READ

AN OVERVIEW OF

THE

DEPARTMENT OF HEALTH AND SOCIAL SERVICES

February 19'

DIVISION OF ADMINISTRATIVE SERVICES

The Division of Administrative Services provides needed services to the department's program divisions, offices and agencies, plus the commissioner's office. Included services are personnel, supply, fiscal, accounting, federal financial reporting, budget preparation and execution, expenditure monitoring and control, contract administration, employee payroll, mail/messenger and graphic arts. The civil rights and equal employment opportunity programs are also coordinated through this division.

DIVISION OF CORRECTIONS

The state-operated adult institutional programs provided custody and treatment programs for an average of 711 prisoners each day during FY 78. The division continued to obtain services by contract from the Federal Bureau of Prisons at a level averaging 45 prisoners during the year, and also continued to contract with local jails for temporary services at Kodiak, Kenai, Bethel, and Sitka. The following operational changes were made with respect to adult correctional centers:

The opening of the Ridgeview Correctional Center in December 1977 heralded the first exclusively women's program correctional center in the State. Although available funds in FY 78 fell considerably short of renovation needs, the facility is operational and secure, and further renovations are planned for FY 79. The facility appears to have satisfied the Human Rights Commission's formal complaint, by providing more suitable housing and programs. Adult basic education, drug and alcohol counseling, cooking, needlework, and recreational activities are now available. The facility has a limited capacity of 28 and has maintained a population

near that level since December.

The 3rd Avenue Correctional Center has been changed to house maximum security prisoners as well as medium and minimum security prisoners for the purpose of classification, transferring persons to institutions throughout the state in order to place the prisoner in the institution which most nearly fits his needs. A prisoner's average length of stay at 3rd Avenue is six (6) weeks.

The 6th Avenue Correctional Center houses only pre-trial and unsentenced prisoners. It is no longer a program facility. Its primary purpose is to serve the Anchorage area as an intake facility for all arrested offenders in the Anchorage area.

The Nome State Correctional Facility came on line as a State facility on October 1, 1977. Formerly the facility was managed by the City of Nome, Alaska. The Nome Facility is rated at 30 beds and is staffed by 11 correctional employees. The Nome Facility is now handling nearly twice as many offenders as it did when it was a city jail.

The Division of Corrections provided services to a daily average of 130 youths in the state-operated McLaughlin Youth Center. Additionally, through contracts for specialized care, an average of 40 youths received services outside the state. The majority of youths for whom the division is responsible received care under community placement through probation services. During FY 78 the probation/parole information system provided services for 62 average workload units per month per probation.

AJIS terminals have been installed and are operational in all Alaska Correctional Institutions and in the Regional Probation and Parole Office, except Nome, and all stations are connected to the central records room in Juneau. There are 13 terminals presently operating. The system frequently handles more than 300 messages per day. The messages provide a flow of management information to and from the central office and between the institutions. The system is used to facilitate the transfer of prisoners, to provide statistical information (morning counts, etc.) and to issue requests and directives. It also provides (daily) personnel information and data on juvenile incidents as well as facilitating file searches and number assignments and is used to issue NLETS information to a nation-wide justice reporting system.

The need to develop and implement a statewide medical care program became more evident in FY 78 Statewide medical costs approached $0.75 million, and the continued upward trend in prisoner population dictated the move toward medical care standardization. A federal grant--a medical care demonstration project for jails--was secured, and a medical administrator has been employed. It is expected that medical care for prisoners will not only be improved, but cost reductions and avoidance of costly lawsuits will be realized.

A Corrections Career Ladder Program has been developed with a balanced emphasis on the need for the public safety through improved security staffing patterns, and the establishment of a formal structure for treatment staff trained for specializing in the development, operation, and evaluation of reformative programs for prisoners. The Career Ladder is designed for maximum flexibility in staffing through the use of a

component structure that may be tailored to meet specific or unique staffing needs. A major problem has been, and continues to be, the lack of sufficient state funds to meet training needs, rather than relying on the use of grant funds for 50% of the training programs.

DIVISION OF MENTAL HEALTH AND DEVELOPMENTAL DISABILITIES

The Division of Mental Health and Developmental Disabilities is responsible for the development, implementation, and administration of programs for the prevention and treatment of mental illness and for the habilitation of developmentally disabled persons. The division also seeks to further public awareness of mental health and developmental disabilities.

The division provides in-patient psychiatric services at the Alaska Psychiatric Institute, a 200-bed JCAH accredited acute-care facility for the mentally ill. Harborview Developmental Center in Valdez, a 120-bed certified Intermediate Care Facility for the Mentally Retarded (ICF/MR), provides care, training, education and habilitation for the developmentally disabled. In addition, the division operates regional mental health offices in Anchorage, Fairbanks, and Juneau to provide statewide coordination, development, and technical assistance for community mental health services.

The division is currently providing grants-in-aid to 19 locally controlled and operated community mental health centers located throughout Alaska. In addition, services for the developmentally disabled are provided at the local level under contractual agreements administered by the division. These community based developmental disabilities services are located in

Anchorage, Fairbanks, Juneau, and Ketchikan.

Services to the courts and the Division of Corrections are provided, for the most part, at the recently opened Psychiatric Security Unit at the Alaska Psychiatric Institute. This 14-bed unit is a medium security unit providing evaluations and observations for the court and short-term treatment for the mentally ill offender.

The Governor's Mental Health Advisory Council and the Governor's Council on the Handicapped and Gifted provide advice and recommendations to the division concerning the delivery of services to the mentally ill and the developmentally disabled.

DIVISION OF PUBLIC ASSISTANCE

The Division of Public Assistance administers the following programs: Adult Public Assistance, Aid to Families with Dependent Children, Food Stamps, General Relief, Medicaid, and General Relief Medical.

Regional offices are maintained in Juneau, Anchorage, Fairbanks, Bethel, and Kotzebue to supervise 20 district offices. There are 149 full-time and 11 part-time positions within the division. The division has a fiscal 1979 budget appropriation of approximately $75 million, of which 47 per cent is federally funded.

During FY 1978, medical care was provided to approximately 12,500 Medicaid recipients at a cost of $25.8 million (50 per cent federally funded). Services covered by Medicaid include in-patient and out-patient hospital,

laboratory and x-ray, skilled nursing and intermediate facility care, physician's services, early and periodic screening, diagnosis and treatment, home health, transportation, optometrist's services, eyeglasses, treatment for speech, hearing and language disorders and in-patient psychiatric care.

Individuals not eligible for Medicaid may be eligible to receive help from General Relief-Medical. In FY 1978, $6.2 million (100 per cent state funded) were spent on services similar to those provided under the Medicaid program with the exception of home health and screening programs.

Benefits totalling $5.25 million were paid to recipients of Adult Public Assistance during FY 1978. Payments by program during the year were: Old Age Assistance, average payment of $112.78 was made to 1,849 recipients each month for total of $2.5 million; Aid to the Disabled, average payment of $135.48 to 1,633 recipients each month with total payments of $2.15 million; Aid to the Blind, average payment of $131.51 to 66 recipients each month with total payments of $104,200.

Persons not eligible for financial assistance under any of the categorical programs may be eligible for General Relief. Through this program emergency help such as one-time payment to vendor for rent or fuel is available. The total paid during FY 1976 under the General Relief program was $500,900.

Financial aid totalling $16 million was paid to 11,821 recipients eligible for Aid to Families with Dependent Children with an average payment of $113.09 per month.

The new Catastrohpic Illness Program provides medical assistance to eligible applicants who have experienced a single illness or injury during a 12-month period which, after all other sources of payment have been exhausted, leaves medical expenses of more than $1,000. The total amount expended during FY 78 was $450,000.

Approximately $2.49 million was spent on determination of eligibility for all programs administered by the division. Determination of eligibility is done by 78 eligibility workers located throughout the state.

DIVISION OF PUBLIC HEALTH

During FY 78, the Division of Public Health continued to provide preventive medical and environmental health services to the citizens of the state. Significant accomplishments included:

-A statewide immunization program aimed particularly at infants and preschool children. A survey of children entering school showed that 98.3% had received all required immunizations. This figure exceeds the national goal set by HEW.

-Provision of some 335,000 public health nursing services to people in all parts of the state. The types of services included maternal and child health, communicable disease control, screening for diseases, acute care and preventive services in mental health, substance abuse and accident prevention.

-Provision of new leased space for health centers in Nome and Wasilla and modification of health centers in Kake, Hoonah, Kenai,

Dillingham, and McGrath to permit more effective services and better coordination of state programs with those of regional native health corporations.

-Development of standards and regulations for Metabolic Screening of Newborn Infants. The implementation of these standards and regulations places Alaska among the top five states with screening programs for early detection of metabolic disorders leading to mental retardation.

-Granting of interim approval to four (4) local laboratories in the state for microbiological examination of water samples from public drinking water supplies. This marks the first time in Alaska that non-state laboratories have been approved for this service.

-Isolation and identification of the three influenza virus strains involved in the past winter's flu season. Screening of over 900 specimens submitted on suspected influenza cases, confirmed that the so-called Russian (USSR) strain cases were restricted to military personnel and not present in the civilian population.

-Strengthening of the otitis media program in the Bethel area.

-Issuance of educational materials on management of commerical food service activities and on prevention of botulism in home prepared foods.

-Production of 37 programs on public health issues which were shown as part of the Alaska Television Satellite Demonstration Project.

-Production of new educational materials which included two coloring

books for the otitis media project; pamphlets describing the services and special clinics for four (4) different health centers, grocery bag stuffers for "Week of the Young Child," Wrangell TB Clinic, "No Shots - No Day Care," Hearing Screening and Noise-Induced Hearing Loss. Pamphlets were designed for Handicapped Children's Program, Botulism, Ear Aches and Draining Ears, and After a Tympanoplasty Operation.

-Completion of data entry of Southeastern Regional facilities health data in the Patient Care Information System. This system which will be used by state-operated health centers and Alaska Native Health Service facilities will make a significant contribution towards improved patient care by providing current surveillance lists for needed follow-up on patients and eliminating duplication of services.

DIVISION OF SOCIAL SERVICES

The Division of Social Services, through its six (6) regional offices and 37 field offices, provided statewide child and adult protective services in response to problems of neglect, abuse or exploitation. The division served more than 4,800 children and over 350 adults through these services. Of the more than 4,800 children served, 70% received supportive services while residing in their own home. Another 1,256 children received services while residing in foster care arrangements.

In addition, the staff of the division provided information and referral services for more than 5,000 individuals to help them to identify and utilize appropriate services provided by other public and private agencies. Individual and family counseling was provided for over 2,700

individuals by the social work staff.

Services made available for clients for the Division through purchase arrangements with private contractors included protective services, day care for over 200 children, and homemaker services for over 500 individuals and families.

OFFICE OF ALCOHOLISM AND DRUG ABUSE

The Office of Alcoholism and Drug Abuse was administratively combined in FY 78. There are still separate statutes and two (2) separate Advisory Boards for Alcoholism and Drug Abuse.

The Office funds 26 alcoholism prevention, treatment or rehabilitation programs in Anchorage, Fairbanks, Kotzebue, Nome, McGrath, Bethel, Napaskiak, Unalaska, Dillingham, Copper River, Tok, Kodiak, Kenai, Yakutat, Juneau, Sitka, Hoonah, Kake, Petersburg, Wrangell, and Ketchikan. Many of those programs are co-funded by the Division of Mental Health and Developmental Disabilities, the Criminal Justice Planning Agency, C.E.T.A., the Indian Health Service and the Veterans Administration. Major efforts this year are being made to solidify working relationships between these programs and other interested agencies, including the criminal justice system, mental health and social services programs, and the schools. It is estimated that more than 5,000 clients will utilize these programs during FY 79.

The Office funds 11 drug abuse prevention, treatment and rehabilitation programs in Anchorage, Fairbanks, Nome, Dillingham, Sitka, Petersburg,

and Ketchikan. Services range from youth recreation and counseling programs in Fairbanks, Petersburg, Sitka, and Ketchikan, to methadone maintenance programs for hard drug addicts in Anchorage and Fairbanks. The projection is for more than 1,000 clients to utilize these services during FY 79.

In both Alcoholism and Drug Abuse, there is a heavy demand for increased prevention programming, training for program staff and boards, and better evaluation technology for programs, including outcomes of treatment.

There is on file in the State Office a total of $6 million in requests for alcoholism programs, as well as a total of $2 million of requests for Drug Abuse programming, for a combined total of $8 million. Total available FY 79 funds for the Alcoholism program amount to $2.6 million, while for Drug Abuse, the total is $9 hundred thousand. The State Office of Alcoholism and Drug Abuse estimates that approximately 40% of the need expressed by local communities is currently being met.

OFFICE OF STATE HEALTH PLANNING AND DEVELOPMENT

Increased responsibilities led to the reorganization of the Office of Planning and Research into two (2) separate units, the Office of State Health Planning and Development (OSHPD) and the Office of Information Systems (OIS). These new offices will concentrate on the areas of health planning and data collection and analysis in order to provide the department with necessary information for the delivery of human service programs.

More specifically, the Office of State Health Planning and Development (OSHPD) is responsible for implementing the National Health Planning and Resource Development Act (P.L. 93-641) and licensing and certifying all state medical facilities.

P.L. 93-641 provides for the coordination of health planning efforts at the local, regional, and state levels. In Alaska, this planning effort is coordinated through the OSHPD in conjunction with the three (3) regional health system agencies and the Statewide Health Coordinating Council, who have just completed a proposed State Health Plan. The planning scheme attempts to prevent a duplication of effort and to allow efficient and optimum use of valuable resources. By lending technical assistance and expertise to local and regional planning, a more uniform approach to solving Alaskan health problems will be realized.

The Office of State Health Planning and Development is also responsible for licensing and certifying all state medical facilities. This includes those facilities that are providing part or all levels of care under Medicaid and Medicare.

OFFICE OF INFORMATION SYSTEMS

The new Office of Information Systems (OIS) has retained all of the responsibilities of the data services unit that was located within the former Office of Planning and Research. The main focus of OIS remains progamming and systems analysis for all department divisions and offices. Support is also provided for new department projects that require immediate analysis for decision-making at the division level. OIS also

provides statistical reporting and research for all divisions and offices, so that the ever increasing population will continue to be served effectively by the department and its human services programs.

Under the new organization, the Bureau of Vital Statistics and the State Center for Health and Social Statistics report directly to the Coordinator of OIS. This management scheme provides for the assimilation and distribution of data information within the department on a uniform basis and without duplication of effort. Office of Information Systems is currently developing a common data base for use by the department to provide a more effective long range delivery of services.

OFFICE ON AGING

The Office on Aging increased the numbers of hot meals served to senior Alaskans by more than 20%, and increased the amount of transportation provided to the elderly by the same percentage. New meal sites were developed, or the number of meal sites was increased, in Haines, Hydaburg, Pelican, Petersburg, Sitka, Palmer, the Cook Inlet Native Association in Anchorage, and Nenana. Cordova, Dillingham, and Bethel have new general senior centers, which were provided under Title III.

For the first time, the Department, through the Office on Aging, placed approximately 125 persons age 55 or over in part-time employment under Title IX of the Older Americans Act. These senior citizens work for a maximum of 1,300 hours per year, largely in community service activities, including the provision of in-home services for other elderly citizens.

In those areas where the federal government has built housing for the elderly, the Office on Aging has attempted to provide a network of services based in the home community to help senior citizens remain at home. Programs were started in Juneau, Anchorage, Fairbanks, and Ketchikan.

The Governor's Task Force on Aging met several times during FY 78 under the leadership of the Governor's Division of Policy Development and Planning. The Task Force held public hearings and established specialized sub-groups to examine the needs of the elderly. The effort initiated by the Task Force is being continued by the Department of Health and Social Services in its focus on Alternative Care for Senior Alaskans. As a part of the latter project, the Department made a presentation to the Governor, to public groups, and the House Health, Education and Social Services Committee of the Legislature.

OFFICE OF INTERNAL REVIEW

The Office of Internal Review has the responsibility for: (1) audit of contracts, grants, hospitals and nursing homes funded by the Department; (2) collections of monies owing to the Department where recovery has proven to be difficult; and (3) investigation where fraud is suspected in any of the department programs, but primarily in the Public Assistance programs including Food Stamps and Mediciaid. It is the goal of this unit to reduce unauthorized expenditure of federal and state tax dollars by identifying overpayments made to contractors, grantees, and medical providers; to recover funds identified as owing to the department; and to reduce fraud through vigorous prosecution of persons found claiming

benefits as a result of willful mispresentation. A system to identify and recover funds where third party liability exists for medical services is being developed.

BOARD OF PAROLE

The Parole Board staff during FY 78 continued to provide professional support and training for the members of the Board of Parole and the staff of the Division of Corrections. Staff maintained files, conducted hearings, and administered the operation of the parole system in Alaska.

Staff also continued to provide expertise for policies and procedures development as well as administrative, research and clerical support.

EMPLOYMENT

Total number of employees authorized on July 1, 1978	1,741
Total number of permanent employees on July 1, 1978	1,686

DEPARTMENT OF EDUCATION

2-2-79

Dept. of Education Commissioner Marshall Lind gave an overview of the Dept. of Education. They have a 7 member state board and a 2 member advisory board: a student and a military person.

Nat Cole -- soon to retire
Dick Engen -- Library and Museum
Marilou Madden -- education
Bill Thompson -- not present
Ernest Polley -- Research and Planning
Bill Branble -- Educational TV
Harry Gamble -- public information
Bob Green -- Superintendant of Schools
Susan Stichell -- teachers

The role of DOE is a "nebulous area". They work closely with school boards. There is no statutory relationship between DOE and U of A.

DICK ENGEN - Film library has 14,000 films available (regional coordinator in Anchorage and Fairbanks. Serves all age groups. Direct service.
MARILOU MADDEN - Director, Educational Program. Division that works with teachers. Elementary and secondary. Correspondence studies, assisting school districts. Vocational rehabilitation. Provides information to schools to better their programs. 12 districts run their own correspondence study programs aside from the statewide program. The Alaska Skill Center falls under this program. In 1969 it was tied with federal dollars.
$110 million construction passed last session.
CHAT: Asked about the Alaska Skill Center. Said that some people feel we do not have adequate training facilities for Alaskan jobs.
LIND: We don't have to rely so much on federal money, we now have state General Fund money and the program is open to anyone who has the money to attend.
NAT COLE: Division of Management, Law and Finance.

This Division pays bills, administrative functions, record keeping, distributes statutes, all funding to public schools. Takes care of the planning, implementation and school construction and school transportation.

NAT COLE: This Division also takes care of accounting manuals and certification of teachers. The basic procedure -- expenditure of funds, makes plans, REAA recommendations to Governor, reimbursements to districts.

REP. HURLBERT: Does the certification of teachers supercede school board certificates?

COLE: All teachers must be certified by the Dept. of Education. Must have B.A. Bacheler's Degree. All papers submitted are reviewed. It is the responsibility of the individuel to have certificate.

BARNES: Molly Hootch case?

Consent of court-- option of local community to say whether they want a school or not. Settled out of court.

BARNES: Said she would like a list of schools that have been built under Molly Hootch. On a square foot basis and how many students.

COLE: We just received information. Some available statistics.

BILL BRAMBLE -- Educational Telecommunications.

Jennifer Wilke is the Director of project-video tape. Satellite Demonstration Porject. 20 to 25 hours a week in demo project.

Three major facets: 1. Administrative Communications Network. Takes care of administrative problems. Has electronic mail system -- connects all schools to pass information. On national basis too. 2. Facilitate 3. Preparing support component for small high schools. Gives them a broader circulum for schools with limited teachers. Student management system.

MUNSON: Asked if there were evaluations on the use of television instruction and education.

BRAMBLE: J. Wilke put together a package on the use of television. Cost effective apprcach.

BUCHHOLDT: No contributions from Local Districts?

LIND: Yes. They are making contributions. At one time we were asking for cash contributions, but not direct cash. Either they contribute or they pay the extra costs assumed in telecomm. lines.

ERNEST POLLEY: State Dept. of transportation and public facilities: State operated network from Fairbanks to Kenai. Have to pay t[illegible]ecommunications line costs. Local costs went up after the RCA increases.
CONCLUSION: Review Task Force was put together and working for almost one year. They have completed their review. One review done by feds the others are state agencies.
Dept. of Education not asking for any new monies. They are concerned with the present format.

Committee on Judiciary

Pouch V
State Capitol
Juneau, Alaska 99811

Official Business

MEMO: March 29, 1979

TO: Representative Ramona Barnes

FROM: Charlie Parr, Chairman CP

RE: Interim Participation

During the interim the Committee will be investigating a number of areas in the broad fields of law enforcement and justice. I need to prepare a proposed schedule and budget for submission to the Legislative Council.

The amount of work we do (and the budget) will depend in large measure on how many members of the Committee are available for hearings and work sessions in various parts of the state. The areas of concentration will be largely determined by your perception of what the problems are.

Please let me know:

1. Whether you wish to participate.

2. Whether there are any periods when you will not be able to attend Committee meetings.

3. Your recommendations as to specific matters to be investigated.

4. The names of any groups or individuals who should be notified of Committee hearings.

5. Any other information which you think will be useful in planning the Committee's interim work.

1. Yes
2. Yes When I know an operation, but I can't tell you exactly when that will be -
3. Enclosed a letter I received from Fairbanks Judges re: Thelma Dominion Clerk and the role of Tribal Court Prosecutor.

MEMORANDUM

TO: Representative Charlie Parr, Chairman

FROM: Representative Nels A. Anderson, Jr.

SUBJECT: Interim Committee Activity

1. I do wish to participate in an interim investigatory review of the entire law enforcement and justice system.

2. July and August would be difficult for me.

3. a) We should conduct an oversight review of the Judicial Sentencing Study to assure ourselves that legislative intent is being followed if HB 195 and HB 196 pass and are approved by the Governor.

   b) We should follow the history of several cases from the time of arrest through to final sentence and place of confinement.

   c) We should determine whether or not judges recommendations for rehabilitation are being followed after incarceration.

   d) We should visit the policemen, judges, public defenders, district attornies, law clerks, correctional officers, and the public Safety and Health and Social Services Commissioner.

4. Groups to contact:

   Anchorage Black Caucus
   Anchorage Native Caucus
   Fairbanks Native Association
   Alaska Federation of Natives
   Non-profit Regional Native Associations

The Honorable Charles Parr, Chairman
House Judiciary Committee
Pouch V, Mail Stop 3100
Anchorage, AK 99811

RE: YOUR MEMO TO ME OF MARCH 29, 1979 CONCERNING INTERIM PARTICIPATION

Thank you for your memo dated March 29, 1979.

In answer to your questions:

1. Yes, I do wish to participate.

2. I work during the summer months and it is hard for me to get away to attend meetings during that time. For me, the best month is probably November; however, if adequate notice is given, I could make arrangements to attend meetings.

3. Specific matters to be investigated: Selection of jury and judges as a whole; slowness of the process; administration of court system in Anchorage.

4. Names of groups of individuals to be notified: Lee Jordan, Editor, Chugiak-Eagle River Star, PO Box 1007, Eagle River, AK 99577; Robbie Robinson, Chugiak Community Council, Box 309, Chugiak, AK 99567; Bob Johnson, Eagle River Community Council, PO Box 456, Eagle River, AK 99577; Stephen Dunning, Eagle River Valley Community Council, Box 1644, Anchorage, AK 99510; Tom Henry, Birchwood Community Council, SRA Box 760, Chugiak, AK 99567; Rex Campbell, North Mt. View Community Council, 819 N. Klevin, Anchorage, AK 99504; Fred Selkregg, Northeast Anchorage Community Council, 5811 Radcliffe, Anchorage, AK 99504; Gene Buck, Russian Jack Park Community Council, 5222 East 24th Avenue, Anchorage, AK 99504; Kathleen Bush, 6631 East Eighth, Anchorage, AK 99504; The Brown Family, 442 South Flower, Anchorage, AK 99504; Clifford and Jane Bissell, Box 656, Eagle River, AK 99577; Marion E. Daley, PO Box 108, Chugiak, AK 99567; Mike Briggs, Esq., Ely, Guess & Rudd, 510 L Street, Anchorage, AK 99501.

5. Other information: I would like to have hearings at following areas in House District 8 -- Eagle River, Mt. View, Muldoon, Nunaka Valley.

If you need further information, please do not hesitate to contact me.

Best Regards,

Randy Phillips
State Representative

RP:js

Alaska State Legislature
House of Representatives

April 2, 1979

To Rep. Charlie Parr

From Rep. Thelma Buchholdt

Subject Judiciary Committee Interim Activity

Yes, I'd like to participate in the interim work of the House Judiciary Committee.

I'll be available to attend hearings in and out of the state, except during the following:

June 16-30; July 1-13; August 20-26; September 16-30;

October 1-6; November 21-24; December 22-31.

Specific topics that I want considered include the following:

POLICE: Ethics, Recruitment, Training, Organization, Funding Source.

Because of the importance of public confidence in our policemen/state troopers, we must be sensitive to how the general public views our police. Working with respected policemen from all parts of Alaska, the Committee should review police behavior, recruitment policy, training programs and staffing, working relations of local and state officers, budgetary needs and sources.

Additionally, the Committee should become familiar with law enforcement priorities, and how such priorities get set.

PRISON: Public policy in Alaska has historically opposed the construction of a maximum security prison, and prison classification staff has awesome power to transfer men and women to outside facilities. Is this power being used wisely? Because of the importance of public confidence in fair and just punishment, the Committee should discuss prisoner classification with respected correctional officials with a view of recommending appropriate legislative action.

The Committee should also research ways at expanding reliable alternatives to institutionalizing convicted felons, including penitential employment on public works projects.

PAROLE: Parole is the most commonly-used alternative to jail, and our parole system should be reviewed by the Committee to see if it is functioning effectively as a re-entry program.

EQUAL JUSTICE: We know from recent judicial studies that certain groups of people wind up in jail faster than others. The Committee should strive to determine the degree to which justice now obtains in law enforcement, in the courts, and in the correctional institutions.

There is that hope in the New Criminal Code which may help to correct previous inequities in the system. But the Committee should maintain that there is plenty of work yet to be done to straighten out the problems spelled out in the sentencing studies.

GROUPS TO BE NOTIFIED OF HEARINGS:

Commission on the Status of Women
League of Women Voters
Alaska Legal Services
N.A.A.C.P.
Alaska Black Caucus
All Alaska Native organizations
PTA groups
AkPIRG
Other minority group organizations
In District 9 for hearings in Anchorage:

Spenard Community Council (Myron Igtanloc)
Turnagain Community Council (Wilda Marston)

Note: I'm particularly interested in working on the topics listed on the first page, as what happens between the arresting officer and the suspect, I believe, may determine the trend that follows thereafter to the defendant, the inmate, the parolee.

Needless to say, public confidence with the correctional/judicial system has to be maintained, perhaps restored.

Here's to hard labor during the interim!

****

Judiciary Committee Interim Activity

Questions Need Answers

Police Ethics: Are Alaskan police behaving as they should? Hear and review complaints about police behavior and administration.

Police Training: Review of training programs and opportunities. What can be learned of police attitudes from training curricula and training staff?

Police Organization: Relationships between local police and state troopers; probation officers; federal marshall and other law enforcement officers (FBI, etc.)

Communication systems; cooperation between agencies.

Police Funding Sources: Personnel; equipment; state and federal budget;(LEAA, Peace Officers groups, etc.)

Law enforcement priorities: How crimes get classified (when does it suit the victim, the offender?); How are police handling narcotic-related crimes(alcohol-related crimes) in order of priorities?

Public Defender Agency: How much time is spent by a Public Defender with his client during pre-trial, during trial, etc.

Judges: qualifications; selection; early retirement incentives(?); Constitutional changes on salary schedule; etc.

Bails: how set are they for specific crime; bail bonding agencies;

Parole Board: criteria in releasing an inmate for parole; quality of decisions made by the board.

Jury: how much influence on punishment for crime committed; selection, certain groups of people seem to be serving more often than others (except those excused due to professional constraints).

General Public: What is the public perception of certain crimes and appropriate punishment; priorities in law enforcement.

(1)

EDUCATION

It is time now for the Legislature to investigate what has become a steady stream of complaints about the state in which ~~the~~ Alaska's education industry finds itself after several years of generous fiscal support. Now, after years of being fairly unanimously urged to fund without much question ~~all of~~ the budget requests submitted by education progarm administrators, the Legislature is being asked to adopt a more critical view of ~~the education priorities we are having to fund~~ education as we must ~~face~~ begin to ~~have to~~ deal with problems of widespread adult illiteracy. This is a real political problem because the education industry does not ~~accept~~ gracefully accept critical views. However, the House ~~Education Sub~~ HESS Committee will accept responsibility to bring the following aspects of public education under critical review during the interim:

1) Federal and State and local Funding Sources. There must be more public understanding of funding sources available to local school districts. Some critics feel these are so numerous and uncoordinated as to make education program administrators unaccountable to ~~political~~ our political leadership on our local school boards, borough assemblies, and the Legislature. The Committee will focus upon the school systems of the Ketchikan Gateway ~~Borough, the Anchorage Unified Municipality~~ selected REAA's, and the North Slope Borough to learn how improved education program funding systems might contribute to improved education. ~~formula (Gateway, Anchorage, Juneau)~~ ~~weight~~ the base instructional unit

~~)//Children in K to 12 - The Committee will try to evaluate the problems of education in our communities. Are our kids learning to read and write? How many are not? Is there a growing attendance problem? Is illiteracy part of this problem? How well do our kids do compared with other parts of the country? What about these educational achievement~~

2) Children in K to 12 grades - The Committee will try to evaluate the problems of education in our communities. Are our kids learning to read and write? How many are not? Is there a growing attendance problem? Is illiteracy part of this problem? How well do our kids do compared with other parts of the country? What about these educational achievement

tests? Can they be trusted, or are they written to mask the failure of our schools as many feel? What do our kids think of their schools? And our truants and drop-outs - what do they think of our schools? What do their parents think? What educational alternatives are there to help them continue their education?

3) Teacher Recruitment and Pay. There are many questions being asked about how teachers are recruited, and how much they are paid. The public's image of teaching has moved from one of an inadequately paid profession to one of a well-paid profession, one in which too few Alaskans have been encouraged to enter as Alaska's education industry has become a $000-million industry employing _____ teachers and administrators, as well as _____ non-professional support personnel. What about local hire in education, one of Alaska's largest industries? How can this be improved? And for those teachers we must continue to recruit from outside, how can we improve recruitment to insure we employ only the best teachers available? How might the University of Alaska help toward the training and employment of Alaskan teachers, and improved outside teacher recruitment?

4) School Administration. There is a widely-shared perception of rapid growth of the number of educational program administrators employed in Alaska's education industry whose combined strength has weakened the role of the School Board as a moderating influence in the growth of this industry. What is the truth of these perceptions? How well are the School Boards making educational policy? Is rapid growth in the ranks of school administrators a sign of School Board weakness to resist inflationary costs? How many administrators are there? What are they paid? What do they do? How are they typically recruited, and from where? How do they relate with classroom teachers? What do classroom teachers think about the rapidly expanded corps of administrators? The Committee will focus upon educational administration as a much-complained of problem affecting influencing educational failure in Alaska.

5) Foundation Program. The Schools Foundation Program has been amended to provide sharp increases of State support annually for several years. ~~every year since 1973.~~ Some have suggested local governments are avoiding mill-rate increases by passing on their educational cost increases on to the State treasury. Thus, local jurisdictions have been able to appear fiscally frugal to local property tax payers, ~~some~~ (one going so far as to even begin closing neighborhood schools,) while ~~passing on~~ depending upon annually-increased levels of ~~foundation~~ State foundation support. ~~This was evaded to assist in holding down~~

Right here

Additionally, until the creation ~~The creation~~ and funding of REAA's, ~~has severely~~ compounded this trend into a serious fiscal problem ~~at a time when~~ anticipated ~~unknown~~ educational costs have contributed to State budget growth ~~must be effected sharply reduced.~~ ~~What are the factors contributing to annual increases in State foundation~~ for FY 88 up to 10% bi annually.

Is the Foundation Program in need of overhaul? The Committee will seek answers to this question in an effort to ~~retain/prevent~~ make Foundation support equitable to everyone.

6) Rural School Construction, Operation and Maintenance - The Committee will undertake to study and comprehend the economic and problems of rural village school construction, operation and maintenance as it has become a major budget consideration ~~in future~~ about which too little is understood. What are the politics and economics of village high school construction? Have village school construction and O&M estimates proved reliable in the past? What has been the experience with cost-overruns, and what caused them? ~~What information does the state have projections~~ ~~Any~~ What is the real square-foot cost of village school operation and maintenance? How have village high school stood up to wear and tear so far? What are the outstanding and most difficult O&M problems? What about heat. How will new village high schools affect rural Alaska's need for fuel? ~~Is~~ Will there be enough, or will village homes have to compete with

schools for fuel? What is the life-cycle cost estimate of village schools, and what is being done to try to reduce it? Why are these schools so important to ŧĦ¢/ɣIIIȺ rural Alaska? How is a village school used? WĦȺŧ/ɨɱƥȺ¢ŧ/ɣIII ȵ¢W/ɣIIIȺɠ¢/ƨ¢ĦƥƥI/ƒȺ¢ɄIIɣ/ĦȺɣ¢/Ʉƥƥȵ Against the background of perceptible political reaction against capital expenditure for ɣ new village high schools, the Committee will try to determine their real monetary cost, as well as the costs to be incurred if the schools are not built and operated as planned.

7) Small High School Programs. The Committee will respond to growing ƥƥIIɪɪ¢ȺI/ƥɣƥƥƨɪɪɪƥȵ/ŧƥ criticism that Alaska's small high school program operated by our new REAA School Boards are providing substandard high school educations, and turning out graduates unable to read or write properly. How are small village high school designed, and for what are they designed? How is curriculum designed and used, and how relevent are small high school curricu' to community needs?ȺȵȺ/ƥɪƥɣIɪ¢ȵƨ?/

How are these small high schools staffed? w are teachers and administrators recruited, and from where? How do they perform? How are they regarded by their communities? How long do they stay? How much are they paid? How well are small school organized and managed? What alternatives exist for rural high school students who do not want to attend small village high schools? ȺɠȺIȵƨɪ/Ⱥ/ɪIƨIȵg/ ȺIƨ¢ƥȵɪ¢ȵɪ What do small high school students and their parents think of their experience? Many Alaskans feel the small high school program produces the world's most expensive high schools and the most poorly educated high school ƨŧȵȺ¢ȵɪƨ?/ students fluent and literate in neither English or their Native languages. The Committee will determine how true this may be, but it will also seek to learn what is good about the small high school program, and how it can be Ⱥ impreved.

8) Youth Centers . The Committee will respond to the continuing requests for a State-supported youth center program. Many communities throughout Alaska, both urban and rural, feel the need for stability and direction it is felt a good youth center program could provide to increasingly unemployed and unemployable young people both in and out of school. Youth Centers are being advanced as more as community education and guidance programs rather than as merely recreation and social centers. At a time when Alaska can must sharply restrict budget growth, what is the proper policy we should adopt regarding State support of community youth center construction and operation? The Committee will seek out/assistance to determine if Alaska's social + education investment should provide for community youth centers.

9) Adult Basic Education. Increasing educational program failure produces increased need for adult basic education, an activity now in shared between the U. of A. and several non-profit education corporations ~~UEOS~~ especially in rural Alaska. As/this/was/true/of/all/education/ in/rural/Alaska/ The Committee will review ABE in Alaska to determine how it might be improved to mitigate increasing failure to properly educate children. It may be we must face up with the necessity to provide local for local District ABE programs.

10) Community Schools Program. Slated for termination as a State-funded program, the Community Schools Program proved to have a large and effective constituency able to convince this Committee to extend the program's support one more year, with the understanding the Legislature would study the Community Schools Program as/a/candidate/for/permanent/inclusion/in the/foundation/program to make recommendations about its future. The Committee has noted the great political popularity of Community Schools, but has also noted apparent abuses of Program funds by some ~~school~~s administrators.

University of Alaska Research Programs - As the industrialization of knowedge develops throughout Alaska, the role of the University of Alaska as a subsidized competitor in the private knowledge market

must be fairly defined and possibly restricted if the market benefits of free enterprise are to be realized by our State.

Professional businessmen throughout the State have argued they should not have to compete with the University of Alaska for consultant planning, program evaluation, industrial, economic, and environmental analysis, and architectural and engineering, and other services. Yet many of our University's best programs flourish because of their involvement in the real competitive world of private industry. Should restrictions be placed on this involvement? Should the U. of A. be allowed to compete with private industry for State contracts? If so, under what terms? This is a public policy question of growing importance, and the Committee will work to prepare a policy recommendation.

HESS Committee Chair

SUBJECT: Proposed Interim Work of the HESS Committee

Traditionally, a legislator who winds up on the Health, Education and Social Services Committee is labelled a "bleeding heart" who approves, with great ease, the funding of everything that comes along, from day care to senior citizens programs, schools and numerous other social and human services needs.

During these penny-pinching times, even programs that tug at the heartstrings require as much scrutiny and justification as all others. In fact, more so than others, because historically, nobody wants to check them out for fear of treading into "sacred grounds". The H.E.S.S. Committee recognizes that in poking around for facts and public input during the interim, there will be some treading on tender, sensitive areas which will need to be addressed delicately as much as possible. But at the same time, to quote a recently-expired newspaper, "Sacred Cows make the best hamburger", and certainly, the H.E.S.S. Committee will not spare any sacred cow that cannot justify its existence.

The H.E.S.S. Committee proposes to work on certain bills presently in committee and others that will be introduced next session. Additionally, work topics will include, but will not be limited to, the following:

HEALTH AND SOCIAL SERVICES ISSUES

Alcoholism programs - review of local agencies and educational programs. (HB-219)

Senior Citizens Programs:

Multipurpose Senior Citizens Center
Alternative residential facilities

The H.E.S.S. Committee will work with the Judiciary Committee in its review of the program under the Division of Corrections.

1) Police: Ethics, Recruitment, Training, Organization, Funding Source.

Because of the importance of public confidence in our policemen/state troopers, we must be sensitive to how the general public views our police. Working with respected policemen from all parts of Alaska, the Committee should review police behavior, recruitment policy, training programs and staffing, working relations of local and state officers, budgetary needs and sources.

Additionally, the Committee should become familiar with law enforcement priorities, and how such priorities get set.

2) Prison: Public policy in Alaska has historically opposed the construction of a maximum security prison, and prison classification staff has awesome power to transfer men and women to outside facilities. Is this power being used wisely? Because of the importance of public confidence in fair and just punishment, the Committee should discuss prisoner classification with respected correctional officials with a view of recommending appropriate legislative action.

The Committee should also research ways at expanding reliable alternatives to institutionalizing convicted felons, including penitential employment on public works projects.

jail, and our parole system should be reviewed by the Committee to see if it is functioning effectively as a re-entry program.

EDUCATION

1) Federal and State Funding Sources

2) Children in Grades K to 12:

   Attendance
   Basics
   Extracurricular activities
   Special Education alternatives

3) Teacher Recruitment and Pay

   Local hire first
   Outside recruitment
   (Employ the best from outside)

4) School Administration

   School Boards and Policy
   Positions and Pay Structure

5) Foundation Program (HB-126; HB-222; HB-333)

   Urban support
   Rural support

6) School Construction, Repairs and Improvement

   a) Urban schools
      Rural schools
      Problems of village school construction in the unorganized borough; in the organized borough.

   b) Review of small high schools

      Design
      Curriculum
      Staffing
      Organization and Management
      Alternatives

7) Youth Centers (HB-125)

8) Adult Basic Education

Traditionally, a legislator who winds up on the Health, Education and Social Services Committee is labelled a "bleeding heart" who approves, with great ease, the funding of everything that comes along, from day care to senior citizens programs, schools and numerous other social and human services needs.

During these penny-pinching times, even programs that tug at the heartstrings require as much scrutiny and justification as all others. In fact, more so than others, because historically, nobody wants to check them out for fear of treading into "sacred grounds". The H.E.S.S. Committee recognizes that in poking around for facts and public input during the interim, there will be some treading on tender, sensitive areas which will need to be addressed delicately as much as possible. But at the same time, to quote a recently-expired newspaper, "Sacred Cows make the best hamburger", and certainly, the H.E.S.S. Committee will not spare any sacred cow that cannot justify its existence.

The H.E.S.S. Committee proposes to work on certain bills presently in committee and others that will be introduced next session. Additionally, work topics will include, but will not be limited to, the following:

HEALTH AND SOCIAL SERVICES ISSUES

Alcoholism programs - review of local agencies and educational programs. (HB-219)

Senior Citizens Programs:

Multipurpose Senior Citizens Center
Alternative residential facilities

The H.E.S.S. Committee will work with the Judiciary Committee in its review of the program under the Division of Corrections.

1) Police: Ethics, Recruitment, Training, Organization, Funding Source.

Because of the importance of public confidence in our policemen/state troopers, we must be sensitive to how the general public views our police. Working with respected policemen from all parts of Alaska, the Committee should review police behavior, recruitment policy, training programs and staffing, working relations of local and state officers, budgetary needs and sources.

Additionally, the Committee should become familiar with law enforcement priorities, and how such priorities get set.

2) Prison: Public policy in Alaska has historically opposed the construction of a maximum security prison, and prison classification staff has awesome power to transfer men and women to outside facilities. Is this power being used wisely? Because of the importance of public confidence in fair and just punishment, the Committee should discuss prisoner classification with respected correctional officials with a view of recommending appropriate legislative action.

The Committee should also research ways at expanding reliable alternatives to institutionalizing convicted felons, including penitential employment on public works projects.

3) Parole: Parole is the most commonly-used alternative to jail, and our parole system should be reviewed by the Committee to see if it is functioning effectively as a re-entry program.

EDUCATION

It is time now for the Legislature to investigate what has become a steady stream of complaints about the State in which Alaska's education industry finds itself after several years of generous fiscal support. Now, after years of being fairly unanimously urged to fund without much question, the budget requests submitted by education program administrators, the Legislature is being asked to adopt a more critical view of education as we must begin to deal with problems of widespread adult illiteracy. This is a real political problem because the education industry does not gracefully accept critical views. However, the House HESS Committee will accept responsibility to bring the following aspects of public education under critical review during the interim:

1) Federal, State and Local Funding Sources. There must be more public understanding of funding sources available to local school districts. Some critics feel these are so numerous and uncorrdinated as to make education program administrators unaccountable to our political leadership on our local school boards, borough assemblies, and the Legislature. The Committee will focus upon the school systems on the base instructional unit formula (Gateway, Anchorage, Juneau), selected REAA's and the North Slope Borough to learn how improved education program funding systems might contribute to improved education.

2) Children in Grades K to 12. The Committee will try to evaluate the problems of education in our communities. Are our kids learning to read and write? How many are not? Is there a growing attendance problem? Is illiteracy part of this problem? How well do our kids do compared with other parts of the country? What about these

educational achievement tests? Can they be trusted, or are they written to mask the failure of our schools as many feel? What do our kids think of their schools? and our truants and drop-outs -- what do they think of our schools? What do their parents think? What educational alternatives are there to help them continue their education?

3) Teacher Recruitment and Pay. There are many questions being asked about how teachers are recruited, and how much they are paid. The public's image of teaching has moved from one of an inadequately paid profession to one of a well-paid profession, one in which too few Alaskans have been encouraged to enter as Alaska's education industry has become a $500,000,000 industry employing 4,000 teachers and administrators, as well as 4,000 non-professional support personnel. What about local hire in education, one of Alaska's largest industries? How can this be improved? And for those teachers we must continue to recruit from outside, how can we improve recruitment to insure we employ only the best teachers available? How might the University of Alaska help toward the training and employment of Alaskan teachers, and improved outside teacher recruitment?

4) School Administration. There is a widely-shared perception of rapid growth of the number of educational program administrators employed in Alaska's education industry whose combined strength has weakened the role of the School Board as a moderating influence in the growth of this industry. What is the truth of these perceptions? How well are the School Boards making educational policy? Is rapid growth in the ranks of school administrators a sign of School Board weakness to resist inflationary costs? How many administrators are there? What are they paid? What do they do? How are they typically recruited, and from where? How do they relate with classroom teachers? What do classroom teachers think about the rapidly expanded corps of administrators? The Committee will focus upon educational administration as a much-complained of problem influencing educational failure in Alaska.

5) Foundation Program. The School Foundation Program has been amended to provide sharp increases of State support annually for several years. Some have suggested local governments are avoiding mill-rate increases by passing on their educational cost increases on to the State treasury. Thus, local jurisdictions have been able to appear fiscally frugal to local property tax payers, (one going as far as to even begin closing neighborhood schools), while depending upon annually-increased levels of State

foundation support. Additionally, with the creation and funding of REAA's, anticipated and extraordinary costs have contributed to State budget growth up to 10% biannually. Is the Foundation Program in need of overhaul? The Committee will seek answers to this question in an effort to make Foundation support equitable to everyone.

6) Rural School Construction, Operation and Maintenance. The Committee will undertake to study and comprehend the economic and problems of rural village school construction, operation and maintenance as it has become a major budget consideration about which too little is understood. What are the politics and economics of village high school construction? Have village school construction and Operation and Maintenance estimates proved reliable in the past? What has been the experience with cost-overruns, and what caused them? What is the real square-foot cost of village school operation and maintenance? How have village high schools stood up to wear and tear so far? What are the outstanding and most difficult operation and maintenance problems? What about heat? How will new village high schools affect rural Alaska's need for fuel? Will there be enough, or will village homes have to compete with schools for fuel? What is the life-cycle cost estimate of village schools, and what is being done to try to reduce it? Why are these schools so important to rural Alaska? How is a village school used? Against the background of perceptible political reaction against capital expenditure for new village high schools, the Committee will try to determine their real monetary cost, as well as the costs to be incurred if the schools are not built and operated as planned.

7) Small High School Programs. The Committee will respond to growing criticism that Alaska's small high school program operated by our new REAA School Boards are providing substandard high school educations, and turning out graduates unable to read or write properly. How are small village high schools designed, and for what are they designed? How is curriculum designed and used, and how relevant are small high school curricula to community needs? How are these small high schools staffed? How are teachers and administrators recruited, and from where? How do they perform? How are they regarded by their communities? How long do they stay? How much are they paid? How well are small schools organized and managed? What alternatives exist for rural high school students who do not want to attend small village high schools? What do small high school students and their parents think of

their experience? Many Alaskans feel the small high school program produced the world's most expensive high schools and the most poorly educated high school students fluent and literate in neither English or their Native languages. The Committee will determine how true this may be, but it will also seek to learn what is good about the small high school program, and how it can be improved.

8) Youth Centers. The Committee will respond to the continuing requests for a State-supported youth center program. Many communities throughout Alaska, both urban and rural, feel the need for stability and direction -- it is felt a good youth center program could provide to increasingly unemployed and unemployable young people both in and out of school. Youth Centers are being advanced more as community education and guidance programs rather than as merely recreation and social centers. At a time when Alaska must sharply restrict budget growth, what is the proper policy we should adopt regarding State support of community youth center construction and operation? The Committee will seek to determine if Alaska's social and education investment should provide for community youth centers.

9) Adult Basic Education. Increasing educational program failure produces increased need for adult basic education, an activity now shared between the University of Alaska and several non-profit corporations especially in rural Alaska. The Committee will review Adult Basic Education in Alaska to determine how it might be improved to mitigate increasing failure to properly educate children. It may be that we must face up with the necessity to provide for local District ABE programs.

10) Community Schools Program. Slated for termination as a State-funded program, the Community Schools Program proved to have a large and effective constituency able to convince this Committee to extend the program's support one more year, with the understanding the Legislature would study the Community Schools Program to make recommendations about its future. The Committee has noted the great political popularity of Community Schools, but has also noted apparent abuses of Program funds by some administrators.

11) University of Alaska Research Programs. As the industrialization of knowledge develops throughout Alaska, the role of the University of Alaska as a subsidized competitor in the private knowledge market must be fairly defined and possibly restricted if the market benefits of free enterprise are to be realized by our State. Professional businessmen throughout the State have argued they should not

have to compete with the University of Alaska for consultant planning, program evaluation, industrial, economic, and environmental analysis, architectural and engineering, and other services. Yet many of our University's best programs flourish because of their involvement in the real competitive world of private industry. Should restrictions be placed on this involvement? Should the University of Alaska be allowed to compete with private industry for State contracts? If so, under what terms? This is a public policy question of growing importance, and the Committee will work to prepare a policy recommendation.

VII APPENDIX

TABLE I - SUMMARY OF STATE LEGISLATIVE OPTIONS TO EXPAND COMPREHENSIVE HEALTH CARE COVERAGE

	Program	Who It Would Cover	State Administrative Tasks	Estimated Annual Premium Costs To The State*	Other Payers
1.	Universal State sponsored coverage	All state residents without federal health coverage (267,500)	Verification of residency, enrollment, accounting, and financing	$87 million (if 100% subsidized)	Taxpayers (optional cost sharing with subscribers)
2.	State sponsored coverage for the uncovered	All state residents not covered under other public or private plans and their dependents (56,000-71,000 estimated)	Eligibility determination, enrollment, accounting, and financing	$27 - $41 million (if 100% subsidized)	Taxpayers (optional cost sharing with subscribers)
3.	State sponsored coverage for non-wage earners without coverage from public sources	The unemployed, self-employed, and the non-labor force and their dependents (60,000 estimated)	Eligibility, determination, enrollment, accounting, and financing	$25 million (if 100% subsidized)	Taxpayers (optional cost sharing with subscribers)
4.	Income tax credit	All residents filing tax returns (124,000 estimated) and their dependents	Negligible	$21 million (assuming a flat $250 credit)	Taxpayers and subscribers
5.	Medicaid medically needy program	Categorically needy with income above the public assistance level (1,580 estimated)	Eligibility determination, enrollment, accounting, and financing	$1.1 - $1.4 million (cost savings in GRM not included)	Federal government, federal taxpayers, and Alaska taxpayers
6.	Mandatory employer coverage	All non-agricultural wage and salary employed people, and their dependents (200,000 estimated)	Regulation of Employers	$0 (state cost sharing optional)	Employers and their clients (optional cost sharing with subscribers)
7.	High risk reinsurance pool	People who are unable to obtain health insurance at a reasonable premium due to health conditions	Investigation on a complaint basis	$0 (state cost sharing optional)	Subscribers, insurance companies and their clients
8.	Health insurance regulation	Better coverage for current subscribers; possible decline in the number of low-income subscribers	Regulation of carriers	$0	Subscribers (including employers and other sponsors)

* These estimates are based on estimates of the current extent of coverage. Presumably alternatives 2, 3, & 4 would provide incentives for increasing health coverage, and therefore the state's premium costs would tend to rise over time.

Prepared by Legislative Affairs Agency Research Division 2/17/78

TABLE II ESTIMATED PREMIUM COSTS OF STATE-WIDE HEALTH COVERAGE WITH BENEFITS EQUIVALENT TO THE STATE EMPLOYEE HEALTH PLAN

Total FY '77 Civilian Population	398,000
U. S. Public Health Service Eligibles	(70,000)
CHAMPUS Eligibles	(55,000)
Medicaid Eligibles (excluding USPHS)	(5,500)
Eligible Population	267,500

	19 and Under (32.5%)	Over 19 (67.5%)
Number eligible	86,900	180,600
Premium Rate	$12.40	$34.10
Monthly Premium	$1,078,000	$6,158,000

ESTIMATED ANNUAL PREMIUM $86,800,000

TABLE III ESTIMATED RANGE OF INITIAL[1] PREMIUM COSTS OF HEALTH COVERAGE FOR THE UNCOVERED POPULATION

	High	Low
Uncovered Population	71,000	56,000
19 and Under (32%)	23,000	18,000
Premium Rate[2]	$22.00	$19.00
Monthly Premium	$506,000	$342,000
Over 19 (68%)	48,000	38,000
Premium Rate [2]	$60.00	$51.00
Monthly Premium	$2,880,000	$1,938,000
ESTIMATED ANNUAL PREMIUM	$41,000,000	$27,000,000

1. These costs would approach the cost of universal coverage over time, as private subscribers opt for state subsidized coverage.

2. The estimated premium rate for state wide coverage, +50 to 75%. See Blue Cross memo which follows.

TABLE IV ESTIMATED RANGE OF PREMIUM COSTS OF HEALTH COVERAGE FOR NON-WAGE EARNERS AND DEPENDENTS WITHOUT HEALTH COVERAGE FROM PUBLIC SOURCES

Unemployed	18,300
Self-employed	15,000
Non-labor Force	244,000
Wage earner dependents	(105,000)
CHAMPUS eligibles	(46,000)
Medicaid eligibles	(14,800)
U. S. Public Health Service Eligibles	(31,500)
TOTAL	60,000

	High (+20%)	Low (+20%)
19 and Under (32.5%)		19,500
Premium Rate	$16.12	$14.88
Monthly Premium	$314,000	$290,000
Over 19 (67.5%)		40,500
Premium Rate	$44.33	$40.92
Monthly Premium	$1,795,000	$1,657,000
TOTAL ANNUAL PREMIUM	$25,300,000	$23,400,000

TABLE V ESTIMATED COST OF INCOME TAX CREDIT FOR PRIVATE HEALTH COVERAGE

Tax Returns Filed	124,000
Filers with Private Health Coverage (68.5%)	85,000
Annual Tax Credit	$250.00
TOTAL	$21,000,000

Blue Cross®
of Washington and Alaska

Ms. Sharman Haley
Research Analyst
Legislative Affairs Agency
State of Alaska
Pouch Y, State Capitol
Juneau, Alaska 99811

Dear Sharman:

On September 29, you requested information concerning projected costs of a Blue Cross medical package for various classifications of State residents.

Three alternative approaches were requested in your letter. The attached proposal is applicable only for the first alternative, "coverage for all residents". The second alternative, to cover "all residents not currently covered under comprehensive group health plans", would present problems in defining and administering eligibility and in developing a controlled risk. Rates for the second alternative would probably be 50% to 75% higher than the rates for the first alternative.

The third alternative, to cover "the unemployed, the temporarily or seasonally employed, and the self-employed (mandating employer-sponsored coverage for all regular employees and their dependents)", would present fewer problems in controlling risk but would still require rates 20% to 30% higher than the first of the three alternatives and probably would have the least economic impact on the State's health care system.

We recognize that you may have many questions concerning the information contained in this letter. Please give me a call and we will try to help in any way we can.

Sincerely,

John M. Hopkins

JMH:bc

EXHIBIT 'A'

Blue Cross medical coverage extended from the Alaska State Employees to eligible residents of Alaska, given the following assumptions:

I. A resident is a person whose primary residence has been within the State of Alaska for a continuous period of at least six months.

II. An eligible resident is a resident not eligible for medical care benefits available through the following entities:

a. Federal Employee Health Programs
b. United States Armed Forces
c. CHAMPUS
d. Medicaid
e. United States Public Health Service

III. Healthcare benefits would be provided as primary coverage, with the sole exception that the Program be coordinated as secondary coverage to Medicare. Any persons eligible for Medicare and not enrolling in the Medicare Program will receive the same coordinated benefits had they been covered under Medicare.

IV. The State of Alaska would identify all eligible residents and submit necessary eligibility data to the Blue Cross Plan monthly on a computer tape in order that an updated eligibility file could be maintained for the Program. Administration and enforcement of eligibility rules would be the responsibility of the State of Alaska.

V. The State of Alaska would remit, monthly, funds due the Plan based on the eligibility file and contract rates.

VI. At the end of each contract year the Plan would provide a summary of Income, Incurred claims and administrative expenses under the Program. Any surpluses would be refunded to the State of Alaska. Any deficits would become due and payable to the Plan by the State of Alaska. The Plan would provide monthly reports to the State of Alaska during each contract year, itemizing year-to-date income and expense data.

VII. During the initial years of the Program it is likely that abnormally high rates of inflation and increases in utilization of healthcare services will occur. In an attempt to control these anticipated trends and their effects on the cost of the Program, it would be desirable for the State of Alaska to enact legislation to control the expansion of healthcare facilities and to set reasonable limits on the rate of return healthcare providers may be allowed.

continued . . .

VIII. If the first contract year is from 7-1-78 through 6-30-79, one of the following options could be used in determining the monthly funds due to the Plan:

A. Rates by eligible resident-

1. Adult (age 19 and over) = $34.10/month
2. Child (under age 19) = $12.40/month

B. Rates by type of family unit-

1. Single Adult = $34.10/month
2. Husband & Wife = $68.20/month
3. Husband,Wife & one or more Children = $96.70/month
4. Husband,or Wife and one or more Children = $62.60/month

C. Rate for any Family Unit = $71.40/month
Each family unit would coincide with one of the categories itemized in section VIII, B., above. Children must be unmarried and meet the IRS definition of a dependent to be considered an eligible member of any covered family unit.

The above rates assume all eligible residents will participate in the Program.

IX. To minimize the chance of duplicate coverage and benefit payments each eligible resident should be assigned a unique membership number under the Program. This procedure would also facilitate computerized surveillance of medical utilization under the Program. Surveillance programs could be used to detect abnormal utilization of benefits by covered members and abnormal patterns of service by healthcare providers.

X. The Program should provide coverage for services rendered within the State of Alaska. For services outside the state, coverage should be limited to emergencies and to referrals by Alaska physicians for conditions that, in the opinion of the attending physician, cannot be adequately treated in the State's healthcare facilities.

MINUTES
House HESS Committee Meeting
3/31/80

Members present:

All members were present at the start of the meeting.

758 The Chair stated that the Committee would be hearing testimony on HB 977, providing comprehensive health care in the state, for most of the week. The first witness would be John Ingrassia, from Minnesota, to talk about how the Minnesota plan resembles one part of HB 977. A Mr. Ching from Hawaii would be with the Committee tomorrow to discuss another section of the bill (he was originally scheduled to come before the Committee today but was unable to get here on time).

802 John G. Ingrassia, Supervisor, Life and Health, Insurance Division, Dept. of Commerce, State of Minnesota

Mr. Ingrassia described the Minnesota health insurance for the Committee. He began his testimony by stating that the most important part of the Minnesota plan that is included in HB 977 is the creation of an association to control expenses incurred through the provision of catastrophic illness coverage. All health insurance carriers would participate in the association and thereby share the risks of the plan. The state would cover the losses of the carriers by allowing them to deduct any losses taken from their tax liability to the state.

There would be three different categories of plans that employers could provide. Insurance carriers could develop several different options for employers to chose from within each category. However, an employee could not pick and choose which items he or she would like his insurance to cover, rather, he or she would have to choose one of the preplanned packages that the insurance company or the employer would present to him. $250,000 would be the maximum life time benefit.

Mr. Ingrassia stated that Alaska might want to consider mandating that all plans include "chemical dependency" coverage as well as coverage for alcoholism. The plans cover treatment for "conditions" such as pregnancy, obesity, etc., as well as coverage for illnesses and diseases.

There would also be a state plan providing minimum benefits that an individual could pay for if he could not find someone to cover him because he had a heartattack or some other serious illness that no one wished to provide further insurance against.

1300 Rep. Miles left the Committee.

The self employed would be covered because they would also qualify for the state plan since they would not be getting a plan from their employer in the private sector.

There would also be a provision in the Act that would allow employees to receive coverage when they are in a period of unemployment.

Mr. Ignassio stressed the point that everyone could get coverage through one form or another, even those who traditionally are not able to because they are high risk investments.

There were several questions from the Committee members on the above subjects. In addition, Rep. Chatterton asked if the Minnesota law was not presently embroiled in a court battle to have its constitutionality determined. Mr. Ingrassia explained that this was indeed the case.

new tape
00 Rep. Munson stated that the Minnesota plan did not require employers to provide insurance but that it required employers to make insurance available.

Mr. Ingrassia stated that there has not been a major influx of people into Minnesota to profit from the Act. This had been a fear before enactment that has never materialized.

There were other questions, and the meeting was eventually adjourned for lack of further time to carry on the discussion.

Mr. Ching stated that he was not very optimistic about national health insurance legislation passing Congress because there are too many diverse geographical interests to resolve. Rather, he feels that states should attack the problem on their own and that if a plan does develop that would benefit the country as a whole, then that plan can be lobbied for on a national level. He reiterated his earlier point that maybe the Alaska plan will develop into a prototype for national legislation, or for implementation on a statewide basis in other states. He stated that only time would tell, however, if administrative and other problems would develop.

Mr. Ching stated that the Committee was very likely to run into opposition from insurance companies and that he did not think that there was any way to avoid it.

The Chair asked if there were any people about on the teleconference network that would like to ask a question of Mr. Ching. A person from Nome asked why state employees were exempted from the Act. Mr. Ching stated that they are already covered under a program designed especially for state employees.

1000 Rep. Hurlburt left the Committee room.

Mr. Ching stated that if there was any further assistance that the State of Hawaii could offer in the area of administration of the program or in any other area, it would be forthcoming.

The Chair asked if there was anyone in the audience in Juneau who wished to testify. Since no one responded, the meeting was adjourned.

MINUTES
House HESS Committee
4/1/80

Members present:

Buchholdt, Chair
Munson
Chatterton
Miles
Beirne
Hurlburt

00 The Chair brought the meeting to order. The meeting consisted of a hearing on HB 977, comprehensive state health insurance, that was broadcast over the teleconference network.

95 Donald Ching, Hawaii State Legislator

Mr. Ching came from the State of Hawaii to talk about the similarities and the differences between the existing Hawaii statute and HB 977. He prefaced his remarks by stating that HB 977 was comprehensive and "far reaching" and that it could represent an answer to the people's problems regarding health insurance. He stated that the following provisions were what made the bill comprehensive and more complete than the Hawaii statute: (1) coverage for employee dependents, (2) medicare coverage, (3) coverage for the uninsurable, (4) the establishment of a joint underwriting association, and (5) the allowance of deductibles.

