   Such action would circumvent the protection that all patients presently may expect from a licensed hospital, i.e. that a board (trustee), medical staff organization and a competent administration are responsible for assuring that minimal standards of training and licensing have been met by practicing staff. A nurse practitioner does not meet the level or training required for physicians, nor do they meet by-law standards for staff privileges.

2. The continued availability and/or additional cost of hospital malpractice should such legislation be inacted leads one to question the prudency of such a proposal. One of the protections that patients and hospitals presently have is recourse for a financial settlement for ajudicated damages. The removal of that protection by a withdrawal of insurance coverage, or a significant increase in the cost of such coverage, due to the inclusion of paraprofessionals as attending staff is a serious concern for our members.

3. Limited investigation due to the shortness of notification of this proposal has identified that third party carriers are not presently able to assure any reduction in premimum costs due to O.B. services provided by paraprofessionals. Lack of experience with this concept does not yet provide a historical base upon which to draw conclusions.

Although for the above stated reasons our association cannot support the proposed bill, let me hasten to add that under the appropriate medical direction and approved hospital standards of medical treatment, paraprofessionals can be effectively utilized in the hospital setting to deliver a sophisticated level of health care.

Thank you for this opportunity to express our concerns and recommendations on this proposal.

Sincerely,

Max Kersbergen
Executive Director

Re: Position Paper - House Bill No. 802
An Act Relating to Nurse Midwives

Dear Representative Buchholdt:

Fairbanks Memorial Hospital recently submitted preliminary comments on House Bill 802, an act relating to nurse midwives. The Hospital has recently gone back and done more research on this bill and would like to submit the following position on House Bill 802.

Fairbanks Memorial Hospital cannot support House Bill 802 because of the following reasons:

1. The bill as it is currently written would let a nurse midwife work in the hospital without a physician's supervision. To my knowledge all hospitals in the state require nurse midwives, physicians assistants and other para-professionals to be directly supervised by a physician preceptor. If this bill passed, this would prevent nurse midwives from being required to have this physician supervision.

2. The bill as it currently stands grants a nurse midwife hospital privileges. At the current time no para-professional in any Alaska hospital to my knowledge is granted full privileges, but is rather granted an extension of their physician preceptor's privileges. This requires the para-professional to be supervised and to do only those procedures and exams the physician preceptor has privileges to perform.

3. Fairbanks Memorial Hospital does not believe that a hospital's license should be dependent upon any one para-professional group. We believe that if this bill was passed, other para-professionals would request similar status.

4. As I am sure you are aware, there is a severe difference between certified nurse practitioner midwives and certified nurse midwives. A certified nurse practitioner midwife attends a specific midwife program only for a few months after she has gained the status of nurse practitioner while a certified nurse midwife has at least several years of training in order to become a certified nurse midwife. This bill directly addresses the least trained of the two categories.

5. Under Section 7.AS21.37.330 we feel that a nurse midwife should not be included under the definition of a participant physician.

6. As the hospital reads section 21.87.125 of the bill we interpret this to mean that all hospitals in the state and other medical service corporations will be required to hire nurse midwives and to have these services available even though some pre-paid plans might not address maternity care.

In closing, the Hospital cannot support this bill as it currently stands. It should be pointed out that Fairbanks Memorial is not objecting to nurse midwives since the hospital has provisions in our bylaws for nurse midwives, physicians assistants and other para-professionals to work in the hospital under the direct supervision of physicians. We are very much against any bill which indicates that a physician would not be supervising this individual.

Thank you for the opportunity to express our position on this bill.

Sincerely,

Tom Mingen
Administrator

TM/mw

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 802

"An Act relating to nurse midwives."

HB. No. 802 requires that hospitals extend staff privileges to nurse midwives as a condition of licensure. The Bill also defines the coverage of nurse midwives' practice under health and disability insurance policies by requiring coverage by those policies that pay for maternity care. The Bill also requires a medical service corporation, hospital service corporation, and combined medical and hospital service corporation cover nurse midwife services under certain conditions. The Bill also amends the definition of "participant physician" to include a nurse midwife, and adds a new definition defining "nurse midwife" to the Alaska Statutes.

The Department of Health and Social Services will limit its comments to the areas of the practice of the nurse midwife and the requirements of hospitals to extend staff privileges to the midwife as a condition of State licensure. It is our understanding that the Department of Commerce and Economic Development, Division of Insurance, will be commenting separately on the sections dealing with mandatory insurance coverage.

Practice of Nurse Midwives

Nurse midwives have been a part of the American health care system for over fifty years. The practice of nurse midwifery, including the management of labor and delivery, is recognized in the laws of all states except Kansas, Michigan, and Wisconsin. The typical recent graduate of a nurse midwifery educational program has six years of professional nursing experience and a bachelor's degree in addition to nine months to two years of midwifery training. Upon successful completion of the course and a national certification examination, the nurse midwife is prepared to care for women's health needs, including normal childbirth and uncomplicated gynecological and family planning services.

The nurse midwife, according to Alaska law, collaborates with a physician. Nationally, nurse midwives are employed by hospitals, public health agencies, private physicians, the military, prepaid health plans, and birthing centers. Their practice, typically, extends beyond pregnancy and birth to include the post-partum care of the well woman and neonatal care of the infant. Health education is a vital component of the role of the nurse midwife.

The use of nurse midwives can offer greater availability of quality prenatal care, delivery, and post-natal care in medically underserved

areas. As a member of the health care team, the nurse midwife can provide professional care to the normal obstetrical or postpartum patient, thus freeing her collaborating physician to concentrate on patients with problems requiring his or her medical expertise. An expanded use of nurse midwives also can offer an alternative style of care to families at a special time in their lives. The desire of certain families for such an alternative may partially account for the apparent increase in home deliveries, a practice which involves a greater risk.

Requirement of Extension of Staff Privileges to Nurse Midwives as a Condition of Hospital Licensure

The purpose of licensure, rules, regulations, and standards for hospitals is "...promoting safe and adequate treatment of individuals in the interest of public health, safety and welfare..." (AS 18.20.060).

Historically, the State's responsibility began as licensure and inspection of public facilities to look for fire, environmental health, and other standards for the condition of buildings. It then was extended into the area of professional standards requiring certain levels of competence and experience to have been reached by the staff providing care in the hospital. The strictest requirement for hospitals comes as a result of the need to be certified in order for the hospital to be eligible for Federal Medicare and Medicaid reimbursement. Nowhere in State Statute or regulation are hospitals required, as a condition of licensure, to extend staff privileges to professional groups (such as dentists) or paraprofessional groups (such as therapists). HB 802 would break with past precedence by requiring such an extension as a condition of hospital licensure to nurse midwives.

Department Position

The Department of Health and Social Services recognizes the valuable contribution that nurse midwives can make to the overall physical and emotional health of the family at time of pregnancy and delivery. We would encourage hospitals to provide staff privileges to well-qualified nurse midwives who meet the requirements of the Advanced Nurse Practitioner Guidelines issued by the Alaska Board of Nursing. However, the Department believes that the decision to use the services of nurse midwives or other qualified allied health personnel appropriately should rest with each individual hospital, its governing body and administrative staff, and not with the Department of Health and Social Services licensing authority.

Honorable Terry Gardiner
% Legislative Affairs
State Capital
Pouch Y
Juneau, Alaska 99811

Dear Representative Gardiner:

I received a call from Sharon Garrett (whom I presume works in Representative Bucholdt's office) a few days ago with reference to drumming up physician support for House Bill 802. I promised to call her after I obtained the bill and set about my normal Sunday activity of trying to recover from the recent bridge tournament.

Today I was able to obtain the bill and here goes. I have been given the circumstances surrounding this bills raison d'etre and certainly am in sympathy with the thinking behind the bill. However, there are problems.

The bill attempts to make the hospital do that which it is not in a position to do. Hospitals do not grant privileges to practitioners. That responsibility is delegated by the corporate body of the hospital to the attending medical staff. Thus, the bill fails, in this first paragraph, by attempting to legislate a requirement on the hospital that the hospital is not able to undertake.

Secondly, there are already sufficient laws, on the books, to offset the problems enumerated in or underlying this bill. The main legislation that works in this is the restraint of trade federal laws of which you are much more familiar than I. In the medical field, wherein a practitioner has felt unfairly denied access to the hospital to practice his/her trade or art or science, he/she has simply initiated a lawsuit and almost universally won when the condition of the denial of privileges was purely a restraint of trade. There are a fair number of cases on record, particularly in California, providing case law on this point, many of them having to do with family practitioners being denied privileges at certain hospitals governed by, or if you will, staffed by, sub-specialty interests. Thus, another reason for this part of the bill's inappropriateness is the fact that a mechanism for righting this wrong already exists and works well.

To reiterate, the bill attempts to make the hospital do that which it is not capable of doing. That is, assume the responsibility or granting of privileges and there is, not only no need for this but there is and has been a very tested way to right such wrongs as periodically crop up. In the case of the nurse mid-wife, he/she may simply obtain the services of a lawyer and institute a law-suit on the denial of privileges on the basis of restraint of trade and very likely win the case. More to the point, such action would serve to publically put the medical staff on record in their restraint of trade exercise, which is probably valuable.

Since there are free legal services in this state, such court action is thusly available to all, including the poorest physicians or other practitioners who have unjustly been denied privileges.

For the practice of good medicine, i.e. for patient protection, it is imperative that the medical staff remain in total control of staff privileges (except for court intervention) because this is the entire basis of peer review (peer review is something we have done here for 13 years plus and is now mandated by federal law) which is the only effective handle we have on the practice of medicine at a hospital.

With regard to the rest of the bill I would simply say I strongly agree discrimination by third party people (insurance companies et al) is nonsense. A service should be paid for on the basis of the service performed, not on how (over) qualified the practitioner is who performs it, so long as the practitioner is indeed qualified.

I have reviewed the bill with Dr. Richard Babcock (OB Gyn) who has a nurse-midwife associate, Dr. Tom Conley, Chief of Staff at Ketchikan General Hospital and Dr. David Johnson, President-elect, Alaska Medical Association and all are in agreement with the position I have outlined.

Thank you for your time.

Sincerely,

Bill Henrickson

March 13, 1980

Thelma Buckalew, Chairman
House H&SS Committee
Room 4 State Capitol
Juneau, Alaska 99811

Dear Mr. Buckalew,

As chairman of the Board of Nursing I have been asked to respond to HB 803 on behalf of the Board. Since our mission is to protect the public I do not think it appropriate that the Board take a position on a matter of policy-interest to the nursing profession.

As an individual, however, I support the bill. We currently have no nurse-midwives authorized to practice under our legislation. We have one application that is still being processed. The bill would provide an incentive to attract more of these highly qualified individuals to Alaska.

I do think the matter of mandating third party payers to reimburse nurse-midwives directly needs to be looked at with reference to the availability of medical insurance within the state. Would insurance companies refuse to comply, and hence no insurance coverage would be available to many citizens of our State? I trust Congress has ignored it in this matter, but someone should check it.

Yours truly,

Ellen Montano

The Honorable Margaret Branson
Alaska State House of Representatives
Pouch "V" State Capitol Building
Juneau, Alaska 99811

Dear Ms. Branson,

Our daughter Betty Wickett is a patient at Harborview Memorial Hospital in Valdez.

She is presently attending a Harborview School program at the Valdez City School District.

Valdez City School District is planning to build a new school with a wing for the Harborview shhool program.

Since residents of Harborview come from all over the state of Alaska and are residents of a state facility, the Community of Valdez should not be required to pay for the special wing of the new school.

As ooncerned parents we are requesting the State for full funding of the special school wing.

Sincerely,

Mrs. Merle Wickett

cc: Arlene Spaulding, Harborview School

ALASKA DEPARTMENT OF EDUCATION
POSITION STATEMENT
HOUSE BILL 805

The Department is in support of the proposed $600.0 appropriation to the City of Valdez. The appropriation represents less than the amount which would not be reimbursed to the municipality pursuant to AS 43.18.100, for the retirement of bonded indebtedness associated with the construction of a special education facility in Valdez.

The proposed facility would house the educational program required by the institutional residents of the Harborview Developmental Center, a state institution for the severely-profoundly handicapped. Please refer to the attachment provided by the district.

Approved by: William D. Thomson

William D. Thomson
Deputy Commissioner
April 18, 1980

HARBORVIEW PROGRAM & IMPROVEMENTS ENVISIONED BY MOVEMENT TO THE NEW SCHOOL

Currently there are several drawbacks to the educational facility at Harborview that have an impact on teaching and which the Herman Hutchen School design will improve. First, there is considerable isolation of classrooms frome one another. Two meet in the living area, one is on the first floor of the school annex, two are on the secord floor, two in modulars outside the Developmental Center and two in modulars near the elementary school across town. This isolation precludes gradual transition from one classroom to another, sharing equipment and staff, and hinders constructive staff communication. In the proposed school, the classrooms whose programs fit together are next to one another. This will allow students to spend part of their day in each of two classrooms when that is appropriate. The proximity will also allow sharing of equipment, especially large, immobile pieces. The pre-vocational/vocational cluster is an excellent example. The four classrooms will be close enough so that the workshop and kitchen equipment can be shared by all forty students. Secondly, the fact that there are two classrooms now on the second floor means that all physically handicapped students are automatically excluded from those programs. Since the program is sequential this means those students must be ready to jump two steps in order to advance. This is like expecting a second grader to remain in a second grade classroom until he is ready to do fifth grade work. The proposed school will have all classrooms on one floor which eliminates the problem. Third, having all staff in one building will allow better communication and sharing of program ideas. Currently, because classrooms are so spread out, teachers have little opportunity to observe one another or "brainstorm" about mutually beneficial program ideas. The design of the proposed school will correct both.

Another major problem in the present education facility at Harborview is the lack of provisions for physically handicapped students. The second story classrooms have already been mentioned. In addition, the toilet areas do not allow enough stalls large enough for proper transfer from wheelchair to toilet. This is a major safety problem for both students and staff. None of the sinks or home living equipment are presently designed for physically handicapped people which means self-help and home skills programs are difficult for these students. There is also no storage or maneuvering space for wheelchairs and walkers in the one downstairs classroom which is appropriate for physically handicapped students. The proposed facility has storage areas for wheelchairs and walkers and each classroom is large enough to allow students to maneuver in their wheelchairs. In addition to the lack of access to the upstairs classrooms, other areas are awkward or dangerous for wheelchair access, especially in the winter. The proposed school has appropriate access throughout.

Currently the prevocational and vocational classes do not have the space for large pieces of vocational workshop equipment. Since the workshop produces items for sale and is designed as a work setting, provision for as many types of training as possible is desirable. The proposed school has a complete, safely designed woodworking shop. The space and safety limitations also prevent our having a properly set up home living skills area to teach cooking, laundry, and other independent living activities. The new school has a portion designed to meet this section of our curriculum with special provisions for wheelchair bound young people.

In our program toileting, toothbrushing and handwashing are important components. In the present facility there is only one toilet and sink for the twenty one students upstairs. Downstairs, the bathroom facilities are outside the classroom and must be shared with the gym & Occupational Therapy programs.

Finally, the present administrative office serves also as a teachers' lounge and storage area. The lack of administrative privacy makes it difficult to meet individually with staff and infringes on their rights to confidential handling of personal concerns. It also makes it difficult to meet with visitors or parents and focus on the topic at hand. To accomplish any type of written work requiring a large, uninterrupted block of time is almost impossible. In the proposed school administrative, teachers' lounge, and storage areas are separate.

April 18, 1980

Representative Thelma Buchholdt
Pouch V
Juneau, Alaska 99811

RE: HB 805

Dear Representative Buchholdt:

The Governor's Council for the Handicapped and Gifted opposes appropriation of state funds for the construction of a special education wing as an attachment to the new elementary school in Valdez.

The Council believes that construction of such a facility will lead to further institutionalization of handicapped individuals at Harborview Developmental Center rather than encourage development of special education programs and community residential services (group homes, foster care homes) in the handicapped children's home communities.

The funds requested would be best utilized for local services so children at Harborview can be returned home. So long as the majority of funds for this population are channeled to institutional care, handicapped children will continue to be required to ~~have~~ leave their families and home communities in order to receive essential services.

We feel this position is consistent with court cases across the country which require deinstitutionalization of handicapped and mentally retarded individuals. It is also consistent with PL94-142, the Education for all Handicapped Children Act, which requires provision of a free, appropriate public education for handicapped children in the least restrictive environment.

Sincerely yours,

Marsha Buck

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL 805

"An Act making a special appropriation to the City of Valdez for the construction of a disability development section at the Valdez School; and providing for an effective date."

(1) The current space available for Special Education Programs in Valdez is inadequate and does not permit non-ambulatory clients to take part in some educational programs.

(2) HB 805 provides $600,000 to the City of Valdez to assist in the construction of a special education portion of a new school that will be separate from the Harborview Developmental Center.

(3) The proposed facility would provide proper space for educational programs for the 96 severely mentally handicapped clients at the Harborview Developmental Center who come from throughout the State as well as for those children who live at home in the Valdez area and who need special education services.

(4) The Department recommends support for the Bill.

Dear (parents' name)

As you may know, the Valdez City School District is currently planning to build a new school with a wing for the Harborview School program.

The new building is needed for several reasons. First, we do not now have enough classroom space to group all nine classes in one central location. Second, the space we have is not appropriate for the full range of handicaps. And third, it is not adequate for the comprehensive program we should be running.

Since residents of Harborview come from all over the state of Alaska and are residents of a state facility, the community of Valdez should not be required to pay for the special wing of the new school. In order to encourage the state legislature to fully fund the special wing, we are asking concerned parents to write their state senators and representatives requesting that they support full funding for the special school wing.

We would very much appreciate your writing such a letter for us. Will you please send us a copy too, so that we can know what more we must do?

Thank you.

Sincerely,

Mr. Tom Gilson
Asst. City Mgr., City of Valdez
P.O. Box 307
Valdez, Alaska 99686

Dear Tom:

I am sending you copies of HB 805, a special appropriation for the construction of disability development in the Harborview School, and HB 185 and HB 752 concerning cultural facilities.

Both of these issues are of particular significance to Valdez. I will try to keep you informed of their progress.

Cordially,

Margaret Branson
Representative

MAB:mcrs

Enclosures (3)

, from left to right, are Dan Hickok, Doug Cranor, Brent Lisa Wells. In the back row are Brad Jaeger, Mary Ket- Bonte, and Davis Nichols with coach Loyd Nichols.

Notes from Representative Margaret Branson

The issue I will discuss this week concerns the funding of the disability wing in the Valdez school. I have co-sponsored a bill, HB 805, to fund in the amount of $600,000 this special wing on the new Valdez sc[illegible] a project of benefit to all [illegible] of district five and the St[illegible] Alaska.

This wing w[illegible] provide long overdue educational and developmental facilities for the residents of Harborview. This service is currently operating out of the Harborview facilities which are inadequate for several reasons. There is not enough classroom space, it is upstairs, the space available is not appropriate to properly handle the full range of handicaps, and it is not adequate for comprehensive programs that should be provided. The new wing will include many necessary facilities including sensory stimulation areas with a sensory stimulation laboratory, speech therapy facilities and vocational workshops grouped in such a design that students can progress from one to the other without hardship.

The idea of incorporating the facility into the Valdez School rather than an addition to the Harborview facility is important because it will allow much greater versatility in each individual's treatment and education. This combination will allow access to wider range of the school facilities for use by the residents of Harborview and it will also allow for the use of the school by those students who might not be residents of Harborview, but could benefit from some of the special facilities such as the speech therapy area.

Please vote

The program is broken down into classes. These range from a very basic level of sensory stimulation to the level where the student is taught certain vocational skills. With the many advances being made in this field, constant progress is seen in the treatment of the developmental disabilities which affect these young people. The child moves through the program according to ability with the end goal of helping many learn the skills necessary to lead a self-sufficient life.

The State if also taking positive steps in the treatment of developmentally disabled in another area. In the FY 81 budget there has been $48,000 allocated to Prince William Sound Community College to increase instructional programs for the treatment of the developmentally disabled. This has created a very positive situation where the local school district, the state and the University are working together to enhance the care fo the residents of Harborview.

Please vote

Full State funding has been requested for this wing because the residents of Harborview come from all the State of Alaska and do reside in a State facility.

The staff of the Harborview facility and the Valdez school board, administration and staff, and the Dept. of Education deserve a great deal of praise for providing care and training and helping them attain their goals.

Please contact me at Juneau, Pouch V, or 465-4941 if you have need of my help or have comments to make.

Young gets committee post

WASHINGTON—The House Merchant Marine and Fisheries Committee today designated Congressman Don Young as ranking minority (Republican) member on its Coast Guard and Navigation Subcommittee. The Congressman succeeds Rep. Dave Treen who was inaugurated as Louisiana's Governor recently.

"I'm pleased and proud to be named to this post, and the State of Alaska will benefit," said Young. "Alaskans have a special relationship with the Coast Guard. Their presence is vital to our transporation and our industries. As ranking member of the Subcommittee, I'll make sure this relationship becomes even better."

Young has served on the Merchant Marine Committee since his election to Congress in 1973, and on the Coast Guard Subcommittee since that time.

The ranking member functions as a minority leader on the committees, helping to decide the agenda and appointing the minority staff.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill, by itself, does not cause enough extra work to justify extra funding or an additional position. Many such bills have been proposed, however, and if a significant number of them pass, additional funding and one or more positions may be necessary.

POSITION PAPER/Department of Health & Social Services

HB 821

POSITION PAPER

HOUSE BILL NO. 821

"An Act making a special appropriation to the Department of Community and Regional Affairs for the construction of health clinics at King Cove and Sand Point; and providing for an effective date."

HB No. 821 appropriates funding for two $120,000 grants, one to King Cove and one to Sand Point, for the construction of community health clinic facilities.

The clinic that is presently in use in King Cove is owned by the cannery and according to our records is well-equipped but not large enough to provide all levels (preventive, primary and emergency) of health care to the population.

The building housing the clinic in Sand Point is owned by the Mission; the clinic is well-equipped. However, as the population increases, the Mission may want the building back for its own use. This would result in displacement of the clinic and may cause a hardship to the community.

The Department of Health & Social Services supports construction of new health clinics to enhance health care in these communities.

Juneau, Alaska 99811

Dear Ms. Buchholdt:

Re: House Bill No. 826

House Bill No. 826, an Act authorizing licensed grocery stores to sell beer and wine, was introduced in the House on February 18, 1980 and was referred to the House Health, Education and Social Services and Judiciary Committees.

For the consideration of the House Health, Education and Social Services Committee, I am enclosing a copy of a Fiscal Note prepared by Patrick Sharrock, Director, Alcoholic Beverage Control Board, Department of Revenue, Anchorage concerning the proposed legislation.

Sincerely,

R. D. Stevenson
Special Assistant

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

NOTE: This legislation establishes a new "grocery store" class retail liquor license. Costs associated with a new class of license include printing of additional license forms, licensee files, telephone communication costs and postage. Estimated number of applicants for this class of license is unknown. Other sections of Title 4 prohibit minors from entering licensed premises. If grocery stores stock beer and wine for sale, minors would be prohibited from entering a licensed grocery store. This could pose additional enforcement endeavors.

HB

830

Alaska Department of Health & Social Services
DRAFT/Department of Health & Social Services

HOUSE BILL 830

"An Act relating to alcohol and drug abuse; combining and changing the membership of the advisory boards on alcoholism and drug abuse; changing the responsibilities of the office of alcoholism; amending the alcoholism grant-in-aid program; and repealing a requirement for mandatory discharge of an alcoholic from involuntary commitment."

This bill proposes a number of steps the legislature could take to make alcohol and drug abuse prevention and treatment programming more effective and efficient.

First, it clarifies the ABC boards responsibility to adopt regulations that implement the Intent expressed in HB 832 (a related bill).

Second, it allows one member of the Alcohol Beverage Control Board to also serve on the proposed Advisory Board on Alcoholism and Drug Abuse.

Third, it clarifies the responsibility of the proposed new combined board of Alcoholism and Drug Abuse, to review all Alcohol and Drug related grant applications, submitted to the Department for funding.

Fourth, it enables the Department to waive local community dollar match requirements for State grants, under certain conditions, thereby affording small poverty striken local communities an opportunity to receive State Alcohol and Drug Abuse grant funds for programs.

Fifth, it ratifies an already existing operational reality by formally designating the office as the "Office of Alcoholism and Drug Abuse".

Sixth, it adds appropriate members (especially the Director of the ABC board) to the State "Interdepartmental Coordinating Committee".

Seventh, it creates a combined advisory board for alcoholism and drug abuse. Combination of these two boards is favored by a majority of both existing advisory boards, a majority of local program personnel, the staff of the office of alcoholism and drug abuse, the three regional health systems agencies, a majority of the Native Health Corporations, and the Commissioner.

The benefits of a combined board, as proposed, are; 1) Regional membership which makes the board both more representative and more accessible; 2) Regional membership makes it possible for the board to work more closely with the Health Systems Agencies; 3) Number of full board meetings would be reduced from eight per annum, to four per annum; 4) Makes it possible for all local communities administering both alcoholism and drug abuse programs to negotiate levels of support with one board, in one place, at one time, instead of two; 5) Greatly reduces the time, travel costs, and secretarial support necessary to staff two boards, freeing State Office resources to do more in the areas of planning and program Administration; 6) Affords alcoholism and drug abuse program interests, access to and participation with the State Health Planning process since the combined board would be a subcommittee of the State Health Coordinating Council, and; 7) Makes it more convenient for the legislature to hold the whole alcoholism and drug abuse program effort accountable, through their oversight on one office and one advisory board.

The balance of the bill alters responsibility for custody of intoxicated persons who are involuntarily committed to treatment by the Courts, by removing responsibility for such custody from the State Office and giving that responsibility to the local treatment programs funded by the Office. This provision enhances both the convenience and effectiveness of local courts ability to see to it that their commitment orders are carried out by local programs.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
Presently, the two boards have a total of twenty appointed members. FY 80 costs for eight board meetings will be $42,000 for boards travel and per diem, or an average cost of 5,250 per meeting. The projected cost of four statewide meetings of a combined board of thirteen members in FY 81 would be computed as follows:

FY 80 cost per member per meeting = $ 525
\+ Est. 12% FY 81 travel/per diem inflation = 63
Net cost FY 81 per member per meeting = $ 588

13 members x 4 board meetings @ 588 each per member = 13 x 4 x 588 or, 30,576
Cost savings for board travel and per diem $11,424

Dear Representative Bucholdt:

Your Health Education and Social Services Committee requested a fiscal note reflecting the impact of a 90% - 10% match requirement for all alcoholism grant-in-aid programs.

Under the existing statute, non-poverty communities have a 25% match requirement while poverty communities have a 10% match.

The attached fiscal note displays these amounts at the level of funding proposed in the Governor's FY 81 budget.

Sincerely,

Robert L. Cole

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
Presently, the two boards have a total of twenty appointed members. FY '80 costs for eight board meetings will be $42,000 for boards travel and per diem, or an average cost of 5,250 per meeting. The projected cost of four statewide meetings of a combined board of thirteen members in FY 81 would be computed as follows:

	FY 80 cost per member per meeting	=	$ 525
+	Est. 12% FY 81 travel/per diem inflation	=	63
	Net cost FY 81 per member per meeting	=	$ 588

13 members x 4 board meetings @ 588 each per member = 13 x 4 x 588 or, 30,576
Cost savings for board travel and per diem $11,424

Rep. Thelma Buchholdt
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Thelma,

Thank you for making me aware of the upcoming Committee meeting on HB 830. If I could attend I would be there, but the finances get tight after just returning from a trip to Juneau.

I request that you distribute the enclosed packets to each of your committee members for their consideration. I am angry and frustrated and I guess that shows. We have been going through this type of threat every couple of years as the state office attempts to corner the market on all aspects of drug/alcohol treatment.

If anyone on the Committee has any questions, please allow them the freedom to contact me. I will remain in the office on the 10th of April in case I can be of any additional assistance to the Committee.

Again, thank you for the consideration.

Sincerely,

Frank

Frank J. Gold, EdD
Programs Director

PS: Could you please put the enclosed envelopes in the appropriate mail boxes? That would be appreciated.

Room 112 - Capitol Building
Juneau, AK 99811

Dear Ms. Buchholdt:

HOUSE BILL NO. 830

House Bill No. 830, an Act relating to alcohol and drug abuse; combining and changing the membership of the advisory boards on alcoholism and drug abuse; changing the responsibilities of the office of alcoholism; amending the alcoholism grant-in-aid program; and repealing a requirement for mandatory discharge of an alcoholic from involuntary commitment, was introduced in the House on February 18, 1980 and was referred to the House Health, Education and Social Services and Finance Committees.

For the consideration of the House Health, Education and Social Services Committee, I am enclosing a copy of a Fiscal Note prepared by Patrick Sharrock, Director, Alcoholic Beverage Control Board, Department of Revenue, Anchorage concerning the proposed legislation.

Sincerely,

R. D. Stevenson

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 830

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to alcohol and drug abuse; combining and changing the membership of the advisory boards on alcoholism and drug abuse; changing the responsibilities of the office of alcoholism; amending the alcoholism grant-in-aid program; and repealing a requirement for mandatory discharge of an alcoholic from involuntary commitment."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 04.05.010(a) is amended to read:

(a) There is established an Alcholic Beverage Control Board within the Department of Revenue consisting of five members appointed for overlapping three-year terms. The board is vested with the duties, powers, and responsibilities involved in the control of alcoholic beverages, including the adoption of [PROMULGATION OF RULES AND] regulations and the hearing of appeals from the action of officers and employees charged with enforcing the alcoholic beverage control laws [, RULES,] and regulations. The governor shall appoint the board subject to confirmation by the legislature. With the exception of membership on the Advisory Board on Alcoholism and Drug Abuse, a [NO] member of the board may not hold any other state or federal office, either elective or appointive. Two members of the board shall be actively engaged in the alcoholic beverage industry, except that no member may be an officer, agent, or employee of a wholesal alcoholic beverage enterprise. No three members of the board may be engaged in the same business, occu-

pation or profession. Three members constitute a quorum for the conduct of business. The board shall meet at least once each year in each of the four judicial districts to study, reconsider and modify existing agency [RULES AND] regulations in the light of current local problems.

* Sec. 2. AS 47.30.475(b) is amended to read:

(b) Money available under this section shall be awarded by the department to applicants on the basis of community need, but only if the award is consistent with the annual implementation plan developed under sec. 1513(b)(2) of P.L. 93-641 by the health systems agency for the health system area in which the applicant is located and the state health plan developed by the Statewide Health Coordinating Council under sec. 1524(c)(2)(A) of P.L. 93-641, and only after consideration of comment and advice of the Advisory Board on Alcoholism and Drug Abuse. In awarding grants, the department shall further consider the amount of money that is available for all applications and whether an application would contribute to the wise development of a comprehensive program of alcoholic rehabilitation and prevention.

* Sec. 3. AS 47.30.475(c) is amended to read:

(c) Grants shall be awarded in a ratio of 90 [75] percent state money to 10 [25] percent community money [, EXCEPT THAT IN COMMUNITIES DESIGNATED AS POVERTY AREAS THE RATIO SHALL BE 90 PERCENT STATE MONEY TO 10 PERCENT COMMUNITY MONEY,] for the costs of providing staff and limited improvement, renovation or new construction of facilities for alcoholic detoxification, rehabilitation or "half-way house" care. The department shall count the value of an in-kind contribution made by a community in determining whether the requirement of community money has been met. No grant for improving, renovating or constructing may exceed $50,000 except when there is a lack of applicants for available money and then only with the approval of the Advisory Board on Alcoholism

and Drug Abuse. The department is not required to award all money available under this program, or the full percentages specified in this subsection, when another source of money is available or could reasonably be made available to the applicant.

* Sec. 4. AS 47.37.020 is amended to read:

Sec. 47.37.020. OFFICE OF ALCOHOLISM AND DRUG ABUSE. An office of alcoholism and drug abuse is established in the department. The office shall be headed by a coordinator appointed by the commissioner. The coordinator shall be a qualified professional who has training and experience in the organization and administration of treatment services for persons with medical-social problems. The coordinator is in the classified service.

* Sec. 5. AS 47.37.050(a) is amended to read:

(a) An interdepartmental coordinating committee is created, composed of the coordinator, [AND] the commissioners of health and social services, education, transportation and public facilities [HIGHWAYS], labor and public safety, and the direc or of the Alcoholic Beverage Control Board. The committee shall meet at least twice annually at the call of the commissioner of health and social services who is its chairman. The committee shall provide for the coordination and exchange of information on all programs relating to alcoholism, and act as a permanent liaison among state departments engaged in activities affecting alcoholics and intoxicated persons. The committee shall assist the commissioner of health and social services and the coordinator in formulating a comprehensive plan for prevention of alcoholism and for treatment of alcoholics and intoxicated persons.

* Sec. 6. AS 47.37.060 is amended to read:

Sec. 47.37.060. ADVISORY BOARD ON ALCOHOLISM AND DRUG ABUSE. There is established in the Department of Health and Social Services an

Advisory Board on Alcoholism and Drug Abuse. This board shall function as a standing committee of the Statewide Health Coordinating Council established under AS 18.07.011.

* Sec. 7. AS 47.37.070 is amended to read:

Sec. 47.37.070. COMPOSITION. The [ADVISORY] board [ON ALCOHOLISM] consists of a member of the Alcoholic Beverage Control Board selected by its members and nine members appointed by the governor.

* Sec. 8. AS 47.37.080 is repealed and re-enacted to read:

Sec. 47.37.080. QUALIFICATIONS OF APPOINTED BOARD MEMBERS. (a) Of the nine appointed members of the board

(1) two shall be persons who are licensed to practice medicine in the state, one of whom shall be certified in psychiatry;

(2) one shall be a practicing attorney who has been admitted to the practice of law by the state supreme court;

(3) six shall be persons who have evidenced an interest in the problems of alcoholism or drug abuse and who have knowledge of the social problems associated with alcoholism or drug abuse.

(b) Of the nine members qualified under (a) of this section

(1) three shall be residents of the northern health systems area established under 42 U.S.C. 300;

(2) three shall be residents of the southcentral health systems area established under 42 U.S.C. 300;

(3) three shall be residents of the southeastern health systems area established under 42 U.S.C. 300.

* Sec. 9. AS 47.37.090 is repealed and re-enacted to read:

Sec. 47.37.090. TERM OF OFFICE. (a) The term of a board member is four years, except the chairman of the Alcoholic Beverage Control Broad who serves ex officio.

(b) A vacancy occurring in the appointive membership of the board

shall be filled by appointment of the governor for the unexpired portion of the vacated term.

(c) Appointed board members serve at the pleasure of the governor.

* Sec. 10. AS 47.37.100 is amended to read:

Sec. 47.37.100. COMPENSATION, PER DIEM, OR EXPENSES. Members of the [ADVISORY] board [ON ALCOHOLISM] are not entitled to a salary, but are entitled to per diem, reimbursement for travel and other expenses authorized by law for other boards.

* Sec. 11. AS 47.37.110 is amended to read:

Sec. 47.37.110. DUTIES. The board shall act in an advisory capacity to the commissioner and the Statewide Health Coordinating Council established under AS 18.07.011 in the following matters:

(1) special problems affecting mental health which alcoholism and drug abuse may present;

(2) educational and research activities conducted by the office in respect to the problems presented by alcoholism and drug abuse;

(3) social problems which affect rehabilitation of alcoholics and drug abusers;

(4) legal processes which affect the treatment and rehabilitation of alcoholics and drug abusers;

(5) a program of public relations concerning the problem of alcoholism and drug abuse conducted by a department of the state government or by an organized group; [WHOSE PURPOSE IS THE REHABILITATION OF ALCOHOLICS]

(6) the preparation, review, and approval of local, regional and statewide plans for the prevention, treatment, and control of alcohol and drug abuse.

* Sec. 12. AS 47.37.120 is amended to read:

Sec. 47.37.120. [ALCOHOLISM] PROGRAM COORDINATOR. The [ALCOHOLISM] program coordinator shall carry out the development and implementation of a comprehensive program dealing with the treatment of, research on and education concerning alcoholic problems as they affect the state.

* Sec. 13. AS 47.37.130(c) is amended to read:

(c) The office shall insure that [PROVIDE] adequate and appropriate treatment is provided to [FOR] alcoholics and intoxicated persons admitted under AS 47.37.160 - 47.37.190 within the limits of available state and federal funds.

* Sec. 14. AS 47.37.160(c) is amended to read:

(c) When a patient receiving inpatient care leaves an approved public treatment facility, he shall be encouraged to consent to appropriate outpatient or intermediate treatment. If it appears to the administrator in charge of the treatment facility that the patient is an alcoholic who requires help, the administrator [OFFICE] shall arrange for assistance in obtaining supportive services and residential facilities.

* Sec. 15. AS 47.37.190(a) is amended to read:

(a) After a hearing initiated by petition of his spouse or guardian, a relative, the certifying physician, or the administrator in charge of an approved public treatment facility, a person may be committed to the custody of a private or public facility [THE OFFICE] by the superior court. The petition shall allege that the person is an alcoholic who habitually lacks self-control in using alcoholic beverages and that he (1) has threatened, attempted to inflict, or inflicted physical harm on another and that unless committed is likely to inflict physical harm on another; or (2) is incapacitated by alcohol. A refusal to undergo treatment does not constitute evidence of lack of judgment as to the need for

treatment. The petition shall be accompanied by a certificate of a licensed physician who has examined the person within two days before submission of the petition, unless the person whose commitment is sought has refused to submit to a medical examination, in which case the fact of refusal shall be alleged in the petition. The certificate shall set out the physician's findings in support of the allegations of the petition.

* Sec. 16. AS 47.37.200(a) is amended to read:

(a) At the hearing required under AS 47.37.190(b), the court or the jury, if requested under AS 47.37.190(c), shall hear all relevant testimony, including, if possible, the testimony of at least one licensed physician who has examined the person whose commitment is sought. The person whose commitment is sought shall be present unless the court believes that his presence is likely to be injurious to him, in which case the court shall appoint a guardian ad litem to represent him throughout the proceeding. The court may examine the person in open court, or if advisable, examine him out of court. If the person has refused to be examined by a licensed physician, he shall be given an opportunity to request examination by a court-appointed licensed physician. If he fails to request a medical examination and there is sufficient evidence to believe that the allegations of the petition are true, or if the court believes that more medical evidence is necessary, the court may issue a temporary order committing him to <u>a private or public facility</u> [THE OFFICE] for a period of not more than five days for purposes of a diagnostic examination.

* Sec. 17. AS 47.37.200(b) is amended to read:

(b) If after hearing all relevant evidence, including the results of any diagnostic examination by the <u>private or public facility</u> [OFFICE], the court or the jury finds that grounds for involuntary

commitment have been clearly established, the court shall issue an order of commitment to the private or public facility [OFFICE]. No court may order the commitment of a person unless it determines that a private or public facility [THE OFFICE] is able to provide adequate and appropriate treatment for him.

* Sec. 18. AS 47.37.200(c) is amended to read:

(c) A person committed under AS 47.37.190 - 47.37.200 shall remain in the custody of a private or public facility [THE OFFICE] for treatment for a period of up to 30 days. At the end of the 30-day period, he shall be discharged automatically unless the private or public facility [OFFICE], before the expiration of the period, obtains a court order for his recommitment upon the grounds set out in AS 47.37.190(a) for a further period of up to 90 days. If a person has been committed because he is an alcoholic likely to inflict physical harm on another, the private or public facility [OFFICE] shall apply for recommitment if after examination it is determined that the likelihood still exists.

* Sec. 19. AS 47.37.200(d) is amended to read:

(d) A person recommitted under (c) of this section who has not been discharged by the private or public facility [OFFICE] before the end of the 90-day period shall be discharged at the expiration of that period unless the private or public facility [OFFICE], before expiration of the period, obtains a court order on the grounds set out in AS 47.37.190(a) for recommitment for a further period not to exceed 90 days. If a person has been committed because he is an alcoholic likely to inflict physical harm on another, the private or public facility [OFFICE] shall apply for recommitment if after examination it is determined that the likelihood still exists. No more than two recommitment orders may be permitted under (c) and (d) of this section.

* Sec. 20. AS 47.37.200(f) is amended to read:

(f) A private or public facility [THE OFFICE] shall provide adequate and appropriate treatment for a person in its custody. A public facility [THE OFFICE] may transfer a person in its custody from one approved public treatment facility to another if the transfer is medically advisable.

* Sec. 21. AS 47.37.230(a) is amended to read:

(a) Cities [THE OFFICE AND CITIES] and boroughs may establish emergency service patrols. An emergency service patrol consists of persons trained to give assistance in public places to persons who are intoxicated. Members of an emergency service patrol shall be capable of providing first aid in emergency situations and shall be capable of transporting intoxicated persons to their homes and to and from public treatment facilities.

* Sec. 22. AS 47.37.240(a) is amended to read:

(a) A patient in an approved treatment facility, or the person obligated to provide for the cost of treatment of a person committed under this chapter, is liable to the public or private facility [OFFICE] for the cost of maintenance and treatment of the patient in accordance with rates established by the coordinator.

* Sec. 23. AS 47.37.270(2) is amended to read:

(2) "approved private treatment facility" or "private facility" means a private agency meeting the standards prescribed in AS 47.37.140(a) and approved under AS 47.37.140(c);

* Sec. 24. AS 47.37.270(3) is amended to read:

(3) "approved public treatment facility" or "public facility" means a treatment agency operating under the direction and control of the office or providing treatment under this chapter through a contract with the office under AS 47.37.130(g) or through a grant awarded under AS 47.30.475, and meeting the standards prescribed in AS 47.37.140(a)

and approved under AS 47.37.140(c);

* Sec. 25. AS 47.37.270(11) is amended to read:

(11) "office" means the office of alcoholism and drug abuse within the Department of Health and Social Services;

* Sec. 26. AS 47.37.270 is amended by adding a new paragraph to read:

(13) "board" means the Advisory Board on Alcoholism and Drug Abuse established under AS 47.37.060.

* Sec. 27. AS 44.29.100 - 44.29.140 and AS 47.37.200(g) are repealed.

* Sec. 28. The terms of the present members of the Advisory Board on Alcoholism and the Advisory Board on Drug Abuse terminate on the effective date of this Act. Appointments to the Advisory Board on Alcoholism and Drug Abuse shall be made in accordance with this Act. A person presently serving on either of those boards who meets the qualifications of this Act may be appointed to the Advisory Board on Alcoholism and Drug Abuse.

HOUSE BILL 831

"An act relating to admissibility of refusal to take breathalyzer tests".

The Office of Alcoholism and Drug Abuse is supportive of House Bill 831. Drinking drivers presently are the largest contributor to Alaska's high rate of accidental death and injury and increased strategies to curb this serious problem are needed. Data from existing Alaska OMVI diversion programs indicate that in excess of 50% of the people presently being convicted of OMVI in fact have serious drinking problems which require treatment. The passage of House Bill 831 would tend to increase the number of convictions and the subsequent referral of these people to diversion programs for alcohol problem screening and diagnosis.

From: Ginny Chitwood

Re: HB 838

The Alaska Municipal League supports legislation such as HB 838 under which the state will provide funding for all approved school capital projects at the time of approval instead of two years later. Depending on administrative requirements, there may be a modification to allow the Department of Education time to review district audits prior to making payments.

Passing a law to eliminate the reimbursement delay, however, will not help municipalities unless the Legislature is willing to fund it. As a first step, we would like to see current law funded at its present level. In FY '79, the appropriation was $5.6 million less than the entitlement; in FY '80, $6.7 million less; and proposed FY '81, $5.2 million less than estimated entitlement. (See reverse side for community by community breakdown in FY '79. The breakout for FY '80 is very similar.)

In summary, we urge the Legislature to assist municipal school districts with their capital construction projects. Please fund the program at its authorized level and, if at all possible, shorten or eliminate the two-year reimbursement delay.

Testimony - April 11, 1980

In support of H.B. 838

Chairman Buckholdt, and members of the HESS Committee:

My name is Jim Hitchcock, and I'm a Mat-Su Borough Assemblyman, here representing that body. I am a property owner and owner of Caribou Cab Company, a log house building firm. I've lived in Alaska since 1939, and homesteaded in the Mat-Su Valley with my parents in 1943.

I'm before you to speak in favor of H.B. 838, which relates to debt service for school construction. Municipalities desire that the state fund the 80% share of school construction during the same year in which the debt is incurred and bring to date the present two year lag.

The two year delay has increased costs to taxpayers by carrying this debt forward, and causes an erratic mill rate.

There is good reason for the state to relieve taxpayers of this extra burden, therefore I request your support of H.B. 838.

- J. Hitchcock -

James Hitchcock
Borough Assemblyman
Mantanuska-Susitna Borough Assemblyman
Box 867
Palmer, Alaska 99645

April 11, 1980

Chairman Buckholdt, and members of the HESS Committee;

My name is Dorothy Jones from Talkeetna, Alaska. I am a member of the Matanuska-Susitna Borough Assembly. I have been an Alaskan for 47 years and a businesswoman for 25 of those years. As a private citizen and as a Borough Assembly member, I urge your favorable consideration of H.B. 838. This would in effect alleviate a considerable tax burden now placed upon the taxpayer since we now must put up front end money for construction and then wait two years for reimbursement.

Thank you.

Note: The money for the Matanuska-Susitna Borough is expecting for reimbursement for this year and the prior year for expenses incurred amounts to $982,309.00. However, we are having to carry these reimbursible expenses (2 years) ($2,376,314) an extra year because they are not returned on a timely basis. Following our fiscal year end each June 30, the Assembly mandates an independent audit. When the audit has been completed and published we forward it to the State of Alaska and we feel we should be able to have the money sent to the Borough shortly after the State has received the audit and reviewed it.

Dorothy Jones

Dorothy Jones
Matanuska-Susitna Borough Assembly

HB
861

Section-by-section Analysis of HB 861

Section 1. Adds a new chapter to the water, air and environmental conservation title of the Alaska Statutes.

Sec. 46.12.010 establishes a revolving loan fund in the Department of Environmental Conservation. Loans may be made from the fund for the extension of existing municipal water and sewer systems.

Sec. 46.12.020 authorizes the department to administer the loan fund; requires the department to consult with the Department of Community and Regional Affairs during the administration of this loan program.

Sec. 46.12.030 establishes the terms for repayment of loans which are:

(1) 10 percent down payment;

(2) five percent interest; and

(3) repayment over a period of 40 years.

Sec. 46.12.040(a) authorizes the department to sell loans to private investors at face value or at a discount.

(b) authorizes the commissioner of revenue to purchase loans at face value with surplus state revenue.

Section 2. Makes the Act effective on July 1, 1980.

Budget and Management

FY 82: The budget for the Loan Administrator should remain about the same in FY 82 except for merit increase in salary and inflation effects on the other categories. Clerical help should still be available in the administrative service section.

FY 83: During FY 82, it is anticipated that discontent with the Loan Program will have surfaced and a Loan Advisory Board will be established. The expenses of the board and part-time clerical help is reflected in the FY 83 budget. Recording equipment and a second typewriter will be needed.

FY 84: This fiscal year's budget should reflect only normal increases.

JUSTIFICATION: The Loan Administrator will monitor the fiscal records of the fund, maintain current and accurate accounts of fund moneys, prepare monthly financial statements for the Commissioner, prepare bills and delinquent statements. The incumbent will confer, coordinate, and advise the appropriate municipal officials.

During the first 6 months of the program, the necessary regulations will be written, public hearings conducted, and regulations adopted. Actual loan processing will follow the adoption of regulations.

HB 861

MEMO

To: The Honorable Joyce Munson

From: Christine Johnson CJ
Temporary Research Analyst, House Research Agency

Through: Duncan L. Read DLR
Director, House Research Agency

Date: November 20, 1979

Subject: Request for bill regarding revolving loan fund for sewer construction.

Enclosed please find SB 19, introduced in the Ninth Alaska State Legislature, which establishes a revolving loan fund for sewer construction within incorporated municipalities. This bill was introduced in 1975 by former Senator Genie Chance. The bill was referred to Senate Resources, Finance, and Rules, but it was never reported out by the first committee of referral.

Ms. Chance coincidentally was in Juneau when we were locating the bill for you. She recalls that she introduced this legislation to alleviate a problem in Anchorage where the cost of putting in sewer and water systems was significantly increasing the cost of subdivision development. Ms. Chance indicated that the high cost made it difficult for municipalities to require sewer and water systems in some areas under development. SB 19 would have provided long-term low interest loans for municipalities in anticipation that annual property assessments could then be lowered.

Members of the Anchorage Planning and Zoning Commission expressed interest in the bill as did the Anchorage Borough Assembly. The bill also received some support from other municipalities, such as Valdez, who needed additional monies for sewer construction. According to Ms. Chance, there was no opposition to the bill, but because of other revenue issues before the legislature that session, the bill was not acted upon by the first committee of referral. Of course, we kept your inquiry confidential when we obtained this information for you.

We apologize for the quality of the reproduction of the bill. Older bills have been transferred onto microfilm which often will not produce clear copies. Please do not hesitate to contact us if you require further information on this or similar legislation.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 862

"An Act making a special appropriation to the Department of Health and Social Services for the purchase and dissemination of materials produced by the Growing Child Program; and providing for an effective date."

Persons may become parents with little or no knowledge or understanding of child development, changes that occur within the family or the variety of emotions evoked in parents and children. Consequently, parents frequently have problems in coping with the normal feelings of depression and anger that accompany the joys of a new baby.

House Bill 862 will provide $68,200 for the purchase and dissemination of educational materials produced by the Growing Child Program. The distribution of these materials will be administered by the Division of Mental Health and the Division of Public Health. The initial introduction of these materials to new parents will be made with a personal visit to the hospital or home. Subsequent copies will be distributed through monthly mailings. The Divisions are presently pursuing options by which parents, according to ability to pay, may contribute to the purchasing cost.

The Department does recommend a change in wording. The Growing Child Program is a copyrighted feature of a specific company. The naming of a particular firm or trade name is contrary to the state's bidding and purchasing policies. The Bill should be amended to provide for the purchase and dissemination of child development and parenting skills materials, rather than specifically naming the Growing Child Program.

The Department therefore recommends the following amendments:

CHANGE TITLE OF BILL TO READ:

"An Act making a special appropriation to the Department of Health and Social Services for the purchase and dissemination of educational materials related to child development and parenting skills."

CHANGE *SECTION 1. TO READ:

"The sum of $68,200 is appropriated from the general fund to the Division of Mental Health, Department of Health

POSITION PAPER/Department of Health & Social Services

and Social Services, for the purchase and dissemination of educational materials related to child development and parenting skills."

The Department supports the need for preventive health education materials.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It has been determined that there are approximately 9000 live births per year in Alaska. Each new family would receive a direct mailing with follow-up to provide an annual subscription to a monthly professional production media service. Department material will be included in each monthly mailing to provide educational material on parenting and nurturing skills relative to the age of the child.

Initial contact will be to 9000 persons with an expected participation for 50% of the contacted families. A part time clerk is projected to coordinate and physically prepare mailings of an estimated 58,500 individual mailings per year.

100 - 3 man-months Clerk Typist III
@ 1277 per month + benefits 4941
300 - 4500 annual subscription to prepared
material @ $5.25/year = 23,625

Growing Child®

Babies Like To:

Suck
Listen to repeated soft sounds
Stare at movement and light
Be held and rocked

Give Your Baby:

Your talking and singing
Lamps throwing light patterns
Your arms

Here You Are!

Something new and wonderful has happened to you: you are now parents! You're probably feeling happy, excited, elated, and yes, just a little frightened at the thought of the new life you've created and the responsibility of being Mother and Father. Don't feel alone. We've just described what is probably a universal reaction to parenthood.

During this first month you're going to be concerned with many things – most of them will be new situations for you such as feeding and adjusting to schedules, but after some of the excitement dies down, you're going to have a lot of questions. Most of them will concern the physical health of your child, and we'll discuss this a little later. You're also going to have questions about the proper growth and development of your child.

Today there is a great deal of research being done on how infants develop and how to help them develop. Most research suggests there are lots of things you as parents can do to help your child develop mentally, physically, and emotionally.

This, then, is the purpose of *Growing Child:* to emphasize the importance of mental development and to provide you with information to help you learn about your baby and about yourselves as parents; to help you learn what you can provide for your child so that he might develop, mentally and emotionally, to his fullest potential.

A special note for those of you who have other children: this information is just as important for your second or third child; learning and development is not restricted to a first child so make sure you take advantage of the information available for your new baby.

Brothers & Sisters

At last the big day arrives when you and your baby go home. If you have other small children waiting at home, give some thought to the situation.

When you arrive home, put the baby down and appear to ignore him while you greet the other children and make a big fuss over them. They will then discover Baby and quickly make him their own. Let them touch him, unwrap him, and hold him if they want to. It may take a little control on your part, but they won't hurt him.

In your care for Baby, let the other children help. There are small chores they can do which will include them in your attention and make them feel needed.

Don't be surprised if your youngest regresses to thumb sucking and wet, dirty pants or demands to be fed from a bottle just like Baby. Take a little time to spend with him alone to repair his bruised ego. Mother and Father should make it a point to assure your children you love them as much as before Baby came but that right now he is small and needs extra attention.

A Newborn Baby

Mother-to-be type magazines should publish pictures of newborns more often to prepare new parents a little better for the shock of seeing their baby. One mother told her husband in the delivery room, "Oh, honey, he's beautiful, but we'll really have to love him hard because he's so homely!" She was right. A new life is beautiful, but newborns are not the light pink, round babies smiling from the magazine pages. A newborn's skin is often red and scaling, his little nose is often misshapen or flat after birth, and it's hard to see his eyes as they're often tightly closed.

Baby's head accounts for about one quarter of his size. Although this makes him look a little odd, it's a good thing, and here's why:

The head and the brain have already become very well developed before he was born. From now on the brain will continue to develop, but the rest of the body will have to catch up. The typical pattern of development is from the head downward to the rest of the body and from the center of the body to the extremities (for example, the fingers). As an illustration, in a very short time Baby will learn to watch things. His eyes do see almost from the beginning, but mostly they just see things close to them that are brightly colored. When you lean over

the crib or hold Baby close to you, very likely he does see something. And he can use his eyes to explore the world long before he can use his body to crawl and explore.

Right now Baby may move his arms a little but the fists are usually clenched tightly and the whole arm moves in a jerky way. Later he will have developed better control of his arms and will bat at things. Still later he will be able to use his fingers to try and grasp things. This is an example of development from the center of the body outward (from the whole arm to fingers). In the months ahead, watch for your baby's development.

Birth Marks

Every baby has "birth marks." There are a lot of interesting stories about their being caused by something that happened while the baby was being "carried" or during his delivery. Actually they are either minor variations in normal skin development or inherited or racial characteristics.

The most common birth mark is the nevus flameus. This is a medical name for the pink-red, flame-shaped marks seen on the forehead, upper eyelids, and tail-bone areas of some babies and on the nape of the neck of almost all infants. These are commonly called "stork bites." They become more noticeable when the baby holds his breath or cries. They usually disappear in one or two years although those on the neck may always be there. Nevus flameus is often confused with stains from the silver nitrate that is put into the eyes of babies to prevent serious eye infection at birth. This stain is light brown in color, present only around the eyes and disappears as the face is cleansed.

Sometimes birthmarks are deeper, larger and more blue in color. These are called hemangiomas and although they appear serious, they usually disappear in early childhood. Occasionally some type of surgery or other treatment needs to be carried out on these, but it is usually not done until enough time has gone by to be sure that they are not going to disappear spontaneously.

The familiar brown mole or "freckle" is usually not present at birth. It appears as the skin gets older. Sometimes it also disappears. Most of them, however, will be with your child all of his life and are useful as identification marks.

A port-wine nevus is darker and more blue than nevus flameus and can be located on any body area, particularly the face or scalp. These do NOT disappear and require either cosmetic surgery or cover makeup to make them less noticeable.

Strawberry marks can be found on any part of the baby's body. They are usually not present at birth but appear shortly after. They are small, raised, and irregular in shape and have a raspberry rather than a strawberry color. They usually grow for one to four months and then slowly disappear.

Mongolian spots are smooth, blue-gray, irregularly shaped areas of skin over the tail-bone and buttocks of dark-skinned or oriental infants. They disappear in the first few years of life and have no significance except that they can be mistaken for bruises.

As you can see, most birth marks are not serious and, although they may "mark" your baby at birth, they certainly do not "mark" him for life.

Diet and the New Mother

"Now that that's over, I can go back to eating again!" That is the way most new mothers feel, especially if they have had to watch their diet carefully during pregnancy because they were gaining too much weight or getting too much salt. Unfortunately, the diet watching is only beginning particularly if the mother is still overweight after delivery and/or is breast feeding.

If the problem is just too many pounds and breast feeding is not part of the picture, a balanced, moderately low-calorie diet can be used. It is not wise to use an extremely low-calorie or "fad" diet right after a pregnancy to quickly "get back into shape" again. The body takes time, adequate nutrition and exercise to regain its pre-pregnancy condition. That is why most doctors also advise their new mothers to continue taking their pre-natal vitamins and minerals (including iron, in some cases).

Breast feeding increases the care a new mother must take in selecting her diet for she must be well-nourished to supply adequate good-quality milk for her infant. She must also be alert to the effects of certain foods on the baby's response to the breast feeding. For instance, chocolate, spices, cabbage, certain juices and onions may pass through the breast milk to the child and cause mild stomach upsets such as colic or diarrhea. The amount of trouble these foods cause means a great deal with the individual mother and baby. Most new nursing mothers soon learn to recognize those foods which affect their breast milk and the baby's response to it.

An important, but often overlooked factor concerning the new mother's diet is her emotional response to food and the effect of that response on the baby. The mother who has poor eating habits will pass them on to her baby. Children learn by imitation and when it comes to eating they first imitate their mother. Her reaction to food quickly becomes theirs. If she eats an unbalanced diet herself, she will probably offer the same to her child. And even if she tries the "do as I say and not as I do" routine, the baby will very early sense the contradictory attitude and become the so-called problem eater.

So, along with all of the other responsibilities of being a new mother there is the most important job of eating correctly to maintain your own health and to teach the baby that good nutrition is fun and necessary. It is a lesson that will help him all of his life.

Your Baby and His Intelligence

Experts in child development know that the right kind of experiences in infancy and the early childhood years can increase a child's intelligence, and there are many scientific studies which support this idea.

There are also many studies of identical twins reared in different homes. In general, these studies showed that the twin who had the best kind of early experiences had a higher intelligence than the twin who had poor early experiences. These tests are very important since identical twins come from the same cell, which means their heredity is identical. They have the same genes. This means that heredity is not the only factor which determines intelligence, but experience in early life also plays an important part.

In 1939 there was what experts call a "classic study." The results are rather startling and further support the idea of the importance of early experiences.

The study, by H.M. Skeels and H.B. Dye, tells about 13 infants and young children who were in an orphanage. The youngest was 7 months old and the oldest was 30 months. All 13 children were transferred from the orphanage to a school for mentally retarded children. At the time of transfer, they had an average Intelligence Quotient (IQ) of 64.3 with the lowest being 36 and the highest 89.

When transferred, these children were placed in a ward with some older and brighter girls who started playing with them during most of the time they were awake.

Just by playing with these babies, the older girls provided many more experiences and much more stimulation than was provided for the children left behind in the orphanage.

After the new arrivals had been in the ward for some time, the people making the study gave a second intelligence test. All 13 children showed gains in IQ. The smallest gain was 7 points and the largest 58 points. All but four showed gains of at least 20 points. A check of the 12 children who remained behind in the orphanage showed an amazing difference. One had a decrease of only 8 points but the other 11 children showed decreases from 18 to 45 points.

Twenty-one years later all the children in both groups were located. The differences are startling. Of the 13 transferred to the school for the mentally retarded (the group where the older girls played with the children), all were self-supporting and none was in an institution. Of the group that remained in the orphanage, one died in an institution for the retarded and five were still in state institutions.

The difference in education between the two groups is just as startling. Of the group transferred, the median grade completed was the 12th grade. In fact, one boy received a bachelor's degree from a large state university. For the group of 12 that remained at the orphanage, half did not complete the third grade and none of them went to high school.

Clearly this study shows the importance of early learning experience for development of intelligence and for general independent functioning in the world. A school for retarded children is not the best place for giving these early learning experiences, but even in this setting, the older retarded girls who played with the children seem to have given the kind of stimulation that made tremendous differences in the children's later abilities.

This is what *Growing Child* is all about—to help you give your infant the early experiences that can have an important influence on intelligence and on independent functioning.

Your Baby's Birth Certificate

Be sure to get a birth certificate for your baby. It is legal proof of the date of your child's birth and citizenship. Throughout life he will need this proof of identity. It may be required when a child enters school, requests a driver's license, goes to work. It may be needed to prove his right to vote, to marry, to draw social security benefits, to hold office, inherit property, or obtain a passport to travel in foreign countries.

If the baby is born in a hospital, the staff will see that necessary information is sent to the local health department or registrar of births. If you have not selected a name for the baby before you leave the hospital, be sure to add it to the official record later.

If the baby is born at home, the midwife or doctor (or the parent if no one assists at the birth) is required by law to report the birth to the local authorities.

You will be officially notified when the record of your baby's birth is on file. Some States send a copy of the registration. If any of the information is wrong, be sure to get it corrected immediately. In some States,

the birth certificate is sent only on request and for a fee. There is practically always a charge for a second copy, so keep your baby's certificate in a safe place.

If you do not receive notice of the proper registration in a few weeks, check on it. Call the hospital or local health department. Or write to your State health department, which is usually located in the capital city.

Baby Seating

One of these days you're going to discover you need something for Baby to ride in while in the car. And we'd like to say a few words about what you might use.

It isn't a pleasant fact, but today millions of kids ride unprotected, or close to it, in automobiles. In the last 10 years, over 10,000 children under four have been killed in car crashes. In addition to fatalities, a major concern is permanent brain damage which could have been prevented by a proper infant carrier.

There are several excellent car seats for children. To obtain the most complete, up-to-date information we suggest you take the time to read Consumer Reports' survey. Most libraries have this publication. . .and you can learn a lot about what to look for.

It's so easy to provide protection for Baby and the other youngsters in your household.

Breast Feeding

Both professionals and parents have been known to become emotional on the breast vs. bottle issue. This controversy is unnecessary because the choice is extremely personal – the choice of the mother or mother and father. At this time there is no absolute scientific evidence to indicate that one method is better for infants. If you do choose to bottle feed, it is important to provide Baby with the physical caressing and cuddling he would automatically receive when held for breast feeding. There are some values to breast feeding: it's economic; the milk is always pure; it saves hours of time because there are no bottles to sterilize, formula to mix, refrigeration to worry about, travelling is no problem; it helps mother physically (when the baby nurses there is vigorous contraction of the muscles of the uterus and this helps to restore the uterus to its pre-pregnancy size and shape.

For a variety of reasons breast feeding is not considered by some women. Many of the reasons are "old wives tales", and we'll mention a few. (1) "Nursing mothers lose their figures". There's no need to eat excessively or gain weight in order to make milk. (2) "The effect of breast feeding is large, pendulous breasts". There are women whose breasts have become flatter after breast feeding, but there are women who have nursed several babies and have still maintained fine upright breasts; and finally there are women who have never nursed and whose breasts are flattened. (3) "Working mothers can't nurse". They can, depending upon the working hours and how quickly mother must return to work after Baby's birth. Even if mother is employed for 8 hours a day, she can nurse at night. And even if she can't nurse after resuming work, it is still possible to breast feed for a month or so. (4)"Breast feeding is tiring for the mother". Having and caring for a baby is fatiguing – for all women. However, our bodies adapt quickly to changing energy needs. If a woman feels that breast feeding is "taking a lot out of her", she may be a worrisome person, an overconcerned mother, a woman in poor physical health, or an individual not committed to the idea of breast feeding. For those interested in knowing more about breast feeding, an international organization, La Leche League, provides information. The League has chapters in many cities, small and large, in the U.S.

The Old-Fashioned Rocking Chair

Was there a rocking chair in your childhood? Do you remember one of the old-fashioned kind with comfortable arms and a high back for mother to rest her head against?

Perhaps not, because rocking chairs went out of style when you were young and for a time no one seemed to have one around the house. However, since the time President Kennedy's doctor ordered one for him, rockers are back in style. Rocking chairs are good for anyone, but they seem to have been made especially for mothers and babies. By holding your baby and talking gently to him, you communicate love, warmth and security in ways that even a newborn baby understands. Rocking chairs are wonderfully comfortable and relaxing for both you and Baby. Doctors tell us that as mother rocks gently, she improves the circulation in her legs.

As you rock, the easy to and fro movement stimulates the balance and position sensors deep in Baby's inner ears. As he lies in the curve of his mother's arm he feels the movement. When he is lifted and held upright with his head on your shoulder, he feels movement in a different direction If you lay him across your knees on his tummy, he becomes aware of still a different kind of movement. With each change of position Baby experiences the rock-

ing motion in slightly different ways. But always his nearness to his mother provides warmth and security as a background for his growing awareness of changing positions and of movement in different directions.

From these experiences an infant learns how to interpret and to use the sensations produced in his balance centers by changes of position or direction of movement.

Later this ability to interpret these sensations will help him develop and maintain the balance he will need as he learns to stand and walk. The early stimulation provided by the gentle movements of the rocking chair will make it easier for him to learn to balance on his own two feet. So, we say..."long live the old-fashioned rocking chair, symbol of love and learning"

Get the Right Nipple for His Bottle

Baby's development of good speech and attractive teeth begins as soon as he is born. The tongue and mouth muscles so necessary for good speech must be stimulated and exercised long before the baby is ready to talk. Basic muscle training starts with sucking. At birth, sucking is a reflex which is provoked by hunger or by being stroked around the mouth. For the infant who is bottle fed, the choice and use of proper nipples is very important to sucking. Improper nipples can lead to problems not only of speech but also to serious problems of alignment and structure of the permanent teeth, and here's why:

If the nipple is too long, it reaches far back into the infant's small mouth. The milk then flows directly into his throat and there is no opportunity for any muscle exercise.

If the nipple is the correct size but has too many holes or holes that are too big, Baby gets too much milk and in self defense, he either spits up, lets the surplus spill out of the sides of his mouth, or chokes. Now, to prevent himself from choking, the infant thrusts his tongue forward and squeezes the nipple between the tip of his tongue and the upper gum. Then he swallows. This abnormal combination of tongue thrust and swallowing may become a habit. Later when the child talks, he will lisp and you will be able to see his tongue thrust between his lips when he makes the s, sh, ch, or j sounds. Also the tongue tip sounds of t, d, l, and n will be made incorrectly – the tongue pressed forward against the front teeth rather than against the upper part of the teeth and gums.

As the habit of tongue thrusting is practiced, the child develops a space between the front teeth. As the space grows wider, he thrusts the tongue more frequently. Finally this persistent tongue thrust against the teeth will affect the bite.

If the infant fails to receive enough sucking exercise, he may substitute thumb sucking when the bottle is taken away. As he grows older, he may continue the sucking habit but in a more social way – chewing on pencils or other objects, pushing the lower lip against the upper teeth, licking the lips or thrusting the tongue up under the inside of the upper lip.

Dressing Your Baby

When you get right down to it, the only clothing you really must have for Baby is a good-sized stack of diapers. All other adjustments for warmth could be made with an assortment of blankets. And, in parts of our country, even this item is dispensed with. The Eskimo mother tucks her little one inside her fur parka, absolutely naked.

Starting with absolutely nothing in the way of clothing, you can add items indefinitely. It is largely a matter of personal preference and the size of your budget. Here are some simple ideas you might keep in mind:

(1) In general, simple, easily-washed garments are best—these include drip-dry, machine washable and dryable, no-iron fabrics.

(2) Babies grow so fast it is better to have only a few things of any one size.

(3) Adjust the warmth of the garments to the weather. On very hot days, a shirt and diaper is enough. If you are cool, put a sweater on the baby.

(4) Consider the ease and comfort for the baby. Are the clothes easy to put on, take off; is it easy to change diapers.

What about the individual items? How many of what? Here are some suggestions:

3 to 6 dozen diapers: You'll probably use about 2 dozen a day on the baby and find yourself grabbing a diaper to throw over your shoulder when you "bubble" the baby, as extra sheeting, bib, towel, etc. The extra dozen or so is handy if you can't get diapers washed or dried daily. In some cities it is possible to contract with a company to furnish and launder diapers for the baby. Such service is a great help, if you can afford it, especially at first. The diaper companies often rent certain items of equipment which you might like to have for only a short time. Even if you plan to use a diaper service, you might find it convenient to have a dozen or so diapers of your own. (Diaper service makes an excellent gift.)

Diapers
3-6 dozen
1-2 packages disposable diaper pail

Bedding
Mattress
4-6 crib sheets
4 waterproof pads
2-3 crib blankets
1 comforter

Furnishings
Crib
Chest of drawers
Changing/bath table

Feeding
Breast feeding: 2-4 bottles for juice, water.
Bottle feeding: 8 bottles, 8 oz.
2-4 4 oz. bottles.
Sterilizer and utensils
Bottle and nipple brushes
Extra caps and nipples
Bibs
Baby dish, utensils
Feeder for strained food, cereal

Clothes
4-6 shirts
4-6 gowns, kimonos
4 waterproof panties
3-4 stretch suits
4-6 receiving blankets

Bath/Toilet Articles
Diaper pins
Cotton swabs
Baby oil, lotion, powder
Baby soap or cleanser, baby shampoo, brush & comb
Moist towelettes, ointment
3-4 washcloths
2-3 hand towels
2-3 bath towels

Nice "Extras"
Bassinet
Nursery Lamb
Scale and Pad
Rocking Chair
Diaper Service
Baby Food Grinder

Later
High chair
Stroller
Toilet chair

Diapers are made of gauze, cotton flannel, bird's-eye, and other fabrics. There are squares, rectangles and shapes cut to fit the body and provided with snaps. Everybody has his own idea about which kind is best, and you'll just have to select the kind that appeals to you.

4-6 cotton shirts. Size 2 fits most babies in a few weeks. Sleeveless or short-sleeved shirts can be used in any weather. If it gets cold, you can add a sweater or the light jackets known as "sacks." Be sure to select a style of shirt that will go on the baby easily. Babies hate to have anything over their faces, and a mouthful of shirt sets them wild. Get armholes large enough and neck openings ample for the baby's head.

4-6 nightgowns. Avoid the type with string or cord at the neck. Cotton-knit or jersey doesn't need ironing. One of the advantages of a long nightgown is that the baby's windmill kicking doesn't send the covers off so readily. Some parents like the sleeping garmet which is long and roomy enough to enclose the baby's feet.

A cap for the baby. A warm one to cover the ears for cold weather. Knitted styles are good.

Bootees and socks. Don't expect these to stay on those active feet, though. The baby's feet and hands may feel cold to your touch, but he may be quite warm enough. He still has relatively poor circulation in his extremities. Unless your house is very cold, covering for the feet is not necessary.

Dear Growing Child

"G.C." is almost a necessity in that it provides accurate and pertinent information which is valuable to parents as well as babies and children. I honestly believe that parents who use the informative insights provided by "G.C." have tremendous advantage over others, and the benefits must surely reflect in their children. I use it, depend upon it, enjoy it, and have come to regard it as my essential aid in Mothering!"

Let Me Introduce Myself!

I am Pierre the Pelican, a Disney-like character who gives suggestions to young parents about their first children. I talk with fathers and mothers about their babies, and often tell them in advance what may happen a few weeks or months ahead. That helps them get ready.

How do I know you have a new baby? Mostly, I get names from birth records. In some countries I have a hard time getting names, and sometimes the baby's name comes late, because birth records aren't always kept up to date. But I do the best I can.

I'm interested in your baby's development, but in my messages I won't say much about physical care. You will need to keep in close touch with your doctor or nurse and get advice on all subjects that have to do with physical health. My special interest in your baby is something you'd never guess of a pelican like me. I'm interested in the mental health of that new baby of yours. I want the baby to grow up to be happy and friendly and able to do his part in the world, and to get his full share of love and good care. I know you do, too!

In mental health you have to think a long way ahead, for the way you are beginning to care for the baby now is likely to be the way you will continue for years to come. In physical health you have to think ahead, too. But it is easier to know when things go wrong. If he isn't well, he may fret or have fever. You will know somehow that he is not well. In mental health though, the baby's ways of letting you know whether he is getting along nicely and you are doing a good job are not always as clear as when he is physically ill. For that reason I plan to come for a chat about once a month for the next several months and will tell you what I have learned from people who know about mental health. You can prevent many problems from arising if you know in advance about the causes.

By the way, is yours a boy or a girl? I have forgotten. There are so many these days; and besides, both kinds are as fine as can be. If you don't mind, I'll just call your baby "he" when I'm talking about what to do, because what I say about baby boys goes for baby girls, too.

Here is a suggestion for "Father" and "Mother"

Before I say much about the baby, I'd like to talk to both of you parents about yourselves—the father and mother. Say, it sounds funny for you to be called "father" and "mother," doesn't it? I guess you had been practicing it some before the baby came, just for fun.

You two need to leave the baby with someone else once in a while and have some fun all by yourselves. Yes, I mean that. I know he is wonderful, but just the same you both need some time off together. You will feel so different, now that the baby has come. The mother can take long, natural steps once more, and is also pleased to get back her figure. You remember how it was when everybody noticed and both of you were proud, but a little self-conscious. Remember how careful mother had to be not to fall.

As soon as mother is able to be out—and if the feeding periods are far enough apart—find some reliable person to look after the baby while you are away. A grandmother or an aunt, a friendly neighbor, or some other person who knows how to handle babies can keep him safe for that much time.

When you two are out alone there will be old problems you will want to talk over again, and some new ones also. Many of the old problems may seem rather small now, considering all you have been through. Just the same, it is nice for you to talk things out and understand each other. When you are talking about the baby, you ought to decide together what to do about him. You should decide together the kind of medical service to have, and the use of money, now that there is one more in the family. This will be good for you and the baby. It will get you into the habit of talking with each other about the baby and making decisions that are agreeable to both of you.

Nowadays, I notice young parents often take very young babies two or three months old with them when they go out, and can't get someone to take care of the baby at home. They carry him around in a plastic "infant seat" which can be set up on the table and raised up a little so that the baby can look around a bit. However, young babies catch colds easily, and especially during the season when people are sneezing and coughing it is a good idea to keep them out of crowds as much as possible.

Babies are easiest to take places when they are very young. Then their parents can spend an enjoyable evening with friends, and the baby can sleep in a crib or on a bed. But this period does not last long. Pretty soon the parents will begin to be afraid the baby will roll off a bed while they are in the next room talking or playing at games. And "infant seats," if used at all, may turn over as the child gets older and more active.

The baby's needs come first right now

It doesn't matter what part of the world you live in, or your race, creed, or color, or the kind of government under which you live—your baby's early needs, during the first few years, are going to be the same as every other baby's needs. As children get older the customs of the country and culture in which they live will have much to do with their development.

But the people of the world are becoming more and more alike. They are teaching each other. Scientists from many countries are learning about how human beings develop, and

Fathers and Moth

television broadcasts may soon be made all over the globe at once, teaching us about better ways to care for children. Just as a new medicine is developed successfully in one country—as penicillin in England—soon the whole world uses it. In much the same way, ideas on the better care of children are spreading around the world.

For example, we have learned that every baby should—from the beginning—get used to being handled by several people, and not just his mother. Once in a while you will find a young mother who won't let other people hold her baby, feed him, or change and dress him. This is now a very old fashioned point of view. For it has been found that children develop better if they learn to like and trust many people, and this for a very young child comes from being fed and handled and made comfortable by several different people. As he gets older, it means having fun with more people, and learning from them.

The father needs to share in the care of the young baby. This is not only very satisfying to him, but gives the mother relief—which you can be sure she needs. The baby also should become accustomed to being handled by his father from the beginning.

Learning about baby care

Nature provides the mother cat with instincts to care for her kittens, but more is required of you humans. You learn about babies just as you learn anything else. You are lucky if you have had the chance to see some babies properly cared for by good mothers and fathers. What you have seen has in a way become a model for you. Perhaps you grew up as one of the older members in a family and had a chance to be with younger brothers and sisters. In some schools they teach young people about the care of children, and that is fine, but there is not much of this. There should be a great deal more in the future.

Some people will tell you that you can trust your judgment to do a good job. But judgment depends on experience. It partly depends on **what you have been able to observe,** because I see many educated persons who have difficulty in raising their children and many uneducated persons who do well. Education that is not specifically about children provides little assurance that a child will be easily and properly cared for.

Of course, you know quite a bit already. You have observed babies, and you have talked with mothers, some young, some old. Your doctor is a good source of information. And women who have done a fine job of rearing their children know a lot, too. Then there is published material these days, a great deal of it, such as these letters that are coming to you. And there are articles about child care in the better magazines, and good books which we will be talking about later.

Love for a baby grows

Sometimes your baby may cry a great deal, his food may not agree with him, or he may keep you awake at night and you just can't get enough rest. At such times parents may feel as if they wished they didn't have him. Or they may have moments when they wonder whether they love him. If you ever reach this point, it's time to find other parents whose child is older and who handle him easily, and sit down and talk and talk. I can tell you for sure that as the baby gets adjusted to his routines, he will be less troublesome, and easier to love. If he "gets on your nerves too much," have someone with you, perhaps a sister or a mother or some friend. Don't be ashamed of your feelings, but ask for help. This is a phase many young parents go through. If it happens to you, it does not mean that you are not a good parent or that you will keep on feeling like that.

You will gradually develop a real feeling of affection for your baby, and as you understand his needs better you can take care of him better.

The more you learn about babies the more interesting they become. But don't ever let anybody give you the idea that it is a simple thing to bring up a child. It isn't; but you can do it. You can learn more about the rearing of children. It isn't really quite like learning anything else.

How often does one feed a very young baby?

If five young mothers of very young babies get together to talk about the feeding schedules they have for their young babies, you're likely to hear five different stories. Formerly, there was the notion that babies should be fed exactly by the clock. Few people believe that any more.

On the other hand, most people like some sort of schedule for themselves, and babies do, too. The trick is to gradually work into a rather regular routine, but to keep it flexible enough to change when an unusual situation comes up.

Babies tend to like frequent feeding at first, and then they settle down to a schedule that means longer hours between feedings. Two or three hours at first, and then four hours seems to be most often spoken of as the favorite interval between feedings. But the important practice to keep in mind is to feed him when he's hungry. It must hurt a lot when he's really hungry. Of course, you don't need to feed him **every time** he cries, for he may not be hungry. He may need a change of diapers, or he may be happy with some warm water or a pacifier. But when he cries hard, and none of these things satisfies, you'd better hurry and get the food to him.

As I say, pretty soon you'll find that he settles down to a schedule, and you can help this along by feeding him at regular hours even though he hasn't cried for food. This will surprise and please him and help him to establish a schedule.

Parents these days, however, are pretty clever in working with the little fellow. They will try to get the baby to sleep all night. But at first he can't go that long without food. In fact, you will be lucky if he will sleep through the night by the time he is eight or nine weeks old. Some babies require a night feeding quite a few weeks or even months longer.

If he passes up the night feeding, don't wake him up to feed him. Of course, when he does wake up in the morning he will probably be very hungry and will be crying, so you'd better get right up and feed him, and be thankful you've had most of a good night's sleep.

Breast and bottle feeding

There is much to be said in favor of breast feeding. After all, it is the most natural form. It is a very satisfying experience for both baby and mother. It nurtures a close, secure feeling. Also, breast feeding has in its favor such matters as ease of feeding, a clean milk supply,—and even expense.

Some mothers are not able to feed their infants at the breast, or for other reasons they do not wish to do so. Sometimes mothers find they do not have a sufficient supply of milk. It is very important that such mothers not feel they have failed in their duty if they are unsuccessful at breast feeding.

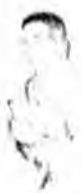
If a baby is fed from the bottle, the mother can hold him in the same way and can give him the same feeling of love and security as if she were feeding him from the breast.

The baby can have just as much enjoyment from a bottle as he can from the breast **if he is held in a lovin, manner and is watched closely to see that he is getting the milk, but that he isn't getting it too fast.**

What about the baby's bottle?

Your doctor or nurse or some other trained person will tell you all about the importance of keeping the baby's bottles clean and mixing the formula, and keeping it cold in the refrigerator. But then comes the question of whether to heat it before the baby is fed.

Most parents and doctors still feel that the milk should be gently heated until it is about body temperature. But the surprising thing is that babies will soon accept cold milk



COPYRIGHT 1957, © 1967 BY LOYD W. ROWLAND Ph.D.
ALL RIGHTS RESERVED

just as it comes from the refrigerator. You can gradually warm it less and less and pretty soon he'll drink it cold, just as you yourself like cold milk rather than warm. And it won't give him the colic either. Recent studies with premature infants in one large hospital, using cold milk from the beginning, showed that the babies do just fine. However, your doctor may prefer that your own child have warm milk. In any case, if a baby takes only part of a bottle, throw the rest of it away, or place it in the refrigerator immediately, if you expect to use the same milk again.

The importance of nursing

Nursing is the nicest time of all for the baby, and if his mother is holding him close, and feeding him either by breast or bottle, the baby couldn't be happier.

Here are two cautions: First, no smoking please while feeding the baby! Ashes and even fire have damaged the eyes of some infants while nursing. Also, **NEVER LEAVE THE BABY ALONE WITH THE BOTTLE PROPPED UP BY A PILLOW OR SOMETHING, AT HIS AGE!** I will suggest to you later when you may do so. Much depends upon his age, strength, and development. A young baby left alone with a bottle may choke and strangle badly. And since he is so small, he can't do anything to help himself.

Instead, hold the little fellow, take plenty of time for the feeding, a half hour if necessary. Let other things wait. You will find as the baby gets stronger the feeding time will be shorter.

Good sleep habits for the baby

Speaking of sleeping, it's very nice for the baby to have good sleep habits. You'll appreciate this a lot more as he gets five or six months old. Do not expect him always to go to sleep as soon as you put him in bed for his naps. He may drop right off to sleep while he is very young, but as he gets older he will want to look at things and stay awake for a time. When you put him to sleep you should leave him alone, although you will want to check on him every couple of hours, or until you go to bed yourself.

At his present age he is probably sleeping most of the time. When he is six months old he will sleep about fifteen hours out of twenty-four, and when he is a year old he will sleep about fourteen hours. Two or three months from now I want to talk to you some more about good sleep habits. They make everything a lot easier.

How much does the baby cry?

As I will say to you many times—babies are not all alike. In fact, they are very different. One baby may hardly ever cry, but will take his food and be ready for sleep. (Of course, I'm thinking now of the time when he is very young.) Another baby in the house down the street may be a crying baby. He will cry a great deal. There is usually a reason for this difference. The quiet child is comfortable. The crying child is not; he may be hurting somewhere. It may even be something about his food. If you think your child cries too much you should talk with the doctor about it, and give him all the facts. He may be able to help.

Yes, babies cry when they are uncomfortable, and sometimes it is hard to know what is wrong. Some of them just naturally seem to be irritable for the first two or three months, or have colic. Why some children have colic and others do not is something of a mystery still, but it should be comforting to parents to know that there do not seem to be any unfavorable after effects.

Of course, if a crying baby is wet or soiled, that is easy to discover. Maybe he is too warm or has gas pains in his stomach. Bringing up the bubbles by "burping" will help. In fact, you can prevent much discomfort by being certain to burp him at the end of every feeding. As I said above, if the crying upsets you too much, you must have relief, as some parents cannot endure too much crying. Get somebody to help you part of the time, and get away from the baby for some rest. Mothers of young parents can often be very helpful, if they do not live too far away.

How much attention should you pay the baby?

When the baby is very young he will sleep most of the time, even from one feeding to the next. It is better if you do not pick him up often in between. But after a few weeks you will find him awake more and more. When he is awake, you will want him in the same room with you. Talk to him softly. Hold him some and play with him. You ought to do this especially when he is good. Sometimes it will help if you pick him up when he is fretting or crying, but you ought not to wait always for him to cry before you pick him up. **Pick him up while he is good and in that way you will be rewarding him for being good.**

Some parents are afraid they will spoil their baby if they pick him up and show affection for him. Quite the opposite is true. Loving the baby is good for both him and you. The only way the baby knows you love him is by what you do. While he is very young this means you talk to him, pat him, and show him that you are very interested in him. Of course, you show your love also at other times, as when you are feeding, bathing, and changing him.

To be sure, you can overdo the time you hold the baby and play with him. You certainly don't need to spend all your time with him. Anyway, the baby seems to become tired of too much playing and attention. I am going to talk with you again about this next month.

Does the baby look like an aunt or uncle?

Babies often look like their relatives when they are still very young. However, just because a baby looks like one of the relatives is no reason why he will be like him. You can't count on the baby having a good disposition just because he looks like his aunt who is that way. And it is no guarantee that he will be short tempered, or lazy, or untidy, just because he looks like some other person who is. Anyway, babies look like different people at different times.

And right here I'd like to say that children don't just grow up by themselves. They grow up with help from you. However, bringing up a child isn't like moulding clay. You have probably found out by now that your baby has his wants and his likes. As he gets older he will have ideas of his own—lots of them—and you will want him to have them and to make decisions for himself, but you will know also that you will have to help guide him.

Freedom of movement for the child

From ancient times down to the present in some countries there has been the custom of binding the infant, or swaddling him as it was called, until he could barely move at all. Instead, he should be placed in his bed, sometimes on his back, sometimes on his stomach with his face turned toward the side with complete freedom to move. It is even helpful to place him on his side for a short time.

The baby, like an adult, must get very tired of lying in the same position all the time. Just staring at the ceiling is not much pleasure. One of these days I will talk about making the young baby's life more interesting, because we know now that he can hear and see more than we once thought he could.

The more parents love each other, the better it is for the baby

You've been together quite a while now, and I suppose you have learned the little things you can do to please each other, and what the other person doesn't like. All through these messages I'll be suggesting that you try to understand your baby and not expect more of him than is reasonable. It is the same way between you two. Sometimes fathers and mothers expect too much of each other. They expect more than is fair, and then they are disappointed.

Printed in U.S.A.

Address Correction Requested

A First Message to You
From

Also, if you really love each other, and let each other know it, neither of you is likely to become jealous of the baby. I know you don't see how it is possible for a grown-up to be jealous of a baby, but it often happens. Usually grown-ups don't admit it, but I have known lots of cases. You see, sometimes the mother's time is so taken up by the baby, that the father feels left out and without thinking, holds the baby responsible. It can work the other way, too, with the husband paying more attention to the baby than to his wife.

Family planning

Now is also the time for you to be thinking about the number of children you want in your family. I used to talk with mothers and fathers about this in a later message, but they wrote me often and said, "We already have another baby on the way; by the time our first was eleven months old we had another child." So I decided to talk with parents about the number of children they want to have in my very first message. The first baby may have been unexpected, but you can plan when you want to have the second.

In nearly every country of the world there is a large increase in the number of people. In some countries the number will double in the next few years. There are several reasons for this, but probably the most important one is because of improvements in the care now given to children. In earlier times many children died of epidemics, but now the medicines that have been developed by scientists make it possible for many more children to live. I am sure, also, you know that many young mothers who in the past died during childbirth no longer do so because of advances in medical care, and so they live to have more babies.

You want your babies to have the best possible care, but they can't have this if there are too many of them. When a mother has babies too close together she can't give the best attention to the older one because the new one comes while the first one is still an infant. And you are already beginning to know how much of the mother's (and father's) time it takes to care for a baby.

Also, you have to think ahead to the question of whether you will be able to provide house space for a large family, even if you wanted one, and whether there will be enough food. And then there is education — for children will get along much better in the modern world they are going to grow up in, if they have some education.

So the best thing is for the two of you to talk this whole matter over and then go to your doctor this very month. If you want a total of two or three babies, and want them separated by about three years, tell your doctor and ask him for information. If he thinks it better he may send you to a family planning center for instructions. Husbands do not need to go to see the doctor, though many of them will wish to do so.

In some countries a father feels he is not manly unless he has a large family, and mothers may have somewhat the same feeling about their womanliness. But this idea is changing, and people are asking not how many children a family has, but how well they are cared for. Parents hardly ever really want more babies than they feel they can care for and love, and spend time with, and give a good education. There is no nation or religion that disagrees with the idea of spacing children, though there is some difference of opinion on how it should be done.

By the time you read this, people in even the remotest countries will know about "the pill," and the "ring" which is inserted in the uterus of the woman and which for reasons not yet known keeps her from becoming pregnant until the ring is removed. These methods of family planning are easy to use and cost very little, and work very well if instructions are followed carefully. Another is called the "rhythm" method. Some of these ways of spacing children are more effective than others.

The world no longer honors the family which has more children than it can care for; it pities mother, father, and children.

Should you take the baby back for the doctor to see even if he is well?

Yes, indeed! You should take the baby back for the doctor to examine regularly. There is a great deal you need to learn about how to care for him, especially since this is your first child. The doctor knows all kinds of things to do for the baby. He needs to talk over with the mother the kind of food the baby is getting. He needs to ask about how the baby's bowels move and what the movements are like. The doctor knows how to regulate the diet so that there will be very little difficulty about bowel movements. Laxatives to make the baby's bowels move should not be given unless the doctor tells you to give them.

By the way, the mother ought to go back to see the doctor, too. Every mother needs to have proper examinations after the birth of her baby. Her own health will be better and it will be easier for her if she has another baby later.

KEEP MY MESSAGES! They will be coming to you once each month for the first year. By then you will feel better able to care for your baby, so after that I will come less often. Beginning with the third message I will try to leave a little space at the end of my message where you can write down what the baby is doing and what he is like at that time.

Good luck. I'll see you next month!

Learning To Manage Life's Stresses

"Stress" — a word we've been hearing a lot lately and a significant factor affecting our lives. But what is it, how can we recognize it, and, more importantly, how can we learn to manage it in a way that is healthy and productive?

Stress Defined

What is stress? I like the definition and explanation given by Blair and Rita Justice.[1] They state that stress is:

> any demand, force, or pressure that requires a person to make an adjustment. It may be physical stress such as rain that drives a person indoors, cold that requires him to bundle up, a noise that interrupts his sleep. It may be emotional stress such as separation from loved ones or death. It may be behavioral stress that comes from what a person does such as overeating and smoking.

Stated another way, "To a scientist, stress is any action or situation that places special physical or psychological demands upon a person — anything that can unbalance his individual equilibrium."[2]

That sounds like scientific talk, doesn't it? In short, it simply means that if we have to consciously or unconsciously change or adjust, we are experiencing stress. We are used to the idea that disasters and other unpleasant events are stress producing, but it is also important to note that stress comes from happy events as well.

Thus, while a divorce is stressful, so is a marriage. Losing one's job is stressful, but so is gaining a promotion. Losing a child is obviously stressful, but so is giving birth and adjusting to the presence of another person in the family. *Anytime* there is a loss or an addition of a family member, the family equilibrium is unbalanced and stress is introduced.

Bodily Reaction to Stress

Our bodies react to stress in the following manner. In extreme stress, our hearts will race and pound, our blood pressure will soar, and a flood of hormones will stimulate some organs and depress the activities of others. Our breathing quickens and our muscles tense. Now remember, this is how our bodies react whether we are exhilarated or scared to death, whether we consider the stress good or bad, welcome or unwelcome.[3]

Occasional reactions of this nature are not likely to be harmful and can certainly be tolerated by the average human body. But, what if we feel like we are constantly under stress? What if our stomach usually seems to be pumping enough acid to keep Rolaids and Tums in business? What if we rarely get through a day without a headache, or our neck feels like someone is practicing knot tieing with it?

One or more of these symptoms is reported as a frequent companion to many people. With as large an audience as is reached by *Growing Parent*, there are likely to be many who read this who can identify with this list of symptoms. This is particularly likely since the period of parenting small children is considered by many to be the most stressful stage of their lives.

If this is true for you, please read on so that you can learn how excessive or chronic stress can be harmful to your body. More importantly, we want to share some steps you may take to reduce your stress level or, at least, to manage the stress you experience rather than being managed by it.

Our Bodies Store Stress

What is harmful about stress, in addition to the extreme physical and emotional discomfort it can

produce in and of itself, is that our bodies tend to store it. Unless we have ways to break the stress cycle, the accumulation of stress produced by noise, constant interruptions, lack of uninterrupted sleep, lack of privacy, lack of exercise, improper diet, worry about finances, broken appliances, broken down cars, the barking dog, the crying baby, the . . . takes a severe toll on our bodies.

The effect of life changes are also cumulative, so that if one experiences a number of changes within the period of a year — a move, a new job, a new baby, marital difficulties, a change of diet, etc., the likelihood of becoming seriously ill increases tremendously.[4]

We React in Different Ways

Illness is only one of the possible tolls of excessive stress, however, for, as noted by the Justices[5]

> The consequences of excessive stress may be physical, emotional, or social. Some people have a heart attack, acquire some form of cancer, get ulcers or colitis, have headaches or arthritis. Others get depressed, suffer chronic anxiety, hostility, guilt, or shame. Still others deal with excessive stress by acting out in such ways as committing incest or physical child abuse, becoming alcoholic and assaultive, or battering wives. A few people express excessive stress in all three areas: the physical, emotional, and social.

Isn't that a sobering list of possible consequences? Surely none of us wants to get either physically or emotionally sick, or lash out at our spouses or children. The thought of sex within the family is repelling to most and, indeed, is a "taboo." But when we experience excessive stress, our internal and external controls may break down. Like the Three Mile Island Nuclear Plant, we are potentially dangerous and unpredictable. And, as in that incident, the question becomes whether we will break down internally, explode outwardly, or possibly both.

Taking Stock

What is your personal stress level at this point in your life (or that of your spouse)? Have you recently experienced, or are you currently experiencing, a great amount of change? Have you noticed weight gains, or losses, that aren't typical for you? Are you more subject to sore throats, colds, or the flu? Do you have head or stomach aches more often? Is your back acting up? If you answered yes to any, or many, of these questions, you may well be under a goodly amount of stress and may not be managing it well.

Managing the Stress

How then can an individual gain more control over his or her own life and manage the stress he or she is experiencing? You have already taken the first step if you have paused to evaluate the amount of life change you have been experiencing, and if you have paid more attention to your recent health history.

By becoming more self-aware you can take more charge of your life if you choose to do so. You have probably seen the poster or plaque that says, "When this mess is over I'm going to have a nervous breakdown. I've worked hard for it and I deserve it." I think we can all identify with the humor in this but, unfortunately, for some of us illness or "breakdown" is the only way we can give ourselves permission to rest, to pamper ourselves or accept pampering. Wouldn't it be better if we could learn to pamper ourselves when we felt great instead of rotten?

Eliminating the Self-Stressers

Stress not only comes from the outside; we can also contribute our share through self-stressing behavior. This internal stress, or "self-stress," is caused by how we view and respond to the events and changes in our lives, situations, and circumstances. It is when we face both external and internal stress that we face excessive stress, so a second significant way to reduce the stress in your life is to learn to eliminate self-stressing behaviors.

Blair and Rita Justice have put their fingers on three specific self-stressing behaviors that too many of us fall into, and which we could certainly do without. These three are:[6]

(1) "awfulizing" — viewing events, situations, or circumstances as catastrophic, horrible, terrible, or unbearable.

(2) "shoulding" — demanding (usually silently in the form of self-talk and thoughts) that others should do or be different, or that the world should be different (fair, just, easy).

(3) "overgeneralizing" — condemning oneself or others on the basis of a single performance or one set of behaviors or traits ("I'm a failure" or "I'm worthless because I got fired" or "I let my family down").

So, in addition to becoming more aware of the amount of external stress in your life and deciding whether to take steps to vary that, you can also significantly reduce the stress you feel by reducing the amount of self-stressing in which you engage.

Be Your Own Person

One good way to reduce self-stressing behavior is to be or become your own person, to learn to

dear Growing Child

Baby Neil wakes up at 6 am for his feeding. Daddy Roger gets up and brings him to our bed for me to breast feed. While Neil chows down, Roger fixes coffee and brings it to our bedroom. After baby is finished, we all spend an enjoyable 30-45 minutes in our bed talking, playing. Neil is always in good humor at this time, and Daddy benefits from the special time together with Neil and Mommy. In the quiet of the early morning when the entire world seems to be asleep, this very special time starts our day off to a terrific, positive beginning, and we would not give anything for it!

Linda S.
Cocoa, Florida

Dear Growing Child:

When we were expecting our second child, we made our daughter feel a part of the pregnancy. She came to the doctor's office with me and toward the end, she was allowed to hear the baby's heartbeat during my examination. We would let her listen to the baby's heartbeat and feel him kicking. We read books about new babies and one about jealous feelings. She also tried to think of names for this new person. When the baby (a boy) was born, our daughter came to see him and me in the hospital, and she came when my husband brought us home. She held her brother as soon as he got in the car. Our daughter turned 3 years old 2 weeks after our son was born.

We allowed our daughter to select clothes, help change and help bathe her brother. When our son was six months and started eating, our daughter fed him when she expressed an interest in doing so.

Consequently, we have avoided major jealous feelings. Our daughter also gets very excited by each new accomplishment of her little brother.

Give the unique baby gift—an eight month gift subscription to **Growing Child.**

Just fill in the form with the name and address of those you'd like gifts sent to. Subscriptions are $4 for each gift.

We'll send the new parents a gift card from you and then we'll send **Growing Child** for the next eight months.

This special gift offer is available only to current subscribers for gifts to parents (who don't already subscribe) with children under four years. Please allow 6-8 weeks for the first issue to arrive. Send cash and save check charges. We'll be responsible if the money is lost in the mail.

Please send a Growing Child gift subscription to the following. I have enclosed cash, check, money order or credit card information.

All through your child's years . . . Give yourself the reassurance of having the right answers to questions like these:

- Your baby has a rash. How can you tell if it's diaper rash, allergy, infection, or a contagious disease?
- Your infant is crying. Should you pick her up? Feed her? Give her a pacifier? Let her cry?
- Your toddler is having a temper tantrum. What should you do?
- Your child has been exposed to chicken pox. What now?
- Your youngster wants a toy gun. What are the pro's and con's of buying it?

Parents' Encyclopedia

Softbound $2.95 **Hardbound $13.95**

Feed Me! I'm Yours

Feed Me! I'm Yours is an informative and entertaining book on nutrition and child feeding. The author has examined the labels on packaged foods and used them to advise parents on quality foods and those which should be avoided. This is not a textbook, nor is the author a purist. It is thoroughly practical advice for contemporary parents.

For example, in evaluating certain products which children prefer, she found too much salt, and salt can cause hypertension in children, according to Mrs. Lansky. Finally she says, "Love is not equal to the amount of food you give your child. Provide quality but not quantity."

NEW Spiral Bound Edition **$3.95**

The Baby Exercise Book

In **The Baby Exercise Book,** Dr. Janine Levy shows parents how to aid a child's growth by utilizing his natural movements. These exercises are not "gym" but are based on the movements that young children normally make while playing in cribs or with their parents, rather than on unnatural motions.

These techniques will clearly be beneficial both to the child's physical development and to his emotional stability and relationship with his parents. The photos make the series of very simple exercises easy to follow. The book includes specific advice on such things as carrying the child in the right way and making use of his natural instincts for play.

The Baby Exercise Book can be helpful in developing the child's muscles, giving him sensation and self-image, and helping him to move around in his own immediate environment.

Dear Growing Child:

Reading or telling stories is one of the most relaxing and enjoyable times for us because we learn a lot about each other. Daddy tells stories about what he does at work or our three year old tells about nursery school or we read about the values of saying please and thank you, etc. The next day I find things we've talked about the previous evening are incorporated into everyday use.

The next most valuable time is doing household chores together. It is really a thrill to see a child complete a job all by himself when a few months ago it would have been too hard for him to figure out.

Some of the most entertaining times is to give a 2 or 3 year old a pile of kitchen utensils (or anything that he's not sure of the exact use) and let him tell you what he thinks it is or does; an eggbeater is an umbrella, a spoon with holes is a scoop to catch fish which lets the ones that are too small get away . . . it's fun and imaginative.

Our son was only 14 months old when we had the baby—coming home with a new baby when the first is still a baby is hard, but even at 14 months my son adjusted best when he was involved in feeding, changing, picking out clothing, etc., for his new sister. When she would cry, I would not say, "I can't play now, I have to change your sister." I would say, "Let's change Dea—you can help by doing the powder." It worked for a long time. For six months or so I was tired, the housework never got caught up, but the only time the babies conflicted was when they were both sick and wanted to be held all the time or once in a while at a feeding when the older just couldn't wait for her to finish and wanted lunch or a toy for himself.

Nancy W.
Nesconset, New York

SCIENCE & SELF

In olden times the scientist and the philosopher were one. In fact, *science* means *knowing*. The early scientist/philosopher had one primary interest: to understand being or, as the song says, "What's it all about, Alfie?" The old sage wanted the facts, but then he wanted to know what the facts mean for him.

Nowadays we tend to think of philosophy and science as separate. The scientist, like the detective, "just wants the facts, Ma'am."; the philosopher is the dreamer, the guy with his head in the clouds. Scientists and philosophers may deny this, but the fact remains that they follow completely different educational routes to get where they're going. A fellow who keeps his foot in both camps is so unusual that he stands out — a genius. Einstein, for instance.

There's only one large group for whom science and philosophy remain united: children. Until they get turned off, all children are scientist/philosophers.

When a baby meets other living things — dog, insect, bird — an earthquake happens in him. Listen to his exploding laughter. "Eureka!" he is exclaiming. "We are not all!"

All he *says* is, "Wha' dat?" He has so few words. But for goodness' sake *give* him the words! In school he probably won't get science until the fourth or fifth grade. By that time everything has been broken apart into fantasy and fact, and the children labeled as math and science types or as language and history types.

So it's up to you as parents to retain the unity of your child for whom science and philosophy are just two sides of the same coin: being alive.

