Unfortunately, you were in a committee meeting at the time and we could not make contact with you. When I was visiting with Representative Buchholdt about the Community Schools Legislation, she informed me that you were on the committee that is presently considering the Community Education Legislation.

She also said that you had information from areas of your constituency which caused you to question whether community school funds were being utilized for community school purposes. We want to assure you that in Iditarod Area School District, all community education funds which we have received have been spent directly to the intent of community education.

In fact, we have found state funding for community school activities very inadequate for carrying out any kind of meaningful program unless the funding is supplemented by other sources. We have been able to develop community school activities in each of the villages of our school district through the creative use of CETA funds. If it were not for CETA, we would only be able to afford a small amount of district level administrative promotion of the community school concept. However, with CETA we have successfully employed Native Community School Coordinators in the villages and we have conducted a number of local adult education activities. I am enclosing a summary of our adult education activities in this district. When you review the summary, please bear in mind our school district population is approximately 1200 people (all ages) and that our services are scattered among nine villages.

So, you might ask, "Why do we need [illegible] community school money?" For us, the answer is that CETA funding is short term and indirect. Four of our Community Education Coordinators have been in those positions since the fall of 1977. In the beginning of this coming school year, these four individuals will no longer be eligible for CETA funds and we will be required to lay them off or pay them with non-CETA funds. As you know, CETA is a tenuous program having undergone much national criticism.

We talk a lot about the necessity for good education for rural residents. From your own experience in the bush, I expect that you will agree with me that there is a need to <u>demonstrate</u> how education can really benefit rural residents. Community Schools are a way to respond to what people <u>want</u>. Too often schools try to tell people what they need. I believe that adult education and adult involvement in local schools is the best way to generate a positive and practical educational climate in the villages.

Please give strong support to fully funded Community School Legislation. Community education should be considered a basic and required component of education in rural Alaska. Thank you.

Sincerely,

Francis Mitchell

Francis Mitchell
Programs and Personnel Development Coordinator

P.S. We met when you personally campaigned in McGrath. I was working on a storm entry to my cabin when you stopped by.

(1) RELATED BILLS (SIMILAR OR CONFLICTING) None

(2) OTHER AGENCIES AFFECTED BY BILL Local School Districts

(2) a. ORGANIZATIONAL SUPPORT FOR BILL		(2) b. ORGANIZATIONAL OPPOSITION TO BILL
Not Known		Not Known

(3) PROGRAM EFFECTS OF BILL

Provides for base level support of FY'80 programs; provides for additional state funds on a dollar for dollar match for FY'81.

(4) FISCAL IMPACT: ☐ NONE ☐ FISCAL ANALYSIS ATTACHED (already submitted)

(5) AMENDMENTS PROPOSED:

None

(6) COMMENTS:

If HB-204 passes, it will provide the impetus for local support of district programs.

As you will note from the fiscal note which is attached to the bill, many districts will receive less money in FY'80 under the new bill than they did in FY'79. However, FY'81, the effect of 14.30.030(b) of the bill will enable the districts to utilize state and local match monies to bring the level of services to their communities up to the level which was intended.

The Department of Education is in support of both the FY'80 base level of support and the FY'81 matching concepts of HB-204.

STATE OF ALASKA

MEMORANDUM

TO: The Honorable Thelma Bucholdt
The House of Representatives
Alaska State Legislature

DATE: January 28, 1980

FILE NO:

THRU: Commissioner Lind
Department of Education

TELEPHONE NO:

FROM: Joe Miguel, Supervisor
Community Education
Department of Education

SUBJECT: List of currently funded Operational Community School Districts which will not be funded in FY'80

At your reqeust, I am supplying your office with a list of school districts which are currently receiving grants from the State, but will be dropping off as of June 30, 1980, due to the formula in the Community School Act of 1975.

District	Funding Level	Year of Operation
Anchorage	256,646	5
Bristol Bay	8,465	4
Dillingham City	12,169	4
Fairbanks	96,803	4
Haines	11,958	5

North Slope	50,533	4
Sitka	29,677	4
Valdez	21,848	4
Yakutat	5,472	4
Adak	16,850	4
Bering Straits	28,690	4
Delta/Greely	25,531	4
Southwest Region	33,670	4

MEMORANDUM State of Alaska

TO: Jan Sorice, Legislative Aide
Representative Buchholdt's Office

DATE: May 2, 1980

FILE NO:

TELEPHONE NO: 465-2800

FROM: Marshall L. Lind, Commissioner
Department of Education

SUBJECT: House Bill 629

In the event that the legislature does not fully fund House Bill 629, the Department of Education recommends the following methods for dispersal of funds to those districts with approved plans of service:

1. If less than 1% of the total foundation support is given to the bill for sections a and b, then .5% will be used in section a and the remaining amount will be prorated to the districts in section b.

2. If 1% of the total foundation support is given to the bill for sections a and b, then .5% will be used in section a and .5% in section b.

3. If 1.5% of the total foundation support is given to the bill for sections a and b, then section a will be fully funded at the 1% level and section b will be prorated at the .5% level.

4. If 2% of the total foundation support is given to the bill for sections a and b, then section a will be fully funded at the 1% level and section b will also be fully funded at the 1% level.

ELEVENTH LEGISLATURE

FISCAL NOTE

I. REQUEST

Bill/Resolution No. Committee Substitute for H.B. 629

Title An act relating to Community Schools

Requested by H.E.S.S. Committee Date April 21, 1980

II. FISCAL DETAIL

Agency Affected Education

Program Category Affected Foundation Support Programs

BRU, Program, or Subprogram(s) Affected Community Schools

(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

	FY 80	FY 81	FY 82	FY 83	FY 84	FY 85
100 PERSONAL SERVICES						
200 TRAVEL						
300 CONTRACTUAL						
400 COMMODITIES						
500 EQUIPMENT						
600 LAND & STRUCTURES						
700 GRANTS, CLAIMS, ETC.		5,323.	5,843.	6,252	6,689.	7,157
TOTAL						

FUNDING (Thousands of Dollars)

GENERAL FUND		5,323.	5,843.	6,252.	6,689.	7,157.
FEDERAL FUNDS						
OTHER (Specify Fund Source)						

POSITIONS

FULL TIME						
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY'81 cost reflects establishment of 10.0 base or one percent floor as contained in the proposed bill. For FY'82 upon a 2 million dollar increase in the foundation support. FY'83, '84, and '85, are based upon a 7% inflationary cost.

IV. DATE April 21, 1980 PREPARED BY [signature]

AGENCY Education

PHONE 465-2800

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

MEMORANDUM State of Alaska

TO: Alephe Morris, Administrative Assistant
Senator Sackett's Office
Alaska State Legislature

DATE: May 20, 1980

FILE NO:

TELEPHONE NO: 465-2800

FROM: Marshall L. Lind, Commissioner
Department of Education

SUBJECT: CSHB 629

Due to the changing of basic formulas for the Community Schools grants and the appropriation which the House gave the new bill, you will notice on the attached sheet that many districts will take a substantial cut in the amount they receive for FY'81.

The Department urges the Senate to place the following verbage into the intent of CSHB 629, "that no district will receive less in FY'81 than it received in FY'80."

Along with this intent, we also urge the sum of $179,000 be added to the bill to insure the above intent.

District/REAA

MEMORANDUM State of Alaska

TO: Alephe Morris, Administrative Assistant
Senator Sackett's Office
Alaska State Legislature

DATE: May 20, 19[illegible]

FILE NO:

TELEPHONE NO: 465-2800

FROM: Marshall L. Lind, Commissioner
Department of Education

SUBJECT: CSHB 629

Due to the changing of basic formulas for the Community Schools grants and the appropriation which the House gave the new bill, you will notice on the attached sheet that many districts will take a substantial cut in the amount they receive for FY'81.

The Department urges the Senate to place the following verbage into the intent of CSHB 629, "that no district will receive less in FY'81 than it received in FY'80."

Along with this intent, we also urge the sum of $179,000 be added to the bill to insure the above intent.

LETTER OF INTENT

It is the intent of the Senate Finance Committee that $1.006 million be added to the governor's appropriation of $1.229 million and the House appropriation of $.250 million for the support of the community schools program.

It is the further intent of the Senate Finance Committee that $18,000 be added to the Department of Education's Adult and Continuing Education BRU for the sole purpose of conducting on-site monitoring and evaluation of operational community school programs, as required in Section 14.36.010(b)(4). Accounting of the expenditure of these funds shall be included in the annual report to the Legislature as mandated in the the same section.

GREATER SITKA BOROUGH SCHOOL DISTRICT
ACCREDITED BY THE NORTHWEST ASSOCIATION OF SECONDARY SCHOOLS & COLLEGES

P. O. BOX 179 SITKA, ALASKA 99835

JOHN E. COFFEE
SUPERINTENDENT

February 15, 1980

Honorable Representative Thelma Buchholdt:

I want to make a few comments on our Telecommunications conservation February 13th regarding House Bill 629.

It was taken very well by the seven people we had in to testify. I just wish we would have had more time for discussion. It would have been nice if we could have asked some questions to the legislators.

Enclosed are the letters people wrote supporting the Community School concept here in Sitka. Also the list of people we had in to testify and our last brochure that went out to all boxholders of Sitka.

We sure appreciate your efforts in helping us keep the Community Education process going here in Sitka. If I can be of any assistance to you feel free to contact me at your convenience.

Yours for a Better Community!

Sincerely,

Ralph B. Piepkow

Ralph Piepkow, Director
Sitka Community School

CAROL WALSH

I wish to speak on behalf of Community Schools across the State of Alaska as well as for the active + viable Community School program that exists in Sitka.

As a board member for the Greater Sitka Borough School District, it has been heartening for me to see the Sitka program exhibit great effectiveness in opening our school facilities to the entire public - giving a diverse cross-section of the community the opportunity to participate in new learning + social experiences.

As an advocate for exceptional children, I have been greatly pleased to see the Special olympics program enhanced and strengthened [redacted] by that group's activities inclusion in the Community School setting.

As a parent, I have seen first-hand how such a program can offer exciting opportunities for the younger members of our community.

The track & field competitions, for example, generated a great deal of interest among some of our junior high

students - my daughter included. Their high enthusiasm for such activities and awareness & good physical fitness has been directly affected by the Community School support and encouragement of such activities. As a result, four Sitka girls represented the entire State of Alaska at a national track and field competition in West Virginia. Such a healthy & edating venture would not have been possible without Community School initiative and interest in

providing community
activity and involvement.

Thank you.

Carol Welsh
Sitka

February 13, 1980

To the Committee:

I have served on the Sitka Community School Committee from the day of its conception five years ago. I am a firm believer in the fact that the impact the program has had on our community has been nothing but positive. The quality of life has been greatly enhanced because of the programs' scope and depth. It has made available outlets for recreational, cultural and educational interests that a town of our size could not do on its' own. It has opened the public school facilities for their maximum use that could only be matched by a very substantial capitol outlay for a multi-use facility. In short. the Community Education Program does a very fine job in serving the maximum amount of citizens, with a wide variety of programs, for a minimum amount of money.

I wish to thank you for this opportunity to state my feelings and voice my support for the on-going Community Education Program.

Sincerely,

David Winters
Chairman

13 February 1980

The Community Schools program in Sitka is a most important part of our Total Community. People of all ages, from pre-school to adult, are involved in the varied programs offered by the Community Schools. I strongly urge continued funding of this program for Sitka.

Carol Wheeler

Carol Wheeler

The Community Schools program at Blatchley Junior High School, Sitka, has become for our family a "family center" during the evenings of the winter months.

Judy instruction for children has offered a fine father-son activity with Ed offering supervision support for the class.

Other children have felt comfortable to visit parents classes, simultaneously taking recreational swim at the school.

The quality of instruction has been superior and the very reasonable fees have encouraged all ofus to choose a class each semester.

I have done calligraphy for twelve years and have taken instruction in California from a university art professor and an artist who taught in adult education evening classes. In these twelve years of classes and workshops, the best teacher ofcalligraphy I found in the Community Schools program in 1979.

Certainly we as a family will continue each semester to select classes from thewide range of offerings for all ages.

Sincerely,

Barbara A. Soukup

Barbara A. Soukup
Box 562
Sitka, Alaska 99835

Feb. 13, 1980

to the Committee.

Our family moved to Sitka three years ago. Shortly after we settled in this rather isolated community we discovered the Sitka School District had a Community Schools Program. There are programs for every member of our family from age 6 to adult.

Because of the Community Schools year around programs we are no longer isolated from opportunities to be involved in a wide range of educational and physical activities.

At present funding for the Sitka School District's "Community Schools Program is being maintained. I urge you to continue support of the Community School Program in Sitka.

Respectively
Sandy Hackett

13 February

To Whom it May Concern:

I, Susan Johnson, being a concerned citizen of this community, wish to show my concern and support for our Community Schools.

This program is a vital part of our community. It provides the means for many of us to further ourselves in numerous ways! It also gives us a place to go and meet other people with similar interests and goals. And, it provides education along with self-improvement in mental ~~and~~ physical and many other areas.

I feel we use and need our Community School system and hope the State support can be maintained.

Sincerely,

Susan Johnson

existing statute, 14.36 provides for 4 years of funding:

year 1:	up to 1/2%	foundation	support
year 2:	1%	"	"
year 3:	1 1/2%	"	"
year 4:	2%	"	"

the funding was tied to the number of community schools in operation
the formula is:

$$\frac{\text{no. of community schools}}{\text{no. of schools in district}} \times \text{foundation support} \times \%\ \text{which district receives in that year}$$

Last year, CS HB 394 extended the programs on their 4th year for one more year, at at least the same level of funding the program received in its 4th year

There are currently 21 districts which will be dropping off as of June 30, 1980 due to the formula in the Community School Act of 1975. (list included)

CS HB 629 provides for a state grant of 1% of the foundation support money or $10,000, whichever is greater, to all districts operating community schools.

In addition, the state will match, up to 1% of the foundation support money or $10,000, local effort (cash or in-kind)

The grant application must include an assurance that the community school program will be reasonably accessible to residents of all communities within a district which express an interest in having such a program.
(in an REAA, that might mean having a program in each village that has a school; in a city like Juneau, it might mean operating a program downtown, in the valley and in Douglas.)

Community school programs will be evaluated by the Department at least once every 4 years; a report will be submitted to the Legislature annually.

There may be a problem here, as the bill does not address funding to the Department of Education for conducting the evaluations. They would like about $50,000 to do this.

The Department must provide training of personell and help the programs develop an internal monitoring system.

They can get this as a supplemental next year if it can't get on the FY81 operating budget.

STATE of ALASKA

MEMORANDUM

TO: The Honorable Thelma Bucholdt
The House of Representatives
Alaska State Legislature

DATE January 28, 1980

FILE NO

THRU: Commissioner Lind
Department of Education

TELEPHONE NO

FROM Joe Miguel, Supervisor
Community Education
Department of Education

SUBJECT: List of currently funded Operational Community School Districts which will not be funded in FY'80

At your reqeust, I am supplying your office with a list of school districts which are currently receiving grants from the State, but will be dropping off as of June 30, 1980, due to the formula in the Community School Act of 1975.

District	Funding Level	Year of Operation
Anchorage	256,646	5
Bristol Bay	8,465	4
Dillingham City	12,169	4
Fairbanks	96,803	4

ALASKA ASSOCIATION OF COMMUNITY EDUCATION

Legislation Position Paper

1.0 Definition

The Act should define a community education program as "a program in which a public building, including but not limited to a public elementary or secondary school, or a community or junior college (or a related extension center), is used as a community center operated in conjunction with other groups in the community, community organizations, and local governmental agencies, to provide educational, recreational, health care, cultural, and other related community and human services for the community that the center serves in accordance with the needs, interests and concerns of that community."

1.1 The Local Education Agency may elect to function as a prime sponsor in order to subcontract the operational funds to other agencies. (such as municipal goverments, community colleges, extension centers, etc.)

1.2 An LEA is considered to be one of the 53 public school districts in Alaska.

2.0 Need

Community Education has captured the imagination of both educational and lay leaders throughout the United States. The growth of community education has arisen from three significant factors. These factors are:

2.1 Schools must discharge their presently accepted responsibilities with a greater degree of community accountability.

2.2 Schools must extend their traditional service to all members of the community - not just the traditional student population.

2.3 Alternatives must be found for reducing duplication of effort so that improved services are provided at a lower overall cost.

Because of the potential which Community Education holds for recognizing and addressing these factors the Alaska State Legislature will assume responsible leadership in fostering Community Education. This will be accomplished by providing financial and technical assistance within the limitations of the Alaska State Department of Education's allocated resources to those LEAs requesting funding and services related to Community Education. Technical assistance may be provided to subcontractors at the request of the LEA.

3.0 Program Description

The proposed law and accompanying regulations should limit eligible activities to the leadership, administrative, and coordinating activities involved in planning, establishing, expanding, or operating a community education program. The program should not pay for cost directly related to the provision of services or activities.

This approach reflects the associations judgment that while a community education program may encompass virtually any type of educational or other

social service, the State Program was not meant to pay for these services but, rather, for the processes of organizing and coordinating these services in a community education program. These proposed limits distinguish community education, elementary and secondary education, and recreational and social services.

4.0 Position Statement

Because of the uniqueness of each local situation and/or community, Community Education cannot be considered a uniform, state-mandated, or prescribed set of activities, classes or programs. It should be the position of the State Legislature to encourage educators and the community at large to:

4.1 Explore the possibility of initiating Community Education.
4.2 Consider Community Education when new facilities are being developed or existing facilities are being remodeled.
4.3 Consider the use of Community Education to effect participation of local citizenry in the education decision-making process.
4.4 Explore the possibility of using Community Education to eliminate duplicated effort and coordinate education and community programs.
4.5 Consider how Community Education will be evaluated to insure community and educational accountability.
4.6 Consider Community Education's potential for extending the school's traditional services to all members of the community.

5.0 Position Strengths

Consideration of Community Education should reveal the following strengths:

5.1 Community Education can be generally accomplished through improved coordination of existing resources at minimal additional cost.
5.2 Community Education maximizes the use of public facilities and services, thus increasing program and service cost-effectiveness.
5.3 Community Education assists the citizenry to a greater awareness of the needs of the total community.
5.4 The greater awareness created by Community Education maximizes the possibility of meeting the self-defined needs of the total community.
5.5 The involvement of the citizenry in meeting their own needs generally develops a more positive outlook toward education and the community.
5.6 The positive outlook toward education and the community which develops through Community Education usually increases community support for education.
5.7 The positive outlook and support gained through Community Education fosters individual concern for both family and neighbors, thereby strengthening the family and the community structure.

6.0 Position Constraints

It should be recognized that a number of existent factors could hinder or deter the successful implementation of the Community Education process.

6.1 There is a need for additional qualified personnel available for the purpose of providing technical assistance to those inaugurating or strengthening Community Education.

6.2 Presently, technical assistance and evaluation assistance to those developing or operating community education is hindered by financial limitations.

6.3 Financial resources currently designated for Community Education can not adequately support programs in Alaska's 53 school districts.

6.4 If community and educational agencies cannot work together effectively, the following constraints may result:

- a. Duplication of programs and services.
- b. Competition between agencies for resources and patrons.
- c. Increased expense to the citizenry.
- d. Poor Community Eduction accountability.

6.5 Community Educational opportunities for training leaders in key community and education leadership positions should be supported by the legislation.

6.6 Community Education can run the risk of being just another add-on program.

6.7 Community Education should never be inaugurated solely to improve the schools image or public relations with the community.

6.8 Initiating Community Education through administrative decree alone should never occur, but administrative leadership and support are imperative.

6.9 Care should be exerted so as not to limit or eliminate the involvement of the citizenry in the education decision-making process associated with Community Education.

6.10 Care should be exerted to insure that control of Community Education remains with the local community, where individuals interacting with each other can insure that the greatest good results for the greatest number.

7.0 Minimum Elements

The association recommends that minimum elements should apply to each Community Education program to be assisted under the State formula program within the State Foundation support system. These minimum elements are:

7.1 Educational Institution Involvement -- The extent to which an LEA is involved in program administration policies development, financial resources, and their commitment to the support and improvement of the program should be defined.

7.2 Community To Be Served -- The geographic area which the program is designed to serve as well as the populations which exist in the community should be defined.

7.3 Community Education Council -- A community council should be in existence to provide for the active and continuous involvement of individuals, groups, and institutions broadly representative of the community served.

7.4 Community Needs -- The program should provide a systematic procedure for identifying community needs, interests, and concerns.

7.5 Interagency Cooperation -- Community Education should promote, encourage, and facilitate interagency cooperation through such activities as coordinating councils, joint use agreements, public relations, cooperative facility planning and joint funding arrangements.

7.6 Identification of Community Resources -- Community resources in the following areas should be identified:
a. Physical b. Fiscal c. Human d. Services

7.7 Public Facility As A Community Center -- Program services for the community should be identified in specific public facilities although satellite or mobile facilities may be utilized.

7.8 Scope of Activities and Services -- Community Education programs are based upon needs identified in each community and should contain a balance between enrichment, recreational, vocational, cultural and social activities. The Community Education program should make provisions for social and health agencies to provide services in community education facilities, Community Education should provide for the awareness, discussion, and analysis of topics of contemporary community interest and concern.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

M E M O R A N D U M

January 29, 1980

SUBJECT: ost settling for social services, etc.
Work Order Number 7795)

TO: Representative Charles H. Parr

FROM: David T. Walker
Co-Revisor of Statutes

Your request for reintroduction of CSHB 432 gave me the opportunity to do some "clean-up" work on the bill. I do not believe any of my changes are substantive - mostly they relate to use of the technique of repealing and reenacting and to clarifying that the cost settling technique is applicable to the purchase of services for all persons under the state's responsibility, not just to child care agencies.

I hope that these changes meet with your approval.

DTW:ljb

Enclosure

September 19, 1979

Representative Charles H. Parr
SR Box 50599
Fairbanks, Alaska 99701

Dear Representative Parr:

<u>You are one of our State's leading legislators and we need your help!</u>

Alaska Children's Services (ACS) is committed to providing quality residential childcare to our State's most troubled children. In fiscal year 1979 we provided more than 23,000 days and nights of tender loving care and professional treatment for 956 unwanted, abused, neglected and delinquent children and youth. Some of these children are from the district you represent in the State Legislature. More than 95% of the children we serve are in the custody of the State's Department of Health and Social Services through either the Division of Corrections or the Division of Social Services.

Alaska has some of the most stringent childcare, health, safety and fire codes in the nation. Our statutes were written to be in the best interest of children. For this you and our other law makers are to be commended. However, it costs a great deal to implement these statutes and regulations. Providing adequate funds to do this is also a legislative responsibility.

We at ACS want to work hand in hand with the Legislature and the Department of Health and Social Services in providing the very best care and treatment possible for these unfortunate and troubled children and youth. Even though we have a so called "full cost of care statute", AS 47.40, it falls far short of reimbursing agencies for the full cost of caring for state placed children. In 1979 our agency had to raise $143,000 from private contributions to subsidize state placed children. Many of our employees -- who are the real substitute parents for these children -- worked for less than the minimum wage simply because our request for adequate reimbursement rates have consistently been denied by the State. One such former employee is now suing us for back wages charging that we were in violation of Alaska Statute 21.10.

We need your help to change some of the laws that place heavy fiscal burdens on our childcare agencies and we need your help in obtaining adequate reimbursement for the full implementation of those laws and regulations which are in the best interest of children. Meanwhile, we need your help in getting adequate legislative appropriations for those line items in the State budget from which we are reimbursed for taking care of, and providing treatment for children the state places with us.

Specifically, the problems are as follows:

1. The Division of Corrections owes ACS in excess of $35,000 for services provided in FY 1979. We have been informed that we will not likely receive payment for this until a supplemental appropriation is approved by the Legislature. This, of course, cannot occur until next spring. Last year we waited 11 months to be paid $17,000 carried over by the Division of Corrections from FY 1978. How can we collect what the State owes us now for FY 1979?

2. Because of FY 1980 budget constraints the Division of Corrections has decided not to place any additional children in our care. This will have the long run effect of increasing the cost of care rate for next year since fixed expenses remain relatively the same whether the occupancy rate is 75% or 100% of state licensed capacity. What is going to happen to the Division of Correction's youth who need residential treatment? Will they not be "on the street" only to get into more serious difficulty with the law and ultimately require more extensive and expensive treatment and/or incarceration? How can we keep our rates reasonable without full placement utilization?

3. The Commissioner of the Department of Health and Social Services has determined not to grant any cost of living increase with our current reimbursement rates due to FY 1980 budget constraints. Inflation has increased our cost at least 10%. For July and August this has resulted in a $30,000 short fall, which will grow to more than $150,000 by the end of the fiscal year. How can this agency fiscally survive the year? Does not AS 47.40.040 state that cost of care rates shall include a proportionate share of anticipated cost of living and staff salary increment increases for the fiscal year for which the cost of services is being determined?

4. To curb expenditures sufficiently to stay within the current reimbursement rates we would have to terminate several staff members. We cannot legally provide the coverage necessary for the supervision and treatment of the troubled and unwanted children now in our care should this be done. Most normal families do not want to become foster parents for "these kind of children and teenagers." They either have no homes or families to which they can be returned or the ones they have are not safe or viable. What is going to happen to the children in our care and treatment programs if we are forced to terminate staff?

5. During the 1980 legislative budget process the Administration requested $6,989,833 for institutional childcare. The Legislature reduced this by nearly one half million dollars. The Commissioner states that she is committed and legally responsible to keep the Department of Health and Social Services expenditures within this reduced appropriation. ACS which has a long history, 90 years,

of providing quality care for Alaska's needy children cannot fiscally survive on the reimbursement rates established by the Department within the Legislature's appropriation. How can the Department's request of $6,989,883 be restored in order that they may be able to reimburse us more adequately?

1979 has been designated "The year of the child." ACS is stretching to its maximum ability to provide the very best residential childcare and treatment for Alaska's most troubled and needy children. We cannot do it alone. We and the children of our state need your help in finding a solution to our fiscal crisis. At your earliest convenience I, or one of our Board members, would welcome the opportunity to meet with you to discuss this pressing matter. Please call me at 276-4515 or let me know what additional information is needed. Can we count on you and the next session of the Alaska State Legislature to provide the resources necessary to keep serving Alaska's "troubled kids?"

Respectfully yours,

John C. Garvin, Ph.D.
Executive Director

JCG/rv

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 637

"An Act relating to the purchase of services by the state for persons under its responsibility; and providing for an effective date."

House Bill 637 redefines the procedures and policies for care purchased by the State from private institutions, group homes or foster care homes for children and young adults under the Department's supervision or custody.

The bill would require that the Department adopt regulations within one year from the effective date of the Act governing standards of reasonable and allowable costs for purchase of such services. The Department would be required to pay interim daily rates using "standard industrial cost-accounting principles" plus a cost-of-living increase. At the end of the fiscal year, a cost settlement between provider and the Department is made based on the actual costs incurred compared to the amount the provider has received from the State. Another major change is the allowance of depreciation and replacement costs of major property and equipment in determining reimburseable costs by the State.

Current Situation

The Department presently purchases care for these children under 47.40 of the Alaska law which is titled "Purchase of Service," but is more commonly referred to as "Full Cost of Care." Both the Department and providers of care have expressed dissatisfaction with the present law and its lack of flexibility to respond to current changing situations in a timely manner. In response to this, the Department has asked the Governor to introduce legislation which would allow us the flexibility to design such a system through negotiating contract procedures. This bill was introduced as House Bill 704.

The "Full Cost of Care" law now provides funds for the maintenance of the child (food, clothing, allowances, heat, light, transportation, etc.) as well as the program provided by each individual institution. The program costs are reflected in staff salaries. Costs specifically excluded by the law include fund raising, construction, major equipment, and other capital expenditures, depreciation, religious training and education, and services provided which are substandard to, or exceed, the requirement of the Department. Section 47.40.040(a) describes how the rate shall be set based on the previous years expenditures and days of service provided by the individual agencies. The method of rate computation has caused a great deal of dissatisfaction with the child care agencies and the State in that it is inflexible and based on year old conditions and costs.

POSITION PAPER/Department of Health & Social Services

Discussion Items

1. All reference to "full" cost in the "purchase of services" statute should be changed to reasonable or allowable in accordance with regulations. The statute stating it pays full cost of care, yet excludes many expenses has been a source of confusion and litigation. Since H.B. 637 would permit the Department to define by regulation standards of "allowable cost which are reasonable and necessary," it is likely that the Department may not pay for all costs associated with the child's care as certain items such as religious training will continue to be excluded from reimbursement. The same confusing situation will exist. Such reference to payment of "full cost" in the bill are on:

   a. Page 1, line 18.

   b. Page 1, line 28.

   c. Page 2, line 8.

2. Page 2, line 1 and 2 - We are unaware of any standard accepted "industry cost-accounting principles for fixed and variable costs" for the purchase of care for children. We interpret this to mean cost-accounting principles accepted by the AICPA (American Institute of Certified Public Accountants). We support the use of generally accepted cost-accounting principles utilized by the profession in the State.

3. Page 2, line 1 - We would recommend modifying the "per-person, per-day costs" to be based on total beds being maintained and available and not based on occupancy. The Department has found itself under the current law paying for the cost of vacant beds.

4. Page 2, line 4 - The bill states that the inflation increase is based on the Department of Labor cost-of-living index. In checking with the Department of Labor, we found that the appropriate title for this index is the United State Department of Labor, Bureau of Labor Statistics Consumer Price Index. The Bureau provides an index for both Anchorage and Fairbanks, Alaska. We would recommend a change reflecting the formal title of this index.

5. Page 2, line 5 - We recommend that the definition of salary increases include benefits. We have found that although base salaries in many child care institutions are low, many institutions provide free lodging, meals, and transportation in lieu of additional salary, which often brings their total compensation in line with salaries in the current market.

6. Page 2, line 14 - We would recommend that replacement costs continue not to be reimburseable under the purchase of services statutes. Since the bill would already be covering depreciation, we believe this would be duplicative. Also, it may serve as an

POSITION PAPER/Department of Health & Social Services

avenue of potential abuse for institutions who received their building through donations could as well bill the State for costs necessary to replace the building if became antiquated and needed replacement.

7. Page 2, line 15 - It would be extremely useful to clearly state that depreciation may not be claimed for buildings acquired by donation, rather than purchase. The public may be paying for the cost of the building twice - once through charity donations and again through tax dollars for the care purchase by the State provided in that institution.

8. Page 2, line 20 - We would recommend that the rates be based on reasonable and allowable costs as defined by regulations, rather than on actual cost incurred. This may avoid confusion in the future, when an institution provides services beyond which the State normally provides or cares to purchase (i.e., swimming pool). The State would pay only up to the level defined by regulation and not all dollars spent by the provider to care for the child.

9. Page 2, line 26 - We would recommend that the effective date be changed to July 1, 1981. We believe we could do a better job administratively if we had one year to prepare for the new process. We would have to write and issue new regulations; hold public hearings; revise forms and manuals; hold training sessions for providers and department staff; and advise provider groups accordingly. If this recommendation is accepted, we would see no objection to the regulations becoming due shortly (90 days) after the bill becomes effective, rather than one year later.

Department Position

Although the Department believes that the contracting approach to purchase of services found in H.B. 704 is preferable, we could support H.B. 637 if the changes noted in this position paper are accepted. We, too, recognize the need to revise Alaska "purchase of services" law in order to make it more responsive to current situations and to make reimbursement more cost-effective and appropriate.

Chapter 40. Purchase of Services.

Section	Section
10. Purchase of services	50. Services
20. Licensing and supervision	60 — 70. [Repealed]
30. Required accounting procedures	80. Definitions
40. Determination of full cost of services	

Sec. 47.40.010. Purchase of services. (a) When the department purchases services for persons for whom the state has assumed responsibility under the laws of the state, the department shall

(1) adopt regulations establishing the levels of care to be provided;

(2) determine the rates of payment for the full cost of services required;

(3) pay all expenses related directly to the full cost of services at the levels of care required;

(4) make the placement of persons in accordance with the levels of care provided for in the regulations.

(b) Services of jails and other penal institutions may not be included in services purchased by the state in this chapter. (§ 1 ch 136 SLA 197

Sec. 47.40.020. Licensing and supervision. Anyone providing services which are purchased by the department under this chapter shall, if required by the department, be licensed and supervised in the same manner as boarding homes, foster homes and other institutions provided for in AS 47.35.010 — 47.35.080. (§ 1 ch 136 SLA 1970)

Sec. 47.40.030. Required accounting procedures. Anyone who solicits or receives funds from the department for the cost of services provided under this chapter shall

(1) meet accepted standards of fiscal accountability for public funds and shall, upon request, submit a complete financial statement by an independent, certified public accountant to the department and to the division of legislative audit;

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

(2) upon request before the meetings provided for in AS 47.05.010 (10) demonstrate the actual cost of services offered using cost accounting procedures as provided for by the department;

(3) upon request, furnish the division of legislative audit all fiscal information, books, records, and accounts pertaining to services paid for under this chapter. (§ 1 ch 136 SLA 1970)

Sec. 47.40.010. Determination of full cost of services. (a) In this chapter, "full cost" of services shall be determined by the per person, per day cost in the preceding fiscal year plus a proportionate share of anticipated cost of living and staff salary increment increases for the fiscal year for which the full cost of services, determined to be necessary by the department, is being determined. Child care costs for foster homes shall be computed in the same manner as for child care and nursing home institutions except that no salary costs may be considered.

(b) Full cost of services does not include the following:

(1) expenses, including salaries and fees, incurred in raising funds;

(2) funds expended for construction, major equipment and other capital expenditures;

(3) depreciation and replacement costs of, and costs of additions to, major property and equipment;

(4) religious training and education; and

(5) services provided which are substandard to, or exceed, the requirements of the department. (§ 1 ch 136 SLA 1970)

Sec. [illegible].050. Services. When determining the levels of service to be [illegible] department shall consider program services as outlined in the Catalogue of Functional or Program Service Categories published by the United Funds and Councils of America, September [illegible] (§ 1 ch 136 SLA 1970)

Sec. 47.40.060. Temporary placement. Repealed by § 1 ch 210 SLA 1970.

Revisor's note. — The repealed section derived from § 1, ch. 136, SLA 1970.

Sec. 47.40.070. Permanent placement. Repealed by § 1 ch 210 SLA 1970.

Revisor's note. — The repealed section derived from § 1, ch. 136, SLA 1970.

Sec. 47.40.080. Definitions. In this chapter

(1) "anyone" means any person, city, organized borough and private voluntary institution or agency;

(2) "services" means family, child welfare and nonprofit nursing home services but does not include health, hospital, profit-making nursing homes or medical services,

Supplement

(3) "department" means the Department of Health and Social Services. (§ 1 ch 136 SLA 1970; am § 2 ch 210 SLA 1970; am § 55 ch 71 SLA 1972)

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Note 1:

During 1978 rate hearings were held for "full-cost-of-care" as required in AS 47.40.70. Inflationary rate increases were established and the costs for the first six months of that year were reviewed. Based on that information rates were believed to be sufficient to pay for the full-cost-of-care. A review of FY 1979 provider costs revealed costs exceeded actual payments by $352,723.81. It may be reasonable to assume that the FY 81 cost settlement would be at least equal and probably greater.

Assumptions:

1. Actual impact cannot be estimated for expenditures related to costs to be allowed under this bill, as no data base exists. Other line items reflect 7% inflation.

2. Costs above reflect increase in administrative expense only.
3. All positions full year budgeted.
4. Salaries reflect current contracts plus 7% increase in calendar year 1982.

Program:

1. Personal Services

   a. Two range 18 Field Auditors
      Salary FY 81
      2465 increases to 2640 1-1-81

      FY 82
      2736 increases to 2928 1-1-82
      Benefits total 28%

Program:

   b. Social Worker IV Position for FY 81 only.

      This position is needed to enable the Department to promulgate regulations this fiscal year, including levels of care and standards of allowable costs. The position would also carry out an implementation plan including developing facility forms, guidelines, and information packets. Finally, the position would provide ongoing expertise in residential child care and develop strategies to enable providers to upgrade the quality of their treatment programs.

2. Program Plan

   These additional auditors will be required to perform lengthy and complex fiscal audits to establish and revise rates of reimbursement for contract providers of service.

   The complex financial arrangements made by some current providers include holding companies, lease back agreements, donated property and similar complications, all of which preclude an accurate cost estimate.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M March 11, 1980

SUBJECT: Effect on land and land grant assistance of establishment of a separate Alaska Community College System, HB 651

TO: Representative Thelma Buchholdt, Chairman
House Health, Education and Social Services Committee

FROM: John B. Chenoweth
Legislative Counsel

At the committee hearing of March 10th, members of the committee posed two questions, both bearing on the effect of establishment of a separate community college system on lands now held by or for the benefit of the University of Alaska.

The first question concerned the propriety of the legislature's designation of a second educational institution and the receipt by it of a portion of federal land grant assistance. In a 1976 memo, prepared in conjunction with an earlier version of community college legislation, the Agency suggested that it saw no problem in establishing institutions of higher education in addition to the land grant college originally designated:

> "Federal land grant aid is based upon the Morrill Act and subsequent legislation incorporated under 7 U.S.C. 301-349. Under the Morrill Act federal land or land script was donated to the states and the proceeds from the sale of the land or script was placed in a trust fund to be used 'to the endowment, support and maintenance of at least one college where the leading object shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts in such manner as the legislatures of the states may respectively prescribe, in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life.' (7 U.S.C. 304).

"The Morrill Act applied only to states and did not provide federal aid for territorial colleges. Consequently, the University of Alaska originated from a land grant enacted by Congress in 1915. The Act provided for the donation of certain federal lands to be leased by the Territory to provide operating expenses for 'the support of a territorial agricultural college and school of mines when established by the Legislature of Alaska' (P.L. 63-181, section 1). Section 2 of that 1915 Act of Congress provided federal lands as a site for the territorial college and school of mines. The original territorial college, therefore, was not created under the same conditions and procedures as were state colleges under the Morrill Act. Nevertheless, the successor to the original territorial college and school of mines has been and still is treated by the federal government as if it were a land grant college under the Morrill Act.