Mr. Ching explained that the Hawaii statute was currently under litigative attack by Standard Oil Company. That suit is presently before the 9th Circuit Appeals Court.

He noted that Hawaii had set up a supplementation fund to pay premiums for employees unable to meet that obligation. He stated that that fund had hardly been touched and that through its investments it had made over $800,000 for the State of Hawaii. He used this as an example of how little money the Hawaii statute was costing the state. He stated that employers pay the biggest chunk of the health insurance costs in Hawaii.

There was a discussion about the fact that around 97% of Hawaii's population is covered by some type of health insurance.

Rep. Hurlburt asked if natives would be able to opt out of the Alaska plan due to existing coverage by the Indian Health Service. Mr. Ching stated that it was his understanding that that would be a "political and social" decision that the Alaska legislature would have to make and that costs would need to be taken into account. The Chair explained that native groups had indicated that they would introduce an amendment to the Act to have the Act treat them as individuals, not as members of a racial group, so that they could receive coverage under it.

Rep. Chatterton asked about dependent coverage. Mr. Ching explained that employees who wish to have dependents covered must pay for the additional premiums themselves. However, he noted that most employers will pick up this tab for their employees.

80C Rep. Miles left the Committee room.

Rep. Beirne asked if Mr. Ching thought that Alaska, given its oil wealth, should pick up 100% of the cost of the bill. Mr. Ching cautioned that the legislators should provide as much as they could, but that they should not get themselves into a position that they could not extricate themselves from without extreme political costs. He stated that they should provide a level of funding that they could support in the bad times as well as the good. "Don't pay too much of the tab in the beginning...", he stated, "you can still be heroes further down the road."

Angie Hague, National Association of Social Workers

She stated that she did not have sufficient time to review the bill but that she supported timely reimbursement of payments to providers of services, dental, prenatal and high risk coverage, coverage for the medically needy, and buying private insurance with medicaid funds.

Penny Hladna, Anchorage

Ms. Hladna supports provisions for the medically needy, alcoholism treatment, routine exams, high risk, cash advance and interest. She also stated that doctors routinely refuse to handle medicaid patients.

Gordon DePew, Fairbanks Life Underwriters Association

Mr. DePew was angry that he had not been informed about the bill; he stated that he received the legislation summary by accident. He said that it was the most inflationary piece of legislation that he had even seen and that it called for coverage exceeding mandatory coverage in six states. He said that the bill woud bankrupt employers. He said that mandatory coverage in a state with so little population would mean that many insurers would leave the state and that small companies would go under.

Bernie Barr, International Rehabilitation Association, Anchorage

Mr. Barr was curious about what coverage for rehabilitation services would be provided. Debby Behr, from H&SS answered that she thought that physical therapy and similar services would be covered.

Gil D'Ihnorente, Anchorage

Mr. D'Ihnorente complained about the short notice given for the hearing. He stated that insurance rates would rise by $100-150 per person.

Candice Berry, Welfare Rights Organization, Anchorage

Ms. Berry voiced her support for the bill. She stated that uninsured poor women currently suffer the most and that only 6% of ob-gyns accept medicaid patients.

Pudge Kleinkoff, National Association of Social Workers

Ms. Kleinkoff supported coverage for poor and otherwise needy people. She stated that she would like to receive a copy of the bill's fiscal note. She also questioned whether coverage for the medically needy would elimiate their coverage under General Relief Medical.

Frank Austin, CEJ, Black Caucus, Anchorage

Mr. Austin endorsed the concept of the bill and stated that he would try to write a position paper for the Committee.

Susan Johnson, Chris Billington, NOW

The witnesses voiced their support for the bill.

Nancy Lander, WPA

Ms. Lander expressed support for the bill. She stated that it should include coverage for mental health problems.

1437 The meeting was adjourned.

MINUTES
House HESS Committee
4/1/80
evening session

Members present:

Buchnoldt, Chair
Munson
Miles
Beirne
Chatterton
Barnes

1219 The meeting consisted of a teleconference on HB 977, an Act providing comprehensive health insurance for the state.

1264 Bill Weimer, Anchorage

Mr. Weimer proposed comprehensive health and dental programs that each citizen would be enrolled in. The programs would be subject to competitive bid proceedings and the state could pay monthly premiums. If there was an adverse impact on employers, state could provide some form of supplementation. This would be a way to distribute the state's wealth equally. Processing of the bill in Alaska would provide more jobs.

There was discussion between the members, the audience and the witness about how much oil wealth the state really has, and how much of it should be spent on health insurance.

Nick Noll, Fairbanks Eye, Ear, Nose & Throat Clinic

Mr. Noll stated that he hadn't had enough time to review the bill.

The Chair asked if he could send written comments, when he has time, especially regarding the proposed medicaid plan and how that would effect the present payment system.

Donald Thieman, Fairbanks Medical Association

Mr. Thieman stated that he had so little notice on the bill that he hadn't had time to prepare any comments.

Chris Beardsly, Providence Hosp., Anchorage

Ms. Beardsley stated that she had just received the bill but she made several comments anyway. She said that it seemed that some employers' liability for premium and withholding payments would be greater than others because of the discrepancy in wage levels. She also stated that the Medicaid sections would reward the physicians and that further work was needed to improve this section. She made several other comments and stated that these would be incorporated into a position paper which she would present to the Committee.

David Mather, Tanana Chiefs Conference

Mr. Mather stated that he had only had time for a cursory review of the bill, but that he very definitely supported its goals.

new tape

Margaret Wolfe , Anchorage

Ms. Wolfe noted that the bill would exclude outpatient mental health care coverage. She also stated that small employers would be severely impacted by the bill. She said that she supports a penalty for late payment of premiums.

page two.

He said that there may be a problem finding enough domestic carriers in the state to provide enough competition to bring about reasonable insurance rates for employers.

new tape 00 There would also be problems with having outside carriers, in terms of getting immediate payments to providers.

There would be cost problems with this outside carrier situation, and also cost problems for the employers.

He concluded his remarks by stating that there may also be other conflicts of law which called for further research, including the possibility that Blue Cross could be excluded from providing coverage in Alaska if HB 977 was enacted.

200 Rep. Miles left the Committee room.

Mr. Koch provided testimony for the Committee that consisted of a section-by-section analysis of the bill. He noted several areas of proposed language change and suggested several interpretations for policy changes that the bill would bring about. He was unable to complete his analysis because of time constraints, and so the Chair asked him to come back and continue his analysis at another hearing. He completed comments on Section 1 of the bill, only.

1350 The meeting was adjourned.

MEETING
House HESS Committee
4/2/80

Members present:

Buchholdt, Chair
Chatterton
Munson
Miles

The meeting consisted of a public hearing on HB 977, an Act providing comprehensive health insurance on a statewide basis.

1442 Don Koch and Jim Jordan, Division of Insurance, Dept. of Commerce

Mr. Koch stated that the Division is not in favor of the bill although it applauds the concept of providing health insurance for all Alaskans. He stated that though the bill was like Hawaii's and Minnesota's legislation, combining those two states' plans and adding a new "Alaskan" section made the bill entirely different from either states' plans and allowed for very little comparison between the other states' plans and HB 977. He stated that the experience of the other two states would not be the same as what would happen in Alaska if HB 977 were enacted.

Mr. Jordan then made several statements to the Committee, addressing several problem areas of the bill from the Division's point of view. He stated that litigation pending against the Minnesota and Hawaii statutes involved issues that were also addressed in HB 977. This would mean that if enacted, HB 977 could also be subjected to litigation. The Hawaii suit centers around who can be considered a self insurer and therefore exempt from the law.

Mr. Jordan brought up two areas of statutory conflict that would be created by enactment of the bill. He said that creation of an underwriting association would conflict with existing law that states that a group may not form for the purpose of becoming insured. The other area of conflict involves the proposed provision to give the director 90 days to certify qualified plans. This conflicts with an existing statute stating that the director can have only 30 days to complete filing of forms.

He further stated that the provisions for determining amounts of employers' contributions to pay for the health insurance are discriminatory. Also, the method of making a determination would be cumbersome, time consuming and costly for the employer.

He said that there could be a problem with a couple that could receive dual coverage. One partner could work for the state and get coverage and the other could work for a private employer and also get coverage. Since coverage in both instances would include dependents, both people would be covered twice. They could conceivably get 100% of their health costs paid under dual coverage, instead of the 80% allowed. They would have to pay double premiums, but conceivably this could be worth it to them if they would get all their health care costs paid.

He stated that the term "prepaid health care" as used in the bill should be changed to provide more specific language to better mesh with the provisions that the phrase is currently found in. The same comments were made about "defray or reimburse".

He asked how employers would be able to comply with the President's wage guidelines and comply with HB 977.

He noted several problems with the premium supplementation section of the bill. He stated that the section may provide payments too late and that there was not enough data to know how often and how much supplementation would be necessary.

SUMMARY OF HEALTH CARE LEGISLATION
HB 977

The first section of the bill requires employers to provide health coverage for their regular employees and to pay at least 50% of the premium cost of such coverage. The health coverage must meet or exceed the standards for a "number two qualified plan" as established in the second section of the bill, and must cover the employee's dependents as well. The employer may choose the type of health plan (insurance, self insurance, medical service contract, etc.) and the carrier, provided that employers with 100 or more employees offer each employee a choice of an insurance type plan or a health maintenance organization contract, where a health maintenance organization exists. The employee's share of the premium is automatically withheld from his or her paycheck and may not exceed the amount the employee would have paid if the employer had chosen the most prevalent type of health care plan in the state. The employer is obligated to continue paying his or her share of the premium even if the employee is sick and unable to work, for up to three months or the period for which the employer must continue to pay wages, which ever is larger. Any employee who works for at least twenty hours per week on the average, and has been employed for at least four consecutive weeks, is to be covered. If the employee has health coverage from another source, such as another employer, a government program, or coverage as a dependent under someone else's health plan, the employer is not liable for health coverage for that employee. The bill specifically provides that employees retain the freedom to bargain collectively for health benefits which may differ from those provided under this legislation.

A small employer who can demonstrate undue financial hardship resulting from the mandatory health coverage is entitled to premium supplementation from the state. To qualify (1) the employer must employ fewer than eight employees, (2) the premium for which the employer is liable must exceed 1.5 percent of the total payroll, and (3) the amount that the employer's cost exceeds 1.5 percent of the payroll must exceed five percent of the employer's income from that business, before taxes. A qualifying employer is entitled to subsidy in the amount that his or her costs exceed these standards.

Employers who cover their Alaska employees in a group plan in which the majority of the covered employees are out-of-state and not covered by the act, are given, in section eight of the bill, an additional year to bring the coverage of their Alaska employees up to the standards mandated in the act.

The law mandating employer sponsored coverage would terminate when it is superseded by federal health insurance legislation.

Section two of the bill establishes state standards for "qualified" health insurance plans, and requires insurance carriers to offer qualified plans to all eligible applicants. The bill does not prohibit the offering or sale of unqualified plans. Qualified plans must include benefits for the following: hospital services, professional services rendered by a physician or at his or her direction, prescription drugs, nursing home services, home health agency services, radium, oxygen, anesthetics, prostheses, medical equipment, x-rays and laboratory tests, oral surgery, physical therapy services, medically necessary transportation, well baby care, routine physical exams, multiphasic screening, and other diagnostic testing. The plan must cover at least 80% of the usual and customary charges for covered services, must limit out-of-pocket expenses at least to $3000 per person annually, and may provide a limit on maximum lifetime benefit of not less than $250,000. A number one qualified plan may have a deductible not exceeding $150 per person or $450 per family. A number two qualified plan may have a deductible not exceeding $500 per person or $1500 per family. A number three qualified plan may have a deductible not exceeding $1000 per person or $3000 per family. A qualified Medicare supplement plan must provide coverage of at least 50% of the Medicare deductible and copayment, provide at least 80% coverage of the services required in a qualified plan which are not covered be Medicare, limit out-of-pocket expenses to no more than $1000 per person per year, and provide for a maximum lifetime benefit of not less than $100,000. The director has authority to upgrade minimum benefit standards by regulation.

The act also offers health insurance coverage to high risk "uninsurable" clients under the state plan. The state plan provides number one, number two, and Medicare supplement qualified plans at premium rates which may not exceeed 125% of the average premium for a normal risk individual. To qualify, a person must present evidence that they have been refused coverage which is available to a person of standard risk by at least two carriers. The person is not covered for a preexisting condition during the first six months of coverage under the state plan if the person was diagnosed or treated for that condition during the 90 days preceeding the filing of an application.

All health insurance carriers in the state are required to participate in a joint underwriting association to pool the risk of the state plan, to publicize the state plan, and to reinsure other coverage mandated by the act. Losses incurred by the association due to the state plan are to be covered through assessments on association members proportional to their volume of health insurance business in the state. Assessments on members may in turn offset the income tax or premium tax payable by that member to the state. Thus the state is ultimately liable for the losses incurred by the operation of the state plan. The association selects one carrier to act as its agent in writing and issuing each type of state plan insurance for a period of at least three years, and reimburses the carrier or carriers for their expenses.

The act requires that all group health insurance policies written in the state include the right to convert to an individual coverage qualified plan without the addition of underwriting restrictions, regardless of the reason for leaving the group. It also requires that individual policies include a provision that covered dependents may continue coverage following the death of the primary insured, under that or a different contract, without additional underwriting restrictions.

The remaining sections of the bill amend the state's medical assistance programs. The bill provides that the Department of Health and Social Services will purchase health care services for its clients through health insurance policies or through health care service contracts which provide some or all of the services covered by state medical assistance programs.

The bill authorizes the Department to pay a cash advance to providers who serve a large volume of state medical assistance clients. It also requires the state to pay interest on unpaid bills which have been presented by providers which satisfy program requirements for payment. If payment of the bill is delayed more than thirty days from the date it becomes payable, interest is charged at the rate of one percent per month. If payment of the bill is delayed more than six months from the date it becomes payable, interest is charged at the rate of two percent per month.

The bill extends Medicaid coverage to all optional eligible groups under the federal program and expands covered services to include prescription drugs, adult dental care, dentures, physical therapy, prosthetic devices, chiropractors' services, private duty nursing, podiatrists' services, and other optional services under the federal Medicaid program. Eligibility for Aid to Families with Dependent Children and Medicaid is expanded to cover unborn children.

The bill establishes a medically needy program under the state General Relief program. The monthly income threshold for eligibility is set at 150 percent of the poverty guidelines for Alaska, and includes a spend down provision such that a person who is over income qualifies when the amount of their excess income has been spent on medical bills.

LIMITS ON EMPLOYEE SHARE OF PREMIUM COST

Hourly Wage	Gross Monthly Wage (172 hrs.)	Maximum employee share (HB 977) 1.5%	2%	3%
$3.60	$619	$9.29	12.38	18.57
4.00	688	10.32	13.76	20.64
6.00	1032	15.48	20.64	30.96
8.00	1376	20.64	27.52	41.28
10.00	1720	25.80	34.40	51.60
15.00	2580	38.70	51.60	77.40

WRITTEN COMMENTS TO HOUSE BILL NO. 977

Presented by: Denise L. Knapp, Executive Director
Delta Dental Plan of Alaska

April 10, 1980

First of all, I would like to mention that I was informed of the bill and the teleconference at 5:08 p.m. on Tuesday, April 1, the time of the teleconference. I, therefore, did not have time to prepare a formal testimony. The next day I checked with the Alaska State Dental Society to see if they had received any information on the bill or the hearing, and their response was negative.

I would like to respond to the bill wearing not only the hat of Executive Director of a small company with 6 full-time employees (over 32 hours a week) and four part-time employees (under 32 hours a week but paid more than the minimum hourly wage), but also that of a prepaid dental service corporation (and therefore a member of the insurance industry).

Section 18.12.010. The last sentence of this section indicates the "Number two qualified plan" includes coverage for dependents, but I was unable to find any further reference in the bill as to who is to pay the cost for dependent coverage. This perhaps should be clarified.

Section 18.12.030. This section seems to benefit the part-time, lower paid employee and discourage the incentive of an employee to be full-time and earn a higher salary. Under the approach in the bill, the way I read it, a full-time employee due to the fact of working longer hours, or a long-time employee having worked several years, would be paying a higher portion of the premium than a part-time or new employee. Where then is the incentive for employees to want to stay with a company for a long period of time if they are penalized by paying more premium for the same benefits as a newcomer? As an example,

	Example I Part-time Employee	Example II Full-time Employee
Salary	$5.05/hr.	$7.50/hr.
Number of hours	x 32	x 40
Weeks a year	x 52	x 52
Yearly Salary	$8403.20	$15,600
Bill Percent	x 1.5%	x 1.5%
	$ 126.05	$ 234
Insurance Yearly Premium	$ 457.56	$457.56
One-half	$ 228.78	$228.78
Employee's Portion	$ 126.05	$228.78

Section 18.12.040. Under Delta's present program, there is a 90-day waiting period for eligibility for medical, life, and A,D&A benefits. Changing the eligibility period to four weeks would encourage an individual to join a company just to get medical benefits, and then quit once treatment was completed. In the past few months, Delta has had two employees terminate after two months with the firm. They would not have been eligible for benefits under Delta's program, but we would have been paying for them under your bill, and most likely they would have taken advantage of the benefits and cost the insurance company more money.

Section 18.12.050. By your provision of continuing coverage if prevented from working by sickness, Delta could be paying up to three months for any employees who worked only one and one-half months and up to six years if an employee worked six years before becoming ill. Wouldn't it be better to have the employee transfer to the State risk-plan fund or Medicaid if without sufficient funds to continue self-paying?

Section 18.12.060. Perhaps the decision of which company is prime should be left up to the present insurance industry rule; i.e., whichever company has employed the individual the longest. Is this really the type of decision which should be left up to an employee?

Section 18.12.070, paragraphs (2), (3), and (4). Clarification is needed as to what types of employees are included under this paragraph. Would this be natives covered under the Indian Health Service, or those employees eligible and presently receiving Medicaid coupons? Are State of Alaska employees exempted by this paragraph?

Section 18.12.100. Not all employees wish medical coverage presently under Delta's program; one, because her husband is in the military and another because she says she cannot afford even her share of the premiums. Would this bill make it mandatory for these two cases?

Section 18.12.140. (Do we qualify under 1 and 2?)

Section 18.12.200, paragraph (3) (B) (i). Does this mean that employees treated by the Indian Health Service may not bill for services provided?

Section 18.12.200, paragraph (6) (A). Perhaps the term "restorative appliances" should be clarified. Does this mean dentures and partials? What is meant by the ability to charge a "nominal per services charge"? Is this charged to the patient by the provider, or does this mean an additional charge can be made if the company wishes to add "restorative appliances" as a covered benefit?

Section 21.50.010 (d). If an applicant (I presume applicant is an employer rather than an individual employee) elects not to offer major medical coverage to its employees, would the employees be able individually to obtain major medical at their own cost or by applying to the State "high risk" plan? This is not clear.

Section 21.50.030 (a). Mention is made for the first time of "number three qualified plan". Is this a typographical error, since the employer, as I read the bill, is only required to offer the "number two" or "number one" plan.

Section 21.050.030 (a) (1) (I). Would "prostheses" include dental prosthesis such as dentures, partials, or bridges? Typically the medical insurance carrier would not cover such services under its program.

Section 21.50.030 (a) (1) (L). Oral surgery of the "gums and tissues of the mouth" would mean periodontal surgery to Delta. Is this what is intended? Normally in the insurance industry, this type of service is not covered by the medical carrier. It would only be included in dental insurance coverage.

Section 21.50.030 (a) (3) (B) and (C). Inclusion of coverage for annual physicals and multiphasic screening would raise the insurance rates to an extraordinary level, which would be beyond the reach of most employers to pay and most insurance companies to pay, and still keep rates down.

Section 21.50.050. The section on the State Plan Premium could use further clarification of definitions and intent. It is confusing as to whether all employers will be members of the "association" and pay premiums directly to the State Plan instead of an individual insurance carrier. From your "summary", it would appear this State Plan is only for "high-risk" employees; however, I did not get that from reading the bill itself.

Section 21.50.070 (b). Lines 6-10 on page 19 appear to be contradictory. On the one hand, the members of the board may be reimbursed for expenses incurred, but must pay for the costs of conducting meetings themselves. Would they be reimbursed for transportation mileage, hotel plus a per diem? This section needs clarification.

Section 21.050.070 (h). On lines 22-25 of page 20, I question why the "Association" should be allowed to make a 110% profit on expenses of "reinsuring". Perhaps I don't understand the intent of this paragraph, but this is the way I interpret it. Perhaps it needs to be clarified.

Section 21.50.080. Again, I find this section very confusing. Is the "State Plan" an alternative choice for the employer to dealing through a private insurance company directly, or is it only for "high-risk" employees? What about individuals who do not qualify under an "employer" group? Would self-insured individuals be eligible for the State Plan? This is unclear in my reading of the bill.

Under paragraph (e) of this section, are all employers required to join the State Plan even if they have no "high-risk" employees and required then to share the risk for companies who happen to hire "high-risk" employees?

Section 21.50.100 (c). If the writing carrier is to agree to provide these services of administrative and claims payment functions for a period of three years, would there be any provision in the contract for review of the administrative fee paid for these services, or would the carrier be held to one rate for three years?

Section 21.50.110 (a) (2). Again, it is unclear whether only high-risk individuals may enroll dependents under the "State Plan" or whether any employee eligible under the employer group could elect to enroll his/her spouse and children and at what cost to the employee or employer.

Section 21.50.130 (b). This paragraph is unclear. If an individual dies, why would his medical coverage be passed on to his beneficiary, or why would he need extended coverage? If this refers to the life coverage, perhaps it should be spelled out that way?

Section 21.50.200 (3). Definition of dependent includes "a household member who is financially dependent on the primary insured." Is the intent of this to cover a non-related individual who happens to be living in the household of another? This paragraph could be interpreted to mean the "old lady" or "old man" (the popular terminology for the live-in boyfriend or girlfriend) or any friend of the opposite or same sex who happens to be living in the household of the insured. Also, would the employer be required to pay for this dependent, or is this only on "high-risk" individuals?

Section 47.05.070 (a) and (b). Is the intent of this section to have employers with employees presently on medical assistance receive the employee's portion of the premium from the State? If the employer is paying for a portion of the medical benefits for a Medical Assistance eligible person, does that mean the individual who is working will no longer be on Medical Assistance? If they can continue receiving free benefits through the Medical Assistance coupon, what is the purpose of having the employer cover them also through a private carrier?

Section 47.05.090. As the fiscal intermediary for the dental portion of the State Medicaid and General Relief Medical programs, we applaud this section. However, in Delta's case, we would like to see the State consider paying interest to Delta when Delta is not reimbursed within 30 days of its billings to the State.

Section 47.07.030. Benefits added include "dental services and dentures" and "prosthetic devices". Does this mean the same dental services presently available to children under the Medicaid program, except with the addition of dentures? Or, does it mean all "dental services"? We personally feel partial dentures should be covered, but not porcelain/gold crowns or fixed bridges. Also, periodontal surgery and orthodontic services should be limited to only the most severe cases. If all the aforementioned services were included in a State funded program, it could bankrupt the State and the taxpayers.

Overview - Mandatory health insurance is a good concept and it is evident a lot of thought and time have gone into this bill. However, mandatory health insurance, to the extent written into this bill, will jeopardize the free enterprise system in that many companies would be unable to afford to provide this maximum coverage. May we suggest a minimum benefits coverage excluding some of the services written into the bill. If the employer wishes to offer more, he could do so. If the employee wished to purchased additional coverage, it would be optional, but could be handled through payroll deduction by the employer and require one-year's signup.

Apr. 11, 1981

Dear Rep. Buchholdt:

If this letter is in time to be made a part of the public testimony concerning HB 977, I would like for the paragraphs marked to be entered. If not, I hope you'll take a few minutes to read the letter and the enclosed article.

Thank you,
Eileen Herring

April 10, 1980
Anchorage

Rep. Bill Parker
Bouch V
99811

Dear Bill;

Thank you for taking the time to tell me about HB977 and for soliciting my comments. It is an area of great concern to me, as you know, and I welcome the opportunity to opine.

I think that the measure is well-intended but poorly conceived. Insurance is not the way to improve health care because the problem goes much deeper than that. The reason that health care is so expensive is that it is controlled, almost monopolized, by a single profession, that of the M.D.'s, who have a strong political organization, the A.M.A. The A.M.A. runs doctors, runs medical schools, collaborates with pharmaceutical companies to lobby Congress, collaborates with insurance companies, and generally acts to keep power within the M.D. profession. Until this conglomerate is dealt with in some way, health care will not improve.

You're probably aware that there's a growing grass-roots movement, loosely known as the holistic health field, making a vigorous, though uphill, struggle to provide viable and professional alternatives to the power monopoly in health care. A person wanting to improve health care for the public would do well to support this movement, especially since the holistically-oriented treatments are often much cheaper and more effective than those of the medical establishment.

HB977 unfortunately plays right into the hands of the power maniacs. Insurance policies only cover certain "acceptable" modes of treatment, administered in the usual manner by the usual "acceptable" M.D.'s. Giving a whole lot of people a chance to get the standard treatments for free or cheap will just send a lot more business and money their way. It will leave chiropractic and naturopathy and some other struggling professions out in the cold, dealing them a low blow while strengthening the position of the monopoly that is getting rich on illness.

Since I'm working real hard at becoming a naturopathic physician, you can understand my absolute opposition to HB977. You might like to know that there is a group of naturopaths in Alaska who are working for the establishment of a naturopathic licensing board in this state. If you want to help get cheap and effective professional medical care to the proles, support this effort.

I am enclosing an article written by someone much more knowledegeable and articulate than me. The man's a genius, so please read it. Then sit down and figure out a new plan.

The health care problem is serious and pervasive and will not be solved by passing a bill. HB977 would do more harm than good, and I think we can do better. Thanks for listening.

Sincerely,

Eileen

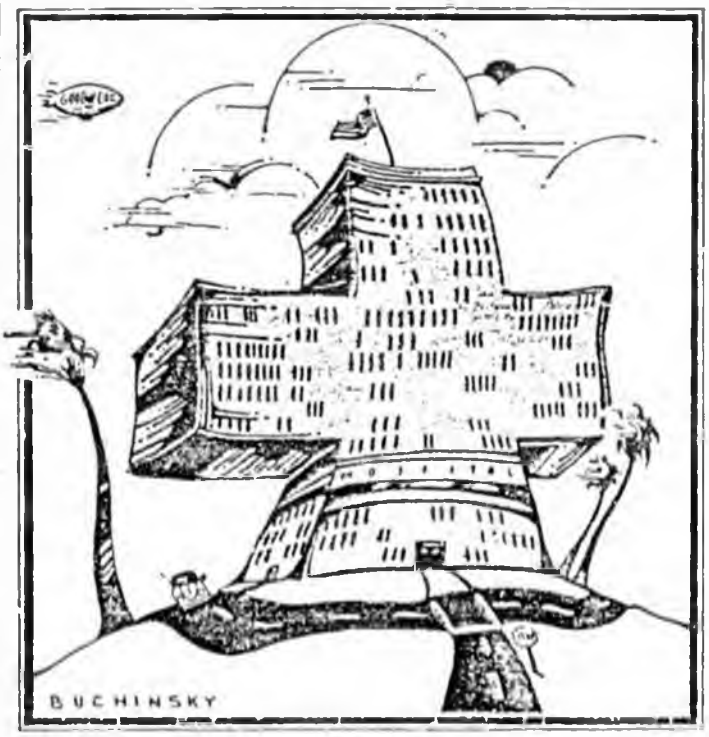
Mother's Healer

YOUR HEALTH AT TOO HIGH A PREMIUM

by Hugh Drummond, M.D.



SOME FORM OF national health insurance seems inevitable. It has been an almost sacred tenet of American liberalism since the New Deal. The Great American Center has shifted its hemorrhoidal bottom in this direction, and even organized medicine has begun to calculate the finger-lickin' goodies involved in a $60 billion-plus federal program.

Insurance is, of course, the American way of dealing with life's terror. No institution better describes a population trying to save its ass. It is a vestige of the medieval myth that moats and castle walls could keep out the plague. Insurance buildings are designed to convey immortality; steel and granite, sheathed in glass, they are meant to look like the executives who minister to them—vigorous, phallic, Apollonian. If God should break his contract with Noah, those buildings will endure the flood to pay the claims of a well-covered, if dead, constituency.

So it is inevitable that as we grow more anxious we will develop a form of universal health insurance, propped up by the federal government and its corporate underpinnings. About the only people left who are opposed to it are a few herbalists and that peculiar gaggle of paranoids on the Left and the Right, who cannot believe that anything compassionate or rational can emerge from the heart of this nation.

I have great respect for paranoia. So let me count myself among the crazies this time and suggest that, like the massive public housing projects that were another vision of American liberalism, national health insurance as currently conceived will someday be subjected to euthanasia.

Health insurance is really not health insurance at all, but sickness insurance. The major premise behind it is that we are all terrified by cancer and heart disease, which can be treated by such techniques as transplants, by-pass procedures and radiotherapy. These are enormously expensive technologies that the government will be expected to underwrite.

Overlooked are the pervasive diseases of the young and poor, such as lead poisoning, which affects a quarter of the kids in low-income neighborhoods, and malnutrition, which affects even more. Insurance doesn't touch these problems because their control has to do with social and environmental conditions. You can't fight hunger with pocketa-pocketa machines in medical centers.

In fact, when you get right down to it, you can't stop cancer and heart disease that way either. They are just as much social and environmental diseases as they are medical ones.

Since 1900, the ratio of cancer deaths to all deaths has increased five times; the same is true for heart disease. Together they will kill more than half of us. It is calculated by the American Heart Association and the Department of Health, Education and Welfare (HEW) that in a life of 65 years, we lose 1,300 days for being 25 per cent overweight, 1,800 days for living in a city and 3,300 days for smoking a pack a day. Yet we have virtually no information on the relative impact of bad housing, polluted air and water, Muzak and Twinkies. If we did, we would know we were losing the battle.

To really stop cancer we would need to control all industrial pollutants, such as asbestos, vinyl chloride and sulphur dioxide. The huge numbers of synthetic additives poured into our bodies every day would have to be eliminated. If we wanted to control heart disease we might have to do something about unemployment, which has been documented to increase nor-epinephrine and cholesterol excretion to murderous levels. We might also have to eat less, drink less, smoke less and drive less. If a serious effort were made in this country to prevent cancer, strokes and heart disease, the economy would collapse—a fact not lost on the pilots of the empire, many of them now supporting some form of national health insurance.

There have been amazingly few studies on the actual "outcome" of medical care in this country, but when they have been done the results are invariably depressing. A Johns Hopkins University doctor found that only 27 per cent of emergency room patients at Baltimore City Hospital received effective medical care. When the doctor's superiors insisted that the results would be radically different at a more "prestigious" hospital, namely Johns Hopkins, the doctor checked out the patients there who had gastrointestinal symptoms. He found that only 28 per cent of these Johns Hopkins patients received quality treatment. In other words, more insurance will help more people get lousy care.

With Medicaid and Medicare, the forerunners of national health insurance, the more we spent the less we got. In the first year of the programs, doctors' fees rose two and a half times as fast as the cost of living. In the last two years from September 1974 to September 1976, physicians' fees rose 23.3 per cent, while the Consumer Price Index increased by only 13.7 per cent. According to a report released in February by the Health Research Group, Medicare and Medicaid pay out more than $6 billion yearly in doctors' charges. Hospital costs have climbed even faster—a four-and-a-half-fold increase since the programs started. Where did all the extra money go?

Not to new services; there were hardly any of those. A lot of doctors got richer. There was expensive and "interesting" medical technology to utilize, such as the hyperbaric chamber at Mount Sinai, which is operated on an average of only once or twice a day. The money

spent on buying and running it could finance 20,000 outpatient visits a year, or a huge lead poisoning program in East Harlem. But that's not as much fun. Unfortunately, there is no assurance that similarly wasteful health care programs will not be funded by massive national health insurance.

Upper-level hospital personnel increased their salaries as the federal programs took hold. Hundreds of thousands of dollars were spent in efforts to prevent hospital employees from organizing unions. Much of the extra money went for outrageously expensive drugs and supplies. As long as the government was willing to underwrite the cost, the hospitals and doctors didn't care. Most of them welcomed the bucks the federal bonanza brought, no longer convinced that their salaries would decrease under the "socialized medicine" of Medicare and Medicaid.

And for the people the programs were supposed to serve? More people had access to bad health care. But one-third of Americans living below the poverty level remained untouched by Medicare and Medicaid. There was still no medical care for the poor. Enter national health insurance.

With national insurance, the $140 billion-a-year health industry could *really* rake it in. There would be the kind of guaranteed security the defense industry enjoyed during the height of the Cold War. Just think—no more people skipping out on their bills. The whole country as paying customers, and for each person, another prescription filled out, another piece of hardware needed, another disposable whatnot disposed of.

Under national health insurance, the poor still will not have quality medical attention. The health care system is not radically changed under the program, only subsidized fully. There will be no improved doctor-patient relationships, no health clinics that are community controlled. National health insurance does not mean better hospitals, with staffs responsive to the special problems of poor people. No fundamental change for the rich either. As usual, they will buy their way to priority.

We can also look forward to the government entering into some sort of alliance with private insurance companies, as it has with Medicare and Medicaid. Blue Cross is the leading contender for the job of administering a national health insurance system. That's the same Blue Cross that has allowed runaway hospital fees to multiply in the last ten years, while the average length of hospital stay has *decreased*. You might be interested in knowing that Blue Cross is controlled by the hospitals themselves. The hospitals created it during the Depression to ensure that their bills were paid, and you can be sure that with national insurance, hospital bills—no matter how ridiculously high—will be found "reasonable" by Blue Cross.

> "With national health insurance, the $140-billion-a-year health industry could really rake it in—as the defense industry did during the Cold War."

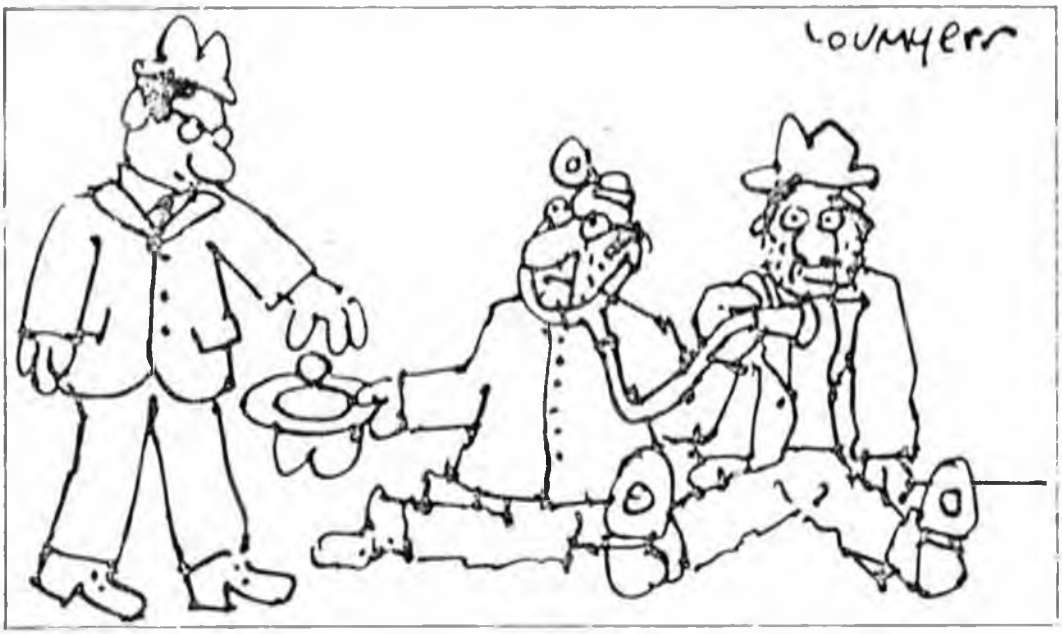
My real anxiety about national health insurance isn't only economic; it is philosophical. There is something wrong with a social policy that so irrevocably consigns to a single profession something so subtle and profound as human health. For all the wonders of Western medical science, it has no understanding of and little interest in the meaning of health. It is possible that when you set out to "conquer disease," no less than when you set out to "conquer space," you can't win. Western medicine tries to throttle its patients into well-being. It relies on the military model of technology, the invention of hammers and the subsequent search for heads to bang with them. It has only given us a new ecology of disease with the smell of progress.

I am not suggesting that we dismantle all the cobalt units, computer assisted tomographs and heart-lung machines. But national health insurance will retard a more pluralistic approach to health, which might include self-help programs, herbal remedies and even faith healing. Is it antiscientific to permit the existence of activities that may have centuries of traditional practice and pure empiricism behind them? They may be conceptualized in less mechanistic terms than we have been trained to believe truthful. However, dying empires have always insisted that their vision of the truth is eternal when their artifacts barely survive.

Do I have the courage of my own convictions? Of course not. If I awake tonight with a right lower quadrant pain, shall I not call one of my surgical confreres rather than a Navajo healer? Would I deny that preference to anyone else? No. But neither would I deny the preference of someone for a Navajo healer. Yet with national health insurance, like all the other medical programs, Navajo healers will not be licensed to accept government money. National health insurance grants access to one kind of health care, and if a bill is passed, the "right" to medical care established will be a right to bad medicine.

Think of China for a moment. It has brought health to 800 million people, who were as mutilated, starved, infected and demoralized as any who have ever lived. And in that nation, where pragmatism is almost religious, where waste is murder, they brought health to the people with as much respect for the ancient and the traditional as for the modern and innovative.

Needless to say, there were other changes.



If you have any medical or psychiatric questions you'd like Dr. Hugh Drummond to address in this column, please write Mother's Healer, c/o Mother Jones, 607 Market Street, San Francisco, CA 94105.

ESTIMATED PREMIUM COSTS FOR NUMBER TWO QUALIFIED PLANS[1]

Individual Plans - Employee Only	Minnesota Rate November 1979 (Quarterly)	Area Differential[2]	Est. Rate in Alaska (Quarterly)	Est. Rate in Alaska (Monthly)
low: Blue Cross/Blue Shield, Male age 20-24	$31.47	+12%	$35.25	$11.75
high: State Farm, Male or Female age 60-64	214.40	+ 7%	229.41	76.47
Average of 5 carriers[3], Male age 35-39	55.42	+11%	61.52	20.51
Average of 5 carriers[3], Female age 35-39	87.13	+11%	96.71	32.24
Individual Plans - Employee and Dependents				
low: Blue Cross/Blue Shield, M 20-24 + F 20-24 + children	$128.27	+13%	144.95	$48.32
high: State Farm, M 60-64 + F 60-64 + children	487.68	+ 7%	521.82	$173.94
Average of 5 carriers[3], M 35-39 + F 30-34 + children	185.80	+11%	206.24	$68.75

Group plan premiums are roughly 8% less than individual plan premiums.

1 The Minnesota minimum standards for a number two qualified plan are the same as those specified in HB 977 except that the requirements for coverage for well baby care, physical exams, and multi phasic screening have not yet taken effect in Minnesota, and Minnesota does not cover medically necessary transportation (other than an ambulance) or treatment for alcoholism or chemical dependence.

2 Derived from the area schedule of premiums of the CARE group insurance trust for all Alaska and for Anoka, Dakota, Hennepin, Ramsey, and Washington counties in Minnesota.

3 Blue Cross/Blue Shield, Prudential, State Farm, National Farmers Union, and Massachusetts Mutual. This is a straight average and not a weighted average. Since Blue Cross/Blue Shield has by far the lowest rates and covers 96% of the people covered by these five Minnesota carriers, the straight average used here is substantially higher than the weighted average would be.

a bitter pill to swallow...

Issues In Health Care Financing

MAY 8-9, 1980
NEW ORLEANS

National Conference
of State Legislatures

ISSUES IN HEALTH CARE FINANCING

MAY 8-9, 1980 — NEW ORLEANS, LOUISIANA

The National Conference of State Legislatures will hold a seminar on "Issues in Health Care Financing" at the Monteleone Hotel in New Orleans, Louisiana on May 8-9, 1980. This meeting is supported in part by a grant from the Health Care Financing Administration, U.S. Department of Health and Human Services (formerly U.S. Department of Health, Education and Welfare).

Public officials at the state level continue to face demands for action on a number of important issues in the health care field: the high rate of inflation; the provision of services to the elderly and disabled; protection against the catastrophic costs of a major illness; and access to care for the medically underserved, both rural and urban. This conference will focus on these major issues and some solutions that the states have developed to deal with them. Key legislators and administrators involved in the enactment, operation and oversight of these programs will serve as seminar faculty.

This program promises to be a useful tool of assistance for legislators as they deal with these and other important health financing issues.

The NCSL has reserved a block of rooms at the Monteleone Hotel, located in the New Orleans French Quarter at 214 Rue Royale. The main hotel telephone number is (504) 523-3341 and the toll free number for reservations is 1-800-535-9595. When arranging for hotel accommodations, please indicate that you are attending the NCSL "Issues in Health Care Financing" Seminar to receive the above conference room rates. The following are rates for the block of rooms NCSL has reserved:

SINGLE ROOM: $48.00 DOUBLE ROOM $56.00

EACH PERSON IS RESPONSIBLE FOR CONTACTING THE HOTEL AND MAKING NECESSARY ARRANGEMENTS FOR HOUSING. RESERVATIONS MUST BE MADE NO LATER THAN APRIL 16, 1980 AND WILL BE HELD ONLY UNTIL 4:00 P.M. ON THE DAY OF ARRIVAL. If you do not plan to arrive by 4:00 p.m., you must guarantee your room for late arrival. If you guarantee your room and do not arrive or fail to cancel your reservation, you will be responsible for payment of one night's stay. NCSL can not be responsible for any guarantees.

Registration Fee: $ 75.00—Legislators and Legislative Staff
$150.00—Non-Governmental Persons

The registration fee is payable in advance of the seminar or due at registration. NCSL cannot bill you or your legislature without advance approval. Expenses of attending an NCSL seminar are deductible for income tax purposes if the "taxpayer is benefiting or advancing the interests of his trade or business by such attendance."

For additional information contact Russ Hereford or Susan Ponder with NCSL, 1405 Curtis Street, 23rd Floor, Denver, Colorado 80202—(303) 623-6600.

AGENDA

Thursday, May 8

8:45-9:00 am	**Welcome and Introduction**
9:15-9:45 am	State Legislatures' Interest in Health Care Financing
10:00-12:00 am	Approaches to Health Care Cost Containment: Competition vs. Regulation
12:00-2.00 pm	Luncheon and Luncheon Address: The Federal Role in Health Financing
2:15-4:15 pm	**TRACK A:** Long Term Care: Nursing Home Reimbursement; Alternatives to Institutional Care
	TRACK B: Catastrophic Health Insurance: Overview of Issues; State Approaches

Friday, May 9

9:00-9:15 am	**Introduction to Day's Activities**
9:15-11:45 am	**TRACK A:** State Hospital Cost Containment Programs: Overview of Efforts; State programs
	TRACK B: Health Manpower: Federal Activities Impacting on the States; State Programs
12:00-2:00 pm	Luncheon and Luncheon Address: Congressional View of Health Financing
2:00-3:00 pm	**Closing Session**

The National Conference of State Legislatures, the official representative of the country's 7,600 state legislators and their staffs, works to help lawmakers meet the challenges of the complex federal system. Headquartered in Denver, Colorado with an office of state-federal relations in Washington, D.C., the NCSL is a nonpartisan organization funded by the states and governed by a 43-member Executive Committee.

The NCSL has three basic objectives:

To improve the quality and effectiveness of state legislatures.

To assure states a strong, cohesive voice in the federal decision making process.

To foster interstate communication and cooperation.

The Honorable Thelma Buchholdt
Chairman, House Health, Education and
Social Services Committee
Alaska House of Representatives
State Capital
Juneau, Alaska 99811

Dear Representative Buchholdt: Re: Alaska H.B. 977

We wish to thank you for sending us a copy of this bill, which arrived only last week because of its recent introduction.

Portions of this bill are of vital interest to health insurance companies. I would be there to testify on the bill, but for a recent injury which temporarily prevents me from traveling. I am sorry to miss the pleasure of visiting Juneau again, and of testifying again before your committee, as I did last year in connection with a bill on another subject.

I would appreciate your including the attached HIAA Statement on H.B. 977 in the record, and, if possible, providing copies of it to committee members.

Sincerely,

Charles D. Kuhnen
Counsel

STATEMENT
of the
HEALTH INSURANCE ASSOCIATION OF AMERICA
concerning
ALASKA H. B. 977 ESTABLISHING
A STATE MAJOR MEDICAL INSURANCE PLAN

The Health Insurance Association of America is a trade association consisting of 311 insurance companies which write 85% of the health insurance written by insurance companies in the United States.

We are opposed to this bill, which is badly conceived and poorly drafted. We believe that its enactment would have serious adverse effects on the Alaska business of insurance companies, causing many insurance companies to stop writing health insurance in Alaska, to the detriment of Alaska residents.

Our remarks are directed to Sections 1, 2, and 8 of the bill, which are the sections affecting insurers. We understand that your Insurance Department has prepared a detailed analysis of the bill's section-by-section defects, and so our remarks will mostly be of a more general nature.

GENERAL PLAN

The general plan of the bill is to require employers of one or more regular employees in Alaska to provide at least a specified level of medical expense benefits, through a prepaid health care plan contractor, to employees and their dependents, with the costs shared by the employees (Section 1 of the bill). Health insurers would be required to make available to employers (if the insurers write group health insurance) and to individuals (if the insurer's write individual health insurance), three specified ("qualified") plans of major medical expense insurance, and must add to any health insurance policy which is not a "qualified" plan a fourth plan of specified benefits, unless the "applicant" declines it (Section 2 of the bill). There is a fifth standard plan for qualified Medicare supplements. There would also be a State Plan for persons not otherwise insurable at standard rates for qualified plan benefits, under a pooling arrangement funded by health insurers and self-insurers, with a tax offset for the inevitable losses of the pool (Section 2 of the bill).

The purpose of these sections of the bill seems to be to provide more major medical insurance to Alaska residents, by requiring all health insurers to furnish major medical insurance, by requiring certain employers and their employees to purchase it, and by requiring a pool for substandard risks.

GENERAL COMMENTS

Section 1 of the bill is derived from a Hawaii law. That law, together with a premium tax differential between insurance companies on the one hand, and Blue Cross-Blue Shield and the Kaiser HMO (Health Maintenance Organization)

plans on the other, makes it virtually impossible for insurance companies to compete for qualified plan business. There is likewise a substantial premium tax differential in Alaska between insurance companies and Blue Cross-Blue Shield. Alaska has no HMO's.

Section 2 of the bill is derived from a Minnesota law, which is the subject of several lawsuits and is on its way to being declared unconstitutional. One case has been tried and the Federal Magistrate who tried the case has, in an 85-page opinion, found the law to be unconstitutional on at least five different grounds. Among other things, the Magistrate's opinion says:

> "The Court is convinced that, in spite of exemplary effort by able counsel, no one knows what the Legislative intended or what this Act really means. . ." Insurers' Action Council Inc. et al. v Heaton et al., U.S. District Court, District of Minnesota, c.v. No. 3-76-440 (p. 84 of the Magistrate's decision dated October 1, 1979).

Some provisions of the law are so impractical that they are being ignored in administering it. Other provisions are confusing. Some qualified plan benefits are so expensive that the Minnesota legislature just recently passed a bill modifying or eliminating them.

Many insurance companies have either writhdrawn from Minnesota, or have stopped or limited their writing of health insurance in that State. Unless the law is finally held invalid, more companies can be expected to do so.

Because of its poor design and drafting the Minnesota law has resulted in much difficulty for the insurance department, insurers, and the courts. The law has never been fully implemented. The State Plan is operating partially (it is not reinsuring insurers or administering qualified plans for them), and incurring substantial losses. That it operates at all is due to the presence in the State of several large domestic insurers, and to the ready availability of qualified people from out-of-State compaines. This ready availability of insurer help is not the case in Alaska, since Blue Cross-Blue Shield has its principal office in Seattle and all the other large Alaska writers have their principal offices even further away.

SECTION 2

1. No law is needed to make major medical insurance available in Alaska. Coverage in a wide variety of plans is already available from a sufficient number of insurers. This includes some plans with higher policy maximums than the $250,000 of HB 977's "qualified" plans.

Most Alaskans are already covered by some type of major medical protection. Persons age 65 or over are covered by Medicare or other government programs.

Of the under-age-65 civilian, noninstitutionalized population, my own rough projection is that about 70% have some form of major medical coverage from insured and noninsured plans. Some of the remainder have government plan coverage (Medicaid, Public Health Service, etc.), a small number are uninsurable as individuals not covered under group plans, and a larger number just plain can't afford it. We think that the subsidy plan in Section 1 will make only a dent in the affordability problem.

2. The insurers which do not write major medical coverage do not have the knowledge or assets to write this broadest, most complex, and costly of health insurance coverages, or have chosen other health insurance coverages as their proper products, or both. If, HB 977 is enacted, any of them writing coverage for hospital, surgical, or medical care will be forced out of the health insurance business in Alaska. We cannot think of a single valid reason for the bill requiring these companies to write major medical insurance.

3. All of the five plans of insurance which section 2 would require health insurers to write are nonstandard -- the three "qualified" major medical plans, the supplementary major medical plan to be added to existing policies, and the "qualified" Medicare supplement plan. While some companies can get by with some of their standard plans on an equivalency test, there seems to be no good reason to disrupt the health insurance business by requiring nonstandard plans of benefits. The bill's major medical plans will not even be the same as Minnesota's, in view of the latter state's recent amendment to the law. Using nonstandard forms just adds unnecessarily to administrative costs, which are reflected in premium rates.

4. The required plans are too expensive.

5. The method of determining State Plan rates is impractical. The corresponding Minnesota statutory provision is not followed by the Minnesota State Plan.

Charging 125% of standard rates for the substandard persons in the State Plan is inadequate, and will always produce losses, as Minnesota discovered. The provision that rates are also to be self-supporting is illusory.

The Minnesota State Plan, together with the costs of the Association governing body, lost $1,000,000 in 1979. We do not know how much in additional costs insurance companies incurred in attempting to comply with the law.

SECTION 1

1. Whoever drafted this section does not know what a prepaid plan is. Insurance companies do not write them, except for a few companies that market

prepaid dental or vision care plans. As a result, insurance companies do not qualify, under the section 1 definitions, as "prepaid health care plan contractors" from which employers can purchase qualified plans. Neither do employers, which cannot self-insure under the provisions of this section.

2. The dual option of proposed section 18.12.030 is impractical in Alaska, because there are no HMO's in the State. Before employers are asked to offer such an option you need a sufficient number of good operating HMO's in appropriate locations in the State.

Self-insurance by employers of HMO benefits is mentioned in paragraph (b) of that proposed section. This is impossible, except for an employer that is an HMO.

If, in the future, you do get a sufficient number of operating HMO's in Alaska so that you then want an HMO option, the requirement should be drafted to be in accord with the amended Federal law on this subject.

3. It seems to us that eligibility for premium supplementation may also be needed by employers of more than seven employees.

4. Where the legislature sets minimum standards for "qualified" plans, these tend to be the standard plans employers provide for their employees (absent a collective bargaining agreement calling a different plan). Insurance companies cannot compete on premium costs with Blue Cross-Blue Shield on standardized benefits where Blue Cross-Blue Shield has substantially lower premium taxes to pay. In Alaska, the premium tax is 3% of health insurance premiums for out-of-State insurance companies (there are no or few Alaska companies which write health insurance). Whereas Blue Cross-Blue Shield pays 6% on the difference between premiums and claims. It is a reasonable guess that major medical claim payments are about 90% of premiums, with a resulting effective tax rate for Blue Cross-Blue Shield of six-tenths of one percent of premiums (.06 times 10% of premiums). This is more than sufficient differential to make insurance companies noncompetitive on premiums which must be charged on standardized major medical plans.

UNCONSTITUTIONALITY

The Federal Magistrate in the case cited earlier involving the Minnesota law found that law to be unconstitutional on several grounds, all but one of which apply to HB 977. Section 1 of this bill, which does not appear in the Minnesota law, may raise additional constitutional questions.

The Federal Megistrate found the Minnesota law to be unconstitutional on these grounds: (1) it violates the due process clause of the constitution by requiring insurers to write major medical coverage, which many of them do not or can not do; (2) it violates the Constitutional provision prohibiting impairment of

the obligation of contracts, by requiring insurers to add major medical coverage to existing policies unless the policyholder declines such coverage; (3) it violates the commerce clause of the Constitution by attempting to regulate policies validly issued outside the State; (4) it is vague and ambiguous and unconstitutionally delegates legislative authority to the insurance commissioner; and (5) denies the required equal protection of the law, because of an amendment (not in HB 977) concerning the pool. The Magistrate also found that there was, as yet, too little experience under the law to determine whether the law was unconstitutionally confiscatory.

The validity of the Minnesota law is also in question on other grounds in other lawsuits which have not yet reached trial.

CONCLUSION

The foregoing critical comments, together with the more detailed ones we expect you will receive from others, should be sufficient indicators that HB 977 is contrary to the public interest and should not be enacted.

Mr. Dale Strowbridge
State Liaison Officer
DHEW, Region X
Arcade Plaza Building
1321 Second Avenue
Seattle, Washington 98101

Dear Dale:

I appreciate all your efforts assisting the Department in obtaining HEW comments on relevant pending legislation. I am in need of receiving further clarification regarding the scope of the Medicaid option - diagnostic, screening, prevention, and rehabilitation services. In particular, House Bill 977, if passed would add that option to the State's Medicaid program (see page 33 of the enclosed bill). I have received correspondence from International Rehabilitation Associates, Inc. inquirying whether they would be covered under that Medicaid option. The letter is enclosed for your reference and outlines that organization's services and the background of its employees. Would you please have your Medicaid Bureau review this material to determine whether that new option would cover International Rehabilitation Associates, Inc.?

I appreciate your assistance in this matter. If you need additional information on this inquiry, please do not hesitate to contact me. I would appreciate a response by May 7, 1980.

Sincerely,

Deborah E. Behr
Special Assistant to
the Commissioner

April 21, 1980

Thelma Bucholdt
House HESS
State Capital Bldg.
Juneau, Ak 99811

Dear Thelma:

I've been meaning to respond to HB 977 in more detail as it has been on my mind ever since I received the copy of the bill. While I generally agree with the intent of the bill, I've had this uneasy feeling about it and have finally realized the source of my concerns.

The major deterrent to good health care in the United States, as I see it, is the fee-for-service philosophy, which rewards the doctor for performing more as well as more expensive procedures.

Physicians engage in benevolent (for them) price fixing. They set their fees high enough to make a sizable profit, then agree as a group not to let the factors of supply and demand interfere.

Physicians (and hospitals) have institutionalized this practice via the creation of health insurer intermediaries, who have grown so powerful in the health industry that even Senator Kennedy has retracted in the face of their opposition.

In the health field, the federal government (and to a degree, state governments) has legitimized restraint of trade (by allowing physicians to control supply and access), price fixing (by reimbursing providers at the prevailing rates) and boycotts (by allowing physicians to refuse to see Medicaid patients).

While HB 977 has noble intentions, i.e., the mandatory insurance for high risk patients, employees, etc., it institutionalizes:

1) The health insurance industry and creates the potential for a greater political alliance by creating a

mechanism to further their power (The Association) while giving them a cause to rally around (more government regulations).

2) Price fixing. By reinforcing the fee-for-service mechanism, physicians will continue to set fees at a high profit level and health insurers will continue to ally with their clients (the physicians) as opposed to the State's clients (the patients).

3) Boycotts. HB 977 sanctions the present physician boycott of Medicaid patients by placing the blame on the State bureaucracy. There are very few physicians around whose medical school or education is not subsidized by the federal government. It is unconscionable, to me, for them to refuse to treat Medicaid patients.

I oppose the payment of interest or advance payments to physicians to treat Medicaid patients. The money should be put into the State Medicaid office. After my visit with the State Medicaid people in March, I'm convinced that the problem will not be resolved for another 6 - 9 months, in spite of claims to the contrary by the legislature and the Commissioner. They are still understaffed and 6 months behind in their reimbursements.

I feel that the State of Alaska has a chance to really excell in the area of health policy. I think that HB 977 is a very progressive attempt to do just that. However, I think that we can do better and would take the liberty of making a few suggestions.

1) That the legislature proceed with a study (such as HB 793) to investigate new and innovative methods of health care financing. Further, this study should be international in scope, with regards to determining true alternatives to the present methods of financing health care in the United States.

2) That Section 47.05 070 of HB 977 be studied further. While the HMO concept has many inherent limitations, there are a few successful consumer controlled HMO's that may be successful in Alaska (with State subsidy). Certainly Anchorage is a potential candidate and the situation at Alaska Hospital suggests some interesting alternatives. It is my hope that within a year, the Anchorage Neighborhood Health Center will be a candidate for such a program, and potentially a model for attempting alternative sources of health care financing.

Again, I want to emphasize that I basically support the intent of the bill.

I realize that my comments may not be politically palatable, but I still have the hope that Alaska can take an innovative lead in the health policy arena. It is in the spirit of this optimism (and my high regard for you) that I have made these comments.

I know that you will weigh their merit (if any) and political acceptability, and I thank you for the opportunity to respond to the bill.

Sincerely,

Don Bantz

ANN ARBOR, MICHIGAN 48109

March 24, 1980

Richard L. Block, Director
Division of Insurance
Department of Commerce and Economic
Development
State Office Bldg.
Pouch D
Juneau, Alaska 99811

Dear Mr. Block:

Please find enclosed a reprint of an article describing a new approach to the structuring of Health Insurance Policy Information. The article describes an information frame based on seven major issues or goals (Table 1, p. 129). There is a preliminary listing of program options to pursue these goals (Table 2, pp. 136-157) as well as identification of problems related to these program options relevant to the other issues. A limited range of possible solutions to these problems so far identified are suggested.

The proposed information frame aims at eventually establishing a health insurance policy information base. It is postulated that when completed, the comprehensive information frame alone would provide a qualitative tool for policy analysis.

Before proceeding with further development of the information frame, I consider it desirable to explore its potential utility. I would therefore appreciate your completing the attached very short questionnaire and returning it as soon as possible. I will arrange for you to receive a compilation of the replies to this questionnaire.

In addition, I would appreciate your comments on the enclosed article once you have had time to go over it. I would particularly like to know whether you might be interested in participating in a review of a first draft of the information frame and, at a later stage, in contributing to the information base.

Yours sincerely,

J. L. de Vries, M.D.

A SYSTEMS APPROACH TO HEALTH INSURANCE POLICY INFORMATION

A PRELIMINARY TAXONOMY OF HEALTH INSURANCE ISSUES, PROGRAM OPTIONS, PROBLEMS AND SOLUTIONS

J. L. DE VRIES and B. H. PERRY
Department of Health Planning and Administration, University of Michigan School of Public Health, Ann Arbor, MI 48109, U.S.A.

(*Received* 20 *August* 1978; *received for publication* 15 *January* 1979)

Abstract—A methodology is proposed for assisting health insurance policy analysts by developing a systems approach to health insurance information and literature. The general approach is to supply a link between the quantitative and qualitative information available, and the analytic needs of policy analysts. There is a great deal of information available, but traditional cataloging and indexing techniques do not adequately meet the policy researcher's and analyst's information needs. The most important of these once goals and limitations are identified, is knowledge of the interrelationships between program options in terms of expected results (problems, solutions) in a wide range of settings.

The key element of the approach used is the concept of an information frame, based on considering health insurance as systems of issues, program options, problems, and solutions with interrelationships explicitly defined. This approach would provide initially qualitative identification of these interrelationships and make them available via a machine readable taxonomy of the components. With substantiating literature references, preliminary work on the building of the taxonomy is based on seven major health insurance issues, and over 70 program options, 325 problems, and 350 solutions so far identified for 170 of the problems. The implementation of this methodology would provide analytically structured information for policy analysts in a format not presently available. The multi-country information to be included would allow consideration of alternatives which might otherwise be neglected. The result would improve an important element of the analytic process, and reduce the lead time required for inquiries by health insurance policy analysts, legislators, health planners and administrators.

1. INTRODUCTION

In a rational model, policy analysis, as a search for ways of determining preferred policies, should be able to consider as many options as possible. Recognition of the desirability of expanding the range of policy options as a means to more rational policy outcomes has led to an increasing interest in cross-national studies. The number of such studies has greatly increased in the past decade and shows every indication of continuing to do so[1]. A recent publication by HEW and NSF indexes some 4000 selected books and articles on the effectiveness and efficiency of alternative programs in health and social welfare[2]. The growing amount of information available in health insurance and health system programs is, however, inadequately structured for easy access particularly with regard to actual experience with various program options.

Thus, the policy analyst is still faced with the task of having to make decisions based on whatever information he is able to assimilate. To the extent that the information can be systematically structured his burden can be lightened. Jay Forrester has maintained that without an integrating structure, information remains a hodge podge of fragments. "When a structure and governing principles for systems have been accepted, they should go far to explain the contradictions, clarify the ambiguities and resolve the controversies in the social sciences"[3].

Faced with the challenge to review health insurance in an extremely concise manner, one of the writers developed for teaching purposes a conceptual listing of health insurance issues, problems and solutions in early 1975. Subsequently this approach was encouraged as well as assisted by the academic environment† of the authors and expanded into a project to establish a systematic information frame for eventual indexing of literature and other reports relevant to health insurance. The usefulness of the information frame was tested by collecting a set of references for application of program options and solutions in several European countries and linking them to the information frame. Eighty-five of these earlier generated solutions were thus verified in practice in various European countries. This trial run proved encouraging as a potentially useful method for structuring information about alternative approaches in health insurance policy in the countries examined. This paper describes an attempt to apply this basic concept of a systematic structure to the organizing of information on comparative health insurance policies. While specific to a particular substantive area, the framework should also be generally applicable to comparative policy analysis.