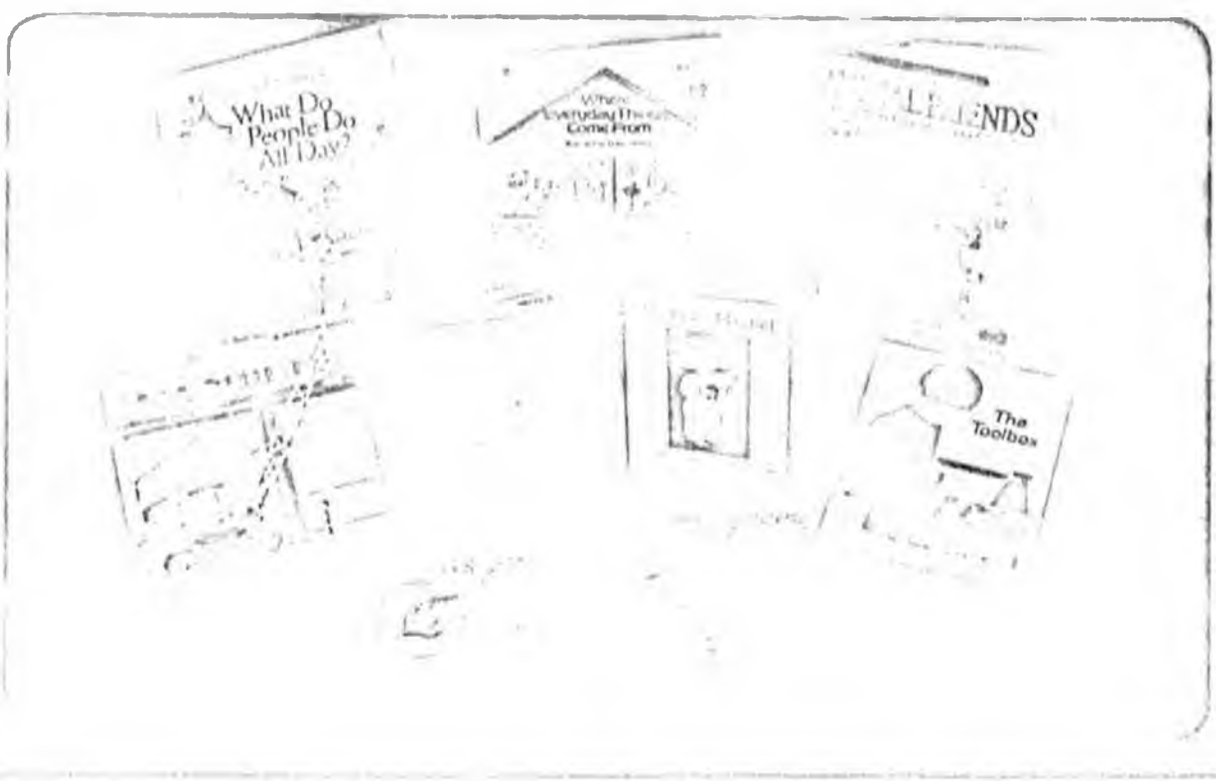
Recognize his questions. Give him the words. Let his whole life be one joyful scientific experiment. When he takes a snowball into the bath, what happens? Did the snowball die? No, it changed — it became water again! If you know how, you can keep a caterpillar alive in a jar. It will make a cocoon. Then, one day, out comes a butterfly! Did the caterpillar die? No, it took another form! Wow!

You don't have to draw his conclusions for him. You must not. But give him the words. Give him the evidence that produces both the questions and the answers.

Above all, this means allowing him to conduct his whole life as scientific research. Whether he's popping the peas on his plate or tasting a mudpie, there is a scientific/philosophical possibility worth pursuing. It also means books. There are so many terrific books to show a child amazing things and to give him the words for his amazing questions.

Not all of the amazing questions are for now. But give him the confidence and the freedom to find out. He will also meet the difficulties in his life with strength and joy and intelligence.

What books to buy? Let his interests guide you. Follow his interests as far as they go. Where the interest stops or where it hasn't begun yet, don't force. The library is a super place to pursue momentary scientific interests — be they astronomical, technological, biological, etc. And here are some books especially well suited to the preschooler.



WHAT DO PEOPLE DO ALL DAY? by Richard Scarry. On the preschool level this is as good as a whole set of encyclopedias. Its delightful animal people busily introduce such topics as government, coal mining, electricity, and the water cycle in terms both accurate and lively. Every preschooler needs a book like this to grow on. Random, hardbound, 4-colors, 96 pp., 2-6 yrs., $5.00.

WHERE EVERYDAY THINGS COME FROM, by Aldren Watson. Besides the questions most parents can answer (like how bread is made and where your cotton shirt comes from), this book includes some less familiar mysteries — where plastic comes from, and chocolate, and paint. Concise, straightforward text with large animal-peopled pictures. Platt and Munk, hardbound, 4 colors, 96 pp., 3 yrs. and up, $5.00.

OUR ANIMAL FRIENDS AT MAPLE HILL FARM, by Alice and Martin Provensen. A totally unique book about the artists' own befoibled animals — dumb, smart, funny, and lovable. Special to this book is its matter-of-fact and tender acceptance of both personal shortcomings and death. Random, 4 colors, 64 pp., 4-6 yrs., hardbound, $4.00.

MACHINES, by Anne and Harlow Rockwell. Another beautifully simple book by the Rockwells — this time about important mechanical devices such as the lever, pulley, and wheel. This with THE TOOLBOX makes a marvelous present for a very young construction-minded child. Collier, hardback, 4 colors, 32 pp., 1 yr. and up. $6.00.

BABY ANIMALS — by Harry McNaught, for the very youngest. This is a friendly way to meet some other small creatures, A board book the young child can't hurt with rounded corners that won't hurt him. Random House, board, 4 color, 12 pp., 1-2 yr., $2.50, 5½" × 8".

MICKEY'S MAGNET, by Franklyn Branley and Eleanor Vaughan. Using the little magnet that comes with the book, let Mickey guide you and your child through a first-rate introduction to the wonders of magnetism. Real magic! Scholastic, paperback, 2 colors, 48 pp., 3-6 yrs, $1.25.

THE TOOLBOX, by Anne and Harlow Rockwell. A simple painting and single sentence about each of fifteen tools. One especially nice thing about this book is the way it seems to portray the tools themselves as works of art. Collier, paperback, 4 colors, 32 pp., 1 yr. and up, $2.00, hb $7.00.

ALL ABOUT EGGS, by Millicent Selsam. The story of how all animals — from fish and frogs to *people* — begin with eggs. This may be *the* most helpful and appropriate book around for answering the preschoolers' questions of *Where did I come from?* Young Scott, hardcover, 1 and 3 colors, 72 pp., 4-6 yrs. $6.00.

BIG RED BOX OF BOOKS — Change your child's lap into Noah's ark by giving him this box of five books any preschool animal lover will love. ANIMAL BABIES by Harry McNaught and Jan Pfloog's KITTENS ARE LIKE THAT and PUPPIES ARE LIKE THAT are beautifully illustrated with full color paintings. THE LITTLE DUCK and THE LITTLE LAMB by Judy and Phoebe Dunn are stories illustrated with the fuzziest, wooliest, cuddliest photos ever. A luxurious exposure to the animal kingdom at a bargain price. Random House, 5 paperback books in a box, 4 colors, 32 pp. ea. 2-4 yrs. $4.75, 8" × 8".

be at peace with yourself. Dr. Han Selye, international authority on stress, spoke to this when asked how to cope with stress. He replied:[7]

> The secret is not to avoid stress but to "do your own thing." That is an expression to which I fully subscribe. It implies doing what you like to do and what you were made to do at your own rate.
>
> Medicine can help. There are good drugs for high blood pressure, for instance. But for most people it is a matter of learning how to live, how to behave in various situations, to decide: "Do I really want to take over my father's business or be a musician?" If you really want to be a musician, then be one.

Break the Stress Cycle

Stress is cumulative, *unless* you have ways to break the stress cycle. This is, of course, one of the original intentions behind the Sabbath. Even God felt the need to rest after a week of creation. But some of us seek to pack so much into our weekends that we have to go back to work to relax.

In addition to taking at least one day a week that is for yourself, and in which you truly relax, stress may also be diminished by physical exercise. Such activities as jogging, bicycling, swimming or gardening clean out the system and replenish one's energy reserves.

Meditation is another means to reduce or cope with stress. In meditation, one's thoughts are so specifically focused on a particular image that other concerns, cares, anxieties, are at least temporarily forgotten. After meditation, even if the problems exist, one is more capable of coping with them because your mind has been renewed.

Finally, we can refer to the specific relaxation techniques that have proven effective. Biofeedback therapy, yoga, tensing and relaxing different muscle groups in the body, and hypnosis have all proven their effeciveness. Different individuals respond better to different means of stress reduction, so you need to sample and experiment to find which one(s) work(s) best for you.

We Can Find the Time

No matter how busy we are, no matter how much our lives are subject to interruption, we can find the time to break the stress cycle each and every day if we choose to. What we need is the self-discipline (another self-stress reducer) to redeem those moments we are now wasting to engage in the activity (activities) that are truly refreshing to us.

Best of luck to you as you learn how to manage your life's stresses.

Dr. Bill Peterson

A PARENT'S QUERY

"My question . . . Baby refuses to go to sleep without the pacifier, and if she does, she wakes up in 10 to 15 minutes. How do I break this habit (I never should have started) and at what ages should I take the pacifier away altogether? Baby is breastfed and does not suck fingers."

Any comments for this mother?

STATUTORY PROVISIONS PERTAINING TO LICENSING OF MIDWIVES		ALABAMA (Professions and Businesses 4.34-19-1-.34-19-10)
NURSE-MIDWIFE Definition: Registered nurse who has expanded his/her practice to the care of mothers and babies through the maternity cycle.	Requirements	Licensed registered nurse; certificate from school for nurse-midwives.
	Limitations on Practice	Cases of normal childbirth; physician's supervision necessary.
	Special Statutory Provisions	All deliveries must be planned to take place in hospital.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It has been determined that there are approximately 9000 live births per year in Alaska. Each new family would receive a direct mailing with follow-up to provide an annual subscription to a monthly professional production media service. Department material will be included in each monthly mailing to provide educational material on parenting and nurturing skills relative to the age of the child.

Initial contact will be to 9000 persons with an expected participation for 50% of the contacted families. A part time clerk is projected to coordinate and physically prepare mailings of an estimated 58,500 individual mailings per year.

100 - 3 man-months Clerk Typist III
@ 1277 per month + benefits 4941
300 - 4500 annual subscription to prepared
material @ $5.25/year = 23,625

STATE OF ALASKA
Department of Commerce and Economic Development
Division of Occupational Licensing

The Performance Review of the Division of Occupational Licensing (DOL), dated October 30, 1978, was accomplished by the Division of Legislative Audit in response to the sunset law calling for legislative review of boards and commissions with examination and/or licensing authority in professions. A number of recommendations were made regarding procedures and practices of the Division of Occupational Licensing, most of which were concurred with by DOL and most of which have been implemented.

According to the FY'78 Annual Report from the Department of Commerce and Economic Development, the goal of the Division of Occupational Licensing is to "provide preventive consumer protection in occupational areas where the potential harm is so great that the remedies available for recourse to general law will frequently be insufficient to compensate the aggrieved party."

The Division of Occupational Licensing is statutorily charged with administrative and investigative support services for twenty-one boards and commissions and three occupations which are regulated but have no board. Approximately one hundred and twenty-five members serve on the following boards and commissions:

Board of Chiropractic Examiners
Board of Dental Examiners
State Medical Board
Board of Nursing
Board of Dispensing Opticians

Board of Examiners in Optometry
Board of Pharmacy
Board of Veterinary Examiners
Board of Psychologist and Psychological Associate Examiners
Board of Nursing Home Administrators
Physical Therapy Board
Board of Public Accountancy
Board of Barber Examiners
Collection Agency Board
Board of Hairdressing and Beauty Culture Examiners
Board of Electrical Examiners
State Board of Registration for Architects, Engineers and Land Surveyors
Guide Licensing and Control Board
Board of Marine Pilots
Real Estate Commission
Board of Welding Examiners

Professions regulated without a board are Mortuary Science, Construction Contractors, and Concert Promoters.

The Division has a total of twenty-one employees. Two investigators, two Executive Officers, and two administrative support persons comprise the Anchorage Field Office personnel. Juneau personnel consists of eight licensing examiners, one licensing supervisor, one chief investigator, one regulation specialist, one management analyst, three administrative support persons and the Director. The Executive Officer and Executive Secretary located in Anchorage are partially exempt positions and are providing administrative support to the Board of Nursing and the Real Estate Commission.

In FY '79, the Division's staff scheduled and coordinated approximately 71 board meetings and 52 examinations for 3,000 candidates, responded to more than 20,000 inquiries, processed and issued 2,742 new licenses and

8,000 renewal licenses, collected over $717,000 in fees, and maintained more than 28,000 license files.

It should be stressed that DOL is statutorily mandated to provide administrative and budgetary services to boards and commissions; the Division has no authority or decision-making control over any individual board. Legal advice on board activities is provided by the Department of Law, when sought.

Almost without exception the licensing boards have declared their financial independence. That is, they have maintained that they are self-supporting, that revenues from fees charged exceed regulation expenses of their particular profession. Almost without exception this is not the case. Because revenues from all professions are deposited into the general fund, and all expenditures must be allocated from the Division's authorized budget, a penny-by-penny expenditure breakdown is simply not kept for individual boards. The following information was compiled by deducting figures for contractors and mortuary science (who have no board), deducting variables, and assigning administrative expenditures based on number of licensees in each profession in each fiscal year indicated.

FISCAL YEAR 1976

DOL Actual Expenditures:	$478,100.00
- Contractor Expenditures:	1,924.60
- Licensing Examiner:	12,996.00
- Executive Officers:	26,400.27

With respect to specific recommendations made by the Division of Legislative Audit, appropriate steps for implementation have been taken in most instances.

Recommendation No. 1: The Division of Occupational Licensing's investigation unit should be transferred to the Department of Public Safety.

As of this date, a thorough analysis of such a transfer is continuing. The feasibility of an RSA between the Department of Commerce and Economic Development and the Department of Public Safety is a valid option that may have considerable merit in that the functions could be assumed by the Department of Public Safety in an expedited time frame. If our review indicates a transfer of the unit is merited, the transfer would take place prior to February 15, 1980.

Improvements have been made in this unit within the past year. Complaints are now being screened and prioritized, and reports by investigative staff are being made to the boards. Approximately 1,700 cases were purged from the Division files in the fall of 1978; these are pending board approval for closure due to age, lack of jurisdiction, or no apparent violation. Effective December, 1979, approximately 400 have been closed. The Division is in the process of organizing all investigative files and forwarding appropriate material to the State archives; this is expected to be completed by the end of January, 1980.

The Division's enforcement staff received 298 complaints for investigation in FY '79, ranging in priority from urgent public harm to minor technical violations. In FY '79, 44 cases were closed due to one of the following reasons: no jurisdiction no violation, voluntary compliance or age. Charges were filed against 27 which required process for hearing. Out of the 27 litigation cases, 3 licenses were revoked, 1 license was suspended, 2 licenses were denied, 1 case was dropped due to no violation, 2 closed with the stipulation that they retake the board examination and pass, 1 applicant was allowed to resubmit an application after

1 year, and 1 license was granted with the other 16 litigation cases still pending. As of December 10, the Division had 307 open cases on file.

Recommendation No. 2: Statutory amendments are needed to assure that appropriate action is taken on consumer complaints against licensed persons.

The Office of the Governor has indicated that appropriate amendments to AS 45.50.471, and its application, are being pursued.

Recommendation No. 3: The Office of the Governor should keep the appointments of members of the occupational licensing boards current.

We agree with this recommendation; the Division has solicited and submitted recommendations for board appointments.

Recommendation No.4: Legislation should be enacted limiting the length of service for all board members to two consecutive terms.

We agree with this recommendation and the reasoning supporting it.

Recommendation No. 5: The Department of Commerce and Economic Development should improve the operation, security and internal control of the 3M-Linolex minicomputer system.

To designate a data entry person is a valid recommendation, however, budget restrictions do not allow us to hire one individual solely to enter data. This would be very costly.

The Division is currently locking all copied data diskettes in its fire proof safe. These disks are kept current by creating new copies to replace the old ones after 20 changes have been made to any one master disk. It would be very difficult for a person to come into the office and be able to open a data disk without prior training. The State also maintains security personnel who walk the floors constantly and who question any individual working in the offices after hours. If, by chance, a disk was ruined we would have a current backup disk in the safe.

It is felt that if we prenumbered the blank licenses, it would add to more confusion to the licensee. This would have to be a four digit number, which is the same number of digits in a license number. The cost is also high.

A system utilization log has been established and is maintained daily.

The only operating procedures manual at this time is the one distributed by 3M. For data entry it is very good, for correcting errors on disks caused by power failure and/or fluctuations, it is poor. Time has not allowed us to complete a manual at present.

Recommendation No.6: The Department of Commerce and Economic Development should review the license fee structure of all boards and seek appropriate revisions.

Agreed. The Division has reintroduced legislation (SB 94 in the Senate Finance Committee) which would allow the Department to set fees after consultation with the boards. This request was also made to the 1978 Legislature but no action was taken.

Recommendation No. 7: The Department of Commerce and Economic Development should include the goals, objectives and quantifiable measures of each board in the Division of Occupational Licensing's budget documents and submit performance reports for each board as required by AS 37.07.

In April of 1979, all boards and commissions were contacted by the Division and requested to submit goals and objectives for inclusion in the FY '81 budget documents; 15 boards complied. Boards were also requested to submit performance reports for FY '79; 14 boards complied with this request.

Recommendation No. 8: The Division of Occupational Licensing should collect, record and maintain, for five year periods, files, and statistics of license and testing applicants, and related workload of the licensing examiners.

For the past year, monthly activity reports have been maintained by the Division containing information on board activities and examiner workload. Examiners are also submitting interim reports to the boards which outline licensure activity between meetings. This encourages feedback from the boards regarding staff performance.

Recommendation No. 9: The Department of Commerce and Economic Development, in conjunction with the Office of the Governor, should prepare a board member orientation booklet, including a code of conduct.

A manual for board members was prepared by the Department of Law and was distributed to all members. In addition to this manual, new board members receive information regarding complaint handling and the board's role in investigation and adjudication, an application packet for the regulated profession, appropriate statutes and regulations, a copy of the Administrative Procedure Act, information on the availability of teletype service, a listing of other members' names and address on the particular board, and a listing of Division employees.

Recommendation No. 10: The 11 health-related boards, in conjunction with the Division of Occupational Licensing should review their applications for licensure and delete any questions which could lead to discrimination against applicants.

All 21 boards and commissions are cognizant of the need to ensure against appearances or charges of discrimination, and of their responsibilites in this area. The process of application review is time consuming for most boards due to the infrequency of meetings; however, all boards have, or will, consider this recommendation, with assistance from the Division.

Recommendation No. 11: The Department of Commerce and Economic Development should improve formal board minutes.

The Division has been implementing this recommendation and will continue to do so. A decrease in licensing examiner turnover has resulted in substantial improvements to board minutes preparation.

Recommendation No. 12: The Department of Commerce and Economic Development and all licensing boards should ensure that public notices of examinations are sufficiently and timely advertised.

Public notices for board meetings and examinations are advertised according to legal requirements.

In conclusion, the DOL wishes to ensure the Legislature and the public that every effort is being made within available resources to accomplish the directives outlined in Title 8. The recommendations made as a result of the Sunset process, in addition to any other appropriate suggestions from any source, have been and will continue to be evaluated.

MEDICAL CONSULTING SERVICES
VIRGINIA M. COLLINS, R.N.

3201 "C" STREET, SUITE 240
ANCHORAGE, ALASKA 99503

April 28, 1980

The Honorable Thelma Buchholdt
Chairwoman, Health, Education, and
Social Services Committee
House of Representatives
Pouch B
Juneau, Alaska 99811

RE: House Bill 910

Dear Ms. Buchholdt:

I would like to take this opportunity to thank you for your assistance in obtaining information regarding this bill during my brief stop in Juneau on April 18. I would like to restate my opposition to sections of that bill as follows.

Section 2.01.68.060

Lines 26 to 28 (Page One) currently read: "At least two of the members who are professional nurses must hold a bachelor's degree or higher." Recommendation: I would like to see these lines deleted and substituted with the following - "At least two of the members must be diploma and associate degree registered nurses." Justification for Change: There is no foundation that a professional nurse holding a bachelor's degree is any more qualified as a nurse than one prepared at the three or the two year level. As a matter of fact, a recent study, which I am enclosing for you, published in "RN" magazine in 1980 clearly brings to light the real matter of the problems with baccalaureate programs. This study is sufficient to discredit the idea that the baccalaureate program is inherently better than others in preparing nurses.

Section 6AS 08.68.111

Part B states that "the executive secretary must be a nurse with a bachelor's degree or higher in nursing, must be currently licensed by the state, and must meet other qualifications as established by board regulations." Justification for Change: There is no criteria that indicates that a bachelor's degree registered nurse is any more qualified for the position of executive secretary.

I would appreciate your consideration in changing these two sections so that they refer to registered nurses who have met the state's requirement for licensure. This would cover BSN nurses, nurses who have degrees in health science fields, the ADN, and diploma nurses. In this manner, all segments of the nursing population should be represented.

Thank you again for your help. It has been greatly appreciated.

Very truly yours,

Virginia M. Collins, R.N.
Director

Enclosure

Is the BSN better?

Superior nursing performance of diploma graduates is confirmed in a survey of nursing directors and in state board test results.

By Anita Zarett, RN, BA

Although the following study applies to only one state out of 50, it makes a point that's true everywhere and anytime: Don't judge labels; judge results. It's individual performance that counts, not just credentials. What we need now is more information: Is the situation in Pennsylvania typical? Or is it a rare exception? RN welcomes data from any state. If you know of any similar studies, please help us share the results.—The Editors.

THE AUTHOR, who conducted this study, teaches [illegible] nursing at Memorial Rosborough School of Nursing and is presently completing the graduate health education program at St. Joseph's University in Philadelphia. Contributions to the study were also made by Patricia Nelson, R.N., ED, EdM; Carol Chenicki, RN, BSN, EdM, and Kathleen Brogan, RN.

Diploma school graduates rate higher than BSNs in nine of 11 nursing performance categories (and the difference is statistically significant in six of them), according to a survey I conducted of directors of nursing in Pennsylvania. In addition, according to 96% of the respondents, diploma graduates need the least amount of orientation at the time of employment.

I've also discovered that diploma graduates outperformed BSNs in the Pennsylvania State Board Examinations for the past two years. In 1977, the diploma grads scored a mean of 22 points higher, and in 1978, a mean of 28 points higher than BSNs. Further, the percentage of graduates failing state boards in 1978 is lowest for

diploma graduates and highest for BSNs. And although AD grads consistently scored lower than diploma grads, in 1978 they scored higher than the BSNs in four out of five of the nursing areas tested.

A challenge to the '85 proposal

Taken together, these data certainly lead you to wonder about the assumptions of the ANA '85 resolution calling for the BSN as a requirement to enter professional nursing practice. The '85 proposal is, of course, based on the premise that modern nursing practice requires knowledge and skill of a "high order that can only be obtained through a rigorous course of study in

NOTICE: THIS MATERIAL MAY BE PROTECTED BY COPYRIGHT LAW (TITLE 17 U.S. CODE)

colleges and universities"; and that hospital schools of nursing are "inadequate" in meeting these demands.

Little evidence has been offered to support these assumptions. Virtually no previous research in Pennsylvania has been reported that directly compares the performance of BSN, AD, and diploma graduates. Some other studies have attempted to assess performance by comparing the entry level of nurses who have reached higher positions, or by examining hospital policy for hiring and promoting various grads. But these results are, at best, confusing (see "Do hospitals prefer diploma grads?", below).

So when I set out to test the soundness of the ANA's assumptions, I decided to focus on nursing competency. My basic question was whether or not the quality of nursing care would, in fact, improve if the BSN requirement became mandatory. I felt the best way to determine this was to scientifically answer the following questions:

1. How high do nursing service directors in acute care settings in Pennsylvania rate the performance of all three levels of beginning nurse practitioners?

2. Of the three levels, which group needs the least amount of clinical orientation upon employment?

3. Of the three levels, which group, in fact, displays the most successful performance on Pennsylvania State Board Licensure Examinations?

The third question was answered by comparing the results of the graduates in their Pennsylvania State Board Examinations for the past two years.

The first two questions were answered through a survey sent to all the directors of nursing in acute care hospitals in Pennsylvania. The survey asked them to rate the performance of graduates of the various programs in 11 categories of nursing practice and to indicate which group upon graduation required the least amount of orientation. A total of 323 surveys were mailed, 68% were returned, and 48% were useable. Here are highlights of the results (see "How the study was conducted," page 33).

The nursing directors rated diploma grads significantly higher that BSNs in the following areas of performance:

- Performing independently—when necessary—in providing health care.
- Assuming responsibility for the patients assigned to their care.
- Establishing and choosing appropriate priorities to achieve nursing goals.
- Performing nursing skills accurately and safely in the promotion, maintenance, and restoration of health.
- Systematically reporting and recording pertinent data to determine nursing care needs.
- Exhibiting a high degree of commitment to quality nursing care.

In three other areas the diploma grads rated higher than the BSNs, but the difference was not statistically significant: utilizing the nursing process competently; interacting effectively with the health care team, patients, family, and society; and respecting the rights and values of patients and significant others.

Other significant results

The directors rated BSN grads significantly higher than diploma nurses in applying selective knowledge of bio-psycho-social influences on health status; and in identifying the need for nurse self-actualization and continuing education.

continued on page 32

Do hospitals prefer diploma grads?

Performance does count with hospital employers because, as some studies show, many hospitals hire and promote according to ability and seniority, rather than educational background. In a survey of 10 acute care community hospitals in California, Scott found that diploma nurses filled 82% of the head nurse positions and 76% of the managerial and administrative slots, though they comprised only 69% of the professional nursing staff as a whole.

A study by Dateman in 1977 showed more than 92% of the directors of nursing in Pennsylvania viewed diploma nurses as best prepared for nursing practice. Hogestell, in another 1977 study, found that over half of the AD graduates were being hired for the same positions as BSN grads, and that over 80% of all graduates were promoted without regard to preparation. Likewise, in a competency study by Smoyak (1970) diploma and baccalaureate graduates were found to be more alike than different.

The verdict is far from unanimous, however. In a study by Nelson (1978) supervisors rated BSN nurses highest in performance.

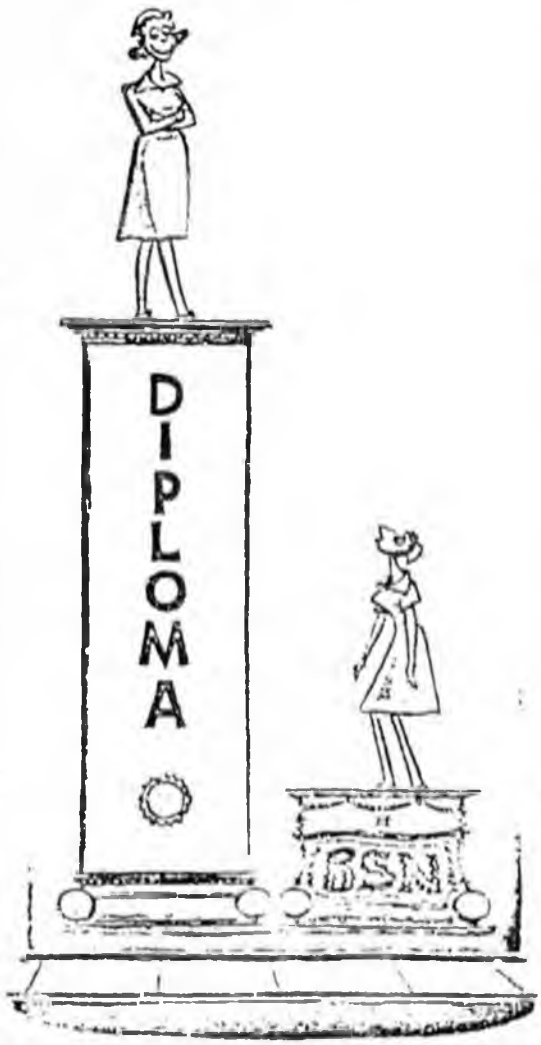
Top honors for diploma grads on nine different counts

When 154 Pennsylvania nursing directors rated diploma, BSN, and AD grads on the skills and attributes listed below, the diploma grads got top scores on nine of 11. Ratings are based on a scale of 5 (highest performance) to 1 (lowest performance). Scores represent the directors' average rating.



Nursing activity	Diploma	BSN	AD
1. Perform nursing skills accurately and safely in the promotion, maintenance, and restoration of health.	4.13*	3.29	2.62
2. Respect the rights and values of patients/clients and significant others.	4.12	4.01	3.58
3. Assume responsibility for the patients/clients assigned to his/her care.	4.09*	3.49	2.29
4. Exhibit high degree of commitment to quality nursing care.	4.03*	3.35	3.31
5. Perform independently when necessary in the provision of health care.	4.01*	3.12	2.53
6. Identify the need for self-actualization and continuing education.	3.93	4.10**	3.41
7. Interact effectively with the health team, patients/clients, family, and society.	3.92	3.82	3.10
8. Systematically report and record pertinent data to determine nursing care needs.	3.92*	3.71	2.98
9. Establish and choose appropriate priorities in order to achieve goals.	3.86*	2.89	2.68
10. Apply selective knowledge concerning biopsycho-social influences on health status.	3.77	4.11**	2.83
11. Utilize the nursing process competently.	3.68	3.47	2.51

*This rating is significantly higher for the diploma graduate than for the BSN graduate.

**This rating is significantly higher for the BSN graduate than for the diploma graduate.

How diploma, BSN, and AD graduates scored on their state boards

The State Board of Nurse Examiners' minimum competency examination leaves little room for misinterpretation. It's the only standard method of evaluating the graduates of all three programs. Here are the comparative results for two consecutive years. The figures speak for themselves.

Mean score achieved in areas examined

1977

	Diploma	BSN	AD
Medicine	526	490	499
Surgery	542	494	517
Obstetrics	516	504	489
Nursing of Children	522	500	501
Psychiatry	504	517	498

1978

	Diploma	BSN	AD
Medicine	535	490	506
Surgery	535	480	508
Obstetrics	510	484	501
Nursing of Children	511	487	489
Psychiatry	493	505	481

In all cases the diploma nurses rated significantly higher than the AD graduates and in most cases the BSN nurses rated higher than the ADs.

The twelfth entry on the survey gave the directors of nursing an opportunity to point out which program prepared nurses to function appropriately with the least amount of orientation. Respondents were invited to give open-ended comment on their assessment of the graduates. Of the 154 directors of nursing responding, 148 (96%) said the diploma graduate is prepared to begin nursing at the entry level with the least amount of orientation. Twenty-three directors claimed that the only nurse prepared to meet the demands of the hospital milieu is the diploma graduate. Ten commented that it took the BSN and the AD six months to a

NOTICE: THIS MATERIAL MAY BE PROTECTED BY COPYRIGHT LAW (TITLE 17 U.S. CODE)

year to "catch up," but five of these said that once the BSN caught up, she exceeded the other two in performance. Although six directors said that the BSN is the best prepared in patient communication, teaching, and similar tasks, three mentioned that after a year of experience, many BSNs accept positions that take them away from the bedside.

The directors of nursing of the larger inner city hospitals associated with a BSN program tended to rate baccalaureate graduates equal to or better than diploma graduates, and those hospitals with their own schools of nursing viewed the diploma graduate as superior. A number of directors (34) expressed concern over nursing shortages that would be created if the '85 proposal became effective. Others stated that instead of closing diploma programs, the ANA and state nurses associations should put pressure on colleges and universities to make the transition from RN to BSN less difficult for those who seek it.

No matter how painstaking the methodology of this research (see "How the study was conducted," below), it remains a survey of the *opinions* of the directors of nursing, rather than a direct measure of nursing performance.

But the second part of my study leaves little room for personal opinion

continued on page 78

How the study was conducted*

Two factors—performance on licensing exams and the opinions of Directors of Nursing—were used to compare the competency of Pennsylvania nurses graduating from BSN, AD, and diploma programs. A null hypothesis was adopted.

Test results of the State Board Registered Nurse Licensing Examinations from the years 1977 and 1978 were used to compare the performances of the examinees. Means were reported individually for the areas tested and failures were expressed in percentages for all three groups.

To study the opinions of directors of nursing, a three-part survey form was developed by the investigators. The first part collected information on hospital size and whether or not nurses from all three programs were employed. The second part listed 11 functions nurses should be able to perform to meet acceptable standards of care and asked the directors to rate the performance of their new graduate nurse employees using a 5 point Likert Scale with a "strongly agree" rating of 5 down to a "strongly disagree" rating of 1 on each of the behaviors. These 11 areas of nursing performance were gleaned from the catalogues of six Pennsylvania baccalaureate, associate degree, and diploma schools. The schools, two of each type, were selected on the basis of their common terminal objectives. The list complies with ANA standards of nursing practice, and the Pennsylvania Nurses Association "1985" position paper's outline of specific nursing qualities.

Content validity for these 11 elements was tested by administering the instrument to four nursing supervisors and two directors of nursing. Unclear areas were revised in accordance with their recommendations if the suggestions agreed with ANA standards.

Reliability of the instrument was assessed by applying the test-retest method three weeks apart. Reliability ($r = .87$) was computed by the Pearson Product Moment Correlation.

The third part of the survey asked the director which level graduate required the least orientation upon employment. Comments were also solicited.

From July through December 1977, a total of 323 survey forms were mailed to hospitals with a census range from less than 50 to over 2,000 beds—modal census was 250. In September of 1977 a second request was mailed to institutions that had not responded to the first. A total of 220 (68%) of the forms were returned completed. Sixty-six were discarded—50 because the hospital did not have either BSN or AD graduates in their employ, the remaining 16 because respondents developed their own rating scale which could not be accurately converted to the survey's scaling system.

After the data was collected and computed, a three-way analysis of variance was employed to test the first 11 hypotheses. An F ratio was obtained at the .05 level of probability. When significance was demonstrated, T tests were applied to indicate exactly between which groups the significance occurred. Both .01 and .05 levels were used. T tests were chosen in preference to the more sophisticated methods because of their simplicity in computation. The results of the 12th variable—the question on orientation—were merely tallied and expressed in the form of a percentage.

BSN *continued from page 33*
or prejudice to color the results. It uses the only standardized method of evaluating nurses that we have: the State Board of Nurse Examiners' cognitive-theoretical minimum competency exam. At present, graduates of all three preparatory programs in Pennsylvania take the same test and are scored in the same manner. So it was a simple matter to compare the performance of the graduates from all three programs in both the 1977 and 1978 exams. Here are some highlights of the findings (for details, see page 32).

In both 1977 and 1978, diploma graduates consistently scored higher than AD and BSN graduates in medical, surgical, obstetric, and nursing of children. BSN graduates scored higher than diploma graduates only in psychiatric nursing. Although AD graduates scored lower than their diploma colleagues, in 1978 they scored higher than BSNs in four of the five areas tested.

Overall means place the diploma graduate first, the AD second, and the BSN last. In 1978, the BSNs' mean scores were lower than their 1977 mean scores in all five areas, and the gap between their scores and the diploma graduates' widened.

Conclusion and implications

Although this study applies only to the state of Pennsylvania, it is certainly sufficient to discredit the idea that a BSN program is inherently better than diploma training. Indeed, it demonstrates that, in at least one major state, diploma school preparation is in many ways significantly superior. The implications are clear.

Before any serious consideration can be given to legislative changes in the entry requirements, an objective comparison of all programs' effectiveness must be carried out on a national scale. If the facts I discovered in Pennsylvania hold true throughout the nation, mandating the BSN would clearly be a terrible mistake. In fact, it would actually make more sense to mandate the diploma. □

Diploma vs. BSN: Some caveats

Because the results of this study are controversial, to say the least, *RN* asked for comments on it from a representative group of nurses, including nursing directors and educators. Included in their remarks were a number of specific provisos worth remembering as you weigh the study's results.

- These data are limited to new graduates employed in or having taken state board exams in Pennsylvania. That doesn't mean, however, that these grads all went to nursing school in Pennsylvania. In fact, some may even have been trained abroad. Several respondents claim the same results would not be found in their states.
- The 11 activities surveyed seem, to some observers, to be weighted toward technical, task-oriented clinical performance rather than leadership and management skills. Since diploma programs are noted for their strong technical/clinical orientation and BSN programs for leadership and management, the results of the survey may be skewed in favor of diploma graduates. The same cannot be said of the state board results, however, because of the cognitive/theoretical bases of the exams.
- Directors of nursing in large hospitals, one reviewer notes, are not as well qualified to speak of the performance of new graduates as supervisors and head nurses are. In smaller community and rural hospitals, the directors might have first hand knowledge of new graduate performance, but the study doesn't break down the data according to institutional size.
- Fifty hospitals had to be disqualified because they did not have ADs or BSNs on staff and consequently had no basis for comparing performance. These were probably diploma school hospitals and/or rural hospitals where AD and BSN graduates are scarce. If so, the survey may understate the overall favor diploma graduates enjoy.

Almost everyone saw a need for more studies. One reviewer suggested an evaluation of performance based on the competencies established by the National League for Nursing for the graduates of various programs. Enrica Singleton, RN, DrPH, an *RN* consultant, focused her attention on the finding that BSN grads rated significantly higher than diploma grads in applying selective knowledge of bio-psycho-social influences on health status. "If this is true," she observed, "better care and performance should be the ultimate result." This seems to be confirmed by the comments of some directors who say that, although it takes BSNs six months to a year to "catch up," once they have, they surpass ADs and diploma grads in performance. Ms. Singleton suggested that possibility is worth a follow up study.

But other reviewers express impatience with studies that look back. Contributing Editor Margaret Van Meter, RN, wants nursing to press forward. "What's needed is in-depth analysis of future health-care needs and an educational program that's geared to meet those needs."

Sue Bear, RN, Manager - Emergency Room - Providence Hospital, Anchorage - 276-4511

Relating to: House Bill 910 - An Act Relating to the practice of nursing.

As diploma and associate degree registered nurses, we continue to oppose HB 910.

We will continue to oppose this bill until we have a guarantee in writing that we will have representation on the board of nursing of a diploma RN graduate and an associate degree RN graduate.

It would require making changes in the language in sections 1 and 2 on page 1 of HB 910.

Regardless of what any other lobbyist, spokesman, legislative writer, or the like, who supports this bill may say to your committee, we are against the bill until the above guarantees are inserted into the bill.

Diploma and associate degree registered nurses comprise the majority of RNs in the State of Alaska. We want equal representation on the board. We do not want to governed by a minority (the Bachelor of Science RNs) -- as it would be unfair, undemocratic and unsupportable.

We did have a meeting with representatives of the Alaska Nursing Association -- whose officers support this bill. Our meeting reconfirmed that we should oppose the bill until diploma and associate degree nurses are represented on the board.

Thank you for your consideration.

Introduced: 2/27/80
Referred: Health, Education & Social Services and Finance

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 910

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the practice of nursing."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.68.010 is amended to read:

Sec. 08.68.010. CREATION AND MEMBERSHIP OF BOARD OF NURSING. There is created a Board of Nursing, consisting of seven members appointed by the governor. One member must [SHALL] be an actively licensed practical nurse [CURRENTLY INVOLVED IN INSTITUTIONAL NURSING SERVICE], one member an advanced nurse practitioner [IN COMMUNITY OR PUBLIC HEALTH NURSING], one member who is a professional nurse engaged in basic professional nursing education, [AND] two members who are professional nurses with direct or indirect responsibilities for nursing services [IN BASIC OR CONTINUING NURSING EDUCATION, ONE NURSE AT LARGE], and two persons who have no direct financial interest in the health care industry.

* Sec. 2. AS 08.68.060 is amended to read:

Sec. 08.68.060. QUALIFICATIONS OF REGISTERED NURSE AND LICENSED PRACTICAL NURSE BOARD MEMBERS. The five members of the board who are nurses must [SHALL] be licensed [PROFESSIONAL NURSES] in the state, and must [SHALL] have been actively engaged in nursing for not less than four years before appointment, three [TWO] years of which were within the five years immediately preceding appointment. ~~[At least two of the members who are professional nurses must hold a bachelor's degree or higher.]~~ delete adop.

* Sec. 3. AS 08.68.070 is amended to read:

Sec. 08.68.070. ELECTION OF OFFICERS. The board shall annually elect a chairperson [CHAIRMAN] and secretary-treasurer from among its members.

* Sec. 4. AS 08.68.080 is amended to read:

Sec. 08.68.080. MEETINGS. The board [~~shall~~ may] meet at least four times [ONCE] a year.

* Sec. 5. AS 08.68.100 is amended to read:

Sec. 08.68.100. DUTIES AND POWERS OF BOARD. (a) The board shall

(1) adopt [RULES AND] regulations necessary to make this chapter effective, including regulations pertaining to practice as an advanced nurse practitioner [AND WHEN NECESSARY, ADDITIONS TO OR CHANGES IN RULES AND REGULATIONS OF THE BOARD BY A QUORUM VOTE BY MAIL, THESE ADDITIONS TO OR CHANGES IN THE RULES AND REGULATIONS WHICH ARE MADE BY MAIL AND THE VOTE ON THEM TO BE ENTERED IN THE MINUTES OF THE BOARD AT ITS NEXT MEETING];

[(2) MAKE AVAILABLE, UPON REQUEST, COPIES OF THIS CHAPTER AND THE REGULATIONS ADOPTED FOR ADMINISTERING IT;]

(3) approve curricula and adopt standards for

(A) educational programs preparing persons for licensure or authorization to practice under AS 08.68, and

(B) basic and graduate degree educational programs in nursing [LICENSING AND PROVIDE FOR SURVEYS OF THESE PROGRAMS IN THE STATE AT THE TIMES IT CONSIDERS NECESSARY];

(4) accredit [ACCREDITS] educational programs which meet the requirements of this chapter and [THE STANDARDS] of the board, and deny, revoke, or suspend [OR WITHDRAW] accreditation from educational programs for failure to meet board requirements [STANDARDS];

(5) examine, license, and renew the licenses of qualified

applicants [, AND CONDUCT HEARINGS UPON CHARGES AND ADMINISTER OATHS TO PERSONS GIVING TESTIMONY AT HEARINGS];

(6) prescribe requirements to validate competency to continue or re-enter practice; [KEEP A RECORD OF ITS PROCEEDINGS, AND SUBMIT ANNUAL REPORTS TO THE GOVERNOR AND THE LEGISLATURE]

(7) keep a record of its proceedings, and submit annual reports to the governor and legislature;

(8) define by regulation the duties of the executive secretary and delegate such authority of the board to the executive secretary as may be necessary for the conduct of board business.

(b) The board may:

~~(1) issue subpoenas, compel the attendance of witnesses, and administer oaths to persons giving testimony at hearings;~~ delete adop.

(2) conduct hearings upon charges of alleged violations of this chapter or regulations adopted under it;

(3) invoke, or request the department to invoke, disciplinary action against a licensee, in accordance with the Administrative Procedure Act (AS 44.62).

* Sec. 6. AS 08.68.111 is amended to read:

Sec. 08.68.111. EXECUTIVE SECRETARY [OFFICER] OF BOARD. (a) The Department of Commerce and Economic Development, in consultation with the Board of Nursing, shall employ a licensed, professional [REGISTERED] nurse, who is not a member of the board, to serve as executive secretary [OFFICER] of the board.

(b) The executive secretary ~~must~~ May adop. [OFFICER SHALL] be a nurse having a bachelor's degree or higher in nursing, ~~must~~ Shall adop be currently licensed in the state ~~and must meet other qualifications as established by board regulations.~~ delete adop. [WITH NOT LESS THAN FIVE YEARS OF ACTIVE NURSING EXPERIENCE, OF WHICH NOT LESS THAN TWO YEARS WITHIN THE PRE-

CEDING FIVE YEARS HAS BEEN IN AN ADMINISTRATIVE OR A TEACHING CAPACITY IN AN ACCREDITED INSTITUTION ACCEPTABLE TO THE BOARD. IF A LICENSED PROFESSIONAL NURSE HOLDING A BACHELOR'S DEGREE IS NOT AVAILABLE TO FILL THE POSITION OF EXECUTIVE OFFICER, THE BOARD MAY WAIVE THE REQUIREMENT FOR A BACHELOR'S DEGREE AND APPOINT A LICENSED PROFESSIONAL NURSE POSSESSING OTHER QUALIFICATIONS IN EDUCATION AND ADMINISTRATIVE EXPERIENCE WHICH THE BOARD CONSIDERS ACCEPTABLE. HOWEVER, THE APPOINTEE SHALL COMPLETE THE REQUIREMENTS FOR THE AWARD OF A BACHELOR'S DEGREE IN FOUR YEARS AFTER APPOINTMENT TO THE POSITION OF EXECUTIVE OFFICER. ANNUALLY, THE APPOINTEE SHALL OFFER THE BOARD EVIDENCE OF SATISFACTORY PROGRESS TOWARD AWARD OF A BACHELOR'S DEGREE. IF AFTER THE ANNUAL REVIEW THE BOARD BELIEVES THAT THE APPOINTEE HAS NOT MADE SATISFACTORY PROGRESS TOWARD AWARD OF A BACHELOR'S DEGREE, THE DEPARTMENT MAY DISMISS THE APPOINTEE, NOTWITHSTANDING THE PROVISIONS OF AS 39.25.170.]

(c) The executive secretary [OFFICER] shall:

(1) perform the ~~administrative~~ duties ~~as required~~ by law, regulation, or [THE STATUTES AND] the department, including the preparation of minutes of board meetings;

(2) carry out regulations and policy decisions, consistent with law, made by the Board of Nursing, [AND]

(3) review and approve applicants for licensure who meet the qualifications prescribed in this chapter and in the board's regulations, [ASSIST THE BOARD IN THE CONDUCTING OF EXAMINATIONS, EDUCATIONAL PROGRAMS, PREPARATION OF MINUTES AND OTHER BOARD ADMINISTRATIVE WORK]

(4) bring before the board those applications that raise questions requiring full board consideration.

(5) conduct licensure examinations for qualified applicants,

(6) assist the department in informing licensees of the

necessity to renew licenses,

(7) communicate with other state boards and educational institutions regarding licensure of candidates and related concerns,

(8) refer complaints against licensees to the department for investigation,

(9) prepare periodic and special reports and surveys as required, including the annual report to the governor and the legislature,

(10) collect, compile, analyze, and distribute data relating to nursing education and licensure,

(11) respond to communications relating to nursing licensure, the provisions of AS 08.68, nursing education, and other related matters,

(12) direct communications requiring full board action to the board,

delete adp.

(13) provide information concerning the provisions of AS 08.68, board regulations and policies, and trends in nursing and nursing education to members of the public and the nursing profession, and to schools and other interested institutions and organizations,

(14) participate in educational program surveys,

(15) refer educational program reports to the board,

(16) assist the board and the department in the preparation of the annual budget,

(17) prepare and distribute the agenda for board meetings,

(18) collect and make available to the board all pertinent information on issues before the board,

(19) assist the division in the orientation of new board members.

* Sec. 7. AS 08.68.170 is amended to read:

Sec. 08.68.170. QUALIFICATIONS OF PROFESSIONAL OR PRACTICAL NURSE APPLICANTS. An applicant for a license to practice professional or practical nursing shall submit to the board on forms and in the manner prescribed by the board, written evidence, verified by oath, that the applicant has [COMPLETED AN APPROVED FOUR YEAR HIGH SCHOOL COURSE OF STUDY OR THE EQUIVALENT AS DETERMINED BY THE APPROPRIATE EDUCATIONAL AGENCY, AND HAS] successfully completed (1) a professional or practical nursing education program accredited by the board; or (2) a professional or practical nursing education program outside the state which, in the opinion of the board, meets the minimum requirements of the board for an accredited program of study in this state at the time the applicant graduated; or (3) a professional or practical nursing education program accredited by the National League for Nursing at the time the applicant graduated.

* Sec. 8. AS 08.68.190 is amended to read:

Sec. 08.68.190. LICENSE BY EXAMINATION. The applicant shall pass a written examination as prescribed by [IN THE SUBJECTS WHICH] the board [PRESCRIBES]. The board shall issue a license to an applicant who passes the examination to practice professional [NURSING] or practical nursing provided the other qualifications outlined in AS 08.68.170 and 08.68.180 are also met. The board shall conduct examinations annually and as often as it considers necessary.

* Sec. 9. AS 08.68.200 is amended to read:

Sec. 08.68.200. LICENSE BY ENDORSEMENT. The board may issue a license by endorsement to practice professional or practical nursing [OR TO PRACTICE PRACTICAL NURSING], whichever is appropriate, to an applicant who

(1) is licensed as either a professional or practical nurse [OR A PRACTICAL NURSE] under the laws of another state or territory,

if in the opinion of the board the applicant meets the qualifications required for licensing in the state, and meets the requirements of AS 08.68.170 [EITHER SEC. 170 OR SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE]; or

(2) meets the requirements of AS 08.68.170 and has successfully completed the Canadian Nurses' Association Testing Service (CNATS) examination if the board determines it is comparable to the examination administered by this state.

* Sec. 10. AS 08.68.210(a)(2) is amended to read:

(2) meets the requirements of AS 08.68.170 [EITHER SEC. 170 OR SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE], and

* Sec. 11. AS 08.68.210(b) is amended to read:

(b) The board may issue a nonrenewable permit to an applicant for license by examination if (1) the applicant [HE] meets the qualifications of AS 08.68.170, or (2) the applicant is a graduate of a foreign school of nursing and has successfully completed the examination administered by the Commission on Graduates of Foreign Nursing Schools (CGFNS) [SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE, AND PAYS THE REQUIRED FEE]. The permit will be valid for a period not extending beyond the time when the results are published of the first examination the applicant is eligible to take after the permit is issued.

* Sec. 12. AS 08.68.220 is amended to read:

Sec. 08.68.220. FEES. The following fees shall be imposed under this chapter when applicable:

(1) for professional [OR REGISTERED] nursing

(A) application fee..... $40 [$20]

(B) license-by-examination fee..... $20

(C) license-by-endorsement fee..... $20

if in the opinion of the board the applicant meets the qualifications required for licensing in the state, and meets the requirements of AS 08.68. '0 [EITHER SEC. 170 OR SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE]; or

(2) meets the requirements of AS 08.68.170 and has successfully completed the Canadian Nurses' Association Testing Service (CNATS) examination if the board determines it is comparable to the examination administered by this state.

* Sec. 10. AS 08.68.210(a)(2) is amended to read:

(2) meets the requirements of AS 08.68.170 [EITHER SEC. 170 OR SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE], and

* Sec. 11. AS 08.68.210(b) is amended to read:

(b) The board may issue a nonrenewable permit to an applicant for license by examination if (1) the applicant [HE] meets the qualifications of AS 08.68.170, or (2) the applicant is a graduate of a foreign school of nursing and has successfully com, eted the examination administered by the Commission on Graduates of Foreign Nursing Schools (CGFNS) [SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE, AND PAYS THE REQUIRED FEE]. The permit will be valid for a period not extending beyond the time when the results are published of the first examination the applicant is eligible to take after the permit is issued.

* Sec. 12. AS 08.68.220 is amended to read:

Sec. 08.68.220. FEES. The following fees shall be imposed under this chapter when applicable:

(1) for professional [OR REGISTERED] nursing

(A) application fee..... $40 [$20]

(B) license-by-examination fee..... $20

(C) license-by-endorsement fee..... $20

(D) biennial license renewal fee..... $20 [$15]

(2) for practical or vocational nursing

(A) application fee..... $30 [$15]

(B) license-by-examination fee..... $10 [$15]

(C) license-by-endorsement fee..... $10 [$15]

(D) biennial license renewal fee..... $20 [$15]

* Sec. 13. AS 08.68.251 is amended to read:

Sec. 08.68.251. LAPSED LICENSES. (a) A lapsed license may be reinstated if it has not remained lapsed for more than three [FIVE] years by payment of license fees which have fallen due during the lapsed period.

(b) If a [THE] license has remained lapsed for more than three [FIVE] years and

(1) if the board has reason to believe that the person applying for reinstatement [OF HIS LICENSE] no longer has sufficient knowledge to carry out the duties of a licensed nurse, the board shall [MAY] require the applicant to [TAKE AND PASS THE EXAMINATION GIVEN UNDER SEC. 190 OF THIS CHAPTER OR] complete a course of study [REFRESHER COURSE] approved by the board or pass an examination prescribed by the board, and to pay all applicable fees as if for a new application;

(2) if the board determines that the person applying for reinstatement has been actively employed in nursing in another state and has sufficient knowledge to carry out the duties of a licensed nurse, the lapsed license may be reinstated by payment of a reasonable fee imposed by the board under AS 44.62 (the Administrative Procedure Act), not to exceed the total fees required for a new application.

* Sec. 14. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.260. INACTIVE NURSES UNDER PREVIOUS LAW. A nurse who holds an inactive license issued under previous AS 08.68.261 shall

either (1) activate the license on or before that renewal date, or (2) permit the license to lapse.

* Sec. 15. AS 08.68.270 is amended to read:

Sec. 08.68.270. GROUNDS FOR DENIAL, SUSPENSION, OR REVOCATION. The board, after compliance with the Administrative Procedure Act (AS 44.62), may deny, suspend or revoke the license of a person who

(1) has obtained or attempted to obtain a license to practice nursing by fraud or deceit;

(2) has been convicted of a felony;

(3) has been convicted of any misdemeanor that bears directly on the fitness of the person to practice nursing [A CRIME INVOLVING MORAL TURPITUDE];

(4) [IS] habitually abuses alcoholic beverages, stimulants, or depressants or illegally uses hallucinogenic or stimulant drugs as defined by AS 17.12.150(3) or narcotic drugs as defined by AS 17.10.-230(13) [INTOXICATED OR IS ADDICTED TO THE USE OF NARCOTICS];

(5) has impersonated a professional or practical nurse;

(6) is guilty, in the opinion of the board, of negligence which has resulted in a significant risk to the health or safety of a client or has resulted in [SERIOUS] injury to a client [PATIENT];

(7) practices or attempts to practice nursing while afflicted with physical or mental illness, deterioration, or disability to such an extent that the affliction interferes with the individual's performance of nursing functions [IS MENTALLY ILL OR MENTALLY INCOMPETENT];

(8) is guilty of unprofessional conduct;

(9) has wilfully [OR REPEATEDLY] violated any of the provisions of this chapter;

(10) is considered by the board to be professionally incompetent;

(11) denies care or treatment to a patient or person seeking assistance if the sole reason for the denial is the failure or refusal of the patient or person seeking assistance to execute an agreement to arbitrate a dispute, controversy, or issue arising out of the care or treatment, as provided in AS 09.55.535(a).

* Sec. 16. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.276. CONTINUING COMPETENCE REQUIRED. A license to practice nursing may not be renewed unless the nurse has complied with continuing competence requirements that may be established by the board by regulation.

* Sec. 17. AS 08.68.280 is amended to read:

Sec. 08.68.280. NURSING EDUCATION PROGRAM PROHIBITED UNLESS ACCREDITED. No person, institution or agency may conduct a nursing education program preparing persons for examination, licensure, authorization for specialized practice, or a graduate degree [FOR PROFESSIONAL OR PRACTICAL NURSES] unless the program is accredited by the board. All nursing education programs must be established in an accredited post secondary educational institution within the state.

* Sec. 18. AS 08.68.290 is amended to read:

Sec. 08.68.290. APPLICATION FOR ACCREDITATION BY BOARD. An institution desiring to conduct a nursing education program to prepare p ofessional [OR PRACTICAL] nurses at the associate, baccalaureate or higher degree levels or to prepare a nurse to perform in an expanded role as an advanced nurse practitioner or to prepare practical nurses shall apply to the board and submit evidence that (1) it is prepared to carry out the curriculum which meets requirements prescribed by law and [APPROVED] by the board for professional nursing, [OR] for practice as an advanced nurse practitioner or for practical nursing, [AS THE CASE MAY BE,] and that (2) it is prepared to meet other

requirements prescribed [STANDARDS ESTABLISHED] by law and by the board.

* Sec. 19. AS 08.68.300 is amended to read:

Sec. 08.68.300. SURVEY AND ACCREDITATION BY THE BOARD. The board shall designate a survey team [THE EXECUTIVE OFFICER, A BOARD MEMBER, OR A CONSULTANT TO SURVEY THE INSTITUTION APPLYING FOR ACCREDITATION] to determine if the [STANDARDS AND] requirements prescribed [REQUIRED] by law and the board are met. The board may survey a nursing education program in the state at any time. Written reports of the surveys shall be filed with and retained by the board [AND RETAINED BY IT].

* Sec. 20. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.325. RECOGNITION OF EDUCATIONAL PROGRAMS. No program or course of study will be recognized as satisfying state requirements without board approval.

* Sec. 21. AS 08.68.330 is amended to read:

Sec. 08.68.330. LIST OF ACCREDITED AND APPROVED PROGRAMS. The board shall prepare, maintain, and periodically [FROM TIME TO TIME] publish a list of accredited nursing education programs preparing nurses to practice and programs or courses of study which are approved to validate competency or to prepare a nurse for authorization to practice as an advanced nurse practitioner or to obtain a graduate degree [IN THE STATE].

* Sec. 22. AS 08.68.340 is repealed and re-enacted to read:

Sec. 08.68.340. VIOLATIONS. (a) It is a class A misdemeanor for a person to:

(1) sell or fraudulently obtain or furnish a nursing diploma, license renewal, or record, or knowingly aid in doing so;

(2) practice nursing under cover of a diploma, license, or

record illegally or fraudulently obtained or signed or issued unlawfully, with knowledge of the illegality or unlawfulness of the act;

(3) practice or offer to practice nursing with knowledge that he has not been licensed, except when rendering necessary aid to the ill, injured, or infirm in an emergency, or knowingly to employ as a nurse a person without a license to practice nursing;

(4) knowingly use in connection with his name a designation tending to imply that he is a licensed nurse unless he is licensed;

(5) practice nursing during the time his license is suspended or revoked, knowing of the suspension or revocation;

(6) conduct a nursing education program that represents or implies that it is accredited knowing that the program has not been accredited by the board;

(7) do an act described in AS 08.68.405(10), (11), (14), or (15); or

(8) knowingly do an act described in AS 08.68.405(9).

(b) It is a class B misdemeanor for a person to:

(1) practice nursing under cover of a diploma, license, or record illegally obtained or signed or issued unlawfully;

(2) practice or offer to practice nursing without having been licensed, except when rendering necessary aid to the ill, injured, or infirm in an emergency, or to employ as a nurse a person without a license to practice nursing;

(3) use in connection with his name a designation tending to imply that he is a licensed nurse unless he is licensed;

(4) practice nursing during the time his license is suspended or revoked or with knowledge his license has lapsed;

(5) conduct a nursing education program that represents or implies that is is accredited, unless the program has been accredited

by the board; or

(6) do an act described in AS 08.68.405(4), (6), (7), (8), (12), (17), (18), or (19).

(c) It is a violation for a person to practice nursing during the time his license is lapsed.

* Sec. 23. AS 08.68.400(a) is amended to read:

(a) This chapter does not apply to

(1) a qualified nurse licensed in another state employed by the United States Government or a bureau, or agency, or division of the United States Government while in the discharge of his official duties;

(2) nursing service given temporarily in the event of a public emergency, epidemic, or disaster;

(3) the practice of nursing by a student enrolled in a nursing education program accredited by the board when the practice is in connection with the student's course of study; [OR]

(4) the practice of nursing by an individual [A NURSE] enrolled in an approved program or course of study for purposes of meeting competency re-entry requirements under AS 08.68.251; or [REFRESHER COURSE]

(5) the practice of nursing by a nurse licensed in another state who engages in nursing education or nursing consultation activities when these activities and contact with clients do not exceed 20 working days within a licensing period.

* Sec. 24. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.405. UNPROFESSIONAL CONDUCT. (a) A person who commits one of the following acts is guilty of unprofessional conduct:

(1) failing to use appropriate judgment in the practice of nursing based upon the level of nursing for which the individual is

educationally prepared and licensed;

(2) failing to exercise technical competence in carrying out nursing care,

(3) failing to safeguard a client's dignity and right to privacy;

(4) violating the confidentiality of information or knowledge concerning a client;

(5) verbally abusing a client;

(6) physically abusing a client;

(7) performing new nursing techniques or procedures without proper education and preparation;

(8) using alcohol or other drugs to the extent that the use interferes with nursing functions;

(9) making a disposition of prescription drugs or narcotics other than that ordered or prescribed by a person authorized by law to do so;

(10) falsifying a client's records or intentionally making an incorrect entry in a client's chart;

(11) violating state or federal laws regulating drugs, by forging prescriptions or by making drugs available to himself, friends, or family members;

(12) delegating a nursing care function, task, or responsibility to another who is not licensed under AS 08.68 to perform that function, task, or responsibility, and the delegation involves a substantial risk of harm to a client;

(13) assuming duties and responsibilities, on repeated occasions, without adequate training or when competency has not been maintained;

(14) assisting another person to violate or circumvent any

law or regulation intended to regulate nursing practice;

(15) permitting or allowing another person to use his or her nursing license or permit for any purpose;

(16) failing to exercise adequate supervision over persons who are authorized to practice only under the supervision of the licensed professional;

(17) leaving a nursing assignment without properly notifying appropriate personnel;

(18) committing any act that poses a substantial risk of harm to a client;

(19) failing to perform acts within the nurse's scope of competence which are necessary to prevent substantial risk of harm to a client;

(20) failing to report as required by AS 08.68.406.

(b) The board may by regulation provide that other acts contrary to the standards of the nursing profession constitute unprofessional conduct.

* Sec. 25. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.406. DUTY TO REPORT ILLEGAL CONDUCT OR CONDUCT DANGEROUS TO CLIENTS. A nurse who witnesses a health care provider engaged in the following conduct shall report that conduct to the appropriate licensing board or to the immediate supervisor of that provider:

(1) any act described in AS 08.68.405(6), (8), (9), (10), (11), (12), (14), (15), (18), or (19);

(2) any act described in AS 08.64.380(3)(B) or (F);

(3) any act posing a danger to a client's welfare.

* Sec. 26. AS 08.68.410 is repealed and re-enacted to read:

Sec. 08.68.410. DEFINITIONS. As used in this chapter

(1) "accredited nursing education program" means a program having curricula and standards which meet the requirements established by the board;

(2) "advanced nurse practitioner" means a registered professional nurse authorized to practice in the state who, by virtue of specialized education and experience, has become certified to perform acts of medical diagnosis and the prescription of medical, therapeutic, or corrective measures under regulations adopted by the board;

(3) "board" means the Board of Nursing;

(4) "endorsement" is the licensing of an applicant without examination through the acceptance of a license or registration issued by any state or territory after a comprehensive examination which is substantially equivalent to the examination offered in this state;

(5) "licensed practical nurse" is equivalent to the title "licensed vocational nurse" and to the name suffix abbreviations L.P.N. and L.V.N.;

(6) "licensed professional nurse" is equivalent to the common title "registered nurse" and the name suffix abbreviation R.N.;

(7) "practice of practical nursing" means the performance for compensation or personal profit of selected acts in the prevention of illness, and in the care of the ill, injured, or infirm under the direction of a licensed professional nurse or a licensed physician or a licensed dentist not requiring the substantial specialized skill, judgment, and knowledge required in professional nursing;

(8) "practice of professional nursing" means the performance for compensation or personal profit of acts of professional service requiring substantial specialized knowledge, judgment, and skill based upon the principles of biological, physiological, behavioral, and sociological sciences in assessing and responding to actual or poten-

tial health needs of individuals, families, or communities through such services as:

(A) assessment, problem identification, counseling, and health teaching:

(i) in the maintenance of health or in the prevention of illness of clients; and

(ii) in the care of the ill, injured, or infirm;

(B) administration, supervision, delegation, and evaluation of nursing practice;

(C) teaching of nursing;

(D) execution of a medical regimen as prescribed by a health care provider authorized by the state to perform acts of medical practice;

(E) performance of such additional acts requiring education and training and recognized by the nursing profession as properly performed by registered professional nurses;

(F) performance of acts of medical diagnosis and the prescription of medical therapeutic or corrective measures under regulations adopted by the board;

(9) "professional incompetence" means that a nurse does not possess the skills, knowledge, and awareness of his or her limitations and abilities to continue safely the practice of nursing.

* Sec. 26. Administrative regulations, adopted jointly by the Board of Nursing and the State Medical Board and in effect on the effective date of this Act, remain in effect until amended or repealed by the Board of Nursing under this Act.

* Sec. 27. AS 08.68.180(a), 08.68.260, and 08.68.350 are repealed.

1) get figures on how much the Bd brings in from licensing fees.

2) How much does it cost to run the Bd.

3) cost to administer test

4) proposed budget for next yr.

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 910

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVEN[illegible]LATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the practice of nursing."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.68.010 is amended to read:

Sec. 08.68.010. CREATION AND MEMBERSHIP OF BOARD OF NURSING. There is created a Board of Nursing, consisting of seven members appointed by the governor. One member must [SHALL] be an actively licensed practical nurse [CURRENTLY INVOLVED IN INSTITUTIONAL NURSING SERVICE], one member an advanced nurse practitioner [IN COMMUNITY OR PUBLIC HEALTH NURSING], one member who is a professional nurse engaged in basic professional nursing education, [AND] two members who are professional nurses with direct or indirect responsibilities for nursing services [IN BASIC OR CONTINUING NURSING EDUCATION, ONE NURSE AT LARGE], and two persons who have no direct financial interest in the health care industry.

* Sec 2. AS 08.68.060 is amended to read:

Sec. 08.68.060. QUALIFICATIONS OF REGISTERED NURSE AND LICENSED PRACTICAL NURSE BOARD MEMBERS. The five members of the board who are nurses must [SHALL] be licensed [PROFESSIONAL NURSES] in the state, and must [SHALL] have been actively engaged in nursing for not less than four years before appointment, three [TWO] years of which were within the five years immediately preceding appointment, [At least two of the members who are professional nurses must hold a bachelor's degree or higher.] Delete adopted

* Sec. 3. AS 08.68.070 is amended to read:

Sec. 08.68.070. ELECTION OF OFFICERS. The board shall annually elect a chairperson [CHAIRMAN] and secretary-treasurer from among its members.

* Sec. 4. AS 08.68.080 is amended to read:

Sec. 08.68.080. MEETINGS. The board [shall] may meet at least four times [ONCE] a year.

* Sec. 5. AS 08.68.100 is amended to read:

Sec. 08.68.100. DUTIES AND POWERS OF BOARD. (a) The board shall

(1) adopt [RULES AND] regulations necessary to make this chapter effective, including regulations pertaining to practice as an advanced nurse practitioner [AND WHEN NECESSARY, ADDITIONS TO OR CHANGES IN RULES AND REGULATIONS OF THE BOARD BY A QUORUM VOTE BY MAIL, THESE ADDITIONS TO OR CHANGES IN THE RULES AND REGULATIONS WHICH ARE MADE BY MAIL AND THE VOTE ON THEM TO BE ENTERED IN THE MINUTES OF THE BOARD AT ITS NEXT MEETING];

[(2) MAKE AVAILABLE, UPON REQUEST, COPIES OF THIS CHAPTER AND THE REGULATIONS ADOPTED FOR ADMINISTERING IT;]

(3) approve curricula and adopt standards for

(A) educational programs preparing persons for licensure or authorization to practice under AS 08.68, and

(B) basic and graduate degree educational programs in nursing [LICENSING AND PROVIDE FOR SURVEYS OF THESE PROGRAMS IN THE STATE AT THE TIMES IT CONSIDERS NECESSARY];

(4) accredit [ACCREDITS] educational programs which meet the requirements of this chapter and [THE STANDARDS] of the board, and deny, revoke, or suspend [OR WITHDRAW] accreditation from educational programs for failure to meet board requirements [STANDARDS];

(5, examine, license, and renew the licenses of qualified

applicants [, AND CONDUCT HEARINGS UPON CHARGES AND ADMINISTER OATHS TO PERSONS GIVING TESTIMONY AT HEARINGS];

(6) prescribe requirements to validate competency to continue or re-enter practice; [KEEP A RECORD OF ITS PROCEEDINGS, AND SUBMIT ANNUAL REPORTS TO THE GOVERNOR AND THE LEGISLATURE]

(7) keep a record of its proceedings, and submit annual reports to the governor and legislature;

(8) define by regulation the duties of the executive secretary and delegate such authority of the board to the executive secretary as may be necessary for the conduct of board business.

(b) The board may:

(1) issue subpoenas, compel the attendance of witnesses, and administer oaths to persons giving testimony at hearings; delete adopted

(2) conduct hearings upon charges of alleged violations of this chapter or regulations adopted under it;

(3) invoke, or request the department to invoke, disciplinary action against a licensee, in accordance with the Administrative Procedure Act (AS 44.62).

* Sec. 6. AS 08.68.111 is amended to read:

Sec. 08.68.111. EXECUTIVE SECRETARY [OFFICER] OF BOARD. (a) The Department of Commerce and Economic Development, in consultation with the Board of Nursing, shall employ a licensed, professional [REGISTERED] nurse, who is not a member of the board, to serve as executive secretary [OFFICER] of the board.

(b) The executive secretary [must] [OFFICER SHALL] be a nurse having a bachelor's degree or higher in nursing, [must] be currently licensed in the state. [and must meet other qualifications as established by board regulations.] [WITH NOT LESS THAN FIVE YEARS OF ACTIVE NURSING EXPERIENCE, OF WHICH NOT LESS THAN TWO YEARS WITHIN THE PRE-

May adopted Shall adopted delete adopted

CEDING FIVE YEARS HAS BEEN IN AN ADMINISTRATIVE OR A TEACHING CAPACITY IN AN ACCREDITED INSTITUTION ACCEPTABLE TO THE BOARD. IF A LICENSED PROFESSIONAL NURSE HOLDING A BACHELOR'S DEGREE IS NOT AVAILABLE TO FILL THE POSITION OF EXECUTIVE OFFICER, THE BOARD MAY WAIVE THE REQUIREMENT FOR A BACHELOR'S DEGREE AND APPOINT A LICENSED PROFESSIONAL NURSE POSSESSING OTHER QUALIFICATIONS IN EDUCATION AND ADMINISTRATIVE EXPERIENCE WHICH THE BOARD CONSIDERS ACCEPTABLE. HOWEVER, THE APPOINTEE SHALL COMPLETE THE REQUIREMENTS FOR THE AWARD OF A BACHELOR'S DEGREE IN FOUR YEARS AFTER APPOINTMENT TO THE POSITION OF EXECUTIVE OFFICER. ANNUALLY, THE APPOINTEE SHALL OFFER THE BOARD EVIDENCE OF SATISFACTORY PROGRESS TOWARD AWARD OF A BACHELOR'S DEGREE. IF AFTER THE ANNUAL REVIEW THE BOARD BELIEVES THAT THE APPOINTEE HAS NOT MADE SATISFACTORY PROGRESS TOWARD AWARD OF A BACHELOR'S DEGREE, THE DEPARTMENT MAY DISMISS THE APPOINTEE, NOTWITHSTANDING THE PROVISIONS OF AS 39.25.170.]

(c) The executive secretary [OFFICER] shall

(1) perform the ~~administrative~~ duties ~~required~~ by law, regulation, or [THE STATUTES AND] the department, including the preparation of minutes of board meetings,

(2) carry out regulations and policy decisions, consistent with law, made by the Board of Nursing, [AND]

(3) review and approve applicants for licensure who meet the qualifications prescribed in this chapter and in the board's regulations, [ASSIST THE BOARD IN THE CONDUCTING OF EXAMINATIONS, EDUCATIONAL PROGRAMS, PREPARATION OF MINUTES AND OTHER BOARD ADMINISTRATIVE WORK]

(4) bring before the board those applications that raise questions requiring full board consideration.

(5) conduct licensure examinations for qualified applicants;

(6) assist the department in informing licensees of the

necessity to renew licenses,

(7) communicate with other state boards and educational institutions regarding licensure of candidates and related concerns,

(8) refer complaints against licensees to the department for investigation,

(9) prepare periodic and special reports and surveys as required, including the annual report to the governor and the legislature,

(10) collect, compile, analyze, and distribute data relating to nursing education and licensure,

(11) respond to communications relating to nursing licensure, the provisions of AS 08.68, nursing education, and other related matters,

(12) direct communications requiring full board action to the board,

(13) provide information concerning the provisions of AS 08.68, board regulations and policies, and trends in nursing and nursing education to members of the public and the nursing profession, and to schools and other interested institutions and organizations,

(14) participate in educational program surveys,

(15) refer educational program reports to the board,

(16) assist the board and the department in the preparation of the annual budget,

(17) prepare and distribute the agenda for board meetings,

(18) collect and make available to the board all pertinent information on issues before the board,

(19) assist the division in the orientation of new board members.

* Sec. 7. AS 08.68.170 is amended to read:

delete adopted

Sec. 08.68.170. QUALIFICATIONS OF PROFESSIONAL OR PRACTICAL NURSE APPLICANTS. An applicant for a license to practice professional or practical nursing shall submit to the board on forms and in the manner prescribed by the board, written evidence, verified by oath, that the applicant has [COMPLETED AN APPROVED FOUR YEAR HIGH SCHOOL COURSE OF STUDY OR THE EQUIVALENT AS DETERMINED BY THE APPROPRIATE EDUCATIONAL AGENCY, AND HAS] successfully completed (1) a professional or practical nursing education program accredited by the board; or (2) a professional or practical nursing education program outside the state which, in the opinion of the board, meets the minimum requirements of the board for an accredited program of study in this state at the time the applicant graduated; or (3) a professional or practical nursing education program accredited by the National League for Nursing at the time the applicant graduated.

* Sec. 8. AS 08.68.190 is amended to read:

Sec. 08.68.190. LICENSE BY EXAMINATION. The applicant shall pass a written examination as prescribed by [IN THE SUBJECTS WHICH] the board [PRESCRIBES]. The board shall issue a license to an applicant who passes the examination to practice professional [NURSING] or practical nursing provided the other qualifications outlined in AS 08.68.170 and 08.68.180 are also met. The board shall conduct examinations annually and as often as it considers necessary.

* Sec. 9. AS 08.68.200 is amended to read:

Sec. 08.68.200. LICENSE BY ENDORSEMENT. The board may issue a license by endorsement to practice professional or practical nursing [OR TO PRACTICE PRACTICAL NURSING], whichever is appropriate, to an applicant who

(1) is licensed as either a professional or practical nurse [OR A PRACTICAL NURSE] under the laws of another state or territory,

if in the opinion of the board the applicant meets the qualifications required for licensing in the state, and meets the requirements of AS 08.68.170 [EITHER SEC. 170 OR SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE]; or

(2) meets the requirements of AS 08.68.170 and has successfully completed the Canadian Nurses' Association Testing Service (CNATS) examination if the board determines it is comparable to the examination administered by this state.

* Sec. 10. AS 08.68.210(a)(2) is amended to read:

(2) meets the requirements of AS 08.68.170 [EITHER SEC. 170 OR SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE], and

* Sec. 11. AS 08.68.210(b) is amended to read:

(b) The board may issue a nonrenewable permit to an applicant for license by examination if (1) the applicant [HE] meets the qualifications of AS 08.68.170, or (2) the applicant is a graduate of a foreign school of nursing and has successfully completed the examination administered by the Commission on Graduates of Foreign Nursing Schools (CGFNS) [SEC. 180 OF THIS CHAPTER, WHICHEVER IS APPLICABLE, AND PAYS THE REQUIRED FEE]. The permit will be valid for a period not extending beyond the time when the results are published of the first examination the applicant is eligible to take after the permit is issued.

* Sec. 12. AS 08.68.220 is amended to read:

Sec. 08.68.220. FEES. The following fees shall be imposed under this chapter when applicable:

(1) for professional [OR REGISTERED] nursing

(A) application fee..... ~~$40~~ [$20] adopted

(B) license-by-examination fee..... $20

(C) license-by-endorsement fee..... $20

(D) biennial license renewal fee..... ~~$20~~ [$15]

(2) for practical or vocational nursing

(A) application fee..... ~~$30~~ [$15]

(B) license-by-examination fee..... $10 [$15]

(C) license-by-endorsement fee..... $10 [$15]

(D) biennial license renewal fee..... ~~$20~~ [$15]

* Sec. 13. AS 08.68.251 is amended to read:

Sec. 08.68.251. LAPSED LICENSES. (a) A lapsed license may be reinstated if it has not remained lapsed for more than three [FIVE] years by payment of license fees which have fallen due during the lapsed period.

(b) If a [THE] license has remained lapsed for more than three [FIVE] years and

(1) if the board has reason to believe that the person applying for reinstatement [OF HIS LICENSE] no longer has sufficient knowledge to carry out the duties of a licensed nurse, the board shall [MAY] require the applicant to [TAKE AND PASS THE EXAMINATION GIVEN UNDER SEC. 190 OF THIS CHAPTER OR] complete a course of study [REFRESHER COURSE] approved by the board or pass an examination prescribed by the board, and to pay all applicable fees as if for a new application;

(2) if the board determines that the person applying for reinstatement has been actively employed in nursing in another state and has sufficient knowledge to carry out the duties of a licensed nurse, the lapsed license may be reinstated by payment of a reasonable fee imposed by the board under AS 44.62 (the Administrative Procedure Act), not to exceed the total fees required for a new application.

* Sec. 14. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.260. INACTIVE NURSES UNDER PREVIOUS LAW. A nurse who holds an inactive license issued under previous AS 08.68.250 shall

either (1) activate the license on or before that renewal date, or (2) permit the license to lapse.

* Sec. 15. AS 08.68.270 is amended to read:

Sec. 08.68.270. GROUNDS FOR DENIAL, SUSPENSION, OR REVOCATION. The board, after compliance with the Administrative Procedure Act (AS 44.62), may deny, suspend or revoke the license of a person who

(1) has obtained or attempted to obtain a license to practice nursing by fraud or deceit;

[(2) has been convicted of a felony;] delete

(3) has been convicted of any misdemeanor that bears directly on the fitness of the person to practice nursing [A CRIME INVOLVING MORAL TURPITUDE];

(4) [IS] habitually abuses alcoholic beverages, stimulants, or depressants or illegally uses hallucinogenic or stimulant drugs as defined by AS 17.12.15 (3) or narcotic drugs as defined by AS 17.10.-230(13) [INTOXICATED OR IS ADDICTED TO THE USE OF NARCOTICS];

(5) has impersonated a professional or practical nurse;

(6) is guilty, in the opinion of the board, of negligence which has resulted in a significant risk to the health or safety of a client or has resulted in [SERIOUS] injury to a client [PATIENT];

(7) practices or attempts to practice nursing while afflicted with physical or mental illness, deterioration, or disability to such an extent that the affliction interferes with the individual's performance of nursing functions [IS MENTALLY ILL OR MENTALLY INCOMPETENT];

(8) is guilty of unprofessional conduct;

(9) has wilfully [OR REPEATEDLY] violated any of the provisions of this chapter;

(2) ~~(10)~~ is considered by the board to be professionally incompetent; or demonstrates unprofessional conduct;

~~(as defined by reg.)~~ ?

(3) ~~(B)~~ denies care or treatment to a patient or person seeking assistance if the sole reason for the denial is the failure or refusal of the patient or person seeking assistance to execute an agreement to arbitrate a dispute, controversy, or issue arising out of the care or treatment, as provided in AS 09.55.535(a).

* Sec. 16. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.276. CONTINUING COMPETENCE REQUIRED. A license to practice nursing may not be renewed unless the nurse has complied with continuing competence requirements that may be established by the board by regulation.

* Sec. 17. AS 08.68.280 is amended to read:

Sec. 08.68.280. NURSING EDUCATION PROGRAM PROHIBITED UNLESS ACCREDITED. No person, institution or agency may conduct a nursing education program preparing persons for examination, licensure, authorization for specialized practice, or a graduate degree [FOR PROFESSIONAL OR PRACTICAL NURSES] unless the program is accredited by the board. All nursing education programs must be established in an accredited post secondary educational institution within the state.

* Sec. 18. AS 08.68.290 is amended to read:

Sec. 08.68.290. APPLICATION FOR ACCREDITATION BY BOARD. An institution desiring to conduct a nursing education program to prepare professional [OR PRACTICAL] nurses at the associate, baccalaureate or higher degree levels or to prepare a nurse to perform in an expanded role as an advanced nurse practitioner or to prepare practical nurses shall apply to the board and submit evidence that (1) it is prepared to carry out the curriculum which meets requirements prescribed by law and [APPROVED] by the board for professional nursing, [OR] for practice as an advanced nurse practitioner or for practical nursing, [AS THE CASE MAY BE,] and that (2) it is prepared to meet other

requirements prescribed [STANDARDS ESTABLISHED] by law and by the board.

* Sec. 19. AS 08.68.300 is amended to read:

Sec. 08.68.300. SURVEY AND ACCREDITATION BY THE BOARD. The board shall designate a survey team [THE EXECUTIVE OFFICER, A BOARD MEMBER, OR A CONSULTANT TO SURVEY THE INSTITUTION APPLYING FOR ACCREDITATION] to determine if the [STANDARDS AND] requirements prescribed [REQUIRED] by law and the board are met. The board may survey a nursing education program in the state at any time. Written reports of the surveys shall be filed with and retained by the board [AND RETAINED BY IT].

Delete sec. 19 adopt.

* Sec. 20. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.325. RECOGNITION OF EDUCATIONAL PROGRAMS. No program or course of study will be recognized as satisfying state requirements without board approval.

Delete adopt

* Sec. 21. AS 08.68.330 is amended to read:

A motion to repeal adopted

Sec. 08.68.330 [LIST OF ACCREDITED AND APPROVED PROGRAMS. The board shall prepare, maintain, and periodically [FROM TIME TO TIME] publish a list of accredited nursing education programs preparing nurses to practice and programs or courses of study which are approved to validate competency or to prepare a nurse for authorization to practice as an advanced nurse practitioner or to obtain a graduate degree [IN THE STATE].

* Sec. 22. AS 08.68.340 is repealed and re-enacted to read:

Clarification

Sec. 08.68.340. VIOLATIONS. (a) It is a class A misdemeanor for a person to:

(1) sell or fraudulently obtain or furnish a nursing diploma, license renewal, or record, or knowingly aid in doing so;

(2) practice nursing under cover of a diploma, license, or

A 14
5,000
B 1000 8 days

record illegally or fraudulently obtained or signed or issued unlawfully, with knowledge of the illegality or unlawfulness of the act;

(3) practice or offer to practice nursing with knowledge that he has not been licensed, except when rendering necessary aid to the ill, injured, or infirm in an emergency, or knowingly to employ as a nurse a person without a license to practice nursing;

(4) knowingly use in connection with his name a designation tending to imply that he is a licensed nurse unless he is licensed;

(5) practice nursing during the time his license is suspended or revoked, knowing of the suspension or revocation;

(6) conduct a nursing education program that represents or implies that it is accredited knowing that the program has not been accredited by the board;

(7) do an act described in AS 08.68.405(10), (11), (14), or (15); or

(8) knowingly do an act described in AS 08.68.405(9).

(b) It is a class B misdemeanor for a person to:

(1) practice nursing under cover of a diploma, license, or record illegally obtained or signed or issued unlawfully;

(2) practice or offer to practice nursing without having been licensed, except when rendering necessary aid to the ill, injured, or infirm in an emergency, or to employ as a nurse a person without a license to practice nursing;

(3) use in connection with his name a designation tending to imply that he is a licensed nurse unless he is licensed;

(4) practice nursing during the time his license is suspended or revoked or with knowledge his license has lapsed;

(5) conduct a nursing education program that represents or implies that is is accredited, unless the program has been accredited

by the board; or

(6) do an act described in AS 08.68.405(4), (6), (7), (8), (12), (17), (18), or (19).

(c) It is a violation for a person to practice nursing during the time his license is lapsed.

* Sec. 23. AS 08.68.400(a) is amended to read:

(a) This chapter does not apply to

(1) a qualified nurse licensed in another state employed by the United States Government or a bureau, or agency, or division of the United States Government while in the discharge of his official duties;

(2) nursing service given temporarily in the event of a public emergency, epidemic, or disaster;

(3) the practice of nursing by a student enrolled in a nursing education program accredited by the board when the practice is in connection with the student's course of study; [OR]

(4) the practice of nursing by an individual [A NURSE] enrolled in an approved program or course of study for purposes of meeting competency re-entry requirements under AS 08.68.251; or [REFRESHER COURSE]

(5) the practice of nursing by a nurse licensed in another state who engages in nursing education or nursing consultation activities when these activities and contact with clients do not exceed 20 working days within a licensing period.

* Sec. 24. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.405. UNPROFESSIONAL CONDUCT. (a) A person who commits one of the following acts is guilty of unprofessional conduct:

Clarification

(1) failing to use appropriate judgment in the practice of nursing based upon the level of nursing for which the individual is

educationally prepared and licensed;

(2) failing to exercise technical competence in carrying out nursing care;

(3) failing to safeguard a client's dignity and right to privacy;

(4) violating the confidentiality of information or knowledge concerning a client;

(5) verbally abusing a client;

(6) physically abusing a client;

(7) performing new nursing techniques or procedures without proper education and preparation;

(8) using alcohol or other drugs to the extent that the use interferes with nursing functions;

(9) making a disposition of prescription drugs or narcotics other than that ordered or prescribed by a person authorized by law to do so;

(10) falsifying a client's records or intentionally making an incorrect entry in a client's chart;

(11) violating state or federal laws regulating drugs, by forging prescriptions or by making drugs available to himself, friends, or family members;

(12) delegating a nursing care function, task, or responsibility to another who is not licensed under AS 08.68 to perform that function, task, or responsibility, and the delegation involves a substantial risk of harm to a client;

(13) assuming duties and responsibilities, on repeated occasions, without adequate training or when competency has not been maintained;

(14) assisting another person to violate or circumvent any

law or regulation intended to regulate nursing practice;

(15) permitting or allowing another person to use his or her nursing license or permit for any purpose;

(16) failing to exercise adequate supervision over persons who are authorized to practice only under the supervision of the licensed professional;

(17) leaving a nursing assignment without properly notifying appropriate personnel;

(18) committing any act that poses a substantial risk of harm to a client;

(19) failing to perform acts within the nurse's scope of competence which are necessary to prevent substantial risk of harm to a client;

(20) failing to report as required by AS 08.68.406.

(b) The board may by regulation provide that other acts contrary to the standards of the nursing profession constitute unprofessional conduct.

Sec. 25. AS 08.68 is amended by adding a new section to read:

Sec. 08.68.406. DUTY TO REPORT ILLEGAL CONDUCT OR CONDUCT DANGEROUS TO CLIENTS. A nurse who witnesses a health care provider engaged in the following conduct shall report that conduct to the appropriate licensing board or to the immediate supervisor of that provider:

(1) any act described in AS 08.68.405(6), (8), (9), (10), (11), (12), (14) (15), (18), or (19);

(2) any act described in AS 08.64.380(3)(B) or (F);

(3) any act posing a danger to a client's welfare.

Sec. 26. AS 08.68.410 is repealed and re-enacted to read:

Sec. 08.68.410. DEFINITIONS. As used in this chapter

(1) "accredited nursing education program" means a program having curricula and standards which meet the requirements established by the board;

(2) "advanced nurse practitioner" means a registered professional nurse authorized to practice in the state who, by virtue of specialized education and experience, has become certified to perform acts of medical diagnosis and the prescription of medical, therapeutic, or corrective measures under regulations adopted by the board;

(3) "board" means the Board of Nursing;

(4) "endorsement" is the licensing of an applicant without examination through the acceptance of a license or registration issued by any state or territory after a comprehensive examination which is substantially equivalent to the examination offered in this state;

(5) "licensed practical nurse" is equivalent to the title "licensed vocational nurse" and to the name suffix abbreviations L.P.N. and L.V.N.;

(6) "licensed professional nurse" is equivalent to the common title "registered nurse" and the name suffix abbreviation R.N.;

(7) "practice of practical nursing" means the performance for compensation or personal profit of selected acts in the prevention of illness, and in the care of the ill, injured, or infirm under the direction of a licensed professional nurse or a licensed physician or a licensed dentist not requiring the substantial specialized skill, judgment, and knowledge required in professional nursing;

(8) "practice of professional nursing" means the performance for compensation or personal profit of acts of professional service requiring substantial specialized knowledge, judgment, and skill based upon the principles of biological, physiological, behavioral, and sociological sciences in assessing and responding to actual or poten-

tial health needs of individuals, families, or communities through such services as:

(A) assessment, problem identification, counseling, and health teaching:

(i) in the maintenance of health or in the prevention of illness of clients; and

(ii) in the care of the ill, injured, or infirm;

(B) administration, supervision, delegation, and evaluation of nursing practice;

(C) teaching of nursing;

(D) execution of a medical regimen as prescribed by a health care provider authorized by the state to perform acts of medical practice;

(E) performance of such additional acts requiring education and training and recognized by the nursing profession as properly performed by registered professional nurses;

(F) performance of acts of medical diagnosis and the prescription of medical therapeutic or corrective measures under regulations adopted by the board;

(9) "professional incompetence" means that a nurse does not possess the skills, knowledge, and awareness of his or her limitations and abilities to continue safely the practice of nursing.

* Sec. [26.] Administrative regulations, adopted jointly by the Board of Nursing and the State Medical Board and in effect on the effective date of this Act, remain in effect until amended or repealed by the Board of Nursing under this Act.

* Sec. [27.] AS 08.68.180(a), 08.68.260, and 08.68.350 are repealed.

TO: Rep. Thelma Buchholdt

FROM: Susan Littell, R.N.,M.S.N.
4906 Knights Way, Anch., 99504 338-0393

I'm writing in regard to the bill before your committee regarding Nurses Practice Act. Although on the whole the bill is very good, I do object to the portion making it acceptable for Nurse Practitioners to make "medical diagnosis". The bill has merits, but I feel the part regarding medical diagnosis should be reworked or omitted.

RE: House Bill 910

Dear Rep. Buchholdt:

The Alaska State Medical Association respectfully offers the following ammendments in an effort to assure the continued existence of a consultive relationship between a nurse and a physician which utilizes their respective areas of expertise to meet to common goal of providing comprehensive care for the patient.

1. Page 2, lines 11-12, delete: [, including regulations pertaining to practice as an advanced nurse practitioner]

2. Page 16, line 8, delete: [under regulations adopted by the board;]
   add: authorized by regulations promulgated by the State Medical Board and the Board of Nursing and as implemented by the Board of Nursing;

3. Page 17, lines 18-19, delete: [under regulations adopted by the board;]
   add: as authorized under (2) of this section;

4. Page 17, section 27, delete: [lines 23-26]

Re: Attached amendment to
HB 910 (nursing bill)

Thelma

Dear Representative Buchholdt:

An amendment to HB 910 (nursing) is attached. It would clarify the status of incumbent members of the Board of Nursing when the provisions of the new law changing requirements for board members take effect. The bill as written would leave the status of incumbent members in doubt; some amendment is therefore necessary.

The Board of Nursing wishes to allow incumbent board members to serve out the remainders of their terms of office under AS 08.68.020 -- 08.68.030. The amendment so provides; it also provides that any new appointment would then be made on the basis of the amended version of AS 08.68.010.

Sincerely,

Keith

Box 1216
Kodiak, Alaska 99615
April 11, 1980

Ms. Thelma Buchholdt, Representative
Chairman, House HE&SS Committee
Pouch V -
Juneau, Alaska 99811

Dear Representative Buchholdt:

House Bill 919 an act related to the practice of nursing, ie the Nurse Practice Act, was introduced February 27, 1980 and referred to the House HE+SS Committee. As a licensed professional nurse in the state, I am very interested in seeing this legislation passed this session. As introduced, the bill is in a very acceptable form and sections I would like to see stay intact, with no alteration in content, are especially the following:

Sec. 08.68.251. reinstatement of license after lapse
Sec 08.68.270 - grounds for denial, suspension or revocation of license
Sec. 08.68.276 Continued Competence
Sec 08.68.340 Violations
Sec 08.68.405 - Unprofessional conduct
Sec 08.68.410(8) - Definition of nursing.

Your support in initiating movement on this bill would be greatly appreciated.

Sincerely -

Beth Ennis, R.N.

Box 1216
Kodiak, Alaska 99615
April 11, 1980

Fred Zharoff, Representative
Pouch V
Juneau, Alaska 99811

Dear Representative Zharoff:

H.B. 910, an act related to the practice of nursing, ie the Nurse Practice Act, was introduced february 27, 1980 and is presently sitting in the House HESS committee with no reported action to date.

As presented, the bill is in very acceptable form and the following are sections with which I am particularly pleased, and which I would like to see remain intact with no change in intent:

Sec. 08.68.251 - reinstatement of license after a lapse. this addresses competence and controlled, reasonable fees.

Section 08.68.270 - grounds for denial, suspension or revocation of license. makes this very specific

Section 08.68.276. Continued Competence. Does not make continuing education mandatory, and leaves any future regulations in the hands of Nursing thru the Board of Nursing.

Sec. 08.68.340 violations and

Sec 08.68.405 - unprofessional conduct.

these two, together, are excellent, as they

Specify acts in question and the specific class of misdemeanor as a result of infraction. Although I am uneasy as to the potential interpretation of some of the acts listed, ie "verbally abusing client" I have faith, which I hope will be justified, that the Board of Nursing investigator will be reasonable in deciding on any such cases.

Sec. 08.68.410(8) - Definition of nursing. Bring this into the modern world and in line with education and practice.

HB 910 will be referred to HESS and finance committees and your support in getting action moving on this and/or finding out if there are factors not favorable to a move at this time, would be greatly appreciated. I would like to see this passed this session.

Sincerely -

Beth Ennis, R.N.

FACT SHEET FOR NURSE PRACTICE ACT
HB 910

The Nurse Practice Act revisions address the Sunset Review Recommendations.

1. Legislation should be introduced requiring continuing education for nurses as a provision for license renewal. This is addressed by Section 08.68.276 in the continuing competence requirements.

2. A statutory amendment is needed to ensure that all regulated nurses are adequately represented on the Board of Nursing. This is addressed by Section 08.68.010 which adds an LPN and ANP to the membership of the Board of Nursing.

3. The Board of Nursing should discontinue its policy of requiring foreign nurse graduates to have one year of work experience before a temporary permit can be issued. Section 08.68.210(b) speakes to this issue as it allows for substitution of successful completion of the exam administered by the committee on Graduates of Foreign Nursing Schools. This area also more clearly states requirements for licensure of graduates of Canadian programs.

4. The Board of Nursing, in conjunction with the Attorney General, should compose formal regulations which define and list examples of license violations. Section 08.68.340 outlines violations which are classified according to the Alaska criminal code. Section 08.68.405 more clearly defines acts which are contrary to the accepted standards of the nursing profession and constitute unprofessional conduct.

5. The fifth recommendation refers to the Board refining their goals and objectives and submitting a performance report. This recommendation is addressed under Section 08.68.100 a (7) which defines the reporting procedures of the Board of Nursing.

6. The Division of Occupational Licensing should comply with the Board of Nursing resolution requiring the Executive Officer to review and approve all applications for license by endorsement. This is defined as above by Section 08.68.111 c (3). This section delineates the job description for the Executive Secretary. The duties are explained more succintly and are more comprehendable to the public.

Additional highlights of the bill which are of importance to nurses and consumers follow.

7. The powers and duties of the Board of Nursing are further elaborated upon in Section 08.68.100 including a (1) adopt regulations necessary to make this chapter effective, including regulations pertaining to practice as an advanced nurse practitioner; and a (6) prescribe requirements to validate competency to continue or re-enter practice. This section also gives the Board authority to conduct inquiry into revoking licnsure in accordance with the Administrative Procedures Act.

8. The inactive status of nurses was dropped because of the inability to maintain competency of that group.

9. Section 08.68.400 a (5) covers the practice of a nurse licensed in another state engaged in nursing education and consultation in Alaska for a period not to exceed 20 working days.

10. Section 08.68.406 makes it mandatory for nurses to report illegal conduct or conduct dangerous to clients regardless of the providers health care profession.

prepared by the Alaska Nurses Association, Legislative Committee, 3/80

BOARD OF NURSING

HB 910

"AN ACT RELATING TO THE PRACTICE OF NURSING"

SECTION	SUBJECT	RATIONALE
08.68.010 (p. 1-line 9)	Board membership	More effectively represents the profession to be regulated by providing for a LPN & ANP on the board.
08.68.060 (p. 1-line 22)	Qualifications of RN & LPN Board members	Insures that members have recent experience in nursing; and the educational background to evaluate nursing programs.
08.68.080 (p.2-line 5)	Meetings	Assures the Board may meet often enough to accomplish its goals and complete the large volume of work for which it is responsible.
08.68.100 (p.2-line 11)	Board Duties adopt ANP regs	See Sunset Review comments "In September of 1978, after commendable efforts by the Board of Nursing and little cooperation from the State Medical Board, proposed regulations were approved by the Boards for public hearings which will allow registered nurses to perform an expanded role in the delivery of health care." "The Board was impeded in their efforts to compose and approve advanced nurse practitioner regulations by the State Medical Board which was jointly responsible for the promulgation of the regulations." The present ANP regulations jointly promulagted with the medical board, were the original regulations proposed by the Board of Nursing, with very little modification. The joint promulgation is not only a slow process but is also costly for the State.
(p.3-line 6)	Prescribe requirements to validate competency to continue or re-enter practice	Sunset review recommendation was to establish c.e. requirements. The Board feels this is a complex issue and deserves study of other alternatives such as work experience and testing. The impact of any requirement of this nature on the Alaska health care system must be carefully studied. However, in its mission to protect the public, the Board must be granted this power.

SECTION	SUBJECT	RATIONALE
08.68.111	Executive Secretary	The performance of this staff person is so vital to the Board's functioning, the Board feels these duties must be clearly defined.
08.68.210 (b) (p.7-line 15)	Foreign Nurses	Board has found it impossible to evaluate the programs of foreign nurses. CGFNS examination helps to assure the Board that the applicant has the minimal knowledge necessary for safe practice with a temporary permit until passing the SBTPE exam. See also Sunset Recommendation #3.
08.68.220 (p.7-line 1(A)	Fees	The Board has felt it necessary to increase fees to reflect costs. Fees had not been changed for many years.
08.68.251	Lapsed licenses	The board wishes to change the period of time it will allow a license to lapse from five years to three years. Nursing is changing so rapidly that it is necessary to carefully consider an applicants ability to give safe nursing care when they have been inactive for three years.
08.68.261	Inactive Status	Inactive status serves no useful purpose for the applicant, and is costly for the state. In many cases, the Board has found this to be misleading to applicants who believe they may easily activate an inactive license. This is not true - the Board does consider inactive license activation in the same light as a lapsed license.
08.68.270 (p.9-line 4+)	More clearly defines examples of license violations	See Sunset Review recommendation #4 - "The Board of Nursing, in conjuction with the Attorney General, should compose formal regulations which define and list examples of license violations." The Board will find this most helpful in substantiating its decisions on violations.
08.68.276 (p.10-line 7+)	Continuing competency requirements	(see previous remarks concerning 08.68.100 -- p.3-line 6).
	Accreditation of educational programs	The Board already is empowered to accredit programs within our state. This more clearly defines the types of programs to be accredited.

SECTION	SUBJECT	RATIONALE
08.68.340 (p.11-line 25)	Violations	This realigns current violations to comply with the new criminal code.
p. 13-line 17 (4)	Exemptions - nursing educators	Allows nurses to teach/consult within the state for a short period of time without obtaining an Alaska license. These individuals must be licensed in another State. The board wishes to encourage nurses to come to Alaska to share their expertise, without having to go through a formal licensing procedure.
08.68.405 (p. 13-line 26)	Unprofessional conduct	(see previous remarks concerning rationale for 08.68.270 (p.9-line 4+)
08.68.406	Reporting illegal conduct	(see previous remarks concerning rationale for 08.68.270 (p.9-line 4+) The nurse is the patients advocate.
(p.16-line 25)	Definition practice of professional nursing	An updating of what this practice entails.
(p.17-line 23)	Repeal of regualtions	The Board feels this is misleading - it has no present intent to repeal the regulations jointly promulagated with the Board of Medicine.
(p.17-line 26/27)	Board membership	This allows for an orderly reconstitution of the Board membership as specified in A.S. 08.68.010 as amended.

Honorable Thelma Buchholdt
Chairman, House Health, Education
& Social Services Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Ms. Buchholdt:

RE: Department of Commerce & Economic Development Synopsis of HB 910

At the request of your committee, the following is a departmental synopsis of HB 910, "An Act relating to the practice of nursing."

Section 1. Changes composition of board of nursing by adding an L.P.N. member and an advanced nurse practitioner. Also, more clearly states minimum necessary qualifications of other board members. These changes are felt necessary to assume board representation for all regulated nurses.

Section 2. More clearly delineates minimum qualifications of the licensed nurses on the board.

Section 3. Housekeeping measure changing "chairman" to "chairperson."

Section 4. Mandates that the board shall meet at least four times a year.

Section 5. More clearly defines the powers and duties of the board. Also, gives the board the authority to define by regulation the duties of its Executive Secretary to make it a more effective position.

Section 6. Changes the title of the executive officer to executive secretary which better establishes this person's relationship to the board. Gives the board the authority to estab-

lish minimum qualifications of the executive secretary by regulation rather than be limited by statute.

Sections 7-10. All housekeeping measures.

Section 11. Better defines temporary permit procedures and the validity of temporary permits.

Section 12. Establishes fees to be collected by the board and a biennial renewal.

Section 13. Changes the criteria for reinstatement of a lapsed license. Makes it more difficult for a nurse who has not been practicing to resume practicing. Must prove competency to reinstate license. This section is felt necessary as a result of section 27 of this bill which repeals the inactive status of nursing licenses.

Section 14. Correction needed: On line 29, the statute referred to should read AS 08.68.260.

Section 15. Housekeeping measure to better define violations and get rid of ambiguous terminology. More in accordance with the new criminal code.

Section 16. Authorizes the board to establish continuing competency for nurses through regulation.

Section 17. Establishes accredited programs for the state. Suggest a wording change on line 17 and 18 to read: "All nursing education programs within the state must be established in an accredited past secondary educational institution [WITHIN THE STATE]."

Section 18. Outlines which programs must apply for board accreditation and establishes the procedures to be followed.

Section 19. Housekeeping measure which would designate a board survey team and allow for better use of board time.

Sections 20-21. Housekeeping measures pertaining to the accredited programs.

Section 22. Outlines violations and provides punishment for violations in accordance with new criminal code.

Section 23. Sets out exemptions from the act; most important being (5) which pertains to nurses licensed in another state.

Section 24. Establishes all possible acts which constitute unprofessional conduct.

Section 25. We question making this a mandatory provision.

Section 26. Definitions. We feel that (2) and (8)(F) should be amended to include language which would provide for regulations to be adopted jointly by the Board of Nursing and the State Medical Board.

Section 27. Should be deleted.

Section 28. Standard houskeeping repeals.