"Assuming then that the University of Alaska is a 'land grant' college as that term has been used in relation to the Morrill Act, the first question to be addressed is whether a state which already has an existing land grant college can create a separate postsecondary educational institution which could also be classified as a land grant college for purposes of receiving federal land grant aid. This question has been specifically answered by the courts. In State of Wyoming ex rel Wyoming Agricultural College v. Irvine 206 U.S. 278 (1906), the Wyoming Agricultural College, which was that state's original land grant college, contested the appropriation of federal land grant monies to the University of Wyoming, which was established several years after the Wyoming Agricultural College was founded. The plaintiff claimed that federal land grant monies were appropriated directly to land grant colleges and, as such, the state could not reallocate these monies to different educational institutions. The Supreme Court disagreed. It held that federal land grant monies are appropriated to the states - not to specific institutions - and the states, acting through the legislatures, could create additional institutions which could qualify for aid (206 U.S. at 283). The court's ruling was codified under the agricultural extension act which provided that if a state had two or more land grant colleges, federal land grant aid for extension programs 'shall be administered by such . . . colleges as the legislature of such state [or] territory . . . may direct' (7 U.S.C. 341)."

The Committee members' second question concerned particular parcels or tracts of land held by the University.

A 1976 study for the University, prepared by Charles E. Tulin and Dale Tubbs and published as a "Manual of University of Alaska Lands" identifies the University lands by parcel and catalogs the holdings into seven categories

(1) "Site lands", the lands within the Tanana Valley, the site of the principal campus of the system at Fairbanks, conveyed to the Territory of Alaska by the Act of March 4, 1915, 48 U.S.C. 354;

(2) Section 33 lands, reserved from townships 33 for the benefit of the University by the 1915 Act, 48 U.S.C. 353, and granted to the State by the Statehood Act;

(3) 100,000 acre lands, authorized by the Act of January 21, 1929, 48 U.S.C. 354a, providing that the University might select up to 100,000 acres of vacant non-mineral, surveyed, unreserved public lands;

(4) Experiment Station lands, withdrawn by the U. S. Department of Agriculture for experimental station purposes, and subsequently conveyed to the University by the United States Government;

(5) Gift lands, provided by private gifts and endowments;

(6) Purchased lands, acquired through purchase from private and public sources; and

(7) Leased lands, held by the University under lease-purchase or similar arrangement.

The report indicates that the various categories of lands are subject to differing restraints on alienation. Since committee members limited expressions of concern only to tracts or parcels which clearly related back to the original federal acts providing for conveyance of these lands, the first three categories of the preceding paragraph, I will limit discussion to these.

"Site lands", by the Act of 1915, are required to be "forever reserved and dedicated to use as a site for an agricultural college and school of mines," and constitute a revocable

grant. The 1915 Act does not authorize disposition of the lands, thus the four sections included in the Fairbanks campus site may not be reconveyed from University ownership.

Section 33 lands, that is, the various sections 33 of townships in the Tanana Valley, were reserved to the territory for the benefit of an agricultural college and school of mines by the same 1915 Act, but subject to different strictures. The original statute precluded "sale or settlement," but specifically permitted the lease of these lands, with use of the proceeds or income from these lands to be invested and the income to be expended "for the exclusive use and benefit of . . . the agricultural college and school of mines, . . . in such manner as the Legislature of Alaska may by law direct." The Statehood Act, P.L. 85-508, sec. 6(k), repealed provisions of the 1915 Act, granted to the State the lands previously reserved to the Territory, but imposed the additional condition that the Statehood Act land grant was "for the purposes for which [the lands] were reserved [under the 1915 Act, §353]." Thus, the state received title to the Section 33 lands as the corpus of a trust for the benefit of the state's university system.1/

The 100,000 Acre lands were originally granted by a 1929 Act, codified as 48 U.S.C. 354(a), and were subject to extensive limitations and conditions. Sale or disposal of these lands was, however, permitted, with the principal stipulation that sale proceeds be deposited into an account in the state treasury for the benefit of the University. The parallel state statute is AS 14.40.400, amended in secs. 3 - 5 of HB 651 to recognize the proposed community college system.

1/ Whether Section 33 lands may be sold or otherwise disposed of is an unresolved question. Relying on the provision in 48 U.S.C. 353 prohibiting sale or settlement of these lands as surviving repeal of that section by the Statehood Act, the Tulin-Tubbs report concludes that sale or disposal is precluded. In a 1978 memo, this Agency reached the opposite conclusion, suggesting that the repeal of §353 by the Statehood Act removed the impediment. However, the latter determination is without legal effect in that the legislature has specifically authorized only lease of these lands, with income to go for the benefit of the University under AS 14.40.360. HB 651 recognizes the applicability of the community college system's sharing in this income: see AS 14.42.300.

I suggest that, with respect to both Section 33 lands and those which derive from the so-called 100,000 acre category, the state legislature has latitude to determine that these lands may benefit a separate community college system as well as the University of Alaska corporation. The decision in Irvine earlier cited suggests that the legislature has discretion in the expenditure of land grant funds. There is no comparable court decision that considers the discretion which the legislature enjoys with respect to land when it authorizes establishment of a separate institutional system. But policy arguments, when coupled with reference to the land grant enabling legislation, 7 U.S.C. 301 - 308, suggest that, where, as with HB 651, the legislature is proposing to establish a community college system "as part of a comprehensive statewide system of degree and nondegree programs," where the course work offered by the community colleges provides both "practical education . . . in the several pursuits and professions of life," and a liberal education that does not exclude "other scientific and classical studies," -- the tests of the "rounded education" required to be provided by a land grant college, 7 U.S.C. 304 -- and where Congress has not required that land grant colleges provide a full course of instruction at only one location, the legislature may establish a community college system as an extension of the state's university system, to introduce postsecondary education to students at locations closer to their homes, without sacrificing the benefits received by the state's land grant status.

The matter of title to lands is admittedly not entirely clear. The committee may wish to consider additional language, to be added in sec. 18(a), to the effect that, where title to property may not be conveyed to a community college because of restrictions or limitations included in the grant of lands used for the benefit of a unit of the community college system, the Board of Regents shall enter into a long-term lease with the Board of Trustees of the Community College System by which the latter may have exclusive use of the facility or parcel for a period of years specified by statute.

JBC:ljb

THE BOARD OF REGENTS

UNIVERSITY OF ALASKA
FAIRBANKS, ALASKA 99701

March 7, 1980

Representative Thelma Buchholdt, Chairperson
House HESS Committee
112 State Capitol
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt & Committee Members:

House Bill 651, which you are now considering, would separate the Community College system from the University of Alaska. As Vice President of the Board of Regents and as an Alaskan citizen, I wish to bring your attention to four of the many issues that arise relative to the proposed split.

First, the University of Alaska is an integrated system of senior colleges, community colleges, Rural and Cooperative Extension Service Centers, fisheries and agricultural programs and many other services reaching every corner of the State. We cannot draw lines that would neatly put Community Colleges on one side and the University of Alaska on the other. There must continue to be full mutual access between the University and the people of Alaska. The constitutional mandate of the University and the proposed mandate of the Community Colleges would overlap in far too many areas. House Bill 651 would not create two complementary systems, but rather would invite duplications and confrontations on boundaries that are not and cannot easily be defined. We believe that would not be in the interests of the people of Alaska.

Second, we see immense potential in the present structure to provide integrated, coordinated educational services to the people of Alaska. No one is more aware than the Board of Regents is of the painful growth and development we have experienced to achieve this potential. House Bill 651 would dismantle that structure just as it is prepared to prove itself to be one of the great assets of the people of Alaska.

Third, the University of Alaska, in its entirety, is a small University. Seattle University, Portland State, Chico State and many other schools of modest size are larger than the University of Alaska. Providing maximum benefit from our capital, human and educational resources for a widely scattered population, is already our foremost challenge. Dividing those resources under two separate Boards and two separate Administrations is not the best use of resources, nor is it sound educational development.

And finally, House Bill 651 cannot relieve the Board of Regents of its constitutional responsibility to make the educational resources of the State University available to all citizens of the State. The Community Colleges are vital to the mission we accepted. Their removal would leave us with the same task, but with a drastically reduced capacity to respond.

To: Representative Thelma Buchholdt
From: Regent Jeffry J. Cook
Re: House Bill 651
Date: March 7, 1980

Many Legislators have expressed satisfaction with the tremendous strides that the University has made in the development of educational services. We now ask your support for continuation of a unified system of public higher education in Alaska.

Sincerely,

Jeffry J. Cook, Vice President
Board of Regents

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

[illegible] (Rev. 12/79)

A. Assumptions:

1. 10% inflation per year following FY81.
2. All support functions under the proposed Community College System would be totally independent and separate from the current University of Alaska system.
3. No program expansions or reductions are included in the fiscal data.
4. The Community College System Statewide offices would be based in Anchorage.

B. Program Summary:

1. Positions - An estimated 60 new positions would need to be added to perform all the functions presently being performed by the University of Alaska system. A few of these positions (approx. 15%), could be transferred from the University of Alaska. It is impossible to be precise without several months of detailed planning when the bill is enacted.

2. Types of Expenditures - The following table identifies, by function, the level of expenditure required to create a separate administrative structure for the proposed Community College System.

a. Board of Trustees expenses	$150,000
b. Data Processing Network	1,400,000
c. Financial Administration/Purchasing	333,000
d. Payroll	275,000
e. Institutional Studies	180,000
f. Admissions and Records	370,000
g. Financial Aid Administration	360,000
h. Facilities Planning/Construction	408,000
i. Rural Facility Maintenance	111,000
j. Public Information Office	118,000
k. Student Services	360,000
l. Legal Services	250,000
m. Risk Management	750,000
n. Property Control	65,000
o. Additional Leased Office Space	150,000
p. Labor Relations Management	80,000
q. External Audit	90,000
Total	$5,450,000
Approximately $800,000 could be transferred from UA	(800,000)
Net Increase to State (GF)	$4,650,000

3. Exclusions - The above data does not attempt to assess the fiscal impact on other institutions which presently deal with one university system. Other institutions include the Alaska Commission on Postsecondary Education, Alaska Department of Administration, and Alaska Department of Revenue.

C. Agency Comments: The University of Alaska is not in favor of the proposed HB 651. The principal reasons include:

1. When dealing with two entirely separate institutions, students attending the Community College System would have significantly greater problems with the transfer of credits than at present.
2. Dividing the University of Alaska at a time when the State's policies with respect to postsecondary education are not clearly defined would result in:
   a. further confusion about the allocation of resources for post secondary education;
   b. greatly expand the competition for resources dedicated to education; and
   c. result in costly and needless duplication of programs within the state.
3. The creation of the Community College System would necessitate a costly, duplicative, and unneeded bureaucracy in higher education.

4. While more populous states (such as California) have multiple systems of higher education Alaska still has one of the lowest population levels in the nation. Accordingly, the University of Alaska feels that the small population base does not warrant more than one public system of higher education.

5. A division of the University of Alaska would result in substantial amounts of litigation for a number of years. At present, many contracts are in force which affect multiple institutions. Lands, buildings, and property would need to be divided, and many federal grants and contracts would need to be renegotiated.

6. The currently pooled resources of the University of Alaska would be divided into fractional components, which would diminish the effectiveness of either institution in solving many of the state's problems, especially in rural education and crosscultural educational programs.

DATE: February 28, 1980

HB 651, an act establishing the Alaska Community College System, is before your committee for consideration. In your deliberations it may be useful to have available some general background information. Much of this information may have already been submitted through various testimonies, but I felt it might be beneficial to have it summarized in one place.

A. Community College Structures

In examining the governance structures for community colleges in the fifty states, one finds a variety of approaches. These can be categorized into six basic types for summary purposes, but it should be remembered that a great deal of variation may exist between approaches included under one category. The most important point to be made is that no one type is always successful or always a failure. There are strengths and weaknesses to each, and there are advocates and critics of each. No single approach can be held up as the only, or best approach for other than subjective reasons.

Structure	Number of States	
No community colleges	2	(SD and IN)
CC's part of university	4	(AK, HI, KY, NY)
Separate CC board - no coord. board	7	
Separate boards with a coord. board	28	
One statewide ed. bd. for all educ.	5	
CC's divided between bd's.	4	
	50	

B. Transfer of Credits

Transferability of credit is not a product of the governance structure, or at least, it should not be. A student attending a public institution should be given the information as to exactly which credits will or will not transfer to other in-state public institutions; and further, if the credits do transfer, the student should know if the credits apply toward major degree requirements. This can be achieved with a single system or a totally independent system, with or without a statewide coordinating board.

C. Accreditation

If accreditation problems exist currently, they would probably continue to exist under a different structure. Each institution is presently seeking its own accreditation, so creating a new separate system should not adversely affect this process. In other words, accreditation should not be a prime determinate in the current deliberations.

D. Educational Goals

The goals of a community college are different from the goals of a university. This is well-established. In fact, a nationwide study of over 1,000 persons, conducted in 1976 by Dr. Leonard Romney of the National Center for Higher Education Management Systems, documented, or attempted to document, these differences. Trustees, administrators, and faculty were asked to rank twenty goal areas for their institution. Those goals ranked highest by community college representatives were quite different from those ranked highest by doctorate-granting universities. For example: trustees, administrators, and faculty in community colleges ranked "meeting local needs: as 2nd, 1st, and 2nd, respectively; while those doctorate-granting university representatives ranked it as 16th, 15th, and 15th, respectively. Conversely, doctorate-granting univeristy trustees, administrators, and faculty ranked "academic development" as 2nd, 1st, and 1st, respectively; while community college representatives ranked it 13th, 7th, and 9th, respectively.

Whether or not a single administration and single board can encompass these divergent philosophies is of course at the center of the current issue. As with so many of these questions, the answer may be people-dependent rather than structure-dependent. Within some states a single board and administration is both lauded and criticized. The same is true for those states with separate boards. The decision as to which structure is the best for which state is a question for the Legislature, and ultimately, the people to answer.

E. Administrative Efficiency

Efficiency is usually measured as a relationship between cost and output. In education this becomes extremely difficult to measure, especially in any objective fashion. Costs, of course, can be readily identified, and there are few who would argue that two separate systems will not require additional costs.

Output, in an educational sense, relates to actual changes in the lives of people. To simply quantify outputs in terms of credit hours produced or degrees granted is a disservice. If this is recognized, the question then becomes one of whether or not the educational outputs and services would be better under one structure than another. This is also a philosophical issue which must be addressed on a state by state level. Would one structure or the other be educationally better for Alaska? Would one structure or the other better promote the services and programs of community colleges in Alaska? These are the questions to be answered.

F. Enrollment Data

Enrollments in Alaska's community colleges have expanded by more than 400 percent in the last eight years. Some if this increase is attributable to expansion of the community college system, but the majority of the increase is an absolute increase in the percentage of the population receiving educational services from the community college system. In terms of headcount, in 1978-79, the community colleges accounted for 62.6% of the students enrolled for credit in the University of Alaska. This headcount relationship is presented in Figure 1.

Peak semester enrollments are used to reflect the most individuals served at one time (semester) throughout the academic year.

Figure 2 contains data on student credit hours produced within the University of Alaska system. In 1978-79, the community colleges produced 55.2% of the total student credit hours. From these comparisons it is readily seen that Alaska's community colleges represent a large and vital portion of the public postsecondary educational resources of the State.

Full-time equivalent enrollments, those calculated by converting student credit hours to a full-time student equivalent, are presented in Figure 3.

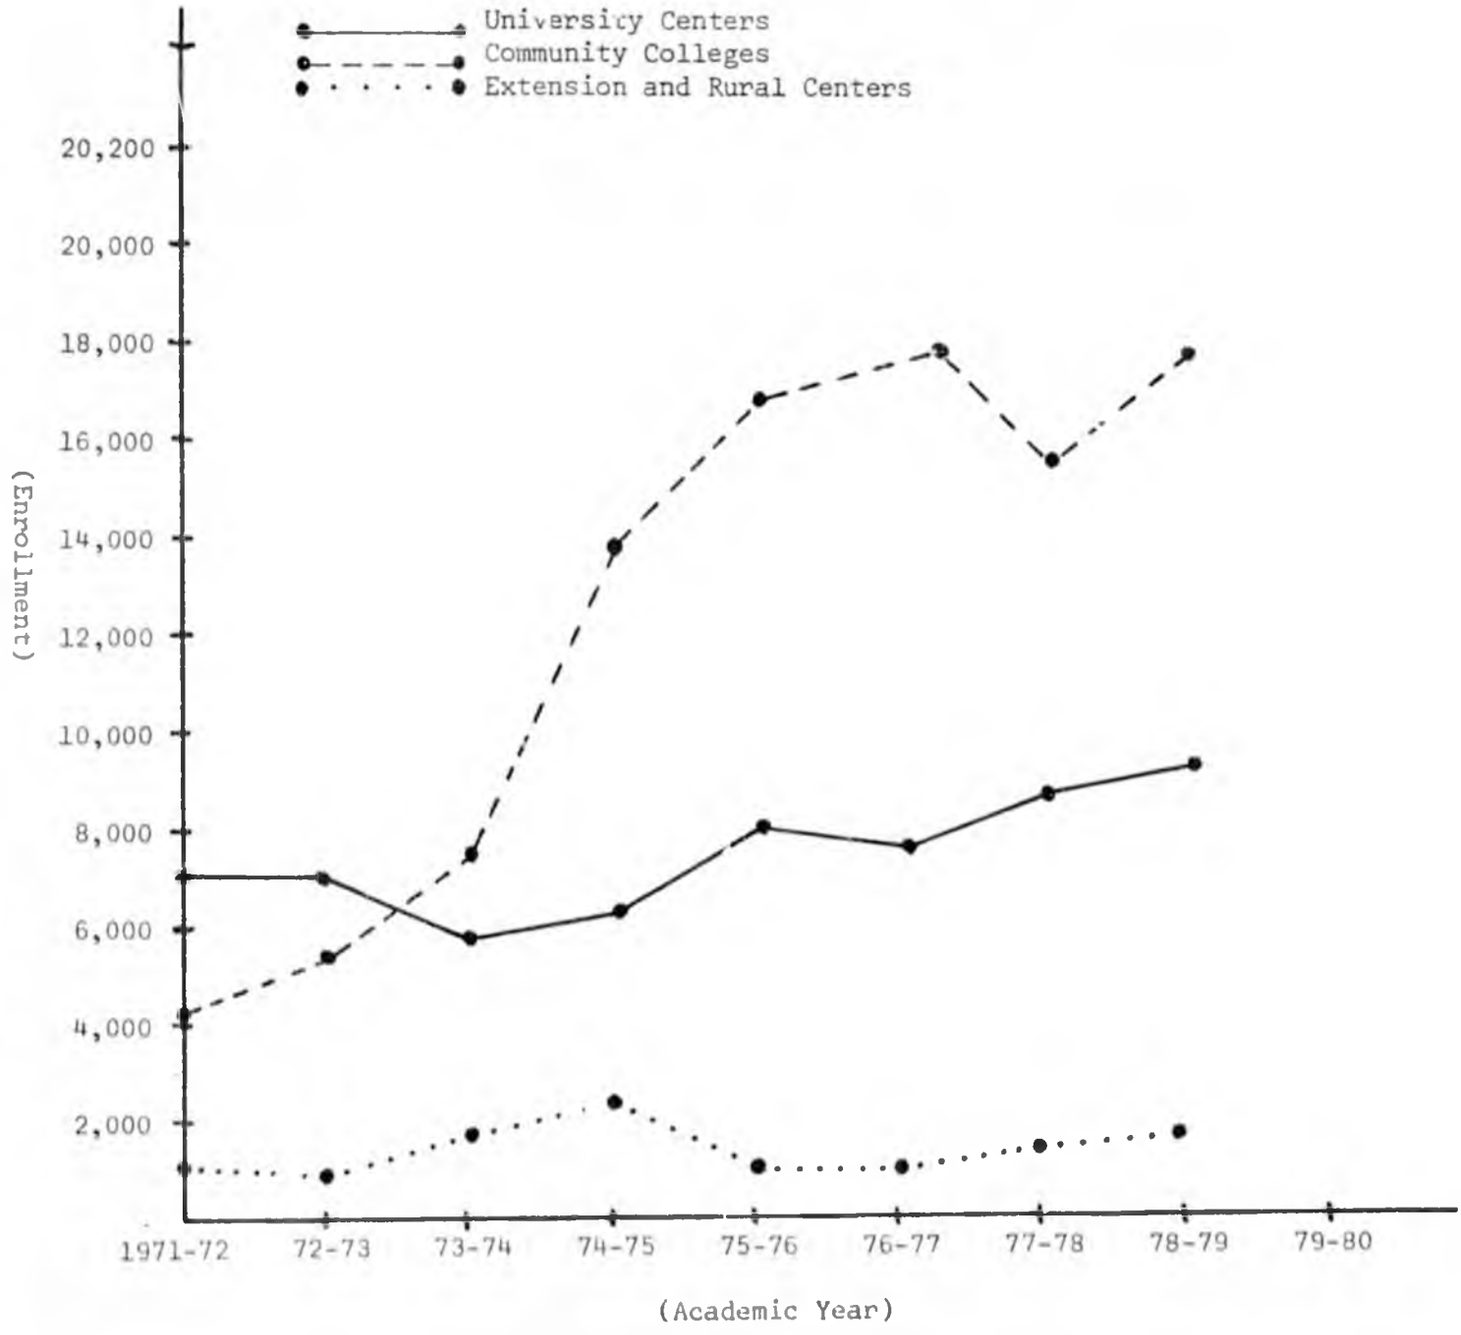

Figure 1

Juneau, Alaska 99811

Dear Representative Buchholdt:

I am writing to follow-up my personal testimony on the teleconference on HB 651, held sometime ago. At our regular meeting last night, the Ketchikan Community College Policy Advisory Council discussed this bill in particular, and the issue of separation in general, at some length. Following careful consideration, it is our considered position that we oppose enactment of HB 651.

While there are changes in the community colleges that could be helpful, we believe that they are most effective as part of the University of Alaska. We are impressed with the information gathering that Dr. Jay Barton has done, and would prefer to continue the current relationship at this time, rather than embark upon a new organizational structure.

Thank you for providing the opportunity to us to testify on this legislation. We will continue to study this issue, and would be glad to respond further, should that be helpful in your deliberations.

Yours truly,

D E Johnson

112 State Capitol
Pouch V
Juneau, Alaska 99811

Dear Representative Bucholdt & Committee Members,

The papers on which you requested a response all discuss matters related to the debt service on bonds for student centers in Fairbanks and Anchorage. One paper also discusses the budget of the ACC Electronic Technology Program.

The paper entitled "History of Student Center Bonds" is correct in saying that the University initially could not sell bonds for the Anchorage center. It was necessary to agree to earmark 35% of tuition for debt service in order to sell the bonds. Enclosed are letters which explain the bond requirements relative to the student centers.

As you will see, the University has little latitude in the management of debt service. The alternatives are spelled out on page two of Sherman Carter's letter to Bill Hogan, dated February 2.

In regard to the Electronic Technology Program budget, a 47% cut was made across the instructional budgets of all ACC disciplines when the ACC tuition shortfall became apparent. The Board of Regents submitted a supplemental request for $350,000 to cover the shortfall. SB426 proposes to fully fund the request while CSHB60 proposes to fund it at $250,000. If the supplemental appropriation is funded -- preferably to the amount requested -- we can alleviate some of the problems brought to your attention.

The Electronics Technology Program at ACC is a strong program for which both the Community College Chancellor and the ACC President expect to provide the fullest support possible as funds are made available. By the same token, other programs should receive the same fair consideration that the Electronics Technology Program will receive.

We would be happy to provide any additional information you require.

Sincerely,

Dennis Demmert

FROM: Ashok K. Dhingra
Associate Vice President for Finance

In reference to the papers that you gave me last week relating to Anchorage Community College, statements made in the said papers are not fully accurate. On the subject of Debt Service Requirements, enclosed find a copy of the letter that was recently sent to Bill Hogan. The information in this attachment responds to the concerns expressed in the papers that you provided to me.

As to the Electronic Technology program, the paper on this outlined the budget fairly accurately for this program. The above is based on information confirmed by Anchorage Community College Staff, Larry Kingry, who is the head of this division. He has provided us the following observations pertaining to the said paper.

1. FY79 travel funds were allocated to several Electronic Technology faculty but those funds were distributed from the Director's office control account.

2. Several cost saving devices were used in FY79 and FY80 by consolidating program budgets and purchasing a dry copier thus saving contractual services expenditures.

3. Travel funds for FY79 and FY80 were reduced by the legislature.

4. FY80 equipment funds were cut entirely from program budgets by the legislature. Funds allocated to the chancellor were sufficient only to cover emergency needs.

5. True inflation rate over the last several years has been greater than that funded by the legislature. As commodity prices rose, funds had to be redistributed to programs in critical areas. FY80 reductions in the 4001 and 3001 line items to some programs are the result of this redistribution.

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

February 27, 1980

Mr. Bill Hogan
Aide to Senator John Sackett
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Bill:

This letter is to provide information which you requested from Ashok Dhingra regarding debt service requirements for student centers at Anchorage and Fairbanks.

Undergraduate resident students on both campuses pay $170 per semester tuition. Additionally, at UAF, students are charged $15 per semester for covering part of the debt service on the Wood Center. On both campuses, students pay some additional fees for different things, such as their own student organizations; but, no charge on the Anchorage campus compares with the $15 per semester charge made to UAF students to retire debt on their student center. Additional monies as necessary, up to 25% of the fulltime student tuition, are pledged to cover the total debt service requirement on the Wood Center. At Anchorage, debt service on the student center is covered totally from part of the aforementioned $170 per semester student tuition which these students pay.

Data concerning indebtedness on student centers is summarized below:

Anchorage student center

Original debt: $5,000.0

Amount outstanding: $5,000.0

Interest rate: 8.00%

Type: revenue bonds, non-registered, payable to bearer

Maturity date: May 1, 2000

Prepayment: no prepayment is allowed until 5/1/85; after that, any prepayment is subject to a 2% penalty.

Faribanks student center

Original debt: $4,000.0

Amount outstanding: $3,076.0

Interest rate: 5.00%

Type: "Special Obligation Installment Note" with State of Alaska

Maturity date: June 31, 1995

Prepayment: no prepayment penalty

A paper which I wrote earlier this month concerning the debt service requirement on the Anchorage student center is attached. However, there are some additional related points which should be made. For FY80 and FY81, collections from the 35% tuition mentioned in the attachment are now budgeted to be used as follows:

UAA Administration and Plant	$125.3
UAA Student Services	125.3
ACC Student Services	39.8
Operation of the Student Center	252.7

We are now using more money than is being collected from the 35% of student tuition to retire debt, since we have a past accumulation of funds. Starting in FY82, however, the only money which will be available from this source, in addition to debt service, will be the above-listed $252.7 for operation of the student center. The other charges listed above, for the administration and plant and for student services, will need to be covered from the general fund.

To summarize--

(1) It is not possible to prepay the indebtedness on the Anchorage student center until May 1, 1985; then, if this indebtedness is to be prepaid there will be a 2% penalty.

(2) The indebtedness on the student center at UAF could be prepaid at any time.

(3) The university has no money in hand or in sight to prepay indebtedness on either student center. If the state wishes to provide the university money to prepay such indebtedness, that would be fine as far as the university is concerned.

(4) UAF students are now being required to pay $15 per semester extra to retire indebtedness on their student center while debt service on the Anchorage student center is paid from tuition paid by students attending UAA and ACC.

(5) Because of this disparity and because the debt on the Anchorage student center cannot be paid until 1985, the state may wish now to consider covering indebtedness on the Fairbanks student center.

(6) Since this debt is owed to the state, I assume that the legislature could simply arrange to waive or forgive this debt, rather than going through the process of appropriating the money to the university for use to repay the state.

(7) If the legislature were now to cover outstanding indebtedness on the Wood Center, (a) UAF students would no longer need to be assessed the special $15 per semester student fee, and also (b) the university's budget request for general fund money for FY81 could be reduced by $210.8. This represents the amount of the $170 per semester tuition at UAF being used for Wood Center debt service. If the above-cited debt for UAF is retired, a general fund offset in the amount of $210.8 thus can be made in the UAF instruction component.

To keep interested persons informed about these matters, because of student lobbying with respect to prepayment of indebtedness on the student centers, and because some points in this paper differ slightly from information previously presented, I shall now send copies of this letter to the persons listed below.

Sincerely,

Sherman Carter

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

February 4, 1980

TO: Chancellor O'Rourke

FROM: Sherman Carter

SUBJECT: Debt Service Requirements

This is to respond to a paper which you wrote to me dated 22 January regarding the requirement to set aside 35% of student fee collections for debt service. We previously made the interpretation that special fees such as lab fees and any receipts which might eventually be collected for such things as dormitory rentals or operating a housing system are excluded. And, it now may be possible further to expand somewhat exceptions to the 35% requirement.

Provisions to cover indebtedness on the student center are somewhat complicated. The annual debt service requirement is about $502.0. However, the bond indenture requires that the university collect about $754.8, that is, about 1½ times the annual debt coverage which is required. This amount must be collected and segregated. Then the amount in excess of what is needed to cover the debt service during any fiscal year may be used on the Anchorage campus, by UAA and ACC, the next year. For the current year, the state specified how that money was to be used. If the state does not so specify this in the future, we will make an equitable distribution of that money to UAA and ACC based upon the amount which each has contributed.

Stating again points made above, in FY80 we must collect about $754.8 to service debt on the student center on the Anchorage campus. However, only about $502.0 will actually be used to service this debt in FY80. The $252.8 then can be used by UAA and ACC in FY81. Any collections over the $754.8 in FY80 may be used in FY80. However, this year in order to do that, we must clear that with the legislative budget and audit committee.

The situation as I understand it, is that self-supporting courses could be given at Elmendorf AFB and Fort Richardson if the 35% debt service requirement were not involved, but with this requirement, charges cannot be such that the courses will be self-supporting. So, with the 35% debt service requirement, some such courses cannot be conducted. If this is true, and if and when we are certain of being able to cover the $754.8 from student collections which are made in FY80, it will be permissible for all courses which are set up on a self-support basis which are conducted off campus by ACC and UAA to be excluded from the requirement to set aside 35% of collections from students to service debt on buildings on the campus. I suppose that most "self-support" courses which are conducted off campus will be by ACC rather than UAA; however, to ensure that both ACC and UAA are following the same rules, I shall send a copy of this paper to Chancellor Frank Harrison.

In FY79, student fees collected against the 35% requirement totaled $787.397--$339.437 came from UAA and $447.960 came from ACC. I do not know how much, if any of this came from self-support courses conducted off campus. I assure that

more fees will be collected in FY80 than in FY79. But, I must continue to emphasize that before instituting the change mentioned above (i.e., excluding the 35% requirement for self-supporting courses conducted off the Anchorage campus by UAA and ACC) conservative projections must indicate that the $754.8 will be collected this year from the 35% of student tuition which is set aside. I do not yet know the financial impact of making the change underlined above, and it is not to be implemented until we can eliminate any doubt about being able to collect at least the $754.8 in FY80.

Your paper to me asked if the legal requirement for covering bonded indebtedness was to attain only some specific dollar amount. No, it unfortunately does not simply provide for that. We must go through the drill of initially setting aside the 35% collection for debt services and then redistributing the excess collections as explained above. And, I do not want even to consider the interpretation described above with regard to self-supporting courses conducted off campus unless UAA and ACC will collect over the $754.8. If they will, the interpretation is reasonable, in the university's best interests, permits presenting courses that would not otherwise be conducted, and does not jeopardize in any way the position of the holders of this debt.

In conclusion, Pat, I shall help you get in place the provisions underlined on the previous page, as soon as possible. To proceed to do this, please send me conservatively prepared financial projections for FY80 indicating the amount of fees to be collected by ACC in FY80 which compare with the $447.960 cited above. Please have this information presented two ways—under procedures now in effect and under the procedure specified by the underlined provisions on the previous page. By sending a copy of this paper to Chancellor Harrison I shall ask him please to send me this same data for UAA, that is, considering that UAA contributed $339.437 toward student center debt service in FY79, how much is UAA projected to contribute in FY80, assuming (a) current procedures remain in effect, and (b) procedure gets changed as specified by the underlined provisions on the previous page? If possible, I would like to get this data from UAA and ACC within two weeks. Then, we can see where we are. If we cannot be sure of collecting enough money for debt service in FY80 to institute the new procedure, perhaps we can fix things in another way to solve the problem for the year starting July 1, 1980.

Juneau, AK 99811

Dear Thelma,

As mentioned in my earlier letter the Committee for Autonomy has some concern with page 24 of HB651. We had hoped to clear proposed changes with the ACCFT legal counsel, but he has been unavailable. Since I realize you may be marking up the bill in the near future I am writing to give you our suggestions and would also like to ask that they be cleared with Legislative Counsel.

We suggest that page 24 line 9 and 10 read as follows: "... and who were employed for 1979-80 shall be offered equivalent employment by the Alaska Community College system. The..."

We suggest that page 24 line 25 read: "... the University of Alaska during 1979-80, shall be assumed by the..."

While these changes seem minor, to us they represent a much greater protection both for employees of the community colleges and the community college programs, and we feel it extremely important that they he made. We are especially concerned about the impact of these provisions on Juneau Douglas.

Thank you again for your community college efforts.

Mim Carlson

Rep. Thelma Buchholdt
Chairperson House Health
Education & Social Services Committee
Pouch V
Juneau, AK 99811

Dear Thelma,

The committee for Community College Autonomy reviewed HB651 and the comments made by John Chenoweth, Legislative Counsel. We wholeheartedly endorse the bill. We did have several suggestions of minor changes which I communicated verbally to your assistant. The following is to give you written confirmation of those suggestions.

1. Our suggested draft included the following in Sec. 14.42.230(a)

> Sec. 14.42.230. FINANCE. (a) The state is basically responsible for the funding for all community college, extension center or outreach programs and activities.
>
> However, nothing in this chapter prohibits a school district, municipality, federal agency or nonprofit corporation or association from providing funds for additional courses and programs which may be considered appropriate under Sec. 210(a)(3) of this chapter.

We feel that it is important to retain this statement in the bill. Mr. Chenoweth felt this was a philosophical statement that might better be included in a purpose or intent clause. We suggest incorporating this statement on page 2 line 8 as item (c)..

On page 17 add the word <u>same</u> on line 21 to read as follows: "Alaska, the <u>same</u> shared or joint use of these facilities..." After line 26 add the following: <u>Subsequent changes are subject to mutual agreement of both boards.</u>

These suggestions are made because there was fear that in the transition period there might be an attempt on the part of the University to preempt community college use of facilities. These two changes would insure status quo in the transition and provide for future flexibility.

On page 18 line 2 we suggest changing shall to may, so that it reads "...the two boards may enter into a contract ..."

It was our feeling that it would allow for more flexibility in the future if this were made a permissive rather than a mandatory statement.

We have some concerns about page 24 line 5-13. We are awaiting a legal opinion as to whether this fully protects the employment rights of all present community college staff. We will notify your office immediately if our counsel suggests any change.

On behalf of the committee I would like to express our appreciation for your efforts on our behalf.

Thank you,

Miriam Carlson

Representative Thelma Buchholdt
Chairman, House HESS Committee
Pouch V
Juneau, Alaska 99811

Dear HESS Committee:

On Tuesday, February 19 I appeared in a teleconference committee hearing as a witness on the subject of House Bill 651. A quite accurate transcription of my remarks is attached. The analysis would have been more extensive and in-depth except that we mistakenly thought the testimony of each person would be limited to about 2-5 minutes.

During the course of the testimony, Policy Advisory Committee Chairman Donnis Thompson remarked that a meeting would be held and the subject of separation discussed on Thursday, February 21. A copy of the minutes of that meeting are attached. A digest of the discussion on House Bill 651 is included on the second page of the minutes.

Again we thank you for allowing us to present our testimony. In the event that further testimony would be in order, I am sure that the other members of our Policy Advisory Council would be glad to bear witness.

Very truly yours,

John G. Wilsey, Ed.D.
Campus President

TESTIMONY TO THE HEALTH, EDUCATION & SOCIAL SERVICES COMMITTEE OF THE HOUSE OF REPRESENTATIVES, STATE OF ALASKA

REPRESENTATIVE THELMA BUCHHOLDT, CHAIRMAN

CHAIRMAN BUCHHOLDT AND MEMBERS OF THE HESS COMMITTEE, I AM JOHN WILSEY, PRESIDENT OF THE KENAI PENINSULA COMMUNITY COLLEGE. ALL OF US IN THE ALASKA COMMUNITY COLLEGE SYSTEM ARE VITALLY INTERESTED IN HOUSE BILL 651 AND OTHER LEGISLATIVE ACTIONS THAT WOULD AFFECT OUR ACTIVITIES. AND IT IS COMFORTING TO KNOW THAT THE LEGISLATURE IS INDEED INTERESTED IN THE COMMUNITY COLLEGES THIS STATE.

BUT MAY I ADDRESS HB-651 NEITHER AS AN ADVOCATE NOR AS AN OPPONENT BUT RATHER AS A NEUTRAL? I WOULD SPEAK ONLY TO CERTAIN FEATURES, ASPECTS AND IMPLICATIONS OF THE BILL. IT IS A FAR RANGING DOCUMENT IN WHICH MUCH THOUGHT HAS BEEN PLACED BUT READING IT RAISES QUESTIONS FOR ME. HOUSE BILL 651 COULD CREATE A VERY HIGHLY BUREAUCRATIZED CENTRAL AUTHORITY. AS IT IS WRITTEN THE STATE COULD END UP WITH A SINGLE COMMUNITY COLLEGE AND EXTENSIONS OR BRANCHES LOCATED AROUND THE STATE. ASSUMING THAT THE PURPOSE IS INCREASED AUTONOMY TO ALLOW FOR THE FLEXIBILITY SO VITAL TO ANSWER COMMUNITY NEEDS, THIS BILL PLAYS A STRONG EMPHASIS ON A TIGHT HIERARCHY WHICH COULD PROVE MOST BENEFICIAL OR COULD STYMIE HIGHER EDUCATION IN COMMUNITY COLLEGES. MANY STATES OPERATE SUCCESSFULLY WITH A BOARD OF TRUSTEES, AN EXECUTIVE DIRECTOR OR CHANCELLOR WHO PRESIDES OVER A SMALL CENTRAL OFFICE, LOCAL BOARDS OF GOVERNORS OR SOME SUCH, AND LOCAL PRESIDENTS.

THERE IS MUCH TO BE SAID FOR THIS WHICH FOLLOWS THE NATIONAL PATTERN YOU MIGHT CONSIDER.

THE EXTREME PROBLEM OF EQUITABLE FUNDING IS NOT ADDRESSED SPECIFICALLY IN HB-651. COMMUNITY COLLEGES MUST BE ABLE TO GAUGE REVENUES ACCURATELY ALLOWING FOR BASIC COSTS, GROWTH OR SHRINKAGE, AND DISCRETIONARY FUNDS RATHER THAN AN ANNUAL PERHAPS CONGENIAL BUT FIERCLY COMPETITIVE CONFRONTATION. THE PUBLIC SCHOOLS OFFER A GOOD EXAMPLE.