Comparative policy analysis provides material for evaluating alternatives among possible choices by looking at their recorded or probable effects. Comparative research many times will reveal what is possible under certain conditions rather than what is explicitly desirable

†Special thanks are due to Dean Wilbur J. Cohen and Prof. R. N. Grosse for major contributions to the conceptual development.

or transportable directly to another social setting. The overall goal of the present activity is to improve the decision making process by improving on one important input to the analytic process—comparative information on alternative solutions and problems in health insurance policy. The detailed objectives of the project are as follows:

(1) To establish a computer stored taxonomy of major issues, program options, problems, and potential solutions involved in health insurance policy decisions.

(2) To establish a capacity to identify for health insurance policy analysts qualitative interdependencies among issues, program options, problems and solutions.

(3) To establish a comprehensive identification of actual applications of program options and potential solutions by health insurance systems, within the U.S. and abroad.

(4) To establish a selective listing of references from published literature and annual and other reports of health insurance systems linked to a taxonomy created and coded to indicate the type of information contained therein (e.g. resource requirements, program outcomes, theoretical references, etc.).

2. BACKGROUND

One of the most important health and social policy questions today in many countries is that of the choice of the preferred mode of financing and delivering health care to the population. In the broadest view a country's health insurance scheme is a projection of its overt and covert social goals in all the modes of financing and delivering health and medical care and health related activities, as contributions to overall social welfare. A range of societal goals is involved which often conflict with each other in actual implementation, such as the trade-off between equity and efficiency. While Roemer and Axelrod considered four possible combinations of modes of financing and delivery for *broad* policy consideration[4], many more alternatives could be generated for purposes of mapping a new health insurance system and its actual application.

While some issues and several program options are determined by the social-political environment, other issues and many program options are compatible with different yet related social-political systems, particularly with regard to equity considerations and to incentives and disincentives for both providers and consumers. Furthermore, the commonality of problems encountered in implementing program options and solutions to cope with such problems is probably greater than often recognized, possibly because of the lack of comparative studies.

Because of the close interdependencies among the various possible options and their resultant positive or negative effects, health insurance or health care financing policies which address a single problem, for example easing the financial burden of hospital care only, may fail to achieve these objectives or may even have counterproductive results[5, 6]. Nor can health insurance policy be considered in isolation from many other social service needs and provisions, such as care for the elderly, workmen's compensation benefits, child day care facilities, etc., extending the interdependencies beyond health insurance per se.

The issues, encompassing a complex range of concerns, vary among countries and often within one country. Major obstacles in implementing or managing a health insurance program can arise from neglected differences in socio-political values among sub-groups in a particular society. It is often overlooked that while it is technically possible to impose a uniform health insurance program on a society in which diverse social values are held, value conflicts among competing interest groups may remain unresolved. These latent conflicts are likely later to lead to unplanned consequences of implemented programs (e.g. Medicaid's excessive cost-escalation [7], Canada's growth of hospital beds and their costs over the past two decades[8]). Unanticipated consequences of the sort experienced in the U.S. and Canada are less likely to occur when a very strong, centralized governmental authority imposes one set of values on all. (China[9], U.S.S.R.[10]).

If the need of the policy analyst is correctly postulated as particularly directed to the interrelatedness of program options and their effects, then the scope of much of the available literature does not address itself to that specific need. There are many comprehensive studies of a descriptive nature (Roemer[11], Simanis[12], Fry and Farndale[13], Fulcher[14], Van Langendonck[15], U.S. Congressional Studies[16], K. Davis[17]), while others endeavor to explore interrelationships of a range of issues and program options Donabedian[18], Berki[19], M. Feldstein[20], Somers[21]). However, the problem of the interdependence of health insurance activities has not been adequately addressed from a comprehensive systems point of view. The complexity of health insurance problems *per se* and the considerable interrelationships among health insurance options and other social programs and systems make health insurance systems well beyond individual investigation[22].

Thus, health care system analysis requires a considerable amount of manpower time to explore sources of information for each policy issue at the varying levels of decision making--federal or central, state, county and city. Many approaches to analysis are used. In health and social planning, it has been common to look extensively at data collected from within one's own country and, by modifying or adjusting for different assumptions about such variables as population mix, incomes, age distributions, use rates, etc. to make rational decisions about the preferred course action[23].

A recent approach, proposed by some as an improvement over merely attempting to extrapolate from existing data to reach rational conclusions, is the controlled field experiment or special study. The experimental model approach has been used in the United States in attempts to estimate the probable effects of income maintenance programs[24], and of housing allowances[25]. The experimental model has even been proposed as a useful tool for evaluating national health insurance proposals[26]. However, the use of controlled experiments as tools for social planning has been criticized since so many of the necessary criteria and assumptions of controlled experiments are violated in complicated social action and health related programs[27]. In fact, some maintain that the modern techniques in policy analysis which have been pursued with such great optimism in the areas of public housing, manpower training, etc have had few if any striking successes, partially due to a failure of the analysts to appreciate the complexity of the tasks they were facing[28]. The complexity arises because, inevitably, goals, the resultant programs and their results are all highly interrelated and interdependent. Levin, Roberts

and Hirsch in a more recent approach to policy analysis, applied the theory of systems dynamics to complex social problems, in particular to the specification of the U.S. heroin problem in terms of a closed, or feedback, dynamic system[29].

Useful information has come from the above approaches in some settings, however, they primarily focus on activities and observations within a single society or section of the country. Improved generation of alternatives could result from the consideration of a wider range of possible alternatives, particularly those which tap cross-national experience. The proposed methodology not only would offer more observations than are currently available to the above approaches, but would include qualitative and descriptive evaluative data collected for a wide range of alternative activities. This, along with qualitatively determined interrelationships between the alternatives will serve to complement and assist the above and other approaches, adding alternatives and relationships for testing and scrutiny.

A central component for this process is the development of a systems framework for health insurance issues, program options, problems and solutions on which to build an information base containing structured data elements on a broad range of alternative activities, derived from literature searches and other sources.

3. A SYSTEMS CONCEPT FOR A HEALTH INSURANCE POLICY INFORMATION FRAME

The essence of the presented activity lies in the recognition of two important factors: (1) the need to recognize the interactions that characterize health insurance as a system, and (2) the need for analysts and decision makers to try to consider as many reasonable alternative activities as possible. A principle rationale behind the present attempt at defining health insurance as a system relates to the importance which Forrester gives to systems as the building blocks for understanding complex dynamic behavior by way of the theory of system dynamics[3].

In this view of health insurance the dynamics of the system are initially set in motion by the broad health insurance goals determined by the social values and political will of a society. A health insurance goal here is a category of concerns less specific than the term objectives as used in the usual planning and evaluation context, but yet more operational than a mere statement of societal values. Seven areas or issues have been used to define goals within the current project and are intended to be the basic categories for the major grouping of alternative activities which aim toward the ultimate goal of a healthy society. These goals are listed in Table 1.

The primary means by which attainment of a society's health insurance goals is attempted is by implementation of various program options. The health insurance goals can be thought of as requiring program options aiming at their fulfillment. On the other hand, the very existence of certain programs may serve as a controlling or guiding factor in terms of which broad goals are pursued and with what degree of intensity. In this way there is a kind of synergism between program options and goals so that in most cases neither can be looked at separately, and it may become very difficult to separate out which force has brought a certain set of program options into being. The program options are broad sets of activities, and in the context of this project, may also include many activities not necessarily already in existence.

From the program options, we can project subsequent outcomes either empirically or hypothetically. Some of the outcomes will, it is hoped, be positive and to that extent some attainment of the major goal is achieved. Because all social programs have a variety of impacts, however, the results of any one of them may be felt in areas other than the specific one initially intended. The consequences of a program may be beneficial and expected, but with most activities, because it is inherently impossible for one activity to be all things for all segments of a population, some of the consequences of a program may be undesirable and these undesirable effects may need to be counteracted or corrected by other activities. The undesirable consequences are grouped under the broad category *problems*, and the various attempts at their correction, under *solutions*. There is an interaction between each of these levels of activities—the issues and program options affecting each other, while program options and "problems" shape each other, equally as do problems and the solutions tried to correct them. The success or failure of the solutions affect in turn the continued or modified pursuit of the original and other goals. Desirable effects of a program option often constitute a solution to a problem inherent in some other program option. A few examples may illustrate the concept.

There are many different kinds of problems that arise when implementing programs for health insurance goals. A restricted categorization of them would be deficiencies, negative results and constraints. A deficiency would be a structural inadequacy resulting in failure to obtain fulfillment of an objective because of neglect or exclud-

Table 1. Seven major goals of health insurance

1)	Promote access to medical care.
2)	Contain indirect financial burden of illness on the individual consumer.
3)	Contain direct financial burden of illness on the individual consumer.
4)	Promote efficient remuneration of providers.
5)	Containment of overall cost of medical care.
6)	Secure appropriate medical care.
7.	Promote preventive health care.

ing a segment of the population or area of concern. For example, lack of coverage of the unemployed is a deficiencies in health insurance schemes linked to employers. Negative results are process outcomes resulting from implementation of a program option, e.g. some undesirable impacts either directly or indirectly to some segment of the target population or area of concern, or with respect to some other issue under consideration in this activity. An example would be excessive laboratory or surgical procedures resulting from expanded coverage. One class of problems more difficult to identify without ambiguity would be program constraints. These would be limitations in the environment of a program option, which imply the need for avoidance of compensation. Problems in this category may flow from such social factors as regional or cultural patterns of health care utilization and health behavior practices which may constrain access or stimulate overutilization of services.

Problems, and indeed solutions as well, can be defined only in the context of an existing set of criteria for their classification and identification. These criteria depend almost totally for their definition on the social values and priorities of the society. The criteria of equity, efficiency and illness cost risk sharing have been proposed for the current project. Identification of health insurance system components in the above format, along with literature references linked to them, form the basis for a health insurance information base to serve as an important but currently lacking input into the policy analysis process.

Figure 1 shows a summary of the proposed health insurance project, emphasizing that the analytic process is served by the project rather than subsumed within it.

Obviously the boundaries in any attempt at a systems view can not always be formulated definitively, and in social policy even less so. In health promotion many other social activities play a crucial, if not overriding role, the contribution of medical services to overall health status being increasingly questioned[8]. Yet health insurance's main concern is medical care, even preventive care being often totally or partially provided by public health activities. Many important preventive activities are partly or completely outside the reach of medical care in different areas of social action, be it the behavior of the individual or family, the compliance with immunization provisions, the use of destructive weapons in inter-personal conflict, the safety at work, the protection of the environment, etc. all of which can affect health and the cost of medical care and health insurance considerably. From this point of view it becomes all the more apparent that medical care is but one of the contributors to social welfare (Margot Jeffereys[31]) and that the socio-political values entertained by any society are basic to health behavior and health care. This paper does not pretend to extend its boundaries into these manifold areas of social concern, yet does not intend to neglect their existence. A projection of the interdependencies of these various social concerns with health insurance policy design is provided in Fig. 2.

The uniqueness of the present approach lies in the existence of well defined cross linkages among the four elements within the formulated system. Indeed, not only can an activity appear as a "solution" for many "problems", but in some cases an activity may be a valid program option under consideration of one issue, and the undesirable result, or problem, in another with its particular solutions.

4. PROPOSED DEVELOPMENT OF A HEALTH INSURANCE INFORMATION FRAME SCOPE

Current state of the art work in library science has developed several comprehensive multi-coordinate word indexes for many fields of study. The most elaborate of these have been prepared for the areas of medicine and biological sciences (MEDLARS, *Science Citation Index*). Word indexes also exists for the social sciences but to date are not as comprehensive as those for the exact sciences[32]. These extensive data collections may be based on multiple keywords from previously written abstracts, title keywords, or subject content of the current literature. Such abstracting and indexing, while immensely worthwhile and essential in medical and scientific fields for many purposes, is not what the current activity proposes to do. Rather, it is the creation and use of a taxonomy of health insurance issues, options, problems, and solutions that forms a key element of the proposed information frame.

It is clear that the development of consistent typologies in the social and political sciences lags far behind such development in the natural sciences. This is no doubt related to the difficulty of trying to relate complex social problems and solutions to a clearly categorized indexing scheme. Also, the time frames for problem solving, policy analysis, and decision making in the highly politicized social structures is considerably shorter than in such academic disciplines as mathematics, statistics, or biology, discouraging the considerably time-demanding efforts in this direction.

Establishing a taxonomy of categories of knowledge is a laborious endeavor in any field, and for health insurance problems as a part of the social sciences possibly more so than in some other sciences. On the other hand the first application of a discipline to a field so far untouched usually appears more complex than already existing applications, without necessarily being so, since the earlier applications have partly lost their image of complexity and laboriousness as a result of work already accomplished.

The establishment and maintenance of indexed reference collections is labor intensive and costly, due to the tremendous volume of information indexed. However, as emphasized earlier, comprehensiveness in the mode of indexes such as MEDLARS and Scientific Citations Index is not envisaged here. Rather only articles and reports containing information relevant to the information frame or for expanding this frame would be selected. As a result it is expected that the information base will be much smaller in size than those currently in use and maintained for the more conventional library searchers. In contrast to conventional indexes, the coding of the information will require more careful attention and understanding of the contents of the references found, since the aim is not to create merely a keyword reference, but to identify the kind of information contained in the reference (e.g. type of political system, resources identified, quantitative results) and link it logically to the information frame (see Fig. 3).

It is expected that such indexing will require more specially trained indexers than normally used for abstracting of articles, etc. and that extra attention will have to be given to the crucial problems of inter-coder reliability. Much use will be made of the existing multi-coordinate indexed systems, but this will by no means be the only source of input to the information base. Actual experience with health insurance options is not always

readily available from publications normally included in multi-coordinate indexed systems and is more likely to be found in internal documentation of health insurance systems both in the U.S and abroad. These normally unpublished sources would be a significant source of much of the information for the proposed health insurance information base.

The exact costs of establishing and maintaining the information base can only be approached after the information frame has been evolved to a workable degree. The test for the workability of the frame lies in the use of the frame for exploring qualitatively interrelationships among issues, program options, problems and solutions. It is postulated that the capacity to explore such qualitative relationships within this information frame is adequate justification for further developing and using the proposed systems approach to health insurance.

Methods

(1) *Initial exploration.* The activity reported now has been pursued by the authors, assisted through occasional review by colleagues at the School of Public Health in Ann Arbor. An information frame was internally generated using only the three categories—issues, problems and solutions. The listings for these three categories were subsequently partly confirmed as well as expanded through literature search. Further development of the concept led to the recognition of the need to identify program options for the selected issues and to clearly specify criteria for identification of problems and solutions. This recognition led to the outline of the information frame as shown in Fig. 1, using as the basis for the taxonomy the hypothesized operational sequence—issues, program options, problems and solutions. Figure 4 shows the format for listing the program

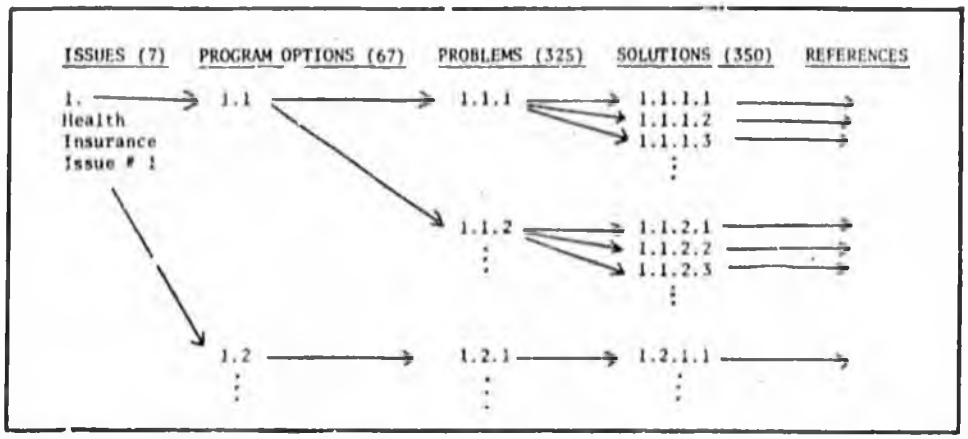

Fig. 4. Format for listing of health insurance taxonomy.

options, problems and solutions based on the proposed taxonomy. The sixty-seven program options so far generated for the postulated issues are provided in Table 2. An example of the worksheets using this format for one problem, under one program option, under Issue 1, *Promote Access to Medical Care*, is shown as Fig. 5. This example lists the codes for problem class (reference Fig. 1) and for the criteria used for identification of the individual problem and solution. It is anticipated that this identification will provide one of the tools to explore qualitative interrelationships between solutions and problems and issues. Also an attempt is being made to identify for each solution one or more of the seven levels assumed for most health care systems at which the solution is directed. Known applications of solutions are linked to these levels of care by country of application with references.

The relevancy of generated program options, problems and solutions should be tested by submitting the preliminary frame, once completed, to a larger group of health insurance experts here and abroad. It is likely that this testing process will generate a considerable number of additional program options, problems and solutions easily incorporated in the established data file. The design for a computerized information base using the health insurance information frame as described has been done with the anticipation of easy expansion resulting from such tests[33].

(2) *Access to an interrelated taxonomy.* To establish data manipulation capability the list of health insurance issues, program options, problems and solutions is used as a starting point. From this list a single file of raw data consisting of two types of records, identification records and reference records, has been constructed.

The identification portion of the files contains one set of data (one record) for each program option, problem and potential solution. The reference records would be made up of one additional data record for each country where, for a given program option or solution, an application reference or a literature reference(s) to a theoretical application was found. The exact contents of these two kinds of records is flexible, however, the basic format is as shown in Fig. 6. The machine readable data base has been described in more detail elsewhere[33].

Identification of individual problems and solutions is done by use of a computer generated word index for each relevant term in the program option, problem, and solution description. This facilitates initial location of specific elements of the taxonomy without requiring prior knowledge of the structure.

It is probable that explicit definitions of levels of care and areas of impact, both from the provider and client perspective, can be used with concepts from set theory to provide a framework to structure analyses of the interdependence problem. The procedure to be followed involves identifying additional variables for each solution based on their expected outcomes with regard to other issues of the health insurance system. The inter-linkage would be identified at two levels—the first level will be the impact, beneficial or otherwise, of each solution on each of the other major issues, the second level will be the identification of solutions which may be incompatible with other specific solutions for this same objective. Each solution can effect the other issues positively, negatively, or not at all, and this gives enough classification to define an additional categorical variable for each solution.

For identification of program options, problems and solutions occurring more than once, all such solutions will be listed with an additional four level value made up of variables 1–4. For the first or primary occurrence of a solution this would be just a duplication of the first four variables: but where this solution was one repeated from a previous location, it would contain the issue, program option, problem and solution number of that solution (see Fig. 6).

Once such a data frame has been assembled, a variety of questions and comparisons can be made. A major element of flexibility arises from being able to cross reference any of the variables in the data frame. This can be done very easily without yet having all the variables defined, by using only those of most immediate concern (issue number, problem number, solution number, country and level of care) on an interactive computer system. Cross referencing would be accomplished by using packaged software (already available without immediate production of new or special computer programs), to perform sorts and/or counts of the various elements. For example, if identification of solutions applied for various problems was desired, the computer can perform a sort operation on the solution identification field which would group all occurrences of each solution, and show the different problems to which it has been applied. Similarly, counts or cross references by country, or any of the other variables, could also be obtained rapidly and inexpensively by a simple computer command. However, as additional descriptive variables (as well as other constraints) are examined special programs can then be written.

Interrelationships among the program options, problems and solutions will be explored through "signed descriptors" for the individual problem or solution qualitatively indicative of the direction of the effect on the criteria other than the one used for identifying a problem or solution as well as on the issues other than that in which the problem or solution occurs. "Signed descriptor" is used to refer to additional variables associated with each program option and solution to indicate the effect of this activity on the other issues and the other criteria. The effect is intended to be shown by giving a plus or minus *sign* or a zero to indicate the probable direction of the effect relative to that issue (positive, negative, or neutral), as for example in Table 3. The concept of a signed descriptor as an aid in the grouping of social science literature has also been observed elsewhere though not exactly in the present context[32]. For example, a program option which promoted access (Issue 1), but increased the indirect financial burden (Issue 2) and also failed to contain overall costs (Issue 5) might have three signed descriptors of +−− for these three issues.

Another means for identifying qualitative relationships is the tabulation of repeated occurrence of options as problems or solutions and vice versa. Analysis of such multiple occurrences will give some indication of the range of possible effects of the different activities. As an example, co-insurance may constitute both a program option and a potential solution in attempts to contain overall costs, but will emerge as a problem violating equity when considering the issue of promoting access to medical care. Thus it will be more easily recognized that selection of solutions to, for instance, co-insurance as a problem, mitigates negative effects on the accepted goal of equity. The power of any given solution may in this

Program Option		Problem	Problem Class	Problem Criteria		Potential Solutions	System Level	Applications
1.8 Compulsory health insurance for those with an income below a defined level. way be measured by the frequency with which it addresses different problems.

Quantitative interrelationships are not intended to be produced within the policy information frame itself, but are expected to become available from literature references.

5. PRELIMINARY RESULTS

For the seven selected issues, 78 program options have so far been listed. For these 78 options 325 problems have been identified. Over 350 solutions generated earlier for the more than 75 problems at that time listed have been rearranged for the newly identified problems. So far applications in 8 European health insurance systems have been identified for 85 solutions. To test the feasibility of creating a computerized health insurance information base, the available issues, program options, problems and solutions have been transferred to computer storage according to the design provided in Fig. 6.

The first preparation of the information frame cannot at all be considered complete. Completion will require intensive collaboration from future users, particularly in government, and health insurance specialists, both in this country as well as in other countries with experience in health insurance, so as to complement and adapt the frame accordingly. In addition, the literature search, once started, is expected to provide additions to elements of the information frame, without need to change the design of the frame itself.

6. DISCUSSION

The preliminary character of this report relates to the recognition that the information frame, once worked out for all four categories, needs further testing by health insurance specialists and policy analysts for confirmation or adaptation. A structured survey of policy information-needs should form a part of such a testing phase for the project. Contributions must also be obtained from existing health insurance systems outside the U.S.A.

In addition, it is obvious that the authors by themselves can never expect to establish an adequate information frame. A search for additions and corrections and a need-survey would eventually complete a workable information frame for the purposes identified earlier. Apart from adaptation, addition to the frame will be necessary, particularly on the basis of information available through reports, including internal reports from health insurance agencies, both government and private. The information frame as designed allows for expansion within the established four categories, and also for possible expansion of the categories if considered necessary. The establishment of the information base would be a much larger endeavor, requiring considerable and long-term support or might be undertaken in another environment altogether.

7. CONCLUSION

So far the development of the information frame has been conducted in a university setting with assistance from experienced health policy analysts. But even with a relatively limited exposure, the potential usefulness of the approach has been demonstrated. The increasing importance of comparative analysis of health insurance alternatives, plus the increasing interest in international comparisons of experience, and the time saving such a resource could provide policy analysts are the justifications for the present efforts.

QUESTIONNAIRE

1. Do you have an information framework for Health Insurance Policy Information available to you on the following issues?

	YES	NO
a) Access to medical care.	☐	☐
b) Contain in direct financial burden of illness on the individual consumer.	☐	☐
c) Contain direct financial burden of illness on the individusl consumer.	☐	☐
d) Efficient renumeration of providers.	☐	☐
e) Containment of overall cost of medical care.	☐	☐
f) Secure appropriate medical care.	☐	☐
g) Promote preventive health care.	☐	☐

2. Would an information frame with all of the above issues increase your (agency's) analytical capacity,

	YES	NO
both in scope	☐	☐
and in time efficiency? . . .	☐	☐

3. If a complete information frame was made available to you, would your organization/agency use it? (Please indicate on scale.)

Never Always

4. What factors would limit your (agency's) use of such a taxonomy?

	YES	NO
a) inadequate staff	☐	☐
b) actual policy problems do not relate to this kind of analysis	☐	☐
c) time efficiency not important enough	☐	☐
d) policy choices are not related to interdependencies among issues, program options and problems	☐	☐
e) political, administrative, and other constraints limit consideration of interdependencies	☐	☐
f) other (specify) _____	☐	☐

5. Would you expect an information frame to require

	YES	NO
a) expansion of issues	☐	☐
If yes, which? _____		
b) frequent updating	☐	☐

6) Does your agency have the resources to engage in policy analysis? ☐ ☐

If yes, please identify number of manpower in categories

(i) ____ health economists

(ii) ____ public administrators

(iii) ____ sociologists

Representative Thelma Buchholdt
Pouch V M.S. 3100
Juneau, Alaska 99811

Dear Representative Buchholdt:

While I was in Alaska a week ago, the Health Education & Social Services Committee requested information concerning the costs for health care coverage in H.B. 977. A similar request was received by phone from Jack Kreinheder in the House Research Agency, who asked for a comparison between the $106 cost of coverage for state employees and the cost per member of coverage for all Alaskans.

I have spent a week on the project and the answer cannot be derived from our data. When coverage is figured for all Alaskans, the group makeup changes radically. For instance, a group of employees is younger than a group composed of all Alaskans since persons leave the employment group upon reaching retirement age. A group of employees is healthier since that group is composed of working people and persons who are disabled or not healthy enough to be employed would be a part of a group of all Alaskans. A group of all Alaskans would have to include all the persons who are in institutions in the state and these persons are not included in any employed group and usually have health characteristics which would result in higher utilization. Because these characteristics are different from the characteristics of an employed group and because these characteristics will have a direct effect on the utilization of benefits, the extrapolation of cost from a given cost for the state employees would be inaccurate and misleading.

The Health Education & Social Services Committee may want to consider asking that an independent consultant be employed during the interim to make an estimation of the cost of coverage. While that study will give you only an approximation of the costs, that approach seems to be the only way that a reasonable estimate will be available.

Sincerely,

Joan H. Gaumer

POSITION PAPER/Department of Health & Social Servi

POSITION PAPER
ON
HOUSE BILL NO. 977

"An Act relating to the health of residents of the state."

I. Departmental Overview of House Bill 977

House Bill 977 appears designed to accomplish the following reforms to health care delivery in Alaska:

a. Section 1 and 2 of House Bill 977 provides for a comprehensive plan for coverage of certain health care costs for all Alaskans who are otherwise not covered under a private or public health plan. The bill requires employers to provide health insurance coverage for their regular employees and their dependents and to pay at least 50% of the premium cost of such coverage. The Bill defines the standards and designs of the health plans including covered services and deductibles. The bill also offers health insurance coverage to high risk, "uninsurable" clients under the state plan.

b. Section 3 of H.B. 977 directs the Commissioner to use available medical assistance funds to purchase health care service through health insurance policies or contracts, if the Commissioner of the Department of Health and Social Services find them to be cost effective.

c. Section 4, 6, and 7 of H.B. 977 would expand current Medicaid and General Relief-Medical programs to cover new groups of persons specifically the unborn child group and the medically needy group.

d. Section 5 of H.B. 977 would expand covered services under Medicaid to add many of the optional services not offered under the program in Alaska.

II. General Departmental Comments/Recommendations

The Department of Health and Social Services will primarily reserve its comments to Section 3 through 8 of the bill, as the earlier sections are primarily concerned with employers and insurance and it is our understanding that these issues are planned to be addressed by the Department of Commerce and Economic Development, Division of Insurance and the Department of Labor. We do wish though to bring the Committee's attention to Section 18.12.070 on pages 4 and 5 of the bill. That section in part relieves an employer of his obligations for employees who already have health coverage through state medical assistance or state prepaid health care plan for the needy. It requires the Commissioner of Labor to notify the employer of

POSITION PAPER/Department of Health & Social Servi

that fact. We find some administrative problems with the release of this information, which is generally classed as confidential under state or federal laws. We could release to the Department of Labor the names of public assistance recipients who are employed only if the individual recipient has signed a release form permitting the Department of Health and Social Services to do so. We believe this to affect only a small percentage of clients, as most public assistance clients are not employed outside of the home, due to age, disability or dependent children in the home.

However, the Department believes that H.B. 977 takes a many faceted approach to a complex problem. It appears to move in too many directions and at a too rapid time frame, which could potentially jeopardize the successful accomplishment of the worthwhile goals that H.B. 977 seeks to achieve. The Department's specific comments which follow in Part III of this Position Paper support this observation. The Department's general comments regarding Section 3 through 8 of H.B. 977 are, as follows:

1. We support in concept the purchase of health care services through health insurance policies or contracts when judged by the Commissioner of the Department of Health and Social Services to be cost-effective for Medicaid and other medical assistance programs;

2. We recognize the need for the addition of the unborn child group as eligible for cash assistance and medical services under AFDC and Medicaid respectively. The Department views this as a positive step to providing necessary medical care, food, clothing, and other necessities at a time critical to the development of the child in effort to prevent future problems. The State covered at one time unborn children under AFDC. This option was dropped by the Legislature in 1975. The Department found little cost impact to overall AFDC expenditures as a result of the addition or deletion of this option.

3. We propose that additions of new Medicaid service options (such as drugs or podiatry) should be phased in, rather than all remaining services being added at a single time. Each service could be evaluated on its own merits, rather than in mass to determine whether it is cost-effective to do so at this time.

POSITION PAPER/Department of Health & Social Services

III. Specific Departmental Recommendations on Section 3 through 8

Section 3 - AS 47.05.070 (a)

The Department is in favor of purchasing services through health insurance policies or contracts if more cost effective than traditional methods. The Department has no problem with the mandatory nature of the language in this section. "Medical assistance" should be redefined and a definition added for "remedial care".

Section 3 - AS 47.05.070 (b)(1)

Language appears to confuse the role of Commissioner, Department of Health and Social Services. Commissioner of Department of Health and Social Services purchases services under the same standards in place for all others competing for these medical services. There is nothing unique about the DHSS medical programs which would set professional standards different for them than exists for all other persons purchasing these services. Recommend 47.05.070 (b)(1) be reworded as follows: "to provide those medical and remedial care and services allowed under Alaska law."

Section 3 - AS 47.05.070 (b)(2)

Language is confusing and adds no additional authority to the Commissioner. Recommend deletion entirely or simply cross-referencing to existing state laws. Adequate safeguards exist in present law to insure fair reimbursement of medical providers.

Section 3 - AS 47.05.070 (b)(3)

No change recommended.

Section 3 - AS 47.05.070 (b)(4)

No change recommended.

Section 3 - AS 47.05.080

Recommend deletion of this section entirely. The Commissioner is not a rate setting authority in this instance. Rates are governed by competitive purchase of services on a bid basis with all competitors abiding by the same bidding principles set by Department of Administration and Division of Insurance. The only authority vested with the Commissioner is rejection of all bids which exceed the federally prescribed upper limits used by Medicare. Again, adequate safeguard and bid rules exist in this area in both federal and state regulations.

POSITION PAPER/Department of Health & Social Service

Section 3 - AS 47.05.090 (a) and (b)

No change recommended

Section 3 - AS 47.05.100

No change recommended

Section 3 - AS 47.05.110

Recommend this section be re-titled "Interim Payment." The Department is presently working towards installation of a more sophisticated claims processing system by July 1, 1981. An interim payment mechanism will be part of that new system for certain large volume providers.

Section 3 - AS 47.05.120

Under present Medicaid law the Department is required to pay 90% of "clean claims" within 30 days of receipt, and 99% of "clean claims" within 90 days of receipt. The Department supports the idea that medical providers should not suffer financially because of bill payment delays after a reasonable period. Therefore, the Department supports the intent of 47.05.120 with the following changes:

1. Interest entitlement should be limited to "clean claims" only. In Section 47.05.120 the phrase "clean claim" should be substituted for the phrase "a bill."

2. Interest entitlement should not commence until the 91st day after receipt of a clean claim. Interest entitlement should accrue in monthly increments, not in daily increments, and providers should receive a full months' interest entitlement if the bill is paid after the 15th day of any calendar month.

3. "Clean claim" should be defined in Section 47.05.130.

Section 3 - AS 47.05.130

1. Add definition for "remedial care," "non-exclusive" contract, health care service contracts.

2. Define "medical assistance" to mean Medicaid, GR Medical, Catastrophic Illness, Crippled Children's and Maternal/Child Health.

3. Define 'clean claim' to mean one that can be processed without obtaining additional information from the provider of the service or from a third party; it includes a claim with errors

FOSITION PAPER/Department of Health & Social Service

originating in the department's claims processing system, but does not include claims from a provider who is under investigation for fraud or abuse, or a claim under review for medical necessity.

Section 4 - AS 47.07.020 (b)

This Section would amend Medicaid law to provide coverage for all optional groups not currently entitled to Medicaid benefits, primarily the unborn child group, the unemployed father, and the medically needy group. We recognize the value of the addition of the unborn child group to Medicaid to assist in proper health and low income women's development of child through the receipt of necessary prenatal care. We believe the addition of this group to Medicaid will have little impact on programs' expenditures. We can see the need for health care coverage to the medically needy and to the unemployed fathers but the cost impact of these options would be substantial and would be covering a greatly expanded group of clients. The Department supports the concept of a limited medically needy program including only the aged, blind, and disabled until such time that we can develop the monetary and administrative burdens.

Section 5 - AS 47.07.030

This section as amended would change Medicaid law to dramatically expand medical services offered under the Medicaid program. The Department recommends that each service should be evaluated on its own merit, perhaps adding only those where it appears cost-effective, in terms of saving general fund dollars, to do so. Also, all services added in mass would cause administrative problems. A phase-in model would be more appropriate if the Legislature decides to pursue this section.

Section 6 - AS 47.25.120

This section as amended would add broad medically needy coverage under the State General Relief-Medical Program. The Department supports the concept of a limited medically needy program including only the aged, blind, and disabled until such time that we can develop the monetary and administrative burndens.

Section 7 - AS 47.25.410 (3)

This section as amended would add the unborn child group under the AFDC program and entitle them to monthly cash assistance payments. Eligibility for cash payments under AFDC is a not prerequisite for the unborn child group to receive medical coverage under Medicaid.

Dear Legislator

We are strongly opposed to House Bill 977. State health insurance would not only be very expensive, but it would crowd private insurance carriers out of the market, and therefore, greatly interfere with free enterprise. Additional information is included on second page.

Sincerely,

FREE Committee

A committee of the Anchorage Woman's Club

Addendum to FREE Committe's position on House Bill 977.

We are opposed to HB 977 for the following reasons:

1. Insurance premiums will be higher than many small business people can afford.

2. History has proven that the level of care will decrease due to the increased demand.

3. We do not need another health care program in addition to Medicare and Medicaid. We have not heard patient complaints or of problems.

4. Large losses may result which the state would have to underwrite.

5. State health insurance would force insurance companies to cover even "bad" risk persons.

6. Over a period of 5-10 years all private companies will pull out of the state program because of the losses to them.

7. This is the first step towards socialized medicine because the premiums will be high; therefore there will be pressure to lower premiums so the state will pay to make up the difference.

8. The State cannot run the Medicaid program effeciently so how can they administer this program. The State had to hire an outside firm to manage Medicaid billing and the payments are still late.

Dear [illegible]

We oppose House Bill 412 relating to minimum standards for hospital care. If such a bill were enacted the cost of hospital care could rise dramatically. We feel that this bill puts an unnecessary burden on the physician as well as on the relatives of the patient.

Sincerely,

FREE Committee
Anchorage Woman's Club

POSITION PAPER

To: Legislators of the State of Alaska

From: FREE Committee of the Anchorage Women's Club

Re: House Bill 412 "An Ac providing for minimum standards for hospit care."

The FREE Committee of the Anchorage Women's Club opposes HB 412 for the following reasons:

1. Recruitment and retention of physicians in our rural communities could be impaired.

2. The bill appears to regulate the physicians through the hospital. Hospitals do not practice medicine, but rather provide the setting in which medicine can be practiced. Doctors work at the hospital, not for the hospital.

3. The cost of health care will rise even higher.

4. This bill appears to ignore the training of nurses who are specifically prepared to work on the intensive care ward.

5. Very few doctors will allow another doctor to interfere with his patients' care. We as patients would not like a strange "night" doctor taking over our case.

6. Malpractice insurance probl ms may result if one doctor treated another doctor's patient without permission.

7. This bill regulates and interferes even further with a profession whose primary goal is excellence in their services and relationships with their clients.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF PUBLIC ASSISTANCE

POUCH H-07
JUNEAU, ALASKA 99811

April 14, 1980

To: The Honorable Thelma Buchholdt
Alaska State Legislature
House of Representatives
Pouch V
Juneau, Alaska 99811

Thru: Helen D. Beirne, Commissioner
Department of Health and Social Services

Thru: Rod Betit, Director
Division of Public Assistance

From: Robert M. Ogden, Chief
Medical Assistance Section

Dear Ms. Buchholdt:

We have not been able to develop a comprehensive and complete fiscal note for HB 977. In order to adequately develop a responsive fiscal note more time is needed.

To date we have developed fiscal notes for three sections of the bill and will outline them as follows:

		Millions
a.	Dental Services and Dentures:	2,800
b.	Limited Medical Needy program for Blind, Disabled and Elderly (persons over 60):	5,600
c.	Prescription Drugs for the Elderly (65 years or older):	2,499
		10,899

These three portions are a very small part of the cost involved in the implementation of House Bill 977.

Acquiring cost figures on the many other services that would be added will take lengthy study and research and the Deaprtment has not had time to accomplish that which is required.

06-F81LH

Other services added that need cost analysis are as follows:

1. Diagnostic, Screening, Preventive and Rehabilitative Services: This type of program can be very costly if not controlled in a reasonable manner.

2. Podiatrist Services: Should not cost a great deal due to the small number of podiatrists in the State.

3. Chiropractic Services: This also could be a very costly addition.

4. Private Duty Nursing: Could in the long run with development reduce costs currently incurred in health facilities expenses.

5. Physical Therapist Services: This addition would be of moderate cost to the State.

6. Occupational Terapy: Also of moderate costs, depending upon controls of usage.

7. Personal Care Services: Costly to implement but may in the long run actually save costs.

8. Prosthetic Devices: Should be of little cost.

CHAMBER OF COMMERCE

FAIRBANKS
ALASKA

A RESOLUTION RELATIVE TO HEALTH INSURANCE IN THE STATE OF ALASKA

EREAS the Alaska House of Representatives Committee on Health, Education and Social Services (HESS) has introduced House Bill No. 977, and

EREAS HB 977 ignores the fact that most employers in the State of Alaska provide health insurance for their employees, and

EREAS the provisions of HB 977 place an additional cost burden on small business, both for premium and administrative cost, and

EREAS the provisions of HB 977 require additional regulations to be promulgated in large quanity by the State of Alaska, and

EREAS HB 977 would create an additional cost burden to the insurance carriers to bring their current plans into compliance with the provisions of HB 977, and this cost would be passed over to the consumer, and

EREAS these cost burdens would be a disincentive to have employees, and

EREAS currently there is a sufficient number and quality of insurance carriers licensed in the State of Alaska to provide adequate coverage as outlined in the provisions of HB 977, and

EREAS the provisions of HB 977 require the State of Alaska to add substantial additional staff to administer this local version of a "National Health Care Plan", now

EREFORE BE IT RESOLVED that the Greater Fairbanks Chamber of Commerce is opposed to HB 977 in its entirety.

ssed by the Board of Directors of the Greater Fairbanks Chamber of mmerce on April 8, 1980.

Re: House Bill 997

Dear Committee Members:

The Greater Kenai Chamber of Commerce has requested that I communicate to you in writing the Chamber's position with regard to House Bill 997. The Chamber opposes the Bill for the following reasons:

The great majority of our members carry some type of health insurance for the benefit of their employees. It therefore appears that only a relatively few regularly employed Alaskan employees would benefit from the plan.

As to those employers who do not carry insurance for their employees, there appear to be three basic types of employers. The first category of such employers are businesses who primarily employ seasonal workers, many of whom are transient. A prime example of such employers would be canneries. The canneries employ seasonal workers who would be benefited by the plan for only a month or so, and have no reasonable expectations of being insured while in the employ of the cannery.

The employers of such an industry would be saddled with the expenses of additional overhead and premium expenses with little net benefit to Alaska employees generally.

The second classification of employers who do not carry insurance are those employers, generally small businesses, who have employees who have chosen the occupation, fully aware that no health plan exists, but who have elected to stay with the job for whatever reason. They may have spouses who are covered under alternative plans; they may receive wages or bonuses in a sufficient amount to pay for their

own medical coverage; or, they may have elected to take the additional wages in lieu of insurance plans. Examples of such workers are those usually single workers whose perceived health insurance needs are not of significant concern to them, but who are in the stage of their lives where the additional income is more significant to them.

The final obvious classification is those employers, again primarily small businesses, who cannot afford to provide health care plans for their employees, but who are nevertheless able to attract employees because of other attractive aspects of the working conditions offered.

The Bill as presently written would result as noted above in a net benefit to only a small portion of the Alaska work force. The provision of the Bill which requires mandatory coverage by employers is its most objectionable feature. We question whether it is the function of the State to make such an economic decision for employers and employees. If health care is of concern to an employee, then that employee can seek employment with an organization which offers such a benefit, or can join an organization which offers a group health care plan to its individual membership. Even our Chamber of Commerce has such a plan which is available to all members and their employees.

If an employer is able to attract qualified employees for whom a health care plan is not of significant concern, then it should not be the function of the State to amend the employment contract by adding a provision which may be of little consequence to an employee, but is an added burden to an employer through increased overhead expenses.

The Bill appears to focus primarily on the small business entities of the State who are already overburdened with governmental reporting and record keeping requirements. The small benefit to the Alaskan employee from the Bill appears to be substantially outweighed by the additional costs and administrative problems with wh ch the Bill saddles the small employer.

The administrative features of the Bill make it obvious that an increased state bureaucracy is going to be required to supervise and administer the plan. This bureacracy does not seem to be justified by the limited needs which are addressed by the plan.

We view the Bill in its present form as being an unnecessary intrusion into the affairs of employers and employees, and of limited benefit generally when compared to the hardship with which it saddles the small business.

Thank you for your attention to our concerns.

Very truly yours,

C. R. BALDWIN
Director

CRB:jh

IMPACT ON INSURANCE CARRIERS

Minnesota Experience

The Minnesota Comprehensive Health Act took effect January 1, 1977. At year end, 1976, the following statistics were compiled:

Out of

751 carriers licensed to write health and accident insurance in the state,

42 carriers withdrew from the state rather than comply with the law. Of these,

25 never wrote any health insurance in the state anyway. The remaining

17 carriers that withdrew had a combined volume of

$888,000 in health insurance premiums in Minnesota (less than 0.2% of the total) or an average of

$52,200 in premiums per carrier. The largest carrier that withdrew reported a volume of

$428,000 in accident and health premiums.

Since the time these statistics were compiled, other carriers have dropped their accident and health business in Minnesota, and some that originally withdrew have resumed their accident and health line of business in the state again.

Mr. Caroll Calloway, Assistant General Counsel for the Health Insurance Association of America, discussed several reasons that carriers might have preferred to stop doing accident and health business in Minnesota rather than comply with the Comprehensive Health Act.

The first objection was that many carriers specialize in a particular type of insurance and do not underwrite comprehensive policies. The law requires them to offer comprehensive plans, and does not allow them to refuse a client for reasons other than that the client is an uninsurable risk. Another objection was that the required conversion privileges obligates a carrier that specializes in group policies to also write individual conversion policies.

Mr. Calloway stated that the insurance carriers like the Connecticut comprehensive health act, because in Connecticut the underwriting burden for the mandated coverage is not placed on the induvidual carriers, but on the association. The association in Connecticut develops and underwrites the comprehensive health plan which the carriers are obligated to make available to their clients. The Minnesota law also provides for reinsurance and administration by the association of all required types of coverage, and the association has the ability to develop prototype plans for use by any carrier which does not choose to develop and issue its own qualified plans. The Minnesota carriers association has refused, however, to reinsure lines of coverage mandated by the act, other than the state plan for high risk clients, according to Mr. Calloway. Thus it is not the provisions of the law which place an insurmountable burden on the carriers, but the practice of the assocaition, which of course is run by the carriers themselves.

The third objection was the "major medical roll on" which requires carriers to offer major medical coverage to their client with unqualified plans. They regard this as an impairment of contract. This section to which the carriers strenuously object could easily be deleted without significantly weakening the bill, in light of the requirement that carriers must offer their client a comprehensive qualified plan with major medical coverage anyway.

MEMORANDUM March 18, 1980

TO: Representative Bill Parker
Attn: Mr. Jim Erickson

FROM: Jack Kreinheder, Issues Analyst JK

RE: State Health Care Programs
Research Request No. 61

You have asked that we: (1) provide any available studies on Medicaid, state health insurance, and the State's health care program in general; and (2) determine whether the State could provide medical care for low-income groups in medically underserved areas of the state. The enclosed materials represent all the relevant materials we were able to locate, with the exception of past copies of the State Health Plan and the Medicaid Annual Status Report. These reports were not included because of their bulk and uncertain value to you; should you wish to review these documents, please let us know.

Our major findings with regard to direct State delivery of medical services are the following:

1. There appear to be no legal reasons why the State could not hire doctors to treat low-income groups or any other class of people; however, four major practical difficulties with such an approach were raised during the course of our research. The first problem is that everyone we contacted believed the medical community would oppose the competition which direct State participation in the delivery of medical services would represent. Second, the State would need to purchase malpractice insurance for doctors in its employment, thus incurring substantial costs. Third, if the legislature approved funding for such a program, and later discontinued it, or if State physicians' services were to be provided on a temporary basis, the problem of "medical abandonment" could result in lawsuits against the State unless adequate arrangements were made for the further treatment of patients handled under the program. Fourth, it appears that medical services provided by State physicians would not be eligible for federal Medicaid funds

except on a temporary or special situation basis; therefore, the State would have to bear the full cost of the program unless State-provided services were demonstrated to qualify for a waiver from the usual federal Medicaid requirements.

2. Withdrawal from the Medicaid program is not, however, a prerequisite to the establishment of a State physician program. My understanding of the alternative health care system you are considering is that the State would not necessarily provide all the medical services now administered by private physicians under the Medicaid program, but would instead make State doctors available in areas which are medically under-served either because of the lack of physicians, the lack of specific medical services, or because of the refusal of available physicians to accept Medicaid patients. It is clear that the State could continue to receive federal Medicaid funds for medical services provided by private physicians; and, in addition, it appears that funds could also be received for State-provided services if a federal waiver from certain regulations could be obtained. The State currently receives over $22 million per year in federal Medicaid funds.

3. It may be possible to improve medical care for low-income persons by means other than, or in addition to, direct State health care delivery, and without opting out of the Medicaid program. The principal problem with the Medicaid program, from the recipient's point of view, appears to be that many doctors in Alaska refuse to accept Medicaid patients. This reluctance to take Medicaid patients is, in turn, largely attributable to the extensive paper-work requirements and the extremely slow payment process of the current Medicaid system in Alaska. However, these problems are not inherent in the federal Medicaid system, and it appears that more rapid and efficient reimbursement of medical providers could substantially improve low-income access to medical care by encouraging more doctors to participate in the program. Of course, there may be other problems with the Medicaid program which might make withdrawal from the system desirable.

4. The expanded use of fiscal intermediaries may be one option for making more doctors available to low-income persons. Delta Dental Plan of Alaska is currently the only organization of this type in Alaska and handles only dental services, but all parties involved--the Department of Health and Social Services, the participating dentists, and the Medicaid recipients--seem to be very satisfied with the program. About 96 percent of the dentists in Alaska are members of Delta Dental and 95 percent of these participate in Medicaid. The fact that reimbursement to dentists by

Delta Dental for Medicaid cases usually occurs within two weeks, as compared to up to several months for other Medicaid claims handled by the State, is the main reason for the almost universal acceptance of Medicaid cases by Alaska dentists.

In an administrative review of the Alaska Medicaid program completed in 1979, HEW officials recommended that the Division of Public Assistance contract with a fiscal intermediary for Medicaid processing. The Division is planning to solicit within the next six months requests for proposals for the processing of all Medicaid claims by a fiscal intermediary, although H&SS may still elect to process claims in-house. Robert Ogden, Chief of Medical Assistance for the Division, stated that a fiscal intermediary handling all Medicaid claims could probably process claims as rapidly as Delta Dental currently does for dental claims, thus improving the prospects for physicians accepting Medicaid patients. However, the choice between the use of a fiscal intermediary and processing the Medicaid claims in-house will depend on administrative decisions made within the department.

Each of the four points summarized above will now be discussed in more detail.

State Medical Care

According to the sources we contacted, the basic answer to your second question is yes, the State could hire doctors to treat low-income groups. Eligibility could be determined in a number of ways and would not need to parallel the federal Medicaid system. Placement of the State-employed doctors throughout the state could be based on whatever criteria were deemed appropriate by the State.

The State already provides direct delivery of medical services to a limited degree. Nurses employed by the Division of Public Health administer the Early Periodic Screening, Diagnosis, and Treatment Program (EPSDT) for children throughout the state. The program is small in comparison to other medical services, but it does provide a precedent on the State level for direct delivery of services.

Political resistance by the medical community was cited by several persons with whom we spoke as the greatest obstacle to the direct employment of doctors by the State. Our contacts believed that many doctors would view such an action as State competition with the private sector,

and as "socialization" of the medical profession. The apparent acceptance by the medical community of the EPSDT program suggests that opposition to the State physician approach would not be as strong if the approach were used only in a few selected areas or were clearly temporary in nature. For example, if the State adopted a procedure similar to that which was employed by the federal Department of Health, Education, and Welfare (HEW) to identify and designate the low-income population of Anchorage as a Critical Health Manpower Shortage Area (see Attachment A), doctors might be more willing to accept the State delivery approach than if it were part of a comprehensive, state-wide system.

Under the HEW system, which is authorized by section 332 of the Public Health Service Act, an area or population group of an area may be designated as a Health Manpower Shortage Area if the population-to-primary care physician ratio exceeds a certain level. An area is also given a degree-of-shortage classification based on this ratio. The population-to-physician ratio takes account of physician accessibility, rather than simply dividing the population by the number of physicians. For example, in Anchorage, the ratio of Medicaid eligible persons to all primary care practioners is estimated at 161:1, but when HEW adjusted for the fact that most of these physicians do not accept Medicaid patients, the final population-to-primary care physician ratio was determined to be 3,041:1.

This ratio qualified the low-income population of Anchorage as a degree-of-shortage group 4, which makes the area eligible to: (1) apply for placement of National Health Service Corps (NHSC) physicians; (2) be an eligible service area for purposes of repayment of health professions student loans and for the NHSC scholarship program; and (3) apply for grant funds under various sections of the Public Health Act.

A similar approach to improving medical care for medically underserved areas or population groups could be utilized by the State. Designation under the program might qualify an area for the placement of State-hired physicians, for grants to improve health care delivery, or perhaps for a special streamlined medicaid process which would encourage doctors to accept Medicaid patients. The latter option might be effective in a case like Anchorage's, in which the number of practicing physicians in an area is sufficient to meet the medical needs of the population, but the physicians will not accept Medicaid patients because of dissatisfaction with the reimbursement system.

Attachment B, which is a letter to Representative Martin from Commissioner Beirne, suggests other questions which should be considered if the State elects to provide medical care directly and/or withdraw from the Medicaid program. As Duncan Read indicated in his earlier memo, Dr. Frederick McGinnis, Deputy Commissioner of H&SS, has proposed a major study of health care financing options which would address questions relating to

State provision of health care, such as who would be eligible for the program, and what services should be provided. Dr. McGinnis has apparently expanded the scope of the proposed study and is attempting to obtain about $170,000 for the project. If the study is conducted, the results would be submitted to the 1981 legislature.

If the State physician health delivery system is to be pursued, the problems of malpractice insurance and medical abandonment must be considered. Neither of these problems would prevent the State from hiring doctors, but their cost and legal implications may have some bearing on the issue. The State currently carries a small amount of malpractice insurance for doctors employed in administrative capacities, apparently in the event that they are called upon in an emergency situation. To fully insure doctors employed by the State who regularly provided medical services would require a substantial expenditure. The magnitude of the insurance cost would depend on the number of doctors employed the service provided, and the scope of the program, but the cost could be significant.

Medical abandonment appears to be a relatively easy problem to avoid, but it could present legal problems if it is not considered in the design of any State-provided medical care program. Under state and federal law, physicians are responsible for arranging for continued medical care for their patients if, for any reason, they discontinue their treatment. A doctor not fulfilling this responsibility may be sued by a patient. The two ways in which the issue of medical abandonment could arise are: (1) if the legislature suddenly discontinued funding for the program, and (2) if the program were discontinued in an area because it was determined that the private physicians in the area could now adequately serve the population. In both instances, the problem of medical abandonment could be avoided by ensuring that adequate arrangements were made for the continuing treatment of patients after the State ceased providing service directly.

A final point to be considered regarding direct State delivery of medical care is the Medicaid funding question. I contacted officials with the Northwest regional office of the HEW Medicaid Bureau in Seattle to determine if federal Medicaid funding could be provided for medical services delivered by State-employed physicians. A firm answer could not be secured within the time frame of this project, but it appears that a waiver from certain federal regulations pertaining to reimbursement procedures and other matters would be required for federal funding to be given for State-provided services. The necessary conditions for such a waiver are also unclear at this time, but HEW officials indicated that the designation of an area or population group having a severe shortage of medical care might meet the waiver requirements.

You have indicated an interest in the possibility of the State withdrawing entirely from the Medicaid program, and the question of Medicaid support for State-provided services may therefore not be a major concern. However, the State currently receives over $22 million each year in federal Medicaid funds. It may, therefore, be desirable to retain these funds if a State medical care program could meet, or be exempted from, the necessary federal regulations without compromising the program. Please let us know if you would like a more concrete response to the Medicaid funding question. A written request to HEW would be required and their response could take two weeks or more, but we would be glad to pursue this issue if you would like.

Medicaid Issues

Although we were not asked to specifically address the Medicaid program in this memorandum, we obtained information on Medicaid during our research which may be of value to you in considering health care options. The greatest problem with the current Medicaid program in Alaska is that the claims processing system is inefficient, requires excessive paperwork, and results in long delays in provider reimbursement. It is the paperwork and the payment delays which have been the primary cause of Alaska physicians refusing to accept Medicaid patients. Attachments C and D provide a physician's perspective on the problems of the Medicaid system. In many cities, most notably Anchorage, the number of physicians seems to be adequate, but a Medicaid patient cannot see a doctor because the majority of physicians refuse to take Medicaid cases. It therefore appears that a more efficient and rapid claims processing system could do much to alleviate the difficulty of obtaining medical care for low-income Alaskans.

The current program of Medicaid dental services lends strong support to this premise. Medicaid claims for dental care do not go through the State system used for other medical services, but instead are handled by the Delta Dental Plan of Alaska, which acts as a fiscal intermediary between the providers and the State. The pertinent statistics regarding Medicaid participation by dentists were cited in the findings section, but the importance of Delta Dental in this discussion is that the vast majority of the state's dentists accept Medicaid patients. The two-week Medicaid reimbursement time which Delta Dental provides for dentists is the primary reason for the high degree of cooperation by Alaska dentists with the Medicaid program.

The obvious question, then, is if Delta Dental is so efficient, why doesn't the State use Delta or another fiscal intermediary to process all its Medicaid claims. There are a number of reasons why fiscal intermediaries do not represent an easy solution to the Medicaid and low-income health care problems.

The first is that Delta Dental does not appear eager, and may not have the capability to take on the processing of medical claims. Attachment D is a letter from the Pediatricians' Association to Representative Martin suggesting that the State contract with Delta Dental for payment of Medicaid claims for pediatric services. However, I spoke with Denise Knapp, Executive Director of Delta Dental, and she indicated that Delta has not agreed to process pediatric claims and is still only discussing the idea. Robert Ogden, Chief of Medical Assistance for H&SS, stated that while he has been very pleased with Delta's performance, he is not sure if Delta could handle the large volume of Medicaid claims for medical services, and knows of no other in-state firms who could.

A second possible problem with the expanded use of fiscal intermediaries is cost. Each claim processed by Delta Dental costs the State an average of more than $14, while the medical claims processed under the current system cost only about $1.45 each. However, Mr. Ogden was quick to point out that the current system does not meet federal requirements, and meeting these requirements is likely to increase the cost of processing claims whether a fiscal intermediary is used or not. In addition, Delta's cost is much higher than would be that of a fiscal intermediary handling all medical claims, because the fixed costs of the Delta claims processing system are spread over a relatively small number of claims (8,000 per year). A fiscal intermediary handling all Medicaid claims for medical services would process about 144,000 claims per year; cost per claim would therefore be much lower, perhaps in the $2.50 range, according to Mr. Ogden.

HEW has mandated that the Division of Public Assistance implement a new claims processing system by September, 1980. In an administrative review completed a year ago, HEW officials recommended that the Division contract with a fiscal intermediary for the processing of all Medicaid claims. (See Attachment E, Chapter 7, for more detail on this recommendation.) However, it is still uncertain whether this recommendation will be followed. The Division plans to solicit requests for proposals (RFP) for claims processing within the next six months. At least six to eight firms are expected to bid on the contract, but it appears that the decision to use a fiscal intermediary or to process Medicaid claims in-house will be more dependent on administrative decisions within H&SS than on the results of the RFP process.

We hope the information we have provided is useful to you. This memorandum is a brief treatment of a complex subject, so please let us know if you would like additional research, or if we may be of further assistance in any other way.

JK/dp

BUREAU OF HEALTH MANPOWER

JAN 17 1980

Mr. Don Bantz
Executive Director
Anchorage Neighborhood Health Center
1217 East 10th Avenue
Anchorage, Alaska 99501

Dear Mr. Bantz:

We have reviewed your request as amended for designation of the low-income population of Anchorage as a population with a shortage of primary medical care manpower. In addition, we have contacted the Health Systems Agency for your area, the State Health Planning and Development Agency, and the Governor's office for their comments.

From this review, we have determined that the area appears to be rational for the delivery of primary medical care, and it has a population-to-primary care physician ratio of 3,034:1 and has unusually high needs for primary medical care services.

Therefore, we are designating the low-income population of the Municipality of Anchorage as a population group with a shortage of primary medical care manpower, under the authority of section 332 of the Public Health Service Act. The designated population is defined to include:

County	Parts
Anchorage Division	Municipality of Anchorage-low-income population

This area is assigned to degree-of-shortage group 4, as defined in the regulations for Designation of Health Manpower Shortage Areas.

As you probably know, designation under section 332 makes this area (1) eligible to apply for placement of National Health Service Corps personnel, (2) an eligible service area for purposes of repayment of health professions student loans, (3) an eligible obligated service area under the National Health Service Corps Scholarship Program, and (4) eligible to apply for (or to receive preference for) grant funds under various sections of the Public Health Service Act.

Applications for NHSC personnel are available from Dr. Art Lagace, NHSC Regional Program Consultant, in Seattle.

We appreciate your efforts to assist us in identifying health manpower shortage areas.

Sincerely yours,

Howard V. Stambler

State Health Planning and Development Agency

APPLICATION FOR THE MUNICIPALITY OF ANCHORAGE FOR DESIGNATION OF THE LOWER INCOME POPULATION AS A CRITICAL HEALTH MANPOWER SHORTAGE AREA GROUP

In April of 1977, the Municipality of Anchorage was designated as a Medically Underserved Area. This designation was based upon four indices:

1) percentage of population below the poverty level,
2) percentage of population over age 65,
3) infant mortality rate, and
4) primary care physicians per 1,000 population.

It is the contention now that the lack of access to primary care practitioners for the low income population group of Anchorage qualifies this group to be designated as a Critical Health Manpower Shortage group.

This application includes the following:

1) population methodology
2) primary care practitioners
   (a) background
   (b) primary care practitioner summary
   (c) Anchorage Human Resources Department survey
   (d) Anchorage Neighborhood Health Center survey
   (e) adjustments of the ratio: population group to primary care practitioners serving them
3) additional documentation
4) appendices

POPULATION METHODOLOGY

According to the Municipality of Anchorage Human Resource Planning Department, the population of Anchorage is 202,101 persons. Subtracting the Alaska native and military populations from this total leaves a non-federal population of 165,517 persons:

202,101	
- 28,500	military
- 8,084	Alaska native
165,517	

The 1978 Population Profile prepared by The Municipality of Anchorage lists the distribution of annual household incomes for Anchorage but the data is not broken down by number of persons in the household.

Table 1. DISTRIBUTION OF INCOME OF ENTIRE HOUSEHOLD BY SUBCOMMUNITY

Annual Household Income	Total Population
$ 0-$ 9,000	10.0%
$10,000-$14,999	9.2
$15,000-$19,999	9.5
$20,000-$24,999	10.9
$25,000-$29,999	10.1
$30,000-$34,999	12.2
$35,000-$39,999	7.7
$40,000-$49,999	12.8
$50,000-$59,999	9.0
$60,000 & Above	8.6
(n)	(1,177)
Mean	32,998
Median	30,155
Standard Deviation	20,555

The median household size in Anchorage is 3.0. (Population Profile - Municipality of Anchorage, Page 4 table I-1).

The Medicaid eligible population of Anchorage can be estimated by using the poverty guidelines for Alaska, issued by the Community Services Administration on May 7, 1979 in the Federal Register. (For a complete breakdown of these figures, see Appendix).