Sincerely,

Charles R. Webber
Commissioner

BY: Ann Griggs, Director
Division of Occupational Licensing

AG/cwA16

S.R. 10033
Fairbanks, Alaska 99701
April 14, 1980

Thelma Buchholdt
Chairman, House Hess Committee
Pouch V
Juneau, Alaska

Dear Ms. Buchholdt,

I understand that objections have been raised by the medical profession relating to the following sections of HB910: Section 5 08.68.100 Duties and Powers of the Board (a) The board shall

(1) adopt regulations necessary to make this chapter effective, including regulations pertaining to practice as an advanced nurse practitioner.

Section 26 AS 08.68.410

(2) "advanced nurse practitioner" means a registered professional nurse authorized to practice in the state who, by virtue of specialized education and experience.....under regulations adopted by the board;

(8) "practice of professional nursing" means .....(F) performance of acts of medical diagnosis and the prescription of medical therapeutic or corrective measures under regulations adopted by the board;

All of these sections listed above refer to advanced nurse practitioner regulations. The former nurse practice act, which HB910 seeks to amend, states that regulations for advanced nurse practitioners must be "promulgated jointly by the State Medical Board and the Board of Nursing".

The rationale of the Board of Nursing in modifying these sections related to the length of time and difficulty in promulgating the regulations jointly. (See "A performance Review of the Board of Nursing" - October 6, 1978 - Division of Legislative Audit -pp. 5-6, 13).

The chairman of the medical board has contacted me about his objections to deletion of the section on joint promulgation. He has objected also to Section 26 "Administrative regulations, adopted jointly by the Board of Nursing and the State Medical Board....remain in effect until amended or repealed by the Board of Nursing under this Act."

The Board of Nursing has no intent to repeal these regulations. We have a good working relationship with the Medical Board and have no desire to jeopordize that relationship.

Therefore, we are in agreement, that the act may be revised to specify "joint promulgation." Therefore, the following sections may be revised to read as follows:

Section 5. AS08.68.100 -

"(1) adopt regulations necessary to make this chapter effective. This includes regulations pertaining to practice as an advanced nurse practitioner which shall be jointly promulgated with the State Medical Board."

Section 26. AS08.68.410 -

(2) "....under regulations jointly promulgated by the Board of Nursing and the State Medical Board."

(8) " practice of professional nursing means .....(F) performance of acts of medical diagnosis and the prescription of medical therapeutic or corrective measures under regulations adopted by the Board of Nursing and the State Medical Board."

Section 26

"Administrative regulations, adopted jointly by the Board of Nursing and the State Medical Board and in effect on the effective date of this Act, remain in effect until amended or repealed by the Board of Nursing under this Act." Delete.

Thank you for your consideration of this matter.

Sincerely,

Eileen Montano, Chairman
Alaska Board of Nursing

RE: House Bill 910

Dear Ms. Buchholdt:

I would like to take this opportunity to thank you for your assistance in obtaining information regarding this bill during my brief stop in Juneau on April 18. I would like to restate my opposition to sections of that bill as follows.

Section 2.61.68.060

Lines 26 to 28 (Page One) currently read: "At least two of the members who are professional nurses must hold a bachelor's degree or higher." Recommendation: I would like to see these lines deleted and substituted with the following - "At least two of the members must be diploma and associate degree registered nurses." Justification for Change: There is no foundation that a professional nurse holding a bachelor's degree is any more qualified as a nurse than one prepared at the three or the two year level. As a matter of fact, a recent study, which I am enclosing for you, published in "RN" magazine in 1980 clearly brings to light the real matter of the problems with baccalaureate programs. This study is sufficient to discredit the idea that the baccalaureate program is inherently better than others in preparing nurses.

Section 6AS 08.68.111

Part B states that "the executive secretary must be a nurse with a bachelor's degree or higher in nursing, must be currently licensed by the state, and must meet other qualifications as established by board regulations." Justification for Change: There is no criteria that indicates that a bachelor's degree registered nurse is any more qualified for the position of executive secretary.

I would appreciate your consideration in changing these two sections so that they refer to registered nurses who have met the state's requirement for licensure. This would cover BSN nurses, nurses who have degrees in health science fields, the ADN, and diploma nurses. In this manner, all segments of the nursing population should be represented.

Thank you again for your help. It has been greatly appreciated.

Very truly yours,

Virginia M. Collins, R.N.
Director

March 4, 1980

To: House HESS Committee
House Finance Committee
Senate Health & Social Services Committee

From: Concerned nurses in Anchorage.

A Position Paper relating to H.B. 910 "An Act relating to the practice of nursing."

We, the undersigned, have reviewed H.B. 910. We do not support certain specific changes. The balance of the bill is reasonable, as much of it relates to existing law and is relatively unchanged.

We would appreciate your consideration of the following suggested changes:

Section 2. 08.68.060 - lines 26 - 28 (page 1) currently reads - At least two of the members who are professional nurses must hold a bachelor's degree or higher.

We would like to see these lines deleted:

Reason: By allowing those three lines or that sentence to stand as is, the law would prevent all of the registered nurses who graduated from three year diploma programs from having a representative on the board. The vast majority of registered or professional nurses, the terms used interchangeably, in Alaska -- and other states -- are three and two year registered nurses, not BS degree nurses.

It is also common knowledge around the United States that a small minority of BS registered nurses are trying to dominate the profession. In New Jersey recently, for example, the legislature soundly defeated a proposal which would have required all registered nurses to have Bachelor's degrees -- which was being pushed by a few BS nurses and University nursing programs.

There is absolutely no foundation that a Professional Nurse with a Bachelor's degree or higher can give better patient care or render decisions relating to patient care in a non-supervisory capacity. Quite the contrary, many physicians and hospitals have found that those registered nurses who have come from diploma programs are far better prepared to work with patients than those coming from Bachelor Degree programs. This is because the diploma nurses spend far more time training right on patient floors with patients--whereas the Bachelor's degree RN spends more time in the classroom setting. This is a sore point with many Bachelor's RNs and also why they are trying to change their programs. It is also why many in the health care community put them as head nurses rather than floor nurses -- as their training better prepares them for the administrative role rather than the patient care role. There are exceptions, of course, of Bachelor's RNs who do have good clinical training, but that is not the point.

The vast majority of RNs around the United States are diploma RNs. They are good nurses and deserve to be represented on all state boards of nursing. We seriously object to being left off, as we would be under this section.

We have no objection to your substituting the following: At least two of the members must include diploma and associate's degree registered nurses. The Bachelor's degree nurses are already represented in two other categories.

Section 6 AS 08.68.111 (part b)

(b) states that the executive secretary must be a nurse having a bachelor's degree or higher in nursing, must be currently licensed by the state and must meet other qualifications as established by board regulations.

1. We have no objections to the part about being licensed by the state, providing licensed means and includes all diploma RNs.

2. There is no reason to believe that a Bachelor's Degree RN could handle the job of executive secretary any better than a Diploma RN.

3. It should not be left up to the board to decide other qualifications when the majority of RNs (diploma nurses) are not represented on the board.

As is described in the opening Section (1) Creation and Membership of Board of Nursing -- it is almost impossible for a diploma RN - who are in the majority in every state in the United States including Alaska, to be appointed to the Board. Only two professional nurses can be chosen who are directly or indirectly responsible to nursing services. Then, in the next section as I described before, those two must have Bachelor's degrees. Therefore, we are left out. Nurse practitioners and professional nurses in education both have to have Bachelor's degrees, and the practical nurse is a totally different level of patient care.

Therefore, we would appreciate your consideration in changing these two sections so that they refer to registered nurses who have either diploma, ADN, or bachelor's degrees.

There are hundreds of RNs currently working in Alaska and other states who have diploma degrees. We give good patient care to you and your families. We take offense to a few Bachelor's degree RNs trying to impose their power grabbing tactics on us. There are nursing supervisors, probably some director's of nursing, and head nurses who come from diploma programs. It is a disservice to them and the many staff diploma RNS to not be represented.

Thank you for your consideration. Replies can be sent to: Carol Beardsley, RN

Subject: House Bill No. 910 - Practice of Nursing

Dear Representative Gardiner:

The above bill, in sections 5 and 26, contain provisions that may have significant import with respect to the practice of medicine within the state of Alaska.

For whatever it's worth, it is interesting that in our recent meeting in February, in Juneau, we had a joint meeting for a brief period of time with the nursing board, during which time House Bill 910 was not brought to our attention.

I think it is abundantly clear that the legislature, over the years, has felt that the State Medical Board is the best means of regulating the practice of medicine for the citizens of Alaska. The state board of nursing has had regulatory authority over nursing and now wishes to have regulatory authority over a variety of mid-level practitioners of medicine. As a board member and a practicing physician, I feel very strongly that whenever the practice of medicine arises it should be dealt with by those who have been trained in the traditional practice of medicine. I would like to see sections 5 and 26 deleted or replaced with language that retains the current Board of Medicine, Board of Nursing relationship; that, in fact, retains the concept that the state medical board will indeed be ultimately responsible, under the legislature, for the regulation of the practice of medicine in the state of Alaska.

To permit sections 5 and 26 to stay in House Bill No. 910 will mean that advanced nurse practitioners, mid-wives and whatever other level of practitioners arise in the future to be working independent of any medical guidance except as that which is decreed by the nursing board. What we shall see, under those circumstances, is the development of parallel practices of medicine, some of which will be by physicians, some of which will be by mid-level practitioners. A problem arises in the inability

of the public to select out what levels of training each of these imply. I feel this is a distinct potential hazard to the patient and would opt for mid-level practice of medicine, or any level practice of medicine be under the final responsiblity of the physician. Our current PA and ANP regulations seem to protect the public from this possibility and still permit the mid-level practitioner the opportunity to provide a service for the people of Alaska.

Sincerely,

Hilbert J. Henrickson, M.D.

A Position Paper relating to H.B. 910 "An Act relating to the practice of nursing."

We, the undersigned, have reviewed H.B. 910. We do not support certain specific changes. The balance of the bill is reasonable, as much of it relates to existing law and is relatively unchanged.

We would appreciate your consideration of the following suggested changes:

Section 2. 08.68.060 - lines 26 - 28 (page 1) currently reads - At least two of the members who are professional nurses must hold a bachelor's degree or higher.

We would like to see these lines deleted:

Reason: By allowing those three lines or that sentence to stand as is, the law would prevent all of the registered nurses who graduated from three year diploma programs from having a representative on the board. The vast majority of registered or professional nurses, the terms used interchangeably, in Alaska -- and other states -- are three and two year registered nurses, not BS degree nurses.

It is also common knowledge around the United States that a small minority of BS registered nurses are trying to dominate the profession. In New Jersey recently, for example, the legislature soundly defeated a proposal which would have required all registered nurses to have Bachelor's degrees -- which was being pushed by a few BS nurses and University nursing programs.

There is absolutely no foundation that a Professional Nurse with a Bachelor's degree or higher can give better patient care or render decisions relating to patient care in a non-supervisory capacity. Quite the contrary, many physicians and hospitals have found that those registered nurses who have come from diploma programs are far better prepared to work with patients than those coming from Bachelor Degree programs. This is because the diploma nurses spend far more time training right on patient floors with patients--whereas the Bachelor's degree RN spends more time in the classroom setting. This is a sore point with many Bachelor's RNs and also why they are trying to change their programs. It is also why many in the health care community put them as head nurses rather than floor nurses -- as their training better prepares them for the administrative role rather than the patient care role. There are exceptions, of course, of Bachelor's RNs who do have good clinical training, but that is not the point.

The vast majority of RNs around the United States are diploma RNs. They are good nurses and deserve to be represented on all state boards of nursing. We seriously object to being left off, as we would be under this section.

We have no objection to your substituting the following: At least two of the members must include diploma and associate's degree registered nurses. The Bachelor's degree nurses are already represented in two other categories.

Section 6 AS 08.68.111 (part b)

(b) states that the executive secretary must be a nurse having a bachelor's degree or higher in nursing, must be currently licensed by the state and must meet other qualifications as established by board regulations.

1. We have no objections to the part about being licensed by the state, providing licensed means and includes all diploma RNs.

2. There is no reason to believe that a Bachelor's Degree RN could handle the job of executive secretary any better than a Diploma RN.

3. It should not be left up to the board to decide other qualifications when the majority of RNs (diploma nurses) are not represented on the board.

As is described in the opening Section (1) Creation and Membership of Board of Nursing -- it is almost impossible for a diploma RN - who are in the majority in every state in the United States including Alaska, to be appointed to the Board. Only two professional nurses can be chosen who are directly or indirectly responsible to nursing services. Then, in the next section as I described before, those two must have Bachelor's degrees. Therefore, we are left out. Nurse practitioners and professional nurses in education both have to have Bachelor's degrees, and the practical nurse is a totally different level of patient care

Therefore, we would appreciate your consideration in changing these two sections so that they refer to registered nurses who have either diploma, ADN or bachelor's degrees.

There are hundreds of RNs currently working in Alaska and other states who have diploma degrees. We give good patient care to you and your families. Thelma Buchholdt
Chairman, House Hess Committee
Pouch V
Juneau, Alaska

Dear Ms. Buchholdt,

I understand that objections have been raised by the medical profession relating to the following sections of HB910: Section 5 08.68.100 Duties and Powers of the Board (a) The board shall

(1) adopt regulations necessary to make this chapter effective, including regulations pertaining to practice as an advanced nurse practitioner.

Section 26 AS 08.68.410

(2) "advanced nurse practitioner" means a registered professional nurse authorized to practice in the state who, by virtue of specialized education and experience.....under regulations adopted by the board;

(8) "practice of professional nursing" means .....(F) performance of acts of medical diagnosis and the prescription of medical therapeutic or corrective measures under regulations adopted by the board;

All of these sections listed above refer to advanced nurse practitioner regulations. The former nurse practice act, which HB910 seeks to amend, states that regulations for advanced nurse practitioners must be "promulgated jointly by the State Medical Board and the Board of Nursing".

The rationale of the Board of Nursing in modifying these sections related to the length of time and difficulty in promulgating the regulations jointly. (See "A performance Review of the Board of Nursing" - October 6, 1978 - Division of Legislative Audit -pp. 5-6, 13).

The chairman of the medical board has contacted me about his objections to deletion of the section on joint promulgation. He has objected also to Section 26 "Administrative regulations, adopted jointly by the Board of Nursing and the State Medical Board....remain in effect until amended or repealed by the Board of Nursing under this Act."

The Board of Nursing has no intent to repeal these regulations. We have a good working relationship with the Medical Board and have no desire to jeopardize that relationship.

Therefore, we are in agreement, that the act may be revised to specify "joint promulgation." Therefore, the following sections may be revised to read as follows:

Section 5. AS08.68.100 -

"(1) adopt regulations necessary to make this chapter effective. This includes regulations pertaining to practice as an advanced nurse practitioner which shall be jointly promulgated with the State Medical Board."

Section 26. AS08.68.410 -

(2) "....under regulations jointly promulgated by the Board of Nursing and the State Medical Board."

(8) " practice of professional nursing means .....(F) performance of acts of medical diagnosis and the prescription of medical therapeutic or corrective measures under regulations adopted by the Board of Nursing and the State Medical Board."

Section 26

"Administrative regulations, adopted jointly by the Board of Nursing and the State Medical Board and in effect on the effective date of this Act, remain in effect until amended or repealed by the Board of Nursing under this Act." Delete.

Thank you for your consideration of this matter.

Sincerely,

Eileen Montano, Chairman
Alaska Board of Nursing

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

HB 910

February 27, 1980

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to qualifications for nursing practice in the state, and to the powers and duties of the Board of Nursing.

The bill revises and clarifies the statutes setting out the powers and duties of the board and its executive secretary. It also revises qualifications required for service on the board.

In addition, the bill clarifies the requirements and procedures to be followed by applicants for licensing to engage in nursing practice, defines "unprofessional conduct," adds a requirement of "continuing competence," and brings criminal penalty provisions into conformity with the new criminal code.

Further, the bill makes two changes of a more substantive nature: (1) it eliminates inactive status for nurses, on the rationale that maintaining competency is more important in the provision of health care than any right to that status; and (2) it creates a duty to report conduct or omissions by another health care provider which can result in serious harm to a patient.

Sincerely,

Jay S. Hammond
Governor

re: HB 910

Dear Rep. Buchholdt,

I've been reading the proposed amendments to the Nurse Practice Act and am distressed that the bill in this form was introduced - There are substantial changes which I strongly feel are not improvements and some reversions to former terminology for which I can think of no rationale. The proscriptions against "unprofessional" conduct are detailed but the standards by which such conduct is judged are not defined nor credited (American Nurses Association published Standards for Nursing Practice ?) I hope this bill will remain in your committee until nurses in Alaska have had opportunity to study and understand the proposed changes it contains. Thank you.

Ruth Benson R.N.

DRAFT

HOUSE BILL NO. 922

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state payment for child care costs for foster homes."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 47.40.040(a) is amended to read:

(a) In this chapter, "full cost" of services shall be determined by the per person, per day cost in the preceding fiscal year plus a propriationate share of anticipated cost of living and staff salary increment increases for the fiscal year for which the full cost of services, determined to be necessary by the department, is being determined. Child care costs for foster homes shall be computed in the same manner as for child care and nursing home institutions except that no salary costs may be considered[.] for nonspecialized foster homes. Salaries may be paid for specialized foster homes as defined by regulations promulgated by the department.

* Sec. 2. AS 47.40.080 is amended by adding a new subsection to read:

(4) "Specialized foster homes" means a foster home for the placement of children who would otherwise be classified for placement in institutional care. The foster parents shall meet particular requirements defined by regulations promulgated by the department for education, therapeutic skills, and experience and

DRAFT

DRAFT

successfully complete training as specified by the department for this purpose.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.070(c).

DRAFT

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
HOUSE BILL NO. 922

"An Act relating to state payment for child care cost for foster homes."

This Bill would provide the Department with the authority to pay foster parents a salary for services provided to "special-needs" children in foster homes. Many times, the placement of these youths out of institutions is of benefit to the child and respresents a substantial cost saving to the state. However, it is extremely difficult to recruit foster parents willing and able to take on added burden imposed by "special-needs" youth. This Bill would allow the Department to compensate those foster parents who are willing to assume the burden of care for these youths, through a salary, mandatory training prior to placement and follow-up training and support services throughout the placement. In this way, the Department will have the means of developing alternative specialized foster homes to provide the type of care these youths need in a home environment. Without this authority, these youths will continue to require institutional care resulting in higher costs to the state and removal of these individuals from the mainstreams of normal adolescent development.

The Department is committed to, wherever possible, supporting those intrinsic values found in family structure as this is believed to represent the best means of providing for the care of those youths who are in its custody. In addition, the Department is committed to the deinstitutionalization of youth. Therefore, this Bill is consistent with departmental program objectives and should be enacted.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A. Assumptions

1. Ten (10) juveniles would be placed in specialized foster care, transfered from private juvenile institutions. This represents 11% of the projected institutional caseload for FY'81.

2. The specialized foster care rate would include $700.00 per month for salaries in addition ot the regular foster care rate. The estimated foster care rate for teenagers during FY'81 is $423.70 per month. Therefore, the estimated cost for specialized foster care would be $1123.70 per month.

Roger C. Lange

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

Prepared by: Roger C. Lange Date: March 24, 1980
Division/Office: Corrections PH: 465-3376
Department of Health & Social Services

Approval DHSS Mgt. & Bdgt: M. Hubbard Date: 4/8/80

33-001 (Rev. 12/79)
Modify by DHSS (11-28-79)

3. The average costs per month for private institutional care in facilities utilized by the Division of Corrections is $86.65 per child care day or $2635.60 per month.

B. Costs Savings with Specialized Foster Care

1. Cost of Specialized Foster Care:

10 juveniles x $1123.70 per month x 12 months = $134,844.00

2. Costs of Private Institutional Care:

10 juveniles x $2635.60 per month x 12 months = $316,272

3. Estimated Savings:

$316,272	Institutional Care
134,844	Specialized Foster Care
$181,428	Net Savings

C. Savings for subsequent fiscal years is based on an inflation rate of 9%.

D. There is a potential for expanding the specialized foster care program, although it will not meet the appropriate program needs of all juveniles. Until such a program is tested, no estimate can be made as to the optimum number of specialized foster care placements which could reasonably be expected.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This Bill has no fiscal impact for the Division of Social Services since cost figures for Institutional Care have been reduced in the FY 81 budget to reflect the anticipated savings which would result from the Specialized Foster Care Program and the costs for the program have been budgeted in the Foster Care component.

REPORT
ON
SPECIALIZED FOSTER CARE

The original plan for FY80 was to recruit, train, and use for placement, 20 specialized foster homes, by September 1, 1979. Since a statutory amendment is necessary in order to include salary costs for specialized foster homes, the placement phase of this program has not been implemented.

The initial recruitment phase was completed, and between September 1, 1979 and March 1, 1980, a specific training program was developed for specialized foster care and twenty-two parents have completed the training program. Another training session scheduled for June, 1980 will prepare 20 additional parents for specialized foster care providing enough homes to allow for the "best possible placement' for every child.

Specialized foster parents (one parent in a home will be identified as the specialized parent) will receive a salary of $700/month, which will be in addititon to the foster home maintenance rate. The average FY 1980 average institutional group home cost rate is $60/day. The daily cost of specialized foster care would be $35/day, (including both salary and foster home maintenance).

Requirements of Specialized Foster Parents

1) One parent must not work outside of the home in order to be available to provide appropriate intensive specialized care to the child.

2) The parent who will not work outside of the home must have five years experience in working with children. This experience can include:

   a) experience as a foster parent
   b) experience as a social worker
   c) experience in a child oriented work setting.

(Experience as a biological parent of an adolescent may be counted for one year of experience. A Bachelor's degree with specific course work in counseling, clinical psychology, or child development, or a graduate degree in social work or a related field may be counted for two years of required experience).

3) Specialized foster parents must also have:

   a) the ability to work with children in a therapeutic way.
   b) the ability to work with the biological parent of a child in a therapeutic way.
   c) the ability to accept and work with a child with emotional and behavioral problems.

d) the ability to work with an older child
e) the ability to accept a child who has been raised in a different philosophical environment.
f) a stable family life.
g) must meet all of requirements for regular foster home licensing
h) may have to provide additional references beyond the number required for regular foster home licensing.

Criteria for Selection of Children:

1) The child should be one, who without this program, would require institutional or group home placement due to emotional or behavioral problems.

2) The child should be within the age range of 8-18 years.

3) The child, with intensive supervision, should be able to function and have his/her needs met in a community setting.

					COST $	ADDITION	FOR BSU USE

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF SOCIAL SERVICES

POUCH H-05
JUNEAU, ALASKA 99811

APR 16 1979

Document# 80-80

The Honorable Thelma Buchholdt
House of Representatives
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Ms. Buchholdt:

This is written in response to your inquiry regarding Alaska foster parent liability insurance coverage. The State of Alaska has broad liability protection which includes liability coverage for foster parents who are providing care for children in state custody . The liability insurance coverage is in excess of a million dollars. The policy is administered by the Division of Risk Management in the Department of Administration. John Haywood at 465-2180, is available to answer any further questions you may have.

I hope this information is helpful. Please let me know if any further information regarding our foster care and licensing program is required.

Sincerely,

John Pugh
Acting Director

RE: House Bill 936 3/12/80

I as a Displaced Homemaker partisapating in Fairbanks training and learing skills to enable me to be self supparting of myself and two children. Can not stress enough how help full this program has been! Without having been given the opportunity to return to School and obtain updated skills, I would still be sitting at home. When on Welfare and no education to obtain a job that would pay a substantial income to support the expenses of a job. — transportation - daycare.

The Displaced Homemakers program has been very encouraging that in the near futer I will be employed and self supporting not having to rely on Assistance of the State of Alaska or the tax payers.

I am hoping that many more people in my situation could have the same opportunity to improve themselfs and take ~~o~~ control of their families future.

Beverly E Schulz

Jessie J Harris
witness

3/12/80

There are Women (Displaced Homakers who do have employment Skill and do not necessary have to be trained. But because of Child Care problem can not work and actuely seek employment. This is a major concert that must be met. There is no mention of Child Care Aid in this bill. This is a major problems because women who can work must become AFDC and can not become essential part of the Labor force. And they become Stagnant. Displace Homakers want to become active to Society and to themselves

Catherine E. McCain
3/12/80

Linda Withop, 32yr old mother of four and in a dependency status for 20 yrs. The last fourteen as "common-law". I was directed by Alaska State Employment & CETA division to the "Displaced Homemaker Program" in Fairbanks. I called & was given an appointment. I wished qualified as a "Displaced Homemaker" I had very few self-esteem - very few marketable job skills - a small child to care for - no money - no medical or transportation etc. After an hour with a staff member I was able to identify my most urgent needs & was directed to the existing agencys to help me with the most urgent as I saw it. I also was, with the able guidance of the staff, able to set some short & long range goals & a plan of action to obtain them. Needless to say the staff is excellent. I have observed that they give willingly of their time and have been continually upgrading their program which was declared at the beginning - I was just recently in Juneau to represent my area at the Urban Citizen Participation Conference which was organized to allow the low-socioeconomic citizen an opportunity to view the workings of the government first hand. While there I had the opportunity to confer with thirty-four other members like myself on issues of importance All of which I most are included in HB 926. Over & over again as I listened I realized that there was a lack of information dissemination. I was pleased to hear that two to twelve the Fairbanks Program for "Displaced Homemakers" was well received. I would recommend to the Committee that they review the program as a workable model upon which they could

gain valuable & applicable information to
HB 936

Linda K. Witkop
March 12, 1980

Witness
Dianne Helfferich
March 12, 1980

March 12, 1880

I, Cathy L Overly, am submitting my testimony to the comittee in support of the Displaced Homemaker Program.

I personally have struggled as a divorced parent to support my children financially and still maintain a secure home life for them for six years.

This year, I learned of the Displaced Homemakers Program in Fairbanks, and with the help of the fine counselors, I have recently completed twelve credits of office occupations training at Tanana Valley Community College.

I could not have done this without the moral support and financial assistance that I received from Displaced Homemakers. I have tried for years to get to this point.

Now, I have gained the training, self-confidence and knowledge necessary to become employed at a better job.

I recently received the job that I have been striving for and it will make a difference in my life and my childrens life for the rest of their lives.

I feel that this bill is a very worthwhile cause for the State of Alaska and will improve the economy of Alaska in the long run.

I don't feel that this should be put off until July 1, 1981.

Cathy L Overly

SUBMITTED TO:

HOUSE H.E.S.S. COMMITTEE
CHAIRMAN REP. BUCHHOLDT
MARCH 12th 1980

RE: HOUSE BILL 936

MR. CHAIRMAN:

I would like to speak in behalf of myself and other women who fit into the catagory of "displaced homemakers." I have personally been helped a great deal by the displaced homemakers program currently operating in Fairbanks, not only through the opportunity to attend classes at our community college but also through the moral support and the "you have a friend" attitude of the counsellors.

Through the financial & mental help of this program I have begun a course of study & growth that I can see a future in for myself and my children that will no longer include AFDC or other handouts from the state. I would much rather be a productive member of the community, a stable job holder, & a good example to my own daughter of a well-balanced, self-supporting woman.

This bill and any other bill that will help women to help ~~myself~~ themselves deserve all our attention and support.

Thank You
Debra S. Brown

Chairman: Rep. Buchholdt
House - H.E.S.S.
March 12, 1980

As a client of the Displaced Homemakers Program, I support this bill. Without this programs assistance I would not be able to enter the job market with any skills. I have been at the University of Alaska - TVCC. After two semesters I now I feel that I am better equipped and have more to offer the business community.

Judith J. Rylander

As part of this organization, I have been tremendously helped in my situation. This service is needed in alot of ways. They have enabled me to go to school, acquire skills to enable me to support myself & son. I've had the opportunity to counsel with Deanne Belfich, to learn to cope & solve my problems in a possitive & productive way. There is a need for assistance with day care, also sometimes emergency transportation. There is a real need for emergency funding. I've known several instances ~~were~~ where, because of a lack of day-care-funds women have had to pass up the opportunity to attend school, or because they are single they have difficulty finding employment. I myself am a single parent, during an interview, the man seemed concerned with the fact that I had a child & could I guarantee this wouldn't interfere with the work, would the sitter be reliable & such. This is discriminating & there was really nothing I could do except gracefully say. Thanks when told some-one else had been elected, ~~could~~ ~~that~~. This program can help others as it has me.

Renee Harris

Nancy Hedden
3/12/80

As a Displaced Homemaker I feel there is a great need for more job-getting services. In order to work, child care is essential. Licensed child care is very expensive in this state, and more financial assistance is also greatly needed.

We also need more financial assistance for legal aid, and more prompt legal aid should be made available. We are Persons in crisis and as in any crisis, help is needed immediately.

L. Patricia Hartman

Gene C Kingrea 3/12/80

As a displaced homemaker, I am glad to see legislation for funds for the program. The local program has helped me as a job referral service after I had gone to the state personnel office and job service and chanted the other sources I knew of.

It seems to me that the bill is weak in several areas. We displaced homemakers need help with establishing credit, need help with child care, and need assistance with legal aid. Also, the requirement that a displaced homemaker must have been a homemaker 6 years, seems discriminatory. It is difficult to get into the job market again, having been out of it for even 2 years.

Maureen Wright

Geneseo Dawn 3/12/80

3/12/80

Delores Starkey, age 50, I have a 15 yr. old son to care for. In process of a divorce. I heard of Displaced Homemakers from a friend in the same position as I.
I've had job interviews, I feel my age had alot to do with it. I feel the older woman is discriminated against, because of their age, it's a real problem. I would like the Displaced Homemakers Program to address this question.

Displaced Homemakers is now helping me with schooling. They have been + are a great help to me. Displaced Homemakers is very much needed here in Fairbanks.

Delores Starkey

Cheryl Cameron

March 24, 1980

TO: COMMITTEE MEMBERS

FROM: SHANNON GARRETT

The following are proposed amendments to HB 936 which the committee has received through letters and the teleconferencing on the bill.

PAGE 1 LINE 28- Insert the words "aptitude testing" between the words "counceling" and "training".

PAGE 2 LINE 18- Insert from Pg. 3, line 8, the #(3) section in it's entirety and add a new (A) to read"(A) Supportive transitional counceling." Reletter rest of sec. accordingly.

PAGE 3 LINE 4- Some question has been raised as to the age requirements of apprenticeship training (I really don't think the committee can address that problem in this bill but I have included it because it was brought up several times.)

PAGE 3 LINE 5- After "programs;" insert " re-entry refresher courses;".

PAGE 3 LINE 14- Insert the words "dental care" between "care" and "and".

PAGE 3 LINE 21- Insert the words "and assistance" between "information" and "relating."

PAGE 3 LINE 24- Delete "determined by the commissioner to be" It is felt that the commissioner may be inclined to select only that information Which applies to traditional job roles.

PAGE 4 LINE 19- Isert "a reimbursment" between "agency" and "not".

PAGE 5 LINE 3- Delete "six years" and insert "two years".

PAGE 5 LINE 4- Insert "in a" between "been"and "dependent" and after "dependent" insert "role".

NOTE: Council members are advised that agenda times are flexible for the second day of meetings. This is necessary because of legislators who are guest speakers; we must provide a time which is convenient for them to appear. It may be necessary to adjust the agenda as we proceed.

HB 936
Amendments proposed by Fred Ali, C&RA

Page 1:

Change Section 1 (b)(1) to read as follows (lines 28-29):
(1) provide the necessary counseling, training, employment placement and other services for displaced homemakers [,] through contracts with public or private nonprofit organizations and by utilizing and expanding existing state programs.

Page 2:

Change Section 2, 47.90.010(a) to read as follows (lines 8-12):
(a) The commissioner...may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers [.] and expand existing state programs through reimburseable service agreements.

Add to Section 2, 47.90.010 a new subsection (c):
(c) The commissioner shall establish a competive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Page 3:

Add to Section 2, 47.90.020(2), line 7, the words ", and" (and delete [and] from line 5)--- then add a new subsection (E) to this section to read as follows:
(E) expose displaced homemakers to nontraditional occupations.

Page 4:

line 5, p.4 (1.) At the end of Section 2, 47.90.030, add the following sentence:
Under the procurement process established under AS 47.90.010, the commissioner will give preference to applicants proposing to fill staff positions with displaced homemakers.

p.4 delete 18-22 (2.) add Delete Section 2, 47.90.060 and replace it with the following section:
Sec. 47.90.060. STATE EMPLOYMENT ASSISTANCE. Contrators operating programs under this chapter will, to the maximum extent possible, provide displaced homemakers with assistance in being placed on state employment registers. This will be accomplished with the assistance and cooperation of the Division of Personnel and the Department of Community and Regional Affairs.

Page 4:

(3) Delete Section 3, 43.20.037 in its entirety. ~~(If the Committee decides to do this, it must delete the reference to this section on page 4, line 17.)~~

(2) Delete Section 4 and include the following language instead: All provisions of this Act will take effect July 1, 1981. Proposed CS for HB 936 (Work completed by Committee thus far)

For an Act entitled: "An Act relating to displaced homemakers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. LEGISLATIVE FINDINGS AND INTENT. (a) The legislature finds that there is an increasing number of persons in the state who, after having fulfilled the role of homemaker for a number of years of their life, find themselves "displaced" through the death of a spouse, divorce, separation, desertion, or loss of family income. The legislature finds that displaced homemakers are often without any source of income, face continuing discrimination in employment because they frequently have no recent work experience and may be older than other applicants for employment, are subject to high rates of unemployment and are ineligible for unemployment insurance because they have been engaged in unpaid labor in the home, may be ineligible for categorical welfare assistance, are ineligible for social security if they have been divorced from the family wage earner, may have lost their rights as beneficiaries under employers' pension and health plans through death of a spouse or divorce despite the contribution of years to the well-being of the family, and may be ineligible for Medicaid and unable to purchase private health insurance because of age and lack of income. The legislature further finds that homemakers are an unrecognized part of the work force of the state who have made an invaluable contribution to the welfare of society.

(b) It is the intent of the Act to

(1) provide the necessary counseling, aptitude testing, training, employment placement, opportunities and other services for displaced homemakers[;] through contracts with public or private nonprofit organizations and by utilizing expanding existing state programs.

(2) improve the mental and physical health and welfare of this growing group of members of the community; and

(3) ~~provide~~ assist displaced homemakers ~~with~~ in achieving independence and economic security vital to a productive life.

Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 90. DISPLACED HOMEMAKERS.

Sec. 47.90.010. PROGRAM ESTABLISHED. (a) The commissioner, in consultation with state and local governmental agencies, community groups, and groups concerned with displaced homemakers, may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers[.] and expand existing state programs through reimburseable service agreements.

(b) The commissioner shall adopt regulations prescribing the standards to

be met by each multipurpose service center for displaced homemakers in accordance with the policies established in this chapter.

(c) The commissioner shall establish a competitive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Sec. 41.90.020. MULTIPURPOSE SERVICE CENTERS. A multipurpose service center for displaced homemakers established under AS 47.90.010 may provide the following services:

(1) job counseling services which shall

(A) be specifically designed for displaced homemakers;

(B) counsel displaced homemakers regarding job opportunities; and

(C) consider and build on the skills and experience of a homemaker and emphasize job readiness as well as skill development;

(2) job training and job placement services which shall

(A) emphasize short-term training programs which expand upon homemaking skills and volunteer experience and which lead to gainful employment;

(B) develop through cooperation with state and local government agencies and private employers training and placement programs for jobs in the public and private sector;

(C) assist displaced homemakers in gaining admission to existing public and private job-training programs and opportunities including vocational education, reentry into secondary and postsecondary educational facilities, and apprenticeship training programs; and

(D) assist in identifying community needs and creating new jobs, including nontraditional occupations for displaced homemakers, for displaced homemakers in the public and private sector;

(3) health counseling services including referral to existing health programs with respect to

(A) general principles of preventive health care;

(B) health care consumer education, particularly in the selection of physicians and health care services including health maintenance organizations and health insurance;

(C) mental health care and transitional counseling;

(D) family health care, dental care and nutrition;

(E) alcohol and drug abuse; and

(F) other related health care matters;

(4) financial management services which provide information and assistance relating to insurance, taxes, estate and probate matters,

mortgages, loans, and related financial matters;

(5) educational services including

(A) information, including the availability of monetary assistance programs, relating to courses offering credit through secondary or postsecondary education programs and reentry programs, including bilingual programs if appropriate; and

(B) information about other programs [DETERMINED BY THE COMMISSIONER TO BE] of benefit to displaced homemakers;

(6) legal counseling and referral services; and

(7) information services with respect to federal and state employment, education, health, public assistance, and unemployment assistance programs which the commissioner determines to be of benefit

The Committee stopped its deliberations at this point (end of page 3 in original bill).

HB 936
Amendments proposed by Fred Ali, C&RA

Page 1:

adopted

Change Section 1 (b)(1) to read as follows (lines 28-29):
(1) provide the necessary counseling, training, employment placement and other services for displaced homemakers [;] through contracts with public or private nonprofit organizations and by utilizing and expanding existing state programs.

Page 2:

adopted

Change Section 2, 47.90.010(a) to read as follows (lines 8-12):
(a) The commissioner...may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers [.] and expand existing state programs through reimburseable service agreements.

adopted

Add to Section 2, 47.90.010 a new subsection (c):
(c) The commissioner shall establish a competive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Page 3:

Add to Section 2, 47.90.020(2), line 7, the word and
(and delete [and] from line 5)--- then add a new subsection (E) to this section to read as follows:
(E) expose displaced homemakers to nontraditional occupations.

Stark here

Page 4:

adopted

At the end of Section 2, 47.90.030, add the following sentence:
Under the procurement process established under AS 47.90.010, the commissioner will give preference to applicants proposing to fill staff positions with displaced homemakers.

adopted

Delete Section 2, 47.90.060 and replace it with the following section:
Sec. 47.90.060. STATE EMPLOYMENT ASSISTANCE. Contrators operating programs under this chapter will, to the maximum extent possible, provide displaced homemakers with assistance in being placed on state employment registers. This will be accomplished with the assistance and cooperation of the Division of Personnel and the Department of Community and Regional Affairs.

C&RA proposed amendments to HB 936.

Page 4:

Delete Section 3, 43.20.037 in its entirety. (If the Committee decides to do this, it must delete the reference to this section on page 4, line 17.)

Delete Section 4 and include the following language instead:
All provisions of this Act will take effect ~~July 1, 1980~~ Jan 1, 1981
During FY '81, the commissioner will consult with appropriate groups and state agencies concerned with displaced homemakers, adopt resolutions prescribing program standards, adopt a competitive procurement process, provide information and assistance to groups interested in conducting displaced homemaker programs, and fund one or more limited pilot projects.

STATE of ALASKA

MEMORANDUM

TO: R. D. Stevenson
Special Assistant
Department of Revenue

DATE: March 10, 1980

FILE NO.

TELEPHONE NO.

FROM: Gary L. Jenkins
Director
Audit Division

SUBJECT: House Bill No. 936

Section 3 of this bill would provide for an income tax credit for up to 30 percent of the wages paid to an individual who qualified as a displaced homemaker. There are two issues which should be considered in analyzing this proposed legislation.

First of all, there is considerable pressure at the present time to either suspend or repeal the individual and corporate income taxes. If either of those actions were to take place, it would obviously make this proposal, in effect, null and void.

Secondly, there is a policy question with regard to how programs of this nature should be accounted for by permitting a major portion of the actual cost of the program to be buried as a tax credit, with the result that the total cost of the program is not subject to appropriation. It makes it difficult to easily analyze the benefits of a program as compared to its actual total cost.

In lieu of the tax credit provision, since the Department of Community and Regional Affairs will already be working directly with the various employers involved, it will be a relatively simple operation for them to refund the employer the 30 percent of the wages paid. This would also be very logical from an administration point of view because they are charged with the responsibility of ensuring that each employer meets the conditions set forth in the law and regulations prior to the reimbursement being paid. This concept would also permit the Legislature to clearly understand the total cost of this program when they appropriate the funds for it annually.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The bill would establish a displaced homemakers support program. Among other things, it proposes an income tax credit of 30 per cent of the first 12 months of compensation paid by an employer for each certified displaced homemaker.

The above estimate is based on information provided by the Alaska Commission on the Status of Women.

TO: COMMITTEE MEMBERS

FROM: SHANNON GARRETT

The following are proposed amendments to HB 936 which the committee has received through letters and the teleconferencing on the bill.

PAGE 1 LINE 28- Insert the words "aptitude testing" between the words "counceling" and "training".

PAGE 2 LINE 18- Insert from Pg. 3, line 8, the #(3) section in it's entirety and add a new (A) to read"(A) Supportive transitional counceling." Reletter rest of sec. accordingly.

PAGE 3 LINE 4- Some question has been raised as to the age requirements of apprenticeship training (I really don't think the committee can address that problem in this bill but I have included it because it was brought up several times.)

PAGE 3 LINE 5- After "programs;" insert " re-entry refresher courses;".

PAGE 3 LINE 14- Insert the words "dental care" between "care" and "and".

PAGE 3 LINE 21- Insert the words "and assistance" between "information" and "relating"

PAGE 3 LINE 24- Delete "determined by the commissioner to be" It is felt that the commissioner may be inclined to select only that information Which applies to traditional job roles.

PAGE 4 LINE 19- Isert "a reimbursment" between "agency" and "not".

PAGE 5 LINE 3- Delete "six years" and insert "two years".

PAGE 5 LINE 4- Insert "in a" between "been"and "dependent" and after "dependent" insert "role".

INTRODUCTION

The Displaced Homemaker's Program is new to Fairbanks and to the rest of the United States. The problems of the displaced homemaker have just come to light in the last decade. Prior to that time a homemaker who, because of death, divorce or separation, found herself alone was dependent to a great extent on welfare, relatives or a small pension. She had no real hope of transition to a new and productive life.

The skills most homemakers utilize on a daily basis are not recognized as marketable by the great majority of employers. They are also not viewed as marketable by the homemaker herself. Many homemakers have never held salaried positions and those who have often have not worked for a number of years. Frequently their skills are out of date. The majority of these women feel totally unprepared and inadequate to participate in today's competitive job market. Most of these people are intelligent and capable but lack the self confidence, educational and vocational resources to help themselves. They need practical and emotional support to meet their special needs.

The Displaced Homemaker's Program was established to assist women during this transitional period. The Fairbanks program is staffed by professional counselors who, through their training and life experiences, are familiar with and sensitive to the problems of the displaced homemaker.

The primary function of the Displaced Homemaker's Program of Fairbanks is to ease the problems of transition and to act as an advocacy agency for displaced homemakers. The services the program offers are many and varied. They include transitional counseling, peer group support, workshops, educational and vocational training, job referrals and referrals to other agencies with follow-up support.

METHODOLOGY

After a review of the literature, it was determined that no current information was available on the existence or numbers of displaced homemakers in the Fairbanks community. Therefore, in order to obtain the information necessary for this report, a survey of the adult female population of this area was conducted.

Because of the great numbers and diversity of the people who attend the Tanana Valley State Fair in Fairbanks (1979 figures were in excess of 85,000 persons over a period of five days), I chose to conduct the survey at the fairgrounds and circulated my questionnaire for five consecutive days. This survey questionnaire placed emphasis on information relating to marital and/or dependency status and the economic and educational profiles of those women interviewed. Experienced interviewers approached adult females at random and careful consideration was given to days, hours and activities during the fair to insure that we obtained the broadest possible sample. As a further check, note was made of the general geographic location of each respondent's residence. Only Fairbanks area residents were selected for this interview.

Three hundred and two (302) women participated in the survey. Forty-six (46) of these participants were found to be widowed,

divorced or separated. These forty-six (46) women are the basis of this report.

SUMMARY

As this study of divorced, widowed and separated women evolved, the following trends emerged:

1. The divorced, widowed or separated woman is shown to economically disadvantaged. The unemployment rate in this segment of society is nearly four times the average for the Fairbanks area as of August, 1979. (This figure was confirmed by the Fairbanks Community Information Office).

2. While the problems of the divorced and widowed are readily apparent, the needs of the separated are critical by comparison. The separated woman is younger, has more children, has less education and less income per family member than the divorced or widowed displaced homemaker.

3. The displaced homemaker needs help in building employment skills, emotional support, personal effectiveness, money management, skills and finding financial aid for education.

I believe the problems of the Fairbanks displaced homemakers are acute due to several factors. Among these are a skyrocketing

unemployment rate, high costs for basic life necessities and the boom/bust economic cycle. All data gathered to date points to an even more severe decline in the status of displaced homemakers as their numbers increase. Theirs is not a problem which can be resolved with the passage of time. Their need is great and their resources are few.

DISPLACED HOMEMAKERS PROGRAM

During the period of June 18, 1979 to March 1, 1980, the Displaced Homemakers Program has served 316 persons. Because of certain CETA restrictions, only 241 were served as a matter of record. Of these 241 persons, 62 were granted funds for vocational or educational training.

The following is excerpted from the Displaced Homemakers Program quarterly report on the period of October 1, 1979, through December 31, 1979, and is a descriptive break-down of specific services rendered to clients during that quarter.

Bill No. House Bill 936 **Date** March 11, 1980

Title An Act relating to displaced homemakers; and providing for an effective date

Contact: Judy DuBois 465-2700

House Bill No. 936 "An Act relating to displaced homemakers; and providing for an effective date" is proposed to establish multipurpose service centers to provide services for Alaskan displaced homemakers.

Although the conceptual emphasis of the bill is supported, we have four primary concerns in relation to its implementation. First, the bill does not indicate the size or distribution of the population to be served and thus does not indicate sites as where the multipurpose centers will be established. A second concern is the tax credit provision for displaced homemakers. It appears that the displaced homemakers tax credit is a duplication of the proposed Alaska State Jobs Tax Credit program and may be a moot issue in view of the current tax legislation before the Alaska Legislature. A third concern is the current existence of federal funds available for displaced homemaker services. It appears that by consolidating existing displaced homemaker service programs and by utilizing present funding sources, expansion of services to additional geographical areas of the State of Alaska could be accomplished without the inclusion of State funds.

Lastly, the proposed legislation duplicates the current efforts of providing employment, counseling and necessary referral services for eligible displaced homemakers by Job Service and the Alaska Work Incentive program. It would appear that since Job Service and the Work Incentive program are currently operational, they should be utilized as the primary administrative and service provider vehicles for the proposed displaced homemaker legislation. This is especially pertinent when it is recognized that the population to be served by this legislation are or will be eligible for existing agency's services and that the proposed multipurpose centers will function as primarily a referring organization.

Departmental Position: Opposed in current status.

POSITION PAPER/Department of Labor

March 24, 1980

TO: COMMITTEE MEMBERS

FROM: SHANNON GARRETT

The following are proposed amendments to HB 936 which the committee has received through letters and the teleconferencing on the bill.

PAGE 1 LINE 28- Insert the words "aptitude testing" between the words "counceling" and "training".

PAGE 2 LINE 18- Insert from Pg. 3, line 8, the #(3) section in it's entirety and add a new (A) to read"(A) Supportive transitional counceling." Reletter rest of sec. accordingly.

PAGE 3 LINE 4- Some question has been raised as to the age requirements of apprenticeship training (I really don't think the committee can address that problem in this bill but I have included it because it was brought up several times.)

PAGE 3 LINE 5- After "programs;" insert " re-entry refresher courses;".

PAGE 3 LINE 14- Insert the words "dental care" between "care" and "and".

PAGE 3 LINE 21- Insert the words "and assistance" between "information" and "relating."

PAGE 3 LINE 24- Delete "determined by the commissioner to be" It is felt that the commissioner may be inclined to select only that information Which applies to traditional job roles.

PAGE 4 LINE 19- Isert "a reimbursment" between "agency" and "not".

PAGE 5 LINE 3- Delete "six years" and insert "two years".

PAGE 5 LINE 4- Insert "in a" between "been"and "dependent" and after "dependent" insert "role".

HB 936
Amendments proposed by Fred Ali, C&RA

Page 1:

Change Section 1 (b)(1) to read as follows (lines 28-29):
(1) provide the necessary counseling, training, employment placement and other services for displaced homemakers [;] through contracts with public or private nonprofit organizations and by utilizing and expanding existing state programs.

Page 2:

Change Section 2, 47.90.010(a) to read as follows (lines 8-12):
(a) The commissioner...may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers [.] and expand existing state programs through reimburseable service agreements.

Add to Section 2, 47.90.010 a new subsection (c):
(c) The commissioner shall establish a competive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Page 3:

Add to Section 2, 47.90.020(2), line 7, the word and
(and delete ~~[and]~~ from line 5)--- then add a new subsection (E)
to this section to read as ~~follows~~:
(E) ~~expose~~ introduce displaced homemakers to nontraditional occupations.

Page 4:

At the end of Section 2, 47.90.030, add the following sentence:
Under the procurement process established under AS 47.90.010, the commissioner will give preference to applicants proposing to fill staff positions with displaced homemakers.

Delete Section 2, 47.90.060 and replace it with the following section:
Sec. 47.90.060. STATE EMPLOYMENT ASSISTANCE. Contrators operating programs under this chapter will, to the maximum extent possible, provide displaced homemakers with assistance in being placed on state employment registers. This will be accomplished with the assistance and cooperation of the Division of Personnel and the Department of Community and Regional Affairs.

Page 4:

Delete Section 3, 43.20.037 in its entirety. (If the Committee decides to do this, it must delete the reference to this section on page 4, line 17.)

Delete Section 4 and include the following language instead:
All provisions of this Act will take effect July 1, 1980. During FY '81, the commissioner will consult with appropriate groups and state agencies concerned with displaced homemakers, adopt resolutions prescribing program standards, adopt a competitive procurement process, provide information and assistance to groups interested in conducting displaced homemaker programs, and fund one or more limited pilot projects.

Proposed CS for HB 936 (work completed by Committee thus far)

Proposed CS for HB 936 (Work completed by Committee thus far)

For an Act entitled: "An Act relating to displaced homemakers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. LEGISLATIVE FINDINGS AND INTENT. (a) The legislature finds that there is an increasing number of persons in the state who, after having fulfilled the role of homemaker for a number of years of their life, find themselves "displaced" through the dealth of a spouse, divorce, separation, desertion, or loss of family income. The legislature finds that displaced homemakers are often without any source of income, face continuing discrimination in employment because they frequently have no recent work experience and may be older than other applicants for employment, are subject to high rates of unemployment and are ineligible for unemployment insurance because they have been engaged in unpaid labor in the home, may be ineligible for categorical welfare assistance, are ineligible for social security if they have been divorced from the family wage earner, may have lost their rights as beneficiaries under employers' pension and health plans through death of a spouse or divorce despite the contribution of years to the well-being of the family, and may be ineligible for Medicaid and unable to purchase private health insurance because of age and lack of income. The legislature further finds that homemakers are an unrecognized part of the work force of the state who have made an invaluable contribution to the welfare of society.

(b) It is the intent of the Act to

(1) provide the necessary counseling, aptitude testing, training, employment placement, and other services for displaced homemakers[;] through contracts with public or private nonprofit organizations and by utilizing expanding existing state programs

(2) improve the mental and physical health and welfare of this growing group of members of the community; and

(3) provide displaced homemakers with independence and economic security vital to a productive life.

Sec. ?. AS 47 is amended by adding a new chapter to read:

CHAPTER 90. DISPLACED HOMEMAKERS.

Sec. 47.90.010. PROGRAM ESTABLISHED. (a) The commissioner, in consultation with state and local governmental agencies, community groups, and groups concerned with displaced homemakers, may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers[.] and expand existing state programs through reimburseable service agreements.

(b) The commissioner shall adopt regulations prescribing the standards to

Proposed CS for HB 936 (work completed by Committee thus far)

mortgages, loans, and related financial matters;

(5) educational services including

(A) information, including the availability of monetary assistance programs, relating to courses offering credit through secondary or postsecondary education programs and reentry programs, including bilingual programs if appropriate; and

(B) information about other programs [DETERMINED BY THE COMMISSIONER TO BE] of benefit to displaced homemakers;

(6) legal counseling and referral services; and

(7) information services with respect to federal and state employment, education, health, public assistance, and unemployment assistance programs which the commissioner determines to be of benefit

The Committee stopped its deliberations at this point (end of page 3 in original bill).

be met by each multipurpose service center for displaced homemakers in accordance with the policies established in this chapter.

(c) The commissioner shall establish a competitive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Sec. 41 10.020. MULTIPURPOSE SERVICE CENTERS. A multipurpose service center for displaced homemakers established under AS 47.90.010 may provide the following services:

(1) job counseling services which shall

(A) be specifically designed for displaced homemakers;

(B) counsel displaced homemakers regarding job opportunities; and

(C) consider and build on the skills and experience of a homemaker and emphasize job readiness as well as skill development;

(2) job training and job placement services which shall

(A) emphasize short-term training programs which expand upon homemaking skills and volunteer experience and which lead to gainful employment;

(B) develop through cooperation with state and local government agencies and private employers training and placement programs for jobs in the public and private sector;

(C) assist displaced homemakers in gaining admission to existing public and private job-training programs and opportunities including vocational education, reentry into secondary and postsecondary educational facilities, and apprenticeship training programs; and

(D) assist in identifying community needs and creating new jobs, including nontraditional occupations for displaced homemakers, for displaced homemakers in the public and private sector;

(3) health counseling services including referral to existing health programs with respect to

(A) general principles of preventive health care;

(B) health care consumer education, particularly in the selection of physicians and health care services including health maintenance organizations and health insurance;

(C) mental health care and transitional counseling;

(D) family health care, dental care and nutrition;

(E) alcohol and drug abuse; and

(F) other related health care matters;

(4) financial management services which provide information and assistance relating to insurance, taxes, estate and probate matters,

Testamony to the Health, Education and Social Services Committee on behalf of HB 936 relating to Displaced Homemakers:

As testamony via Teleconference Network was interrupted, I would like to submit these remarks regarding the Displaced Homemakers Bill.

I am an Employment Counselor although I am not representing any governmental agency. I encounter daily women who come looking for jobs who are entering or re-entering the labor force after living as a homemaker. They typically have no experience in the labor market, they lack employable skills, and usually have little or long-distant education. But on top of this, their lives as dependent people have not provided the image of themselves as capable money-makers. As an Employment Counselor, no amount of learning job-search skills will make up for the low-self image most of these women have.

I support most heartily the HB 936 with these recommendations:

1. 6 years is too long a limit; Alaska's population is young and a woman who has spent most of her life as a dependent woman needs assistance with the transition to independence;

2. Page 3, section 3, Line 17 I support the addition recommended by Anchorage women that mental health conseling be added. In order to counter the image of dependency and incompetency, a woman must learn problem resolution, decision-making, coping skills, and assertiveness before she can approach the job-market in a confident manner necessary to compete in the labor market.

Finally, I support the management of Displaced Homemakers Progress by independent service agencies rather than state agencies who are hampered by Federal Regulations. Thank you. Rebecca L. Smith

If these alternatives are not provided to our displaced homemakers, the result will continue to be an ever increasing permanent welfare population. The more practical resolution is a comprehensive plan that will return these women to the job force and allow them to contribute as independent, capable individuals.

TESTIMONY ON HOUSE BILL NO. 936

TO THE HEALTH, EDUCATION AND SOCIAL SERVICES

COMMITTEE

THELMA BUCHOLDT, CHAIRMAN

My name is Flora "Skeeter" Jepson, L.PN. at the Kotzebue Senior Citizen Center.

I am representing the Senior Center and myself.

I support the Bill No. 936 "Displacement Homemakers" for the following reasons:

(1). There are no programs or facilities here in Kotzebue for "displaced homemakers". This type of program is greatly needed NOW.

(2). I have had friends stay with us at home because they have had no place else to go. If there was a program like this here in Kotzebue I know that they would make good use of it. Knowing them I know for a fact that they do not want to get on any type of Welfare programs.

(3). Within the NANA Region, I know that there are many other Ladies caught between a "rock and a hard spot" because of no place to go or to turn to.

I would like to see the following changes made:

Page five, line two,

;should be eliminated or expanded to a variety of cases.

Thank you very much.

Flora "Skeeter" Jepson LPN

WOMEN IN SAFE HOMES

A Safe Alternative for Battered Women & Their Children

DISPLACED HOMEMAKERS

Displaced homemakers are those women old and young who have spent years in the home nurturing the family, supplying unpaid labor in the form of housekeeping, child care, budget management, food preparation and providing other contributions that would be considered valuable if anyone other than a housewife performed them.

The traditional role of wife, mother, and homemaker does not provide women with experiences that can readily be translated into recognizable job skills when her services are no longer needed or wanted in the home.

Displaced homemakers are women who are thrust on the job market as a result of divorce, spousal death or separation without appropriate job finding skills, education, or job history. The result is a growing population of unskilled, undereducated women who have a difficult, if not impossible, transition from home to outside occupation.

Of 122 abused women who were provided with shelter and aid last year by Women in Safe Homes, 15 percent became displaced homemakers as an alternative to the violence in their homes. Ketchikan has a high rate of desertion by spouses who leave their families without support because of an inability to find a high paying job in Alaska.

Almost 80 percent of the displaced homemakers serviced last year were transferred outside of the state because of the lack of resources available to them here.

It is so important for the State of Alaska to make a provision for local services for the displaced homemakers in our state.

These services required in Ketchikan include:

1. Individual and supportive group counseling for values clarification, conflict resolution, coping skills, and increased self-esteem.
2. Assertiveness training.
3. On the job training.
4. Education in job hunting techniques, resume preparation, and career alternatives.
5. Adequate and available child care during training, counseling, and work.
6. Employment counseling and aptitude testing.
7. Referral and advocacy services for location of housing, legal advice, medical treatment and health education, parenting skills, nutrition counseling, and alcoholism treatment.

DISPLACED HOMEMAKERS
by Elizabeth Union-Jakubek
Alcoholism Counselor
Ketchikan Alcoholism Program

Many researchers say that women, far more frequently than men, are able to point to a specific incident in their lives which they believe precipitated heavy drinking. The factors most often cited are death of a loved one, divorce, grown children leaving home, and obstetrical and gynecological problems.

These are also some of the factors that force women unprepared into the job market. Women who have been homemakers for years-who have few marketable skills.

The majority of my adult female caseload which at present numbers approximately 20 individuals-have two major hurdles facing them.

1. Attaining and maintaining sobriety as well as
2. finding a way to support themselves and their children

outside of welfare payments and food stamps.

True these women have been handicapped by their alcoholism-but one of the greatest threats to their sobriety are lack of skills, lack of self confidence and a limited job market.

A comprehensive program that could be made available to women such as my clients would greatly increase the chances of these women becoming functional, contributing members of our soci y.

Respectfully submitted,

E. A. Union-Jakubek

Elizabeth A.Union-Jakubek
Counselor for Women and Youth
Ketchikan Comprehensive Alcoholism Prog.

DISPLACED HOMEMAKER

Testimony to H.E. & S.S. committee on HB 936
by Jayne Wagner

Being a Displaced Homemaker I suddenly found myself the sole-supporter of myself and three children, because I would not allow myself to be physically, emotionally, or economically abused in my relationships. Not only was I being abused, but my children were being emotionally abused thru witnessing these incidents.

I found myself with out a home, income, transportation and standing in the welfare lines not being able to support my family above the Public Assistance level because of lack of vocational or educational training and no extended job experience, since I had spent all my time and energys in marriage, running a home, being a wife and mother of young children.

When seeking help in my community in Washington to leave the violent relationship I was referred to a Seattle Shelter for Battered Women where I had time and most of all safety to make arrangements for transportation for myself and children. When arriving in Ketchikan I contacted the WISH office and got some referrals and supportive counseling to continue my search for a job and housing, which I have accomplished with their aid.

More women need to know of the support and resources that can be available to them to have an independance in their life. I feel there is a need for more job services, training, and childcare in Ketchikan for women who want to remain in the Ketchikan area.

Response to HB 930 March 12, 1983 Teleconference

Madam Chairman,

I am Joan Bennett Schrader and [redacted] testifying for myself. As a woman who, except for the most fortunate of circumstances, could be with-in the group you are discussing, [redacted] I am strong and continuing. There is no need for me to list the particulars of what happens to a displaced home-maker. We are all aware of the particular problems. I support this bill; however I feel there are some aspects that need close scrutiny.

Page one, line 9.....the scarcity of aid available to encourage community members to re-set their goals and to learn new skills seems to be [redacted] paucity of pre-advisory testing. This is available in Anchorage but for some-one with little or no money, possibly no vehicle, and a need for baby-sitters, Anchorage may as well be Nome. Insufficient testing and then counseling them into schools or training programs that are not sufficient to meet their needs is devestating to their self-confidence. EX: I am a 49 year old woman who would find herself in a secretarial or office skills program. Nothing wrong with such a course, but for 35 years I have detested office skills. A personal matter but if I am to be successful in learning and applying new skills, I must at least feel comfortable and not drowning in skills or a job that I detest. How comprehensive will this job testing be? The counseling? How integrated will the counselors knowledge be, both in [redacted] places for my area and where is the training available. How imaginative will the counselor be? Will he/she know this state? Will they understand the Alaskan life-style? Will they be bound by what is traditional? Out of 50, will they see training a 49 year old in the computers to sort fish, grade, and learn areas of processing; to implement training for maintence or service [illegible]

Page two, line 20.....Here again, as in counseling, knowledge of the community is essential. In the Kenai-Soldotna area [illegible] oil-related employment. Will the displaced home-maker find the [illegible] only for the lower level office staff? or will the training be [illegible] job with-in these facilities? [illegible] basis of household [illegible] good access to such facilities and well paid employment, with [illegible] defined up-ward movement, not some job with little chance of [illegible] or up-grading.

Page two, line 29..... [illegible] I firmly believe that should I find myself in a [illegible] as a mother and grandmother would [illegible] relative" training [illegible] to children using ideas that [illegible] not prepared me for. Would I be [illegible] of the secretarial school [illegible]

Page two, line 36.....What is short term? A course of three to six months may suffice for those who have had previous grounding in the training being undertaken, but would be insufficient for those newly introduced to the course.

Page two, line 39.....this could be the area where this program would succeed or flounder. If the state agencies and private training see this program as a possible source of well-trained, skilled workers, [illegible]. Would they, on the other hand, view this as a source of [illegible] stenos [illegible]

' feeling of self worth in the displaced homemaker is a great need. Low paying jobs as a goal rest low on the Totem Pole. certainly, many of those retrained will be comfortable in less demanding/lower paying jobs but they should not be channelled into them as a matter of course.

Page three, Line 1.....Omit this for any homemaker over the age of 25 (approx) as trade Union regulations forbid apprenticeships to anyone older. And they would really have to be sold on apprenticeship program that would change this rule when they have apprentices out of work for months at a time.

Line 7.....Good idea, if it avoids the pitfalls I commented on re: alternative training.

Line 10.....Small counties have a desperate need of more health care.

Line 14.....Excellent!

Line 17.....Desperately needed.

Line 21.....Also, provided this service is clearly marked for information of what is available for training throughout the state and nation.

Line 26.....The Omaha State Bar Association could be of aid here as the usual course for the homemaker is to a local attorney first and that is where the homemaker needs to be advised of a vested interest in her spouses pension plan and his/her social security before the divorce. It is not practical for the homemaker to have legal advise only after the divorce.

Line 24.....This could be a problem area. Should the commissioner/staff/feel uncomfortable with the idea of non-traditional jobs, and the homemaker feel he/she has a viable interest and capability in that field, what are the channels of appeal for the homemaker? I see shades of the Peter Principle in this. It may well be the counselor/counselor/staff/commissioner are not able to see homemakers in other than traditional jobs.

Page four, line 10.....It is good to include the Department of Labor. This department, by my understanding is the governing body. We are talking about a section of the work-force, primarily, that is specified as to why they are not meeting the above. Public, legal and other workers are secondary to enabling workers (in this case homemakers) secure profitable, timely and responsible employment. It is in the area of work, the training for work, either in school or on the job, or a combination of these, and the eventual placement of workers on a job site, these would be in turn to contribute to the tax structure. All the health and education efforts are geared to this end and meet the intent of this bill. Why is the Department of Labor not spearheading this effort?

Line 14.....Economically injured men should be made aware of their ability to qualify too.

Line 19.....With the knowledge of unemployment here private business I can foresee problems in this area.

SK: My agency needs 10 workers for lower echelon positions plus 5 highly paid consultants. The budget will not stretch that far. However, if I hire 7 homemakers on the 3% off I can then hire three non-homemaker at the regular rate. My two consultants are now within my reach. My budget is in line, my employer happy and the homemaker staff happy. Everything is fine but the danger here is for the homemakers who need the feeling of being able to compete on a equal basis at the work level, to feel well-trained and capable in the labor force. They could, if this portion of the bill not be closely monitored, become meshed into a "ghetto" situation. Carried to a logical conclusion, the possibility of "de facto" segregation from the valuable "give & take" with non homemakers could result. Part of any employment training is from our fellow workers and that is a very valuable part. It would be destructive to their concept of themselves as valuable and capable workers. That of the non-homemakers view. Does this carry reverse discrimination? The State of Alaska carried the concept of part-time employees far beyond reason, and in my opinion, to the detriment of those workers.

If the training programs are well thought out, imaginative, bold. The staff not out of touch with the realities of our communities; if the programs be well co-ordinated then you will produce good workers who are able and more than willing to compete with any worker.

Equal Pay - Here I have a feeling [illegible] On occasion I can see a weakening of the value of this program to the homemaker. Possibly, even above. Possibly those women from the mainstream of the employment market with its competition and stress are not what I see the homemaker as wanting. Rather let them learn, compete and grow with female employment.

Thank you for listening to me.

in support of
H.B.936

Submitted by: Pamela Herman, Planner
Mauneluk Manpower

Thank you, Madam Chairman, for an opportunity to testify in support of H.B. 936, which would establish a program for Displaced Homemaker Multi-Service Centers through funding from the Alaska Department of Community and Regional Affairs. We enthusiastically support this legislation.

First, I would like to offer some statistics that indicate the size of the population in this region which could be affected by this program:

* There are about 750 unemployed or underemployed females in the regional labor force (estimated at 2276) and about 600 unemployed or underemployed men. The unemployment rate is an estimated 43%.
* There are 250 women for whom "no adequate child care substitute is available." These are women who could become displaced homemakers if their current source of financial support is lost.
* The median grade completed among women 35 years old or older is 6.0; for men of the same age, 6.5 years.
* There are almost as many employed mothers as fathers in the region. By the same token, there are a number of families dependent upon subsistence food-gathering efforts of the father for their livelihood.
* Only 30% of the regional workforce (those who manage to find a job) is employed full-time, year-round.
* According to our Regional Strategy Survey, conducted by the Dept. of Community and Regional Affairs under contract to Mauneluk Association, subsistence resources are significant alternatives to employment income for three times as many families as are state or federal income payments or food stamps.
* According to the records for the Second Judicial District of the Superior Court for the State of Alaska, 36 divorces were filed in 1975; 43 in 1976; 56 in 1977; 63 in 1978. This includes both Nome and Kotzebue.
* In March, 1979, 129 families in this region received AFDC; this is 3.2% of the statewide AFDC caseload, although the region has only 1% of the state's population. The regional AFDC caseload with adults not included is 104, and each of those cases can represent up to 6 children. This is 9.1% of the statewide caseload. Informal placements of children outside their homes is 18 times more common in this region than statewide.
* 25% of live births at the Kotzebue P.H.S. Hospital are to women 19 years old or younger.

This evidence would indicate a potentially large displaced homemaker population in the region, spanning a wide range of age and including members of both sexes. The large unemployment figure should also give an indication of how much of a problem displaced homemakers have finding work when they are thrown onto the job market.

We have spent the last five months planning a displaced homemaker program which we are now seeking to fund. One of the goals of the project is to find out more about the characteristics of our target population, but we already know that displaced homemakers in this region face the following barriers to employment:

* very few jobs are available to anyone
* clients lack education
* clients can't find markets for skills they have
* employers can't find workers with skills they require
* clients often have a poor command of written English
* demands of large families make job retention difficult for single parents
* dietary requirements and cultural patterns require seasonal absences from work to pursue subsistence activities
* individuals of social standing in the community require jobs commensurate in prestige
* the qualities that fit one for traditional subsistence life sometimes make the adjustment to less physically active occupations very difficult
* patterns of alcohol abuse are such that frequently creative or talented individuals suffer through periods of instability on the job.

The program we intend to operate will be a supplement to the services we already provide for displaced homemakers through our CETA program. We want to offer the following services specifically designed to overcome the common problems faced by displaced homemakers: information and outreach, work experience, job training, tuition and allowances while in training, technical assistance in establishing cottage industries, marketing services for cottage industries, expanded day care services, employer education, supportive services including housing assistance, clothing and gear for work, medical and dental services, travel from home village to Kotzebue in order to find work, alcoholism and family crisis counseling and referral, and most important, individual and group counseling to overcome psychological barriers to retaining work and building a satisfactory life. We believe that all of these services are necessary to serve the target population and we would like to help coordinate the efforts of all the agencies in Kotzebue who seek to deliver services to this group.

Displaced homemaker programs already are in operation in Fairbanks and Anchorage, funded by CETA funds administered by the Department of Community and Regional Affairs. In order to allow maximum coordination with the few programs operational now as well as the other CETA-funded employment and training programs which serve displaced homemakers as well as other unemployed and economically disadvantaged people, we would like to recommend that a few small changes be made in the bill to allow a unified approach

to the problem. I say small, because the bill as it stands is remarkably similar in its approach to providing displaced homemaker services. In its recognition that displaced homemakers come to the job market with many skills to offer, it is more enlightened than the federal legislation.

Page 3, line 8, (3) should read "housing services including
(A) loan for rental deposit,
(B) temporary shelter allowance, and
(C) assistance in locating permanent housing."
The following sections would be renumbered to reflect this addition.

Page 5, line 3, should be changed to read "for a substantial number of years. (This will allow the cut-off period to be determined according to agency information about the length of time in which one's marketability as an employee dwindles to the point where it presents problems in finding and holding a job.) Occasional periods of temporary, part-time, or incidental employment shall not be a disqualifying factor."

Page 5, line 5, should be changed to read, "and has lost that income, or who is presently or has just ceased to receive public assistance, or who would qualify to receive public assistance; and" (This makes welfare recipients eligible.)

Page 5, line 6, should be amended to read,"is unemployed or underemployed and has experienced difficulty in finding employment." (This requires the person to be substantially unemployed in order to qualify for assistance.)

Page 5, line 15, should be amended to allow for an early implementation of this program.

I am attaching a copy of the federal displaced homemaker regulations which might suggest other language which the Committee would like to adopt. I am not urging you to replicate the federal scheme, but I would like to suggest that unnecessary differences in language which do not reflect a true difference in approach to the problem might be eliminated at the outset to allow extensive coordination of programs for the target group.

For the same reasons, it is appropriate for the Department of Community and Regional Affairs rather than the Department of Labor to administer this program, since that agency already has expertise in the delivery of services to displaced homemakers.

Thank you for the opportunity to support this most worthwhile legislation.

Re: Health Education & Social Services

H.B. 936 3-12-80

"An Act relating to displaced homemakers; and providing for an effective date."

A displaced homemaker should be interpreted as a person, male or female, who has been in a dependent situation and finds themselves for various reasons (death, separation, divorce, abandonment,) ~~find~~ displaced from the position of homemaker.

A displaced homemaker, more often than not, becomes a public charge, due to inability to find employment.

The inability to find employment may be caused by many factors. Skills are non-existent, skills are out-dated, skills are inappropriate for community of residence, child-care is too costly to be paid from wage received, child-care facilities may not be available within reasonable distance of residence or place of employment. Also, transportation or

the form of personal car or public transit may not be available.

Also, due to the trauma of the displacement many homemakers are not ready for employment until they have received good transitional counseling. After transitional counseling there often exists a need for continuing supportive counseling.

Skills must be acquired through class-room training or on-job-training programs. Existing, but out-dated, skills must be renewed through brush-up courses for re-licensing or re-certification. Inappropriate skills must be evaluated to determine what portion, if any, can be transferred into employment which is available in the community of residence.

The displaced homemaker more frequently than not finds themselves without housing which is affordable. Alternative affordable housing is difficult to locate. Low-income housing units are always in too short or supply. In the

case of the single adult with no dependent children there is no low-income housing available. A single or displaced mother of ~~a~~ head of ~~two~~ children could receive a monthly stipend of $400 through A.F.D.C. With rent for a ~~two~~-bedroom apt. at $350 to $400 mo. plus utilities there is often no alternative except to enter another dependent situation for which they are not prepared.

If the displaced person cannot get a job which pays enough to replace A.F.D.C. ~~and~~, Food Stamps and Medicaid they continue as a public charge, thus creating a Catch 22 situation.

Legal problems are also a prime concern. Many displaced persons do not pursue a divorce due to the cost of legal fees. Free legal services through Alaska Legal Services often do not materialize as that agency is overworked and understaffed. So the displaced person may lose child support, property, etc. for which they may be entitled.

Establishing credit is still a problem for the female displaced homemakers. Even if she gets a job and can afford to pay her bills. She finds herself being asked "husband's name", "credit references", "do you own or rent", "how long have you lived in your present residence". Many displaced homemakers find they can't get credit because the ex-husband or ex-wife had a bad credit rating during the marriage.

Persons who are displaced and are seeking employment are not necessarily "hard-core-unemployed" persons. They are persons who are willing to do almost any kind of work for a living wage. It is not felt that the employment of a displaced homemaker is a liability. In fact, it should be considered a definite asset as displaced persons have no alternative sources of income except welfare which they feel is degrading & undesirable.

It is not felt that employers should receive a "tax break" at the further expense of taxpayers for hiring a displaced homemaker.

Section 3, AS 43.20 should be deleted entirely from HB. 939.

Respectfully submitted,

Leslie M. Mallard
Counselor
Displaced Homemaker Program

TELECONFERENCE HEARING
March 12, 1980

ALASKA WOMEN'S RESOURCE CENTER
HELEN ROBERTS, OUTREACH
DISPLACED HOMEMAKERS PROGRAM

RE: HOUSE BILL NO. 936

The Displaced Homemaker Program at Alaska Women's Resource Center has counseled, seen and served approximately 64 women within the past six (6) months who are divorced. separated or widowed. These women represent the population addressed by the intent of House Bill 936. There are many more in the Anchorage area, as well as throughout our state who can be identified and assisted through this legislative bill providing for the services as discussed.

The Displaced Homemaker must be reached in order to be trained. They must also be in touch with the real work world in order to gain realistic work skills. The need for a comprehensive program approach to attack the isolation which contributes to the Displaced Homemaker syndrome is m _ in the Multi-Purpose Center Concept. Not knowing where to turn, not having confidence to seek assistance, finding stop-gap help that is too little, premature and not pertinent is a prime problem. The need for job counseling, training and placement is a major priority. Permanent employment within the clerical, sales, health and food services is one area of need and demand among women who come to the Center. The other side of the coin is that if there were adequate training programs, such as the proposed Anchorage Skill Center, that would offer training in other work areas, there would be guaranteed enrollees for such programs. We support the Fairview Community Council Skill Center Committee, chaired by Mr. Joseph M. Jackson, in their efforts for a site selection for a proposed and funded Anchorage Skill Center.

ALASKA WOMEN'S RESOURCE CENTER _ TESTIMONY _- HOUSE BILL 936

We would like to request that House Bill 936 Provide for mechanisms for identifying Displaced Homemakers throughout the state.

The Women our Center deals with are intimidated by a society that has welshed on its' promises, such as health services, economic security, and to be fully educated in order to be responsible for their own lives.

Displaced Homemakers Program, Alaska Women's Resource Center

approximate number of displaced homemakers served in one year: 128. This is a conservative estimate based on the number of women served since October 1979, when the program became funded as a Displaced Homemakers Program.

salary ranges for jobs displaced homemakers looking for work: $900/mo. This is the lowest salary a displaced homemaker could make and still support a family. Any salary above $900/mo. would be even better.

the types of jobs displaced homemakers are looking for are: clerical, bookkeeping, sales (not retail sales), child care, restaurant and food services, and some very limited requests for non-traditional types of employment. A great many displaced homemakers say they are looking for a job and will take anything.

Any incentive given to a businessperson to employ displaced homemakers will only help. These women are usually very low on marketable skills but are willing and able to learn new skills. They will make very stable employees if given a chance.

G. Summary of activities
Employability Skills Workshop: Held 25-30 Nov 79; 12-15 people in attendence at the 10 hour course. Topics covered were: skill identification; resume preparation; assertiveness training; interviewing techniques; and planning a job campaign.

Advisory Board meetings were held in November and January.

Outreach; contacted 35 agencies and members of the media to discuss the Displaced Homemakers Program; participated in 8 committees and attended various meetings as a representative of the Displaced Homemakers Program ; attended a conference in Seattle of the Region X Displaced Homemakers Program.

H. Plans for next quarter
Self confidence clinic; scheduled to begin 8 Jan 80. This clinic is designed to enable women to start improving their self-esteem and self-image. It is planned once a week for 90 minutes for 4 weeks and is facilitated by a staff member of the AWRC therapy program.

Bilingual-Multicultural Conference: the DPH program is assisting UAF in locating registration workders for the 3 day conference to be held 13-15 Feb 80 in Anchorage.

Employability Skills Workshop: future workshops will be held monthly covering basically the same material as discussed earlier.

I. Progress on Program Objectives:
The DPH program is solidifying present activities into ongoing, self-perpetuating activities. Plans for new activities to assist women in obtaining employment are constantly discussed and evaluated for feasibility.

J. Administrative change:
Sherry White, the VISTA volunteer who initially began the DPH program, took a position with the Division of Vocational Rehabilitation.

K. Training provided
Because of the current limitations of the program, no training was provided during the quarter. However, a funding source was discovered which, if received, would provide funds for establishing training provisions for our clients.

Counselor

RE: House Bill No. 936

I am in support of House Bill No. 936. During the teleconference on March 12, Cene Kingrea made a suggestion of changes needed in the bill. I would like to support these changes.

One area, which Gene Kingrea covered but I would like to reemphasize, is the importance of Transitional Adjustment Counseling. This should be number one, on page two, line eighteen. Adjustment Counseling is like making sure a building is on a firm foundation before one spends time and energy in remodeling the building. Without this firm foundation the rest of the support services will not bring the desired results.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

POUCH BC
JUNEAU, ALASKA 99811
PHONE: (907) 465-4890

COMMUNITY EMPLOYMENT & TRAINING ASSISTANCE DIVISION

March 12, 1980

The Honorable Thelma Buchholdt
House HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

The Department of Community and Regional Affairs supports H.B. 936 relating to displaced homemakers. We concur with the Commission on the Status of Women that attention should be focused on displaced homemakers. The creation of Multipurpose Service Centers as outlined in Sec. 47.90.020 of this bill is an excellent method to provide much-needed services.

We would also like to take this opportunity to note that the Multipurpose Service Center concept should be extended to include all groups of the population experiencing difficulties in finding employment. Such centers could be staffed by outstationed employees of various state and local agencies working in the field of social services. The primary purpose of the centers would be to provide comprehensive assessment, counseling, and referral services.

Last summer the CETA Division, through the Southeast Regional Resource Center, conducted three workshops involving 35 women, age 22 through 57, with an average age of 34, from Southeast Alaska in a displaced homemaker program. These workshops provided information and counseling for participants to be referred into training.

In Fairbanks a displaced homemaker program provided coordinated services. Last year the program operated with vocational educational funds from the CETA Governor's Grant, administered by the State CETA Division in the Department of Community and Regional Affairs and the Department of Education. Serving both men and women, it provided job counseling and vocational training to single parents and adults entering the labor market for the first time or after an extended absence. The displaced homemaker program is a sub-agency of the Adult Learning Programs of Alaska and works closely with an associated agency called the Regional Adult Learning Center which provides services such as employment counseling, General Educational Development (GED), English-as-a-second-language and one-to-one tutoring in any subject. Networking with other agencies and services has also helped the program tremendously.

Aside from the Department's involvement on a limited basis as mentioned through these two programs, our other concerns with the proposed legislation include the following:

(1) Page 4, line 6, Sec. 47.90.040: We feel mandatory coordination with other state agencies and the centers is necessary to avoid duplication and should be so outlined in the bill.

(2) Page 4, line 18, Sec. 47.90.060: It should be noted that CETA Public Services Employment funds are available on a competitive basis to state agencies to hire disadvantaged individuals. In addition, we have concerns as to how this section will work mechanically and what regulations would be adopted to carry out this section. Would the displaced homemakers have to be placed on a state register? We also feel this section could impact collective bargaining agreements. It is our opinion that this section should be considered within the broader context of State personnel policy.

(3) Page 5, line 8, Sec. 43.20.037: We feel this section should be considered in the broader context of tax relief and relate to legislation currently being considered in that regard. In addition, this matter is also addressed in the Governor's bill, Senate Bill 496, "An Act providing for Alaska Job Tax Credits; and providing for an effective date."

(4) Page 5, line 15, Sec. 4: Should be amended to provide funding to the Department in state fiscal year 1981 for program development.

Thank you for giving us the opportunity to comment on this bill.

Sincerely yours,

Marie Pignalberi

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

March 12, 1980

The Honorable Thelma Buchholdt
Cahirman
House Health, Education &
Social Services Committee
Room 112 - Capitol Building
Juneau, Alaska 99811

Dear Ms. Buchholdt:

Re: House Bill No. 936, an Act relating to displaced homemakers, was introduced in the House on March 6, 1980 and was referred to the House Health, Education and Social Services Committee.

For the consideration of the House Health, Education and Social Services Committee, I am enclosing copies of Fiscal Notes prepared by Gary Jenkins, Director, Audit Division and Barbara Sorensen, Research Section of the Department of Revenue concerning the proposed legislation.

Sincerely,

R. D. Stevenson
Special Assistant

FROM: Gary L. Jenkins
Director
Audit Division

SUBJECT: House Bill No. 936

Section 3 of this bill would provide for an income tax credit for up to 30 percent of the wages paid to an individual who qualified as a displaced homemaker. There are two issues which should be considered in analyzing this proposed legislation.

First of all, there is considerable pressure at the present time to either suspend or repeal the individual and corporate income taxes. If either of those actions were to take place, it would obviously make this proposal, in effect, null and void.

Secondly, there is a policy question with regard to how programs of this nature should be accounted for by permitting a major portion of the actual cost of the program to be buried as a tax credit, with the result that the total cost of the program is not subject to appropriation. It makes it difficult to easily analyze the benefits of a program as compared to its actual total cost.

In lieu of the tax credit provision, since the Department of Community and Regional Affairs will already be working directly with the various employers involved, it will be a relatively simple operation for them to refund the employer the 30 percent of the wages paid. This would also be very logical from an administration point of view because they are charged with the responsibility of ensuring that each employer meets the conditions set forth in the law and regulations prior to the reimbursement being paid. This concept would also permit the Legislature to clearly understand the total cost of this program when they appropriate the funds for it annually.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The bill would establish a displaced homemakers support program. Among other things, it proposes an income tax credit of 30 per cent of the first 12 months of compensation paid by an employer for each certified displaced homemaker.

The above estimate is based on information provided by the Alaska Commission on the Status of Women.

Bill No. House Bill 936

Date March 11, 1980

Title An Act relating to displaced homemakers; and providing for an effective date

Contact: Judy DuBois
465-2700

House Bill No. 936 "An Act relating to displaced homemakers; and providing for an effective date" is proposed to establish multipurpose service centers to provide services for Alaskan displaced homemakers.

Although the conceptual emphasis of the bill is supported, we have four primary concerns in relation to its implementation. First, the bill does not indicate the size or distribution of the population to be served and thus does not indicate sites as where the multipurpose centers will be established. A second concern is the tax credit provision for displaced homemakers. It appears that the displaced homemakers tax credit is a duplication of the proposed Alaska State Jobs Tax Credit program and may be a moot issue in view of the current tax legislation before the Alaska Legislature. A third concern is the current existence of federal funds available for displaced homemaker services. It appears that by consolidating existing displaced homemaker service programs and by utilizing present funding sources, expansion of services to additional geographical areas of the State of Alaska could be accomplished without the inclusion of State funds.

Lastly, the proposed legislation duplicates the current efforts of providing employment, counseling and necessary referral services for eligible displaced homemakers by Job Service and the Alaska Work Incentive program. It would appear that since Job Service and the Work Incentive program are currently operational, they should be utilized as the primary administrative and service provider vehicles for the proposed displaced homemaker legislation. This is especially pertinent when it is recognized that the population to be served by this legislation are or will be eligible for existing agency's services and that the proposed multipurpose centers will function as primarily a referring organization.

Departmental Position: Opposed in current status.

HB 936
Amendments proposed by Fred Ali, C&RA

Page 1:

Change Section 1 (b)(1) to read as follows (lines 28-29):
(1) provide the necessary counseling, training, employment placement and other services for displaced homemakers [;] through contracts with public or private nonprofit organizations and by utilizing and expanding existing state programs.

Page 2:

Change Section 2, 47.90.010(a) to read as follows (lines 8-12):
(a) The commissioner...may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers [.] and expand existing state programs through reimburseable service agreements.

Add to Section 2, 47.90.010 a new subsection (c):
(c) The commissioner shall establish a competive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Page 3:

Add to Section 2, 47.90.020(2), line 7 the word and
(and delete [and] from line 5)--- then add a new subsection (E) to this section to read as follows:
(E) expose displaced homemakers to nontraditional occupations.

Page 4:

At the end of Section 2, 47.90.030, add the following sentence:
Under the procurement process established under AS 47.90.010, the commissioner will give preference to applicants proposing to fill staff positions with displaced homemakers.

Delete Section 2, 47.90.060 and replace it with the following section:
Sec. 47.90.060. STATE EMPLOYMENT ASSISTANCE. Contrators operating programs under this chapter will, to the maximum extent possible, provide displaced homemakers with assistance in being placed on state meployment registers. This will be accomplished with the assistance and cooperation of the Division of Personnel and the Department of Community and Regional Affairs.

Page 4:

Delete Section 3, 43.20.037 in its entirety. (If the Committee decides to do this, it must delete the reference to this section on page 4, line 17.)

Delete Section 4 and include the following language instead:
All provisions of this Act will take effect July 1, 1981. During FY '81, the commissioner will consult with appropriate groups and state agencies concerned with displaced homemakers, adopt resolutions prescribing program standards, adopt a competitive procurement process, provide information and assistance to groups interested in conducting displaced homemaker programs, and fund one or more limited pilot projects.

Lu Anne -

Here are the comments on HB 936 -

I'll be back in town on Thursday and will be happy to meet with you and the committee to further discuss the bill -

Fred Mc.

465-4580

Call on Thursday.

SECTION 1

(b)(1) should read

provide the necessary counseling, training . . . for displaced homemakers[;] through contracts with public or private non-profit organizations and by utilizing and expanding existing State programs

→ to make DS mandate more specific

SECTION 2

47.90.010 (a) should read

may contract with public . . . for displaced homemakers[.] and expand existing State programs through reimburseable service agreements

→ to show that ones now in existence will get $ w/out being "multipurpose"

add (c)

The commissioner shall establish a competive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of the procurement process, it is intended that public or private non-profit organizations

and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

SECTION 2

47 90 020 (2) add (E)

and

(E) expose displaced homemakers to non-traditional occupations

→ omit traditional refer to women

SECTION 2

47.90.030 add the following

Under the procurement process established under AS 47.90.010, the Commissioner will give preference to applicants proposing to fill staff positions with displaced homemakers

SECTION 2

47.90.060 delete entire section

Add a Section, entitled State Employment Assistance, that reads as follows:

Contractor operations programs under this chapter will, to the maximum extent possible

provide displaced homemakers with assistance in being placed on State employment registers. This will be accomplished with the assistance and cooperation of the Division of Personnel and the Department of Community and Regional Affairs.

SECTION 3

43.20.037 delete entire section

support SB 436 instead.

SECTION 4 should read

All provisions of this Act will take effect July 1 1981. During State fiscal year 1981, the Commissioner will consult with appropriate groups and State agencies concerned with displaced homemakers, adopt regulations prescribing program standards, adopt a competitive procurement process, provide information and assistance to groups interested in conducting displaced homemaker programs, and fund one or more limited pilot projects.

2 yr in def:

definitely opening up to a larger category.

Proposed CS for HB 936 (Work completed by Committee thus far)

For an Act entitled: "An Act relating to displaced homemakers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1. LEGISLATIVE FINDING AND INTENT. (a) The legislature finds that there is an increasing number of persons in the state who, after having fulfilled the role of homemaker for a number of years of their life, find themselves "displaced" through the death of a spouse, divorce, separation, desertion, or loss of family income. The legislature finds that displaced homemakers are often without any source of income, face continuing discrimination in employment because they frequently have no recent work experience and may be older than other applicants for employment, are subject to high rates of unemployment and are ineligible for unemployment insurance because they have been engaged in unpaid labor in the home, may be ineligible for categorical welfare assistance, are ineligible for social security if they have been divorced from the family wage earner, may have lost their rights as beneficiaries under employers' pension and health plans through death of a spouse or divorce despite the contribution of years to the well-being of the family, and may be ineligible for Medicaid and unable to purchase private health insurance because of age and lack of income. The legislature further finds that homemakers are an unrecognized part of the work force of the state who have made an invaluable contribution to the welfare of society.

(b) It is the intent of the Act to

(1) provide the necessary counseling, aptitude testing, training, employment placement, and other services for displaced homemakers[;] through contracts with public or private nonprofit organizations and by utilizing expanding existing state programs

(2) improve the mental and physical health and welfare of this growing group of members of the community; and

(3) provide displaced homemakers with independence and economic security vital to a productive life.

Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 90. DISPLACED HOMEMAKERS.

Sec. 47.90.010. PROGRAM ESTABLISHED. (a) The commissioner, in consultation with state and local governmental agencies, community groups, and groups concerned with displaced homemakers, may contract with public or private nonprofit organizations for multipurpose service centers for displaced homemakers[.] and expand existing state programs through reimburseable service agreements.

(b) The commissioner shall adopt regulations prescribing the standards to

be met by each multipurpose service center for displaced homemakers in accordance with the policies established in this chapter.

(c) The commissioner shall establish a competitive contract procurement process that ensures free and open competition for funds allocated for programs established in this chapter. As part of this procurement process, it is intended that public or private nonprofit organizations and state agencies may propose to provide all or a portion of the services listed under AS 47.90.020.

Sec. 41.90.020. MULTIPURPOSE SERVICE CENTERS. A multipurpose service center for displaced homemakers established under AS 47.90.010 may provide the following services:

(1) job counseling services which shall

(A) be specifically designed for displaced homemakers;

(B) counsel displaced homemakers regarding job opportunities; and

(C) consider and build on the skills and experience of a homemaker and emphasize job readiness as well as skill development;

(2) job training and job placement services which shall

(A) emphasize short-term training programs which expand upon homemaking skills and volunteer experience and which lead to gainful employment;

(B) develop through cooperation with state and local government agencies and private employers training and placement programs for jobs in the public and private sector;

(C) assist displaced homemakers in gaining admission to existing public and private job-training programs and opportunities including vocational education, reentry into secondary and postsecondary educational facilities, and apprenticeship training programs; and

(D) assist in identifying community needs and creating new jobs, including nontraditional occupations for displaced homemakers, for displaced homemakers in the public and private sector;

(3) health counseling services including referral to existing health programs with respect to

(A) general principles of preventive health care;

(B) health care consumer education, particularly in the selection of physicians and health care services including health maintenance organizations and health insurance;

(C) mental health care and transitional counseling;

(D) family health care, dental care and nutrition;

(E) alcohol and drug abuse; and

(F) other related health care matters;

(4) financial management services which provide information and assistance relating to insurance, taxes, estate and probate matters,

mortgages, loans, and related financial matters;

(5) educational services including

(A) information, including the availability of monetary assistance programs, relating to courses offering credit through secondary or postsecondary education programs and reentry programs, including bilingual programs if appropriate; and

(B information about other programs [DETERMINED BY THE COMMISSIONER TO BE] of benefit to displaced homemakers;

(6) legal counseling and referral services; and

(7) information services with respect to federal and state employment, education, health, public assistance, and unemployment assistance programs which the commissioner determines to be of benefit

The Committee stopped its deliberations at this point (end of page 3 in original bill).

Bill No. House Bill 936

Date March 11, 1980

Title An Act relating to displaced homemakers; and providing for an effective date

Contact: Judy DuBois
465-2700

House Bill No. 936 "An Act relating to displaced homemakers; and providing for an effective date" is proposed to establish multipurpose service centers to provide services for Alaskan displaced homemakers.

Although the conceptual emphasis of the bill is supported, we have four primary concerns in relation to its implementation. First, the bill does not indicate the size or distribution of the population to be served and thus does not indicate sites as where the multipurpose centers will be established. A second concern is the tax credit provision for displaced homemakers. It appears that the displaced homemakers tax credit is a duplication of the proposed Alaska State Jobs Tax Credit program and may be a moot issue in view of the current tax legislation before the Alaska Legislature. A third concern is the current existence of federal funds available for displaced homemaker services. It appears that by consolidating existing displaced homemaker service programs and by utilizing present funding sources, expansion of services to additional geographical areas of the State of Alaska could be accomplished without the inclusion of State funds.

Lastly, the proposed legislation duplicates the current efforts of providing employment, counseling and necessary referral services for eligible displaced homemakers by Job Service and the Alaska Work Incentive program. It would appear that since Job Service and the Work Incentive program are currently operational, they should be utilized as the primary administrative and service provider vehicles for the proposed displaced homemaker legislation. This is especially pertinent when it is recognized that the population to be served by this legislation are or will be eligible for existing agency's services and that the proposed multipurpose centers will function as primarily a referring organization.

Departmental Position: Opposed in current status.

SUBJECT: Displaced homemakers.
(Work Order Number 7956)

TO: Representative Thelma Buchholdt, Chairman
House Health, Education and Social Services
Committee

FROM: Richard A. Bradley
Legislative Counsel

The bill requested by the committee is attached.

To a large extent it speaks for itself and best indicates what it includes.

However, certain observations may be useful.

Because the draft given to me embodied more of a concept than a vehicle for legislative drafting, I sought to find a law in another state that would be useful. I think it is clear that the derivation of the concept is law from the State of Washington. See, RCW 28B.04.010 - 28B.04.130.

I used the Washington law as the basis for this bill.

The appropriation suggested in the draft is not included. If the committee wishes, I will prepare a separate bill embodying whatever amount it wishes.

The concept of taxing marriage licenses probably would not generate adequate revenues to accomplish very much. In any case, it would result in a dedicated fund and as such would be unconstitutional. The concept is not included in the bill.

If I may assist further, please advise.

HOUSE BILL NO. 936

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to displaced homemakers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LEGISLATIVE FINDINGS AND INTENT. (a) The legislature finds that there is an increasing number of persons in the state who, after having fulfilled the role of homemaker for a number of years of their life, find themselves "displaced" through the death of a spouse, divorce, separation, desertion, or loss of family income. The legislature finds that displaced homemakers are often without any source of income, face continuing discrimination in employment because they frequently have no recent work experience and may be older than other applicants for employment, are subject to high rates of unemployment and are ineligible for unemployment insurance because they have been engaged in unpaid labor in the home, may be ineligible for categorical welfare assistance, are ineligible for social security if they have been divorced from the family wage earner, may have lost their rights as beneficiaries under employers' pension and health plans through death of a spouse or divorce despite the contribution of years to the well-being of the family, and may be ineligible for Medicaid and unable to purchase private health insurance because of age and lack of income. The legislature further finds that homemakers are an unrecognized part of the work force of the state who have made an invaluable contribution to the welfare of society.

(b) It is the intent of this Act to

(1) provide the necessary counseling, training, employment placement, and other services for displaced homemakers;

adopted Mental & Physical

(2) improve the health and welfare of this growing group of members of the community; and

(3) provide displaced homemakers with independence and economic security vital to a productive life.

* Sec. 2. AS 47 is amended by adding a new chapter to read:

CHAPTER 90. DISPLACED HOMEMAKERS.

Sec. 47.90.010. PROGRAM ESTABLISHED. (a) The commissioner, in consultation with state and local governmental agencies, community groups, and groups concerned with displaced homemakers, may contract with public or private nonprofit organizations for multipurpose service centers for dis laced homemakers.

(b) The commissioner shall adopt regulations prescribing the standards to be met by each multipurpose service center for displaced homemakers in accordance with the policies established in this chapter.

Sec. 47.90.020. MULTIPURPOSE SERVICE CENTERS. A multipurpose service center for displaced homemakers established under AS 47.90.010 shall [may] provide the following services:

(1) job counseling services which shall

(A) be specifically designed for displaced homemakers;

(B) counsel displaced homemakers regarding job opportunities; and

new (C) consider and build on the skills and experience of a homemaker and emphasize job readiness as well as skill development;

(2) job training and job placement services which shall

(A) emphasize short-term training programs which expand upon homemaking skills acquired on homemaking and volunteer experience and which lead to gainful employment;

(B) develop through cooperation with state and local government agencies and private employers training and placement

programs for jobs in the public and private sector;

(C) assist displaced homemakers in gaining admission to existing public and private job-training programs and opportunities including vocational education, re-entry into secondary & post secondary and apprenticeship training programs; and re-entry refresher courses;

(D) assist in identifying community needs and creating new jobs for displaced homemakers in the public and private sector;

(E) Reconciling of community needs re jobs

(3) health counseling services including referral to existing health programs with respect to (C) mental health care

(A) general principles of preventive health care;

(B) health care consumer education, particularly in the selection of physicians and health care services including health maintenance organizations and health insurance,

(C) family health care, mental health & dental care and nutrition;

(D) alcohol and drug abuse; and

(E) other related health care matters;

(4) financial management services which provide information and assistance relating to insurance, taxes, estate and probate matters, mortgages, loans, and related financial matters;

(5) educational services including

~~information~~ incl. avail of mont tax assist prg.

(A) information relating to courses offering credit through secondary or postsecondary education programs and reentry programs, including bilingual programs if appropriate; and

(B) information about other programs [determined by the commissioner to be] of benefit to displaced homemakers;

(6) legal counseling and referral services; and

(7) information services with respect to federal and state employment, education, health, public assistance, and unemployment assistance programs which the commissioner determines to be of benefit

to displaced homemakers.

Sec. 47.90.030. EMPLOYMENT OF DISPLACED HOMEMAKERS. The staff positions of multipurpose centers established under AS 47.90.010, including supervisory, technical and administrative positions, shall to the maximum extent possible be filled by displaced homemakers.

Sec. 47.90.040. CONSULTATION AND COORDINATION. The commissioner shall consult and cooperate with the Department of Health and Social Services; the Department of Education, including the division of vocational rehabilitation; the University of Alaska, community colleges and other colleges as appropriate; the Department of Labor, including the division of employment security; and other persons or agencies which the commissioner considers appropriate in the implementation of this chapter.

Sec. 47.90.050. CERTIFICATION OF DISPLACED HOMEMAKERS. The commissioner shall adopt regulations under which the commissioner may certify individuals as displaced homemakers for the purposes of AS 47.90.060 [and AS 43.20.037].

Sec. 47.90.060. ASSISTANCE TO AGENCIES. The commissioner may grant to a state agency a reimbursement not to exceed 30 percent of the first 12 months of the compensation paid to a displaced homemaker whom the agency employs and trains if the agency assists the displaced homemaker in obtaining permanent employment.

Sec. 47.90.070. REGULATIONS. The commissioner may adopt regulations to implement this chapter.

Sec. 47.90.080. DEFINITIONS. In this chapter

(1) "agency" means a department or agency of the state or a municipality of the state;

(2) "commissioner" means the commissioner of community and regional affairs;

d has

(3) "displaced homemaker" means a person who

(A) has worked [without compensation] as a homemaker for at least [six years;] 2 yrs. discriminatory

(B) has been dependent on the income of a family member [and has lost that income;] and

(C) has encountered difficulty in finding employment.

* Sec. 3. AS 43.20 is amended by adding a new section to read:

Sec. 43.20.037. DISPLACED HOMEMAKER CREDITS. For purposes of calculating the income tax payable under this chapter, the taxpayer may apply as a credit against his tax liability 30 percent of the first 12 months of compensation paid each person certified by the commissioner of community and regional affairs to be a displaced homemaker and employed and trained by the taxpayer under regulations of the commissioner of community and regional affairs.

* Sec. 4. This Act takes effect July 1, 1980.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 936

"An Act relating to displaced homemakers; and providing for an effective date."

This Bill would establish a program for displaced homemakers to be administered by the Department of Community and Regional Affairs. The Bill also authorizes the development of multipurpose service centers for displaced homemakers to provide job counseling, training and placement; health counseling; financial management; education; legal counseling and referral; and information services.

There has been growing concern for displaced homemakers, persons who must change their roles from that of homemaker to that of wage earner as a result of a change in circumstances such as divorce, separation, or death of a spouse. Among this group of individuals would also be those persons who have been on a fixed income which now due to inflation must be supplemented by a job for which they are not prepared. Otherwise they may be forced on to the welfare roles.

The Department recognizes the need for programs for displaced homemakers to assist them through their role transition. The Department does currently provide services aimed at this population. Those displaced homemakers residing in the Anchorage and Juneau areas who are eligible for Aid to Families with Dependent Children (AFDC) may receive a wide variety of employment oriented social services through the Work Incentive (WIN) program. In addition, in the FY 80 capital budget, the legislature appropriated $100,000 to the Alaska Women's Resource Center in Anchorage for a counseling program and a displaced homemaker program. The contract for this program has been administered by the Department of Health and Social Services. During the first two quarters of FY 80 the program reported 396 client contacts, ranging in age from early 20's to mid 60's.

The directors of the shelters for battered women have noted a great need for job training for women served by their programs. Women who have been forced out of their homes due to violence towards them may face a need for immediate employment in order to support themselves and their children. The majority of these women either have not worked for years or have never worked and are competing in an ever tightening job market.

At the present time there is no central source to coordinate services for displaced homemakers, although Division of Social Services workers do provide information and referral and counseling. There is a definite need to have a centralized information and referral system as well as a need to coordinate services which are already available.

POSITION PAPER/Department of Health & Social Services

On the surface it appears that there may be some possible overlap between the services to be provided by the multipurpose service centers and those currently provided by various existing programs. In the Department's view, however, any seeming potential for duplication and overlap, would be reduced by coordinating existing state operated and funded programs as well as community resources.

Should this enhanced program for displaced homemakers be established by statute the Department of Health and Social Services will coordinate with the Department of Community and Regional Affairs to avoid duplication and will provide any technical assistance requested to ensure the development of a quality program.

JUNEAU ALASKA/Department of Health and Social Servi

POSITION PAPER

HOUSE BILL 956

"An Act making a special appropriation to the Department of Health and Social Services for a mental health transitional facility in Anchorage; and providing for an effective date."