THE COMPOSITION OF THE CRITICALLY IMPORTANT BOARD OF TRUSTEES CAUSES DISCOMFITURES. A FACULTY MEMBER IS NAMED; HE WOULD SEEM TO HAVE THE GROSSEST KIND OF CONFLICT OF INTEREST BECAUSE HE WOULD HELP DETERMINE HIS OWN SALARY. ALSO, UNDER THE ACT NO COMMUNITY COLLEGE STUDENT COULD EVER BECOME ELIGIBLE FOR MEMBERSHIP ON THE BOARD. AND IF THE FACULTY AND STUDENT ARE NAMED WHY NOT ADD A CAMPUS PRESIDENT, A BUSINESSMAN, A HOUSEWIFE OR OTHER CATEGORIES? HERE IS WHERE A LA BOARD MIGHT OPERATE BEST AND MOST EFFECTIVELY.

LOCAL CONTROL WOULD SEEM A MUST FOR AN AUTONOMOUS COMMUNITY COLLEGE SYSTEM TO WORK. LOCALLY ELECTED BOARDS OF GOVERNORS SHOULD GIVE REAL ATTENTION TO LOCAL NEEDS AND MAKE POLICY UNDER THE UMBRELLA OF THE STATE BOARD. A BOARD ELECTED IN A DEMOCRATIC MANNER COULD BE EXPECIALLY EFFECTIVE IF ACCOMPANIED BY LEGALIZED TAX BASE OR ITS BOROUGH EQUIVALENT.

ONE PROBLEM TO BE CONSIDERED HAS TO DO WITH THE TRANSFERABILITY OF CREDIT IN A STATE ARTICULATED PROGRAM. TO ASSURE TRANSFER STUDENTS THAT THEIR TIME HAS NOT BEEN WASTED WOULD SEEM TO BE AN IMPORTANT ITEM TO CONSIDER AS IT IS IN THE FLORIDA PLAN.

RELATED TO THIS, WHAT OF INTRUSION INTO THE HOMEGROUND OF THE COMMUNITY COLLEGES? HOUSE BILL 651 SAYS THAT COMMUNITY COLLEGES "MAY" COORDINATE UPPER LEVEL AND GRADUATE COURSES. WHAT IF THEY CHOOSE NOT TO DO SO? THIS PROBLEM MIGHT BE APPROACHED BENEFICIALLY THROUGH SUCH AN ORGANIZATION AS THE RURAL EDUCATION DEPARTMENT OF THE PRESENT COMMUNITY COLLEGE DIVISION.

COMMITTEE MEMBERS, THIS BILL ADDRESSES MORE THAN SEPARATION. I AM SURE YOU COULD ANSWER THIS BUT I CANNOT. WHY ARE SCHOLARSHIPS INCLUDED IN THE SEPARATION BILL? COULD SCHOLARSHIPS BE TAKEN CARE OF UNDER A SEPARATE ACT?

OTHERS WILL HAVE TO ADDRESS THE MANY STICKY ISSUES NOT SPOKEN TO HERE: COMPREHENSIVENESS, HOUSING, DIVISION OF PROPERTY AND EQUIPMENT, LAND GRANT LEGALITIES, STUDENT FEES, TERMINATION AND TRANSFER OF STAFF AND FACULTY, AND OTHER RELATED ITEMS. BUT IT IS MY GUESS THAT TO SERVE A MAXIMUM NUMBER OF CITIZEN-STUDENTS IN A MANNER THAT ADDRESSES THE VARIED NEEDS OF EACH COMMUNITY IN A WIDELY DIVERSIFIED STATE, YOU ALREADY HAVE TASK FORCES ON THIS BILL AT THIS MOMENT.

TO ME IT IS MOST GRATIFYING JUST TO KNOW THAT THE LEGISLATURE IS CONCERNED ABOUT ITS HIGHER EDUCATION SYSTEM. AND IN THIS TESTIMONY I HAVE SPOKEN ONLY TO FEATURES OF THE BILL RATHER THAN SEPARATION ITSELF, BUT IF SEPARATION WOULD BECOME A FACT, PLEASE GIVE US 15 MINUTES AND WATCH OUR SMOKE.

I THANK YOU FOR ALLOWING ME TO TESTIFY TODAY.

KENAI PENINSULA COMMUNITY COLLEGE POLICY ADVISORY COUNCIL
Minutes, Meeting of February 21, 1980

Meeting called to order at 7:10 P.M. by Chairman Thompson.

MEMBERS PRESENT: Donnis Thompson, Chairman, George Day, Marion Hylen, Hazel Heath, John Monfor, Walter Ward, John Wilsey.

MEMBERS ABSENT: Earl Mundell, Linda O'Brien.

MOTION: By Day, second Heath, passed unanimously.

That the Minutes of meeting of November 29, 1979 be accepted as read.

AGENDA APPROVAL: By concensus, Chairman Thompson was given permission to rearrange the Schedule as required due to the expected appearance of Dr. Pat O'Rourke about 8:00 P.M.

GUESTS, STAFF AND VISITORS: Dave Forbes, Jim Morrison, Chris Butzen, Dayne Clark, Margo Zuelow, Tom Wagoner, Dennis Steffy, John Williams.

REPORTS: President Wilsey reported on a meeting of Campus Presidents in Anchorage.

Dean of Instruction, Margo Zuelow, presented three Grant Proposals for approval by the PAC.

MOTION: By Heath, second Hylen, passed unanimously.

That the Policy Advisory Council of the Kenai Peninsula Community College hereby recommends final approval of the proposal, NETWORK: PHASE II to be funded by ALASKA COMMISSION ON POSTSECONDARY EDUCATION: HIGHER EDUCATION FUNDS. The Policy Advisory Council commends the administration, faculty, and staff for seeking funding for activities such as represented here.

By Day, second Hylen, passed unanimously.

That the Policy Advisory Council of the Kenai Peninsula Community College hereby recommends final approval of the proposal, STATE OF ALASKA: PETROLEUM EXTENSION SERVICE to be funded by ALASKA DEPARTMENT OF EDUCATION, CAREER AND VOCATIONAL EDUCATION UNIT. The Policy Advisory Council commends the administration, faculty and staff for seeking funding for activities such as represented here.

By Ward, second Hylen, passed unanimously.

That the Policy Advisory Council of the Kenai Peninsula Community College hereby recommends final approval of the proposal, KPCC DEVELOPMENTAL STUDIES PROJECT to be funded by NATIONAL BASIC SKILLS IMPROVEMENT PROJECT. The Policy Advisory Council commends the administration, faculty and staff for seeking funding for activities such as represented here.

REPORTS: Business Manager, Tom Wagoner, explained the problems caused by accrued leave. Budget margins are thin but KPCC is staying within its requirements.

REQUEST BY LEGISLATORS: The prioritized lists themselves and related communications were distributed to PAC members. At this time Dr. O'Rourke arrived. After brief discussion, it was agreed that the Chancellor and Campus President should meet to discuss the matter.

SEPARATION OF C.C. FROM U.A.: House Bill 651 was mentioned although not reviewed. In Dr. Wilsey's opinion the Bill has serious deficiencies and his Testimony to HESS on the Bill was distributed. Dr. O'Rourke pointed out that HB-651 and SB-483 were exactly the same and if passed in the present form an FCC would not be necessary. Opinions by the PAC members on the matter varied. Day spoke for separation perhaps not through this Bill. Hylen spoke for separation possibly going to a Borough college. Heath felt that whatever would benefit all areas of the Kenai Peninsula would be best. Monfor spoke for separation. Ward suggested looking at aiternatives such as SB-190 which sponsors Grades 13 and 14 in the public schools. Chairman Thompson did not take a stand.

FUTURE MEETINGS: As the time was growing late a number of Agenda items were held over to the next meeting. Chairman Thompson spoke to the need for monthly meetings until the great mass of backed up work due to having bi-monthly meetings be taken care of. Hylen pointed to the desirability of workshops and the inability to make informed decisions without more time for study. All agreed that it is impossible to make sound decisions without more time for preparation.

The next meeting was scheduled for March 13, 1980 at 7:00 P.M.

MEETING ADJOURNED: 10:07 P.M.

KETCHIKAN COMMUNITY COLLEGE
7th and Madison
KETCHIKAN, ALASKA 99901
907-225-6177

February 20, 1980

Representative Thelma Buchholdt
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

I appreciated the opportunity to speak on House Bill 651 last evening, but feel that I should write relative to my concerns as I did not mention all of them last night as they had been previously mentioned by other people testifying.

As I stated, I had worked for three different systems while engaged in community college education and those systems being the K-12 system, a statewide community college system, and then the statewide system of higher education as we have here in Alaska. I see advantages and disadvantages of each system, but have concluded that different systems work better and more efficiently in different states depending on their geographic size and their administrative structure.

I read the bill as a mixture of educational delivery systems and not once specifically relating to community colleges and its accepted philosophy and objectives for providing educational opportunities of lower division offerings in a local geographical area at a reasonable cost to students. My major question relative to the intent of the bill is whether it is establishing a community college system or separating out that portion of the Univeristy of Alaska now in the Division of Community College, Rural Education and Extension under Chancellor O'Rourke. Rural education and cooperative extension have different objectives than community colleges and I am wondering in this bill if we are mixing a number of different ingredients as to philosophy and objectives.

Some of the specific items in the bill that I considered were concerns are as follows:

Section 1, Paragraph 4 - Educational delivery system that may or may not lead to baccalaureate and advanced degrees. The question is whether this is opening up the possibility that the community college system being created by this bill would, therefore, open the doors for community colleges to offer upper-division and graduate courses.

Article I, Section 14.42.030 - Faculty member of a community college being on the Board of Trustees. This could create a situation where there could be a conflict of interest with the collective bargaining faculty serving on the Board of Trustees in having a voice in determining the policies and making the decisions relative to governance.

Article I, Section 14.42.040 - The method of determining a student member to the Board of Trustees. The bill states that a person must be a full-time student for at least one year before appointment, then the student would be appointed for a two-year term. Traditionally, students in community colleges usually attend only a maximum of two years so, therefore, most of the terms for students would only be one year or less.

If there are going to be faculty members and students on the Board of Trustees, consideration might be given to putting on an administrator and a classified staff member as they are a part of the total community college.

Section 14.42.140 - It states that the principal administrative officer of each community college campus will be responsible directly to the president and to the community college council, however, it does not specify what the community college councils are responsible and accountable for. This also relates to Section 14.42.170 where it states that the community college council will act in a policy making capacity and also in an advisory capacity, but again the responsibilities are not specifically listed and I believe that this could cause some conflict between the chief executive officer of the board and the local community college councils.

Section 14.42.150 - It states that regional service centers also may be established to administer the outreach programs and to provide postsecondary education services. In reading this, this would appear that it would probably be an opportunity for the community college to offer upper-division and graduate courses which has not been a community college objective or function in the past. Again, if this is supposed to be a function of the rural education outreach programs, it comes back to my original statement relative to a difference of philosophy and objectives of the areas to be included in the community college system.

Section 14.42.170 - With the establishment of the community college council, again it refers of having faculty and student representation as well as representatives from other agencies in the area. Again, why not include an administrator and a classified staff member if these councils are established.

Section 14.42.200 - This section again refers to the establishing of the extension centers and outreach programs that may or may not include upper-division and graduate courses in-so-far as the community college determines demand for postsecondary education. This could cause some conflicts and duplications in-so-far as cooperative agreements may be made with one university, but would not prohibit another university from coming in and offering parallel or similar courses on their own initiative.

Section 14.42.230 - It states that the board shall prepare a complete budget for each community college including all courses, programs and activities. This would make a very cumbersome and expansive budget proposal if all courses and activities had to be included and it would also put limitations on community colleges of offering courses that were requested during the year after the budget was put together. I am assuming that this does not mean listing every individual course and every individual activity that is sponsored or offered by a community college.

Section 14.42.240 - The question arises as to the constitutiorality of community colleges being land-grant institutions when not associated with the state four-year university.

Section 14.42.310 - It states a person may not be deprived of the privileges and services of the system because of age, sex, color or nationality. In a question relative to age, it would appear that the bill would allow community colleges to serve anyone regardless of age. This could cause much concern in the secondary level with students wanting to drop out of high school and attend community colleges. Community colleges have not had as one of its objectives that of providing secondary education except for adults.

Section 14.40.460 - This relates to scholarships for high school students which I believe would be a good idea, however, it states that the scholarship would include dormitory rent for a period of two years or four years, however, this would be very limiting to community colleges as most community colleges do not have dormitory facilities.

Under Section 18 - Transition. It states that the Board of Regents of the University of Alaska shall redistribute or transfer property assets, etc. to the Alaska Community College System. The question arises as to the legality of the transfer of property from the University of Alaska to the community college system as the University of Alaska is constitutionally created.

Under the same section, it states that faculty, staff and officers in the community colleges shall be terminated by the University of Alaska and shall be rehired by the community college system, however, it goes on to say that the Alaska Commission on Postsecondary Education shall assist those community college faculty and staff and its officers and employees, who are not transferred, in finding positions. This appears to be a conflicting statement within the same section of the bill.

Under Section 20, it states this act will be effective July 1, 1980. This appears to be a very short timetable to do many of the things that this bill encompasses and feel that we would probably create a massive chaos trying to implement this in such a short space of time.

The community colleges have come a long way in the past two years under the reorganization within the University of Alaska of placing the community colleges into a separate division with its own chancellor. I don't feel that this bill would be in the best interest of the community colleges and the local communities in the state of Alaska as relating to community college objectives and philosophies.

I feel that the community colleges should continue to operate as it is today under the chancellor instead of under this bill.

Sincerely,

Rod Enos

Rodney Enos
Campus President

Chancellor Patrick O'Rourke

Statement of Richard Whittaker
Regarding legislation to separate community colleges from the University of Alaska system, HB 651

In years past I have favored anything which would disrupt the stepchild status between the University and the Community Colleges. The University has had little or no interest in bringing education to the people of our state which, of course, is one of the significant roles of Community Colleges.

My view has radically changed in the past year. With the coming of University of Alaska president, Jay Barton, we have a vastly different University, a University which sees the Community Colleges as a means of bringing the services of the total university system to the people of the state.

Separating the two institutions would limit the ability of Dr. Barton to give the University the needed guidance to accomplish this change. He has indicated his first priority as rural education, which basically means Community College and similar approaches.

I, having studied the matter, as a member and chairman of the Ketchikan Community College Advisory Board, and prior to that as a legislator, strongly believe the best thing we can do in higher education in Alaska at this time, is to give our support to Dr. Barton to give him a change to correct these long standing inequities.

STATE OF ALASKA

M E M O R A N D U M

February 16, 1980

SUBJECT: Sectional analysis, legislation establishing a separate Community College System (HB 651) [Work Order No. 7988]

TO: Representative Thelma Buchholdt, Chairman
House Health, Education and Social Services Committee

FROM: John B. Chenoweth
Legislative Counsel

The legislation relies extensively on earlier bills by which the community colleges, extension centers, and outreach programs of the University of Alaska would have been removed from the University's jurisdiction and constituted a separate Community College System.

Section 1, an uncodified section in keeping with current drafting practice, describes a purpose for the bill and the general philosophy of a separate comprehensive community college system for the state.

Section 2 adds a new chapter to AS 14 and describes the "Alaska Community College System." The System is established as a state corporation (AS 14.42.010), under control of a seven member board of trustees, each of whom is appointed by the governor; an appointee be a resident of a community containing a unit of the community college system (AS 14.42.020(a) and (b)). Five board members are appointed from designated geographic regions (AS 14.42.020(c)); a sixth member must be a member of the faculty of a unit of the System (AS 14.42.-020(c)(5)); the seventh must be a student enrolled in a unit of the System (AS 14.42.020(c)(6)). Specific procedures are described for the nomination and selection of the faculty appointee (AS 14.42.030) and for the student appointee (AS 14.42.040), and limitations are placed on their service as members of the board of trustees of the corporation expressed in terms of their continuing appointment to faculty

status and continuing association with a unit of the system as a student. The term of office of the "public" members of the board is five years (AS 14.42.050(a)); for the faculty and student board member, the term is two years (AS 14.42.-050(b)). The legislation contemplates a staggering of terms: see section 19 for manner and duration of initial appointments. The legislation requires election by the board of certain officers, and authorizes the board to select others, limiting terms of officers to one year and setting a two-term limit on a person's service as chairman (AS 14.42.060). The legislation requires the board to prepare rules for its procedures (AS 14.42.070(a)), determines a quorum and the minimum vote necessary for action by the board -- both set at four of seven votes (AS 14.42.070(b))) -- and precludes use of proxies (AS 14.42.070(c)). The legislation requires, at minimum, quarterly board meetings, rotating through the various community college campuses over a five-year cycle (AS 14.42.080(a) and (b)), authorizes special meetings, prescribes meeting notice requirements (AS 14.42.080(a)), and generally restates "open meeting" provisions of the Administrative Procedure Act (AS 14.42.080(c)). The bill authorizes reimbursement for travel and per diem at state rates (AS 14.42.090).

The powers and duties of the board of trustees are enumerated in AS 14.42.100 and 14.42.110. Key provisions are designated as paragraph (7) in each: establishment of management policies applicable to units of the System and determination of the courses of instruction at the units of the System define the policy-making nature of the corporation's board of trustees.

The board's chief executive officer is the System's president. The bill describes his primary responsibility as the administration of the System. (AS 14.42.110(a)). In addition to the on-campus programs, he is charged with development and administration of an effective rural and off-campus program (AS 14.42.110(b)). The corporation president may, with the approval of the board, appoint administrative officers for community colleges and extension centers (AS 14.42.120(b)(1)) and, with the recommendation of the latter, appoint -- or delegate authority to appoint -- members of the faculty of units of the System (AS 14.42.120(a)). He must supervise the work of the people he appoints (AS 14.42.120(b)(2), and give general direction to, and coordinate the work of, the several units of the System (AS 14.42.120(b)(3) and (4)). Student discipline -- exercised through suspension or expulsion -- is the responsibility of the president (AS 14.-42.130).

Community college campus administration is made the responsibility of a chancellor; other units of the System are headed by a director. The manner of appointment of each is described in AS 14.42.140.

The bill authorizes the board to establish and maintain centralized and regional service centers to supplement activities involving units of the System (AS 14.42.150). The bill provides minimal direction relating to appointment of and service by faculty (AS 14.42.160(a) and (b)). A unit of the Community College System is given authority to "coordinate and facilitate all public postsecondary and continuing education in the area it serves," including coordination of course work offered through the University of Alaska and other universities (AS 14.42.160(c)).

The establishment of a community college council for a community college is mandated; a council may be established for other units of the System (AS 14.42.170(a)). The determination of the size, manner of selection, terms, officers and comparable provisions concerning community college councils is the responsibility of the board of trustees (AS 14.42.170(b)). The bill distinguishes between the "policy-making" role of a council and its "advisory" role (AS 14.42.170(e)), and gives a community council significant authority with respect to making and securing implementation of recommendations with respect to operation of the campus or unit for which the council is responsible (AS 14.42.170(f)).

The bill describes the manner of establishment of new community colleges: nomination (AS 14.42.180); determination of feasibility (AS 14.42.190); establishment of a different form (i.e. "extension center or outreach program" where a community college does not meet standards (AS 14.42.200). While legislative nomination of new campuses is made a part of the process, the process does not preclude the legislature from establishing a new college through appropriation.

Specific provision is made by which the relationship between a unit of the System and a second party may cooperate in the formation and operation of a community college (AS 14.42.210): the college is given, under the bill, "complete operational authority . . . subject to periodic reviews" by the cooperating party, and title to those facilities financed or constructed with System funds.

The board of trustees is given specific duties under AS 14.-42.220 by which to assure expanding educational opportunity for community college System course work.

Finance, fiscal and property management, and related provisions generally follow requirements imposed by the state on operations of its secondary education programs, though the manner of administration of funds received is committed to the discretion of the board of trustees by regulation (AS 14.42.230(b)). The budget process is made the responsibility of the board (AS 14.42.230(a)), and requires preparation of a program budget subject to the review and recommendations of a community college council for a particular campus (see AS 14.42.170(f)(2)). Fund management and the acquisition and holding of property are committed to the board (AS 14.42.240), and the board may act as trustee for property as necessary (AS 14.42.250). Monetary gifts and endowments for the benefit of the System are transferrable to the Department of Revenue for investment and management (AS 14.42.260); other properties, real or personal, are taken by the System and made part of the permanent property inventory (AS 14.42.270). Specific provision is made for a working capital fund to receive legislative appropriations for construction of capital improvements of benefit to the Community College System (AS 14.42.290). The state's Fiscal Procedures Act (AS 37.05) is imposed on the corporation (AS 14.42.280); federal laws applicable to the University of Alaska as a land grant college are made applicable also to the System corporation in its capacity as an anticipated recipient of federal funds and lands (AS 14.-42.300).

The remaining newly-codified provisions generally address the manner of operation or function of the system. General civil rights provisions are made applicable (AS 14.42.310(a)); political and religious sectarian instruction is prohibited (AS 14.42.310(b)). Cooperative use of facilities brought into the System from the University of Alaska as a result of this Act, or otherwise subsequently constructed for the benefit of the System or for the University, is mandated (AS 14.42.320). Open library services are made mandatory for community college campuses; at extension centers and outreach program offices, they are discretionary (AS 14.42.-330). An annual report of the work of the corporation is required (AS 14.42.340).

The manner of operation of a unit of the System, where not specifically described in the legislation, is committed to the authority of the System in accordance with regulations prescribed by the board of trustees (AS 14.42.350).

Sections 3 - 11 amend existing provisions of law applicable to the University of Alaska to incorporate reference to the "community colleges" or "the Alaska Community College System", as applicable. Section 12 adds membership from the System on the state's Postsecondary Education Commission; section 13 authorizes that Commission to designate the board of trustees of the Community College System corporation as its advisory council on community colleges where an advisory council is required by federal Higher Education Acts.

By section 14 the commissioner of administration is authorized to delegate any of his responsibilities under the state's Fiscal Procedures Act to the System's board of trustees by "[setting] out the criteria and guidelines which shall be followed." Section 15 places officers, employees, and faculty of the System in the state's exempt service; section 16 requires the members of the System's board of trustees to file necessary disclosure reports in accordance with the state's so-called "Conflict of Interest" statutes. Section 17 repeals current provisions, part of the University of Alaska chapter, pertaining to community colleges as part of the University.

Transitional provisions -- to accommodate the separation and separate establishment of an Alaska Community College System -- are collected in section 18: asset redistribution occurs under the direction of the state's Postsecondary Education Commission; continuance of litigation, contracts, other proceedings, and courses of study and related services is addressed; faculty, staff, officers and employees of the University whose work involves them with the community college system are terminated and must be rehired by the Alaska Community College System; where the latter proves impossible, the Postsecondary Education Commission is directed to assist in securing positions for which these persons are qualified.

Mr. Robert F. Leach
4010 Merrill Drive
Anchorage, AK 99503
February 28, 1980

Ms. Thelma Buchholdt
Health, Education and
Social Services
Pouch V
Juneau, AK 99811

Dear Ms. Buchholdt:

The enclosed information is documentation to backup my testimony on Tuesday, February 26, 1980. This documentation demonstrates the University makes decisions which greatly impact the Community College without consulting the Community College. Later, when it is shown to them that there is adverse reaction, they take no action to correct the problem. They simply appear to just walk away from the problem and do not address it.

Attachment 1: History of Student Center Bonds, outlines a decision made by the University in which the Community College was committed to 35% of its tuitions to pay for the Student Center.

Attachment 2: Effects of 35% Tuitior Loading on Anchorage Community College, briefly outlines the financial burden that this decision has had on the Community College.

Attachment 3: This item shows the effects that this decision has on self-support, night-time programs.

Attachment 4: Anchorage Community College major fiscal problem areas shows that additional incidents in which the University of Alaska through its decisions have adversely affected the Anchorage Community College operation.

For all of the above reasons, I find it necessary to support the Autonomy Bill which would separate the Community Colleges from the University of Alaska.

Sincerely,

Robert F Leach

Robert F. Leach

Robert Leach

HISTORY OF STUDENT CENTER BONDS

The Board of Regents decided to build a complex at the Anchorage Campus. The Student Center was one part of the complex. They went to the legislature requesting permission to sell six million dollars in revenue bonds to pay for the student center. The revenue was to come from 25 percent of tuitions paid in the Anchorage area. The legislators authorized the sale of the revenue bonds.

The University marketed the bonds but could not sell the bonds. They then successfully lobbied the legislature to increase the authorization to 35 percent of the Anchorage tuition. Only five million of the six million dollar bonds authorized were sold; and then only after an agreement that the 35 percent of Anchorage's tuitions had to be assessed each year. Also that a minimum of $754,800.00 had to be raised by tuition monies or the Board of Regents would be required to make a special assessment to each student to make up the difference. The annual payment is $500,000.00 for twenty years.

The bond money was invested to earn interest during construction. Also, the excess monies from two years of collecting the 35 percent were invested. The five million dollars did not pay to complete the Student Center. Central administration now decided to use part of the interest on the invested monies and the excess raised by the 35 percent of tuition to complete the Student Center. These monies went mainly into food service equipment.

The next major event was when Max Hullinger's replacement found approximately $600,000.00 in unused interest monies. The legislators thought that the University of Alaska had "rat holed" this money and directed that $290,000.00 be transferred to the Physical Education Plant and withdrew a like amount from appropriations.

The combined operating costs of the Physical Education facility and the Student Center is $540,000.00. The 35 percent of tuition has been producing $250,000.00 excess monies each year over the $500,000.00 annual payment. These excess monies and the found monies were combined to operate the two facilities. As of January, 1980, funds for operating these two facilities ~~has~~ will have been depleted and a plan for obtaining funds in the future has not be stated.

Robert Leach

EFFECTS OF 35% TUITION LOADING ON ACC

The Board of Regents had a plan to cover the Anchorage Community College and the University of Alaska Anchorage's (one unit at this time) 35 percent tuition load by increasing the requested funds from the legislature by a like amount.

The FY77 ACC budget reflected an increase to cover the losses incurred by the 35 percent tuition loading. But the anticipated tuition income for ACC for FY78 and FY79 were over estimated by some large amount. As of this writing time, I have been unable to determine which office or person made the over estimation. Because of the over estimation of income for ACC, ACC was unable to raise all of its tuition income. The budget had been absorbing the 35 percent loading on the self-support classes. It could not now absorb the 35 percent loading and classes had to be cut. Cutting classes meant fewer tuitions. Fewer tuitions further compounded the original problem of having over estimated the tuition income.

At this point, ACC finances started a downward spiral. Fewer tuitions meant fewer classes. Fewer classes meant fewer tuitions.

Possible solutions must address two problems. First, how to reduce the 35 percent loading of Anchorage's tuitions. Second, how to raise the operational monies needed to keep the Physical Education facility and Student Center operating.

If the remainder of the bond indebtedness were to immediately be paid off, this would stop the 35 percent of tuition loading. At the same time, it would eliminate a $250,000.00 source of operating funds for the Physical Education facility and for the Student Center.

The shortage of operational monies will be further compounded when the ice hockey rink comes on line. Additional personnel will be needed and larger utility bills incurred.

Robert Leak

The Electronic Technology Department can not operate a serious night program because the University Regent's change in self-support financing. At first I could operate self-support classes by charging the student twenty dollars per credit. The student could not obtain self-support classes under the consolidated fee schedule. Of this tuition money, I received eighty percent to pay the instructor and to pay for consumables. Twenty percent was for overhead such as: utilities, janitorial services, registration office, accounting office, and administration at all levels to include the President's office for the University of Alaska. Under this system I started to build up the night program.

The Board of Regents then changed the self-support fee structure so that a student could use the consolidated fee schedule for self-support classes. This dictated that ACC move instructional monies into a separate account to cover the self-support class whenever a student uses the consolidated fee schedule to pay for the self-support class.

Next came the Student Center. I was now told that an additional 35 percent of the tuition paid to self-support classes would be withdrawn to meet the bond retirement indebtedness. This now meant the most monies I could realize for self-support was 45 percent of the tuition paid by the student. The difference between the 45 percent of the tuition and the costs of the self-support class had to be made up from the instructional budget. That drain was too large unless the Electronic Technology Program had more than 45 students in a class. For a technology class using equipment under tight supervision to insure personal safety, these numbers are unrealistic.

Because of the above administrative decisions the Electronic Technology Program will be unable to offer night classes. I have to tell those students who must work days and can attend classes only at night there will be no night program for them.

SELF-SUPPORT MONIES DISTRIBUTION FOR A 3 CREDIT CLASS

	Cost per Credit	3 credits	Number of Students	Total Tuition	20% for Adminis.	80% for Program	35% for Bonds	45% for Program
Original Financing	$20	$60	20	$1200	$240	$960		
Change in Financing	$20	$60	20	$1200	$240		$420	$540
Current Change in Financing	$21	$63	20	$1260	$252		$441	$567

Program now receives $567.00 to pay instructor for 15 weeks of two nights a week and to cover all expendables. If the instructor received all of the $567.00, he would only receive, before taxes, $18.90 per night. The instructor has 90 minutes of instruction, 15 minutes set-up, 15 minutes breakdown, travel to and from the college, prep time, grading papers. The instructor makes approximately $6.30 an hour. Also, we have had double digit inflation in the last three years yet the total monies the Electronic Technology Program has received to run these self-support classes has gone down, not up. It is not possible to attract quality people at these rates.

Robert Leach

ACC'S MAJOR FISCAL PROBLEM AREAS

I. Projected tuition and fee income shortfall

Presently the ACC Administration is projecting a tuition and fee income shortfall for FY'80 of approximately $300,000 (rounded from $289.900) for the following reasons:

A. Income has been overstated since FY'78;

B. Income projection for FY'79 was increased by $494,100, with a corresponding General Fund increase (in hard dollars) of only $57,000;

C. It was UAA, not ACC, who projected the incomes and controlled the budgets in both FY'78 and 79. No explanation at this time is available as to why UAA estimated such a large increase in tuition and fee revenues;

D. The FY'80 Governor's budget included a tuition increase item of 20%(removing this amount from the General Fund dollars). This amounted to $339,300. However, the Board of Regents refused to approve such a tuition increase, approving only a 7% increase. The Free Conference Committee restored $249,400 of this revenue, leaving the shortfall of $89,900 which represents the difference between the Governor's 20% increase and the actual 7% increase allowed.

II. Reduction of tuition income for debt service

By law, the Anchorage Community College must apply 35% of all credit tuition to the retirement of revenue bonds on the new Student Center. Apparently, income projections since FY'78 have been based on 100% tuition income and not the actual 65% income, even though UAA has told ACC that there was an initial adjustment made for this difference.

III. Leave Accrual

Annual leave accrual for teachers has until this year been handled by the University of Alaska Statewide Administration. The cumulative leave accrual liability has been estimated at $450,000, which Vice-President Sherman Carter is implying now must be paid off totally by ACC during FY'80.

ACC was never given budget instructions to budget for this liability, and all ledgers on the local campus were in the black until June 23rd, when ACC was told the leave accrual was immediately due and payable.

Attached are copies of the Electronic Technology Program's budgets for the last five years. This will give you the picture of the monies the Electronics Technology Program has had in the past and the monies it now has.

While the upper levels of the University administration have their disputes over the question: Are there enough funds? Are the funds allocated properly? Are the present funds being spent wisely?; We at the teaching/first line supervision level do not have enough monies to properly operate our classrooms. The Electronic Technology Program is a four semester Associate Degree program whose purpose is to take in unskilled men and women and properly train them to become Electronic Technicians. This September, 1979, we expect to have 16 to 20 individual classes taught in the day program. In January, 1980, we are scheduled to have 24 classes. This summer we are operating four classes. For all of the above classes the Electronic Technology Program's budget is as follows:

Pay for seven full-time instructors
3001-Contractual has $1500
4001-Commodities has $3000
5001-Equipment is zero
8001-Miscellaneous is zero

The above shows that to operate 44 technical classes the Electronic Technology Program has $3,000 to purchase all of our consumables. Besides chalk, grade books, paper, writing materials, postage, program advertisement, subscriptions, telephone bills, leases and reproduction costs for handouts, this $3,000 must also cover purchase of resistors, capacitors, transistors, wire,hardware to repair test leads, integrated circuit chips, printed circuit boards, replacements for tools and other items that wear out due to fair-wear-and-tear. The $1,500 in code 3001 for contractual maintenance cannot be used for commodity items. Code 3001 monies can only be used for maintenance agreements to maintain or to repair equipment. Included are items such as, xerox machine, our two typewriters, five microcomputers with peripheral equipment and all of our test equipment. We have over one hundred items of test equipment.

As I stated earlier, the upper levels of the University are arguing and pointing their fingers at each other as to who is at fault. I as a first line teacher/supervisor have no quarrel with the President of the Anchorage Community Colleges on down. I have no idea who is at fault in the upper levels of administration, I only know that I do not have the proper amount of monies to properly operate the Electronic Technology Program.

BUDGET SUMMARY

	FY 74	FY 75	FY 76
200 Travel	-----	-----	1,140
300 Supplies	3,911	5,420	1,978
400 Services	1,100	1,275	1,275
500 Student Aid	-----	-----	-----
600 Other	320	320	320
700 Equipment	9,000	13,280	1,713
TOTAL	$14,331	$20,295	$6,420

	FY 77	FY 78	*FY 79	FY 80
2001 Travel	1,273	900	-----	-----
3001 Contract & Repair	1,923	1,900	2,000	1,500
4001 Expendables(commodities)	2,420	9,200	4,100	3,000
5001 Equipment	9,356	4,000	11,000	-----
TOTAL	$14,927	$16,000	$17,100	$4,500

*FY 79 - The voters approved a bond for the University of Alaska. The Electronics Technology Program received $31,867.70. This was in addition to the $11,000 shown in 5001.

Rep. Thelma Buchholdt
Chairperson House Health
Education & Social Services Committee
Pouch V
Juneau, AK 99811

Dear Thelma,

The committee for Community College Autonomy reviewed HB651 and the comments made by John Chenoweth, Legislative Counsel. We wholeheartedly endorse the bill. We did have several suggestions of minor changes which I communicated verbally to your assistant. The following is to give you written confirmation of those suggestions.

1. Our suggested draft included the following in Sec. 14.42.230(a)

> Sec. 14.42.230. FINANCE. (a) The state is basically responsible for the funding for all community college, extension center or outreach programs and activities.
>
> However, nothing in this chapter prohibits a school district, municipality, federal agency or nonprofit corporation or association from providing funds for additional courses and programs which may be considered appropriate under Sec. 210(a)(3) of this chapter.

We feel that it is important to retain this statement in the bill. Mr. Chenoweth felt this was a philosophical statement that might better be included in a purpose or intent clause. We suggest incorporating this statement on page 2 line 8 as item (c).

On page 17 add the word <u>same</u> on line 21 to read as follows: "Alaska, the <u>same</u> shared or joint use of these facilities..." After line 26 add the following: <u>Subsequent changes are subject to mutual agreement of both boards.</u>

These suggestions are made because there was fear that in the transition period there might be an attempt on the part of the University to preempt community college use of facilities. These two changes would insure status quo in the transition and provide for future flexibility.

On page 18 line 2 we suggest changing shall to may, so that it reads "...the two boards may enter into a contract ..."

It was our feeling that it would allow for more flexibility in the future if this were made a permissive rather than a mandatory statement.

We have some concerns about page 24 line 5-13. We are awaiting a legal opinion as to whether this fully protects the employment rights of all present community college staff. We will notify your office immediately if our counsel suggests any change.