By these guidelines a family of 3 persons who makes $7,008 per year or less is Medicaid eligible. Using the

household incomes in Table 1, approximately 8% of the 165,517 non-federal population of Anchorage, 13, 241 persons, live below the poverty levels and are Medicaid eligible.

PRIMARY CARE PRACTITIONERS

There are, at present, 82 practicing primary care non-federal physicians in the Anchorage Municipality. The breakdown is as follows:

Family practice/general practice	42
Pediatrician	14
OB/GYN	17
Internists	9
Total	82

Source: Alaska State Medical Association. 1978-9 Medical Directory.

Background

The State of Alaska's Medicaid Program has experienced problems with its reimbursement system to the degree that a nine month lag in physician reimbursement is not uncommon. The Alaska Medical Society, at their annual meeting in 1979 went on record as rejecting any mandatory medical obligation to care for people who cannot pay. This resolution was written and sponsored by the Anchorage Medical Society (see attached newspaper article). It appears that this resolution was directed at efforts by the State to legally prohibit doctors from refusing to treat poor patients in retaliation to tardiness in paying Medicaid bills.

This has lead to the situation whereby Medicaid patients are being denied access to primary care practitioners in Anchorage. This has been documented by a number of independent surveys conducted by various health agencies in Anchorage during the past year. The situation is particularly acute with regards to prenatal care. The initial survey was done by the South Central Health Planning and Development Agency who concluded that a "shortage of OB services does exist, and that the economically disadvantaged patients are those who are most likely to directly experience that shortage" (December 12, 1978).

Anchorage Human Resources Department Survey

The Anchorage Human Resources Planning Department surveyed 38 of the 42 Family Practice physicians in March, 1979 and 33% responded that they do not accept Medicaid patients for any type of services. In a further study commissioned for the Human Resources Planning Department, the Anchorage Urban Observatory found that the primary care physicians have on an average 57 Medicaid patients per practice. This

would indicate that approximately 4731 Medicaid patients (57 x 83 physicians) are being seen on a regular basis by Anchorage primary care physicians. This represents about 36% of the Medicaid eligible population in Anchorage, and would seem to indicate that 64% of the Medicaid eligible population in Anchorage is not being seen regularly by primary care practitioners except for the two physicians at the Anchorage Neighborhood Health Center.

ANHC Survey

To further clarify the situation, the Anchorage Neighborhood Health Center conducted its own telephone survey in October, 1979. ANHC called 17 OB physicians, 36 family practice physicians, and 14 pediatricians in Anchorage.

Summary of results (see appendix for complete survey results).

1) Five OB practices are completely closed to new OB patients or Medicaid patients.

2) Six OB practices accept new OB patients but do not accept Medicaid patients.

3) The remaining four OB practices all require cash payments by the patients, up front, before they will be seen, thus limiting access to low income patients. Further, they will only accept a limited number of Medicaid patients.

4) None of the 36 family practice physicians accept new OB Medicaid patients.

5) Twelve of the fourteen pediatricians will not accept Medicaid patients. Two pediatricians who accept Medicaid patients do so on an extremely limited basis.

Adjustments To Primary Care Practitioners

1) Beginning Ratio $\frac{13,241}{82}$

2) Adjusting for physicians with closed practices to Medicaid patients. $\frac{13,241}{21}$

11 obstetricians (ANHC Survey - see appendix)
12 pediatricians (ANHC Survey - see appendix)
38 family practice (Anchorage Municipal Human Resource Planning Survey)

3) a) Adjusting for limited access to Medicaid patients - 36% of Medicaid eligible population, currently has access to primary care practitioners. This means that the 4,766 Medicaid eligible persons have access to the 21 remaining primary care physicians. $\frac{4,766}{21}$

b) The remaining 64% (8,475) of the Medicaid eligible population, in effect, has a total of 2 physicians (Anchorage Neighborhood Health Center) available to them on a full-time basis. $\frac{8,475}{2} = 1:4,236$

Thus, according to the data presented, a Critical Health Manpower Shortage area ratio exists in the Anchorage low income population. For the reasons outlined in this report, we are requesting that the Bureau of Health Manpower provide this designation immediately. A critical need in the area of prenatal care is particularly apparent, and the Anchorage Neighborhood Health Center intends to apply for a Family Practice National Health Service Corp Physician to help alleviate this problem.

ADDITIONAL DOCUMENTATION IN SUPPORT OF THIS APPLICATION

There is some evidence that the group above the Medicaid eligible population of Anchorage also lacks regular access to primary care practitioners. This "medically indigent" category is not well defined. However, using the HUD "Section 8" guidelines (the most generally accepted income guidelines for Anchorage), low and moderate income levels and target populations can be enumerated.

Table 2. HUD Section 8 Income Guidelines for Anchorage, July 31, 1979*

Number in Family	Low Income	Moderate Income	Median Income
1	8,960	11,200	14,000
2	10,240	12,800	16,000
3	11,520	14,400	18,000
4	12,800	16,000	20,000
5	13,600	17,000	21,250
6	14,400	17,800	22,500
7	15,200	19,000	23,750
8	16,000	20,000	25,000

* Source: Al Robinson, HUD Economist, Anchorage

According to HUD figures, an Anchorage family of 3 that makes $11,520 or less is considered to be low income. Referring again to Table 1, approximately 4% of the total Anchorage population falls above the poverty level, yet below the low income level (extrapolation of the 2 categories 0-9,000 and 10,000-14,999 per year). By this calculation, there are about 6,620 persons who fall within this medically

indigent category. end: 8876

Again, using the HUD figures, the moderate income level population can be estimated. This amounts to approximately 7%, or 11,586 persons in the low to moderate income range.

In summary, the income populations are shown below.

Anchorage Target populations

Poverty level (Medicaid eligible)	13,241
Low income	6,620
Moderate income	11,586
Total	31,447

Lack Of Access To Medical Care Services

Another indicator of the problem is the emergency room utilization. Providence Hospital had 27,000 emergency room visits during the past year. According to the administration office at Providence, 60% to 80% of these visits were non-emergency problems. This is one of the major indicators of the lack of access to a regular physician by a large segment of the Anchorage population.

Perceived Needs

The perceived needs of Anchorage health consumers seems to support the physician access problem. In a recent survey done for the Anchorage Municipality, the Anchorage Urban Observatory* found that 25.4% of the persons surveyed had difficulty paying for the uninsured cost of medical care.

Attachment B

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER / POUCH H 01 – JUNEAU 99811

February 6, 1980

The Honorable Terry Martin
Alaska State Representative
Pouch V
Juneau, Alaska 99811

Dear Mr. Martin:

Recently you requested information regarding key questions that might be addressed in a study analyzing the advantages and disadvantages of State of Alaska withdrawing from the federal Medicaid and Aid to Families with Dependent Children (AFDC). Our primary information sources for your request were Deputy Commissioner Frederick McGinnis, who has been designated to coordinate a special project on health care financing, and members of the Division of Public Assistance. They offered the following list of pertinent questions:

Medicaid Issues

1. What would be the impact of withdrawing from Medicaid without withdrawing from AFDC?

2. Which option services (such as eyeglasses) and mandatory services (such as doctor's visits) would be advantageous to the State to continue in a state designed and financed medical program?

3. Who would be eligible for the state replacement program? Would the State be interested in expanding its eligible group to cover certain needy or middle income persons now not routinely eligible for state assistance?

4. How would the issue of prior medical resources (Indian Health Service, Blue Cross coverage, etc.) be handled? Would the state only cover those persons with no other available resource to pay for or provide care? As is the case currently with General Relief Medicaid program.

5. Should the Medicaid requirement of "free choice of provider" be continued under any new state medical assistance program?

6. Would the services be offered in all areas of the state in the same manner? Or would regional planning and delivery of services be utilized?

7. How will National Comprehensive Health Insurance or National Catastrophic Medical Insurance programs now discussed on federal fronts impact the design of this program?

8. Other points to consider regarding loss of federal Medicaid funds if the State withdrew from Medicaid:

   a. 50% federal funds for medical services covered under Medicaid for persons eligible for a cash payment under AFDC, SSI and/or APA.

   b. 50% to 90% federal funds for medical services covered under Medicaid for persons not eligible for a cash assistance payment but who are in state institutions, in long-term care facilities and hospitals, and children in foster homes and private child-caring institutions.

   c. 100% federal funds which flow through the Medicaid program to the Alaska Area Native Health Services to provide funds to raise the quality of care of those facilities under the Indian Health Care Improvement Act.

   d. 75% to 90% federal funds for the development and operation of a computerized Medicaid claims payment and management information system to provide prompt payment of medical providers and detailed information necessary to do adequate budget projections.

   e. 75% to 100% federal funds for program management safeguards to assure that cost effective payment is being made to licensed providers for medically necessary services through a professional standards review organization for hospital care, medical utilization review for long term care and outpatient medical services and supplies, and medical provider fraud investigation.

   f. 75% to 100% federal funds for certification and licensing of health care facilities under Medicare and Medicaid to assure adequate care is being provided in safe and sound facilities.

   g. 50% to 75% federal funds to the Division of Public Health for nursing services provided to Medicaid eligible children for the detection, identification and treatment of diseases and deformities.

   h. 100% federal funds for federal program oversight, technical assistance, and program review to assist the Department in an effort to provide payment for cost-effective, high quality medical care.

   i. 50% to 90% federal funds for program administration costs claimable by the Department for the department-wide and

statewide cost allocation system designed to maximize federal receipts to offset state general fund expenditures.

AFDC Issues

An exhaustive study of this subject was completed by the former Research Division, Legislative Affairs Agency. The Department participated actively in this research project and has reviewed the draft. The Legislative Affairs Agency's Research Division was disbanded before the final report was approved for printing. We recommend you obtain a copy of this report to determine whether your current initiative may duplicate the massive effort required in that project.

Though the draft report discussed the features of the AFDC program that may make it desirable for Alaska to opt out and upon the costs of dropping the program, considerable attention was given to possible alternatives to replace AFDC. Among the topics covered in the study were:

(1) history of Alaska's assistance programs;

(2) problems in administering a federal program in Alaska;

(3) federal welfare reform proposals and their potential effects on Alaska;

(4) fiscal impact of withdrawal;

(5) alternatives to AFDC (including negative income tax and a universal child allowance);

(6) legislative and administrative alternatives and options within the current federal AFDC program; and

(7) work requirements for welfare recipients.

You may wish to contact Deputy Commissioner McGinnis directly at 278-4668 (Anchorage) and Rod Betit, Director of the Division of Public Assistance at 465-3355, for further clarification. For your information, Deputy Commissioner McGinnis has just begun the planning for a study with the Governor's approval to take a comprehensive look at the total health care financing picture in Alaska, of which Medicaid is a vital part. He plans to submit the results of his study to the 1981 Legislature.

We appreciate the opportunity to offer some input on your possible project.

Sincerely,

Helen D. Beirne

The Children's Clinic
3300 Providence Drive
Anchorage, Alaska 99504

907/279-8571

October 12, 1979

Mr. Leonard D. Schaeffer, Administrator, HCFA
Department of HEW
Mary E. Switzer Building, Room 5006
330 "C" Street, S.W.
Washington, D.C. 20201

Dear Mr. Schaeffer:

The purpose of this letter is to outline the difficulties The Children's Clinic has experienced in dealing with the Medicaid system in the State of Alaska. In addition, we are outlining some of the recommendations that would alleviate some of these problems.

(1.) Failure of Medicaid to pay anything in less than four months, with many accounts unpaid in 16 months. An example is given in Table 1.

(2.) The cost of processing Medicaid paperwork is excessive. For example, The Children's Clinic pays $1,700.00 in combined staff salaries to process Medicaid paperwork. The current disallowance rate pays us $ .62 for each $1.00 billed. In the month of September 1979 our doctors each made an average of 1,355 patient visits in the hospital and office. Thirty-eight percent of these visits or procedures are for Medicaid recipients. After correcting for the disallowed rate, the secretarial time to process paperwork, less office overhead of 55%, net receipts was $489.00. The average net is $3.62 to the doctors per patient procedure or visit. If this is converted into a net hourly rate, the amount is $4.31 per hour for Medicaid patients. Compare this with the net income per doctor per visit or procedure of $19.29 per visit or $28.30 per hour for patients having private insurance.

(3.) The fact that a doctor will be reimbursed $3.62 nine months after he provides the treatment is not conducive to his opening his practice to any new Medicaid patients. The fact that a Medicaid coupon is relatively worthless from the financial viewpoint means the Medicaid patient is, in effect, a second-class citizen in his attempts to obtain medical care.

(4.) The Medicaid office has repeatedly failed to advise the providers of changes in the system prior to the change taking place. This results in a great waste of time for the State employees, the providers, staff, and the Medicaid patient in generating and processing outdated forms.

(5.) The Medicaid office fails to keep Medicaid recipients notified of coverage to which they are entitled and the system by which they are to obtain these benefits.

(6.) The supervisory and clerical staff in Juneau change very often. A supervisor with whom we might have discussed various cases is no longer there when we telephone back a month later. The people who are now handling the account know nothing of what is going on and they request reapplication of the entire account. After a particular invoice is handed from one clerk to another, 6 months may have elapsed. If the paperwork must be resubmitted, coupons for the service provided 6 months ago cannot be provided by Medicaid. The patients themselves do not keep old coupons.

(7.) Although private insurance carriers will coordinate benefits between one another, when the patient has coverage by more than one company, Medicaid expects the doctor's office to do this. The physician's offices are skilled at providing Medicaid care, but not for employing insurance personnel for this type of activity.

(8.) The Medicaid office is not verifying whether or not the Medicaid recipients have insurance coverage. The social worker will determine that a divorced mother is working for a company that has insurance available. Many of these mothers choose not to have the insurance as it will reduce their take-home pay. This mother will be recorded by the Medicaid office as having private insurance when, in actual fact, no private insurance exists. It takes an average of 5 months of letter writing between the insurance company, employer, and the doctors to prove that no insurance coverage existed at the time. Again, when 5 months have elapsed, the patient does not have a coupon covering the appropriate time period. The Medicaid office refuses to provide the coupons or authorize payment for those services.

(9.) The Medicaid office in Juneau requires a separate coupon be obtained for each provider. When the patient comes to the hospital in the middle of the night for an emergency, often times the patient forgets to bring the coupon. The hospital will be reimbursed on a basis of a coupon number typed on the emergency room services sheet. The private physician who provides the service at the time of the visit is expected to obtain a coupon rather than use the same system as the hospital.

(10.) Payment vouchers are presently identified only by invoice numbers. They lack corresponding patient names. Transition errors are being made by Medicaid personnel in typing invoice numbers on the vouchers, consequently the doctors cannot find the invoice that should be credited with the payment. We need patient names included as well as the invoice numbers.

(11.) Lump sum payemnts are made, which do not give Explanation of Benefits that state what services are being paid and what date. For example, we will have provided 20 services for a family over a period of one year. Because of the reimbursement for Medicaid being delayed 6 to 12 months - some services are disallowed, others are questioned, and others are paid - we cannot properly credit the lump sum payment to the proper services. This particular procedure is necessary because invoices are constantly being lost in Juneau and we must reapply two or three times. We must have an itemization accompanying each payment voucher so that accounts can be properly credited and duplicate charges will not be submitted in error.

(12.) A mother who is pregnant is not permitted to get a coupon for the unborn child until after the birth of the child. In this office an average of 2 months elapses following the birth of a child before the mother can provide us with a coupon for that child. Medicaid mothers are a high risk for having premature infants and newborns with a high degree of sickness. The whole process of initiating paperwork to obtain reimbursement is delayed an additional two months, in addition to the five or six months already mentioned. If the social worker thinks that the mother has maternity benefits from her employer, the situation stretches out for a year.

(13.) Medicaid recipients only recieve 5 coupons per month which may be used in 2 visits to the doctor (one coupon for the doctor, one for the lab, one for the x-ray, and one for the pharmacy). Recipients tell us they go to the Medicaid office, but are unable to get any more coupons; as a result, patient care suffers.

The following recommendations are offered to IMPROVE MEDICAID.

(1.) It is time for the state and federal government to get out of the insurance business. The CHAMPUS program works very satisfactorily in Alaska. In Alaska, private insurance companies competitively bid to obtain one-year contracts for the CHAMPUS funds. The companies compete with one another to provide the government with more health care for less dollars. The insurance carriers are already very good at coordinating benefits for recipients having multiple coverage, and consistently accompany the voucher with the explanation of benefits for each individual patient. We would strongly urge that the federal government look at the actual cost in dollars per service to the patient, including the overhead for the cumbersome duplicating, inefficient system we have in Alaska. If the Medicaid in Juneau was to bid competitively with Blue Cross, Aetna, Metropolitan to obtain federal funds for the administration of reimbursement for medical care, the Medicaid would either shape up or lose the contract to a private carrier.

(2.) An alternative system to do away with reimbursing doctors altogether: Doctors would simply document the services provided and apply the patient fees for Medicaid patients as a tax credit to the Internal Revenue Service. The IRS already has an effective system of cross-checks and could audit office records simply and avoid suspicion of fraud on the part of the doctors. The amount of monies saved by doing away with salaries, equipment and rent for the Medicaid system could be reallocated into education, food, etc.

(3.) We understand from Mr. William Collings, of the D.H.E.W., that the Medicaid office in each state is to have a medical advisory committee in each state. The committee has not been functional in Alaska to our knowledge. The Alaska American Academy of Pediatrics and the Anchorage Medical Society have doctors who are knowledgeable and are willing to contribute their time and efforts to such a committee. These representatives could report back any changes in the system to the doctors in the communities.

(4.) To curbe the current widespread abuse of the Medicaid system by the patient, each patient should be required to make "token" payments in cash ($2.00) each visit. Children are being brought into the doctor's office for hang nails, etc., because they are on Medicaid and think they must be seen. If they paid $2.00 of their own slender dollars they would think carefully before going to the doctor or health clinic unnecessarily.

To prevent user abuse of the hospital emergency room, patients would be required to make a cash payment of $20.00 in advance if the emergency triage nurse determined that this visit is not an emergency. It is not unusual for a Medicaid mother to bring a 4-year-old to the emergency room at 3 a.m. because he has been crying for two weeks and cannot sleep. If his mother had to pay $20.00 in cash prior to the service she would make more efficient use of her Medicaid coupon and the medical services available to her. Thus, Medicaid would be charged only $28.00 for an office visit, instead of $100.00 for an emergency room visit.

(5.) As an interim measure, move the state Medicaid offices from Juneau to Anchorage or Fairbanks. These are the areas where the majority of the recipients live and the majority of the care is provided. This would facilitate communications between recipients, providers and administrators. Each area must have a strong manager who has the authority to authorize payment, issue coupons, etc.. locally.

The pediatricians of The Children's Clinic appreciate the opportunity to bring their ideas and concerns for caring of the Medicaid recipients to you at the Annual Meeting of the American Academy of Pediatrics. We hope that this type of dialogue will continue to benefit the Nation's Medicaid children.

Sincerely,

(Signed)

CHAIRMAN
MARIAN T. WITT, M.D.
3300 PROVIDENCE DRIVE
ANCHORAGE, ALASKA 99504

ALASKA CHAPTER
American Academy of Pediatrics

February 6, 1980

Representative Terry Martin
Pouch V
Juneau, Alaska 99811

Dear Sir:

By way of introduction, I am the alternate chairman of the Alaska Chapter of the American Academy of Pediatrics. The Academy represents 90 per cent of all of the pediatricians in Alaska. We have been struggling to develop new solutions to the Medicaid problems. It is our desire to provide excellent care for every child in Alaska, regardless of the ability to pay.

Many physicians (including some pediatricians) have refused to accept Medicaid patients simply because the entire fee for the office visit is expended in clerical time to process the paper work. To add insult to injury, after processing (and reprocessing) the paper work, payment is not forthcoming. From a financial standpoint, we would be better off to see Medicaid patients for free and not bother to process any paper work.

If we do this, however, an ethical problem arises with the patients who have jobs (and thus are not eligible for Medicaid) but do not earn enough to pay for medical care. If we give free care to one part of the population, we are ethically bound to do that for others. With no end in sight, this is not a viable solution.

We have been impressed with the capability of Delta Dental as an intermediary for handling Medicaid payments for dentists. We would strongly recommend that pediatric care, including handicapped children, and early screening for Medicaid recipient patients be contracted through Delta Dental.

Our experience with third party payers who are out of state has been dismal. Close and frequent communication is mandatory to facilitate understanding between the provider of care and the third party payer. This is simply impossible when the offices are out of state.

The carriers very effectively can set aside or delay payment, knowing there is no effective way we can communicate with them. As a result, our clerical costs are quite high and the costs to the system (because they do not understand what is going on in our offices, or any of Alaska for that matter) are quite high. It may seem on the surface that an outside carrier would be cheaper, but this is only in the short run. A close working relationship with open communications will greatly reduce costs, in the long run. Delta Dental has proven itself to be effective, and even if they have higher costs than an outside carrier, we firmly believe that the cost to the system will be much lower with Delta Dental carrying Medicaid for pediatrics.

Enclosed is a letter which gives you background information. It was originally presented for our discussions with Mr. Leonard Schaeffer of HEW.

Dr. James Nesbitt and I are willing and prepared to help you understand what is going on with the Mecicaid program as it presently exists and would like to work with you in developing new solutions so that needy children in our state can receive proper care and physicians can be reimbursed for the care they provide.

Sincerely yours,

C B Lillibridge MD

Clinton B. Lillibridge, M.D.
Alternate Chairman
Alaska Chapter

VII.	CLAIMS PROCESSING	32

I. EXECUTIVE SUMMARY

Introduction

This is a report of a review of Alaska's Medicaid program conducted during the week of January 15-20, 1979 by members of the Region X Medicaid Bureau staff. This review was conducted at the request of the Division of Public Assistance.

Chapters II through VII present the major findings, conclusions, and recommendations of the review. These are summarized in the next pages. Detailed reports from the members of the review team follow Chapter VII.

Summary of Findings, Conclusions, and Recommendations

Any review of this type tends to focus on weaknesses of present operations. At the same time, it must be recognized that, despite very considerable difficulties of staff turnover, budget limitations, and the problems of travel and communication within Alaska, the State's staff have made valiant efforts to keep the program functioning and to be responsive to recipients and providers.

There is no doubt, however, that Alaska'a Medicaid program has very serious problems. Staff turnover, staff shortages, and the need to deal with day-to-day crises have combined to place the program in a situation in which there are few controls over costs and the program is seriously vulnerable to fraud or human error.

The major changes recommended in the next six chapters cover:

- reorganization of the Division of Public Assistance to establish a clearly defined Medical Assistance Unit
- addition of staff in eligibility determination, medical policy, third-party liability areas, claims processing (unless fiscal agent employed), Medicaid quality control, and medical surveillance unit
- more emphasis on training efforts

- contracting for development of manuals and procedures
- improvements in accounting controls
- enhancement of the TPL collection function
- improvements in the maintenance of the claims history file
- improvements in control over provider enrollment
- establishment of a provider training program
- development of closer relationships with the provider community
- development of eligibility determination procedures and associated training
- improvements in gathering eligibility data, including a new Basic Eligibility Form
- implementation of a reasonable cost-related reimbursement system, incorporating a 90 percent minimum occupancy level
- re-establishment of admission review for API cases
- renegotiating the memorandum of understanding with APRO and developing an associated monitoring system
- increased emphasis on alternatives to institutional long-term care
- contracting for development of a new provider manual and claims processing procedures
- development of, or contracting for, a new claims processing system (preferably through use of a fiscal agent or facilities manager who would also operate the system)

Implementation Plan

Three of the recommendations potentially involve the use of contractors. Given the seriousness of the Alaska Medicaid program's problems, this is

an appropriate approach, since it provides some assurance that changes can be accomplished at a known cost, without dependence on the very limited -- and desperately busy -- existing staff of the Division of Public Assistance. The recommendations are for use of outside organizations to:

- develop manuals and procedures for providers, claim examiners, eligibility workers, etc.
- develop training materials
- develop a new claims processing system (preferably through use of a fiscal agent or facilities manager, who would also operate the system)

Contracting for the first should be done immediately. Contracting for the second should be done as soon as the manuals and procedures are developed. The feasibility of using a fiscal agent should be investigated immediately.

All the recommendations are urgent. Those involving adding staff should be examined immediately so that personnel can, if funds are available, be hired. Responsibilities for implementation of each recommendation should be assigned as rapidly as possible and detailed schedules and cost estimates developed.

II. ADMINISTRATION AND MANAGEMENT

Overview

This chapter discusses the administration and management of Alaska's Medicaid program in terms of organization, staffing, hiring, training, and operational procedures. The next five sections of this chapter present findings, conclusions, and recommendations for these five areas.

Organization

Alaska's Medicaid program is administered by the Department of Health and Social Services through the Public Assistance Division, which is designated as the State's Medical Assistance Unit. Other components of the Department with significant involvement in Medicaid administration are the Office of Information Systems, the Office of Internal Review, the Division of Public Health, the Division of Mental Health and Developmental Disabilities, and the Division of Administrative Services.

Major Findings and Conclusions

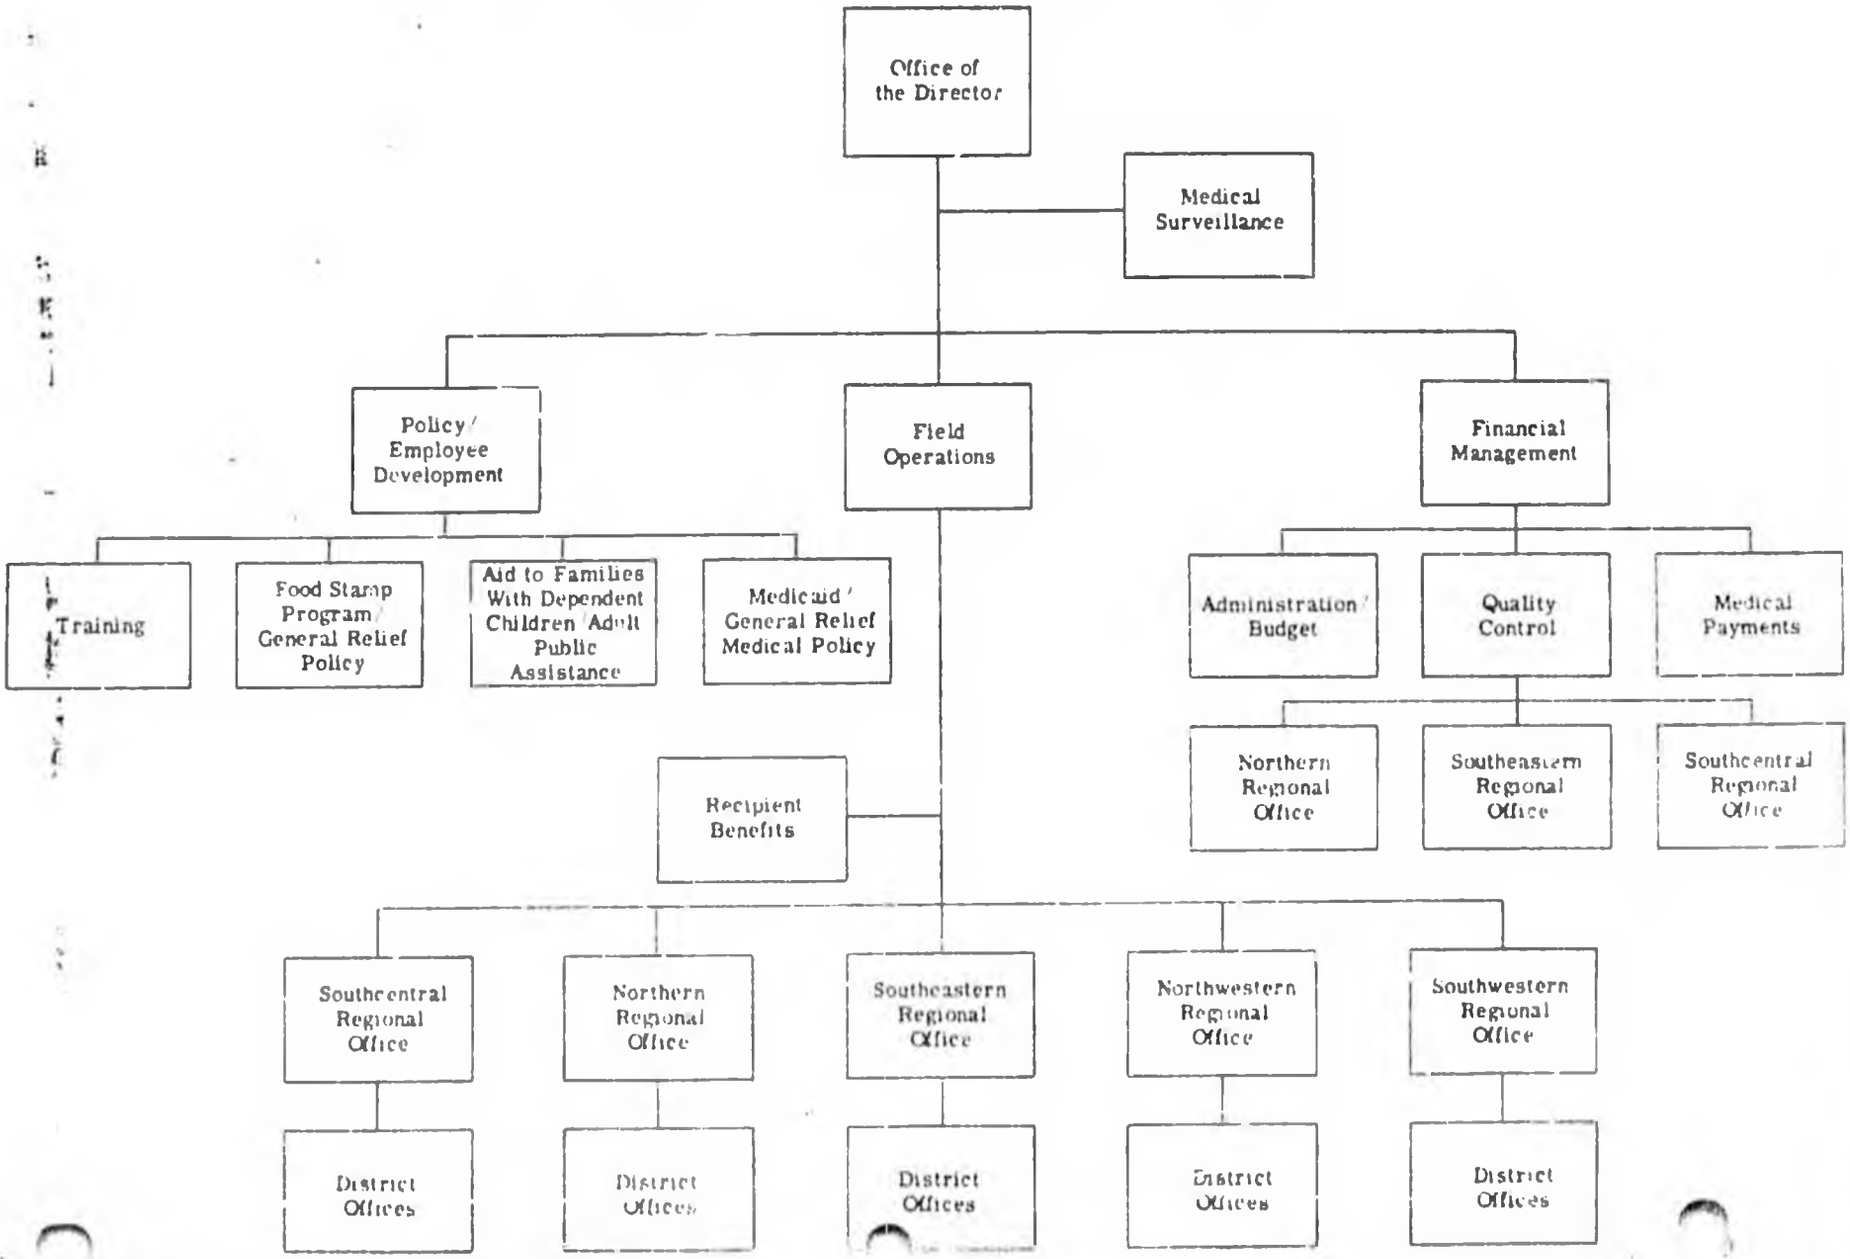
While the Department's organization structure is comparable to that of other states, the Division of Public Assistance's organization is significantly different and appears to result in a number of problems:

- The definition of the Public Assistance Division as the State's Medical Assistance Unit appears not to comply with the relevant Federal regulations (45 CFR 205.101 (b) and (c) and Part 2-40 of the Medical Assistance Manual), since the Division and its Director are responsible for a variety of other programs in addition to Medicaid. Thus it is doubtful that the Division meets the requirement that a State Medical Assistance Unit "provide a central point of responsibility for professional and technical aspects of medical services and medically related programs of the agency". The present organization is shown in Exhibit 1.

EXHIBIT 1

DHSS - DIVISION OF PUBLIC ASSISTANCE

UNIT ORGANIZATION CHART - JANUARY 1979



- From an organizational point of view, the dispersing of Medicaid functions, including policy-making, through a division which also administers other important programs, leads to a lack of direction of the Medicaid program. There is no part of the Division of Public Assistance whose sole responsibility is Medicaid policy. In practice, Medicaid policy decisions are made by the Medical Surveillance Section, the Medicaid/General Relief Medical Policy Section, and the Medical Payments Section. Each section performs a variety of other functions as well as Medicaid policy-making. Medicaid functions must compete with the AFDC, Adult Payment, Catastrophic Illness, and Food Stamp programs for the time and attention of the Division Director as well as for other Division resources. Directing and coordinating the varied elements of the Medicaid program is extremely difficult in this organizational arrangement.

- Responsibility for Medicaid claims processing is split between the Division of Public Assistance and the Division of Administrative Services. This leads to difficulties in controlling service utilization and in developing accurate financial and statistical data for the program. (This problem is discussed further in Chapter VII, Claims Processing.)

Recommendations

- Restructure the organization of the Division of Public Assistance to establish a clearly identifiable Medical Assistance Unit with responsibility only for Medicaid administration. The Medical Assistance Unit should be established either as a separate division or, preferably, as a major subdivision of Public Assistance co-equal with Field Operations and Financial Management. The Medical Assistance Unit should include the following present groups:

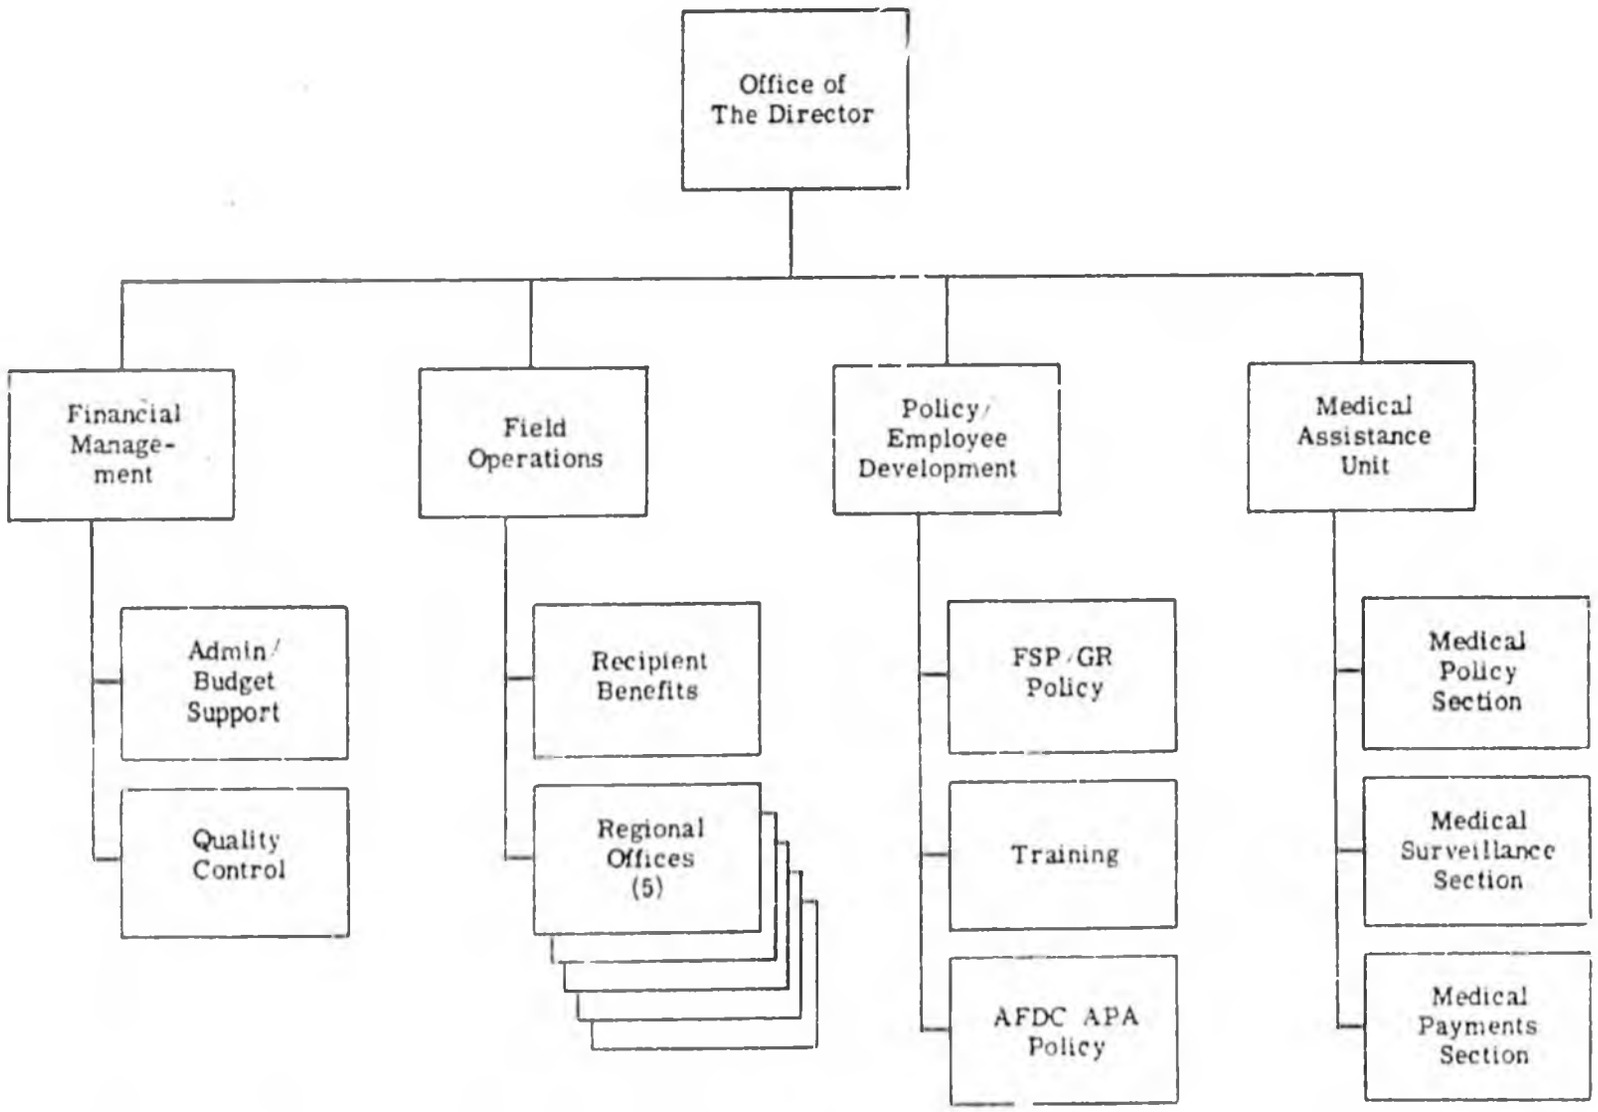
  Medicaid/General Relief Medical Policy Section
  Medical Surveillance Section
  Medical Payments Section
  Medical Assistance Administrator (Anchorage Regional Office)

The proposed organization structure is shown in Exhibit 2.

EXHIBIT 2

DIVISION OF PUBLIC ASSISTANCE

PROPOSED ORGANIZATION STRUCTURE FOR MEDICAL ASSISTANCE UNIT



- Provide clear definitions of policy-making and other responsibilities within the revised structure. Policy-making functions should be located in one section, not dispersed through the Medical Assistance Unit.

- Contain all Medicaid claims processing functions in one unit.

Staffing

Any examination of staffing in DHSS must take into consideration two factors: first, the State of Alaska is in a period of considerable budgetary constraint; second, most State agencies and many private sector businesses in Alaska experience problems of high staff turnover.

At the time of the review (January 6, 1979), the authorized versus actual staffing of the Division of Public Assistance was as follows:

Authorized	Actual
163 full-time	133 full-time
(plus 11 part-time)	(plus 8 part-time and 15 temporary)

It should be noted, however, that the 163 authorized positions are not fully funded; that is, some vacancies are assumed.

Major Findings and Conclusions

The effectiveness of Alaska's Medicaid program is currently hampered by insufficient staffing in some key areas and by high levels of staff turnover.

- DPA management anticipates a considerable staff shortage in the eligibility determination area in FY

1980, due to expected increases in numbers of eligibles without a corresponding staff increase. The staffing formula used by DPA indicates a need for an additional ten FTE personnel for eligibility determination.

- The Medicaid/GR Medical Policy Section is severely understaffed. At present, a program officer and an administrative assistant are responsible for developing Medicaid policy, GR Medical policy, and catastrophic illness program policy, provider enrollment, fair hearings, writing the Alaska Medicaid program regulations, drafting a Medicaid eligibility manual, consulting to field offices, and other ad hoc administrative activities.

- Only one person is currently assigned to third-party liability collection. Since Alaska's experience to date (borne out by that of other states) is that this is a highly cost-effective activity, there is a need for increased staffing to provide additional recoupment from third parties.

- High levels of staff turnover have undoubtedly contributed to problems in Medicaid administration. An analysis of two BRUs within DPA showed turnover rates of 44 percent within each during FY 1978. This is assumed to have resulted in too low experience levels in too many positions within the Division.

Recommendations

- Examine ways of increasing the eligibility determination staff for FY 1980. Possible approaches include:

  a supplemental request to the Governor's Office for ten eligibility positions

  use of CETA positions in District and Regional offices to carry out eligibility and/or clerical duties

  use of temporary hires in the District and Regional offices (the least desirable approach)

- Examine ways of increasing effectiveness of the eligibility determination staff. Possible approaches include:

  enhancement of automated systems for eligibility determination

  provision of additional training (discussed in a later section)

  provision of improved procedure manuals (discussed in a later section)

- Add one professional and one clerical position to the Medicaid/GR Medical Policy Section. It may be possible to add the professional position through reassignment of a vacant position elsewhere in the Division. One function of the new positions should be maintenance of manuals and procedures.

- Reassign the position of Medical Assistance Administrator from the Anchorage Regional Office to the Medicaid/GR Medical Policy Section in Juneau, since, although the Anchorage position is currently needed, implementation of other recommendations will allow its elimination.

- Add up to three additional positions to the third-party liability collection function in order to increase third-party reimbursement of Medicaid payments. Additional staff may be required to maximize these reimbursements.

- Examine ways of reducing staff turnover, including:

  acceleration of the Department of Administration's planned classification review of eligibility positions to the earliest possible date in 1979

  provision of improved training throughout DPA (discussed in a later section)

  provision of improved procedure manuals so that tasks are easier to perform and job pressures are somewhat eased (discussed in a later section)

Hiring

Hiring for new or vacant positions presents some unique problems in Alaska State government. The practical difficulties of attracting out-of-state personnel, combined with a policy of preference for State residents, and a limited State population, considerably constrains the available pool of persons qualified for open positions. It is important, then, that Division of Public Assistance hiring problems be examined in the light of these constraints.

Major Findings and Conclusions

At least in part for the reasons noted above, DPA has and is experiencing hiring problems.

- There have been some delays in filling positions, particularly in view of the high turnover rate. Currently the average time to fill an existing position is one month, and for new positions is up to six months.

- There has been a tendency to promote staff with minimal experience in their existing jobs, with new personnel hired only at low levels. While this has some positive aspects, it can lead both to "inbreeding" and to inadequately experienced supervisory staff.

Recommendations

There are obvious practical difficulties in solving DPA's hiring problems. The following recommendations, however, should alleviate the problems to some extent.

- Work with DHSS personnel staff and Department of Administration personnel staff to reduce the length of time to fill vacant positions.

- Aggressively utilize the "flexible" staffing authority for filling eligibility worker positions.

- For managerial positions, ensure the position requirements are sufficiently specific to allow recruiement of qualified employees.

Training

The preceding sections indicate weaknesses in staffing which might be, at least partly, alleviated by more extensive training. In fact, as discussed below, DPA's training efforts have been much reduced as a result of other pressures on the Division.

Major Findings and Conclusions

- The position of Training Specialist is currently filled only in name, since the incumbent is temporarily assigned to management of the Southeast Regional Office.
- Partly as a result of this temporary assignment, minimal training activities are currently being performed.
- As discussed earlier, the high level of staff turnover, combined with inadequate or nonexistent manuals and procedures, makes the need for training very urgent.

Recommendations

- Fill the Training Specialist position on a full-time basis.
- Contract for development of Medicaid training courses for Division staff.

Operational Procedures

The Medicaid Program is one of considerable complexity, and its proper administration depends on the availability of current, accurate, and understandable manuals and procedures for use by State and provider personnel. These manuals and procedures should meet the needs of providers, claims examiners, policy-makers, and management.

Major Findings and Conclusions

Development and maintenance of Medicaid manuals and procedures has suffered due to staff shortages and the need to deal with more immediate critical problems. Specifically:

- Medicaid regulations have been drafted but have not yet been adopted. Implementation is anticipated in May 1979.
- The Provider Manual is not current. The version available to providers was developed in 1974.
- There is no current eligibility worker manual for Medicaid.
- There are no procedures for use by claims examiners.
- There is no medical policy or staff operational manual for use by DPA management and staff.

Recommendations

- Complete the current review process and hearing on draft program regulations and implement by March 1979.
- Contract with a consulting firm to develop:

  provider manual(s)
  claims examiner desk procedures
  medical policy manual
  Medicaid eligibility manual

  At least the provider manual(s), claims examiner desk procedures, and medical policy manual should be completed by July 1, 1979.
- Establish a position in the Medicaid/GR Medical Policy Section to be responsible for maintenance of manuals and procedures (recommended also under Staffing).

Summary

The major changes recommended in the preceding sections cover:

- reorganization to establish a clearly defined Medical Assistance Unit
- addition of staff in eligibility determination, medical policy, and third-party liability areas
- more emphasis on training efforts
- contracting for development of manuals and procedures

In terms of costs, the reorganization should have minimal impact, the staff additions and training efforts (except for TPL) will increase costs in the short run but should contribute toward a more effective and better controlled program, and the development of manuals and procedures should pay for itself in reducing claims payment errors.

III. FINANCE AND ACCOUNTING

Overview

This chapter discusses the accounting systems and controls relevant to the Medicaid program, the third-party liability collection function, contracts management and financial reporting.

Accounting Systems and Controls

Accounting systems and controls for the Medicaid program are the responsibility of three groups within the Department of Health and Social Services: Financial Management Section (Division of Public Assistance), Finance Operations (Division of Administrative Services), and Office of Information Systems. Certain functions are also performed by the Department of Administration, which provides computer services and operates the Statewide accounting system (PBA).

Major Findings and Conclusions

Possibly in part because of the ongoing staffing problems, and more urgent situations such as claims backlogs, there are a number of weaknesses in accounting for the Medicaid program.

- There is a lack of control over Medicaid claims documents and over the entire claims payment process (discussed in more detail under Claims Processing).

- Specific weaknesses include: payment vouchers can be completed and certified by the same individual, provider enrollment can be completed without certification by an independent person, there is no system for verifying that recipients actually receive the services billed, remittance advices do not necessarily match warrants, batch integrity is not maintained over claims in data entry, and the PBA file does not match claims history file.

- While most Medicaid invoices are processed by the Division of Public Assistance, certain invoices (State institutions, other State agencies, certain non-medical claims) are processed by the Division of Administrative Services. The systems of controls, document storage, and invoice-to-warrant reconciliation processes used by the two divisions are all dissimilar. More important, the invoices paid by Administrative Services do not become part of the claims history file and are not checked for overlapping or duplicated services against the invoices processed by DPA. This fragmentation of processing makes projecting Medicaid costs extremely difficult.

Recommendations

- Provide organized secure storage for all accounting documents (medical coupons, invoices, vouchers, etc.).
- Eliminate the practice of persons certifying vouchers they have prepared.
- Implement a batch control system to provide complete batch integrity.
- Implement a system to provide reconciliation of warrants versus invoices.
- Contain payment of all Medicaid claims within one unit.
- Post all claims payments to the claims history file (discussed also under Claims Processing).
- Request a full-scope audit by the Office of Internal Review of the Title XIX program with specific emphasis on internal controls.

Third-Party Liability Collection

Third-party liability collection efforts provide an opportunity to achieve significant reductions in Medicaid program costs by collecting from (or

redirecting claims to) other medical insurers or a liable party in an accident case.

Major Findings and Conclusions

Alaska's TPL Collection function has only recently been established and is only beginning development. Limitations of the function include:

- Eligibility workers may not obtain details of other coverage from a newly eligible person.
- Only some claims are examined (manually) for possible third-party liability.
- Neither the eligibility nor claims processing computer systems are used in TPL detection.
- Insufficient staff are available to handle the potential volume of TPL collections.

Despite these limitations, over $30,000 has been recovered by the one person currently assigned in the short time this function has been in existence.

Recommendations

- Provide training to eligibility workers to enable them to obtain details of any other coverage.
- Add edits to claims processing computer system to identify potential TPL cases.
- Increase TPL collection staff to two professional and one clerical.

(The experience to date suggests that further cost-benefit analysis may justify a greater increase than this.)

Contracts Management

The contracts management function covers contracts with fiscal agents, consultants, and other contractors. The function is the responsibility of the Division of Public Assistance, although routine processing is performed by the Department of Administrative Services.

Major Findings and Conclusions

Comprehensive written policies regarding contracts management have recently been developed by the State. These policies are generally satisfactory. A few minor weaknesses are noted in the corresponding Detailed Review Report.

Financial and Statistical Reporting

Three groups of financial reports are prepared by the State which have relevance to the Medicaid program: monthly and annual reports of disbursements (generated by the Department of Administration's PBA System), internal State reports (prepared by DHSS), and Federal reports (prepared by DHSS). Only the Federal reports were reviewed in detail during the review, so the following findings and conclusions are limited to Federal reporting.

Major Findings and Conclusions

- Financial reports are out of phase with statistical reports.
- Expenditures by eligibility category are incorrectly reported.
- Expenditure projection reports are incomplete and inaccurate.

Recommendations

- Adopt written procedures covering preparation of Federal reports.

- Consolidate all claims processing in the Division of Public Assistance, to eliminate multiple sources of financial and statistical data (discussed elsewhere).

- Modify the claims processing system to provide a claims history file which reflects warrants issued, not merely claims adjudicated (recommended also under Claims Processing).

Summary

The major changes recommended cover:

- improvements in accounting controls

- enhancement of the TPL collection function

- improvements in the maintenance of the claims history file

Each of these changes involves increased expenditures. Each is important. The accounting control improvements are essential to avoid fraud and protect the integrity of the program. The additional staffing of the TPL collection function should more than pay for itself, based on other states' experience. The changes to claims history file maintenance are essential to provide proper controls and reporting.

IV. PROVIDER RELATIONS

Overview

This chapter discusses provider enrollment, provider education and training, and other provider relations activities.

Provider Enrollment

New providers are enrolled in the Medicaid program by the completion by provider, and the signing by the State, of a provider application and agreement, in accordance with 42 CFR 431.107.

Major Findings and Conclusions

The provider enrollment process is generally straightforward and effective except that:

- Under some conditions a fictitious provider could be enrolled.
- Out-of-State providers are not enrolled, nor is there any verification of the validity of their participation.
- Three different provider application/agreement forms are used: for mental health clinics, for audio/speech therapists, and for all other providers. These forms do not reflect all current Federal regulation citations.

Recommendations

- Direct the Department of Administration's Pre-Audit Unit to reject provider updates without an appropriate countersignature. (This is generally done now, but has not been formally or consistently applied.)
- Establish a verification process for out-of-State providers, including obtaining of state license number and social security or employer ID number.

- Consolidate the three provider application forms into a single common form, and update the references to Federal regulations.

Provider Education and Training

An ongoing program of provider education and training is important to the Medicaid program to ensure new (and existing) providers understand the requirements and constraints of the program and to help maintain good provider relations.

Major Findings and Conclusions

Alaska's Medicaid provider education and training is extremely limited:

- In the six months prior to the review only two training sessions, each for specific providers, were given.

- Responsibility for provider training is not clearly assigned to any one group.

Recommendations

- Establish an ongoing provider training program with more frequent provider workshops throughout the State.

- Assign responsibility for provider training to a specific unit in the Division of Public Assistance.

Other Provider Relations Activities

Other provider relations activities include attendance at professional society meetings, publication of newsletters, etc.

Major Findings and Conclusions

- Because of limited staff availability and the pressures of more immediate and urgent problems, few other provider relations activities have been performed.

Recommendation

- Develop closer relationships with the provider community, through participation in professional meetings, etc.

Summary

The major changes recommended cover:

- improvements in control over provider enrollment
- establishment of a provider training program
- development of closer relationships with the provider community

The cost increase associated with these changes is probably equivalent to the addition of one person. The result should be improved controls against fraud and a provider community with a better understanding of the program and its constraints.

V. ELIGIBILITY

Overview

This chapter discusses eligibility organization, eligibility policy, and eligibility procedures.

Eligibility Organization

The Medicaid eligibility organization consists of eligibility workers in district and regional offices, a central Recipient Benefits section, and a network of fee agents in the villages.

Major Findings and Conclusions

Alaska's eligibility program has some unique aspects. The fee agent network covers some 90 percent of the villages and provides an efficient mechanism for identifying potential eligibles and assisting in the application process.

In common with other parts of the Division, the eligibility organization suffers from the problems of high turnover and lack of training, identified in Chapter II. Since these problems are covered there, further details and recommendations are not presented here.

Eligibility Policy

Clear and correct understanding of Medicaid eligibility policy is essential to Medicaid cost control, to compliance with Federal regulations, and to ensure that potential Medicaid eligibles receive appropriate benefits.

Major Findings and Conclusions

For reasons similar to those for other problems -- lack of staff, high turnover, more urgent problems -- a number of weaknesses exist in the area of eligibility policy.

- Current Medicaid eligibility determination forms and manuals do not exist.

- Determination of eligibility appears to be based almost entirely on AFDC, SSI, and Adult Supplement eligibility, although Federal law and regulations provides many eligibility provisions peculiar to the Medicaid program. Thus, for persons not receiving cash grants, eligibility may be determined incorrectly.

- Particular misunderstandings of eligibility policy appear to exist for Alaska Psychiatric Institute cases, for which no Medicaid agency review of a need for admission (as required by 42 CFR 456.171) was occurring.

Recommendations

- Assign one person the responsibility of developing Medicaid eligibility policy. This is at least a half-time job on a continuing basis because of the frequent changes in Federal policy. This function could be combined with responsibility for training staff in Medicaid eligibility policy.

- Develop (or contract for) a Medicaid eligibility manual reflecting current State and Federal laws and regulations (also discussed in Chapter II).

- Develop a training plan for Medicaid eligibility training to be given to each eligibility worker within the first six months of employment, and for refresher courses.

Eligibility Procedures

Eligibility procedures must be adequate to ensure that eligibility is rapidly and accurately determined and the information correctly incorporated in appropriate files.

Major Findings and Conclusions

- The Basic Action Form used to convey information from the field to the State Office is in need of updating. Combined with the absence of up-to-date written procedures, the form is liable to be incorrectly completed.

- The Office of Information Systems, which has responsibility for the data processing system used for maintaining and reporting eligibility, has little documentation for the system and no one designated as responsible for its maintenance.

- For Alaska Psychiatric Institute cases, a form other than the Statement of Income and Resources normally used for AFDC eligibility was being used for gathering information. So little financial information is gathered via this other form that the eligibility of many children in API must be considered suspect.

Recommendations

- Update the Basic Eligibility Form and develop adequate instructions for using the new form.

- Designate an individual within the Office of Information Systems to be responsible for the eligibility system. Improve the quality of documentation of the system.

- Use the form used to gather eligibility data from AFDC recipients to gather data for children at API, or use some other form with adequate questions regarding financial status.

- Update the written instructions for determining the eligibility of children at API.

Summary

The major changes recommended cover:

- development of eligibility determination procedures and associated training
- improvements in gathering eligibility data, including a new Basic Action Form

The costs are a one-time cost for new procedures (already noted in Chapter II) and the addition of one staff person to have ongoing responsibility for maintenance of eligibility policy and related training. Savings should result from more accurate eligibility determination.

VI. UTILIZATION CONTROL AND RATE SETTING

Overview

This chapter discusses details of Alaska's rate-setting processes for long-term care, monitoring of appropriateness of care, utilization control, and the development of alternatives to long-term care.

Rate Setting for Long-Term Care

Long-term care costs represent the largest single component of Alaska's Medicaid costs. The generally high costs of labor, goods, and services in Alaska and the desirability of availability of long-term care in major communities present some constraints to cost reductions; nevertheless, any reductions which can be achieved will have a significant impact on overall program costs.

Major Findings and Conclusions

Long-term care costs in Alaska are very high, ranging from $40 to $170 per day with a weighted average daily rate of $75-80 per day. The following appear to be the major non-economic causes of the high rates.

- Responsibilities for interim rate setting are not clearly defined. This has led to at least one situation in which interim reimbursement rates were approved which included unallowable costs.
- There has been no systematic approach to rate setting, nor do any detailed procedures currently exist. Interim rates, in particular, have been approved as requested.
- Field audits have not always been performed. Settlement activity has been inadequate and has generally been a "rubber stamping" of reported costs.
- Current occupancy levels in SNF/ICF facilities average 70 percent. No occupancy minimums are included in the State reimbursement process.

Recommendations

- Define interim rate setting responsibilities clearly and provide adequate staffing.

- Implement a reasonable cost-related reimbursement system, incorporating a 90 percent minimum occupancy level. Because of the extent of the disparity currently existing, it may be necessary to phase in this occupancy level requirement.

- Expand the Medicaid Audit Section to ensure that, at least for the next three years, field audits of all facilities are performed annually.

Appropriateness of Care

From the viewpoints both of the Medicaid recipients and the State and Federal governments, it is important to ensure that recipients receive appropriate levels of care.

Major Findings and Conclusions

The State is currently in the process of developing Medicaid regulations which would include enforceable policies regarding levels of care determination and the placement of patients in long-term care. Accordingly, at least some of the following problems may be expected to be resolved with implementation of the new regulations.

- Generally, the approval process for admission to nursing homes works well and appears to be effective in ensuring appropriate care. However, there is currently no admission review for eligibles entering Alaska Psychiatric Institute. This is the responsibility of the Division of Mental Health and Developmental Disabilities but has not been done following the resignation of the psychiatrist assigned to the function.

- Monitoring of continued stays involves both periodic monitoring of patients' long-term stays and an annual review by the Medicaid Surveillance Unit of all patient

records in long-term care facilities. Both functions appear to be generally effective, except that patients have not been sent "adequate notice" of changes in their level of care as specified in 45 CFR 205. 10(a)(4)(14).

Recommendations

- Re-establish admission reviews for API, either by having the Medicaid Surveillance Unit reassume responsibility or by development of a clear memorandum of understanding with the Division of Mental Health and Developmental Disabilities. If the latter is chosen, some form of periodic monitoring by the Medicaid Surveillance Unit should occur.

- Ensure that adequate notice is sent to Medicaid recipients whenever a change is made in their level of care.

Utilization Control

Utilization control for Medicaid patients in acute care hospitals in Alaska is delegated to the Alaska Professional Review Organization (APRO). Utilization control for patients in long-term care facilities is the responsibility of the Medical Surveillance Unit and is covered in part in the preceding section.

Major Findings and Conclusions

Utilization control activities are performed for both hospital and nursing home patients. Weaknesses are listed in the following paragraphs:

- There is some indication that APRO's review procedures are inadequate and tend to "rubber stamp" hospital physicians' decisions. A current proposal by APRO to move to "sample review" could intensify the problem.

- The Division of Public Assistance has no mechanism for monitoring the APRO review process.

- The State is not performing the review of a sample of hospital claims agreed to in the memorandum of understanding with APRO.

- Long-term care utilization control is partly covered under the previous section on appropriateness of care. Utilization control efforts in nursing homes appear to be very much limited by staffing availiability and the absence of procedures.

Recommendations

- Renegotiate the current memorandum of understanding with APRO, to specify relative responsibilities, assurances that APRO will carry out a full review, and the monitoring system to be used by the State in reviewing APRO activities.

- Develop the monitoring system for reviewing APRO performance.

- Perform a review of a sample of hospital claims.

- Increase staffing in the Medical Surveillance Unit to enhance long-term care utilization control efforts.

Alternatives to Long-Term Care

The costs of long-term care in Alaska are such that, if alternatives can be developed, substantial savings could result.

Major Findings and Conclusions

The State has recognized the need to develop alternatives to long-term care and has recently established a committee to work on the issue. At present, however, the only possible alternative covered by the Medicaid program is home health agency services (available only in Anchorage). Use of these services appears to be discouraged by two factors:

- Many Medicaid recipients are Alaska natives, who have tended to use the Indian Health Services Hospital in Anchorage, which was until recently not subject to professional standards review and did not actively discourage long-term stays.