Federal law defines a transitional facility as:

"A program of transitional half-way house services for mentally ill individuals who are residents of its catchment area and who have been discharged from a mental health facility or would without such services require inpatient care in such a facility." Presently, this sector in the continuum of care for the mentally ill adult and adolescent in Alaska is deficient.

The State Plan and Governor's Mental Health Advisory Council all include such a program as high priority. The Department of Health and Social Services recognizes the need for a transitional facility in Anchorage. The chronic mentally ill require both housing and daily supervision to adjust to their return to the community. The present facilities in Anchorage do not provide either the appropriate environment or adequate daily programming. There is also a need for a transitional facility for emotionally disturbed adolescents.

We have a technical suggestion in terms of form. Since capital expenditures cannot be funded under the auspices of Alaska Statute 47.30.520-620, the Community Mental Health Services Act, any capital portion of the $450,000 should be funded under Alaska Statute 18.25.010 and be appropriated to Department of Health and Social Services, Division of State Health Planning and Development. Any program portion of the $450,000 should be funded under the Alaska Statute 47.30.520-620 and appropriated to Department of Health and Social Services, Division of Mental Health and Developmental Disabilities.

There is a statewide need for transitional facilities for the chronically mentally ill and emotionally disturbed adolescents. The Anchorage area provides an excellent pilot arena for a model program due to the presence of the Alaska Psychiatric Institute and the Anchorage Community Mental Health Clinic..

HOUSE BILL NO. S HB 956

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Department of Health and Social Services for a mental health transitional facility in Anchorage; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $450,000 is appropriated from the general fund to the Department of Health and Social Services, division of mental health and developmental disabilities, for a mental health transitional facility in Anchorage.

* Sec. 2. The unexpended and unobligated portion of the appropriation made by this Act lapses into the general fund June 30, 1981.

* Sec. 3. This Act takes effect July 1, 1980.

TRANSITIONAL LIVING - A STEP TOWARD INDEPENDENCE

Just as a person's treatment plan must be individualized and based on his/her particular needs, so must a plan for living and housing be individualized. The planning and development of discharge goals should be obtainable, appropriate and started already at the time of admission. Individual needs and wishes provide the basis for planning and development of main discharge goals. One factor that has often been overlooked in treatment planning and for maximizing a client's chances for success in any kind of a rehabilitation program, is an assessment of the quality of the client's residential situation. Two major factors must be considered: (a) The client's current family situation, and (b) The extent to which the residential setting is conducive to rehabilitation. An inadequate and destructive family setting, such as involving excessive dependence on family members, or substandard boarding homes or apartment settings are seen as posing the greatest threat to any successful outcomes. If it is determined that at least for a temporary period a client would make more progress away from a family, or in a separate setting, or as an alternative to hospitalization, a community mental health center should be prepared to offer some alternatives.

Basically, staff should be aware of the possibility that the client may have special needs within the community, including: (1) A residential setting which provides appropriate support and offers the least restrictive environment; (2) A mutually caring relationship with one or more persons; (3) Opportunity for social and recreational activities; (4) Assistance to and education of family and significant others in relation to difficulties they may experience as a result of the client's return to his/her home; (5) Vocational guidance training and assistance in securing and holding a job; (6) Provision for useful daily activities for those who are incapable of holding a regular job; (7) Assistance in taking advantage of services as citizens of their respective communities, e.g., S.S.I. payments, food stamps, housing benefits, etc.; (8) A place to go to or person to call for help in dealing with problems with stress; (9) Medical and psychiatric treatment as necessary, including review and assessment of drug therapy; (10) A coordinator or a therapist to provide linkage between the various service delivery systems and the client to assure the client has access to all the needed services.

This link in services from hospital to community, or as an alternative to hospitalization, is missing in many communities. One of the more recent concepts is the development of a transitional living facility which is designed to fill the gap between the institution and the community, or in providing therapeutic services which do not require hospitalization. This facility is designed as short-term, highly therapeutic, with a basic goal of rehabilitating the client in as little time as possible to resume or begin "normal" community living.

This document is a proposal for the development of a transitional home facility for the Anchorage catchment area. The home will be directed toward people who are experiencing a situational crisis, as well as requiring services which are now offered by the Mental Health Center. The funding required for such a program will involve monies allocated for capital outlay for the purchase, construction or lease of a facility adequate for a maximum of twelve individuals who qualify for this program, as well as money to fund the program, to support operating costs, and staff required to operate a quality program.

All of this would be based on a premise that many of the people who are experiencing the types of situational crises which warrant admission to this program, would be without adequate financial resources to fully pay for these services. As such, we are estimating that the operating cost will require a substantial amount of public money as a means of alleviating admission to a psychiatric hospital, or other residential care facility.

Staff has been asked to provide an overview and to research the needs for transitional housing in Anchorage for citizens who require additional situational support. The professional literature reviewed to date points to the following areas of consideration: (1) There is a serious shortage of facilities nationally to deal with the need for housing coupled with a program to improve coping abilities. (2) Federal and State laws mandate care for this population, but a gap in the system is residential living with supervision present to assist in individuals being discharged from a hospital without adequate situational support, and preventing hospitalization when needs can be addressed in the community with adequate resources. (3) Linking people, programs, and organizations is crucial for effective treatment and is consistent with the continuity of care concept which underlies the NIMH commitment to community support. (4) Need for meaningful evaluation criteria to assure quality community service. (5) Need for a coordinating body with clear lines of communication and minimal administrative detail. (6) Need for exclusion of individuals with active primary problems of substance abuse. (7) Needs assessment conducted by the Municipal Health Commission, by the University of Alaska, and by the Department of Health and Social Services indicate that there is a serious gap in this type of living facility to serve the Anchorage catchment area.

Adequate housing for the emotionally unstable is a national problem dating back for generations. The advent of psychotropic drugs in the 1950's and the process for deinstituionalization and acceleration of the community psychiatry movement in the 1960's appear to be major factors affecting the declining acceptance of state mental hospitals as a means for dealing with consumers' lack of support systems in the community. Many of the needs of the acute and chronic "mental patient" are absorbed by the core of the community--family, friends, schools, clergy, community services, professional boarding homes, foster care, independently operated

hotels, apartments and the hospitals. This core has varying levels of commitment, skill, and understanding to assist the individuals with transitional coping needs. Even on the professional end of the spectrum, there is a limited milieu for observation of structured living and monitored progress outside of the hospital. Consequently, the hospital, primarily A.P.I., is inundated with people needing situational support, not necessarily inpatient psychiatric care.

The following is a perception of factors affecting the potential resident population we are addressing: Dysfunctional precursors such as distorted perception of events; inadequate situational and emotional support; inadequate coping abilities and symptoms of mental illness lead to a stressed, potential resident. This potential resident then exhibits such things as dysfunctional attempts at stabilization, loss of motivation, crisis to crisis lifestyle, substance abuse, legal encounters, marginal existent transient lifestyle, agency bouncing, community bouncing, exhaustion of community resources, stressed family, friends and community, and in general, needs not being met. This inability to cope with and relate to the community leads to request for hospitalization and regression to institutionalization.

Stress is an inherent factor of life. The population that is being spoken of does not exhibit the wherewithall of adequate stress management. The theoretical causes or enhancers of this inability to cope are numerous and will not be explored here. Rather, we will look at the interventions and education which can be utilized to assist people with coping needs. The need for, and at times the number of, support systems that this population utilizes to compensate for this inability to cope, is at times a stress source in and of itself defining an imperative need for coordination. The individual's ability to coordinate and to cope with living at the highest potential is the goal. A transitional residence program would provide a base where staff with adequate theoretical knowledge and experience could assist a resident in assessing what coping skills they are lacking to achieve and maintain maximum functioning in the community.

At present there are few statistics available to document the need for this facility in Anchorage. In consultation with planning agencies, and in a review of the various documents and assessments that have variously been done, the need seems evident. The consensus of professionals in the area is that such a facility is desperately needed.

The residential transitional home that we are addressing here is thought to be a short-term facility. Short-term is defined as a maximum single stay of up to a 90-day period of time. This seems like a reasonable period in which an assessement of the individual needs and linkages in the community could be achieved. In some cases, an additional 90-day stay could be recommended. The acceptance criteria for such a facility would be as follows: (1) Age 19 or over. (2) Primary problem of

emotional instability and not other related issues. (3) Inadequate or no support system. (4) Inability to cope with stressful events. (5) Needing coordination of services. (6) Capable of functioning without constant direct supervision. (7) Accepting of and willing to participate in the contract agreed upon with screening person and staff as well as residents. (8) Not imminently dangerous to self or others. (9) Engaged in a therapeutic relationship or willing and able to engage in such. (10) As an alternative to 24-hour inpatient hospital care.

During the resident's stay, growth will be facilitated by: (1) Community meetings, peer supported feedback, decision-making and problem-solving. Here plans for residence managing will occur, including disciplinary actions, allocation of chores for housekeeping, maintaining, purchasing, group therapy, etc. (2) The therapeutic community environment milieu will focus on interaction between members, not intrapsychic content of individual. (3) Group therapy, emotional interdependence, nature of living situation, and review of individual's plan, action, support and confrontation. (4) Individual or conjoint sessions with significant others as necessary. Program framework would undoubtedly have included a preventative approach to self-care, educational resources, community classes, stress management, recreation and physical fitness, nutrition--whatever else is possible or necessary. Complete details of the program will be addressed in the policy and procedures manual.

This facility would receive residents from numerous community areas. The channels that would be utilized to determine acceptance would be as follows: (1) Potential residents would demonstrate need for situational support and express a desire to explore the options and initiate change. (2) Referee consults with staff as part of pre-discharge planning, identifies status as medically and psychiatrically cleared for discharge without adequate situation support; (3) Potential resident is then interviewed by the staff; (4) Following the interview and screening, if the facility is suitable for the potential resident's needs, expectations and responsibilities of potential resident and the facility will be discussed, and if agreed upon, a treatment plan will be initiated.

Linkages within the community for a resident of this facility is imperative. Therefore, due to the nature of the environment of this facility and the individual housed therein, the communication between the facility, the resident and the following community resources must be open, collaborative and responsive: (1) Community consumers; (2) Division of Vocational Rehabilitation; (3) A.P.I., Community Hospital, Community Services; (4) Adult Basic Education; (5) Work and recreational resources; (6) Social Security, Alaska State Housing Authority, Food Stamps, and other supportive services; (7) Police and legal department systems; (8) Substance abuse programs; (9) Emergency services; (10) Community professionals.

In looking at quality assurance for such a facility, it appears that formal evaluation criteria is one of the major areas lacking in documentation of published literature. Due consideration in this area will need to be given. At present, it seems reasonable to measure the following areas:

(1) The resident

(a) Initial resident's assessment of needs and goals

(b) Monthly formal monitoring evaluation

(c) Termination evaluation with report regarding status of goal attainment. Appropriateness of services, follow-up availability.

(2) Staff

(a) Regular supervision and evaluation program

(b) Six-month review of overall operation of program

(c) Yearly evaluation with input from referral sources; follow-up on prior residents and staff recommendations

(d) Two-year evaluation of needs for program changes, funding, referral criteria and other major overall program changes.

It appears that a transitional facility of this nature would be far less expensive than a hospital stay, and a much more favorable and healthier choice for the individual in terms of residing in the community. Hopefully, in the future some arrangements in terms of assisting residents in moving toward semi-independent or apartment living would be the next feasible step for those on the higher end of dysfunctioning continuum. Utilizing data from the ongoing assessment of the resident while in the facility, appropriate referrals to family, friends, boarding home, etc., within the community could be made with the clear understanding of the individual's needs and growth potential.

The emphasis should be on incorporating the facility into an already existing neighborhood. This facility would involve the necessity of meeting the existing codes required by the Municipality of Anchorage, as well as the State of Alaska, in addition to any Federal NIMH or JCHA standards which are warranted. The facility itself would be adequate in terms of square footage to meet zoning requirements per individual, as well as adequate fire, health and other code and zoning requirements. We visualize this facility as housing a maximum of twelve clients with a hoped for average of about eight. This would involve sleeping and cooking facilities adequate to cover the maximum number of clients in the program, as well as leisure and recreation areas such as a TV and recreational room.

Other budgetary items necessary would be to support the program involving money for equipment and supplies of an ongoing nature. This would include funds for capital improvement and upkeep; funds for acquisition; funds for fixed costs such as electricity, gas, telephone and salaries of staff and purchase of equipment which would be necessary for the proper operation of the program. A vehicle should be provided which can be used by the staff to provide transportation for clients, either on a full or part time basis, or in a shared arrangement with another part of the program.

Staffing pattern would include: (a) One full time resident manager who would be required to be on the premises 24 hours a day, five days a week; (b) A part-time cook who would also serve as dietician in arranging for and supervising preparation of at least two meals per day; (c) A part-time or backup manager who will work on weekends and serve as backup to the resident manager; (d) A professional staff person who would do most of the screening, provide the group therapy; provide the liaison with a variety of community agencies; maintain the records; and provide the follow-up.

In 1955, well over half a million people resided in state and county hospitals. The latest data shows that this population has now been reduced by more than half or about 200,000 people. This decrease has been accompanied by a rise to over a million people who now reside in a community nursing homes which have grown in number and now house a large proportion of these former patients. There are many residents currently in nursing homes, however, who are not in need of this type of expensive care, yet inadequate boarding homes or slum hotels offer no solution either. In reviewing the literature concerning those best equipped to initiate a transitional living program, there seems to be general agreement that this type of living should be an extension of the community mental health service.

Research also seems to point to a special need and special attention must be given to the type of community which is to be home to the residents of this facility. This is particularly true in regard to community mores and sociocultural variables.

residents of this home should not be an instrument of social reform, but rather should be a part of an existing community which is most nearly representative of the clients who will be living in the facility.

A second factor that becomes increasingly apparent is that this facility must not be seen as simply a convenient place to house a patient when the emergency or chronic wards are overcrowded in the institution. We will use special care that this facility not become a dumping ground for all those who have no other place.

The third major pitfall to avoid is in reference once again to the host agency. Several instances have shown that the likelihood of success is considerably less where private agencies try to develop programs by themselves without entire community support. Of vital necessity is the support of other service providers. If agencies operate in an isolated fashion, very likely there will be a narrow concentration of similar clients when a mix of clients is much more desirable.

In conclusion, it must become apparent to all that a major value underlying all programs is that those who are suffering from mental disabilities have the same right as anyone else to live in a type of environment which affords a quality of life conducive to self-realization and growth. Since a transitional facility offers relative anonymity to the residents and presents less cause for community fears, they have many advantages not often realized by other residential modalities such as boarding homes. Chief among such advantages is the avoidance of stigma-prone situations brought about in conspicuous community living arrangements, such as large residential care facilities or large hotels. The whole concept of normalization seems to become increasingly apparent in this endeavor.

TRANSITIONAL LIVING FACILITY

PROPOSED BUDGET

Facility Acquisition	$300,000	
Equipment and furniture	40,000	
Transportation	10,000	
Food and consumable supplies	21,000	
Utilities	2,000	
Insurance	2,000	
		$375,000
Staff:		
Resident manager - Salary and fringes	$ 20,000	
Asst. and backup manager - sal. & fringes	12,000	
Cook and aide	12,000	
Professional staff - screening, therapy, etc.	29,000

United States Code Annotated Title 42

SUBCHAPTER XVI—SUPPLEMENTAL SECURITY INCOME FOR AGED, BLIND, AND DISABLED

Library References

Social Security and Public Welfare ⇐241.

C.J.S. Social Security and Public Welfare § 73.

§ 1381. Statement of purpose; authorization of appropriations

For the purpose of establishing a national program to provide supplemental security income to individuals who have attained age 65 or are blind or disabled, there are authorized to be appropriated sums sufficient to carry out this subchapter.

Aug. 14, 1935, c. 531, Title XVI, § 1601, as added Oct. 30, 1972, Pub. L. 92-603, Title III, § 301, 86 Stat. 1465.

Historical Note

Codification. A prior section 1381, Act Aug. 14, 1935, c. 531, Title XVI, § 1601, as added July 25, 1962, Pub.L. 87-543, Title I, § 141(a), 76 Stat. 197, authorized appropriations for grants to states for aid to the aged, blind, or disabled, and for medical assistance for the aged. See section 801 of this title.

Effective Date. Section 301 of Pub.L. 92-603 provided in part that this section is to take effect Jan. 1, 1974.

Continuation of Federal Financial Participation in Experimental, Pilot, or Demonstration Projects Approved Before Jan. 1, 1973, for Period On-And-After Dec. 31, 1973, Without Denial or Reduction on Account Of Subchapter XVI Provisions; Waiver of Subchapter XVI Restrictions for Individuals; Federal Payments of Non-Federal Share as Supplementary Payments. Subchapter provisions with respect to effect on Federal Financial Participation in Experimental, Pilot, or Demonstration Projects approved before Oct. 1, 1972, for period On-And-After Dec. 31, 1973, see section 11 of Pub.L. 93-233, Dec. 31, 1973, 87 Stat. 958, set out as a note under section 1315 of this title.

Payments Under Chapter Provisions in Effect Before Jan. 1, 197 for: Activities Carried Out Through Dec. 31, 1973, under State Plans Approved Under Subchapter I, X, XIV, or XVI Provisions; and for Administrative Activities After Jan. 1, 1974, Closing Out Such Activities. Pub. L. 93-233, § 19(b), Dec. 31, 1973, 87 Stat. 974, provided that: "Notwithstanding the provisions of section 301 of the Social Security Amendments of 1972 [enacting this subchapter], the Secretary of Health, Education, and Welfare shall make payments to the 50 States and the District of Columbia after December 31, 1973, in accordance with the provisions of the Social Security Act [this chapter] as in effect prior to January 1, 1974, for (1) activities carried out through the close of December 31, 1973, under State plans approved under title [subchapter] I, X, XIV, or XVI, of such Act [this chapter], and (2) administrative activities carried out after December 31, 1973, which such Secretary determines are necessary to bring to a close activities carried out under such State plans."

Puerto Rico, Guam, and Virgin Islands. Enactment of provisions of Pub. L. 92-603, eff. Jan. 1, 1974, not applicable to Puerto Rico, Guam, and the Virgin Islands, see section 303(b) of Pub.L. 92-603, set out as a note under section 301 of this title.

Legislative History. For legislative history and purpose of Pub.L. 92-603, see 1972 U.S.Code Cong. and Adm.News, p. 4980.

Notes of Decisions

1. State or local regulation or control

No language in either the federal or state Supplemental Security Income related legislation requires or indeed suggests a total preemption of state and local responsibility by the federal government. Fuller v. Nassau County Dept. of Social Services, N.Y.Sup.1974, 352 N.Y.S.2d 978.

Although provision was made in 1973 state legislation for the Supplemental Security Income takeover of the current needs of aged, blind and disabled New Yorkers previously met by state disbursement, the basic duty of care, as imposed by McKinney's N.Y. Constitution and McKinney's N.Y. Social Services Law, remained in the state and local agencies; in specific terms, there still remained state responsibility for special need grants, social services, and medical assistance to the aged, blind and disabled; that is, the federal responsibility was primary but not exclusive. Id.

§ 1381a. Basic entitlement to benefits

Every aged, blind, or disabled individual who is determined under part A to be eligible on the basis of his income and resources shall, in accordance with and subject to the provisions of this subchapter, be paid benefits by the Secretary of Health, Education, and Welfare.

Aug. 14, 1935, c. 531, Title XVI, § 1602, as added Oct. 30, 1972, Pub. L. 92–603, Title III, § 301, 86 Stat. 1465.

Historical Note

Codification. A prior section 1602 of Act Aug. 14, 1935, c. 531, Title XVI, as added July 25, 1962, Pub.L. 87-543, Title I, § 141(a), 76 Stat. 198, and amended Oct. 13, 1964, Pub.L. 88-650, § 5(b), 78 Stat. 1078; July 30, 1965, Pub.L. 89-97, Title II, § 221(d) (3), Title IV, § 403(e), 79 Stat. 358, 418; Jan. 2, 1968, Pub.L. 90-248, Title II, §§ 210(a) (5), 213(a) (4), 241 (d), 81 Stat. 890, 898, 917, formerly classified to section 1382 of this title, set forth the required contents of state plans for aid to the aged, blind, or disabled, and for medical assistance for the aged. See section 802 of this title.

Effective Date. Section 301 of Pub.L. 92-603 provided in part that this section is to take effect Jan. 1, 1974.

Puerto Rico, Guam, and Virgin Islands. Enactment of provisions of Pub. L. 92-603, eff. Jan. 1, 1974, not applicable to Puerto Rico, Guam, and the Virgin Islands, see section 303(b) of Pub.L. 92-603, set out as a note under section 301 of this title.

PART A—DETERMINATION OF BENEFITS

§ 1382. Eligibility for benefits—Definition of eligible individual

(a)(1) Each aged, blind, or disabled individual who does not have an eligible spouse and—

(A) whose income, other than income excluded pursuant to section 1382a(b) of this title, is at a rate of not more than $1,752 (or, if greater, the amount determined under section 1382f of this title) for the calendar year 1974, or any calendar year thereafter, and

(B) whose resources, other than resources excluded pursuant to section 1382b(a) of the title, are not more than (i) in case such individual has a spouse with whom he is living, $2,250, or (ii) in case such individual has no spouse with whom he is living, $1,500,

shall be an eligible individual for purposes of this subchapter.

(2) Each aged, blind, or disabled individual who has an eligible spouse and—

(A) whose income (together with the income of such spouse), other than income excluded pursuant to section 1382a(b) of this title, is at a rate of not more than $2,628 (or, if greater, the amount determined under section 1382f of this title) for the calendar year 1974, or any calendar year thereafter, and

(B) whose resources (together with the resources of such spouse), other than resources excluded pursuant to section 1382b(a) of this title, are not more than $2,250,

shall be an eligible individual for purposes of this subchapter.

Amount of benefits

(b)(1) The benefit under this subchapter for an individual who does not have an eligible spouse shall be payable at the rate of $1,752 (or, if greater, the amount determined under section 1382f of this title) for the calendar year 1974 and any calendar year thereafter, reduced by the amount of income, not excluded pursuant to section 1382a(b) of this title, of such individual.

(2) The benefit under this subchapter for an individual who has an eligible spouse shall be payable at the rate of $2,628 (or, if greater, the amount determined under section 1382f of this title) for the calendar year 1974 and any calendar year thereafter, reduced by the amount of income, not excluded pursuant to section 1382a(b) of this title, of such individual and spouse.

Period for determination of benefits; redetermination of eligibility and amount of benefits; effective date of application

(c)(1) An individual's eligibility for benefits under this subchapter and the amount of such benefits shall be determined for each quarter of a calendar year except that, if the initial application for benefits is filed in the second or third month of a calendar quarter, such determinations shall be made for each month in such quarter. Eligibility for and the amount of such benefits for any quarter shall be redetermined at such time or times as may be provided by the Secretary

(2) For purposes of this subsection an application shall be considered to be effective as of the first day of the month in which it was actually filed.

Limitation on amount of gross income earned; definition of gross income

(d) The Secretary may prescribe the circumstances under which, consistently with the purposes of this subchapter, the gross income from a trade or business (including farming) will be considered sufficiently large to make an individual ineligible for benefits under this subchapter. For purposes of this subsection, the term "gross income" has the same meaning as when used in chapter 1 of the Internal Revenue Code of 1954.

Limitation on eligibility of certain individuals

(e)(1)(A) Except as provided in subparagraph (B), no person shall be an eligible individual or eligible spouse for purposes of this subchapter with respect to any month if throughout such month he is an inmate of a public institution.

(B) In any case where an eligible individual or his eligible spouse (if any) is, throughout any month, in a hospital, extended care facility, nursing home, or intermediate care facility receiving payments (with respect to such individual or spouse) under a State plan approved under subchapter XIX of this chapter, the benefit under this subchapter for such individual for such month shall be payable—

(i) at a rate not in excess of $300 per year (reduced by the amount of any income not excluded pursuant to section 1382a(b) of this title) in the case of an individual who does not have an eligible spouse;

(ii) at a rate not in excess of the sum of the applicable rate specified in subsection (b)(1) of this section and the rate of $300 per year (reduced by the amount of any income not excluded pursuant to section 1382a(b) of this title) in the case of an individual who has an eligible spouse, if only one of them is in such a hospital, home, or facility throughout such month; and

(2) No person shall be an eligible individual or eligible spouse for purposes of this subchapter if, after notice to such person by the Secretary that it is likely that such person is eligible for any payments of the type enumerated in section 1382a(a)(2)(B) of this title, such person fails within 30 days to take all appropriate steps to apply for and (if eligible) obtain any such payments.

(3)(A) No person who is an aged, blind, or disabled individual solely by reason of disability (as determined under section 1382c(a)(3) of this title) shall be an eligible individual or eligible spouse for purposes of this subchapter with respect to any month if such individual is medically determined to be a drug addict or an alcoholic unless such individual is undergoing any treatment that may be appropriate for his condition as a drug addict or alcoholic (as the case may be) at an institution or facility approved for purposes of this paragraph by the Secretary (so long as such treatment is available) and demonstrates that he is complying with the terms, conditions, and requirements of such treatment and with requirements imposed by the Secretary under subparagraph (B).

(B) The Secretary shall provide for the monitoring and testing of all individuals who are receiving benefits under this subchapter and who as a condition of such benefits are required to be undergoing treatment and complying with the terms, conditions, and requirements thereof as described in subparagraph (A), in order to assure such compliance and to determine the extent to which the imposition of such requirement is contributing to the achievement of the purposes of this subchapter. The Secretary shall annually submit to the Congress a full and complete report on his activities under this paragraph.

Individuals outside United States; determination of status

(f) Notwithstanding any other provision of this subchapter, no individual shall be considered an eligible individual for purposes of this subchapter for any month during all of which such individual is outside the United States (and no person shall be considered the eligible spouse of an individual for purposes of this subchapter with respect to any month during all of which such person is outside the United States). For purposes of the preceding sentence, after an individual has been outside the United States for any period of 30 consecutive days, he shall be treated as remaining outside the United States until he has been in the United States for a period of 30 consecutive days.

Individuals deemed to meet resources test

(g) In the case of any individual or any individual and his spouse (as the case may be) who—

(1) received aid or assistance for December 1973 under a plan of a State approved under subchapter I, X, XIV, or XVI of this chapter,

(2) has, since December 31, 1973, continuously resided in the State under the plan of which he or they received such aid or assistance for December 1973, and

(3) has, since December 31, 1973, continuously been (except for periods not in excess of six consecutive months) an eligible individual or an eligible spouse with respect to whom supplemental security income benefits are payable,

the resources of such individual or such individual and his spouse (as the case may be) shall be deemed not to exceed the amount specified in subsections (a)(1)(B) and (a)(2)(B) of this section during any period that the resources of such individual or individuals and his spouse (as the case may be) does not exceed the maximum amount of resources specified in the State plan, as in effect for October 1972, under which he or they received such aid or assistance for December 1973.

Individuals deemed to meet income test

(h) In determining eligibility for, and the amount of, benefits payable under this section in the case of any individual or any individual and his spouse (as the case may be) who—

(1) received aid or assistance for December 1973 under a plan of a State approved under subchapter X or XVI of this chapter,

(2) is blind under the definition of that term in the plan, as in effect for October 1972, under which he or they received such aid or assistance for December 1973,

(3) has, since December 31, 1973, continuously resided in the State under the plan of which he or they received such aid or assistance for December 1973, and

(4) has, since December 31, 1973, continuously been (except for periods not in excess of six consecutive months) an eligible individual or an eligible spouse with respect to whom supplemental security income benefits are payable,

there shall be disregarded an amount equal to the greater of (A) the maximum amount of any earned or unearned income which could have been disregarded under the State plan, as in effect for October 1972, under which he or they received such aid or assistance for December 1973, and (B) the amount which would be re-

quired to be disregarded

Historical Note

Codification. A prior section 1382, Act Aug. 14, 1935, c. 531, Title XVI, § 1602, as added July 25, 1962, Pub.L. 87-543, Title I, § 141(a), 76 Stat. 198, and amended Oct. 13, 1964, Pub.L. 88-650, § 5(b), 78 Stat. 1078; July 30, 1965, Pub.L. 89-97, Title II, § 221(d)(3), Title IV, § 403(e), 79 Stat. 358, 418; Jan. 2, 1968, Pub.L. 90-248, Title II, §§ 210(a)(5), 213(a)(4), 232(4), 81 Stat. 896, 898, 917; Oct. 30, 1972, Pub.L. 92-603, Title IV, §§ 405(d), 406(d), 407(d), 410(d), 413(d), 86 Stat. 1489, 1490, 1491, 1492, set forth the required contents of state plans for aid to the aged, blind, or disabled, and for medical assistance for the aged. See section 1382 of this title.

1974 Amendment. Pub.L. 93-368, § 6(a)(1)-(4), inserted "(or, if greater, the amount determined under section 1382f of this title)" immediately after "$1,752" in subsecs. (a)(1)(A) and (b)(1) and "$2,628" in subsecs. (a)(2)(A) and (b)(2).

1973 Amendments. Subsec. (a)(1)(A). Pub.L. 93-233, § 4(b)(1), substituted "$1,752" for "$1,680".

Pub.L. 93-66, § 210(a), substituted "$1,-[illegible]" for "$1,560".

Subsec. (a)(2)(A). Pub.L. 93-233, § 4(b)(2), substituted "$2,628" for "$2,520".

Pub.L. 93-66, § 210(b), substituted "$2,[illegible]" for "$2,340".

Subsec. (b)(1). Pub.L. 93-233, § 4(b)(1), substituted "$1,752" for "$1,680".

Pub.L. 93-66, § 210(a), substituted "$1,-[illegible]" for "$1,560".

Subsec. (b)(2). Pub.L. 93-233, § 4(b)(2), substituted "[illegible]" for "$2,520".

Pub.L. 93-66, § 210(b), substituted "$2,[illegible]" for "$2,340".

Subsec. (g). Pub.L. 93-233, § 18(d), incorporated existing provisions in text designated as cl. (1), added cls. (2) and (3), and substituted final December "1973" for "1972".

Subsec. (h). Pub.L. 93-233, § 18(e), incorporated existing text in provisions designated as cls. (1) and (2), added cls. (3) and (4), redesignated former cls. (1) and (2) as items (A) and (B), and in item (A) inserted phrase "under which he or they received such aid or assistance for December 1973".

Effective Date of 1974 Amendments. Section 1(c) of Pub.L. 93-335, July 8, 1974, 88 Stat. 291, provided that amendments by section 1(a) and (b) of Pub.L. 93-335 to section 8(a)(1), (2), (b)(1)-(3) and (e) of Pub.L. 93-233, Dec. 31, 1973, 87 Stat. 955, set out as notes under section 1382e of this title and sections 612c, 1431 and 2012 of Title 7, Agriculture, shall be effective July 1, 1974.

Effective Date of 1973 Amendments. Section 4(b) of Pub.L. 93-233 provided that amendment of subsecs. (a)(1)(A) and (b)(1) by section 4(b)(1), of subsecs. (a)(2)(A) and (b)(2) by section 4(b)(2), and of provisions set out as a note hereunder by section 4(b)(3) of Pub.L. 93-233, shall be effective with respect to payments for months after June 1974.

Section 210(c) of Pub.L. 93-66, as amended by Pub.L. 93-233, § 4(a)(1), Dec. 30, 1973, 87 Stat. 953, provided that: "The amendments made by this section [to subsecs. (a)(1)(A), (2)(A), (b)(1), (2) of this section] shall apply with respect to payments for months after December 1973."

Effective Date. Section 301 of Pub.L. 92-603 provided in part that this section is to take effect Jan. 1, 1974.

Federal Program of Supplemental Security Income; Supplemental Security Income Benefits for Essential Persons; Definitions of Qualified Individual and Essential Person. Section 211 of Pub.L. 93-66, as amended by Pub.L. 93-233, § 4(a)(2), (b)(3), Dec. 31, 1973, 87 Stat. 953, provided that:

"(a)(1) In determining (for purposes of title XVI of the Social Security Act [this subchapter], as in effect after December 1973) the eligibility for and the amount of the supplemental security income benefit payable to any qualified

if the Secretary after reasonable notice and opportunity for hearing to the State agency administering or supervising the administration of such plan, finds—

(1) that the plan has been so changed as to impose any residence or citizenship requirement prohibited by section 1352(b) of this title, or that in the administration of the plan any such prohibited requirement is imposed, with the knowledge of such State agency, in a substantial number of cases; or

(2) that in the administration of the plan there is a failure to comply substantially with any provision required by section 1352(a) of this title to be included in the plan;

the Secretary shall notify such State agency that further payments will not be made to the State (or, in his discretion, that payments will be limited to categories under or parts of the State plan not affected by such failure) until he is satisfied that such prohibited requirement is no longer so imposed, and that there is no longer any such failure to comply. Until he is so satisfied he shall make no further payments to such State (or shall limit payments to categories under or parts of the State plan not affected by such failure).

Aug. 14, 1935, c. 531, Title XIV, § 1404, as added Aug. 28, 1950, c. 809, Title III, pt. 5, § 351, 64 Stat. 555, and amended 1953 Reorg.Plan No. 1, §§ 5, 8 eff. Apr. 11, 1953, 18 F.R. 2053, 67 Stat. 631; Jan. 2, 1968, Pub.L. 90-248, Title II, § 215, 81 Stat. 918.

§ 1355. Definitions

Section was repealed effective Jan. 1, 1974, by Pub.L. 92-603, Title III, § 303(a), (b), Oct. 30, 1972, 86 Stat. 1484, except with respect to Puerto Rico, Guam, and the Virgin Islands. Therefore, as to Puerto Rico, Guam, and the Virgin Islands, section 1405 of the Soc l Security Act [this section] continues t apply as follows:

§ 1355. Definitions

For the purposes of this subchapter, the term "aid to the permanently and totally disabled" means money payments to, or (if provided in or after the third month before the month in which the recipient makes application for aid) medical care in behalf of, or any type of remedial care recognized under State law in behalf of, needy individuals eighteen years of age or older who are permanently and totally disabled, but does not include any such payments to or care in behalf of any individual who is an inmate of a public institution (except as a patient in a medical institution) or any individual who is a patient in an institution for tuberculosis or mental diseases. Such term also includes payments which are not included within the meaning of such term under the preceding sentence, but which would be so included except that they are made on behalf of such a needy individual to another individual who (as determined in accordance with standards prescribed by the Secretary) is interested in or concerned with the welfare of such needy individual, but only with respect to a State whose State plan approved under section 1352 of this title includes provision for—

(1) determination by the State agency that such needy individual has, by reason of his physical or mental condition, such inability to manage funds that making payments to him would be contrary to his welfare and, therefore, it is necessary to provide such aid through payments described in this sentence;

(2) making such payments only in cases in which such payments will, under the rules otherwise applicable under the State plan for determining need and the amount of aid to the permanently and totally disabled to be paid (and in conjunction with other income and resources), meet all the need of the individuals with respect to whom such payments are made;

(3) undertaking and continuing special efforts to protect the welfare of such individual and to improve, to the extent possible, his capacity for self-care and to manage funds;

(4) periodic review by such State agency of the determination under paragraph (1) to ascertain whether conditions justifying such determination still exist, with provision for termination of such payments if they do not and for seeking judicial appointment of a guardian or other legal representative, as described in section 1311 of this title, if and when it appears that such action will best serve the interests of such needy individual; and

(5) opportunity for a fair hearing before the State agency on the determination referred to in paragraph (1) for any individual with respect to whom it is made.

At the option of a State (if its plan approved under this subchapter so provides), such term (i) need not include money payments to an individual who has been absent from such State for a period in excess of ninety consecutive days (regardless of whether he has maintained his residence in such State during such period) until he has been present in such State for thirty consecutive days, in the case of such an individual who has maintained his residence in such State during such period or ninety consecutive days in the case of any other such individual, and (ii) may include rent payments made directly to a public housing agency on behalf of a recipient or a group or groups of recipients of aid under such plan.

Aug. 14, 1935, c. 531, Title XIV, § 1405, as added Aug. 28, 1950, c. 809, Title III, pt. 5, § 351, 64 Stat. 555, and amended July 25, 1962, Pub.L. 87-543, Title I, § 156(d), 76 Stat. 207; July 30, 1965, Pub.L. 89-97, Title II, § 221(c), Title IV, § 402(d), 79 Stat. 359, 417; Oct. 30, 1972, Pub.L. 92-603, Title IV, §§ 402(c), 409(c), 86 Stat. 1490, 1491.

SUBCHAPTER XVI—SUPPLEMENTAL SECURITY INCOME FOR AGED, BLIND, AND DISABLED

§ 1381. Statement of purpose; authorization of appropriations

Puerto Rico, Guam, and Virgin Islands. Enactment of section 1601 of the Social Security Act [this section] by Pub.L. 92-603, eff. Jan. 1, 1974, was not applicable to Puerto Rico, Guam, and the Virgin Islands. See section 303(b) of Pub.L. 92-603, set out as a note under section 301 of this title. Therefore, as to Puerto Rico, Guam, and the Virgin Islands, section 1601 of the Social Security Act [this section] as it existed prior to reenactment by Pub.L. 92-603 continues to apply as follows:

§ 1381. Authorization of appropriations

For the purpose (a) of enabling each State, as far as practicable under the conditions in such State, to furnish financial assistance to needy individuals who are 65 years of age or over, are blind, or are 18 years of age or over and permanently and totally disabled, (b) of enabling each State, as far as practicable under the conditions in such State, to furnish medical assistance on behalf of individuals who are 65 years of age or over and who are not recipients of aid to the aged, blind, or disabled but whose income and resources are insufficient to meet the costs of necessary medical services, and (c) of encouraging each State, as far as practicable under the conditions in such State, to furnish rehabilitation and other services to help individuals referred to in clause (a) or (b) to attain or retain capability for self-support or self-care, there is authorized to be appropriated for each fiscal year a sum sufficient to carry out the purposes of this subchapter. The sums made available under this section shall be used for making payments to States which have submitted, and had approved by the Secretary of Health, Education, and Welfare, State plans for aid to the aged, blind, or disabled, or for aid to the aged, blind, or disabled and medical assistance for the aged.

Aug. 14, 1935, c. 531, Title XVI, § 1601, as added July 25, 1962, Pub.L. 87-543, Title I, § 141(a), 76 Stat. 197.

Index to Notes

Due process ½
State or local regulation or control 1

½. Due process

Eligible plaintiffs had right to receive the social security benefits for aged, blind and disabled persons and such entitlements could not be ended without due process and substantial delays in payment thereof constituted deprivation of property. Andujar v. Weinberger, D.C.N.Y.1976, 69 F.R.D. 600.

1. State or local regulation or control

The federal supplemental security income program under this subchapter does not effect the simple transfer of a public assistance program within a single governmental entity, but rather creates a new federal program which differs substantially from the state programs it allegedly replaced. Hannington v. Weinberger, D.C.D.C.1975, 393 F.Supp. 553.

§ 1381a. Basic entitlement to benefits

Index to Notes

Disability 6
Income maintenance 1
Jurisdiction 5
Provisional benefits 3
Replacing state programs 2
Rollback applicants 4

1. Income maintenance

This provision, which became effective on January 1, 1974, is an income maintenance program for the aged, blind and disabled and has replaced state-administered programs with a new federal program establishing uniform eligibility criteria. Hannington v. Weinberger, D.C.D.C.1975, 393 F.Supp. 553.

2. Replacing state programs

This provision does not effect the simple transfer of a public assistance program within a single governmental entity, but rather creates a new federal program which differs substantially from the state programs it allegedly replaced. Hannington v. Weinberger, D.C.D.C.1975, 393 F.Supp. 553.

3. Provisional benefits

Benefits accorded by Congress under supplemental security income program for those who began receiving benefits under state-administered programs after June 1, 1973 were merely intended to be provisional and temporary and were only "presumptive" and not intended to give any permanent right to recipients. Ashby v. Weinberger, D.C.N.Y.1975, 402 F. Supp. 1203.

Payment of benefits which are clearly defined by Congress as provisional and temporary do not support a property interest in permanent supplemental security income benefits. Hannington v. Weinberger, D.C.D.C.1975, 393 F.Supp. 553.

4. Rollback applicants

By amending the original provision to exclude rollback cases from automatic eligibility, Congress put rollback cases into the category of initial applicants. Hannington v. Weinberger, D.C.D.C.1975, 393 F.Supp. 553.

Action of the Secretary and the subsequent action of Congress in allowing plaintiffs, who were rollback cases to be treated as presumptively disabled did not change their status from that of initial applicants; rather, it was clear from the regulations, the subsequent congressional enactment, and its legislative history that Congress treated the rollback cases as initial applicants while giving the Secretary discretionary authority to treat them as presumptively disabled. Id.

5. Jurisdiction

In view of language of this section relating to payment of benefits by the Secretary to every eligible aged, blind or disabled individual and the regulations, federal district court had jurisdiction under section 1361 of Title 28 relating to compelling an officer of the United States to perform his duty with respect to action by plaintiffs asserting unlawful conduct of Secretary in permitting lengthy delays in the delivery of social security benefits. Andujar v. Weinberger, D.C.N.Y.1976, 69 F.R.D. 600.

6. Disability

Under this chapter, elements of proof of disability are objective medical facts and clinical findings, opinions and diagnoses of doctors, subjective evidence of pain and disability testified to by claimant, and claimant's education, work history and age. Hurst v. Mathews, D.C. Va.1976, 426 F.Supp. 245.

§ 1382. Eligibility for benefits

[See main volume for text of (a) to (d)]

Limitation on eligibility of certain individuals

(e)(1)(A) Except as provided in subparagraph (B) and (C), no person shall be an eligible individual or eligible spouse for purposes of this subchapter with respect to any month if throughout such month he is an inmate of a public institution.

any interested individual a copy of such standards, along with the procedures available in the State to insure the enforcement of such standards and a list of any waivers of such standards and any violations of such standards which have come to the attention of the authority responsible for their enforcement.

(3) Each State shall certify annually to the Secretary that it is in compliance with the requirements of this subsection.

(4) Payments made under this title with respect to an individual shall be reduced by an amount equal to the amount of any supplementary payment (as described in subsection (a)) or other payment made by a State (or political subdivision thereof) which is made for or on account of any medical or any other type of remedial care provided by an institution of the type described in paragraph (1) to such individual as a resident or an inpatient of such institution if such institution is not approved as meeting the standards described in such paragraph by the appropriate State or local authorities.[1]

Cost-of-Living Adjustments in Benefits

Sec. 1617. Whenever benefit amounts under title II are increased by any percentage effective with any month as a result of determination made under section 215(i), each of the dollar amounts in effect for such month under subsections (a)(1)(A), (a)(2)(A), (b)(1), (b)(2) of section 1611, and subsection (a)(1)(A) of section 211 of Public Law 93-66, as specified in such subsections or as previously increased under this section, shall be increased by the same percentage (and rounded, when not a multiple of $1.20, to the next higher multiple of $1.20), effective with respect to benefits for months after such month; and such dollar amounts as so increased shall be published in the Federal Register together with, and at the same time as, the material required by section 215(i)(2)(D) to be published therein by reason of such determination

Operation of State Supplementation Programs

Sec. 1618. (a) In order for any State which makes supplementary payments of the type described in section 1616(a) (including payments pursuant to an agreement entered into under section 212(a) of Public Law 93-66), on or after June 30 1977, to be eligible for payments pursuant to title XIX with respect to expenditures for any calendar quarter which begins—

(1) after June 30, 1977, or, if later,

(2) after the calendar quarter in which it first makes such supplementary payments,

---

[1] Subsection (e) was added effective October 1, 1977 by section 505(d) of P.L. 94-566.

the Reserve Corps of the Public Health Service prior to July 1, 1960, shall not be included in computing entitlement to or the amount of any monthly benefit under this title, on the basis of his wages and self-employment income, for any month after June 1960 and prior to the first month with respect to which the Civil Service Commission certifies to the Secretary that, by reason of a waiver filed as provided in paragraph (2), no further annuity will be paid to him, his wife, and his children, or, if he has died, to his widow and children, under subchapter III of chapter 83 of title 5, United States Code, on the basis of such service.

(2) In the case of a monthly benefit for a month prior to that in which the individual, on whose wages and self-employment income such benefit is based, dies, the waiver must be filed by such individual; and such waiver shall be irrevocable and shall constitute a waiver on behalf of himself, his wife, and his children. If such individual did not file such a waiver before he died, then in the case of a benefit for the month in which he died or any month thereafter, such waiver must be filed by his widow, if any, and by or on behalf of all his children, if any; and such waivers shall be irrevocable. Such a waiver by a child shall be filed by his legal guardian or guardians, or, in the absence thereof, by the person (or persons) who has the child in his care.

Cost-of-Living Increases in Benefits

(i) (1) For purposes of this subsection—

(A) the term "base quarter" means (i) the calendar quarter ending on March 31 in each year after 1974, or (ii) any other calendar quarter in which occurs the effective month of a general benefit increase under this title;

(B) the term "cost-of-living computation quarter" means a base quarter, as defined in subparagraph (A)(i), in which the Consumer Price Index prepared by the Department of Labor exceeds, by not less than 3 per centum, such Index in the later of (i) the last prior cost-of-living computation quarter which was established under this subparagraph, or (ii) the most recent calendar quarter in which occurred the effective month of a general benefit increase under this title; except that there shall be no cost-of-living computation quarter in any calendar year if in the year prior to such year a law has been enacted providing a general benefit increase under this title or if in such prior year such a general benefit increase becomes effective; and

(C) the Consumer Price Index for a base quarter, a cost-of-living computation quarter, or any other calendar quarter shall be the arithmetical mean of such index for the 3 months in such quarter.

(2)(A)(i) The Secretary shall determine each year beginning with 1975 (subject to the limitation in paragraph (1)(B)) whether the base quarter (as defined in paragraph (1)(A)(i)) in such year is a cost-of-living computation quarter.

(ii) If the Secretary determines that the base quarter in any year is a cost-of-living computation quarter, he shall, effective with the month of June of that year as provided in subparagraph (B), increase—

(I) the benefit amount to which individuals are entitled for that month under section 227 or 228,

(II) the primary insurance amount of each other individual on which benefit entitlement is based under this title (including a primary insurance amount determined under subsection (a)(1)(C)(i)(I), but subject to the provisions of such subsection (a)(1)(C)(i) and clauses (iv) and (v) of this subparagraph), and

(III) the amount of total monthly benefits based on any primary insurance amount which is permitted under section 203 (and such total shall be increased, unless otherwise so increased under another provision of this title, at the same time as such primary insurance amount) or, in the case of a primary insurance amount computed under subsection (a) as in effect without regard to the table contained therein) prior to January 1979, the amount to which the beneficiaries may be entitled under section 203 as in effect in December 1978, except as provided by section 203(a)(6) and (7) as in effect after December 1978.

The increase shall be derived by multiplying each of the amounts described in subdivisions (I), (II), and (III) (including each of those amounts as previously increased under this subparagraph) by the same percentage (rounded to the nearest one-tenth of 1 percent) as the percentage by which the Consumer Price Index for that cost-of-living computation quarter exceeds such index for the most recent prior calendar quarter which was a base quarter under paragraph (1)(A)(ii) or, if later, the most recent cost-of-living computation quarter under paragraph (1)(B); and any amount so increased that is not a multiple of $0.10 shall be increased to the next higher multiple of $0.10. Any increase under this subsection in a primary insurance amount determined under subparagraph (C)(i)(II) of subsection (a)(1) shall be applied after the initial determination of such primary insurance amount under that subparagraph (with the amount of such increase, in the case of an individual who becomes eligible for old-age or disability insurance benefits or dies in a calendar year after 1979, being determined from the range of possible primary insurance amounts published by the Secretary under the last sentence of subparagraph (D)).[1]

[1] Clause (II) was amended by sec. 201(g)(1) of P.L. 95-216.

(iii) In the case of an individual who becomes eligible for an old-age or disability insurance benefit, or who dies prior to becoming so eligible, in a year in which there occurs an increase provided under clause (ii), the individual's primary insurance amount (without regard to the time of entitlement to that benefit) shall be increased (unless otherwise so increased under another provision of this title and, with respect to a primary insurance amount determined under subsection (a)(1)(C)(i)(I), subject to the provisions of subsection (a)(1)(C)(i) and clauses (iv) and (v) of this subparagraph) by the amount of that increase and subsequent applicable increases, but only with respect to benefits payable for months after May of that year.[2]

(iv)(I) In the case of an individual who is entitled to an old-age insurance benefit that is based on a primary insurance amount determined under subsection (a)(1)(C)(i)(I), such primary insurance amount shall not be increased under this subsection for any year before the year in which occurs the first month with respect to which there is payable to such individual all or some part of such benefit after application of the provisions of section 203 relating to deductions on account of work, or, if earlier, the year in which he attains age 65.

(II) In the case of an individual who is entitled to an insurance benefit under subsection (e) or (f) of section 202 that is based on a primary insurance amount determined under subsection (a)(1)(C)(i)(I), such primary insurance amount shall not be increased under this subsection for any year (except as provided in subdivision (III)) before the year in which occurs the first month with respect to which there is payable to such individual all or some part of such benefit after application of the provisions of section 203 relating to deductions on account of work, or, if earlier, the year in which he attains age 65.

(III) Any increase under this subsection which would otherwise be applied to a primary insurance amount except for the provisions of subdivision (II) of this clause, shall apply to such primary insurance amount if, during any month of the year in which the increase occurs, any individual is entitled to a benefit under subsection (d), (g), or (h) of section 202 based on such primary insurance amount, and such primary insurance amount is based upon the wages and self-employment income of a deceased individual.

(IV) No primary insurance amount determined under subsection (a)(1)(C)(i)(I) shall be increased under this subsection for any year during which no individual was entitled to any benefit based thereon under section 202 or 223 for any month of such year.

(V) In any case in which an increase under this subsection which occurs during any year applies to a primary insurance amount deter-

[2] Clauses (iii), (iv), and (v) were added by sec. 201(g)(2) of P.L. 95-216.

mined under subsection (a)(1)(C)(i)(I), and such an increase occurring in a later year does not apply to such primary insurance amount on account of the provisions of this clause, any such increase which occurs in a later year which is applicable to such primary insurance amount shall be based upon such primary insurance amount as previously increased under this subsection.[1]

(v) Notwithstanding clause (iv), no primary insurance amount shall be less than that provided under section 215(a)(1) without regard to subparagraph (C)(i)(I) thereof, as subsequently increased by applicable increases under this section.[1]

(B) The increase provided by subparagraph (A) with respect to a particular cost-of-living computation quarter shall apply in the case of monthly benefits under this title for months after May of the calendar year in which occurred such cost-of-living computation quarter, and in the case of lump-sum death payments with respect to deaths occurring after May of such calendar year.

(C)(i) Whenever the level of the Consumer Price Index as published for any month exceeds by 2.5 percent or more the level of such index for the most recent base quarter (as defined in paragraph (1)(A)(ii)) or, if later, the most recent cost-of-living computation quarter, the Secretary shall (within 5 days after such publication) report the amount of such excess to the House Committee on Ways and Means and the Senate Committee on Finance.

(ii) Whenever the Secretary determines that a base quarter in a calendar year is also a cost-of-living computation quarter, he shall notify the House Committee on Ways and Means and the Senate Committee on Finance of such determination within 30 days after the close of such quarter, indicating the amount of the benefit increase to be provided, his estimate of the extent to which the cost of such increase would be met by an increase in the contribution and benefit base under section 230 and the estimated amount of the increase in such base, the actuarial estimates of the effect of such increase, and the actuarial assumptions and methodology used in preparing such estimates.

(D) If the Secretary determines that a base quarter in a calendar year is also a cost-of-living computation quarter, he shall publish in the Federal Register within 45 days after the close of such quarter a determination that a benefit increase is resultantly required and the percentage thereof. He shall also publish in the Federal Register at that time (i) a revision of the range of the primary insurance amounts which are possible after the application of this subsection based on the dollar amount specified in subparagraph (C)(i)(II) of subsection (a)(1) (with such revised primary insurance amounts constituting the

[1] Clauses (iii), (iv), and (v) were added by sec. 201(g)(2) of P.L. 95-216.

increased amounts determined for purposes of such subparagraph (C)(i)(II) under this subsection), or specified in subsection (a)(3) as in effect prior to 1979, and (ii) a revision of the range of maximum family benefits which correspond to such primary insurance amounts (with such maximum benefits being effective notwithstanding section 203(a) except for paragraph (3)(B) thereof (or paragraph (2) thereof as in effect prior to 1979)).[1]

(3) As used in this subsection, the term "general benefit increase under this title" means an increase (other than an increase under this subsection) in all primary insurance amounts on which monthly insurance benefits under this title are based.

(4) This subsection as in effect in December 1978 shall continue to apply to subsections (a) and (d), as then in effect, for purposes of computing the primary insurance amount of an individual to whom subsection (a), as in effect after December 1978, does not apply (including an individual to whom subsection (a) does not apply in any year by reason of paragraph (4)(B) of that subsection (but the application of this subsection in such cases shall be modified by the application of subdivision (I) in the last sentence of paragraph (4) of that subsection)). For purposes of computing primary insurance amounts and maximum family benefits (other than primary insurance amounts and maximum family benefits for individuals to whom such paragraph (4)(B) applies), the Secretary shall publish in the Federal Register revisions of the table of benefits contained in subsection (a), as in effect in December 1978, as required by paragraph (2)(D) of this subsection as then in effect.[2]

---

[1] Subparagraph (D) was amended by sec. 201(g)(3) of P.L. 95-216.
[2] Paragraph (4) was added by sec. 201(g)(4) of P.L. 95-216. See Appendix F for law as in effect on December, 1978.

URBAN CITIZEN PARTICIPATION CONFERENCE

MARCH 24-26, 1980

PROPOSED AMENDMENT TO HB 968

Section 1- be repealed and reenacted to read:

1. The basic AFDC Grant be increased by $100.00 (to $450.00 for one (1) parent/guardian - one (1) child). The increase for each additional child be raised to $75.00.

2. C.O.L.A. be based on the National index rate of inflation plus 7% for Alaskan higher cost of living. C.O.L.A. shall become effective July 1 each year with an effective date beginning July 1, 1980.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL No. 968

"An Act adding a cost-of-living adjustment to maximum benefits paid as Aid to Families with Dependent Children; and providing for an effective date."

This proposed legislation would amend AS 47.25.320 to provide that the maximum monthly payment for families receiving cash assistance under the Aid to Families with Dependent Children (AFDC) program would increase each year by the same percentage increase as is granted under the Social Security Act to Social Security and Supplemental Security Income (SSI) recipients.

Under federal law, needy elderly, blind, and disabled persons receiving SSI assistance have their SSI payments increased each July 1 by the percentage that the national cost-of-living index has increased in the preceding year. Under Alaska statutes, maximum supplemental state payments to Alaska's needy elderly, blind, and disabled increase automatically by this same percentage. This guarantees that these persons will not suffer an inflation-caused erosion in their ability to purchase the basic necessities.

AFDC recipients are not now afforded this protection against inflation increases in costs of necessities. Despite past periodic legislative increases in AFDC payments levels, the Department believes that the present payment maximums are not adequate to meet most AFDC families' basic needs. (A copy of the Department's annual report to the Legislature on AFDC payment adequacy is attached.) We believe that HB 968 provides the most economical means of assuring that AFDC payments become and remain sufficient to achieve the purpose of the program and meet recipient families' needs.

We strongly support the passage of HB 968.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER

POUCH H 01 – JUNEAU 99811

APR 10 1979

Document# 69-80

Honorable Terry Gardiner
Speaker
House of Representatives
Pouch V MS 3100
Juneau, Alaska 99811

Dear Representative Gardner:

AS 47.25.320(c) provides that the Department shall provide the Legislature with "financial data on the Aid to Families with Dependent Children program with special reference to amount of funds required to maintain adequate payments in consideration of changes in the cost of living."

The Fiscal Year 1981 budget submission for the Aid to Families with Dependent Children (AFDC) program provides fiscal data on recent expenditures, the number of persons served, and the average payment made to each family unit. However, the budget documents do not address the question of the adequacy of the payments being made. This report is intended to apprise you of the Department's current assessment of that question.

I. The AFDC Maximum Payment

The current maximum payments specified in AS 47.25.320 are intended to meet the basic needs of dependent children who are deprived of the support and care of one or both parents, and, if necessary, the needs of the one relative with whom they live. These needs include such subsistence items as food, fuel, shelter, and clothing. At the present time, a typical AFDC family consisting of a mother and one child can be paid up to $350 per month in AFDC funds to enable them to obtain these basic needs.

Federal regulations require that the state exclude all or part of certain kinds of income that AFDC recipients receive when determining their AFDC payment level. The effect of these regulations is that some AFDC families receive more monthly income than other AFDC families. However, we estimate only 10% of the 7564 families who will receive AFDC assistance monthly in FY 81 will have extra income. Thus the vast majority of Alaska's AFDC families exist on a total monthly income equal to the maximum AFDC payment specified by Alaska statute. These monthly income levels depend on family size and are as follows:

Family Size	With Needy Adult Relative	Without Needy Adult Relative
1	---	$ 150
2	$ 350	$ 300
3	$ 400	$ 350
4	$ 450	$ 450

($50 additional for each additional child)

II. Recent Changes in the Maximum Payment

Though no longer in effect, legislation enacted in 1970 established a complex structure of maximum AFDC payments based upon children's ages that was significantly different than that in use now as described above. A mother and one child under 5 received a maximum AFDC payment of $125 per month, $150 if the child were between 5 and 12, and $175 if the child were between 13 and 18.

Effective July 1, 1974, these maximums were again changed to $250 per month for a mother and one child 12 or under, and $300 for a mother and a 13 to 18 year old. On July 1, 1975, these standards were again modified by removing any consideration of the child's age and establishing a universal two-person maximum of $300 with $50 allowed for each additional child, to a ceiling of $520 regardless of family size.

The last AFDC payment change was made effective July 1, 1978. The $520 ceiling for AFDC payment was deleted. The maximum payment for a needy relative and one child was increased from $300 to $350, with $50 continuing to be allowed for each additional child. Whereas, approximately three/fourths of our AFDC caseload includes a needy adult living with one or more children, the effect of this last change in standards was to increase average payments to 75% of all AFDC families by $50 per family. AFDC children living with a non-needy relative have not received an increase since 7/1/74. The $50 increment for each additional child has not been changed since 1974.

III. Adequacy of the Current Maximums

Title IV of the Social Security Act, as amended, states that the purpose of the AFDC program is to "encourage the care of dependent children in their own homes or in the homes of a relative by enabling each state to furnish financial assistance and rehabilitation and other services, as far as practicable under the conditons in each state, to needy dependent childre. and the parents or relative with whom they are living, to help maintain and strengthen family life and to help such relatives to attain or retain capability for the maximum self-support and personal independence consistent with the maintenance of continuing parental care and protection."

The Social Security Act and federal regulation (Title 45) allow the states the freedom to establish their own separate payment levels. They also allow for regional differences in payment levels within a state, if those differences can be supported by objective data. (Alaska has chosen a statewide standard.) Nowhere in these laws or regulations is guidance offered regarding the minimum subsistence level consistent with the purpose of the program.

In Alaska, as in almost all other states, "adequacy" of payments is defined primarily by legislative action. As we view this process, it is an attempt to reach a reasonable compromise among three often conflicting elements: the program purpose, the basic economic needs of the recipient families, and the taxpayer's willingness and ability to provide the funds necessary to maintain needy families intact in dignity and health. Payment levels that are too low to meet legitimate client needs waste the taxpayer's money, for the program cannot then meet its purpose of providing financial support adequate to enable the family to remain together. Payment levels that are too high are wasteful in two senses: they cause unnecessary expenditures, and they encourage unnecessary welfare dependency.

The Department believes that the taxpayer's definition of adequate AFDC payment levels is accurately expressed through the annual administrative and legislative review of the AFDC budget. It is therefore our belief that this report should represent evidence which will help you to define adequacy from the AFDC recipient's point of view.

From the recipient's point of view, we believe that, despite the history of payment increases, AFDC payment levels are presently inadequate to meet most recipient's basic subsistence needs. The evidence supporting this judgement is detailed below.

IV. Measurements of Inadequacy

A. Recipient Reports of Expenses

In 1978, the Legislative Affairs Agency mailed questionnaires to each AFDC recipient, measuring among other things what the AFDC household's expenses were in August 1978. About one third of the households responded, which is in itself a measure of concern about payment levels. While the survey results cannot be considered statistically accurate, they do give some indication of costs of basic subsistence items for AFDC recipients.

A summary of the survey's results are:

	Urban	Rural
Rent or Mortgage	$ 261	$ 180
Fuel	$ 48	$ 108
Utilities	$ 47	$ 76
Food	$ 182	$ 272
TOTAL	$ 538	$ 636

(Note: Some of the households responding had additional household members who were not receiving AFDC benefits. Therefore the costs reported in the survey may be higher than if the survey had been restricted to households in which all members were AFDC recipients.)

The expenditures listed are now quite old. You do not need to be reminded what effect double-digit inflation and the energy crisis have had on living costs since mid-1978.

These survey results tend to support common knowledge about Alaskan costs of basic necessities, particularly housing costs. The majority of Alaska's AFDC cases reside in urban settings, concentrated in Anchorage, Fairbanks, Juneau and Ketchikan. A cursory survey of available housing in those areas shows that there is inadequate low-income housing available. Minimally-acceptable rental units which can accomodate children, when such units are available, range from $180 to $450 per month. Even when the total expense amounts are reduced by the amount of food assistance available through the Food Stamp program, and energy assistance through the Energy Assistance program, the costs of basic necessities exceed many AFDC families maximum monthly grants.

B. Cost of Living Poverty Guidelines

(1) The U.S. Bureau of Labor Statistics maintains a Cost of Living Index for Alaska which measures relative increases in living costs for Anchorage. On January 1, 1970, the Index was 107.9; on January 1, 1979 the Index was 198.1; and on January 1, 1980, it was 218.2. In these 10 years the cost of living more than doubled, and AFDC benefits for a mother with a young child more than doubled, increasing from $150 to $350 per month.

By this measurement, AFDC increases over the years have apparently kept pace with rising costs of living. However, this comparison would indicate that AFDC payment maximums are adequate now only if they were originally adequate in 1970. Absent any convincing information on this question, we leave this to your judgement.

(2) The U.S. Community Services Administration (CSA) publishes annual poverty guidelines for Alaska. This year's (1980) guidelines have not yet been published, but the 1979 CSA annual gross income poverty levels compared to current annual AFDC maximums as follows:

Family Size	CSA 1979 Farm	CSA 1979 Non-Farm	AFDC With a Needy Adult	AFDC With No Needy Adult
1	4562	5338	------	1800
2	6023	7050	4200	3600
3	7463	8763	4800	4200
4	8913	10475	5400	4800

Clearly, current AFDC maximums fall well below federally established poverty levels for Alaska.

C. Comparison with Other States

The following payment levels for several states offer a useful comparison which may be indicative of payment adequacy. In our judgement, Alaska's higher costs of necessities were considered in this comparison, Alaska's maximum payment would not compare favorably with those of most other western states.

Maximum payments for AFDC recipients (1979-early 1980 Levels for needy adult-included cases):

	Parent and One Child	Parent and Three Children
Alaska	$ 350	$ 450
Oregon	304	456
Washington	339	483
Utah	253	389
Idaho	259	366
California	331	487
Hawaii	390	546

This comparison does not consider extra "special needs" which most states except Alaska grant for various items such as school attendance and supplies, laundry, job interviews, etc. Most listed states except Alaska have lower standards for persons with little or no housing costs.

D. Comparison with Adult Public Assistance

Another possible measurement of adequacy is internal to Alaska's own assistance programs. By state statute, the FY 80 Adult Public Assistance programs (Aid to the Blind, Aid to the Disabled, and Old Age Assistance) provides for a $414 maximum monthly payment to an individual, and $608 to a couple. Each year this maximum increases by the percentage amount of the annual national Social Security percentage increase. For FY 81, the $414 maximum for an individual is expected to increase by 13%, to $467, while the couple maximum will increase from $608 to $687. State statutes thus appear to maintain the striking position that a mother and child can maintain themselves on $350 a month, but two elderly or disabled adults require $608 to $687 a month. Not only are adults likely to be more "established" and therefore have lower expenses for necessities, but particularly the elderly have many more programs available which offer them direct or indirect financial benefits.

E. Comparison with Foster Care Costs

A final point of measurement is also internal to the Department of Health and Social Services. The Department establishes foster care rates each year after holding rate hearings throughout the state. Payments are set on a regional basis, varying by ages of children. Payment rates are set to meet, but not exceed, the direct costs of providing basic necessities and adequate recreational and instructional material to families willing to assume the additional responsibility of a foster child.

For a 30-day month, the Division of Social Services reimburses a foster parent as follows for one child:

Region	Lowest (Age 0-4)	Highest (Age 12 and over)
Northern	$ 334.00	$ 442.00
Northwestern	387.00	514.00
Southcentral	291.00	384.00

By comparison, the AFDC program pays $150 for a single child with no needy adult relative, $150 maximum for the second child, and $50 for each additional child.

V. Conclusion

This is the third annual report we have presented to you which has utilized these five basic comparative measures of adequacy. Each year these comparative measures show that Alaska's AFDC families' capacity to meet the costs of the basic necessities of life is diminishing rapidly. To us, there is no longer any question that our AFDC program is u ble to fulfill the purposes for which it was designed by federal law and implemented by Alaska statute.

To correct this situation, Govenor Hammond has requested legislation be placed before you which would provide for AFDC maximum payment levels to be automatically increased each year by the same percentage our adult programs are increased. This bill, HB 968, would at least guarantee that AFDC recipients will not see their comparative situation worsen each year.

We commend HB 968 to your attention as a workable compromise between the AFDC client's obvious need for adequate aid and the taxpayer's equally obvious desire to support a program which achieves its goals at the lowest possible cost.

Sincerely,

Helen D. Beirne

Dear Mr. Betit:

We have been advised that the cost of living increase in SSI payments will probably be 13.0 percent. This will raise federal payment standards to $235.30 for an individual and $352.90 for a couple. The final figure will be available April 22, and we will relay it to you as soon as it is received.

As soon as possible, please advise us what your new SSI payment standards will be.

Sincerely,

Robert H. Dunn

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

I. The FY 81 Aid to Families with Dependent Children (AFDC) budget anticipates that a monthly average of 7,564 recipient families will each receive an average monthly grant of $343.00 for a total expected AFDC expenditure of 31,133.1 (7,564 x $343.00 x 12 months).

Title XVI annual percentage increases are determined by the percentage increase in the national cost of living index. At this time, the Social Security Administration estimates this percentage increase for the coming year will be 13.0%. The effect of this proposed legislation would be to increase the average monthly payment to each AFDC family by 13.0%, or $44.59, beginning July 1, 1980. The maximum monthly payment for the average AFDC family would increase from $343.00 to $387.59 ($343 x 1.13 = $387.59).

33-001 (Rev. 12/79)
Modify by DHSS (11-28-79)

III. ANALYSIS---Continued

Thus the impact of this legislation on the anticipated AFDC expenditures would be an increase of 4,047.3 (7,564 x $44.59 x 12 months). 50% of this increase, 2023.7 would be federal matching funds.

II. In the AFDC program the statutory maximum payment levels are also the qualifying standards for entry into the program. This proposal would increase these standards. For example, the maximum countable income an applicant with one child can have and still qualify for AFDC assistance is currently $350. (This would also be the recipients's AFDC payment if he or she had no other countable income.) A 13.0% increase in the standard would establish a new qualifying limit of $388.00 for this size family.

It is reasonable to assume that there are Alaskan families who have countable incomes over the current standards but under the higher proposed standards, and to assume that some of these families would choose to apply and would meet all other eligibility factors.

Therefore it is reasonable to assume that the legislation would add new recipients to the anticipated FY 81 caseload. However, there are no factual grounds upon which this assumption can be based. In fact, there is evidence demonstrating that these newly-eligible families are not likely to affect anticipated expenditures:

(a) Effective July 1, 1978, a statutory amendment increased maximum payment levels and qualifying standards for 75% of AFDC applicants and recipients by $50.00 per family. There was no sudden increase in the total number of recipients, and the rate of growth in the number of recipients in the twelve months after this change was not significantly changed from the rate of increase in the twelve months preceding this change.

(b) An annual Social Security cost of living percentage increase has applied to the Adult Public Assistance programs for several years. Each July, the increase in standards and payments has not produced significant changes in the recipient growth rate in those programs.

The Department has no data proving that this legislation will not increase the total number of AFDC recipients, but the recent history of assistance programs does indicate that an increase is unlikely to happen. We are therefore not projecting any additional growth in caseload in AFDC solely as the result of this legislation, nor are we projecting any related increase in expenditures in the Medicaid and Eligibility Determination BRUs.

Dear Mrs. Buchholdt:

Re: House Bill 968

You have already received copies of our fiscal note on H.B. 968, which adds an annual cost-of-living benefits increase to the Aid to Families with Dependent Children program. That fiscal note was prepared on March 18, 1980. It reflects costs based on the Social Security Administra-tion's preliminary estimate that their annual cost-of-living benefits increase this year would be 13.0%.

However, on Tuesday, April 22, the Social Security Administration issued its final COLA percentage for 1980. This final figure was 14.3%. Social Security Region X officials notified us by telephone of their new percentage and we have used this figure to revise our fiscal note. The revised fiscal note is attached.

Please discard the March 18, 1980 fiscal note. It is no longer accurate.

Sincerely,

Rod Betit

1. The FY 81 Aid to Families with Dependent Children (AFDC) budget anticipates that a monthly average of 7,564 recipient families will each receive an average monthly grant of $343.00 for a total expected AFDC expenditures of $31,133.10 (7,564 x $343.00 x 12 months).

   Title XVI annual percentage increases are determined by the percentage increase in the national cost of living index. The Social Security Administration has determined that this percentage increase for the coming year will be 14.3%. The effect of this proposed legislation would be to increase the average monthly payment to each AFDC family by 14.3%, or $49.05, beginning July 1, 1980. The maximum monthly payment for the average AFDC family would increase from $343.00 to $392.05 ($343 x 1.43 = $392.05).

33-001 (Rev. 12/79)
Modify by DHSS (11-28-79)

III. ANALYSIS---Continued

Thus the impact of this legislation on the anticipated AFDC expenditures would be an increase of 4,452.2 (7,564 x $49.05 x 12 months). 50% of this increase, 2226.1, would be federal matching funds.

II. In the AFDC program the statutory maximum payment levels are also the qualifying standards for entry into the program. This proposal would increase these standards. For example, the maximum countable income an applicant with one child can have and still qualify for AFDC assistance is currently $350. (This would also be the recipients's AFDC payment if he or she had no other countable income.) A 14.3% increase in the standard would establish a new qualifying limit of $400.00 for this size family.

It is reasonable to assume that there are Alaskan families who have countable incomes over the current standards but under the higher proposed standards, and to assume that some of these families would choose to apply and would meet all other eligibility factors.

Therefore it is reasonable to assume that the legislation would add new recipients to the anticipated FY 81 caseload. However, there are no factual grounds upon which this assumption can be based. In fact, there is evidence demonstrating that these newly-eligible families are not likely to affect anticipated expenditures:

(a) Effective July 1, 1978, a statutory amendment increased maximum payment levels and qualifying standards for 75% of AFDC applicants and recipients by $50.00 per family. There was no sudden increase in the total number of recipients, and the rate of growth in the number of recipients in the twelve months after this change was not significantly changed from the rate of increase in the twelve months preceding this change.

(b) An annual Social Security cost of living percentage increase has applied to the Adult Public Assistance programs for several years. Each July, the increase in standards and payments has not produced significant changes in the recipient growth rate in those programs.

The Department has no data proving that this legislation will not increase the total number of AFDC recipients, but the recent history of assistance programs does indicate that an increase is unlikely to happen. We are therefore not projecting any additional growth in caseload in AFDC solely as the result of this legislation, nor are we projecting any related increase in expenditures in the Medicaid and Eligibility Determination BRUs.

III. ANALYSIS

The FY 81 Aid to Families with Dependent Children (AFDC) budget anticipates that a monthly average of 7564 families will each receive an average monthly grant of $343.00, for a total anticipated AFDC expenditure of 31,133.1 7564 x $343.00 x 12 months).

(1) Assistance Payments BRU, AFDC Program:

(a) Adult Not Included (ANI) Cases: For FY 81, 24.8%, or 1876 of the anticipated 7564 AFDC cases, will consist of children living in the home of non-needy relatives. CSHB 968 calls for granting these cases an automatic annual percentage increase equal to the annual percentage benefits increase in the Social Security and Supplemental Security Income programs. For FY 81, this increase has been established at 14.3%.

Prime Sponsor (First Legislator Named)

Prepared by: Gordon Landes Date: April 29, 1980
Division/Office: Public Assistance PH: 465-3347
Department of Health & Social Services

Approval DHSS Mgt. & Bdgt: Date: 4/30/80

33-001 (Rev. 12/79)
Modify by DHSS (11-28-79)

This COLA would increase the average payment for Adult Not Included AFDC cases by $33.21 per case per month, raising their anticipated average payment from $232.21 to $265.42 per month.

The cost of the COLA addition to ANI cases would be 747.6. ($33.21 increase per month x 1876 cases x 12 months = 747.6.)

(b) Adult Included (AI) Cases: CSHB 968 calls for AFDC children living with a needy relative to experience three increases: (1) an increase in basic maximum payment of $100 per month (from $350 maximum to $450 maximum for a household with a parent and one child); (2) an increase in the additional amount for additional children from $50 to $75 each; and (3) adding the Social Security annual cost-of-living percentage of 14.3% to all AI cases.

(1) $100 Maximum Payment Increase: For FY 81, 5688 cases per month will receive an average monthly payment of $371.47. CSHB 968 would increase the average payment by $100 per family. The cost of this provision would be 6825.6 ($100 increase per month x 5688 cases x 12 months = 6825.6).

(2) $75 Child Increment: CSHB would increase the additional maximum payment for second, third, and additional children by $25, from $50 to $75 for each child. The "average" AFDC-AI case consists of 2.81 persons--a mother and 1.81 children. The first child is included in the base payment. Thus the cost of this provision would be 1382.2 (.81 children x $25.00 increase x 5688 cases x 12 months).

(3) 14.3% COLA Adjustment: CSHB 968 would add the national cost of living percentage increase of 14.3% after the increased base payment and the child increment increase. The cost of this provision would be 4799.8 ($371.47 FY 81 average payment + $100 base increase + $20.25 child increment increase = $491.72 average payment x 14.3% x 5688 cases per month x 12 months).

(c) New Cases: In the AFDC program the statutory maximum payment levels are also the qualifying standards for entry into the program. CSHB 968 would increase these standards. For example, the maximum countable income a needy applicant with two children can have and still qualify for AFDC assistance is currently $400. (This would also be the recipient's AFDC payment if he or she had no other countable income. The provisions of CSHB 968 would establish the new qualifying limit of $600.00 for this 3-person family.

It is reasonable to assume that there are Alaskan families who have countable incomes over the current standards but under the higher proposed standards, and to assume that some of these families would choose to apply and would meet all other eligibility factors. However, there is no data, either within the past ten years of AFDC program utilization or from any other source that indicates whether new families would enter the program, or if they would, in what numbers.

Nevertheless, the Department believes a growth in families served will occur. Though it is nothing but an unsubstantiated guess, we believe the large increase in standards would attract an additional 800 families in FY 81. These new families are most likely to have an average countable non-AFDC income mid-way between the current and the proposed standards and thus qualify for an average monthly AFDC payment of $92.13 (2.81 persons per household: $350 + (.81 x $50) = $390.50 current, versus $514 +(.81 x $75) = $574.75. 1/2 of $574.75 - $390.50 = $92.13). This would produce an increased AFDC cost of 884.5 ($92.13 average payment x 800 cases per month x 12 months).

(d) AFDC BRU Summary

700 Grants:	ANI COLA Increase	=	747.6	
	AI $100 Base Increase	=	6,825.6	
	AI $25 Child Increase	=	1,382.2	
	AI COLA Increase	=	4,799.8	
	AI New Cases	=	884.5	
	TOTAL		14,639.7	
			7,319.9	Federal
			7,319.8	State GF Match

(2) Medicaid BRU

If 800 new families enter the AFDC program, they will be automatically eligible for Medicaid services. Approximately 60%, or 1349, of these 2248 persons (2.81 persons/family x 800 families) will use Medicaid services. Each of these 1349 persons will average $600 in services in FY 81. Total cost to the Medicaid BRU will be 809.4 (1349 x $600); 404.7 federal funds, 404.7 state general fund match; 700, Grants and Claims.

(3) Eligibility Determination BRU

The addition of 800 new AFDC and Medicaid cases will require additional eligibility staff and services. Additional staff required will be four Eligibility Worker IIs, one Eligibility Worker III supervisor, and one Clerk Typist III. The cost to the Eligibility Determination BRU will be:

100	Personal Services	155.0	
200	Travel	3.0	
300	Contractual	6.0	
400	Commodities	.6	
500	Equipment	3.0	
	TOTAL	167.6	66.2 Federal Match 66.2 General Fund Match 35.2 General Fund

Juneau, Alaska 99811

RE: HB 998

Dear Representative Buchholdt:

The Governor's Council for the Handicapped and Gifted supports the development of community programs for severely physically handicapped children and adults in need of personal attendant care or other medical/nursing support services.

There are 20 handicapped young adults in the Anchorage area who have been identified as needing these services who presently reside in nursing homes in order to receive services. These individuals could function very well in architecturally barrier-free small group residences or apartments with special home health aides and personal attendants to assist them in caring for themselves. Funding is also needed to provide physical therapy and related services to such individuals who are inappropriately placed in nursing homes at extremely high financial and social cost.

If HB 998 is intended to provide for these individuals we recommend that it be revised to clearly reflect this purpose. By making a simple amendment to existing statute AS 47.80 stating that the definition of developmental disability would be "as amended by a statutory umbrella for P.L. 95-603," services for this population would be provided. A.S. 47.8[illegible]

Thank you for your support of these needed programs and services.

Sincerely yours,

Marsha Buck

MEMORANDUM:

TO : Representatives Buchholdt, Munson, Chatterton, Hurlbert, Miles, Barnes and Beirne

FROM: James L. Rich, President

RE : Support of ALTERNATE HB 998

The Alaska Association of Administrators for Special Education is very concerned about alternative living facilities for severely handicapped children and young adults. We strongly support the Orthopedically Handicapped Action Group (OHAG) and their proposal for the construction of a barrier-free facility to house both long term and short term severely orthopedically impaired young adults. The State of Alaska is currently sending many of these individuals out of Alaska for their care. We feel that this solution is both expensive and totally inappropriate. We would hope that the State would seriously consider development of an Alaskan alternative for this group of handicapped individuals.

Therefore, AAASE requests that you support the alternate version of House Bill 998 to develop a residential program for mentally alert young adults who are severely orthopedically handicapped. For the purpose of planning this housing project, it is hoped that you would appropriate seed monies to HB 998 or support inclusion of the seed money request in House Bill 60.

Thank you for your consideration of this proposal.

State of Alaska
Capitol, Room 112
Juneau, AK 99811

Dear Representative Bucholdt:

The purpose of this letter is to emphasize my support of House Bill 998. I am delighted to see that you are going to sponsor this bill. It is something that has long been a need in the community and for the state.

I understand there is a possibility that this bill might have been inadvertently directed toward medical care for children rather than severely disabled young adults. Although I do not for a moment denigrate the needs of handicapped children, I do feel that our current need in the rehabilitation community is for more and better services for severely handicapped young adults, many of whom are institutionalized in less than acceptable facilities.

I also heartily recommend favorable action on House Bill 60 to initate planning and implementation of a residential structure for this above-described population. I feel that the requested funding in House Bill 60 to initiate preliminary planning and eventual implementation of a residential structure for this population is imperative. Most severely physically handicapped young adults in Anchorage are institutionalized in less than adequate facilities. Moving these individuals into an appropriately designed and staffed residential structure will not only enable them to improve their independent living possibilities, but will enable them to seek and obtain gainful employment. This will, in turn, improve their self-concept and image and enable the taxpayers to receive some relief by removing them wholly or partially from public support.

I encourage you to support these two pieces of very needed legislation. I know from personal experience of your dedicated and knowledgeable service to the handicapped community. Thank you very much for considering my recommendations.

Sincerely,

Gary L. Aanes

Dear Representative Bucholdt:

The Residential Services Forum which is composed of individuals as per the attached sheet supports the intent of House Bill 998. We do recommend that this legislation be directed to mentally alert young adults rather than children as indicated in the present draft of the legislation.

We also support the request for seed money as spoken to in House Bill 60 to initiate action on a residential structure for this population group.

Your support of these two pieces of legislation is encouraged.

If you have questions, please feel free to contact me.

Dear Representative Bucholdt:

I want to express my support of House Bill 998, with some modification of the definition of the population discussed. I feel this legislation should be directed to mentally alert young adults rather than children as outlined in the present draft.

I also endorse the request for seed money as spoken to in House Bill 60 to initiate planning and action on a residential structure for this population. In most circumstances, their housing situations are not conducive to vocational training and placement.

I am hopeful that you will support these two pieces of legislation. If you have any questions or concerns, please contact me at 243-5600.

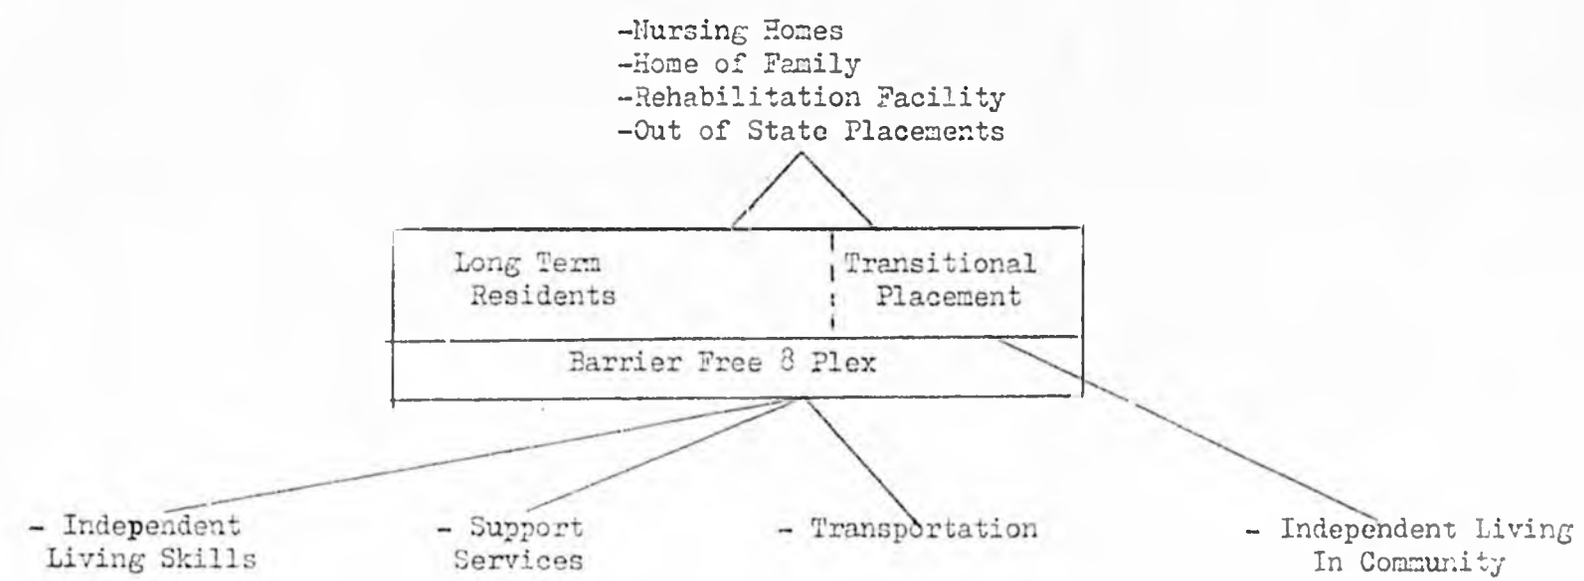
Residential Care Program For

Mentally Alert Young Adults Who Are Severely Orthopedically Handicapped



THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

This is a proposed bill by Audrey Hanes

Introduced:
Referred: Health, Education & Social Services

IN THE HOUSE

~~BY THE HEALTH, EDUCATION~~ AND ~~SOCIAL SERVICES COMMITTEE~~

HOUSE BILL NO. 998

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing a least restrictive residential care program for mentally alert young adults needing continuous medical care."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 47 is amended by adding a new chapter to read:

CHAPTER 9. RESIDENTIAL CARE PROGRAM FOR YOUNG ADULTS.

Sec. 47.09.010. RESIDENTIAL CARE PROGRAM. There is established in the Department of Health and Social Services a residential care program to provide needed services for mentally alert young adults who require continuous medical care, but who do not need to be kept in a nursing home or hospital. Care for the young adults in this program shall be provided in residential rather than institutional settings.

Sec. 47.09.020. ADMINISTRATION. (a) The department shall administer the residential care program. It shall adopt regulations to provide minimum standards for

(1) residential care facilities, including accessibility requirements;

(2) medical services to be provided;

(3) live-in and day care programs; and

(4) staff requirements.

(b) Within the limits of appropriations made for the purpose, the department may enter into contracts for services with local or state agencies which are able to provide the required residential care for young adults.

Sec. 47.09.030. ELIGIBILITY REQUIREMENTS. (a) To be eligible

for long term services under the residential care program, the young adult must

(1) be at least 18 years of age and under 40 years of age;

(2) be under the care of a physician who diagnoses the young adult's condition as sufficiently serious to warrant consideration for the program;

(3) be in danger of institutionalization or of being placed out of state for purpose of receiving intensive support services;

(4) be diagnosed as having

(A) multiple physical impairment with congenital or acquired defects of the central nervous system or sensory motor systems requiring continued dependency for activities of daily living such as eating, hygiene, grooming, etc., and dependent for chronic or intermittent skilled medical care such as delivery of medications, nursing care, respiratory care, OT, PT, and communication on other rehabilitative measures; as well as impaired use of two or more extremeties, causing the individual to be dependent on a wheelchair or other total body mobility device; or

(B) emotional and social adjustment disorders resulting from a significant motor impairment which impedes the person's ability to function normally in society.

(b) To be eligible for short term, transitional services under the residential care program, the young adult must

(1) be at least 18 years of age and under 40 years of age;

(2) be under the care of a physician who diagnoses the young adult's condition as sufficiently serious to warrant consideration for the program;

(3) be significantly motor impaired as to require training in independent living skills and have the potential for community living in less restrictive environment.

Sec. 47.09.040. PROGRAM PLAN (a) In cooperation with the client, the client's legal guardian and the client's physician, a written program plan shall be developed by the department for each young adult accepted for the residential care program.

(b) The plan shall provide for the coordination of all required services. The services to be available as required by each individual's needs shall include

(1) nursing care;

(2) medical care, including any needed treatment by a specialist on a referral, consultative, or on-going basis;

(3) respiratory therapy or devices;

(4) routine and emergency dental care;

(5) nutritional consultation from a trained professional;

(6) communication disorder therapy;

(7) physical and occupational habilitation and rehabilitation therapy and devices;

(8) education;

(9) leisure time activities and opportunities for recreation and socialization in the community;

(10) group or individual psychological counseling;

(11) transportation; and

(12) employment.

(c) A portion of these required services can be provided from state and local agencies having primary responsibility for such services, but the ultimate responsibility for ensuring and coordinating the delivery of all necessary services shall rest with the department.

Sec. 47.09.050. COST. Within the limits of appropriations made for the purpose, the residential care program shall be made available to eligible young adults at no cost or at partial cost. However, medical insurance

benefits available to a young adult shall be used as payment for the young adult's medical treatment under the residential care program.

Sec. 47.09.060. DEFINITION. In this chapter "department" means the Department of Health and Social Services.

March 19, 1980

IN REPLY REFER TO:
10.1HDH

Audrey Aanes, Chairman
OH Interest Group
Wahley Center
2220 Nichols
Anchorage, AK 99504

Dear Ms. Aanes:

We have been directed to provide response to your letter of February 11, 1980 to Mort Leeds of HUD Central Office.

The most viable and workable program for handicapped housing within the National Housing Appropriation is the Section 202 program, which provides direct loan financing. The interest rates for this program at this time are as follows: Interest during construction is 9.0 percent per annum and 8.5 percent per annum thereafter. Each year a specific amount of loan funds for Section 202 is set aside by HUD for use in developing senior citizens' and handicapped housing. There are many more applications than can be funded in each annual appropriation. Therefore the applications are funded on a competitive basis based on their merits, and unsuccessful proposals must be resubmitted annually.

The Anchorage Area Office has not received an allocation of Section 202 funds in FY 1980. If applications are submitted, we may receive some 202 funding in FY 1981. There are also limited discretionary authorities in the office of the Asst. Sec. for Housing.

Included for your information is a copy of HUD 4571.1 Rev. which describes processing procedures for the program. If you wish to prepare an application this handbook will provide most of the information you need, as well as explain HUD processing procedures.

Obtaining Section 202 funding is a difficult and complicated process. While we in the Anchorage Office are prepared to render what assistance we can, your organization should be prepared to spend considerable time and funds in preparation of an application. The Department expects and requires demonstration of a long term well-orgainzed commitment from 202 sponsors.

Please address your questions regarding an application to Bill Arterburn, Multifamily Housing Representative at 271-4177.

Sincerely,

John G. Duffy
Area Manager

Anchorage, Alaska 99504

Dear Audrey:

We certainly commend your energy and interest for handicapped individuals in Alaska.

The "severely handicapped, medically fragile, young adults, with average intelligence" do require "skilled" care. Your source of expertise for meeting their needs is the Department of Social Services, Division of Certification and Licensure. With explicit guidelines from the Federal and State regulations for the provision of skilled care, we feel many of your questions will be answered. Unfortunately, it is a financial fact that it is next to impossible to cost-effectively provide care for less than one-hundred patients. You may want to contact Hope Cottage for cost information that may be similar, as they do have group homes.

From your letter you infer that a less restrictive environment is beneficial to "medically fragile, severely handicapped" persons. The only restriction in institutional settings that we are aware of is the reimbursement system that does not allow meeting more than basic physical and mental needs.

As 90% of our patients are Medicaid-funded, we feel that until we can provide basic care for all, we cannot support specialized care for a few.

The Nakoyia population, per Computerized Patient Assessment, December 31, 1979 statistics showed that 31% of the patients were less than 60 years of age. We wish you the best of luck in developing "small group home type" skilled care facilities as we agree that some of these patients' psycho-social needs could possibly be better met in smaller living situations.

We welcome your visits to Nakoyia and any further need for information in regards to your project.

Sincerely,

NAKOYIA HEALTH CARE CENTER

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
HOUSE BILL NO. 998

"An Act establishing a residential medical care program for children needing continuous care."

House Bill 998 provides authority to the Department of Health and Social Services to provide directly, or through contracts, needed medical care in a residential setting the certain chronically-ill children. To be eligible for assistance, the child must:

(1) be under the age of 18 years;

(2) be diagnosed by a physician as having a covered serious medical condition in need of this type of care;

(3) be presently residing in, or in immediate need of residing in a hospital or other medical facility in order to receive intensive support medical services; and,

(4) be suffering from a chronic medical condition listed in Section 47.09.030(4) of the bill.

The Department is responsible for developing a written program plan for each child in cooperation with the child's parents or legal guardian and the child's physician. Subject to the limits of the appropriation, the residential medical care program shall be made available to eligible children at no cost or partial care. The State is required to bill any existing family medical insurance benefits which would cover the costs of care provided under this program.

Overview of this Type of Care in Alaska

Since the bill is primarily focused on the provision of medical services, this level of care would be classed as intermediate or skilled nursing home services, rather than residential care. Residential care is primarily concerned with non-medical support services (such as bathing, dressing) for persons who cannot live independently and are in need of some degree of supervision, but do not require medical or nursing care on a regular basis.

The Department of Health and Services is able to cover such nursing home care for these children through either the Medicaid or General Relief-Medical programs. Currently, the Division of Public Assistance is paying for care for 71 persons aged 18 years of age or younger, at the following facilities:

POSITION PAPER/Department of Health & Social Services

Nursing Home	No. of Children
Harborview Development Center (Valdez)	33
Hope Cottages (Anchorage)	28
Careage North (Fairbanks)	2
Nakoyia (Anchorage)	6
St. Ann's (Juneau)	2
Total	71

Only two (2) nursing home programs, Harborview and Hope Cottage, in the State have specialized care for children, and these programs are primarily for the developmental disabled with mental handicaps.

Nursing home care in Alaska is very costly, averaging about $3,000 a month. Most insurance programs do not cover such care. Medicaid currently pays for the costs of care for a significant number of children residing in nursing homes. The State also limits the parental financial responsibility to $50 a month for children in intermediate care facilities for the mentally retarded.

Currently on a statewide average, nursing homes have an occupancy rate of approximately 70%, leaving 30% of the home's available beds unfilled. The occupancy range of the occupancy rate is from 41% (Careage House in Anchorage) to 100% (Norton Sound Hospital in Nome). (Attachment #1)

Discussion of Issues

1. Clarification of Nursing Home and Residential Care Services - The bill appears to confuse residential care and nursing home care services. Since the bill appears to address the provision of medical services, in lieu of hospitalization, this type of care would be classified as intermediate or skilled nursing care services. It would be helpful for the Committee to consider specification of level of care services to be provided:

   a. intermediate (ICF) and skilled nursing home (SNF) services;

   b. residential care services; or

   c. both intermediate and skilled nursing home services and residential care services.

2. Certificate of Need Requirements - In the implementation of this Act, the health care facilities that would provide this service would be subject to the health care facilities certificate of need statute. Each residential medical care facility as proposed would be reviewed in light of the existing facilities and the degree to which appropriate services are being provided or can be provided, and the degree of utilization of these facilities.

POSITION PAPER/Department of Health & Social Services

3. Modification of Existing Programs Rather Than of Construction of New Facilities - Certainly children have special needs and most generally SNF and ICF facilities in the State do not especially tailor their programs to meet these special needs. The Department favors the use of programs that meet children's needs in the least restrictive environment for the children's care, instead of constructing new facilities.

4. Expansion of Specified Medical Conditions - The bill presently details rather specifically the chronic conditions that the Department is able to cover under this program. This list of conditions excludes coverages of other chronic conditions that affect children that may require continuous medical care. We would recommend more general language to allow for coverage of needed services for persons with significant disabilities. The Department recommends amending AS 47.80.900(7) to include the federal definition of developmental disability as contained in Title V of P.L. 95-602 (Attachment #2). This amendment would open the range of services as specified in AS 47.20 to this additional population.

5. Age Cut-off of 18 years - The Department questions the inclusion of the age of 18 years as a cut-off for services. These children have long-term disabilities and a continuation of services above 18 might be appropriately addressed, as well, in this bill.

Department Position

The Department approves the concept of programs designed to meet the specific needs of the clients, but believes that amendments are necessary to effectively and efficiently implement this concept.

Current Statute

Sec. 47.80.900. DEFINITIONS. In this chapter

(1) "council" means the Governor's Council for the Handicapped and Gifted created by sec. 30 of this chapter;

(2) "department" means the Department of Health and Social Services;

(3) "facilities for persons with handicaps" means publicly or privately operated facilities, or specified portions of facilities, designed primarily for the delivery of services to these persons; the term includes but is not limited to residential facilities;

(4) "habilitation" means education or training for the handicapped to enable them to function better in society;

(5) "least restrictive setting" means a residential or other setting for meeting the needs of a handicapped person which requires the least amount of restriction of personal liberty by enabling the person to function in as normal an environment as possible and to live as normally as possible, within the limitations of the handicap;

(6) "person with a handicap" means a person with a developmental disability as defined in (7) of this section or a person who is hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, orthopedically or otherwise health impaired, or who has a specific learning disability; the term includes but is not limited to "exceptional children" as defined in AS 14.30.-350(1) and AS 47.20.050(1);

(7) "person with a developmental disability" means a person having a disability which

(A) is attributable to

(i) mental retardation, cerebral palsy, epilepsy, or autism;

(ii) any other condition found to be closely related to mental retardation because the condition results in impairment of general intellectual functioning or adaptive behavior similar to impairment resulting from mental retardation; or

(iii) dyslexia resulting from a disability described in (i) or (ii) of this subparagraph; and

(B) constitutes a substantial handicap to the person's ability to function normally in society;

(8) "residential facility" means a publicly or privately operated facility which provides 24-hour care for four or more persons with handicaps, excluding family, foster family, or adoptive homes;

(9) "substantial handicap" means a disability which prevents or substantially impedes the person's participating in and benefiting from the social, economic, educational, recreational, or other opportunities generally available to peers in the community who are not similarly handicapped.

Current Federal → Definition of "Developmental Disability" as defined in Title V of Public Law 95-602

The term "developmental disability" means a severe, chronic disability of a person which--

(A) is attributable to a mental or physical impairment or combination of mental and physical impairments;
(B) is manifested before the person attains age twenty-two;
(C) is likely to continue indefinitely;
(D) results in substantial functional limitations in three or more of the following areas of major life activity; (i) self-care, (ii) receptive and expressive language, (iii) learning, (iv) mobility, (v) self-direction, (vi) capacity for independent living, and (vii) economic sufficiency; and
(E) reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. The bill does not specifically address the construction of new facilities. Since the Department believes that the redirection of programs in existing facilities would be the most cost-effective approach to the problem, we have not included any cost for construction of buildings.

2. The only privately run facility in the state for this age population is Hope Cottage. The daily rate at Hope Cottage presently for this type of care is $130 per day.

3. The population to be served is estimated to be 10 individuals in Anchorage and 5 individuals in Fairbanks.

4. Inflation in future years is 10%.

Prime Sponsor (First Legislator Named)

Prepared by: D. Behr Date: 4/21/80
XXXXXXX/Office: Commissioner PH: 3030

33-[illegible] (Rev. 12/79)

5. Implementation of the program would require promulgation of regulations and the issuance of a contract in accordance with the State administrative policies. We estimate this will necessarily delay the implementation of first year of the project, such that only a 9-month appropriation will be needed.

FY 81 Calculations:

Anchorage / 10 children	X	FY 80 Rate + Inflation / $143	X	9 Mos. of Svc. / 270 days	=	Total / $386,100
Fairbanks / 5 children	X	FY 80 Rate + Inflation / $143	X	9 Mos. of Svc. / 270 days	=	Total / $193,050
				Grand Total		$579,150

FY 82 Calculations:

Anchorage / 10 Children	X	FY 81 Rate + Inflation / $157	X	Days / 365	=	Total / $573,050
Fairbanks / 5 children	X	FY 81 Rate + Inflation / $157	X	Days / 365	=	Total / $286,525
				Grand Total		$859,575

1007

POSITION PAPER/Department of Health & Social Services

POSITION PAPER on

HOUSE BILL NO. 1007

For an Act entitled: "An Act relating to comprehensive health planning."

House Bill No. 1007 amends existing statute AS 18.07 to comply with amendments to the National Health Planning and Resources Development Act, as incorporated in PL 96-79, signed into effect October 4, 1979. Such amendments are required of all states wishing to participate in and receive funding under the Public Health Service Act, the Community Mental Health Centers Act, the comprehensive Alcohol Abuse Act and Alcoholism Prevention, Treatment and Rehabilitation Act and the Drug Abuse Office and Treatment Act of 1972. Alaska receives an estimated $5.6 million annually under the four above-named acts.

The purpose of the National Health Planning Act is to encourage consumer and provider involvement at both the local and the state level in planning for and implementing a health care system in Alaska that provides equitable access to quality care at reasonable costs. This process requires the development of local health plans which are incorporated into a State Health Plan; this document is to serve as a guide to the Governor and the Legislature for health policy development and resource allocation.

The incorporation of Article 2 as a new section within AS 18.07 amends the State's existing certificate of need program to bring it into conformance with the new federal requirements outlined in Section 1532 of PL 96-79. The primary additions to this section fall in three categories: major medical equipment, health maintenance organizations and coverage of rehabilitation facilities. Each of these issues is addressed in detail below:

Major Medical Equipment

Section 1527(e) adds a requirement for certificate of need review of major medical equipment costing in excess of $150,000 which will be used for inpatients regardless of its location. Major medical equipment located outside of a health care facility may be exempt from the review if: 1) the sponsor notifies the state agency in writing of intent to purchase such equipment; and 2) the state agency determines that the equipment will not be used for inpatients.

The purpose of this provision is to close a "loophole" which would allow a physician to purchase major medical equipment for a health care facility and thereby avoid the requirement for a certificate of need. Although this provision is required to be in effect in each state, its impact will not be significant in Alaska, since Alaskan physicians generally rely upon hospitals to provide such equipment.

POSITION PAPER/Department of Health & Social Services

Health Maintenance Organizations

Section 1527 has been amended to exempt certain health maintenance organizations (HMOs) which have enrollment of at least 50,000 from certificate of need review. The impact of this provision is not expected to be significant since there are no such HMOs in Alaska.

Rehabilitation Facilities

Section 1527 has been amended to include rehabilitation facilities as facilities subject to certificate of need review. Rehabilitation facility is defined to mean inpatient or outpatient facilities which are operated for the primary purpose of assisting in the rehabilitation of disabled persons through an integrated program of medical and other services which are provided under competent professional supervision. This provision will bring a few facilities under review which previously had not been required to obtain certificate of need.

The amendments to the national planning law, as incorporated in P.L. 96-79 and addressed by reference in House Bill No. 1007 also modify the planning process, strengthen the role of a Governor in approval and use of the State Health Plan and introduce organizational changes within the planning boards and advisory committees. These modifications are highlighted on the attached chart; specific backup material can be found in a more extensive position paper on this matter.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This fiscal note relects the results if legislation is not passed to enable the State Health Planning & Development Agency (SHPDA) to carry out its full responsibilities under the "Health Planning & Resources Development Amendments of 1979" (Public Law 96-79). P.L. 96-79 significantly revises Title XV and XVI of the Public Health Service (PHS) Act, enacted by the "National Health Planning & Resources Development Act of 1974 (Public Law 93-641). Consequently, amendment to AS 18.07, which adopted P.L. 93-641 provisions, is necessary to adopt the revisions in P.O. 96-79. If the SHPDA is not fully empowered by State statute by January 1, 1981 to conduct tne "State Program" mandated by the amended Title XV of the PHS Act, the SHPDA designation agreement with the Federal government will either be terminated, or the SHPDA designation agreements made conditional for one year and the designation then withdrawn. This fiscal note depicts the effects of the withdrawal of "full designation of the State Health Planning & Development Agency (SHPDA) and reversion to "conditional" designation for the period 1-1-81 - 12-31-81, followed by termination of the SHPDA designation agreement. The impact on Federal funding woul be as follows based upon the current level of $5.6 million in Federal grants involved throughout the State as described in the attached listing of grantees and grants.