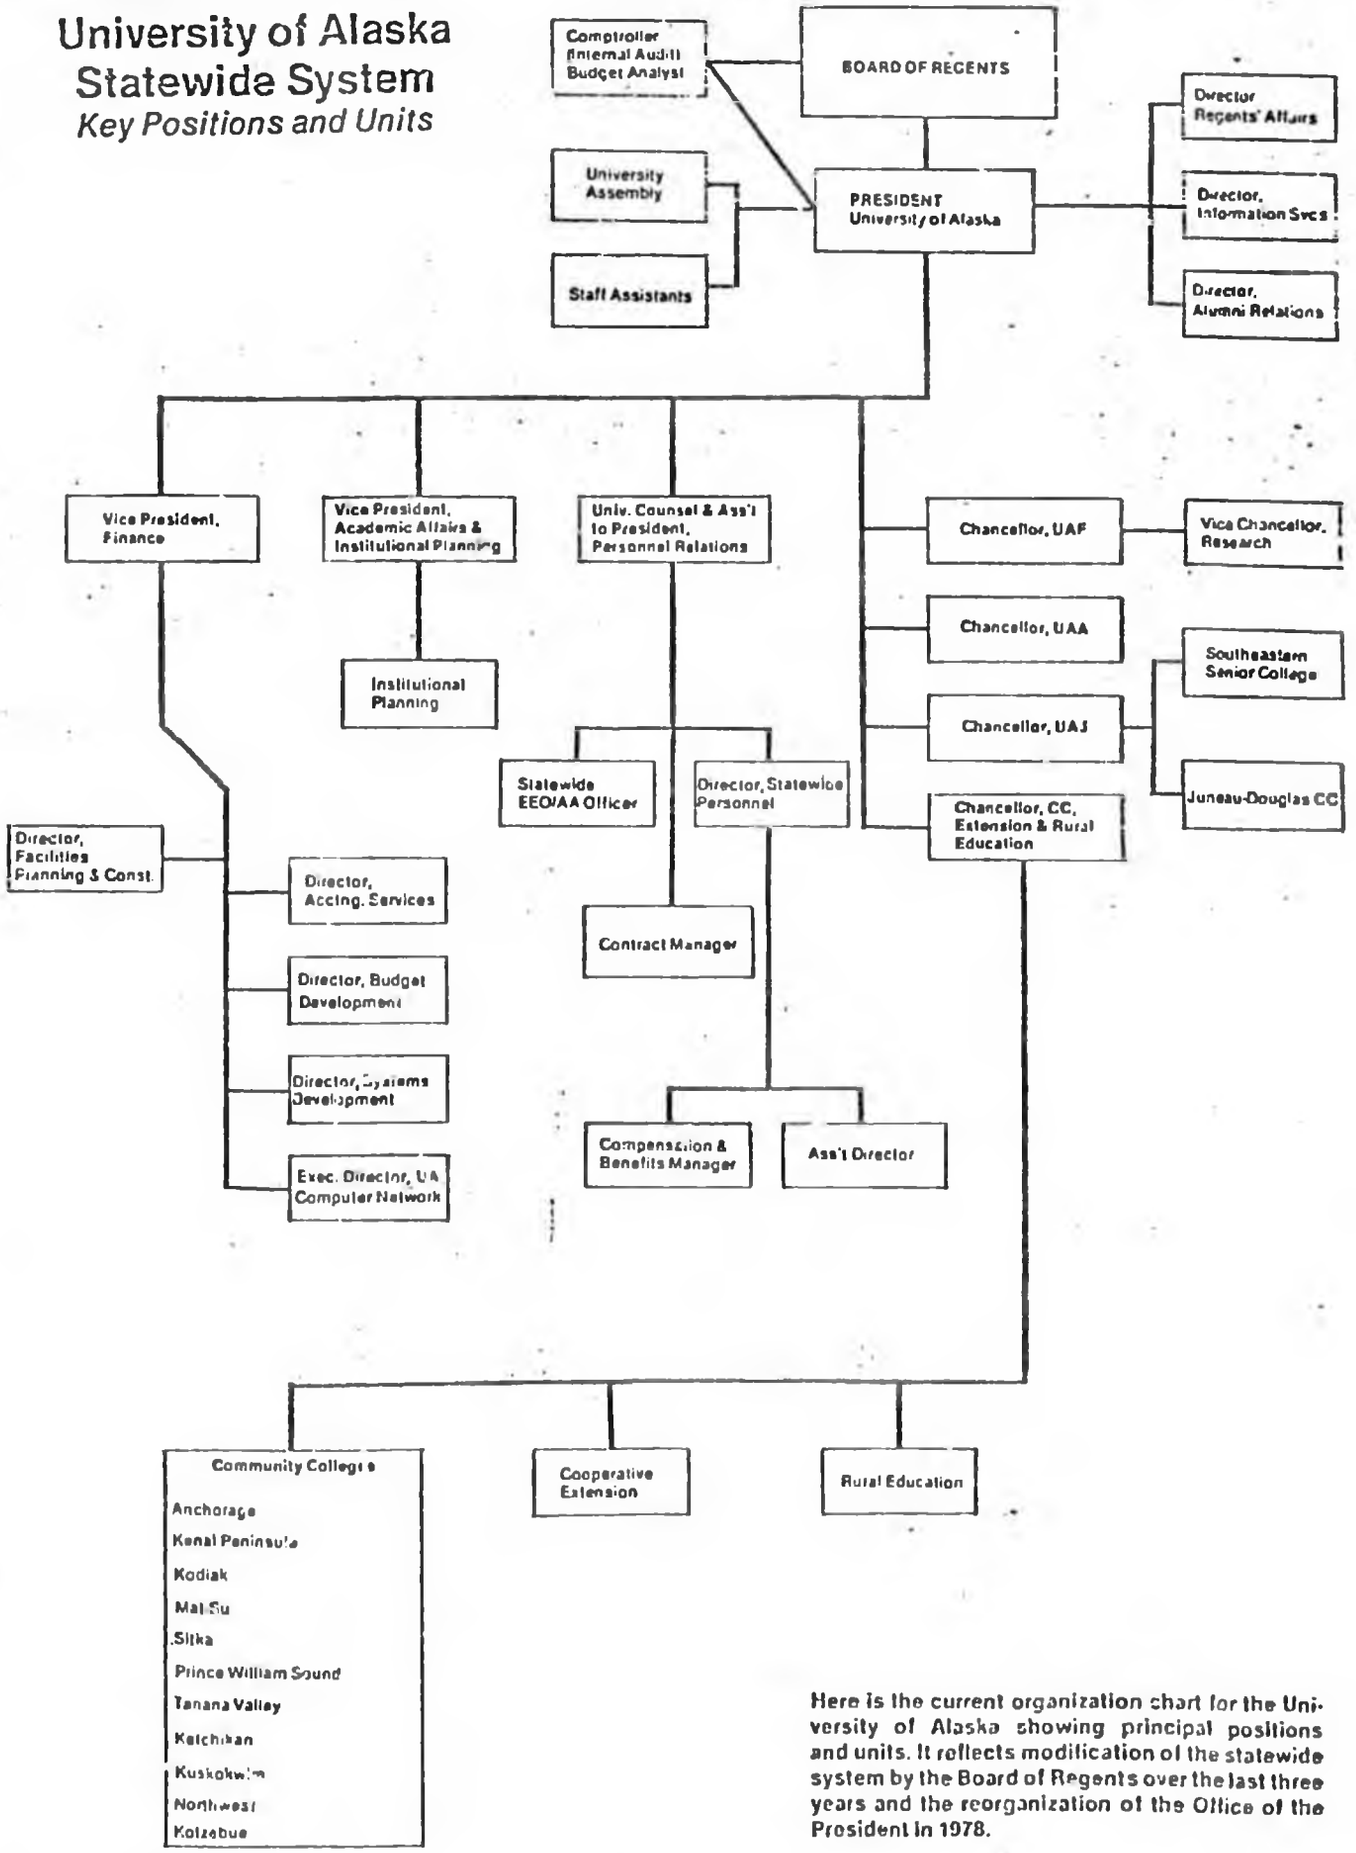
On behalf of the committee I would like to express our appreciation for your efforts on our behalf.

Thank you,

Miriam Carlson

University of Alaska Statewide System

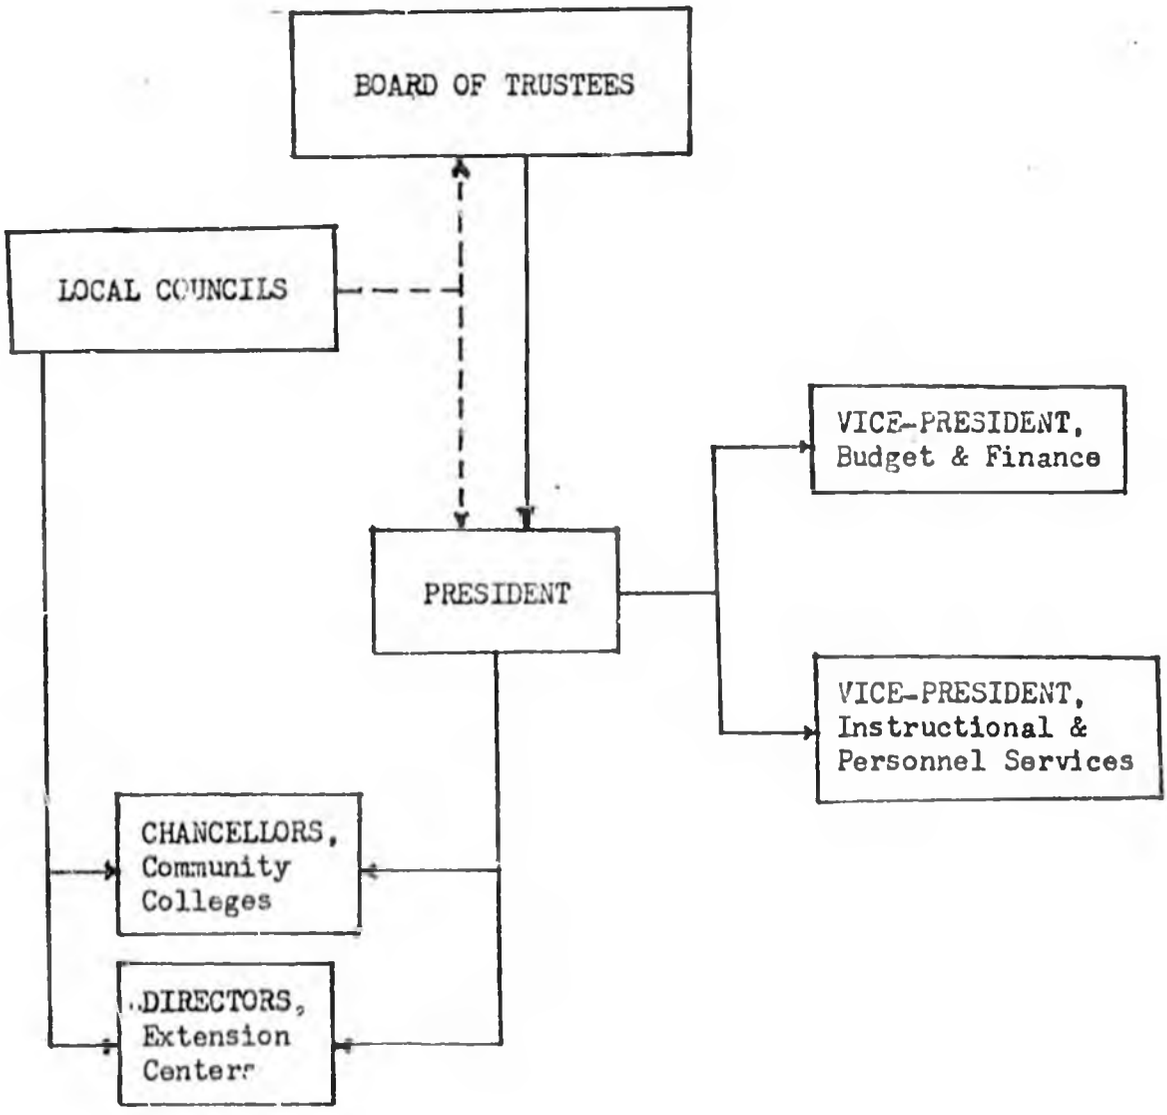
Key Positions and Units



Here is the current organization chart for the University of Alaska showing principal positions and units. It reflects modification of the statewide system by the Board of Regents over the last three years and the reorganization of the Office of the President in 1978.

ALASKA COMMUNITY COLLEGE SYSTEM

Proposed Organization Chart



Direct ———

Advisory - - - -

February 26, 1980

Representative Buchholdt
Chairperson, House H.E.S.S. Committee

Dear Chairperson Buchholdt and Members of the Committee:

I regret that I am unable to appear in person to testify in support of HB 651 and the establishment of a statewide community college system. I have a very large class tonight that requires advance preparation during the hours that the teleconference is scheduled. I do hope that this written statement will suffice.

I am a teacher of history and geography at Anchorage Community College. Since my initial hire in 1972, I have been involved in a number of programs at A.C.C. I am probably best known for the numerous film series and film classes offered on campus, but I have also been actively involved in organization and promotion of study tours; in fact, this year we are offering our sixth study tour to the Hawaiian Islands. I am presently serving as faculty advisor for the soon-to-be-organized Anchorage Community College Student Association and was a member of the University Assembly and chairperson for the Student Affairs Committee in 1975-76.

I must be quite candid and say that I have supported autonomy for the community colleges of Alaska ever since I have been at A.C.C. I came to Alaska from the state of California where the role of the community colleges in higher education is clearly defined and actively supported by individual communities throughout the state. In California, the community colleges are viewed as the foundation of the state's educational system, offering a number of courses and programs of interest to the respective community, as well as serving as a source of students for the University of California and the California State University and College system.

In Alaska, the situation is not quite so clearly defined. Despite the existence of a statewide network of community colleges, they are all under the monolithic control of the University of Alaska system, an organization which does not seem certain as to the role it wishes the community colleges to play. The history of Anchorage Community College (the largest community college in the system) certainly demonstrates this confusion.

When I first arrived, A.C.C. was administered under the "Southcentral Region" office of the University. Within two years, it was decided that A.C.C. and the Senior College of this Southcentral Region were to be merged into a single entity, the University of Alaska-Anchorage. A.C.C's identity was soon lost as we became a "happy family" under the U.A.A. logo.

The attempt to merge two educational institutions with differing educational goals and purposes was, as you are hopefully aware, an outright disaster. Yet the uneasy "marriage" of A.C.C. and U.A.A. continued for nearly three years until the Board of Regents declared a "divorce" in 1977. The impact of this marriage on the respective institutions was one from which we are still trying to recover today, yet it appears as though such mistakes can be repeated. Within the past year, the same situation that was forced upon A.C.C. has now been placed upon Juneau-Douglas Community College. Worse than the A.C.C.-U.A.A. situation, J.D.C.C. has had its academic programs placed under the banner of the University of Alaska-Juneau, leaving the community college as little more than a "voc-tech" school.

These actions by the University administration and the Board of Regents are particularly astonishing in light of the fact that community colleges are increasing in importance nationwide while the traditional four-year institutions are facing stabilizing (if not declining) enrollments and, in some cases, fiscal problems of major proportions.

I don't wish to argue for the discontinuance of the University of Alaska system. Indeed, their programs of research and degree-oriented courses should be allowed to continue and grow. However, this should not be at the expense of the community colleges. Community colleges have their place and purpose in higher education in serving transfer students (those in pursuit of a bachelor's degree), vocational and technical training, and community interest programs. Under the present system, this growth and development has not been allowed to take place to the full potential of which Alaska's community colleges are capable. It is my firm belief that the community colleges can successfully serve the educational goals and needs of the people of the state of Alaska only through the creation and the active support of a separate community college system.

Sincerely,

Ron Crawford

Ron Crawford
History/Geography Teacher
Anchorage Community College

March 25, 1980

Rep. Thelma Buchholdt, Chairperson
Committee on Health, Education and Social Services
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Thelma,

Mim Carlson and I appreciated the opportunity to meet with you and Kerry Romesburg regarding HB651. We're happy that you both were supportive of our proposal for a joint legislative interim study of higher education needs in Alaska. While we continue to support the provisions of HB651, we do understand the reluctance of the Legislature to take such a significant step as separation of the community colleges from the University system without further inquiry into the effects of such a move. We feel that an interim study would clarify the issues which have been raised.

Our recommendation is that a joint legislative committee be established consisting of two members from each house of the Legislature, with the Executive Director of the Postsecondary Commission on Higher Education serving in an ex-officio capacity. The committee would employ a Director for the study and other staff support. The committee would be charged to examine, review and report on the structure of higher education in Alaska, with the following goals in mind:.

1. Review of missions, goals and objectives of the University of Alaska and its component parts.

2. Comparison of the structure of public higher education in Alaska with structures in other states.

3. To make recommendations regarding structuring public higher education in Alaska to fulfill missions with emphasis on maximum responsiveness to community needs and cost effectiveness.

We feel that the committee should provide every opportunity for interested persons throughout the State to express their views on this vital subject, and we would urge that sufficient hearings be held to accomplish this. The committee should also avail itself of all possible expert opinions in all phases of higher education. We would hope that sufficient funding to accomplish these objectives would be made available.

We deeply appreciate the concern of yourself and your Committee for the community college programs in Alaska. If we can be of further assistance please call on us.

Sincerely,

Pat Spartz
Faculty Autonomy Committee
Anchorage Community College

P.S. I've taken the liberty of sending copies of this to George Hohman and Terry Stimson, cosponsors of SB483. Both expressed their support of an interim study.

c: Kerry Romesburg, Postsecondary Education Commission
Senator George Hohman
Senator Terry Stimson

HOUSE BILL NO. 664

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Transportation and Public Facilities for school construction and upgrade at various locations; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of ~~$1,200,000~~ 3,629,525 is appropriated from the general fund to the Department of Transportation and Public Facilities for payment as a grant to the Dillingham City school district for school construction and upgrade.

* Sec. 2. The sum of $1,200,000 is appropriated from the general fund to the Department of Transportation and Public Facilities for payment as a grant to the Bristol Bay borough school district for school construction and upgrade.

* Sec. 3. The sum of $19,850,500 is appropriated from the general fund to the Department of Transportation and Public Facilities for school construction and upgrade in the following amounts in the following regional educational attendance areas:

Southwest regional educational attendance area	$12,094,000
Lake-Peninsula regional educational attendance area	7,756,500

* Sec. 4. This Act takes effect immediately in accordance with AS 01.10.-070(c).

RE: Remodeling of Dillingham High School

Dear Representative Anderson:

Let me start by thanking you for all of your hard work in the past in helping to provide Dillingham with new showers, gym and the funds to begin and complete a new elementary building. For your information the plans will be going out to bid on the third of March.

As you will recall during the last session we were also looking for funds to remodel the current high school. That need is still with use and is more apparent than ever as the Fire Marshall's office in the person of Ray C. Isenberg, has issued the District a notification of fire hazards and an order to correct. There are some which are not difficult to comply with. Enclosed please find the four (4) page report. I have circled the items which will be costly and difficult to comply with from the finance point of view.

To continue you have a number of copies of the "Dillingham Secondary School Facilities Analysis" which was prepared in January, 1978. That document deals with our needs. However, to review page 44 with you, we have completed the shwer and locker rooms. Still needed under "A" are the Public Toilets and Hallway between new gym and old building. The rejected bid for the toilets and hallway was $366,000.

B.	Science Lab	477,200
C.	Learning Resource Center	759.400
D.	Music	302,100
E.	Art	251,800
F.	Home Economics	201,500
G.	Health Clinic	75,600
H.	Classrooms	465,500
	Jan. 1978 est.	$2,899,100
	Inflation 10.5 (1979) 8.9 (1980) = 19.4%	562,425
		$3,461,525
	Additionally from a safety stand point and financial savings a sprinkler system would be needed.	168,000
		$3,629,525

We have asked that a sprinkler system be installed as an add-on in the bids for the new elementary and have looked into the cost. For the building which is about one-half the square foot of the high school is about $56,000 and since adding the system to the high school which is about 44,000 square feet the cost would be three times the cost for the new elementary. The savings on insurance is great, (for example: the cost for $1,000 of insurance without the system is $1.25 and with the system $.50 for $1,000 of insurance or a savings of $.75 per $1,000 of insurance.) The high school, not counting the gym and showers, is valued at $4,000,000. As you can see there is a great deal of savings.

The District could get by with $3,629,000. It would be greatly appreciated by the community, board and administration of the District if you could secure the funds to complete our school construction and remodeling program.

Please let us know in what ways we would be of help.

Thank you again for your help.

Sincerely,

Harry E. Purdy
Assistant Superintendent

Dillingham, Alaska 99576

February 12, 1980

Representative Nels A. Anderson, Jr.
Pouch V
Juneau, Alaska 99811

Dear Representative Anderson:

Per your suggestion at last evening's Constituent Teleconference, I am forwarding to you my remarks in behalf of the Dillingham Extension Center and its Policy Advisory Council addressed to you and Sen. Hohman in support of HB 672.

"We are here this evening (Trish Dorey, President, PAC, and I) to urge the passage of House Bill 672 allocating funds for Adult Basic Education (ABE) to DOE.

"Various agencies and individuals in the Dillingham Community have over the past five years submitted proposals to bring ABE to the Bristol Bay region. These proposals were never funded and our region is still without an ABE program to serve the needs of more that 5000 people of the 30+ villages in the area.

"I am here as one representative of education in this community to urge passage of HB 672 for the following reasons:

"1. The Bristol Bay region needs an ABE program--as Coordinator of the Dillingham Extension Center I have had the opportunity to travel extensively in the region and ABE is an unmet need which I receive most question about. It is unquestionably, in my opinion, the number one educational priority of the region.

"2. We believe that passage of HB 672, in its present form will finally result in the release of a portion of the total ABE funds ($617,500) for a program in this region.

"3. The Dillingham Extension Center is in a position vis-a-vis the Bristol Bay Regional Resource Center and its Director, Mr. Bob Brown, to train teachers using models developed by the Northern Institute. I have talked with Mr. Dave Alexander of

rec'd 2/18/80

TNI who has assured us of assistance in the development of a training program for ABE teachers. We will however, need funds to assist our teacher trainees once they are recruited, as well as funds to support them as they work in the villages training adults in basic literacy skills.

"4. Finally, and perhaps most importantly, we believe that a successful ABE program in the Bristol Bay region will go a long way toward insuring the success of other programs in the region. The University of Alaska as it attempts to extend education to all the people of the Bristol Bay area through its Extension Center is acutely aware of the need to impact people at all educational levels if its own programs are to succeed."

Sincerely,

Charles A. Blood, Jr.

A PROPOSAL FOR EDUCATION LEGISLATION TO SERVE SEVEN REGIONS IN ALASKA

INTRODUCTION

This state offers a free education to every member of its varied society. Even so, there are many adults among us who either could not or would not finish (or, in some cases, even start) their elementary or secondary education. Because these adults are poorly educated, they have, throughout an entire lifetime, held some of the least rewarding jobs in our society. Frequently, they have held no jobs at all. They find themselves on the welfare roles, and each generation begets yet another generation of those who are uneducated, unskilled, and unemployed.

There are men and women in the state who cannot fill out job applications, who cannot read labels on prescriptions or prices at the grocery store, and who cannot help their children with even the simplest homework. They are people who need Adult Basic Education.

On the other hand, there are men and women among us who have recently applied for and received either their first job or a better job. We have adults who no longer must depend upon others to read for them on shopping trips. We have people who take new pride in helping their children learn, who pass that pride in education along to their formerly indifferent families. These are men and women who have received and are now demonstrating the benefits of Adult Basic Education.

DEFINITION

Adult — A person sixteen years of age or older who is not enrolled in a regular public or private school program and who is in need of basic literacy skills, English Language instruction, life skills instruction or other assistance up to secondary school completion.

STATEMENT OF NEED

The goals of Alaska Adult Basic Education are:

> ...to provide the best possible educational opportunities for all undereducated adults in Alaska ... to provide adults opportunities to continue their education to at least the level ... of secondary school ... (to make these) opportunities available for adults who have not completed secondary training as well as adults who have received a certificate of graduation from a school providing a secondary education but are functioning at less than a secondary competency.

There are presently seven geographic regions in the state receiving little or no instructional money for Adult Basic Education. The North Slope, Northwest Arctic, Aleutian/Pribilof Islands and Bristol Bay and Rural Anchorage Regions receive no funding. The Kenai Region receives

12
13
REGIONALIZED SERVICE

funding for two part-time classes and Valdez is funded for one teacher. This means that approximately 68,000 Alaskans are being denied access to the advantages of adult education.

At current funding level options are limited. Programs could be drawn out of one region and relocated in another region, but this would cause the loss of experienced staff in whom the state has a considerable investment in training. This would further cause the discontinuation of programs for many students who have had a long term commitment and are in the advanced stages of completion.

A second alternative would be to trim a percentage of money from existing programs and put into the unserved regions. Once again this would cause many people to lose service and take away from programs which already operate at only a minimal level. A case in point is the Kuskokwim Region which serves fourteen out of fifty-three villages now.

The third alternative and that being suggested by this proposal is to leave present funding in place and add minimum funds necessary to complete the network. The state is already in the unfortunate position of denying many of its citizens equal access to educational opportunity. To reduce or remove the programs currently thinly spread over the state would be a denial to our responsibility.

Great social pressure is being exerted upon the Native populations of the state. With Indian Self Determination, the advent of Native Land Claims and localization of the schools people with little education are being required to sit on boards of directors of corporations making decisions with great environmental and financial impact, sitting on school boards making decisions in hiring and firing professional staff as well as judgements on quality of education.

This press for educated adults cannot depend strictly upon the new young graduates to fill the need. Every effort must be made to tap the knowledge and experience of the mature adult in the older geneations. This can be done only through basic education.

The following statistics corroborate the need for basic education in the proposed regions to be served.

REGIONAL NEEDS STATEMENTS

1. Bristol Bay:

"In a special report prepared by Robert Natham and Associates for the Federal Government, a number of statistics were identified relative to the well being of Alaska Natives. For Bristol Bay, the figures are indeed stark:

The Median education ... school years completed by
Alaska Native (as a whole) is:.....7.4
For Bristol Bay.....3.5

Further, the studies identified 50.3% of the population 25 years of age or older as having an educational attainment of 0-4 years of formal schooling. In this same population group, only 8.6% have

completed four years of high school or have an equivalent high school diploma. There is an immediate need for Adult Basic Education Courses in virtually all Bristol Bay villages."

No Adult Basic Education courses are currently being taught, therefore, there is no existing program or vehicle for adults within the villages to obtain the basic skills necessary to even apply for and pass the five sub-tests for a General Education Diploma (GED). An Adult Basic Education program would not only provide this service but would help provide for equal educational and growth opportunities for those adults who have been and are still being neglected.

2. Northwest Arctic:

An active, comprehensive program of adult education, based on the conceptual framework of Adult Performance Levels, is a prime requisite for growth of political, social, personal, and economic skills of NANA Region residents. In a recent (December 1978) survey, it was found that 42% of respondents had attended school to eighth grade of less. Another 13% attended between nine and eleven years. 45% were at least high school graduates. Teachers and other relatively transient professionals were included in the random sample and contributed to this last category. The indigenous, stable population is primarily of Inupiaq Eskimo heritage and fewer of this group have completed high school than the survey results suggest. Complicated further by multilingualism, the adult populations thus has a high rate of functional illiteracy. The region's people also suffer a high rate of unemployment. Inuit respondents, 52% had not had a job for the past year. An additional 41% were employed part-time. Only 7% had fulltime jobs. Besides unemployment, alcoholism, high prices, and lack of something to do, were seen by the respondents as the region's major problems.

The above statistics would in themselves suggest a need for an adult basic education/adult education program. But there is further evidence as well. When asked the question, "If a school for adults was available here, would you be likely to go?", 73% replied they would. And 90% said they would attend workshops or classes to teach people self-health care.

In follow-up interviews by school district personnel (April 1979), Ambler adults indicated that an average of 36% of respondents would attend each of sixteen (16) vocationally oriented classes. An average of 61% would enroll in each of two (2) consumer education classes, and in each of four (4) health and safety classes. Three (3) ABE courses would each have an enrollment of 10% of the adult population of this village, and a GED preparation course 32%. If extrapolated to the region's adult residents (approximately 2,500 people in eleven villages), one could anticipate about 150 people interested in a ABE program, 800 in a GED program, 900 in job skills, and 1,525 in other life skills program. Of course, many people indicated interest in several programs, and actual attendance would be well below the level of interest, but the need for an adult education program is apparent.

MEDIAN YEARS OF SCHOOL COMPLETED BY REGIONAL POPULATIONS

The following chart was compiled in an effort to show both the educational services needs and the income levels of the target area populations the A.S.H.E.S. Talent Search Project would be aimed at.

Region	Median Years School Completed		Highest Grade Completed by largest % of population				Eligible youth age 14-24 (17.4% of poverty population	Total below poverty pop.		Total Pop.
	Native	Non-Native	Native	%	Non-N.	%				
ALUET	7.2	12.7	5-6	23.9	12	46.7	73	419	9.6	4359
ARCTIC SLOPE	5.6	18.0	5-6	23.9	12	35.9	154	887	28.8	3079
CALISTA	3.0	13.5	0	33.9	12	33.6	1378	7889	65.5	12040
BERING STRAITS	7.0	13.8	1-4	21.8	12	28.5	387	1938	35.3	5497

SEALASKA	10.3	12.5	9-11	25.3	12	38.1	760	4370	10.4	41957
OTAL	7.5	12.6					6197	35614	12.7	280536

Data compiled from 2(c) Report, Task I. Excerpt from 2(c) Report, Task II, "The lack of basic statistical information prevents educational agencies from evaluating current educational efforts and identifying unmet needs."

3. Aleutian/Pribilof

Due to limited educational opportunities in the past, the people of the Aleutian/Pribilof region have faced many difficulties coping with 20th Century corporate life thrust upon them by the Native Claims Settlement Act. Leadership has been developing with incredible rapidity and effectiveness, but the heavy pressures involved in rapid change have caused frustrations resulting in social disorganization. Village corporations, councils, school committees and school boards have all been forced into leadership decisions for which they often lack basic training and experience. According to the 1970 U.S. Census in the Aleut Corporation area, 15% of the Native people 25 years or older completed grades 1-4; 25% grades 5-6; and 16% grades 7-8. Unless educational needs are met, the following will continue to occur:

A. Village and city governments will fail or falter or will be dominated by non-Natives.
B. School boards will be dominated by non-Natives, and Native parents will have little to say about education of their children.
C. Village corporations will not function at their full potential.
D. Outside investors will reap fortunes in the Aleutian/Pribilof area while the majority of Aleut people will subsist virtually at poverty level.
E. The Aleut cultural heritage will be overrun and lost, leaving behind the vicious circle of poverty, alcoholism, drug abuse, family disintegration and loss of identity.

4. Matanuska-Susitna

Matanuska-Susitna Community College identified 4,600 adults having less than a secondary education in the Matanuska-Susitna service area. Bureau of Labor statistics revealed a July unemployment rate of 15.1 percent and November 23.3 percent combined with Decembers 24.9 percent are symptomatic of the need for basic education and life coping skills training.

5. North Slope

The native residents of the North Slope have a median school completion level of 5.6 years. This lack of education has significant impact upon the ability of natives to compete for and maintain jobs in the now technologically oriented North Slope Region. Additionlly, a bank of educated persons is necessary to train for the roles necessary if the new affluence introduced by massive oil revenues is to remain under control of its rightful owners. The few individuals represented in the leadership need many more trained, educated people to take on the many emerging roles in business, education, industry and arctic leadership.

6. Kenai Region

During the summer of 1979, an assessment of the available educational resources and needs of the adult client population was done under a federally funded program named NETWORK. (Network of Education, Training and work Opportunity Resources Knowledge Bank). The final report will not be in this office until October 30, however, preliminary analysis indicates that the statistics presented last year were in the ball park. Thus, they are repeated here.

The population of the Kenai Peninsula is approximately 25,000 with most of the people living in the Kenai-Soldotna area. In Level I (1-9), it is estimated that 1,500 adults could be served. Additional estimates are that there are approximately 3,000 adults in Level II and 150 needing ESL training.

7. Valdez/Copper River

The Valdez/Copper River Region encompases a population of nearly ten thousand people. Of this ten thousand an estimated 2,400 have less than a high school education. The Native adult population has a median school completion level of 5.8 years. With the pipeline terminal, pumping and maintenance stations throughout the region it is apparent that employment opportunities are fast appearing, but they are at a level which demand solid-scholastic background. Unless the region is given the benefit of ABE services, these opportunities will once again fall to outsiders.

PROPOSED SERVICES

Services shall include instruction in basic literacy, English as a Second Language, life coping skills and vocational counseling in the form of:

an "individualized educational program" a written statement jointly developed by a qualified instructor and by the person, to include:

- present achievement level analysis
- short range and long range goals
- identification of specific services that will be provided toward meeting those goals
- when and where these services will be provided and how long they will last
- a schedule for checking progress achieved under the plan and for rating necessary revisions

These services shall take place in the towns and villages of the respective regions as selected by the educational institution providing the service. Curriculum shall be determined by the student, local educational institution in concert with their local advisory council and the citizens participatory planning process used by the state ABE program.

PROGRAM IMPLEMENTATION

Organization for Delivery of Services

State Organization: In an effort to prevent proliferation of state bureacracy, these funds should be located in the Alaska Department of Education, Adult Basic Education Section.

This section already has in place the mechanisms for granting and administering funds. A statewide network of curriculum assistance, technical assistance and staff development. The addition of this program to the present network could achieve maximum benefit at minimum cost.

LOCAL DELIVERY

Local/Regional delivery is currently conducted throughout the state by a variety of organizations. These organizations include school districts, community colleges, Native Non-profits, private non-profits and public non-profit agencies. The funds are placed on a competitive basis to the organization offering the most service for the available dollars. Programs in most regions reflect cooperation between two or more agencies for delivery of service. The competition between agencies has been very effective in holding down costs without causing instability in the program. In the case of similar bids the program operator with the proven history of performance is always funded.

Program operators not performing will have historically been given one year grace to upgrade and it has been necessary to null only a program in six years.

FUNDS NECESSARY TO IMPLEMENT NEW REGIONS

North Slope	$80,000
Northwest Arctic	80,000
Bristol Bay	75,000
Aleutian/Pribilof Islands	85,000
Kenai Peninsula	75,000
Rural Anchorage (Mat-Su)	75,000
Valdez/Copper River	75,000
Total Program	$545,000
Staff Development @ 10%	54,500
Support Services - 1 clerk typist III @ 18,000 including fringe, etc.	18,000
Total Cost	$617,500

Justification:

Regional Allotments

North Slope, Northwest Arctic and Aleutian/Pribilof Islands Regions are suggested at a higher level of support due to unusual travel costs. Although travel will be much cheaper in the Kenai and Rur Anchorage regions extra funds are justified due to the population density they must serve.

Staff development is a vital compontent to ABE. Rural teachers are taken from the indigenous population and trained as ABE instructors. This training is a rich source of leaders in the rural areas. Attached find statements of what have happened to many of the ex-instructors once the role of ABE instructor gave them responsibility in the political/social process.

Furthermore, staff development is inherent in quality instruction, particularly when dealing with people who have never taught before or even experienced teachers dealing for the first time with adult students.

Support services are necessary if reasonable service is to be available to the new regions. Although ABE is funded over three times as high as four years ago and is offering many more services to field programs, the present administrative staff need not be expanded but the present 1/2 time secretarial clerical arrangement simply cannot keep up with present volume let alone be expected to handle nearly double the number of contracts currently served.

Matching funds are available from many sources including C.E.T.A., B.I.A., Indian Education, Labor, Social Services, boroughs, etc., once a knowedgable organize services and negotiate contracts. It is anticipated that the first fiscal year funds at least equally the inital grant will be generated by and the third year they would be generating as much as three dolllars per state dollar.

The money being generated tends to be dollars that previsously created overlap programs or furnish ancillary services which, though useful, were not coordinated with ABE, therefore seldom used.

United States Council of State Directors

Adult Education Economic Impact Survey
Alaska - FY79

A. Public Assistance

1. List the number of Adult Education Learners removed from public assistance in FY77 (as reported in Table 5, Item 12 in Annual Report). 24

2. Average annual cost per adult for public assistance in your state. Households average 1 adult and 2 dependents nationally and FY77 statistics from USOE reveal Alaska costs to be 12,948 per household including case work, etc. 12,948

3. Total projected savings per year. (Multiply answer in number one times the answer in number two.) 310,752

B. Employment

1. List the number of Adult Education learners who became employed in FY77 as a result of Adult Education (as reported in Table 5, Item 13 in Annual Report). 112

2. Projected income earned by adults who became employed. Take the number of adults receiving jobs as a direct or indirect result of attending Adult Education class: Multiply this number by the minimum hourly rate (now $2.30) times 40 X 52. If the actual income is known, then use this instead of minimum rate. 1,397,760

Minimum average in Alaska is just over $6.00

EXAMPLE: 112 persons who became employed X $6.00 per hour = $672.00 per hour X 40 hours per week = $26,880 X 52 weeks = $1,397,760 per year new income.

C. Job Promotions

1. List the number of adults who were promoted as a result of Adult Education (as reported in Table 5, Item 14 in Annual Report). 222

2. Using Employers State salary scale minim is 18¢ per hour. Projected additional money earned by adults who were promoted as a result of Adult Education. Multiply the number of adults receiving a promotion by .10 per hour (which is a minimal figure) X 40 hours X 52. 230,880

EXAMPLE: 222 promotions X .50 per hour = $111.00 per hour X 40 hours per week = $4,440 per week X 52 weeks = 230,880 per year.

January 10, 1980

The Honorable Nels Anderson, Jr.
Member, Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Nels:

We have reviewed our capital improvement needs and find them to be as follows:

1.	Aleknagik South Shore		
	Diking of oil tanks and doing code required work.	$ 50,000	$ 50,000
2.	Aleknagik North Shore		
	Additional funds needed to provide complete K-12 school, including space fo industrial arts, kindergarten, specialized secondary classroom, instructional materials center, and support space for a total of 4,600 square feet.	1,350,000	1,350,000
3.	Clarks Point		
	Diking of oil tanks and doing code required work.	75,000	
	Additional space for industrial arts, multipurpose activities and support space, totaling 4,200 square feet.	1,120,000	
	Remodel existing space to provide specialized secondary classroom.	150,000	1,345,000
4.	Ekwok		
	Additional funds needed to provide complete K-12 school including specialized secondary space, an instructional materials center, industrial arts and support space for a total of 3,900 square feet.	1,144,000	1,144,000

5. Koliganek		
Funds for a 1,200 square foot industrial arts building.	$ 370,000	
Oil tank diking and life safety upgrade of original building.	250,000	$ 620,000
6. Levelock		
Funds for one elementary classroom, one specialized secondary classroom, an industrial arts room, an instructional materials center, plus supplemental space for a total of 4,700 square feet.	1,300,000	
Furnace replacement and waste heat recovery.	100,000	1,400,000
7. Manokotak		
Remodel existing space to provide an instructional materials center.	125,000	
Dike oil tanks and perform code required work.	150.000	
Upgrade gym floor and improve safety of building.	150,000	425,000
8. New Stuyahok		
Convert existing space to an instructional materials center and remodel kitchen.	200,000	
Dike oil tanks and perform code required work.	100,000	
Furnace replacement and waste heat recovery.	200,000	500,000
9. Portage Creek (Ohgsenakale)		
Furnace replacement and waste heat recovery.	75,000	
Dike oil tanks and perform required work.	50,000	125,000

10.	Togiak		
	Construct and equip a 2,400 square foot industrial arts building.	$ 720,000	
	Heating system replacement and waste heat recovery.	300,000	
	Dike oil tanks and perform code required work.	75,000	
	Replace relocatable classrooms, 3,600 square feet.	960,000	2,055,000
11.	Twin Hills		
	Dike oil tanks and perform code required work.	30,000	30,000
12.	District Office		
	Perform code required work and connect to Dillingham City Water.	50,000	50,000
13.	Swimming Pools		
	Construct 20 x 50 x 4 ft. deep pools, plus mechanical systems, lockers and showers in order to improve building life safety and provide swimming instruction to students at Manokotak, New Stuyahok and Togiak.	3,000,000	3,000,000
	Larger pools with capability for diving could be constructed at the three sites at a cost of $1,500,000 each or a total of $4,500,000.		
	To date we have been unable to secure a rate quotation for fire insurance that would be lower than present rates by using the pools as reservoirs for the sprinkler systems. However, a sprinkler system would definitely improve life safety protection at Manokotak and New Stuyahok where there are no sprinkler systems.		
		TOTAL	$12,094,000

We have appreciated your past efforts on behalf of the students of the District, and know that you will do your very best for them during this session.

Should you need additional information, please do not hesitate to call.

Sincerely,

Bob

Robert Van Slyke
Superintendent

RVS:ct

HB
690

FY81 CAPITAL BUDGET REQUEST

1. Instructional Equipment. (Various Units)

   This is a six-year program which will maintain a continuous supply of instructional equipment for teaching purposes for the entire University. Most of the needs are determined or based on the existing program needs, the deterioration of the current equipment and projected needs.