- There is an excess of ICF and SNF beds, which suggests there is a tendency to admit patients to long-term facilities although they could be served in their homes by an HHA.

Recommendations

- Continue to develop alternatives to long-term care, and critically examine any further plans to certify additional long-term care beds until plans are in place to offer a continuum of care which includes non-institutional placements.

Summary

The major changes recommended cover:

- implementation of a reasonable cost related reimbursement system, incorporating a 90 percent minimum occupancy level

- re-establishment of admission reviews for API cases

- renegotiating the memorandum of understanding with APRO, and developing an associated monitoring system

- increased staffing in the Medical Surveillance Unit

- increased emphasis on alternatives to institutional long-term care

Each change should have a significant impact on program costs. Only the fourth item involves an ongoing cost increase, of one staff member's salary. The other items will each take considerable short-term effort to achieve, however.

VII. CLAIMS PROCESSING

Overview

This chapter discusses the entire claims processing function, including plans for an improved data processing system and the use of AMOEBA.

Hospital, Physician, HHA, and Pharmacy Claims Processing Flow

Medicaid claims from hospitals and physicians (including crossover claims), home health agencies, and General Relief/Medical claims from pharmacies follow essentially the same overall claims flow:

- Claims are received in the DHSS mail room, normally with eligibility coupons attached, stamped with date of receipt, and passed to the claims receipt area in the Division of Public Assistance.

- Claims are checked for eligibility coupon. If coupon is attached, information will be transferred from coupon to claim. If there is no coupon, the on-line eligibility file is accessed to obtain eligibility data. If the recipient is not on file, the claim is returned to the provider.

- Claims are sorted by type of service and passed to a claims examiner for adjudication (they may be temporarily filed in the examiner's area).

- Adjudication is performed manually. Payment allowed is based on:

  lowest of actual charge, median charge, and Medicare reasonable charge (for physicians)

  percentage of charges (for hospitals)

  amount billed (for pharmacies)

- Claims are batched, "certified", and forwarded to data entry.

- Following data entry to diskette, the claims data is read into the Department of Administration computer system and processed through the Claims Processing System.

- The outputs from the Claims Processing System include remittance advices, an updated claims history file, punched cards for entry to the PBA accounting/warrant system, and various reports.

- Warrants are produced from the PBA system, matched with the remittance advices, and mailed to the providers.

Major Findings and Conclusions

There are significant problems with the present claims processing operations:

- No record is currently made of the number and type of claims received, making workload scheduling very difficult.

- The on-line eligibility file is for inquiry only and will not supply historical data on eligibility. If no coupon is attached, and the recipient is now eligible but was not at the time of service, the claim will be paid in error.

- Procedure coding is converted from 1969 RVS or 1974 RVS to 1964 RVS for comparison with Medicare profiles. The conversion and subsequent adjudication process is complex, time-consuming, and error-prone.

- There are no procedure manuals for claims processing.

- Where services are limited (e.g., x services per year), the manual system cannot determine when the limitation is met.

- Crossover claims are paid even when a Medicare EOB is not provided. This may result in overpayments.

- The experience level of the claims processing staff is low. The senior examiner has one year of experience, the other examiners only two to three months. (It is generally accepted that six months' experience is necessary for a claims examiner to become accurate and efficient).

- No validation of the reasonableness of pharmacy claims is made. (This finding applies to the GR/Medical program only.)

- Data entry is performed from the less legible carbon copies of the claims.

- Claims may be altered or removed from a batch during the data entry process.

- Data may be substituted in a field in data entry if the data is missing from the claim.

- The claims history file is updated before it is known that warrants can be or have been issued. Moreover, PBA cards created by the claims processing system may be altered prior to processing through PBA. Thus the claims history file does not reflect claims paid.

- The claims processing system does not provide an acceptable level of duplicate checking, does not verify coverage of procedures or services, and does not check for recipient eligibility.

Recommendations

Generally, the problems listed above have obvious solutions. Each problem must be eliminated if Alaska is to have a workable claims processing operation. The major changes which must be made are:

- Contract for development of adequate claims processing procedures (see also Chapter II).

- Contract for development of a new provider manual to reduce the errors created by providers.

- Develop, or contract for (preferably through use of a fiscal agent or facility manager), a new claims processing system incorporating automated claims pricing and adjudication.

- Update the claims history file with amount paid after the warrant is created by PBA.

- Examine the feasibility of turning over the entire claims processing function to a fiscal agent or facility manager. The feasibility would depend on:

  availability of interested qualified companies

  potential cost

  political acceptability

Claims Flow for Other Claims Types

Other types of Medicaid claims which do not follow the typical claims flow are nursing home claims, EPSDT screening claims, State institutional claims, transportation claims, other miscellaneous services claims, and out-of-State claims. The major exceptions to the claims flow described in the preceding section are noted in the following paragraphs:

- Nursing home claims are checked for prior authorization, a voucher prepared and forwarded via data entry to the PBA system, without editing, to create a warrant. Nursing home claims data is added to the claims history file at a later date, without processing through the full claims processing system.

- EPSDT screening claims are processed by the Nursing Section of the Division of Public Health. Except for screenings performed by a physician, no claim is submitted, only details of screening results. Screenings performed by Public Health nurses (95 percent of the total) are reimbursed on the basis of an annual time study. Nurse screenings are not added to the claims history file.

- Claims for miscellaneous services (e.g., wheelchairs, oxygen), some transportation claims (those not processed by the Division of Administrative Services), and out-of-State claims, generally follow the claims flow for hospital and physician claims.

Major Findings and Conclusions

The most important conclusion regarding processing of these other claims types is that the fragmentation of claims processing leads to inaccurate claims history and the possibility of incorrect payment.

Many of the problems identified for hospital and physician claims processing are valid for these other types also.

Recommendations

The same recommendations listed for hospital and physician claims flow apply to the other types of claims. In addition, the following recommendation made also in Chapter II is extremely relevant:

- Consolidate all claims processing in a single area.
- Ensure that all adjudicated claims update the claims history file.

Claims Data Processing System

The preceding sections have identified some problems with the present claims data processing system. The Office of Information Systems has developed plans for, and has programmed part of, a new claims processing system. The following findings and conclusions relate primarily to the possible new system, or to some alternative system.

Major Findings and Conclusions

- The new system which has been partially developed by OIS is based on the use of a schedule of maximum allowables which has been rejected by the provider community.
- The new system, as currently designed with a single fee schedule, is anticipated to be completed in December 1979, based on a development group of three analysts/programmers (two present staff plus one planned). However, the forthcoming conversion of the State's computers may delay this schedule.
- The present design for the new system, while offering substantially enhanced capabilities, does not provide for processing of all claims types.

- Whether or not the new system is implemented, there will be a substantial increase in computer processing costs for Medicaid as the Department of Administration installs a new larger computer and implements a charge-back system.

Recommendation

- The problems with the present claims processing system are so serious that development of a new system, whether that planned by OIS, or a system designed and developed by a contractor, must be a major priority.

Use of AMOEBA

The State has been considering for some time the use of AMOEBA, a set of computer programs designed to list questionable claims and identify symptoms of unusual utilization.

Major Findings and Conclusions

To date, one pilot run of AMOEBA has been made using the claims history file for a 30-month period. The experience leads to the following findings and conclusions:

- To use AMOEBA properly requires a significant amount of training and experience, particularly the latter. Without an understanding of the AMOEBA system, the output is likely to be so voluminous and misdirected as to be useless.

- Use of AMOEBA requires staff to be available to conduct detailed research of the claims listed by the system.

- AMOEBA should not be used by anyone not totally familiar with State Medicaid policy.

- If the preceding constraints can be overcome, AMOEBA can be extremely valuable.

Recommendation

- Use of AMOEBA should be delayed until plans for a new claims processing system are finalized. However, such plans should, at least tentatively, involve the use of AMOEBA once the new system is stabilized and provided adequate support staff can be provided.

Summary

The major changes recommended are:

- contracting for development of a new provider manual and claims processing procedures

- development of, or contracting for, a new claims processing system (preferably through use of a fiscal agent or facilities manager who would also operate the system)

Costs for new manuals and procedures are discussed in Chapter II.

Attachment F

DHSS MEDICAID TASK FORCE RECOMMENDATIONS

I. Authority: By memorandum dated May 4, 1979, Deputy Commissioner Catherine M. Lloyd appointed a task force specifically to develop recommendations to correct identified deficiencies in the Medicaid payments system. This task force was comprised of the following persons:

Rod Betit, Director, DPA
Tom Haas, Chief of Financial Management, DPA
Chris Dooley, Accountant IV, DPA
Lloyd Pukis, EDP Supervisor, Information Systems
Doug Goldbach, Finance Officer, Div. of Admin. Services
Ken Sather, Office of Interal Review.

II. Overview: The Medicaid payments system has been a constant source of problems for several years now. When originally installed the system was adequate to meet the billing demands of Medicaid/GR Med providers statewide. However, since 1972 billing demand has steadily grown to the point that the present manual system cannot keep current with billing activity. For purposes of the task force's review, "current" was defined as making payment in 30 days or less from the date of receipt of a billing. This 30 day timeframe is required by current federal regulations. At the time of review, processing timeframes were averaging 49 days and increasing.

Given this situation, the Division of Public Assistance requested and received a complete review of all Medicaid operations by representatives of the federal Medicaid agency in DHEW. This review generally disclosed no startling discoveries; but rather reinforced conclusions already reached by the Division with respect to what was wrong, and what was needed to correct the problem. The recommendations that follow come from careful consideration of the DHEW report, individual experiences from different agency representatives and consideration of the fact that additional manpower and funding were not made available by the Legislature to deal with the problem.

III. Task Force Recommendations

Recommendation #1

The Department should adopt regulations effecting a shift from the current profile pricing method to a schedule of maximum allowances. Adoption of a schedule is viewed the only viable means of reaching the target processing timeframe of 30 days. This recommendation is also most desirable for the following additional reasons; 1) timeliness of implementation will permit on-line operation by August 1 at the latest due to previous start-up work already completed, and 2) many of the deficiencies noted in the DHEW report would be corrected concurrent with installation of a schedule of maximum allowances. Other alternatives considered by the task force included:

- Contracting with a fiscal intermediary. This would provide no short-term relief to payment difficulties and could not be purchased without additional funds. With adequate funding committed, this would be a viable long term alternative.

- Contracting with Aetna Insurance, the current fiscal intermediary for Medicare claims processing. Discussions with Aetna data processing staff indicate that their system, although similar to what we desire for Medicaid claims processing, would not be readily convertable to the needs of a Medicaid processing system in terms of invoice handling, audits, and controls. Any potential for this alternative would require the expenditure of time and money for a long-range benefit. Again, no immediate benefits would be derived from this alternative.

- Automation of the current individual profile pricing system in-house. The work required of DHSS Information Systems to program such a system is estimated at approximately 12 man months. This would not bring immediate relief to the payment problem, nor would the final product be as maintenance free as a schedule of maximum allowances. Again, this could be a viable long term alternative.

- Adapting Aetna's claims processing system to Alaska's needs. The time involved in converting the programs and the expense of purchasing the software from Aetna would be prohibitive under our current budget constraints. Again, the needed expenditure of time and energy would prevent any short range benefits.

Recommendation #2

Although implementation of a schedule of maximum allowances would permit sending invoices directly to Data Processing's keypunch center, it is recommended that DPA maintain responsibility for batch control of all billing documents. This will leave the burden of batch accountability, provider relations and records retention with the Division of Public Assistance.

Recommendation #3

It is expected that the Department could potentially recover the time of two full time adjudicators with transition to a schedule of maximum allowances. It is recommended that one of these two positions be reclassified as a Third Party Liability Technician, and the other an Administrative Assistant II to provide support to the Medicaid Program Officer.

Recommendation #4

Until the current card-deck payment system can be replaced with a tape payment system, written procedures should be developed to place the card-deck system under tighter security controls. This may require a Memo of Agreement between DHSS and the Department of Administration.

Recommendation #5

That the Department renegotiate the Delta Dental contract for FY80 and not attempt to take this responsibility in-house until at least FY81, thereby permiting time to clean-up current operations once the schedule of maximum allowances is adopted.

Recommendation #6

That the Department locate funds to purchase development of new providers manuals and a staff manual for field workers on a contract basis. The present burden on DPA Medicaid staff is such that other critical projects will have to be deferred unless such a contract is arranged. Even then, a staff manual could not be produced prior to October 1, 1979.

Recommendation #7

That the Department should consolidate payment of all DHSS medical bills in the current DPA Medicaid Payments Section. Currently, medical payments are made throughout the Department with little or no system integration.

Recommendation #8

That the office of Information System should draw up an APD to request 90/10 match from DHEW to pay for completion of the new Medicaid DP system.

Recommendation #9

That installation of the new Medicaid system and any funds necessary to purchase hardware such as computer terminals receive top DHSS priority. This determination should be made immediately to permit purchase of needed equipment, and to isure DP staff concentration on installation of the new Medicaid system.

DELTA AND THE MEDICAID PROGRAM - Denise Knapp - director

I. History: Delta was organized in 1973, selected as fiscal intermediary for State Medicaid programs in 1973.

II. Participation: 96% of the dentists in the State are members of Delta, and 95% of these participating in the Medicaid program.

III. Significance to dentists for Delta in fiscal intermediary role.
- A. Prompt payment; bi-monthly.
- B. Payment on usual fee; not to exceed 75% percentile.
- C. Dental profession has a direct voice in program through Delta.
- D. Direct government intervention is avoided.

IV. Significance to State of Alaska for Delta in fiscal intermediary role.
- A. Professional dental services in providing review (pre- and post-operative) and quality assurance.
- B. Local processing, using Alaska employees who invest in Alaska to improve Alaska economy.
- C. Higher utilization by and satisfaction of patients through cooperation of the dental profession to allow free choice.
- D. Increased efficiency of processing and payment.
- E. Cost containment (verification made with dentists' fees on file) and utilization checks and balances.
- F. Provider agreements between Delta and the dentists.

V. Claims Cost Information:

	No. Claims	Total Amount	Av. Cost Per Claim	No. Eligibles
1975	1900	$250,600	$132	11,500
1978	7100	$887,000	$125	15,000

ALASKA AND NATIONAL HEALTH INSURANCE

From time to time, as many as ten or twelve measures have been introduced simultaneously in the United States Congress proposing a variety of national health insurance programs. For a number of years, Alaska health leaders have been concerned with regard to the fragmentation of health delivery systems within Alaska as well as the escalating costs for all health services in the state. Delays have been encountered in active planning for an improved financing system for Alaska health programs because of the prospect of a national health insurance program being enacted by the federal Congress. Numerous discussions continue to go forward with regard to a national health insurance program for the entire United States. It now appears that the enactment of and implementation of such a plan are receding further and further into the future. Three of the more popular approaches to national health insurance have been those which have been introduced into the federal Congress by President Carter, Senator Edward Kennedy and Senator Russell Long. Appendix Number One at the end of this document outlines the "Three Approaches to National Health Insurance" as set forth by these national leaders. The topics covered in the table include coverage, benefits, administration, financing, cost, cost controls and timing for implementation of the respective plans.

There are several reasons why Alaska should consider developing, as rapidly as good planning will permit, a model health system for all the citizens of our state. With our extremely small population and with the numerous extensive health delivery plans in place already, it would seem that Alaska could adjust its present programs and add thereto in order to create a truly comprehensive and effective health system for Alaska. It will take bold, creative and extensive work to develop such a system.

Governor Jay S. Hammond, Lieutenant Governor Terry Miller, and the Commissioner of the Department of Health and Social Services, Helen D. Beirne, have expressed strong support for a revised and improved model health plan for Alaska. The Department of Health and Social Services leaders are taking certain initiatives at the present time in order to explore further the possibilities of changes within the present systems. In due course, numerous parties within the government and in the private sector will be invited to participate in the creation of a new health services financing system, as far as outlays of the state government are involved or will be involved in the future.

Recommendations:

1) It is recommended that the health planning organizations in the state, as well as the health agencies and providers in the state, embark on a joint program to make reasonable efforts at cost containment of health services. A detailed examination should be made for the reasons of the dramatic increases in hospital charges to patients and third-party payers, as well as the escalation in rates of physician fees, prescription drugs, and nursing home rates. Efforts at cost containment, while notable, have not been effective to any substantial degree. Ceilings proposed from time to time applied to specific parts of the health care system do not appear to be equitable, since all of the goods and services related to the delivery of health care have not been proposed for inclusion in the cost ceilings. One of the more urgent matters facing Alaskans, as well as the citizens of other states, is the rapid escalation of health service costs. Detailed attention should be given to any cost of a health service in the state of Alaska which begins to exceed approximately 60% over and above what the average for such cost would be elsewhere in the nation.

2) The Alaska Revenue Sharing Program provided by Alaska Statutes, as it relates to health services, hospitals, health facilities and construction aid, should be reviewed with the possibility of major revisions in order to create a more equitable revenue sharing basis as related to other municipal services. In some communities in Alaska where the local government is responsible for the operation of hospitals, the generous revenue sharing dollars flowing to those hospitals seem to be well justified. In some of the urban areas, in cases where hospital income dramatically is excessive over operational expenditures, an adjustment may be found to be in order. In those cases, the local government should have the freedom to utilize the revenue sharing dollars for those health services deemed to be the local government's priorities for expenditures.

3) A detailed study should be undertaken in Alaska of the 458,305 third-party coverages or non-fee for service coverages when projected on a population base of 411,211 in 1977. The cost benefit ratio of the double coverages should be examined in some length in some depth. At the same time, data seem to reveal that numerous Alaskans are not covered by any third-party coverage or non-fee for service program at all. Scientific research and detailed studies which may be undertaken with regard to the possibility of a model health system for the state could include the study recommended herein.

4) That a detailed review be made of the medicaid eligibles, medicaid coverages and medicaid expenditures in an effort to determine whether or not Alaska wishes to continue the escalation of covered groups, covered services and financial outlays experienced from 1973 to 1979. From a basic coverage of eight services in 1973, the coverage services have gone to 17 services. Minor changes in covered groups have been made by federal and state laws since 1973 and the initially covered groups have contributed substantially to the increase in financial outlays.

5) In the event studies are undertaken with regard to the covered services and the covered eligible groups under medicaid, consideration is recommended with regard to the cost effectiveness of implementing the "medically needy option" under the medicaid program. If Alaska is going to improve health financing assistance to the medically needy, if provided under the medicaid program, the federal government would match all expenditures on the basis of 50% federal and 50% state funds.

6) Regardless of what may develop in the near term with regard to other changes in medicaid, general relief medical coverage or under a model health system, immediate attention should be given to expanding coverage for catastrophic illnesses for Alaskans. This could be accomplished with an amendment to the present catastrophic statute, as well as additional appropriations for the catastrophic illness program.

The design of any amended catastrophic illness program should be undertaken in such a way as to fit in with the State's goal of a comprehensive revision of its health financing plans.

7) That immediate detail and urgent study be continued with regard to broadening the range of services to prevent premature institutionalization in long-term care facilities and more appropriate placements for some who may at present be institutionalized in nursing homes.

8) That the State of Alaska move ahead as rapidly as good planning will permit to develop a model health services financing program geared to the needs of Alaskans, whether or not such a revised program includes the federal medicaid program. In the event it is not possible for the State to carry out an extensive study and mature plans to revise its present financing programs for medical assistance, as a minimum it is recommended that the State consider dropping the medicaid program and rebuild a program with the State's current 50% of medicaid dollars furnished to the State, combined with the State's general relief medical funds, and thereby render services to the limit of funds available to a revised group of eligibles based on new priorities.

9) That the State consider a revised plan of reimbursement for physician services and hospitals in the early part of the 1980's, whether or not the medicaid program remains or is dropped. Strong emphasis should be placed then upon the free enterprise and competitive systems in order the market forces will be generally operable in the health care field as is demanded in all other fields of endeavor.

OPTING

A Study of Medicaid Client Need

February 1977

O P T I N G

A Study of Medicaid Client Need

PREPARED BY

LEGISLATIVE AFFAIRS AGENCY
DIVISION OF RESEARCH

FEBRUARY, 1977

Foreword

In the fall of 1972, Alaska entered the national Medicaid program, providing certain of its citizens thereby a limited spectrum of medical care services.

Since this modest beginning, the legislature has increased Medicaid coverage by the addition of a few services above those which the state is required to cover in order to participate in the federal program. These optional services allowed the state to earn addition "matching" federal funds, some of which were a direct one-for-one offset to medical care expenditures that the state itself had been previously paying for in their entirety. Other program additions resulted in increased state expenditures, but provided a more complete medical coverage package.

In order to maximize the benefits from the additional expenditures, optional service additions must undergo careful scrutiny to insure that the options chosen return the greatest level of benefits in terms of meeting the health needs of the approximately seven percent of Alaska's population served by the Medicaid program. During 1976, a number of legislators indicated their desire to have better information upon which to base their decisions concerning the addition (or deletion) of various possible optional services. In order to meet this need, Miss Deborah Behr of the Research Division staff began, in June of 1976, an extensive effort directed at reviewing public assistance eligibility supervisors' perceptions of client requirements, analyzing written denials of additional client service requests, and obtaining information from various states regarding their experience with selected options. The present study is the result of this effort.

O P T I N G

A Study of Medicaid Client Need

PART I. OVERVIEW OF THE MEDICAID PROGRAM

INTRODUCTION TO THE PROGRAM

Medicaid is a program funded jointly by the federal and state governments which aids certain needy Alaskans in providing payments for them to receive medical services. It helps assure that medical services are available to those needy eligible persons when they are ill or injured. It also assists in guaranteeing that the highest quality care of the kind required by the patient's condition is available, by mandating certain medical reviews of patient care and treatment. Medicaid also attempts to make services available by utilizing the present system of private practitioners, facilities, and institutions to provide the care required at the lowest possible cost to the taxpayer.

STATE PLAN FOR MEDICAID

The Medicaid program in Alaska is administered by a single state agency, the Department of Health and Social Services, which is required to submit a state plan to the Secretary of the federal Department of Health, Education, and Welfare for his review and approval.

The state plan is essentially a contract between the state department and the federal Department of Health, Education, and Welfare specifying conditions to be met in order to qualify for federal financial participation. Some topics included in it are:

1. eligibility determination
2. recipient eligibility
3. eligibility verification
4. medical services
5. health care
6. quality control
7. fair hearings
8. methods of administration
9. utilization review
10. fraud

Many of these items are required be included in the plan (mandatory), but others the state may decide whether or not to include (optional). The optional portions allow the state to shape a medical assistance program to the needs and financial resources of its citizens.

DIFFERENCES BETWEEN MEDICAID AND MEDICARE

Medicaid is often confused with the Medicare program in the state. Medicaid is a medical assistance program for certain needy low-income people. In Alaska, Medicaid is administered by the Division of Public Assistance, an agency of the Alaska Department of Health and Social Services. It is authorized under Title XIX of the federal Social Security Act and AS 47.07.010-.080 of the Alaska statutes. States can design their own programs within set federal guidelines to meet the needs and resources of its citizens. Medicaid programs can and do vary from state to state.

In comparison, Medicare is a medical insurance program for those people, rich or poor, covered by Social Security. It is administered by the Social Security Administration of the federal government. The program is the same in all fifty states. Almost everyone over 65 and some younger persons who have been receiving Social Security disability payments for at least two years qualify for the program.

BRIEF HISTORY OF MEDICAID PROGRAM IN ALASKA

On July 6, 1972, Alaska became the 49th state to provide the Medicaid program for its residents. The state had, since the mid-60's, provided for such services under the General Relief - Medical program. Costs had risen from $1.8 million to $8.7 million in FY 72. This dramatic increase was due to many factors, the major ones being:

1. The number of eligibles had increased, but the rate of expenditure was increasing at even a faster pace.

2. The scope of the program had been liberalized and expanded with a related increase in utilization of services.

3. Medical care costs were rising at a rate disproportionate to that of other costs of living.

In light of this situation, the administration and the legislature came to basic conclusions that the General Relief - Medical program, which was supported 100% with state monies, had need of administrative controls to review services and, hopefully, reduce health care expenditures. There was a general consensus that either the General Relief - Medical program had to be upgraded or research should be done to investigate the possibility of the implementation of the Medicaid program. In April, 1972, the Department of Health and Social Services contracted with Touche Ross and Company, a public accounting firm, to develop a cost benefit study of the Medicaid program. Budgets were developed and testimony was made to the legislature that session. On June 17, 1972, the enabling bill for the Medicaid program passed the legislature and was later signed into law with an effective date of July 6, 1972. (The history of the program can be traced on Table 1: Medicaid History Timeline.)

TABLE 1

State of Alaska
Medicaid History Timeline

Date	Occurrence
April 10, 1972	Touche Ross & Company begin Medicaid System Design
April 18-June 9, 1972	Departmental Presentation to Legislature
May 10, 1972	Department of Health and Social Services' Steering Committee Established
June 17, 1972	Enabling Bill Passes Legislature
July 6, 1972	Medicaid Becomes Law
September 1, 1972	Medicaid Implemented
September 28, 1972	State Plan Submitted to Federal Department of Health, Education and Welfare
April 4, 1973	Effective date of Intermediate Nursing Home Care Option
May 16, 1974	Effective date of Inpatient Psychiatric Hospital Option for Eligible Persons 65 or Over and Under 22
May 16, 1974	Effective Date of Miscellaneous Minor Eligibility Groups (Primarily needy children under 21 in foster care under supervision by Department of Health and Social Services)
July 13, 1974	Effective date of 60 day limit on filing Medicaid claims
April 15, 1975	New Division of Public Assistance Formed
September 2, 1975	Effective date of Intermediate Nursing Home Care for Mentally Retarded Under 21 who Meet AFDC Need Standards Option
March 12, 1976	Effective date of Eye Glasses and Optometrist Service Options
June 21, 1976	Effective Date of New Nursing Home Group of Eligibles
July 1, 1976	Effective Date of Limited Clinic Services Option (Primarily Community Mental Health Centers and State Operated Mental Centers)
July 1, 1976	Effective date of Treatment of Speech, Hearing, and Language Disorders Option

The Department of Health and Social Services worked during the interim period to provide the necessary procedures and organization to make Medicaid an administrative reality in Alaska. A new Division of Medical Assistance in the Department of Health and Social Services was formed to administer the new program, as well as the remnants of the General Relief - Medical program. On September 1, 1972, the Medicaid program was actually implemented. (The Division continued to administer the program until April, 1975, when the new Division of Public Assistance was formed. This new division combined the eligibility determination, income maintenance, and medical assistance functions into one organizational grouping in the state.) Later that month, the official state plan was submitted to the federal Department of Health, Education and Welfare for its approval.

With the approval of the state plan, Alaska realized the benefits due to implementation of the Medicaid program:

1. Federal matching funds for medical expenditures became 50%, thereby allowing the continuation of the level of medical services without further increase in state general fund expenditure.

2. Federal match for categorical assistance programs under the Social Security Act increased from 30% to 50%.

3. Administrative controls, seen as necessary, were implemented to fulfill Medicaid requirements in order to receive federal financial participation.

When the legislature approved the Medicaid program, it included a restriction in statute mandating that all new services or eligibility group additions must receive its approval. At time of passage, the enabling legislation included those services and eligibility groups mandated by the federal government in order to receive federal financial participation. Since that time, the legislature has added few additional services or eligible groups.

The legislature added the first additional service option in 1973. At that time, intermediate nursing home care was selected. This option permitted the coverage of a lower and less expensive level of nursing home care. This addition allowed many Medicaid recipients in skilled nursing, who did not require that level of treatment, to be properly placed in intermediate nursing care thus "saving" state general fund dollars.

In 1974, the inpatient psychiatric hospital services option was added for eligible persons 65 years of age or over and 21 or under. This allowed the state to claim federal reimbursement for some persons at Alaska Psychiatric Institute, who were eligible for Medicaid coverage and were at that time receiving their care 100% from state monies. Also, other small groups of new eligibles were added at that time. Primarily they consisted of certain needy foster care children under 21 supervised by the Department of Health and Social Services. Prior to

that time these children had, in most cases, received coverage for their health care through the General Relief-Medical program. Also, legislation was passed requiring that medical assistance claims be submitted promptly, no later than six months after date of service or third party payment was received. This permitted more administrative control of expenditures and allowed for greater accuracy in budget projections.

The option to include a new group of needy eligibles under 21 who were in intermediate nursing homes for the mentally retarded became effective in 1975. This permitted a group of children at Harborview Memorial Hospital, Alaska Psychiatric Institute, and Hope Park to receive Medicaid coverage and, hence, additional federal dollars could be earned for their care.

In 1976 the legislature chose to add four new items to the program. A new group of needy persons became eligible for Medicaid coverage for their nursing home care due to an addition of an option. Also, that session, prescription eyeglasses and optometrist's services were added to the program. The legislature also approved the addition of limited clinic services which allowed state operated mental health centers and state approved community outpatient mental health centers receiving grants under A.S. 47.30.520 - 47.30.620 to be covered. This permitted federal funds to be earned in these state general fund supported projects. Also, at that time, the coverage of treatment of speech, hearing, and language disorders was added to the Medicaid program.

The legislature has shown interest in examining and evaluating the available Medicaid options, as seen by the recent history of the program in the state. Many of these options, especially in the case of coverage of nursing home care for certain needy eligible persons, actually "saved" state money. By adding them to the Medicaid program, federal funds could be realized for some of those services, which were being paid at that time 100% from state general funds. Also, by increasing the scope of the service package, a more consistent medical treatment program could be offered to these needy persons. For example, prior to the 1976 addition, eyeglasses were not generally available to all Medicaid eligibles who needed them. Only Medicaid eligible children who had been seen in early screening programs and referred for eyeglasses could be reasonably assured of coverage under the program for their lenses. Needy adults, such as those in nursing homes, had no such guarantee.

Alaska was one of the last states to join the Medicaid program and has been cautious in increasing the scope of the program in the state. In comparison with many other states in the program, Alaska's program is limited, with few service and eligibility group options beyond those basic services and groups required to maintain compliance with the program. This paper will later examine the current scope of the program and the options available under it that the legislature may be called upon to evaluate in 1977 and thereafter.

PART II. CURRENT STATUS OF MEDICAID PROGRAM IN ALASKA

ELIGIBILITY OF CLIENTS

The Alaska Medicaid program provides coverage for certain needy persons receiving or eligible to receive public assistance under:

Federal Supplemental Security Income (SSI),

Alaska Old Age Assistance (OAA),

Alaska Aid to the Blind (AB),

Alaska Aid to the Disabled for Persons who Meet Federal Criteria for Disability (AD), or

Aid to Families with Dependent Children (AFDC),

and certain others (mostly children)

Alaska does not cover the medically needy under its Medicaid program.

In general to be eligible for Medicaid in Alaska, an individual must:

(1) Be physically present in Alaska at time of application and citizen of U.S. or lawfully admitted alien;

(2) Not be in a public institution such as a jail (a person may however be in chronic disease facility such as a nursing home);

(3) Not have more than $1,500 in non-exempt personal property; this excludes a home (there is no lien requirement), personal belongings, in certain cases, a necessary automobile and some types of income producing property;.

(4) Not have transferred property to qualify for assistance;

(5) Meet program requirements such as blind, disabled, aged over 65, or dependent child

The Division of Public Assistance examines the financial and living situation to determine if a person is eligible. As a basic rule, if a family of four meets general program requirements, has monthly net income of no more than $400 earned (excluding reasonable work related expenses) and unearned income, the family would qualify for assistance under Aid to Families With Dependent Children program. There is no geographical differential on the total amounts allowed. The amounts vary for the adult programs (OAA, AB, AD) but generally, if household expenses (excluding fuel) are over $35 a month and the net income is no more than $334 a month of earned (excluding reasonable work-related expenses) and unearned income, a single person family would qualify if other program requirements are met. The $334 figure can vary annually

in accordance with cost of living adjustments required in AS 47.25.640; 47.25.430; 47.25.810. Eligibility for categorical assistance programs automatically makes one eligible for Medicaid.

SERVICES COVERED UNDER MEDICAID

The State of Alaska covers basically two types of services: mandatory, which the states are required to provide, and optional, wh.ch the state may provide and receive federal reimbursement. Alaska provides all mandatory services, but optional services are limited.

Mandatory Services

Alaska must provide the following services: 1) inpatient hospital services; 2) outpatient hospital services; 3) physician's services; 4) x-ray and laboratory services; 5) skilled nursing home services; 6) nome health services; 7) early and periodic screening, diagnosis, and treatment of children under 21; and 8) family planning services. Alaska also is required to cover transportation necessary to receive medical service, if unavailable from any other source, but it is not listed as a federal requirement.

Optional Services

In addition to the mandatory services, Alaska provides and receives federal reimbursement for the following services:

(1) Inpatient psychiatric hospital services for individuals age 65 or older or under age 22
(2) Intermediate care facility services
(3) Skilled nursing for those persons under 21 years of age
(4) Emergency hospital services
(5) Eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist
(6) Services for individuals with speech, hearing, and language disorders
(7) Services through state approved out-patient community mental health clinics which receive grants under AS 47.30.520-47.30.620 and state-operated mental health clinics
(8) Optometrist's services and limited dental and prosthetic devices as required under EPSDT regulations

Other services that the state could choose to provide for certain of its needy individuals, but which has not yet opted for, include:

(1) Prescribed drugs
(2) Dental Serv.ces (for persons over 21 not covered under the early screening program)
(3) Dentures
(4) Prosthetic devices (for persons over 21 not covered under the early screening program)

(5) Private duty nursing
(6) Physical therapy and related services
(7) Chiropractor's services and other practitioners
(8) Podiatrist's services
(9) Care for patients aged 65 or older in Institutions for Tuberculosis
(10) Other diagnostic services, screening, preventive services, rehabilitative services

Parts III through V of this report deal later with these optional services in more depth, examining the need and aspects to consider in the evaluation of these alternatives to the program.

FINANCIAL PARTICIPATION BY FEDERAL GOVERNMENT

The federal government financially participates in the Medicaid program by means of matching state dollars for allowable administrative and medical expenditures. Services to eligible clients receive 50% reimbursement, except for family planning supplies and services which are matched at 90% level. Administrative costs are generally matched at 50%. Professional medical review staff are reimbursed at 75% level. (Certain other administrative services receive special match rates, such as 100% for certification and survey of nursing homes. These special rates are itemized in federal law and regulation.)

At the present time there is no "ceiling" or set limit for Alaska on the amount of federal funds available for reimbursement. There has, in recent years, been much discussion on the federal level to restrict such reimbursement, as was indicated in President Ford's budget address in January, 1976. At that time, he mentioned the possibility of placing the Medicaid program in a block grant package with other federally assisted health care programs. By this method, a dollar limit would have been set on the available federal funds for those purposes. Generally, though, the prospects for major funding modifications in the Medicaid program appear slim, although tighter management and administrative mechanisms to control fraud and quality of services seems to be a continued interest.

NEW DEVELOPMENTS IN MEDICAID

In the fall of 1976 the federal government placed additional responsibilities on the Medicaid program, through the passage of Public Law 94-437. That bill, known as the Indian Health Care Improvement Act, mandated closer coordination of Medicaid and Indian health services and required that all services for Medicaid eligible Alaska Natives in Indian health facilities be billed to Medicaid. The federal government would then reimburse the state's Medicaid program at 100% for such services. Additional administrative functions would receive normal federal reimbursement rates. The services eligible for reimbursement under Public Law 94-437 are only those included in the approved Medicaid state plan and provided to Medicaid eligible Alaskan Natives.

Total ramifications of the bill are yet unknown. Federal officials report though that Alaska is far ahead of other affected states in implementing the new law. For example, seven of Alaska's nine Indian Health Service hospitals currently meet statutory requirements for participation in Medicaid without further action. State officials note though that unless there is a major shift in procedures for handling people covered under Indian Health Improvement Act, field office work will increase greatly (e.g., issuing medical coupons, arranging necessary transportation, answering client and provider questions). These state officials voiced concern that estimates of the number of new Alaska Native clients attracted to apply for Medicaid coverage are unknown. The attachment of a dollar figure to the cost of medical services for these persons would be just a rough estimation.

PART III. GENERAL INFORMATION REGARDING OPTIONAL SERVICES

CONTROLS THAT STATES MAY IMPOSE ON MEDICAID OPTIONAL SERVICES

Since the addition of optional services is at the discretion of the state, the federal government allows great flexibility for states to determine the scope of the option that they wish to provide for their Medicaid clients. Generally, federal law and regulation define the basic objectives and requirements of the options, all of which must be met in order to obtain federal financial participation. Some of the requirements address equal offering of services to all eligibles, the qualifications of persons providing the services, and degree of supervision required for paraprofessionals. Within those broad parameters states can shape optional services to fit their unique needs and resources.

Alaska can limit optional services by (1) qualifying coverage, (2) requiring prior authorization, (3) limiting usage frequency, (4) requiring clients to share in cost of services, or (5) limiting the amount of provider reimbursement:

(1) *Qualifying Coverage*

Medicaid law and regulation permit the limiting of coverage of optional services. For example, dentures can be selected as a separate service without having to cover other prosthetic devices such as hearing aids, crutches, etc, or without having to cover other dental services. The Medicaid program does require that the option limitations be applied equally to all eligible clients. (There are certain exceptions to this policy. Some options are defined in federal law to include only specific age groups such as persons under 21 or over 65.) The state, for example, cannot as a general rule limit eligibility for optional service to only those persons receiving aid under a particular program such as Old Age Assistance. If a state chooses an optional service, it must be covered for all groups (except as noted in federal law or regulation) or federal reimbursement will be jeopardized.

(2) *Requiring Prior Authorization*

States can control inappropriate overutilization of optional services by requiring the client to receive approval from the Medicaid agency prior to obtaining certain medical care. Preauthorization is usually based on medical need for services and appropriateness of the care requested to the condition being treated. The Division of Public Assistance has, since the beginning of Medicaid, required preauthorization of all nursing home placements. This mechanism serves to reduce unnecessary placements, place clients at appropriate levels of care, and suggest alternative, and usually cheaper, methods of treatment.

(3) *Limiting Usage Frequency*

Optional services can also be limited by restricting client use. This is generally done by limiting the number of treatments or services paid by Medicaid in a specific time period. For example, Maryland limits adults to one eye examination and one pair of eyeglasses every two years. Arkansas limits Medicaid clients to three prescriptions per month. These restrictions must be applied though uniformly to all clients receiving assistance. Limitations of the amount of services should take into account unusual emergency situations. States cannot impose barriers to needed minimum levels of health care, or risk federal sanction.

(4) *Requiring Clients to Share in Cost of Services*

Some states require Medicaid clients to participate in sharing the costs of certain optional services. Federal regulation sets certain maximum allowable limits on the amount of payment that clients can be required to cover. Those regulations also specify the mechanisms that states can use to allow clients to share in the cost of certain services. Fees are generally limited to small amounts such as $.50 per prescription drug and $2.00 per pair of eyeglasses. Originally, this procedure was instituted to control overutilization of services and not to generate funds. California, along with some other states which elected this option, has found that the cost of administration of this mechanism generally did not offset the revenues gained. The charges did not significantly affect client use of services, and the states found that the collecting and controlling of such small fees were bothersome to both client and provider.

(5) *Limiting the Amount of Provider Reimbursement*

Costs of optional services can also be reduced by limiting the amount of provider reimbursement. Often this comes in the form of reducing reimbursement by a set percentage or by "freezing" payment levels at the current standards. (Medicaid pays "reasonable" rates to its providers. The costs allowable under its definitions often differ greatly from those accepted by Blue Cross and other insurance companies. Fees paid under Medicaid are often lower than fees paid by the general public for the same services.) The state of Michigan, for example, recently implemented an 11% reduction in normal fees paid to practitioners, dentists, laboratories, and other providers. Often such changes receive strong provider reaction and sometimes jeopardize the continued participation of those providers in the program. Federal officials also note the potential use of low bid health providers. For example, the state could solicit bids for a contract to supply Medicaid clients with specific services, such as eyeglasses. The state could select the most advantageous bid and award the contract without jeopardizing federal reimbursement.

OTHER ISSUES TO CONSIDER IN EVALUATING MEDICAID OPTIONAL SERVICES

Although this study focuses primarily on client need, there are other factors that must be considered in evaluating the merits of any given Medicaid option. Three of these major considerations are: availability of funds, costs versus benefits of options, and ease of administration.

The availability of funds plays a major role in the scope of services that a state believes it can provide for its citizens. The high cost of medical care demands an in-depth analysis of cost before any new service is added. Although this study does not discuss this financial issue, it is a major part of any decision to modify the program. Legislators who have a well defined proposal for additional option(s) may request the Research Division of the Legislative Affairs Agency to prepare an analysis of its costs, both direct and administrative.

The costs versus benefits of an option can be an important consideration in deciding whether or not the state should participate in it. For example, certain Medicaid options sometimes "save" state money, if that service is currently paid entirely from state funds or if it allows a client to receive less specialized and less expensive type of service that are more appropriate to this medical condition or problem. In 1976, the Alaska State Legislature added coverage of new limited group of needy eligibles who currently reside in nursing homes. The care for those persons at that time was paid for 100% from state general funds through the General Relief-Medical program. By adding that option, the state was able to claim 50% federal reimbursement for their care. Also, in 1973, the state added the intermediate nursing home care option. By covering this lower and less expensive level of nursing home care, many Medicaid recipients in skilled nursing, who did not require that level of treatment, could be placed in intermediate nursing care. The cost per day for each patient was reduced considerably.

The ease of administration is important also in evaluating the merits of certain options. The drug option, for example, requires that strict payment procedures regarding maximum allowable charges be in place. These are spelled out in some detail in the federal regulations, and the state must meet those requirements or risk loss of federal participation. Federal officials note that many of these cost containment mechanisms would normally be in place in any efficiently administered pharmaceuticals program, regardless of source of funding for it. The transfer of a program from state-only funding to federal assistance should cause minimal additional administrative expenses if adequate cost containment measures are in place in the existing program.

IV. MEDICAID CLIENT NEEDS

QUESTIONNAIRE OF PUBLIC ASSISTANCE SUPERVISORS

In Fall, 1976, a questionnaire was prepared to poll public assistance supervisors (eligibility work supervisors) on their estimation of client need for certain services based on their actual experience in the field. The questionnaire, prior to mailing, was reviewed by both the Division of Public Assistance and Department of Health and Social Services Commissioner's Office. The questionnaires were mailed to nineteen supervisors, many of whom had worked with public assistance clients for a significant period of time. (That sample of supervisors was chosen under the guidance of the Division of Public Assistance's Chief of Field Operations.) Approximately one month after mailing, a follow-up questionnaire was sent.

Fourteen, or 75%, of the supervisors polled responded to the questionnaire. All areas of the State were represented, including Anchorage, Fairbanks, Fort Yukon, Juneau, Kenai, Ketchikan, Nome, and Sitka. Each supervisor was asked specific questions concerning his or her evaluations of client need for Medicaid options not yet selected by the State.

QUESTION #1: In your experience, what optional services currently not covered under Medicaid do you feel your Medicaid eligible clients need most?

Table 2 shows the rank order obtained from the supervisor's responses to question #1. Interestingly, the top four items for each category (Adult Public Assistance and Aid to Families with Dependent Children program recipients) were the same. The ranking for dentures option differed slightly, being seen more necessary for older persons receiving Adult Public Assistance than the younger Aid to Families with Dependent Children recipients.

Since the Medicaid program requires that services included in the State Plan be offered equally to all eligible persons (except for certain specialized programs such as early childhood screening) the similar ranking of need options for both Adult Public Assistance and Aid to Families with Dependent Children Program is particularly meaningful. If it were called upon to evaluate new options, the legislature could be reasonably sure that any of the top four options (prescribed drugs, adult dental services, dentures, and physical therapy and related services) would be "needed" by both categories of clients.

QUESTION #2: On the average, how many Medicaid clients a month ask you if they can receive certain services?

Table 3 shows the responses by the supervisors concerning the requests of Medicaid eligibles for additional services. The responses to question #2 did not match the pattern formed from the supervisor's responses

TABLE 2

Average Ranking of Selected Medicaid Options by Type of Public Assistance Client

Rank	Recipients of Adult Public Assistance	Recipients of Aid to Families with Dependent Children
1st	Prescribed Drugs	Prescribed Drugs
2nd	Adult Dental Services	Adult Dental Services
3rd	Dentures	Physical Therapy and Related Services
4th	Physical Therapy and Related Services	Dentures
5th	Hearing Aids [1]	Chiropractor's Services
6th	Prosthetic Devices	Hearing Aids [1]
7th	Chiropractor's Services	Prosthetic Devices
8th	Private Duty Nursing	Private Duty Nursing
9th	Podiatrist's Services	Podiatrist's Services
10th	Care for Patients 65 or Over in Tuberculosis Institutions	Care for Patients 65 or Over in Tuberculosis Institutions

[1] *Hearing aids, at the time the survey was conducted, were not included in the coverage program offered to all Medicaid clients. An interpretation of Medicaid law and regulation by federal officials allowed hearing aids to be covered as part of the treatment of speech, hearing, and language disorders option. This policy change was implemented by the Division of Public Assistance in November.*

to question #1. For example, the Medicaid prescribed drug option which was ranked as needed first for both program categories, received less than 50% of the requests made for adult dental services, which was ranked as needed second by the supervisors. This could be anticipated for Medicaid clients who do not have prior health resources equal or better in coverage to General Relief-Medical automatically receive their drugs through GRM. One Juneau public assistance supervisor noted that for these persons, eligibility for prescription drugs under GRM is automatically determined at the time that Medicaid eligibility is confirmed. Therefore, few Medicaid clients would ask for prescription drugs, since coverage is established at the time they enter the Medicaid program.

Aid to Families with Dependent Children recipients requested fewer services than did the Adult Public Assistance recipients. This was expected, for the recipients of AFDC tend to be young and thus often have less need for diverse health services. Also, many AFDC recipients are eligible for a wider range of treatment service through the Early Periodic, Diagnosis and Treatment Program (EPSDT), a child check-up program. For example, dental care is available to public assistance recipients under 21 as a referral through EPSDT, but currently persons over 21 who are mostly on Adult Public Assistance programs cannot routinely receive preventative dental care under any of the state medical assistance programs.

Many of the Medicaid options available under the federal program do not match with Alaska's availability of services. In rural Alaska, it would be difficult to obtain chiropractor's or podiatrist's services close to home. Also, the option of care for patients 65 or over in tuberculosis institutions is not really relevant to Alaska, since there are no tuberculosis sanatoriums in the State. Care for such conditions would have to be provided in nursing homes, hospitals, and physicians' offices, all of which are currently covered under Medicaid.

The low number of requests in all categories may be due to lack of client awareness that these additional services sometimes can be covered under the state funded medical assistance program, General Relief-Medical. Because of limited funds under that program, the Division of Public Assistance has not actively conducted an outreach program to inform clients of eligibility requirements and services covered. Also, many clients may be reluctant to ask for services, which they feel they stand a likelihood of being rejected. Dentures are a good example of this. Because of funding limitations, dentures can only be covered in extreme hardship situations. Clients often are informed of this policy from their dentists, public health nurses, or social workers, before a formal request is made to the Division of Public Assistance.

SURVEY OF "DENIALS" OF SERVICE RECORDS

The needs of clients were also analyzed through a survey of all denials of requests for additional services for Medicaid clients. Medicaid clients sometimes require services that are not included in the Medicaid

TABLE 3

Total Average Number of Medicaid-Eligibles Requesting Optional Services Monthly by Program Category

Option	Recipients of Adult Public Assistance	Recipients of Aid to Families with Dependent Children	Total
Adult Dental Services	81.5	88.0	169.5
Dentures	60.5	21.0	81.5
Prescribed Drugs	38.0	39.0	77.0
Physical Therapy and Related Services	20.5	23.0	43.5
Hearing Aids [1]	27.0	16.0	43.0
Prosthetic Devices	25.5	12.0	37.5
Chiropractor's Services	15.5	15.0	30.5
Private Duty Nursing	13.5	5.5	19.0
Podiatrist's Services	4.0	1.5	5.5
Care for Patients 65 or Over in Tuberculosis Institutions	1.0	0.0	1.0
Total	287.0	221.0	508.0

[1] *Hearing aids, at the time of the survey, were not included in the coverage program offered to all Medicaid clients. An interpretation by federal officials of the treatment of speech, hearing, and language disorders options allowed hearing aids to be covered as part of a treament plan. This policy change was implemented in November.*

TABLE 4

Denials of Optional Services for Medicaid-Eligibles
(September 1, 1972 to July 31, 1976) [1]

1.	Dental Services	140 [2]
2.	Therapy	63
3.	Dentures	44 [2]
4.	Prosthetic Devices	37
5.	Prescription Drugs	28
6.	Hearing Aids	15 [3]
7.	Chiropractor's Services	3
8.	Podiatrist's Services	2
9.	Private Duty Nursing	1
10.	Tuberculosis Institution for 65 or Over	0

[1] *The figure includes only denials of requests submitted in writing to the Division of Public Assistance, Central Office. That Division also handles numbers of informal telephone requests, which are not included in these figures.*

[2] *The figure excludes Delta Dental Corporation denials. Delta Dental Corporation currently reviews and evaluates all public assistance clients requests for care. These records were not readily available in Juneau for the study period. In FY76, Delta Dental denied 454 Medicaid adults for dental services and 20 Medicaid adults for dentures.*

[3] *Hearing aids were added to the Medicaid program as of November, 1976. An interpretation by federal officials of the treatment of speech, hearing, and language disorders option added last session allowed hearing aids to be covered as part of the treatment plan.*

program. If the client has no other prior health care resource equal or better in coverage to that of General Relief-Medical (GRM) Program, that client may be able to receive those services through GRM. Since GRM is funded entirely by state general funds, monies are strictly controlled and extremely limited. In order to insure the equitable use of the funds, many services require pre-authorization by the Central Office of the Division of Public Assistance before they can be provided and paid for by the General Relief-Medical Program.

Requests for service can come in two forms: letters and phone calls. The Division of Public Assistance maintains files of only written requests for service. During the month of July, 1976, a tabulation of those records was performed. Table 4 shows the number of denials of optional services which were requested by Medicaid clients during the period September 1, 1972 to July 31, 1976.

Note that the top four options that eligibility work supervisors felt their clients needed appeared within the top five items requested for those clients. Thus, the public assistance supervisors confirm the client perceived need for dental services, therapy, dentures, and prescription drugs. The survey also revealed a client perceived need for prosthetic devices (such as artificial limbs, crutches, canes, etc.).

These tabulations of requests for service represent only written requests. Because of the "emergency" nature of some services and the ease of telephoning for approval, many denials of services are not represented in the written files. Also, many clients will not request a service which they know is unavailable or which they stand a likelihood of being denied. Clearly, then, these figures substantially under-represent client need.

RESULTS OF STUDY

1. Basically State of Alaska eligibility work supervisors feel that their Medicaid-eligible clients most need:

1. Prescription Drugs
2. Adult Dental Services
3. Dentures*
4. Physical Therapy and Related Services*

* *The rank order of these services varies by program which client is receiving aid. The adult public assistance clients are seen to need dentures much more frequently than do clients of Aid to Families with Dependent Children.*

2. The top four services that eligibility work supervisors feel that their Medicaid-eligible clients ask for most frequently are:

1. Adult Dental Services
2. Dentures
3. Prescription Drugs
4. Physical Therapy and Related Services

3. Records of "denials" of requests for services to be provided from the General Relief-Medical Program to Medicaid recipients indicate that the following services are requested and denied most frequently:

1. Dental Services
2. Therapy
3. Dentures
4. Prosthetic Devices

4. The records for the number of client requests generally underestimate client need because only written records are available and because many public assistance clients will not request a service which they know is unavailable or which they stand a likelihood of being denied.

PART V. ANALYSIS OF OTHER STATES' EXPERIENCE WITH SELECTED OPTIONS

OVERVIEW OF STATES PARTICIPATING IN SELECTED OPTIONS

The survey of denials of requests for services and tabulation of the responses to the questionnaire sent to the public assistance supervisors point to four service options which clients are perceived as needing most. These are: prescription drugs, adult dental services, dentures, and physical therapy and related services.

These optional services have been elected by many other states. For example--

- 96% of all states and United States protectorates have Prescription Drug Option *
- 64% of all states and United States protectorates have Dental Services Option *
- 60% of all states and United States protectorates have Physical Therapy and Related Services Option *

**Only states participating in Medicaid program are included in total figures. Data are as of June 1, 1976 and were obtained from United States Department of Health, Education and Welfare. (Data are unavailable on the number of states offering denture service to their eligibles.)*

Many states added these services in the mid-1960's when Medicaid first began. However, it was found that some states eliminated or restricted some of these options during the period January 1, 1975 to July 1, 1976. With the skyrocketing cost of medical care and the increasing demand upon state dollars, we decided to review the options that were selected as needed by public assistance supervisors and contact those states that had recently modified them.

QUESTIONNAIRE OF STATES MODIFYING SERVICES

In early December, the Research Division of the Legislative Affairs Agency prepared a questionnaire to ask the views of state Medicaid program administrators regarding the options they had recently restricted. Fourteen states that had recently modified optional services included in this survey were contacted. Eleven states (or 79%) responded to the questionnaire. Since existing federal reports do not pinpoint the number of states modifying their denture coverage, that option was not included in the discussion.

State Experience With Prescription Drug Option

Of the 51 states providing prescription drugs, 11 states (or 22%) reduced their coverage during the period of January 1, 1975 - July 1, 1976. Seven of those states responded to the questionnaire. The majority of those states reduced coverage of drugs in order to reduce expenditure of state dollars. They noted that it created a hardship, but most clients felt coverage of only certain drugs was better than no coverage at all of them. Basically, controls were maintained by limiting the number of monthly prescriptions any one client could obtain and by limiting the types of drugs covered.

It is interesting to note that one state, Oklahoma, added the drug option during this period. In responding to the questionnaire, the director of the Oklahoma program stated that the option was added at the direction of their legislature. Certain administrative restrictions were imposed when the option was added. Prescriptions were limited to three per client per month and the different categories of drugs were also restricted. The director noted that public reaction to the addition of services has been generally favorable.

State Experience With Dental Services Option

13% of the states which chose the dental services option eliminated it during the period January 1, 1975 to July 1, 1976. (Recently two states, Massachusetts and New Jersey, have reinstated coverage of this option). Five of the seven states eliminating this option responded to the survey.

Generally, these five states found that the adult dental services option was needed by clients and was easy to administer. Restrictions on the option were basically due to lack of state funds. In one instance, New Hampshire, the legislature set a priority list of services that were to be provided. Since adult dental services received a low priority and funds were limited, the option was dropped. The dropping of the option generated considerable negative client reaction, as evidenced primarily by an increased number of client administrative appeals on this issue.

State Experience With Physical Therapy and Related Services Option

Michigan was the only one of 32 states which included physical therapy and related services in their programs and chose to modify that option during the period January 1, 1975 to July 1, 1976. The Michigan Medicaid program responded to the questionnaire and noted its experience with the option. The respondent found that the option was needed by clients; however, the cut, an elimination of physical therapy in long term care institutions, was made in response to lack of sufficient funding. To date, this change in the program has not been rescinded.

RESULTS

1. At least 60% of all states participating in the Medicaid program also cover some form of prescription drugs, dental services, and physical therapy and related services options for their clients. These services were among the top four requested by Alaska public assistance clients and seen as needed most for them according to a survey of Alaska public assistance supervisors. (Nationwide data on the numbers of states covering dentures in their programs are not available.)

2. Two of the top four services seen as needed for public assistance clients, prescription drugs and dental services, were also the top two services restricted or eliminated by other states during the period January 1, 1975 - July 1, 1976. (See Part IV for survey results.)

3. Most states modified the options to reduce expenditure of state funds. They did not drop or restrict them because of lack of client need or complexities in administration.

4. Restrictions of service options were generally done in four ways: limiting coverage of service, limiting client access, reducing provider fee payments, and charging clients small fees.

5. Reduction of fees generally brought strong reaction by the provider sector.

6. The states believe that limiting coverage to certain number of services allowable per month and restricting coverage of type of service allowable under the option was generally more acceptable than totally eliminating it.

7. In most cases, states modifying these options chose to restrict prescription drug coverage but they chose to eliminate dental services (except as was required under the early screening program).

8. In some cases states reinstated changes in options a short time after they were made. This was generally due to the strong reaction received from the groups affected.

PART VI. CONCLUSIONS TO THE STUDY

From the responses to the questionnaire sent to public assistance supervisors concerning client need, the survey of denial records of requests for additional services, and the responses from other states regarding their experience with the program, the following conclusions can be drawn:

1. Of Medicaid optional services available that Alaska does not currently provide under its program, public assistance clients appear to need most(in descending order of need).

   (1) Prescription Drugs
   (2) Dental Services
   (3) Dentures*
   (4) Physical Therapy and Related Services*

   * *The rank order of these services varies by program under which client is receiving aid. The adult public assistance clients are seen to need dentures as a higher priority than do clients of Aid to Families with Dependent Children.*

2. hree of the optional services listed in Item #1 are included by over 60% of the states participating in Medicaid. Prescription drugs, for example, are included in 95% of all state programs. (Data on coverage of dentures are generally unavailable on nationwide basis.)

3. Two of the options that clients "need" most--prescription drugs and dental services--topped the list of options that states reduced or eliminated during the period January 1, 1975 - July 1, 1976. These modifications were done as cost containment measures and not as a response to lack of client need or to complexities of administering the options.

4. Alaska could be reasonably assured that services listed in Item #1 would be needed and used by clients. The choice to include them appears to be a decision based primarily on the state's availability of state funds. The state could choose to cover an option, but restrict that option in many ways to meet funding limitations.

GLOSSARY OF TERMS

AB - See Aid to the Blind.

AD - See Aid to Disabled.

ADC - See Aid to Families with Dependent Children.

AFDC - See Aid to Families with Dependent Children.

APA - See Adult Public Assistance.

APD - See Aid to Disabled. Stands for Aid to Permanently Disabled.

Adult Public Assistance - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education, and Welfare. Designed to provide a state-legislated level of cash assistance to aged, blind, and disabled persons who meet certain income and resource requirements, and who are predominately eligible for Supplemental Security Income (SSI) payments. State administrative costs as well as actual cost payments are 100% state only costs.

Aid to the Blind - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education, and Welfare. Designed to provide a state legislated level of cash assistance to those eligible blind persons who meet certain income and resource requirements, and who are predominately eligible for SSI payments. It is considered an "Adult Public Assistance" program.

Aid to Disabled - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education and Welfare. Designed to provide a state legislated level of cash assistance to those eligible disabled persons who meet certain income and resource requirements and who are predominately eligible for SSI payments. It is considered an "Adult Public Assistance" program.

Aid to Families with Dependent Children - A federal program administered by the state through an approved state plan filed with the U.S. Department of Health, Education, and Welfare. Designed to provide a state-legislated level of cash assistance to dependent children who have been deprived of one or both parents, and who meet certain income and resource requirements. Both administration costs and the actual cash payments provided to recipients are shared equally (50%) by the state and federal government.

Categorical Assistance - Aid, in form of income maintenance, to certain needy persons who receive assistance under Old Age Assistance, Aid to the Blind, Aid to the Disabled, Supplemental Security Income, and Aid to Families of Dependent Children programs.

Compliance - In a federal program, the act of performing certain set program functions in accordance with those requirements outlined in the state plan, federal law, and regulation. Generally, meeting all federal program requirements is necessary to receive federal financial participation in the program.

DHSS - See Department of Health and Social Services.

Department of Health and Social Services - A department of the executive branch designated to be single state agency to administer the Medicaid program for the state of Alaska.

EPSDT - See Early and Periodic Screening, Diagnosis and Treatment.

Early and Periodic Screening, Diagnosis and Treatment - A mandatory service under Medicaid which provides for special check-ups at set intervals for certain needy children, in order to find and treat health problems before they become serious. Coverage includes only those Medicaid eligibles under 21 years of age.

Eligible - A person qualified to receive assistance funded under particular program. Eligibility criteria can vary, so that eligibility must be established on program by program basis.

FFP - See Federal Financial Participation.

Federal Financial Participation - The means by which the federal government asssists in supporting certain specific program. The federal government generally provides aid by two methods: 1) matching dollars by set percentage or 2) formula money grants.

GRM - See General Relief-Medical.

General Relief-Medical - A state emergency medical program designed to respond to immediate medical needs of Alaskan families in time of extreme financial crisis. All assistance rendered under this program is in the form of vendor payments to medical providers. State administrative costs as well as actual cash payments to vendors are 100% state only costs.

Intermediate Nursing Care - An optional service available to be provided under Medicaid program. Denotes a less intensive and less expensive level of around-the-clock nursing care, in comparison to skilled nursing.

Mandatory Coverage - A portion of the Medicaid program that is required to be covered by each and every state in the program, in order for the state to be entitled to federal financial participation. Mandatory coverage items concern persons eligible to receive services and the services provided to those persons. States can still administratively "control" mandatory services and not jeopardize federal financial participation by controlling the amount of service available to client, amount of financial participation (deductible required to be paid by client) in order for the client to receive such services, and other mechanisms.

Medicaid - A federal assistance program established by Title XIX of the Social Security Act and administered by the state through an approved state plan filed with U.S. Department of Health, Education, and Welfare. Designed to provide medical coverage for recipients of Aid to Families With Dependent Children; Supplemental Security Income, elderly and blind recipients of Adult Public Assistance and those disabled persons who meet federal definitions of disability; and certain other groups. State administrative costs are shared equally (50%) by the state and federal governments, except for professional medical support personnel who are funded at 75% federal reimbursement. Actual medical vendor payments are shared equally (50%) by the state and federal government, except for family planning which is funded at 90% federal reimbursement.