House Bill 1007 - An Act Relating to Comprehensive Health Planning as outlined in Public Laws 93-641 and 96-79

Issue Area	Current Status AS 18.07	Proposed Change incorporated in HB 1007	Rationale for change	Impact
CERTIFICATE OF NEED				
Coverage of Major Medical Equipment Purchases	Prior review and approval required in institutional setting	Prior approval required for equipment costing more than $150,000 regardless of location	To resolve a gap which previously allowed physicians to purchase major medical equipment for a facility and thereby avoid the requirement for a review	Since Alaska physicians generally rely on hospitals to purchase such equipment, the impact should be insignificant
Health Maintenance Organization coverage	Alaska presently has no HMOs	Exempts certain HMOs which have enrollments of at least 50,000 from CON review	To allow HMOs to develop without constraint from CON	Since Alaska currently has no HMOs, impact would be insignificant
Coverage of Rehabilitation Facilities	Not covered	Will make rehabilitation facilities subject to CON review	To cover all health care services and settings in review process (with exeception of HMO)	Would cover a few Alaska facilities, depending upon the Federal Regulatory Definition
PLANNING CYCLE				
State Health Plan	Done on an annual basis	Done every 3 years with appropriate annual revisions/updates	To provide a longer cycle for plan development and opportunity to implement and evaluate plan	Should allow longer range view of Alaska's health systems and better use of resources to plan for system and status improvements

Issue Area	Current Status AS 18.07	Proposed Change incorporated in HB 1007	Rational for change	Impact
INVOLVEMENT OF OTHER HEALTH RELATED ENTITIES	Done on voluntary, coordinative basis	Includes involvement of authorities from mental and public health and substance abuse	To ensure close working relationships and integration where possible among various planning entities	Fosters continuing working relationships and avoids duplication and overlap
PLAN IMPLEMENTATION	Done on voluntary, coordinative basis	Appropriate agencies and authorities as designated by the Governor will carry out the parts of the State Health Plan which relate to State Government	To use the State Health Plan as a viable document to be used throughout State Government rather than being a document which could/would only be implemented voluntarily	Creates closer working relationships among authorities
GOVERNOR'S ROLE	Governor receives State Health Plans after they are completed. He appoints members of the statewide Health Coordinating Council (SHCC)	Governor can accept or reject State Health Plan on the basis of whether it meets statewide needs assessment. May also appoint chairman of SHCC	To provide a stronger role for the executive branch since the State Health Plan is to be used to guide State health resource allocation and since the SHCC is to advise the State on health policy matters	Affords mutual commitment between State Government and an advisory body
VOLUNTARY DISCONTINUANCE OF UNNEEDED HOSPITAL SERVICES	Hospitals can currently discontinue unneeded services following appropriate input	Formalizes mechanism for discontinuance or conversion of uneeded hospital services; authorizes limited funds for such changes	To encourage the best utilization of facilities and services to meet a target population's need	Alaska's situation is one of access rather than excess. The conversion feature may be useful
HEALTH SYSTEMS AGENCY (HSA) BOARD MEMBERSHIP	Members may currently be suggested/nominated by existing board	Involves the community to a larger extent in the board selection process	To avoid a self perpetuation of these private, nonprofit corporations	May alter composition slightly among Alaska's three HSA boards

Issue Area	Current Status AS 18.07	Proposed Change incorporated in HB 1007	Rational for change	Impact
DATA COLLECTION	Agencies are to use existing data bases wherever possible	Requires Health Systems Agencies to collect information from all hospitals on the rates charged for the most frequently used services and make such available to public	To provide public information/ awareness on health care costs; and foster competition	Will give Alaskans information on hospital costs
NATION HEALTH PRIORITIES	Currently 10 priorities	Adds priorities for cost containment and encourages competition in allocation of health services	To develop additional mechanisms for dealing with rising health care costs	Will not have great impact where access is more important than dealing with an excess

MEMORANDUM

TO: Representative Jim Duncan

FROM: Susan Brody and Jack Fargnoli
Issues Analysts

RE: Day Care Assistance--Alternatives for Legislative Action
Research Request No. 50

This memorandum is in response to your request for an evaluation of possible changes in the present Day Care Assistance Program, for purposes of improving the long term financial stability of day care facilities. Our evaluation is based on interviews with 25 day care center operators throughout the state, and discussions with Lianne Wesley, administrator of the State day care program, and municipal program directors in Anchorage, Fairbanks, Juneau and elsewhere. Our interview findings are summarized in the Appendix to this memorandum and in our two earlier memoranda to you on the day care issue (February 11 and March 5, 1980).

The following alternatives for legislative action are discussed below:

- amendments to the existing day care assistance statute;
- supplemental subsidies to day care centers;
- a State grant program to provide funds to day care centers for equipment acquisition, capital improvements, and staff training; and,
- a State revenue sharing program for day care services.

The grant program could be initiated in conjunction with either of the first two alternatives. We have not had an opportunity to estimate the budget implications of these alternatives but will do so in another memorandum to be completed by mid-April.

AMENDMENTS TO THE DAY CARE ASSISTANCE STATUTE

Our interviews indicate that three of the primary problems in the operation of the current State program are: (1) escalating operating costs of day care centers; (2) the present State method of reimbursing day care centers for services provided; and, (3) the increasing financial burden of day care costs on families who receive little or no subsidy from the State.

Several amendments to the existing day care assistance statute (AS 44.47.250-310) are suggested below as a means of alleviating these problems.

1. Require the Department of Community and Regional Affairs to establish rates of payment which reflect the full cost of services provided by day care facilities, and review and revise those rates annually.

   Our interviews indicate that the current rates paid by the Department of Community & Regional Affairs for day care services do not reflect the actual costs of providing services in many centers. Even in those centers where the rates "appear" adequate to cover costs, this may be the case only because staff salaries are extremely low ($3-$4/hour), or because rents or other basic expenses are subsidized. If rates are to keep pace with likely increases in operating costs some formal mechanism of rate setting and review should be established. It may be especially important to review the current rates paid for infant care, as our interviews indicate that the lack of adequate rates has discouraged many centers from providing services for infants.

   The Department of Health and Social Services currently operates under statutory provisions which establish a fairly concrete method for determining and reimbursing

the full cost of certain services under its jurisdiction. AS 47.40.040 states that the "full cost of services shall be determined by the per person, per day cost in the preceding fiscal year plus a proportionate share of anticipated cost of living and staff salary increment increases for the fiscal year for which the full cost of services... is being determined" (statute attached). Certain expenses are specifically excluded from the determination, such as major capital expenditures, religious training or education, and services which exceed the requirements of the department.

This method of determining costs of care could also be used in the present Day Care Assistance Program. It would eliminate the lag which now occurs between actual increases in the costs of care, and the decision to adjust rates to reflect those increases. It would also allow day care facilites to offer adequate salaries, and, thus, decrease the extremely high rate of staff turnover which now exists.

A requirement for rate setting and review could be added to AS 44.47.250 (attached), which defines the powers and duties of the Department of Community and Regional Affairs in regard to the Day Care Assistance Program.

2. <u>Require the State to reimburse day care providers, for services rendered to eligible families, on the basis of monthly enrollment rather than actual daily attendance</u>.

At present, the State reimburses day care centers only for those days on which the children of subsidized families actually attend. This method of reimbursement is practied by both the Department of Community and Regional Affairs and the Department of Health and Social Services, and results in centers not being able to recapture a significant portion of fixed costs which do not disappear simply because children are not in attendance on a particular day, or for a number of days each month Day care centers are free to bill families <u>not</u> receiving subsidies, however, on an enrollment

basis (a practice many centers have adopted).

The number of subsidized children served as a proportion of total enrollment varies from center to center. For nine of the centers we intereviewed, less than 25 per cent of their enrollment consisted of children receiving subsidies either through the Community and Regional Affairs program or through the Department of Health and Social Services. For an equal number of centers interviewed, however, 50 per cent or more of their enrollment was comprised of children receiving subsidies. An extreme example is the Childrens' Community Center in Juneau, where all but one of the children in their care receive State subsidies.

As the number of subsidized children enrolled in a center increases, the larger becomes the percentage of operating costs reimbursed on an attendance basis only. When this is coupled with a low rate of attendance, day care centers are likely to suffer financially. In fact, our calculations suggest that this may be the most important component of the monthly operating deficits which many centers are currently experiencing.

The difference between enrollment and actual attendance at centers seems clear among the centers we contacted. Of the twenty-five day care centers surveyed, almost all had actual attendance levels that fell below the number of children enrolled in the center. The majority estimated that, on most days, attendance averaged around 80-90 per cent of enrollment, while several centers indicated that their attendance was as low as 65-75 per cent of enrollment. Absences are often the result of sickness, but may also increase dramatically at certain times of the year. Day care centers typically experience significant declines in attendance during the summer months, and during December and January when families take vacations.

To understand the financial implications of reimbursing centers for costs on an attendance basis

only, we calculated the monthly operating costs for two hypothetical centers which have characteristics typical of many of the centers interviewed:

Consider one center with an enrollment of 75 children (all 2 years and over), of which 40 (53%) are receiving subsidies from the State, and where attendance averages about 80 per cent of enrollment. $18,900 represents the total monthly operating costs for the center. (75 full time children X $12/day X 21 days/month = $18,900). This assumes that most of the standard operating costs (salaries, rent, insurance, maintenance, etc.) are fixed costs which must be paid regardless of whether all the children attend. Since 40 children out of 75 are receiving subsidies, 53 per cent of these costs are subject to reimbursement on an attendance basis only (53% X $18,900 = $10,017). If the subsidized children are absent from the center approximately 20 per cent of the time, then $2,003 ($10,017 X 20%) of the center's fixed operating costs will not be reimbursed by the State. In other words, the center might expect to run an operating cost deficit as high as $2,000 per month.

Even for a center with fewer subsidized children and a better attendance record, monthly operating cost losses could be substantial. Consider a second center with 50 children, where 12 of the children (25%) receive subsidies. If these children are absent 10 per cent of the time, the monthly deficit would be $315 per month, as indicated below:

- 50 children X $12/day X 21 days = $12,600 monthly operating costs

- $12,600 X 25% = $3,150 X 10% = $315 per month loss.

A provision requiring the Department of Community and Regional Affairs to reimburse costs (through municipalities) on an enrollment rather than an attendance basis could be added to AS 44.47.300, which establishes how benefits shall be paid. A similar change in the reimbursement policies of the Department of Health and Social Services might be made to insure that centers are not penalized

for offering day care services to children participating in those programs. In the past, the Division of Social Services has followed the lead of the Department of Community and Regional Affairs in the method of reimbursement used and the rate paid.

(3) Require that the income levels which qualify a family for day care assistance be reviewed and adjusted annually to reflect increases in the statewide median income.

Currently, AS 44.47.280 requires the Department of Community and Regional Affairs to determine the eligibility of families for day care assistance based on the net income of the family, the number of children in the family, and whether there is one parent responsible for the care of the family. No mechanism is established, however, for periodically adjusting the qualifying net income levels as incomes rise.

If the desired goal is to identify a population in need of assistance (i.e., "low income" as stated in the statute), it may be helpful to define "need" in terms of how a family's income relates to the median income within the state or a particular region. Then, as the statewide or regional median income rises, the income level qualifying a family for assistance would also rise. Without such an adjustment, fewer and fewer families would qualify for assistance as salaries increase to conform with cost of living increases.

The median family income for Alaska is estimated annually by the U. S. Bureau of the Census (with a 1-2 year time lag), and provides a relatively simple mechanical basis for making this kind of annual adjustment. Other measures exist, such as the mean family income of families and the mean level of personal disposable income; but the median family income would appear to be the soundest basis for distinguishing between "low" and "middle" income families, and thus the most straightforward measure for adjusting family income eligibility levels.

The ratio of family income eligibility levels to the statewide median family income could be established for a base year, and that ratio could then be maintained as the statewide median income rises. For example, the qualifying net income for day care assistance is currently $16,000, or 58 per cent of the statewide median income ($27,572 in 1978). Under the proposed method, if the median family income increased by 8 per cent, the income level qualifying a family for day care assistance would also rise by 8 per cent, to $17,280.

We discussed this possible means of adjusting family income eligibility levels with Jim Sullivan, economist with the Division of Economic Enterprise. He believes it to be a satisfactory method, but also noted that the method would be somewhat more accurate if movement (up or down) in the statewide median income level were also adjusted for movement in the statewide consumer price index, as salary levels often lag behind increases in the cost of living.

A provision requiring this kind of annual adjustment of family income eligibility levels could be added to AS 44.47.280, which establishes the eligibility of families for day care benefits.

The three statutory adjustments described above probably would do much to alleviate the most pressing financial difficulties of day care centers and, to some degree (through annual adjustment of eligibility income levels), ease the burden of rising day care costs on families currently not qualified to receive subsidies. In the following three sections of the memorandum, several additional approaches are discussed which go farther in these respects, and which might be a basis for more comprehensive revision of the State day care statute (and program) in the future.

SUPPLEMENTAL SUBSIDIES TO DAY CARE CENTERS

In discussing any plan for increasing the current State subsidy rates, it seems necessary to consider the effects of such an action on non-subsidized families. The logic for

this is straighforward: if the current per-child subsidy is considered insufficient to cover the actual costs of providing care, then it is also likely that the present fees charged for non-subsidized families (which generally are keyed to State per-child subsidy amounts) are also inadequate. A reasonable expectation, therefore, is that any increase in the State subsidy amount would probably be accompanied by a rise in charges to non-subsidized families. Particularly in the long term, then, as day care costs (and subsidies) continued to rise, the accompanying increases in cost for non-subsidized families could become a significant burden.

One possible approach to mitigating this effect could be an additional subsidy to day care centers, per licensed slot, for both subsidized and non-subsidized children. This would be in addition to the current State subsidy for qualifying children, but would be in lieu of any anticipated increase in that subsidy. In effect, then, the additional subsidy would achieve the same effect as a rate increase, but would mitigate any increased financial burden on non-subsidized families. The chief drawback to this approach, of course, is that the ultimate cost to the State would be somewhat higher than simply raising the per cent per-child subsidy rate. Another consideration is that such an action would constitute a direct subsidy of families which are not "low income", and thus could blur the distinction achieved by eligibility criteria.

A more direct means of accomplishing the same purpose would be to consider increasing (as distinct from annually adjusting) the income levels currently used to determine subsidy eligibility. This would allow more families to qualify for a State subsidy, and thus alleviate for them the burden of a straightforward increase in subsidy rate levels. A further adjustment might be to consider revising the current statutory language of AS 44.47.250, to identify "middle income" as well as "low income" families as qualified for day care assistance. While the implications of an approach such as this have not been investigated in detail, some combination of these two options presumably could be found which would significantly reduce the burden of increasing day care costs on the majority of families.

STATE GRANTS TO DAY CARE CENTERS

While much of the preceding discussion has focused on possibilities for increasing State day care assistance, it is important to note that the emphasis consistently has been on minimal increases (income level and rate adjustments, billing procedures, etc.). Apart from these remedies, however, which attempt only to make day care operations economically feasible on a day-to-day basis, a number of other important needs remain largely unaddressed. The most important of these, as evidenced by most of the day care centers contacted, include (1) the need for major capital improvements, (2) training of staff, and (3) the acquisition of necessary equipment.

The most obvious source of relief is for day care centers to obtain loans which would satisfy some of these needs. Most day care centers, however, are in no shape financially to undertake any kind of debt repayment, and thus it is unlikely that a loan mechanism would afford any realistic possibility for relief. Furthermore, the only existing loan program specifically for day care centers (the Childcare Facility Revolving Loan Fund, administered through the Department of Commerce & Economic Development) limits loans to a maximum of $30,000, has very strict collateral requirements, and provides only for loans necessary to meet licensing or certification requirements.

Creation of a grant mechanism, therefore, would seem the most viable approach for assisting day care centers in obtaining needed capital improvements, training for staff, and equipment necessary for their daily operations. While determining the amount of funding for such a grant program would require more detailed information than has been collected to date, it seems clear that the administrative apparatus required is already at least minimally in place: specifically, the present Day Care Assistance Program within the Department of Community & Regional Affairs, and its established linkages with participating municipalities. Thus, the major concern would appear not to be the mechanical feasibility of such a grant program, but rather a matter of the ultimate costs involved and whether grants for such purposes (capital improvements, staff training, equipment) are considered part of a State responsibility to provide day care services.

Implementing such a grant program, however, would almost certainly require amending the current day care statute (AS 44.33.240-275) to provide for the expansion in authority. The only potential obstacle immediately apparent, as with all the day care adjustments discussed, might be the granting of public monies to those day care centers which are profit-making. (This topic has been discussed in an earlier memorandum; however, a legal opinion may be necessary which focuses on the distinction between providing public monies for day care services as a public purpose, as opposed to day care center improvements as a public purpose.)

REVENUE SHARING FOR DAY CARE SERVICES

A possible alternative to the existing State Day Care Assistance Program would be to incorporate day care services within the present State revenue sharing program. The possibility is a novel one, and has not been investigated in depth, but at face value at least appears to pose no legal or mechanical problems. A major advantage of this approach would be that a predictable amount of funding would be guaranteed for statewide day care services. The pro rata format for distributing shared revenues would also assure that funding for day care services would be distributed equitably among all Alaska communities with qualifying (i.e., licensed) day care centers. Yet an additional advantage would be that, as part of the total annual revenue sharing entitlement, day care funds would pass through municipalities, which at present already are the administrative nexus for State day care funding. Thus, although adjustments might be necessary, in general, no new administrative burden would be created for municipal governments.

One potential problem with this approach, however, is that the shared revenue entitlement each year is fixed, and therefore any inclusion of day care uses might result in a decrease in shared revenues currently allocated for other purposes. The total annual entitlement could be increased to compensate for the inclusion of day care services, by an amount equivalent to the expanded funding needs discussed in this memorandum, but it is unclear at this point what obstacles such an action might encounter. A corollary problem is that at present there is no statutory guarantee or requirement that municipalities must use shared revenues for the purposes identified in computing the allocation. Department of Community

& Regional Affairs regulations currently require only that a minimum of 20% of shared revenues, or the equivalent, be allocated by municipalities for specific purposes. Thus, statutory language similar to that currently provided for hospitals (e.g., "Funds received under this paragraph may be used only for day care centers (sic) and shall be apportioned among qualifying day care centers (sic) as the municipality may determine") probably would be required.

A further consideration is that the trend in shared revenue legislation may be away from specific per capita entitlements, and towards the combining of intended uses within general and miscellaneous shared revenue accounts (although specific exceptions may be possible). Part of the intent, for example, of proposed legislation such as CSHB 192 appears to be to permit municipalities more discretion in allocating shared revenues. This also raises the possibility that monies originally intended for day care services might ultimately be diverted at the municipal level to other purposes. (The converse possiblity, of course, is that such a general account mechanism could also allow municipalities to allocate extra shared revenues for day care services, if they so desired.)

Overall, however, it may be too soon to be considering the inclusion of day care services in the revenue sharing program. Unlike police services, hospitals, roads, etc., the overall contours of the statewide need for day care services are fairly indeterminate at present, and probably will not emerge with any definiteness until the State program has been in operation (as is, or expanded) for a longer period of time than it has been to date. Until specific day care needs and basic operating problems are better identified, therefore, it may not be wise to artificially fix concepts (and, in effect, funding levels) by including day care services within the revenue sharing model. Such action could be premature if undertaken at this time, and possibly might arrest or make difficult the emergence of a developing public service.

A final consideration worth noting, however, is that, in the long term, inclusion of day care services within the State revenue sharing program (if feasible) probably would address

the two most central concerns of day care advocates: guaranteed annual funding, and recognition of day care as an acknowledged public responsibility.

APPENDIX

A. Day Care Problems (Findings From Interviews)

B. Relevant Statutes

APPENDIX A

Day Care Problems: Findings From Interviews

Interview Sample

The issues and problems presented in this discussion are based on telephone interviews conducted recently with 25 day care center administrators throughout the state. Our sample represents 32 per cent of the 70 day care centers currently funded by the State, and a regional representation proportionate to population. The selection criteria for the centers contacted included enrollment capacity, regional representation, and participation in the Day Care Assistance Program. In our initial selection process, we attempted to identify those centers having financial problems, but also included centers operating in good financial health. Our sample is as follows:

City	Number of Centers	Number Interviewed
Anchorage	32	9
Fairbanks	19	2
Juneau	9	4
Ketchikan	2	1
Petersburg	1	0*
Sitka	2	2
Cordova	1	1
Bethel	2	2
Wasilla	3	1
Ft. Greely	1	0
Nome	1	1
Kotzebue	1	1
Kodiak	2	1
Anderson	1	0
Total:	70	25

*Although we did not conduct an interview with Petersburg, we are in receipt of a letter from the Center's Director that will be referenced throughout this report. The letter, submitted to the Juneau Association of Child Care Providers, details child care concerns in Petersburg.

Specific areas identified by administrators during our interviews are as follows:

- escalating operating costs
- attendance vs. enrollment
- capital acquisitions and improvements
- staffing costs
- insufficient salaries
- staff/child ratios
- decrease in CETA funding
- high cost of infant care
- need for additional infant care providers.

These, as well as other problems and issues identified, are discussed in the pages following.

Escalating Operating Costs

Fifty-two per cent of the providers interviewed are experiencing program deficits. The extent of deficit ranges in severity from slight to extreme. However, several of the administrators undergoing slight financial shortfalls have projected a trend of increasing deficits. No administrator interviewed perceived a means for recovery beyond programmatic reduction or rate increases.

A major factor contributing to the current deficits of day care centers is increasing operating costs. The rise in costs is especially apparent in the areas of salaries, supplies and other commidities. For example, center operators reported increases ranging anywhere from 25 per cent to 158 per cent in food costs between FY 77 and FY 79.

Attendance vs. Enrollment

Throughout their fiscal year, day care administrators find themselves frustrated by efforts to meet fixed costs with an undependable and fluctuating income. A chief cause of this frustration, according to administrators, is the fact that the

operating policies established by the Department of Community and Regional Affairs for the Day Care Assistance Program establish a payment structure based on attendance rather than enrollment.

In the course of our interviews, administrators complained that their operating costs cannot be adjusted to the daily fluctuations in attendance, which is the current basis for payment. Several managers mentioned this has weakened the organizational structure of their centers. Paula Fridgen, Supervisor of St. Joseph Child Care in Cordova, added:

> "Because the employment situation has been very poor here all winter, our child care volume has decreased 40 to 50 per cent. Because of this, trying to balance out workers and salaries is a real strain. Some of our workers don't know from day to day or hour to hour when they will be working. It's a real strain for the Director."

Day care center operators in communities experiencing seasonal economic downturns, such as Cordova, expressed special concern about the attendance method of reimbursement. In Fairbanks, one administrator stated her second largest cause for absence, beyond children's illness, to be parents' finances. Economic decline in the community results in parents' inability to pay for child care.

Capital Acquisitions and Improvements

The effects of inflation on operating budgets have caused many providers to neglect capital expansion and maintenance. In some instances, centers developed deficits when operators were forced to make emergency capital repairs and no funds were available for this purpose. In addition, several center operators noted the need for play equipment as an important component of quality care. Patti Meritt, Director of Play n' Learn in Fairbanks, stressed the statewide need for indoor/outdoor large-muscle equipment as essential for preventing developmental learning disabilities such as dyslexia, and added that day care centers do not have the funds necessary for equipment purchases of this magnitude.

Staffing Costs

A major concern of the day care operators surveyed is the large percentage of program budgets committed to staff salaries. Funds obligated toward salaries and benefits range somewhere between 75-85 per cent of a center's operating budget. Since FY 77, however, some centers have been experiencing salary cost increases which have surpassed the rate of inflation. Between FY 77 and FY 79, St. Ann's Nursery had a 51 per cent increase in salaries with only a 17 per cent enrollment increase. In other centers salary increases have not kept pace with inflation. One Anchorage center showed only a 13 per cent salary increase over a two-year period. Another Anchorage provider lowered salaries to prevent an impending deficit.

Insufficient Salaries

Most center administrators indicated that current salaries are not competitive with other similar job classifications in their communities. One indication of the effects of low pay scales is the high turnover rate among staff. The average length of employment in centers can be as low as three to six months, as is the case in Petersburg. Lee N. Robertson, Director of Carousel Child Care Center in Anchorage, stated a need she believes to be shared by all providers - - funding to "pay our staff an attractive and fair wage," thereby providing an incentive "to remain in this dedicated field, when the children we care for is our America of Tomorrow." Some center administrators expressed apprehension about their ability to attract quality staff with substandard pay scales. Vicki Malone, Director of Bethel Social Services, stated that neither of the community's two day care center administrators is drawing a salary commensurate with her skills and training.

Staff/Child Ratios

State regulations for licensed child care establish staff/child ratios, a requirement which all respondents agreed places demands on staffing volumes and costs.

Day care supervisors in Anchorage and Kodiak noted correlations between their programs' financial problems and the 1977 State regulatory amendment requiring more stringent staff/child

ratios. In Kodiak,both the manager and administrator of the U. S. Coast Guard Base Day Care Center stated that they periodically have considered removing the center from State affiliation in order to abandon the current ratio requirements. They have chosen not to exercise this option because they believe the ratios to be necessary, and because they do not want to sacrifice quality of care. They view the problem not to be the ratios, but rather the lack of income necessary to support the costs which required staff/child ratios entail.

Other day care managers viewed the currently required staff/child ratios as minimum guidelines, in contrast to their own centers' quality standards. The centers in Bethel, for example, offer comprehensive programs in child development which require a more strict ratio of 1:6 for children and 1:3.5 for infants. Several providers added that competent staff, rather than ratios, is the truer measure of quality care.

Decrease in CETA Funding

Voluntary or subsidized employment assistance is the most often mentioned means of coping with the high cost of staffing. Fifty-six per cent of the centers contacted are relying on CETA or some form of employment assistance. Administrators expressed concern to us about the transitory nature of these funds, particularly CETA funds. Directors indicated that they would have no means of absorbing losses without CETA positions. Vicki Malone of Bethel projected a combined deficit of $75,000 annually for the community's two centers. Administrators in Petersburg and Nome both stated that their centers "would fold without CETA." Excluding one administrative staff position, Kotzebue's child care center is staffed solely through 5 CETA positions.

Federal funding modifications of CETA during FY 80 have resulted in a decline in the total number of jobs per dollar. The effect of this on day care centers receiving CETA funds from the State will be a 47 per cent decrease in total positions by 9/30/80. This does not include any additional decreases projected by Indian Prime Sponsor funding sources.

High Cost of Infant Care

Currently, 72 per cent of the day care centers contacted provide infant care. Of these, 77 per cent consider the cost of

care for infants to be significantly greater than the care costs for children.* The Day Care Assistance Program's present rate schedule pays providers $15.00 per day for full-time infant care, or an additional 25% above the rate established for children. However, 38 per cent of the providers interviewed believe the cost of infant care to exceed child care costs by as much as two or three times.

The primary reason cited for the disproportionate costs of infant care is a mandatory staff/child ratio (1 care giver for every five infants) which is double that for child care. Most operators regarded the staff/infant ratios to be necessary, however, and in fact many considered them to be substandard. The issue raised, in short, was not the validity of the ratios, but the financial burden which they create.

Another problem cited with regard to infant ratios concerned their inflexibility. Several operators cited problems in increasing their enrollment of infants beyond five, since the addition of a sixth or seventh infant would require a second full-time staff person.

Operators also questioned the accuracy of the age breakdowns in the ratios. A Nome administrator found that infant care required a 1:1 staff ratio, and discontinued the service. An administrator in Bethel noted a similar disparity and extended her thoughts to the rate structure, stating that the adequacy of the infant care rate depends on the number of toddlers enrolled because toddler care is less expensive than younger infant care. In light of these concerns about staff ratios, it is interesting to note that the new federal standards proposed for adoption include the following divisions:

Age of Child	Staff/Child Ratio (Attendance)	Staff/Child Ratio (Enrollment)
0-2 years	1:3	1:3
2-3 years	1:4	1:4
3-5 years	1:8	1:9.

*Four centers were not polled on this question; the percentage could be higher.

Need for Additional Infant Care Providers

The final issue raised in the interviews concerned the need for additional infant care providers. Six of the centers interviewed currently maintain infant waiting lists, while two centers have considered establishing an infant care service, but all are apprehensive about the added expense. Marion Estelle, Director for Petersburg Day Care Center, cited an "extremely urgent need for more licensed care in Petersburg, especially to care for infants and school-aged children." The future of existing infant care programs is being questioned in some other centers. Ricki Govaars, Supervisor of The Nest in Ketchikan, has found infant care to be an overwhelming expense which is draining the financial health of the center. She may need to terminate her infant care program, she said, but is exploring other options because the center is the sole source for this service in Ketchikan.

Other Issues

Several approaches to other issues emerged during the course of our interviews which, while exceeding the boundaries of the current project, are noted below for future consideration:

- An examination of the ramifications of the State's renewed participation in (federal) Title XX (Alaska is the only state not participating at present in the federal program).
- A formalized mechanism for communication and resource coordination between day care centers and public schools.
- A modification of the Department of Health and Social Services Child Protection Day Care Program, to provide less transitory placement of children needing assistance.
- An exploration of the staff training needs of child care providers, for consideration in development of a statewide in-service program.
- Expansion of Day Care Assistance staff to upgrade monitoring capabilities and to add training functions.

APPENDIX B

RELEVANT STATUTES

Section
270. Conditions of receipt of benefits
280. Eligibility of families for benefits
290. Contributions by parent or guardian
300. Child care facilities
310. Definitions

Editor's note. — Section 1, ch. 66, SLA 1975, provides: "Findings of fact; purpose. The legislature finds that a need exists in the state for the provision of adequate day care facilities for families with low income. Adequate child care facilities allow the parent or guardian to work outside the home and in many cases to avoid the need for welfare and other forms of public assistance. The purpose of this Act is to establish in the Department of Community and Regional Affairs a program to aid low income families in urban and rural areas of the state in providing adequate care for their children."

---

* Sec. 44.47.250. Powers and duties. (a) The department shall

(1) implement and administer a program to assist in providing day care for the children of low-income families according to the requirements of §§ 250—310 of this chapter;

(2) establish standards of eligibility for day care benefits;

(3) contract for the care of children of eligible families;

(4) establish procedures to periodically review the needs of families receiving day care benefits;

(5) provide notification to the local government body of the request for a contract with a day care facility.

(b) The department may

(1) adopt regulations necessary for the performance of its duties under §§ 250—310 of this chapter;

(2) contract with municipalities to perform its duties under §§ 250—310 of this chapter within that municipality; with the approval of the department, the municipality may subcontract with another organization in the community to perform administrative duties;

(3) [deleted]

(4) contract with day care facilities outside of municipalities; to provide more effective administration of programs in the unorganized borough, the department may contract with another organization in the community or with an organization serving the region in which the community is located to perform administrative duties. (§ 2 ch 66 SLA 1975; am § 1 ch 272 SLA 1976)

Effect of amendment. — The 1976 amendment deleted "with day care facilities" following "contract" in paragraph (3) of subsection (a), and in subsection (b), substituted "municipalities" for "local agencies" in paragraph (2), added the language beginning "within that municipality" to the end of paragraph (2), deleted paragraph (3), which read "solicit recommendations from local governing bodies regarding local agencies which may provide contractual services under this section," and added paragraph (4).

Legislative committee report. — For report on ch. 66, SLA 1975 (HCS CSSB 120), see 1975 Senate Journal, p. 257, 1975 House Journal, p. 876.

Sec. 44.47.260. Local participation. When a contract is made under § 250(b)(2) of this chapter between the department and a municipality, the municipality shall pay the costs of administering the contractual duties within its jurisdiction. (§ 2 ch 66 SLA 1975; am § 2 ch 272 SLA 1976)

Effect of amendment. — The 1976 amendment substituted "municipality" for "local agency within an incorporated borough or city of the state" and for "incorporated borough or city."

Sec. 44.47.270. Conditions of receipt of benefits. Benefits may be paid for the care of children of a low income family only if a parent or guardian, because of the day care, is freed to work or to attend school. In no event shall benefits be paid for the care of children of a family where one parent or guardian is not working or attending school and is physically and mentally capable of caring for the children. (§ 2 ch 66 SLA 1975)

Sec. 44.47.280. Eligibility of families for benefits. The department shall determine the eligibility of families for day care benefits on the basis of the following factors:

(1) net income of the family including salary, alimony, child support, retirement benefits, social security, and any other source of income;

(2) number of children in the family;

(3) whether there is one parent or guardian solely responsible for the care of the family;

(4) whether the family receives aid to families with dependent children and is eligible for day care service under aid to families with dependent children;

(5) other factors found relevant by the department. (§ 2 ch 66 SLA 1975)

Sec. 44.47.290. Contributions by parent or guardian. The department shall develop a sliding fee scale based on the factors listed in § 280 of this chapter for purposes of determining the amount to be contributed by the parent or guardian for child care. The contribution of the parent or guardian shall be paid to the day care facility. (§ 2 ch 66 SLA 1975)

Sec. 44.47.300. Child care facilities. (a) Parents or guardians shall select the day care facility for the care of their children.

(b) Benefits shall be paid by the department directly to the municipality contracting with the day care facility or, outside of a municipality, to the facility upon receipt of a billing from a municipality or facility. (§ 2 ch 66 SLA 1975; am § 3 ch 272 SLA 1976)

Effect of amendment. — The 1976 amendment rewrote this section.

Sec. 44.47.310. Definitions. In §§ 250—310 of this chapter

(1) "day care facility" means a center or home licensed in accordance with the provisions of AS 47.35.010—47.35.080 or recognized by the federal government for the care of children;

(2) "department" means the Department of Community and Regional Affairs;

(3) "child" means a person who has not reached the age of 7;

(4) "day care" means the care, supervision, and guidance of a child or children unaccompanied by a parent or legal guardian on a regular basis for periods of less than 24 hours a day.

(5) "municipality" includes a home rule, general law and unified municipality, as defined in AS 29. (§ 2 ch 66 SLA 1975; am §§ 6—8 ch 253 SLA 1976; am §§ 4, 5 ch 272 SLA 1976)

Revisor's note (1976). — Paragraph (3) of AS 44.47.310 was amended by both § 7, ch. 253, SLA 1976, and § 4, ch. 272, SLA 1976. Since the two amendments appear to be inconsistent, and ch. 253 is superseded by ch. 272, only the later enactment has been given effect here.

Effect of amendments. — The first 1976 amendment rewrote paragraphs (1) and (3) and added paragraph (4).

The second 1976 amendment substituted "who has not reached the age of 7" for "up to the mandatory school age" in paragraph (3) and added paragraph (5).

Part 3. Administrative Officers.

Chapter
50. Notaries Public (§§ 44.50.010 — 44.50.190)
53. Foreign Commissioners for Acknowledgments (§§ 44.53.010 — 44.53.020)

Cross reference. — As to public administrator, see AS 22.15.310 — AS 22.15.350.

Chapter 50. Notaries Public.

Section
10. Appointment and commission
20. Qualifications
30. Term of office
40. Fees
50. Chapter not a limitation on postmasters
60. Duties
70. Presence and identification required
80. Seal
90. Protest of bill or note
100. Return of papers to lieutenant governor
110. Application of Administrative Procedure Act to revocation of notary commission
120. Bond
130. Filing oath and bond
140. Disposition of bond
150. Copy of bond as evidence
160. Misconduct or neglect
170. State employees as notaries
180. Postmasters as notaries
190. Savings clause

(10) "intoxicated person" means a person whose mental or physical functioning is substantially impaired as a result of the use of alcohol;

(11) "office" means the office of alcoholism within the Department of Health and Social Services;

(12) "treatment" means the broad range of emergency, outpatient, intermediate, and inpatient services and care which may be extended to alcoholics and intoxicated persons, including diagnostic evaluation, medical, psychiatric, psychological, and social service care, vocational rehabilitation and career counseling. (§ 1 ch 207 SLA 1972; am § 4 ch 116 SLA 1978)

Effect of amendment. — The 1978 amendment inserted "or through a grant awarded under AS 47.30.475" in paragraph (3).

Quoted in Peter v. State, Sup. Ct. Op. No. 1112 (File No. 2185), 531 P.2d 1263 (1975).

Chapter 40. Purchase of Services.

Section	Section
10. Purchase of services	50. Services
20. Licensing and supervision	60 — 70. [Repealed]
30. Required accounting procedures	80. Definitions
40. Determination of full cost of services	

Sec. 47.40.010. Purchase of services. (a) When the department purchases services for persons for whom the state has assumed responsibility under the laws of the state, the department shall

(1) adopt regulations establishing the levels of care to be provided;

(2) determine the rates of payment for the full cost of services required;

(3) pay all expenses related directly to the full cost of services at the levels of care required;

(4) make the placement of persons in accordance with the levels of care provided for in the regulations.

(b) Services of jails and other penal institutions may not be included in services purchased by the state in this chapter. (§ 1 ch 136 SLA 1970)

Sec. 47.40.020. Licensing and supervision. Anyone providing services which are purchased by the department under this chapter shall, if required by the department, be licensed and supervised in the same manner as boarding homes, foster homes and other institutions as provided for in AS 47.35.010 — 47.35.080. (§ 1 ch 136 SLA 1970)

Sec. 47.40.030. Required accounting procedures. Anyone who solicits or receives funds from the department for the cost of services provided under this chapter shall

(1) meet accepted standards of fiscal accountability for public funds and shall, upon request, submit a complete financial statement by an independent, certified public accountant to the department and to the division of legislative audit;

(2) upon request before the meetings provided for in AS 47.05.010 (14), demonstrate the actual cost of services offered using cost accounting procedures as provided for by the department;

(3) upon request furnish the division of legislative audit all fiscal information, books, records, and accounts pertaining to services paid for under this chapter. (§ 1 ch 136 SLA 1970)

Sec. 47.40.040. Determination of full cost of services. (a) In this chapter, "full cost" of services shall be determined by the per person, per day cost in the preceding fiscal year plus a proportionate share of anticipated cost of living and staff salary increment increases for the fiscal year for which the full cost of services, determined to be necessary by the department, is being determined. Child care costs for foster homes shall be computed in the same manner as for child care and nursing home institutions except that no salary costs may be considered.

(b) Full cost of services does not include the following:

(1) expenses, including salaries and fees, incurred in raising funds;

(2) funds expended for construction, major equipment and other capital expenditures;

(3) depreciation and replacement costs of, and costs of additions to, major property and equipment;

(4) religious training and education; and

(5) services provided which are substandard to, or exceed, the requirements of the department. (§ 1 ch 136 SLA 1970)

Sec. 47.40.050. Services. When determining the levels of service to be required the department shall consider program services as outlined within the Catalogue of Functional or Program Service Categories published by the United Funds and Councils of America, September 1967. (§ 1 ch 136 SLA 1970)

Sec. 47.40.060. Temporary placement.
Repealed by § 1 ch 210 SLA 1970.

Editor's note. — The repealed section derived from § 1, ch. 136, SLA 1970.

Sec. 47.40.070. Permanent placement.
Repealed by § 1 ch 210 SLA 1970.

Editor's note. — The repealed section derived from § 1, ch. 136, SLA 1970.

Sec. 47.40.080. Definitions. In this chapter

(1) "anyone" means any person, city, organized borough and private or voluntary institution or agency;

(2) "services" means family, child welfare and nonprofit nursing home services but does not include health, hospital, profit-making nursing homes or medical services;

(3) "department" means the Department of Health and Social Services. (§ 1 ch 136 SLA 1970; am § 2 ch 210 SLA 1970; am § 55 ch 71 SLA 1972)

Legislative history report. — For report on ch. 71, SLA 1972 (HCSSB 385 am H), see 1972 House Journal, p. 595.

Chapter 45. Alaska Longevity Bonus.

Section
10. Persons who may qualify for longevity bonus
20. Continuous eligibility procedures
30. Absence from the state
40. Disqualification
50. Department hearing
60. Legal remedy
70. Unqualified persons
80. Accrual of bonuses
90. Alaska longevity bonus fund
100. Powers and duties of the administrator
110. Custody of funds
120. Exemption from taxation and process
130. Death or cessation of residency
140. Penalty for false statements
150. Definitions
160. Applicability of Administrative Procedure Act
170. Purpose

Editor's note. — Section 2, ch. 205, SLA 1972, provides: "AS 01.10.030 does not apply to this Act. If any provision of this Act, or the application of a provision of this Act to any person or circumstance is held invalid, this entire Act shall be considered invalid."

Legislative history report. — For report on ch. 205, SLA 1972 (FCCS HCS CSSB 211), see 1972 House Journal, p. 751.

Sec. 47.45.010. Persons who may qualify for longevity bonus. (a) A person who is 65 years of age or over, who was domiciled in the territory on or before January 3, 1959 and who has maintained a continuous domicile in the territory or state for 25 years may apply to the commissioner of administration for qualification to receive a monthly bonus of $150.

(b) When the commissioner of administration determines that an applicant qualifies under this chapter he shall immediately begin payment of the bonus.

(c) A person who otherwise qualifies to receive a bonus provided for in this chapter may continue to do so only as long as he continuously retains a domicile in the state. (§ 1 ch 205 SLA 1972; am § 1 ch 33 SLA 1976; am § 1 ch 89 SLA 1978)

Effect of amendments. — The 1976 amendment increased the monthly bonus in subsection (a) from $100.00 to $125.00.

The 1978 amendment increased the monthly bonus in subsection (a) from $125.00 to $150.00.

Legislative history report. — For report on ch. 33, SLA 1976 (SB 476 am), see 1976 Senate Journal, p. 166.

HOUSE RESEARCH AGENCY
Pouch Y - State Capitol
Juneau, Alaska 99811

MEMORANDUM March 5, 1980

TO: Representative Jim Duncan

FROM: Susan Brody and Jack Fargnoli SB

RE: Supplemental Appropriation for the State Day Care Assistance Program (Research Request No. 50)

The following purposes could be the basis for a supplemental appropriation to the FY 80 day care assistance program budget:

(1) to allow additional eligible families to receive day care subsidies between now and the end of the fiscal year;

(2) to provide emergency financial assistance to day care centers which are in danger of closing or severely reducing their program services.

A possible amount for each of these supplemental appropriation purposes is identified below with a brief discussion of the factors used to derive the budget estimates. The total amount would be about $525,000. We have also indicated possible ways to administer the funds.

Subsidies for Families

Lianne Wesley, the State day care program administrator, contacted municipalities participating in the day care assistance program to determine whether they are experiencing any shortfalls in funding which prevent them from offering day care subsidies to all the eligible families within their jurisdiction. Three municipalities--Fairbanks, Anchorage and Juneau--indicated that additional funding for the remainder of the fiscal year would allow them to serve an increased number of eligible families. The total amount which would be required for these municipalities is $227,000, as indicated below:

Fairbanks has a waiting list of 75 families. Dottie Englund, the municipal program administrator, believes that a number of other families qualify for assistance as well, but have not entered their names on the waiting list. She estimates that $142,000 would be adequate to provide

subsidies for the remainder of the fiscal year in Fairbanks. The Municipality of Anchorage has just begun to compile a waiting list for day care subsidies, and the program administrator estimates that they could use approximately $75,000 between now and the end of the fiscal year. The only other community indicating a need for additional funding was Juneau, where they anticipate a need for an additional $10,000. The remaining eleven communities participating in the State day care assistance program appear to have adequate entitlements to last them through the fiscal year.

Emergency Financial Aid for Day Care Centers

To date, we have interviewed the directors of 25 day care centers throughout the state to determine the factors affecting their financial stability. This represents 35 percent of the total number of day care centers participating in the Community and Regional Affairs day care assistance program. Thirteen of the centers we interviewed (52 percent) are sustaining operating deficits which range from $200 to $6,000 a month. These deficits average about $2,200 a month (the median is $2,300). In addition, two of these centers are apparently in danger of closing--one in Ketchikan, and one in Anchorage. A third center, the Children's Community Center in Juneau, was also on the verge of closing until it received an emergency grant from the City and Borough of Juneau. Our data indicate, then, that there may be a need for emergency aid to those centers experiencing financial difficulties until more permanent solutions can be instituted. Our upcoming memorandum on March 7 will identify a number of alternatives for possible legislative action to address these long-term needs.

To estimate the possible amount needed for emergency financial aid, we assumed that the centers we interviewed and their deficit levels were representative of all 70 State-funded day care centers currently operating. If this assumption is correct, it is possible that as many as 40 centers statewide may be sustaining operating deficits of about $2,200 a month, while some 6 centers may be in danger of closing within the near future. If the State were to subsidize this level of monthly operating deficit for 40 centers over the next 3 months, the total cost would range from $250,000 to $300,000, with the actual amount probably closer to the higher figure.

As it is not likely that all day care centers experiencing a deficit would be in danger of closing or seriously reducing their childcare services, an emergency appropriation based on these estimates would probably overcompensate for the likely real degree of emergency need. One way of dealing with this would be make any appropriation subject to

allocation criteria which give first priority to those centers facing imminent closure, and second priority to centers whose operating deficits are likely to require a significant reduction in their child care services (for example, reduction in the number of children served because of inability to meet State required staff-to-child ratios), with unused monies returned to the General Fund.

The emergency financial aid could be administered either through the State Department of Community and Regional Affairs office or through the municipal day care program administrators. In any event, it may be difficult to get an emergency aid program underway in a short period of time. The State and/or municipalities will need to examine the financial records of the applicants and make a determination as the severity of their financial difficulties. If the administration occurs at the State level, time will be needed for the State to finalize allocation criteria. If administered at the local level, the municipality will need to determine the amount required and request these funds from the State.

Some possible criteria for the State or municipalities to use in allocating funds to centers are listed below.

1. The amount of the center's deficit. Documentation should probably be required.

2. The effect of the deficit on the center's operations (e.g., whether it will require the center to close or significantly reduce the number of children it serves).

3. Evidence of a major cutback in CETA-funded staff positions (this potential problem will be discussed in our next memorandum).

4. Inability to meet major loan repayments.

5. The number of State-subsidized children receiving care through the center.

There are probably additional criteria which could be used and we offer these only as suggestions that should be refined futher.

While an emergency appropriation appears to pose no legal problems with regard to non-profit day care centers, there may be a legal question involved in extending the appropriation to include profit-making centers. Specifically, the Alaska Constitution provision that no appropriation of public money shall be made except for public purpose (Article IX, Section 6) probably will have to be satisfied prior to acting on any appropriation which includes profit-making centers.

Satisfying the public purpose requirement probably will not be difficult, but will require some advance preparation prior to legislative action on any appropriation. Essentially, this preparation will include compilation of a fact sheet which both specifies the particulars of the appropriation contemplated, and identifies specifically how the public purpose will be served by the appropriation (public purpose principles are spelled out in statutorary annotations, attached). This fact sheet should then be given to the Legal Services Division of Legislative Affairs if an appropriation bill is drafted, so drafters may ensure that public purpose doctrine requirements are addressed in the proposed legislation.

MEMORANDUM February 11, 1981

TO: Representative Jim Duncan

FROM: Susan Brody, Issues Analyst SB

RE: State Day Care Assistance Program
Research Request #50

This memorandum presents our research to date on the State day care assistance program. As per our agreement with Dale Staley, we are providing these preliminary findings now so that you will have time to consider possible legislation by the personal bill deadline. We will be completing a more thorough analysis by the beginning of March to supplement the information contained here.

The information we have obtained is presented in three sections. The first section contains a brief description of the principal features of the existing day care program. The second section discusses some of the major issues and problems, especially regarding the State subsidy rates. The third section suggests alternatives for State legislative action.

Our research has been conducted within a short time frame and we have not been able to collect all of the necessary data yet. However, we were able to contact several day care providers in both Juneau and Anchorage and the administrators of municipal day care assistance programs in Ketchikan, Juneau, Anchorage and Fairbanks, and we therefore believe our preliminary research findings reflect conditions in many parts of the State.

PROGRAM DESCRIPTION

Purpose

The State day care assistance program was established in 1975 to provide day care services to low income parents who are either working or attending school. The program attempts to help defer costs of day care when these may be a factor which prevents parents or guardians from becoming self-supporting. State statute (AS 44.47.270) specifically states that "in no event shall benefits be paid for the care of children of a family where one parent or guardian is not working or attending school and is physically and mentally capable of caring for the children."

Administration

The day care assistance program is administrered by the Local Government Assistance Division of the Department of Community and Regional Affairs. The State contracts with municipalities who administer the program at the local level. In some cases, municipalities subcontract their administrative functions to private nonprofit organizations or to individuals. For example, in Nome, the program is administered by the United Methodist Church.

Subsidy grants are awarded to communities who then allocate the money to day care providers. The grant funds can only be awarded to day care facilities that are licensed by the State Department of Health and Social Services. All local costs of program administration, including office space, equipment and staff time, must be borne by the local communities and are not reimbursable.

The day care assistance program is operated under the statutory provisions of AS 44.47.250-310 and a set of "operating policies." No administrative regulations have been adopted, but the new director of the program, Lianne Wesley, is drafting regulations that will incorporate many of the current operating policies. She hopes to have the regulations ready for public hearings in May.

Licensing

Two kinds of day care facilities are licensed by the Division of Social Services, Department of Health and Social Services--homes and centers. Day care homes are neighborhood family dwellings that serve no more than six children between the ages of 3 and 14, or no more than five children when the age range includes infants. Day care centers serve groups of seven or more children.

In licensing day care facilities, the Division of Social Services requires that a number of specific standards be met, including staff-to-child ratios, insurance coverage, and fire protection (7 AAC 50.120-255). The licensing procedure includes an inspection of the home or center and all licenses must be renewed annually. The following staff-to-child ratios are currently required in day care centers.

- 1 caregiver for every five infants (six weeks to two years)
- 1 caregiver for every ten children between the ages of two to six
- 1 caregiver for every 15 children aged six to ten years
- 1 caregiver for every 20 children aged ten to 14 years

Allocation of Funds

Program funds are allocated to municipalities based on the number of licensed day care spaces within the community as a percentage of the

total number of day care spaces statewide. For example, in FY 80 Anchorage had 2,690 licensed spaces or 54 percent of the 4,956 spaces in the State. The total FY 80 budget for subsidy grants was $1,758,500. Therefore, Anchorage was entitled to 54 percent of this statewide budget or $951,300.

Table A shows the 1980 allocation to communities. Actual community use of the entitlement is monitored during the fiscal year and funds may be reassigned in mid-year if there is more demand for subsidies in one community and less than expected in another. It is important to note that, in the past, no attention was paid in the allocation process to the number of low income families in the community, past use of subsidy grants, or other indicators of need.

Families qualify for subsidy grants based on their net income. For the purposes of the program, net income is determined by first taking the family's gross yearly income and subtracting taxes, retirement and social security payments. A family is then allowed to further deduct $1,200 for each child under the age of 18, not including the first child, to arrive at the "adjusted annual net family income". For example, a family with two working parents and three children might calculate their adjusted net income as follows:

Yearly Salary and Benefits	$19,000
(minus) Taxes, FICA, etc.	4,000
	$15,000
(minus) Family Size Adjustment	2,400
ADJUSTED ANNUAL NET INCOME	$12,600

The amount of State assistance is determined on a sliding fee scale. Table B shows the percentage of total day care costs covered by the State program as a function of net income and area of residence in the State. If our example family lives in Fairbanks, their net income would fall within Income Group III and the State would pay 60-80 percent of their day care costs. The actual percentage that the State will pay within this range is determined by the local program administrator based on any special family circumstances. For example if this family had incurred significant medical expenses over the last year, the State might pay close to the maximum 80 percent allowed for the income group. At the end of each month, a day care center operator bills the program contractor (i.e., the State) for their percentage of the costs and bills the parents for their percentage.

The maximum net income that qualifies a family for a State subsidy ranges from $16,000 in Juneau, Anchorage and Ketchikan to $21,411 in Healy, Tanana and Anderson (see Table B). Once a family has been de-

termined eligible for a subsidy grant, day care payments are made to providers for authorized hours and on an attendance basis only. Thus, the State does not pay the daily rate if the child is absent. Attendance is calculated on the basis of five hour blocks of time. Part time care is defined as care for up to five hours in a 24- hour period: full time care is for 5-10 hours in a 24 hour period; and for any period exceeding 10 hours, payment is calculated per hour. The maximum rates that the State can pay to a day care center are listed below.

Type of care	Part time	Full time	Full Time +
Infant (up to two years)	$9.00	$15.00	$19.00
Child (two years and over)	7.00	12.00	19.00

The last increase in the daily payments occurred in FY 77 when payments were raised to the current $12 and $15 rate. The base net income level that qualifies a family for a subsidy was raised by $1,000 in FY 1979, a 5 percent increase.

Federal Funding

The State day care assistance program is funded soley by the State. Federal funds are available through the Title 20 program, but the State has chosen not to utilize this funding because of the restrictive regulations and "red tape." Some individual day care centers do take advantage of the federal supplemental food program. The amount of food available to a center is calculated based on the type of meal (hot or cold) and the income of each participating child's family.

Loan Programs

One State loan program is available to day care facilities to assist with construction, renovation and equipment costs. Loans of up to $30,000 are offered through the Department of Commerce and Economic Development. Loan interest rates are seven percent with a 5-10 year pay back period, depending on the purpose of the loan. A total of ten loans were awarded between FY 77 and FY 80--seven went to facilities in the Anchorage area, one in the Mat-Su Borough, one in Ketchikan, and one in the Bethel area.

ISSUES AND CONCERNS

This discussion of issues and concerns is based on our conversations with day care administrators and providers in several areas of the State. Our primary sources of information on day care operating costs were Sister Elaine of St. Ann's Day Care and Nursery and Pat Marlin of Wee Cottage, both in Juneau. We also conducted a series of telephone interviews with municipal day care administrators in Ketchikan, Juneau,

Anchorage and Fairbanks to obtain a general overview of the issues and problems faced by day care providers in those four cities.

Operating Costs

Rising operating costs are a major problem for many day care facilities; a number of day care providers have indicated that the State's day care assistance rate is insufficient to cover these operating costs. Rita Jacobs, acting program manager of the Municipality of Anchorage day care program, believes that several centers are running deficits in Anchorage. One of the major day care providers in Anchorage, Lee Robertson, indicated that two of her centers (Infant Inn and Gingerbread House) have monthly deficits of $1,500-3,000. In Juneau, four of the seven centers--Children's Community Center, St. Ann's Day Care, St. Ann's Nursery, and Wee Cottage--are running monthly deficits of between $2,000 and $5,000. The Salvation Army day care center in Ketchikan also has a deficit of about $2,000. In Fairbanks apparently no centers are currently running operating deficits. However, according to the Fairbanks day care administrator, several of the centers do not pay rent or utilities which, of course, decreases their total operating costs.

The operating costs of day care centers consist of salaries, food, rent, utilities, maintenance, insurance, and supplies. We have requested operating cost data from three day care centers in Juneau, and one in Anchorage to determine how much costs have risen from 1977 to 1980. As noted earlier, 1977 was the last year the State increased its daily subsidy rate for the day care assistance program. To date, we have only received data from two of the Juneau centers--St. Ann's Nursery and St. Ann's Day care. At St. Ann's Nursery, total operating costs increased by about 60 percent from 1977 to 1979, while income was up by only 12 percent. Salaries increased by 50 percent, and rent was up 78 percent. At St. Ann's Day care, total operating costs increased by about 24 percent, while income increased by 7 percent. Salaries were up 18 percent, rent was up 13 percent, and food was up 40 percent. If the increases in operating costs experienced by St. Ann's are indicative of increases at other day care centers, then day care providers will need to consider rate increases or other alternatives to alleviate growing deficits. Although we have not obtained data from other centers as yet, our initial interviews suggest that operating costs have also increased substantially for centers in Ketchikan, Fairbanks and Anchorage.

Reimbursement by Attendance vs. Enrollment

One of the major concerns of the day care providers is the method used by the State to reimburse them for services provided to children in the

day care assistance program. The State reimburses centers only for the days that a child actually attends the day care center. Yet, the day care providers argue that their expenditures for rent, utilities, insurance, and so forth are fixed costs that must be paid regardless of whether the children attend. Staffing a day care center is also problematic under these conditions. Several day care providers indicated that it is extremely difficult to send staff home for the day if not all of the children who are enrolled actually attend. In effect, the center must hire and pay staff based on their enrollment and anticipated attendance to ensure that they meet the required staff-child ratios. Under the present system, many staff costs must be wholly absorbed by the day care center operators.

The Anchorage municipal day care program administrator voiced some concern about reimbursing costs strictly on an enrollment basis. She indicated that the available State money can be used to serve more children when centers are payed only for those days that a child attends. For example, if a child is enrolled in a center, but then attends only 10 days during the month, the State, through the municipality, would still be reimbursing the center for the entire monthly cost. The Juneau day care administrator, Pat Audap, suggested that if the State switches to an enrollment system, it might be possible to reimburse day care centers only if the child attends at least 75 percent of the time during the month. In conjunction with this, the day care center would be responsible for contacting parents to determine why children are not attending on a regular basis and then change their enrollment status if necessary.

Income Subsidy Limitation

The current operating policies of the Department of Community and Regional Affairs specify that the rate that a center charges for children receiving State assistance must correspond to the rate charged to those families who do not receive a subsidy.

We asked day administrators and providers whether they felt an increase in the daily rate for subsidized children would affect those families who are not currently receiving day care assistance. There was considerable agreement that increasing the daily rates could place a major burden on the non-subsidized family.

The possible impact of a daily rate increase is demonstrated in the following example. If the daily rates established in 1977 were increased by 15 percent in 1980, this would represent about a 5 percent annual increase, probably a bit less than day care center operating costs have actually increased. Full time rates would increase from $12 per day to $13.80 per day for children over two years old and would increase from $15 to $17.25 per day for infants (children under two years). Consider a family with two children--one infant and one preschool child, aged four. Under the current day care rates, this family would pay about $315 dollars per month in day care costs for the infant

and $350 for the four year old, for a total monthly cost of $545. If rates increase by 15 percent, the family would pay about $360 for the infant and $290 for the pre-school child, for a total of $650.

Many families receiving State assistance would also face increased monthly payments because the State is often only reimbursing a portion of the costs. Consider a family identical to the one described above who is paying 30 percent of its day care costs while the State pays the other 70 percent. Under the current rates, the family is paying about $170 for day care services. With a 15 percent rate increase, the family would pay about $195, or an increase of about $25 dollars per month.

Some of the increased financial burden on the non-subsidized family resulting from rate increases might be alleviated to some extent by increasing the number of families who are eligible for day care assistance. In FY 79, the income limit for a State subsidy was increased by $1,000. Several of the day care administrators and providers that we interviewed indicated that another increase in the eligible family net income level would be desirable to relieve some of the additional burden on non-subsidized families if the daily rate per child were increased. We plan to interview several non-subsidized families in Juneau to determine what problems they face in financing day care costs.

ALTERNATIVES FOR STATE ACTION

Our preliminary research suggests that any legislative action on the day care issue should attempt to relieve the operating deficits of day care centers while, at the same time, minimizing any increases in day care costs for families. The following alternatives are presented with these objectives in mind. None of these alternatives would necessarily require that changes be made in existing State statutes. It is important to note that most of the alternatives presented here would require an increase in the FY 81 program budget. To implement the alternatives without a budget increase would result in fewer families being served by the program.

Increase the Daily Subsidy Rate

Because our data on day care center operating costs is incomplete, it is difficult to recommend an exact percentage increase in the subsidy rate. Our preliminary research suggests that a 15 to 30 percent increase over the 1977 rate may be appropriate to cover the increases in operating costs that many day care centers have experienced. This would be equivalent to a 5 to 10 percent annual increase for the years 1977 to 1981.

The FY 81 budget request for the day care assistance program is $1,850,000. The budget assumes that the day care subsidy will remain at its current rate. A 15 percent increase in the rate would require that an additional $278,000 be added to the FY 81 budget, for a total of about $2,128,000. If day care centers require immediate assistance prior to the beginning of the new fiscal year, then a supplemental appropriation to this year's budget might also be desirable.

To ensure that the State day care assistance rates continue to reflect increases in day care center operating costs, it may be advantageous to include a provision in State statute requiring annual review and adjustment of the rate.

Reimburse Program Costs on the Basis of Enrollment

Several day care providers indicated that they would prefer to avoid any dramatic increases in the rate for day care assistance. They suggested that by basing State payments on enrollment rather than attendance, their financial situation would be significantly improved, thus requiring less of an increase in the daily rate per child.

The current method of reimbursement on the basis of attendance is not a statutory requirement. It is established in the Department of Community and Regional Affairs "operating policies" for the day care assistance program. The Department is currently in the process of drafting regulations that will become part of the Alaska Administrative Code and, according to the day care assistance program director, these regulations will probably continue to require reimbursement on the basis of attendance.

A change to reimbursement based on enrollment could be accomplished in several ways: It could be required by statute; it might be stipulated as a footnote to the budget appropriation; or it might be changed by the Department, if sufficient opposition to the existing method is voiced at the public hearings on the proposed regulations.

Increase the Income Eligibility Level

As discussed earlier, any increase in the rate per child will increase the financial burden on the non-subsidized parent. A possible countermeasure would be to increase the number of families that qualify for day care assistance. Without further research, we hesitate to suggest a new subsidy income level. An increase in the income limit by the same percentage as the increase in the rate per child (i.e., 5-10 percent per year) might be considered. However, the actual increased burden of the new rate on the non-subsidized family depends on the extent to which the family income has kept pace with inflation. The true measure of financial hardship would be the extent to which day care costs have increased as a percentage of total household income, if any. We will continue to do research in this area to determine what changes in the income limit should be considered.

Other Options

In the course of our research, we have identified a number of other options that may be worth exploring. Please let us know which, if any, of the following alternatives you would like us to investigate.

1. State day care payments directly to families rather than to Centers.

2. State reimbursement of certain day care center operating costs, such as rent or insurance.

3. State grants to day care centers for major capital improvements, equipment acquisition, etc.

4. An in depth study of family day care needs, day care center capital and operating costs, and municipal day care administration.

This last item was identified as a priority by Lianne Wesley, the director of the State day care assistance program. She indicated that comprehensive background data would be extremely helpful to them in determining what kinds of changes should be made in the day care program. This might be an appropriate research project for the House Research Agency after adjournment of the current legislative session, subject to the approval of the governing committee.

League of Women Voters

of Juneau, Alaska

May 1, 1980

Honorable Thelma Buchholdt
Pouch Y
State Capitol Building
Juneau, AK 99811

Dear Representative Buchholdt:

The League of Women Voters of Juneau supports HB-1019. The League has a state position on Day Care which says:

> The League of Women Voters of Alaska supports day care for everyone who needs or wants it with priority given to those children whose need is greatest. The members of the League believe users should be primarily responsible for day care financing. Supplemental financial and regulatory responsibilities should be shared by all levels of government to insure that day care is of high quality and available to those who need it.

We urge you to support this bill and pass it out of committee as soon as possible so that it may be acted on this session.

Thank you for your continued support of Day Care.

Sincerely,

Chottie Angst

Chottie Angst
President

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

HOUSE BILL NO. 1019

"An Act relating to day care for children; and providing for an effective date."

This bill would establish criteria for determining the rates paid to a day care facility for reimbursment for the cost of care for eligible children under the Alaska Day Care Assistance Program administered by the Department of Community and Regional Affairs. It would also require that facilities be reimbursed on the basis of enrollment for each child under the program rather than a actual attendance, the current form of state reimbusment.

While the Department of Community and Regional Affairs has major responsibility for purchase of day care services in the state, the Department of Health and Social Services maintains responsibility for purchase of day care in child protective cases and for WIN clients where the Day Care Assistance Program does not meet their needs. The protective services and WIN day care programs are not named in this bill, however, the Department of Health and Social Services has adhered to a policy of administering its day care programs in a manner compatible with the Day Care Assistance Program and plans to continue that policy to the extent feasible. This bill therefore has an impact on Department programs. Comments and suggestions on specific sections follow:

Sec. 44.47.305(a) The Department suggests that the term "cost" be modified to "reasonable or allowable cost" to further establish intent.

Sec. 44.47.305(b) No objections.

Sec. 44.47.300(b) The department is interpreting this change to mean that a child may be enrolled for day care for a specified number of days, including one or more days. The state would make payment based on the child's enrollment, rather than on the child's attendance. The Department has no objection to the amendment if the above interpretation is in keeping with the intent of the amendment.

The Department recognizes that good day care programming from a child development point of view would specify enrollment on a long term basis, generally not less than one month. There are considerations however, for authorizing day care services for periods of time substantially less than a full month. WIN clients need short term day care for their children during job interviews, vocational counseling, testing sessions, or employment related medical sessions. Occasionally only one day of day care is needed. Families may need protective services day care support for only one week of respite from the strusses of parenting during a family crisis. Most day care center enrollment policies and some day care home policies allow enrollment on a drop-in basis and also for periods of less than a full month. The Department assumes that these enrollment options will remain available for WIN and protective services eligible children. It is appropriate to pay for the number of days authorized, recognizing that the day care facility must hold space open for the child.

POSITION PAPER/Department of Health & Social Services

The Department has some question on how this bill will impact families using day care services who are not eligible for a state subsidized program, especially middle income families. The exact nature of the impact could not be determined. Some committee discussion may be warranted.

The Department supports the concepts in this bill and suggests that clarifications be made, based on the Department comments.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is assumed that the Department will retain the option of authorizing day care services for periods of time less than a full month. The Division plans to issue guidelines to social workers regarding authorization of realistic numbers of days in relation to anticipated child attendance. The fiscal note reflects the anticipated cost difference between days authorized and days of actual attendance. The Division's Fiscal Year 81 budget request of 233.7 was based on actual days of attendance. House Bill No. 1019 would result in an anticipated increase in this budget request of 58.4 for a total Fiscal Year 81 request of 292.1.

A 9% increase was used to indicate inflation in future years.

Dear Representative Buchholdt:

RE: HOUSE BILL 1019 - AN ACT RELATING TO DAY CARE FOR CHILDREN

The following comments on HB 1019 were prepared by Lianne Wesley, the Day Care Assistance Coordinator.

Effects

This bill would more fully define the legal basis of the day care assistance program by directing the Department to: 1) annually review and revise, if necessary, the sliding fee scale of parent's contribution to the cost of licensed day care for their children; 2) pay a facility based on enrollment, rather than on an attendance basis; 3) reimburse a facility for the cost of providing the day care service; and 4) annually determine the cost of providing day care in each facility where the service is provided.

Comments

The focus of the Day Care Assistance Program to date has been the needs of families, not day care facility operators. This bill (and HCR 66) significantly alters that focus, and changes the way this Department has traditionally handled this program. Instead of the Department functioning in a contractual relationship with local governing bodies as intermediaries the Department will deal more directly with the service agencies.

A major implication of the bill revolves around the setting of rates for day care services. Raising daily rates or mandating an enrollment rate increases the cost to both the general public and to state-subsidized families. Raising day care rates could price some people out of the market and in the end detrimentally affect the day care operators, this

legislation is designed to help. Facility operators may face declining enrollment and income if the State raises rates beyond what the general public will bear. Unless the appropriation for the Day Care Assistance Program is dramatically increased, raising the payment maximum to the day care facilities will decrease both the number of low income families receiving program subsidy and the level of subsidy available to each family.

Day care services reimbursed on an enrollment basis will require more local administrative staff time to assure the same level of fiscal accountability presently provided. AS 44.47.260 requires the cost of this local administration to be paid by the contracting municipality. Under the present system, local staff only take the facility's attendance figures multiplied by the daily rate and check the calculations to determine the accuracy of the facility's billing. On an enrollment basis, local administrators will presumably check attendance figures to see if the monthly enrollment rate is justified before calculating the accuracy of the billings. If enrollment fees are paid in advance, the current month's attendance must be compared with the previous month's billing before calculations can be checked and payment authorized.

Sincerely,

Lee

Lee McAnerney
Commissioner

FISCAL NOTE

I. REQUEST

Bill/Resolution No. House Bill 1019

Title An Act Relating to Day Care for children

Requested by House H&SS Committee Date 5-6-80

II. FISCAL DETAIL

Agency Affected Department of Community & Regional Affairs

Program Category Affected Social Service

BRU, Program, or Subprogram(s) Affected Child Care

(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

	FY 80	FY 81	FY 82	FY 83	FY 84	FY 85

TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The 45.0 on line 300 (contractual) would provide for a contracted study of the current costs of providing daycare. It is anticipated that the contract would also require the establishment of procedures for annual update. The annual update could then be accomplished by existing office personal.

The 2178.8 on line 700 is a combination of estimates.

978.8	Amount estimated by Community & Regional Affairs to fund existing need at existing price levels
1200.0	Amount estimated by Legislative Affairs to fund 100% of costs of operation of Daycare Centers
2178.8	Total Estimated Cost

IV. DATE 5/6/80 PREPARED BY Lianne Wesley

AGENCY Community & Regional Affairs

PHONE (907) 276-1721

Original: Legislative Finance

cc: Budget and Management

Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/79)

FISCAL NOTE - Continued HB 1019

It should be pointed out that the above figures are only estimates based on very limited data.

The claims costs have been increased 8% per year for inflation.

STATE DAY CARE SUBSIDY CHANGE Res. No 35

WHEREAS the State Day Care Subsidy Porgram is a singular success in providing child care support for parents who need it through local community participation; and

WHEREAS it is very important that children who have been abused or neglected continue to be placed outside the home for daytime care by the Health & Social Services Department;

WHEREAS day care services are restricted by prohibitive costs of complying with regulations which allow a center to be paid only on the basis of child attendance rather than enrollment; and

WHEREAS staffing must be maintained whether an enrolled child is present or not;

WHEREAS Day Care Centers are being penalized when they accept children whose parents are subsidised by daycare assistance or by Health & Social Services because parents who are not being subsidized can and in most cases are charged on a monthly rate rather than a daily rate;

WHEREAS Day Care Centers throughout Alaska are facing closure because of financial reasons;

BE IT RESOLVED that the Community & Regional Affairs Department and Health & Social Services Department amend their regulations to permit child care payment by enrollment rather than attendance.

This is a resolution passed without any dissent by the Southeast Regional Alaskan Democratic Party Convention: April 12, 1980.

FISCAL NOTE

I. REQUEST

Bill/Resolution No. HB 1019

Title An Act relating to Daycare for children

Requested by House H&SS Date

II. FISCAL DETAIL

Agency Affected Community & Regional Affairs

Program Category Affected Social Services

BRU, Program, or Subprogram(s) Affected Childcare

(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

	FY 80	FY 81	FY 82	FY 83	FY 84	FY 85
100 PERSONAL SERVICES						
200 TRAVEL						
300 CONTRACTUAL		45.0				
400 COMMODITIES						
500 EQUIPMENT						
600 LAND & STRUCTURES						
700 GRANTS, CLAIMS, ETC.		370.0				
TOTAL		415.0				

FUNDING (Thousands of Dollars)

GENERAL FUND		415.0				
FEDERAL FUNDS						
OTHER (Specify Fund Source)						

POSITIONS

FULL TIME		0	0	0	0	0
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The 45.0 on line 300 (contractual) would provide for a contracted study of the current costs of providing daycare. This study will provide needed data to make reasonable estimates by February 1, 1981, of cost for Section 1 and 2 of HB 1019. It is anticipated that the contract would also require the establishment of procedures for annual update. The annual update could then be accomplished by existing office personnel.

Sec. 3 of HB 1019 requires payment based on enrollment instead of the present method of payment based on attendance. The 370.0 on line 700 will pay for this absentee factor based on the current estimated absentee (vacancy) rate of 20%.

May 5, 1980

Chottie Angst
League of Women Voters of Juneau
Box 221
Juneau, Alaska 99802

Dear Ms. Angst:

I have received your letter in support of HB 1019. We are scheduled to hold hearings on the bill on Thursday and Friday of this week. I hope that we are able to report the bill out of Committee at that time.

I will be sure that the other members of the Committee are made aware of the view of the Juneau league when we are deliberating on the bill.

Sincerely,

Thelma

Thelma Buchholdt
State Representative
District 9 (Spenard);
Chair, House HESS Committee

League of Women Voters

of Juneau, Alaska

May 1, 1980

Honorable Thelma Buchholdt
Pouch Y
State Capitol Building
Juneau, AK 99811

Dear Representative Buchholdt:

The League of Women Voters of Juneau supports HB-1019. The League has a state position on Day Care which says:

> The League of Women Voters of Alaska supports day care for everyone who needs or wants it with priority given to those children whose need is greatest. The members of the League believe users should be primarily responsible for day care financing. Supplemental financial and regulatory responsibilities should be shared by all levels of government to insure that day care is of high quality and available to those who need it.

We urge you to support this bill and pass it out of committee as soon as possible so that it may be acted on this session.

Thank you for your continued support of Day Care.

Sincerely,

Chottie Angst

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

May 6, 1980

The Honorable Thelma Buchholdt
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

RE: HOUSE BILL 1019 - AN ACT RELATING TO DAY CARE FOR CHILDREN

The following comments on HB 1019 were prepared by Lianne Wesley, the Day Care Assistance Coordinator.

Effects

This bill would more fully define the legal basis of the day care assistance program by directing the Department to: 1) annually review and revise, if necessary, the sliding fee scale of parent's contribution to the cost of licensed day care for their children; 2) pay a facility based on enrollment, rather than on an attendance basis; 3) reimburse a facility for the cost of providing the day care service; and 4) annually determine the cost of providing day care in each facility where the service is provided.

Comments

The focus of the Day Care Assistance Program to date has been the needs of families, not day care facility operators. This bill (and HCR 66) significantly alters that focus, and changes the way this Department has traditionally handled this program. Instead of the Department functioning in a contractual relationship with local governing bodies as intermediaries the Department will deal more directly with the service agencies.

A major implication of the bill revolves around the setting of rates for day care services. Raising daily rates or mandating an enrollment rate increases the cost to both the general public and to state-subsidized families. Raising day care rates could price some people out of the market and in the end detrimentally affect the day care operators, this

legislation is designed to help. Facility operators may face declining enrollment and income if the State raises rates beyond what the general public will bear. Unless the appropriation for the Day Care Assistance Program is dramatically increased, raising the payment maximum to the day care facilities will decrease both the number of low income families receiving program subsidy and the level of subsidy available to each family.

Day care services reimbursed on an enrollment basis will require more local administrative staff time to assure the same level of fiscal accountability presently provided. AS 44.47.260 requires the cost of this local administration to be paid by the contracting municipality. Under the present system, local staff only take the facility's attendance figures multiplied by the daily rate and check the calculations to determine the accuracy of the facility's billing. On an enrollment basis, local administrators will presumably check attendance figures to see if the monthly enrollment rate is justified before calculating the accuracy of the billings. If enrollment fees are paid in advance, the current month's attendance must be compared with the previous month's billing before calculations can be checked and payment authorized.

Sincerely,

Lee

Lee McAnerney
Commissioner

THE LEGISLATURE OF THE STATE OF ALASKA
ELEVENTH LEGISLATURE

The 45.0 on line 300 (contractual) would provide for a contracted study of the current costs of providing daycare. It is anticipated that the contract would also require the establishment of procedures for annual update. The annual update could then be accomplished by existing office personal.

The 2178.8 on line 700 is a combination of estimates.

978.8	Amount estimated by Community & Regional Affairs to fund existing need at existing price levels
1200.0	Amount estimated by Legislative Affairs to fund 100% of costs of operation of Daycare Centers
2178.8	Total Estimated Cost

It should be pointed out that the above figures are only estimates based on very limited data.

The claims costs have been increased 8% per year for inflation.

League of Women Voters of Alaska

May 7, 1980

Honorable Thelma Buchholdt
Alaska State Legislature
Pouch V,
Juneau, Alaska 99811

Dear Representative Buchholdt:

The League of Women Voters of Alaska supports HB 1019 which relates to Day Care and Day Care Funding. The League believes that day care for children should provide an environment that maximizes each childs potential. To do this requires sufficient funds to pay the salaries of trained staff and an appropriate facility.

Alaska's day care centers are experiencing a financial crisis and need assistance. HB 1019 which will allow day care centers to receive payment based on enrollment rather than attendance is a key provision to alleviating the financial crisis day care centers in Alaska are experiencing at this time.

The League of Women Voters of Alaska urges you and the other members of your committee to support HB 1019.

Sincerely,

Margaret

Margaret E. Holland
Human Resources Chairperson

Alaska Native Health Board

1689 C STREET, SUITE 230, ANCHORAGE, ALASKA 99501 PHONE 276-8989

Reference #A80-0489

RECEIVED
APR 17 1980
DEPUTY COMMISSIONER
DEPT. OF HEALTH & SOCIAL SVS
ANCHORAGE

April 16, 1980

Dr. Fred McGinnis
Deputy Commissioner
Department of Health & Social Services
State of Alaska
MacKay Building
338 Denali Street
Anchorage, Alaska 99501

The purpose of this letter is to proclaim the Alaska Native Health Board's dismay regarding efforts underway to promote the use of State funds to subsidize the financially troubled Alaska Hospital and Medical Center/Professional Office Building in Anchorage.

Speaking as the designated statewide health entity representing the Alaska Native population in health matters -- and as concerned citizens, voters, and taxpayers -- this Board is strongly opposed to the utilization of State funds to subsidize this most costly, underutilized community hospital/office complex. Any such action could not be considered to be in the best interest of all Alaskan citizens.

During its regular meeting on April 10, 1980, this Board did pass a resolution supporting the IHS acquisition of the Alaska Hospital and Medical Center/Professional Office Building. This Board further advised the Alaska congressional delegation that a study should be undertaken to determine how this transfer might best be accomplished while still providing access to quality health care to all Alaskan residents.

Again, we would like to remind you that State funds should be expended for programs and/or improvements that will mutually benefit all Alaska residents and we ask that you lend your support.

A letter containing the above information has been sent to all Alaska State Legislators, the Governor, and Commissioner Beirne. I might add that the Board's decision to support IHS acquisition of the AHMC/POB was by no means a hasty decision and came about as the result of indepth studies conducted regarding both ANMC and AHMC/POB.

ALEUTIAN PRIBILOF ISLAND ASSOC., INC.
BRISTOL BAY AREA HEALTH CORPORATION

The use of State funds to temporarily alleviate the hospital's indebtedness would not solve the problem but only serve to prolong the real issue -- history has proved that the private sector in Anchorage cannot yet support a second hospital the size of the Alaska Hospital and Medical Center.

If you choose, your response will be incorporated in our records for statewide dissemination.

Thank you again for your support.

Sincerely,

ALASKA NATIVE HEALTH BOARD

SUBJECT: Financial Aid For
Alaska Hospital and
Medical Center, Inc.

By:
Thomas H. Robertson
Assistant Attorney General

You have asked whether the Alaska Hospital and Medical Center, Inc., is eligible for financial aid under AS 18.25.040-060. You have informed us that the institition 1/ believes itself to be eligible as a "community operated nonprofit hospital" within the meaning of these statutes.

Having reviewed that institution's Bylaws and Articles of Incorporation, 2/ we believe that the Alaska Hospital and Medical Center, Inc., is not eligible for financial aid under AS 18.25.040-060.

The statutes with which you are concerned were enacted as long ago as 1949 to assist communities whose "taxable values" are limited and who would face "insurmountable hardship" in obtaining local financing for the operation of a hospital or clinic. They provide:

> AS 18.25.040. DEPARTMENT TO RENDER AID. The department may assist in cases of operational deficits of community operated nonprofit hospitals and clinics in the state.
>
> AS 18.25.050. DETERMINATION OF NECESSITY. The department shall initiate appropriate action in accordance with the provisions of §§ 40-60 of this chapter as soon as the department determines which projects are of most immediate necessity.

1/ The phrase "Alaska Hospital and Medical Center, Inc." is apparently used to denote both the hospital and the corporation.

2/ The Articles of Incorporation were "restated and amended" on August 30, 1978.

> AS 18.25.060. INTENT. It is the intent of §§ 40-60 of this chapter to provide financial aid, or funds to match available federal funds to aid localities or municipalities whose taxable values are limited in scope and for whom an attempt at community financing of a community operated nonprofit hospital or clinic would entail insurmountable hardship.

You have informed us that longstanding employees of the Department of Health and Social Services have no recollection of funds ever having been distributed under these statutes. You have also informed us that no funds have been appropriated for distribution during the current fiscal year. See Ak. Const., Art. IX, § 13.

The answer to your question turns on whether the Alaska Hospital and Medical Center, Inc., is a "community operated nonprofit hospital" within the meaning of AS 18.25-.040-060. The statutes do not, of course, refer simply to a hospital operated by a nonprofit corporation. They refer to a "community operated" nonprofit hospital and, as a consequence, your inquiry presents the issue of whether this institution can legitimately be viewed as being operated by the community in which it is situated.

The Alaska Hospital and Medical Center, Inc., is incorporated under AS 20.10 as a nonprofit corporation for the purpose, among others, of operating hospitals, clinics, and related facilities in the State of Alaska and elsewhere. 3/ There are no shareholders and the members of the corporation are limited to its Board of Trustees. 4/ The Board of Trustees is composed of five trustees who must, to be eligible for appointment, be at least twenty-one years of age, at least one year residents of the Third Judicial District, and of good moral character. Trustees are appointed by the Board of Trustees, voting as members of the corporation. The corporation is wholly controlled by the Board of Trustees. 5/ An administrator, who reports to the Board of Trustees, is responsible for its everyday operation. 6/

3/ Articles of Incorporation, Arts. I, III.

4/ Articles of Incorporation, Art. V; Bylaws, Art. III.

5/ Articles of Incorporation, Art. VI; Bylaws, Art. IV.

6/ Bylaws, Art. V.

We believe, in light of these factors alone, that the Alaska Hospital and Medical Center, Inc., is not operated by the community within the contemplation of AS 18.25.040-060. 7/ It does not have access to taxation, as alluded to in AS 18.25.060, and is entirely subject to the will of a five member Board of Trustees. Although undoubtedly dedicated to the pursuit of eleemosynary ends, the Alaska Hospital and Medical Center, Inc., is operated not by the community but rather by a private nonprofit corporation of the same name. It is thus not eligible to receive public funds under the statutes to which you have referred.

7/ In light of this conclusion it is unnecessary to address the other issues you have raised in this regard.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER ON

HOUSE BILL NO. 1030

For an Act Entitled: "An Act relating to assistance to nonprofit hospitals and providing for an effective date."

House Bill 1030 amends AS 18.25.010 to permit the Department of Health and Social Services to assist not only nonprofit hospitals operated by municipalities, communities and associations in the state but also nonprofit hospitals operated by nonprofit corporations in purchasing, constructing, repairing and providing necessary equipment. Section 1 is further amended to permit Departmental support for the retirement of debt in addition to the provisions for purchase, construction and equipping noted above.

The statute was originally enacted to provide the mechanism for disbursement of state funds, along with federal Hill Burton construction funds, for hospitals and long term care facilities. All Alaska hospitals, except Glennallen and Alaska Hospital and Medical Center, have benefited from this program since its enactment in 1949. The original statute did not authorize direct retirement of debts of nonprofit hospitals or grants to hospitals operated by nonprofit corporations unless community operated.

Discussion Items;

1. House Bill 1030 expands the authorizing language whereby resources can be provided to nonprofit hospitals or hospitals operated by nonprofit corporations not only for purchase, construction and equipping purposes, but also for retirement of debt. The Department could assume this expanded responsibility as funds are appropriated under the new authority of this amended act.

2. House Bill 1030, Section 4, also provides for the establishment of standards and critieria (through the development of regulations) for determining the extent and urgency of need by hospitals and the priority of need for funding. Such regulations, developed through the public Administrative Procedures process, are crucial to the responsible and equitable administration of this program.

3. Depending on the size and scope of the amended program, the Department would need to consider limited additional staff capabilities for appropriate administration.

4. To ensure that the rendering of aid includes not only the awarding of grants, but the potential to make loans, consideration might be given to reviewing the language in Section 1, 18.25.010 and in Section 4, 18.25.060 to ensure that rendering of aid encompasses the issuance of loans.

POSITION PAPER/Department of Health & Social Services

5. To ensure that potentially eligible facilities are not required to meet the test of receiving matching federal funds in order to qualify for state aid, it is suggested that the first sentence in Section 18.25.060 be modified to read as follows (suggested changes double underlined):

   Section 18.25.060, INTENT. It is the intent of AS 18.25.040-18.25.060 to provide financial aid, including but not limited to money [OR FUNDS] to match available federal money [FUNDS] to aid localities or municipalities whose taxable values are limited in scope and for whom an attempt at community financing of a community operated nonprofit hospital or clinic would entail insurmountable hardship or to aid other nonprofit hospitals or clinics which face closure because of financial problems.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

In order for the Department to administer this program, it will need to secure staff and/or contract assistance to develop proposed regulations, conduct appropriate public meetings and hearings and implement regulations. It is anticipated that this will require at least a 180-day (6 month) time period to accomplish.

Depending on the size of the program anticipated by the Legislature, it is possible that a professional staff person with skills in fiscal analysis, an understanding of facility mortages and related matters be added to the Department's staff to administer the program.

ATTORNEY GENERAL

Financial Aid For
Alaska Hospital and
Medical Center, Inc.

By:
Thomas H. Robertson
Assistant Attorney General

You have asked whether the Alaska Hospital and Medical Center, Inc., is eligible for financial aid under AS 18.25.040-060. You have informed us that the institition 1/ believes itself to be eligible as a "community operated nonprofit hospital" within the meaning of these statutes.

Having reviewed that institution's Bylaws and Articles of Incorporation, 2/ we believe that the Alaska Hospital and Medical Center, Inc., is not eligible for financial aid under AS 18.25.040-060.

The statutes with which you are concerned were enacted as long ago as 1949 to assist communities whose "taxable values" are limited and who would face "insurmountable hardship" in obtaining local financing for the operation of a hospital or clinic. They provide:

> AS 18.25.040. DEPARTMENT TO RENDER AID. The department may assist in cases of operational deficits of community operated nonprofit hospitals and clinics in the state.
>
> AS 18.25.050. DETERMINATION OF NECESSITY. The department shall initiate appropriate action in accordance with the provisions of §§ 40-60 of this chapter as soon as the department determines which projects are of most immediate necessity.

1/ The phrase "Alaska Hospital and Medical Center, Inc." is apparently used to denote both the hospital and the corporation.

2/ The Articles of Incorporation were "restated and amended" on August 30, 1978.

> AS 18.25.060. INTENT. It is the intent of §§ 40-60 of this chapter to provide financial aid, or funds to match available federal funds to aid localities or municipalities whose taxable values are limited in scope and for whom an attempt at community financing of a community operated nonprofit hospital or clinic would entail insurmountable hardship.

You have informed us that longstanding employees of the Department of Health and Social Services have no recollection of funds ever having been distributed under these statutes. You have also informed us that no funds have been appropriated for distribution during the current fiscal year. See Ak. Const., Art. IX, § 13.

The answer to your question turns on whether the Alaska Hospital and Medical Center, Inc., is a "community operated nonprofit hospital" within the meaning of AS 18.25-.040-060. The statutes do not, of course, refer simply to a hospital operated by a nonprofit corporation. They refer to a "community operated" nonprofit hospital and, as a consequence, your inquiry presents the issue of whether this institution can legitimately be viewed as being operated by the community in which it is situated.

The Alaska Hospital and Medical Center, Inc., is incorporated under AS 20.10 as a nonprofit corporation for the purpose, among others, of operating hospitals, clinics, and related facilities in the State of Alaska and elsewhere. 3/ There are no shareholders and the members of the corporation are limited to its Board of Trustees. 4/ The Board of Trustees is composed of five trustees who must, to be eligible for appointment, be at least twenty-one years of age, at least one year residents of the Third Judicial District, and of good moral character. Trustees are appointed by the Board of Trustees, voting as members of the corporation. The corporation is wholly controlled by the Board of Trustees. 5/ An administrator, who reports to the Board of Trustees, is responsible for its everyday operation. 6/

3/ Articles of Incorporation, Arts. I, III.

4/ Articles of Incorporation, Art. V; Bylaws, Art. III.

5/ Articles of Incorporation, Art. VI; Bylaws, Art. IV.

6/ Bylaws, Art. V.

We believe, in light of these factors alone, that the Alaska Hospital and Medical Center, Inc., is not operated by the community within the contemplation of AS 18.25.040-060. 7/ It does not have access to taxation, as alluded to in AS 18.25.060, and is entirely subject to the will of a five member Board of Trustees. Although undoubtedly dedicated to the pursuit of eleemosynary ends, the Alaska Hospital and Medical Center, Inc., is operated not by the community but rather by a private nonprofit corporation of the same name. It is thus not eligible to receive public funds under the statutes to which you have referred.

7/ In light of this conclusion it is unnecessary to address the other issues you have raised in this regard.

THR:jal

ALASKA HOSPITAL

Alaska Hospital and Medical Center, Inc., is a nonprofit private corporation which owns the hospital. The mortgage on the hospital is held by the Alaska Teamster-Employer Pension Trust. The Professional Office Building (which is physically a part of the hospital) is owned by the Teamsters Building Corporation, which leases space exclusively for the practice of medicine.

The original cost of the hospital and clinic for all equipment and building	$33,075,975
Estimated value now (1.42 replacement cost factor)	$46,970,000
Total due to Teamsters Pension Trust as 2/29/80	$40,643,000
Arrears payments to Trust as of 2/29/80	$ 5,714,000
Unfunded depreciation	$ 6,468,000
Professional Office Building (appraisal 12/10/79 by Kenneth M. Zamzow, MAI)	$13,000,000

The hospital has a 5 member board of trustees. The trustees are elected by the board and may succeed themselves. Members are as follows:

Ray L. Snitil, President
Jack Bentley, Vice President
William H. Ivy, M.D., Secretary
Vernon Cates, M.D.
Emmitt Wilson

The hospital administrator is Ronald A. Pavellas, 276-1131. He has been with the hospital approximately 8 months.

Brian J. Brundin, 274-7522, of Hughes, Thorsness, Gantz, Powell, and Brundin , 509 W. 3rd. Avenue represents the hospital.

Alaska Hospital has not made a mortgage payment since April of 1978. The Department of Labor, through ERISA (Employee Retirement Income Security Act), has said that the Teamsters must divest their interest in the hospital. There are two reasons for this. First, only prudent investments are to be made by the pension fund. Second, too much of the portfolio of the pension fund is invested in the hospital--only 5% of the pension fund may be put in any one investment. The mortgage on the hospital constitutes 27% of the pension fund.) The Department of Labor has not made a formal statement yet; however, when they do it will be to require immediate divestiture. They may also file suit against the Teamsters for having too much of their money tied up in the hospital as a violation of ERISA. The Department of Labor is suppose to make a statement regarding their position in the near future, according to Bob Eccles of the Department of Labor's solicitor's office.

The Indian Health Service has expressed interest in obtaining the hospital for a new Native hospital in Anchorage. Originally this was priority #23 in their budget request; it has since become #2. The budget appropriations will be considered in early June by the Senate. At that time, it is expected they will receive approval for the purchase of the hospital, either directly or through a deal with the Cook Inlet Native Association.

The hospital board has requested assistance from the state in order to maintain the hospital as a community one. They estimate they would need a state loan of approximately $55 million to purchase the mortgage on the hospital and the professional office building. The administrator and board feel that their main problem is the mortgage holder. They are seen as a teamster hospital and the medical community refuses to use the facility because of that. The financial status also affects use, since the doctors are afraid that if they support Alaska Hospital and it goes under, they may not have anywhere to put their patients. There is also some stigma attached to the hospital from the Alaska Clinic days that may play a small part in the boycott of the hospital.

South Central Health Planning and Development, Inc., sent out a questionnaire to the local physicians in the Anchorage area regarding Alaska Hospital. 75 (39%) returned the questionnaire. 31 of the 75 said that a change in the mortgage holder would be necessary before they would admit more patients to Alaska Hospital, another 21 stated it would require a change in the structure of the Board.

Providence Hospital has a capacity of 250. Alaska Hospital is certified for 154. Current occupancy at Providences is 78%; Alaska 44%. A hospital is considered full at 85%. In the first three months of 1980 the average daily acute patient census in Anchorage was 281 (85% of Providences' 250 beds is 212). Without Alaska Hospital there would be 69 people a day in need of hospital care and no facilities available. Providence does plan to add another wing to handle an additional 132 patients; however, this project is not expected to be completed before October of 1983.

According to state statute, funding for hospitals can be given under the following:

18.25.010 thru 18.25.060 deals with aid to nonprofit hospitals for operating deficits. In an attorney general's opinion dated 2/28/80 (addressing 18.25.040-060 only) it states that Alaska Hospital would not be eligible for funding under this section because it is not a "community operated" nonprofit hospital; community operated meaning by a municipality or local government. The Department of Health and Social Services has proposed language changes to sections 18.25.010. 040, and 060 that would make private nonprofit hospitals eligible for funding under this section of statute.

18.26.050 deals with the Alaska Medical Facilities Authority and their powers to invest. 18.26.050 (11) allows for the issue of notes and revenue bonds to pay the cost of <u>establishing and equipping</u> medical facilities. This provides for only noncertificated areas of hospitals to be eligible. It also does not allow for the facility to be up and operating at the time of the investment.

37.10.070 lists investment of surplus funds. a(11) allows for investment if the financial institution retains 33-1/3 percent of the mortgage. a(14) allows for purchase of mortgages if mortgage insurance is available; or no insurance under certain loan-to-value ratios. Mortgage insurance only goes up to $13 million and is at the rate of 3 percent per year.

Alaska Hospital does not qualify for funding under any of these statutes. According to Tom Williams. Commission of Revenue, funds could be provided through a direct appropriation to the Department of Revenue for purchase of the mortgage with any stipulations deemed necessary.

Possible alternatives:

Alaska Hospital would like to see a $55 million loan with the understanding that repayment would allow them time to get the hospital financially responsible. This could be done through an appropriation to the Dept. of Revenue to purchase the mortgage.

By changing the statute under 18.25.010-060, the Dept. of Health and Social Services would be able to offer financial assistance to the hospital for the retirement of debts or assistance in operational deficits to insure nonclosure due to financial problems. (HB 1030)

It might also be possible to sell the hospital to a private chain, such as Hyatt House. In this case, however, the hospital would be run like any other private facility to make money and not necessarily for the benefit of the community.

Indian Health Service could be allowed to purchase the hospital. This would result in it becoming a Native hospital exclusively. It would also create a shortage immediately as far as hospital facilities are concerned. Anchorage would be short 69 beds daily and would be in serious trouble should any sort of emergency situation develop.

May 9, 1980

Honorable Thelma Buchholdt, Chairman
Health, Education & Social Services Committee
House of Representatives
Alaska State Legislature
Pouch Y
Juneau, Alaska 99811

Dear Representative Buchholdt:

This is to respond to your questions as to the allowability of investment by the general fund in the mortgage of the Alaska Hospital and Medical Center, Inc.

The following sections of AS 37.10.070 affect this type of investment:

1. (a)(11) - this section requires that another offering financial institution be involved (i.e. a bank) and that it must retain a 1/3 participation; on the basis of equal representation with neither parties interest (i.e. state v. bank) subordinate to the other. Section (b)(3) also requires that such loans be certified by the originating financial institution to be made in compliance with law and that liens supporting the loan have been perfected.

2. (a)(14) - this section allows for purchase of mortgages with mortgage insurance at certain loan-to-value (LTV) ratios. At a 50 percent LTV no such insurance is required. At 50-60 percent LTV, 10 percent insurance is required; at 60-75 percent, 15 percent insurance is required.

In light of the above requirements, the mortgage on the Alaska Hospital and Medical Center could not be purchased under general investment powers available to the department for investment of State general fund surplus. The payments on the existing mortgage are in arrears and the general poor financial health of the hospital make any bank participation unlikely (and not allowed by governing Federal banking laws) and mortgage insurance unavailable or, at best, prohibitively expensive.

If I can be of any further assistance, please contact me.

Sincerely,

Peter A. Bushre

Peter A. Bushre

RE: Bill Miles Questions on Alaska Hospital

1. Who/what owns P.O.B. (Professional Office Building)?

   Teamsters Building Fund. Current appraisal, 12/10/79, is for $13,000,000. The Teamsters Building Fund leases space to various medical concerns.

2. Who/what owns Alaska Hospital?

   Alaska Hospital and Medical Center, Inc., an Alaskan Nonprofit Corporation, owns the hospital.

3. Mortgage balance on P.O.B.?

   If Teamsters have a mortgage on the P.O.B., it is not part of the issue, as they only want to sell it in connection with the Hospital.

4. Mortgage on the Hospital?

   The mortgage is held by the Teamsters Pension Trust Fund. The balance as of 4/30/80 is $34,929,000 on the principal,

5. Arrears on P.O.B.?

   Not in question, same as #3.

6. Arrears on the Hospital?

   As of 4/30/80 the hospital owes $2,710,000 in back payments. (This figure was $5,714,000; however, they applied their revenue sharing money to this.)

7. Other debts on the P.O.B.?

   Same as #3.

8. Other debts of the hospital?

   They are having trouble meeting their operational commitments. And have an outstanding promissory note with the Pension Fund for $950,000 for purchase of the xray and lab equipment from Alaska Clinic. The hospital is making its payments on this debt currently, which is $8,000 per month.

BYLAWS

OF

THE ALASKA HOSPITAL AND MEDICAL CENTER, INC.

(AN ALASKA NONPROFIT CORPORATION)

ARTICLE I. OFFICES

The corporation shall maintain its principal office for the transaction of its business within the Third Judicial District, State of Alaska.

ARTICLE II SEAL

The corporation shall have a seal.

ARTICLE III. MEMBERS

The members of the corporation are its Board of Trustees.

ARTICLE IV. BOARD OF TRUSTEES

Section 1 - General Powers. The business and affairs of the corporation shall be managed by its Board of Trustees.

Section 2 - Number, tenure and qualifications. The Board of Trustees shall be five (5) in number. The number of trustees may be increased by amendment of these bylaws but may not be decreased to less than five (5) without amendment to the Articles of Incorporation. Trustees shall be elected by the Board of Trustees, as members of the corporation, at the annual meeting of the Board for a term of one (1) year or until their successors shall have been duly elected and qualified, and the term of each trustee shall begin immediately after his election. Trustees may succeed themselves.

Any trustee may be removed from office at any time by majority vote of the remaining trustees, without cause stated. Any trustee shall be removed if he fails to attend three (3) consecutive meetings without excuse acceptable to the Board. Any trustee may resign at any time upon giving written notice to the Board. Any vacancy occurring in the office of a trustee shall be filled by majority vote of the remaining trustees, even though such number be less than a quorum.

To be eligible to be a trustee, a person shall be twenty-one (21) years of age or older, shall have been a resident of the Third Judicial District of Alaska for at least one (1) year preceding, and shall be of good moral character. The judgment of the Board as to qualifications of any member shall be final and binding.

Section 3 - Meetings. The annual meeting of the Board and of the corporation shall be held on the FOURTH THURSDAY in the month of JANUARY in each year, or at such other time as conveniently thereafter may be, stated in notice thereof. The Board shall hold such regular meetings from time to time as determined by the President. Special meetings may be called by the President or by any two members of the Board, and at such special meeting no business other than that stated in the notice shall be transacted.

Section 4 - Notice, Place. No notice need be given of annual or regular meetings unless the time or place be other than that stated at the prior meeting. Notice of any special meeting shall be given at least two (2) days previously thereto by means then deemed best to give actual notice. Any trustee may waive notice of any meeting and the attendance of a trustee at a meeting shall constitute a waiver of a notice, except where the trustee attends for the express purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened.

Meetings shall be held at the offices of the corporation or such other place as may from time to time be determined by the Board, the President, or as set forth in the notice.

Section 5 - Quorum. The majority of the number of trustees shall constitute quorum, but if less than a majority is present at a meeting, it may be adjourned from time to time without further notice.

Section 6 - Manner of Acting. The act of a majority of the trustees present at a meeting at which a quorum is present shall be the act of the Board of Trustees.

Section 7 - Action Without a Meeting. Any action that may be taken by the Board of Trustees at a meeting may be taken without a meeting if a consent in writing shall be signed by all of the trustees. The business transacted at any meeting, however called and noticed and wherever held or if no meeting be held, shall be valid if all trustees execute approval of the minutes thereof or written record of the action taken and such writing is made a part of the minutes of the Board.

Section 8 - Compensation. Unless a resolution of the Board shall provide otherwise, no trustee shall be compensated except that he may be paid his expenses, if any. This shall not preclude any trustee from serving the corporation in any other capacity and receiving reasonable compensation therefor.

Section 9 - Committees. The Board may by resolution establish such standing or special committees, composed of such trustees and other persons, as may from time to time be determined. The Board shall ordinarily act as a committee of the whole.

Section 10 - Officers. The Board shall from time to time elect from among its members a president, vice president and secretary, and such other officers as the Board may from time to time determine. Each officer shall serve at the pleasure of the Board. The president shall preside at all meetings and be the chief executive officer of the Board. The vice president shall act in the absence of the president. The secretary shall keep and maintain adequate records of all meetings of the Board and of the corporation.

Section 11 -- Powers. The Board of Trustees shall have and exercise all powers, without limitation, of all of the members or of the Board of Directors or Trustees of a nonprofit corporation not prohibited by law.

ARTICLE V. ADMINISTRATION

ADMINISTRATOR, COMPTROLLER, OTHER REPRESENTATIVES.

Section 1 -- Administrator. The Board of Trustees shall select and appoint as chief administrative officer of the corporation an administrator, who shall be its direct executive representative in the management of the Hospital and other business of the corporation. Subject only to such policies as may be adopted and such orders as may be issued from time to time by the Board of Trustees, the administrator shall act as and be the duly authorized representative of the Board of Trustees in all matters in which the Board of Trustees has not formally designated another person to act. The administrator has authority and responsibility for:

a. Carrying out all policies and orders established and made by the Board of Trustees.

b. Development, submission to the Board for approval and maintenance of organizational and operational plans for the Hospital.

c. In conjunction with the comptroller, preparation and submission for approval of an annual operating budget, and operation of the Hospital in accordance with approved budgets.

d. Selection, employment control and discharge of employees, and development and maintenance of personnel policies and practices of the Hospital.

e. Care, maintenance, repair and management of the physical properties, inventories, supplies and other assets of the corporation.

f. Supervision of business affairs of the corporation.

g. Representative of the Board and corporation and liaison from the Board with all other entities public, private and governmental, and with the medical staff.

h. Preparation of and presentation to the Board of Trustees of regular and special reports as requested by the Board or as needed to keep the Board fully advised.

i. Attendance at all meetings of the Board.

j. Performance of such other duties as may be in the best interests of the Hospital or assigned from time to time by the Board.