2. Seward Marine Education Center. (UA/Fairbanks)

   This will be a new facility and will provide conference rooms, library spaces, office and reception areas for marine advisory agent, a public display area, aquarium, etc. This will be located in Seward. This facility will be built on the land that is currently owned by the City of Seward, which has extended the lease agreement with the University for the next two to three years, within which time this project can be implemented.

3. Handicapped Barrier Removal. (Various Units)

   This item is in response to the requirement of Section 504 which requires removal of handicapped barriers within the University buildings and campuses.

4. Campus Development Plan. (Statewide Administration)

   This project, if approved, would provide a resource to properly develop the expansion and growth of the physical aspects of the University. It would also afford coordination between the academic master plan, physical master plan and land management. It would provide basis and document from which the requests for capital projects in the future could be extracted and coordinated. It will provide a general plan document which is necessary not only for the development of the major campuses, but also the community college campuses as well as coordination of the entire University system.

5. General Building Upgrade and Replacement. (Various Units)

   This is a six-year program that will keep vigilence and maintenance over the buildings within the University system, providing continuously good quality space for educational needs, resulting in a lower maintenance cost.

6. Roads, Streets and Parking. (Various Units)

   This project is part of the six-year schedule within the capital projects program. It is intended to serve as a maintenance type of project to prevent deterioration of streets, roads and parking, and will therefore result in an economical way of maintaining the vehicular communication lines within the campus.

7. Classroom Building. (UA/Anchorage)

   Because of lack of large space the department is currently located in a variety of sites which is not conducive to proper educational development. Enrollment has increased to such a level that it is difficult to handle program needs in current facilities. Therefore, it is proposed that a new classroom building will provide for Departments of Music, Theatre and Art.

8. Galena Learning Center. (Rural Education)

This request will provide space facilities for the Rural Education needs. The student population and interests in technical education are growing, and at this point there is no facility to provide these kinds of programs in the rural areas of this state.

9. Repair Elvey Annex Roof. (UA/Fairbanks)

The existing roof is leaking water around the periphery of the building, resulting in a deterioration of the structure. Spaces below, like the electronics shops, are out of use due to seepage, especially during the winter months. This should be stopped, and the space returned to the user. It is estimated that about 20% of this space is unused during the major portion of the year.

10. University Center - Phase I. (UA/Juneau)

Included in this phase of the project would be a cultural center, student recreational center, administrative center, plus mechanical and other types of spaces necessary for the building's functions. It will house a number of interrelated programs, making an interaction between them much simpler and easier, resulting in a much more efficient operation. It is thought that one single complex approach has numerous advantages; there are economies related to a large building construction rather than numerous small ones. It is thought that the economies of maintenance are better in a single structure rather than numerous buildings located all over the area. It is expected that the program development and attraction of students would increase having a facility that is of a centralized type.

11. Land Acquisition. (UA/Juneau)

It is necessary to purchase property because of the potential need for the location of water supply tank, since this is the highest point on campus. The water would flow by gravity rather than be assisted by mechanical means.

12. Central Receiving. (UA/Fairbanks)

Currently, the Physical Plant is using about one-third of its space for unrelated storage and warehousing. This is an inefficient use of space, therefore it is proposed that a new central warehouse be constructed. A control warehouse would be much more efficient and will lower current operating costs by a significant amount.

13. Prince William Sound Community College.

Projects that are requested are only those listed before you. All listed projects are new. There are no facilities, at the moment, that the college owns. They are currently in a "borrowed space". The justification simply reads: "We have no buildings. We are an established community college; therefore it is appropriate for us to ask for new facilities as soon as possible."

14. Utilities Modification. (UA/Fairbanks)

This request will include water chiller for environmental science labs, a refrigeration system for Irving Building, water chiller for Elvey Building, heating and cooling systems in Elvey Building, steam system upgrading, ventilation and air handling for KUAC, etc.

15. Sewer Connection. (CC-Sitka)

This project is necessary to connect the college buildings to the Sitka community sewer system. Presently the septic tank system must be frequently cleaned. This is costly. It is felt that it would be more advantageous to connect into the city utility system.

16. Engineering Equipment. (UA/Anchorage)

This equipment is necessary to furnish engineering laboratories in the new building. This building is near completion, and the equipment that will be purchased will serve areas such as thermodynamics, electric power, fluid mechanics, electronic communication, etc. This will provide basic furnishing for the educational needs.

17. Applied Science Building. (UA/Anchorage)

This particular request is based on the consolidation of nursing programs. The programs that will be housed in this building are dental and health occupations, chemistry, biology and general type of classrooms. If approved, this will contribute highly to the education of applied science programs and professions within the Anchorage area.

18. On-Line Computer System. (Statewide Administration)

The funds requested for the UACN will be used to: (1) provide increased accessibility and improved service to the Network for all users throughout the University system; (2) provide improved computer hardware and software support for the Division of Community Colleges, Rural Education and Extension; (3) provide needed life support systems in the Anchorage Computer Center and a security system in the Fairbanks Computer Center.

19. Utilities Monitoring and Building Security. (UA/Fairbanks)

It is intended that a computerized system for monitoring of the utility usage and building security be provided for the Fairbanks campus.

20. Physical Plant - Various Programs. (UA/Fairbanks)

This project includes items such as swimming pool chlorinator, re-roofing of some of the buildings, domestic water cooling tower, carpet replacements, elevator safety devices, etc. All items are too numerous to be listed here. There are improvements that have to be made for which no money has been allocated up to this point.

21. Administrative Equipment. (CC-Tanana Valley)

FY81 requests are administrative equipment. This equipment is necessary for college functioning. The technological areas of the programs require more expensive equipment. Although initial investment costs are high, they do decrease over time.

22. Purchase ABE Facility. (CC-Anchorage)

Currently the college is leasing the space for this particular program. The Board of Regents have decided that it would be wiser to purchase the building rather than continue renting.

23. University/Legislature Teleconference Link. (Statewide Administration)

The purpose of this project is to provide a coordinated system of communication between all the campuses and facilitate the contact between the President and Chancellors and all the community colleges within the University system. It is anticipated that the development of the system will be staggered, and that in the long term the entire teleconferencing will be operational throughout the state.

24. Art Department Equipment. (UA/Anchorage)

Due to the lack of space and proper equipment in the art studios, the student body is decreasing - this action is intended to reverse this process. The equipment and the space improvements will be in areas such as ceramic studios, sculpture studios, printmaking studios, painting and drawing, art education, jewelry, photography, etc.

25. Bookstore - UAA/ACC

Currently, a provisional bookstore exists and it does provide a service on a limited basis to both of the units. However, the facility is limited in size and service. It is intended that the new facility will provide full services to both units within the Anchorage area.

26. Yak Estates Plumbing and Heating Conversions. (UA/Fairbanks)

The current state of plumbing in Yak Estates is rather poor. Also, the existing energy source for the heating system should be converted from electric to oil, because operating costs of the electrical heating system is extremely high. Oil conversion would result in significant savings. Capital investments need to be made on this project so that occupancy rates can be increased, so that the university can cover outstanding indebtedness on the project and so that it will not cause financial loss to the university.

27. Statewide Administration Building.

This is the only other statewide capital project anticipated at this time. The reasons for this project is that currently all the statewide administrative units are dispersed all over the Fairbanks campus. There is no identity to a statewide function. This building will afford a possibility to bring all those statewide units into one central location. It is also thought that by centralizing the activity of the statewide functions a better coordination will be attained between the departments responsible for the entire University system.

28. Vocational/Technical Equipment. (Rural Education)

This is a media services need to provide programs to the rural education which presently aren't available.

29. Classroom/Shop Building - Phase IV. (CC-Kenai Peninsula)

This request is made with the hope that since community demand on the college programs is so great and increase in the student enrollment is rapid, this building is proposed so that no delay occurs for the programs to be accessible to the public. Spaces that will be included in this structure are: heavy duty electrical equipment shop, petroleum electronics, cooperative extension facilities, etc.

30. Vocational Building and Equipment. (CC-Chukchi)

Besides the "standard" programs described previously, the new project requested by Kotzebue is Item No. 2, Vocational Building and Equipment. This building is a staging area for the delivery of programs in the bush. There is a great student interest in these programs, and having a facility as proposed would be extremely helpful for the community college to expand its service in this area of the state.

31. Arctic Health Incenerator. (UA/Fairbanks)

This will be an incinerator for the disposal of waste from the health experimental labs and controlled by Physical Plant operations.

32. Pratt/Ely Property Renovation. (UA/Juneau)

This is a recently acquired property which has existing structures located there. The structures are rather run down and require extensive remodeling and repair. The remainder of the money from the project when it was purchased will be used for that purpose; however, the funds are insufficient and the additional money is requested for that purpose. It will provide new vocational programs in power technology, marine and fish technology, etc.

33. Phase II Rasmusson Library Addition. (UA/Fairbanks)

The library is overcrowded, making use of the facility difficult and time consuming. It is anticipated that addition to the existing space will occur at this time to allow the expansion of stack area, book collections, media and computer services, creating a centralized and functional facility.

34. Conference Center. (UA/Fairbanks)

This facility will serve the entire University. The development of this facility would not only provide a conference center for outside agencies, but also expand information about the University and provide facilities for adult education. It is anticipated that it will increase the student enrollment, as well as the income to the University. The facility would consist of classroom space, registration areas, food areas and offices for the conference staff as well as exhibition areas and meeting spaces.

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

February 25, 1980

Dear Thelma:

This letter concerns House Bill 690 which I understand you have scheduled for hearings by the House Health, Education and Social Services Committee this coming Friday.

Last week in Juneau I testified before the Senate Health, Education and Social Services Committee with respect to the governor's proposal for general obligation bond funding for the University of Alaska in FY81 totaling $20,550.0. I thought that you might like to have a copy of the attached related material which I am sending to Senator Glenn Hackney to comply with the request the university received from the Senate Health, Education and Social Services Committee.

I am sorry that I shall not be able to be in Juneau this Friday to testify before your committee with respect to House Bill 690. However, if you or your staff wishes information in addition to what is shown on the attachment with respect to the university's needs and priorities for general obligation bond funding, Dennis Demmert will be able to secure it for you. Or, it may be obtained by contacting me or Sherman Carter, the university's Financial Vice President. His telephone number is 479-7711.

Thank you very much for your assistance in these matters.

Very truly yours,

Jay Barton
President

JB:nba

Representative Thelma Buchholdt
House of Representatives
Pouch V
Juneau, Alaska 99811

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

February 25, 1980

Dear Senator Hackney:

On 20 February, the Senate Health, Education and Social Services Committee asked the university to submit a revised capital budget request for general obligation bond funding for FY81 which totaled between $30 and $35 million. Attachment number 1A to this paper presents such a request summarized by major administrative unit of the university and also by budget request unit.

As you know --

a. The board of regents authorized the university administration to submit a capital budget request for funding by general obligation bonds in FY81 which totaled $71,129.0.

b. The governor then recommended that the legislature approve general obligation bond projects for the University of Alaska in FY81 totaling $20,550.0 as listed below:

Handicap Barrier Removal - All Units	$525.0
General Building Upgrade - All Units	950.0
Utilities Modification - UAF	800.0
Yak Estates Changes - UAF	600.0
Arts Classroom - UAA	12,000.0
Sitka Sewer Connection	75.0
Kenai Classroom	5,600.0

Attachment number 1B to this letter shows how the listing of capital projects which were requested by the board of regents for funding by general obligation bonds in FY81 has been changed to comply with the report requested by the Sentate Health, Education and Social Services Committee. It appears that I cannot get the formal approval of the revised listing by the board of regents until the next regular meeting of the board now scheduled for 20-21 March. I believe that the board will then approve my recommendation that, if general obligation bond funding for university capital projects in FY81 is to be provided in an amount of from $30 to $35 million, that projects as listed on the attachments be funded. If the board does not approve this recommendation which

I shall make, I shall let you know promptly.

Thank you for your assistance in these matters.

Very truly yours,

Jay Barton
President

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill, by itself, does not have enough fiscal impact on our department to require additional appropriations or positions. There are many such bills pending however, and if a significant number pass the cumulative administrative burden will require additional personnel.

Date: April 9, 1980

RE: HB704

In behalf of the Alaska Association of Homes for Children, Inc., and Alaska Children's Services, Inc., I want to speak in opposition to HB704 entitled "An Act Relating to the Purchase of Services By The State For Persons Under Its Responsibility; and Providing For An Effective Date."

HB704 was drafted by the Department of Health and Social Services and proposes to repeal and/or amend major sections of Alaska Statute 47:40 so that the intent is totally changed.

The Alaska Association of Homes for Children, Inc. is a statewide association consisting of 14 of the State's 16 private non-profit child care agencies. These agencies provide residential care and treatment for some of Alaska's most troubled, abused, and neglected children and youth. More that 2,000 children are cared for each year with approximately 250 in care on any given day. These are children that do not have families of their own who can care for them and have generally been in and out of numerous foster homes.

For the past ten years, private non-profit child care agencies in Alaska have been providing residential care and treatment for children placed by the Department of Health and Social Services. They have been reimbursed according to Alaska Statute 47:40. This is often referred to as the "Full Cost-of-Care Statute".

Although AS 47:40 has never allowed for the full reimbursement of the care of State placed children, it is superior to the reimbursement method of contracting proposed by HB704 in some of the following ways:

1. AS 47:40 currently enables continuity of care for troubled, disturbed, often abused children who need protection and security. Under the changes proposed by HB704, children could be uprooted and moved from one agency to another at the end of a contract period. Relationships with their primary caregivers would be broken and another, often traumatic move from one home to another could undermine any improvement they have made or security they have found. Even knowing in advance that a move is pending would be detrimental to their sense of wellbeing and security unless it is carefully incorporated into their treatment plan which cannot always be made to coincide with the State's fiscal year.

2. AS 47:40 promotes and maintains the private voluntary nature of child care institutions which historically have provided high quality care

and treatment of orphaned and troubled children. Agencies across the State have invested millions of dollars in facilities and equipment for the care of children. Under HB704, private enterprise would suffer. Agencies would be unable to make long-range plans and the recruitment of professional staff would be seriously jeopardized.

3. AS 47:40 protects the small agencies from hard pressure contracting methods. Under provisions of HB704, the Department would hold the upper hand in negotiating contracts with small, private child care agencies. The Department with its resources would be able to hold out indefinitely for a reimbursement rate which may be substantially less than the agency needs to operate a quality program.

   Presently, the Department has the option of contracting with agencies for new services and of discontinuing its placement of children in any agency which it does not care to use. During the past year, its Division of Corrections chose not to use two agencies.

   The present statute requires the Department to provide a cost-of-living increase. If it had not been for this requirement in the law during the past year, the Department would not have granted a cost-of-living increase. It took an opinion of the Attorney General to bring the Department into compliance with the existing statute. Without certain protection provided by the current statute, private agencies would be at the mercy of the Department.

4. AS 47:40 protects against inflation. Not only does it provide in Section 040(a) for a reimbursement rate to include a proportionate share of anticipated cost-of-living and staff salary increment increases but it enables agencies to keep up with inflation even though the Department's annual increase has historically been less than the inflation rate reported by the U.S. Department of Labor. The method of determining the rate incorporates the actual allowable expenses for the preceding year divided by the number of days of care. Under HB704, no guarantee of consideration for inflation will be provided unless it is a part of the negotiation process. The private agencies have historically found the Department to offer less than the actual rate of inflation. The current year is a good illustration where the proposed inflation rate is considered to be 18%. The Department has been insisting on limiting the rate increase for FY 1981 to 9%. The agencies feel that a very minimum of 12% must be included and this has met with considerable resistance.

   A multi-year contract without an automatic inflation increase would cause undue hardship to most private agencies.

5. AS 47:40 encourages creativity, dedication, and joint public/private financing of child care programs. Historically, the private agencies have had to raise 10 to 20 percent of the cost of care. This has encouraged agencies to find private funds for the improvement of their program in situations when the State has been reluctant to support an innovation that would benefit the program and children in care. Furthermore, most child care salaries paid by private agencies are only one half to three fourths that of the salaries paid to State employees for comparable positions. In fact, the private agency employees personally subsidize the care of State placed children to

the tune of several hundred thousand dollars a year, due to their dedication to the agencies and the children they serve even though they cannot be paid the type of salaries they deserve.

Under HB704, private agencies would have less opportunity to develop programs they know to be in the best interest of children inasmuch as the Department would have a greater capacity to dictate the nature and content of the program.

For these and other reasons, the Alaska Association of Homes for Children, Inc. and Alaska Children's Services, Inc. oppose vigorously HB704. It is true that there are limitations to AS 47:40. Primarily the present statute does not require cost settling and reimbursement for depreciation on property and equipment.

Representative Charles Parr has introduced HB637 which would strengthen AS 47:40 by requiring that the Department cost settle and allow depreciation as a reimbursable expenditure.

In behalf of the private child care agencies of the State of Alaska, I urge you to oppose HB704 and to support HB637.

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER POUCH H 01 – JUNEAU 99811

April 9, 1980

The Honorable Thelma Buchholdt
Chairman
House HESS Committee
Pouch V
Juneau, Alaska 99811

Document # 65-80

Dear Ms. Buchholdt:

COST OF CARE RATE HEARINGS
REPORT TO THE LEGISLATURE

Alaska St tes, Chapter 47.05.010(14), mandate a public meeting be held by the Department of Health and Social Services "in February to review, study, and propose the necessary levels of care and the rates it (the department) will pay to anyone for the services requ red during the succeeding year; before final adoption by the department, the proposed levels of care and the rates of payment shall be reviewed by the Legislature annually while in session."

The meetings to conform to the statutes were held during February, 1980 as required. Testimony was presented on both the rates of payments and the levels of care during the hearing process. Attachment 1 lists the estimated rates which need to be paid during FY 1981 based upon testimony given by the providers. Attachment 2 provides the cost estimate and rates without the provider requested 3% allowance for fringe benefits. Funding for both institutional and foster care for instate costs appears to be insufficient to meet the estimated expenditures.

All calculations of costs presented in this report are based on provisions of current purchase of service statutes.

The rates reflected on Attachment 1 were developed using a 12% increment for salary, a 12% cost of living allowance for all expenditure categories other than salaries and benefits, and a 3% increment for employee benefits. These increases were requested by providers during the rate hearings.

Costs as Requested by Providers at Hearings

	Division of Social Services	Division of Corrections	Department Total
Institutional Care	(In-State)	(In-State)	
Budgeted Amount	$4,281,300.00	$2,001,675.00	$6,282,975.00
Estimated Cost	6,893,119.00	2,550,313.00	9,443,432.00*

Balance (Deficit)	(2,611,819.00)	(548,638.00)	(3,160,457.00)

*The difference in $9,993,958 on Attachment 1 and $9,443,432 shown represents projected changes in placement patterns.

Foster Care	Division of Social Services	Division of Corrections	Department Total
Budgeted Amount	$2,682,513.00	$ 444,100.00	$3,126,613.00
Estimated Cost	2,943,272.00	448,700.00	3,391,972.00
Balance (Deficit)	$ (260,759.00)	$ (4,600.00)	$ (265,359.00)
Total Deficit	$(2,872,578.00)	$ (553,238.00)	$(3,425,816.00)

Unless the legislature appropriates additional funds required or directs that the rates requested by the providers should be granted, the department does not intend to allow the level of increases as requested. We have developed rates allowing for an across the board increase of 12% (Attachment 2).

In the institutional care and foster care components, no increase beyond the 9% guideline was utilized during budget preparations.

There has not been a separate allowance made in the full cost formula for fringe benefits paid by providers to their employees. The department has historically considered any fringe benefit allowance as part of the salary costs. The providers have requested an increase of 3% over the current salary expenses to enable agencies to improve benefits such as medical/dental insurance, retirement plans, and/or other benefits currently not provided or provided at inadequate levels.

While the providers have requested a separate 3% increase for fringe benefits, the department is not recommending a departure from its established position of including fringe benefits in the salary increase allowance.

Costs as Recommended by Department

	Division of Social Services	Division of Corrections	Department Total
Institutional Care	(In-State)	(In-State)	
Budgeted Amount	$4,281,300.00	$2,001,675.00	$6,282,975.00
Estimated Cost	6,763,305.00	2,506,991.00	9,374,398.00
Balance (Deficit)	(2,482,005.00)	(505,316.00)	(2,987,321.00)

Foster Care

Budgeted Amount	$2,682,513.00	$ 444,100.00	$3,126,613.00
Estimated Cost	2,943,272.00	448,700.00	3,391,972.00
Balance (Deficit)	$ (260,759.00)	$ (4,600.00)	$ (265,359.00)
Total Deficit	$(2,742,764.00)	$ (509,916.00)	$(3,252,680.00)

Foster Care rates were developed according to 7 AAC50.720(C) assuming a 9.874% change in the Consumer Price Index during FY 1980. Attachment 3 displays the rates for FY 1981.

Consistent with the information presented as a recommendation from the providers, the department projects additional funds would be required in the amount of $3,425,816 for both institutions, group homes and foster homes as shown below:

The department has recommended the 12% general increase, not allowing for an additional fringe benefit component. Additional funding required to comply with this recommendation is projected at $2,987,321 in the institutional care component.

The foster care component as recommended would require an additional $265,359.

Based upon data developed as the result of recent 1980 hearings, under 47.05.010 (14), the legislature is advised that sufficient provisions have not been made in the current budget request. Additional funds will be required in order to meet anticipated purchase of services at levels proposed either by the providers or the department as set forth in this report.

If such additional funds are not appropriated, the Department of Health and Social Services will not be in position to purchase services from any facility not licensed in FY 1980 and may have to refrain from purchasing services from some existing facilities.

Sincerely,

Helen D. Beirne

Helen D. Beirne
Commissioner

Attachment 2

The foster care rates for FY 81 have been calculated in the following manner.

The Anchorage Consumer Price Index (CPI) as of January 1980 was 218.2. Annualizing the rate for the period of March 1979 through March of 1980, the Anchorage CPI is expected to be 221.6 in March. Placing the March CPI over the 1970 base year CPI results in a ratio of 1.9874:1.0. Multiplying the 1970 base year rates by this increase for each of the three age categories we arrive at the annual foster care rate for fiscal year 1981 for the Southeastern, Southern and the Southcentral Regions.

Age Group				Annual Rate	Month Rate	Daily Rate
4 & under	$\frac{221.6}{111.5}$	x	1935 =	$3,846	$321	$10.54
5 thru 11	$\frac{221.6}{111.5}$	x	2140 =	$4,253	$355	$11.66
12 & over	$\frac{221.6}{111.5}$	x	2557 =	$5,082	$424	$13.93

In order to calculate the rate for the Northern, Northwestern and Western Regions a cost of living differential was calculated based on GGU range 14A salary as negotiated under the 1980 contract.

	Pay Schedule	Percentage
Anchorage	$1,850	
Fairbanks	2,132	1.1524
Bethel	2,465	1.3324
Kotzebue	2,556	1.3816

Fairbanks

Age Group							Monthly	Daily
4 & under	$3,846	x	1.1524	=	$4,432	=	$ 369.00	$12.14
5 thru 11	4,253	x	1.1524	=	4,901	=	408.00	13.42
12 & over	5,082	x	1.1524	=	5,856	=	488.00	16.04

Bethel

4 & under	$3,846	x	1.3324	=	$5,124	=	$ 427.00	$14.03
5 thru 11	4,253	x	1.3324	=	5,665	=	472.00	15.52
12 & over	5,082	x	1.3324	=	6,771	=	564.00	18.55

Kotzebue - Barrow

4 & under	$3,846	x	1.3816	=	$5,313	=	$ 442.00	$14.56
5 thru 11	4,253	x	1.3816	=	5,875	=	489.00	16.10
12 & over	5,082	x	1.3816	=	7,021	=	585.00	19.23

Attachment 3

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 704

"An Act relating to the method of purchase of social services by the state; and providing for an effective date."

House Bill 704 substantially amends 47.40 Purchase of Services to enable the Department to contract for the delivery of institutional, foster home or residential care services. The present statutes (47.40.010) require the Department to "determine the rates of payment for the full cost of services required" and to "pay all expenses related directly to the full cost of services at the levels of care required." In addition, this bill would amend current statute to allow salary costs to be provided to qualified foster parents participating in the specialized foster care program. This additional level of foster care expands the options for placement of children in custody and serves as a cost-effective alternative to placement in institutional care. Specialized foster care will provide for care for a child in his/her own region, and if possible, close to his/her biological parents. We have attached a report marked Attachment A on the foster care program which explains this program in more detail.

On the surface the present statutory language seems to provide for a fair and equitable way to determine rates and to pay for the full cost of services rendered by the provider. However, the problem with Chapter 40, Purchase of Services is not in the enactment section (47.40.010) but in section (47.40.040) which outlines the method of determining the full cost of services. This section indicates that full cost of services shall be determined by the per person, per day cost in the preceding fiscal year plus a proportionate share of anticipated cost of living and staff salary increment increases for the fiscal year for which the full cost of services, determined to be necessary by the Department, is being determined. This formula for determination of rates does not consider the occupancy factor for the various facilities. For example, if a group home opens in a given community and asks for a license for a 10 bed facility the Department must by law license them if they meet the requirements even if the Department cannot fully utilize the 10 beds. However, under the formula if the Department utilizes 5 beds in the first fiscal year the next year's rates must include the costs for all 10 beds. Therefore the per person, per day cost is significantly higher due to the vacancy factor.

If House Bill 704 were enacted, it would enable the Department to negotiate contracts for a specific number of beds for the types of services needed by the Department. This process would not only make an impact on the rates of care but would enable the Department to control the number of beds available at each level of care. Presently, the Department's only alternatives are to pay for the empty beds or to stop utilizing a facility completely. Contracting for services would result in a more reasonable and cost effective method of handling the problem of vacancy rates.

POSITION PAPER/Department of Health & Social Services

The Department would adopt regulations describing the contracting procedures. As part of the process of promulgating regulations, the Department plans to have public hearings in at least Anchorage, Fairbanks, and Juneau to explain the proposed regulations and solicit comments for improvements. Providers in other areas of the state would be able to receive copies of the proposed regulations and comment by mail. The Department would take these comments under advisement in finalizing the regulations.

The Department anticipates going to a request for proposals procedure for the purchase of these services if House Bill 704 is passed. To accomplish this the Department plans to describe the type of services they wish to purchase in a fiscal year and the approximate number of placements anticipated at each level of care. These requirements would be made known to existing child-care agencies and any other individual or group who may want to develop one or more services the Department wishes to purchase. Proposals would come to the Department for review with contracts subsequently being neogitated for the required services. We hope to create a truly competitive atmosphere in which to negotiate for the purchase of services. Contracting should serve to provide adequate incentives to contain expenditures at reasonable levels.

The Department supports the modification of the full cost of care statutes to permit purchase of care through contracting and through a specialized foster care program. The Bill would give the Department maximum flexibility in purchasing adequate services for children under the state's care at the lowest possible cost.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A. Assumptions:

Program costs will continue to rise due to inflationary pressures. The existing statute covering the purchase of institutional juvenile care is significantly vague as to what is "full cost," and contains no incentive for efficient management practices by the providers of service. Through a statutory change, it is assumed that the individual contracts negotiated will be very specific regarding budget line items for which the Department will pay. Through this mechanism, it is envisioned that, through contracting for institutional juvenile care, the Department will be able to slow the exponential growth of program costs.

A highly qualified contract negotiator position is necessary to take on this activity. The incumbent will be responsible for negotiating all of the necessary contracts with child care provider agencies, develop annual departmental budget projections for private institutional child care services, develop and recommend

33-001 (Rev. 12/79)
Modify by DHSS (11-28-79)

Approval DHSS Mgt. & Bdgt: _____ Date _____

regulations to implement the statutory changes, act as liasion between the provider agencies and the department, etc. A Senior Negotiator is recommended (range 21) at an estimated annual cost of $47,000:

Personnel Services	$39,600
Travel	3,000
Contractual	3,000
Commodities	400
Equipment	1,000

It is assumed there will be a cost savings achieved through the proposed legislative action. The Department of Health & Social Services would be able to contract for the specific number of private institutional beds considered necessary to meet the Departmental needs for these services. Over the past several years the private child care agencies have, collectively, been operating at 70% to 75% of licensed capacity. The methodology given in AS 47.40.040 for rate computation allows for reimbursement of the vacant beds by dividing actual costs for a fiscal year by the bed utilization during the same period. The contracting option will permit the Department to limit the number of beds to a more satisfactory ratio of full to empty beds resulting in a cost savings. The magnitude of the savings is impossible to estimate at this time although it should exceed the costs related to the contract negotiator position requested ($47,000).

Another advantage for the Department will be the ability to request the type of program(s) needed rather than having to take the program(s) offered by the provider. Through the contract procedures, the Request for Proposal can clearly delineate what services the Department wishes to purchase in the various geographical areas of the state.

Both the Division of Corrections and the Division of Social Services have instituted revised procedures to assure that juveniles are placed in appropriate programs at the lowest level of care necessary to meet the needs of the child. This has resulted in a reduced need for private institutional care for juveniles placed by the Department. This program change, however, makes it extremely hard to forecast the savings potential with the enactment of this legislation.

B. Estimated Savings:

Since the economy of the nation is in a period of spiralling inflation, the major savings resultant from this bill will be to curb the quantum jumps in the departments annual budget request for institutional child care services. There are a number of inter-retating variables (case load size, individuals specific program need, geographical area of placement, etc.). Without experience in contrasting or knowing the value of the variables, the Department cannot estimate an estimated savings. However, by contracting for a number of beds more reasonable to the actual caseload enactment of this legislation would have the effect of slowing dow the exponential growth of the expenditures for institutional child care services.

REPORT
ON
SPECIALIZED FOSTER CARE

The original plan for FY80 was to recruit, train, and use for placement, 20 specialized foster homes, by September 1, 1979. Since a statutory amendment is necessary in order to include salary costs for specialized foster homes, the placement phase of this program has not been implemented.

The initial recruitment phase was completed, and between September 1, 1979 and March 1, 1980, a specific training program was developed for specialized foster care and twenty-two parents have completed the training program. Another training session scheduled for June, 1980 will prepare 20 additional parents for specialized foster care providing enough homes to allow for the "best possible placement' for every child.

Specialized foster parents (one parent in a home will be identified as the specialized parent) will receive a salary of $700/month, which will be in addititon to the foster home maintenance rate. The average FY 1980 average institutional group home cost rate is $60/day. The daily cost of specialized foster care would be $35/day, (including both salary and foster home maintenance).

Requirements of Specialized Foster Parents

1) One parent must not work outside of the home in order to be available to provide appropriate intensive specialized care to the child.

2) The parent who will not work outside of the home must have five years experience in working with children. This experience can include:

   a) experience as a foster parent
   b) experience as a social worker
   c) experience in a child oriented work setting.

(Experience as a biological parent of an adolescent may be counted for one year of experience. A Bachelor's degree with specific course work in counseling, clinical psychology, or child development, or a graduate degree in ial work or a related field may be counted for two years of required erience).

3) Specialized foster parents must also have:

   a) the ability to work with children in a therapeutic way.
   b) the ability to work with the biological parent of a child in a therapeutic way.
   c) the ability to accept and work with a child with emotional and behavioral problems.

d) the ability to work with an older child
e) the ability to accept a child who has been raised in a different philosophical environment.
f) a stable family life.
g) must meet all of requirements for regular foster home licensing
h) may have to provide additional references beyond the number required for regular foster home licensing.

Criteria for Selection of Children:

1) The child should be one, who without this program, would require institutional or group home placement due to emotional or behavioral problems.

2) The child should be within the age range of 8-18 years.

3) The child, with intensive supervision, should be able to function and have his/her needs met in a community setting.

HB
720

northern alaska health resources association, inc.

April 11, 1980

The Honorable Thelma Buchholdt, Chairman
House HESS Committee
Pouch V
Juneau, AK 99811

Dear Representative Buchholdt:

On behalf of the Northern Alaska Health Resources Association (NAHRA), I am writing to urge you to oppose HB 720, which would establish a single advisory board for DHSS.

NAHRA, the Division of State Health Planning and Development, and the Statewide Health Coordinating Council exist in accordance with P.L. 93-641, as amended by P.L. 96-79. That law mandates the establishment of the Statewide Health Coordinating Council (SHCC) which serves as an advisory body to the Division of State Health Planning and Development of DHSS. Any state which does not have a SHCC is subject to the revocation of all federal health care dollars, including grants, contracts, Medicare, and Medicaid.

Federal requirements for many other health-related grants also mandate the existence of categorial advisory bodies. Mental health and alcoholism programs are examples.

In light of the tremendous financial sanctions associated with abolition of existing advisory boards and creation of a single board, not to mention the harm to the general welfare of the people which could result from the closure of health services and facilities, I feel it is incumbent upon the elected representatives of the state to prevent enactment of HB 720.

Please let us know your position on HB 720.

Sincerely,

J.B. Carnahan
President

JBC/SEM/rlw

Southern Region
EMERGENCY
Medical Services Council, Inc.

February 27, 1980

Thelma Buckholdt
Chairperson
House HESS Committee
Pouch V
Juneau, Alaska
99811

Dear Representative Buckholdt:

The Southern Region Emergency Medical Services Council (SREMSC) is a nonprofit corporation dedicated to improving emergency medical care in Southcentral and Western Alaska. The SREMSC represents almost two-thirds of the State's population and has been very active in obtaining improved services for these people.

During the past years we have had numerous opportunities to work with the Advisory Council on Emergency Medical Services (ACEMS). The ACEMS consists of eleven professional medical providers and consumers of emergency medical care who were selected for their knowledge of medical services or their desire to perfect outstanding emergency care system in Alaska. These volunteers serve without pay and provide a state-wide forum for the discussion of critical EMS problems. An emergency medical system is an extremely complex endeavor which requires understanding of such diverse fields as; communications, transportation, medical facilities, public safety, disaster coordination, etc. The members of the ACEMS have spent years evaluating these various technical fields and are now recognized as experts.

The publics' desire to participate in emergency medical development was obvious when over sixty people were nominated to fill the initial eleven vacancies on the ACEMS. There has been a continuous waiting list of people desiring to participate as ACEMS members. This is the one opportunity that the general citizen has to help make a better emergency care system and assist in the saving of human life.

HB 720 "An Act establishing a single advisory board for the Department of Health and Social Services and abolishing existing advisory boards to the department; and providing for an effective date." envisions a single board to advise the Commissioner of Health and Social Services on all health and social matters. We believe that it is impossible for a solitary board to become competent in all phases of health and social affairs. A single specialty, such as emergency medicine, requires a significant dedication of time and effort to achieve reasonable results. The Bill provides for a subcommittee of three people to advise on all matters relating to the Division of Public Health. Since EMS is only one segment of public health, it is

obvious that this subcommittee would not be able to devote sufficient time or effort to the improvement of emergency medicine. We feel this would rob the public of their desire to influence the EMS program and would seriously detract from the development of the system.

The members of the Southern Region EMS Council believe that HB 720 is not a good piece of legislation and should not be passed by the House HESS Committee. The ACMES is serving a very useful purpose and should continue to act in its present role and be given even more authority, if that is possible.

Mr. Richard Pauley, our Executive Administrator, will be in Juneau on March 3rd and 4th, and I would like very much for you to meet with him concerning this critical problem.

Thank you for your kind consideration.

Sincerely,

Gary E. Hessmer,
President

MATANUSKA-SUSITNA BOROUGH
EMERGENCY MEDICAL SERVICES BOARD

RESOLUTION SERIAL NO. 80-1

A RESOLUTION OF THE MATANUSKA-SUSITNA BOROUGH EMERGENCY MEDICAL SERVICES BOARD OPPOSING HOUSE BILL 720.

WHEREAS, House Bill 720 proposes to combine the nine different advisory councils within the Department of Health, Education and Social Services into one 25-member advisory council and provide for sub-committees of the central council; and

WHEREAS, passage of House Bill 720 would result in the ADVISORY COUNCIL ON EMERGENCY MEDICAL SERVICES being eliminated and a sub-committee under the heading of "Public Health" would deal with the planning and implementation of a statewide emergency medical service system along with the other aspects of public health; and

WHEREAS, the Matanuska-Susitna Borough Emergency Medical Services Board feels that this would limit regional emergency medical services' in-put into State government and that the importance of the service, the specialized training required and liability issues involved warrant a special council to deal specifically with emergency medical services.

NOW THEREFORE, BE IT RESOLVED, that the Matanuska-Susitna Borough Emergency Medical Services Board urges the State Legislature to consider the specialized field of emergency medical services in reviewing and voting upon House Bill 720.

PASSED AND APPROVED by the Matanuska-Susitna Borough Emergency Medical Services Board this 27th day of February, 1980.

Gary E. Hessmer, Chairman

ATTEST:

Kim Kalmbach, Clerk

HB

751

February 28, 1980

Members of the House HESS Committee
P.O. Pouch V
Juneau, Alaska 99811

Dear Representatives:

This letter is in response to House Bill No. 751.

I am currently a member of the UAA Faculty, have been involved in Nursing education in Alaska since 1974 and have approximately eleven years of experience in teaching in University settings.

I do not believe that policies regulating the "outside activities"of University faculty are excessively restrictive NOR do they constitute a danger to personal freedom. Within any academic community the potential exists for utilizing a faculty status to further individual gain at the expense of the primary mission of the University or that extends the University reputation, responsibility and liability into activity areas over which it has no control. This risk is even more serious when the University is tax supported. It can be difficult for the public or for faculty to define the limits of "ones own time," in relation to a faculty position. Because of this there can be problems relating to:

(1) The public not recognizing an "outside activity" as being separate from a faculty activity.
(2) The public may accept an individual's personal representation as being supported and sanctioned by the University.
(3) Faculty have numerous opportunities to utilize a position to establish contacts and credibility for personal gain in "outside activities."
(4) Faculty could receive double reimbursement for a singular activity.
(5) Faculty could engage in "outside activities" which have the potential of weakening or reducing credibility of academic programs.

On the surface no one would be in favor of having his personal choices or freedoms infringed upon. In reality most people recognize and accept responsible and necessary limits in the expression of personal freedom. Within a University system these limits can best be interpreted by acknowledged academic colleagues who provide program leadership and are responsible for program quality and integrity. This is where responsibility is placed by current Regent policies relating to the establishment of faculty workloads and approval of outside activities.

I would urge that you consider the potential risks to the public and to the University community inherent in the proposed bill.