Medically Needy - An optional group of eligibles for whom federal reimbursement for necessary medical care may be covered under the Medicaid program. Generally includes individuals who have insufficient income and resources to meet the costs of necessary medical or remedial care and services. Presently Alaska does not include the medically needy under its Medicaid program.

Medicare - An insurance program administered solely by the federal government to provide payments for necessary medical care for those people, rich or poor, who receive Social Security payments.

OAA - See Old Age Assistance.

Old Age Assistance - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education, and Welfare. Designed to provide a state legislated level of cash assistance to those eligible persons 65 and over who meet certain income and resource requirements and who are predominately eligible for Supplemental Security Income payments. It is considered an "Adult Public Assistance" program.

Option - A portion of the Medicaid program that is discretionary on the part of the state. Options generally deal with persons eligible for coverage or medical services available for those eligible persons. Options are set out in federal law and regulations and are generally eligible for federal financial participation. Since the choice of options is up to each state, options can generally be designed to fit the state's unique needs and available resources, but each option chosen must meet certain broad federal program requirements.

Public Assistance - A division of Department of Health and Social Services, responsible for administration of the Medicaid, General Relief-Medical, and Income Maintenance programs. This division determines the eligibility of state's residents for such services by carefully reviewing the person's income, resources, and other factors according to state and federal standards.

Quality Control - An office of the Department of Health and Social Services which is assigned the responsibility to verify that

randomly selected cases are eligible to receive services in month that service was rendered. The verification consists of check of files, client contact, and collateral sources.

Recipient - A person receiving income maintenance or assistance services funded under a particular program.

SSA - See Social Security Administration.

SSI - See Supplemental Security Income.

Skilled Nursing Care - A mandatory service required to be provided under the Medicaid program. Denotes highly professional round-the-clock nursing care and monitoring. Generally more expensive and more specialized care than intermediate care.

Social Security Administration - An agency of the federal Department of Health, Education and Welfare assigned the responsibility to administer Social Security, Medicare, and Supplemental Security Income programs.

State Plan - A contract between the single state agency to administer the Medicaid program and the federal Department of Health, Education and Welfare, specifying conditions to be met in order to be eligible for federal financial participation.

Supplemental Security Income - An assistance program funded and administered by federal government which provides payments to certain needy persons who are aged, blind, or disabled and meet program and financial requirements. Payments are uniform nationwide and are based on need.

Title XIX - A portion of the federal Social Security Act which outlines the Medicaid program.

Title XVIII - A portion of federal Social Security Act which outlines the Medicare program.

Utilization Review - Random records check of sample institutional Medicaid billing to insure that services rendered match with those billed to the program. Verifies that institutional records are complete, accurate, and up-to-date. Examines for overuse or misuse of treatment and professional resources and the patient's duration of stay relating to those resources.

SUMMARY OF SERVICES UNDER THE ALASKA MEDICAID PROGRAM 10

MEDICAID OPTIONAL SERVICES. 13

MEDICAID - A LOOK TO THE FUTURE 17

ABSTRACT OF MEDICAID FY 1977
STATUS REPORT

Medical Assistance Budget FY 1977 (not including supplemental appropriations):

Medicaid	$16,908,500
General Relief-Medical	2,542,100
Total	$19,450,600

Medical Assistance disbursements for FY 1977 (through February 28, 1978):

Medicaid	$18,608,568
General Relief-Medical	3,743,128
Total	$22,351,696 1/

Medicaid	50% federal funding for services and administration
	75% federal funding for professional staff (medical)
	90% federal funding for family planning services
GR Med	100% state funding
Catastrophic Illness	100% state funding

Savings to the State of Alaska through participation in Medicaid (vendor payments only):

Federal financial participation	$ 9,450,261
State financial participation	9,158,307
Total Medicaid payments	$18,608,568

Total number of persons receiving Medicaid services FY 1977: 11,815 2/
Total number of persons receiving GR Med services FY 1977: 2,631

Who is eligible for Medicaid? Persons eligible for cash assistance payments under any categorical assistance program: Old Age Assistance, Aid to the Blind, Aid to the Disabled meeting federal disability criteria, Aid to Families with Dependent Children. Additional eligibility criteria exist for persons in nursing facilities and children in foster care or juvenile care situations.

Who is eligible for GR Med? Persons having no prior Medical resources and who meet financial eligibility (need) requirements for the assistance programs listed above but do not meet other qualifications for Medicaid coverage (not blind or disabled under federal definition, under 65, both parents in the home are physically able to work).

1/ - Not included in these statistics were approximately $500,000 worth of FY 1977 invoices which had not yet been paid as of 2/28/78, pending decision on the FY 1978 supplemental appropriation request.

2/ - Statistics based on federal report during the federal fiscal year October 1, 1976 to September 30, 1977.

ALASKA MEDICAID PROGRAM

Medicaid Objectives

Medicaid is based on three basic premises:

(1) That medical services are available to needy eligible persons when ill or injured;

(2) That the highest quality care is provided;

(3) That care is provided at the lowest possible cost to the taxpayers through existing health care providers.

Development of the Program

Medicaid is a state-administered medical assistance program funded by both federal and state sources. The program was implemented in Alaska on September 1, 1972. Since that time Medicaid expenditures have grown tremendously as a result of population growth, inflation, increased availability of services, rising cost of services, and increased utilization of federal revenues for programs that were previously (funded by state revenues alone).

FISCAL YEAR	MEDICAID EXPENDITURES	GR MED EXPENDITURES	ADMINISTRATION AND SUPPORT
1973	$ 4,447,219	$ 3,675,277	$ 481,890
1974	7,876,759	2,607,112	631,129
1975	9,309,702	2,358,080	722,778
1976	14,328,201	2,881,213	1,085,086
1977	18,608,568	3,743,128	1,253,002
1978 1/	25,915,719	6,213,100	1,346,800
1979 2/	38,811,695	6,769,100	1,423,950

1/ Projected expenditures

2/ Total of budget request including supplemental requests--includes $6,422,300 for Indian Health Care Improvement Act billings by ANHS; this is 100% federal funds.

Medical Care Advisory Committee

The Medical Care Advisory Committee is composed of health care providers, consumers (including Medicaid recipients), and government agency representatives. The committee is mandated by federal Medicaid regulations and deals with issues concerning Medicaid services, performs studies and makes recommendations for action by the Division of Public Assistance or legislature. The purpose of the committee is to provide oversight for implementation of the Medicaid program as well as provide an opportunity for input by both the provider and consumer communities.

Members of the Medical Care Advisory Committee are:

ALASKA'S MEDICAL CARE

ADVISORY COMITTEE

Charles Rush, Chairman	Anchorage	Pharmacist
Ann Maioriello Vice Chairman	Anchorage	Coordinator Home Health Care
Jimmy Anaver	Kipnuk	Consumer
Gloria Barclay	Juneau	Consumer
Sam Granato	Juneau	Director, Division of Social Services
Rose Davis	Fairbanks	Consumer
Robert Gregovich, MD	Juneau	Program Administrator Developmental Disabilities
J. Ray Langdon, MD	Anchorage	Physician
Sister Kathy McGinty, MD	Ketchikan	Catholic Community Services
Mildred Pelch, RN	Ketchikan	Nursing Home Administrator
Mary Wolcoff	Anchorage	Consumer

Health Care Providers

Health care providers in Alaska must be enrolled with the Division of Public Assistance to be eligible to bill the Division's Medical Assistance programs. Enrollment requires that the provider: (1) be licensed or eligible to provide a service covered under the Division's medical assistance programs; (2) have on file with the Division a signed and approved Division provider agreement form; (3) abide by the regulations and policies governing the Division's medical assistance programs; and (4) comply with TitIe VI of the Civil Rights Act of 1964.

Medical providers are required to keep records and furnish billing information when requested by state or federal officials for services provided to the Division's medical assistance recipients.

Provider Reimbursement

The Division sets maximum allowable fees for services provided outside of hospitals and nursing facilities. Maximum allowable fees must not exceed Medicare payment for the same service in Alaska. Providers are required to bill the Division for the lesser of: (1) their usual and customary charge to the public, or (2) the Division's maximum allowable fee (or Medicare upper limit, whichever is applicable).

For hospitals (both acute care and psychiatric), skilled nursing and intermediate care facilities and intermediate care for the mentally retarded, payment is based on reasonable cost reimbursement for services rendered. Interim payments are made and, after the close of a facility's fiscal year, settlement is made between the Division and a facility based on the cost report filed by a facility. In order for reasonable cost reimbursement to be effective the following aspects of the Division's Medicaid program must be functioning at maximum efficiency:

(1) Division policy must be organized and kept current to give adequate notice to providers;

(2) Utilization review of medical services--both by statistical survey and on-site review;

(3) Thorough audit of the financial reports and operations of each hospital and nursing facility.

Number of Medical Providers in Alaska

Hospitals	27
Nursing Facilities	14
Physicians	368
Dentists	135
Optometrists	24
Speech, hearing and language therapists	13
Home Health Agencies	1
Laboratories	5
Ambulance services	8
Opticians	12
Community Mental Health Clinics	10
Physical Therapists	16 1/
Pharmacies	68 1/
Others	35 1/

General Relief Medical Program

General Relief Medical (GRM) provides state-only coverage for two distinct classes of recipients: (1) those persons eligible for Medicaid who require services not included under the Alaska Medicaid program: and (2) those financially needy persons not eligible for Medicaid coverage who require medical care.

Under the first group, GRM only provides coverage for those medical services and supplies not covered under Medicaid (such as prescription drugs, prosthetic devices, and medical equipment). For the second group, GRM provides state-only funding for coverage under all Medicaid service categories as well as certain medical services and supplies not covered by Medicaid (drugs, prosthetic devices and medical equipment).

Catastrophic Illness

This program was created by the 1976 legislature to provide post-care financial assistance to Alaskans with large medical bills who did not meet the financial eligibility criteria for Medicaid or GRM at the time the person received the medical care. The Catastrophic Illness Committee is composed of a medical officer of the Department of Health and Social Services, a member of the insurance community appointed by the Governor and a lay member who has previously suffered a catastrophic illness.

SUMMARY OF SERVICES COVERED UNDER THE ALASKA MEDICAID PROGRAM

Medicaid is a federal-state program administered by the states. As a condition of participation states must provide coverage for a minimum number of services prescribed by federal law. Beyond this minimum, each state has the opportunity to add or delete other "optional services" described in federal regulations.

The advantages of Medicaid optional services are: (1) they allow compensation for services provided by tax-paying providers who may be suffering a loss on services currently provided to low-income customers, and (2) they allow states currently providing services using state-only funds to tap federal money as partial funding for programs funded soley by the state.

The following mandatory and optional services are covered under the Medicaid program in Alaska:

Mandatory Services

(1) Inpatient Hospital services. Public or private facilities, not including hospitals for mental diseases or tuberculosis; services must be physician-ordered; non-emergency out-of-state hospitalization must be prior authorized by the Division.

(2) Outpatient Hospital services. Emergency medical services; on-going ambulatory care; public or private facilities.

(3) Laboratory and X-ray services. Independent facility or one connected with a physician; services must be physician-ordered.

(4) Skilled nursing facility care (SNF). High level nursing and/or rehabilitative care; alternative to extended hospital care; must be prior authorized by the Division.

(5) Physician services. Inpatient and outpatient services performed by private physicians; cosmetic surgery must be prior authorized by the Division.

(6) Home Health Services. Provides an alternative to nursing home care by covering services to clients at home rather than in a nursing facility. Covered services under this category include nursing; medical supplies and equipment; physical, occupational and speech/hearing therapy when provided by a licensed home health agency.

(7) Family planning services and supplies. These services receive 90% federal financial participation; covers hospital and surgical procedures as well as contraceptive devices.

(8) Transportation. To or from a facility or provider of medical services; locally handled by Divisional offices except where cost is in excess of $250.00 or travel is out-of-state, in which case it must be prior authorized by the Division's Medical Practice Review Officer.

(9) Early Periodic Screening, Diagnosis and Treatment (EPSDT). Currently limited by the Department to federal minimum requirements for covered services; provides screening for all Medicaid-eligibles under 21 years of age; optional at client's choice; as a result of screening, referral is made to physician, audiologist, optometrist, dentist or therapist for further treatment; covered services include all mandatory services plus services for eyeglasses, hearing aids, treatment for visual and hearing defects, and dental services.

Optional Services

(1) Intermediate Care Facilities (ICF). Lower level nursing home care; alternative to skilled nursing and/or hospitalization; requires prior authorization by the Division.

(2) Intermediate Care for the mentally retarded or persons with related disabilities (ICF/MR). Lower level nursing home care for persons with mental retardation or developmental disabilities; requires prior authorization.

(3) Inpatient psychiatric hospital services. Acute care for persons suffering from psychological trauma or impairment; limited to persons under 21 years of age or over 65 years of age; prior authorization is required.

(4) Eyeglasses. Must be prescription glasses; new, repaired or replacement; no photogrey tints; cataract contact lenses must be prior authorized by the Division.

(5) Optometrists. Coverage is provided for both eye care and dispensing.

(6) Clinic services. Currently limited by state statute to state-operated and state-funded outpatient community mental health clinics enrolled for Medicaid; must be supervised by a physician.

(7) Services for speech, language and hearing disorders. Services rendered by speech pathologists or audiologists; requires prior authorization by the Division; must be ordered by a physician.

MEDICAID OPTIONAL SERVICES--INCLUDING THOSE NOT CURRENTLY COVERED BY THE ALASKA MEDICAID PROGRAM

The following is a list of all optional services under the Medicaid program. Optional services may be selected by the individual states for inclusion in their Medicaid program if a state decides to make those services available to all categories eligible for the basic Medicaid coverage. A brief description of each option is provided below followed by a comparison of optional services that are offered in Alaska, Idaho, Oregon and Washington, the four states comprising federal Region X. Those services covered in Alaska are indicated.

(1) Podiatrist services. Manipulation of the feet and treatment of corns, bunions, callouses, etc., by a licensed podiatrist.

(2) Optometric services. Covered under Alaska Medicaid.

(3) Chiropractic services. Treatment by a licensed chiropractor limited to manual manipulation of the spine.

(4) Other practitioner services. Naturopaths, homeopaths, herbalists, faith healers.

(5) Private duty nursing. Care by a registered nurse or licensed practical nurse under a physician's supervision in home, hospital or nursing facility when a person requires exceptional individual and continuous care.

(6) Clinic services. Under the Alaska Medicaid program this is currently limited to state-operated and state-funded community mental health clinics. This option could also include such other services as health care clinics, alcoholism treatment centers, ambulatory surgical centers, and rural health care clinics. Rural health clinics are now a mandatory service pursuant to Public Law 95-210.

(7) Physical therapy. Physician-prescribed services provided by a licensed or certified physical therapist (depending upon state licensing procedures).

(8) Occupational therapy. Physician-prescribed services provided by a licensed or certified occupational therapist (depending upon state licensing procedures).

(9) Services for speech, hearing, and language disorders. Included under the Alaska Medicaid program.

(10) Prescribed drugs. Covered by state-only General Relief Medical. Alaska is one of only two states without Medicaid coverage for this option.

(11) Dentures. Replacement of a full or partial set of teeth.

(12) Prosthetic devices. Physician-prescribed replacement, corrective or supportive devices that artificially replace a missing part of the body, to prevent deformity or malfunction, to support a weak or deformed portion of the body.

(13) Eyeglasses. Covered by Alaska Medicaid.

(14) Other diagnostic, screening, preventive and rehabilitative services. Identification of illness, injury or other health deviation; preventive and rehabilitative services to restore patient to functional level.

(15) Services to individuals over 65 years of age in institutions for tuberculosis. Facility providing services could be ICF, SNF or inpatient hospital.

(16) Services to individuals over 65 years of age in institutions for mental diseases. (a) Inpatient psychiatric care for persons over 65 is covered under the Alaska Medicaid program. (b) ICF and SNF care for persons over 65 with mental diseases is not covered in Alaska. Under this provision, it would be possible to provide nursing care for persons with mental disabilities who may not otherwise qualify for nursing care due to a lack of physical health problems requiring nursing home care.

(17) Intermediate care facilities (ICF). Covered under the Alaska Medicaid program.

(18) Inpatient psychiatric services for persons under 22 years of age. Covered by the Alaska Medicaid program.

(19) Transportation. Covered under the Alaska Medicaid program.

(20) Services by Christian Science nurses.

(21) Services by Christian Science Sanatoria.

(22) Skilled nursing facility care (SNF) for persons under 21 years of age. Covered by the Alaska Medicaid program.

(23) Emergency hospital services. Covered under the Alaska Medicaid program.

(24) Dental services. Adult dental services are not covered by Medicaid in Alaska.

(25) Personal care services. Physician-ordered services provided to a person in their home by a non-relative and supervised by a registered nurse.

(26) Intermediate care for the mentally retarded and persons with related conditions (ICF/MR). Covered under the Medicaid program in Alaska.

MEDICAID

A LOOK TO THE FUTURE

The federal government through the Department of Health, Education and Welfare (DHEW) continues to put greater emphasis on cost containment and accountability in the operation of the Medicaid program nationwide. This places added burdens on state-administered Medicaid programs to provide swift and accurate information to DHEW--while providing information about the program and prompt payment to medical providers.

In Alaska, the Division of Public Assistance is attempting to upgrade the overall operation of the Medicaid program in an effort to control costs as well as provide more adequate notice to providers about their rights and responsibilities under the program.

Several tools are necessary to accomplish that end--state administrative regulations, staff operational manual, provider manuals, schedules of maximum allowable fees, and a more efficient mechanized claims payment and data reporting system.

Program Tools

After five and one-half years of Medicaid participation, state administrative regulations are in the drafting stage with hearings tentatively scheduled for the summer of 1978. Federal statutes and federal regulations provide only a broad sketch of the Medicaid program. The Department of Health, Education, and Welfare assumes that states develop the details of the Medicaid program through state administrative regulations and agency policy. Without state regulations it is impossible to begin a program of effective cost containment to insure that improper and excessive utilization does not occur.

Federal law mandates that states have systems for investigation and prosecution of fraud and abuse by Medicaid providers. Without notice to providers through state administrative regulations and provider manuals, it is impossible for the state to control provider fraud and abuse. Broad state statutes and federal laws and regulations lack the detail necessary to insure that providers have specific notice of program requirements and limitations. Additionally, states must have a mechanism that allows providers to appeal decisions on invoices where payment is denied.

Provider manuals offer an organized structure within which notice is given to providers of recurrent changes in the program. Frequent updating of both regulations and manuals help assure that the state and provider are in compliance with federal requirements as well as guarantee that the state receives the maximum allowable federal matching funds afforded to Alaska.

Federal Accountability

Greater emphasis is being placed on state accountability to the federal government. States no longer have the luxury of running their Medicaid programs on an open account. Fraud and abuse control are being emphasized, and overall state management is being scrutinized. During the summer or fall of 1978, DHEW staff will be reviewing the entire Alaska Medicaid program as part of a nationwide management assessment program. Information from this review will be helpful in assessing the deficiencies and operational needs of the Division of Public Assistance, as well as providing DHEW information upon which it can base specific program improvement requests.

Federal budgeting is being revised to require more accurate quarterly expenditure and estimating reports. Revision is being made in part because DHEW is shifting its budgeting from one-year to three-year projection cycles, which places a greater burden on states to arrive at more accurate cost and utilization projections. The Division of Public Assistance must develop more accurate data to fulfill this budgeting requirement; with the present computer system, it will be extremely difficult to insure compliance in Alaska.

Increasing Efficiency in Claims Processing

A new federal statute that will have great impact on the Division's current operation requires that 90% of all "clean claims" (those invoices which require no correction or additional information from providers prior to payment) must be paid within 30 days of receipt. Given the present manual claims payment system, it will be virtually impossible to comply with this requirement.

In an attempt to speed up the claims processing system, the Division is seeking to shift to a schedule of maximum allowable fees for physician services rather than continuing with the present fee profile system. The basic difference between the two is that with maximum allowable fees, an upper limit is established for all providers for a particular medical or surgical procedure. The state pays the lesser of a provider's usual and customary billing or the maximum allowable fee.

With the current fee profile system, the amount paid varies from provider to provider--even within the same city or clinic! Also, with the fee profile system, providers submit invoices with the amount they normally charge for a service. This is then "adjudicated"--that is, reduced--if the charge exceeds the maximum fee for that procedure as established on the physician's fee profile.

A schedule of maximum allowable fees will guarantee: (1) that all physicians receive equal pay for equal work; (2) that they will receive a fair wage for their work; (3) that their invoices will be paid in a more timely manner; and, (4) that they will have notice at the time they perform the medical or surgical procedure of the amount they can expect to be paid.

Fraud and Abuse

More intensive fraud and abuse controls have been mandated by Public Law 95-142. Post-payment utilization review of medical services has been a requirement for several years. The Division is currently computerizing claims payment information and statistical analysis of that information. This computerized system is necessary in order to comply with the reporting and investigative requirements mandated by this new fraud and abuse legislation.

Medicaid Management Information System (MMIS)

Federal law provides for 90% federal funding for development and 75% funding for operation of MMIS. The funding level for a non-MMIS claims payment and information system is only 50%. Alaska has not yet taken advantage of this offer of funding by HEW. All new federal requirements for budgeting, reporting, claims payment, and fraud and abuse are geared to an MMIS operation. Without such a system, or at least the reporting and statistical analysis portion of that system (surveillance/utilization review), the State of Alaska faces several crises in the Medicaid system which could well result in withholding of federal matching money.

It may be possible for the Division to interface with an MMIS operation in another state, and the Division is currently preparing proposals to make this interface possible. This might be the least expensive means of securing an MMIS program. Another alternative would be the purchase of a surveillance/utilization review system to accompany the present claims payment system. If this latter alternative were used, it would allow the state to comply with reporting and budgeting requirements as well as providing statistical information needed for fraud and abuse control.

Indian Health Care Improvement

Public Law 94-437 (the Indian Health Care Improvement Act) provides for reimbursement of services rendered to Medicaid eligible persons by Indian Health Service (IHS) hospitals by allowing the facilities to bill Medicaid. There will be no impact on the State's portion of Medicaid program costs as all money paid to IHS providers will be 100% federal funds. However, there will be an impact on state administration costs as states must pay their percentage of the cost of processing these additional invoices (in Alaska, without MMIS, this is 50% of cost).

In Alaska, IHS has not yet begun to bill the Division for services provided to Medicaid eligible Natives. Start-up has been postponed as IHS is still in the process of establishing billing mechanisms for each of their facilities in Alaska. Several facilities are now ready to begin billing and full implementation of IHS participation may be achieved by July 1978.

Rural Health Clinics

Public Law 95-210 provides for Medicaid and Medicare reimbursement to rural health clinics.

Under P.L. 95-210, states will be required to provide Medicaid coverage for services provided to eligible recipients by a rural health clinic once a clinic has been certified for participation in the federally-administered Medicare program. In Alaska, this certification is performed by the Division of Public Health Office of Certification and Licensing.

Clinics are staffed by nurse practitioners and physicians assistants trained to provide services traditionally performed by physicians. Although there is need for physician supervision, it may be indirect supervision.

The earliest that Medicaid can cover rural health clinic services is July 1, 1978. In order for this required coverage to be implemented in Alaska it will be necessary for AS 47.07.030 to be amended to include rural health clinics. Also, implementing regulations will be needed to allow provision of medical services by physician assistants and nurse practitioners.

Child Health Assessment Program (CHAP)

A bill is presently in Congress (HR 6706 and SB 1392), which, if enacted, would expand eligibility under the Early Periodic Screening, Diagnosis and Treatment (EPSDT) program to include a larger number of children through modification of eligibility criteria. Medicaid coverage would be extended to children whose families meet some definition of low income but do not qualify for cash assistance payment as currently required for eligibility under the Medicaid program. Under the CHAP proposal, federal financial participation would be increased to 75% federal funding.

This amendment would greatly expand the EPSDT program beyond its current level of operation in Alaska, though the full impact of the proposal cannot be accurately projected until a decision is made on what age limit will be imposed on the low income children to be added to the program.

The amendment points out the necessity for the Division of Public Assistance to identify more accurately all services provided under the existing EPSDT program. The present billing system does not identify all services provided to children as a result of EPSDT screenings. With passage of the CHAP amendment, states will need to be able to identify all CHAP claims in order to receive the 75% federal matching funds. Changes must be made to allow a child to be "tracked" from the time of screening through completion of services performed by licensed providers for medical problems identified by the screening. This is not being done in Alaska currently.

Summary

The Carter administration's emphasis in medical care is gradually moving toward some form of national health insurance program. It appears that before Congress will take any step in that direction it must be proven that the existing Medicaid/Medicare system will operate efficiently. Rising cost of service, over-utilization, improper utilization and provider fraud and abuse must be controlled.

In order for the State of Alaska to fulfill its role within the nationwide framework of health care, and for the Medicaid program in particular, the following broad goals have been set out for our program.

(1) Assessment of services covered or potentially covered under Medicaid and General Relief Medical (including the Medicaid "medically needy" option and the state catastrophic illness program);

(2) Streamlining the claims payment system;

(3) Updating and expanding computer capability to provide for federal and state requirements in reporting and utilization review;

(4) Improvement of procedures to give more accurate notice of the existing program and changes as they occur (regulations, provider manuals, staff manual);

(5) Simplification of structure within the Department of Health and Social Services to allow for more independent operation of the Medicaid program by the Division of Public Assistance;

(6) Adequate staffing of the Division to allow for control of the medical programs within the framework of good management practice.

TESTIMONY PREPARED
for
HOUSE OF REPRESENTATIVES
COMMITTEE ON HEALTH EDUCATION & SOCIAL SERVICES
ALASKA STATE LEGISLATURE

March 31, 1980

I apologize publicly to him for this breach of protocol

It is indeed a pleasure for me to appear before you today to discuss legislation which I believe will promote the health of residents of your great state and this great country. I am very pleased that a state legislature is seriously considering enactment of a bill which will guarantee citizens' access to third party payment for health care. It is also very comforting for Minnesotans who have championed this sort of legislation to know that Minnesota is not out of step in fighting for this enlightened program.

I have come a long way to be with you today. It is an awesome responsibility to represent the State of Minnesota, our Governor, Al Quie, and our Insurance Commissioner, Michael D. Markman. I also feel I represent the hundreds of people who toiled for many months before and after the enactment of our law. We had great cooperation from our local insurance people and although the insurance industry continues to be assaulted from many quarters, this is one area in which some of the industry can be justifiably proud.

What success our law has had in promoting access to comprehensive health care to Minnesotans lies in the willingness of the State and the insurance people within that state to join forces to effect the goal of the legislation. Although I could not bring the experts who have made our program work smoothly with me, I did bring some of their work product which I shall leave with you with the hope that it will ease the implementation of the bill upon enactment.

My role here today as I see it is to share with you the experiences and knowledge gained in four years of working with our legislation which is similar to your proposed legislation. The provisions which are similar or nearly identical will of course, lend themselves to a recitation of historical fact. Those that ar unique to your bill will require a forecast.

To All Parties Interested in Health Care Coverage:

Hearings for legislation dealing with various health care issues are scheduled for March 31, April 1 and April 2 before the House Health, Education and Social Services Committee.

We are interested in your comments on this important piece of legislation which is presently in draft form. Therefore, we felt that it was necessary to prepare the following summary of the issues contained in the legislation to aid in the preparation of your testimony.

We expect that the legislation will be introduced in the House on March 25 or 26. The bill will be available at Legislative Information Offices throughout the state on the following day.

On March 31 and April 2, the Committee will be hearing testimony in Room 112 of the Capitol at 1:30 pm. On April 1 we will be holding teleconference hearings from Anchorage and Fairbanks from 7:00 - 9:00 pm Juneau time (5:00 - 7:00 pm Anchorage and Fairbanks time) and from all other sites from 1:30 - 3:00 pm Juneau time.

We regret that the bill is not available in its final form at this date. However, we would like to stress that all of the information necessary to formulate comments/testimony is included in the attached summary. Thank you for your cooperation.

Sincerely,

Thelma

SUMMARY OF HEALTH CARE LEGISLATION

The first section of the bill requires employers to provide health coverage for their regular employees and to pay at least 50% of the premium cost of such coverage. The health coverage must meet or exceed the standards for a "number two qualified plan" as established in the second section of the bill, and must cover the employee's dependents as well. The employer may choose the type of health plan (insurance, self insurance, medical service contract, etc.) and the carrier, provided that employers with 100 or more employees offer each employee a choice of an insurance type plan or a health maintenance organization contract, where a health maintenance organization exists. The employee's share of the premium is automatically withheld from his or her paycheck and may not exceed the amount the employee would have paid if the employer had chosen the most prevalent type of health care plan in the state. The employer is obligated to continue paying his or her share of the premium even if the employee is sick and unable to work, for up to three months or the period for which the employer must continue to pay wages, which ever is larger. Any employee who works for at least twenty hours per week on the average, and has been employed for at least four consecutive weeks, is to be covered. If the employee has health coverage from another source, such as another employer, a government program, or coverage as a dependent under someone else's health plan, the employer is not liable for health coverage for that employee. The bill specifically provides that employees retain the freedom to bargain collectively for health benefits which may differ from those provided under this legislation.

A small employer who can demonstrate undue financial hardship resulting from the mandatory health coverage is entitled to premium supplementation from the state. To qualify (1) the employer must employ fewer than eight employees, (2) the premium for which the employer is liable must exceed 1.5 percent of the total payroll, and (3) the amount that the employer's cost exceeds 1.5 percent of the payroll must exceed five percent of the employer's income from that business, before taxes. A qualifying employer is entitled to subsidy in the amount that his or her costs exceed these standards.

Employers who cover their Alaska employees in a group plan in which the majority of the covered employees are out-of-state and not covered by the act, are given, in section eight of the bill, an additional year to bring the coverage of their Alaska employees up to the standards mandated in the act.

The law mandating employer sponsored coverage would terminate when it is superseded by federal health insurance legislation.

Section two of the bill establishes state standards for "qualified" health insurance plans, and requires insurance carriers to offer qualified plans to all eligible applicants. The bill does not prohibit the offering or sale of unqualified plans. Qualified plans must include benefits for the following: hospital services, professional services rendered by a physician or at his or her direction, prescription drugs, nursing home services, home health agency services, radium, oxygen, anesthetics, prostheses, medical equipment, x-rays and laboratory tests, oral surgery , physical therapy services, medically necessary transportation, well baby care, routine physical exams, multiphasic screening, and other diagnostic testing. The plan must cover at least 80% of the usual and customary charges for covered services, must limit out-of-pocket expenses at least to $3,000 per person annually, and may provide a limit on maximum lifetime benefit of not less than $250,000. A number three qualified plan may have an annual deductible not exceeding $150 per person or $450 per family. A number two qualified plan may have an annaul deductible not exceeding $500 per person or $1500 per family. A number three qualified plan may have an annual deductible not exceeding $1,000 per person or $3000 per family. A qualified Medicare supplement plan must provide coverage of at least 50% of the Medicare deductible and co-payment, provide at least 80% coverage of the services required in a qualified plan which are not covered by Medicare, limit out-of-pocket expenses to no more than $1,000 per person per year, and provide for a maximum lifetime benefit of not less than $100,000. The director has authority to upgrade minimum benefit standards by regulation.

The act also offers health insurance coverage to high risk "uninsurable" clients under the state plan. The state plan provides number one, number two, and Medicare supplement qualified plans at premium rates which may not exceeed 125% of the average premium for a normal risk individual. To qualify, a person must present evidence that they have been refused coverage which is available to a person of standard risk by at least two carriers. The person is not covered for a preexisting condition during the first six months of coverage under the state plan if the person was diagnosed or treated for that condition during the 90 days preceeding the filing of an application.

All health insurance carriers in the state are required to participate in a joint underwriting association to pool the risk of the state plan, to publicize the state plan, and to reinsure other coverage mandated by the act. Losses incurred by the association due to the state plan are to be covered through assessments on association members proportional to their volume of health insurance business in the state. Assessments on members may in turn offset the income tax or premium tax payable by that member to the state. Thus the state is ultimately liable for the losses incurred by the operation of the state plan. The association selects one carrier to act as its agent in writing and issuing each type of state plan insurance for a period of at least three years, and reimburses the carrier or carriers for their expenses.

The act requires that all group health insurance policies written in the state include the right to convert to an individual coverage qualified plan without the addition of underwriting restrictions, regardless of the reason for leaving the group. It also requires that individual policies include a provision that covered dependents may continue coverage following the death of the primary insured, under that or a different contract, without additional underwriting restrictions.

The remaining sections of the bill amend the state's medical assistance programs. The bill provides that the Department of Health and Social Services will purchase health care services for its clients through health insurance policies or through health care service contracts which provide some or all of the services covered by state medical assistance programs.

The bill authorizes the Department to pay a cash advance to providers who serve a large volume of state medical assistance clients. It also requires the state to pay interest on unpaid bills which have been presented by providers which satisfy program requirements for payment. If payment of the bill is delayed more than thirty days from the date it becomes payable, interest is charged at the rate of one percent per month. If payment of the bill is delayed more than six months from the date it becomes payable, interest is charged at the rate of two percent per month.

The bill expands Medicaid coverage to include prescription drugs, adult dental care, dentures, physical therapy, prosthetic devices, chiropractors' services, private duty nursing, podiatrists' services, and other optional services under the federal Medicaid program. Eligibility for Aid to Families with Dependent Children and Medicaid is expanded to cover unborn children.

The bill establishes a medically needy program under the state General Relief program. The monthly income threshold for eligibility is set at 150 percent of the poverty guidelines for Alaska, and includes a spend down provision such that a person who is over income qualifies when the amount of their excess income has been spent on medical bills.

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the health of residents of the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18 is amended by adding a new chapter to read:

CHAPTER 12. PREPAID HEALTH CARE.

Sec. 18.12.010. COVERAGE OF REGULAR EMPLOYEES BY GROUP PREPAID HEALTH CARE PLAN. (a) An employer who pays to a regular employee monthly wages amounting to 86.67 times the minimum hourly wage established in AS 23.10.065 shall provide coverage for the employee with a prepaid group health care plan or combination of plans which have been certified under AS 21.50.040 as a number two qualified plan including coverage for dependents with a prepaid health care plan contractor in accordance with this chapter.

(b) If the plan of health coverage does not meet the requirements of AS 21.50.040 for a number two qualified plan, the employer shall make available a supplemental plan of health benefits which, when combined with the existing plan of health benefits, constitutes a number two coverage plan.

Sec. 18.12.020. CHOICE OF PLAN TYPE AND OF CONTRACTOR. (a) An employer required to provide coverage for his employees by a prepaid group health care plan under this chapter shall determine whether coverage is provided by

(1) a plan which obligates the prepaid health care plan contractor to furnish the required health care benefits;

(2) a plan which obligates the prepaid health care plan contractor to defray or reimburse the expenses of health care; or

(3) ~~a plan which complies~~ plans under both (1) and (2) in compliance with AS 18.12.030(a).

(b) The election made under (a) of this section is binding for one year.

(c) Whether the employer elects a plan type described in (a)(1) or (2) of this section, the employer may elect the particular contractor but the employee is not obligated to contribute a greater amount to the premium than he would have to contribute had the employer elected coverage with the contractor providing the prevailing coverage of the respective type in the state.

(d) The employer shall provide coverage with the prepaid health care plan contractor selected under (c) of this section for all his employees in the state electing the type of coverage who are covered by the provisions of this chapter, except for employees covered by the health care provisions of an applicable collective bargaining agreement and except as provided in AS 18.12.110.

Sec. 18.12.030. DUAL OPTION. (a) An employer who employs 100 or more persons in the state on the average during a calendar quarter other than employees engaged in seasonal employment, shall, upon the next renewal of the health benefits plan contract, offer his employees an option to obtain health benefits through either an accident and health insurance policy or a health maintenance organization contract if one is available. An option need not be provided if fewer than 25 employees select that option.

(b) An employer may make the offers through an insurer, a health maintenance organization or on a self-insured basis. If an offer is made on a self-insured basis, the accident and health insurance type of coverage or health maintenance organization type of coverage shall meet

the requirements of the laws of the state as to the services covered or benefits provided but is not required to be approved by the director.

(c) An insurer may not make acceptance of its offer to provide insurance coverage contingent on acceptance by the employer of health maintenance organization coverage by a particular health maintenance organization. A health maintenance organization may not make acceptance of its offer to provide health maintenance organization coverage contingent on acceptance by the employer of insurance coverage by a particular insurer. An offer to provide the accident and health insurance policy and the health maintenance organization contract may not combine the two offers in a single price package.

Sec. 18.12.040. LIABILITY FOR PAYMENT OF PREMIUM AND FOR WITHHOLDING. (a) Unless an applicable collective bargaining agreement provides otherwise, an employer shall contribute at least one-half of the premium for the coverage required by this chapter and the employee shall contribute the balance. The employee may not be required to contribute more than 1.5 percent of his wages. If the amount of the employee's contribution is less than one-half of the premium, the employer is liable for the remaining portion of the premium.

(b) The employer shall withhold the employee's share from his wages.

Sec. 18.12.050. COMMENCEMENT OF COVERAGE. The employer shall provide the coverage required by this chapter for any regular employee who has been in his employ for four consecutive weeks at the earliest time after the fourth week at which coverage may be provided with the prepaid health care plan contractor selected in accordance this chapter.

Sec. 18.12.060. CONTINUATION OF COVERAGE. If an employee is prevented by sickness from working, the employer shall enable the employee to continue his coverage by contributing to the premium the amount paid

by the employer toward the premium before the employee's sickness for the period that the employee is prevented by sickness from working. The obligation established by this section may not exceed a period of three months following the month during which the employee became disabled from working or the period for which the employer has paid regular wages to the employee, whichever is longer.

Sec. 18.12.070. LIABILITY OF SECONDARY EMPLOYER. An employer who has been notified by an employee on a form prescribed by the commissioner that he is not the principal employer is relieved from the duty to provide coverage required by this chapter until he is notified by the employee under /S 18.12.090 that he has become the principal employer. A secondary employer shall notify the commissioner on a form prescribed by the commissioner that he is relieved from the duty of providing coverage and of any change in that status.

Sec. 18.12.080. EXEMPTION OF CERTAIN EMPLOYEES. (a) In addition to the exemption granted by AS 18.12.070, an employer is relieved of his obligations under AS 18.12.010 to an employee who has notified him on a form specified by the commissioner that the employee is

(1) protected by health insurance or a prepaid health care plan established under a law of the United States;

(2) covered as a dependent under a prepaid health care plan, entitling him to the health benefits required by this chapter;

(3) a recipient of public assistance or covered by a prepaid health care plan established under the laws of the state governing medical assistance.

(b) An employer receiving notice of a claim of exemption under this section shall notify the commissioner of the claim on a form prescribed by the commissioner.

Sec. 18.12.090. TERMINATION OF EXEMPTION. (a) If an exemption

claimed by an employee under AS 18.12.080 terminates the employee shall notify the principal employer promptly of the termination of the exemption and the employer shall provide coverage as required by this chapter.

(b) If a principal employer becomes a secondary employer or a secondary employer becomes the principal employer because of a change in the employment situation of an employee or a redetermination by an employee under AS 18.12.100, the employee shall promptly notify the employers affected of the change and the new principal employer shall provide coverage required by this chapter.

Sec. 18.12.100. PRINCIPAL AND SECONDARY EMPLOYERS. (a) If an individual is concurrently a regular employee of two or more employers, the principal employer is the employer who pays him the most wages. If the employer who does not pay the most wages employs the regular employee for at least 35 hours per week, the employee shall determine which of the employers is his principal employer and his other employers are secondary employers. An employer designated as the principal employer remains the principal employer for one year or until change of employment, whichever occurs first.

(b) If an individual is concurrently a regular employee of a public entity which is not an employer under this chapter and of an employer under this chapter, the latter is a secondary employer.

(c) An employer who directly or indirectly interferes with or coerces or attempts to coerce an employee in making a determination under this section is guilty of a class B misdemeanor.

Sec. 18.12.110. FREEDOM OF COLLECTIVE BARGAINING. (a) This chapter may not be construed to limit the freedom of employees to bargain collectively for different prepaid health care plan coverage or for a different allocation of the costs of the coverage. A collective

bargaining agreement may provide that the employer will provide the health care specified in an agreement.

(b) If certain employees are not covered by the health care provisions of an applicable collective bargaining agreement to which their employer is a party, this chapter applies to them. An employer or group of employers has complied with this chapter if the employer or group of employers undertakes to provide health care services under a collective bargaining agreement and the services are available to all employees not covered by the agreement.

Sec. 18.12.120. INDIVIDUAL WAIVERS PROHIBITED. An employee as an individual may not waive the required health care benefits or agree to pay a greater share of the premium for the benefits than is required by this chapter.

Sec. 18.12.130. JOINT PROVISION OF COVERAGE. For the purpose of providing prepaid health care protection under this chapter for their employees, employers may form associations with the contractors authorized to provide coverage in the state.

Sec. 18.12.140. POWERS OF THE COMMISSIONER. The commissioner may adopt regulations necessary for the administration and enforcement of this chapter.

Sec. 18.12.150. PENALTIES. (a) An employer who fails to comply with AS 18.12.010 - 18.12.040 shall pay a penalty of not less than $25 or of $1 for each employee for every day during which the failure continues, whichever is greater. The penalty shall be assessed under regulations adopted by the commissioner under the Administrative Procedure Act (AS 44.62) and shall be collected by the commissioner and paid into the general fund. The commissioner may, for good cause shown, remit all or a part of the penalty.

(b) An employer, employee, or prepaid health care plan contractor

who wilfully fails to comply with this chapter or a regulation adopted under it may be fined not more than $200 for each violation.

Sec. 18.12.160. ENTITLEMENT TO PREMIUM SUPPLEMENTATION. (a) An employer who employs less than eight employees entitled to coverage under this chapter and who provides coverage to the employees under AS 18.12.010 is entitled to premium supplementation if the employer's share of the cost of providing the coverage as determined under AS 18.12.040 and 18.12.060 exceeds 1.5 percent of the total wages payable to the employees and if the amount of the excess is greater than five percent of the employer's income before taxes directly attributable to the business in which the employees are employed.

(b) The amount of the supplementation shall be that part of the employer's share of the premium cost which exceeds the limits specified in (a) of this section.

Sec. 18.12.170. CLAIM OF PREMIUM SUPPLEMENTATION. An employer entitled to premium supplementation may file a claim in the manner provided by regulation of the commissioner. The employer has the burden of establishing his entitlement.

Sec. 18.12.180. EXISTING PLANS. This chapter may not be construed to interfere with or diminish protection already provided under collective bargaining agreements or employer-sponsored plans more favorable to the employees benefited by them than the protection provided by this chapter.

Sec. 18.12.190. TERMINATION OF CHAPTER. This chapter terminates on the effective date of federal legislation that provides for voluntary prepaid health care for the people of this state in a manner at least as favorable as the health care provided by this chapter or upon the effective date of federal legislation that provides for mandatory prepaid health care for the people of this state.

Sec. 18.12.~~1~~2~~5~~50. DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of labor;

(2) "employer"

(A) means an individual or any type of organization, including a partnership, association, trust, estate, joint stock company, insurance company, or corporation, whether domestic or foreign, a debtor in possession or receiver or trustee in bankruptcy, or the legal representative of a deceased person, who has one or more regular employees in his employment

(B) does not mean

(i) the state, a municipality of the state or an instrumentality of the state or its municipalities;

(ii) the United States government or an instrumentality of the United States;

(iii) another state or municipality or instrumentality of another state or municipality;

(iv) a foreign government or instrumentality wholly owned by a foreign government, if the service performed in its employ is of a character similar to that performed in foreign countries by employees of the United States government or of an instrumentality of the United States, and the United States Secretary of State certifies to the United States Secretary of the Treasury that the foreign government, with respect to whose instrumentality exemption is claimed, grants an equivalent exemption for similar service performed in the foreign country by employees of the United States government and instrumentalities of the United States;

(3) "employment"

(A) means service, including service in interstate

commerce, performed for wages under a contract of hire, written or oral, expressed or implied, with an employer, either inside or both inside and outside the state if:

(i) the service is localized in the state; or

(ii) the service is not localized in any state but some of the service is performed in the state and the individual's base of operation, or, if there is no base operation, the place from which the service is directed or controlled, is in the state; or the individual's base of operation or place from which the service is directed or controlled is not in any state in which some part of the service is performed but the individual's residence is in the state;

(B) does not mean service

(i) performed by an individual in the employ of an employer who, under the laws of the United States, is responsible for care and cost in connection with the service;

(ii) performed by an individual in the employ of his spouse, son, or daughter, and service performed by an individual under the age of 21 in the employ of his father or mother;

(iii) performed in the employ of a voluntary employee's beneficiary association providing for the payment of life, sickness, accident, or other benefits to the members of the association or their dependents or their designated beneficiaries, if admission to membership in the association is limited to individuals who are officers or employees of the United States government, and no part of the net earnings of the association inures (other than through such payments) to the benefit of a private shareholder or individual;

(iv) performed by an individual for an employer as an insurance agent or as an insurance solicitor, if all the service performed by the individual for the employer is performed for remuneration solely by way of commission;

(v) performed by an individual for an employer as a real estate salesman or as a real estate broker, if all the service performed by the individual for the employer is performed for remuneration solely by way of commission;

(4) "income directly attributable to the business"

(A) means gross profits from the business less deductions for

(i) compensation of officers;

(ii) salaries and wages, except wages paid by an individual proprietor to himself;

(iii) repairs;

(iv) taxes on business and business property;

(v) business advertising;

(vi) amounts contributed to employee benefit plans;

(vii) interest on business indebtedness;

(viii) rent on business property; and

(ix) other expenses necessary for the current conduct of business;

(B) does not mean

(i) bad debts;

(ii) contributions or gifts, other than those listed under (A)(vi) of this paragraph;

(iii) amortization and depreciation; or

(iv) losses by fire, storm, casualty, or theft;

(5) "premium" means an amount payable to a prepaid health

care plan contractor as consideration for his obligations under a prepaid health care plan;

(6) "prepaid health care plan" means an agreement by which a prepaid health care plan contractor undertakes in consideration of a stipulated premium

(A) to furnish health care, including hospitalization, surgical, medical or nursing care, drugs or other restorative appliances, subject to, if at all, only a nominal per service charge; or

(B) to defray or reimburse, in whole or in part, the expenses of health care;

(7) "prepaid health care plan contractor" means

(A) a medical group or organization which undertakes under a prepaid health care plan to provide health care;

(B) a nonprofit organization which undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care; or

(C) an insurer who undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care;

(8) "regular employee" means a person employed in the employment of any employer for at least 20 hours per week;

(9) "wages"

(A) means cash remuneration for services from whatever source, including commissions, bonuses, and tips and gratuities paid directly to an individual by a customer of the employer; if the employee does not account to his employer for the tips and gratuities received and is engaged in an occupation in which he customarily and regularly receives more than $200 a month in tips,

the combined amount received by him from his employer and from tips is considered to be at least equal to the wage required by AS 23.-10.065 or a greater sum as determined by regulation of the commissioner;

(B) does not mean the amount of a payment

(i) specified in AS 23.20.530(b);

(ii) received for nonoccupational sickness or accident; or

(iii) received as workers' compensation.

* Sec. 2. AS 21 is amended by adding a new chapter to read:

CHAPTER 50. COMPREHENSIVE HEALTH INSURANCE.

Sec. 21.50.010. DUTIES OF INSURERS. (a) For each type of qualified plan described in AS 21.50.030, an insurer or fraternal issuing individual policies of accident and health insurance in the state other than group conversion policies shall develop and file with the director an individual policy which meets the minimum standards of that type of qualified plan. An insurer or fraternal issuing individual policies of accident and health insurance in the state shall offer each type of qualified plan to each person who applies and is eligible for accident and health insurance from that insurer or fraternal.

(b) An insurer or fraternal issuing Medicare supplement plans in the state shall develop and file with the director a Medicare supplement policy which meets the minimum standards of a qualified Medicare supplement plan. An insurer or fraternal issuing Medicare supplement plans in the state shall offer a qualified Medicare supplement plan to each person who is eligible for coverage and who applies for a Medicare supplement plan.

(c) For each type of qualified plan described in AS 21.50.040, an insurer or fraternal issuing group policies of accident and health

insurance in the state shall develop and file with the director a group policy which provides for each member of the group the minimum benefits required by that type of qualified plan. An insurer or fraternal issuing group policies of accident and health insurance in the state shall offer each type of qualified plan to each eligible applicant for group accident and health insurance.

(d) Each insurer and fraternal shall include coverage of major medical costs in every unqualified policy of accident and health insurance, unless the applicant for a new or renewal policy declines the coverage in writing. The coverage shall provide that when a covered individual incurs out-of-pocket expenses of $5,000 or more in a calendar year for services covered under AS 21.50.030(a), benefits shall be payable, subject to any copayment authorized by the director, up to a maximum lifetime limit of $250,000.

(e) A policy of accident and health insurance may not be issued or renewed in the state after January 1, 1981, by an insurer or a fraternal which has not complied with this section.

(f) An insurer or fraternal may fulfill its obligations under this section by issuing the required coverages in its own name and reinsuring the risk and administration of the coverages with the association in accordance with AS 21.50.030(g)(5) and (6).

(g) This section does not require an insurer or fraternal to offer or issue a policy to a person who does not meet the underwriting or membership requirements of the insurer or fraternal.

Sec. 21.50.020. CERTIFICATION OF QUALIFIED PLANS. On application by an insurer, fraternal, or employer for certification of a plan of health coverage as a qualified plan or a qualified Medicare supplement plan for the purposes of AS 21.50.010 - 21.50.130 the director shall determine within 90 days whether the plan is qualified. Each plan of

health coverage shall be labeled as "qualified" or "nonqualified" on the front of the policy or evidence of insurance. A qualified plan shall indicate whether it is a number one, two, or three coverage plan.

Sec. 21.50.030. MINIMUM BENEFITS OF QUALIFIED PLAN. (a) A plan of health coverage shall be certified as a number three qualified plan whether or not the policy is issued in the state if it meets or exceeds the following minimum standards:

(1) The minimum benefits for a covered individual shall, subject to the other provisions of this subsection, be equal to at least 80 percent of the cost of covered services in excess of an annual deductible which may not exceed $150 per person, or $450 per family. The coverage shall include a limitation of $3,000 per person on total annual out-of-pocket expenses for services covered under this subsection. The coverage may be subject to a maximum lifetime benefit of not less than $250,000. Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

(A) hospital services;

(B) professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction;

(C) drugs requiring a physician's prescription;

(D) services of a nursing home for not more than 120 days in a year if the services begin within 14 days following confinement of at least three days in a hospital for the same condition;

(E) service of a home health agency up to a maximum of 180 visits per year;

(F) use of radium or other radioactive materials;

(G) oxygen;

(H) anesthetics;

(I) prostheses;

(J) rental or purchase, as appropriate, of durable medical equipment;

(K) diagnostic x-rays and laboratory tests;

(L) oral surgery for partially or completely unerupted impacted teeth, a tooth root without the extraction of the entire tooth, or the gums and tissues of the mouth when not performed in connection with the extraction or repair of teeth;

(M) services of a physical therapist;

(N) medically necessary transportation.

(2) Covered expenses for the services and articles specified in this subsection do not include the following:

(A) a charge for care for an injury or disease either arising out of an injury in the course of employment and subject to a worker's compensation law or for which benefits are payable under another policy of accident and health insurance or Medicare;

(B) a charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect;

(C) a charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician;

(D) that part of a charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceeds the prevailing charge in the locality where the service is provided;

(E) a charge for services or articles the provision of which is not within the scope of authorized practice of the in-

stitution or individual rendering the services or articles.

(3) The minimum benefits for a qualified plan shall include, in addition to those benefits specified in (a)(1) of this section, benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations:

(A) well baby care;

(B) physicians' services for routine checkups and annual physicals when prescribed by a physician;

(C) multiphasic screening and other diagnostic testing.

(b) The director shall prescribe by regulation reasonable limits on the reimbursement required for the services specified in (a) of this section.

(c) A plan of health coverage shall be certified as a number two qualified plan if it meets the requirements established by the laws of the state and provides for payment of 80 percent of the covered expenses required by this section in excess of a deductible which does not exceed $500 per person. or $1500 per family

(d) A plan of health coverage shall be certified as a number one qualified plan if it meets the requirements established by the laws of the state and provides for payment of 80 percent of the covered expenses required by this section in excess of a deductible which does not exceed $1,000 per person. or $3000 per family

(e) A health maintenance organization which provides the services required by (a) of this section is providing a number three qualified plan.

Sec. 21.50.040. QUALIFIED MEDICARE SUPPLEMENT PLAN. A plan which provides benefits to persons over the age of 65 years may be certified as a qualified Medicare supplement plan if the plan is designed to supplement Medicare and provides coverage of 50 percent of the deduc-

tible and copayment required under Medicare and 80 percent of the charges for covered services described in AS 21.50.030(a) which charges are not paid by Medicare. The coverage shall include a limitation of $1,000 per person on total annual out-of-pocket expenses for the covered services. The coverage may be subject to a maximum lifetime benefit of not less than $100,000.

Sec. 21.50.050. STATE PLAN PREMIUM. (a) The association shall establish the following premiums to be charged for membership in the state plan:

(1) The premium for the number one qualified plan may not exceed 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in the state.

(2) The premium for the number two qualified plan may not exceed 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in the state.

(3) The premium for a qualified Medicare supplement plan may not exceed 125 percent of the average of rates charged by the five insurers with the largest number of individuals enrolled in a qualified Medicare supplement plan.

(4) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

(b) The schedule of premiums for coverage under the state plan shall be designed to be self-supporting and based on generally acce actuarial principles.

Sec. 21.50.060. DUTIES OF DIRECTOR. The director may

(1) formulate general policies to advance the purposes of AS 21.50.010 - 21.50.140 and may adopt regulations under the Admin

tive Procedure Act (AS 44.62) to carry out AS 21.50.010 - 21.50.140.;

(2) adopt regulations revising minimum benefit standards under AS 21.50.010 - 21.50.040 as may be appropriate due to inflation or changes in prevailing industry standards;

(3) supervise the establishment of a comprehensive health association within the limits described in AS 21.50.050;

(4) approve the selection of the writing carrier by the association and approve the association's contract with the writing carrier including the state plan coverage and premiums to be charged;

(5) appoint advisory committees;

(6) conduct periodic audits to assure the general accuracy of the financial data submitted by the writing carrier and the association;

(7) contract with the federal government or another unit of government to ensure coordination of the state plan with other governmental assistance programs;

(8) undertake directly or through contracts studies or demonstration programs to develop awareness of the benefits of AS 21.50.010 - 21.50.140, so that the residents of the state may avail themselves of the health care benefits provided by these sections.

Sec. 21.50.070. COMPREHENSIVE HEALTH ASSOCIATION. (a) There is established a comprehensive health association with membership consisting of all insurers, self-insurers, fraternals, and health maintenance organizations licensed or authorized to do business in this state.

(b) The board of directors of the association shall be made up of seven individuals selected by participating members, subject to approval by the director. To select the initial board of directors and to initially organize the association, the director shall give notice to all members of the time and place of the organizational meeting. In

determining voting rights at the organizational meeting, each member shall be entitled to vote in person or by proxy. The vote shall be a weighted vote based on the member's cost of self-insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of residents in the previous calendar year, as determined by the director. If the board of directors is not selected within 60 days after notice of the organizational meeting, the director may appoint the initial board. In approving or selecting members of the board, the director shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the money of the association for expenses incurred by them as members, but may not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

(c) Members shall maintain their membership in the association as a condition of doing business in the state. The association shall submit bylaws and operating rules to the director for approval.

(d) Meetings of the association, its board, and committees of the association shall comply with AS 44.62.310.

(e) Members shall enter into a contract with the association according to terms specified in AS 21.50.080. The contract of reinsurance shall be executed for a period of one year and may be renewed annually. A company which ceases to do business in the state remains liable under the contract for the reinsurance contracted for during that calendar year.

(f) In the performance of their duties as members of the association, the members are exempt from the provisions of AS 45.52.

(g) The association may

(1) exercise the powers granted to insurers under the laws of the state;

(2) sue or be sued;

(3) enter into contracts with insurers, similar associations in other states, or other persons for the performance of administrative functions including the functions provided for in (5) and (6) of this subsection;

(4) establish administrative and accounting procedures for the operation of the association;

(5) provide under (h) of this section for the reinsuring of risks incurred as a result of issuing the coverages required by AS 21.50.010 and 21.50.120 by members of the association;

(6) provide under (i) of this section for the administration by the association

of policies which are reinsured under (5) of this subsection.

(h) Each member which elects to reinsure its required risks under (g)(5) of this section shall determine the categories of coverage it elects to reinsure in the association. The categories of coverage are: (1) individual qualified plans, excluding group conversions; (2) group conversions; (3) group qualified plans with fewer than 50 employees or members; and (4) major medical coverage. A separate election may be made for each category of coverage. If a member elects to reinsure the risks of a category of coverage, it must reinsure the risk of the coverage of every life covered under every policy issued in that category. Members electing to administer the risks which are reinsured in the association shall comply with the benefit determination guidelines and accounting procedures established by the association. The fee charged by the association for the reinsurance of risks may not be less than 11 percent of the total anticipated expenses incurred by the association

for the reinsurance.

(i) Each member electing to reinsure one or more categories of coverage in the association under (g)(6) of this section may elect to have the association administer the categories of coverage on the member's behalf under (g)(6) of this section. If a member elects to have the association administer the categories of coverage, it must do so for every life covered under every policy issued in that category. The fee for the administration shall not be less than 110 percent of the total anticipated expenses incurred by the association for the administration.

see page 37 discussion

Sec. 21.50.080. OPERATION OF STATE PLAN. (a) Upon certification as an eligible person under AS 21.50.110, an eligible person may enroll in the state plan by payment of the state plan premium to the writing carrier.

(b) An employer which has in its employ one or more eligible persons enrolled in the state plan may make all or a portion of the state plan premium payment to the state plan directly to the writing carrier.

(c) Not less than 87-1/2 percent of the state plan premium paid to the writing carrier shall be used to pay claims and not more than 12.1/2 percent shall be used for the payment of agent referral fees authorized in AS 21.50.120(c) and for payment of the writing carrier's direct and indirect expenses, as specified in AS 21.50.100(g).

(d) Income in excess of the costs incurred by the association in providing reinsurance or administrative services shall be held at interest and used by the association to offset losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

(e) Each member of the association shall share the losses due to claims expenses of the state plan according to the terms of the individual reinsurance contracts executed by the association with each

member in accordance with AS 21.50.070(e). Deviations in the claim experience of the state plan from the premium payments allocated to the payment of benefits shall be the liability of the association members. Association members shall share in the excess costs of the state plan in an amount equal to the ratio of the member's total cost of self-insurance, accident and health insurance premium, subscriber contract charges, or health maintenance organization contract charges received from or on behalf of state residents as divided into the total cost of self-insurance, accident and health insurance premium, subscriber contract charges, and health maintenance organization contract charges, received by all association members from or on behalf of state residents, as determined by the director. The reinsurance contract shall provide for a retroactive determination of each member's liability and payment due within 30 days after each renewal date of the re-insurance contract. Failure by a member to tender to the association the assessed reinsurance payment within 30 days of notification by the association is grounds for termination of the member's membership. Net gains from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

(f) The assessed reinsurance payment levied against a member may be offset against the income tax or the premium tax payable under this title by the member payable under AS 43.20 for the year in which the payment is assessed. The commissioner of revenue shall report not later than the 10th day of a regular session to the legislature the total amount of income tax or premium tax offset claimed by members during the preceding calendar year.

Sec. 21.50.090. MINIMUM BENEFITS OF STATE PLAN. The association through its state plan shall offer policies which provide the benefits

of a number one qualified plan, a number two qualified plan, and a qualified Medicare supplement plan. It shall offer health maintenance organization contracts in those areas of the state where a health maintenance organization has agreed to make the coverage available and has been selected as a writing carrier.

Sec. 21.50.100. ADMINISTRATION OF PLAN. (a) A member of the association may submit to the director the policies of accident and health insurance or the health maintenance organization contracts which are being proposed to serve in the state plan. The time and manner of the submission shall be prescribed by regulation of the director.

(b) On the director's approval of the policy forms and contracts submitted under AS 21.50.070, the association shall select policies and contracts submitted by a member or members of the association to be the comprehensive health insurance plan. This selection shall be based on criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified Medicare supplement plan, and the health maintenance organization contract.

(c) The writing carrier shall perform all administrative and claims payment functions required by this section. The writing carrier shall provide these services for a period of three years, unless a request to terminate is approved by the director. The director shall approve or deny a request to terminate within 90 days of its receipt. The failure to approve or deny a request to terminate within 90 days of its receipt constitutes an approval. Six months before the expiration of each three-year period, the association shall invite submissions of policy forms from members of the association, including the writing

carrier. The association shall select a writing carrier for the following three-year period under (b) of this section.

(d) The writing carrier shall provide to all eligible persons enrolled in the plan an individual certificate which contains a clear and easily understandable statement as to the insurance protection to which he is entitled, with whom claims are to be filed, and to whom benefits are payable. The certificate shall indicate that coverage was obtained through the association.

(e) The writing carrier shall submit to the association and the commissioner on a monthly basis a report on the operation of the state plan. Specific information to be contained in this report shall be determined by the association before the effective date of the state plan.

(f) All claims shall be paid by the writing carrier under the provisions of AS 21.50.010 - 21.50.140 and shall indicate that the claim was paid by the state plan. Each claim payment shall include information specifying the procedure to be followed in the event of a dispute over the amount of payment.