Section 2 - Comptroller. The administrator shall, with the advice and consent of the Board, appoint a comptroller, who shall have charge and custody of and be responsible for all funds and securities of the corporation, receive and give receipts for moneys due and payable, deposit all such moneys in the name of the corporation in such banks, trust companies or other depositories as shall be from time to time selected, maintain the financial records of the corporation and prepare financial reports therefrom, prepare the financial portions of annual operating budgets and be responsible for financial management thereunder, and to do and perform all other duties incident to the office of comptroller and such other duties as may be from time to time assigned to him by the administrator or by the Board of Trustees. If required by the Board, the comptroller shall give a bond for the faithful discharge of his duties in such sum and with such surety or sureties as the Board shall determine.

Section 3 - Other Officers. The Board of Trustees or the administrator with the advice and consent of the Board may from time to time create such other offices and describe the duties and functions thereof.

ARTICLE VI. MEDICAL STAFF

The medical staff of the Hospital shall organize, operate and be self-governed under medical staff bylaws, rules and regulations. The Board of Trustees reserves unto itself, however, the final authority and responsibility for all medical and other matters of the Hospital or the corporation, and accordingly:

a. All medical staff, bylaws, rules and regulations shall be advisory to and not binding upon the Board of Trustees, and

b. No medical staff bylaws, rules or regulations, or any amendment thereto, shall be effective unless and until the same shall have been approved by the Board of Trustees, and

c. The Board of Trustees reserves unto itself the absolute right to amend such medical staff bylaws, rules and regulations or to take any action inconsistent therewith which the Board of Trustees, in its sole discretion, deems to be in the best interest of the Hospital or the corporation.

This provision of these Bylaws respecting the medical staff shall be deemed at all times to be a portion of and shall be set forth in all medical staff bylaws, rules and regulations.

ARTICLE VII. FISCAL YEAR

The fiscal year of the corporation shall be the calendar year.

ARTICLE VIII. SPECIAL PROVISIONS

The corporation shall have no authority to and shall take no action which, under the laws of the United States or of Alaska are prohibited by nonprofit corporations or which jeopardize the corporation's tax exempt status.

ARTICLE IX. INDEMNIFICATION

In acting for the corporation, trustees may rely upon financial records and reports prepared by agents of the corporation. Each trustee is entitled by right to defense, indemnifcation and to be held harmless by the corporation for any and all liability of any kind which a trustee may suffer or for actions threatened against a trustee arising from his actions and decisions made for and on behalf of the corporation to the maximum extent permitted by law.

ARTICLE X. AMENDMENTS

These Bylaws may be altered, amended or repealed and new bylaws may be adopted by the Board of Trustees at any regular meeting or at any special meeting.

KNOW ALL MEN BY THESE PRESENTS: That the undersigned secretary of the Board of Trustees of The Alaska Hospital and Medical Center, Inc. does hereby certify that the above and foregoing bylaws were duly adopted by the Board of Trustees as the Bylaws of the corporation on the 30th day of August, 1978.

William H. Lee
Secretary

AMENDED AND RESTATED

ARTICLES OF INCORPORATION

OF

THE ALASKA HOSPITAL AND MEDICAL CENTER, INC.

Pursuant to the provisions of Article 3 of Chapter 20, Title 10, Alaska Statutes, the undersigned corporation adopts the following Amended and Restated Articles of Incorporation:

ARTICLE I

The name of this corporation is THE ALASKA HOSPITAL AND MEDICAL CENTER, INC.

ARTICLE II

The duration and existence of this corporation shall be perpetual.

ARTICLE III

The object and purposes for which this corporation is formed are as follows:

a. To own, build, erect, construct, lease, maintain, manage and operate hospitals and clinics, general and special, or related facilities, or all of them, within the State of Alaska, or elsewhere, for the care of persons suffering from illness or disabilities and for the rendering of inpatient or outpatient medical care to persons; said business to be carried on and the objectives thereof not for profit, but rather exclusively for charitable scientific and educational purposes within the meaning of the Alaska Nonprofit Corporation Act and of Section 501(c)(3) of the Internal Revenue Code of 1954, as now in force or as may hereafter be amended.

b. To carry on educational activities related to the rendering of care to the sick and injured or to promotion of health and to promote and carry on scientific research related to the care of the sick and injured or the promotion of health.

c. To do and engage in all lawful activities that are in furtherance of one or more of the general purposes of this corporation.

d. To have and exercise the general powers specified in AS 10.20.011, as now in force or as may hereafter be amended. The objects and purposes of the corporation shall be construed also as powers, and the matters expressed in each of the foregoing clauses shall, unless otherwise expressly provided, be in no wise limited by reference to or inference from the terms of any other clause, but shall be regarded as independent objects, purposes and powers; and the enumeration of specific objects, purposes and powers shall not be construed to limit or restrict in any manner the meaning of general terms or the general powers of the corporation; nor the expression of one thing be deemed to exclude another not expressed, although it be of like nature.

ARTICLE IV

The following additional provisions are inserted for the regulation of the affairs of the corporation.

a. No substantial part of the activities of the corporation shall consist of attempting to influence legislation by propaganda or otherwise or directly or indirectly participating in or intervening in (including the publishing or distributing of statements), any political campaign on behalf of or in opposition to any candidate for public office.

b. Upon dissolution of the corporation, its remaining assets, if any, shall be distributed to an organization described in Section 501(c)(3), and exempt from taxation under Section 501(a) of the Internal Revenue Code, as now in force or afterwards amended.

c. The corporation shall not engage in any of the prohibited transactions described in Section 501(b) of the Internal Revenue Code or of the Alaska Nonprofit Corporation Act, as now in force or afterwards amended.

d. The corporation shall not unreasonably accumulate income within the meaning of Section 504 of the Internal Revenue Code, as now in force or afterwards amended.

e. The corporation shall not be operated for the primary purpose of carrying on unrelated trade or business as defined in Section 513 of the Internal Revenue Code, as now in force or afterwards amended.

f. No part of the net earnings of the corporation shall inure to the benefit of any private individual or member within the meaning of Section 501(c)(3) of the Internal Revenue Code, as now in force or afterwards amended.

g. No compensation shall be paid to any member, officer, director, trustee, creator or organizer of the corporation or substantial contributor to it, except as to reasonable allowance for services actually rendered to or for the corporation.

h. No loans shall be made by the corporation to any of its directors or officers.

i. The corporation is organized to serve public interests. Accordingly, it shall not be operated for the benefit of private interests, such as contributors to or members of the corporation, or persons controlled directly or indirectly by such private interests.

ARTICLE V

The corporation shall not have shareholders, but it shall have one or more classes of members, and the Bylaws shall set forth the class or classes, the manner of election or appointment and the qualifications and rights of the members of each class and the certificates evidencing membership, if any, that the corporation may issue.

ARTICLE VI

The corporation shall be under the management and control of a Board of Trustees. Such Board shall consist of not less than five (5) members. The qualifications of and manner of election of trustees as well as the number of trustees shall be prescribed in the Bylaws of this corporation.

ARTICLE VII

The Bylaws of the corporation may be adopted or amended by a majority vote of the Board of Trustees.

ARTICLE VIII

These Amended and Restated Articles of Incorporation correctly set forth without change the corresponding provisions of the Articles of Incorporation as amended, and supersede the original Articles of Incorporation and all amendments.

ARTICLE IX

These Amended and Restated Articles of Incorporation shall be considered effective the 30th day of August, 1978.

DATED this 30th day of August, 1978.

Information Update . . .

LAKE OTIS CLINIC, INC. P.O. BOX 4-1539 ANCHORAGE, ALASKA 995
(907) 276-31

THE LAKE OTIS COMMUNITY HOSPITAL

DELIVERED TO HESS COMMITTEE MAY 19, 1980 BY KEITH DOUGLASS

In a manner true to Chicken Little, a few Assemblymen, a hospital administrator, a labor union, and a couple hundred hospital employees, staff and their relatives are running around Anchorage and Juneau crying that the sky is falling in on Anchorage's hospital care. There is a potential community wide crisis, they say, that needs—IMMEDIATE legislative attention to save Anchorage from a catastrophe. They ask the Legislature, AT THE VERY END OF ITS SESSION, to commit 55 MILLION DOLLARS to bail out two pieces of real estate: The Alaska Hospital, and the Teamster's half-vacant office building.

Shouldn't we question the motives behind this eleventh-hour crisis technique? Why has a hospital that has been failing for four years wait until March of this year to present a proposal to the Legislature? Isn't it simply that devoid of the eleventh-hour crisis atmosphere, such a preposterous proposal would receive no serious consideration?

HOW CAN THERE BE A COMMUNITY HOSPITAL BED CRISIS WHEN:

1) The Indian Health Service has stipulated to a transition plan?

2) Providence Hospital can have additional beds on line with

one year?

3) The Lake Otis Hospital could be built as a TRUE COMMUNITY HOSPITAL in eighteen months?

4) THERE ARE 80 AVAILIBLE BEDS in the Old Community Hospital at 525 L Street that COULD BE AVAILIBLE IN 48 HOURS?

Why haven't we heard about this re-convertable emergency hospital at 525 L Street? Behind the facade of offices, there is a hospital in mothballs, with equipment being maintained, and a provision for its re-conversion to a functional hospital in 48 hours. Why hasn't this facility (which the Municipality leases for about ONE TENTH of the annual debt service on the Alaska Hospital Complex) been exposed as a temporary alternate if the Alaska Hospital folds? Because, ladies and gentlemen, such solutions are NOT what crisis are made of.

There is no real crisis in hospital care in Anchorage today, NOR WILL THERE BE IF THE DEPARTMENT OF LABOR FORCLOSES TOMORROW. The ONLY ones that will be caught in a crisis if this Legislature refuses to be swayed by pressure tactics are:

1) Teamsters' Local 959, and its officers

2) The employees, medical staff, and administrator of the Alaska Hospital

3) Local politicians who have made this an election year issue

4) Providence Hospital, who would suddenly have UNKNOWN and UNCONTROLLED competition for profitable medical-surgical beds.

We are told that the Alaska Hospital needs a "loan" of 55 PLUS DOLLARS to save them. Proponents of this move would have you believe that this is a bonafide loan. In reality, it is a direct subsidy to the Hospital and Teamsters IN EXCESS of the 5 million per year that the Hospital already receives. This hospital operation is currently loosing over 4 MILLION DOLLARS PER YEAR IN EXCESS OF UNFUNDED DEPRECIATION. How can anyone seriously expect it to pay back its loan, PLUS the loan on the half vacant office building at ANY time certain?

The real truth is that proponents of H.B. 1030 KNOW that the Legislature would never grant a direct appropriation of this magnitude to any private group, even to the Teamsters. They would have you pass enabling legislation under the guise of a loan program, without insuring any of the normal safeguards, and leave it to the administration to decide its propriety.

It is a credit to the legislative process, and to Mrs. Buchholi that these hearings are being held, and that this committee has resisted special-interest pressures to pass the bill out. I ask only that you continue to look beyond the veneer of the arguments made by proponents of H.B. 1030, and ask "Is the sky REALLY falling?" If you decide that it is, than it is the responsibility of THIS COMMITTEE, not others down the line, to suggest alternate solutions, and to build in safeguards to this expendature of state funds.

Thank you.

The Honorable Thelma Buchholdt
State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

On April 26 the second annual Providence Medical Staff Planning Congress was held here at Providence Hospital.

The purpose of the Congress was to encourage the free exchange of ideas on several issues relating to achieving and maintaining excellence in patient care. Attendance was high with over 150 participating, including medical staff members, hospital management staff, and a wide variety of citizens and officials involved in health planning programs.

One of the issues discussed was: "Should Anchorage be a one, two, or three hospital town?" Following a thorough discussion of the alternatives by a discussion group, the Congress adopted four resolutions in the afternoon plenary session. Also, due to the serious nature of the resolutions and their timeliness, it was agreed that the resolutions be communicated to appropriate members of the state legislature. They are as follows:

Resolution #1 "We are opposed to the federal government purchasing or leasing Alaska Hospital and Medical Center for the Native services hospital." (Approved unanimously.)

Resolution #2 "Anchorage should be a two-hospital city for planning purposes over the next five years. We strongly endorse maintaining Alaska Hospital and Medical Center as a non-profit community hospital in Anchorage, and recommend that they seek financial assistance from the state legislature to develop interim and long-range financing." (Approved unanimously.)

Resolution #3 "If Alaska Hospital and Medical Center beds are removed from the community through federal purchase for Native beds, there must be a disaster mode plan for both current and long-range needs to accommodate patients." (Approved unanimously.)

Resolution #4 "We currently disapprove of the hospital proposed by Lake Otis Clinic because it lacks community support, medical support, financial support and community planning input, and because it lacks in its current conception the ability to meet the hospital bed needs and the community service needs now available at Alaska Hospital and Medical Center." (Approved at Congress by voice vote with one opposed.)

If you have any questions regarding these resolutions or the Medical Staff Congress, please give us a call.

Sincerely,

Christopher Beardsley

Department of Commerce and Economic Development

Certificate

The undersigned, as Commissioner of Commerce and Economic Development of the State of Alaska, hereby certifies that duplicate originals of Articles of Merger of MEDICAL DENTAL BUILDING CORPORATION, a nonprofit corporation and THE ALASKA HOSPITAL AND MEDICAL CENTER, INC., a nonprofit corporation, duly signed and verified pursuant to the provisions of the Alaska Nonprofit Corporation Act, have been received in this office and are found to conform to law.

ACCORDINGLY the undersigned, as such Commissioner of Commerce and Economic Development, and by virtue of the authority vested in him by law, hereby issues this Certificate of Merger of

MEDICAL DENTAL BUILDING CORPORATION

MERGED INTO

THE ALASKA HOSPITAL AND MEDICAL CENTER, INC.

and attaches hereto a duplicate original of the Articles of Merger.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed my official seal at Juneau, the Capital, this

FEB 21 1978

STATE OF ALASKA

ARTICLES AND PLAN OF MERGER OF MEDICAL DENTAL BUILDING CORPORATION, INC. A NONPROFIT CORPORATION INTO THE ALASKA HOSPITAL AND MEDICAL CENTER, INC. A NONPROFIT CORPORATION

The undersigned corporations, in accordance with Sections 236, 246, 251 and 256 of Article IV, Chapter 20, Title 10, of the Alaska Statutes, hereby adopt the following Articles and Plan of Merger.

FIRST: These Articles and Plan of Merger were duly adopted and approved by the Board of Directors of MEDICAL DENTAL BUILDING CORPORATION, INC. by special meeting of the Board of Directors held May 31, 1977, in the manner and by the vote required by the laws of the State of Alaska. Likewise, these Articles and Plan of Merger were duly adopted and approved by the Board of Trustees of THE ALASKA HOSPITAL AND MEDICAL CENTER, INC. at a special meeting held May 31, 1977, in the manner and by the vote required by the laws of the State of Alaska.

The Plan and Agreement of Merger is as follows:

ARTICLE I

The parties hereto agree to effect this merger.

ARTICLE II

The parties to these Articles and Plan of Merger are MEDICAL DENTAL BUILDING CORPORATION, INC. (hereinafter referred to as MDBC, INC.) and THE ALASKA HOSPITAL AND MEDICAL CENTER, INC. (hereinafter referred to as THE ALASKA HOSPITAL), both incorporated as nonprofit corporations in the State of Alaska.

ARTICLE III

The corporation to survive the merger is THE ALASKA HOSPITAL AND MEDICAL CENTER, INC., an Alaskan nonprofit corporation, which shall continue under the same corporate name.

ARTICLE IV

The principal offices of MDBC, INC. and THE ALASKA HOSPITAL are located at Anchorage, Alaska. MDBC, INC. is the owner of real property, the title of which will become vested in THE ALASKA HOSPITAL as a result of this merger.

ARTICLE V

The Articles of Incorporation of THE ALASKA HOSPITAL, as in effect on the effective date of this merger, shall continue in full force and effect as the Articles of Incorporation of THE ALASKA HOSPITAL and shall not be changed or amended by the merger.

ARTICLE VI

THE ALASKA HOSPITAL reserves the right and power, after the effective date of the merger, to alter, amend, change or repeal any provisions contained in the Articles of Incorporation in the manner now or hereafter provided by statute, and all rights conferred on officers, directors or members are subject to this reservation.

ARTICLE VII

The Bylaws of THE ALASKA HOSPITAL, as such Bylaws exist on the effective date of the merger, shall remain and be the Bylaws of THE ALASKA HOSPITAL, until altered, amended or repealed, or until new Bylaws shall be adopted in accordance with the provisions thereof, the Articles of Incorporation or in the manner permitted by the applicable provisions of law.

ARTICLE VIII

The Board of Trustees of THE ALASKA HOSPITAL, as of the effective date of the merger, shall continue in office until the next annual meeting of the Board of Trustees of THE ALASKA HOSPITAL. The number of the Board of Trustees of THE ALASKA HOSPITAL shall continue to be fourteen (14) in number and shall be the following persons: Michael Barry, Floyd Connors, John Creed, Gary Dixon, William Ivy, M.D., Robert McFarland, William Padgett, Robert Sinnett, Frank Yarnot, Jesse Carr, Vernon Cates, M.D., Barney Gottstein, Gordon Hartlieb and John Forceskie.

The following officers of THE ALASKA HOSPITAL immediately prior to the effective date of merger shall continue in office after the effective date of merger and until the next annual meeting of the Board of Trustees of THE ALASKA HOSPITAL: Jesse Carr, President; Vernon Cates, M.D., Vice President; and William Padgett, Secretary.

ARTICLE IX

MDBC, INC. is a wholly owned subsidiary of THE ALASKA HOSPITAL and, therefore, there is no exchange of shares to be had as a result of this merger. There are no members of either nonprofit corporation entitled to vote in this merger.

ARTICLE X

On the effective date of the merger, the separate existence of MDBC, INC. shall cease (except to the extent continued by statute), and all of its property, rights, privileges and franchises of whatsoever nature and description shall be transferred to, vest in and devolve upon the surviving corporation, without further act or deed. Conformity deeds, assignments or other like instruments, when deemed desirable by THE ALASKA HOSPITAL to evidence such transfer, vesting or devolution of any property, right, privilege or franchise shall at any time, and from time to time, be made and delivered in the name of MDBC, INC. for the last acting officers thereof, or by the corresponding officers of the surviving corporation.

ARTICLE XI

The effective date of the merger shall b May 1, 1977, if these Articles and Plan of Merger are accepted for record by the Department of Commerce and Economic Development of the State of Alaska.

SECOND: There are no members entitled to vote in either corporation a party to this transaction.

THIRD: Pursuant to the Alaska Statute 10.20.236, approval of this merger was had by the Board of Directors of MDBC, INC. and the Board of Trustees of the ALASKA HOSPITAL by a majority vote as indicated below:

POSITION PAPER/Department of Health & Social Services

HOUSE CONCURRENT RESOLUTION NO. 43

"A resolution endorsing the concept and requesting implementation of the Indian Child Welfare Act of 1978."

House Concurrent Resolution No. 43 resolves that the legislature endorse and support the concept and policy of the Indian Child Welfare Act of 1978 (P.L. 95-608) and urgently request the Governor to direct the Department of Health and Social Services to promptly take steps necessary for implementation of the Act in Alaska.

The Department strongly supports the Indian Child Welfare Act of 1978 and certainly supports the legislature's endorsement and support of the Act. The Department, however, questions the necessity for the resolve number two in HCR No. 43. The Department has been actively involved in implementing the Act since its passage in November 8, 1978. During 1979 the Department has taken numerous steps towards full implementation of the Act (report attached).

APPROVED BY: _____ DATE: 2/5/80
Helen D. Beirne, Commissioner
Department of Health and Social Services

REPORT ON IMPLEMENTATION OF THE INDIAN CHILD WELFARE ACT

The Department of Health and Social Services has been quite active since the passage of the Indian Child Welfare Act in working towards full implementation. As early as February 13, 1979 Department representatives met with the Area Director of BIA and representatives from various native non-profit corporations to begin mapping out strategies and procedures necessary for implementation. In early March Department Representatives met with the BIA contractors to further discuss implementation. On March 7, 1979 the Department testified at hearings held in Juneau regarding the first draft of federal regulations (testimony attached). These regulations were finally published as proposed regulations on April 23, 1979 and were not finalized until July of 1979.

During this interim period before finalization of the implementing regulations the Department's Regional Social Services Managers met with representatives of the native non-profit organizations as well as various village and IRA council leaders to discuss the Act and to begin informal working procedures. The Managers also met with court personnel and the attorney general's offices to establish appropriate court procedures. The Social Service's Field Director met with Art Snowden, the Court Administrator, his staff, the BIA Social Services Director, and the BIA Counsel to further work toward state-wide development of court procedures. As a result of this meeting the Court Administrator agreed to include a letter summarizing the Act in the next mailing to the Alaska Bar members.

Since the finalization of regulations the Department has not only attempted to comply with the formal procedures established by the regulations but has developed many cooperative projects for furthering the implementation of the Act. For example, the Division of Social Services has been working with Tanana Chiefs and United Crow Band on locating, studying, and licensing native foster homes. Similar projects have also been operating in Fairbanks (Fairbanks Native Association) and in Southeast Alaska (Tlingit-Haida). The Division also held a two day training session in Anchorage on Oct 8 & 9, 1979 on the Indian Child Welfare Act. The trainer was Bert Hirsh, one of the original drafters of the law. All the native non-profit organizations as well as state and private agencies were invited to attend. Finally, the Division's training director by request of the native non-profit in the Bethel area provided a training session in Bethel.

These are just some of the examples of the cooperative efforts that have been initiated state-wide. It should be noted however that the Department has supported the concepts embodied in the Indian Child Welfare Act before its passage in 1978. In fact the Department supported a change in 47.10.230 (Powers and duties of Department over care of child) which made placement with blood relatives mandatory if they requested custody.

The intent of this statute was to provide for placement of children in surroundings which meet their social and cultural needs.

The Department has attempted to implement this statute to the fullest extent possible. It has been very successful in areas such as Nome and Bethel but less successful in larger cities such as Anchorage, Fairbanks, and Juneau. For example, 10 years ago 92% of all native children placed for adoption were placed in non-native homes. This has been completely reversed. Presently 75% of the native children placed for adoption are placed in native homes. The only exceptions being some severely handicapped children who have special medical needs and some native children who have been in long term foster care with a non-native family. In addition, in the Nome Region in 1969 all but two Eskimo children were in non-native foster homes. Today in Nome the figures are: 32 native children in native homes and 7 in non-native homes. In the Bethel Region there are 42 native children placed in foster homes. All are placed in native foster homes. However, the placements of native children in native foster homes are significantly lower in the larger cities with Anchorage having the lowest percentage (20 out of 127 native children are in native foster homes). The Department has been working diligently to improve the situation. As noted earlier Tlingit-Haida and Fairbanks Native Association have had foster home finding projects in Juneau and Fairbanks respectively. The Department has supported and worked closely with the staff of these projects. However, the success has been limited.

In summary the Department has been supporting the concepts of the Indian Child Welfare Act for a number of years. It had implemented certain policies consistent with the Act prior to its passage. In addition the Department, has worked diligently to develop formal procedures to implement the Act as well as numerous cooperative projects. The Department realizes there is stil much to be accomplished and certainly agrees to continue its present efforts of implementation and to increase its efforts wherever necessary.

PUBLIC HEARING ON THE INDIAN CHILD WELFARE ACT (PL 95-608)

TESTIMONY:

The Department of Health and Social Services appreciates the opportunity to testify at these hearings. We thank the National American Indian Court Judge Association and Tlinget-Haida Central Council for sponsoring and coordinating this public hearing which provides Alaskans a chance to speak out on such important legislation as the Indian Child Welfare Act.

The Department strongly supports the purpose of the bill which is to protect the best interests of native children and to promote the stability and security of native tribes and families by the establishment of minimum federal standards for the removal of native children from their families and the placement of such children in foster or adoptive homes which will reflect the unique values of native culture. We will diligently work to achieve this purpose and to meet these standards. This is in keeping with the revisions of the Alaska Children's Code passed in 1977. We fully recognize that implementation of both these acts will entail maximum cooperation between the Department, the various organizations representing native Americans and the Federal government. Only through cooperation will we be able to accomplish the tasks necessary to implement these legislative mandates.

The Department is particularly concerned about the fact that the draft regulations only address two areas of Title I: notification and payment for appointed counsel. There are many other areas in Title I that need clarification through regulations, particularly notification procedures (Sec. 102(a)), active efforts to provide remedial and rehabilitative programs designed to prevent the break-up of the Indian family (Sec. 102(d)), confidentiality of information regarding both parents and child (Sec. 102(a) and Sec. 105(c) and (f)), definition of qualified expert witnesses (Sec. 102 (e) and (f)), procedures for informed consent (Sec. 103 (a)). The Department would appreciate an opportunity to comment on these proposed regulations once they are drafted.

In conclusion, the Department is concerned with the best interest of all Alaskan children. The programs for children in Alaska have been struggling due to an ever decreasing committment of resources. In this International Year of the Child, all organizations interested in the welfare of children need to cooperate to enable this landmark legislation, the Indian Child Welfare Act, to be implemented.

This letter sent to all members of House & Senate

APR 26 1979

The Honorable Clem Tillion
Alaska State Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Tillion:

The Indian Child Welfare Act was signed into law in November, 1978. The regulations implementing this law are scheduled for completion sometime in June. Due to the significant impact this law will have on the Department's operations, I wanted to take this opportunity to give each of you a brief summary of the Department's activities regarding its implementation and a review of some of the most significant changes which will result from its passage.

The Department has been quite involved in the developments concerning the implementation of this Act in Alaska. As recently as March 7th, one of my staff and a member of the Attorney General's Office testified at a hearing concerning the proposed federal regulations. In addition, Department representatives have met with the Bureau of Indian Affairs and with various native non-profit organizations to discuss and plan the process of implementation. Further meetings with these organizations are planned and the Department is in the process of developing agreements with some of the organizations.

In relation to specific change, the Indian Child Welfare Act does alter existing procedures for both adoptions and foster child placements of native children. The area of adoptions is addressed in Sec. 103 of the Indian Child Welfare Act. This section requires voluntary relinquishments of the parental rights of parents of native children to be "executed in writing and recorded before a judge's certificate that the terms and

consequences of the consent were fully explained in detail and were fully understood by the parent or Indian custodian." Presently, the Division of Social Services' procedures is that "if there is no active child in need of aid case before the court, the relinquishment may be taken before a social service worker of the Department." In addition, Sec. 103 mandates that "any consent given prior to, or within ten days after birth of the Indian child shall not be valid." Once again this will result in significant change for the Division of Social Services. The Division's policy, as stated in the manual, is that "a relinquishment may not be taken prior to 48 hours following the birth of a child." Finally, Sec. 103 states that "the consent of the parent may be withdrawn for any reason at any time prior to the entry of a final decree of termination of adoption, as the case may be, and the child shall be returned to the parent." Under present Alaskan statutes, the parents have 10 days to withdraw the relinquishment. After the 10 day period, the parents must show good cause for withdrawing consent.

In regard to foster placement, the Indian Child Welfare Act addresses both custody proceedings (Sec. 102) and placement (Sec. 105). In Sec. 102(d) the Act states that "any party seeking to effect a foster care placement, or termination of parental rights to an Indian child under state law, shall satisfy the court that active efforts have been made to provide remedial services and rehabilitative programs designed to prevent the break-up of the Indian family and that these efforts have proved successful." The Act goes on to state in Sec. 102(e) that "no foster care placement may be ordered in such proceedings in the absence of a determination supported by clear and convincing evidence, including testimony of qualified expert witnesses, that the continued custody of the child by the parent or Indian custodian is likely to result in serious emotional or physical damage to the child." The standard of proof that the Indian Child Welfare Act establishes for foster placements is higher than present state law. Under present law a preponderance of the evidence is required and there is no requirement for testimony from expert witnesses.

Sec. 105(b) of the Act establishes an order of preference for placement of native children: (1) a member of the child's extended family; (2) a foster home licensed or approved by the Indian child's tribe; (3) an Indian foster home licensed or approved by an authorized non-Indian licensing authority; or (4) an institution for children approved by an Indian tribe or operated by an Indian organization which has a program suitable to meet the Indian child's needs. The Division's policy now in effect requires workers to give consideration to placement with relatives before exploring other alternatives. This Act, however, states that "a preference shall be given in the absence of good cause to the contrary" to the order of placement delineated above. To accomplish this the Department and the native organizations in the state must develop ongoing cooperative efforts, particularly in the area of the finding and licensing of foster homes.

These are just a few of the changes which will result from the Indian Child Welfare Act. There are many other anticipated changes in the area of court proceedings. Due to the fact that the federal regulations have not been published, the Department cannot determine the total impact of this Act. The Department is working with the Attorney General's Office to develop an implementation plan.

If you have further questions, please feel free to contact my office.

Sincerely,

Helen D Beirne

February 7, 1980

Thelma Buchholdt, Chairperson
Health, Education and Social Services
Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

The Central Council, Tlingit and Haida Indian Tribes of Alaska supports House Concurrent Resolution No. 43, "A resolution endorsing the concept and requesting implementation of the Indian Child Welfare Act of 1978." We believe that legisaltive recognition and support of this act is essential to full implementation. We also believe that a directive to the Department of Health and Social Services regarding prompt implementation will facilitate the department's establishment of appropriate priorities concerning the act.

As a follow up to the resolution, a review of the existing Children's Code is necessary to identify areas of non-compliance with the Indian Child Welfare Act. Then any statutes found to be in non-compliance should be corrected with appropriate legislation.

Thank you for giving your support and attention to this issue of great concern to Alaska Native families.

Sincerely,

CENTRAL COUNCIL, TLINGIT AND
HAIDA INDIAN TRIBES OF ALASKA

SUBJECT: House Joint Resolution No. 19

This resolution would provide for an amendment to the constitution of the State of Alaska whereby the Legislature would be directed to provide a tax credit for tuition paid to all "nonsectarian" educational institutions in the State. In considering this resolution, the Legislature should be aware of two items which appear to be in conflict with the several proposed tax credit bills that have been introduced this year. There are two limiting provisions in the proposed constitutional change. First of all, the credit would be available for payments only to nonsectarian educational institutions, which would eliminate all schools operated by a religious organization. Secondly, it would limit the payments to institutions in the State of Alaska. The current proposed tuition credit bills would allow the credit regardless of where the institution is located.

HJR 29: REQUESTING CONGRESS

TO

PERMIT WORKFARE PROGRAMS

Compiled by:

Deborah E. Behr
Policy Analyst
Legislative Affairs Agency
Research Division

April 12, 1979

MEMO

WORKFARE PROGRAMS FOR AFDC ADULT RECIPIENTS

AND POTENTIAL BENEFITS TO ALASKA IF WORKFARE PROGRAMS

WERE PERMITTED UNDER FEDERAL LAW

The rising costs of welfare have been a source of concern for many Alaskan taxpayers. Welfare costs for cash, food, medical, and social assistance have more than tripled in the most recent eight-year time period. Workfare programs are an outgrowth of a desire by some taxpayers to require that needy able-bodied adult recipients be required to work in exchange for their welfare assistance.

The largest cash assistance program in Alaska is the Aid to Families With Dependent Children (AFDC) Program. AFDC is anticipated to provide over $23 million dollars in aid to over 6,000 needy eligible Alaskan families in Fiscal Year 1980. Each family is anticipated to receive an average of $325 a month to cover the costs of housing, fuel, clothing, utilities, and other life necessities. If one were to divide that total $23 million figure by the state's projected FY '80 population, an annual cost of more than $50 per Alaskan would result. That $50 reflects only the cost of the grants and does not include the cost of administration, eligibility determination, related social services, covered medical assistance, and food stamps. It must be kept in mind, though, that the $50 figure includes the 50 percent funding by the federal government. Alaskans are federal taxpayers too; thus federal dollars spent indirectly affect the individual Alaskan's pocketbook, as well.

Many taxpayers in Alaska and elsewhere have expressed a concern regarding the rising AFDC caseload and expenditures that are occurring in most states due to the high unemployment and high costs of living. Some of the taxpayers are asking that able-bodied AFDC adults be required to work in exchange for their welfare assistance. Many governmental units on state or local basis are seriously examining requiring adult recipients who are not employed or disabled to do public service work as a condition of receiving their welfare checks.

Other States and Workfare

Alaska is not the only state that has expressed an interest in imposing AFDC workfare requirements. In September of 1978, Jay Rowen of the U.S. Department of Labor prepared an informal memorandum on this topic. Mr. Rowen noted that the following 20 states, or communities within these states, have taken the initiative regarding AFDC workfare requirements.

They are:

1. Alaska
2. Colorado
3. Connecticut
4. Florida
5. Idaho
6. Kentucky
7. Maine
8. Massachusetts
9. Michigan
10. Mississippi
11. New Hampshire
12. New Jersey
13. New Mexico
14. New York
15. North Carolina
16. Oregon
17. Pennsylvania
18. Tennessee
19. Utah
20. Wisconsin

(The memorandum detailing each state's actions regarding workfare programs is included in the attached notebook.) These 20 states expressed an interest in mandatory "workfare" requirements be imposed on AFDC clients even though federal law does not presently allow this.

Workfare in Utah

Probably the most publicized workfare experiment is currently being conducted in Utah. Utah's Work Experience and Training (WEAT) Program was originally designed to be a "workfare" program where recipients would work off their grants at one hour for each $1 of aid to a specified maximum. Through time, and in response to federal pressures as well as actual program experience, it was found that the original approach was not effective. The make-work public projects, although keeping clients busy, did not provide them with the necessary job skills and work experience needed for future employability. People simply were not getting off assistance as a result of the WEAT participation. And since the WEAT jobs were seen as make-work, dead-end projects, resentment among the clients was high. Utah thus began to restructure its WEAT program to focus on sheltered work experiences. Thus, all persons who were required to register for WIN but for whom a WIN placement was not available were also required to register for WEAT. WEAT, unlike WIN, is entirely operated by the state welfare department. The eligibility workers develop WEAT project sponsors among public and private non-profit agencies. WEAT registrants are assigned to an available sponsor where they work for no pay three days a week with the remaining two days set aside for job search or job skill improvement activities. Failure to perform acceptably on the work project without a valid excuse could result in the mandatory registrants' ineligibility for assistance.

The welfare rights organization in Utah planned to sue the state over the mandatory features of the program. Participants voiced objections that they did not want to jeopardize the existence of the program and the suit was dropped. The organization now is working for improvements in WEAT. Similarly, the Tribal Council of the San Juan County Navajo Reservation also vigorously objected to federal attempts to have the WEAT program there removed. These clients found that WEAT was more successful for them than WIN, for WEAT could offer a more personal, less demanding environment, than the formal work and training program of WIN. This was especially true for clients with low skills or no job history.

The success of the WEAT program in Utah is due in large part to the uniform attitude found throughout the state. The recipients, the sponsors, the legislature, and the general population share a common work ethic that all able-bodied persons should work. State officials stress the importance of training or finding employment for welfare recipients as soon as possible after application. It is their experience that the greater the wait for WIN or WEAT placement, the less chance for success. Utah has a low unemployment rate (less than six percent) so that, once trained, the chances for employment are good. A major problem still remains in the inadequacy of appropriate long-term training and support services coupled with the fact that many welfare clients may, in fact, never be able to enter competitively into private sector employment. Also, lack of enough licensed day care facilities are also beginning to provide significant barriers to employment for welfare mothers.

Despite WEAT's apparent success in Utah, HEW officials have consistently opposed efforts toward similar programs in other states. Utah's program was implemented at a time when federal policies were unclear, and support within the state was nearly unanimous. These favorable conditions do not exist for other states.

WIN

The federal government currently permits only one job placement and training program for AFDC recipients that program is called WIN.

WIN stands for the Work Incentive Program and was instituted in Alaska in 1968. It is the principal manpower program aimed at assisting AFDC recipients to find and retain jobs. Under provisions of the Federal Social Security Act, any able-bodied member of an AFDC family who is 16 or more years of age, not in school and not otherwise needed to care for a disabled person in the home, must participate in the program as a condition of receiving his or her AFDC grant. AFDC recipients with pre-school children are not required to participate in WIN. WIN provides both manpower (counseling, training, and placement) and support services, subject to its funding limitations. Both administrative and assistance costs are funded 90 percent by the federal government and 10 percent by the state government. Federal participation is subject to a national ceiling with an individual state share based on a intricate formula related to performance and AFDC caseload size. The total national federal authorization for WIN has not been increased since 1968.

Alaska, because of its minimal AFDC program (the state has opted not to operate an unemployed father program), has a small welfare population in comparison to highly-populated urban states with comprehensive AFDC coverage, such as California. Alaska must compete with these states, which automatically receive large appropriations despite the degree to which they effectively penetrate the AFDC caseload. Also, Alaska's share of WIN funds does not take into account the state's higher cost of living. Today, due primarily to funding constraints, WIN offices are open only in Anchorage and Juneau (which serves Southeast Alaska).

WIN and Workfare

Due to WIN, AFDC, and other federal requirements, workfare programs other than WIN, are generally not permitted, except as approved demonstration grants. Federal funding to the state would be jeopardized if the state were to implement a workfare program not approved by the federal government. Louis Weissman, HEW Acting Assistant Regional Commissioner for the Office of Family Assistance, testified before House HESS Committee on March 16, 1978, stating that requiring individuals to work off, or work for, AFDC assistance is inconsistent with AFDC program requirements. Implementation of a workfare system for AFDC recipients would jeopardize federal funding, except as part of an approved federal demonstration project. In a letter to Gregg Erickson, Director of Legislative Research Services, dated September 28, 1978, Bernard E. Kelly, Regional HEW official, confirmed that the federal position remained unchanged. Mr. Kelly's letter notes the "sanctions range from the withholding of specific amounts of money to the disallowance of all federal financial participation for AFDC." Federal funding in other related programs, such as WIN, Title XX, and Medicaid, may be affected, as well by the implementation of a workfare program not approved by the federal government.

HJR 29 and Benefits to Alaska

HJR 29 urges Congress to amend federal law to allow workfare programs for able-bodied AFDC adult recipients. It also requests the legislatures in the other states to pass similar resolutions, so that Congress will be aware that many states, not just Alaska, are interested in this proposed change in federal law.

The benefits of workfare programs commonly cited are:

1) Mechanism for removing able-bodied adult recipients from AFDC rolls who refuse to work for their assistance;

2) Provision of needed services to society that would cost additional state tax dollars; and

3) Promotion of client dignity, self-esteem and responsible work attitudes by allowing clients to work for their assistance as a paycheck, rather than just receiving a welfare "hand-out".

In conclusion, it is important to note that the resolution, if passed, only expresses Alaska's interest in the federal law change. Although

this paper does not address the problems regarding actua implementation of workfare programs or effect on the clients, further action by the legislature would be necessary at a later date to authorize and fund a workfare program. At that time, the costs and merits of the particular workfare programs permitted by Congress could be discussed and reviewed for their appropriateness for Alaska.

HEW TESTIMONY ON WORKFARE

MINUTES OF HOUSE

HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

March 16, 1978

The meeting was called to order at 3:05 P.M. by Chairman Parr. Present was: Mr. Beirne, Mr. Phillips, Mr. Chatterton, Mr. Bennett, Mr. Cotten, Mr. Nakak, Mrs. Buchholdt and Mr. Cse.

Mr. Parr stated House Bill's 410, 415, 891, 493 and SSHB 666, all bills dealing with University of Alaska re-organization, were on the agenda for today. Before discussing the University of Alaska bills, Mr. Dick Wilson introduced Mr. Louis Weissman, Acting Assistant Regional Commissioner, from the Division of Health, Education and Welfare in Seattle, Washington, to speak to the Committee regarding HB 840.

Mr. Weissman spoke from a prepared testimony. Copies were made available to the committee. He stated HB 840 would establish work requirements for recipients of public assistance. Mr. Weissman stated the work requirements under the federal law and regulations. He also told the committee that enactment of HB 840 as it is now written would be inconsistent with the Social Security Act and Federal Regulations. He said enactment of the proposed bill would result in a compliance issue with the State of Alaska's Public Welfare Division and could place the federal financial participation dollars at risk.

Next to be taken up were the University of Alaska re-organization bills. Mr. John Schaeffer, member of the Board of Regents was first to testify. Mr. Schaeffers testified, that given more time he feels that the University of Alaska can correct its own problems. He stated once the financial problems have been corrected, they can begin to address other issues. Mr. Schaeffer also stated that of all proposed legislation, HB 891 would best fit the University of Alaska's needs.

Mrs. Sharilyn Mumaw, student regent University of Alaska, was next to speak. Mrs. Mumaw did not offer testimony but answered questions asked to her by the committee.

Next to testify was Mr. Mason West, President Alaska Community Colleges Federation of Teachers Anchorage. Mr. West stated that ACCFT fully supports HB 410 which advocates total separation of the community colleges from the University of Alaska. He stated they wish to be responsible and responsive to the state legislature, they wish to be accountable for all dollars requested and expended by the community colleges and they wish to provide academic programs that provide students with a quality education by implementing a 5 year plan that is comprehensive, integrated and distributed to all concerned.

No action was taken on these bills today, they will be before the committee again tomorrow.

Meeting adjourned at 4:50 P.M.

SOCIAL SECURITY ADMINISTRATION
OFFICE OF THE REGIONAL
COMMISSIONER

TESTIMONY REGARDING ALASKA HOUSE BILL NO. 846
MARCH 16, 1973

ALASKA HOUSE BILL NO. 846 WOULD ESTABLISH WORK REQUIREMENTS FOR RECIPIENTS OF PUBLIC ASSISTANCE. INCLUDED AMONG THESE RECIPIENTS WOULD BE CERTAIN PERSONS WHO ARE RECIPIENTS OF BENEFITS UNDER TITLE IV-A OF THE SOCIAL SECURITY ACT, KNOWN COMMONLY AS AID FOR FAMILIES WITH DEPENDENT CHILDREN OR AFDC.

WORK REQUIREMENTS IN RELATION TO THE RECEIPT OF ASSISTANCE UNDER THE FEDERALLY AIDED AFDC PROGRAMS HAVE BECOME A MATTER OF CONSIDERABLE PUBLIC INTEREST.

THE WORK ETHIC IS WELL ESTABLISHED AS A PART OF OUR NATIONAL LIFE. THE NEED AND WISH TO BE ECONOMICALLY PRODUCTIVE MAKES UNEMPLOYMENT A MAJOR PROBLEM IN TODAY'S SOCIETY. IT IS NOT ONLY THOSE WHO ARE POORLY EQUIPPED WHO HAVE DIFFICULTY IN FINDING EMPLOYMENT, MANY WHO ARE WELL EDUCATED AND TRAINED WITH VARIOUS SKILLS ARE ALSO FINDING THEMSELVES IN THE LINES TO CLAIM UNEMPLOYMENT COMPENSATION BENEFITS AND ON THE WELFARE ROLLS FOR VARYING LENGTHS OF TIME. IN ADDITION THERE ARE THE YOUNG PEOPLE WHO ARE SEEKING FOR THE FIRST TIME TO ENTER THE LABOR MARKET WHO ARE UNABLE TO FIND WORK AND THUS SEEK WELFARE AID.

THERE ARE NO DATA TO ESTABLISH THAT PERSONS SEEKING OR RECEIVING WELFARE AID ARE ANY LESS ANXIOUS TO WORK THAN ARE OTHER PERSONS.

WORK REQUIREMENTS UNDER FEDERAL LAW AND REGULATIONS

TITLE IV-A OF THE SOCIAL SECURITY ACT IMPOSES TWO DIFFERENT SETS OF PENALTIES, ONE FOR UNEMPLOYED FATHERS AND ANOTHER FOR ALL OTHER PRESUMED EMPLOYABLES UNDER THE WIN PROGRAM, FOR REFUSING TO REGISTER FOR EMPLOYMENT, REFUSING BONA FIDE OFFERS OF EMPLOYMENT OR TERMINATING WORK WITHOUT GOOD CAUSE.

THE AID FOR FAMILIES OF DEPENDENT CHILDREN UNEMPLOYED FATHERS PROGRAM (AFDC-UF) IS AN OPTIONAL PROGRAM AND ONE IN WHICH THE STATE OF ALASKA HAS DECLINED TO PARTICIPATE.

UNDER SECTION 407(b)(1) OF THE ACT AND 45 CFR 233.100(a)(5) THE ENTIRE FAMILY OF AN UNEMPLOYED FATHER MAY NOT RECEIVE AFDC IF THE FATHER HAS WITHOUT GOOD CAUSE, WITHIN A 30 DAY PERIOD, REFUSED A BONA FIDE OFFER OF EMPLOYMENT OR TRAINING FOR EMPLOYMENT.

I MENTIONED THE SANCTION PROVIDED UNDER THE AFDC-UF PROGRAM TO ILLUSTRATE THAT FEDERAL LAW DOES REQUIRE EMPLOYABLE FATHERS TO ACTIVELY SEEK EMPLOYMENT AS A CONDITION OF RECEIPT OF BENEFITS. ALASKA HOUSE BILL 840 WOULD NOT AFFECT THE TREATMENT OF EMPLOYABLE MALES INSOFAR AS RECEIPT OF FEDERALLY MATCHED WELFARE BENEFITS IS CONCERNED BECAUSE THE STATE HAS NOT ELECTED TO ASSIST THEM UNDER ANY CONDITIONS. HOWEVER, ALASKA HAS BEEN PROVIDING VENDOR PAYMENTS TO THIS GROUP SINCE OCTOBER, 1977 WHEN THE GENERAL RELIEF PROGRAM WAS CHANGED DUE TO COMPLAINTS BY LEGAL AID. I UNDERSTAND THAT THESE PAYMENTS WILL BE TERMINATED SHORTLY.

UNDER SECTION 402(a)(19)(F) THE NEEDS OF ANY INDIVIDUAL WHO FAILS TO PARTICIPATE IN THE WIN PROGRAM OR TO HAVE REFUSED EMPLOYMENT WITHOUT GOOD CAUSE ARE NOT TO BE TAKEN INTO ACCOUNT IN DETERMINING THE NEED OF THE FAMILY AND THE AMOUNT OF THE AFDC ASSISTANCE PAYMENT; ASSISTANCE MUST BE FURNISHED TO THE OTHER ELIGIBLE MEMBERS IN THE FORM OF PROTECTIVE OR VENDOR PAYMENTS TO OTHER THAN THE REFUSING MEMBER. IF AN INDIVIDUAL WHO IS A RELATIVE OTHER THAN THE UNEMPLOYED FATHER RECEIVING AFDC REFUSES WITHOUT GOOD CAUSE TO PARTICIPATE IN THE WORK INCENTIVE PROGRAM OR TO ACCEPT A BONA FIDE OFFER OF EMPLOYMENT IN WHICH HE IS ABLE TO ENGAGE, HIS NEEDS ARE REMOVED FROM THE AMOUNT OF ASSISTANCE OTHERWISE PROVIDED AND AFDC IS PROVIDED TO THE REST OF THE ASSISTANCE UNIT IN THE FORM OF PROTECTIVE OR VENDOR PAYMENTS OR AS FOSTER CARE. (45 CFR 234.60 AND 233.110).

IF SUCH INDIVIDUAL WHO REFUSES IS THE ONLY CHILD IN THE FAMILY, AFDC ASSISTANCE IS DENIED TO THE ENTIRE FAMILY. (45 CFR 224.51(a)(2))

THIS DENIAL OF AID TO THE REFUSING REGISTRANT IS NOT APPLIED DURING THE 60 DAYS IN WHICH THE INDIVIDUAL ELECTS TO RECEIVE COUNSELING OR OTHER SERVICES BUT AFDC ASSISTANCE IS PAID AS A PROTECTIVE OR VENDOR PAYMENT. (45 CFR 224.51(b))

HOWEVER, IF AN UNEMPLOYED FATHER FAILS TO REGISTER FOR WIN AND IS NOT EXEMPT FROM WIN REGISTRATION, THE ENTIRE FAMILY IS INELIGIBLE FOR AFDC (SECTION 407(b)(2)(C) OF THE ACT).

THE LAW SPECIFIES THAT EVERY INDIVIDUAL, AS A CONDITION OF ELIGIBILITY FOR AID UNDER THE AFDC PROGRAM MUST REGISTER FOR MANPOWER SERVICES, TRAINING, AND EMPLOYMENT, AS PROVIDED BY REGULATIONS OF THE SECRETARY OF LABOR UNLESS SUCH INDIVIDUAL IS:

A CHILD WHO IS UNDER AGE 16 OR ATTENDING SCHOOL FULL TIME;

A PERSON WHO IS ILL, INCAPACITATED, OR OF ADVANCED AGE;

A PERSON SO REMOTE FROM A WORK INCENTIVE PROGRAM THAT HIS EFFECTIVE PARTICIPATION IS PRECLUDED;

A PERSON WHOSE PRESENCE IN THE HOME IS REQUIRED BECAUSE OF ILLNESS OR INCAPACITY OF ANOTHER MEMBER OF THE HOUSEHOLD;

A MOTHER OR OTHER RELATIVE OF A CHILD UNDER THE AGE OF 6 WHO IS CARING FOR THE CHILD; OR

A MOTHER OR OTHER FEMALE CARETAKER OF A CHILD IF THE FATHER OR ANOTHER ADULT MALE RELATIVE IS IN THE HOME AND NOT EXCLUDED FROM THE PROGRAM.

INDIVIDUALS WHO HAVE BEEN DETERMINED TO BE EXEMPT FROM REGISTRATION ON THE BASIS OF INCAPACITY ARE REFERRED TO THE APPROPRIATE STATE VOCATIONAL REHABILITATION AGENCY.

A MOTHER OR OTHER RELATIVE OF A CHILD UNDER THE AGE OF 6, WHO IS CARING FOR THE CHILD, IS ADVISED OF HER OPTION TO REGISTER IF SHE SO DESIRES, AND OF THE FACT THAT CHILD CARE WILL BE PROVIDED IF NEEDED. OTHER EXEMPTED INDIVIDUALS MAY REGISTER, SUBJECT TO ACCEPTANCE OF SUCH REGISTRATION BY THE SECRETARY OF LABOR.

WORK RELIEF PRECLUDED UNDER FEDERALLY AIDED ASSISTANCE PROGRAMS

QUESTIONS HAVE ALSO BEEN RAISED BY STATES AS TO WHETHER A CHILD, OTHERWISE ELIGIBLE FOR AFDC, OR THE ENTIRE UNIT COULD, UNDER FEDERAL POLICIES BE DENIED AID IF AN APPLICANT OR RECIPIENT REFUSED TO WORK WITH IN PROJECTS OR WORK RELIEF PROGRAMS, THE ASSISTANCE TO WHICH HE WAS OTHERWISE ENTITLED UNDER TITLE IV-A OF THE ACT.

SUCH A STATE PLAN PROVISION IS CLEARLY PROHIBITED UNDER 45 CFR 233.140 WHICH SPECIFIES THAT:

> "FEDERAL FINANCIAL PARTICIPATION WILL NOT BE AVAILABLE IN EXPENDITURES MADE IN THE FORM OF PAYMENTS FOR WORK PERFORMED IN ANY MONTH AFTER JUNE 1968, EXCEPT UNDER THE WORK INCENTIVE PROGRAM AUTHORIZED BY TITLE IV, PART C OF THE SOCIAL SECURITY ACT, OR UNDER THE WORK EXPERIENCE AND TRAINING PROGRAMS AUTHORIZED BY TITLE V OF THE ECONOMIC OPPORTUNITY ACT."

ABSENT CONGRESSIONAL AUTHORITY TO THE CONTRARY, A NEEDY AND OTHERWISE ELIGIBLE CHILD AND HIS NEEDY CARETAKER RELATIVE MUST RECEIVE ASSISTANCE UNDER TITLE IV-A OF THE ACT TO WHICH HE IS OTHERWISE ENTITLED. THIS VIEW IS CONSISTENT WITH THE UNITED STATES SUPREME COURT DECISION IN THE CASE OF TOMKINS v. SWANK. (404 U.S. 202)

WORK RELIEF REFERS TO ANY SYSTEM IN WHICH AN INDIVIDUAL IS ASSIGNED TO WORK-OFF THE ASSISTANCE GIVEN, OR TO WORK WITHOUT PAY AS A CONDITION OF

RECEIVING SUCH NEEDS-RELATED CASH ASSISTANCE FOR HER OR HIS FAMILY. IT INCLUDES SYSTEMS IN WHICH THE AFDC ASSISTANCE IS SPECIFICALLY CHARACTERIZED AS PAYMENT FOR THE WORK, SYSTEMS IN WHICH HOURS OF WORK REQUIRED ARE DETERMINED BY ASSIGNING AN HOURLY VALUE TO THE WORK PERFORMED AND DETERMINING THE NUMBER OF HOURS THAT NEEDED TO BE WORKED OFF THE PAYMENT, AND SYSTEMS IN WHICH ACCEPTANCE OF THE OTHERWISE UNPAID WORK IS SIMPLY A CONDITION OF ELIGIBILITY FOR ASSISTANCE. IT IS UNCLEAR AS TO WHETHER THE INTENT OF ALASKA HOUSE BILL 840 IS TO LIMIT ELIGIBILITY AT INTAKE OR TO DENY AN ALREADY DETERMINED ELIGIBLE RECIPIENT UPON REFUSAL TO WORK FOR NO COMPENSATION. SUCH A DISTINCTION HOWEVER IS MOOT. SUCH WORK RELIEF CREATES A CLASS OF WORKERS WHO PERFORM WORK WITH NEITHER THE STATUS NOR THE BENEFITS GENERALLY ACCEPTED AS THE RIGHT OF EMPLOYEES. FOR EXAMPLE, AS NON-EMPLOYEES THEY ARE EXCLUDED FROM COLLECTIVE BARGAINING, FROM PENSION SYSTEMS, AND THEY CANNOT QUALIFY FOR PROMOTION. IN ADDITION, GENERALLY THE FAMILY SUFFERS AN OUT-OF-POCKET LOSS SINCE THEY CONTINUE TO RECEIVE ONLY THE AMOUNT OF THEIR REGULAR AFDC ASSISTANCE WITHOUT AN INCREMENT TO ACCOUNT FOR THE EXPENSES INCURRED AS A RESULT OF PARTICIPATION IN THE WORK RELIEF ASSIGNMENT.

FROM THE INITIAL ENACTMENT OF THE PUBLIC ASSISTANCE PROGRAMS IN 1935 HEW HAS TAKEN THE POSITION THAT REQUIRING AN INDIVIDUAL TO ACCEPT ASSIGNMENT TO A WORK RELIEF PROJECT, I.E., TO WORK OFF, OR WORK FOR, ASSISTANCE PROVIDED FOR IN TITLE IV-A OF THE ACT IS INCONSISTENT WITH THE BASIC REQUIREMENT THAT AFDC PAYMENTS BE UNRESTRICTED MONEY PAYMENTS, 42 U.S.C. §606(b). THIS PORTION IS REFLECTED IN THE MINUTES OF THE SOCIAL SECURITY

BOARD, FEBRUARY 25, 1936, BD. DOCUMENT NO. 73, 45 CFR 233.140. THE VIEW WAS BASED ON ITS CONCLUSION THAT A REQUIREMENT THAT AN INDIVIDUAL ACCEPT OTHERWISE UNDENUMERATED WORK AS A CONDITION OF ELIGIBILITY FOR AID IS, IN FACT, A REQUIREMENT THAT THE INDIVIDUAL "EARN" THE FAMILY'S ASSISTANCE BY WORK SO THAT THE WELFARE PAYMENT IS ACTUALLY COMPENSATION FOR SERVICES RENDERED AND NOT AID WITHIN THE MEANING OF U.S.C. § 606(b).

THE CORRECTNESS OF THIS INTERPRETATION OF THE STATUTE WAS CONFIRMED BY THE 1962 ENACTMENT OF 42 U.S.C. §609, THE COMMUNITY WORK AND TRAINING PROGRAM, WHICH PROVIDED SPECIFIC AUTHORIZATION FOR THE ESTABLISHMENT OF WORK RELIEF TYPE PROGRAMS IN AFDC UNTIL ITS REPEAL IN 1968 BECAUSE OF CONGRESSIONAL DISSATISFACTION WITH THE PROGRAM. UPON THIS RPEAL HEW PROMULGATED THE STILL EFFECTIVE 45 CFR 233.140 TO REESTABLISH ITS PRE-1962 RULE. SUBSEQUENT LEGISLATIVE PROPOSALS TO REINSTATE 42 U.S.C. §609 WERE REJECTED.

THIS POSITION WAS REAFFIRMED BY HEW IN 1971, WHEN BOTH CALIFORNIA AND NEW YORK PROPOSED WORK RELIEF PROGRAMS FOR AFDC RECIPIENTS AND WERE ADVISED THAT FEDERAL FUNDING WOULD NOT BE AVAILABLE IF THEIR REGULAR AFDC PLAN REQUIRED RECIPIENTS TO ACCEPT ASSIGNMENT TO WORK RELIEF. THE ONLY EXCEPTION HAS BEEN THE APPROVAL OF PLACEMENTS FOR NOT TO EXCEED 13 WEEKS UNDER THE WIN PROGRAM, ON THE GROUNDS THAT WHERE THE INDIVIDUAL HAD HAD VERY MINIMAL ATTACHMENT TO THE LABOR MARKET, ONE COULD CONSIDER "EXPOSURE TO WORK" TO BE A FORM OF TRAINING. SEE WIN HANDBOOK, CHAPTER SIX, PAGE 5, PARAGRAPH E.

JY 05 Dublino

IN 1974 HEW PUBLISHED A REVOCATION OF §233.140 OF THE REGULATIONS; HOWEVER THIS REVOCATION WAS CHALLENGED IN A SUIT BROUGHT BY RECIPIENTS ORGANIZATIONS (INMRO v. DWIGHT) AND, THE REGULATION WAS REINSTATED.

STATE-ONLY WORK REQUIREMENTS

DURING THE PAST YEAR THERE WERE NUMEROUS INQUIRIES AS TO WHETHER, IN THE ABSENCE OF FEDERAL LAW, STATES COULD IMPOSE THEIR OWN WORK REQUIREMENTS AS A CONDITION OF RECEIVING AID UNDER TITLE IV-A IN ADDITION TO THESE PROVIDED IN THE ACT AS DESCRIBED ABOVE. THE ONLY ADDITIONAL INDIVIDUALS NOT COVERED UNDER CURRENT LAWS AND REGULATIONS WOULD BE RECIPIENTS IN NON-WIN AREAS. (THE POSITION OF HEW TO DATE HAS BEEN THAT IN THE ABSENCE OF LEGISLATIVE AUTHORITY THE DEPARTMENT WOULD NOT ISSUE A POLICY TO SUPPORT STATE-ONLY WORK REQUIREMENTS.)

CONGRESS ENACTED, AS A PART OF P.L. 95-216, THE SOCIAL SECURITY AMENDMENTS OF 1977, SECTION 404 ENTITLED STATE DEMONSTRATION PROJECTS. THIS SECTION AMENDS AND EXPANDS SECTION 1115 OF THE SOCIAL SECURITY ACT WHICH RELATES TO DEMONSTRATION PROJECTS. UNDER THIS AUTHORITY THE SECRETARY OF HEW COULD WAIVE CERTAIN STATUTORY REQUIREMENTS AND PERMIT NOT MORE THAN THREE DEMONSTRATION PROJECTS PER STATE. THESE PROJECTS COULD PROVIDE FOR PUBLIC SERVICE EMPLOYMENT. THERE ARE CERTAIN RESTRICTIONS CONNECTED WITH THIS AUTHORITY:

A. NOT MORE THAN ONE SUCH PROJECT COULD BE CONDUCTED ON A STATEWISE BASIS.

B. WITH RESPECT TO PUBLIC SERVICE EMPLOYMENT -

- APPROPRIATE HEALTH AND SAFETY STANDARDS AND TRAINING CONDITIONS MUST BE MADE
- THE PROJECT MUST NOT RESULT IN DISPLACEMENT OF EMPLOYED WORKERS
- COMPENSATION FOR WORK IS SPECIFIED AT AN HOURLY WAGE EQUAL TO THE LOCAL PREVAILING WORK WAGE
- WORK CONDITIONS MUST BE REASONABLE
- WORKMEN'S COMPENSATION MUST BE PROVIDED

(DEMONSTRATION PROJECTS MUST NOT LAST LONGER THAN TWO YEARS AND ALL MUST BE TERMINATED NOT LATER THAN SEPTEMBER 30, 1978)

THE FACT THAT THE CONGRESS FELT COMPELLED TO BROADEN SECTION 1115 OF THE ACT TO PERMIT WORK PROGRAMS SUCH AS THOSE UNDER DISCUSSION HERE IS CONSISTENT WITH THE CURRENT DEPARTMENTAL POSITION THAT SUCH PROGRAMS ARE INCONSISTENT WITH THE PROVISIONS OF THE SOCIAL SECURITY ACT ABSENT ANY OTHER SPECIFIC LEGISLATIVE AUTHORITY.

THE ONLY PROVISIONS IN FEDERAL LAW OR REGULATIONS WHEREBY A STATE MAY DENY AFDC TO INDIVIDUALS OR TO CHILDREN, ON THE BASIS OF WORK REQUIREMENTS, ARE THOSE CONTAINED IN SECTION 407 (b)(1) OF THE ACT AND 45CFR 233.100 (a)(5) PERTAINING TO THE UNEMPLOYED FATHER AND IN SECTION 402 (a)(19)(F) OF THE ACT AND 45CFR 224.21(b), 224.51(a)(1) AND 233.110 PERTAINING TO THE PROVISION OF FOSTER CARE FOR OTHER INDIVIDUALS UNDER THE WIN PROGRAM.

ENACTMENT OF ALASKA HOUSE BILL NO. 840 AS IT IS NOW WRITTEN WOULD BE INCONSISTENT WITH THE SOCIAL SECURITY ACT AND FEDERAL REGULATIONS. ENACTMENT OF THIS PROPOSED BILL WOULD RESULT IN A COMPLIANCE ISSUE WITH THE STATE OF ALASKA'S PUBLIC WELFARE DIVISION AND COULD PLACE THE FEDERAL FINANCIAL PARTICIPATION DOLLARS AT RISK.

THANK YOU,

LOUIS E. WEISSMAN
ACTING ASSISTANT REGIONAL COMMISSIONER

SEATTLE, WASHINGTON 98101

September 28, 1978

OFFICE OF THE REGIONAL DIRECTOR

Mr. Gregg K. Erickson
Director of Research
Legislative Affairs Agency
State of Alaska
Pouch Y - State Capitol
Juneau, Alaska 99811

Dear Mr. Erickson:

This is in response to your inquiry regarding potential Federal implications if the State of Alaska withdrew from participation in the AFDC Program. The State may, of course, withdraw from the AFDC Program at any time.

Before addressing the specific questions you raised, a general discussion of the compliance process, as it pertains to each of these programs, may be helpful. The compliance process reflects one way in which the Secretary may withhold part or all of the Federal funding for a particular program. The Social Security Act and regulations give the Department broad discretion in compliance proceedings. Pertinent sections of the Social Security Act which describe the compliance process include Sections 404(a) for AFDC, 443 for WIN, 1904 for Medicaid and 2003(c) and (e) for Title XX. The compliance processes for AFDC, Medicaid and Title XX are similar.

There are three ways stated in the regulation in which a question of compliance may arise. 45 CFR 201.6(a) states that:

> A question of noncompliance of a State plan may arise from an unapprovable change in the approved State plan, the failure of the State to change its approved plan to conform to a new Federal requirement for approval of state plans, or the failure of the State in practice to comply with a Federal requirement, whether or not its State plan has been amended to conform to such requirement.

All or part of the payments made pursuant to a State plan may be withheld after a finding of noncompliance. 45 CFR 201.6(e) provides that:

> If the Administrator makes a finding of noncompliance with respect to a matter under paragraph (a) of this section, the State agency is notified that further payments will not be made to the State (or, in his discretion, that payments will be limited to categories under or parts of the plan not affected by such failure), until the Administrator is satisfied that there will no longer be any such failure to comply. Until he is so satisfied, no further payments will be made to the State (or will be limited to categories under or parts of the plan not affected by such failure).

A State may appeal an adverse decision to the Court of Appeals for the circuit in which the State is located. (45 CFR 201.7.)

WIN's provision differs, but contains notice and hearing requirements (Section 443). Title XX contains an additional requirement that a State must comply with certain funding requirements (Section 2003(c)), but again there is a notice and hearing requirement.

You have inquired as to which part of a program would lose funds, or whether funding for a certain program would be jeopardized under a given set of circumstances. As stated previously, the Social Security Act gives the Secretary broad discretion in compliance proceedings. For example, noncompliance with one AFDC requirement could result in the withholding of part or all of the Title IV-A funds. There is no loss of Federal funds until a State has its hearing.

The State should be aware that Federal funds may be affected by audit exceptions or fiscal disallowances with respect to individual payments that may occur prior to or at the same time the Department decides to initiate compliance proceedings.

Regional office staff have the primary responsibility for identifying questions of compliance and reporting them to the State involved and to the appropriate officials in Washington, D.C. If a question of compliance cannot be resolved through negotiation, a compliance hearing may be scheduled. If a State is dissatisfied with an action taken on a State plan, it can request a reconsideration.

Title IV-D does not contain the compliance and hearing provisions found elsewhere in the Social Security Act. Instead, Congress enacted a 5 percent penalty to be assessed at such time as the annual audit establishes that a State failed to have an effective child support enforcement program, (Section 403(h)). In order to have an effective program, a State must be in compliance with each of the State plan requirements identified in 45 CFR 305.20. Use of the term "compliance" in discussions of the child support enforcement program refers to the audit and penalty provisions, rather than the process of raising a question of compliance and then holding a hearing.

We now proceed to the questions raised in your letter of June 28, 1978, answering them in the order raised.

I. TITLE IV-D OF THE SOCIAL SECURITY ACT

1. If the Department of Revenue were to implement these instructions, would Alaska be found noncompliant with Title IV-D requirements?

There are two situations in which implementation of the instructions of House Concurrent Resolution 134 would result in noncompliance with Title IV-D regulations.

The first is one in which the practical result of the instruction is that the Child Support Enforcement Agency works no paternity cases. Under those circumstances, the State does not meet the criteria outlined in 45 CFR Part 305. If a limited number of cases are worked, there is a serious question about compliance and therefore a serious question about the effectiveness of the child support program.

The second situation arises from OCSE's approach to the audit and penalty regulations. Although regulations covering the initial start up period are more flexible, HEW intends to amend those regulations and apply more stringent standards as the child support program moves out of the developmental stage and becomes more fully operational nationwide.

2. If found noncompliant, what fiscal penalties would be assessed on the Title IV-D program?

If the State does not comply with the audit criteria, Alaska's Title IV-A reimbursement will be reduced by 5 percent for the period audited.

While not a penalty provision, there is another fiscal consequence of implementation of the resolution that should be mentioned. Activities such as notifying individuals of their right to privacy under the State constitution and obtaining a waiver are outside the scope of Title IV-D and therefore are not eligible for Federal financial participation. The Department of Revenue would need to establish a mechanism for identifying those costs and excluding them from the claim for Federal reimbursement.

There are also some additional ramifications for children and taxpayers in Alaska we feel should be mentioned. The failure to establish the paternity of a child can have grave social and legal consequences. A child's right to those benefits which accrue to a child via the parent-child relationship may be lessened or eliminated if paternity has never been established. This could affect such benefits as Social Security, workmen's compensation and medical and life insurance. The failure to establish paternity will, in many cases, result in shifting the burden for child support from the child's father to the taxpayers in Alaska.

If there is no AFDC program in the State, and therefore no AFDC component of the child support program, there is virtually no chance that HEW could approve a State plan for child support. In that event, no Federal funds would be available for the costs of obtaining financial support for children. It seems likely that Alaskans would want to continue providing child support services to women and children not on assistance and that taxpayers would want the State to recover welfare costs from parents with the obligation and financial ability to support their children. Without a IV-D State plan, Alaska would have to pay all costs pf providing these services. In the twelve-month period ending March 31, 1978, costs of these services were $1,043.445. The Federal Government paid $782,584 of this amount.

3. Would noncompliance with Title IV-D result in noncompliance for Title IV-A (AFDC)?

If a question of compliance is raised with regard to whether an aspect of a Title IV-A requirement would not or could not be met, there could be both a compliance and a Federal matching issue involved. Clearly, a compliance issue would exist if the State plan does not contain language requiring applicants and recipients to cooperate in establishing paternity, as well as if, in practice, the State does not assist recipients in establishing paternity. Furthermore, Federal matching questions may arise if recipients are not cooperating in establishing paternity.

Section 402(a)(27) of the Social Security Act requires that as a part of the State's plan for aid and services to needy families, provision is to be made for a child support program which conforms with Part D of Title IV, as well as the State plan requirements of Section 454, "State Plan for Child Support."

4. If the answer to question number 3 is yes, what would be the penalty assessed on Alaska's Title IV-A program?

If a State is found to be out of compliance after a hearing, it could jeopardize all of their Federal AFDC funds, should the State fail to take steps to immediately come into compliance. (45 CFR 201.6).

II. WORK REQUIREMENTS FOR AFDC RECIPIENTS

1. Has this Federal position remained unchanged regarding the impact on AFDC for institution of a work requirement program as outlined by House Bill No. 840?

Yes, the Federal position remains unchanged with regard to the implications of the enactment of House Bill No. 840. Should Alaska wish to explore alternatives allowable under current policy and law, HEW is willing to explore the possibility of demonstration programs authorized under Sections 1115(a) and 1115(b) of the Social Security Act.

2. Would the Alaska AFDC program be deemed wholly or partially noncompliant if Alaska were to enact House Bill No. 840?

3. What would be the fiscal penalty assessed on the AFDC program if a question of compliance were raised?

These two questions can be best addressed with a single response. Simply enacting the legislation without further action on the part of the State would not affect the program. Should Alaska choose to implement the legislation, however, HEW would be faced with two courses of action. First, the necessary State plan would be disapproved and expenditures for the portion of the grant affected would not be subject to Federal financial participation (FFP). Second, HEW would have to determine whether the nature of the program, should the State choose to operate it without FFP, raises a substantial compliance issue. If HEW decides this is the case, and the State, subsequent to a hearing, is found to be substantially out of compliance with any provision required by Section 402 of the Social Security Act, fiscal sanctions would be imposed. These sanctions range from the withholding of specific amounts of money to disallowance of all FFP for AFDC.

4. Would Federal financial participation be withdrawn from the Alaska WIN program? In whole or in part?

Alaska's WIN allocation would not be affected by a compliance issue generated by the passage of House Bill 840. The term "Federal financial participation" has no direct relevance to the WIN program. That term applies to the Federal share of AFDC grants and administrative costs, not to WIN program funds.

The amount of funding Alaska receives for the WIN program is determined by two factors:

a. Fifty percent of the funds for Alaska's WIN program are based on the number of WIN registrants in Alaska in January of the previous fiscal year, as a proportion of the average number registered in all the States. Hence, any reduction in the number of AFDC recipients registered in WIN will directly affect the level of WIN funds provided to Alaska.

b. In addition to this statutory requirement, the balance of Federal funding to the State's WIN program is allocated on a formula in which the State's performance and potential are measured against other States. A high performance level by the State's WIN program in reducing welfare grants and placing individuals in well-paying jobs having a high job retention rate, will have a positive affect on WIN funding. In contrast, any modification of the AFDC program which results in fewer WIN registrants or a reduced level of WIN performance will adversely affect program funding.

5. Would Federal financial participation in the AFDC foster care component also be jeopardized?

   Yes. This would, however, depend upon the nature of the compliance issue. If the State was found substantially out of compliance, a fiscal sanction would be imposed on the entire program, including the foster care component.

6. If the answer to question 5 is yes, what amount of monies would be lost?

   In the event that a fiscal sanction were imposed on the entire program, then all FFP for AFDC foster care would cease.

7. Could the Alaska WIN program itself be expanded without penalty to include a nonpaid public service component such that nonprofit agencies and public agencies could provide at no cost to the WIN program nonpaid work experience and job training for WIN registrants who are not in other WIN components?

   Our response is a "qualified yes." The WIN regulations provide for a work experience component (45 CFR 224.43(b)) which has similarities to a nonpaid public service component.

   A WIN experience assignment is limited to 13 weeks for any individual (45 CFR 224.35(b)). Participants must be provided a $30 per month incentive payment plus training and related expenses. Assignment to WIN work experience, as with any other WIN training or employment component, must be part of an individual's employability development plan. Work experience sites can only be established in public and private nonprofit agencies.

   As all WIN funding has been allocated to the States, the only way work experience could be expanded would be to restructure the existing program to give work experience a higher priority. Such restructuring would necessitate a modification to the State's WIN plan and approval by the Regional Coordination Committee (RCC).

   Increased utilization of the work experience component could, of course, adversely affect Alaska's WIN allocation. If this restructuring resulted in fewer placements, Alaska's allocation in the subsequent year would be reduced as a result of the performance-based feature of WIN's allocation formula.

8. If the answer to question 7 is yes, to what extent can Alaska receive Federal financial participation in such a component (assuming a compliant AFDC program)? Or have WIN funds essentially reached a ceiling such that any additional expenditures would be State-only funds?

   As explained in the answer to question #4, the term "Federal financial participation" is not applicable to the WIN funding process. Should the

State decide to modify its program to provide for more extensive use of work experience, this should be addressed in the form of a request to the RCC for a WIN plan amendment. Such an amendment would have to be viable given existing funding levels and constraints.

III. MEDICAID (TITLE XIX)

1. (a) If Alaska had no approved Title IV-A (AFDC) plan because it chose to withdraw from AFDC, could its Medicaid State plan still be approved even though we would be lacking coverage of a mandatory group?

   (b) Could Alaska's Medicaid State plan be approved if the State covered these same individuals under Medicaid, but they received their cash assistance under a 100 percent State funded grant program rather than AFDC, if the State chose t withdraw from that program?

These two questions can best be answered together.
Title XIX coverage is mandated for the categorically needy, defined in 42 CFR 448.1(a)(1)(i) as individuals who are eligible for or receiving financial assistance under Titles IV-A (AFDC) or XVI (SSI) of the Social Security Act, or under an SSI State supplement. A State also has the option of extending coverage to the medically needy, as defined in 42 CFR 448.1(a)(2) as well as certain other optional coverage groups described in 42 CFR 448.1(c).

There are no specific provisions in Title XIX or the applicable Federal regulations which require a State to implement a Title IV-A and/or a Title IV-D program as a prerequisite for participating in Medicaid. If Alaska withdrew from participation in AFDC, but elected to retain Medicaid, then Medicaid services could continue to be made available, but only to the SSI required coverage group and the optionally-related Title XVI individuals included in the approved Title XIX State plan. If this were to occur, a question might be raised as to where eligibility determination for SSA eligibles for Medicaid services would be made.

Furthermore, it is not possible to operate a medically needy program without a Title IV-A program, since Section 1903 (f)(1)(B)(i) relates medically needy income to 133 1/3 of the highest money payment under an approved Title IV-A State plan. If no Title IV-A State plan exists, there would be no basis for making this determination.

Title IV-A - type families and individuals receiving cash assistance under a State-only funded program would not be eligible for Title XIX services, because eligibility is based in part upon eligibility under an approved Title IV-A program. If the State opted to withdraw from Title IV-A, there would be no basis under law or regulation to determine eligibility for Medicaid services.

2. Does the phrase "approved State plans under Title IV-A" mean total compliance with provisions of Title IV-A or substantial compliance? If the latter is the case, what constitutes substantial compliance? Specifically:

   (a) If Alaska were found not in compliance with the AFDC program due to noncompliance with Title IV-D requirements, would the Title XIX (Medicaid) State plan also be ruled noncompliant as well, due to that action?

   (b) If Alaska instituted mandatory work requirements as outlined in Alaska House Bill No. 840 and the State was found to be noncompliant with Title IV-A (AFDC), would the Title XIX (Medicaid) State plan also be ruled noncompliant due to that action?

   (c) If Alaska was found not in compliance with Title IV-A (AFDC) for reasons listed in both above questions 2(a) and 2(b), would the State's Medicaid State plan also be found noncompliant?

   All the components of this question are best answered together. As stated earlier, compliance is judged on the accurancy of the State plan, as well as the way in which it is actually being administered. If a question of compliance is raised regarding the Medicaid State plan and cannot be resolved through negotiation, a compliance hearing may be scheduled by the Administrator of the Health Care Financing Administration. A finding of substantial compliance or noncompliance would be made after the hearing, and would depend on the nature of the question. If a compliance hearing were held on a Title IV-A and/or Title IV-D issue, the decision rendered would not directly affect Title XIX in the witholding of Federal Medicaid funds. On the other hand, if the result of a Title IV-A hearing was a determination that a given AFDC population was ineligible for AFDC, this group of individuals would not be eligible for Title XIX either. There must be a clear and undisputed eligibility for Title IV-A or Title XVI before there is an entitlement to Federal financial participation (FFP) under Title XIX. Therefore, in response to your specific questions, the Title XIX State plan would not necessarily be judged out of compliance as a direct result of a finding that Alaska's AFDC State plan is out of compliance because of Title IV-D requirements or a mandatory work program.

3. What would be the fiscal penalty in the Medicaid program for a partially noncompliant AFDC program? Would the result be a total, a partial, or zero withholding of Federal funding under Title XIX (Medicaid)?

4. If the Title IV-A State plan were deemed totally noncompliant, would the fiscal effect on the Medicaid program be the same as if the State withdrew from participation in the AFDC program? Would this result in a total loss of Federal financial participation in Medicaid?

These two questions are best answered with a single response. As noted in our response to question #2, we are unaware of any fiscal penalty which would be applied to Title XIX if Alaska were to withdraw from participation in the Title IV-A and/or Title IV-D programs, but there may be FFP implications.

Donna Rogers of Alaska met with HCFA staff on August 21, 1978. During that meeting, she posed several questions regarding the relationships between Titles XIX, IV-A and IV-D. Our response to the questions she raised follows:

1. Could Alaska have a medically needy program and include unemployed fathers not included in the IV-A program?

   No, this would not be possible. 42 CFR 448.1(d) specifies that if a State opts to include medically needy individuals under Title XIX, the State plan must specify that it covers all medically needy groups that correspond to the categorically needy groups covered in the plan. There is no provision in law or regulation to extend medically needy coverage to other groups of individuals.

2. Can retroactive 90 day coverage go before that date if service were delivered, e.g. 4 or 5 months previously?

   No, this would not be possible. 45 CFR 206.10(a)(6)(ii) provides for retroactive medical coverage up to three months prior to the month of application. Again, there is no provision in law or regulation to allow coverage prior to the 3 month retroactive period.

3. Spend-down: Utah requires recipients to make their payments the first of each month before medical coupons are issued. Is this acceptable?

   No, this would not be possible. 42 CFR 448.3(c)(2)(ii) provides that in determining when spend-down requirements are met "income will be applied to costs incurred . . ." (emphasis added). Since the Utah method requires that individuals not only incur costs, but pay them as well, before eligibility is established, it is not acceptable.

IV. SOCIAL SERVICES (TITLE XX)

1. We are concerned that the fifty percent rule (45 CFR 228.56) may cause a partial or total reduction in the amount of Title XX Federal financial participation if the State withdrew from participation in AFDC. Thus, we need to know the fiscal impact of 45 CFR 228.56. Would the effect be to eliminate all Social Services Federal funding if the State no longer had an approved State plan under Title IV-A? Or would the effect be to reduce the amount of Title XX funding due to the fact there would be no AFDC Federal funding included in the calculation contained in the fifty percent regulation?

The fifty-percent rule (45 CFR 228.56) applies to Title XVI (SSI), Title XIX (Medicaid), and Title IV-A (AFDC) recipients or those eligible to participate in these three programs. If there were no AFDC program, the fifty-percent rule would then need to be applied to the remaining two income maintenance groups -- Medicaid and SSI. If Medicaid eligibles would no longer be eligible for Title XIX services because of no approved Title IV-A AFDC plan, the fify-percent rule would then need to be applied to the category of SSI recipients and SSI eligibles only. If this were to happen, some Title XX funding would be lost, but not the total amount.

If the fifty-percent rule is not met, the Federal share is adjusted downward until the rule is, in effect, met. You may wish to refer to 45 CFR 228.56(a) which states, in part, that ". . .Federal funds will be adjusted so the total Federal reimbursement does not exceed twice the amount of the total expenditures in behalf of those individuals. . ." who come under the rule.

The loss of Federal dollars for failure to meet the fifty-percent rule would amount to the difference between what the total Federal share would have been had the rule been met, and twice what was spent on social services and personnel training. Downward adjustment of the eligible population will reduce the Federal share of Title XX funds, but will not eliminate Federal participation altogether.

2. If the State were found noncompliant with AFDC Federal requirements, would the fiscal effect on Title XX Federal funding be the same as if the State withdrew from Title IV-A? If there is a different fiscal impact, please detail those differences.

   If the State were found noncompliant with AFDC Federal requirements, it would be assumed that the State would be operating an AFDC program under a plan which would be approved to a certain degree. There would be no change in Title XX FFP in such a case. If the State withdrew from Title IV-A, however, there would be no approved plan under Title IV-A, and the fifty-percent rule would then need to be applied, minus this former category of income maintenance status eligibles.

3. If the State no longer had an approved State plan under Title IV-A, but instituted a State-only cash assistance program for those individuals who previously were or would have been covered by AFDC, would Federal financial participation for Title XX services to these people be the same as if they were receiving AFDC? If so, to what degree? We are assuming here that such a State-only program would be essentially the same as a Title IV-A program.

Application of the Title XX fifty-percent rule is based on individuals ". . .who are receiving aid under the plan of the State approved (our emphasis) under Part A of Title IV or who are eligible to receive such aid. . ." (45 CFR 228.56(a)(1)). The fifty-percent rule would not allow FFP consideration of State-only cash assistance recipients as though they were eligible for AFDC.

4. If the State were only partially noncompliant with Title IV-A requirements and partial rather than total Federal penalties were assessed on the AFDC program, would there be a partial withholding of Title XX Federal funding? If so, to what degree and for what reasons?

As indicated in our response to question #2, if the State had an approved AFDC plan and was found partially noncompliant, there would be no Title XX funding constraints, assuming there would be no change in the number of eligibles (45 CFR 228.56(a)(1)).

5. Title XX requires AFDC recipients to be informed of the availability of family planning services. If the State had no AFDC program, how would this action affect this Title XX mandatory requirement? Would fiscal penalties result? What if the State were able to inform these types of low income individuals of family planning services and these individuals received their grants through a 100 percent funded State-only program, would Title XX funding still be jeopardized? What fiscal penalties might still result?

6. If the State were found noncompliant with all or part of the AFDC Federal requirements, but still was informing AFDC recipents of family planning service availability, would there be any fiscal penalty imposed on Title XX? That is, is the family planning issue totally separate from other AFDC requirement considerations when compliance with Title XX requirements are addressed?

These two questions can be best addressed with a single response. Failure to provide family planning services under provisions of Section 402(a)(15) of the Social Security Act would result in a disallowance of a reduction by one percentum of the quarterly amount payable to the State for all expenditures under Title IV-A (45 CFR 201.14 (a)(2)). The fiscal penalty involved is not a Title XX funding penalty, but rather a loss of FFP to the State under its AFDC program. If there is no AFDC program with no AFDC FFP, there can be no reduction. If, however, there continues to be a program with noncompliance Title IV-A reductions, there would be no further penalties, providing there was compliance with the provisions of Section 402(a)(15).

V. OTHER PROGRAMS

There would undoubtedly be many other programs affected by a decision to withdraw from the AFDC program. For example, loss of Medicaid funds for AFDC eligibiles would almost certainly have a negative impact on Community

Mental Health Centers (CMHCs). Although there are no references in the CMHC legislation (Title III of P.L. 94-63) requiring that AFDC clients be served, there are a number of areas which could be interpreted as applicable:

--Within the limits of its capacity, a CMHC should provide services to any individuals residing or employed within the catchment area regardless of ability to pay (Section 201 (a)(1)(B)).

--The provision of services shall be coordinated with the provision of services by other health and social services agencies (Section 201 (b)(2)).

--If the area is a designated poverty area, additional grant funds received because of this designation will be used to provide services for people unable to pay (Section 206 (c)(1)(G)).

--CMHCs will develop a financial plan to insure adequate support from other Federal and nonfederal sources, will have a contractual arrangement with the State agency that administers Title XIX and will make every effort to collect reimbursement. (Section 206 (c)(1)(H)(I)(J)).

Because most CMHCs are currently operating on such tight budgets, we expect that potential clients with no means of reimbursement are likely to receive minimal, if any, services. CMHCs claim a significant number of fee reimbursements through Medicaid. Loss of Medicaid funds for AFDC eligibles would limit access to mental health care and could seriously undermine the comunity mental health program in Alaska. Other public health services would probably be similarly affected.

Because of the magnitude of the issues you have raised, we recognize there may well be other Federal implications not addressed in this letter, and that our response may precipitate additional questions. This response constitutes a preliminary reaction to the questions you have raised. Some portions have been sent to Washington, D.C. for review and it is possible there may be some modifications. We shall look forward to a continuing dialogue with the Legislative Affairs Agency on these subjects. Please feel free to contact me again if I can be of additional assistance.

Sincerely,

Bernard E. Kelly

MEMORANDUM FOR: MERWIN S. HANS ✓
SHELLY BLOOM

FROM: JAY ROWEN JWR

SUBJECT: State Initiatives Toward AFDC Workfair Programs

The attached "TABA" represents the most recent Office of Family Assistance attempt to get information on State initiatives.

From the list and my discussions with Gene Walker I identify the following as of most immediate concern to us:

Kentucky

The State plan amendment request should be in the regional office in the near future.

Michigan

S'arted out with a focus on Kent County (Grand Rapids). This is not pure work relief, but a mixture of employment training and work relief. The word is that Michigan is looking at what happens in Colorado, and may move in that direction. Sue Foster (Under Secretary's Office) is supposed to be calling a meeting. Hans name is on the list.

Wisconsin

Regional office has this request, but for some odd reason has not sent a copy into National OFA. So Walker does not know its contents. Supposedly, the regional office is waiting to see what response is made to Michigan.

Alaska

We have been in on this. There is pending legislation to establish a work program. State is looking a consequences.

Other efforts either appear to be dormant, have not reached an action point, or are not really workfair proposal, ie-- Pennyslvania is taking about a strong work search and acceptance of jobs in non-WIN counties.

For the directors meeting, I suggest we give them the attached document and ask that they give us more complete information where available, also that they obtain any documents such as legislative actions and plan requests on State initiatives. Caution them to use fineese in dealing with Regional OFA staff since they have just been approached by Walker to get this information.

TAB A

The following States have expressed interest in implementing mandatory work programs for AFDC recipients:

REGION I

CONNECTICUT – State law passed which established Employability Benefit and Equity Program which requires all employable persons to participate in a community project program. Law has not been implemented.

MAINE – Discussed with Regional Office staff the possibility of a work program.

MASSACHUSETTS – Submitted Amendment to State plan establishing Work Experience Program, but withdrew plan in favor of Special Initiative under the WIN program.

NEW HAMPSHIRE – Discussed with Regional Office staff the possibility of having a work program.

REGION II

NEW JERSEY – Senate Minority Leader plans to introduce a Bill which would establish public work programs.

NEW YORK – State is not interested in a work program, however several upstate counties have discussed with State staff the desirability of such a program.

REGION III

PENNSYLVANIA – Has submitted an amendment to State plan establishing a work registration requirement.

REGION IV

FLORIDA	-	Currently has an 1115 project in operation.
KENTUCKY	-	State law passed January 1978 establishing a work requirement. Plan material not yet submitted.
MISSISSIPPI	-	Expressed interest to R.O.
NORTH CAROLINA	-	Expressed interest to R.O.
TENNESSEE	-	Expressed interest to R.O.

REGION V

MICHIGAN	-	State plan amendment submitted establishing an employment and training requirement. Pending in Central Office.
WISCONSIN	-	State plan amendment submitted establishing an employment and training requirement. Pending in Regional Office.

REGION VI

NEW MEXICO	-	A Bill establishing a work requirement has been introduced in the State Senate.

REGION VII

No interest in a work requirement, however, Iowa, Kansas, Missouri, and Nebraska has discussed with Regional Office staff a Job Search requirement.

REGION VIII

COLORADO	-	State Law passed which establishes a work requirement. State plan material pending in Central Office.
UTAH	-	Operating an approved Work Experience and Training Program.

REGION IX

No interest.

REGION X

ALASKA – A Bill establishing a Work Requirement has been introduced in the State Legislature.

IDAHO – The State has passed legislation which establishes a WIN-like work in non-WIN counties, however the legislature did not fund the program.

OREGON – Discussion with Regional staff to establish a program under 1115(b).

WASHINGTON – ~~The Governor is in favor of a Work Requirement.~~ Apparently not in favor

IN THE HOUSE BY PHILLIPS AND MARTIN

HOUSE JOINT RESOLUTION NO. 29

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Requesting Congress to permit workfare programs and urging all states to make similar requests of Congress.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS welfare costs have skyrocketed in Alaska, more than tripling in the most recent eight-year time period; and

WHEREAS excess welfare costs drain scarce dollars that are much needed throughout Alaska for many other basic state programs and services such as education, health, and public safety; and

WHEREAS Aid to Families with Dependent Children (AFDC) is the largest federal and state funded cash assistance program providing over $18 million in aid to over 13,000 needy Alaskan children and their families; and

WHEREAS Alaska pays one-half of the total costs of the AFDC program administered in the state, yet is given little flexibility by the federal government to design a program that channels our limited dollars to needy children and only to those needy AFDC adults who are disabled or who are willing to work in exchange for their welfare checks; and

WHEREAS many Alaskans, as well as other taxpayers across the United States, are alarmed by the rising costs of welfare and are demanding a mechanism to require able-bodied AFDC adults to provide society with some tangible work product; and

WHEREAS mandatory workfare programs are seen by many as not only providing the state with a mechanism to remove from the welfare rolls idlers who refuse to work for their welfare grant, but also as (1) promoting client dignity, self-esteem, and responsible work attitudes, (2) assisting clients

in establishing a work history often necessary for obtaining permanent gainful employment, and (3) providing needed services to society that might otherwise require additional state revenues; and

WHEREAS those states which have attempted to implement workfare systems have been threatened with the loss of substantial federal funds because workfare programs are not permitted under federal law;

BE IT RESOLVED that the Alaska State Legislature respectfully requests the United States Congress to amend provisions of federal law to permit workfare programs for AFDC able-bodied adults without jeopardizing federal funding for the state's welfare programs; and be it

FURTHER RESOLVED that the Alaska State Legislature calls on the state legislatures in all of the states to forward similar resolutions to the United States Congress acknowledging their interest in such a change of federal law and urging Congress to pass legislation allowing for workfare programs.

COPIES of this resolution shall be sent to the Honorable Warren G. Magnuson, President Pro Tempore of the United States Senate; the Honorable Thomas P. O'Neill, Jr., Speaker of the United States House of Representatives; to the Honorable Ted Stevens and the Honorable Mike Gravel, U. S. Senators, and the Honorable Don Young, U. S. Representative, members of the Alaska delegation in Congress; and to the presiding officers of each house of the legislatures of all the states and the governing bodies of Puerto Rico, the Virgin Islands, Guam and the District of Columbia.

IN THE SENATE BY TILLION

SENATE BILL NO. 124

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to general relief assistance; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The legislature

(1) finds that excessive welfare costs are a burden on the taxpayers of the state and a drain on limited state revenues which are much needed in other state programs and services; that, in view of these constraints, state general relief assistance must be provided only to those needy citizens who are unable to work and those with dependent children; and that to discourage idlers and to promote responsible work attitudes and self-esteem, a work requirement must accompany state general relief assistance for able-bodied recipients; and

(2) declares that the purpose of this Act is to limit general relief assistance payments to persons who are at least 55 years old, are disabled, or have dependent children in their homes, and who are unable to provide sufficient support for themselves or their dependents.

* Sec. 2. AS 47.25.120 is repealed and re-enacted to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. (a) Financial assistance may be given under AS 47.25.120 - 47.25.300, so far as practicable under the conditions in this state, to an eligible individual who is

(1) at least 55 years old, or disabled, or who has dependent children in the home;

(2) not receiving other assistance under this chapter;

(3) unable to provide sufficient support for himself or those dependent upon him; and

(4) a resident of the state.

(b) For the purpose of determining whether an individual seeking assistance under this section is a resident of the state, the department shall consider, but is not limited to considering, the following factors:

(1) enrollment in the welfare program of another state and receipt of welfare benefits from another state;

(2) physical presence in the state;

(3) maintenance of a place of residence in the state;

(4) furnishings and household and personal effects sufficient to lead a reasonable person to conclude that the place of residence is more than a public accommodation;

(5) registration to vote;

(6) motor vehicle operator's license and motor vehicle registration;

(7) enrollment of children in local schools;

(8) bank accounts in this state or another state.

(c) An individual who is at least 55 years old is eligible for general relief assistance if the individual

(1) is unemployed for reasons other than misconduct or voluntary separation without cause;

(2) is actively and diligently seeking gainful employment;

(3) has not refused to accept employment when offered;

(4) has registered and is available for work as required by AS 23.20.375; and

(5) has exhausted all of his benefits, if so entitled, under AS 23.20, except that if his benefits under AS 23.20 are less than those

for which he would otherwise be eligible under this section, he is eligible for supplementary general relief assistance.

(d) A disabled individual between the ages of 18 and 65 years is eligible for general relief assistance if the individual is (1) determined to be needy in accordance with standards established by regulations of the department; (2) unable to meet the requirements established by the federal Supplemental Security Income Program or its successor agency; and (3) unable to engage in substantial gainful employment because of a physical or mental impairment determined and certified by a licensed physician. "Substantial gainful employment" as used in this paragraph means at least 30 hours of work per week. An individual determined to be eligible under this subsection may be referred to the appropriate state agency for vocational rehabilitation services and is required to accept such services as an additional condition of eligibility under this section. An individual determined to be eligible under this subsection may be required to seek employment or to participate in public service employment projects under AS 47.25.145 as an additional condition of eligibility under this section.

(e) An individual with children is eligible for general relief assistance if he satisfies the requirements of (c)(1) - (5) of this section.

(f) In addition to the requirements and conditions of (c) and (e) of this section, the department shall require that an individual who is physically fit, able to work, and employable shall, as a condition to receiving general relief assistance, accept an assignment to work under AS 47.25.145.

(g) An applicant for and recipient of general relief assistance must satisfy all applicable provisions of this section. Recipients disqualified for failure to comply with a requirement of this section

shall be excluded from general relief assistance for a period not longer than 12 months.

(h) The department shall adopt regulations under the Administrative Procedure Act (AS 44.62) necessary to enforce this section and to establish criteria and standards for the conditions and requirements of general relief assistance.

* Sec. 3. AS 47.25 is amended by adding a new section to read:

Sec. 47.25.145. PUBLIC SERVICE EMPLOYMENT. (a) The department is responsible for providing public service employment on public works projects to an individual who is receiving (1) general relief assistance under this chapter; or (2) unemployment compensation benefits under AS 23.20 that are within the last two weeks of eligibility and who, upon termination of those benefits, will be eligible for full or partial general relief assistance from the state. A general relief assistance recipient participating in public service employment is considered to be an employee of the employing agency. Except for workmen's compensation coverage under AS 23.30, the laws relating to public employees do not apply to individuals employed under this section. Payment for public service employment may not be made from the funds of the agency employing the general relief assistance recipient, but shall be made from the funds of the department.

(b) The department shall adopt regulations under the Administrative Procedure Act (AS 44.62) to carry out the purpose of this section. The regulations shall include, but are not limited to, provisions requiring that

(1) the employment of a general relief assistance recipient may not displace a state or municipal employee or an individual performing work for the state or a municipality on a contractual basis;

(2) the period of employment may not exceed that number of

hours which, when multiplied by the prevailing rate of compensation for the work, equals the amount of general relief assistance provided;

(3) there shall be no discrimination based upon race, color, creed, sex, age, religion, or national origin; and

(4) an individual refusing without justification to accept suitable work under this section shall be ineligible for general relief assistance.

* Sec. 4. AS 47.25.300 is amended by adding new paragraphs to read:

(5) "children" does not include unborn children and means individuals who are

(A) ineligible for and unable to obtain aid under a federal assistance program;

(B) in need, and without sufficient income or other resources to provide health care and essential support;

(C) under 18 years old, except that a child between 18 and 21 years may be eligible for assistance under AS 47.25.120 - 47.25.300, if the child is

(i) regularly attending high school to complete requirements leading to a high school diploma or its equivalent;

(ii) employed part time and is enrolled at least half time in an organized program of vocational or technical training designed to fit the child for gainful employment; or

(iii) employed part time and is enrolled at least half time in a local college or university; and

(D) living in a home with his father, mother, grandfather, grandmother, brother, sister, stepfather, stepmother, uncle, aunt, first cousin, nephew, niece, or foster parents in a place of residence maintained by the relative as his own home; or

is living in a family home or institution conforming to the standards fixed by the department;

(6) "public work projects" includes any kind of labor under the Department of Transportation and Public Facilities, department of public works of any municipality, or under any other agency of the state or a municipality.

* Sec. 5. An individual receiving general relief assistance on the effective date of this Act who would otherwise be excluded by the provisions of this Act shall continue to receive assistance if he satisfies the requirements of AS 47.25.120(c), 47.25.120(e), and 47.25.120(f).

* Sec. 6. This Act takes effect July 1, 1979.

KELLY,LETHIN AND URION

IN THE HOUSE

HOUSE BILL NO. 840

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to work requirements for recipients of public assistance."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 47.05.010 is amended by adding a new paragraph to read:

(15) solicit the cooperation of all governmental units and nonprofit agencies in developing unpaid job positions with those units or agencies, with a view toward placing persons receiving assistance under AS 47.25.120 - 47.25.300 and 47.25.310 - 47.25.420 in the positions.

* Sec. 2. AS 47.25 is amended by adding new sections to read:

Sec. 47.25.285. WORK REQUIREMENT. Needy persons receiving assistance under secs. 120 - 300 of this chapter are required to work for no compensation up to 24 hours a week in positions developed under AS 47.05.010(15), if available. Refusal to accept, or to perform with due diligence, work required under this section shall result in discontinuance of the assistance provided under secs. 120 - 300 of this chapter.

Sec. 47.25.407. WORK REQUIREMENT. Parents or relatives receiving assistance under secs. 310 - 420 of this chapter, not participating in the work incentive program for welfare recipients authorized under AS 23.15.650 and not exempt under 42 U.S.C. 602(19)(A)(i), (ii), (iv) - (vi) are required to work for no compensation up to 24 hours a week in positions developed under AS 47.05.010(15), if available. Refusal to accept, or to perform with due diligence, work required under this section shall result in discontinuance of that portion of the monthly assistance

provided under secs. 310 - 420 of this chapter attributable to the needs of the parent or relative.

* Sec. 3. AS 23.10.055(6) is amended to read:

(6) an individual engaged in the activities of a nonprofit religious, charitable, cemetery or educational organization where the employer-employee relationship does not, in fact, exist, and where services rendered to the organization are on a voluntary basis, or an individual placed in a position developed under AS 47.05.010(15);

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Since submission of the Fiscal Note dated February 26, 1979, it has become apparent that the number of Alaskans who are eligible for the Longevity Bonus is increasing at a more rapid rate than anticipated. This revised Fiscal Note is based on a projection which includes actual experience from the beginning of FY 77 to the present time.

This bill would raise the amount of the Alaska Longevity Bonus from $150 to $200 per month, and provide an effective date of July 1, 1980.

Year	Recipients		Increase		Months		Total Increase
FY 1981	8,221	x	$50	x	12	=	$4,932.6
FY 1982	8,833	x	50	x	12	=	5,299.8
FY 1983	9,445	x	50	x	12	=	5,667.0
FY 1984	10,057	x	50	x	12	=	6,034.2

POSITION PAPER/Department of Health and Social Servi

POSITION PAPER

SENATE BILL NO. 32

"An Act adopting the Interstate Corrections Compact; and providing for an effective date."

The Department of Health and Social Services and the Division of Corrections are in support of Senate Bill No. 32.

Alaska is presently a party to the Western Interstate Corrections Compact along with 11 other states. There are presently 16 member states to the Interstate Corrections Compact; 5 of those states are also parties to the Western Corrections Compact. In effect, joining the Interstate Corrections Compact would increase Alaska's out-of-state placement resources for prisoners by 50 percent; 11 additional states.

The Interstate Corrections Compact was initiated in order to allow an exchange of prisoners for the purpose of treatment and long-range release planning. Also, the Compact provides a means of placing prisoners out of state for protective purposes.

Alaska has prisoners with special needs. Membership in the Interstate Corrections Compact would expand the Division of Corrections ability to meet these special needs, and provide the most effective rehabilitation programs on an individual basis without increasing the cost of care.

Alaska would maintain jurisdiction over prisoners confined out of state. Alaska would also have the authority to inspect out-of-state facilities and to communicate with Alaska inmates.

88

Proposed C:

Amend AS 47.10.010 (a) (2) by adding a new subsection (F) to read:

(F) the child being habitually truant from school, except as provided in AS 14.30.010 (b); however, when a child is found to be in need of aid under this subsection, the court may issue no orders under AS 47.10.080 (c) (1) and (3).

Memo

To: Thelma
From: Don Clocksin
Date: April 16, 1979
Subject: SB 88 - Truant Children

Proposed CS:

Amend AS 47.10.010 (a) (2) by adding a new subsection (F) to read:

(F) the child being habitually truant from school, except as provided in AS 14.30.010 (b); however, when a child is found to be in need of aid under this subsection, the court may issue no orders under AS 47.10.080 (c)(1) and (3).

Explanation: As I understand it, the concern is that courts would have the power to terminate parental rights, allow an adoption, or institutionalize a child because ~~[redacted]~~ he or ~~[redacted]~~ she doesn't go to school, regardless of whether the parent is at fault. My proposed CS would allow a child to be (determined) in need of aid if he or she is habitually truant (except where there is an exception to the mandatory attendance statute) but would NOT allow a court to order the child institutionalized under AS 47.10.080 (c)(1) or terminate parental rights under AS 47.10.080 (c)(3). Therefore, the court would be allowed in truancy situations only to 1) release the child to "his parents, guardian, or some other suitable person," 2) order that person to

"provide medical or other care or treatment," or 3) have the department "supervise the care and treatment given to the minor..."