Sincerely,

Betty L. Hodo

Chapter VIII

GENERAL INFORMATION

Outside Activities 04.08.03

A. Scope

1. Teaching, research, application of research findings, preparation and publication of articles and books (whether for royalty or not), preparation and delivery of lectures, serving on advisory bodies, memberships and activities in professional societies, participation in artistic performances or activities, when said activities are related to staff members' professional fields and no compensation or honorarium (other than royalties from publication) is received, are considered to be within the regular work duties of University employees.

   Examples of activities considered to be outside the regular work or duties are: consulting for or providing other services to individuals or firms, serving on boards of directors, or as officers of business organizations, and engaging in commercial operations and practice except as noted above.

2. Outside activities may be of one-time nature, intermittent or occasional, or regularly recurring. They may involve little or considerable amounts of compensation.

3. For purposes of this regulation "employee" is intended to include all personnel of the University, including both staff and faculty enrolled on the University payroll records and receiving compensation from the University of Alaska (no matter what the basic fund source) for the performance of regular staff or academic duties. It includes part-time as well as full-time employees. Nothing contained herein shall be considered applicable to any outside activities of employees during the period of time for which they are not compensated as University employees, except insofar as the use of University name, property, equipment, etc., is concerned.

B. Conduct of Outside Activities

1. Prior to engaging in any outside activity, as defined herein, the employee concerned shall secure approval of his/her immediate supervisor. Department heads, deans, and directors or equivalent level are designated as

representatives of the University to grant such approval for employees under their jurisdiction. If the approval is denied, the individual shall have the right to appeal the decision as set forth below.

(a) In making these determinations the chief consideration shall be whether the employee's current or proposed outside activities, taken individually or cumulatively, would substantially interfere with the performance of his/her regular duties. The fact that the outside activity involved compensation or the amount of such compensation will not be a reason for a refusal.

(b) In some cases the outside activity of an employee may be in the interest of the University or contribute to a significant enhancement of the employee's professional standing or competence, even though engaging in the outside activity would substantially interfere with the employee's performance of his/her regular duties. In such cases the University may, upon consideration, determine that a re-allocation of the employee's duties is justified. Heads of departments and offices should process such cases through regular channels for approval.

2. Review

Heads of offices, departments, deans, and other supervisors may, from time to time, review a case if, in their judgment, reasonable evidence suggests that:

(a) The outside activity or activities, individually or cumulatively constitutes in fact a substantial interference with the satisfactory accomplishment of the employee's regular University duties, or

(b) The employee may otherwise be violating the provisions of this policy.

3. Community, State and Governmental Service

Community, state and governmental service is encouraged by the University as a function of citizenship, provided it does not constitute deterimental interference with the employee's discharge of his/her regular work duties. If community, state or governmental service duties, whether compensated or not, in fact substantially interfere with the employee's discharge of his/her regular work duties, then it becomes an outside activity.

4. Use of the University Name

(a) In conducting outside activities for compensation, the employee will make it clear to his/her employers or associates that he/she is serving in an individual

capacity and that the University accepts no responsibility in connection with the outside activities.

(b) Official stationery of the University will not be used in connection with consultant's reports, bills for services or correspondence relating to the fulfillment of the staff member's performance of the outside activity.

(c) Employees whose names are included in commercial listings or other public documents, the purpose of which is to draw attention to the employee's availability for compensated services, will not list University buildings as an address, or list a University telephone number.

5. Purchase Through the University for Private Purposes

Individuals are not permitted to purchase supplies or equipment for personal use through institutional channels.

6. Use of University Property, Equipment, Facilities, or Services

The use of University property, equipment, facilities, or services by employees for purposes not directly related to their University duties is prohibited. Exception will be made for the use of specialized equipment not available to industry or individuals through any private source within the state for which a pre-determined fee or rate has been established. The individual staff member may use such equipment on the same basis as other members of the public. (05-18-79)

Patents 04.08.04

The President shall appoint a Patent Committee of at least five members, a majority of whom shall be from the teaching and/or research faculty of the University. This Committee shall advise the President in the administration of the patent policy. However, at his/her discretion, the President may assign this function to some other established committee having membership requirements specified for the Patent Committee.

The agreement which it is recommended that the University make with Research Corporation should provide that a staff member of the University may agree to assign an invention to Research Corporation, with the understanding that Research Corporation, if it accepts the assignment, is to carry out the patenting and commercialization of the invention without any expense to the inventor; that Research Corporation is to pay the inventor a share

Nurses Open First-Of-Its-Kind Office Here

By GAYLE WALKER
Times Staff Writer

Eight independent generalist nurses, basing their practice on the care theory of internationally known nurse Lucille Kinlein, have opened in Anchorage office of professional nursing.

Founders of the first-of-its-kind practice in Alaska are Mary Bolin, Joanne Gladden, Patricia Miller, Charles Morel, Mona Ravin, Patricia Steige, Patti Stepp and Linda Waggoner.

Each is a registered nurse and each has a master's degree in nursing care. They are all working in other fields of nursing in the community, as well.

Lucille Kinlein, who has given classes in Anchorage during her travels across the world, teaches a theory which incorporates the client's body, mind and soul in dealing with illness, the nurses explain.

Ms. Bolin gave a working definition of their practice as "assisting our clients in the exercise of self care in regard to living."

In stating that her group was in no way competing with physicians, Ms. Ravin offered the differences between medical and nurse practices: "Nursing is the maintenance of health and the prevention of disease. Medicine is the diagnosis and treatment of disease."

"When medical care is needed the client goes on to his or her physician with his own (the client's) better knowledge of anatomy and the physiology of his own body," Ms. Ravin says. "The client is a more sophisticated consumer of medical care."

The nurses do not treat diseases, she explains. They can tell a client what to expect of non-treatment, leaving the responsibility with the client to seek care or not — and to accept the consequences of either action, Ms. Ravin says.

"A lot of our clients come to us because they're not sure if they need to go to a physician," said Ms. Waggoner. She added that if a person shows a need for medical attention the patient would be directed to a physician more knowledgeable about needed treatment.

The nurses share their books with clients and refer them to the health science library.

"A doctor gives his diagnosis and prescribes treatment. He doesn't help with the rest of the patient's life. Sometimes not all of their questions are answered about the disease. We help our clients explore their disease and see how it may relate to their life and family decisions," said Morel.

He went on to say, "Several people come to me saying, 'I'm not really sick, but I don't particularly feel good about me.'

"Health doesn't just mean the absence of illness. A healthy person feels good about himself and is able to express his emotions."

"We deal with the total person — their physical, mental, personal and spiritual aspects. We help them discover the self-care assets within themselves to enable them to take care of themselves," said Ms. Ravin.

"People really don't trust their own judgment," said Ms. Waggoner. "Maybe it's because they don't have as much knowledge as they did 100 years ago. I really wouldn't want to see us back with the old home treatments, but I do want to work at helping people to gain confidence in their own care."

"If you have the knowledge, you're really the one to make your own health care decisions. After all, who knows your body better than you?" added Ms. Ravin.

The nurses all agreed that Americans have fallen into a false security about their yearly physical exams. "Women and men should be examining their breasts at least once a month," said Ms. Ravin. "They need to be familiar with their own contours, with their own normal lumps and bumps. When you know about your body you are reassured of your good health."

The professional nurses do physical exams and lab work from their offices. "We never do a physical because we feel our clients need one. They only reason we have (to do a physical) is if the client requests one," said Ms. Bolin.

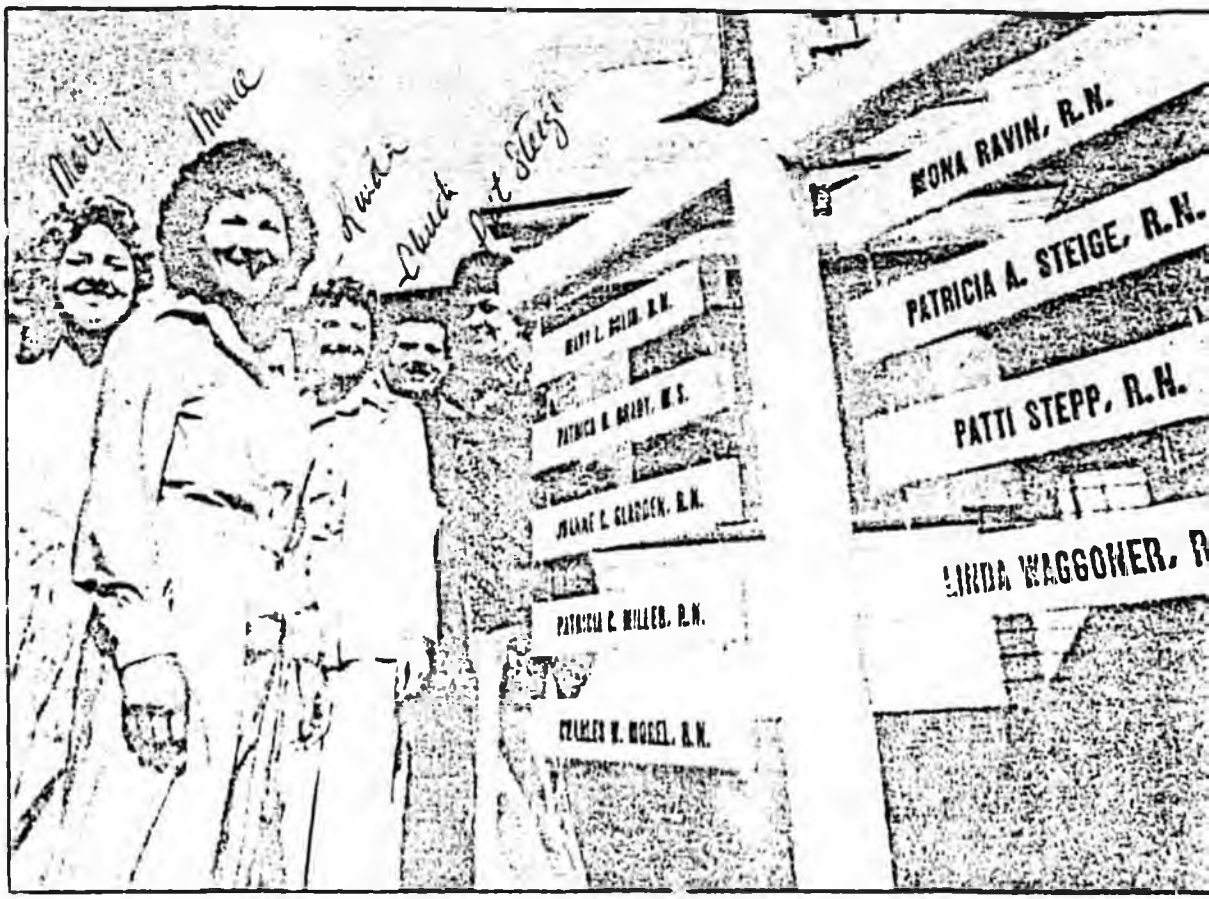
"In all our lab work, we share the results with the patients. It's their property and they have a right to see and understand the results," they concurred.

The practice is based upon client orientation. "This is a very person-enhancing practice," said Ms. "The client is in total contr won't tell them, 'This is wrong with you and this is wh need to do about it.' Instead w several alternatives from whi client is free to pick and which to try."

The nurses help their "take small steps toward get control of their lives," accor Ms. Ravin. "If you work or people come to you with, late may be free to deal with what be their obvious problem, added.

Morel said most commen receive from clients go som like this: "I really feel gooc this. I've never gotten this care from anyone else." He ac guess they see that we are concerned about them.

"All I can say is that it feel to be practicing in a way tha natural and satisfying to m said.



SHINGLES TELL OF NEW ENTERPRISE

Standing in front of their new offices at 327 L St. are some of the independent generalist nurses who follow the health theories of Lucille Kinlein. Eight nurses and geneticist Patrick Bradv share the offices. All with mas er's degrees, the nurses include Mona Ravi foreground, Mary Bolin, Linda Waggone Charles Morel and Pat Steige.
Patti Miller missing from this pictu

Nursing the body, mind and soul

by Annabel Lund

Lucille Kinlein, labeled by the medical profession and the media as a pioneer, revolutionary, and prophet, will be in Homer for two days next week to discuss her radical Kinlein Theory of Nursing with the community. It is a theory so new and so important that her lectures go far beyond an interest confined to the medical care personnel in Homer. Anyone who has ever been to a doctor anywhere will find her ideas exciting stimulation.

Author, teacher, nurse, she is the first registered nurse in history to set up her own independent professional nursing practice, eight years ago.

"When I went into nursing," she said, "I knew I wanted to become a professional, make my own judgments, initiate action, and work with the person I was caring for. Of course, in the traditional setting, it's impossible and it will continue to be impossible as long as medicine controls the field of nursing. I liked nursing. But I went into this field thinking it was a profession in and of itself. If you're in a profession, you've got to be able to stand alone, independent of any other professional connection."

Can nursing, usually thought of as an adjunct to traditional doctor-oriented medicine, stand on its own, independent of medicine as most think of it?

Kinlein has two extremely 1600 clients, has fostered some thirty other professional nursing offices through the U.S. and was recently featured in a Time Magazine article about the changing roles of nurses in the medical field. She has also written two books, lectured in universities across the country and has received the National League of Nursing's highest award for "her outstanding pioneering contributions to nursing" in 1977.

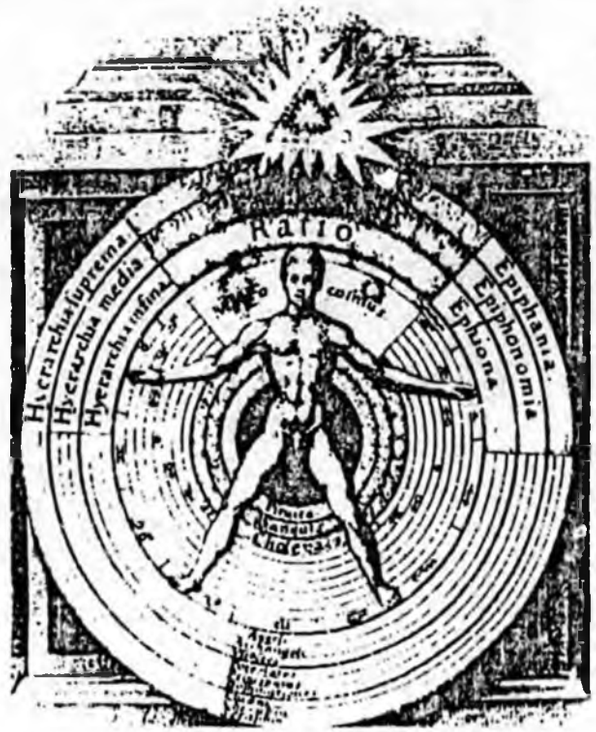
Eight nurses in Anchorage, all RN's with Masters Degrees in Nursing and disciples of Kinlein's theory, have founded a first-of-a-kind Nursing Clinic this year and two local Homer nurses are planning to open their private office here soon.

So what is this radical new theory all about?

Kinlein believes that health is more than an absence of illness. She feels that medicine can be preventative, client-oriented, and that nurses can uniquely help individuals understand, control, and take responsibility for their own health.

"Philosophically speaking," Kinlein says, "the formal object of nursing is the whole person — body, mind and soul."

A Kinlein nurse looks at the client's health from his point of view, helping him to learn about his own self care by helping the client evaluate his own self-care assets. The nurse assists in setting up a program tailored to fit the



Renaissance philosophers such as Robert Fludd visualized the human body as a miniature replica of the universe, a microcosm whose ingredients reproduced and sympathized with the elements of the world at large.

to say, 'I know what's best for you.' The present system fosters dependency and passivity. People want to participate in their own care," Kinlein explains.

"A lot of our clients come to us because they're not sure if they need to go to a physician," said Linda Waggoner, RN in the new Anchorage clinic.

Nurse Mona Ravin, also of the clinic, says "When medical care is needed the client goes on to his or her physician with a better knowledge of the analogue and the cated consumer of medical care.

"A doctor gives his diagnosis and prescribes treatment. He doesn't help with the rest of the patient's life. Sometimes not all of their questions are answered about the disease. WE help our clients explore their disease and see how it may relate to their life and family decisions. In our lab work we share the results with the patient. It's their property and they have the right to see and understand the results," added Charles Morel, a

Kinlein gives physical exams, EKGs, takes blood for lab tests, and offers the unheard-of practice of yesteryear — housecalls.

According to Time Magazine, many doctors admit that up to 80 percent of all office care given by pediatricians and family practitioners could be handled by competent nurses.

Over a hundred nurses nationwide are participating in "learnerships", Kinlein's intensive advanced training courses.

Local nurses and health care authorities participating in Kinlein's workshops in Anchorage and Bethel include Betty Eneboe, Karen Carpenter, Mary Raymond, Lee Daly, Trish Worby, Kathe Gibboney, Mary Kwochka, Janice Todd, Judy Calhoun, Lucia Robinson, and Catherine Stier.

One of the major stumbling blocks for nurses attempting to set up their own practices is money. Nurses average only $13,000 a year in salaries, and the outlay for equipment, office space, and the commitment of time for intensive advanced study is difficult for many health care specialists.

Lucille Kinlein, now in her mid-50s, is a native of Ellicott, Md., where she studied languages to become an interpreter. When World War II broke out, she became a nurse.

She has a bachelors degree in languages from the Col- from the Catholic University of America in Washington D.C.

Her first book, "Independent Nursing Practice with Clients," has become a best seller in the medical profession and her new book, "Kinlein Practice Theory," is slated to hit the market this spring.

In an interview with the Anchorage Times, Ms. Kinlein discusses staying healthy.

"It's important to have a philosophical outlook on life, as a means of keeping body, mind, and soul intact.

"Where you're going in life, your set of values and how you judge your decisions give meaning to your life. Secondly, take care of your body and do not abuse it: eat well, sleep well, have social interactions with people, allow time for solitude, exercise, work and have some diversions and fun.

"All the elements of living come together in a well-integrated person. It's the integrity of the body, mind and soul."

Ms. Kinlein will be speaking in the high school Thursday, Sept. 13, at 7:30 p.m. There is no charge for admittance and the public is urged to attend.

Friday evening there will be "A Chat with Lucille Kinlein" at Mary Raymond's home on Bayview St., at 8 p.m. The public is also invited to attend this informal discussion group.

For more information about Ms. Kinlein's visit,

PART IV

PERSONNEL

Chapter VIII

GENERAL INFORMATION

Outside Activities 04.08.03

A. Scope

1. Teaching, research, application of research findings, preparation and publication of articles and books (whether for royalty or not), preparation and delivery of lectures, serving on advisory bodies, memberships and activities in professional societies, participation in artistic performances or activities, when said activities are related to staff members' professional fields and no compensation or honorarium (other than royalties from publication) is received, are considered to be within the regular work duties of University employees.

   Examples of activities considered to be outside the regular work or duties are: consulting for or providing other services to individuals or firms, serving on boards of directors, or as officers of business organizations, and engaging in commercial operations and practice except as noted above.

2. Outside activities may be of one-time nature, intermittent or occasional, or regularly recurring. They may involve little or considerable amounts of compensation.

3. For purposes of this regulation "employee" is intended to include all personnel of the University, including both staff and faculty enrolled on the University payroll records and receiving compensation from the University of Alaska (no matter what the basic fund source) for the performance of regular staff or academic duties. It includes part-time as well as full-time employees. Nothing contained herein shall be considered applicable to any outside activities of employees during the period of time for which they are not compensated as University employees, except insofar as the use of University name, property, equipment, etc., is concerned.

B. Conduct of Outside Activities

1. Prior to engaging in any outside activity, as defined herein, the employee concerned shall secure approval of his/her immediate supervisor. Department heads, deans, and directors or equivalent level are designated as

representatives of the University to grant such approval for employees under their jurisdiction. If the approval is denied, the individual shall have the right to appeal the decision as set forth below.

(a) In making these determinations the chief consideration shall be whether the employee's current or proposed outside activities, taken individually or cumulatively, would substantially interfere with the performance of his/her regular duties. The fact that the outside activity involved compensation or the amount of such compensation will not be a reason for a refusal.

(b) In some cases the outside activity of an employee may be in the interest of the University or contribute to a significant enhancement of the employee's professional standing or competence, even though engaging in the outside activity would substantially interfere with the employee's performance of his/her regular duties. In such cases the University may, upon consideration, determine that a re-allocation of the employee's duties is justified. Heads of departments and offices should process such cases through regular channels for approval.

2. Review

Heads of offices, departments, deans, and other supervisors may, from time to time, review a case if, in their judgment, reasonable evidence suggests that:

(a) The outside activity or activities, individually or cumulatively constitutes in fact a substantial interference with the satisfactory accomplishment of the employee's regular University duties, or

(b) The employee may otherwise be violating the provisions of this policy.

3. Community, State and Governmental Service

Community, state and governmental service is encouraged by the University as a function of citizenship, provided it does not constitute deterimental interference with the employee's discharge of his/her regular work duties. If community, state or governmental service duties, whether compensated or not, in fact substantially interfere with the employee's discharge of his/her regular work duties, then it becomes an outside activity.

4. Use of the University Name

(a) In conducting outside activities for compensation, the employee will make it clear to his/her employers or associates that he/she is serving in an individual

capacity and that the University accepts no responsibility in connection with the outside activities.

(b) Official stationery of the University will not be used in connection with consultant's reports, bills for services or correspondence relating to the fulfillment of the staff member's performance of the outside activity.

(c) Employees whose names are included in commercial listings or other public documents, the purpose of which is to draw attention to the employee's availability for compensated services, will not list University buildings as an address, or list a University telephone number.

5. Purchase Through the University for Private Purposes

Individuals are not permitted to purchase supplies or equipment for personal use through institutional channels.

6. Use of University Property, Equipment, Facilities, or Services

The use of University property, equipment, facilities, or services by employees for purposes not directly related to their University duties is prohibited. Exception will be made for the use of specialized equipment not available to industry or individuals through any private source within the state for which a pre-determined fee or rate has been established. The individual staff member may use such equipment on the same basis as other members of the public. (05-18-79)

Patents 04.08.04

The President shall appoint a Patent Committee of at least five members, a majority of whom shall be from the teaching and/or research faculty of the University. This Committee shall advise the President in the administration of the patent policy. However, at his/her discretion, the President may assign this function to some other established committee having membership requirements specified for the Patent Committee.

The agreement which it is recommended that the University make with Research Corporation should provide that a staff member of the University may agree to assign an invention to Research Corporation, with the understanding that Research Corporation, if it accepts the assignment, is to carry out the patenting and commercialization of the invention without any expense to the inventor; that Research Corporation is to pay the inventor a share

Nurses Open First-Of-Its-Kind Office Here

By GAYLE WALKER
Times Staff Writer

Eight independent generalist urses, basing their practice on the are theory of internationally known urse Lucille Kinlein, have opened n Anchorage office of professional ursing.

Founders of the first-of-its-kind ractice in Alaska are Mary Bolin, oanne Gladden, Patricia Miller, harles Morel, Mona Ravin, Patricia eige, Patti Stepp and Linda Wagoner.

Each is a registered nurse and ach has a master's degree in nursg care. They are all working in her fields of nursing in the commuty, as well.

Lucille Kinlein, who has given asses in Anchorage during her tra-els across the world, teaches a heory which incorporates the cli-t's body, mind and soul in dealing ith illness, the nurses explain.

Ms. Bolin gave a working definion of their practice as "assisting ur clients in the exercise of self are in regard to living."

In stating that her group was in o way competing with physicians, ls. Ravin offered the differences etween medical and nurse pracces: "Nursing is the maintenance health and the prevention of disase. Medicine is the diagnosis and reatment of disease."

"When medical care is needed he client goes on to his or her physician with his own (the client's) better knowledge of anatomy and the hysiology of his own body," Ms. avin says. "The client is a more sohisticated consumer of medical are."

The nurses do not treat diseases, he explains. They can tell a client hat to expect of non-treatment, eaving the responsibility with the lient to seek care or not — and to ccept the consequences of either ction, Ms. Ravin says.

"A lot of our clients come to us ecause they're not sure if they need o go to a physician," said Ms. Waggoner. She added that if a person hows a need for medical attention he patient would be directed to a hysician more knowledgeable about eeded treatment.

The nurses share their books with lients and refer to the health cience library.

"A doctor his diagnosis and rescribes treatment. He doesn't elp with the rest of the patient's fe. Sometimes not all of their ques-ions are answered about the dis-ase. We help our clients explore their disease and see how it may relate to their life and family decisions," said Morel.

He went on to say, "Several people come to me saying, 'I'm not really sick, but I don't particularly feel good about me.'

"Health doesn't just mean the absence of illness. A healthy person feels good about himself and is able to express his emotions."

"We deal with the total person — their physical, mental, personal and spiritual aspects. We help them discover the self-care assets within themselves to enable them to take care of themselves," said Ms. Ravin.

"People really don't trust their own judgment," said Ms. Waggoner. "Maybe it's because they don't have as much knowledge as they did 100 years ago. I really wouldn't want to see us back with the old home treatments, but I do want to work at helping people to gain confidence in their own care."

"If you have the knowledge, you're really the one to make your own health care decisions. After all, who knows your body better than you?" added Ms. Ravin.

The nurses all agreed that Americans have fallen into a false security about their yearly physical exams. "Women and men should be examining their breasts at least once a month," said Ms. Ravin. "They need to be familiar with their own contours, with their own normal lumps and bumps. When you know about your body you are reassured of your good health."

The professional nurses do physical exams and lab work from their offices. "We never do a physical because we feel our clients need one. They only reason we have (to do a physical) is if the client requests one," said Ms. Bolin.

"In all our lab work, we share the results with the patients. It's their property and they have a right to see and understand the results," they concurred.

The practice is based upon client orientation. "This is a very person-enhancing practice," said Ms. "The client is in total contr won't tell them, 'This is wrong with you and this is wh need to do about it.' Instead w several alternatives from whi client is free to pick and which to try."

The nurses help their "take small steps toward get control of their lives," accord Ms. Ravin. "If you work on people come to you with, late may be free to deal with what be their obvious problem, added.

Morel said most comment receive from clients go son like this: "I really feel this. I've never gotten this cure from anyone else." He ac guess they see that we are concerned about them.

"All I can say is that it feel to be practicing in a way tha natural and satisfying to m said.

FOREWORD

The University of Alaska's mission to the people of the State of Alaska is described in this policy document. Each of the constituent institutions making up the University has its own special mission statement. The University of Alaska mission statement serves as the fundamental planning document for the future development of higher education in the State.

Within the general framework of the mission statements each institution making up the University of Alaska will develop goals and objectives that will further its special academic mission. Each of the institutions has a broad but carefully described responsibility within which it can enthusiastically develop its future and its own special identity.

Like all policy statements, this statement should be regarded as a living document and, as such, be subject to evolutionary change. When it is clear that modification of a University mission or an assignment of institutional responsibilities will render more effective service to citizens of the State, a recommendation for change will be considered by the Board of Regents.

Edward B. Rasmuson, President
University of Alaska Board of Regents
January 25, 1980

THE UNIVERSITY OF ALASKA

The University of Alaska founded in 1917 by an Act of Congress was affirmed in 1959 "as the State University of Alaska" in the Constitution of the new State of Alaska. It is the State's only comprehensive university. Through its many campuses, research institutes, experiment stations, rural education centers, and by means of a wide range of certificate, associate, baccalaureate, professional and graduate degree programs, research and public service activities, the University serves the educational needs of the people of Alaska.

The establishment of the University of Alaska as a land-grant institution to, in the words of the Morrill Act, promote the "agricultural and mechanic arts" places the University of Alaska squarely in the mainstream of public education in the United States. The University of Alaska takes its place among the great universities of America that have learned how to bring together instruction, research, and extension activities for the development of the potential of individual citizens and for the economic development of the resources of the states.

The University of Alaska as a participant in the land-grant tradition accepts as its mission the offering

of appropriate instruction of the highest quality to all who have the interest, dedication and ability to learn. A second part of the University of Alaska's mission is to search for truth through basic and applied research. Pushing back the boundaries of the human mind through the generation of new knowledge and the application of this knowledge to the resolution of problems of concern to the peoples of Alaska is a basic and abiding responsibility of the University. Finally, the University accepts as its mission the extension of its resources and the transmission and application of its research beyond the boundaries of the classroom and laboratory to the citizens of the State. The University accepts responsibility to aid in the development of Alaskan agriculture, forestry, fisheries, business and industry, and the professions as well as to enrich the artistic and cultural life of the State.

In accepting its mission, the University has adopted the multiple goals of accessibility, excellence and accountability.

Accessibility. The University is dedicated to the goal of providing postsecondary education to all the citizens of Alaska who possess the ability and the motivation to benefit from higher education. Educational opportunities to be accessible, must be affordable, conveniently located and

non-discriminatory. In Alaska, special efforts must be made to resolve the continuing access problems of rural Alaskans and especially of Alaska's Native peoples. The University recognizes that the barriers to higher education experienced by Native students are not entirely external but may result from previous educational experience and background. It is the responsibility of the University to reduce both the external and the internal barriers to higher education.

Excellence. Excellence can be judged by the qualities of students, faculty, administration, facilities and the educational environment. It can be defined in terms of the excellence of degree programs and research and public service activities. It is reflected in the career and life experiences of graduates, and it is related to the University's success in achieving its goals and purposes. Very importantly, excellence is dependent upon the support the University receives from those who finance its activities and benefit from its services. Public support alone cannot assure excellence, but without it, efforts to build excellence will not succeed. Formal program review and quality control are responsibilities of the University.

Accountability. Accountability reflects the concern of the University to respond to the needs of the State and relates to both the setting of priorities among competing

goals and to accomplishing goals as efficiently as quality and service considerations permit. The University holds a public trust to spend public monies wisely and is responsible for establishing strong management, budget and cost control procedures. The University must also provide the broadest possible range of instructional programs, research talents and outreach services to the citizens of the State without needless and costly duplication. All programs offered by the University cannot be made conveniently available to everyone; neither the State nor the University can afford to be all things to all people. However, an efficient and rational allocation of functions and responsibilities to the various institutions within the University can be made so that they can, collectively, meet the needs for public higher education in the State. Such a system, made up of institutional components, each with optimum missions, will not eliminate all duplication, but should eliminate destructive competition. Some degree of duplication, however, is a necessary consequence of providing for the personal, social and intellectual development of students and of meeting the goals of accessibility and equal opportunity.

INSTITUTIONAL ROLE AND SPECIAL MISSION DESIGNATIONS

The mission of each institution within the University of Alaska has two principal parts. First, each element

of the University of Alaska shares in the overall purposes and obligations of the entire University and, second, each institution has its own special mission conferring identity and special purpose on that component of the University. The two missions, together, ensure that the University can continue to respond effectively to the needs of Alaska and its citizens and, at the same time, encourage each campus to develop its own character and identity. Institutional diversity and programmatic differentiation are important to the development of the University of Alaska.

The role and special mission of each of the major units of the University are not permanent characterizations. Each will be reviewed periodically by the Office of the President and the Board of Regents and changed as new developments and new circumstances may warrant.

The University of Alaska, Anchorage

The special mission of the University of Alaska, Anchorage is influenced by it location in the state's major center of population. UAA serves students from throughout Alaska but is distinguished by the large number of commuter students, including day and evening part-time enrollees, from the greater Anchorage area.

The programmatic emphasis at UAA is on programs appropriate to its urban environment such as business and public administration, criminal justice, social work, education, engineering, and the health sciences. UAA will have the University's only school of nursing, the only baccalaureate degree program in social work, and the only organized research programs in alcohol and drug addiction and criminal justice. UAA will have the major responsibility within the statewide system for research in the health sciences and will emphasize research in the social sciences.

The development and maintenance of truly excellent baccalaureate degree programs in the liberal arts and sciences is at the heart of the mission of the University of Alaska, Anchorage. Development of graduate programs at UAA will be primarily in those professional and applied fields required to serve the urban needs of Anchorage.

UAA will work cooperatively with the private and public institutions of higher education in its geographic area. The University of Alaska, Anchorage, Alaska Pacific University and Anchorage Community College will continue to develop the Consortium Library to serve the entire Anchorage educational community.

The University of Alaska, Fairbanks

The University of Alaska, Fairbanks, the oldest institution within the University system, serves the State as the University's flagship campus. It is the responsibility of UAF to provide a broad range of baccalaureate and graduate degree programs in the arts and sciences and the professions, including selected doctoral programs.

The University of Alaska, Fairbanks has the University's only agricultural and mineral industry schools. Its School of Education will emphasize the preparation of teachers for rural Alaska. UAF is the University's principal biological and physical science research institution. Its primary emphasis in organized research and in its doctoral degree programs is in disciplines and areas relevant to the high latitude and arctic regions.

The University of Alaska, Juneau

The special mission of the University of Alaska, Juneau reflects its location in the State Capitol. UAJ will provide degree and continuing education programs in public administration and in other areas appropriate to the professional development of governmental employees.

Further, in order to meet the educational needs of the southeastern region of Alaska the University of Alaska, Juneau offers associate and baccalaureate programs in the liberal arts and sciences. The University's strengths in scholarship and research provides support for master's degree programs in education, public administration, business administration and fisheries. UAJ will give, in cooperation with State and Federal agencies and other units within the University, special attention to the development of fisheries research.

The Juneau-Douglas Community College Division of UAJ offers associate degree and certificate programs in technical and vocational fields and programs in developmental education.

UAJ, in addition, cooperates with Sheldon Jackson College and the Sitka and Ketchikan Community colleges in programs especially tailored to the needs of Alaska's southeastern population.

The Community College
Rural Education and Extension Division

The University's Community College, Rural Education and Extension Division consists of the Community Colleges, the Office of Rural Education, the Cooperative Extension Service, and several related instructional and research units.

Each of the University's community colleges will offer academic, vocational, developmental and community service programs to its service area in response to identified educational and vocational needs. The ability of the community colleges to train a highly skilled work force is especially important in Alaska, which imports much of its skilled labor force from outside the State. The community colleges will make every effort to utilize the public and private educational and technical resources available in their service areas, including most notably those in the Native corporations, Sheldon Jackson College, Inupiat University, the Cooperative Extension Service, the public school system and private industry.

While the University's community colleges are empowered to offer only associate degree and certificate programs, the Office of Rural Education is authorized to arrange for one of the University's senior institutions to offer upper division and graduate courses in areas of the State not fully served by a University-level campus. Rural Education also offers lower division courses through its eight learning centers in areas not served by a community college.

The Cooperative Extension Service's primary mission is to provide, in cooperation with State and Federal agencies and other units of the University, a program of outreach designed to bring University of Alaska resources to bear upon the needs and problems of the people and institutions of the State.

University of Alaska Degree Programs

(January 1980)

Note: Decisions authorizing degree programs are made on the basis of sound academic analysis taking the special mission of each institution into account. Questions of need, quality and appropriateness take precedence over questions of quotas or political trade-offs. Just as importantly, decisions regarding the termination of degree programs are taken only after equally careful academic analysis. The University recognizes that maintaining and improving the quality of its academic programs is essential. It is unlikely that it will ever obtain all the resources necessary to support all possible academic programs. Hence, it is necessary to focus the University's resources on areas of greatest need and with the greatest chances of successful contribution to the State of Alaska and its people.

THE UNIVERSITY OF ALASKA INTEGRATED STRATEGIC PLANNING SYSTEM

I. The Planning Concept

The concept of an integrated planning system applied to a university setting reflects a significant departure in both philosophy and procedure from planning efforts normally encountered in service institutions, particularly those in higher education. The concept, for example, does not embrace an effort to develop a "Master Plan." There will be no richly-bound volume of plans and aspirations, produced by a single-effort task force composed of a membership having no direct line responsibility. Other universities admittedly do have these "Master Plans" and, while they usually reflect a prodigious expenditure of effort and expense, they are most easily identifiable for the dust they gather.

Integrated planning at the University of Alaska will advance from another premise, namely, that planning is an intrinsic functional responsibility of management; thus, primary responsibility for planning will reside with the managers of the institution. They will be strongly supported in this activity by a developing institution-wide data base and management information system, advisory councils charged with the examination and conceptualization of our future environment, and planning and review procedures which will lead to resource allocation decisions consistent with the established objectives of the university.

The planning system at the University of Alaska will become part of a management process which focuses on the strategic alternatives open to local units and the state system. It is a management activity which notes that high-level achievement is never possible except against specific, limited, and clearly defined and prioritized targets. The planning system assumes that resources will be allocated and reallocated on that basis.

In common with other effective integrated planning systems, the University of Alaska system will embody five fundamental characteristics:

1) Strategic planning, consistent with well established management theory, will be reinforced as a line-management function. This means that primary responsibility for planning will rest with every manager throughout the system including deans, directors, and chancellors. The line managers, however, will be provided strong staff support from the broadly-based campus and university-wide planning councils, and will receive timely data support from the statewide Office of Institutional Research.

2) The integrated strategic planning system will assist the institution and its managers in making the important and frequently complex decisions. The danger frequently realized with Master Plans and with planning in general, is that the planning effort takes on a life of its own and the planning documents become an end in themselves. At the University of Alaska, planning documentation is designed to identify direction, to clarify strategic choice, and to provide the parameters within which resource allocations within the institution will be made. Managers will know that plans are used and that resource allocations and reallocation through the budget period will be based on their goals and the goals of the system, and on priorities which have been established for each budget period.

Planning at the University of Alaska will be a data-based management system which will place a premium on creativity and innovation, but which will require accountability through a scheduled review process - of plans, objectives, priorities, and even of underlying assumptions. This review will take place at both campus (MAU) and system levels, utilizing current hierarchical relationships.

While it requires line management to plan, it is a participatory management planning system on the premise that planning which has the greatest participation of the persons who will have to carry out its results will have a greater probability of success than a system which is not attended to by those who will have to implement it. Since all managers are charged with planning, first tier involvement is assured; however, inasmuch as this is an integrated (finance, facilities, and program), planning system, there must be a process by which persons other than managers can be involved, including faculty, support services, and the student body. Substantive participation in the planning process for these groups will occur through membership on the planning councils. The planning councils will be given the task of providing a forecast of the relevant external conditions which will dominate over the planning period. The councils will identify these areas of impace on the university and will provide an operational description of that environment in terms of "planning assumptions." These assumptions will then become the parameters within which objectives are established and plans are conceived.

3) The integrated planning system becomes the process by which line managers work together in resolving strategic issues of importance for the entire system. The University of Alaska planning system will emerge as an integrated decision system owing not only to the integration of finance, facilities, and program decisions in the planning phase, but perhaps just as importantly, to the team approach in the reivew of unit and campus (MAU) objectives, priorities, and plans.

It is anticipated that the process of coming-together, particularly at the level of chancellor, will enhance any institution-wide activity which requires substantial amounts of coordination in order to be successful. Such is the nature of planning.