(g) The writing carrier shall be reimbursed from the state plan premiums received for its direct and indirect expenses. Direct and indirect expenses include but are not limited to a pro-rata reimbursement for the portion of the writing carrier's administrative, printing, claims administration, management and building overhead expenses which are assignable to the maintenance and administration of the state plan. The association shall approve cost accounting methods to substantiate the writing carrier's cost reports consistent with generally accepted accounting principles. Direct and indirect expenses may not include costs directly related to the original submission of policy forms before selection as the writing carrier.

(h) The writing carrier is an agent of the association and the director with civil liability subject to the provisions of AS 09.50.250 09.50.300 when carrying out its duties under AS 21.50.010 - 21.50.140.

(i) Premiums received by the writing carrier for the state plan are exempt from the requirements of AS 21.50.130(c).

Sec. 21.50.110. ENROLLMENT BY ELIGIBLE PERSON. (a) The state plan is open for enrollment by eligible persons. An eligible person may enroll by submission of a certificate of eligibility to the writing carrier which provides:

(1) name, address, age, and length of time at residence of the applicant;

(2) name, address, and age of spouse and children, if any, if they are to be insured;

(3) evidence of rejection, or a requirement of restrictive riders, or a preexisting conditions limitation on a qualified plan by at least two association members within six months of the date of the certificate, the effect of which is to reduce coverage substantially from that received by a person considered a standard risk;

(4) a designation of the coverage desired.

(b) Within 30 days of receipt of the certificate described in (a) of this section, the writing carrier shall either reject the application for failing to comply with the requirements in (a) of this section or forward the eligible person a notice of acceptance and billing information. Insurance is effective immediately upon receipt of the first month's state plan premium and shall be retroactive to the date of application if the applicant otherwise complies with the requirements of AS 21.50.010 - 21.50.140. An eligible person may not purchase more than one policy from the state plan.

(c) A person who obtains coverage under this section is not

covered for a preexisting condition during the first six months of coverage under the state plan if the person was diagnosed or treated for that condition during the 90 days immediately preceding the filing of an application.

Sec. 21.50.120. SOLICITATION OF ELIGIBLE PERSONS. (a) The association shall disseminate appropriate information to the residents of the state under a plan approved by the director regarding the existence of the state plan and the means of enrollment.

(b) The association shall maintain public awareness of the provisions of AS 21.50.010 - 21.50.140 and shall administer this chapter in a manner which encourages public participation in the state plan.

(c) The writing carrier shall pay an agent's referral fee of $25 to each insurance agent who refers an applicant to the state plan if the application is accepted. Selling or marketing of qualified state plans may not be limited to the writing carrier or its agents. The referral fees shall be paid by the writing carrier from money received as premiums for the state plan.

(d) Every insurer which rejects or applies underwriting restrictions to an applicant for accident and health insurance shall notify the appplicant of the existence of the state plan, the requirements for being accepted in it, and the procedure for applying to it.

Sec. 21 50.130. CONVERSION PRIVILEGES. (a) Each program of self-insurance and each policy of group accident and health insurance or contract of coverage by a health maintenance organization written or renewed in the state shall include the right to convert to an individual coverage qualified plan without the addition of underwriting restrictions regardless of the reason for leaving the group. A person leaving the group may exercise his right to conversion within 30 days of leaving the group.

(b) Plans of health coverage shall include a provision which, upon the death of the individual in whose name the contract was issued, permits an individual then covered under the contract to elect, within the period specified in the contract, to continue coverage under the same or a different contract without the addition of underwriting restrictions until he would have ceased to be entitled to coverage had the individual in whose name the contract was issued lived.

Sec. 21.50.200. DEFINITIONS. In this chapter,

(1) "accident and health insurance policy" or "policy"

(A) means insurance or nonprofit health service plan contracts providing benefits for hospital, surgical, and medical care;

(B) does not mean coverage which is

(i) limited to disability or income protection coverage,

(ii) automobile medical payment coverage,

(iii) supplemental to liability insurance,

(iv) sold by fraternals and provides payments on a per diem, daily indemnity or nonexpense-incurred basis;

(2) "association" means a comprehensive health association established under AS 21.50.070;

(3) "dependent" means a spouse or unmarried child under the age of 18 years, a child who is a student under the age of 25 years and financially dependent upon the parent, a dependent child of any age who is disabled, or a household member who is financially dependent on the primary insured;

(4) "director" means the director of insurance;

(5) "eligible person" means an individual who is a resident of the state and meets the enrollment requirements of AS 21.50.110;

(6) "fraternal" means a corporation, society, order, or voluntary association without capital stock which sells health and accident insurance in accordance with AS 21.84;

(7) "gross income" means income under AS 43.20;

(8) "health benefits" means benefits offered to employees on an indemnity or prepaid basis which pays the costs of or provide medical, surgical, or hospital care;

(9) "health maintenance organization" means a nonprofit corporation organized and operated under 42 U.S.C. sec. 300e;

(10) "insurer"

(A) means a company offering, selling, issuing or renewing policies or contracts of accident and health insurance;

(B) does not mean health maintenance organization;

(11) "Medicare" means Part A and Part B of the United States Social Security Act, Title XVIII, as amended, 42 U.S.C. sections 1394, et seq;

(12) "Medicare supplement plan" means a plan of insurance protection which provides benefits for the costs of medical, surgical, or hospital care and which is marketed as providing benefits which complement or supplement the benefits provided by Medicare;

(13) "plan of health coverage" means a plan or combination of plans of coverage, including combinations of self-insurance, individual accident and health insurance policies, group accident and health insurance policies, coverage under a nonprofit health service plan, or coverage under a health maintenance organization subscriber contract;

(14) "qualified expense" means a charge incurred for a health service which is included in the list of covered services described in AS 21.50.040(a) and for which no third party is liable;

(15) "qualified Medicare supplement plan" means a health

benefit plan which has been certified by the director as providing the minimum benefits required by AS 21.50.050 or the actuarial equivalent of those benefits;

(16) "qualified plan" means those health benefit plans which have been certified by the director as providing the minimum benefits required by AS 21.50.040 or the actuarial equivalent of those benefits;

(17) "self-insurance" means a plan of health coverage offered by a self-insurer;

(18) "self-insurer"

(A) means an employer who directly provides a plan of health coverage to his employees and administers the plan of health coverage himself or through an insurer;

(B) does not mean an employer engaged in the business of providing health care services to the public who provides health care services directly to his employees at no charge to them;

(19) "state plan" means policies of comprehensive health insurance and contracts of health maintenance organization coverage offered by the association through the writing carrier under this chapter;

(20) "state plan premium" means a premium determined under AS 21.50.060;

(21) "third party" means a person other than the eligible person or his dependents;

(22) "writing carrier" means an insurer or insurers and a hospital or medical service corporation or corporations selected by the association and approved by the director to administer the comprehensive health insurance plan.

* Sec. 3. AS 47.07 is amended by adding new sections to read:

ARTICLE 2. INSURANCE AND SERVICE CONTRACTS.

Sec. 47.07.100. MEDICAL ASSISTANCE BY INSURANCE OR SERVICE CONTRACTS. (a) The commissioner shall use available medical assistance funds to purchase and pay premiums on policies of insurance or pay the expenses on health care service contracts or medical or hospital service contracts that provide one or more of the medical and remedial care and services available under medical assistance for the benefit of the categorically or the medically needy.

(b) The policy of insurance or the contract must by its terms guarantee

(1) to provide medical and remedial care and services of the type and according to the standards prescribed under AS 47.07.030;

(2) to pay providers of medical and remedial care and services the amount due, based on the number of days of care and the fees, charges, and costs established under AS 47.04.030 except as to medical or hospital service contracts issued by a hospital association which employs a method of accounting or payment on other than a fee for service basis;

(3) to provide medical and remedial care and services under policies of insurance or contracts in compliance with applicable laws and regulations;

(4) to provide the statistical data, records, and reports relating to the provision, administration, and costs of providing medical and remedial care and services as required by the commissioner.

Sec. 47.07.110. RATES ON INSURANCE OR SERVICE CONTRACTS. (a) The commissioner shall establish uniform areawide rates for the payment on policies of insurance or service contracts from available medical assistance funds.

(b) The commissioner may not pay a premium or other periodic charge on a policy of insurance, health care service contract, or

hospital service contract unless the insurer or contractor issuing the policy or contract is authorized to do business in the state.

Sec. 47.07.120. CONTRACTS WITH DIRECT PROVIDERS OF CARE AND SERVICE. (a) The commissioner may enter into nonexclusive contracts under which funds available for medical assistance may be administered and disbursed by the contractor to direct providers of medical and remedial care and services available under medical assistance for services rendered and supplies furnished by them under this chapter. Payment shall be made under AS 47.07.030.

(b) A contract under this section shall

(1) oblige the contractor to make payments under the contract promptly and not later than 30 days after receipt of the proper evidence of the claim; and

(2) provide data, records, and reports required by the commissioner.

Insert. Pick up Secs. 130 & 150 from page 32

* Sec. 4. AS 47.07.0~~X~~0 is amended to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include inpatient hospital, outpatient hospital, rural health clinic, outpatient surgical care centers, laboratory and ~~X~~-ray, refractions and eye examinations by ophthalmologists or optometrists, eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist, podiatrist services chiropractic services, private duty nursing, physical therapist services occupational therapy services, dental services and dentures, personal care services, prosthetic services, prescribed drugs, inpatient psychiatric hospital, skilled nursing and intermediate care facility services for persons age 65 or older and persons under age 21, skilled and intermediate nursing home, physician, home health care services, early periodic screening diagnosis and treatment of persons under 21

years of age, inpatient, skilled nursing, and intermediate care facility services for persons 65 years of age or older, clinic services, treatment of speech, hearing and language disorders, diagnostic, screening, prevention, and rehabilitation services and reasonable transportation to and from the point of medical care. No additional services may be provided unless approved by the legislature.

Sec. 47.07.130. IMPLEMENTATION. The commissioner shall implement the provisions of AS 47.07.100 - 47.07.130 when the commissioner determines that comparable benefits at equal or less cost than direct payments by the department to the providers of medical assistance.

Sec. 47.07.150. DEFINITIONS. In AS 47.07.100 - 47.07.150

(1) "commissioner" means the commissioner of health and social services;

(2) "department" means the Department of Health and Social Services.

* Sec. 5. AS 47.07.070 is amended by adding a new subsection to read:

(b) In providing reimbursement to providers of services under (a) of this section, the state shall pay

(1) interest on unpaid ~~medical~~ Medicaid bills presented by providers at the rate of one percent per month when payment is delayed more than 30 days after presentation of the billing; and

(2) interest on unpaid ~~medical~~ Medicaid bills presented by providers at the rate of two percent per month when payment is delayed more than six months after presentation of the billing.

* Sec. 6. AS 47.25.120 is amended to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. Financial assistance may be given under AS 47.25.120 - 47.25.300 [, SO FAR AS PRACTICABLE UNDER THE CONDITIONS IN THIS STATE,] to

(1) a needy person who is eligible under the regulations of

the departmen'; and

(2) a medically needy person who has incurred medical expenses which equal or exceed the difference between the person's monthly income and 150 percent of the current Federal Community Services Administration poverty income guidelines for Alaska (45 C.F.R.,sec. 1060.2).

* Sec. 7. AS 47.25 is amended by adding a new section to read:

Sec. 47.25.175. INTEREST ON LATE PAYMENTS. In providing reimbursement to providers of medical services under AS 47.25.120 - 47.25.300, the state shall pay

(1) interest on unpaid medical bills presented by providers at the rate of one percent per month when payment is delayed more than 30 days after presentation of the billing; and

(2) interest on unpaid medical bills presented by providers at the rate of two percent per month when payment is delayed more than six months after presentation of the billing.

* Sec. 8. ADJUSTMENT OF EMPLOYER-SPONSORED PLANS. When employees subject to the requirements of AS 18.12 enacted in sec. 1 of this Act are included in the coverage provisions of an employer-sponsored prepaid health care plan covering similar employees employed outside the state and the majority of the employees are not subject to the requirements of AS 18.12, the benefits applicable to the employees covered by AS 18.12 shall be adjusted within one year after the effective date of this Act so as to meet the requirements of AS 18.12.

* Sec. 9. This Act takes effect January 1, 1981.

"CHAPTER
PREPAID HEALTH CARE ACT
PART I. SHORT TITLE; PURPOSE; DEFINITIONS

Sec. -1 **Short title.** This chapter shall be known as the Hawaii Prepaid Health Care Act.

Sec. -2 **Findings and purpose.** The cost of medical care in case of sudden need may consume all or an excessive part of a person's resources. Prepaid health care plans offer a certain measure of protection against such emergencies. It is the purpose of this chapter in view of the spiraling cost of comprehensive medical care to provide this type of protection for the employees in this State. Although a large segment of the labor force in the State already enjoys coverage of this type either by virtue of collective bargaining agreements, employer-sponsored plans, or individual initiative, there is a need to extend that protection to workers who at present do not possess any or possess only inadequate prepayment coverage.

This chapter shall not be construed to interfere with or diminish any protection already provided pursuant to collective bargaining agreements or employer-sponsored plans that is more favorable to the employees benefited thereby than the protection provided by this chapter or at least equivalent thereto.

Sec. -3 **Definitions generally.** As used in this chapter, unless the context clearly requires otherwise:

(1) "Department" means the department of labor and industrial relations.

(2) "Director" means the director of labor and industrial relations.

(3) "Employer" means any individual or type of organization, including any partnership, association, trust, estate, joint stock company, insurance company, or corporation, whether domestic or foreign, a debtor in possession or receiver or trustee in bankruptcy, or the legal representative of a deceased person, who has one or more regular employees in his employment. "Employer" does not include:

(A) The State, any of its political subdivisions, or any instrumentality of the State or its political subdivisions;

(B) The United States government or any instrumentality of the United States;

(C) Any other state or political subdivision thereof or instrumentality of such state or political subdivision.

(D) Any foreign government or instrumentality wholly owned by a foreign government, if (i) the service performed in its employ is of a character similar to that performed in foreign countries by employees of the United States government or of an instrumentality thereof, and (ii) the United States Secretary of State has certified or certifies to the United States Secretary of the Treasury that the foreign government, with respect to whose instrumentality exemption is claimed, grants an equivalent exemp-

n with respect to similar service performed in the foreign ..untry by employees of the United States government and of instrumentalities thereof.

(4) "Employment" means service, including service in interstate commerce, performed for wages under any contract of hire, written or oral, expressed or implied, with an employer, except as otherwise provided in sections -4 and -5.

(5) "Premium" means the amount payable to a prepaid health care plan contractor as consideration for his obligations under a prepaid health care plan.

(6) "Prepaid health care plan" means any agreement by which any prepaid health care plan contractor undertakes in consideration of a stipulated premium:

(A) Either to furnish health care, including hospitalization, surgery, medical or nursing care, drugs or other restorative appliances, subject to, if at all, only a nominal per service charge; or

(B) To defray or reimburse, in whole or in part, the expenses of health care.

(7) "Prepaid health care plan contractor" means:

(A) Any medical group or organization which undertakes under a prepaid health care plan to provide health care; or

(B) Any nonprofit organization which undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care; or

(C) Any insurer who undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care.

(8) "Regular employee" means a person employed in the employment of any one employer for at least twenty hours per week but does not include a person employed in seasonal employment. "Seasonal employment" for the purposes of this paragraph means employment in a seasonal pursuit as defined in section 387-1 by a seasonal employer during a seasonal period or seasonal periods for the employer in the seasonal pursuit or employment by an employer engaged in the cultivating, harvesting, processing, canning, and warehousing of pineapple during its seasonal periods. The director by rule and regulation may determine the kind of employment that constitutes seasonal employment.

(9) "Wages" means all cash remuneration for services from whatever source, including commissions, bonuses, and tips and gratuities paid directly to any individual by a customer of his employer.

If the employee does not account to his employer for the tips and gratuities received and is engaged in an occupation in which he customarily and regularly receives more than $20 a month in tips, the combined amount received by him from his employer and from tips shall be deemed to be at least equal to the wage required by chapter 387 or a greater sum as determined by regulation of the director.

"Wages" does not include the amount of any payment specified in section 383-11 or 392-22 or chapter 386.

Sec. -4 **Place of performance.** "Employment" includes an individual's entire service, performed within or both within and without this State if:

(1) The service is localized in this State; or

(2) The service is not localized in any state but some of the service is performed in this State and

(A) the individual's base of operation, or, if there is no base of operation, the place from which such service is directed or controlled, is in the State; or

(B) the individual's base of operation or place from which the service is directed or controlled is not in any state in which some part of the service is performed but the individual's residence is in this State.

Sec. -5 **Excluded services.** "Employment" as defined in section -3 does not include the following services:

(1) Service performed by an individual in the employ of an employer who, by the laws of the United States, is responsible for care and cost in connection with such service.

(2) Service performed by an individual in the employ of his spouse, son, or daughter, and service performed by an individual under the age of twenty-one in the employ of his father or mother.

(3) Service performed in the employ of a voluntary employee's beneficiary association providing for the payment of life, sick, accident, or other benefits to the members of the association or their dependents or their designated beneficiaries, if

(A) admission to membership in the association is limited to individuals who are officers or employees of the United States government, and

(B) no part of the net earnings of the association inures (other than through such payments) to the benefits of any private shareholder or individual.

(4) Service performed by an individual for an employer as an insurance agent or as an insurance solicitor, if all such service performed by the individual for the employer is performed for remuneration solely by way of commission.

(5) Service performed by an individual for an employer as a real estate salesman or as a real estate broker, if all such service performed by the individual for the employer is performed for remuneration solely by way of commission.

(6) Service performed by an individual who, pursuant to the Federal Economic Opportunity Act of 1964, is not subject to the provisions of law relating to federal employment, including unemployment compensation.

Sec. -6 **Principal and secondary employer defined; coercion, interference, etc. prohibited.** If an individual is concurrently a regular employee of two or more employers as defined in this chapter, the employee shall deter-

mine which of the employers shall be his principal employer. His other employers are secondary employers. The determination by the employee of his principal employer is binding for one year or until change of employment, whichever is earlier.

If an individual is concurrently is regular employee of a public entity which is not an employer as defined in section -3 and of an employer as defined in section -3 the latter shall be deemed to be a secondary employer.

An employer who, directly or indirectly, interferes with or coerces or attempts to coerce an employee in making a determination under this section shall be subject to the penalty provided under subsection -33(b).

Sec. -7 Required health care benefits. (a) A prepaid health care plan shall qualify as a plan providing the mandatory health care benefits required under this chapter if it provides for health care benefits equal to, or medically reasonably substitutable for, the benefits provided by prepaid health plans of the same type, as specified in section -12(a) (1) or (2), which have the largest numbers of subscribers in the State. This applies to the types and quantity of benefits as well as to limitations on reimbursability, including deductibles, and to required amounts of co-insurance.

The director, after advice by the prepaid health care advisory council, shall determine whether benefits provided in a plan, other than the plan of the respective type having the largest numbers of subscribers in the State, comply with the standards specified in this subsection.

(b) A prepaid group health care plan shall also qualify for the mandatory health care benefits required under this chapter if it is demonstrated by the health care plan contractor offering such coverage to the satisfaction of the director after advice by the prepaid health care advisory council that the plan provides for sound basic hospital, surgical, medical, and other health care benefits at a premium commensurate with the benefits included taking proper account of the limitations, co-insurance features, and deductibles specified in such plan. Coverage under a plan which provides aggregate benefits that are more limited than those provided by plans qualifying under subsection (a) shall be in compliance with section -11 only if the employer contributes at least half of the cost of the coverage of dependents under such plan.

(c) Subject to the provisions of subsections (a) and (b) without limiting the development of medically more desirable combinations and the inclusion of new types of benefits, a prepaid health care plan qualifying under this chapter shall include at least the following benefit types:

(1) Hospital benefits:

(A) In-patient care for a period of at least one hundred twenty days of confinement in each calendar year covering:

(i) Room accommodations;

(ii) Regular and special diets;

(iii) General nursing services;

(iv) Use of operating room, surgical supplies, anesthesia services, and supplies;

(v) Drugs, dressings, oxygen, antibiotics, and blood transfusion services.

(B) Out-patient care:
(i) Covering use of out-patient hospital;
(ii) Facilities for surgical procedures or medical care of an emergency and urgent nature.

(2) Surgical benefits:
(A) Surgical services performed by a licensed physician, as determined by plans meeting the standards of subsections (a) and (b);
(B) After-care visits for a reasonable period;
(C) Anesthesiologist services.

(3) Medical benefits:
(A) Necessary home, office, and hospital visits by a licensed physician;
(B) Intensive medical care while hospitalized;
(C) Medical or surgical consultations while confined.

(4) Diagnostic laboratory services, x-ray films, and radio-therapeutic services, necessary for diagnosis or treatment of injuries or diseases.

(5) Maternity benefits, at least if the employee has been covered by the prepaid health care plan for nine consecutive months prior to the delivery.

(d) The prepaid health care advisory council shall be appointed by the director and shall include representatives of the medical and public health professions, representatives of consumer interests, and persons experienced in prepaid health care protection. The membership of the council shall not exceed seven individuals.

PART II. MANDATORY COVERAGE

Sec. -11 Coverage of regular employees by group prepaid health care plan. Every employer who pays to a regular employee monthly wages in an amount of at least 86.67 times the minimum hourly wage, specified in chapter 387, as rounded off by regulation of the director, shall provide coverage of such employee by a prepaid group health care plan qualifying under section -7 with a prepaid health care plan contractor in accordance with the provisions of this chapter.

Sec. -12 Choice of plan type and of contractor. (a) Every employer required to provide coverage for his employees by a prepaid group health care plan under this chapter shall elect whether coverage shall be provided by:

(1) A plan which obligates the prepaid health care plan contractor to furnish the required health care benefits; or

(2) A plan which obligates the prepaid health care plan contractor to defray or reimburse the expenses of health care.

His election is binding for one year.

(b) Whether the employer elects a plan type described in subsection (a) (1) or in subsection (a) (2), the employer may elect the particular contractor but the employee shall not be obligated to contribute a greater amount to the premium than he would have to contribute had the employer elected coverage with the contractor providing the prevailing coverage of the respective type in the State.

Subject to the provision of section -20, the employer shall provide coverage with the prepaid health care plan contractor selected pursuant to this subsection for all his employees in the State electing this type of coverage who are covered by the provisions of this chapter, except for employees covered by the health care provisions of an applicable collective bargaining agreement as provided in section -19(b) first sentence.

Sec. -13 Liability for payment of premium; withholding. Unless an applicable collective bargaining agreement specifies differently every employer shall contribute at least one-half of the premium for the coverage required by this chapter and the employee shall contribute the balance; provided that in no case shall the employee contribute more than 1.5 per cent of his wages; and provided that if the amount of the employee's contribution is less than one-half of the premium, the employer shall be liable for the whole remaining portion of the premium.

The employer shall withhold the employee's share from his wages with respect to pay periods as specified by the director.

Sec. -14 Commencement of coverage. The employer shall provide the coverage required by this chapter for any regular employee, who has been in his employ for four consecutive weeks, at the earliest time thereafter at which coverage may be provided with the prepaid health care plan contractor selected pursuant to this chapte

Sec. -15 Continuation of coverage in case of inability to earn wages. If an employee is hospitalized or otherwise prevented by sickness from working, the employer shall enable the employee to continue his coverage by contributing to the premium the amounts paid by the employer toward such premium prior to the employee's sickness for the period that such employee is hospitalized or prevented by sickness from working. This obligation shall not exceed a period of three months following the month during which the employee became hospitalized or disabled from working, or the period for which the employer has undertaken the payment of his regular wages in such case, whichever is longer.

Sec. -16 Liability of secondary employer. An employer who has been notified by an employee, in the form prescribed by the director, that he is not the principal employer as defined in section -6 shall be relieved of the duty of providing the coverage required by this chapter until he is notified by the employee pursuant to section -18 that he has become the principal employer. He shall notify the director, in the form prescribed by the director, that he is relieved from the duty of providing coverage or of any change in that status.

Sec. -17 Exemption of certain employees. (a) In addition to the exemption specified in section -16, an employer shall be relieved of his duty under section -11 with respect to any employee who has notified him, in the form specified by the director, that the employee is:

(1) Protected by health insurance or any prepaid health care plan established under any law of the United States;

(2) Covered as a dependent under a prepaid health care plan, entitling him to the health benefits required by this chapter;

(3) A recipient of public assistance or covered by a prepaid health care plan established under the laws of the State governing medical assistance.

(b) Employers receiving notice of a claim of exemption under this section shall notify the director of such claim in the form prescribed by the director.

Sec. -18 **Termination of exemption.** (a) If an exemption which has been claimed by an employee pursuant to section -17 terminates because of any change in the circumstances entitling the employee to claim such exemption, the employee shall promptly notify the principal employer of the termination of the exemption and the employer thereupon shall provide coverage as required by this chapter.

(b) If because of a change in the employment situation of an employee or a redetermination by an employee as provided in section -6, a principal employer becomes a secondary employer or a secondary employer becomes the principal employer, the employee shall promptly notify the employers affected of such change and the new principal employer shall provide coverage as required by this chapter.

Sec. -19 **Freedom of collective bargaining.** (a) In addition to the policy stated in section -2, nothing in this chapter shall be construed to limit the freedom of employees to bargain collectively for different prepaid health care plan coverage or for a different allocation of the costs thereof. A collective bargaining agreement may provide that the employer himself undertakes to provide the health care specified in the agreement.

(b) If the employees rendering particular types of services are not covered by the health care provisions of the applicable collective bargaining agreements to which their employer is a party, the provisions of this chapter shall be applicable with respect to them. An employer or group of employers shall be deemed to have complied with the provisions of this chapter if they undertake to provide health care services pursuant to a collective bargaining agreement and the services are available to all other employees not covered by such agreement.

Sec. -20 **Adjustment of employer-sponsored plans.** Where employees subject to the coverage of this chapter are included in the coverage provisions of an employer-sponsored prepaid health care plan covering similar employees employed outside the State and the majority of such employees are not subject to this chapter, the benefits applicable to the employees covered by this chapter shall be adjusted within one year after the effective date of this chapter so as to meet the requirements of this chapter.

Sec. -21 **Individual waivers prohibited; additional withholding for dependents.** An employee may not waive individually all or part of the required health care benefits or agree to pay a greater share of the premium for such benefits than is required by this chapter.

Subject to section -7(b), an employee may consent to pay a greater

share of his wages and to a withholding of such share by the employer for the purpose of providing prepaid health care benefits of his dependents under the plan providing such benefits for himself.

Sec. -22 **Exemption of followers of certain teachings or beliefs.** This chapter shall not apply to any individual who pursuant to the teachings, faith, or belief of any group, depends for healing upon prayer or other spiritual means.

Sec. -23 **Joint provision of coverage.** Employers may form associations for the purpose of jointly providing prepaid health care protection under this chapter for their employees with the contractors authorized to provide such coverage in the State.

PART III. ADMINISTRATION AND ENFORCEMENT

Sec. -31 **Enforcement by the director.** Except as otherwise provided in section -7 the director shall administer and enforce this chapter. The director may appoint such assistants and such clerical, stenographic, and other help as may be necessary for the proper administration and enforcement of this chapter subject to any civil service act relating to state employees.

Sec. -32 **Rule making and other powers of the director.** The director may adopt, amend, or repeal, pursuant to chapter 91, such rules and regulations as he deems necessary or suitable for the proper administration and enforcement of this chapter.

The director may round off the amounts specified in this chapter for the purpose of eliminating payments from the premium supplementation fund in other than even dollar amounts or other purposes.

The director may prescribe the filing of reports by prepaid health care plan contractors and prescribe the form and content of requests by employers for premium supplementation and the period for the payment thereof.

Sec. -33 **Penalties.** (a) If an employer fails to comply with sections -11, -12, -13, or -15 he shall pay a penalty of not less than $25 or of $1 for each employee for every day during which such failure continues, whichever sum is greater. The penalty shall be assessed under rules and regulations promulgated pursuant to chapter 91 and shall be collected by the director and paid into the special fund for premium supplementation established by section -41. The director may, for good cause shown, remit all or any part of the penalty.

(b) Any employer, employee, or prepaid health care plan contractor who wilfully fails to comply with any other provision of this chapter or any rule or regulation thereunder may be fined not more than $200 for each such violation.

PART IV. PREMIUM SUPPLEMENTATION

Sec. -41 **Establishment of special premium supplementation fund.** There is established in the treasury of the State, separate and apart from all public moneys or funds of the State, a special fund for premium supplementation which shall be administered exclusively for the purposes of this chapter. All premium supplementations payable under this part shall be paid from the

fund. The fund shall consist of (1) all money appropriated by the State for the purposes of premium supplementation under this part and (2) all fines and penalties collected pursuant to this chapter.

Sec. -42 Management of the fund. The director of finance shall be the treasurer and custodian of the premium supplementation fund and shall administer the fund in accordance with the directions of the director of labor and industrial relations. All moneys in the fund shall be held in trust for the purposes of this part only and shall not be expended, released, or appropriated or otherwise disposed of for any other purpose. Moneys in the fund may be deposited in any depositary bank in which general funds of the State may be deposited but such moneys shall not be commingled with other state funds and shall be maintained in separate accounts on the books of the depositary bank. Such moneys shall be secured by the depositary bank to the same extent and in the same manner as required by the general depositary law of the State; and collateral pledged for this purpose shall be kept separate and distinct from any other collateral pledged to secure other funds of the State. The director of finance shall be liable for the performance of his duties under this section as provided in chapter 37.

Sec. -43 Disbursements from the fund. Expenditures of moneys in the premium supplementation fund shall not be subject to any provisions of law requiring specific appropriations or other formal release by the state officers of money in their custody. All payments from the fund shall be made upon warrants drawn upon the director of finance by the comptroller of the State supported by vouchers approved by the director.

Sec. -44 Investment of moneys. With the approval of the department the director of finance may, from time to time, invest such moneys in the premium supplementation fund as are in excess of the amount deemed necessary for the payment of benefits for a reasonable future period. Such moneys may be invested in bonds of any political or municipal corporation or subdivision of the State, or any of the outstanding bonds of the State, or invested in bonds or interest-bearing notes or obligations of the State (including state director of finance's warrant notes issued pursuant to chapter 40), or of the United States, or those for which the faith and credit of the United States are pledged for the payment of principal and interest, or in federal land bank bonds or joint stock farm loan bonds. The investments shall at all times be so made that all the assets of the fund shall always be readily convertible into cash when needed for the payment of benefits. The director of finance shall dispose of securities or other properties belonging to the fund only under the direction of the director of labor and industrial relations.

Sec. -45 Entitlement to premium supplementation. (a) An employer who employs less than eight employees entitled to coverage under this chapter and who provides coverage to such employees pursuant to section -7(a) shall be entitled to premium supplementation from the fund if the employer's share of the cost of providing such coverage as determined by sections -13 and -15 exceeds 1.5 per cent of the total wages payable to such employees and if the amount of such excess is greater than five per cent of the employer's

income before taxes directly attributable to the business in which such employees are employed.

(b) The amount of the supplementation shall be that part of the employer's share of the premium cost which exceeds the limits specified in subsection (a).

Sec. -46 **Income directly attributable to the business.** (a) "Income directly attributable to the business" means gross profits from the business minus deductions for:

(1) Compensation of officers;
(2) Salaries and wages, except wages paid by an individual proprietor to himself;
(3) Repairs;
(4) Taxes on business and business property;
(5) Business advertising;
(6) Amounts contributed to employee benefit plans;
(7) Interest on business indebtedness;
(8) Rent on business property; and
(9) Other expenses necessary for the current conduct of business.

(b) Deductions shall not include:

(1) Bad debts;
(2) Contributions or gifts, other than those listed under subsection (a) (6);
(3) Amortization and depreciation; or
(4) Losses by fire, storm, casualty, or theft.

(c) The director may promulgate rules and regulations necessary to define income directly attributable to business for the purpose of section -45.

Sec. -47 **Claim of premium supplementation.** An employer entitled to premium supplementation shall file a claim therefor in the manner provided by regulation of the director. The employer shall have the burden of proof of establishing his entitlement."

SECTION 2. This Act shall take effect upon its approval, except that the coverage by group prepaid health care plans required by this Act and the payment of premiums for such coverage shall commence January 1, 1975; provided that this Act shall terminate upon the effective date of federal legislation that provides for voluntary prepaid health care for the people of Hawaii in a manner at least as favorable as the health care provided by this Act, or upon the effective date of federal legislation that provides for mandatory prepaid health care for the people of Hawaii.

(Approved June 12, 1974.)

ACT 211 H.B. NO. 3018-74

A Bill for an Act Relating to Mental Health Services for Children and Youth.

rial is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material, or the underscoring.*

SECTION 9. This Act shall take effect upon its approval.

(Approved May 6, 1975.)

ACT 51 H.B. NO. 419

A Bill for an Act Relating to Prepaid Health Care.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 393-6, Hawaii Revised Statutes, is amended to read:

"**Sec. 393-6 Principal and secondary employer defined; coercion, interference, etc. prohibited.** If an individual is concurrently a regular employee of two or more employers as defined in this chapter, the principal employer shall be the employer who pays him the most wages; provided that if one of the employers, who does not pay the most wages, employs the regular employee for at least thirty-five hours per week, the employee shall determine which of the employers shall be his principal employer. His other employers are secondary employers. An employer so designated as the principal employer shall remain as such principal employer for one year or until change of employment, whichever is earlier.

If an individual is concurrently a regular employee of a public entity which is not an employer as defined in section 393-3 and of an employer as defined in section 393-3 the latter shall be deemed to be a secondary employer.

An employer who, directly or indirectly, interferes with or coerces or attempts to coerce an employee in making a determination under this section shall be subject to the penalty provided under subsection 393-33(b)."

SECTION 2. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material or the underscoring.*

SECTION 3. This Act shall take effect upon its approval.

(Approved May 6, 1975.)

ACT 52 H.B. NO. 442

A Bill for an Act Relating to Taxation of Banks and Other Financial Corporations.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 241-4, Hawaii Revised Statutes, is amended by amending subsection (b) to read:

*Edited accordingly.

and may be leased by it as provided in chapter 171, Hawaii Revised Statutes, or may be retained for management by the department.

Any lease by the board of land and natural resources of Hawaiian home lands hereafter entered into shall contain a withdrawal clause, and the lands so leased shall be withdrawn by the board of land and natural resources, for the purpose of this Act, upon the department giving at its option, not less than one nor more than five years' notice of such withdrawal; provided, that the minimum withdrawal-notice period shall be specifically stated in such lease.

In the management of any retained available lands not required for leasing under section 207(a), the department may dispose of such lands to the public, including native Hawaiians, on the same terms, conditions, restrictions and uses applicable to the disposition of public lands as provided in chapter 171; provided, that the department may not sell or dispose of such lands in fee simple except as authorized under section 205 of this Act.

(3) The department shall not lease, use, nor dispose of more than twenty thousand (20,000) acres of the area of Hawaiian home lands, for settlement by native Hawaiians, in any calendar five-year period.

(4) The department may, with the approval of the governor and the Secretary of Interior, in order to consolidate its holdings or to better effectuate the purposes of this Act, exchange the title to available lands for land, publicly owned, of an equal value. All land so acquired by the department shall assume the status of available lands as though the same were originally designated as such under section 203 hereof, and all lands so conveyed by the department shall assume the status of the land for which it was exchanged. The limitations imposed by section 73(1) of the Hawaiian Organic Act and the land laws of Hawaii as to the area and value of land that may be conveyed by way of exchange shall not apply to exchanges made pursuant hereto. No such exchange shall be made without the approval of two-thirds of the members of the board of land and natural resources."

SECTION 2. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material, or the underscoring.*

SECTION 3. If any portion of this Act is declared invalid, the remaining portions of this Act shall not be affected thereby.

SECTION 4. This Act shall take effect upon its approval.

(Approved April 28, 1976.)

ACT 25 H.B. NO. 2194-76

A Bill for an Act Relating to Prepaid Health Care.

Be It Enacted by the Legislature of the State of Hawaii:

*Edited accordingly.

SECTION 1. The legislature finds that alcoholism and drug problems are the medical problems most disruptive of family life and employment, with alcoholism ranking, in addition, as the third highest medical cause of death in the United States today. Alcoholism and drug addiction are illnesses, and like other illnesses, their treatment should be uniformly covered by prepaid health care plans. The legislature further finds that such inclusion in prepaid health care plans will provide visibility to alcoholism and drug addiction benefits, and as a result, may encourage more accurate diagnosis of health problems related to alcoholism and drug addiction, because of health plan coverage. Moreover, employees may be encouraged to seek early diagnosis and treatment because of such coverage. Effective treatment will reduce substantially the great economic loss to employers. The purpose of this Act is to ensure adequate treatment for alcoholism and drug addiction by requiring its inclusion in prepaid health care plans, including coverage for appropriate detoxification and treatment facilities.

SECTION 2. Section 393-7, Hawaii Revised Statutes, is amended by amending subsection (c) to read as follows:

"(c) Subject to the provisions of subsections (a) and (b) without limiting the development of medically more desirable combinations and the inclusion of new types of benefits, a prepaid health care plan qualifying under this chapter shall include at least the following benefit types:

(1) Hospital benefits:
  (A) In-patient care for a period of at least one hundred twenty days of confinement in each calendar year covering:
    (i) Room accommodations;
    (ii) Regular and special diets;
    (iii) General nursing services;
    (iv) Use of operating room, surgical supplies, anesthesia services, and supplies;
    (v) Drugs, dressing, oxygen, antibiotics, and blood transfusion services.
  (B) Out-patient care:
    (i) Covering use of out-patient hospital;
    (ii) Facilities for surgical procedures or medical care of an emergency and urgent nature.

(2) Surgical benefits:
  (A) Surgical services performed by a licensed physician, as determined by plans meeting the standards of subsections (a) and (b);
  (B) After-care visits for a reasonable period;
  (C) Anesthesiologist services.

(3) Medical benefits:
  (A) Necessary home, office, and hospital visits by a licensed physician;
  (B) Intensive medical care while hospitalized;
  (C) Medical or surgical consultations while confined.

(4) Diagnostic laboratory services, x-ray films, and radio-therapeutic services, necessary for diagnosis or treatment of injuries or diseases.

(5) Maternity benefits, at least if the employee has been covered by the

prepaid health care plan for nine months prior to the delivery.

(6) Substance abuse benefits:

(A) Alcoholism and drug addiction are illnesses and shall receive benefits as such. In-patient and out-patient benefits for the diagnosis and treatment of substance abuse, including but not limited to alcoholism and drug addiction, shall be specifically stated and shall not be less than the benefits for any other illness, except as provided in this subsection. Medical treatment of substance abuse shall not be limited or reduced by restricting coverage to the mental health or psychiatric benefits of a plan. However, any psychiatric services received as a result of the treatment of substance abuse may be limited to the psychiatric benefits of the plan.

(B) Out-patient benefits provided by a physician, psychiatrist, or psychologist, without restriction as to place of service; provided that health plans of the type specified in section 393-12(a) shall retain for the contractor the option of:

(i) Providing the benefits in its own facility and utilizing its own staff, or

(ii) Contracting for the provision of these benefits, or

(iii) Authorizing the patient to utilize outside services and defraying or reimbursing the expenses at a rate not to exceed that for provision of services utilizing the health contractor's own facilities and staff.

(C) Detoxification and acute care benefits in a hospital or any other public or private treatment facility, or portion thereof, providing services especially for the detoxification of intoxicated persons or drug addicts, which is appropriately licensed, certified, or approved by the department of health in accordance with the standards prescribed by the Joint Commission on Accreditation of Hospitals. In-patient benefits for detoxification and acute care shall be limited in the case of alcohol abuse to three admissions per calendar year, not to exceed seven days per admission, and shall be limited in the case of other substance abuse to three admissions per calendar year, not to exceed twenty-one days per admission.

(D) Prepaid health plans shall not be required to make reimbursements for care furnished by government agencies and available at no cost to a patient, or for which no charge would have been made if there were no health plan coverage."

SECTION 3. New statutory material is underscored. In printing this Act, the revisor of statutes need not include the underscoring.*

SECTION 4. This Act shall take effect on July 1, 1976; provided that prepaid health care contracts due for renewal after July 1, 1976 may defer

*Edited accordingly.

inclusion of these substance abuse benefits until such renewal date, or January 1, 1977, whichever occurs earlier.

(Approved April 28, 1976.)

ACT 26 H.B. NO. 2533-76

A Bill for an Act Relating to Day Care Centers.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 346-19, Hawaii Revised Statutes, is amended to read:

"**Sec. 346-19 Day care centers defined.** A "day care center" is defined as a place maintained by any individual, organization, or agency for the purpose of providing care for a child or children with or without charging a fee during any part of a twenty-four hour day. The term day care center includes any place where group care is provided for six or more children, and any family home providing care for two to five children.

Nothing in sections 346-18 to 346-25 shall be construed to include an individual person caring for a related child, a neighbor or friend caring for a child or children if the person does not regularly engage in such activity, a kindergarten or school conducted solely for educational purposes or specialized training, or an organization established to conduct athletic or social group functions."

SECTION 2. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material, or the underscoring.*

SECTION 3. This Act shall be effective July 1, 1976.

(Approved April 28, 1976.)

ACT 27 H.B. NO. 2880-76

A Bill for an Act Relating to the State Environmental Policy.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. The purpose of this Act is to propose an amendment to Section 344-4 of the Hawaii Revised Statutes to provide for guidelines relating to solid wastes.

SECTION 2. Section 344-4 (2) is amended to read as follows:

"(2) Land, water mineral, visual, air and other natural resources.

(A) Encourage management practices which conserve and fully utilize all natural resources;

*Edited accordingly.

ACT 78 Amend.

SECTION 3. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material, or the underscoring.*

SECTION 4. This Act shall take effect upon its approval.

(Approved , 12, 1976.)

ACT 78 S.B. NO. 1820-76

A Bill for an Act Relating to the Prepaid Health Care Act.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 393-3, Hawaii Revised Statutes, is amended by amending the definition of "Wages" to read:

"(9) "Wages" means all remuneration for services from whatever source, including commissions, bonuses, and tips and gratuities paid directly to any individual by a customer of his employer, and the cash value of all remuneration in any medium other than cash.

The director may issue regulations for the reasonable determination of the cash value of remuneration in any medium other than cash.

If the employee does not account to his employer for the tips and gratuities received and is engaged in an occupation in which he customarily and regularly receives more than $20 a month in tips, the combined amount received by him from his employer and tips shall be deemed to be at least equal to the wage required by chapter 387 or a greater sum as determined by regulation of the director.

"Wages" does not include the amount of any payment specified in section 383-11 or 392-22 or chapter 386."

SECTION 2. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material or the underscoring.*

SECTION 3. This Act shall take effect upon its approval.

(Approved May 12, 1976.)

ACT 79 S.B. NO. 1832-76

A Bill for an Act Relating to Civil Service and Exemptions.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 76-16, Hawaii Revised Statutes, is amended to read:

"**Sec. 76-16 Civil service and exemptions.** The civil service to which this part applies comprises all positions in the state service not existing or hereafter established and embraces all personnel services performed for the State, except the following:

*Edited accordingly

brackets, the bracketed material, or the underscoring.*

SECTION 10. This Act shall take effect upon its approval.

(Approved May 12, 1976.)

ACT 81 S.B. NO. 2225-76

A Bill for an Act Relating to Prepaid Health Care.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 393-21, Hawaii Revised Statutes, is amended to read as follows:

"**Sec. 393-21 Individual waivers; additional withholding for dependents.** (a) An employee may waive individually all of the required health care benefits pursuant to this chapter by:

(1) Requesting the waiver by a writing submitted to the employer; and

(2) Receiving approval of the waiver from the director upon the director determining that the employee has other coverage under a prepaid health care plan which provides benefits that meet the standards prescribed in section 393-7.

(b) The employer who receives from an employee a written request for a waiver under this section shall transmit to the director a copy of the waiver, on a form prescribed by the director, and a copy of the prepaid health care plan on the basis of which the waiver is requested.

(c) A waiver under this section is binding for one year and is renewable for subsequent one-year periods.

(d) An employer who, directly or indirectly, coerces or attempts to coerce an employee in making a waiver under this section shall be subject to the penalty provided under subsection 393-33(b).

(e) An employee may not agree to pay a greater share of the premium for such benefits than is required by this chapter.

(f) Subject to section 393-7(b), an employee may consent to pay a greater share of his wages and to a withholding of such share by the employer for the purpose of providing prepaid health care benefits of his dependents under the plan providing such benefits for himself."

SECTION 2. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material, or the underscoring.*

SECTION 3. This Act shall take effect upon its approval.

(Approved May 12, 1976.)

*Edited accordingly.

ACT 206 Amend.

brackets, the bracketed material, or the underscoring.*

SECTION 4. This Act shall take effect upon its approval.

(Approved June 7, 1976.)

ACT 206 S.B. NO. 1821-76

A Bill for an Act Relating to the Prepaid Health Care Act.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 393-13, Hawaii Revised Statutes, is amended to read:

"Sec. 393-13 Liability for payment of premium; withholding; recovery of premium. Unless an applicable collective bargaining agreement specifies differently every employer shall contribute at least one-half of the premium for the coverage required by this chapter and the employee shall contribute the balance; provided that in no case shall the employee contribute more than 1.5 per cent of his wages; and provided that if the amount of the employee's contribution is less than one-half of the premium, the employer shall be liable for the whole remaining portion of the premium.

The employer shall withhold the employee's share from his wages with respect to pay periods as specified by the director.

If an employee separates from his employment after his employer has prepaid the employee's share of the cost of providing health care coverage, the employer may deduct an amount not to exceed one-half of the premium cost but without regard to the 1.5 per cent limitation, from the last salary or wages due the employee, or seek other appropriate means to recover the premium."

SECTION 2. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material or the underscoring.*

SECTION 3. This Act shall take effect upon its approval.

(Approved June 7, 1976.)

ACT 207 S.B. NO. 1899-76

A Bill for an Act Relating to the Establishment of an Office of Children and Youth.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. The legislature finds that securing the well-being of all of Hawaii's children should continue to be a policy concern of the highest order for state government. Hawaii has long been a leader among the states in the development of innovative undertakings in behalf of children and youth as evidenced, in part, by the enactment of Act 294, Session Laws of Hawaii 1949, which estab-lish-

SOME ANSWERS TO HAWAII PREPAID HEALTH CARE LAW

FOR EMPLOYERS AND EMPLOYEES

STATE OF HAWAII
Department of
Labor and Industrial Relations
DISABILITY COMPENSATION DIVISION
P.O. Box 3769
Honolulu, Hawaii 96812

Form No. HC-2 10M

INTRODUCTION

This leaflet has been prepared in question-and-answer format to help employers and employees understand the Hawaii Prepaid Health Care Law. The new law sets up a compulsory health insurance program for the workers of Hawaii. Since every employer has a major role in the program, it is hoped that the information contained herein will enable employers to implement the law with minimal difficulty. For detailed information of this new program, refer to the law.

WHAT IS THE HAWAII PREPAID HEALTH CARE LAW?

This landmark legislation (the first in the nation) requires Hawaii employers to provide health care services for their employees, thus assuring them of needed protection against the high costs of hospital and medical care.

WHEN WILL THIS NEW LAW TAKE EFFECT?

The law took effect on June 12, 1974, but the required coverage by group prepaid health care plans and the payment of premiums for such coverage will not commence until January 1, 1975.

WHEN DOES AN EMPLOYER BECOME SUBJECT TO THE LAW?

An employer becomes subject to the law when he has one or more regular employees. A regular employee is one who works twenty or more hours per week and is paid a monthly wage of at least 86.67 times the prevailing Hawaii minimum hourly wage. A regular employee does not include a person employed in seasonal employment (e.g., harvesting and canning of pineapples) or one who works less than twenty hours a week. The Federal, State and County governments are excluded from the law.

ARE THERE EMPLOYEES EXEMPT FROM COVERAGE?

Yes, besides employees working in seasonal employment, employers need not cover insurance and real estate salesmen or brokers paid solely on commission basis, parent working for son/daughter, wife/husband working for spouse, son/daughter under twenty-one years of age working for father/mother, and others specifically exempted by the law. Also exempt are employees who are covered as dependents under another health care plan.

CAN A REGULAR EMPLOYEE WORKING CONCURRENTLY FOR TWO OR MORE EMPLOYERS HAVE COVERAGE FROM ALL EMPLOYERS?

No.

WHO HAS TO PROVIDE COVERAGE IN ABOVE CASE?

The employee is required to name which of the two or more employers is the principal employer and which the secondary employer(s) on the employee notification form (HC-5). The principal employer is required to provide coverage. An employee's determination of principal employer is binding for one year or until change of employment occurs. A secondary employer can buy out the principal employer if the employee so chooses or if the employee no longer holds two or more jobs concurrently. The employer is prohibited from coercing, interfering or influencing an employee in making a determination.

WHEN IS AN EMPLOYER A PRINCIPAL OR SECONDARY EMPLOYER?

An employee is required to complete Form HC-5 for the purpose of naming his principal and secondary employers, or when ever he chooses to make a change with respect to the status of each employer. The employer and employee each retains a copy, with the original going to the Department of Labor.

MUST AN EMPLOYER COVER AN EMPLOYEE WHO IS ALREADY COVERED AS A DEPENDENT UNDER A HEALTH CARE PLAN?

No. Besides such dependents, others who are exempt are employees protected by health insurance or any prepaid health care plan established under any law of the United States and recipients of public assistance or those covered by a State-legislated health care plan governing medical assistance.

WILL AN EMPLOYER BE NOTIFIED OF AN EMPLOYEE'S EXEMPT STATUS?

Yes. An exempt employee in any of the three categories mentioned above is required to complete Form HC-5 to notify the employer of the exemption, with a copy filed with the Department of Labor. Also, when the employee terminates exemption, the employer must be notified using the same form. When an employer receives notification that the employee has terminated exemption, the employee should be covered under the employer's health care plan.

WHAT PLANS ARE AVAILABLE FOR PROVIDING HEALTH CARE SERVICES?

There are two types of prepaid health care plans: (1) A plan by which a prepaid health care plan contractor would furnish health care, including hospitalization, surgery, medical or nursing care, drugs or other restorative appliances; and (2) a plan by which the contractor would defray or reimburse, in whole or in part, the expenses of health care.

WHAT IS MEANT BY PREPAID HEALTH CARE PLAN CONTRACTOR?

A prepaid health care plan contractor may fall in one of three groups. (1) Any medical group or organization which undertakes under a prepaid health care plan to provide health care benefits (e.g., Kaiser Medical Center); (2) any nonprofit organization which undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care (e.g., HMSA); or (3) any insurer who undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care (e.g., Aetna Life Insurance Company). Note: The names of contractors cited above do not constitute an endorsement. They are used strictly as illustrations.

WHO SELECTS THE PLAN TYPE AND CONTRACTOR FOR THE EMPLOYEES?

The employer selects the plan type and the contractor. The plan type may be either a plan which requires the prepaid health care plan contractor to furnish the required health care benefits, or a plan which requires the prepaid health care plan contractor to defray or reimburse the expenses of health care. This election is binding for one year.

IS SHARING OF PREMIUM COSTS PERMITTED?

While the employer has the option of paying the entire premium, an employee may be required to share the cost. The employer must pay at least one-half of the premium and the employee the balance. The employee's share, however, cannot exceed 1.5% of his wages. If the employee's share constitutes less than one-half of the premium, the employer must pay the entire remaining portion. The employer is permitted to withhold the employee's share from the employee's wages.

WHAT TYPES OF BENEFITS MUST BE PROVIDED IN A PREPAID HEALTH CARE PLAN?

An approved prepaid health care plan must include at least the following types: (1) hospital benefits, including in-patient care for at least 120 days of confinement in each calendar year; (2) surgical benefits; (3) medical benefits; (4) diagnostic benefits; and (5) maternity benefits if the employee has been covered by the prepaid health care plan for at least nine consecutive months prior to the delivery. Note: For detailed breakdown of above five types of benefits, see the law.

HOW SOON MUST AN EMPLOYER COVER AN EMPLOYEE?

Any regular employee who has been employed for four consecutive weeks by an employer must be covered at the earliest time thereafter.

WHAT HAPPENS TO AN EMPLOYEE'S COVERAGE IF THE EMPLOYEE IS UNABLE TO WORK BECAUSE OF DISABILITY?

If an employee is disabled and unable to work, the employer must continue the coverage by paying for the employer's share of the premium costs. The obligation is to continue the longer of the following periods: Three months following the month during which the employee became disabled, or following the period for which the employer has undertaken the payment of the employee's regular wages. An employee must keep up the employee's payments.

WHAT EFFECTS WILL THIS NEW LAW HAVE ON AN EXISTING PREPAID HEALTH CARE PLAN?

A prepaid health care plan shall qualify as a plan providing the required mandatory benefits (see above) if it provides health care benefits equal to, or medically reasonably substitutable for, the benefits provided by prepaid health care plans specified above, or if it provides sound basic hospital, surgical, medical and other health care benefits as determined by the director after advice by the prepaid health care advisory council.

WHO DETERMINES WHETHER OR NOT A PREPAID HEALTH CARE PLAN MEETS THE LAW'S REQUIREMENTS?

This determination is made by the Director of the State Department of Labor after advice by a seven member prepaid health care advisory council consisting of representatives of the medical and public health profession, representatives of consumer interests and persons experienced in prepaid health care protection.

WHAT EFFECTS WILL THIS NEW LAW HAVE ON COLLECTIVE BARGAINING?

(1) Employees will be free to bargain collectively for different prepaid health care plan coverage or for a different allocation of the costs thereof, or for the employer to provide the health care specified in the agreement. (2) An employer or group of employers will be deemed to be in compliance with the law if they provide health care services pursuant to a collective bargaining agreement and the services are available to all other employees not covered by such agreement. (3) An employer will be required to provide coverage for employees not covered by the health care provisions of the applicable collective bargaining agreement to which the employer is a party.

WHAT ABOUT EXISTING EMPLOYER-SPONSORED PLANS COVERING HAWAII-BASED EMPLOYEES?

Any out-of-state employer sponsored health care plan affecting employees of this state must be adjusted by June 11, 1975, so as to meet the law's requirements.

CAN AN EMPLOYEE'S RIGHT TO BE COVERED BY A HEALTH CARE PLAN BE WAIVED?

An employee may not waive individually all or part of the required health care services.

CAN AN EMPLOYEE AGREE TO PAY A GREATER SHARE OF THE PREMIUM COST?

An employee cannot agree to pay a greater share from wages except for the purpose of paying for the added cost of providing prepaid health care benefits for the employee's dependents ... for the same plan.

MUST AN EMPLOYEE BELONGING TO A FAITH-HEALING GROUP BE COVERED?

No.

CAN EMPLOYERS FORM ASSOCIATIONS FOR THE PURPOSE OF PROVIDING PREPAID HEALTH CARE PROTECTION?

Yes, as long as such health care protection is obtained from an authorized health care contractor.

ARE THERE PENALTIES FOR ANY INFRACTION OF THE LAW?

(1) An employer who fails without good cause to comply with the coverage provisions of the law shall be penalized not less than $25 or $1 for each employee for every day during which such failure continues, whichever sum is greater, and (2) an employer, employee or prepaid health care contractor who willfully fails to comply with any other provisions of any rules or regulations shall be fined not more than $200 for each such violation.

WHAT IS THE PREMIUM SUPPLEMENTATION FUND?

This is a special fund financed and administered by the State for the purpose of assisting certain eligible employers in paying for the cost of providing the required health care benefits.

WHAT ARE THE ELIGIBILITY REQUIREMENTS FOR PREMIUM SUPPLEMENTATION?

An employer is entitled to premium supplementation if: (1) less than 8 workers are employed; (2) the employer's share of the cost of providing health care services exceeds 1.5% of the total wages payable to employees, and (3) the amount of such excess is greater than 5% of the employer's income before taxes directly attributable to the business (see below for definition).

HOW MUCH CAN AN EMPLOYER RECEIVE FROM THE PREMIUM SUPPLEMENTATION FUND?

The amount of premium supplementation shall be that part of the employer's share of the premium cost which exceeds the limits specified above.

HOW DOES AN EMPLOYER CLAIM PREMIUM SUPPLEMENTATION?

The employer must complete a prescribed claim form furnishing information that the employer's share of the premium cost exceeds the limits specified above.

WHAT IS MEANT BY INCOME DIRECTLY ATTRIBUTABLE TO THE BUSINESS?

Income directly attributable to the business means gross profits from the business minus deductions for: (1) compensation of officers, (2) salaries and wages, except wages paid by an individual proprietor to himself, (3) repairs, (4) taxes on business and business property, (5) business advertising, (6) amounts contributed to employee benefit plans, (7) interest on business indebtedness, (8) rent on business property, and (9) other expenses necessary for the current conduct of business.

WHAT DEDUCTIONS ARE EXCLUDED FROM INCOME DIRECTLY ATTRIBUTABLE TO THE BUSINESS?

These are: (1) bad debts, (2) contributions or gifts, other than those listed under 6 above, (3) amortization and depreciation, and (4) losses by fire, storm, casualty, etc.

WHAT AGENCY ADMINISTERS THE HAWAII PREPAID HEALTH CARE LAW?

The Disability Compensation Division of the Department of Labor and Industrial Relations administers the Hawaii Prepaid Health Care Law. If you need further information, please contact the following offices:

19 March 1980

To: Representatives Buchholdt, McKinnon, Parker, Gardiner

From: Sharman Haley
Alaska Public Interest Research Group

Subject: Policy Options in Proposed Health Legislation

The health bill which is presently being drafted at Representative Buchholdt's request is largely modeled after Hawaii and Minnesota laws. These laws do not necessarily conform in detail to the situation in Alaska nor the interests of the Alaska sponsors. This memo calls to your attention various points in the model legislation which you may wish to consider modifying for Alaska. Certain policy considerations in the proposed Medicaid amendments and medically needy program are also discussed.

Health Insurance Minimum Standards and Risk Pooling

The Comprehensive Health Insurance Act adapted from Minnesota law and published in 1980 Suggested Legislation Vol. 39, by the Council of State Governments, is the model for the minimum benefits and risk pooling portions of the proposed legislation. One section in the model bill requires health insurance carriers to offer certain kinds of conversion privilages. For example, when an individual drops out of a group plan (such as with the termination of employment) the carrier must offer an individual plan to continue coverage without the addition of underwriting restrictions. Also, when the primary insured dies, the carrier must allow other individuals covered under the plan to continue coverage. This issue was not addressed in our drafting request. You may wish to consider including language on conversion privilages in the bill.

The model legislation also contains a provision known as "dual option" which requires major employers of 100 or more employees who offer health benefits to their employees, to offer both insurance or membership in a health maintenance organization where both are available. This in part is a policy to promote HMOs. This provision was not included in the drafting request. Since Anchorage may have an HMO in the near future, you may wish to consider a similar provision in the legislation for Alaska.

The model legislation sets out standards for three types of qualified plans. You should be aware that the legislation does not require that only qualified plans can be sold; it merely requires of all carriers that qualified plans be offered to each eligible customer.

The model legislation sets numerous specific dollar amounts. Presumably these amounts will have to be periodically updated for inflation or changes in standards. You may wish to consider adding the provision that the specified amounts are applicable for the first year and subsequently the commissioner may revise and update all the dollar amounts by regualtion.

The model legislation initially sets premiums for the high risk coverage at the average premium level among the five largest carriers in the state for comparable standard risk coverage, and provides that in subsequent years the premiums are to be set such that the plan pays for itself according to actuarial principles. In Minnesota's experience however, the claims in the first 18 months were so high that they feared premiums would have to be raised 100% to cover the claims. To keep the premiums at an affordable level, the legislature amended the statute to limit the premiums to 125% of the standard risk premiums, and provided that assessments made against the carriers by the carriers association to cover the losses due to claims, could offset any income or premium taxes owed to the state by that carrier. Thus the state was made responsible for the losses incurred by the plan. You may wish to consider these amendments for the Alaska legislation as well.

The model act defines dependent as spouse, unmarried child under the age of 19, dependent child under the age of 25 who is a student and

is financially dependent on the parent, or a dependent child of any age who is disabled. You may wish to consider the addition of any household member who is financially dependent on the head of household, in order to include other relatives or non-relatives who may be members of that family unit.

The model legislation, in its itemization of minimum services covered and not covered, states that transportation costs other than ambulance are not covered, This is not well suited to Alaska, since medically necessary travel is frequent and expensive in most parts of the state.

The model legislation includes well baby care, routine physicals, and multi-phasic screening. It should be understood that since these are routine, predictable expenses, they do not fall within the central prupose of insurance -- that is, to insure against risk. Requiring coverage of basic medical care such as these in a consumer-paid plan does no service whatsoever to the consumer, since he or she will pay the full cost of routine care through higher premiums anyway, Requiring coverage of them in an employer-paid plan does offer an advantage to the consumer, of course, because it shifts the costs of these medical services from the consumer to the employer. Arguably there is a public purpose served in this requirement even for consumer-paid coverage -- namely to promote the utilization of these services in the interests of preventive medicine. Since the services have already been paid for, the consumer may as well utilize them. There are experts who claim, however, that routine physical exams, other than pap smears, blood pressure checks, or other procedures tailored to the health risks of the individual patient, are not cost effective; that overall they do not save more expense through the early detection of disease than they consume.*

Mandatory Employer Sponsored Coverage

The Hawaii Prepaid Health Care Act is the model for the mandatory employer sponsored coverage portions of the proposed legislation. The Hawaii

* One school of thought maintains that a more effective approach to preventive medicine would be promoting health education, self-awareness and self-responsibility for maintaining health among consumers. This would also promote early detection and reporting of symptoms when they do occur.

act excludes seasonal employees, in particular the pineapple pickers. The only explanation for this offered by the Hawaii program administrator was that the plantation owners had the political clout to get their employees exempted. Seasonal employees are a large component of Alaska's labor force, and often lack health coverage. You may wish to consider including seasonal employees in the Alaska legislation, or perhaps some form of hour bank for seasonal and temporary employees similar to the union health plans in the construction trades.