These powers, which appear in AS 47.10.080 (c)(2), would be strong enough to be the deterrence the school administrators want yet would not impose the severe punishments of institutionalization or termination of parental rights, which the committee seems to fear.

I hope this helps.

SB

162

SB162

9 April 1979

Representative Thelma Buchholdt
Capitol 110
Juneau, Alaska 99801

Dear Representative Buchholdt:

The undersigned respectfully solicit your support for passage in the House of Senator Don Bennett's Senate Bill 162 which recently passed in the Senate by a margin of 12 to 7. The bill amends the definition of "peace officer" to include probation officers who supervise adults, parole officers, and correctional officers.

Without elaboration I wish to refer you to the attached:

(1) Copy of SB 162

(2) Recent editorial in behalf of SB 162

(3) Letter of support from the State President of the Alaska Peace Officers Association directed to Governor Hammond.

(4) Letter of support from the President of the Fairbanks Chapter of the Peace Officers Association.

(5) Letter of support from the President of the Juneau Chapter of the Peace Officers Association.

What better endorsement for passage of this bill to include Adult probation officers, parole officers and correctional officers than from the Peace Officers Association themselves. Other letters of support could have been attached but it is felt the ones selected here convey with logical reasoning the justification for passage of this bill.

Respectfully yours,

Curtis Masingill

CURTIS MASINGILL

STEPHEN D. KORENEK, Parole/Probation Officer

Lawrence Calderone

LAWRENCE CALDERONE, Superintendent of
Fairbanks Correctional
Center.

P.S. Administration attempts to subvert SB 162 by amendment were rejected by the Senate. We support only the bill as presented in its original form.

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL 162

For an Act entitled: "An Act relating to peace officers."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 01.10.060(6) is amended to read:

(6) "peace officer" means any officer of the state troopers, members of the police force of any incorporated city or borough, United States marshals and their deputies, probation officers who supervise adults, parole officers, correctional officers, and other officers whose duty it is to enforce and preserve the public peace;

A Need for Firearms For Safety's Sake

Unfortunately state probation and parole officers have been forced between a rock and a hard place. They have been caught in the cross-fire of clashing political philosophies and petty jealousies in a matter that greatly affects their work and service to the state. At the crux is the need of probation and parole officers who supervise adult felons to carry concealed weapons.

In the past the probation and parole officers have carried concealed weapons either on the off-the-cuff interpretation of judges that they were peace officers and allowed to do so or on the basis of special permits issued by the Commissioner of Public Safety. But recently the new Commissioner of Public Safety William R. Nix moved to revoke the special permits issued just last fall by former Commissioner Richard Burton and the probation and parole officers have been forced to go to court to get the revocations blocked by restraining order or injunction. In the meantime, Senator Don Bennett has sponsored a bill, Senate Bill 162, which would make it perfectly clear that probation and parole officers are "peace officers" and are allowed to carry concealed weapons. The bill has passed the senate and is now being considered in the House.

But certain high officials in the state administration who reportedly believe "it's bad enough to have state troopers carrying concealed weapons, let alone probation and parole officers." These officials are attempting to lobby against Senate Bill 162 although they have been unsuccessful thus far in presenting a logical rationale of why probation and parole officers should not be able to carry concealed weapons. At first, opponents brought up the lack of firearms training as a reason. Then it was shown that the probation and parole officers have the same firearms training as troopers. One bubble popped. Next it was alleged that the probation and parole officers did not have occasion to use concealed weapons. Then it was shown that often these officers get into precarious situations where they were needed. In one case they foiled a bank robbery scheme. In another, they arrested a parolee who had a cache of high-powered weapons, even a bullet-proof vest. Another bubble popped. And so on down the line.

Still the Commissioner of Public Safety, the Commissioner of Health and Social Services, and the State Attorney General appear to be vehement in their opposition to the parole-probation officers being able to carry concealed weapons, despite the fact that the Peace Officers Associatons are fully behind the latter, despite the fact that most judges are behind the latter, despite the fact that most rank and file police officers are behind the latter. Even the former Director of Corrections was behind them on this issue.

The probation and parole officers say this matter is very vital to them because it affects their quality of work. How can they adequately supervise probationers and parolees if they are afraid to make unannounced home or work visits? Are probation and parole officers indirectly being forced to slack off their supervision and be content to receive once-a-month written reports from those under their charge? Is this a move to force good probation and parole officers--those with integrity--to leave state employment? If this is the design of some state cabinet members, they may very well succeed but the real brunt will be felt in the long run by the people of Alaska. We urge State House members to pass SB 162 without delay.

"Good, the more communicated, the more abundant grows."
John Milton

State APOA Office

Phone 337-7712

February 9, 1979

Governor Jay S. Hammond
Pouch "A"
Juneau, Alaska 99811

Dear Governor Hammond:

It has come to my attention that the Acting Commissioner of Public Safety has recently attempted to rescind the Special Commissions that had been extended to the Adult Probation/Parole Officers of the State. I observe that Commissioner Nix's opinion is inconsistent with the decision that had been previously made by Commissioner Burton. Commissioner Burton and previous representatives of the Department of Public Safety were so convinced of the Probation/Parole Officers' need to protect themselves, that to resolve the dispute between the Attorney General and the Probation/Parole Officers, Commissioner Burton, as others have done in the past, issued Special Officer status pursuant to AS 18.65.010. Probation/Parole Officers have not changed their role or function. Their job, if anything, has become tougher in recent years.

The zealous attempt of the Attorney General to strip the Adult Probation/Parole Officer of the concealed firearm is beyond comprehension. I understand the Attorney General has focused on the definition of peace officer and has argued that the legislature's failure to specifically include the Probation/Parole Officer meant that the legislature must have meant to exclude the class from the coverage of the definition. It is observed that in the Criminal Code, which recently passed the legislature and which will go into effect January 1, 1980, the legislature specifically defined a peace officer as: "a public servant vested by law with a duty to maintain order or to make arrests, whether the duty extends to all offenses or is limited to a specific class of offenses or offenders." This new definition of "peace officer" includes Probation/Parole Officers. I have also been apprised that the Attorney General has taken issue with a court order issued by Superior Court Judge Gerald J. VanHoomissen. The court order specifically orders that the Adult Probation/Parole Officer of the Fourth Judicial District is authorized to carry a concealed firearm.

Court action to resolve the Special Commission issue is pending in the Third Judicial District. Action to resolve the Attorney General's question concerning Superior Court Judge Gerald J. VanHoomissen's court order is pending a Supreme Court Hearing in Fairbanks. A great deal of effort is being expended by the Attorney General in opposing judicial and executive efforts in trying to disarm the State's Adult Probation/Parole Officers.

It is difficult to understand why the Attorney General has taken such a fanatic position in attempting to disarm the Adult Probation/Parole Officer of this critically needed tool. It would appear that the Attorney General's motivations for taking issue with such a trivial matter is motivated by something other than a fact of law.

It has been my personal observation that on numerous occasions, the Adult Probation/Parole Officer, while acting within his authority, has initiated and assisted in investigations and the arrests of dangerous and armed felons. I, as a supervisor of a narcotics unit over the past four years, have had occasion to work closely with the Adult Probation/Parole Officers in Fairbanks and have found their actions to be of the highest quality and professionalism. I have participated in investigations where the presence of an armed Probation/Parole Officer was of a great advantage to the safety of all concerned.

Why such tunnel-visioned focus on this issue is not yet understood.

I understand that one area frequently argued by the Attorney General is that a State Trooper or other police officer could be called upon to accompany an Adult Probation/Parole Officer when violence is expected. It would be a serious waste of manpower to require an additional police officer to assist when the Adult Probation/Parole Officer is more than capable of handling the situation at hand. It should be noted that the most dangerous situations are not always the most obvious situations.

When the State sends out an Adult Probation/Parole Officer to effect an arrest of a felon (all arrests made by the Adult Probation/Parole Officers are felonies), it will be done peaceably if possible or forcibly if necessary. It is beyond my comprehension how the Attorney General and the Acting Commissioner of Public Safety can rationalize their attempts to disarm these officers. We should be careful not to make their jobs so dangerous to perform that they might shrink from their duties and hesitate from the action which the proper protection of society demands.

I submit that the continued arming of our Adult Probation/Parole Officers is in the best interest of the citizens of this state. I am writing you in an effort to keep you informed of law enforcement's position in this important issue. I simply seek to make our position known and sincerely hope it will not create any animosities.

Your attention to this important issue would be greatly appreciated.

Sincerely,

Craig A. Forster

ALASKA PEACE OFFICERS ASSOCIATION
FARTHEST NORTH CHAPTER

AFZT-PM-W

9 February 1979

Mr. Wayne Anthony Ross
Attorney at Law

Dear Sir,

Information concerning the recent objection for Removal of Commissions for Adult Parole and Probation Officers to carry concealed weapons in the performance of their duties has been brought to our attention. This alarming objection comes as a grave disappointment and extreme concern for our fellow Law Enforcement Officers. The reasoning for this action considering their role in the Criminal Justice System is baffling to say the least. These Officers confront on a daily basis known felons who without question have little or no respect for law and order and even less for representatives of Law Enforcement.

These Officers have all met the Police Standards Council and are fully qualified. Additionally a vast majority have previous Law Enforcement background which include the attendance of Police Academies and various Law Enforcement Seminars. Many Law Enforcement Officers were personally contacted and expressed their concern over this action.

The Farthest North chapter of APOA gave their vote of confidence in addressing Former Commissioner Burton's Task Force report in 1976 for commissioning these officers. Our position is unchanged and speaking for the largest chapter of APOA we fully support and indorse the Parole and Probation Officers of Fairbanks Office. They are without question true professionals and exhibit the highest standards of any parole and probation office I have worked with.

Having been associated with Law Enforcement work over the last nineteen (19) years there is little question in my mind that these Officers of the Adult Parole and Probation Office are fully qualified and warrant the commission to carry weapons, by virtue of their extreme high potential of encountering a felon who has little regard for Law Enforcement representatives. The decision of this action impacts greatly upon their mission. It is our sincere wish that in the final analysis that these Officers be permitted to retain their Commissions.

Sincerely,

JAY R. RHYMES
President

cc: Adult Parole/Probation

ALASKA PEACE OFFICERS ASSOCIATION

Capital City Chapter
P. O. Box 751
Juneau, Alaska 99802

27 February 1979

Mr. Wayne Anthony Ross
Attorney at Law

Dear Mr. Ross:

The Capital City chapter of the Alaska Peace Officers Association has recently been advised of an effort to prevent select probation officers handling adult caseloads from carrying a concealed weapon (hand gun) in the performance of their official duties.

This has been an on-again, off-again situation for a considerable number of years, to the point that many members of our association have been concerned about the extent State government is willing to go in providing avenues of legal and administrative relief for criminal offenders and, at the same time, fail to recognize the need of those Justice System personnel who are hired and sworn to uphold the law.

In our opinion, government is supposed to represent the best interests of the people and, in doing so, ensure that the probation officers in this case, who are public servants, have the necessary equipment to properly discharge their duties in the safest manner possible.

This most recent action directed against probation officers who exercise, by law, their authority to arrest with or without a warrant, the very same criminal element as police, many of which the police would not even think of apprehending, if unarmed and expected to do so, only tends to reinforce our concern about the criminal element's welfare and rights being placed above the safety and welfare of those government employees charge with enforcing the law.

No one can argue philosophy with any degree of success in the face of cold facts and reality concerning this matter. When a probation officers happens upon a probation or parole violator, there are two thing he will know for sure if he is prohibited from carrying a firearm in the performance of his duties.

A. He will know for sure that he is not armed.

B. He will have no way of knowing whether the violator is armed or not.

In view of such facts, it would appear an easy decision to make: allowing probation officers to carry firearms in the performance of their duties.

Thank you.

Very truly yours,

William H. Huston
President
Capital City Chapter
Alaska Peace Officers Association

Juneau, Alaska 99802

From the Desk of

SENATOR DON BENNETT

3 May 1979

Dear Thelma,

Thought you might find this interesting, as it directly supports my SB 162 which seems to be bogged down.

Don

RECEIVED APR 23 1979

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA

THIRD JUDICIAL DISTRICT AT ANCHORAGE

ALASKA PUBLIC EMPLOYEES ASSOCIATION, et al.,

Plaintiffs,

vs.

STATE OF ALASKA,

Defendant.

No. 3AN79-846 Civil

MEMORANDUM DECISION AND ORDER

The State of Alaska (State) and the Alaska Public Employees Association (APEA), together with the individual probation and parole officers, have filed cross motions for summary judgment. These motions came on for hearing on March 8, 1979.

The court finds that there are no genuine issues of material fact and that summary judgment is appropriate on the following issues raised in the summary judgment motions:

I. Whether probation and parole officers are peace officers within the immunity to prosecution for carrying concealed weapons offenses. See AS 11.55.010 and AS 11.55.020.

II. Whether the Commissioner of Public Safety was within his discretion to revoke the special officer appointments of the probation and parole officers.

III. Whether the subject of carrying weapons while on duty is a subject for grievance arbitration under the contract between APEA and the State.

I.

AS 11.55.010 makes it unlawful for a person to carry a concealed weapon. AS 11.55.020 makes this section inapplicable to "a peace officer whose duty it is to serve process or make arrest." Plaintiff probation and parole officers claim that they are peace officers with the duty to

make arrests within the contemplation of AS 11.55.020 so that they are immune to prosecution for carrying a concealed weapon. The duty of probation and parole officers to make arrests is clear. See AS 33.05.070 and AS 33.15.210.

The primary point of contention on this issue is whether parole and probation officers are "peace officers" within the contemplation of AS 11.55.020. Plaintiffs have offered several definitions for "peace officer" derived from the Alaska Statutes. The State correctly asserts that the applicable definition is the general definition found at AS 01.10.060(6):

> "peace officer" means any officer of the state troopers, members of the police force of any incorporated city or borough, United States marshals and their deputies, and other officers whose duty it is to enforce and preserve the public peace.

(Emphasis added.) Plaintiffs argue that they fall within the emphasized language in that their duties as parole and probation officers require them to help enforce and preserve the public peace. The State relies on Alaska Attorney General's Opinion of September 18, 1977, Definition of "Peace Officer" under AS 01.10.060(6) and "Police Officer" under AS 18.65.290(2), which defines "peace officer" in a restrictive fashion:

> . . . he or she must be empowered with a full range of police duties and authority and must be currently functioning on essentially a full time basis in that role.

Opinions of the Attorney General are usually accorded some persuasive weight by the courts. In this case, however, the court finds the opinion relied upon by the State to be most unpersuasive. The Attorney General's analysis depends on assumptions for which this court finds no basis, either in the opinion or the language of the statute construed.

This court finds that the duties of probation and parole officers in enforcing the parole and probation laws

clearly help preserve the public peace and are an integral part of Alaska's system of enforcement of its laws. Therefore, the court holds that probation and parole officers are "peace officers" within AS 01.10.060(6) and that they may not be prosecuted under AS 11.55.010 in accordance with AS 11.55.020.

Plaintiffs are not persuasive, however, in asserting that their status as peace officers mandates them to carry weapons while on duty. The power of peace officers to carry and use weapons while on duty is subject to limitation. See Figaro v. Ward, 383 N.Y.S.2d 529 (1976).

The Commissioner of Health and Social Services is charged with general supervision and control of probation and parole officers. See AS 33.05.010; 33.05.020; and 33.15.150. It is up to the commissioner to determine the methods and equipment to be used by probation and parole officers in carrying out their functions. Section 2210, Firearms Policy of the Department of Health and Social Services Manual, is an apparently well considered and admirable set of guidelines for implementing the policies of the commissioner as regards firearms use by probation and parole officers. This policy made the officer's ability to carry firearms contingent on training and obtaining a special officer commission from the Commissioner of Public Safety. Apparently, Dr. Beirne had decided to revise this firearms policy to deny the use of firearms to parole and probation officers. In the light of the court's holding, supra, that the legislature has determined that such officers may carry concealed weapons without being prosecuted, it is incumbent on the commissioner to articulate her reasoning and the underlying policies that led her to effectively reverse this legislative judgment.

The court will not substitute its judgment for that of the commissioner in formulating a firearms policy, in the absence of the commissioner's arbitrary abuse of her discretion. But the court feels that the firearms policy here in issue is of such fundamental concern to the plaintiff officers' safety, and the public welfare, that some explanation of the reasoning behind the new policy must be forthcoming before the court can rule on whether Dr. Beirne has abused her discretion. Accordingly, the temporary restraining order will remain in effect until Dr. Beirne fully articulates the basis for her policy decision with regards to firearms and her reasons for abrogating the policy of Section 2210. If such a policy determination is not forthcoming within 60 days from the date of this order, this court will enter its order permitting parole and probation officers to carry concealed weapons in performing their duties under appropriate guidelines formulated by this court after appropriate hearings.

II.

Even if this court could find an abuse of discretion by Dr. Beirne in revoking the earlier policy of the Department of Health and Social Services as embodied in Section 2210, Firearms Policy, it would not help the plaintiffs with regard to special officer permits. They have consistently maintained that they are properly subject to Section 2210. Section 2210 makes the ability of the parole and probation officers to carry concealed weapons subject, among other conditions, to the officer being appointed special officer by the Commissioner of Public Safety under AS 18.65.010. The Commissioner of Public Safety has revoked the special officer commissions of the plaintiffs, so that they no longer qualify under Section 2210.

Plaintiffs contend that the revocation of their permits was an abuse of the Commissioner of Public Safety's discretion. This court cannot agree. By its terms, AS 18.65.010 vests the power to make special officer commissions ". . . as he [the commissioner] considers necessary . . ." The statute is also quite clear that special officers serve at the pleasure of the commissioner. The court interprets this grant of discretion to be broad enough to permit the Commissioner of Public Safety to revoke special officer commissions when he no longer perceives the speci officer to be necessary to aid and assist the state troopers. This court also finds persuasive the argument advanced by the State that AS 18.65.010 was enacted for the purpose of strengthening state trooper personnel in remote areas of Alaska rather than to those in the position of the plaintiffs. See Report of the Committee on State Affairs accompanying CSHB 48, Alaska State House of Representatives, House Journal, Alaska State Legislature, Second Legislature, First Session, p. 105 (1961) (quoted in Alaska Attorney General's Opinion of December 22, 1977, Special Police Commissions).

Accordingly, the court holds that the Commissioner of Public Safety was within his authority in exercising his discretion to revoke the special officer commissions of the plaintiff parole and probation officers. However, parole and probation officers' rights to carry concealed weapons are not dependent upon the special officer commission from the Commissioner of the Department of Public Safety. This procedure used by the two commissioners in authorizing weapons to the petitioning officers is commendable and consistent with insuring they were properly trained in use of the weapons before being permitted to carry them, but is not dispositive of their rights to carry concealed weapons.

III.

Plaintiffs also assert that the subject of carrying weapons is a subject for grievance arbitration under the contract between APEA and the State and that their special officer commissions cannot be revoked until the matter has been grieved. As discussed above, plaintiffs' rights to carry weapons are subject to the discretion of the Commissioner of Health and Social Services and their right to special officer permits is subject to the discretion of the Commissioner of Public Safety. This discretion is one of policy rather than "wages, hours and other terms and conditions of employment." See AS 23.40.070 and AS 28.40.250(1). This court cannot assume that the legislature has implicitly divested these executive departments of their power to determine policy matters. Kenai Peninsula Borough School District v. Kenai Education Association, 572 P.2d 416 (Alaska 1977). Additionally, firearms policy is generally regarded as a management decision outside the proper scope of collective bargaining. See San Jose Police Officer's Association v. City of San Jose, 144 Cal. Rptr. 638 (Cal. App. 1978).

Therefore, this court holds that the firearms policy of the Commissioner of Health and Social Services and the revocation of special officer commissions by the Commissioner of Public Safety are not subject to collective bargaining or the grievance and arbitration procedures of the contract between the APEA and the State.

DONE at Anchorage, Alaska, this 23rd day of April, 1979.

Ralph E. Moody, Presiding
Superior Court Judge

The Honorable Vernon L. Hurlburt
House HESS Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Hurlburt:

This letter concerns Senate Bill 163am which has been setting in the House HESS Committee since last spring. As you may know, we had asked that this bill be held without action as it was necessary for the Activities Association to work with the State Board of Education and the Alaska Association of School Boards to strengthen the concept of local school board control in this bill. This has been accomplished and both of these bodies have given their approval to the changes as outlined in the attached amendment. They support the bill as revised and we now seek favorable action by your committee.

I have been in contact with your Chairman, Mrs. Buchholdt, and have discussed the next steps with her. She agreed that it would be timely for this communication to bring you up to date on the status of this bill. Please note my letter to Mrs. Buchholdt and the complete backup materials.

We ask for your support and assistance in moving this bill favorably through the committee. If you have any questions, please call me at 272-9045.

Sincerely yours,

ASAA Board of Control

IN THE SENATE BY HACKNEY

SENATE BILL NO. 163 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to interschool activities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. The legislature finds that the establishment, promotion and governance of interscholastic athletic activities and other interschool contests and programs can best be accomplished by the schools in the state through self-organization and control and with a minimum of state supervision and involvement and that accomplishment of these goals is a valid public purpose. The legislature further finds that, because of the relatively small number of schools in the state and the high costs associated with coordinating, on a statewide basis, various interschool activities, the establishment, promotion and governance of interscholastic activities cannot be carried out in an efficient and adequate manner without the provision of some financial assistance from the state.

* Sec. 2. AS 14.12 is amended by adding new sections to read:

ARTICLE 4. INTERSCHOOL ACTIVITIES.

see proposed amendment

Sec. 14.12.200. VOLUNTARY INTERSCHOOL ACTIVITIES ASSOCIATION. (a) School districts, on behalf of one or more of their schools, and private schools in the state may join together to establish a voluntary association to provide for the efficient governing, promotion and control of interscholastic athletic activities and other interschool contests or programs recognized by the association.

(b) The association established under (a) of this section is not a state agency, nor is it a school district or other political subdivision

over

see proposed amendment

of the state. However, employees of the association may participate in the public employees' retirement system (AS 39.35) or, if the employee possesses or is eligible to possess a teacher certificate under AS 14.20.020, the teacher's retirement system (AS 14.25).

Sec. 14.12.210. INTERSCHOOL ACTIVITIES GRANTS. The commissioner of education may make grants to an association established under AS 14.12.200 from funds appropriated for that purpose if the association

(1) has adopted a constitution and bylaws for the governance, operation, regulation and supervision of interschool activities which treat the regions of the state and students in member schools on an equitable basis and in the best interests of the entire state;

(2) has a governing body whose membership is elected and is representative of the member schools in the various regions of the state;

(3) has adopted a reasonable operating budget for the period covered by the grant; and

(4) provides for an audit of the association's use of its grant funds within four months of the close of the grant period.

* Sec. 3. AS 14.07.053 and 14.07.054 are repealed.

* Sec. 4. This Act takes effect July 1, 1979.

SB 163am - PROPOSED AMENDMENT

As Approved By:
ASAA Board of Control
State Board of Educatio
Robert Greene-AASB

- December 10, 1979

Sec. 14.12.200 Voluntary Interschool Activities Association

(A) School Districts, by formal resolution of the board of education, on behalf of one or more of their schools, and private schools in the State may join together to establish a voluntary Association to provide for the efficient governing, promotion and control of interscholastic activities, contests or programs recognized by the Association.

(B) Governance for the Association established under (A) of this section is provided when a majority of member school boards, by resolution, have:

(1) Adopted a Constitution & By-Laws for the operation, regulation and supervision of interschool activities which treat the regions of the State and students in member school districts on an equitable basis and in the best interests of the entire State.

(2) Has a governing body whose membership is elected and is representative of the member school districts in the various regions of the State.

(C) The Association established under (A) of this section is not a State agency, nor is it a school district or a political subdivision of the State. However, employees of the association may participate in the public employees' retirement system (AS 39.35) or, if the employee possesses or is eligible to possess a teacher certificate under AS 14.20.020, the teacher's retirement system (AS 14.25).

(D) The State Board of Education shall approve the Association's Constitution and By-Laws and any revisions thereof to insure that all regions of the State are treated on an equitable basis and in the best interests of the State.

Sec. 14.12.210 Interschool Activities Grants

The commissioner of education may make grants to an association established under AS 14.12.200 from funds appropriated for that purpose if the association:

(1) Has complied with the provisions of A.S. 14.12.200 (B) (1 and 2);

(2) Has adopted a reasonable operating budget for the period covered by the grant; and

(3) Provides for an audit of the association's use of its grant funds within four months of the close of the grant period.

RATIONALE FOR LEGISLATIVE AMENDMENT - SB 163am

The membership and the Board of Control of the Alaska School Activities Association believes that school interscholastic activities programs, including athletics, music, and speech and drama, can best be accomplished by member schools through self organization and control, with a minimum of state supervision and involvement. It is recognized that the Association requires a legal basis and assistance in funding its efforts because of the relatively small number of schools and high costs associated with the coordination and operation of activities in such a large state.

The Association has done an outstanding job of sponsoring activities for Alaskan youth over the past twenty-two years and now believes that the current legislation passed in 1976 should be amended in order that the Association may better function to serve the needs of its membership. Current problems are:

1. There is duplication of effort and unnecessary administrative structure. It is agreed by the Commissioner of Education and the Association that it is unnecessary to operate the Association within the Department of Education. The authority for school participation and the operation of the Association also comes from member schools, their school boards, superintendents and principals.

2. The current statute is restrictive and does not allow each regional association to freely elect their Board of Control member.

3. The operation of the budget and the accounting system should be accomplished at the Association level to facilitate the needs of the organization, i.e., collection of officials' fees, purchase and sale of rule books, funding of officials' workshops, and the operation of state meets, tournaments and events.

The control of the Association lies with school districts and Boards of Education in the approval of organizational structure. The Association is operated by the superintendents of schools as approved by school boards, either directly or through appointed representatives. The revised legislation would foster this local control and would give the Association greater ability to react to the needs of its members.

Adequate funding from the state is essential in order to support the basic operation of the Association Office. While other states have adequate income from state tournament receipts to support their total operation and to pay for participant's travel expenses, the small number of Alaskan schools and long distances between communities severely limits tournament gate receipts for such needs. A basic state grant program is thus necessary.

LAWS OF ALASKA

1976

Chapter No.

120

AN ACT

Creating the School Activities Association within the Department of Eduoation; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.07 is amended by adding new sections to read:

Sec. 14.07.053. ALASKA SCHOOL ACTIVITIES ASSOCIATION. (a) There is created within the Department of Education the Alaska School Activities Association.

(b) The purposes of the association are to provide for the efficient governing of interscholastic activities through the promotion of those activities and other inter-school contests or programs sanctioned by the association and to assist in the promotion of those other activities and interests as it may from time to time elect.

(c) A public or private school or school district in the state may become a member of the association if it applies for membership. The Department of Education shall make applications available to all public or private schools or school districts in the state.

(d) The governing body of the association shall be the board of control with at least one member from each judicial district on the board of control. A member of the board shall be elected from each regional activities association by the members of that region. The term of office for each member is two years, except that one-half of the members elected to the first elected board shall be elected for one-year terms under regulations prescribed by the commissioner of education.

(e) The board in consultation with the Department of Education shall appoint an executive secretary, prescribe his duties and fix his compensation. He shall serve at the pleasure of the board.

(f) The board of control of the existing Alaska High School Activities Association in office on the effective date of this Act shall serve as the initial board of control for no longer than six months.

(g) The Department of Education shall approve the association's constitution and bylaws to ensure that all regions of the state are treated on an equitable basis and in the best interests of the state.

Sec. 14.07.054. ALASKA SCHOOL ACTIVITIES FUND. (a) The Alaska school activities fund is established within the Department of Education.

(b) The commissioner of education shall review the budget request of the Alaska School Activities Association and request a sum he approves that is equitable to all regions of the state.

(c) School districts and member schools of the Alaska School Activities Association may appropriate money to the fund.

* Sec. 2. This Act takes effect July 1, 1976.

Juneau, Alaska 99811

Dear Mrs. Buchholdt:

As you know, I have been in contact with Shannon Garrett, your Administrative Assistant, concerning Senate Bill 163 am. We appreciate your cooperation in not calendaring this bill as it has given us the opportunity to work with the educational agencies who have an interest in this legislation.

We are interested in keeping this bill in Committee until we can meet this next month with the State School Boards Association and members of the State Board of Education. It is hoped that we can work out language that is mutually satisfactory and come back to your Committee with a unified position.

If you have any questions concerning this request, please do not hesitate to call me.

Sincerely yours,

Leslie D. Wells
Executive Secretary

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF EDUCATION

STATE BOARD OF EDUCATION

March 29, 1979

Honorable Thelma Buchholdt
State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

During its March 22 Special Meeting on Legislation, the State Board of Education took formal action on several bills presently before the Legislature.

The Board is on record supporting the passage of CSSB 199 (Finance), which deals with the Public School Foundation Program.

The Board does not support either SB 163 am, which deals with the Interschool Activities Association, or HB 411, which deals with sex discrimination in education.

I respectfully request that you take into account the State Board's position on these bills as you determine your own degree of support for them.

Sincerely,

Thelma Langdon

Representative Thelma Bucholdt
Health, Education and Social Services
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Thelma:

As a former Anchorage resident and current principal of Ketchikan High School, I am writing to you to voice my opposition to the passage of Senate Bill 163 relating to the creation of an independent Alaska School Activities Association. This constructive action on my part is related to the continually changing policies of the Board of Control which hampers effective control of student acitivies at the Building level because the Board of Control neither has the foresight or planning ability to stick with a decision over a long period of time. They are continually rewriting and changing policies. Let me give you the latest example. Almost over a year ago they voted to limit the number of students traveling to State tournaments. Two weeks ago they caved in and expanded, once again, the number of participants.

On some occasions the Board of Control will make decisions at almost the last minute without regard for the problems it creates for the member schools. Example, changing the seasons of the Girl's Basketball program in June for the coming school year. Result: Ketchikan High School had to host a State Tournament and play in a Boy's Southeast Tournament the same weekend. After requesting the Board of Control to help us out and getting nowhere, our local school board protested the action to the State Board of Education and finally succeeded in winning the appeal.

I hope your committee will not pass this Bill out to the House floor. Let the Alaska School Activities Association clean up its act first and earn its independence.

Sincerely,

M. Bruce Slama
Principal

Dear Mrs. Buchholdt:

The Board of Control and members of the Alaska School Activities Association request your support for the attached legislation, Senate Bill 163. Basically, it is a clean up bill and contains no request for funds. It will serve to improve the Association's operation and remove some limiting aspects. The full rationale is attached with the proposed bill, the current statute and other background information.

The proposal was drafted by Mr. Ron Lorensen of the Attorney General's office and has the support of the Commissioner of Education. Resolutions of support have been passed by the membership of the State School Boards Association, the Superintendent's Association and the Secondary School Principals Association and are enclosed.

The Association earnestly requests your leadership and assistance in this effort and assures you that it is in the best interest of girl's and boy's school activities and the total educational community. This office stands ready to give full attention to this effort and supply you with any information that may be requested.

I will contact you next week (March 5th) concerning this legislation. I am available to meet with you and/or your committee with 24 hours advance notice.

Sincerely,

Les Wells

RATIONALE FOR ALASKA SCHOOL ACTIVITIES ASSOCIATION

LEGISLATIVE AMENDMENT

The membership and the Board of Control of the Alaska School Activities Association believe that school interscholastic activities programs, including athletics, music, and speech and drama, can best be accomplished by member schools through self organization and control, with a minimum of state supervision and involvement. It is recognized that the Association requires a legal basis and assistance in funding its efforts because of the relatively small number of schools and high costs associated with the coordination and operation of activities in such a large state.

The Association has done an outstanding job of sponsoring activities for Alaskan youth over the past twenty-two years and now believes that the current legislation passed in 1976 should be amended in order that the Association may better function to serve the needs of its membership. Current problems are:

1. There is duplication of effort and unnecessary administrative structure. It is agreed by the Commissioner of Education and the Association that it is unnecessary to operate the Association within the Department of Education. The authority for school participation and the operation of the Association also comes from member schools, their school boards, superintendents and principals.

2. The current statute is restrictive and does not allow each regional association to freely elect their Board of Control member.

3. The operation of the budget and the accounting system should be accomplished at the Association level to facilitate the needs of the organization, i.e., collection of officials' fees, purchase and sale of rule books, funding of officials' workshops, and the operation of state meets, tournaments and events.

The control of the Association lies with school districts and Boards of Education in the approval of organizational structure. The Association is operated by the superintendents of schools, either directly or through their appointed representatives. The revised legislation would foster this local control and would give the Association greater ability to react to the needs of its members.

Adequate funding from the state is essential in order to support the basic operation of the Association office. While other states have adequate income from state tournament receipts to support their total operation and to pay for participants' travel expenses, the small number of Alaskan schools and

(Over)

long distances between communities severely limits tournament gate receipts for such needs.

The Association has applied for funding of $65,000 for Fiscal Year 1980 through the Department of Education. At this time the amount included in their budget as submitted to the legislature is $57,700 for the Alaska School Activities Association. Current year funding is $57,200. This provides funding only for the Association office operation and salaries and represents about 50% of the total financial plan. The other 50% is raised by membership dues and income from officials' fees, rule books and tournaments' income.

Further information concerning the Association is given in the attached "11 Questions About Your Alaska School Activities Association."

11 QUESTIONS

ABOUT YOUR

ALASKA SCHOOL ACTIVITIES ASSOCIATION

1. WHAT IS ASAA?

The Alaska School Activities Association is a voluntary, non-profit state legislature-approved organization of member schools operating under the auspices of the State Department of Education. Organized by and for the schools, the purpose of the Association is to promote, improve and regulate interschool competition and activities in music, speech and drama, athletics and other areas of activities as the membership may so desire.

2. WHY ARE REGULATIONS NEEDED?

In early high school days, problems in interschool competition began to appear. Among the problems were that coaches played on school teams, playing rules and conditions could not be agreed upon, trained officials were lacking, etc. Fair, equal and safe competition was by chance. Chaos often prevailed. Today girls and boys are assured of the opportunity to participate in sound and healthy educational activities.

3. HOW WAS ASAA STARTED?

In the early 1950's school administrators showed a deep concern about the abuses in interscholastic athletics. They saw the need for rules on age, amateurism, and attendance and formed the organization known as the Alaska High School Activities Association in 1956. Meetings were held in conjunction with the annual Fur Rendezvous. A five-man Board of Control administered the affairs of the Association. This was a time for groping, yet much of the basic philosophy for our Activities Association was established during these early years. Basketball in twenty-four high schools was the only area of concern in early years.

Today some twenty-three years later, ninety-five schools are involved in one or more of nine non-athletic areas and eleven athletic areas of interschool activities. On July 1, 1976, legislation became law which placed the Activities Association under the general direction and support of the State Department of Education. It is operated by member schools who vote for and instruct their regional representative to the State Board of Control, approve changes in the constitution and bylaws and participate in activities that fit the needs of their school and community.

Member schools are represented by their elected member on the State Board of Control. This body sets policies, schedules, state event site, budget and employs an Executive Secretary and other staff to administer the Association's business.

(over)

4. WHO MAKES THE RULES?

Being aware that rules and regulations are necessary for any well-run activity organization, the member schools, through ASAA, have set forth necessary rules to assure equal opportunity and competition.

The constitution outlines the scope and purpose of the Association, while the bylaws deal with age, health, transfer, residence, scholarship, officials awards, insurance, amateurism, etc., of pupils; the qualification of coaches; the sponsorship, supervision and number of games; practice and playing seasons; and special rules for various sports.

By adoption of the constitution and bylaws through application for and payment of membership dues, member schools by their own initiative have acted to control their own interscholastic activities accordingly. It is therefore the schools themselves through their school board and superintendent that provides the authority under which the Association functions as approved at this time through State Board of Education.

5. HOW DOES ASAA WORK?

New rules and modifications of existing regulations are made by the member schools through the six regional associations. For purposes of administration and representation, the State of Alaska is divided into six representative regions. Membership in a region is based upon considerations including geography, school size and transportation considerations.

At present there are six regions:

Region I in western Alaska with 33 schools and 2,400 students.
Region II in central and south central Alaska with 20 schools and 1,500 students.
Region III a region of schools from all parts of Alaska (except southeast) with 11 schools and 3,400 students.
Region IV in the Anchorage bowl with 6 schools and 12,000 students.
Region V in southeast Alaska with 16 schools and 3,600 students.
Region VI in the Fairbanks area with 5 schools and 3,400 students.

The Board of Control is the executive and administrative body that carries out the work of the Association through their Executive Secretary. This body enforces the rules voted by member schools. The members of the Board are elected for terms of two years and represent the six regional associations. The Board, which meets four to six times per year, is in charge of the funds of the Association, rules on the eligibility of contestants in all activities, hears and decides protests, recommends changes in regional school placement, and sets dates, sites and qualifications and number of participants for the various state activities and tournaments.

6. WHAT DOES ASAA AND THE REGIONAL ASSOCIATIONS DO?

Develops, approves and directs interscholastic activities such as:

Basketball
Cross-Country Running
Cross-Country Skiing
Future Homemakers of America
Future Farmers of America
Football
Forensics & Drama
Distributive Ed. Club
Gymnastics
Honor Band and Choir

(over)

Hockey	Tennis
Music Festivals	Track & Field
Office Education Assoc.	Volleyball
AASG(Student Gov't. Assoc.)	Wrestling
Swimming	Vocations & Ind. Club

- Sets dates, sites and qualifications for state events;
- Publishes a monthly newsletter, the official handbook and numerous guidelines;
- Works constantly for the safety of participants;
- Strives to promote good sportsmanship and cooperative spirit among schools;
- Encourages a high quality of scholarship;
- Requires physical examinations and insurance standards for participants;
- Seeks to keep awards for achievement on a sound, sensible basis;
- Requires a coach to be a certified teacher and regularly employed by the school they represent, or controlled exceptions;
- Aids officials, coaches and players in acquiring a thorough knowledge of the playing rules;
- Distributes rule books and films to schools and officials;
- Promotes ethical codes among officials, coaches, players and fans;
- Conducts clinics and rule interpretations meetings;
- Tests and registers officials;
- Provides numerous free publications and materials to schools;
- Sactions interstate events and meets;
- Organizes, controls and directs state championships.

7. HOW IS ASAA FINANCED?

ASAA, with a budget of $110,000 in 1978/79, derives its income from the State Legislature through the Department of Education (50%), membership dues (25%), officials dues, sale of publications, and tournaments (largely basketball)(25%).

No transportation expenses for participants are paid by the State Association due to lack of income.

All monies over and above operating expenses from tournaments and meets are used to make up losses in other activity areas.

8. WHAT IS ASAA'S ROLE IN EDUCATION?

School people have long recognized the values of a reasonable and sound school activities program. The purpose of the Alaska School Activities Association is to approve, develop and direct interscholastic programs so that these values are enhanced. ASAA exercises control to reduce over-emphasis and to assure that activities will remain in proper perspective as an integral part of the total educational program. It stresses the cultural values involved in all activities so that the students who participate will grow educationally. The goal is a well-rounded, educational experience for all students.

(over)

9. WHAT IS ASAA'S RELATIONSHIP TO OTHER ORGANIZATIONS AND OTHER STATES?

ASAA cooperates and workswith all agencies that are concerned with the health and educational welfare of high school and junior high school students. Alaska, through ASAA, belongs to the National Federation of State High School Associations, an organization of all fifty states and some Canadian provinces. They assist in formulating uniform policies, standards and game rules so that all schools and students are playing the same games under the safest conditions.

10. WHO MAY BELONG?

Membership in the Association is open to all public and non-public secondary schools desiring participation in interscholastic activities. Over ninety-five are members.

11. WHERE IS THE ASAA OFFICE?

The Association office is located at 650 International Airport Road, Anchorage, Alaska 99502.

ALASKA SCHOOL ACTIVITIES ASSOCIATION

ANNUAL REPORT FOR 1977-78

This report reflects the paper shortage and the desire to set forth in outline form the accomplishments, conditions and needs of the Association as we continue to strive to serve the needs of the membership and their students. First, let us recognize that this is an Association of schools who elect to become members and are partners in setting the bylaws for all activities and eligibility rules. It is organized to promote and control good, sound interscholastic activities for all high school youths.

MEMBERSHIP AND PARTICIPATION

Let's look at the growth of membership. Ten schools joined in 1977-78. Eighteen new schools joined this year for a total of 94. Most of these are small schools in Region I ranging in size from 8 to 40. In the fall of 1976 there were 66 members.

Participation has increased in girls interscholastic sport activities by 76% over the past two years for a total of 3,290 in sports. Another 2,500 are in vocal and instrumental music, forensics-drama, student government and career club activities. Boys sports activities have increased by 15% during the same period for a total of 5,600 in sports and 2,200 in the other activities.

Thus, as David Hartman of NBC states on television for the National Federation of High School Associations during NCAA events "Support High School Activities - the Other Half of Education". Over half of Alaska's high school students gain educational and career value and leadership training from these important activities.

The state tournaments and meets report (Exhibit A) shows that approximately 1,900 students participated in state level championship activities. The current picture (1978-79) is not as bright due to financial restraints that were projected to your Board of Control by several school districts. Only 600 to 700 students will have the opportunity to participate in state level competition this year. Your Board of Control and this office are working to find means of improving this picture for the future. Many feel that a good program at state level should include 1200-1400 participants.

FINANCIAL REPORT

This report (Exhibit B) gives the financial status of the Association at the end of FY 1978. We are happy to report that the loss of FY 1977 has been turned around with reserves increasing by over $5,000 in FY 1978. The budget for the current FY 1979 is shown with the proposed budget FY 1980 (Exhibit C). The one big need that is not included is funds to offset costs of team travel to state tournaments and meets.

The total interscholastic activities growth picture is only slowed because of the lack of finances, lack of coaches and sponsors and the limitation of facilities. In the years ahead these limitations should be eliminated to give more students the best possible option to the drug and drop out society. Certainly this program must continue to be built upon a strong school academic program and a co-committment for intramurals and other local school activities to serve the needs and desires of all young people.

PRIORITIES AND NEEDS

First, the Association is seeking legislation to clean up and revise the legal foundation by which it operates. The plan calls for an uncomplicated law that allows flow-through state funding through the State Department of Education and authorizes

the Association to operate its own affairs under the auspices of member schools, their school boards and administrators. Removal from the State Department of Education would both save money and shorten administrative lines. It is noteworthy to report that the Alaska School Board Association, the Superintendents' Association and the Secondary Principals Association all have passed resolutions supporting the proposed revision to the Association legislation.

The second priority is funds to support interscholastic activity travel by Alaska high school groups. This is needed both to establish a support foundation for state tournaments and meets travel and for the many schools that have to travel by airline or air taxi service to achieve interscholastic competition during the regular activity season.

If these first two needs are met, it will follow that the need for stability in programming and participation at the state level will follow. This would then assure Alaska students the same opportunity that is found in other states where travel costs are not so expensive.

SUMMARY

1977-78 was a year of growth and improvement for the Association. Thanks to the hundreds of coaches, sponsors and administrators, Alaska students had many fine opportunities for growth, competition and just good participation.

We would like to recognize the leadership of President Ed Frandsen, Region III representative and Principal of Wasilla High School, and Vice-President Ed Nash of Region IV and Principal of Chugiak High School. These gentlemen have been reappointed by their regions for another two-year term and were re-elected to their respective office for 1979.

We would also like to express the Association's appreciation to past board member Ivan Gillespie, Region VI, who moved from Eielson High School to the central administration in the North Star School District as Director of Vocational Education. Let us also recognize the other board members who have given freely of their time to work for Alaska's youth. Dale Lunsford, Region I, Superintendent Bristol Bay School District; Wayne Taylor, Region II, Principal Nenana High School; Ed James, Region V, Assistant Principal Juneau-Douglas High School; Bill Brannian, Region VI, Principal Lathrop High School; and Vern William, Director, Department of Education, Juneau.

It is also noted that the Board of Control voted in March, 1977, to accept the recommendation of Alaska Association of Student Government to name a student to the Board of Control. Miss Sheryl Hall, senior at Dimond High, was selected to serve in this role as a non-voting member from A.S.G.A. for the 1978-79 school term.

Leslie D. Wells
Executive Secretary
November 1978

The Alaska [High] School Activities Association, an organization created by the Superintendents' Advisory Commission in 1956 and recreated under state law, Chapter 128-SLA 1976, has been placed within the Department of Education. The Activities Association is authorized to prescribe the regulations and rules for conducting interscholastic activities involving teams, groups, or contestants when a second high school or organization is participating in athletics, music, dramatics, speech and debates, and any other interscholastic activity that may be desired. The Constitution and By-laws of the Association must be approved by the State Board of Education.

8. Activitity Guides

Executive Secretary
Alaska School Activities Assn.
650 International Airport Road
Anchorage, Alaska 99502

PHONE: 272-9045

STATEMENT OF PHILOSOPHY

The purpose of the Alaska School Activities Association is to coordinate the efforts of its member schools toward the ultimate objectives of interscholastic activities. The Association shall provide a means for schools to cooperate in order to enhance and protect their interscholastic programs. In order to accomplish this, the A.S.A.A. is guided by a philosophy consistent with the purposes of secondary education in Alaska.

Member school's programs must be administered in accordance with the following basic beliefs:

Interscholastic activities shall be an integral part of the total secondary school educational program, with emphasis on teaching "through" activities, in addition to teaching the "skills" of activities. They shall have as their purpose:

a. to provide educational experiences not otherwise provided in the curriculum;

b. to develop better citizens; and

c. to encourage high standards of citizenship.

Interscholastic activities shall be tailored to the physical, mental and emotional maturity levels of the youths participating in them and shall be primarily for the benefit of those youths.

Any district, regional or state contest or event held to determine what is a champion shall provide fair opportunities for schools to demonstrate and to evaluate what is best taught in their programs with the best taught from other schools and from other areas of the state.

Participation in interscholastic activities is to be granted to those students who meet the minimum standards of eligibility adopted cooperatively by this association and those additional standards established by each school or region for its own students.

The A.S.A.A. is concerned with the development of those regulations, standards, and policies essential to assist school districts, their boards of education, and administration of member schools in the implementation of their philosophy of interscholastic activities. Interschool activities shall be kept in proper perspective and must complement the academic program of the schools.

Nonschool activities sponsored primarily for the benefit of the participants in accordance with the philosophy compatible with the school district and school philosophy of interscholastics may have values for youth. When they do not interfere with the academic and interscholastic programs, and do not result in exploitation of youth, they shall be considered as a worthwhile supplement to interschool activities.

BRIEF HISTORY

In the early 1950's, interested school men in western Alaska, led by Mr. William Zahradnicek of Palmer, Mr. W. W. Lahnum, Acting Superintendent of Anchorage, and Mr. Gordon Guffey, Anchorage High School, saw the need for separating high school basketball tournaments from local business promotion as part of the Fur Rendezvous. Thus, the Western Alaska High School Activities Association was organized to assure the needed educational leadership. During these same years, Mr. Sterling Sears of Juneau, Mr. Les Wingard, and Mr. J. E. Danielson of Ketchikan, were moving ahead to fill the same need in Southeastern Alaska.

In 1956 the desire to have a state organization led to the establishment of the Alaska High School Activities Association by the State Department of Education Superintendents' Advisory Commission. The Constitution and By-Laws were approved in the fall of 1957. The officers of the two divisions elected Mr. J. E. Danielson, Superintendent of Ketchikan, as Secretary-Treasurer; Mr. William Zahradnicek of Palmer was elected Chairman; and Mr. George McMillan of Juneau, Mr. Joe Montgomery of Anchorage, and Mr. Sterling Sears of Juneau, were members of this first State Board of Control.

In April of 1973 regions were established for basketball tournament purposes by a vote of the schools involved in those regions. Consideration was given to both school population and/or geographical location. From these basketball regions evolved the regional concept for all activities using the same criteria: size and location.

Early years saw 20-25 schools (4,000 to 8,000 students) as members of the Association. Today, over 70 schools hold membership serving the needs of over 32,000 students.

The state operates under one Constitution and set of By-laws regarding membership, student eligibility, contest organization, sport seasons, and other areas of general concern.

A.S.A.A. EXECUTIVE SECRETARIES

1957-1960	J. E. Danielson, Ketchikan
1960-1965	Joe Montgomery, Anchorage
1965-1971	Les Wells, Anchorage
1971-1975	Rick Arndt, Anchorage
1976-1976	Ed Frandsen, Wasilla
1977-	Les Wells, full time

ALASKA SCHOOL ACTIVITIES ASSOCIATION

CONSTITUTION

ARTICLE I NAME

This organization shall be known as the Alaska School Activities Association.

ARTICLE II OBJECT

The object of this Association is to promote and control interscholastic activities and other interschool contests or programs sanctioned by the Association and to assist in the promotion of those other activities and interests as it may from time to time elect.

ARTICLE III MEMBERSHIP

INTRODUCTION:

Secondary schools of Alaska are defined as schools, public or private, with grades 7 through 12 or any combination of those grades.

SECTION 1. Eligible Schools

A. Any state public school district, or if not a part of a state public school district, any accredited or state approved secondary school may become a member of the Association by paying the applicable annual dues. Being a member constitutes recognition by the member of the Association's authority over the membership and agreement to comply fully with the Association's by-laws and policies.

B. A high school is defined as a school which offers grades 9 through 12 or any combination thereof.

C. A junior high school is defined as a school which offers grades 7 through 9 or any combination thereof.

D. On or before May 1 of each year participating schools of member school districts and other member schools must declare whether they will participate with grades 9, 10, 11, and 12 or 10, 11, and 12 and whether they will participate with grades 7 and 8 or 7, 8, and 9, if at all.

E. The Board of Control will hear any request for an organizational structure other than those mentioned above should a school district organize its secondary school or schools on a different basis.

SECTION 2. Membership Definition

A school district's membership status applies to all school units for which the district has made application and paid the applicable annual dues. Each of these school units is considered a "member school" for the purposes of this Constitution.

ARTICLE IV DUES

The annual dues and dates of payments shall be as set forth in the By-laws.

ARTICLE V OFFICERS AND DUTIES

SECTION 1. Board of Control

The Board of Control consists of the elected representative from each regional association.

SECTION 2. Terms of Board Members

A. The term of office for each member of the Board of Control is two years, except that one-half of the members elected to the first elected Board are elected for one-year terms based upon a drawing of lots.

B. Subject to the approval of the Commissioner of Education, the Board of Control shall appoint an executive secretary, prescribe duties and fix the compensation. This person shall serve at the pleasure of the Board. The Board may appoint other officers, agents and employees and prescribe their duties and compensation.

SECTION 3. Department of Education Consultant

The Commissioner of Education, or his designee, shall serve as a consultant to the Board of Control for the purpose of coordinating the activities of the Association within the Department of Education.

SECTION 4. Powers and Duties of the Board

A. The Board of Control is the executive and administrative body of the organization, subject to the restraint of the Constitution and By-laws of the Association.

B. The Board of Control may determine the time and place of its meetings. A majority shall constitute a quorum.

C. The Board of Control has supervision of all sanctioned interscholastic activities of participating schools of member school districts and member schools and interprets the rules of the Association.

D. With respect to funds, not subject to state fiscal procedures, the Board of Control has the charge of Association funds, shall audit and approve all expenditures, and shall conform to the financial policies and audit as set forth by the membership of the Association and the regulations of the State Department of Education.

E. The Board of Control may delegate to the Executive Secretary the authority to rule on all protests and rule violations and determine the penalties, not otherwise specified, for violations of the provisions of the Constitution and By-laws.

F. The Board of Control may make investigations relative to the violation of the Constitution and By-laws and policies of the Association.

G. The Board of Control may appoint special committees to assist in the arrangement and supervision of various activities and contests.

H. The Board of Control may sanction out-of-state meets, contests or activities.

I. The Board of Control may determine suitable awards for winners of contests sponsored by the Association.

J. The Board of Control may approve and register contest officials for use in those activities sanctioned by the Association.

K. The Board of Control may sanction and operate state championship plans, sites and finances.

L. Regional placement: The regional placement of schools is determined and reviewed annually by the Board of Control at its summer meeting. Changes in regional placement take effect on July 1st of the following summer. The change may take effect earlier if all schools involved and affected as well as the state Board of Control concur. New member school placement becomes effective immediately.

M. The Board of Control shall report annually to the Commissioner of Education, the State Board of Education, and the Alaska Association of School Administrators for the purpose of receiving advice and comments. The report will show programs carried out and a financial statement.

N. The Board of Control shall submit an annual financial audit and budget to the Commissioner of Education.

O. The Board of Control may grant eligibility to a student in certain hardship and emergency cases when granting eligibility does not violate the intent and the purpose of any of the standards of eligibility. The purpose of this provision is to provide for certain cases that are beyond the control of the students or their parents. (Refer to Article XIII in By-laws for procedures.)

ARTICLE VI REGIONAL ASSOCIATIONS

SECTION 1. Powers

The Alaska School Activities Association encourages and supports the creation of regional associations. Each regional association administers its own activities in accordance with the provisions of this Constitution and the Association's By-laws and policies. Regions may adopt their own By-laws not in conflict with those of the Association.

SECTION 2. By-Laws

A current copy of the By-laws of each regional association must be on file with the Executive Secretary of the Association.

ARTICLE VII LOCAL CONTROL

The chief administrative officer of a member, or his designee, shall be the member school's official representative and shall be responsible for each member school's actions.

ARTICLE VIII AMENDMENTS

SECTION 1. Amendments

A. Proposed amendments to this Constitution must be introduced at a regular meeting of the Board of Control. Amendments which are proposed by the Board of Control must be endorsed by the authorized representative of ten different member schools.

B. Adoption of a proposed amendment requires a majority vote of all member schools by mail ballot and approval by the State Board of Education. The Board of Control may make recommendations on proposed amendments.

SECTION 2. Effective Date

Amendments take effect July 1 following their adoption unless otherwise provided by the amendment.

ARTICLE IX EFFECTIVE DATE OF CONSTITUTIONAL AMENDMENTS

This revised Constitution takes effect immediately upon the majority vote of the membership and approval of the State Board of Education.

ALASKA SCHOOL ACTIVITIES ASSOCIATION

BY-LAWS

ARTICLE I BOARD OF CONTROL ORGANIZATION AND OPERATION

SECTION 1. Organization and Terms of Members

A. The administration of the Association is vested in the Board of Control composed of a representative elected by the member schools of each regional association and selected in such a manner as to assure that a representative is elected from each judicial district. Each elected member of the Board of Control has one vote.

B. The term of office expires on December 31st.

SECTION 2. Dates of Election and Replacements

Board of Control members shall be elected by December 1 of the year in which the term for the regional representative expires. A person may not serve more than three consecutive terms. The Board of Control will certify new board members in order to assure representation of all judicial districts.

If an encumbent ceases to be a voting member of the Board of Control because of death, resignation, incapacity, change of assignments from administration in a school district, or because of moving out of the region in which elected, the member schools of the regional association shall elect a replacement to serve on the Board of Control for the remainder of the term.

SECTION 3. Alternate Regional Representative

A regional association may elect an alternate member to sit on the Board of Control in place of the regular member for only the following instances: weather and transportation problems, medical illness, or other excusable and acceptable reasons as approved by the majority of the other members of the Board of Control.

SECTION 4. Meetings

The Board of Control shall meet not less than four times annually. They may otherwise convene upon the call of the president or upon the request of a majority of the Board of Control, the call to be issued by the executive secretary. The membership will be informed of the meetings in a timely manner.

SECTION 5. Officers of the Association

The officers of the Association are a president, vice president, and a secretary-treasurer. The president and vice president shall be elected from among the members of the Board of Control, each to be elected annually for a term of one year. No one individual may serve as president for a period longer than a total of five years. If the offices of either the president or the vice president become vacant because of death, resignation, or other emergency, it shall be filled for the remainder of the term by election by the Board of Control at its next meeting.

SECTION 6. Secretary-Treasurer

The secretary-treasurer is the executive secretary and serves at the pleasure of the Board of Control. The duties and functions of the secretary-treasurer are the responsibilities of the executive secretary.

SECTION 7. Association Funds

To the extent applicable, the secretary-treasurer shall comply with state fiscal procedures. With respect to funds not subject to state fiscal procedures, the secretary-treasurer shall, under the supervision of the Board of Control, have charge of funds of the Association. He shall make complete financial statements to the Association members at the time of the fall meeting. The accounts shall be audited at least annually and the cost of the audit will be paid by the Association. The financial year for the Association shall be July 1 to June 30. An annual report and an audit will be furnished the State Department of Education by October first of each year.

ARTICLE II MEMBERSHIP DUES

SECTION 1. Member Schools

Each participating school for which a member school district has paid dues is a "member school" as that term is used in these By-laws.

SECTION 2. Scale of Dues

Annual Association membership dues for school districts and non-school district schools shall be determined as the sum of the dues for each participating member school, based on the actual enrollment as shown on the third quarter attendance report for the prior school year for each school, as shown in the following table:

Enrollment	High School Dues for Next School Year		Jr. High School Dues for Next School Year
1-100	$100.00	$150.00	$ 50.00
101-500	$200.00	$300.00	$100.00
501-1000	$400.00	$550.00	$200.00
1001-	$600.00	$800.00	$300.00

(as approved June 1978)

SECTION 3. Date of Payment

Dues must be submitted to the ASAA executive secretary, payable to the Department of Education, by September 1 for that school year and are delinquent October 1. Delinquent members will be charged a 10% per month penalty on the balance owing but unpaid.

SECTION 4. New Member Schools

New members will not be assessed the penalty for the first year of membership.

ARTICLE III VIOLATIONS OF BY-LAWS AND CONTEST RULES

SECTION 1. Conduct of Activities

All school sponsored interscholastic sports, events, and activities of member schools must be conducted in accordance with the Association's By-laws, rules and policies.

SECTION 2. Conforming to Rules

A. By-laws, including eligibility rules, contest rules, and Board of Control policies may not be waived by consent between or among member schools.

B. As used in these By-laws, "rule" includes these By-laws.

SECTION 3. Violations and Disputes

A. All rule violations must be reported to the Executive Secretary in writing. Assessment and a decision will be rendered in a timely manner.

B. All questions in dispute must be submitted to the Executive Secretary. The Executive Secretary's decision is final unless it is appealed to the Board of Control. All questions in dispute and their disposition will be reported to all member schools.

SECTION 4. Protests Against Member Schools

A. A member school entering a protest against another school shall submit to the Executive Secretary, in writing, a full statement of the facts relating to the alleged violations committed by the offending school (use the form as exhibited in Appendix A). The Executive Secretary will submit copies of the complaint to the superintendent or principal of the accused school. The accused school may present its case in writing to the Executive Secretary within 14 days after receipt of the complaint. After reviewing the submitted materials, the Executive Secretary will render a decision.

B. All protests must be accompanied by a filing fee of $100. If the final decision is in favor of the presenting school, the fee will be refunded. If the protest is denied, the fee shall be forfeited. No decision on a protest will be made unless the filing fee has been paid.

ARTICLE IV APPEAL PROCEDURE

SECTION 1. Appeal by Member Schools and Individuals

A. A member school may appeal decisions of the Executive Secretary by requesting of the Board President, within 14 days of receipt of the decision, and in writing, that the case be presented to the Board of Control for review.

B. An individual who is adversely affected by a decision of the Executive Secretary may appeal that decision by requesting, within 14 days of receipt of the decision, that his or her member school's officially designated administrator request of the Board President, in writing, that the case be presented to the Board of Control for review.

C. All appeals, including all relevant factual matter and legal arguments, must be presented to the Board of Control in writing. Oral hearings are not a matter of right, but will be granted for good cause shown.

D. All appeals will be considered and a decision rendered in a timely manner.

E. In appeals involving rule violations, the Board of Control may assess the costs of the appeal against the member who is found at fault.

SECTION 2. Appeals Review Commission

A. An Appeals Review Commission will review decisions or interpretations of the Board of Control when requested by an affected individual, a member school, or a member school district by formal written appeal within 14 days of receipt of the decision.

B. The Appeals Review Commission is the State Board of Education or a committee of the State Board of Education.

C. All appeals, including all relevant factual matter and legal arguments, must be presented to the Appeals Review Commission in writing. Oral hearings are not a matter of right, but will be granted for good cause shown.

D. All appeals will be considered and a decision rendered in a timely manner.

ARTICLE V PENALTIES

Penalties assessed by the Executive Secretary or by the Board of Control upon member schools for violation of the By-laws will vary depending upon the nature and character of the violation. Penalties assessed may include one or more of the following:

1. Warning
2. Forfeiture
3. Probation
4. Fine - not to exceed five hundred dollars
5. Suspension from the Association - not to exceed 365 calendar days

ARTICLE VI CONTEST RULES

SECTION 1. Contracts for Contests and Events

Final agreements relating to contests or events between or among member schools must be incorporated into contracts on forms provided by the Association. These contracts must be executed by mutual consent of the representatives of the respective schools and exchanged not less than 10 days prior to the contests. The contract may not be cancelled or altered except by mutual consent of the schools involved.

Breach of contract will be considered a rule violation.

SECTION 2. Non-Member School and Out-of-State Rule

A. As a condition of membership, members expressly agree that they and their member schools will not take part in any interscholastic activities or contests with schools eligible for membership but who are not member schools of the Association. A waiver may be requested to participate with a non-member school.

**See margin for addition.

B. A member school may not participate in any contest or event with an out-of-state school unless a sanction has been granted by the Board of Control.

C. Participation without a waiver under A or a sanction under B of this section will result in disciplinary action for the member school and may include suspension from Association membership and participation for a period of up to 365 days.

SECTION 3. Ineligible Students

A member school may not permit students who are ineligible under these By-laws to participate in or otherwise appear on the field or floor in uniform during any contest between itself and other member schools.

SECTION 4. Contest and Event Supervision

Each contesting school must have present at the contest or event a certificated faculty representative who is responsible for the conduct of its participants and students throughout the contest. The home school must have an administrator or his designee in attendance.

SECTION 5. Personal Conduct

A. High standards of courtesy, fair-dealing and sportsmanship must feature all Association contests or events.

B. In matters pertaining to personal conduct, such as gross violations of sportsmanship, attacks on officials and other acts of gross misconduct by any student, school staff member or school community members where the school has failed to act reasonably in controlling the community member, the Association will determine, after providing an opportunity to submit written statements or an oral hearing, or both, appropriate penalcies and whether or not the student or school will be suspended or barred from future contests or events.

SECTION 6. Records

Each school shall keep accurate records of contests and events for a period of four years. These records, or copies, must be forwarded to the Executive Secretary upon request.

SECTION 7. Sunday Contest or Event Rule

Interscholastic events or contests may not be held on Sunday. If inclement weather forces the cancellation of one contest of a scheduled series, and the series cannot be rescheduled at a later date, the host school may request of the State Executive Secretary and its Region's Executive Officer that they sanction a Sunday contest.

**Approved June 1978 - Add to Section 2-A.

A member school may participate in interscholastic activities with a non-member school of less than 25 students on an intermural basis as long as the schools are in the same school district and as long as they are in compliance with all other Association athletic eligibility regulations.

ARTICLE VII SANCTIONED ACTIVITIES

SECTION 1. Compliance with Title IX

The Association will comply with the provisions of Title IX of the Education Amendments of 1972. No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person or otherwise be discriminated against in any activities regulated by the A.S.A.A.

Separate teams for members of each sex may be allowed where selection for such teams is based upon competitive skill or the activity involved is a contact sport. Contact sports include boxing, wrestling, rugby, ice hockey, football, basketball and other sports the purpose or major activity of which involves bodily contact.

The Association will insure that, when separate teams are allowed, equal opportunities in athletics are provided members of each sex, in keeping with Title IX regulations.

SECTION 2. Sports Recognized by the Association

Badminton	Diving and Swimming
Football	Basketball
Soccer	Wrestling
Cross Country Running	Ice Hockey
Bowling	Cross Country Skiing
Volleyball	Track and Field
Gymnastics	Tennis

SECTION 3. Activities with No Season Restriction

Activities with no season restriction include but not limited to:

Bowling	Honor Band, Choir, Orchestra
Cheerleaders	Music Festivals
Drill Teams	Forensics - Speech - Debate - Drama
Rifle Teams	Office Education Association - OEA
Chess	Future Homemakers of America - FHA
Eskimo Games	Future Farmers of America - FFA
Student Governments Conferences	Vocational & Industrial Clubs of Am. - VICA
Journalism Workshops	Distributive Education Clubs of Am. - DECA

SECTION 4. Activities Confined to a Season: Sports and Sport Season Dates, Pre-season Practice, Number of Contests, Number of Game Periods per Day*

*Next page

Number of Game Periods per Day

A. All sports competition will be governed by National Federation of Interscholastic Athletics rules and guidelines where available, or by rules adopted by the Board of Control.

B. The following table sets out the seasons, the permissible pre-season practice periods, the permissible number of game periods per day exclusive of regional and state tournaments, and the permissible maximum games prior to regional tournaments for various interscholastic sport contests:

ADD NOTE: See page 11-a for Four-Season Plan for sport seasons (Regions I and II).

Sport	*Practice Prior to Participation	Date of First Game	No. of Game Periods/Day	Maximum Games Prior Reg. Tourn.	Season End Date
Football	Begin August 15 10 Separate Days	Last Weekend in August	Four	One Per Week	Third Weekend in October
Cross Country Running	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
ADD Volleyball	Begin August 15 10 Separate Days (Except Reg. I & II)				W/completion of Reg. or State meet
Gymnastics	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Diving and Swimming	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
ADD Girls' Basketball	Begin October 15[1] 10 Separate Days (Except Reg. I & II)	November 15[1]	6**	25[1] (30-77/78)	W/completion of Reg. or State meet
ADD Boys' Basketball	Begin October 21 10 Separate Days (Except Reg. I & II)	November 15	6**	25[1] (30-77/78)	W/completion of Reg. or State meet
ADD Wrestling	Begin January 2 10 Separate Days (Except Reg. I & II)			25[2] Matches (excl. forfeits) 20 day limit	W/completion of Reg. or State meet
Ice Hockey	Begin November 1 10 Separate Days	Last Weekend in November	3**	20	W/completion of Reg. or State meet
ADD Cross Country Skiing	Begin November 1 10 Separate Days (Except Reg. I & II)				W/completion of Reg. or State meet
ADD Track and Field	Begin March 15 10 Separate Days (Except Reg. I & II)				W/completion of Reg. or State meet
Tennis	Begin March 15 10 Separate Days				W/completion of Reg. or State meet

[2]Effective 77-78 School Year

INSERT - CONSTITUTITION & BYLAWS (See both sides of 11 and 11a)

Proposed March 1978
Effective August 1978

ALASKA SCHOOL ACTIVITIES ASSOCIATION

CONSTITUTION & BYLAWS

Article VII. Sanctioned Activities. Section 4 - add C & D (pp 11-a).

C. Four-Season Plan - Regions I and II

1. Any student transferring from one school to another who has completed a given sport season*in the current school year shall not be eligible for the same sport in the same school year at the receiving school within the state association.
(* Regional Tournament)
2. Region I and II teams and/or individual participants may compete and/or participate in state level meets, events or tournaments when Regions I and II do not jointly sponsor a similar activity, except in basketball, as a small-schools tournament plan has been previously approved by the Board of Control on June 4, 1977.

D. Four-Season Plan for Regions I and II

Fall Season:
X-Country-boys and girls:
Begins-Two weeks prior to opening of school(no earlier than Aug. 15).
Ends-2nd weekend in October or no later than the end of state x-country meet.

Early Winter:
Basketball-boys and girls:
Begins-October 1; first game, 3rd week-end (Friday of October)
Ends-First weekend of February or with the end of the state small-schools basketball tournaments.

Late Winter:
Girls Volleyball; Wrestling-boys; X-Country Skiing-boys & girls:
Begins-January 15 or third Monday in January, whichever is earlier. First meet-after ten separate days of practice.
Ends-First weekend in April or with the end of the state wrestling tournament and/or volleyball tournament, whichever is latest.

Spring:
Track:
Begins-4th Monday in March. First meet-after ten separate week days of practice.
Ends-With close of school or with completion of small-schools state tournament or meet.

Minor adjustments of dates for activity may be made as needed by the Board of Control.

ARTICLE VIII AMATEURISM

SECTION 1. Only Amateurs Are Eligible to Participate

A. Pupils representing member schools of the Association must be amateurs.

B. A pupil is a professional, not an amateur, and is ineligible if he or she receives or is promised money or other valuable consideration for competing in a sport recognized by the Association. This rule applies throughout the twelve months of the year. A professional in one of these sports is considered a professional in all. A pupil may play with or against those who are professional without losing amateur standing.

C. Acceptance of money or other valuable consideration as wages or expenses or of merchandise prizes for athletic competition renders a pupil ineligible for further athletic competition. No money is to be given to a contestant. However, it is permissible for a contestant to accept necessary meals, lodging and transportation while competing. Medals or trophies may be accepted. College scholarships may be accepted but the amount of the scholarship must be paid directly to the college of choice by the donors.

D. A pupil is ineligible if he or she competes under an assumed name for the purpose of concealing his or her status as a professional.

E. A high school student who has violated his or her amateur standing as set forth by these By-laws may apply to the Board of Control for reinstatement as an amateur, if 365 days have elapsed since the date he or she was declared ineligible, and if he or she has been in regular school attendance and not competed as a professional during the intervening period.

An application under this paragraph must be in writing and must be signed by the student and by the superintendent or principal, certifying that one calendar year has elapsed since the student was declared ineligible, that he or she has been in regular school attendance, and that he or she has not violated amateur rules during the intervening period.

SECTION 2. Signing of Contracts

The signing of any contract by a pupil whereby he or she agrees to compete in any athletic competition for profit immediately makes that pupil ineligible for further interscholastic athletic competition.

SECTION 3. Professional and College Try-Outs

Professional and college try-outs which interfere with a high school student's work or which involve a game in violation of Association rules may result immediately in that student's ineligibility for further interscholastic athletic competition.

ARTICLE IX AWARDS

The Board of Control designates, gives, and controls ribbons, medals, and trophies to be awarded to schools and individuals.

SECTION 1. Principal Approval

Awards must have symbolic value only. Awards may be accepted by a student only if granted through the school with prior approval of the school principal or school district superintendent.

SECTION 2. Value Limit

Awards, such as unattached letters, trophies, metal charms or pins, or similar articles, having symbolic value only, may be given to students by the school if the cost of the award does not exceed $10. In the case of state championships, the cost may be increased to an amount which does not exceed $15. This section does not apply to trophies awarded to teams by the state or regional associations.

SECTION 3. Invitational Tournaments

Leagues or schools conducting invitational tournaments or meets under Association rules may make awards to the winning schools or contestants if the awards are within the limits set forth in Sections 1 and 2 of this Article and in Article XV.

SECTION 4. Other Awards

Suitable awards, of symbolic value only, may be accepted by team members from service clubs, patriotic organizations, civic groups, Dads' and Mothers' Clubs, and similar organizations, provided they are given in compliance with the provisions of Sections 1 and 2 of this Article. However, jackets or sweaters may be accepted by state championship team members even if the cost exceeds $15. Gifts may not in any way advertise any firm or individual insofar as commercial or business interests are concerned.

SECTION 5. College Recruiting

Awards of transportation and entertainment by colleges and universities for recruiting purposes may be accepted by students, when carried on within the limitations of N.C.A.A., N.A.I.A., and college conference rules, if there is prior approval of the high school principal.

ARTICLE X QUALIFICATION OF COACHES

Coaches must be certificated teachers and must be regularly employed as teachers in the school district in which they coach. The Executive Secretary may waive temporarily these certification requirements upon satisfactory proof that a properly certificated coach could not be secured. A certificated staff member of the school district must accompany and be in charge of a traveling team.

ARTICLE XI PHYSICAL EXAMINATION, PARENTS' CONSENT

SECTION 1. General

A pupil may not be permitted to participate in a practice session or to represent his or her school in athletics, cheerleading, or other strenuous activities until there is on file with the superintendent or school principal a statement, signed by a practicing physician, nurse practitioner, physician's assistant, or a military medical examiner, and the pupil's parents or legal guardian, certifying that he or she has submitted to a physical examination within the prior

examiner, the student is physically fit to participate in strenuous physical activities. A waiver of this requirement may be temporarily made by the Executive Secretary in villages where no examiner is available.

Physical exam forms are available from the Association Executive Secretary.

SECTION 2. Wrestling Physicals

With respect to pupils participating in wrestling, the National Federation Rule Book for high schools governs all situations.

Prior to the pupil's first match, the examiner, as defined in Section 1 of this Article, must determine the lowest weight class the individual may wrestle during the season. This determination must be in writing, signed by the examiner and by the student's parents, before the student may be allowed to wrestle in a match. ~~Changes in weight class determination will be allowed during the season if the above procedure is followed.~~ Each school is responsible for the administration of the weight permit slips and the weight permit slips must be made an integral part of the eligibility roster.

DELETE Rule change approved June 1977. Effective Date July 1,1977

Individuals must have their weight permission slip on file with their school before their name may be placed on the eligibility list. There must be a place for the examiner's signature and the parent's signature on the weight permission slip.

ARTICLE XII RULES OF ELIGIBILITY

Unless expressly limited, the following rules are intended to be minimum requirements for student eligibility to participate in all interscholastic activities and do not preclude a school, a school district, or a regional association from imposing additional rules that are reasonable and prudent.

SECTION 1. Enrollment Rules

To be eligible during a school semester for participation in interscholastic activities, a student must:

A. be properly registered;

B. be carrying a minimum of four classes that lead to granting of credit toward graduation; and

C. be in regular attendance at school and classes in which enrolled.

SECTION 2. Eight Semester Rule

A student may only participate in interscholastic activities during the first eight semesters of school after enrollment in the ninth grade.

SECTION 3. School Grade Rule

Students in grade eight and below are ineligible for participation as members of high school athletic teams in interscholastic competition including cheerleading.

SECTION 4. Similar Sports Participation Rule

A student may not participate as a member of other than a high school athletic team in similar contests during the same school season.

SECTION 5. Undue Influence Rule

A student is not eligible to participate in interscholastic activities if he or she has been unduly influenced or offered any remuneration, directly or indirectly for the purpose of causing the student or the student's family to reside in a given school district or school attendance area in order to establish his or her eligibility for activities participation.

SECTION 6. Age Rule

A student is not eligible to participate in interscholastic activities when he or she is no longer of school age as defined in AS 14.03.070. However if the student started a sport season while still of school age, the student will be allowed to complete that sport season.

SECTION 7. Semester Credit Rule

In order to be eligible to participate in interscholastic athletics and cheerleading during any semester after completion of the first semester of ninth grade, a student must have passed, for the immediately preceding semester, at least four courses which grant a semester of credit toward graduation. A student who has been ineligible for a complete semester under this section may become eligible after having attended the first day of the succeeding semester.

A. For purposes of this section, academic deficiencies may be made up through correspondence courses or summer school.

B. A grade of incomplete is considered as not passing until the incomplete is changed on the official school records.

SECTION 8. School Transfer Rule

A. A student who transfers school enrollment corresponding with an actual change in the place or residence (home, abode) of his or her parents or legal guardian is immediately eligible to participate in the interscholastic activities of the school to which he or she has transferred, providing he or she satisfies all other applicable rules of eligibility.

B. A student who transfers school enrollment without a corresponding change in the place of residence (home, abode) of parents or legal guardian is not eligible for participation in the interscholastic athletic activities of the school to which he or she has transferred for a period of 18 weeks following the transfer of enrollment.

C. The 18 week ineligibility rule stated in B of this section does not apply when:

1. the transfer in school enrollment is ordered by the governing body or the chief school administrator of the school district which is responsible for the student's education, whether the transfer is to another school of the same district or not, so long as the transfer was not made for interscholastic activities reasons;

2. the transfer was made to permit the student to take courses or study at a grade level not offered at the school from which he or she transferred; or

3. the transfer was made as the result of an order of a court or of a state or local agency empowered to take custody of children.

D. A school district may establish its own policy regarding intra-district transfer, so long as it is at least as stringent as this transfer rule. The district's policy must be submitted to the Executive Secretary for his approval. Upon approval, the district policy will prevail.

SECTION 9. Eligibility Lists for Sports and Cheerleading

A. A master eligibility list listing all participants in each sport and cheerleading must be prepared on the form provided by the Association for that purpose.

B. A copy of the master eligibility list must be received by the state Executive Secretary and the appropriate regional executive officer before the sixteenth school day of the new semester. The list for sport seasons starting during a semester must be mailed ten days before the first contest of that season.

C. Any additions or deletions to the master eligibility list must be filed as an addendum to the master eligibility list before an individual is allowed to participate.

ARTICLE XIII WAIVERS OF ELIGIBILITY RULES

SECTION 1. Student Request

A student who has been determined to be ineligible to participate in interscholastic activities under one or more of the eligibility rules of Article XII may request a waiver of that rule or rules by the Executive Secretary.

SECTION 2. Request Procedures

A request for a waiver must be directed by the student to the involved member school's officially designated administrator who shall then file a written request stating the full particulars of the case and the reasons felt by the student or the administrator, or both, to warrant the granting of the requested waiver.

SECTION 3. Review by Executive Secretary

Upon receipt of the waiver request, the Executive Secretary shall review it to determine whether any additional information is necessary. If additional information is necessary, the Executive Secretary shall request the administrator to supply it. The Executive Secretary shall render his decision as expeditiously as possible after receiving the waiver request and any additional requested information.

SECTION 4. Guidelines for Consideration

To assist students and member schools to decide whether to request a waiver in specific circumstances, the following apply:

1. If the student is a transfer student, a transfer of eligibility form must be supplied the A.S.A.A. office.

2. Except in unusual circumstances and for good cause shown, the Executive Secretary will not hear a request involving waiving of the standards of eligibility regarding semesters of participation, age standards, semesters of enrollment, or a school administrator's ruling regarding the school citizenship (conduct) of a student.

3. The Executive Secretary will not grant eligibility in any case in which the asserted hardship is the sole result of knowing conduct by the student or his or her parents or guardian which had the effect of causing the hardship.

4. Ignorance of any standard is not sufficient reason for waiving a standard.

ARTICLE XIV A.S.A.A. REGIONS

SECTION 1. Member Schools by Regional Placement

The following shows the placement of schools in the regional associations, effective July 1, 1977:

I	II	III
Aniak	Anchorage Christian School	Barrow
Bethel	Anderson Village	Bob Reeve (Adak)
Bristol Bay	Christian School of Alaska	Cordova
Covenant	Fort Yukon	Delta Junction
Dillingham	Galena	Homer
Kiana	Glennallen	Kodiak
King Cove	Kenny Lake	Palmer
Kivalina	McGrath	Seward
Kongiganak	Nenana	Valdez
Kotzebue	Ninilchik	Wasilla
Nelson Island	Nulato	
Noatak	Susan B. English (Seldovia)	
Nome	Susitna Valley	
Noorvik	Tanana	
Nunapitchuk	Tok	
Selawik	Tri-Valley	
Shishmaref	Tyonek (Bartlett)	
Togiak		
Unalaska		

IV	V	VI
Bartlett	Angoon	Eielson
Chugiak	Haines	Lathrop
Dimond	Hoonah	Monroe
East Anchorage	Hydaburg	North Pole
Kenai	Juneau-Douglas	West Valley
Service	Kake	
West Anchorage	Ketchikan	
	Metlakatla	
	Mt. Edgecumbe	
	Petersburg	
	Prince of Wales (Craig)	
	Sitka	
	Skagway	
	Thorne Bay	
	Wrangell	
	Yakutat (Mt. St. Elias)	

SECTION 2. Changes in Regional Placement

A. Changes in regional placement take effect on July 1 of the following summer, unless all affected schools and the Board of Control agree to an earlier effective date.

B. Changes in regional placement may be initiated by the Board of Control or by request of any member school.

C. Initial regional placement for new member schools will be made by the Board of Control. The Board will give full consideration to a recommendation or request from the new member school. Placement of new member schools becomes effective immediately.

ARTICLE XV TOURNAMENTS

SECTION 1. Handbooks

The Board of Control will cause athletic and activity handbooks of policies and procedures to be developed for their approval. These handbooks will be implemented for the operation of state interscholastic activities.

SECTION 2. Trophy Size

The following sizes are adopted by the Board of Control to give order and meaning for trophies:

State	20-25 inches
Regional	15-20 inches
Invitational	12-18 inches
Individual	10-15 inches

NOTE: Size number 3 figures must be used for individual trophies.

ARTICLE XVI BY-LAW AMENDMENT

SECTION 1. Method

These By-laws may be amended by a simple majority vote of the Board of Control sitting in regular session provided that at least 30 days advance notice has been mailed to the general membership. Additionally, amendments must be approved and adopted by the State Board of Educatio.. under AS 14.07.053 (c) and the Administrative Procedures Act (AS 44.62).

SECTION 2. Effective Date

Unless otherwise specified, amendments to these By-laws take effect 30 days after their filing with the lieutenant governor.

LESLIE D. WELLS, ED.D. 907-272-9045
EXECUTIVE SECRETARY

February 27, 1979

Dear Thelma:

While in Juneau last Friday, I heard that you had been called to the Philippians. May we express our sympathy to you and your family.

I understand that you will be out of the office until next week (March 5th). I will plan to contact you at your office by telephone to see when I might meet with you concerning the attached bill, Senate Bill 163.

Again, we are sorry to hear of the loss of your Mother and send our sincerest regards.

Sincerely,

Les Wells

Juneau, Alaska 99811

Dear Mrs. Buchholdt:

The Board of Control and members of the Alaska School Activities Association request your support for the attached legislation, Senate Bill 163. Basically, it is a clean up bill and contains no request for funds. It will serve to improve the Association's operation and remove some limiting aspects. The full rationale is attached with the proposed bill, the current statute and other background information.

The proposal was drafted by Mr. Ron Lorensen of the Attorney General's office and has the support of the Commissioner of Education. Resolutions of support have been passed by the membership of the State School Boards Association, the Superintendent's Association and the Secondary School Principals Association and are enclosed.

The Association earnestly requests your leadership and assistance in this effort and assures you that it is in the best interest of girl's and boy's school activities and the total educational community. This office stands ready to give full attention to this effort and supply you with any information that may be requested.

I will contact you next week (March 5th) concerning this legislation. I am available to meet with you and/or your committee with 24 hours advance notice.

Sincerely,

Les Wells

RATIONALE FOR ALASKA SCHOOL ACTIVITIES ASSOCIATION

LEGISLATIVE AMENDMENT

The membership and the Board of Control of the Alaska School Activities Association believe that school interscholastic activities programs, including athletics, music, and speech and drama, can best be accomplished by member schools through self organization and control, with a minimum of state supervision and involvement. It is recognized that the Association requires a legal basis and assistance in funding its efforts because of the relatively small number of schools and high costs associated with the coordination and operation of activities in such a large state.

The Association has done an outstanding job of sponsoring activities for Alaskan youth over the past twenty-two years and now believes that the current legislation passed in 1976 should be amended in order that the Association may better function to serve the needs of its membership. Current problems are:

1. There is duplication of effort and unnecessary administrative structure. It is agreed by the Commissioner of Education and the Association that it is unnecessary to operate the Association within the Department of Education. The authority for school participation and the operation of the Association also comes from member schools, their school boards, superintendents and principals.

2. The current statute is restrictive and does not allow each regional association to freely elect their Board of Control member.

3. The operation of the budget and the accounting system should be accomplished at the Association level to facilitate the needs of the organization, i.e., collection of officials' fees, purchase and sale of rule books, funding of officials' workshops, and the operation of state meets, tournaments and events.

The control of the Association lies with school districts and Boards of Education in the approval of organizational structure. The Association is operated by the superintendents of schools, either directly or through their appointed representatives. The revised legislation would foster this local control and would give the Association greater ability to react to the needs of its members.

Adequate funding from the state is essential in order to support the basic operation of the Association office. While other states have adequate income from state tournament receipts to support their total operation and to pay for participants' travel expenses, the small number of Alaskan schools and

(Over)

long distances between communities severely limits tournament gate receipts for such needs.

The Association has applied for funding of $65,000 for Fiscal Year 1980 through the Department of Education. At this time the amount included in their budget as submitted to the legislature is $57,700 for the Alaska School Activities Association. Current year funding is $57,200. This provides funding only for the Association office operation and salaries and represents about 50% of the total financial plan. The other 50% is raised by membership dues and income from officials' fees, rule books and tournaments' income.

Further information concerning the Association is given in the attached "11 Questions About Your Alaska School Activities Association."

Chapter No.

128

AN ACT

Creating the School Activities Association within the Department of Education; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.07 is amended by adding new sections to read:

Sec. 14.07.053. ALASKA SCHOOL ACTIVITIES ASSOCIATION. (a) There is created within the Department of Education the Alaska School Activities Association.

(b) The purposes of the association are to provide for the efficient governing of interscholastic activities through the promotion of those activities and other inter-school contests or programs sanctioned by the association and to assist in the promotion of those other activities and interests as it may from time to time elect.

(c) A public or private school or school district in the state may become a member of the association if it applies for membership. The Department of Education shall make applications available to all public or private schools or school districts in the state.

(d) The governing body of the association shall be the board of control with at least one member from each judicial district on the board of control. A member of the board shall be elected from each regional activities association by the members of that region. The term of office for each member is two years, except that one-half of the members elected to the first elected board shall be elected for one-year terms under regulations prescribed by the commissioner of education.

(e) The board in consultation with the Department of Education shall appoint an executive secretary, prescribe his duties and fix his compensation. He shall serve at the pleasure of the board.

(f) The board of control of the existing Alaska High School Activities Association in office on the effective date of this Act shall serve as the initial board of control for no longer than six months.

(g) The Department of Education shall approve the association's constitution and bylaws to ensure that all regions of the state are treated on an equitable basis and in the best interests of the state.

Sec. 14.07.054. ALASKA SCHOOL ACTIVITIES FUND. (a) The Alaska school activities fund is established within the Department of Education.

(b) The commissioner of education shall review the budget request of the Alaska School Activities Association and request a sum he approves that is equitable to all regions of the state.

(c) School districts and member schools of the Alaska School Activities Association may appropriate money to the fund.

* Sec. 2. This Act takes effect July 1, 1976.

RESOLUTIONS FAVORING SENATE BILL 163

Alaska School Boards Association
Resolution Passed November 12, 1978 #24

ALASKA SCHOOL ACTIVITIES ASSOCIATION

LEGISLATION

WHEREAS, schools in Alaska have ever-increasing activities for students; and

WHEREAS, there is a statewide Alaska School Activities Association; and

WHEREAS, the Alaska School Activities Association is controlled by appointed representatives of the member schools, their administration and their school boards; and

WHEREAS, the Alaska School Activities Association is now tied to the Alaska Department of Education by law; and

WHEREAS, this position leaves the functions of Alaska School Activities Association hindered by further administrative and appeals channels; and

THEREFORE BE IT RESOLVED, that the Association of Alaska School Boards support separation of the Alaska School Activities Association from the Department of Education.

Alaska Association School Administrators
October 1978 - Passed - Resolution #14

Title: Legislation - Alaska School Activities Association

WHEREAS, schools in Alaska have ever increasing activities for students, and

WHEREAS, there is a Statewide Alaska School Activities Association, and

WHEREAS, the Alaska School Activities Association is controlled by appointed representatives of the member schools, their administration and their School Boards

WHEREAS, this position leaves the functions of Alaska School Activities Association hindered by further administrative and appeals channels, and

WHEREAS, the Alaska Commissioner of Education is in favor of a separate State of Alaska funded agency

NOW THEREFORE BE IT RESOLVED, that the Alaska Association of School Administrators support separation of the Alaska School Activities Association from the Department of Education and be established as a separate agency under the draft law attached.

Capitol - Room 112
Pouch V
Juneau, Alaska 99811

Dear Shannon:

Here is a complete set of the materials that we have sent to Mrs. Buchholdt and Committee members concerning Senate Bill 163am. Please note that we are asking them to amend the bill with the proposal by Bob Greene and the Association of Alaska School Boards which is also being recommended by the State Board of Education and our own Association Board of Control.

Please feel free to call me at my home if you have any word on having this bill calendared. My home number is 243-1621 - office number is 272-9045 or 272-9052.

Sure hope we can beat the rush of big bills!

Thanks for any help you can give us.

Sincerely yours,

Leslie D. Wells
Executive Secretary

Anchorage, Alaska 99503

Dear Mrs. Buchholdt:

The Board of Control of the Alaska School Activities Association seeks your support in passage of SB 163am. The bill, as it now sits in your committee, needs to be amended to strengthen the role of local boards of education.

The Association has worked to satisfactorily amend this bill. It has now been approved by the State Board of Education and the Alaska Association of School Boards Committee. The attached amendment is a product of this work. We seek your support of this amendment and place it as part of the bill.

This amendment further clarifies the role of local school district boards of education and the State Board of Education as proposed by them. The Board of Control has directed this office to work with your guidance and counsel to pass this legislation. Senator Hackney has reviewed this amendment and has agreed with its intent.

The amendment continues to accomplish the basic goal of clarifying the Association's role and increase local school district board of education role. It removes the limitations from Region I in Western Alaska of having to have an elected representative on the Board of Control from the second judicial district. Thus, it allows the full membership from this Region to be eligible. It will also allow grant funds to flow through the Commissioner of Education's Office to the Association with proper accounting and reporting.

We ask for your support. Your assistance is vital in moving the bill in this second half of the legislative session. We will be in contact with you by phone after the holiday season to seek your direction.

With warm regards,

Les Wells

Dear Thelma:

As we were working to get out the information to all Committee members, we accidently enclosed the copy of my letter to you of last February 27, 1979, instead of the December 20, 1979, copy. As you see by the enclosed we have corrected this so that they will have full information contained in the letter to you.

May we ask that you calendar this bill just as soon as possible so that we might get out of the way of all the traffic rush that will surely come.

Sincerely yours,

Leslie D. Wells
Executive Secretary

Dear Mr. Miles:

We goofed! Concerning Senate Bill 163am, it was our intention to send you a copy of the December 20, 1979, letter to Mrs. Buchholdt, not the February 27, 1979, introductory letter that we did enclose. Would you please note the attached letter as it states our desires to have Senate Bill 163am amended by your Committee to improve the local school board role.

Again, we ask your support for favorable action as soon as possible. Yes, we would like to beat the rush with this non-money housekeeping bill.

Sincerely yours,

Leslie D. Wells
Executive Secretary

The Honorable Vernon L. Hurlburt
House HESS Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Hurlburt:

This letter concerns Senate Bill 163am which has been setting in the House HESS Committee since last spring. As you may know, we had asked that this bill be held without action as it was necessary for the Activities Association to work with the State Board of Education and the Alaska Association of School Boards to strengthen the concept of local school board control in this bill. This has been accomplished and both of these bodies have given their approval to the changes as outlined in the attached amendment. They support the bill as revised and we now seek favorable action by your committee.

I have been in contact with your Chairman, Mrs. Buchholdt, and have discussed the next steps with her. She agreed that it would be timely for this communication to bring you up to date on the status of this bill. Please note my letter to Mrs. Buchholdt and the complete backup materials.

We ask for your support and assistance in moving this bill favorably through the committee. If you have any questions, please call me at 272-9045.

Sincerely yours,

ASAA Board of Control

SUBJECT: CSSB 227, relating to alcoholism and drug dependence insurance

TO: Senator Mike Colletta

FROM: John B. Chenoweth, Legislative Counsel

I do not want to belabor the explanation you requested of this bill. The one-page summary provided by the insurance division seems more than adequate. I did question Don Koch concerning the distinctions among the several types of policies mentioned or referenced in lines 11-13 of page 1 of the bill, and thought I would share that informaton with you.

The subsection mentioned speaks to

(1) "group insurance policies providing coverage on an expense-incurred basis"; and

(2) "group service or indemnity type contracts issued by a non-profit corporation."

(1) identifies the contracts normally issued by private insurance contracts. Private corporation contracts are typically indemnification contracts, by the terms of which the insurance company agrees to reimburse the insured for covered expenses. These contracts are usually one of three types: the "specified sickness" policy, the "flat rate" policy (paying so much per day for hospitalization for whatever the reason), and the "expense-incurred" policy (reimbursing for certain expenses designated in the policy). This bill addresses only the "expense-incurred" policy, the insurance division spokesman says, for this is the type of policy usually written by companies for the benefit of employees, and is more nearly related to the kind of coverage for hospitalization and outpatient services than other kinds of company-written policies. By the term of the bill, only group policies must provide for the coverage.

(2) above -- the service or indemnity-type policy -- is typically the kind of coverage written by carriers providing direct subscription coverage. In a service contract, payment is made by the carrier to the hospital or health facility (and in some states to physicians) for medical services provided to persons covered. In Alaska, Blue Cross of Washington/Alaska is the principal carrier of service contracts for health care coverage. My understanding of the explanation is that only nonprofit corporations are able to enter into service contract relationships directly with hospitals and health facilities. The reference to "indemnity-type" contracts in this line extends the mandatory coverage for alcoholism and drug dependence to nonprofits who indemnify insureds as well as to those whose business follows the service approach.

I trust this helps to explain the differences in the types of coverage. From the explanation, it appears certain that the intended alcoholism and drug dependence coverage does reach all providing coverage on an expense-incurred basis, including, of course, "profit-seeking" insurance corporations writing this type of coverage.

JBC:nem

PROBLEM

THE PROBLEM IS THAT CURRENTLY IT IS NOT REQUIRED BY LAW THAT ALL GROUP INSURANCE PLANS INCLUDE COVERAGE FOR PERSONS WITH ALCOHOL OR DRUG DEPENDENCY PROBLEMS, YET STATISTICS INDICATE THAT;

1. 5% OF THE POPULATION ARE PROBLEM DRINKING EMPLOYEES
2. 15% OF HEALTH MONEY IS SPENT ON THE PROBLEM DRINKING EMPLOYEE
3. ALCOHOL IS RELATED TO 1/3 OF ALL SUICIDES, 1/2 OF ALL MURDERS 1/2 OF ALL TRAFFIC ACCIDENTS, 1/4 OF ALL ACCIDENTAL DEATHS
4. 70% OF THE PROBLEM DRINKING EMPLOYEES CAN BE REHABILITATED.

COST/BENEFITS

'AN EMPLOYER CAN EXPECT SIGNIFICANT HEALTH INSURANCE COST SAVINGS BY PROVIDING EMPLOYER HEALTH INSURANCE FOR ALCOHOLISM' ::

1. PROBLEM DRINKING EMPLOYEES USE $3 IN HEALTH BENEFITS TO $1 FOR THE AVERAGE EMPLOYEE
2. IF AN EMPLOYER PROVIDED ADEQUATE COVERAGE FOR ALCOHOLISM AND ONLY 20% OF PROBLEM DRINKING EMPLOYEES WERE REHABILITATED, THIS MINIMAL NUMBER ALONE COULD SAVE THE EMPLOYER AROUND 2% OF TOTAL CLAIMS PAID.

:: FROM THE REPORT 'INSURANCE COST SAVINGS DUE TO ADEQUATE ALCOHOLISM HEALTH BENEFIT' FROM THE BLUE CROSS MAGAZINE PERSPECTIVE, WINTER 1978

BRIEF SUMMARY OF CSSSSB 227

" AN ACT RELATING TO INSURANCE FOR ALCOHOLISM AND DRUG DEPENDENCE"

THIS BILL MAKES IT REQUIRED FOR GROUP INSURANCE POLICIES TO PROVIDE COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. THE MINIMUM REQUIREMENTS FOR THIS COVERAGE ARE DESCRIBED IN THE BILL AND INCLUDE:

1. 14 DAYS OF INPATIENT DETOXIFICATION CARE PER YEAR
2. 30 DAYS OF INPATIENT TREATMENT PER YEAR
3. 30 VISITS OF OUTPATIENT TREATMENT PER YEAR

ALL OF THE ABOVE MINIMUM REQUIREMENTS AS OUTLINED IN THE BILL ARE TO BE ADMINISTERED IN A/OR BY A

1. STATE APPROVED TREATMENT FACILITY
2. LICENSED HOSPITAL
3. LICENSED PHYSICIAN
4. STATE CERTIFIED PROFESSIONAL SUBSTANCE ABUSE COUNSELOR

THE INSURANCE AS REQUIRED BY THIS BILL WOULD INCLUDE BENEFITS FOR DEPENDENTS REGARDLESS OF AGE,SEX OR STATE OF ILLNESS.
HOSPITAL MEDICAL SERVICE CORPORATIONS IE. BLUE CROSS (THE LARGEST INSURANCE COMPANY WITH ALASKA) ARE REQUIRED BY THIS BILL TO INCLUDE ALCOHOLISM AND DRUG DEPENDENCE INSURANCE.

THIS BILL INSURES THAT ALL PERSONS COVERED BY A GROUP INSURANCE POLICY ARE COVERED FOR ALCOHOLISM AND DRUG DEPENDENCE WHETHER OR NOT SPECIFIED IN THE POLICY. (THE REASONING FOR THIS IS THAT SOME POLICIES ORIGINATE OUT OF STATE THERFORE THE POLICY MIGHT NOT SPECIFY ALCOHOLISM AND DRUG DEPENDENCE COVERAGE, SO THIS WOULD CHANGE THE LAW MAKING IT AUTOMATIC FOR ALASKAN EMPLOYEES COVERED BY INSURANCE.)

CSSSSB 227 PROVIDES FOR AN EFFECTIVE DATE OF NOVEMBER 1,1979 IN ORDER FOR INSURANCE COMPANIES TO COMPLY WITH THE NEW LEGISLATION.

SECTION ANALYSIS SS for SB 227 FROM THE DIVISION OF I''SURANCE

Sec 1 AS 21.42

Requires that all group health insurance policies issued by insurance companies and all service or indemnity type contracts issued by non-profit corporations such as Blue Cross, provide as a minimum, specified coverages related to alcoholism and drug dependence.

COVERAGES are:

A. not less than 14 days detoxification benefit at a rate equal to other benefits provided in the policy.
B. not less than 30 days inpatient treatment benefit
C. not less than 30 visits to specified outpatient treatment facilities.

Alcoholism and drug dependence coverage is to be provided for all persons covered under the group policy without regard to age, sex, state of illness, or pre-existing condition.

Section 1 also provides key definitions of alcoholism and drug dependence.

Section 2 Amends AS 21.87 347 to provide that Hospital Medical Service Corporations ie. Blue Cross, are also subject to the provisions of AS 21.42 as created by this bill.

Section 3 Specifies that coverage for alcoholism and drug dependence shall automatically apply to all persons covered by a group policy issued for delivery, delivered or renewed in this state after the effective date of the act; whether the policy wording specifically provides coverage or not.

Section 4 Provides for an effective date of November 1, 1979 in order for insurance companies to amend policies and adjust rates prior to the effective date.

Representative Thelma Bucholdt
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Bucholdt:

You are aware that Committee Substitute for Sponsor Substitute for Senate Bill 227 (CSSSSB 227) is before you for consideration.

This bill is designed to combine the resources from providers, business/industry, and third party payors from the private sector in an attempt to combat, through recognized treatment programs, the problem of alcoholism and drug abuse.

The proposed legislation does have a price tag and we estimate this to be between three percent and five percent of existing health insurance premium. However, there is strong evidence that this cost will ultimately be offset by a decrease among the alcoholic population in the incidence of other conditions and a reduction in loss-of-time benefits paid by employers.

Although the concept of mandating benefits is offensive to many, we believe that it is appropriate in this case in order to guarantee the availability of services. In this respect, we would also encourage your support on Committee Substitute for Senate Bill 228 amended (CSSB 228 am).

Overall I believe CSSSSB 227 is a sound piece of legislation and I would urge your support.

Sincerely,

Armand B Hoppel

STATEMENT OF THE HEALTH INSURANCE ASSOCIATION OF AMERICA

SB 227-HEALTH INSURANCE FOR TREATMENT OF
ALCOHOLISM AND DRUG DEPENDENCE

The Health Insurance Association of America (HIAA) is a trade association of 311 insurance companies which write 85% of the health insurance written by insurance companies in the United States.

Our member companies are very much concerned about the problems of alcoholism and drug dependence. We have been leaders in developing insurance coverage for these conditions, and in encouraging the establishment of effective programs for early detection, diagnosis, and treatment. We have learned that an effective program requires much more than just some group insurance coverage. Where an employer does nothing more than furnish the coverage, little use is made of it.

One essential of an effective program is an employer who is willing to encourage the use of the treatment program, and who has specially trained supervisors and a medical department which participate in the program. Forcing unwilling employers to furnish insurance coverage is the worst possible approach.

SB 227, as it passed the Senate, takes this latter approach. It would require all group hospital and medical expense policies to include certain specified benefits for treatment of alcoholism, drunkenness (detoxification), and drug abuse. The required coverage differs in several important respects from coverage now being furnished by insurers, either in Alaska or in other states. We think it would be unwise to take an untested plan of insurance and mandate it for all policies.

The additional costs of this plan are estimated at 3 1/2% to 5% for those policies that already cover alcoholism and drug abuse, and would be considerably higher for one that does not. This will be in addition to the increases in premiums that will be needed to cover the rapidly rising costs of health care covered under other policy benefits.

While additional costs concern everyone, they hurt most employees who have to contribute to the cost of their group insurance, retired persons who pay for coverage under a group plan, and small employers.

Your House HESS committee, at our suggestion, recommended a substitute bill which would not mandate benefits for all policies, but would test the Senate plan of benefits by including it in the State employees insurance program. Blue Cross-Blue Shield is willing to provide the coverage. We think this is the place to test it, where costs and results can be most closely monitored.

This approach will not disrupt our existing plans of alcoholism and drug addiction coverage, which many groups already have and which can be purchased on a voluntary basis.

We urge you to support your HESS committee's substitute bill.

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

HOUSE CS FOR CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 227

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance for alcoholism and drug dependence; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. REQUIRED PROVISION OF COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) Group health insurance policies providing coverage on an expense-incurred basis and group service or indemnity type contracts issued by a nonprofit corporation

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state-approved treatment facility or licensed hospital; payment of institutional and professional benefits shall be equal to and payable as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction;

(B) inpatient treatment coverage benefits for not less than 30 days of benefit each calendar year in a state-approved treatment program; payment of institutional and professional benefits shall be at the same level as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a

licensed physician, state-approved treatment program, or state-certified professional substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting or named condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) The provisions of this section apply to group health insurance contracts and group service or indemnity type contracts issued to an employer, as the policyholder, for the purpose of insuring his employees only if the employer employs 15 or more employees.

(c) In this section,

(1) "alcoholism" means an illness or condition characterized by the habitual lack of self control in the use of alcoholic beverages, or use of alcoholic beverages to the extent that health is substantially impaired or endangered, or social or economic function is substantially disrupted;

(2) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance, but excluding nicotine, caffeine and alcohol;

(3) "state" means any state in the United States and includes the District of Columbia.