4) The strategic planning system is unique to the organizational environment in which it resides. It is generally accepted that the overriding design rule is that there is no general design. There are models, however, both corporate and academic, that can be modified to fit a particular environment.

The unique thrust of the University of Alaska effort is that the planning system will reflect a logical methodology for resource allocation contained within the routine of internal management activity. Management at the University of Alaska will tend to become more forward-looking throughout the system. As planning is made part of a manager's routine, deadlines for thinking about and describing the future become just as important as deadlines for preparing reports about the past.

5) An effective strategic planning system changes continually. One reason, of course, is that the university's internal condition is changing as a result of changes in the external environment. In addition, the design and implementation of this system reflects a significant departure from past practice which suggests that some results will be totally unanticipated and which will argue for modification in the system. Even those planning systems long established in relatively stable organizations require constant modification; thus, the University of Alaska procedures, structure, and documentation of planning will not be carved in granite, rather they will be constantly refined as the planning activity matures. Further, strategic planning systems are considered a major tool for improving the sophistication of managers, a never completed task, but one which requires a developing system to better accommodate improvements in data base, management information systems, and management techniques themselves. Finally, the short time frame for implementation of planning as a prelude to budget construction suggests that some dimension of the planning system which contemplates an 18-21 month long sequence, will not be made operational this cycle.

II. Planning Structure

The formal organization of the planning structure is contained on the chart attached (Appendix A).

There are four organization units created to facilitate the planning process:

A) University Planning Council
B) Campus (MAU) Level Planning Council
C) University Policy and Budget Team
D) Campus (MAU) Policy and Budget Team.

The primary function of the planning councils, as previously described, will be to identify the basic assumptions upon which planning will be based over some precise planning period. These assumptions will normally include such areas as program emphases during planning periods, sources of financial support, and student enrollment projections, as well as broader areas of concern including legislation, economics, and social, cultural, and technological trends. These councils will function at both the MAU and university levels, are composed of a broad cross-section of university staff personnel, are advisory in nature, and will serve to assist line management in its planning function.

The other basic organization form is the Policy and Budget Team, also organized at both MAU and university levels. At the campus level it may already exist in the form of an administrative council; at the university level it is composed of the four chancellors and executive staff of the university. These two units constitute a decision-making dimension of the planning activity and it is these teams which carry out the annual review, first of the deans and directors, and then of the individual MAU plans and budget. This activity occurs once a year as an allocation process and then constantly throughout the year as a reallocation function.

While not mentioned above, it is nonetheless important to stress the planning activity which will occur at the level of each individual dean or director and which may involve department heads and others in the formulation of goals and objectives, priorities and specific budgetary requests - all as part of the planning process. The sum of that effort will constitute the agenda of formal review in conference with the Policy and Budget Teams. Campus plans will be carefully conceived; resource allocations and reallocations which grow out of that planning activity will come to constitute an effective and dynamic strategic management system.

From: Alaska Municipal League

Re: HB 752 - Cultural Facilities Fund

The Alaska Municipal League supports HB 752. Part I of the 1980 Policy Statement which was adopted by the delegates at the last annual local government conference, reads as follows:

"H. Cultural, Civic and Convention Centers and Museums

While legislation has been enacted into law to enable the state to assist local communities in the construction, maintenance and operation of cultural, civic, convention and community recreation centers, only minimal funding has been available for this purpose. The League, therefore, urges the Legislature to authorize the issuance of bonds for this or any similar legislation in an amount sufficient to meet the construction requirements in Alaska communities."

The AML's Board of Directors also cited this as one of eleven top priority items when they met in Juneau in January.

Ms. Thelma Buchholdt, Chairman
Health, Education and Social Services Committee
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Ms. Buchholdt:

The community and City of Kenai are supporting House Bill No. 752. The need is here for a cultural facility in Kenai.

The arts are active in Kenai, but we are in need of an adequate communal facility. At the present time, the visual art groups are meeting and working in the old firehall; the concerts are being held in the high school gymnasium; and the museum is housed in a portion of the Senior Citizen's Center.

Under adverse conditions, the performing arts in Kenai rank at the top in the state on a per capita basis with audiences ranging from 300-1300 on backbreaking bleachers.

I ask your support of House Bill No. 752.

Sincerely,

Kathy Settle
Kathy Settle

We the undersigned request your support of House Bill No. 752 which is a Bill for an Act entitled:

"An Act making a special appropriation for the cultural facilities development fund; and providing for an effective date."

Dear Representatives:

My letter to you is in strong support of House Bill No. 752. We, as citizens of Hydaburg, support the act of making a special appropriation for the cultural facilities development; and providing for an effective date.

Hydaburg has applied for funds for a Cultural Facilities Grant. Being that we are the only HAIDA Enity here in Alaska your support on our behalf would be much appreciated. A museum will preserve our hertiage and give us some public place to show-off and store our artifacts.

Once again we are in support of HB 752.

Sincerely,

Blanche Kelley

March 7, 1980

The Honorable Thelma Buchholdt
Chairman of HESS
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt,

The City of Saxman is a native village. Here, the native culture has become almost a memory. With each death of an elder, the lessons of the past move further out of reach of our youth. With each artifact taken out of the community, another symbol which identifies the people with their past disappears.

Without language, custom and symbols, people have no cultural identity. If the stars and stripes were to suddenly disappear with what would America have to remember the past or envision the future. The very structure of civilization mandates sociopoliticoeconomic diversification to insure continued creativity and appropriate progress. Without this, living would be very stale and non-productive.

By supporting the approval of House Bill No. 752, the legislature is supporting a healthy, productive and integral program development which will not only assist native communities in rediscovering their past, but all communities will be provided a basis for combatting the main antagonists that produce cultural anomie, namely, apathy, alcoholism and drug abuse.

The City of Saxman supports House Bill No. 752 and strongly urges its approval and passage, because it will provide a facility, the principal purposes of which is to serve both the visual and per-

forming arts and as the repository of historical and contemporary heritage of the community and its people.

Sincerely,

W. K. Williams

William K. Williams
Mayor of Saxman

March 8, 1980

Dear Thelma,

Hope your Committee will vote for our cultural facilities appropriation.

We've been listening to our concerts on bleacher seats in the high school gym, displaying our art in an old fire hall, and keeping museum artifacts upstairs in the Senior Citizen's Center.

We've needed a civic center here for years. It was voted & approved nine years ago! Now, we're ready with plans, application from the city, land to build it, but not enough money.

Please help us.

Thank you!

Frances M. Jones

CITY OF KENAI

"Oil Capital of Alaska"

P. O. BOX 580 KENAI, ALASKA 99611
TELEPHONE 283 - 7535

March 6, 1980

Thelma Buchholdt, Chairman
Health, Education & Social Services Committee
Representative, Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Representative Buchholdt:

In regard to House Bill No. 752:

Appropriation to the Cultural Facilities Development Fund

Please accept this letter as evidence of our strongest support for favorable passage of the above bill.

Working with the State organization and our local group has produced sufficient evidence that the timing is correct, the need is there and the capability exists to bring Alaska to the forefront of facilities in existence. Such facilities will honor our historic heritage and bring current culture experience to our citizens.

Your most earnest attention is respectfully asked.

Sincerely,

Vincent O'Reilly
Mayor

VOR:jw

cc: Kathy Settle

Box 3797.
Kenai AK 99611
March 6. 1980.

Helma Buchholdt, Chairman.
Health, Education and Social Services Committee.
Alaska Legislature, Juneau, Alaska.

Dear Mrs Buchholdt,

As a member of the Central Peninsula Concert Association, I must urgently request that you support House Bill No 752, which is in your committee.

Kenai has met all the requirements of the Cultural Facilities Development Committee, Inc., and are ready to move forward with the facility, when the funds are appropriated.

The Concert Association would find it easier to schedule cultural activities, having the proper facilities, presently the scheduling has it be made around the local schools use of their facilities, which is far from being adequate and has very poor acoustics.

Thank you,
Sincerely
Constance Jackson
Central Peninsula Concert Assoc.
Board member.

CULTURAL FACILITIES PROGRAM

Goals and Objectives – To develop, strengthen and diversify Alaska's economic base through construction of facilities for cultural uses. Utilize the State's natural resources to benefit the human resources. Stabilize the State's population base by offering the cultural amenities that now are achieved by Alaska residents only through extensive travel out of State. Improvements to Alaska's standard of living and an increase in employment opportunities are corollary objectives.

Strategy – Implement Sec. 43.18.500 – An Act authorizing State matching grants for construction of cultural facilities: 1) adopt regulations; 2) prepare application forms; 3) review recommendations from the Advisory Council on Cultural Facilities; and 4) fund those facilities that have submitted a complete application and have met all the requirements of the Act.

Economic Influence – This unique program achieves, to a very significant extent, Governor Hammond's policy theme No. 4, to encourage economic development which offers long-term net benefits to all Alaskans.

Facilities for cultural uses can be considered an integral part of a community, not only in the terms of its "quality of life," but also in terms of contributing to improvements in the local economy.

The facilities will stimulate a visitor clientele, they will serve as additional attractions to enhance the labor intensive tourism industry. The Alaska tourism industry will benefit substantially as past experiences, such as at Ashland, Oregon, have shown that the impact of cultural activity on tourism is more striking in remote than in cosmopolitan settings.

The funding of cultural facilities, rather than representing an expenditure by the State and Alaska communities, are, in fact, seed money which generates more than its original cost in revenues to the cities.

In Anchorage, for example, the combined expenditures in the arts for salaries, fees, goods, services, related advertising and promotion, and other expenditures will total $2.5 million in 1980. The combined revenues are also projected to exceed $2.5 million according to budget data of the Anchorage Arts Council.

Research conducted by the Special Assistant for Cultural Resources in the U.S. Department of Commerce indicate that, for every one dollar of funds spent for cultural centers, that between three and four dollars are generated for the community, directly and indirectly.

Many Alaska cultural centers will include facilities for the creation and production of hand crafts. A high labor intensive activity, this cottage industry furnishes a primary source of income for more than 1,300 Alaskans and a supplemental income for thousands more. The historical and cultural buildings will serve to enhance and facilitate the creative activities of these craftsmen, plus encourage more unemployed or under-employed Alaskans to become craftsmen and increase their incomes.

Benefits – The vast majority of Alaska residents can benefit directly from this program utilizing partial State funds for cultural centers. Others will benefit when travelling to the regional centers and utilizing the facilities constructed by many of the larger municipalities, e.g., Anchorage intends to construct an elaborate cultural complex under the program. Most rural Alaskans residing in the communities of Western Alaska travel to Anchorage for trade and services offered. They will have the opportunity to benefit from use of the facility, not only in the performing and visual arts, but as a repository of Alaska's historical and contemporary heritage.

Advisory Council on Cultural Facilities – Five members appointed by Governor Hammond on September 27, 1979 are:

Carol A. Derfner, Chairperson
402 W. Third Avenue
Anchorage, Alaska

Jane Stewart, Vice Chairperson
925 Calhoun
Juneau, Alaska

Allan P. Gregg
Box 1078
Wrangell, Alaska

Mary E. Binkley
P.O. Box G
College, Alaska 99708

Lois R. Hermansen
PHS, Kanakanak
Dillingham, Alaska 99576

Responsibilities of the Council – The Council has four responsibilities: (1) establish the criteria for making grants for construction of cultural facilities; (2) advise the Commissioner of Commerce and Economic Development of the priority ranking of the approved requests for financial assistance; (3) provide assistance to municipalities in preparation of a need assessment and review proposals for construction or development of cultural facilities upon request; and (4) submit an annual report to the Commissioner and the Legislature, summarizing activities and expenses of the Council.

Program's Major Deadlines: (FY '80)

1. September 27 – Appointment of Cultural Facilities Advisory Council (CFAC)
2. December 1 – Advise each municipality in Alaska of program.
3. January 30 – Formal adoption of regulations.
4. January 31 – Applications deadline, first cut.
5. February 20 – Recommendations to Commissioner of Commerce by CFAC.
6. April 4 – Public hearings and community facility evaluation.
7. March 31 – Final deadline for 1980 applications.
8. April 20 – Final recommendations to Commissioner of Commerce and Economic Development.

ALASKA CULTURAL FACILITIES PROJECT

As of February 13, 1980, eleven communities have completed the application process. They are listed alphabetically below:

Municipality	Type of Facility	Local Cost	State Cost	Total Cost
DILLINGHAM	Com. Cultural Facility	160,806	3,578,864	3,739,670
HOONAH	Museum	369,000	23,300	392,300
HYDABURG	Cultural Center/Museum	20,000	490,000	510,000
JUNEAU	Performing Arts Center	1,990,070	13,804,140	15,794,210
KETCHIKAN	Cultural Center	724,100	7,266,140	7,990,240
KODIAK	Cultural Center	343,200	6,256,800	6,600,000
METLAKATLA	Performing Arts Center	187,200	1,507,426	1,694,626
PETERSBURG	Fine Arts Center	200,000	5,335,000	5,535,000
SAXMAN	Long House	158,756	1,312,775	1,471,531
SITKA	Intercultural Center	1,318,000	10,524,900	11,842,900
VALDEZ	Com. Auditorium Project	1,750,000	1,750,000	3,500,000

Other applications nearly completed which may arrive within the next week include: (5,477,550.00) (St Emb 5,112,745.00)
ANCHORAGE, KENAI, YAKUTAT and HOMER.

Other communities who have expressed interest in the project or who are now in the pre-application process include:

KLAWOCK, CRAIG, NAKNEK, FAIRBANKS, SKAGWAY, TENAKEE SPRINGS, ALAKANUK and CORDOVA.

December 12, 1979

SUMMARY STATEMENT CULTURAL/CIVIC CENTER FOR KENAI

The need for a Cultural/Civic Center in Kenai has been recognized for many years. A bond issue was passed in 1971 addressing this need, but due to diverse circumstances at City and State levels, funds were never available for this purpose, leaving citizens with a library only.

Needs as presently assessed include:

1. An Auditorium
2. A Museum
3. A Visual Arts Area
4. Meeting Rooms

Present facilities in Kenai are either non-existent or physically inadequate and/or technically outmoded.

Performing Arts

Currently, Kenai Central High School Gymnasium is used for most performing arts presentations, with scheduling a major problem since this facility is used for competitive sports events, practice schedules, and community adult recreation. For performing arts groups, acoustics are inadequate, proper lighting is impossible, and seating for the audience is back-breaking. Performances must be scheduled far in advance, and often require last-minute re-shuffling with on-going school activities. The Little Theatre at the high school accomodates only 140 people, which makes it useless for visiting performing groups, since our audience in attendance is usually in excess of 300 people. Last year, eleven performances were scheduled in the high school gym by Central Peninsula Concert Association, with attendance at one performance exceeding 700 people.

The Kenai Performers have been inactive because of lack of performance art facilities. The Peninsula Dancers continue to present an annual performance in spite of lack of a theatre.

It is planned that a medium-sized theatre with fixed seats for 600 people adjoin a flat-floor "forum" area with telescoping mechanized seat banks capable of holding an additional 400 people. This multi-purpose pavillion could be used for banquets, group conferences, trade shows, art fairs, dinner theatre, and square dancing. A caterer's kitchen enables this area to be used for a variety of public functions, even at the same time the theatre is being used in the adjacent area. A moveable wall unit would close off this multi-purpose area from the auditorium visually as well as acoustically.

The Museum

At the present time, there is no museum in Kenai. Heritage items are on display in the Senior Citizen Center, upstairs in the Old Fort Kenay Building. It is inadequate in size (approximately 700 square feet), is not adequately protected with fire humidity controls and safekeeping of irreplaceable articles is in constant jeopardy. Floor space is so inadequate there that donations of museum pieces and artifacts is impossible at this time, there is simply no place to put them. This make-shift

The Museum (Cont'd)

museum is housed jointly with the Senior Citizen Coordinator, who occupies part of the floor space. It is not accessible by ramp by handicapped persons, although there is a lifter for Senior Citizens to be hoisted from the center below. However, when the downstairs room is closed, an exterior stairway is the only way to reach the upstairs area. Kenai is such a historic place, a museum would offer both residents and visitors alike a glimpse into the past as well as providing a safe place for heritage objects.

Visual Arts

The Kenai Fine Arts Center (the old City Firehall) is presently available for use by cultural groups. Fourteen arts and crafts workshops were held there during the past year, involving both children and adults. A gallery is open throughout the year, but since the gallery space is needed for art classes, this presents the problem of shifting standards, re-hanging pictures, and re-structuring for every activity. However, this is not the major problem, the building is uninsulated and is extremely cold during winter months when it is needed most. The pottery room is also extremely cold, is not equipped with a sink and is not properly vented for firing pottery. In spite of these adverse conditions, there is a waiting list of people in the community who want to take pottery classes.

Benefit to Community

Employment and business opportunities would increase by doubling the potential visitor tourism business and extending the season.

Opportunities to attract plays, concerts, art shows and specific talent to the community would expand.

The economic stimulus due to increased revenues from gatherings such as conventions would help defray maintenance and operation costs of the civic center.

Economic long-term gains would be evidenced if new industries felt that our community was a more desirable place to live, work, and play. Thus, the center would be an investment in the future.

Maintenance and Staffing After Construction

The City intends to appoint a board of trustees from non-profit organizations in the community to name or create a non-profit organization to operate the facility. Revenues from activities will accrue to this non-profit organization to be available for maintenance, staffing and programming costs of the facility.

The City of Kenai accepts the ultimate responsibility of maintaining the facility. Should revenues from activities be insufficient to operate the facility, the City will provide funds as necessary to assure continued operation.

Charles A. Brown, Acting City Manager

February 11, 1980

M-E-M-O-R-A-N-D-U-M

Mayor

TO: KENAI CITY COUNCIL AND CITY DEPARTMENT HEADS

FROM: C. A. Brown, Finance Director

SUBJECT: Civic Center Grant Application and Funding

I request that the above subject be added to the items to be discussed at the January 14, 1980 worksessi n.

We have started on the grant application for this project, and before submitting the application, I want to make Council aware of the funding situation. I have enclosed the tentative grant project budget for review. First, the City's local share should be 6.66%. This is derived from the following formula: per capita value of property in Kenai divided by per capita value of property in the State of Alaska times 10%, or $32,066 ÷ by $48,115 x .10.

Our share of the project, estimated at $364,805, is comprised of $178,000 land value and $186,805 cash. The cash is available in the Civic Center bond fund ($335,500 less $120,000 for Health Center portion of City Hall equals $215,500 available). I have been assured that the $178,000 of land value may be taken as match, even though we intend to lease the land and the $178,000 is included in the total project cost for application of the State's share percentage.

The Council must be aware that:

(1) We will be responsible for cost overruns of construction.

(2) The application calls for hiring a manager.

(3) We will be responsible for operation and maintenance costs.

If you have any questions, please let me know at the February 14, 1980 meeting. Thanks.

CULTURAL FACILITIES PROGRAM
COMMUNITY READINESS FACTORS

A. Community planning and support

1. What method was used to facilitate the community planning input?

☐ Survey questionnaire ☐ Public hearing ☒ Public planning session

☐ Other _____

What percentage of user groups have made a contribution to the planning process ..... 100 %

2. Has your local government body prioritized the cultural facilities in its planning ☒ Yes ☐ No

If so, how is a cultural facility ranked?

☐ Top priority project ☒ In the top 5 projects

☐ In the top 10 projects ☐ Lower than tenth priority

B. Length of planning time

1. When did you begin formal planning for this facility?

☒ Prior to 1974 ☐ 1975 ☐ 1976

☐ 1977 ☐ 1978 ☐ 1979

C. Readiness to build

1. When could you start building?

☐ 1980 ☒ 1981 ☐ 1982 ☐ 1983

☐ 1984 ☐ 1985 ☐ 1986

D. Quality and suitability of facility

1. Was a need assessment study completed for this proposed building? ☐ Yes ☒ No

If yes, please attach a copy. No formal written study

2. Is your proposed building designed for the particular site on which it will be built? ☒ Yes ☐ No

3. Do you have a theater planner approval design? ☐ Yes ☒ No

4. What will be the primary use of this building?

Performing arts, museum, arts gallery. Facility to be used by both local and touring groups.

5. What will be the secondary uses of the building?

Community meeting; draw convention and visitor business to community.

6. What hours of the day will the new or renovated facility be available to theater/museum groups?

Appx. 9:00 am to 12:00 midnight

7. What percentage of the total facility use time will be available to theater/museum groups?

This is top priority. Thus, up to 100% of available time.

E. Maintenance and operating capability

1. Detail as closely as possible how the operating and maintenance expenses will be funded:
For example what portion would be funded through:

46 % General revenue

46% User groups, or other income generated by facility

_____ A special tax

8 % Private donations

_____ _____ Increased property tax

2. Would any of the above actions require a special election? ☐ Yes ☒ No
If yes, explain:

3. Do you have a management plan that includes the hiring of professionally qualified management? ☒ Yes ☐ No

4. Has this plan been approved by your municipal government? ☒ Yes ☐ No If not, explain:

F. Availability of land

1. Has the site for your facility been determined? ☒ Yes ☐ No

2. Who owns the land? ☐ Privately owned ☒ City/Borough ☐ State ☐ Federal — See attached Memo from Finance Director

3. If the land is not owned by the city/borough, will the land be purchased? ☐ Yes ☐ No

Please estimate the cost of such land ..... N/A

G. Alternatives to completion of proposed facility

1. Could existing buildings be redeveloped for use as a cultural facility (Give a brief explanation)

No, none are suitable, both in terms of size and design.

2. Have any cost estimates been made on redeveloping existing building? ☐ Yes ☒ No
If so, please explain:

3. Do you have a historical property or building of historical value which is part of a historical district that could be rehabilitated for use as a cultural facility? ☐ Yes ☒ No
If yes, describe briefly the property or building:

4. Have any cost estimates been made for the rehabilitation of historical property or building? ☐ Yes ☒ No

H. Per capita benefit

1. Per capita benefit of proposed cultural facility

Suggested formula:

$$\frac{\text{Cost of the facility}}{\text{Population of area being served}} = \text{Per capita benefit effectiveness}$$

$$\frac{\text{Cost } \$5,477,550}{\text{Population } 4,436} = \$1,235$$

STATE OF ALASKA
DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT
CULTURAL FACILITIES PROGRAM
EXISTING PERFORMING ARTS FACILITY ADEQUACY DETERMINATION

A. Availability of existing facilities

1. Who owns the facility?
Kenai Peninsula Borough School Dist.

2. List names of user groups
Central Peninsula Concert Association
Peninsula Dancers
Kenai Performers
Redoubt Chamber Orchestra
Community Chorus
Sweet Adelines

3. What hours of the day is the facility (for cultural uses) available to performing groups?
Between school activities and community functions.

4. What proportion of the total facility time is available for cultural uses?
5 percent (approximately once a month)

B. Quality of existing facility

1. Do you have space for cultural uses? ☒ Yes ☐ No

2. Factors to determine adequacy of existing facilities

YES	NO	
☐	☒	Raked auditorium floor
☐	☒	Adequate theater seating
☐	☒	Adequate acoustics
☐	☒	Rehearsal room
☒	☐	A stage
☐	☒	A stage that is at least 40' by 30' in size
☐	☒	A resilient stage floor
☐	☒	Adequate cross-over
☐	☒	Light booth in the rear
☐	☒	Adequacy of fly space
☐	☒	Riggings
☐	☒	Wings
☒	☐	Dressing room(s)
☐	☒	Costume shop
☐	☒	Scenery shop
☐	☒	Storage shop
☐	☒	Dimmer board
☐	☒	Sound System
☐	☒	Loading door on stage level
☒	☐	Adequate voluage (touring groups usually require 200 amps 110 volts A.C.)
☐	☒	Orchestra pit

5. Is the fee schedule a factor in availability? If so, please explain:
No

6. Please describe the quality of existing facility:
The high school gymnasium is unsuitable for performing groups. It must be scheduled months in advance, with conflicts arising with high school sports and other community activities. Bleacher seats are uncomfortable and acoustics totally inadequate.

SEPARATE FORM TO BE COMPLETED FOR EACH FACILITY

STATE OF ALASKA
DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

CULTURAL FACILITIES PROGRAM

EXISTING GALLERY, ~~MUSEUM AND HERITAGE~~ & VISUAL ARTS CENTER ADEQUACY DETERMINATION

A. Availability of existing facilities

1. Who owns the facility?
City of Kenai

2. List names of user groups
Kenai Arts & Humanities Council
Kenai Art Guild
Peninsula Dancers (costume storage)
Peninsula Photographers' Guild
Totem Tracers (Geneology group)
Beta Sigma Phi
Cooperative Extension Service

3. What hours is the facility open to the public?
Summer: Mon.-Sat., 10 a.m. to 4 p.m.
Winter: Thurs.-Sat., 10 a.m. to 4 p.m.

4. What proportion of total facility time is available for museum related activities, e.g., visitation, education programs, workshops, etc.
available to all groups by scheduling in advance.

B. Quality of existing facility

1. Do you have space for facilities for ~~cultural/historic~~ visual arts programs? ☒ Yes ☐ No

2. Factors to determine adequacy of existing facilities.

YES	NO	
☐	☒	Adequate collections and supplies storage space
☐	☒	Adequate permanent and gallery exhibits space
☐	☒	Adequate space for educational programs; e.g., school groups, lectures, films, workshops, etc.
		Adequate security protection for collections, staff and public:
☐	☒	a. Intrusion alarm system
☐	☒	b. Fire suppression system (halon preferred)
☐	☒	c. Facility safe public use
☐	☒	d. Proper exhibition security systems, e.g., locable exhibit cases, system to monitor visitor activities, etc.
		Adequate environmental controls:
☐	☒	a. Temperature and humidity control in facility
☐	☒	b. Control of ultraviolet light
☐	☒	c. Pollution control, e.g., dust and dirt
☐	☒	d. Secure from insect and other pest hazards
☐	☒	Safe area in facility for fumigation of objects
☐	☒	Shop: Exhibits fabrication and graphic arts preparation area
☐	☒	Adequate staff office space
☐	☒	Adequate public reception and gift shop space
☐	☒	Adequate exhibits lighting
☐	☒	Adequate collection storage equipment - i.e., cabinets, shelving, etc.

5. Please describe the quality of existing facility:

The building in use as a visual arts center is the old city fire hall and jail, constructed of cinderblock. It is uninsulated, inadequately heated, poorly lighted and too small in size for annual art exhibits. Wiring is totally inadequate. An added-on pottery room is extremely cold, lacks sufficient wiring for an additional kiln, has no hot water, and is not properly vented for firing pottery.

☐	☒	Adequate collection storage equipment - i.e., cabinets, shelving, etc.

5. Please describe the quality of existing facility:

Existing building is two-story log construction with the 20'x30' museum space upstairs shared with the staff office for Senior Citizens Services. Exterior stairway entrance is not accessible in wintertime due to icing conditions on the steps. There is no space available for collections or storage at this time.

KENAI CIVIC CENTER

Primary Users:

Performing Arts

1. Central Peninsula Concert Association.
   9-11 programs per year.
   Attendance: 250-1200 Average 450.
2. Peninsula Dancers
   One major production each spring.
   Total attendance (1979) 1400 - 7 performances.
   Occasional dance presentations.
   This year, 62 performers plus community orchestra will present "Fiddler on the Roof".
3. Kenai Performers
   Planning one production this year. Disbanded for several years due to lack of a place to perform .
4. Redoubt Chamber Orchestra
   Concerts 2-3 times per year.
5. Community Chorus
   3-4 performances per year.
6. Sweet Adelines
   2-4 performances per year.
   Need place to practice each week with piano.

Visual Arts

1. Kenai Arts and Humanities Council
   Council represents fourteen (14) cultural groups meeting six (6) times per ye
2. Kenai Art Guild
   76 members meet once each month.
   Art gallelry open 6 days a week in summer, 3 days in winter.
   Volunteers man gallery. 2000 visitors last summer.
   Workshops: Adult - 16 classes involving 260 people .
   Children - 10 workshops involving 412 people.
   Pottery workshops: 3 classes (1979), 43 participants.
   Annual Juried Art Show: 215 entries (average).
   480 people view 4-day exhibit.

Primary Users (cont'd.):

Visual Arts (Cont'd.)

2. Kenai Art Guild (Cont'd.)

   Annual Arts and Trades Fair: 900 people attend one-day sale of arts and crafts.

3. Beta Sigma Phi

   Annual Art Show: 350 entries (average).
   750 visitors (3 days).

   (This is an open-entry show with all arts and crafts accepted and shown.)

   Need a place to host state conventions every 4 years.

   Five chapters in Kenai-Soldotna area.

4. Peninsula Photographers Guild

   Three photography exhibits held each year.

Historical/Educational Groups

1. Kenai Historical Society

   Meets monthly, keeps museum open.

   (1200 people visited make-shift museum in 1979)

   Group hosts area-wide meetings for the Central Peninsula Historical Association. 150-200 people usually attend these gatherings.

2. Totem Tracers

   Geneology group. 14 members.

   Meets monthly in small room in library.

3. Cooperative Extension Service

   Sponsors annual Mini-university Days.

   In 1979, over 400 persons participated in adult classes during the 3-day sessions. This year it will be held for only 2 days due to lack of facilities available for classes.

Other secondary users would be small convention gatherings and public forum groups. Garden, boat, and home improvement exhibits could also be scheduled.

Summary Statement

Fiscal Plans for maintaining and operating the Kenai Civic Center

Estimated annual operating and maintenance costs of the Kenai civic Center are as follows:

operating Supplies	$ 7,000
Repair + maintenance Supplies	7,000
Repair + Maintenance	5,000
Insurance	43,100
Electricity	15,000
Gas	7,200
Rental ($ 17,000 x 62%)	10,680
Maintenance (contracted)	35,000
Manager (including benefits)	34,000
Miscellaneous	5,000
	$ 168,980
Rounded	$ 170,000

The City expects that the facility will receive about $ 13,600 per year in private donations. We can only estimate what user charges will generate. It is estimated that they should provide approximately $ 78,000 per year. The balance, or another $ 78,000 will be provided by the General Fund.

Cultural Facilities Grant Program

Grant Application

From: Charles A. Brown, Finance Director

Re: Ownership of Site, Kenai Civic Center

The property where the Civic Center is planned is owned by the City of Kenai, Airport Land System Fund. This land (61 lots) deeded to the City of Kenai by the Federal Aviation Administration. The City (General Fund) should enter into a long-term lease with the Airport Land System Fund.

According to the information I have received, this will allow the City to utilize the $178,000 land value as part of its local match, as well as being a cost of the project to be included in the State's calculated share. Project funding is projected as follows:

	State Funding (93.34%)	Local Funding (6.66%)	Cash Flow
Total Project Cost	$5,477,550	$5,477,550	$5,477,550
Less non-cash expenses (Land)	N/A	N/A	(178,000)
	5477550	5477550	5,299,550
State Funding	$5,112,745		(5,112,745)
Local Funding		$364,805	$186,805

The $186,805 of local cash will be provided from 94 refunded bond monies which are currently available.

UNIVERSITY OF ALASKA, RURAL EDUCATION

Dillingham Extension Center
Box 10206
Dillingham, Alaska 99576

February 12, 1980

Representative Nels A. Anderson, Jr.
Pouch V
Juneau, Alaska 99811

Dear Representative Anderson:

Per your suggestion at last evening's Constituent Teleconference, I am forwarding to you my remarks in behalf of the Dillingham Extension Center and its Policy Advisory Council addressed to you and Sen. Hohman in support of HB 672.

"We are here this evening (Trish Dorey, President, PAC, and I) to urge the passage of House Bill 672 allocating funds for Adult Basic Education (ABE) to DOE.

"Various agencies and individuals in the Dillingham Community have over the past five years submitted proposals to bring ABE to the Bristol Bay region. These proposals were never funded and our region is still without an ABE program to serve the needs of more that 5000 people of the 30+ villages in the area.

"I am here as one representative of education in this community to urge passage of HB 672 for the following reasons:

"1. The Bristol Bay region needs an ABE program--as Coordinator of the Dillingham Extension Center I have had the opportunity to travel extensively in the region and ABE is an unmet need which I receive most question about. It is unquestionably, in my opinion, the number one educational priority of the region.

"2. We believe that passage of HB 672, in its present form will finally result in the release of a portion of the total ABE funds ($617,500) for a program in this region.

"3. The Dillingham Extension Center is in a position vis-a-vis the Bristol Bay Regional Resource Center and its Director, Mr. Bob Brown, to train teachers using models developed by the Northern Institute. I have talked with Mr. Dave Alexander of

Rec'd 2/18/80

TNI who has assured us of assistance in the development of a training program for ABE teachers. We will however, need funds to assist our teacher trainees once they are recruited, as well as funds to support them as they work in the villages training adults in basic literacy skills.

"4. Finally, and perhaps most importantly, we believe that a successful ABE program in the Bristol Bay region will go a long way toward insuring the success of other programs in the region. The University of Alaska as it attempts to extend education to all the people of the Bristol Bay area through its Extension Center is acutely aware of the need to impact people at all educational levels if its own programs are to succeed."

Sincerely,

Charles A. Blood, Jr.

A PROPOSAL FOR EDUCATION LEGISLATION TO SERVE SEVEN REGIONS IN ALASKA

INTRODUCTION

This state offers a free education to every member of its varied society. Even so, there are many adults among us who either could not or would not finish (or, in some cases, even start) their elementary or secondary education. Because these adults are poorly educated, they have, throughout an entire lifetime, held some of the least rewarding jobs in our society. Frequently, they have held no jobs at all. They find themselves on the welfare roles, and each generation begets yet another generation of those who are uneducated, unskilled, and unemployed.

There are men and women in the state who cannot fill out job applications, who cannot read labels on prescriptions or prices at the grocery store, and who cannot help their children with even the simplest homework. They are people who need Adult Basic Education.

On the other hand, there are men and women among us who have recently applied for and received either their first job or a better job. We have adults who no longer must depend upon others to read for them on shopping trips. We have people who take new pride in helping their children learn, who pass that pride in education along to their formerly indifferent families. These are men and women who have received and are now demonstrating the benefits of Adult Basic Education.

DEFINITION

Adult — A person sixteen years of age or older who is not enrolled in a regular public or private school program and who is in need of basic literacy skills, English Language instruction, life skills instruction or other assistance up to secondary school completion.

STATEMENT OF NEED

The goals of Alaska Adult Basic Education are:

> ...to provide the best possible educational opportunities for all undereducated adults in Alaska ... to provide adults opportunities to continue their education to at least the level ... of secondary school ... (to make these) opportunities available for adults who have not completed secondary training as well as adults who have received a certificate of graduation from a school providing a secondary education but are functioning at less than a secondary competency.

There are presently seven geographic regions in the state receiving little or no instructional money for Adult Basic Education. The North Slope, Northwest Arctic, Aleutian/Pribilof Islands and Bristol Bay and Rural Anchorage Regions receive no funding. The Kenai Region receives

13
REGIONALIZED SERVICE

funding for two part-time classes and Valdez is funded for one teacher. This means that approximately 68,000 Alaskans are being denied access to the advantages of adult education.

At current funding level options are limited. Programs could be drawn out of one region and relocated in another region, but this would cause the loss of experienced staff in whom the state has a considerable investment in training. This would further cause the discontinuation of programs for many students who have had a long term commitment and are in the advanced stages of completion.

A second alternative would be to trim a percentage of money from existing programs and put into the unserved regions. Once again this would cause many people to lose service and take away from programs which already operate at only a minimal level. A case in point is the Kuskokwim Region which serves fourteen out of fifty-three villages now.

The third alternative and that being suggested by this proposal is to leave present funding in place and add minimum funds necessary to complete the network. The state is already in the unfortunate position of denying many of its citizens equal access to educational opportunity. To reduce or remove the programs currently thinly spread over the state would be a denial to our responsibility.

Great social pressure is being exerted upon the Native populations of the state. With Indian Self Determination, the advent of Native Land Claims and localization of the schools people with little education are being required to sit on boards of directors of corporations making decisions with great environmental and financial impact, sitting on school boards making decisions in hiring and firing professional staff as well as judgements on quality of education.

This press for educated adults cannot depend strictly upon the new young graduates to fill the need. Every effort must be made to tap the knowledge and experience of the mature adult in the older geneations. This can be done only through basic education.

The following statistics corroborate the need for basic education in the proposed regions to be served.

REGIONAL NEEDS STATEMENTS

1. Bristol Bay:

"In a special report prepared by Robert Natham and Associates for the Federal Government, a number of statistics were identified relative to the well being of Alaska Natives. For Bristol Bay, the figures are indeed stark:

The Median education in school years completed by
Alaska Native (as a whole) is:.....7.4
For Bristol Bay.....3.5

Further, the studies identified 50.3% of the population 25 years of age or older as having an educational attainment of 0-4 years of formal schooling. In this same population group, only 8.6% have

completed four years of high school or have an equivalent high school diploma. There is an immediate need for Adult Basic Education Courses in virtually all Bristol Bay villages."

No Adult Basic Education courses are currently being taught, therefore, there is no existing program or vehicle for adults within the villages to obtain the basic skills necessary to even apply for and pass the five sub-tests for a General Education Diploma (GED). An Adult Basic Education program would not only provide this service but would help provide for equal educational and growth opportunities for those adults who have been and are still being neglected.

2. Northwest Arctic:

An active, comprehensive program of adult education, based on the conceptual framework of Adult Performance Levels, is a prime requisite for growth of political, social, personal, and economic skills of NANA Region residents. In a recent (December 1978) survey, it was found that 42% of respondents had attended school to eighth grade of less. Another 13% attended between nine and eleven years. 45% were at least high school graduates. Teachers and other relatively transient professionals were included in the random sample and contributed to this last category. The indigenous, stable population is primarily of Inupiaq Eskimo heritage and fewer of this group have completed high school than the survey results suggest. Complicated further by multilingualism, the adult populations thus has a high rate of functional illiteracy. The region's people also suffer a high rate of unemployment. Inuit respondents, 52% had not had a job for the past year. An additional 41% were employed part-time. Only 7% had fulltime jobs. Besides unemployment, alcoholism, high prices, and lack of something to do, were seen by the respondents as the region's major problems.

The above statistics would in themselves suggest a need for an adult basic education/adult education program. But there is further evidence as well. When asked the question, "If a school for adults was available here, would you be likely to go?", 73% replied they would. And 90% said they would attend workshops or classes to teach people self-health care.

In follow-up interviews by school district personnel (April 1979), Ambler adults indicated that an average of 36% of respondents would attend each of sixteen (16) vocationally oriented classes. An average of 61% would enroll in each of two (2) consumer education classes, and in each of four (4) health and safety classes. Three (3) ABE courses would each have an enrollment of 10% of the adult population of this village, and a GED preparation course 32%. If extrapolated to the region's adult residents (approximately 2,500 people in eleven villages), one could anticipate about 150 people interested in a ABE program, 800 in a GED program, 900 in job skills, and 1,525 in other life skills program. Of course, many people indicated interest in several programs, and actual attendance would be well below the level of interest, but the need for an adult education program is apparent.

MEDIAN YEARS OF SCHOOL COMPLETED BY REGIONAL POPULATIONS

The following chart was compiled in an effort to show both the educational services needs and the income levels of the target area populations the A.S.H.E.S. Talent Search Project would be aimed at.

Region	Median Years School Completed		Highest Grade Completed by largest % of population				Eligible youth age 14-24 (17.4% of poverty population	Total below poverty pop.		Total Pop.
	Native	Non-Native	Native	%	Non-N.	%				
ALUET	7.2	12.7	5-6	23.9	12	46.7	73	419	9.6	4359
ARCTIC SLOPE	5.6	18.0	5-6	23.9	12	35.9	154	887	28.8	3079
CALISTA	3.0	13.5	0	33.9	12	33.6	1378	7889	65.5	12040
BERING STRAITS	7.0	13.8	1-4	21.8	12	28.5	387	1938	35.3	5497

NA	6.2	13.5	1-4	29.2	12	34.2	238	1369	37.2	3634
UTON	6.7	12.6	1-4	21.4	12	42.4	892	5127	10.4	49233
ALASKA	10.3	12.5	9-11	25.3	12	38.1	760	4370	10.4	41957
OTAL	7.5	12.6					6197	35614	12.7	280586

Data compiled from 2(c) Report, Task I. Excerpt from 2(c) Report, Task II, "The lack of basic statistical information prevents educational agencies from evaluating current educational efforts and identifying unmet needs."

3. Aleutian/Pribilof

Due to limited educational opportunities in the past, the people of the Aleutian/Pribilof region have faced many difficulties coping with 20th Century corporate life thrust upon them by the Native Claims Settlement Act. Leadership has been developing with incredible rapidity and effectiveness, but the heavy pressures involved in rapid change have caused frustrations resulting in social disorganization. Village corporations, councils, school committees and school boards have all been forced into leadership decisions for which they often lack basic training and experience. According to the 1970 U.S. Census in the Aleut Corporation area, 15% of the Native people 25 years or older completed grades 1-4; 25% grades 5-6; and 16% grades 7-8. Unless educational needs are met, the following will continue to occur:

A. Village and city governments will fail or falter or will be dominated by non-Natives.
B. School boards will be dominated by non-Natives, and Native parents will have little to say about education of their children.
C. Village corporations will not function at their full potential.
D. Outside investors will reap fortunes in the Aleutian/Pribilof area while the majority of Aleut people will subsist virtually at poverty level.
E. The Aleut cultural heritage will be overrun and lost, leaving behind the vicious circle of poverty, alcoholism, drug abuse, family disintegration and loss of identity.

4. Matanuska-Susitna

Matanuska-Susitna Community College identified 4,600 adults having less than a secondary education in the Matanuska-Susitna service area. Bureau of Labor statistics revealed a July unemployment rate of 15.1 percent and November 23.3 percent combined with Decembers 24.9 percent are symptomatic of the need for basic education and life coping skills training.

5. North Slope

The native residents of the North Slope have a median school completion level of 5.6 years. This lack of education has significant impact upon the ability of natives to compete for and maintain jobs in the now technologically oriented North Slope Region. Additionlly, a bank of educated persons is necessary to train for the roles necessary if the new affluence introduced by massive oil revenues is to remain under control of its rightful owners. The few individuals represented in the leadership need many more trained, educated people to take on the many emerging roles in business, education, industry and arctic leadership.

6. Kenai Region

During the summer of 1979, an assessment of the available educational resources and needs of the adult client population was done under a federally funded program named NETWORK. (Network of Education, Training and work Opportunity Resources Knowledge Bank). The final report will not be in this office unt'l October 30, however, preliminary analysis indicates that the statistics presented last year were in the ball park. Thus, they are repeated here.

The population of the Kenai Peninsula is approximately 25,000 with most of the people living in the Kenai-Soldotna area. In Level I (1-9), it is estimated that 1,500 adults could be served. Additional estimates are that there are approximately 3,000 adults in Level II and 150 needing ESL training.

7. Valdez/Copper River

The Valdez/Copper River Region encompases a population of nearly ten thousand people. Of this ten thousand an estimated 2,400 have less than a high school education. The Native adult population has a median school completion level of 5.8 years. With the pipeline terminal, pumping and maintenance stations throughout the region it is apparent that employment opportunities are fast appearing, but they are at a level which demand solid-scholastic background. Unless the region is given the benefit of ABE services, these opportunities will once again fall to outsiders.

PROPOSED SERVICES

Services shall include instruction in basic literacy, English as a Second Language, life coping skills and vocational counseling in the form of:

an "individualized educational program" a written statement jointly developed by a qualified instructor and by the person, to include:

- present achievement level analysis
- short range and long range goals
- identification of specific services that will be provided toward meeting those goals
- when and where these services will be provided and how long they will last
- a schedule for checking progress achieved under the plan and for rating necessary revisions

These services shall take place in the towns and villages of the respective regions as selected by the educational institution providing the service. Curriculum shall be determined by the student, local educational institution in concert with their local advisory council and the citizens participatory planning process used by the state ABE program.

PROGRAM IMPLEMENTATION

Organization for Delivery of Services

State Organization: In an effort to prevent proliferation of state bureacracy, these funds should be located in the Alaska Department of Education, Adult Basic Education Section.

This section already has in place the mechanisms for granting and administering funds. A statewide network of curriculum assistance, technical assistance and staff development. The addition of this program to the present network could achieve maximum benefit at minimum cost.

LOCAL DELIVERY

Local/Regional delivery is currently conducted throughout the state by a variety of organizations. These organizations include school districts, community colleges, Native Non-profits, private non-profits and public non-profit agencies. The funds are placed on a competitive basis to the organization offering the most service for the available dollars. Programs in most regions reflect cooperation between two or more agencies for delivery of service. The competition between agencies has been very effective in holding down costs without causing instability in the program. In the case of similar bids the program operator with the proven history of performance is always funded.

Program operators not performing will have historically been given one year grace to upgrade and it has been necessary to pull only a program in six years.

FUNDS NECESSARY TO IMPLEMENT NEW REGIONS

North Slope	$80,000
Northwest Arctic	80,000
Bristol Bay	75,000
Aleutian/Pribilof Islands	85,000
Kenai Peninsula	75,000
Rural Anchorage (Mat-Su)	75,000
Valdez/Copper River	75,000
Total Program	$545,000
Staff Development @ 10%	54,500
Support Services - 1 clerk typist III @ 18,000 including fringe, etc.	18,000
Total Cost	$617,500

Justification:

Regional Allotments

North Slope, Northwest Arctic and Aleutian/Pribilof Islands Regions are suggested at a higher level of support due to unusual travel costs. Although travel will be much cheaper in the Kenai and Rural Anchorage regions extra funds are justified due to the population density they must serve.

Staff development is a vital compontent to ABE. Rural teachers are taken from the indigenous population and trained as ABE instructors. This training is a rich source of leaders in the rural areas. Attached find statements of what have happened to many of the ex-instructors once the role of ABE instructor gave them responsibility in the political/social process.

Furthermore, staff development is inherent in quality instruction, particularly when dealing with people who have never taught before or even experienced teachers dealing for the first time with adult students.

Support services are necessary if reasonable service is to be available to the new regions. Although ABE is funded over three times as high as four years ago and is offering many more services to field programs, the present administrative staff need not be expanded but the present 1/2 time secretarial clerical arrangement simply cannot keep up with present volume let alone be expected to handle nearly double the number of contracts currently served.

Matching funds are available from many sources including C.E.T.A., B.I.A., Indian Education, Labor, Social Services, boroughs, etc., once a knowedgable organize services and negotiate contracts. It is anticipated that the first fiscal year funds at least equally the inital grant will be generated by and the third year they would be generating as much as three dolllars per state dollar.

The money being generated tends to be dollars that previsously created overlap programs or furnish ancillary services which, though useful, were not coordinated with ABE, therefore seldom used.

United States Council of State Directors

Adult Education Economic Impact Survey
Alaska - FY79

A. Public Assistance

1. List the number of Adult Education Learners removed from public assistance in FY77 (as reported in Table 5, Item 12 in Annual Report). 24

2. Average annual cost per adult for public assistance in your state. Households average 1 adult and 2 dependents nationally and FY77 statistics from USDE reveal Alaska costs to be 12,948 per household including case work, etc. 12,948

3. Total projected savings per year. (Multiply answer in number one times the answer in number two.) 310,752

B. Employment

1. List the number of Adult Education learners who became employed in FY77 as a result of Adult Education (as reported in Table 5, Item 13 in Annual Report). 112

2. Projected income earned by adults who became employed. Take the number of adults receiving jobs as a direct or indirect result of attending Adult Education class: Multiply this number by the minimum hourly rate (now $2.30) times 40 X 52. If the actual income is known, then use this instead of minimum rate. 1,397,760

Minimum average in Alaska is just over $5.00

EXAMPLE: 112 persons who became employed X $6.00 per hour = $672.00 per hour X 40 hours per week = $26,880 X 52 weeks = $1,397,760 per year new income.

C. Job Promotions

1. List the number of adults who were promoted as a result of Adult Education (as reported in Table 5, Item 14 in Annual Report). 222

2. Using Employers State salary scale minim is 18¢ per hour. Projected additional money earned by adults who were promoted as a result of Adult Education. Multiply the number of adults receiving a promotion by .10 per hour (which is a minimal figure) X 40 hours X 52. 230,880

EXAMPLE: 222 promotions X .50 per hour = $111.00 per hour X 40 hours per week = $4,440 per week X 52 weeks = 230,880 per year.

HB
802

POSITION PAPER/Department of Health & Social Service

POSITION PAPER

HOUSE BILL NO. 802

"An Act relating to nurse midwives."

HB. No. 802 requires that hospitals extend staff privileges to nurse midwives as a condition of licensure. The Bill also defines the coverage of nurse midwives' practice under health and disability insurance policies by requiring coverage by those policies that pay for maternity care. The Bill also requires a medical service corporation, hospital service corporation, and combined medical and hospital service corporation cover nurse midwife services under certain conditions. The Bill also amends the definition of "participant physician" to include a nurse midwife, and adds a new definition defining "nurse midwife" to the Alaska Statutes.

The Department of Health and Social Services will limit its comments to the areas of the practice of the nurse midwife and the requirements of hospitals to extend staff privileges to the midwife as a condition of State licensure. It is our understanding that the Department of Commerce and Economic Development, Division of Insurance, will be commenting separately on the sections dealing with mandatory insurance coverage.

Practice of Nurse Midwives

Nurse midwives have been a part of the American health care system for over fifty years. The practice of nurse midwifery, including the management of labor and delivery, is recognized in the laws of all states except Kansas, Michigan, and Wisconsin. The typical recent graduate of a nurse midwifery educational program has six years of professional nursing experience and a bachelor's degree in addition to nine months to two years of midwifery training Upon successful completion of the course and a national certification examination, the nurse midwife is prepared to care for women's health needs, including normal childbirth and uncomplicated gynecological and family planning services.

The nurse midwife, according to Alaska law, collaborates with a physician. Nationally, nurse midwives are employed by hospitals, public health agencies, private physicians, the military, prepaid health plans, and birthing centers. Their practice, typically, extends beyond pregnancy and birth to include the post-partum care of the well woman and neonatal care of the infant. Health education is a vital component of the role of the nurse midwife.

The use of nurse midwives can offer greater availability of quality prenatal care, delivery, and post-natal care in medically underserved

POSITION PAPER/Department of Health & Social Services

areas. As a member of the health care team, the nurse midwife can provide professional care to the normal obstetrical or postpartum patient, thus freeing her collaborating physician to concentrate on patients with problems requiring his or her medical expertise. An expanded use of nurse midwives also can offer an alternative style of care to families at a special time in their lives. The desire of certain families for such an alternative may partially account for the apparent increase in home deliveries, a practice which involves a greater risk.

Requirement of Extension of Staff Privileges to Nurse Midwives as a Condition of Hospital Licensure

The purpose of licensure, rules, regulations, and standards for hospitals is "...promoting safe and adequate treatment of individuals in the interest of public health, safety and welfare..." (AS 18.20.060).

Historically, the State's responsibility began as licensure and inspection of public facilities to look for fire, environmental health, and other standards for the condition of buildings. It then was extended into the area of professional standards requiring certain levels of competence and experience to have been reached by the staff providing care in the hospital. The strictest requirement for hospitals comes as a result of the need to be certified in order for the hospital to be eligible for Federal Medicare and Medicaid reimbursement. Nowhere in State Statute or regulation are hospitals required, as a condition of licensure, to extend staff privileges to professional groups (such as dentists) or paraprofessional groups (such as therapists). HB 802 would break with past precedence by requiring such an extension as a condition of hospital licensure to nurse midwives.

Department Position

The Department of Health and Social Services recognizes the valuable contribution that nurse midwives can make to the overall physical and emotional health of the family at time of pregnancy and delivery. We would encourage hospitals to provide staff privileges to well-qualified nurse midwives who meet the requirements of the Advanced Nurse Practitioner Guidelines issued by the Alaska Board of Nursing. However, the Department believes that the decision to use the services of nurse midwives or other qualified allied health personnel appropriately should rest with each individual hospital, its governing body and administrative staff, and not with the Department of Health and Social Services licensing authority.

SISTERS OF PROVIDENCE

SERVING IN THE WEST SINCE 1856

March 5, 1980

The Honorable Thelma Buchholdt
Pouch V
Juneau, Alaska 99811

Position Paper: H.B. 802 - "An Act relating to nurse midwives"

Dear Representative Buchholdt:

Providence Hospital cannot support passage of H.B. 802, "An Act relating to nurse midwives," because of the following reasons:

1. Licensure

To suggest that a hospital's licensure is dependent on permitting para-professionals such as nurse practitioner midwives to practice medicine is irresponsible and probably unconstitutional. The passing of this law would totally disregard the requirements of the medical staff by-laws, the quality assurance and the medical review processes, which are so important in maintaining quality patient care standards.

2. Malpractice Insurance

In the State of Alaska, where malpractice insurance has traditionally been difficult to obtain, requiring them to make available malpractice coverage to nurse practitioners, as primary admitters, would most likely, 1) make malpractice rates skyrocket, and 2) would probably send insurance companies running out of the state.

3. Types of Midwives

It is interesting to note that the bill specifically relates to certified nurse practitioner midwives -- and the traditional, and far more extensively trained certified nurse midwife commonly found in Europe and in a few places in the United States is left out.

The differences in training of these two categories is quite extensive. The nurse practitioner midwife goes to a program of a few months, whereas the Certified Nurse Midwife of the

European model sometimes trains for a couple of years. This further demonstrates the special interest involved. They are certainly not the same, and cannot be grouped together in terms of training, abilities and experience.

4. Currently, under our medical by-laws and those of other hospitals, para-professionals are permitted to practice medicine only under the direction of the sponsoring physicians who monitor the privileges granted and quality of care delivered.

   We also endorse the hiring of these practitioners (para-professionals), by hospitals, to deliver nursing care.

Thank you for the opportunity of expressing our position on this bill.

Sincerely,

Al M. Tamosso

JUNEAU, ALASKA 99811

March 4, 1980

Honorable Thelma Buchholdt
Chairman
House Education & Social
Services Committee
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Ms. Buchholdt:

RE: House Bill 802

You have requested a position paper for House Bill 802. The Division of Insurance has in the past opposed mandated or required coverages for disability insurance policies. We have on two occasions ventured across this line to support mandated coverages. The first was in support of coverage for newly-born children which became law in 1975 (AS 21.42.345). The second was with Senate Bill 227 which would mandate alcoholism benefits. This bill was before your committee last year and is presently in House Rules.

In both cases there was substantial imperative for the types of benefits sought. With newly-born children, the practice of insurers was to provide no coverage until 14 days after birth, which when coupled with the preexisting conditions clause in many policies, gave rise to some substantial financial burdens on new parents with sick, ill or defective newborn children. In the case of a mandated alcoholism benefit, the imperative was, and is, that alcoholism is generally recognized as Alaska's number one health problem. We do not believe that similar imperatives exist to suggest a required maternity or nurse midwife coverage.

We have prepared a section-by-section analysis or commentary which may help in our view of this legislation.

Section 1. This section would most appropriately be commented on by the Department of Health and Social Services. The section is not crucial to the insurance aspects of the bill, which represents the remaining portion of the proposed legislation.

Section 2. Under this section coverages provided on an expense incurred basis shall provide that the health insurance benefits applicable to maternity coverage consider benefits provided by nurse midwife. This language is not objectionable. The title of the section, however, is somewhat misleading and might better be called "COVERAGE FOR COST OF SERVICES PROVIDED BY NURSE MIDWIVES."

Section 3. The language suggests that maternity benefits are required to be provided under an expense incurred policy. Presently, federal law requires maternity benefits on group coverages where the group has more than 15 persons. This proposal would extend to individual policies and to smaller groups. We are opposed to an expansion of this concept because of cost. We believe that removal of this section will not impair the bill since it is really a repeat of Section 2 of the bill. This same comment applies to Section 4 and Section 5.

Section 6. This section in effect mandates maternity benefits for medical service corporations, of which there are two now in the State. The first is Delta Dental Plans which is a dental medical service corporation and the second is Fairbanks Physicians which is currently inoperative. Blue Cross is a hospital service corporation and would appear to be unaffected by this section due to repeated references to AS 21.87.120.

Section 7. This section is not objectionable but does not really affect anyone presently except for the Delta Dental Plan. AS 21.87.330(9) which defines "physician" as distinquished from "participant physicians" should be modified to include nurse midwife.

Section 8. This section is not objectionable.

Finally, the Commerce Committee of the House is presently considering House 882 which permits the Director of Insurance to minimum standards on various lines of insurance which can potentially resolve the problems that this bill appears to address. If all expense incurred policies had to include nurse midwives as physicians or participating physician then I think this bill would become a moot issue.

To summarize, we believe that a number of amendments should be made to this bill to make it a bill that can be supported by the Administration. These references are:

Page 1, line 14, remove the words "REQUIRED PROVISION FOR" and change the word "OF" between "COVERAGE" and "COST" to read "FOR."

Page 1, lines 22 through 29. Eliminate.

Page 2. Eliminate entire page.

Page 3, lines 1 through 3. Eliminate.

Page 3 between lines 3 and 4. Establish new section to read:

AS 21.84.590(6) is amended to read. (6) AS 21.42.290 and AS 21.42.347.

Page 3, line 4. Renumber the section as appropriate and retain the wording that appears on lines 5 through line 8.

Page 3 between lines 8 and 9. Add a new section to read:

AS 21.87.330(9) is amended to read. (9) "physician" [includes also] means a doctor, dentist, osteopath, optometrist, chiropractor, nurse midwife, surgeon, or other licensed health care practitioner.

Page 3, line 14. Add a new section to read:

AS 21.87340(15) is amended to read: (15) 21.42.345 and AS 21.42.347.

The above amendments would result in a bill acceptable to the Division of Insurance. If you have any additional questions, we would be happy to assist in answering them for you.

Very truly yours,

Donald P. Koch
Chief of Market Surveillance

Re: H.B. 802
"An act relating to
nurse midwives"

Dear Representative Bucholdt:

The Alaska State Hospital Association representing seventeen institutional members who provide obstetrical care is extremely concerned over H.B. 802. While the intent, I am sure, was to make availible to patients an alternative which would provide greater access to O.B. services at a possibly reduced cost, a number of considerations should be evaluated before proceeding with this proposal.

1. Sec.18.20.055 Nurse Midwife Staff Privileges:

   Criteria for the licensure of hospitals which is acceptable under present state and federal regulations does not require that paraprofessionals be accorded staff privileges in orde. to retain state licensure. To legislate such a requirement would be legally contestable, as it is contrary to accepted standards of safeguards provided under present licensing and hospital by-laws related to the admission of patients to hospitals. Such legislation would open the door to numerous medical paraprofessionals to mandate similar consideration.

   Such action would circumvent the protection that all patients presently may expect from a licensed hospital, i.e. that a board (trustees), medical staff organization and a competent administration are responsible for assuring that minimal standards of training and licensing have been met by practicing staff. A nurse practitioner does not meet the level or training required for physicians, nor do they meet by-law standards for staff privileges.

2. The continued availability and/or additional cost of hospital malpractice should such legislation be inacted leads one to question the prudency of such a proposal. One of the protections that patients and hospitals presently have is recourse for a financial settlement for ajudicated damages. The removal of that protection by a withdrawal of insurance coverage, or a significant increase in the cost of such coverage, due to the inclusion of paraprofessionals as attending staff is a serious concern for our members.

3. Limited investigation due to the shortness of notification of this proposal has identified that third party carriers are not presently able to assure any reduction in premimum costs due to O.B. services provided by paraprofessionals. Lack of experience with this concept does not yet provide a historical base upon which to draw conclusions.

Although for the above stated reasons our association cannot support the proposed bill, let me hasten to add that under the appropriate medical direction and approved hospital standards of medical treatment, para-professionals can be effectively utilized in the hospital setting to deliver a sophisticated level of health care.

Thank you for this opportunity to express our concerns and recommendations on this proposal.

Sincerely,

Max Kersbergen
Executive Director

Re: Position Paper - House Bill No. 802
An Act Relating to Nurse Midwives

Dear Representative Buchholdt:

Fairbanks Memorial Hospital recently submitted preliminary comments on House Bill 802, an act relating to nurse midwives. The Hospital has recently gone back and done more research on this bill and would like to submit the following position on House Bill 802.

Fairbanks Memorial Hospital cannot support House Bill 802 because of the following reasons:

1. The bill as it is currently written would let a nurse midwife work in the hospital without a physician's supervision. To my knowledge all hospitals in the state require nurse midwives, physicians assistants and other para-professionals to be directly supervised by a physician preceptor. If this bill passed, this would prevent nurse midwives from being required to have this physician supervision.

2. The bill as it currently stands grants a nurse midwife hospital privileges. At the current time no para-professional in any Alaska hospital to my knowledge is granted full privileges, but is rather granted an extension of their physician preceptor's privileges. This requires the para-professional to be supervised and to do only those procedures and exams the physician preceptor has privileges to perform.

3. Fairbanks Memorial Hospital does not believe that a hospital's license should be dependent upon any one para-professional group. We believe that if this bill was passed, other para-professionals would request similar status.

4. As I am sure you are aware, there is a severe difference between certified nurse practitioner midwives and certified nurse midwives. A certified nurse practitioner midwife attends a specific midwife program only for a few months after she has gained the status of nurse practitioner while a certified nurse midwife has at least several years of training in order to become a certified nurse midwife. This bill directly addresses the least trained of the two categories.

5. Under Section 7.AS21 87.330 we feel that a nurse midwife should not be included under the definition of a participant physician.

6. As the hospital reads section 21.87.125 of the bill we interpret this to mean that all hospitals in the state and other medical service corporations will be required to hire nurse midwives and to have these services available even though some pre-paid plans might not address maternity care.

In closing, the Hospital cannot support this bill as it currently stands. It should be pointed out that Fairbanks Memorial is not objecting to nurse midwives since the hospital has provisions in our bylaws for nurse midwives, physicians assistants and other para-professionals to work in the hospital under the direct supervision of physicians. We are very much against any bill which indicates that a physician would not be supervising this individual.

Thank you for the opportunity to express our position on this bill.

Sincerely,

Tom Mingen
Administrator

KETCHIKAN, ALASKA 99901
907 – 225-5171

March 6, 1980

Representative Terry Gardiner
House of Representatives
State of Alaska
Pouch "V"
Juneau, Alaska 99811

Dear Terry:

The Medical Staff of Ketchikan General Hospital has asked me to write to you in regard to House Bill 802, introduced by McKinnon, nurse-midwives, particularly in relation to provision of coverage of cost of services provided by nurse-midwives by state licensed insurance companies.

In general, we are in support of the bill and feel it effectively recognizes the role of nurse-midwives in the provision of medical care in the State of Alaska. We have only one problem with the bill and that is Section 18.20.005 which states that a hospital may not be issued a license unless the hospital permits nurse-practitioners to practice in the hospital.

Our objection is essentially a disinterested one as we have a nurse-midwife on the staff at Ketchikan General Hospital who will be accorded full privileges as soon as her certification comes through which we expect within the next two months. We previously had a certified nurse-midwife on the staff and she had full privileges. We are fully in support of the concept of such practitioners functioning in the Ketchikan area. Nonetheless, to restrict a hospital's license simply because it does not choose to employ nurse-midwives seems to be an unnecessary interference in the provision of medical care and an unwarranted intrusion of government regulations into what is essentially a private contractual matter. The intrusion might be warranted if it could be demonstrated that failure to provide nurse-midwifery services would reduce the quality of medical care and jeopardize patients, but I can think of no way of proving such a contention.

It is our feeling that nurse-midwifery is very much a coming thing and it will gradually be accepted throughout the country. We see no need to force the matter and indeed to force the matter only raises resentment.

With alteration of this provision we feel we could support the measure. Thank you for your interest in this matter.

Sincerely,

T.L. Conley, M.D.
Chief of Medical Staff

KGH

March 14, 1980

Representative Thelma Buchholdt
House Hess Committee
Pouch V
Juneau, Alaska 99811

To Legislator:

I would like to lend my support to House Bill 802. As a professional in women's health care, I support the concept of midwifery. Present medicine has evolved to treating pregnancy as an illness rather than as a natural process. A common characteristic of Alaskans is the desire to have control over all aspects of their lives. A Nurse Midwife can provide a cost-effective, personal, scientific, and safe birthing service. Nurses attending modern nurse midwife programs receive much more training in normal pregnancy and delivery than family practice physicians.

This bill can provide the needed impetus for using the nursing talent already residing in this state to a fuller extent.

Thank you for your time,

kay kindt R.N., N.P.

Fairbanks, Ak 99701

Dear Sir:

I am writing this letter in support of H.B. 802. I believe that our community could definitely benefit from having nurse practitioners at Fairbanks Memorial Hospital. The doctors would have more of their time to spend with other needful patients if nurse practitioners were allowed to practice (work) in the hospital.

Also the insurance coverage seems to be very important as most doctors, physicians etc have ample insurance coverage, also nurse midwives should be able to get this type of insurance.

I am very happy to see a bill of this sort finally coming through the legislature. It has all of my support.

Holly Debenham

RICHARD J. BABCOCK, M.D.

KETCHIKAN, ALASKA 99901

February 25, 1980

Dear Representative Gardiner:

We would like to add our strong support to House Bill #82, "An Act Relating to Nurse Midwives." The practice of insurance companies in limiting payment arbitrarily to certain health providers while excluding others is grossly unfair to their patrons.

The Nurse Midwife is a well trained, highly skilled practitioner whose services deserve compensation the same as any other recognized member of the healing arts.

Your support of this measure is strongly urged.

Thank you.

Thelma Buckholdt, Chairman
House HESS Committee
Room 11 - State Capitol
Juneau, Alaska 99811

Dear Ms Buckholdt,

As chairman of the Board of Nursing I have been asked to respond to HB 803 on behalf of the Board. Since our mission is to protect the public, I do not think it appropriate that the Board take a position on a matter of only interest to the nursing profession as an individual, however, I support the bill. We currently have no nurse-midwives authorized to practice under our regulations we have one application that is still being processed. The bill would provide an incentive to attract more of these highly qualified individuals to Alaska.

I do think the matter of mandating third party payers to reimburse nurse-midwives directly needs to be looked at with reference to the availability of medical insurance within the state. Would insurance companies refuse to comply, and hence no insurance coverage would be available to many citizens of our State? I trust Congress has input in this matter, but assume your committee will research it.

Yours truly,
Silvia Hoxtaro

SISTERS OF
PROVIDENCE

SERVING IN THE WEST SINCE 1856

March 5, 1980

The Honorable Thelma Buchholdt
Pouch V
Juneau, Alaska 99811

Position Paper: H.B. 802 - "An Act relating to nurse midwives"

Dear Representative Buchholdt:

Providence Hospital cannot support passage of H.B. 802, "An Act relating to nurse midwives," because of the following reasons:

1. Licensure

To suggest that a hospital's licensure is dependent on permitting para-professionals such as nurse practitioner midwives to practice medicine is irresponsible and probably unconstitutional. The passing of this law would totally disregard the requirements of the medical staff by-laws, the quality assurance and the medical review processes, which are so important in maintaining quality patient care standards.

2. Malpractice Insurance

In the State of Alaska, where malpractice insurance has traditionally been difficult to obtain, requiring them to make available malpractice coverage to nurse practitioners, as primary admitters, would most likely, 1) make malpractice rates skyrocket, and 2) would probably send insurance companies running out of the state.

3. Types of Midwives

It is interesting to note that the bill specifically relates to certified nurse practitioner midwives -- and the traditional, and far more extensively trained certified nurse midwife commonly found in Europe and in a few places in the United States is left out.

The differences in training of these two categories is quite extensive. The nurse practitioner midwife goes to a program of a few months, whereas the Certified Nurse Midwife of the

European model sometimes trains for a couple of years. This further demonstrates the special interest involved. They are certainly not the same, and cannot be grouped together in terms of training, abilities and experience.

4. Currently, under our medical by-laws and those of other hospitals, para-professionals are permitted to practice medicine only under the direction of the sponsoring physicians who monitor the privileges granted and quality of care delivered.

   We also endorse the hiring of these practitioners (para-professionals), by hospitals, to deliver nursing care.

Thank you for the opportunity of expressing our position on this bill.

Sincerely,

Al M. Tamosso

DIVISION OF INSURANCE

POUCH D
JUNEAU, ALASKA 99811

March 4, 1980

Honorable Thelma Buchholdt
Chairman
House Education & Social
Services Committee
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Ms. Buchholdt:

RE: House Bill 802

You have requested a position paper for House Bill 802. The Division of Insurance has in the past opposed mandated or required coverages for disability insurance policies. We have on two occasions ventured across this line to support mandated coverages. The first was in support of coverage for newly-born children which became law in 1975 (AS 21.42.345). The second was with Senate Bill 227 which would mandate alcoholism benefits. This bill was before your committee last year and is presently in House Rules.

In both cases there was substantial imperative for the types of benefits sought. With newly-born children, the practice of insurers was to provide no coverage until 14 days after birth, which when coupled with the preexisting conditions clause in many policies, gave rise to some substantial financial burdens on new parents with sick, ill or defective newborn children. In the case of a mandated alcoholism benefit, the imperative was, and is, that alcoholism is generally recognized as Alaska's number one health problem. We do not believe that similar imperatives exist to suggest a required maternity or nurse midwife coverage.

We have prepared a section-by-section analysis or commentary which may help in our view of this legislation.

Section 1. This section would most appropriately be commented on by the Department of Health and Social Services. The section is not crucial to the insurance aspects of the bill, which represents the remaining portion of the proposed legislation.

Section 2. Under this section coverages provided on an expense incurred basis shall provide that the health insurance benefits applicable to maternity coverage consider benefits provided by nurse midwife. This language is not objectionable. The title of the section, however, is somewhat misleading and might better be called "COVERAGE FOR COST OF SERVICES PROVIDED BY NURSE MIDWIVES."

Section 3. The language suggests that maternity benefits are required to be provided under an expense incurred policy. Presently, federal law requires maternity benefits on group coverages where the group has more than 15 persons. This proposal would extend to individual policies and to smaller groups. We are opposed to an expansion of this concept because of cost. We believe that removal of this section will not impair the bill since it is really a repeat of Section 2 of the bill. This same comment applies to Section 4 and Section 5.

Section 6. This section in effect mandates maternity benefits for medical service corporations, of which there are two now in the State. The first is Delta Dental Plans which is a dental medical service corporation and the second is Fairbanks Physicians which is currently inoperative. Blue Cross is a hospital service corporation and would appear to be unaffected by this section due to repeated references to AS 21.87.120.

Section 7. This section is not objectionable but does not really affect anyone presently except for the Delta Dental Plan. AS 21.87.330(9) which defines "physician" as distinquished from "participant physicians" should be modified to include nurse midwife.

Section 8. This section is not objectionable.

Finally, the Commerce Committee of the House is presently considering House 882 which permits the Director of Insurance to minimum standards on various lines of insurance which can potentially resolve the problems that this bill appears to address. If all expense incurred policies had to include nurse midwives as physicians or participating physician then I think this bill would become a moot issue.

To summarize, we believe that a number of amendments should be made to this bill to make it a bill that can be supported by the Administration. These references are:

Page 1, line 14, remove the words "REQUIRED PROVISION FOR" and change the word "OF" between "COVERAGE" and "COST" to read "FOR."

Page 1, lines 22 through 29. Eliminate.

Page 2. Eliminate entire page.

Page 3, lines 1 through 3. Eliminate.

Page 3 between lines 3 and 4. Establish new section to read:

AS 21.84.590(6) is amended to read. (6) AS 21.42.290 and AS 21.42.347.

Page 3, line 4. Renumber the section as appropriate and retain the wording that appears on lines 5 through line 8.

Page 3 between lines 8 and 9. Add a new section to read:

AS 21.87.330(9) is amended to read. (9) "physician" [includes also] means a doctor, dentist, osteopath, optometrist, chiropractor, nurse midwife, surgeon, or other licensed health care practitioner.

Page 3, line 14. Add a new section to read:

AS 21.87340(15) is amended to read: (15) 21.42.345 and AS 21.42.347.

The above amendments would result in a bill acceptable to the Division of Insurance. If you have any additional questions, we would be happy to assist in answering them for you.

Very truly yours,

Donald P. Koch
Chief of Market Surveillance

Dear Terry:

The Medical Staff of Ketchikan General Hospital has asked me to write to you in regard to House Bill 802, introduced by McKinnon, nurse-midwives, particularly in relation to provision of coverage of cost of services provided by nurse-midwives by state licensed insurance companies.

In general, we are in support of the bill and feel it effectively recognizes the role of nurse-midwives in the provision of medical care in the State of Alaska. We have only one problem with the bill and that is Section 18.20.005 which states that a hospital may not be issued a license unless the hospital permits nurse-practitioners to practice in the hospital.

Our objection is essentially a disinterested one as we have a nurse-midwife on the staff at Ketchikan General Hospital who will be accorded full privileges as soon as her certification comes through which we expect within the next two months. We previously had a certified nurse-midwife on the staff and she had full privileges. We are fully in support of the concept of such practitioners functioning in the Ketchikan area. Nonetheless, to restrict a hospital's license simply because it does not choose to employ nurse-midwives seems to be an unnecessary interference in the provision of medical care and an unwarranted intrusion of government regulations into what is essentially a private contractual matter. The intrusion might be warranted if it could be demonstrated that failure to provide nurse-midwifery services would reduce the quality of medical care and jeopardize patients, but I can think of no way of proving such a contention.

It is our feeling that nurse-midwifery is very much a coming thing and it will gradually be accepted throughout the country. We see no need to force the matter and indeed to force the matter only raises resentment.

With alteration of this provision we feel we could support the measure. Thank you for your interest in this matter.

Sincerely,

T.L. Conley, M.D.
Chief of Medical Staff

To Legislator:

I would like to lend my support to House Bill 802. As a professional in women's health care, I support the concept of midwifery. Present medicine has evolved to treating pregnancy as an illness rather than as a natural process. A common characteristic of Alaskans is the desire to have control over all aspects of their lives. A Nurse Midwife can provide a cost-effective, personal, scientific, and safe birthing service. Nurses attending modern nurse midwife programs receive much more training in normal pregnancy and delivery than family practice physicians.

This bill can provide the needed impetus for using the nursing talent already residing in this state to a fuller extent.

Thank you for your time,

kay kindt R.N., N.P.

Dear Sir:

I am writing this letter in support of H B 502. I believe that our community could definitely benefit from having nurse practitioners at Fairbanks Memorial Hospital. The doctors would have more of their time to spend with other needful patients if nurse practitioners were allowed to practice (work) in the hospital.

Also the insurance coverage seems to be very important as most doctors, physicians etc have ample insurance coverage, also Nurse Midwives should be able to get this type of insurance.

I am very happy to see a bill of this sort finally coming through the legislature. It has all of my support.

Holly Debenham

Dear Representative Gardiner:

We would like to add our strong support to House Bill #82, "An Act Relating to Nurse Midwives." The practice of insurance companies in limiting payment arbitrarily to certain health providers while excluding others is grossly unfair to their patrons.

The Nurse Midwife is a well trained, highly skilled practitioner whose services deserve compensation the same as any other recognized member of the healing arts.

Your support of this measure is strongly urged.

Thank you.

RE: HB 802

I STRONGLY SUPPORT HB 802, AN ACT RE TO NURSE MIDWIVES. I BELIEVE IT IS
A GOOD STEP IN THE RIGHT DIRECTION. NURSE MIDWIFERY SHOULD BE RECOG-
NIZED AND COVERED BY HEALTH INSURANCE POLICIES AND SHOULD ALSO BE AF-
FORDED THE SAME INDEMNITY AFFORDED TO DOCTORS. THOUGH I DO SUPPORT TH E
BILL, I DO NOT FEEL THAT IT GOES FAR ENOUGH IN RECOGNIZING THAT BIRTHI NG
IS A NATURAL EXPERIENCE AND NOT AN ILLNESS. I FEEL NURSE MIDWIVES SHO ULD
BE PERMITED TO PRACTICED OUTSIDE THE HOSPITALS AND I DO NOT MEAN IN TH E
PARKING LOTS!.

CAN BE CONTACTED DAYS.

Re: H.B. 802
"An act relating to
nurse midwives"

Dear Representative Bucholdt:

The Alaska State Hospital Association representing seventeen institutional members who provide obstetrical care is extremely concerned over H.B. 802. While the intent, I am sure, was to make availible to patients an alternative which would provide greater access to O.B. services at a possibly reduced cost, a number of considerations should be evaluated before proceeding with this proposal.

1. Sec.18.20.055 Nurse Midwife Staff Privileges:

   Criteria for the licensure of hospitals which is acceptable under present state and federal regulations does not require that paraprofessionals be accorded staff privileges in order to retain state licensure. To legislate such a requirement would be legally contestable, as it is contrary to accepted standards of safeguards provided under present licensing and hospital by-laws related to the admission of patients to hospitals. Such legislation would open the door to numerous medical paraprofessionals to mandate similar consideration.