* Sec. 2. AS 21.87.340 is amended by adding a new paragraph to read:

(17) AS 21.42.347.

* Sec. 3. The provisions of this Act apply to group policies or contracts delivered, issued for delivery, or renewed in this state after the effective date of this Act. A policy or contract providing coverage for persons in this state delivered, issued for delivery, or renewed after the effective date of this Act shall be considered to provide the minimum coverage required by this Act even if the language of the policy or contract does not so specifically provide.

* Sec. 4. This Act takes effect November 1, 1979.

approval of the Advisory Board on Alcoholism. The department is not required to award all money available under this program, or the full percentages specified in this subsection, when another source of money is available or could reasonably be made available to the applicant.

(d) Money used by the applicant to qualify for state money may be from any source other than the state. The cost of developing an application is not reimbursable from the grant. The value of real property to be used directly in conjunction with the grant may be used in calculating the required amount of community money, as allowed by regulations of the department. (§ 2 ch 101 SLA 1970; am § 1 ch 126 SLA 1975)

Effect of amendment. — The 1975 amendment, in subsection (c), substituted the language beginning "except that in communities" and ending "10 per cent community money" for "for the purpose of providing staff, and in the ratio of 75 per cent state money and 25 per cent community money" in the first sentence, inserted "staff and" in the second sentence, and substituted "percentages" for "percentage" in the third sentence.

Sec. 47.30.477. Grant-in-aid program regulations. The department shall adopt regulations implementing § 475 of this chapter. The regulations shall provide for the method of application, the time for consideration of applications, the processing of applications, the type of record keeping, the requirements for reporting the progress and statistics regarding the program, the notification of the applicant as to the action taken on the application, and the issuance of licenses for facilities receiving grants-in-aid under § 475 of this chapter. The department shall also establish the necessary forms of application and may adopt other regulations considered necessary to meet the requirements of health and safety and the orderly administration of the grant-in-aid program. (§ 2 ch 101 SLA 1970)

Sec. 47.30.480. Judicial notice. The superior courts of this state may take judicial notice of the fact that an alcoholic is suffering from an illness and is in need of proper medical, advisory or rehabilitative treatment. (§ 2 ch 163 SLA 1966)

Sec. 47.30.490. Acceptance of funds. The department may accept on behalf of the state and deposit, apart from other public funds, grants from the federal government or gifts or contributions from other sources to assist in carrying out the purposes of § 470 of this chapter. (§ 2 ch 163 SLA 1966)

Sec. 47.30.500. Definitions. In §§ 470—490 of this chapter

(1) "department" means the Department of Health and Social Services;

(2) "alcoholism" means a condition related to alcohol and concerns a physical compulsion which exists, coupled with a mental obsession;

(3) Repealed by § 2 ch 207 SLA 1972.

Sec. 47.37.270. Definitions. In this chapter

(1) "alcoholic" means a person who habitually lacks self-control in using alcoholic beverages, or uses alcoholic beverages to the extent that his health is substantially impaired or endangered, or his social or economic function is substantially disrupted;

(2) "approved private treatment facility" means a private agency meeting the standards prescribed in § 140(a) of this chapter and approved under § 140(c) of this chapter;

(3) "approved public treatment facility" means a treatment agency operating under the direction and control of the office or providing treatment under this chapter through a contract with the office under § 130(g) of this chapter and meeting the standards prescribed in § 140(a) of this chapter and approved under § 140(c) of this chapter;

(4) "commissioner" means the commissioner of health and social services;

(5) "coordinator" means the coordinator of the office of alcoholism;

(6) "department" means the Department of Health and Social Services;

(7) "emergency service patrol" means a patrol established under § 230 of this chapter;

(8) "incapacitated by alcohol" means a person who is unconscious or has his judgment otherwise so impaired that he is incapable of realizing and making a rational decision with respect to his need for treatment, as evidenced objectively by extreme physical debilitation, physical harm or threats of harm to others or chronic inability to hold regular employment;

(9) "incompetent person" means a person who has been adjudged incompetent by the appropriate court;

(10) "intoxicated person" means a person whose mental or physical functioning is substantially impaired as a result of the use of alcohol;

(11) "office" means the office of alcoholism within the Department of Health and Social Services;

(12) "treatment" means the broad range of emergency, outpatient, intermediate, and inpatient services and care which may be extended to alcoholics and intoxicated persons, including diagnostic evaluation, medical, psychiatric, psychological, and social service care, vocational rehabilitation and career counseling. (§ 1 ch 207 SLA 1972)

Quoted in Peter v. State, Sup. Ct. Op. No. 1112 (File No. 2185), 531 P.2d 1263 (1975).

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

HOUSE CS FOR CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 227 (HESS)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to health insurance for employees in the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 50. ~~AS 21~~ COMPREHENSIVE HEALTH CARE PLANS

Sec. 21.50.010. INDIVIDUAL AND GROUP COMPREHENSIVE HEALTH CARE PLANS. (a) A carrier offering individual health insurance in the state shall, as a condition of transacting health insurance, make an individual comprehensive health care plan described in AS 21.50.040 available to each resident of the state who is not eligible for Medicare. An individual shall have a choice of the low option, the middle option, or the high option deductible described in AS 21.50.020(b). Individual comprehensive health care plans may be made available through participation in the Health Reinsurance Association in accordance with AS 21.50.050 or a residual market association, in accordance with AS 21.50.060. The premium charged for a plan which is not insured by or through the Health Reinsurance Association or ~~another~~ residual market association may not exceed the premium which is applicable through participation in a residual market association. The premium charged for a plan insured by or through the Health Reinsurance Association is the premium established for the particular classification under the Health Reinsurance Association.

(b) A self-insurer whose plan covers three or more employees shall make an individual comprehensive health care plan described in AS 21.50.040 available under a conversion privilege to each insured person

covered by the plan who is a resident of the state, who is not eligible for Medicare, and whose coverage under the self-insured plan ceases as a result of layoff, death, or termination of employment. An individual shall have the choice of the low option, the middle option, or the high option deductible described in AS 21.50.020(b). The individual comprehensive health care plans may be provided through a carrier or through participation in the Health Reinsurance Association under AS 21.50.050. The premium charged for a plan which is not insured by or through the Health Reinsurance Association may not exceed the premium established for that particular classification under the Health Reinsurance Association. The premium charged for a plan which is insured by or through the Health Reinsurance Association is the premium established for that particular classification under the Health Reinsurance Association.

(c) Each carrier offering group health insurance in the state shall, as a condition of transacting health insurance, make a group comprehensive health care plan described in AS 21.50.030 available to every resident employer of three or more eligible employees. An employer shall have the choice of the low option, the middle option, or the high option deductible described in AS 21.50.020(b). Group comprehensive health care plans may be made available to resident employers of between three and 25 eligible employees through participation in the Health Reinsurance Association under AS 21.50.050 or the residual market association under AS 21.50.060. The premium charged for a plan on groups of between three and 25 eligible employees which is not insured by or through the Health Reinsurance Association or a residual market association may not exceed the premium which is applicable through participation in a residual market association. The premium charged for a plan which is insured by or through the Health Reinsurance Association is the premium established for that particular classification under the Health

Reinsurance Association.

(d) ~~Except as provided in AS 21.50.070(c)~~ This chapter does not preclude the right of a carrier to transact another kind of insurance or another kind of health insurance which it is authorized to transact.

(e) This chapter does not require a carrier to make coverage available under a group or individual comprehensive health care plan to a person or group already covered under a plan.

Sec. 21.50.020. MINIMUM STANDARD BENEFITS. (a) Individual and group comprehensive health care plans shall include minimum standard benefits described in this section. Except as provided in (b) and (c) of this section, minimum standard benefits are benefits, including coverage for catastrophic illness, with a lifetime maximum of $1,000,000 per insured person for reasonable charges or, when applicable, the allowance agreed upon between a provider and a carrier for charges actually incurred for the following health care services rendered to an ~~individual~~ insured person covered by a plan for the diagnosis or treatment of nonoccupational disease or injury;

(1) hospital services;

(2) professional services which are rendered by a physician or at his direction, by a registered nurse, other than services for mental or dental conditions;

(3) the diagnosis or treatment of mental conditions as defined in regulations of the director during the year by one or more physicians on other than an inpatient basis or, at their direction, by their staffs of registered nurses up to a yearly maximum benefit of $1,000;

(4) legend drugs requiring a physician's prescription;

(5) services of a skilled nursing facility for not more than 120 days in a calendar year if the services begin within 14 days follow-

ing a confinement of at least three consecutive days in a hospital for the same condition;

(6) home health agency services, as defined in regulations of the director

(A) up to a maximum of 180 visits in a calendar year if the services begin within seven days following confinement in a hospital or skilled nursing facility for at least three consecutive days for the same condition;

(B) in the case of an insured person diagnosed by a physician as terminally ill with a prognosis of six months or less to live, home health agency services may begin even if the thresholds of (A) have not been met;

(7) medical social services not to exceed $200 in a calendar year;

(8) use of radium or other radioactive materials;

(9) oxygen;

(10) anesthetics;

(11) non-dental prosthesis;

(12) rental of durable medical equipment which has no personal use in the absence of the condition for which it is prescribed;

(13) diagnostic x-rays and laboratory tests as defined in regulations of the director;

(14) oral surgery for

(A) excision of partially or completely unerupted impacted teeth; or

(B) excision of a tooth root without the extraction of the entire tooth;

(15) services of a licensed physical therapist, rendered under the direction of a physician;

(16) transportation by a local professional ambulance to the nearest health care institution qualified to treat the illness or injury;

(17) other medically necessary services in the treatment or diagnosis of an illness or injury as defined in regulations of the director;

(18) confinement in a facility established primarily for the treatment of alcoholism and licensed for care of alcoholics by the state, or in a part of a hospital used primarily for such treatment, shall be a covered expense for a period of at least 45 days in a calendar year.

(b) Minimum standard benefits may include one or more of the following provisions:

(1) subject to (3) of this subsection, a plan may require deductibles. The low option deductible is $100 per person, the middle option deductible is $500 per person, and the high option deductible is $1,000 per person. The amount of the deductible may not be greater when a service is rendered on an outpatient basis than when the service is offered on an inpatient basis. Expenses incurred during the last three months of a calendar year and actually applied to an insured person's deductible for the year shall be applied to the insured person's deductible in the following calendar year. The $100 maximum, the $500 maximum and the $1,000 maximum shall be adjusted yearly by the director in regulations adopted by him to correspond with the change in the medical care component of the consumer price index. The base year for the computation is the first full year of operation of the plan.

(2) subject to the provisions of (3) of this subsection a plan shall require a maximum copayment of 20 percent for charges for all types of health care in excess of the deductible and 50 percent for

services listed in (a)(3) of this section in excess of the deductible.

(3) the sum of the deductible and copayments required in a calendar year under an option may not exceed a maximum limit of $1,000 per covered individual or $2,000 per covered family except ~~that~~ O.K. ~~(A)~~ covered expenses incurred after the applicable maximum limit has been reached are paid at the rate of 100 percent; and (B) expenses incurred for treatment of mental and nervous conditions may be paid at the rate of 50 percent under (a)(3) of this section. The $1,000 and $2,000 maximums shall be adjusted yearly to correspond with the change in the medical care component of the consumer price index as adjusted by the commissioner.

(4) the plan may limit lifetime benefits to a maximum of not less than $1,000,000 per insured person.

(5) a plan may not exclude coverage of a preexisting condition unless (A) the condition first manifested itself within the period of six months immediately before the effective date of coverage in a manner that would cause a reasonably prudent person to seek diagnosis, care or treatment; (B) medical advice or treatment was recommended or received within the period of six months immediately before the effective date of coverage; or (C) the condition is pregnancy existing on the effective date of coverage. A policy may not exclude coverage for a loss due to preexisting conditions for a period greater than 12 months following the effective date of coverage. An individual comprehensive health care plan issued as a result of conversion from group health insurance or from a self insured group shall credit the time covered under the group health insurance toward an exclusion.

(c) Plans providing minimum standard benefits need not provide benefits for a charge for

(1) care for an injury or disease either

(A) arising out of and in the course of an employment subject to a workers' compensation or similar law; or

(B) to the extent benefits are payable without regard to fault under a coverage statutorily required to be contained in a motor vehicle or other liability insurance policy or equivalent self-insurance;

(2) treatment for cosmetic purposes other than surgery for the prompt repair of an accidental injury sustained while covered;

(3) travel other than medically necessary transportation as defined in regulations of the director;

(4) private room accommodations to the extent it is in excess of the institution's most common charge for a semiprivate room;

(5) services or articles to the extent that it exceeds the reasonable charge in the locality for the service;

(6) services or articles which are determined not to be medically necessary;

(7) services or articles the provision of which is not within the scope of the license or certificate of the institution or individual rendering the services or articles;

(8) services or articles furnished, paid for or reimbursed directly by or under a law of a government, except as otherwise provided in this chapter;

(9) services or articles for custodial care ~~of~~ or designed primarily to assist an insured person ~~or person's~~ in meeting his activities of daily living;

(10) services which would not have been made if no insurance existed or for which the insured person ~~or person's~~ is not legally obligated to pay;

(11) eyeglasses, contact lenses or hearing aids, or the

fitting of them;

(12) dental care not specifically covered by this chapter; and

(13) services of a registered nurse who ordinarily resides in the insured ~~person or~~ person's home, or who is a member of the insured ~~person or~~ person's family or the family of the spouse.

(d) If an insured person who receives benefits for an injury possesses a right of recovery, a carrier that has paid benefits to or for the insured person is subrogated to a right of recovery to the extent of its payments.

(e) The minimum standard benefits of an individual or group comprehensive health care plan may be satisfied by catastrophic coverage offered in conjunction with basic hospital or medical-surgical plans on an expense-incurred or service basis as approved by the commissioner as providing at least equivalent benefits.

Sec. 21.50.030. ADDITIONAL REQUIREMENTS AND ELIGIBILITY UNDER GROUP COMPREHENSIVE HEALTH CARE PLANS. (a) A group comprehensive health care plan shall cover each regular employee and the dependents of the employee.

(b) A group comprehensive health care plan shall

(1) provide the option to continue coverage under each of the following circumstances until the insured person is eligible for other group insurance:

(A) layoff, leave of absence, or termination of employment, other than as a result of death of the employee, continuation of coverage for the employee and his covered dependents to the end of the 39th week following the day on which the employee lost eligibility to participate in the group;

(B) on the death of the employee, continuation of coverage for the covered dependents of the employee to the end of

the 39th week following the day on which the employee lost eligibility to participate in the group;

(C) during an employee's absence due to illness or injury, continuation of coverage for the employee and his covered dependents during continuance of an illness or injury or for up to 12 months from the beginning of the absence;

(D) on termination of the group plan, coverage for covered individuals who were totally disabled on the date of termination continues without premium payment during the continuance of the disability for a period to 12 calendar months following the calendar month in which the plan was terminated;

(E) any continuation of coverage required by this section except (D) of this paragraph may be subject to the requirement, on the part of the individual whose coverage is to be continued, that the individual contribute that portion of the premium he would have been required to contribute had the employee remained an active covered employee, except that the individual may be required to pay the entire premium at the group rate if coverage is continued under (A) of this paragraph but the employer is not legally obligated by this section to pay the premium if it was not paid timely by the employee.

(2) terminate the coverage of an insured person

(A) as to a child, at the end of the month following the month in which a child marries, ceases to be dependent on the employee or attains the age of 19, whichever occurs first, except that

(i) if the child is a full-time student at an accredited institution, the coverage continues while the child remains unmarried and a full-time student, but not beyond the month following the month in which the child attains the age of 23;

LA-L 20A

the 39th week following the day on which the employee lost eligibility to participate in the group;

(C) during an employee's absence due to illness or injury, continuation of coverage for the employee and his covered dependents during continuance of an illness or injury or for up to 12 months from the beginning of the absence;

(D) on termination of the group plan, coverage for covered individuals who were totally disabled on the date of termination continues without premium payment during the continuance of the disability for a period to 12 calendar months following the calendar month in which the plan was terminated;

(E) any continuation of coverage required by this section except (D) of this paragraph may be subject to the requirement, on the part of the individual whose coverage is to be continued, that the individual contribute that portion of the premium he would have been required to contribute had the employee remained an active covered employee, except that the individual may be required to pay the entire premium at the group rate if coverage is continued under (A) of this paragraph but the employer is not legally obligated by this section to pay the premium if it was not paid timely by the employee.

'2) terminate the coverage of an insured person

(A) as to a child, at the end of the month following the month in which a child marries, ceases to be dependent on the employee or attains the age of 19, whichever occurs first, except that

(i) if the child is a full-time student at an accredited institution, the coverage continues while the child remains unmarried and a full-time student, but not beyond the month following the month in which the child attains the age of 23;

LA-L 20A

shall contain provisions

(1) which obligate the carrier to continue the contract until the earlier of (A) the date on which the individual in whose name the contract was issued first becomes eligible for coverage under Title XVIII of the Social Security Act or under a group comprehensive health care plan or, (B) the plan anniversary date which occurs at least 60 days after the carrier has mailed to the individual at his last address shown on the carrier's records written notice of its decision not to continue coverage on a class basis only; the carrier may reserve the right to adjust premiums by classes in accordance with its experience for policies or contracts not written by or through the Health Reinsurance Association but a premium may not exceed the premium established for the particular class by the Health Reinsurance Association;

(2) which, upon the death of the individual in whose name the contract was issued, permits every other individual covered under the contract to elect, within a period established in the contract, to continue coverage until a time when he would have ceased to be entitled to coverage had the individual in whose name the contract was issued lived; and

(3) under which the benefits payable shall be excess to all other sources of health insurance benefits, including benefits provided under a state or federal law other than Medicaid.

Sec. 21.50.050. HEALTH REINSURANCE ASSOCIATION. (a) There is created as a nonprofit legal entity the Health Reinsurance Association. Each insurer and self insurer doing business in the state, as a condition to its authority to transact the applicable kinds of health insurance defined in AS 21.50.100 is a member of the association. The association shall perform its functions under a plan of operation established and approved under (b) of this section and shall exercise its

powers through a board of directors established under this section.

(b) The board of directors of the association shall consist of seven individuals selected by participating members and subject to approval by the ~~commissioner~~ director. The director shall give notice to all members of the time and place of the organizational meeting to select the first board of directors and to organize the association. In determining voting rights at the meeting a member is entitled to vote in person or proxy. The vote shall be weighted based on the net health insurance premium derived from business in the state in the previous calendar year. If the board of directors is not selected within 60 days after notice of the meeting, the director may appoint the board. In approving or selecting members of the board, the ~~commissioner~~ director may consider whether all members are fairly represented. Members of the board may be reimbursed from the money of the association for expenses incurred by them as members but are not otherwise entitled to compensation by the association for their services.

(c) The board shall submit to the director a plan ~~of~~ of operation for the association to assure the fair, reasonable and equitable administration of the association. The plan of operation becomes effective on approval in writing by the director consistent with the date on which the coverage under this chapter must be made available. The director shall, after notice and hearing, approve the plan of operation if the plan is determined to assure the fair, reasonable and equitable administration of the association and provide for the sharing of association gains or losses on an equitable proportionate basis. If the board fails to submit a suitable plan of operation within 180 days after its appointment or if at any time the board fails to submit suitable amendments to the plan, the director may, after notice and hearing, adopt a plan or amendments to a plan as are necessary to carry out the provisions of

this section. A plan and amendments to a plan continue in force until modified by the director or superseded by a plan submitted by the board and approved by the director. A plan of operation shall, in addition to requirements enumerated in this chapter;

(1) establish procedures for the handling and accounting of assets and money of the association;

(2) establish regular times and places for meetings of the board of directors;

(3) establish procedures for records to be kept of all financial transactions and for the annual fiscal reporting to the director;

(4) establish procedures under which selections for the board of directors shall be made and submitted to the director;

(5) establish procedures to amend, subject to the approval of the director, the plan of operations;

(6) establish procedures for the selection of an administering carrier and set out the powers and duties of the administering carrier;

(7) contain additional provisions for the execution of the powers and duties of the association; and

(8) establish procedures for the advertisement on behalf of all participating carriers of the general availability of the comprehensive coverage under this chapter.

(d) The association has the general power and authority granted under the law of the state to a carrier to transact the kinds of health insurance defined under AS 21.50.100 and in addition, may

(1) enter into contracts necessary to carry out the provisions of this chapter;

(2) sue or be sued and may take legal action necessary to

recover an assessment for, on behalf of, or against a participating member;

(3) take legal action necessary to avoid the payment of improper claims against the association or the coverage provided by or through the association;

(4) establish with respect to health insurance provided by or on behalf of the association, appropriate rates, scales of rates, rate classifications and rating adjustments which may not be unreasonable in relation to the coverage provided and the operational expenses of the association not to exceed the limits set under (e)(3) of this section;

(5) administer a reinsurance program for participating members;

(6) pool risks among participating members;

(7) issue policies of insurance in its own name or on behalf of participating members on an indemnity ~~of~~ or provision of service basis providing the coverage required by this chapter;

(8) administer separate pools, separate accounts or other plans considered appropriate for separate members or groups of members;

(9) operate a combination of plans, pools, reinsurance arrangements or other mechanisms considered appropriate to accomplish the fair and equitable operation of the association;

(10) set limits on the amounts of reinsurance which may be ceded to the association by its members; and

(11) appoint from among participating members appropriate committees necessary to provide assistance in the operation of the association.

(e) Each member of the association shall participate in the association under the following provisions of this subsection:

(1) A participating member shall determine the particular

risks it elects to have written by or through the association.

(2) A member shall designate which of the following classes of risks it shall underwrite in the state, from which it may elect to reinsure selected risks:

(A) individual, excluding group conversion;

(B) individual, including group conversion; and

(C) groups of between three and 25 employees or members.

(3) A member or employer may not select out individual lives from an employer group to be insured by or through the association. Members electing to administer risks which are insured by or through the association shall comply with the benefit determination guidelines and the accounting procedures established by the association. A risk insured by or through the association cannot be withdrawn by the participating member except under rules established by the association.

(4) Rates for coverage issued by or through the association may not be excessive, inadequate or unfairly discriminatory. Separate scales of premium rates based on age apply for individual risks and group risks. Group rates may be adjusted for area variations in provider costs but individual rates may not be adjusted for area variations in provider costs. Premium rates shall consider the substantial extra morbidity and administrative expenses for association risks, reimbursement or reasonable expenses incurred for the writing of association risks and the level of rates charged by insurers for groups of 10 lives. The rate for a given classification or group may not be more than 125 percent of the average group rate charged for the classification or group at standard risk with similar characteristics under a policy covering 10 lives. All rates shall be promulgated by the association through an actuarial committee consisting of five persons who are members of the American Academy of Actuaries, shall be filed

with the director and may be disapproved within 60 days from the filing if the director determines that the rates are excessive, inadequate, or unfairly discriminatory.

(f) Following the close of a fiscal year, an administering carrier shall determine the net premiums, reinsurance premiums less administrative expense allowance, the expense of administration pertaining to the reinsurance operations of the association and the incurred losses for the year. A net loss shall be assessed to participating members of the association in proportion to their respective shares of the total health insurance premiums earned in the state during the calendar year, or with paid losses in the year, coinciding with or ending during the fiscal year of the association or on another equitable basis provided in the plan of operations. For self-insured members of the association, health insurance premiums earned shall be established by dividing the amount of paid health losses for the applicable period by 85 percent. Net gains, if any, shall be held at interest to offset future losses or allocated to reduce future premiums.

(g) A net loss to the association represented by the excess of it actual expenses of administering policies issued by the association ove the applicable expense allowance shall be separately assessed to participating members who do not elect to administer their plans. Assessments shall be on an equitable formula established by the board.

(h) The association shall conduct periodic audits to assure the general accuracy of the financial data submitted to the association and the association shall have an annual audit of its operations by an independent certified public accountant. The annual audit shall be filed with the director for his review and the association is subject examination by the director under AS 21.06.

(i) Policy forms issued by the association shall conform to prot

type forms developed by the association and to the requirements of this chapter and shall be approved by the director. The director may disapprove a form if it contains a provision which is unfair or deceptive or which encourages misrepresentation of the policy.

(j) The association may not issue comprehensive health care plan coverage for a person who is covered under an individual or group comprehensive health care plan, who is eligible for Medicare, or who is not a resident of this state.

(k) Benefits payable under a comprehensive health care plan insured by or reinsured through the association are paid net of all other health insurance benefits paid or payable through another source and net of all health insurance coverages provided by or under another state or federal law including Title XVIII of the Social Security Act, Medicare but not including Medicaid.

(l) No liability and no claim arises against a carrier or its agents or its employees, the association or its agents or its employees or the residual market mechanism established under AS 21.50.060 or its agents or its employees, or the director for any action taken by the director in the performance of his duties under this chapter. This subsection does not apply to the obligations of a carrier, a self-insurer, the association or the residual market mechanism for payment of benefits provided under a comprehensive health care plan.

(m) A carrier may credit an assessment paid to the association under (f) of this section against its income tax payable under AS 43.20 or its premium tax payable under this title for the year in which the assessment was paid. If a carrier's total assessment exceeds its tax liability for the year, the commissioner of revenue shall directly reimburse the carrier in the amount of the excess.

Sec. 21.50.060. HOSPITAL AND MEDICAL SERVICE CORPORATIONS;

RESIDUAL MARKET MECHANISM; DIRECTOR'S POWERS CONCERNING MECHANISMS. (a) A hospital ~~and~~ or medical service corporation may elect to meet the obligations of AS 21.50.010 by participating in the association either as a full member or by making comprehensive health care plans available directly through a subscriber contract or combination of contracts or by forming a separate residual market mechanism similar to the association.

(b) If a hospital ~~and~~ or medical service corporation forms a separate residual market mechanism, the director has the same regulatory powers over the residual market mechanism as he has over the association and the residual market mechanism has the same powers and duties as the association. Rating classifications under a residual market mechanism established under this section need not be the same as classifications established under the association but rates established by the residual market mechanism shall be approved by the director. The director may adopt regulations to implement this section.

(c) If a hospital ~~and~~ or medical service corporation does not participate in the association, it is required to make an individual comprehensive health care plan available to every resident of the state who is not eligible for Medicare and whose coverage under a group or individual contract issued by the hospital or medical service corporation has terminated. The coverage may be made available through a separate residual market mechanism established under this section.

Sec. 21.50.070. POWERS OF DIRECTOR. The director may

(1) formulate general policies to advance the purposes of AS 21.50.010 - 21.50.060 and may adopt regulations under the Administrative Procedure Act (AS 44.62) to carry out the provisions of AS 21.50.010 -21.50.060;

(2) adopt regulations upgrading minimum benefit standards under AS 21.50.020 - 21.50.040 as may be appropriate due to inflation or

changes in the prevailing standards of the industry;

(3) supervise the establishment of the association under AS 21.-50.050 or a residual market mechanism under AS 21.50.060;

(4) approve the selection of the administering carrier by the association and approve the association's contract with the administering carrier including the comprehensive health care plan coverage and the premiums to be charged;

(5) adopt by regulation reasonable limits on administrative expenses of the administering carrier which may be paid from comprehensive health care plan premiums, and minimum standards for the proportion of comprehensive health care plan premiums to be paid out in claims;

(6) appoint advisory committees;

(7) conduct audits to assure the general accuracy of the financial data submitted by the administering carrier and the association;

(8) contract with the federal government or with another unit of government to ensure coordination of the comprehensive health care plan with other governmental assistance programs;

(9) undertake directly or through studies or demonstrations programs to develop awareness of the benefits of AS 21.50.010 - 21.50.060 so that residents of the state may avail themselves of the health care benefits provided by these sections.

Sec. 21.50.080. APPLICATION TO NEW OR RENEWED GROUP HEALTH POLICIES AND CONTRACTS (a) Group health policies or contracts delivered or issued for delivery or renewal in the state on or after January 1, 1981, shall, subject to the provisions of (c) of this section, contain the provisions established under AS 21.50.030(b).

(b) The commissioner shall within 180 days after January 1, 1981,

adopt regulations under the Administrative Procedure Act (AS 44.62) covering group coverage discontinuance and replacement.

(c) Nothing in this section alters or impairs existing group policies or contracts which have been established under an agreement which resulted from collective bargaining and the provisions required by this section are effective on the next regular renewal and completion of the collective bargaining agreement.

Sec. 21.50.090. PREMIUM SUPPLEMENTATION. (a) A resident employer who employs 10 or less regular employees who are provided with health insurance coverage as an employee benefit is entitled to premium supplementation if

(1) the employer's share of the cost of providing the coverage exceeds 1.5 percent of the total wages payable to regular employees; and

(2) the amount of the excess under (1) of this subsection is greater than four percent of the employer's income before taxes directly attributable to the business in which the regular employees are employed.

(b) The amount of the supplementation shall be 80 percent of that portion of the employer's share of the premium cost which exceeds the limits specified in (a)(2) of this section.

(c) An employer entitled to premium supplementation may file a claim in the manner provided by regulation of the commissioner. The employer has the burden of establishing his entitlement.

Sec. 21.50.200. DEFINITIONS. In this chapter,

(1) "association" means the Health Reinsurance Association established under AS 21.50.050;

(2) "carrier" means an insurer, hospital service corporation or medical service corporation, or fraternal benefit society;

(3) "commissioner" means the commissioner of commerce and economic development;

(4) "dependent" means

(A) a spouse;

(B) an unmarried child under the age of 19 years;

(C) a child under the age of 23 years who is a full-time student and is financially dependent on the parent;

(D) a child of any age who by reason of mental retardation or physical handicap is incapable of self-sustaining employment and is chiefly dependent on the parent for support and maintenance; and

(E) a household member who is financially dependent on the primary insured;

(5) "director" means the director of the division of insurance in the Department of Commerce and Economic Development;

(6) "family" means the primary insured and his covered dependents;

(7) "health insurance"

(A) means hospital and medical expenses incurred policies written on a direct basis, nonprofit service plan contracts, and self-insured or self-funded employee health benefit plans;

(B) does not include accident only policies, disability income policies or casualty insurance coverages subject to regulation under AS 21.39;

(8) "home health agency" has the same meaning as "home health agency" as defined in 42 U.S.C., sec. 1395x;

(9) "hospital" has the same meaning as "hospital" as defined in 42 U.S.C., sec. 1395x;

(10) "income directly attributable to the business"

(A) means gross profits from the business less deductions for

(i) compensation of officers;

(ii) salaries and wages, except wages paid by an individual proprietor to himself;

(iii) repairs;

(iv) taxes on business and business property;

(v) business advertising;

(vi) amounts contributed to employee benefit plans;

(vii) interest on business indebtedness;

(viii) rent on business property; and

(ix) other expenses necessary for the current conduct of business;

(B) does not mean

(i) bad debts;

(ii) contributions or gifts, other than those listed under (A)(vi) of this paragraph;

(iii) amortization and depreciation; or

(iv) losses by fire, storm, casualty, or theft;

(C) means zero for organizations with a nonprofit tax status under ~~section~~ O.K. 501(c) of the Internal Revenue Code;

(11) "insurer" means an insurance company licensed to transact accident and health insurance business in the state;

(12) "medical social services" means services rendered, under the direction of a physician by a qualified social worker holding a master's degree from an accredited school of social work, including but not limited to

(A) assessment of the social, psychological and family

4-L 20A

(B) appropriate action and utilization of community resources to assist in resolving such problems;

(C) participation in the developments of the treatments for ~~the~~ the insured person;

problems related to or arising out of an insured person's illness and treatment; (B) see above

(13) "physician" means a licensed practitioner of medicine, osteophathy, acupuncture, chiropractic, podiatry, psychology, and, for purposes of oral surgery only, a doctor of dental surgery or a doctor of medical dentistry;

(14) "psychologist" means a person who is licensed or certified as a clinical psychologist and has a doctoral degree and at least two years of supervised experience in clinical psychology in a licensed hospital or mental health center;

(15) "regular employee" means, with respect to an employer, an employee who either is a full-time employee, or who is expected to work at least 20 hours a week for at least 26 weeks during the next 12 months or who has actually worked at least 20 hours a week for at least 26 weeks in a continuous 12-month period;

(16) 'resident employer"

(A) means a person, partnership, association, trust, estate, corporation, whether foreign or domestic or the legal representative, trustee in bankruptcy or receiver or trustee of one of these, or the legal representative of a deceased person, including the state and a municipality of the state which has in its employ one or more individuals during a calendar year;

(B) refers only to an employer with a majority of employees employed in the state;

(17) "self-insurer"

(A) means an employer or an employee welfare benefit fund or plan which provides payment for or reimbursement of the whole or a part of the cost of covered hospital or medical expenses for covered individuals;

(B) does not include an employee welfare benefit fund or plan established before January 1, 1981, by an organization which is exempt from federal income taxes under the provisions of sec. 501 of the Internal Revenue Code and amendments to it except an organization described in section 501(c)(15) of the Internal Revenue Code;

(18) "skilled nursing facility" has the same meaning as "skilled nursing facility" under 42 U.S.C., sec. 1395x;

(19) "totally disabled" means the inability of an employee because of an injury or disease to perform the duties of an occupation for which he is suited by reason of education, training or experience, and, with respect to a dependent, the inability of the dependent because of an injury or disease to engage in substantially all of the normal activities of persons of the same age and sex in good health.

* Sec. 2. AS 39.30.090(1) is amended to read:

(1) A group insurance policy shall provide one or more of the following benefits: life insurance, accidental death and dismemberment insurance, weekly indemnity insurance, hospital expense insurance, surgical expense insurance, dental expense insurance, audio-visual insurance. alcoholism and drug dependency insurance, or other medical care insurance.

* Sec. 3. AS 39.30 is amended by adding a new section to read:

Sec. 39.30.092. COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) The group insurance policy required by AS 39.30.090(1)

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state-approved treatment facility or licensed hospital; payment of institutional and profes-

sional benefits shall be equal to and payable as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction;

(B) inpatient treatment coverage benefits for not less than 30 days of benefit each calendar year in a state-approved treatment program; payment of institutional and professional benefits shall be at the same level as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a licensed physician, state-approved treatment program, or state-certified professional substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting or named condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) The provisions of this section apply to group health insurance contracts and group service or indemnity type contracts issued to provide coverage for employees of the state and may apply to contracts for the benefit of employees of other participating governmental units only if the governing body of the governmental unit elects to have the provi-

sions apply.

(c) In this section,

(1) "alcoholism" means an illness or condition characterized by the habitual lack of self control in the use of alcoholic beverages, or use of alcoholic beverages to the extent that health is substantially

(B) appropriate action and utilization of community resources to assist in resolving such problems;

(C) participation in the development of treatment for the insured person;

impaired or endangered, or social or economic function is substantially disrupted;

(2) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance, but excluding nicotine, caffeine and alcohol;

(3) "state" means any state in the United States and includes the District of Columbia.

* Sec. 4. AS 39.30.100 is amended to read:

Sec. 39.30.100. DEFINITIONS. In AS 39.30.090 - 39.30.100 [AS 39.-30.090]

(1) "eligible employee" means

(A) an employee who has served in permanent full-time or part-time employment with the same governmental unit for 30 days or more, except an emergency or temporary employee, and

(B) an elected or appointed official of a governmental unit, effective upon taking the oath of office;

(2) "governmental unit" means the state, a borough, municipal corporation, or other political subdivision of the state, and the North Pacific Fishery Management Council;

(3) "insurance", "insurance carrier" and "insurance policy" include health care services, health care service contractors and contracts.

* Sec. 5. The provisions of secs. 2 - 4 of this Act apply to group policies or contracts delivered, issued for delivery, or renewed in this state after the effective date of this Act. A policy or contract providing coverage for eligible employees in this state delivered, issued for delivery, or renewed after the effective date of this Act shall be considered to provide the minimum coverage required by this Act even if the language of the policy or contract does not so specifically provide.

* Sec. 6. AS 47.05 is amended by adding new sections to read:

Sec. 47.05.070. MEDICAL ASSISTANCE BY INSURANCE OR SERVICE CONTRACTS. (a) The commissioner shall use available medical assistance funds to purchase and pay premiums on policies of insurance or pay the expenses on health maintenance organization service contracts or medical or hospital service contracts that provide one or more ~~the~~ of the medical services available under state medical assistance programs.

(b) The policy of insurance or the contract must by its terms guarantee

(1) to provide the medical services allowed under Alaska law;

(2) to provide medical services under policies of insurance or contracts in compliance with applicable laws and regulations;

(3) to provide the statistical data, records, and reports relating to the provision, administration, and costs of providing medical services as required by the commissioner.

Sec. 47.05.080. CONTRACTS WITH DIRECT PROVIDERS OF CARE AND SERVICE. (a) The commissioner may enter into nonexclusive contracts under which funds available for medical assistance may be administered and disbursed by the contractor to direct providers of medical and

remedial care and services available under medical assistance for services rendered and supplies furnished by them.

(b) A contract under this section shall

(1) oblige the contractor to make payments under the contract promptly and not later than 30 days after receipt of the proper evidence of the claim; and

(2) provide data, records, and reports required by the commissioner.

Sec. 47.05.090. IMPLEMENTATION. The commissioner shall implement the provisions of AS 47.05.070 - 47.05.100 when the commissioner determines that comparable benefits are available at equal or less cost than direct payments by the department to the providers of medical assistance.

Sec. 47.05.100. INTERIM PAYMENT. The department may make an interim payment before receipt of billing for service to providers who serve a large volume of state medical assistance clients under regulations of the department.

Sec. 47.05.110. INTEREST ON LATE PAYMENTS. When presented by a provider of medical services with a clean claim, the state shall pay

(1) interest at the rate of one percent per month when payment is delayed more than 30 days after presentation of the clean claim;

(2) interest at the rate of two percent per month when payment is delayed more than 90 days after presentation of the clean claim; and

(3) a full months interest entitlement if the claim is not paid by the 15th day of a calendar month.

Sec. 47.05.120. DEFINITIONS. In AS 47.05.070 - 47.05.120

(1) "clean claim" means a claim for payment which can be processed without obtaining additional information from the provider of

the service or from a third party; it includes a claim with errors originating in the department's claims processing system, but does not include claims from a provider who is under investigation for fraud or abuse, or a claim under review for medical necessity;

(2) "commissioner" means the commissioner of health and social services;

(3) "department" means the Department of Health and Social Services;

(4) "medical assistance" means Medicaid (AS 47.07), general relief medical (AS 47.25.120), catastrophic illness (AS 47.08), and crippled children's and maternal and child health programs (AS 18.05.-010).

* Sec. 7. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act allows optional medical coverage qualifying for federal financial participation are eligible for medical assistance.

* Sec. 8. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include services eligible for federal financial participation under Title XIX of the federal Social Services Act.

* Sec. 9. AS 47.25.120 is amended to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. Financial assistance may be given under AS 47.25.120 - 47.25.300 [, SO FAR AS PRACTICABLE UNDER THE CONDITIONS IN THIS STATE,] to

(1) a needy person who is eligible under the regulations of the department; and

(2) a medically needy person whose income is less than the medically needy income standard or who has incurred medical expenses

which equal or exceed the difference between the person's monthly income and the medically needy income standard; the medically needy income standard is 150 percent of the current Federal Community Services Administration poverty income guidelines for Alaska (45 C.F.R., sec. 1060.2).

* Sec. 10. AS 47.07.020(d) is repealed.

* Sec. 11. Sections 1, 7 and 9 of this Act take effect January 1, 1981.

* Sec. 12. Sections 2 - 6, of this Act take effect July 1, 1980.

Here's a quiz on "drinking and working" . . . and the answers:

Questions	Answers
• What percentage of an employee population are problem drinkers?	5%
• How many more company dollars in health benefits does a problem-drinking employee use than the average employee uses?	3 to 1
• What share of employee health claims are by problem drinkers?	15%
• What can be done about problem-drinking employees?	Rehabilitation
• What percentage of problem-drinkers can an employer expect to rehabilitate successfully?	70%
• At what cost to the employer?	None?

Large employers such as Scovill, Economics Laboratory, Illinois Bell, the Philadelphia Fire Department and Kennecott Copper have an edge on most readers. They knew the answers even before PERSPECTIVE provided them. That's because these five employers helped contribute the data.

But Kenneth Sarvis, insurance consultant to the Florida Department of Health & Rehabilitative Services, brought the facts into focus.

His report, INSURANCE COST SAVINGS DUE TO AN ADEQUATE ALCOHOLISM HEALTH BENEFIT, makes four major contentions borne out by employer data:

1. "Problem drinkers utilize a disproportionately high portion of health benefits."
2. "There is a high rehabilitation rate for problem-drinking employees."
3. "There is a significant reduction in the utilization of health and sickness benefits by rehabilitated problem drinkers."
4. "An employer can expect significant health insurance cost savings by providing employees health insurance for alcoholism."

Sarvis' data to support each of these contentions are considerable.

THE TOLL . . .

The U.S. Department of Health, Education & Welfare has issued a report on alcohol abuse. It says:

- An estimated 10 million Americans are either problem drinkers or alcoholics.
- Drinking may be to blame for as many as 205,000 deaths a year.
- The economic toll from alcohol problems was about $43 billion in 1975 (lost production, medical bills, other expenses).
- Alcohol may be involved in: up to one-third of all suicides, half of all murders, half of all traffic deaths, one-fourth of all other accidental deaths.
- Alcohol is "indisputably involved" in causing cancer.

But . . .

- Programs to treat problem drinkers and alcoholics increased from 500 in 1973 to nearly 2,400 in 1977.

CONTENTION NO. 1:

"Problem drinkers utilize a disproportionately high portion of health benefits."

Sarvis says:

"Employee health is considerably affected by problem drinking."

He cites work done by Dr. Wilton Maxw , studying a sample of employees with sickness or injury absence of eight days or more for which sickness payment was made. Each eight-day absence is called a "case" in the following tabulation:

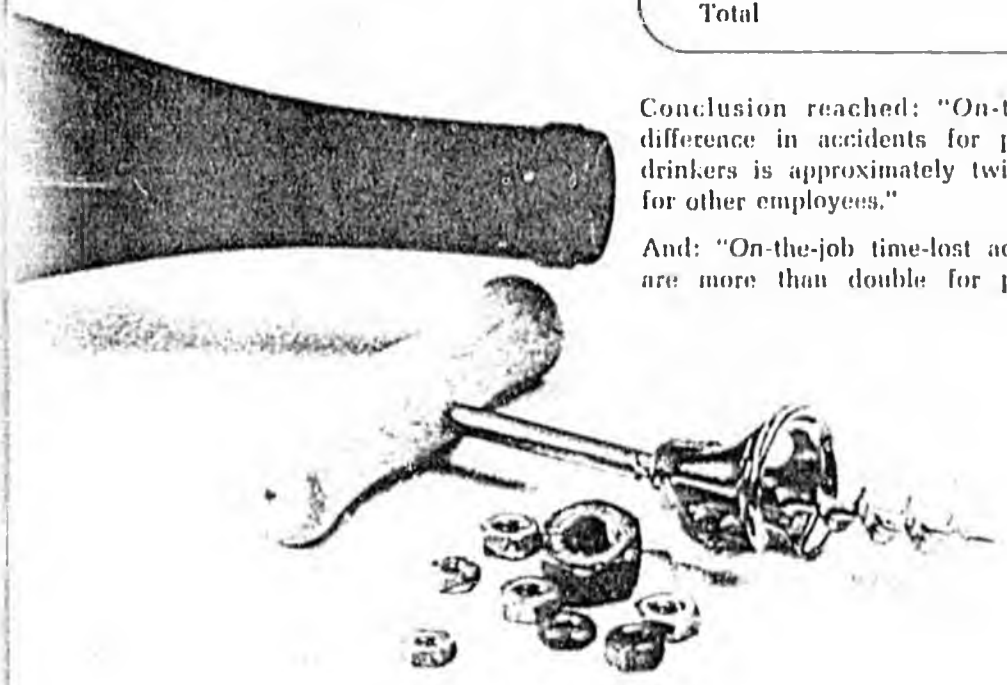
Description	Problem Group	Control Group
Number of cases	364	149
Average number of cases per employee	7.6	3.1
Total days absent	11,672	4,648
Average number of days absent per employee	243.2	96.8
Total sickness payments	$108,495	$36,862
Average sickness payment per employee	$ 2,260	$ 768

Conclusion reached: *"The average and total sickness payments indicate alcoholics cost employers three times the sickness payments of other employees."*

Moreover: "The problem group's total days absent is 2½ times that of the control group, indicating a tremendous loss in production time to the employer."

Maxwell, a PhD in sociology, also studied how frequently accidents happened to members of the two study groups:

Accident Class	Problem Group	Control Group
On job (no time lost)	29	16.0
On job (time lost)	26	11.5
Off job (eight days or more lost time)	44	0.0
Total	99	27.5



Conclusion reached: "*On*-the-job difference in accidents for problem drinkers is approximately twice that for other employees."

And: "*On*-the-job time-lost accidents are more than double for problem drinkers, indicating that the type of accident attributable to problem drinkers is more costly to the employee than other non-alcohol related accidents."

Worst of all: "*Off*-the-job accidents numbered 44 for the problem-drinking group, zero for the control group."

Overall: "The problem-drinker accident rate was 3.6 times that of other employees, a distinctive cost differential to the employer."

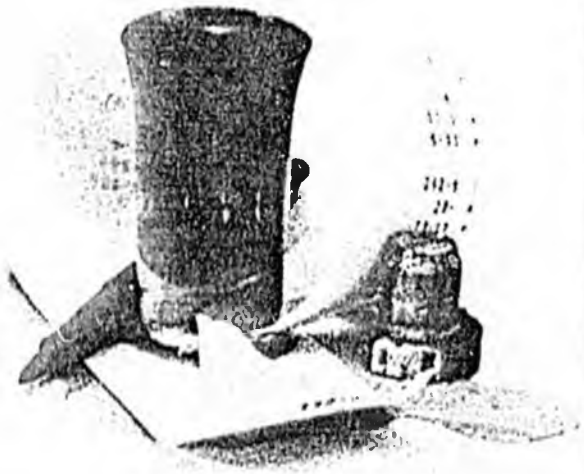
Maxwell explored the question of "how many hospital stays are attributable to problem drinking?" He cites the work of S. Pell and C.A. D'Alonzo in establishing frequency rates by type of illness or injury:

Selected Digestive Disorders		No. of Absences	Frequency Rate %
Gastrointestinal upsets	A	167	21.9
	C	66	7.6
Cirrhosis of liver	A	6	0.8
	C	0	0.0
Peptic ulcer	A	18	2.4
	C	13	1.5
Hernia	A	11	1.4
	C	4	0.5
Gall bladder disease	A	6	0.8
	C	7	0.8
Other digestive disorders	A	7	0.9
	C	13	1.5
Total	A	215	28.1
	C	103	11.9

A = Alcoholics C = Controls

Selected Respiratory Infections		No. of Absences	Frequency Rate %
Upper respiratory infection	A	173	22.6
	C	116	13.4
Influenza	A	71	9.3
	C	51	5.9
Bronchitis	A	35	4.6
	C	24	2.8
Pneumonia	A	15	2.0
	C	4	0.5
Total	A	294	38.5
	C	194	22.5

Selected Musculoskeletal Disorders		No. of Absences	Frequency Rate %
Arthritis	A	18	2.4
	C	5	0.6
Rheumatism	A	15	2.0
	C	7	0.8
Low back disorders, cause unspecified	A	22	2.9
	C	7	0.8
Bursitis	A	17	2.2
	C	5	0.6
Disc disorders	A	14	1.8
	C	2	0.2
Muscular strain	A	16	2.1
	C	6	0.7
Other	A	9	1.2
	C	14	1.6
Total	A	111	14.5
	C	46	5.3



Conclusion reached: "*The frequency rate of alcoholics is about three times that of other employees* for digestive and musculoskeletal disorders, and about two times that of other employees for respiratory infections," replicating other findings.

Sarvis comments: "These and similar studies indicate that problem-drinking employees are sick people who use a disproportionately high portion of employee group health insurance, contributing to high group insurance costs."

CONTENTIONS NO. 2 & 3:

"There is a high rehabilitation rate for problem-drinking employees."

"There is a significant reduction in the utilization of health & sickness benefits by rehabilitated problem drinkers."

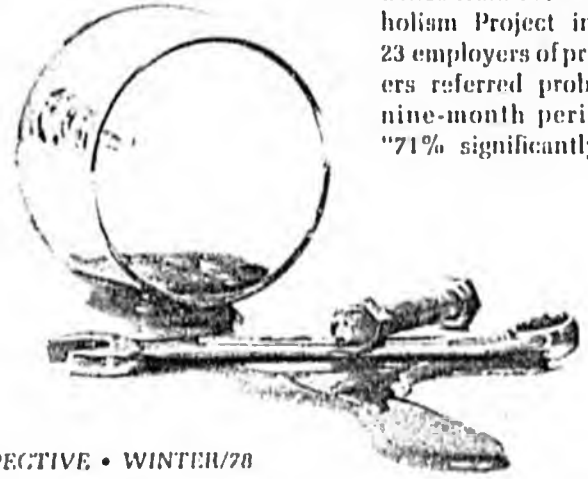
Sarvis finds "the success rate for rehabilitation of problem-drinking employees" to be "very high," indicating that "the possibility of job loss is an incentive for employees to seek rehabilitation."

He also finds that, "after problem drinkers are rehabilitated, there is a great reduction in their utilization of health and sickness benefits," thereby "significantly decreasing the cost of group health insurance."

He cites five employers who have proven track records at rehabilitating problem-drinking employees through a formal mechanism for early identification and referral:

Employer	# of Employees	"Processed"	% Rehabilitated	Savings
Scovill Mfg. Co. Waterbury, Conn.	6,500	180 in 3 years	78%	$186,550
Economics Laboratory, Inc. St. Paul, Minn.	3,500	N/I	80% for employees; 50% for dependents	Not indicated; but treatment costs were cut as much as 65% by using non-hospital facilities, such as alcoholism treatment centers.
Illinois Bell Telephone Co. Chicago, Ill.	N/I	402 in 5 years	72%	46% reduction in sickness disability and "a tremendous decrease in utilization of insurance plans."
Philadelphia Fire Department	3,410	N/I	N/I	55% decrease in sick leave for referred cases; 67% reduction in injuries; "a significant decrease in health insurance utilization."
Kennecott Copper Corp. New York City	N/I	N/I	N/I	After a year, costs for hospital, medical and surgical care were reduced 55%; alcoholics vs. other employees cost 5-to-1 for all sickness & accident activity, 3-to-1 for hospital, medical & surgical care.

N/I = not indicated



Sarvis also cites equally pointed evidence from the DePaul Industrial Alcoholism Project in Milwaukee, where 23 employers of primarily factory workers referred problem-drinking over a nine-month period. Their findings: "71% significantly improved, 46% of them reporting total abstinence and 26% 'essential' abstinence."

The consultant concludes that "*an employer can expect a high rehabilitation success rate for problem-drinking employees* — 70% is average — and a tremendous decrease in the utilization of health benefits." Savings are "maximized when an employer couples a formal mechanism for early identification and referral with appropriate health insurance coverage for alcoholism."

CONTENTION NO. 4:

"An employer can expect significant health insurance cost savings by providing employees health insurance for alcoholism."

Sarvis quotes some key numbers:

- *"5% of an employee population are problem drinkers."* (Source: National Institute on Alcohol Abuse & Alcoholism)
- *"A problem-drinking employee uses $3 in health benefits to $1 for the average employee."* (Source: Dr. Maxwell)
- "An employer can therefore estimate that problem-drinking employees are responsible for 15% of claims paid *annually*" . . . by multiplying the 5% times the 3 in the 3-to-1 ratio.
- If all problem drinkers could be rehabilitated and it could then be "assumed that alcoholism did not exist in an employee group, the employer would pay 10% less in claims" . . . reducing the 15% above by the difference between the numbers in the 3-to-1 ratio to arrive at the use by non-problem-drinkers.
- "It is impractical to believe that 100% of such savings could be achieved. Some can. If an employer provided adequate coverage for alcoholism and only 20% of problem-drinking employees were rehabilitated, this minimal number alone could save the employer around 2% of total claims paid" . . . multiplying the maximum 10% savings by the 20% rehabilitated.

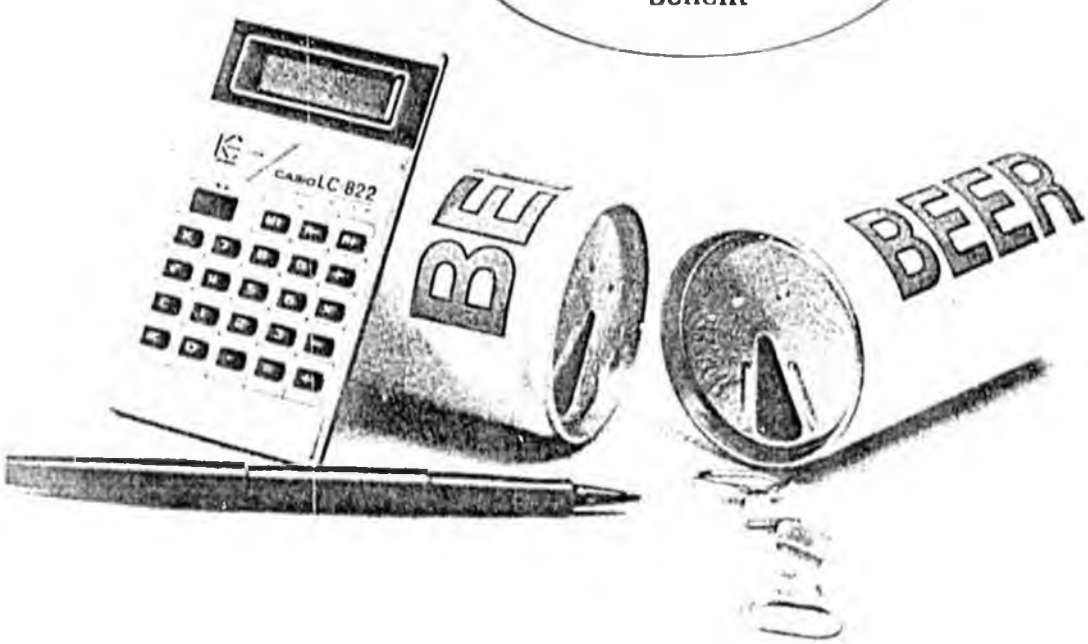
Sarvis then addresses four types of employer situations and presents evidence of savings from each.

A.
With an employee assistance program, *and* an alcoholism health benefit

B.
With an employee assistance program *but not* an alcoholism health benefit

C.
With an alcoholism health benefit, *but not* an employee assistance program

D.
With *neither* an employee assistance program nor an alcoholism health benefit



PROBLEM DRINKERS

Savings depend on the use of the following data:

Expected REDUCTION IN CLAIMS PAYMENTS As A Percent Of Total Claims Payments*

Problem Drinkers Referred As Percent Of Total Employee Population	Percent Increase In Total Premiums Due To Cost Of Alcoholism Benefit				
	0.5%	1.0%	1.5%	2.0%	2.5%
1.0%	1.0%	0.5%	0.1%	—	—
2.0%	2.4%	1.9%	1.4%	1.0%	0.6%
3.0%	3.7%	3.2%	2.8%	2.3%	1.9%
4.0%	5.1%	4.6%	4.2%	3.7%	3.3%
5.0%	6.5%	6.0%	5.6%	5.1%	4.7%

* Problem-drinking employees should have been rehabilitated for at least one year to achieve the expected reduction in claims payments.

Expected REDUCTION IN PREMIUMS As A Percent Of Total Premiums*

Problem Drinkers Referred As Percent Of Total Employee Population	Percent Increase In Total Premiums Due To Cost Of Alcoholism Benefit				
	0.5%	1.0%	1.5%	2.0%	2.5%
1.0%	0.8%	0.3%	—	—	—
2.0%	2.2%	1.7%	1.1%	0.6%	0.0%
3.0%	3.5%	3.0%	2.4%	1.9%	1.3%
4.0%	4.9%	4.4%	3.8%	3.3%	2.7%
5.0%	6.3%	5.8%	5.2%	4.7%	4.1%

* An actual reduction in total premiums from one year to the next could be expected only if overall insurance program costs did not increase.

Here's what the tables tell an employer with 1,000 employees whose total premium is $1,200,000 a year ($100 a month x 12 months x 1,000 employees) and whose total claims payment is $1,080,000 — a 90% claims ratio (claims as a percentage of total premium):

If PROBLEM-DRINKING EMPLOYEES were referred at the rate of:	If the ALCOHOLISM BENEFIT increased total annual insurance premiums by:	These decreases would occur in		For net savings of				
		CLAIMS PAYMENTS	PREMIUMS PAID	CLAIMS PAYMENTS		PREMIUMS PAID		TOTAL
				%	Dollars	%	Dollars	Dollars
2% a year	1%	1.9%	1.7%	.9%	$ 9,720	.7%	$ 8,400	$18,120
5% a year	2.5%	4.7%	4.1%	2.2%	$23,760	1.6%	$19,200	$42,960

The two tables also alert employees to these facts:

Employer "A" — with both referral program and benefit — can determine the percent of problem drinkers who need to be referred vs. the cost of the alcoholism benefit to reach the cost savings he desires.

Employer "B" can determine what it will cost to add an alcoholism health benefit in order to achieve desired insurance cost savings.

Employer "C" can determine how the cost of establishing an employee assistance program in order to increase problem-drinking referrals would net out insurance cost savings.

Employer "D" can determine the cost of both referral program and benefit to produce desired insurance cost savings. ◻

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Approximately 8,900 State employees are currently covered under the State Group Health Care Plan.

2. The cost to implement the provisions of this bill will be $2.64 per employee per month.

3. Estimate that the cost to provide continued coverage will increase 20% each year for the immediate future. However, an effective alcoholism/drug dependency program should help to reduce overall health care claim experience in the future.

4. Cost for coverage of political subdivisions (approximately 50 subdivisions) participating in group insurance not included; recommend that the Alaska Municipal League, 204 Franklin St., Juneau, AK 586-1325, be contacted for input.

Blue Cross insuring alcoholism treatment

By [illegible] FAIRFIELD

Pioneering insurance coverage for alcoholism treatment will be provided later this year by Blue Cross of Northeastern New York, which is hosting a two-day Albany conference on the plan with other Blue Cross systems in the state.

The Slingerlands-based Blue Cross group will be the first to provide the coverage in New York state, and among the first in the nation.

But other Blue Cross groups may not be far behind, and they sent representatives to the Quality Inn Monday to discuss the design and introduction of alcoholism coverage for every region in the state.

Coverage now exists for hospital treatment of alcoholics in the acute final stages of the disease. The sort of coverage planned by the local Blue Cross group will dramatically expand the availability of treatment programs.

The coverage will include 30 days of "intermediate care" in a residential facility; 30 outpatient visits per individual, and 15 outpatient visits for the individual's family.

These options would be available to a patient during a 365-day period; he can renew them once. He is then entitled to 30 visits during the rest of his life.

The present hospital acute care only coverage "really does not get at the drinking behavior itself," explained James M. Stewart, community consultant to Blue Cross of Northeastern New York.

[illegible] ded by the [illegible], however, [illegible] Blue Cross [illegible] the coverage in the [illegible] areas of the country have found that [illegible] alcoholics who need help still don't seek it, partly because many don't recognize the problem, according to Howard Dallowitz of the Blue Cross and Blue Shield Associations in Chicago.

To counter that expected problem Stewart says the local Blue Cross will actively market the expanded coverage, which may become available as early as October.

It will initially be available to [illegible] employer groups which comprise 50 percent of Blue Cross' membership. Blue Cross covers 13 counties, "50 percent of the citizens here," said Dr. Clifton C. Thorne, Blue Cross president.

Stewart couldn't provide specific figures on the added cost of the coverage to subscribers, but said "relatively speaking, as new benefits go," it is "modest."

Among the speakers Monday at the conference, which concludes today, was State Sen. Dale M. Volker, chairman of the Senate Subcommittee on Alcoholism.

He described the high cost of alcoholism to society and its prevalence, even stating it was a problem at the Capitol. He said if the problem were examined there, or in "any pressure place" or "any state capital . . . you might come up with some frightening results."

Blue Cross to sell alcoholism coverage

By JOHN FAIRHALL

Blue Cross' "hardest marketing job" ever will begin locally this fall when its salesmen start knocking on subscribers' doors with comprehensive alcoholism insurance plans.

The first Blue Cross group in the state to announce the added coverage, Blue Cross of Northeastern New York has its work cut out.

Unlike insurance benefits such as general hospital coverage, which obviously are necessary, alcoholism has long been an underestimated problem.

"Only in the last decade" has the problem been viewed as a disease, points out James M. Stewart, community consultant to the 13-county Blue Cross group.

He thinks "of the Dick Van Dykes who only in the last few years have come forward and said 'I am an alcoholic' or the Betty Fords who make public acknowledgement."

So although alcoholism is "the third largest health problem confronting American society after heart disease and cancer," according to one area expert, Blue Cross believes it will have to add community education to its marketing efforts.

"It is perhaps the hardest marketing job we've ever taken on," Stewart says.

What Blue Cross will be selling, as early as October, is alcoholism insurance beyond the hospitalization coverage already provided. An alcoholic suffering from organic problems caused by the disease or in need of detoxification can under present policies get inpatient hospital treatment, according to Stewart.

What he can't get, but will soon be offered, is a package providing 30 days of "intermediate care" at a residential facility; 30 outpatient visits per individual, and 15 outpatient visits for the individual's family.

These are available during a 365-day period and be may be repeated once. A patient is then entitled to 60 other visits during the rest of his life.

This treatment will get at "the drinking behavior itself," which is not addressed in present hospital care.

The insurance, which initially will be provided to Blue Cross groups totaling 70 percent of its subscribers, will eliminate the financial barrier now separating many alcoholics from treatment.

But at the outset Stewart doesn't expect a rush to buy the added protection, which he says will come at a relatively "modest" cost. Part of the reason is that the disease is so little acknowledged, even by its victims.

If there were a sudden and large demand, it would probably overwhelm treatment programs available in the area. There is no "intermediate care" residential center now available in the area, Stewart says.

But Blue Cross believes the insurance coverage will stimulate growth of treatment programs.

Wilmington (Del.) Evening Journal, January 24, 1978

Blue Cross Stops Funds, Dooming New Center for Alcoholics

By IDA KOSCIESZA

Blue Cross says it won't pay for treatment at Delaware's only private alcoholism rehabilitation center, and the people who run the center say that means Delaware won't have a private alcoholism treatment center.

The board of Blue Cross and Blue Shield of Delaware yesterday voted not to extend a contract to Harbour House, a 33-bed facility in Milford.

And James F. Edwards, director of HarbourHouse, said the decision probably means the end of the 6-month-old center.

"I would assume we will close tomorrow," Edwards said bitterly.

Occupancy at Harbour House, described as "excellent' three months ago, has fallen sharply since word got out that Blue Cross might not pay for care there, Edwards said. There are six patients at the center now, he said.

Blue Cross officials said the decision against paying for the Harbour House program was a "cost containment" measure, but both Edwards and M.T. "Ted" Lassiter, director of the Delaware Alcoholism Council, charged that the health plan picked alcoholism for its economy move because of the "stigma" attached to the disease.

"That's typical. Nobody cares about alcoholics," Edwards said.

Blue Cross had been studying the Harbour House issue since mid-August. Charles R. Richards, vice president for provider and professional relations, said Blue Cross staff recommended against paying for the program because: Blue Cross's resources are limited, alcoholism has not been designated a priority by federal or state authorities, and the region has adequate alcohol treatment facilities.

"When it comes to providing money, [alcoholism] may not be a priority," said Lassiter. "But as far as problem areas, it is one of the largest in the country."

Two doctors on the Blue Cross board agreed.

"Alcoholism is a national problem. Why it's not a priority I don't know," said Dr. John M. Levinson.

Dr. Alfred Lazarus suggested that Blue Cross, which has recently been pushing the idea of preventive health care, is going back on its commitment by refusing to pay for alcoholism treatment. Lazarus added, however, that he has had no trouble finding a bed in a treatment facility for his own alcoholic patients.

"If the bed situation is adequate, let's say so . . . not that alcoholism is not a priority," he said.

Delaware residents currently can be treated for alcoholism at private facilities in Maryland, Pennsylvania and New Jersey. There is a one-to-two-week waiting period for these centers, Richards said. The Delaware Blue Cross plan will pay for treatment at these out-of-state rehabilitation facilities.

Harbour House officials claim Blue Cross would save money by paying for the Delaware facility because Harbour House's $1,712 charge for its 30-day program is lower than rates at the out-of-state rehabilitation centers.

But Blue Cross president William E. Flaherty said that is not the case. Harbour House will not substitute for the out-of-state facilities, but will add to them, Flaherty said.

"When you add facilities they get filled," he said.

With alcoholism facilities both in and out of state, Blue Cross would wind up paying for both, Flaherty predicted.

In any case, Blue Cross does not pay the full charges of the Maryland and Pennsylvania facilities, Flaherty said. It pays on a cost basis that works out at about $55 a day, he said.

Two recent Blue Cross cost containment initiatives, a fee cap negotiated with the state's doctors and an improved budget review process with the hospitals, have achieved savings of $[illegible] to $[illegible] a year, Flaherty said. A contract with Harbour House would cost Blue Cross more than $100,000 a year and would completely wipe out the other savings, he said.

The state's health planning agencies approved Harbour House last year. In the past Blue Cross has gone along with the decisions of these planning groups, but Richards said plan[illegible] criteria for alcoholism rehab[illegible] centers are "weaker than [illegible] facilities."

[illegible] House is [illegible] by [illegible] Health [illegible] welcomes a component [illegible] It [illegible] [illegible] from [illegible] Harbour [illegible] House, which is owned [illegible] Joint Ventures, Inc., [illegible] [illegible] of private [illegible] [illegible]

(Newark, N.J.) Star-Ledger, September 20, 1978

Dispute slows health plan for alcoholics

By VINCENT R. ZARATE

The program that was supposed to aid thousands of alcoholics through added benefits from Blue Cross and Blue Shield has barely gotten off the ground, even though the law ordering it is more than a year old.

The Star-Ledger has learned the Department of Insurance and Blue Cross have been wrangling for months on language in new policies to provide those extra benefits.

Richard J. Diehl, executive director of the New Jersey Alcoholism Association Inc., charged yesterday that because of "unbelievable bureaucracy" thousands of alcoholics and near-alcoholics aren't getting the benefits unless they pay for them out of their own pockets.

The law was signed June 2, 1977, and became "effective immediately" requiring all health insurance companies, including Blue Cross and Blue Shield, to pay the cost of rehabilitation, detoxification and out-patient treatment of those suffering alcoholism.

"There's been a continuous policy of delay which is resulting in alcoholics in New Jersey slowly losing rights gained on the floor of the Legislature," Diehl said.

"All I know is we were promised in June of 1977 by the Governor and the Legislature that Blue Cross and Blue Shield would be required to give alcoholics the added benefits for treatment, and nothing has happened . . . nothing."

Diehl and Steven Blader, assistant deputy public advocate in the Division of Public Interest, have quietly been fighting for months — not only to get the program off the ground but to get government employes covered, too.

Because of an apparent "technical oversight" government employes cannot be included, Blader explained.

Blader said, "They forgot to amend the Public Health Benefits Act to include government employes, and we are now attempting to get the Public Health Benefit Commission to include them by a special order."

The sponsor of the legislation, Assemblyman James W. Bornheimer (D-Middlesex), said, "It's unbelievable" that the new benefits have not been implemented. Bornheimer said he would "push to get this whole thing rolling."

Insurance Commissioner James J. Sheeran said Blue Cross forms to amend contracts to include the added benefits have been rejected "because they do not conform to the intent of the law."

Donald Daniels, executive vice president for Blue Cross, said the nonprofit hospital insurance company has been trying to implement the program but can't until the Insurance Department approves its new contract forms.

"We have here," said Diehl. "The inability of the bureaucracy to implement the law . . . it's everybody's fault."

Gov. Brendan Byrne signed into law four bills requiring private insurance companies as well as Blue Cross and Blue Shield to, for the first time, pay for the rehabilitation of alcoholics.

• • •

While the law became effective last year, it was acknowledged then by both Blue Cross and Insurance Department officials that at least two months would be needed to spell out the regulations on how to deal with new aspects of the extended insurance coverage.

But according to Sheeran, the first regulations were not published until May, after a series of meetings with the companies involved.

Blue Cross officials blame the department for the delay, while Sheeran said, "Meetings had to be held and public hearings had to be held to cover all the points."

Blue Cross contends the program's benefits should be paid when "medically necessary," while Sheeran says they should be "therapeutically necessary."

Sheeran said if Blue Cross has its way it would

Continued

undermine the legislative intent, which was to "throw all weapons we have to combat alcoholism and treat it as a disease."

Blue Cross' attempt to restrict the added coverages to "medical necessity," Sheeran said, would limit the benefits.

Daniels said Blue Cross wants to provide the added coverage and "cooperate" with the department, denying there is a "fight between Blue Cross and the Insurance Department."

The recent newsletter of Blue Cross/Blue Shield to its subscribers heralds that both "will soon expand their coverage to include state-mandated benefits for the treatment of alcoholism."

That article states, "The new rider includes a provision to assure that all treatment is medically necessary, is provided at the appropriate level of care, and is administered by licensed professionals under a state-certified alcoholism treatment program."

An alcoholic at present gets paid full Blue Cross payments for the days spent in a hospital, but does not get paid for rehabilitation or out-patient treatment even though the law of June 2, 1977 requires it.

The alcoholism association, a public interest group based in Trenton, reports that at least one residential center has suffered $43,850 in losses because Blue Cross has refused to pay for added benefits to government employes.

Diehl said Seabrook House in Bridgeton treated 35 state employes, incurred the unpaid claims, and then had to stop admitting state employes because they are not covered under the law.

He said two other clinics, Alina Lodge in Blairstown and the Carrier Clinic in Princeton, have also had to reject government employes unless those employes paid for rehabilitation out of their own pockets.

The issue of including the thousands of government employes into the added Blue Cross benefits program for treatment of alcoholics is to be brought up today at a special meeting of the State Health Benefits Commission.

(Newark, N.J.) Star-Ledger, September 21, 1978

Alcoholic aid is ordered for state workers

By VINCENT R. ZARATE

The State Health Benefits Commission yesterday directed that an estimated 175,000 government employes be included in the health insurance program treating alcoholism.

The commission took the action in Trenton to correct an "oversight" in the law enacted 15 months ago requiring Blue Cross and Blue Shield and all other health insurance companies to pay for benefits of rehabilitation, detoxification and other out-patient treatment of alcoholics.

The government employes were inadvertently omitted from the law because the Legislature forgot to amend the State Health Benefits Act when it approved the added health benefits for alcoholics.

• • •

Attorney General John S. Degnan had in January ruled that public employes enrolled in the state health benefits program could not be included in the extended program for alcoholics because the act was not amended by the Legislature.

However, he said the three-man State Health Benefits Commission could use its discretionary power to extend the alcoholic treatment program to state employes.

William Joseph, director of pensions, said yesterday's action will bring into the program 65,000 state employes, and 110,000 employes of 17 county governments, 318 municipalities, 453 school districts and 180 public agencies enrolled in the state health program.

Riley Regan, director of the Division of Alcoholism in the State Health Department, estimated there are "at least" 10,500 state employes with alcoholic problems and they would benefit from the program.

Even though the law became effective 15 months ago, no payments for out-patient treatment, rehabilitation or detoxification have been made and the program has not been implemented for anyone.

The major reason for the delay is the fight between Blue Cross and the Insurance Department over language in riders to the Blue Cross policy on what benefits would be offered.

The Health Benefits Commission is composed of the insurance commissioner, state treasurer, and president of Civil Service.

• • •

They were represented at yesterday's meeting by George LaPalce of the Insurance Department, Robert DeNicholas of Civil Service, and John Flynn of Treasury.

The drive to get state employes included in the program was initiated by Richard J. Diehl, executive director of the New Jersey Alcoholism Association Inc., and Steven Blader, assistant public advocate in the Division of Public Interest.

The sponsor of the legislation extending alcoholism treatment benefits to health insurance policies and pending in the Assembly is Assemblyman James Bornheimer (D-Middlesex). He was represented at the meeting by his aide, Leona Kaufman.

Travel/Ambulance

The following travel and ambulance costs will be paid by the Plan:

- Transportation to a hospital by professional ambulance.
- Round trip transportation by commercial airline from the place where the illness or injury occurred to the nearest place professional treatment can be obtained.

Your air transportation will be covered only if:

(a) a life-endangering situation exists that requires immediate transfer to a hospital that has special facilities for treating the condition;

(b) surgery is needed that cannot be performed locally; or

(c) a condition exists which cannot be treated locally. In that case, transportation benefits in any one benefit year will be limited to:

(1) one visit and one follow-up visit which is preauthorized as a condition requiring therapeutic treatment which cannot be provided locally;

(2) one visit for pre- or postnatal maternity care and one visit for the actual maternity delivery which cannot be treated locally;

(3) one pre- or postsurgical visit and one visit for the actual surgical procedure which cannot be provided locally; or

(4) one visit for each allergic condition which cannot be treated locally.

If you require air transportation for (b) or (c), your doctor must provide written certification and detailed medical documentation of the existing condition in advance of your trip. The Blue Cross Plan will then determine how much of the transportation charges, if any, are eligible for coverage under the plan.

If the patient is a child under 12 years of age, the transportation charges of a parent or legal guardian accompanying the child will be allowed if the attending physician certifies the need for such attendance.

Transportation charges for a physician and/or registered nurse may be covered only when determined necessary by the Blue Cross Plan.

IMPORTANT: Travel benefits apply only to the conditions covered in the medical section of your Group Health Care & Life Insurance Benefits booklet. They do not apply to the audio, dental or vision section.

Travel preauthorization will not be given for diagnostic purposes or second opinion diagnosis. Postauthorization may be given after review of medical documentation for these procedures.

Travel claims submitted under items (b) and (c) will be subject to denial unless they are preauthorized.

An "Air Travel Preauthorization Application," Form 400-4868, is required in all instances that do not involve a genuine life endangering emergency. You may obtain a supply of these forms from your employer.

For travel which is not of a life endangering nature, but must be made before preauthorization can be obtained by using this form, you should call the Blue Cross travel representative, (access code) and 800-426-6933 for information and instructions.

Alcoholism Treatment Services

Your Plan will pay for treatment as an inpatient in a hospital or alcoholism treatment facility. If services are received in an alcoholism treatment facility that does not have an agreement with the Blue Cross Plan, payment will be limited to $1,000 in any benefit year.

Mental and Nervous Disorders

Physician's services for mental and nervous disorders will be covered as follows:

- 50 percent of eligible expenses.
- Care received in the hospital or physician's office.

The maximum amount of benefits available is $2,500 for each covered member in any one benefit year. Services must be provided by a M.D., D.O. or licensed psychologist.

MEDICAL EXPENSES NOT COVERED

Limitations and Exclusions

The State's Comprehensive Medical Plan does not cover any condition, ailment or injury for which you may receive:

(a) benefits from your employer's liability or Workmen's Compensation Law;

(b) benefits available under any state or federal act, even though you or your dependents waive rights to such benefits; or

(c) services provided by a hospital owned or operated by a state or federal agency.

Services provided in the following facilities are not covered:

(a) an institution which is primarily a rest home, home for the aged, nursing home, skilled nursing facility, convalescent home or any facility of like character; or

(b) convalescent or custodial services regardless where such services are provided, or any portion of a hospital stay which is primarily convalescent or custodial.

Charges for or in connection with cosmetic treatment or surgery will not be paid unless:

(a) treatment or surgery is for injuries sustained in an accident which occurs while you or your dependents are covered, and such treatment or surgery is started within 90 days of the accident; or

ARTICLE 7. MEDICAL TRANSPORTATION SERVICES.

Section
500. Prior authorization
505. Emergency transportation coverage
510. Type of transportation
515. Mortuary expenditure
520. Public rates
525. Medicare coverage
530. Definitions

7 AAC 43.500. PRIOR AUTHORIZATION. (a) All non-emergency, in-state medical transportation under $250 per person one way must have prior authorization by the division's regional office manager or his or her designee. All non-emergency, in-state medical transportation exceeding $250 per person one way and all non-emergency, out-of-state medical transportation must be authorized in advance by the medical practice review section of the division.

(b) Evidence of prior authorization must be present on the billing form before payment will be made.

(c) The division will not authorize payment to a provider of medical transportation for non-emergency medical transportation without first verifying medical need for those services.

(d) The medical assistance coupon or identification card is not to be used as an authorization for medical transportation. Rather, the coupon or identification card is evidence of current eligibility. (Eff. 8/18/79, Reg. 71)

Authority: AS 47.05.010
AS 47.07.050

7 AAC 43.505. EMERGENCY TRANSPORTATION COVERAGE. In emergency situations, the division will assume only the necessary expenses of transporting the beneficiary to the nearest facility where the emergency medical need can be met. (Eff. 8/18/79, Reg. 71)

Authority: AS 47.05.010
AS 47.07.050

7 AAC 43.510. TYPE OF TRANSPORTATION. (a) The choice of provider of medical transportation will be determined by the beneficiary's medical condition, distance to the place of treatment, and availability of a suitable provider of medical transportation, using the least expensive conveyance consistent with these conditions.

(b) If a friend or relative will provide the required medical transportation, payment may be made as a medical expense at a reasonable rate determined by the division.

(c) When the services of more than one provider of medical transportation are available, the division will use the services of the provider with the lowest rate which can provide services appropriate to the beneficiary's medical needs.

(d) The division will not pay for ambulance service which appears to be excessive for the distance traveled and the medical needs of the beneficiary.

(e) While ambulance service may be required to transport a beneficiary to a medical provider, a less expensive mode of travel may be adequate for the return of the beneficiary.

(f) The division will work cooperatively with providers of medical transportation to schedule travel on the least busy days and during the most convenient hours during those days, and will make every effort to arrange for transport of more than one beneficiary on a single trip where appropriate. Such arrangements will reduce charges as may be agreed upon by the provider of medical transportation and the division. (Eff. 8/18/79, Reg 71)

Authority: AS 47.05.010
AS 47.07.050

7 AAC 43.515. MORTUARY EXPENDITURE. Medical transportation services are those services provided by the carrier up to the time death is known or until the deceased beneficiary, alive at the time of pickup, reaches the source of medical care. Thereafter, transportation expense of the deceased beneficiary is a mortuary expenditure which is not covered by medicaid. (Eff. 8/18/79, Reg. 71)

Authority: AS 47.05.010
AS 47.07.050

7 AAC 43.520. PUBLIC RATES. (a) In order to qualify for payment by the division, an ambulance service must comply with the provisions of secs. 5-85 of this chapter. In addition, ambulance providers shall:

(1) file with the division a current schedule of public rates;

rates may be changed only by filing an amended public rate schedule; for medicaid purposes, original rates become effective upon filing; rate changes are effective on the first day of the first month which is at least 30 days after the date of filing the change; in no event may the effective date of the change in rates precede the date the rates are effective for the general public; all rates are subject to final acceptance, rejection, or modification by the division;

(2) customarily charge the general public at those rates specified in the public rate schedule and routinely pursue unpaid charges in anticipation of collection; i.e., a volunteer or community ambulance that operates without charge for services to the community must not charge the division for services provided to beneficiaries;

(3) be in compliance with the regulations and policies of the Division of Public Health or other local licensing body; out-of-state ambulance companies providing services to Alaska residents must be suitably licensed in the state where they operate.

(b) Charges to the division include only those services and specific charges detailed on the certification form, and may not exceed the charges to the general public for like services; any carrier may charge the division at rates less than those charged to the general public for like services. (Eff. 8/18/79, Reg.71)

Authority: AS 47.05.010
AS 47.07.050

7 AAC 43.525. MEDICARE COVERAGE. For those beneficiaries 65 years of age or older, or those under 65 who receive medicare coverage due to disability, every effort must be made by the ambulance company to use fully the benefits of 42 CFR 405.201--405.488 before billing the division. (Eff. 8/18/79, Reg.71)

Authority: AS 47.05.010
AS 47.07.050

7 AAC 43.530. DEFINITIONS. In secs.500-525 of this chapter

(1) "ambulance" means any privately or publicly owned vehicle that is regularly provided or offered to be provided for the emergency transportation of persons suffering from illness, injury or disability and licensed by the Division of Public Health or local licensing body; police, fire, funeral home, and other vehicles which serve a dual purpose, one of which meets this definition also may be considered ambulances;

(2) "emergency transportation" means that transportation necessary immediately when a sudden, unexpected occurrence creates a medical emergency;

(3) "escort" means a person who accompanies a beneficiary to or from a source of medical care; the purpose of their accompanying a beneficiary may be the result of medical necessity or may be due to the age or physical or mental capacity of the beneficiary; the accompanying person may be medically-trained but is not required; no compensation will be paid by the division to the accompanying person;

(4) "food and lodging" means meals and sleeping facilities for the beneficiary, escort, or both, while the beneficiary is receiving medical care at a facility away from the place where the beneficiary regularly resides; meals and lodging provided by friends or relatives of either the beneficiary or the escort are not included; nor are accomodations provided by hospitals or nursing homes included in this definition;

(5) "medical transportation" means transportation for medical purposes to and from any source of medical care or between medical facilities, and food and lodging incidental to such transportation for both beneficiaries and escorts when needed;

(6) "provider of medical transportation" means the owner or operator of a private automobile, municipal bus, inter-community bus, taxi, scheduled airline, ferry, wheelchair coach, train, chartered aircraft, chartered boat, or other mode of transportation commonly used to transport a person. (Eff. 8/18/79, Reg. 71)

CURRENT STATUTE

Chapter 07. Medical Assistance for Needy Persons.

Section
10. Purpose
20. Eligible persons
30. Medical services to be provided
40. State plan for provision of medical assistance
50. Implementation of the medical assistance program
60. Receipt of federal money
70. Reimbursement for cost settled providers
80. Definitions

Sec. 47.07.010. Purpose. It is declared as a matter of public concern that the needy persons of this state receive uniform and high quality medical care, regardless of race, age, national origin, or economic standing. Accordingly, this chapter authorizes the Department of Health and Social Services to apply for participation in the national medical assistance program as provided for under title XIX of the federal Social Security Act. (§ 1 ch 182 SLA 1972)

Sec. 47.07.020. Eligible persons. (a) All residents of the state for whom the Social Security Act requires medicaid coverage are eligible to receive medical assistance under title XIX of that Act (42 U.S.C. 1396 et seq.).

(b) In addition to the persons specified in (a) of this section, the following optional groups of persons for whom the state may claim federal financial participation are eligible for medical assistance:

(1) persons eligible for but not receiving assistance under any plan of the state approved under part A of title IV (aid to families with dependent children), or title XVI (supplemental security income), of the Social Security Act;

(2) persons in a general hospital, skilled nursing facility or intermediate care facility, who, if they left the facility, would be eligible for assistance under one of the federal programs specified in (1) of this subsection;

(3) persons under 21 years of age under supervision of the department for whom maintenance is being paid in whole or in part from public funds and who are in foster homes or private child-care institutions; and

(4) aged, blind, or disabled persons, who, because they do not meet income and resources requirements, do not receive supplemental security income under title XVI of the Social Security Act, and who do not receive a mandatory state supplement, but who are eligible, or would be eligible if they were not in a general hospital or skilled nursing facility or intermediate care facility to receive an optional state supplementary payment;

(5) persons under 21 years of age in an institution designated as an intermediate care facility for the mentally retarded who are financially eligible as determined by the standards of the Federal Aid to Families with Dependent Children program;

House CS for CSSSSB227 (HESS) Revisions

* Sec. 7. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act allows optional medical coverage qualifying for federal financial participation are eligible for medical assistance.

(6) persons in a medical or intermediate care facility whose income while in the facility does not exceed 300 per cent of the supplemental security income benefit rate under title XVI of the Social Security Act but who would not be eligible for an optional state supplementary payment if they left the hospital or other facility.

(7) persons under 21 years of age receiving active treatment in a psychiatric hospital who are financially eligible as determined by the standards of part A of title IV (aid to families with dependent children) of the Social Security Act.

(c) Receipt of medical assistance under this chapter is considered to be an additional benefit to these individuals and does not affect other assistance payments, federal or state, for which the recipient is eligible.

(d) No additional groups may be added unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 105 SLA 1974; am § 1 ch 117 SLA 1975; am § 1 ch 221 SLA 1976; am § 1 ch 11 SLA 1978)

Effect of amendments. — The 1975 amendment added paragraph (5) of subsection (b).

The 1976 amendment added paragraph (6) of subsection (b).

The 1978 amendment added paragraph (7) of subsection (b).

Legislative history reports. — For report on ch. 182, SLA 1972 (FCCS HCS CSSB 56), see 1972 House Journal, p. 1684. For report on ch. 105, SLA 1974 (CSSB 465), see 1974 Senate Journal, p. 525 and 1974 House Journal, p. 763.

* Sec. 10. AS 47.07.020(d) is repealed.

Sec. 47.07.030. Medical services to be provided. Medical services to be offered to eligible persons include inpatient hospital, outpatient hospital, rural health clinic, outpatient surgical care centers, laboratory and X-ray, refractions and eye examinations by ophthalmologists or optometrists, eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist, inpatient psychiatric hospital for persons age 65 or older and persons under age 21, skilled and intermediate nursing home, physician, home health care services, early periodic screening diagnosis and treatment of persons under 21 years of age, clinic services, treatment of speech, hearing and language disorders, and reasonable transportation to and from the point of medical care. No additional services may be provided unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 35 SLA 1973; am § 2 ch 105 SLA 1974; am § 1 ch 12 SLA 1976; am § 2 ch 221 SLA 1976; am § 1 ch 82 SLA 1978)

* Sec. 8. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include services eligible for federal financial participation under Title XIX of the federal Social Services Act.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Medical benefits would be provided to approximately 3,065 new cases under the Medicaid program. Administration of program benefits would require 15 field staff positions and 2 central office positions, office space, and additional computer time to be divided between the Eligibility Determination and Public Assistance Administration BRUs. Funding is 50% federal except for the Indian Health Care program which is funded at 100% federal funds. Since the bill proposes to add new coverage groups and new categories of coverage to Medicaid, there will be a reduction in General Relief Medical program expenditures as indicated on page 2. Thus, the actual increase in state General fund revenues needed for this increased Medicaid coverage is 8,477.5 - 4,471.8 = 4,005.7.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Medical benefits would be provided to approximately 2,821 new cases under a state-only medically needy program as part of the General Relief Medical program. Administration of program benefits would require 14 field staff positions and 2 central office positions, office space, and additional computer time to be divided between the Eligibility Determination and Public Assistance Administration BRUs. Funding is indicated as 100% state funds, but it may be possible to receive federal funding for certain individuals with income less than 133% of the state need standard for the particular eligibility categorical group to which they are related.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Funding necessary to make interest payments to providers for Medicaid and General Relief Medical clean claims not processed within 30 days of receipt by the Department. Federal law requires states to process 90% of Medicaid clean claims within 30 days of receipt, however no provision is made under federal law for funds to be used to make interest payments. Thus, all interest payments must be made using state funds only.

~~HOUSE BILL NO.~~ SB 539

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making an appropriation to the Alaska medical facilities bond guarantee account; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $59,000,000 in obligations of the United States government or other instruments which are held in the general fund and which will not mature during fiscal year 1981 is appropriated to the Alaska medical facilities bond guarantee account for bond guarantees made under a version of an Act entitled "An Act relating to bond guarantees for the purchase of mortgage loans made to medical facilities in Alaska and creating the Alaska medical facilities bond guarantee account; and providing for an effective date."

* Sec. 2. The unexpended and unobligated portion of the appropriation made by of this Act lapses into the general fund June 30, 1982.

* Sec. 3. This Act take effect on the effective date of a version of an Act entitled "An Act authorizing the Alaska Medical Facility Authority to purchase mortgage loans made to medical facilities in Alaska, relating to bond guarantees for the purchase of the mortgage loans and creating the Alaska medical facilities bond guarantee account; and providing for an effective date."

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

on

SENATE BILL NO. 539

"An Act making a special appropriation to the Department of Public Safety for emergency medical services; and providing for an effective date."

This bill would make $4,868,419 available to the Department of Public Safety, primarily for equipment for fire suppression and emergency medical services in communities throughout Alaska. Of the total amount, approximately $3.3 million is for fire suppression equipment and the remaining amount is for EMS equipment and training through the Public Safety Academy. None of the proposed funding is for operating expenses of the EMS Program within the Department of Health and Social Services.

The Emergency Medical Services Section of the Division of Public Health, Department of Health and Social Services, feels this equipment and training is needed. The Section has been involved, with assistance from the regional EMS councils, in assessing EMS equipment and training needs throughout the state. The Department recommends that the Department of Public Safety obtain endorsement from Regional EMS Medical Advisors before purchasing advanced medical equipment such as defibrillator monitors for communities since this equipment requires advanced training before it can be used safely.

Sec. 1 -- Brings Board under "Centralized Licensing" Chapter of Title 8.

Sec. 2 -- Allows OL to provide investigative services to Board.

Sec. 3 -- Provides "exception" to current statute which renews licenses biennally and allows our "health boards" to renew licenses every four years.

Sec. 4 -- Provides that R.N. have no direct financial interest in an nursing home.

Sec. 5 -- Allows for board members to serve terms of four years instead of three. Limits membership on board to two consecutive four year terms.

Sec. 6 -- Gives board "approval" power in the issuance of licenses and license renewal.

Sec. 7 -- Provides for the imposition of disciplinary sanctions.

Sec. 8 -- "Continued competency requirement" before license can be renewed.

Sec. 9 -- Provides for removal of board members by governor for cause.

Sec. 10 - Deletes provision "unless excepted by this chapter." The reason for this is that the board feels that if they were to make exceptions this would put them in a vulnerable position -- i.e., if they made an exception in one case they might be setting a precedent to make an exception in other /matters and they would just as soon avoid this.

Sec. 11 - Allows for license renewal to occur every four years

- Provides for continued competency to be established before license can be renewed

Sec. 12 - Provides for individual to apply for examination if his license has expired for a period of 24 months (it currently is 12 months).

Sec. 13 - Fee revision.

Sec. 14 - Grounds for imposition of disciplinary sanctions

Sec. 15 - Disciplinary sanctions enumerated.

Sec. 16 - Penalty clause.

Sec. 17 - Brings board under "administrative adjudication" section of Title 44.

Sec. 18 - Repealers.

Sec. 19 - Effective date.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF ADMINISTRATION

OFFICE OF THE COMMISSIONER

Health, Education & Social Services
Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

To clarify our Department's recommendations on this bill, SB 549 am, we are in support of the bill but recommend an amendment that would read as follows:

> "Add to Sec. 08.70.080 the following: This section does not apply to Pioneers' Home Managers who are incumbents on the effective date of this Act."

We believe that those incumbents with proven experience should be retained.

Sincerely,

Sue S. Greene
Deputy Commissioner for Personnel Management

Sec. 11 - Allows for license renewal to occur every four years

- Provides for continued competency to be established before license can be renewed

Sec. 12 - Provides for individual to apply for examination if his license has expired for a period of 24 months (it currently is 12 months).

Sec. 13 - Fee revision.

Sec. 14 - Grounds for imposition of disciplinary sanctions

Sec. 15 - Disciplinary sanctions enumerated.

Sec. 16 - Penalty clause.

Sec. 17 - Brings board under "administrative adjudication" section of Title 44.

Sec. 18 - Repealers.

Sec. 19 - Effective date.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 549am

"An act relating to professional licensing and to the regulation of Nursing home administrators, and providing for an effective date."

Senate Bill 549am revises current statutes and adds new sections to clarify and strengthen the administration of nursing home administrators licensing procedures. The bill gives the Board of Nursing Home Administrators the authority to develop regulations for the purpose of requiring disciplinary sanctions and making renewal of licenses dependent upon proof of continued competency.

The bill provides specific administrative procedures for applying disciplinary sanctions, and spells out specific grounds for discipline.

The terms of members of the Board of Nursing and limited to approximately eight years and the nursing home administrators license is to be renewed every four years rather than annually.

The Department of Health and Social Services supports Senate Bill 549am as it is written.

As evidenced by the attached letter from Rod Betit, Director, Division of Public Assistance, the existance of and the smooth operation of a Board of Nursing Home Administrators is important to the operation and funding of the State of Alaska's Medicaid program.

The bill does not fiscally affect the cost of operation of the Department of Health and Social Services other than the federal fund participation for the Medicaid program.

Recommended By: Rod Betit Date May 5, 1980

Rod Betit, Director
Division of Public Assistance

Approved By: Helen O Beirne Date 5/9/80

Helen D. Beirne, Commissioner
Department of Health and Social Services

March 31, 1980

Document Number 59-80

The Honorable Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

House Bill 447 proposes terminating the existence of the Board of Nursing Home Administrators on January 1, 1981 and reassigns its responsibilities to the Department of Commerce and Economic Development.

At the time various Boards and Commissions were being considered for "sunsetting" by the Legislature in 1979, it was found that the existence of the Board of Nursing Home Administrators or some similar type of "peer review" system was, by federal law, (U.S. Code 42 Sub-Chapter XIX S. 1396 a(29)) necessary if the State of Alaska was to continue to receive federal fund participation for Medicaid nursing home services.

Federal fund participation is an essential part of the Medicaid nursing home services funding. Nursing home services comprise 70% of the total Alaska Medicaid budget (twenty-nine million dollars) and therefore, approximately fourteen million dollars (50% matching) could be lost in federal fund participation if some type of "peer review" licensing function is not provided for in Alaska Statute.

When viewed superficially, it is difficult to justify the need for, and cost of a statewide, regionally represented, five member Board of Nursing Home Administrators when only approximately 35 licenses have been issued since 1976. However, with approximately fourteen million dollars in federal fund participation dependent upon the state having "either a Board of Nursing Home Administrators or an agency of the state responsible for licensing under the Healing Arts Act of the state" the cost and need is easier rationalized.

What seems needed is a method of administrating the issuance of Nursing Home Administrators licensured through the Department of Commerce and Economic Development while at the same time providing a method of inexpensive "peer review." Some alternatives that we have considered are as follows:

I. Establish the Long Term Care Division of the Alaska State Hospital Association as the board the Department of Commerce and Economic Department must consult with regarding:

a. Promulgating of regulations.

b. Revocation of licenses.

c. Establishment of procedures to insure that licenses uphold standards.

d. Adoption of criteria for educational requirements.

The Long Term Care Division of the Alaska State Hospital Association meets at least bi-annually and at no expense to the State could provide the professional support needed to fulfill federal statute requirements. The Long Term Care Division of the Alaska State Hospital Association is composed of all the nursing home administrators in the State of Alaska.

II. Establish a Board, for federal purposes, composed of state employees who's offices are in Juneau. This type of board should meet during regular working hours and therefore, should be no added expense to the State.

a. Director of Occupational Licensing.

b. Director of Public Assistance.

c. Director of Public Health.

d. Director of Nursing Board.

III. The development of a comprehensive healing arts act, which would encompass all healing professions.

IV. Reinstatement of the existing Board of Nursing Home Administrators with appropriate funding and staffing in the Division of Occupational Licensing to accomplish the tasks required.

The Division of Public Assistance opposes House Bill 447 and support the reinstatement of the Board of Nursing Home Administrators. We feel the cost of supporting the operation of such a board are justified when compared to the amount of federal fund participation involved.

Sincerely,

Rod Betit
Director

STATE OF ALASKA MEMORANDUM

TO: Debra Behr, Special Assistant to the Commissioner
Health & Social Services

DATE: April 13, 1980

FILE NO:

TELEPHONE NO:

FROM: Portia Kaufmann, Administrator
State Health Planning & Development
Certification & Licensing

SUBJECT: Position Paper - Senate Bill 549

For an act entitled: "An Act relating to professional licensing and to the regulation of nursing home administrators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA.

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(22) Board of Nursing Home Administrators.

Discussion:

1. A current license is required by Federal regulations for nursing home administrators.

2. Federal regulations do not require the administrator of a hospital with long term care beds to be a licensed nursing home administrator unless state regulations have this requirement.

   As of this date, the State of Alaska has required a hospital administrator to be licensed as a nursing home administrator if the hospital has a long term care unit.

3. Intermediate Care Facilities for the mentally retarded federal regulations require the administrator to be a qualified Mental Retardation Specialist (A educational background in preference to medical background), unless the State requires him/her to be a licensed nursing home administrator.

   Intermediate Care Facilities for the mentally retarded (ICF/MR) that care for persons with developmental disabilities have an orientation to normalization and a wellness model as opposed to the medical model. Therefore, the administrator of an ICF/MR must have a different background. Alaska has adopted for licensure the Federal Regulations for ICF/MR. Therefore, ICF/MRs are not licensed as nursing homes, but as ICF/MRs.

Senate Bill No. 549 refers to the re-establishment of the Board of Nursing to administer the required licensure program for nursing home administrators.

Comment: The Department of Health & Social Services concurs with the content of this Bill.

SENATE BILL NO. 549 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of nursing home administrators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(22) Board of Nursing Home Administrators.

* Sec. 2. AS 08.01.050(19) is amended to read:

(19) provide investigative services to the boards established under AS 08.20, [AS 08.32,] AS 08.36, AS 08.64, AS 08.68, AS 08.70, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline.

* Sec. 3. AS 08.01.100(a) is amended to read:

(a) Except as provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 4. AS 08.70.020(a) is amended to read:

(a) The board consists of five members: two nursing home administrators licensed under this chapter and practicing in the state, a registered nurse licensed in the state and having no direct financial interest in any nursing home, and two persons from the general public.

? Does this mean an employee? owner? what? definition

* Sec. 5. AS 08.70.020(c) is amended to read:

(c) Board members serve staggered terms of four [THREE] years or until their successor is appointed, except that a member appointed to a vacated term serves the duration of that term. A person who has served

two successive complete terms may not be reappointed until four years from the expiration of the second term [ON THE FIRST BOARD TWO MEMBERS SERVE ONE-YEAR TERMS, TWO MEMBERS SERVE TWO-YEAR TERMS AND ONE MEMBER SERVES A THREE-YEAR TERM].

* Sec. 6. AS 08.70.050(a)(2) is amended to read:

(2) examine, approve issuance of licenses and renewal of [LICENSE, AND RENEW THE] licenses of qualified persons;

* Sec. 7. AS 08.70.050(a)(3) is amended to read:

(3) establish procedures to insure that licensees continue to uphold the board's standards; impose disciplinary sanctions upon [REVOKE, SUSPEND, OR REFUSE TO RENEW LICENSES OF] persons who fail to uphold the standards;

* Sec. 8. AS 08.70.050(a) is amended by adding a new paragraph to read:

(6) adopt regulations insuring that renewal of a license is contingent upon proof of continued competency by the licensee.

* Sec. 9. AS 08.70 is amended by adding a new section to read:

Sec. 08.70.055. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 10. AS 08.70.080 is amended to read:

Sec. 08.70.080. LICENSE REQUIRED. Only a licensed nursing home administrator may manage, supervise, or be generally in charge of a nursing home [UNLESS EXCEPTED BY THIS CHAPTER]. Only a nursing home or which is supervised by a licensed nursing home administrator may operate in Alaska [UNLESS SPECIALLY EXCEPTED BY THE BOARD. THIS SECTION DOES NOT APPLY TO THE ALASKA PIONEERS' HOMES].

* Sec. 11. AS 08.70.140(b) is amended to read:

(b) An administrator may apply to the board for renewal of his

license [every four years] by submitting an application for renewal and proof of continued competency as required by regulation [TO THE BOARD]; application forms for renewal are provided by the department.

* Sec. 12. AS 08.70.140(c) is amended to read:

(c) A person whose license has expired for a period of 24 [12] months or more must apply for a license in the same manner as an applicant who has not been licensed before.

* Sec. 13. AS 08.70.150 is amended to read:

Sec. 08.70.150. FEES. The following fees shall be imposed under this chapter when applicable:

(1) examination fee . . . . . $50 [$25]

(2) investigation fee for persons applying for a license under AS 08.70.110(b) . . . . $50 [$25]

(3) [ANNUAL] license renewal fee [(required every four years)] . . . . . $200 [$50]

* Sec. 14. AS 08.70 is amended by adding a new section to read:

Sec. 08.70.155. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. After a hearing the board may impose disciplinary sanctions when it finds that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the

performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) sold or furnished a license to another;

(10) practiced as a nursing home administrator or used a designation tending to imply that he is a nursing home administrator without a license issued under this chaper.

* Sec. 15. AS 08.70.160 is repealed and re-enacted to read:

Sec. 08.70.160. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.70.155, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving

the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The person may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 16. AS 08.70.170 is amended to read:

Sec. 08.70.170. PENALTIES. A person convicted of violating a provision of this chapter is <u>guilty of a class B misdemeanor</u> [PUNISHABLE BY A FINE OF NOT MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

* Sec. 17. AS 44.62.330(a) is amended by adding a new paragraph to read:

(47) Board of Nursing Home Administrators (AS 08.70.010).

* Sec. 18. AS 08.70.060, 08.70.070, and 08.70.140(a) are repealed.

* Sec. 19. This Act takes effect immediately in accordance with AS 01.10.070(c).

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE CONCURRENT RESOLUTION NO. 40 am

"Relating to expansion of the period during which Older Alaskans may travel free on the state marine highway system."

Senate Concurrent Resolution 40 am provides for increasing the time that Older Alaskans can ride on the Alaska Marine Highway System on space-available basis within Alaska without charge. Senate Concurrent Resolution 40 am would increase the days that seniors would travel free on the ferries to include the full month of October and the first 15 days of May. Mr. James Eide, Director of Marine Highways testified at Senate Finance Committee hearings on this resolution that the added service would not "hamper the operations of the system."

The Department of Health and Social Services recognizes that transportation is one of the key services that seniors need. Lack of transportation is often cited as a major obstacle in the provision and receipt of other necessary services such as medical care for the elderly. We believe this is especially true for seniors on low or fixed incomes. Travel expenses have recently been rising dramatically in response to high fuel costs. These added costs place an increased burden on these elderly citizen's already tight budgets.

Our Office on Aging reports that seniors have utilized free ferry service in the past for many purposes including to visit friends and relatives, meet with other senior groups, and attend recreational activities such as regional fairs. Also, the expansion of free ferry service might allow seniors living in small villages, such as Hoonah, to come to larger towns, such as Juneau to receive medical care or purchase supplies that are unavailable at home.

The Department of Health and Social Services recognizes the need for increased availability of transportation services for our older citizens and, therefore, supports the passage of this resolution.