The model legislation mandates coverage of the employee only, and coverage of dependants is optional (unless the plan is of lower standard than the largest plan and is approved by the commissioner). You may wish to consider making coverage of dependents mandatory in employer-sponsored plans.

The Hawaii model sets up a separate fund for premium supplementation for qualifying employers. Several sections of the bill are devoted to defining the fund and how it is to be managed. Since the fund is not going to be self-supporting and will require annual appropriations anyway, there is little apparent advantage in terms of management or oversight in establishing a separate fund. You may wish to consider making premium supplementation part of the general fund.

The Hawaii model appears to make employee participation, including payment fo the employee share of the premium, mandatory. The advantage in this is that more people will have coverage and employers cannot pressure employees to decline such coverage. The disadvantage is that employees may be required to contribute to the premium and have no choice whether or not to participate. You may wish to consider making participation voluntary on the part of the employee.

Linkage Between Hawaii and Minnesota Models

The Hawaii and the Minnesota models take two different approaches toward defining the minimum benefit standards for qualified health coverage plans. The Hawaii law is setting standards for mandatory employer coverage. In addition to meeting the very general benefit guidelines itemized in the

law, a qualified plan must meet one of two alternative benefit standards: (1) the benefits must meet or exceed the benefits of the largest plan in the state (in Alaska this would be either the Alaska State employees plan or possible the Teamsters plan); or (2) the benefits must provide a level of coverage deemed satisfactory by the Commissioner. If these benefit plans are more limited than the largest plan, the employer must pay half the premium for dependents as well as the primary insured. The bill also establishes a prepaid health care council to advise the Commissioner on benefit levels. The law is administered by the Department of Labor.

The Minnesota law is setting standards for state qualified plans which all carriers are required to offer. The law specifies the scope of required benefits as well as minimum or maximum limits, copayments, and deductibles for three levels of qualified plans. The law is administered by the Division of Insurance.

While there is no direct conflict between these two laws which are proposed for Alaska, there is some duplication. Since the Alaska Department of Labor has no expertise in the arena of health insurance benefits, you may wish to consider centralizing all responsibility for benefit standards under the Division of Insurance, and leave only the employer compliance responsibilities with the Department of Labor. You should be aware that the Alaska Division of Insurance is already seeking authority to regulate minimum standards for insurance of all kinds in HB882 and SB513.

Consideration should also be given to the question of what standards employer coverage should meet and how they should be set. The Minnesota model specifies the standards for three levels of qualified coverage in law, and requires that employers who offer health coverage provide at least a number two qualified plan. The Hawaii model only provides general guidelines of minimum services to be covered, and leaves the other details up to the Commissioner, or else ties the standard to the benefits provided by the largest plan in the state. The state employees plan and the Teamsters plan are both more comprehensive than the minimum standards for the number two qualified plan, but of course would also be more expensive. The Minnesota approach is much simper than the Hawaii approach and gives the legislature

greater control over the minimum standards. The standard required for employer plans does not necessarily have to be the same standard required for a qualified plan offered to individual consumers, particularly in the area of routine care for the r asons discussed in an earlier section.

Medicaid Medically Needy

Federal financial participation requirements in the Medicaid medically needy program set the maximum income threshold for medically needy program eligibility at 133% of the Aid to Families with Dependent Children income standard for a household of equivalent size. The minimum income threshold is set equal to the Adult Public Assistance standard or the AFDC standard, whichever is higher, for a household of equivilent size. Since in Alaska the AFDC standard is so much lower than the APA standard, $350 for an AFDC family of two compared to $608 for two APA elibibles, the federally mandated minimum medically needy income threshold for a family of two, $608, is higher than the federally mandated maximum income threshold of $466.55 ($350 x 1.33). These are clearly impossible criteria. The federal policy manual appears to resolve the contradiction in favor of the lower standard. The result is that for adult elibibles the Medically needy income threshold is not much higher, and for a two person household is actually lower, than the income standard for the regular Adult Public Assistnace program. (See attachment) This inconsistency could be left as is, or resolved in one of two ways: (1) the AFDC standard (which is lower than AFDC standards in many other states and a virtually impossible budget for a family in Alaska) could be raised; or (2) the medically needy income threshold could be set higher than 133% of the AFDC standard and the program could by financed entirely by the state.

Medicaid Optional Services

The Medicaid optional services included in the drafting request were the nine uncovered services most often requested by Medicaid clients and most recommended by social workers, as reported in OPTING: A Study of Medicaid Client Need. A copy of Table 2 from this report is attached. A complete listing of Medicaid optional services is attached should you wish to consider other optional services.

Re: HCS CS SS SB 227 - Health Legislation

HCS CS SS SB 227, "An Act relating to the health of residents of the state," was passed out of the House HESS Committee on Wednesday, May 21. I am supplying you with a copy of the bill summary and the accompanying fiscal note. I am also enclosing a copy of the work draft that was passed out of Committee. I expect that the final version of the bill will be printed this afternoon.

Very briefly, Section 1 of the bill establishes a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state. This section of the bill is designed to pick up high-risk persons and other uninsurables in the state for whom health coverage is now unavailable.

Sections 4 through 7 of the bill comprise the original CS SS SB 227, sponsored by Senators Coletta, Hohman and Stimson, and require state employee health insurance to include coverage for alcoholism and drug dependence.

Section 8 of the bill requires the Commisssioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when cost effective. The bill authorizes the Department to make interim peyments to providers who serve a large volume of state medical assistance clients. The bill also requires the state to pay interest to providers on overdue medical assistance bills.

Sections 9 and 10 of the bill expand the state's Medicaid program to include all services and eligibles qualifying for federal financial participation.

Finally, in Section 11, a medically needy program is established under the state General Relief program with an income standard set at 150% of the poverty guideline. Persons whose income exceeds the standard become eligible when they spend their excess income on medical bills.

The fiscal note for the bill includes approximately $ 8 million from the state's General Funds, $ 22,800 from other state funds and approximately $ 8 million in federal funds.

HCS CSSS SB 227 (HESS)

BILL SUMMARY

(revised 5/21/80)

The basic concept of the first section of the bill is to establish a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state, regardless of underwriting risk. This section is modeled after Connecticut law.

AS21.50.010 Each carrier in the state which offers individual health coverage is required to make an ndividual comprehensive health care plan available to each resident of the state who is not eligible for Medicare. Each carrier in the state which offers group health coverage is required to make a group comprehensive health care plan available to every resident employer of three or more employees. The required coverage may be provided by a carrier or through the reinsurance association, but in the former case the premium charged may not exceed the applicable association premium. The bill does not preclude a carrier from carrying other kinds of health insurance nor does it require a carrier to provide coverage to a person or group who already has coverage.

AS21.50.020 The required comprehensive health plans must cover the services itemized. A choice of $100, $500, or $1000 deductible is provided, and the maximum co-payment is set at 20%. The sum of co-payment and deductibles may not exceed $1000 for an individual or $2000 for a family before benefits

are paid at 100%. The maximum lifetime benefits limit may not be less than $1,000,000. Pre-existing conditions may only be excluded if the condition was treated or medical advice was sought within six months prior to the effective date of coverage, but in any case may not be excluded from coverage for more than twelve months. The plans need not cover occupational injuries, cosmetic treatment, custodial care, services which are not medically necessary, services which are covered under an automobile liability policy, or other specified expenses. Group comprehensive health care plans must also cover dependents.

AS21.50.030 The Health Reinsurance Association is established consisting of all licensed health insurance carriers in the state. The board of governors and a plan of operation which addresses itemized issues are both subject to approval by the director. The authority to issue health insurance, to establish rates, to administer reinsurance, to pool risks, and other general powers are granted the association.

Each association member must designate the classes of risk which it elects to have written by or reinsured by the association. Individual lives may not be selected out of a group for reinsurance. Premium rates may not be excessive, inadequate, or unfairly discriminatory, nor may they exceed 125% of rates for standard risk groups. All rates are promulgated through the association by an actuarial committee.

Losses of the association are assessed to members. Members in turn may credit the assessed claims losses, but not

assessed administrative losses, against their premium or income tax. If the assessment exceeds their tax liability, the Commissioner of Revenue reimburses the carrier for the excess loss. Periodic audits are required.

AS21.50.040 Hospital or medical service corporations (such as Blue Cross) are given the option of participating in the Health Reinsurance Association or of setting up their own parallel residual market association under the same guidelines and standards.

AS21.50.050 The regulatory and oversight powers and administrative duties of the director of insurance are enumerated.

AS21.50.100 Definitions

Sections 2 and 3 are technical amendments to other chapters of the insurance code to bring them in conformity with Section 1.

Sections 4 through 7 of the bill amending AS39.30 comprise the original CSSSSB 227 and require state employee health insurance to include coverage alcoholism and drug dependence. Minimum benefits in the state employees plan are defined to include inpatient detoxification, inpatient treatment and outpatient treatment. Coverage may not exclude dependents or pre-existing alcoholism conditions.

Section 8 of the bill amending AS47.05 requires the Commissioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when this would be cost effective. In a separate section, the department is authorized to make interim payments to providers who serve a large volume of state medical assistance clients. And finally, the bill requires the state to pay interest to providers on overdue medical assistance bills at the rate of one percent per month after 30 days and two percent per month after 90 days.

Sections 9 and 10 expand the state's Medicaid program to include all services and eligibles qualifying for federal financial participation.

Section 11 creates a medically needy program under the state General Relief program with an income standard at 150% of the poverty guideline. Persons whose income exceeds the standard become eligible when they spend their excess income on medical bills.

PERSONAL SERVICES

The law in Connecticut on which this bill is based was implemented with no additional staff. Most of the substantive work was performed by the industry. One new position with clerical support may be justified, however, for drafting the regulations, reviewing the organization of the Health reinsurance Association and approving the rates and policy forms developed by the carriers for the comprehensive health plan.

Market Analyst	III	Range 18A	12 months	$29,580

	$40,900

COMMODITIES (1.5 x 500)

$ 750

EQUIPMENT

desks, chairs, bookcase, filing cabinet, caculator, etc.	$ 4,000

PREMIUM TAX OFFSET

Total Comprehensive Health Plan Premiums in Connecticut for 1979: $2,785,367

Total HMA Assessment since April 1, 1976: $ 80,000

Alaska population*/Connecticut population* = 395,000/2,746,000 = .144

Alaska rates/Connecticut rates: 1.35

Factor for change in deductions: 1.05

Factor for change in pregnancy benefits: 1.05

Factor for change in transportation benefits:? fudgefactor: 1.20

Loss factor: (135% - 125%)/135% = .074

Inflaction factor '79 - '81: 1.21

$2,785,367 x .144 x 1.35 x 1.05 x 1.05 x 1.20 x .074 x 1.21 + ($80,000/345) = 87,402

This estimating procedure will tend to overestimate the costs. Nevertheless, there are many difference between Connecticut and Alaska which we cannot account for, and the margin for error is large. Rounding up to an even $90,000 should produce a safe high estimate of the tax loss to the state in a full year of operation. Since FY '81 includes only a half year of operation, only half that amount would be claimed in FY '82.

* Civilian noninstitutionalized population under age 65.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Approximately 8,900 State employees are currently covered under the State Group Health Care Plan.

2. The cost to implement the provisions of this bill will be $2.64 per employee per month.

3. Estimate that the cost to provide continued coverage will increase 20% each year for the immediate future. However, an effective alcoholism/drug dependency program should help to reduce overall health care claim experience in the future.

4. Cost for coverage of political subdivisions (approximately 50 subdivisions) participating in group insurance not included; recommend that the Alaska Municipal League, 204 Franklin St., Juneau, AK 586-1325, be contacted for input.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Medical benefits would be provided to approximately 3,065 new cases under the Medicaid program. Administration of program benefits would require 15 field staff positions and 2 central office positions, office space, and additional computer time to be divided between the Eligibility Determination and Public Assistance Administration BRUs. Funding is 50% federal except for the Indian Health Care program which is funded at 100% federal funds. Since the bill proposes to add new coverage groups and new categories of coverage to Medicaid, there will be a reduction in General Relief Medical program expenditures as indicated on page 2. Thus, the actual increase in state General fund revenues needed for this increased Medicaid coverage is 8,477.5 - 4,471.8 = 4,005.7.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Funding necessary to make interest payments to providers for Medicaid and General Relief Medical clean claims not processed within 30 days of receipt by the Department. Federal law requires states to process 90% of Medicaid clean claims within 30 days of receipt, however no provision is made under federal law for funds to be used to make interest payments. Thus, all interest payments must be made using state funds only.

BILL SUMMARY

The basic concept of the first section of the bill is to establish a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state, regardless of underwriting risk. This section is modeled after Connecticut law.

AS21.50.010 Each carrier in the state which offers individual health coverage is required to make an individual comprehensive health care plan available to each resident of the state who is not eligible for Medicare. Each carrier in the state which offers group health coverage is required to make a group comprehensive health care plan available to every resident employer of three or more employees. Every self-insured employer group is required to make an individual comprehensive health care plan available as a conversion privilege to each group member. The required coverage may be provided by a carrier or through the reinsurance association, but in the former case the premium charged may not exceed the applicable association premium. The bill does not preclude a carrier from carrying other kinds of health insurance nor does it require a carrier to provide coverage to a person or group who already has coverage.

AS21.50.020 The required comprehensive health plans must cover the services itemized. A choice of $100, $500, or $1000

deductible is provided, and the maximum co-payment is set at 20%. The sum of co-payment and deductibles may not exceed $1000 for an individual or $2000 for a family before benefits are paid at 100%. The maximum lifetime benefits limit may not be less than $1,000,000. Pre-existing conditions may only be excluded if the condition was treated or was apparent and should have been diagnosed or treated within six months prior to the effective date of coverage, but in any case may not be excluded from coverage for more than twelve months. The plans need not cover occupational injuries, cosmetic treatment, custodial care, services which are not medically necessary, services which are covered under an automobile liability policy, or other specified expenses.

AS21.50.030 Group comprehensive health care plans must also cover dependents and must include the privilege to continue coverage for a specified period of time upon leaving the group by reason of layoff, leave, termination, death or illness. Unmarried children remain eligible as dependents as long as they are under 19, under 23 and a full-time student, or disabled. Spouses and resident household members who are financially dependent on the employee are also covered as dependents up until they become elegible for Medicare. Group members must also be provided the privilege to convert to an individual plan immediately on the termination of group coverage.

AS21.50.040 Individual comprehensive health care plans must provide the privilege for dependents to continue coverage after the death of the primary insured until the coverage would have otherwise ceased.

AS21.50.050 The Health Reinsurance Association is established consisting of all licensed health insurance carriers in the state. The board of directors and a plan of operation which addresses itemized issues are both subject to approval by the director. The authority to issue health insurance, to establish rates, to administer reinsurance, to pool risks, and other general powers are granted the association.

Each association member must designate the classes of risk which it elects to have written by or reinsured by the association. Individual lives may not be selected out of a group for reinsurance. Premium rates may not be excessive, inadequate, or unfairly discriminatory, nor may they exceed 125% of rates for standard risk groups. All rates are promulgated through the association by an actuarial committee.

Losses of the association are assessed to members. Members in turn may credit the assessed claims losses, but not assessed administrative losses, against their premium or income tax. If the assessment exceeds their tax liability, the Commissioner of Revenue reimburses the carrier for the excess loss. Periodic audits are required.

AS21.50.060 Hospital or medical service corporations (such as Blue Cross) are given the option of participating in the

Health Reinsurance Association or of setting up their own parallel residual market association under the same guidelines and standards.

AS21.50.070 The regulatory and oversight powers and administrative duties of the director of insurance are enumerated.

AS21.50.080 The conversion privileges required for group comprehensive health care plans under AS21.50.030 are also required for all group health policies issued in the state after January 1, 1981.

AS21.50.090. A voluntary health premium supplementation program is established for employers who choose to provide health benefits for their employees and meet certain financial hardship criteria. Premium supplementation is at the rate of 80% of the premium cost which exceeds 1.5% of the payroll plus 4% of the employer's income before taxes from that business. This section is modeled after Hawaii law.

AS21.50.200 Definitions.

Sections 2 through 5 of the bill amending AS39.30 comprise the original CSSSSB 227 and require group health insurance to include coverage for alcoholism and drug dependence. Minimum benefits are defined to include inpatient detoxification,

inpatient treatment and outpatient treatment. Coverage may not exclude dependents or pre-existing alcoholism conditions.

Section 6 of the bill amending AS47.05 requires the Commissioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when this would be cost effective. In a separate section the department is authorized to make interim payments to providers who serve a large volume of state medical assistance clients. And finally, the bill requires the state to pay interest to providers on overdue medical assistance bills at the rate of one percent per month after 30 days, and two percent per month after 90 days.

Section 7 and 8 expand the state's Medicaid program to include all services qualifying for federal financial participation.

Section 9 creates a medically needy program under the state General Relief program with an income standard at 150% of the poverty guideline. Persons whose income exceeds the standard become eligible when they spend their excess income on medical bills.

IMPACT ON INSURANCE CARRIERS

Minnesota Experience

The Minnesota Comprehensive Health Act took effect January 1, 1977. At year end, 1976, the following statistics were compiled:

Out of

751 carriers licensed to write health and accident insurance in the state,

42 carriers withdrew from the state rather than comply with the law. Of these,

25 never wrote any health insurance in the state anyway. The remaining

17 carriers that withdrew had a combined volume of

$888,000 in health insurance premiums in Minnesota (less than 0.2% of the total) or an average of

$52,200 in premiums per carrier. The largest carrier that withdrew reported a volume of

$428,000 in accident and health premiums.

Since the time these statistics were compiled, other carriers have dropped their accident and health business in Minnesota, and some that originally withdrew have resumed their accident and health line of business in the state again.

Mr. Caroll Calloway, Assistant General Counsel for the Health Insurance Association of America, discussed several reasons that carriers might have preferred to stop doing accident and health business in Minnesota rather than comply with the Comprehensive Health Act.

The first objection was that many carriers specialize in a particular type of insurance and do not underwrite comprehensive policies. The law requires them to offer comprehensive plans, and does not allow them to refuse a client for reasons other than that the client is an uninsurable risk. Another objection was that the required conversion privileges obligates a carrier that specializes in group policies to also write individual conversion policies.

Mr. Calloway stated that the insurance carriers like the Connecticut comprehensive health act, because in Connecticut the underwriting burden for the mandated coverage is not placed on the induvidual carriers, but on the association. The association in Connecticut develops and underwrites the comprehensive health plan which the carriers are obligated to make available to their clients. The Minnesota law also provides for reinsurance and administration by the association of all required types of coverage and the association has the ability to develop prototype plans for use by any carrier which does not choose to develop and issue its own qualified plans. The Minnesota carriers association has refused, however, to reinsure lines of coverage mandated by the act, other than the state plan for high risk clients, according to Mr. Calloway. Thus it is not the provisions of the law which place an insurmountable burden on the carriers, but the practice of the assocaition, which of course is run by the carriers themselves.

The third objection was the "major medical roll on" which requires carriers to offer major medical coverage to their client with unqualified plans. They regard this as an impairment of contract. This section to which the carriers strenuously object could easily be deleted without significantly weakening the bill, in light of the requirement that carriers must offer their client a comprehensive qualified plan with major medical coverage anyway.

The carriers which might find compliance with HB 977 most difficult perhaps are those who write only accident or illness indemnity policies with fixed reimbursement rates (for example, $50 per day for every day in the hospital). These companies are not set up to handle claims based on expenses incurred as required of a qualified plan under HB 977. The largest carrier of this type in Alaska has a premium volume of $723,000. It is not known how many other carriers of this type there are, nor what their premium volume might be. While it is perhaps undesirable to adversely affect any Alaska business with this legislation, it is notable that those for whom compliance with HB 977 would be most difficult are precisely those carriers who specialize in limited types of accident and health coverage which afford the least financial and medical protection to consumers.

POSITION PAPER
ON
HOUSE CS FOR CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 227 (FINANCE)

"An Act relating to the health of residents of the State; and providing for an effective date."

1. Departmental Overview of House CS for CS for SS for SB 227 (Finance)

The Department of Health and Social Services will primarily reserve its comments to Sections 5-15 of the bill, as the earlier sections are concerned with health insurance. It is our understanding that these issues are planned to be addressed by the Division of Insurance in the Department of Commerce and Economic Development.

The Department, in general, believes that House CSCSSSSB 227 (Finance) takes a multi-faceted approach to a complex problem. It appears to move in too many directions and at too rapid a time frame, which could potentially jeopardize the accomplishment of the goals that the bill seeks to obtain. We recommend that all sections of the bill, except for Sections 5-8, be studied further during the interim to insure that the plan on which the insurance section of the bill is modeled is workable, affordable, and in the best interest of clients and the insurance industry. Sections 5-8 (pilot project for alcoholism insurance coverage for state and other participating government employees) which were the body of CSSSSB 227 (HESS) and the result of over a year's planning. That pilot project concept is supported by state government and the insurance companies that serve Alaska. We, therefore, recommend that the pilot project sections of the current committee substitute be addressed separately in their original piece of legislation. We are concerned that the fiscal impact of the expansion of the Medicaid program and the uncertainities of the health insurance section may outweigh serious consideration of the pilot project for alcohol insurance, which has been studied for a significant period of time.

The Department is also concerned about the massive increase to the Medicaid and General Relief-Medical programs, if House CSCSSSSB 227 (Finance) were to pass. The bill would increase the budgets of these programs by over 50% (if implemented for a full fiscal year) and would require a monumental effort on the part of our Division of Public Assistance to gear up for implementation by the January, 1981 effective date. We are concerned that the current Medicaid service program might suffer during the transition period as a result of such a significant increase. We would, therefore, recommend that if new options to Medicaid or General Relief-Medical were to be added that they be phased-in, rather than adding all remaining services and eligibility groups at a single time. Each service could be evaluated on its own merits, rather than in mass, to determine whether it is cost effective to do so at that time. If options are to be added, the Department is interested in exploring the coverage of the AFDC-unborn child under Medicaid and a limited medically needy program under General Relief-Medical. We are also interested in exploring the addition of prescription drugs to the list of covered Medicaid services, if it can be determined to be cost effective.

We also support in concept the purchase of health insurance policies or contracts for our current Medicaid or other state medical assistance clients when the Department determines that such a purchase would be cost effective. The purchase of such insurance or contracts would allow our clients to be integrated into the normal mainstream of the health delivery system, rather than be stigmatized by having to reveal his or her welfare status each time a medical assistance coupon is presented as payment in the medical provider's office.

II. Departmental Comments on Sections 5-8 (Mandatory State and Other Participating Government Employee Alcoholism and Drug Dependence Coverage)

Sections 5-8 of the bill are essentially the contents of CSSSSB 227 (HESS) which passed from House HESS Committee on April 26, 1979. Sections 5-8 were the result of over a year's work involving insurance companies which serve Alaska, the Division of Insurance, and the Department's Office of Alcoholism and Drug Abuse. The sections authorize a limited pilot project to mandate health insurance coverage for the diagnosis and treatment of alcoholism and drug dependence for state and other participating government employees. The Department of Health and Social Services continues to support this concept. The Department of Administration in 1979 estimated the cost of such coverage for state employees to be $338,400 for FY 81.

Authorization of such a pilot project would allow for the testing of the cost effectiveness and merits of mandatory employee alcoholism and drug dependence treatment coverage on a statewide basis. The project will test if coverage were available, would state employees in need of such services would seek them earlier in illness and thus potentially reduce costs for later medical care. The benefits to the employer through the early diagnosis and treatment of alcoholism or drug dependence could be increased employee productivity, reduced absenteeism, decreased sick leave utilization, fewer disability benefit payments, and reduced cost for hospitalization for injury- or disease-related problems.

We support Sections 5-8 of the bill.

III. Specific Department Comments on 9 Through 10 (Medical Assistance)

Section 9 - AS 47.05.070(a) - (Page 9, line 18)

The Department, as mentioned earlier in the position paper, is in favor of purchasing services through health insurance policies or contracts for medical assistance clients only if such purchase is more cost effective than traditional methods. The Department has no problem with the mandatory nature of the language in this section, but notes that there is currently no statutory prohibition against such purchase. Therefore, although these sections would facilitate the purchase of insurance for medical assistance clients, it is not absolutely essential to authorize it.

Section 9 - AS 47.05.110 - (Page 10, lines 24-29 and page 11, lines 1-4)

Under present Medicaid law, the Department is required to pay 90% of "clean claims" within 30 days of receipt, and 99% of "clean claims" within 90 days of receipt. The Department supports the idea that medical providers should not suffer financially because of payment delays after a reasonable period. We would though recommend that payment of interest commence at 60 days rather than 30 days after presentation of "clean claims." This is generally considered reasonable turnaround in Alaska by health providers for payments from private insurance carriers due to uncertainty of mail deliveries. Also, we have been informed by the federal Medicaid program that federal funds are not available for interest payments on late Medicaid claims.

Section 9 - AS 47.05.120 - (Page 11, lines 5-19)

Add definitions for "remedial care," "non-exclusive contract," and "health care service contracts."

Section 10 - AS 47.07.020(b) - (Page 11, lines 20-23) and Section 13 - (Page 12, line 13)

This section would amend Medicaid law to provide coverage for all optional groups not currently entitled to Medicaid benefits in Alaska, primarily the unborn child group, the unemployed fathers, and the medically needy group.

Also, Section 13 removes the requirement that future additions of optional eligible groups to Alaska's Medicaid program must be approved by the Alaska State Legislature. Therefore, when Congress authorizes a new Medicaid optional eligibility group in the future, Alaska statutes do not require revision in order for the State to be required to automatically begin covering the groups.

The Department recognizes the value of the addition of the unborn child group to Medicaid to assist in proper health and development of children to low income women through access to necessary pre-natal care. We believe the addition of this group to Medicaid will have little impact on the program's expenditures. We can see the need for health care coverage to the medically needy and to the unemployed fathers under Medicaid but the cost of these options would be substantial and would be covering a greatly expanded group of clients. The Department supports the concept of a limited medically needy program under General Relief-Medical including only the aged, blind, and disabled until such time that we can fully assess the monetary and administrative costs of more expanded coverage.

Section 11 - AS 47.07.030 - (Page 11, lines 24-28)

This section as amended would change Medicaid law to dramatically expand medical services offered under the Medicaid program. It also removes the requirement that future additions to Alaska's Medicaid services must be approved by the Alaska State Legislature. Therefore, when Congress authorizes a new Medicaid optional service in the future, the Alaska statutes need not be amended in order for the State to be required to automatically offer the service.

Legislative Affairs Agency Department of Health and Social Service

The Department recommends that each service addition should be evaluated on its own merit, perhaps adding only those services where it appears cost effective, in terms of saving general fund dollars to do so. Also, all services added in mass would cause administrative problems. A phase-in model would be more appropriate if the Legislature decides to pursue this section.

Section 12 - AS 47.25.120 - (Page 11, line 29 and Page 12, lines 1-12)

This section as amended would add broad medically needy coverage under the State General Relief-Medical program. The Department supports the concept of a more limited medically needy program including only the aged, blind, and disabled until we can gain some experience regarding monetary and administrative burdens.

Section 14 - (Page 12, lines 14-15 and Page 12, line 16)

Sections 10-12 would add all remaining optional eligibility groups and services to Medicaid and add a broad medically needy program to General Relief-Medical. The bill provides for an effective date of January 1, 1981 for these sections. In light of the size of these additions (over $31 million for a full fiscal year), we would recommend a phase-in model over a period of years, beginning July 1, 1981, in order to administratively prepare for these changes with the minimum of adverse impact during the transition period to clients and providers.

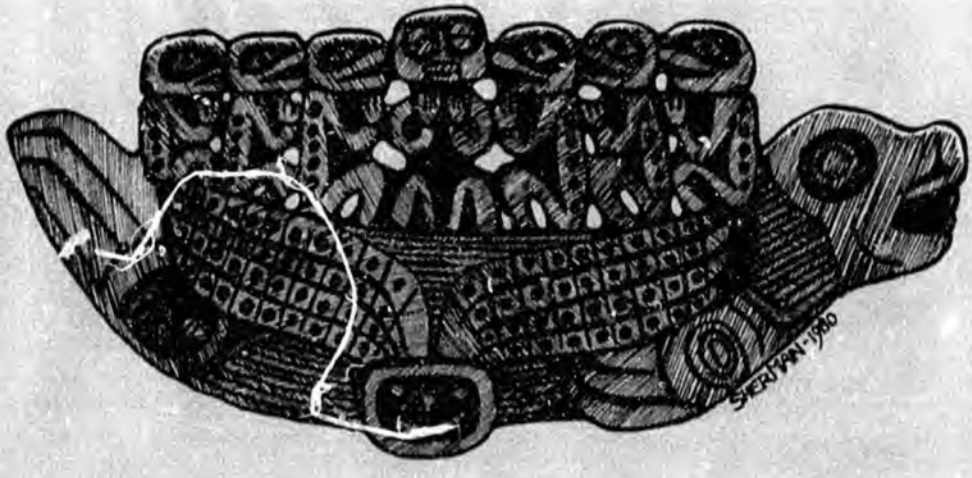
MEDICAID PROGRAM

in Alaska



Administered by:

STATE OF ALASKA
DEPARTMENT OF HEALTH AND SOCIAL SERVICES
DIVISION OF PUBLIC HEALTH

Jay S. Hammond, Governor Helen D. Beirne, Commissioner

The Medicaid Program pays medical expenses for eligible, low-income people. Under agreement with the U.S. Department of Health, Education, and Welfare, the Alaska Division of Public Assistance runs the program through its local offices and fee agents. This booklet explains the rules, and tells you how to apply for and use Medicaid coupons. For more information, ask your local public assistance office or village fee agent.

1 FILE AN APPLICATION FORM

* To be eligible for Medicaid you must usually be eligible for the:

  Aid to Families with Dependent Children Program (AFDC)
  OR
  Adult Public Assistance Program (APA)
  OR
  Supplemental Security Income (SSI)

* Certain people not eligible to receive benefits under the AFDC, APA, or SSI programs may still be eligible to receive Medicaid. This special group of people includes:

  1. Juveniles who are in the protective custody of the Department of Health & Social Services whose available financial resources do not exceed the AFDC need standard for a single person;

  2. Persons in health care facilities on an inpatient basis whose income does not exceed 300 percent of the current SSI payment standard;

  3. All individuals under age 21 who would be, except for age or attendance requirements, dependent children under the AFDC program;

  4. Certain families who become ineligible for AFDC payments due to increased earnings;

  5. Those reasonably classified individuals under age 21 who are in an intermediate care facility for the mentally retarded or persons with related conditions;

  6. Those reasonably classified individuals age 21 and under who are receiving active treatment in an inpatient psychiatric facility;

  7. Individuals under age 18 who meet the SSI eligibility requirements.

* The public assistance office or village fee agent will give you an application for either AFDC or APA. Your local federal Social Security Administration office or their traveling representative will help you apply for SSI. Addresses for Social Security offices are listed in Section 13 of this booklet.

* If you qualify for AFDC or APA, you will be mailed a check and Medicaid coupons within approximately 30 days from the date the office received your application.

* If you qualify for SSI, you must still apply separately at the public assistance office for APA cash benefits and for Medicaid coverage.

* You can apply for food stamps at the same time you apply for AFDC or APA and Medicaid.

2 AFDC, APA, AND SSI

* Aid to Families with Dependent Children (AFDC) is a program which gives money for children of eligible low-income families who are deprived of one or both of their natural or adopted parents.

* Adult Public Assistance (APA) is a program that includes three categories of eligibility (Old Age Assistance, Aid to the Blind, and Aid to the Disabled) and provides a supplemental payment to low-income adults whose income is not enough to provide for their own basic needs. All adults who qualify for APA must be either blind, OR 65 or older, OR physically or mentally disabled.

* Supplemental Security Income (SSI) is a federal program for low-income adults who are either blind, OR 65 or older, OR physically or mentally disabled. It also provides cash assistance for low-income children who are either blind or disabled.

3 HAVE AN INTERVIEW

* When you turn in your application, a worker will usually hold a confidential interview with you.

* At the interview, the worker will explain the program rules and go over the information on your application. The worker will help you complete any of the application form you have not been able to fill out. Ask the worker to explain anything that you do not understand. It's important that you understand the rules.

* Interviews are held at the public assistance office or at the fee agent's location. If no one in your household can go the interview, an adult friend or relative who knows your circumstances may go to be interviewed for you.

* If you are disabled or are unable to go to the interview and no one can go for you, let the office know. It may be possible to arrange an interview at your home or by telephone.

* If you live too far from an office or a fee agent, if you are ill, or if you do not have any transportation to an office, you won't have to have an interview.

4 MEET ELIGIBILITY RULES AND PROVIDE PROOF THAT YOU ARE ELIGIBLE

When you apply, you must show the Division of Public Assistance certain papers and give them information to prove you are eligible. Papers you need for proof may include birth certificates, paycheck stubs, fish tickets, recent income tax returns or other proof of your age, relationship, and income.

You should also be prepared to list your resources (property other than your home) such as cars, boats, savings accounts, and other valuables.

If you have trouble getting the documents or information you need, the division will help you. If the papers are not available, you may give the name of someone outside of your household and family, such as employer, who can confirm your statements.

Eligibility rules and proofs you may have to provide to support your application are different for each type of assistance. Your eligibility worker or fee agent will tell you what documents and information are necessary.

5 RECEIVE A NOTICE THAT THAT TELLS YOU IF YOU QUALIFY

* After reviewing your application, the public assistance office will send you a Notice of Finding.

* If you do not qualify, the Notice will explain why.

* If you do qualify, the Notice will explain when your cash and Medicaid benefits will begin. It's possible that your bills from past months may also be paid by Medicaid.

* If you think your application has been wrongly denied, you should tell the public assistance office. If they do not agree, you can ask for a fair hearing. For more information about fair hearings, see Section 10.

6 RECEIVE YOUR MEDICAID COUPONS

* If the office finds that you are eligible, you will get your Medicaid coupons no later than 30 days from the date you first applied.

* Medicaid coupons are either handwritten or printed by machine. Both types of coupons are equally valuable.

* You will receive five Medicaid coupons. They will be printed with the names of everyone in your household who is eligible for Medicaid. Everyone listed can legally use the coupons.

* Medicaid coupons are dated for one month and can only be used to pay for medical care received during that month.

* If you need more Medicaid coupons, you can request them from the public assistance office.

* Medicaid is a "last pay" program. This means that Medicaid will only pay your health provider for the part of his bill that isn't paid by your private or union health insurance, by Medicare, (see Section 13) or other insurance programs. When you apply for Medicaid, you must list any other sources of medical payments you have. You should also tell your doctor, hospital, etc. about them when you get service.

* To use your Medicaid coupons you must give them to the doctor, hospital, or other health care provider when you receive medical care. It is very important to remember to give your Medicaid coupon to your health care provider. The coupon tells the doctor, clinic, etc. that you are eligible for that month for Medicaid benefits. Without the coupon, your bill cannot be correctly submitted for payment.

7 USE YOUR MEDICAID COUPONS

Most health care providers in Alaska participate in the Medicaid program. This means you can usually choose the doctor you would like to visit. If you are eligible for both Public Health Service and Medicaid, you also have the choice of going to the local Alaska Area Native Health Service (AANHS) or a private doctor.

If the medical treatment you need is not available in your area, payment for transporation may be provided to the nearest location where you can receive the necessary medical care.

When you are Medicaid-eligible and receive a Medicaid-covered service from a doctor or other health practitioner who is enrolled in the Medicaid program, he cannot ask you to pay for all or for any part of that service--even if Medicaid and any other health coverage you have doesn't pay all of his charges. If he bills the Division of Public Assistance, he must accept the Medicaid fee as the total payment for your bill.

Medicaid doesn't pay for every kind of medical and psychological care. If you want to be sure that Medicaid will pay for the services you want or need, your medical provider can tell you. The following list of services are paid by Medicaid:

1. hospital--inpatient and outpatient
2. skilled nursing facility
3. intermediate care facility
4. intermediate care facility for mentally retarded persons and persons with related conditions
5. laboratory and X-ray services
6. physician services
7. visual care services and dispensing
8. opthalmic materials
9. medical transportation
10. speech, hearing, and language services
11. psychiatric facility services (if you are under 21 or over 65)
12. home health care services
13. community mental health clinics
14. family planning services
15. outpatient surgical care centers
16. rural health clinics
17. early periodic screening, diagnosis, and treatment (EPSDT) of individuals under 21 years of age

Payment of service is made directly to doctors, hospitals, and other providers of health care based on invoices submitted by the provider. Invoices must be accompanied by a coupon which you must surrender at the time service is provided.

8 SERVICES NOT COVERED BY MEDICAID

Most Medicaid-eligible people automatically qualify for coverage under the General Relief-Medical program (GRM). Payment is available through the GRM program for all Medicaid-eligible people for the medical services and supplies listed below when those services are not otherwise available under the Medicaid program :

(1) dental care-limited to emergency treatment for relief of pain and acute infection;

(2) family planning services;

(3) pharmaceuticals and over-the-counter drugs;

(4) physical and occupational therapy;

(5) prosthetic devices and medical supplies.

More information about the GRM program is provided in Section 13 of this booklet.

It is your responsibility to pay for any medical treatment not covered by Medicaid or GRM.

The following services are NOT covered by Medicaid :

(1) Any medical expense which is not reasonably necessary for the diagnosis and treatment of illness or injury or for the correction of an organic system;

(2) Items and services not properly prescribed or determined necessary by a health care practitioner;

(3) Expenses incurred for evaluative or periodic check-ups, examinations, or immunizations in connection with the participation, enrollment, attendance, or accomplishment of a program or activity not related to your physical or mental health or rehabilitation which does not meet the criteria of (1) above, is not provided as part of an EPSDT screeening (see Section 12), or is not a physical examination required by the Division of Public Assistance for the purpose of determining eligibility :

(4) Any expense which is for or in connection with cosmetic therapy or cosmetic surgery, except that Medicaid coverage is available when required for repair of accidental injury, for the improvement of the functioning of a malformed body member, or for the correction of a visible disfigurement which would materially affect your acceptance in society, and when performed within the normal course of treatment or otherwise beginning no later than one year after the event which caused the need for that corrective action;

(5) Any expense which constitutes a non-medical charge imposed by a friend or relative, except when payment is made for medical transporation ;

(6) Any medical expense which is for persons who are in the care and custody of federal, state, or local penal facilities, including juveniles in detention facilities.

* The services of the following practitioners are NOT covered under the Medicaid program in Alaska :

(1) chiropractors;

(2) Christian Science practitioners or theological healers;

(3) naturopaths;

(4) podiatrists;

(5) private psychologists;

(6) any other licensed or unlicensed practitioners not enrolled in the Medicaid Program as providers.

9 YOU MUST REPORT CHANGES IN YOUR CIRCUMSTANCES

* You must report changes promptly.

* You can report changes by contacting the public assistance office or your fee agent. However, it is better to fill out the change report form included with your AFDC or APA check and mail it to the office.

IT IS EXTREMELY IMPORTANT THAT YOU REPORT CHANGES, SO THAT YOUR HOUSEHOLD RECEIVES THE RIGHT AMOUNT OF BENEFITS.

Changes that you must report include :

- Changes in mailing or residence address;
- Movement of a related person into or out of the household;
- Increase, decrease, or change in source of income in the household;
- Any change in resources of the household;
- Any change in the costs of rent, mortgage payment, taxes or insurance;
- Change in eligibility status of any household member for other benefits;
- Death of a household member;
- Change in marital status of any household member;
- Change in school attendance of any household member;
- Placement of a child in the custody of the Department of Health & Social Services;
- Improvement in the condition of a blind or disabled person;
- Refusal to accept vocational rehabilitation services;
- Departure from the state, the United States, or both;
- Refusal to accept treatment, or discontinuing treatment for drug addiction or alcoholism; and
- Admission to or discharge from a public institution, hospital, or nursing home.

10 YOUR RIGHTS

YOU HAVE THE RIGHT TO.....

* Apply for or request information about any assistance payments program or social service available from the Department of Health & Social Services including the following:

  — Family Planning
  -- Child Protection
  --- Alcoholic Rehabilitation
  -- Family Counseling
  -- Homemakers
  --- Day Care
  -- Information and Referral Supportive Services for Children.

  (You are eligible for family planning services for three months from the date of your application for AFDC even if you are found ineligible.)

* Receive courteous and fair treatment with no discrimination because of race, color, creed, religion, political belief, marital status, national origin, age, or sex.

* Receive a prompt written decision of your eligibility.

* Receive help from the department in obtaining child support for your children, if you are requesting assistance for children.

* Receive free, regularly scheduled physical examinations, diagnosis, and treatment for most medical problems for all children and adults under 21 who are eligible for Medicaid, under a program called EPSDT.

* Understand that information you give to the Division of Public Assistance will not be disclosed or used for purposes other than those connected with the administration of the public assistance laws of Alaska.

* Request a hearing by a fair and impartial person if you are dissatisfied by a delay or with the decision on your eligibility or the amount of assistance provided to you.

At a fair hearing you can explain to a hearing official why you disagree with an action the public assistance office has taken on your case.

If the hearing official decides you are right, you will continue to receive, or will begin to receive, the correct amount of benefits. If the official decides the public assistance office is right, you will be asked to repay the value of any assistance you were not entitled to receive.

You can ask the public assistance office for a fair hearing in writing, in person, or over the phone.

You can ask a friend or a representative from Alaska Legal Services or anyone else to help you prepare for the hearing and to attend the hearing with you.

The hearing will be scheduled at a time and place that are reasonably convenient for you.

11 YOUR RESPONSIBILITIES

YOU HAVE A RESPONSIBILITY TO.....

* Provide correct and complete information on your application and on all other forms related to your application and your eligibility for assistance.

* Cooperate in providing information about absent parents who are responsible for the children in your care.

* Accept any medical examinations necessary to determine your eligibility.

* Cooperate with the Division of Public Assistance in verifying your situation and the information you provide.

* Register for the Work Incentive Program when your youngest child reaches six years of age.

* Never allow anyone to use your Medicaid coupons or ID card, unless the person is named on the card or coupon as an eligible recipient.

* Apply for and make use of any benefits which you, or those for whom you want help, may be eligible, such as Unemployment Compensation, Social Security, Veteran's Benefits, etc.

* Tell the Division of Public Assistance promptly as changes in your situation occur which may affect your eligibility or the amount of assistance you are paid.

* Advise the Division of Public Assistance of any settlement in your favor as a result of an accident, and grant permission to the State of Alaska, Division of Public Assistance to file a claim against the settlement for medical bills paid in your behalf.

12 EARLY AND PERIODIC SCREENING, DIAGNOSIS & TREATMENT

EPSDT is part of the Medicaid Program and is mainly a preventive health program for children. The goal is to find children who have diseases or abnormalities and to prevent or correct handicaps by giving them medical treatment and rehabilitation as early as possible.

EPSDT services are available to all persons under 21 who are receiving, or are eligible to receive, Medicaid benefits.

EPSDT offers all the coverage available under Medicaid as well as the following special services :

1. physical exam and diagnosis
2. dental care
3. prosthetic devices (leg braces, wheel chairs, etc.) and medical supplies
4. physical therapy
5. immunizations
6. health and nutrition counseling.

13 OTHER MEDICAL PROGRAMS

GENERAL RELIEF-MEDICAL (GRM)

The General Relief-Medical Program (GRM), which is administered by the Division of Public Assistance, is a 100% state-funded program that provides for the payment of providers of medical and emergency dental care for eligible low-income Alaskans.

GRM is considered a "last resort" assistance program. AFDC and APA recipients are automatically eligible for Medicaid and are therefore eligible for GRM benefits only for services not covered by Medicaid.

Applications for GRM are available at State Division of Public Assistance offices.

CATASTROPHIC ILLNESS PROGRAM

The Catastrophic Illness Program,which is administered by the Division of Public Assistance and a committee appointed by the Governor's Office, is a 100% state-funded program that pays providers of medical services.

The purpose of the program is to financially assist residents of Alaska who have suffered and received treatment for a catastrophic illness or injury. A catastrophic illness or injury is one which results in medical expenses of over $1000 during a period of not more than 12 months–after all other sources of medical payment (insurance, etc.) have been used.

Applications for the Catastrophic Illness Program can be obtained at State Division of Public Assistance offices or by writing to:

Catastrophic Illness Program
Division of Public Assistance
Pouch H-07D
Juneau, Alaska 99811

Medicare is a federal health insurance program for certain kinds of individuals regardless of the amount of their income and resources :

-- the aged (65 and older)
-- the blind
-- the disabled
-- persons with certain permanent kidney failure

Although the name of the program "Medicare" is very similar to the name of the program "Medicaid" which is administered by the state Division of Public Assistance, Medicare is a completely separate and different program, administered by private health insurance companies.

Medicare is a two part program. Part A, available to all Medicare beneficiaries without charge, provides coverage for inpatient hospital services. Part B, which is available for a small monthly charge, provides coverage for outpatient and physician services. Detailed information about the Medicare program is available at any Social Security Administration office. In Alaska, Social Security offices are located at the following addresses :

Social Security Administration
P.O. Box 5837
Ketchikan, Alaska 99901

Social Security Administration
P.O. Box 1327

In rural communities where there isn't a district office, the Division of Public Assistance has paid volunteers, called fee agents, who can assist people to apply for Public Assistance Programs.

ABOUT THE COVER:

Antler was used for this spirit canoe in the shape of a sea lion. The seven figures represent people who were drowned when their boat was seized by an octopus. Among Salish groups, shamans performed a ceremony in which they paddled a spirit canoe to the land of the dead to bring back the soul of a person who had become ill because he had lost his soul.

HOUSE CS FOR CSSSSB 227 (FINANCE) REVISIONS

Chapter 07. Medical Assistance for Needy Persons.

Section
10. Purpose
20. Eligible persons
30. Medical services to be provided
40. State plan for provision of medical assistance
50. Implementation of the medical assistance program
60. Receipt of federal money
70. Reimbursement for cost settled providers
80. Definitions

Sec. 47.07.010. Purpose. It is declared as a matter of public concern that the needy persons of this state receive uniform and high quality medical care, regardless of race, age, national origin, or economic standing. Accordingly, this chapter authorizes the Department of Health and Social Services to apply for participation in the national medical assistance program as provided for under title XIX of the federal Social Security Act. (§ 1 ch 182 SLA 1972)

Sec. 47.07.020. Eligible persons. (a) All residents of the state for whom the Social Security Act requires medicaid coverage are eligible to receive medical assistance under title XIX of that Act (42 U.S.C. 1396 et seq.).

(b) In addition to the persons specified in (a) of this section, the following optional groups of persons for whom the state may claim federal financial participation are eligible for medical assistance:

(1) persons eligible for but not receiving assistance under any plan of a state approved under part A of title IV (aid to families with dependent children), or title XVI (supplemental security income), of the Social Security Act;

(2) persons in a general hospital, skilled nursing facility or intermediate care facility, who, if they left the facility, would be eligible for assistance under one of the federal programs specified in (1) of this subsection;

(3) persons under 21 years of age under supervision of the department for whom maintenance is being paid in whole or in part from public funds and who are in foster homes or private child-care institutions; and

(4) aged, blind, or disabled persons, who, because they do not meet income and resources requirements, do not receive supplemental security income under title XVI of the Social Security Act, and who do not receive a mandatory state supplement, but who are eligible, or would be eligible if they were not in a general hospital or skilled nursing facility or intermediate care facility to receive an optional state supplementary payment;

(5) persons under 21 years of age in an institution designated as an intermediate care facility for the mentally retarded who are financially

* Sec. 10. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act requires optional medical coverage qualifying for federal financial participation are eligible for medical assistance.

CURRENT STATUTE

(6) persons in a medical or intermediate care facility whose income while in the facility does not exceed 300 per cent of the supplemental security income benefit rate under title XVI of the Social Security Act but who would not be eligible for an optional state supplementary payment if they left the hospital or other facility.

(7) persons under 21 years of age receiving active treatment in a psychiatric hospital who are financially eligible as determined by the standards of part A of title IV (aid to families with dependent children) of the Social Security Act.

(c) Receipt of medical assistance under this chapter is considered to be an additional benefit to these individuals and does not affect other assistance payments, federal or state, for which the recipient is eligible.

(d) No additional groups may be added unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 105 SLA 1974; am § 1 ch 117 SLA 1975; am § 1 ch 221 SLA 1976; am § 1 ch 11 SLA 1978)

Effect of amendments. — The 1975 amendment added paragraph (5) of subsection (b).

The 1976 amendment added paragraph (6) of subsection (b).

The 1978 amendment added paragraph (7) of subsection (b).

Legislative history reports. — For report on ch. 182, SLA 1972 (FCCS HCS CSSB 56), see 1972 House Journal, p. 1634. For report on ch. 105, SLA 1974 (CSSB 355), see 1974 Senate Journal, p. 525 and 1974 House Journal, p. 762.

Sec. 47.07.030. Medical services to be provided. Medical services to be offered to eligible persons include inpatient hospital, outpatient hospital, rural health clinic, outpatient surgical care centers, laboratory and X-ray, refractions and eye examinations by ophthalmologists or optometrists, eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist, inpatient psychiatric hospital for persons age 65 or older and persons under age 21, skilled and intermediate nursing home, physician, home health care services, early periodic screening diagnosis and treatment of persons under 21 years of age, clinic services, treatment of speech, hearing and language disorders, and reasonable transportation to and from the point of medical care. No additional services may be provided unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 35 SLA 1973; am § 2 ch 105 SLA 1974; am § 1 ch 12 SLA 1976; am § 2 ch 221 SLA 1976; am § 1 ch 82 SLA 1978)

HOUSE CS FOR CSSSSB 227 (FINANCE) REVISIONS

* Sec. 13. AS 47.07.020(d) is repealed.

* Sec. 11. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. [illegible] to be offered to eligible persons include services eligible for financial participation under Title XIX of the federal Social Security Act.

[1]FMAP Federal Medical Assistance Percentage. Rate of Federal financial participation in a State's medical vendor payment expenditures on behalf of individuals and families eligible under Title XIX of the Social Security Act. Percentages, effective from October 1, 1977, through September 30, 1979, are rounded.

[2]Categorically needy. People receiving federally supported financial assistance.

[3]Medically Needy. People who are eligible for medical but not for financial assistance.

Health Care Legislation

HCS CS SS SB 227

HCS CS SS SB 227 "An Act relating to the health of residents of the state" is an omnibus health bill extending health coverage to several new groups of people and expanding the scope of coverage available.

* STATE HEALTH INSURANCE

The first three sections of the bill establish a state comprehensive health plan and a premium supplement program. The comprehensive health plan is a major medical insurance policy offered by a private carrier under contract with the state to any resident who does not have public or group health coverage. The premium program provides state premium supplements on a sliding scale basis to residents who purchase qualifying individual major medical insurance policies.

* ALCOHOLISM COVERAGE FOR STATE EMPLOYEES

Model benefits for coverage of alcoholism, including inpatient detoxification, inpatient treatment and outpatient treatment are added to the state employees health insurance plan. While the original bill mandated these benefits for all health insurance policies, the HESS Committee substitute bill would field test these new benefits on state employees.

* MEDICAID BY INSURANCE POLICIES OR HEALTH SERVICE CONTRACTS

Section eight of the bill directs the commissioner of Health and Social Services to provide Medicaid coverage through the purchase of private health insurance policies or health service contracts on behalf of Medicaid recipients, when this is found to be cost effective.

* RELIEF FOR MEDICAID PROVIDERS

The bill requires that the state pay interest at the rate of one percent per month to Medicaid providers on bills that are more than one month overdue, and two percent per month on bills that are more than three months overdue. It also allows the state to make an interim payment to large volume Medicaid providers prior to billing and processing of the claims.

* EXPANSION OF SERVICES AND ELIGIBLE PEOPLE COVERED UNDER MEDICAID

Sections nine and ten of the bill expand the state's Medicaid program to include all groups and all services for which federal funding is available. New additions include such eligible and services as unborn children, unemployed fathers, prescription drugs, adult dental care and physical therapy.

* COVERAGE FOR THE MEDICALLY NEEDY

Section eleven of the bill creates a new program of medical assistance for medically needy people under the state's General Relief-Medical program. The income threshold for eligibility is set at 150% of the poverty guideline for Alaska. People whose income exceeds that amount can still become eligible for assistance after they spend their "excess" income on medical bills.

* FISCAL IMPACT

The fiscal note for all these programs includes approximately $8 million from the General fund and $8 million in federal funds for FY81.

Re: HCS CS SS SB 227 - Health Legislation

HCS CS SS SB 227, "An Act relating to the health of residents of the state," was passed out of the House HESS Committee on Wednesday, May 21. I am supplying you with a copy of the bill summary and the accompanying fis al note. I am also enclosing a copy of the work draft that was passed out of Committee. I expect that the final version of the bill will be printed this afternoon.

Very briefly, Section 1 of the bill establishes a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state. This section of the bill is designed to pick up high-risk persons and other uninsurables in the state for whom health coverage is now unavailable.

Sections 4 through 7 of the bill comprise the original CS SS SB 227, sponsored by Senators Coletta, Hohman and Stimson, and require state employee health insurance to include coverage for alcoholism and drug dependence.

Section 8 of the bill requires the Commisssioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when cost effective. The bill authorizes the Department to make interim peyments to providers who serve a large volume of state medical assistance clients. The bill also requires the state to pay interest to providers on overdue medical assistance bills.

Sections 9 and 10 of the bill expand the state's Medicaid program to include all services and eligibles qualifying for federal financial participation.

Finally, in Section 11, a medically needy program is established under the state General Relief program with an income standard set at 150% of the poverty guideline. Persons whose income exceeds the standar become eligible when they spend their excess income on medical bills.

The fiscal note for the bill includes approximately $ 8 million from the state's General Funds, $ 22,800 from other state funds and approximately $ 8 million in federal funds.

CURRENT STATUTE

Chapter 07. Medical Assistance for Needy Persons.

Section
10. Purpose
20. Eligible persons
30. Medical services to be provided
40. State plan for provision of medical assistance
50. Implementation of the medical assistance program
60. Receipt of federal money
70. Reimbursement for cost settled providers
80. Definitions

Sec. 47.07.010. Purpose. It is declared as a matter of public concern that the needy persons of this state receive uniform and high quality medical care, regardless of race, age, national origin, or economic standing. Accordingly, this chapter authorizes the Department of Health and Social Services to apply for participation in the national medical assistance program as provided for under title XIX of the federal Social Security Act. (§ 1 ch 182 SLA 1972)

Sec. 47.07.020. Eligible persons. (a) All residents of the state for whom the Social Security Act requires medicaid coverage are eligible to receive medical assistance under title XIX of that Act (42 U.S.C. 1396 et seq.).

(b) In addition to the persons specified in (a) of this section, the following optional groups of persons for whom the state may claim federal financial participation are eligible for medical assistance:

(1) persons eligible for but not receiving assistance under any plan of the state approved under part A of title IV (aid to families with dependent children), or title XVI (supplemental security income), of the Social Security Act;

(2) persons in a general hospital, skilled nursing facility or intermediate care facility, who, if they left the facility, would be eligible for assistance under one of the federal programs specified in (1) of this subsection;

(3) persons under 21 years of age under supervision of the department for whom maintenance is being paid in whole or in part from public funds and who are in foster homes or private child-care institutions; and

(4) aged, blind, or disabled persons, who, because they do not meet income and resources requirements, do not receive supplemental security income under title XVI of the Social Security Act, and who do not receive a mandatory state supplement, but who are eligible, or would be eligible if they were not in a general hospital or skilled nursing facility or intermediate care facility to receive an optional state supplementary payment;

(5) persons under 21 years of age in an institution designated as an intermediate care facility for the mentally retarded who are financially eligible as determined by the standards of the Federal Aid to Families [illegible]

HOUSE CS FOR CSSSSB 227 (FINANCE) REVISIONS

* Sec. 10. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act all[illegible] optional medical coverage qualifying for federal financial participat[illegible] are eligible for medical assistance.

CURRENT STATUTE

(6) persons in a medical or intermediate care facility whose income while in the facility does not exceed 300 per cent of the supplemental security income benefit rate under title XVI of the Social Security Act but who would not be eligible for an optional state supplementary payment if they left the hospital or other facility.

(7) persons under 21 years of age receiving active treatment in a psychiatric hospital who are financially eligible as determined by the standards of part A of title IV (aid to families with dependent children) of the Social Security Act.

(c) Receipt of medical assistance under this chapter is considered to be an additional benefit to these individuals and does not affect other assistance payments, federal or state, for which the recipient is eligible.

(d) No additional groups may be added unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 105 SLA 1974; am § 1 ch 117 SLA 1975; am § 1 ch 221 SLA 1976; am § 1 ch 11 SLA 1978)

Effect of amendments. — The 1975 amendment added paragraph (5) of subsection (b).

The 1976 amendment added paragraph (6) of subsection (b).

The 1978 amendment added paragraph (7) of subsection (b).

Legislative history reports. — For report on ch. 182, SLA 1972 (FCCS HCS CS-SB 56), see 1972 House Journal, p. 1641. For report on ch. 105, SLA 1974 (CSSB 465), see 1974 Senate Journal, p. 525 and 1974 House Journal, p. 763.

Sec. 17.07.030. Medical services to be provided. Medical services to be offered to eligible persons include inpatient hospital, outpatient hospital, rural health clinic, outpatient surgical care centers, laboratory and X-ray, refractions and eye examinations by ophthalmologists or optometrists, eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist, inpatient psychiatric hospital for persons age 65 or older and persons under age 21, skilled and intermediate nursing home, physician, home health care services, early periodic screening diagnosis and treatment of persons under 21 years of age, clinic services, treatment of speech, hearing and language disorders, and reasonable transportation to and from the point of medical care. No additional services may be provided unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 35 SLA 1973; am § 2 ch 105 SLA 1974; am § 1 ch 12 SLA 1976; am § 2 ch 221 SLA 1976; am § 1 ch 82 SLA 1978)

HOUSE CS FOR CSSSSB 227 (FINANCE) REVISIONS

* Sec. 13. AS 47.07.020(d) is repealed.

* Sec. 11. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include services eligible for federal financial participation under Title XIX of the federal Social Security Act.

[1]FMAP Federal Medicaid Assistance Percentage. Rate of Federal financial participation in a State's medical vendor payment expenditures on behalf of individuals and families eligible under Title XIX of the Social Security Act. Percentages, effective from October 1, 1977, through September 30, 1979, are rounded.

[2]Categorically Needy. People receiving federally supported financial assistance.

[3]Medically Needy. People who are eligible for medical but not for financial assistance.

State Capitol
Juneau, Alaska 99801

Dear Ms. Sorice:

Enclosed, as you requested, is some information on state catastrophic health insurance programs.

Maine, Minnesota, Rhode Island, Connecticut, Hawaii and New York, in addition to Alaska, have enacted catastrophic health insurance legislation. Extensive analysis of these programs has not been performed, however.

Mr. Van Ellett at the Intergovernmental Health Policy Project is in the preliminary stages of preparing a background issue paper on catastrophic programs. He has indicated that he will be glad to offer further assistance in this area. Mr. Ellett can be contacted at:

The Intergovernmental Health Policy Project
Suite 505
1919 Pennsylvania Avenue, N.W.
Washington, D.C. 20006
(202)872-1445

I hope this information is useful. If I can be of further assistance, please feel free to call me.

Sincerely,

Russ Hereford

GR-MEDICALLY NEEDY PROGRAM

* 50% of all tax returns in Alaska for individuals and families reported 1978 Adjusted Gross Incomes of less than $20,000.

* 30% reported incomes less than $10,000; less than $833 per month on the average for 1978.

* Many more Alaskans do not file tax returns at all.

These statistics suggest that for a large number of Alaskans, medical care for age, illness or injury would be unaffordable without health insurance or medical assistance while some of these people may have group insurance or be eligible for Medicaid, Medicare, or Alaskan Native Health Service, many are not eligible for any third party health benefits. The medically needy program created by HCSCSSSSB 227 would be an important medical resource for these people.

The income threshold for the medically needy program is set at 150% of the poverty guidelines for Alaska for 1979, the poverty guidelines were as follows:

Non-farm poverty income guidelines

Family size	Annual	Monthly	150%
1	$4,270	356	534
2	5,640	470	705
3	7,010	584	876
4	8,380	698	1047
5	9,750	813	1219
6	11,120	927	1390

A person or family which is over income becomes eligible for medical assistance under this program if their income in excess of the threshold is spent on medical bills. Essentially, this provides a form of catastrophic coverage for all families, as well as a form of basic coverage for low-income families. The department estimates the new program would serve approximately 2,800 families and individuals.

ADJUSTED INCOME OF ALASKA TAXPAYERS FILING 1978 RETURNS

annual income	average monthly income	percent of taxpayers earning this much or less
$5,000	$ 416	16.5%
10,000	833	29.2
15,000	1,250	40.2
20,000	1,667	49.5
25,000	2,083	57.8
30,000	2,500	65.6

MEDICAID ELIGIBLES *

Currently Covered Eligibles

Child under 18 deprived of parental support or care

Parent or other caretaker relative

Child over 18 but under 21 who is school

All children in foster homes or institutions

All children in psychiatric hospitals

A child in an intermediate care facility for the mentally retarded

Aged, blind, or disabled persons

Eligibles added by HCSCSSSSB 227

Child deprived of support of father due to unemployment

Spouse of disabled parent

Spouse of unemployed father

Pregnant woman and unborn child

All other financially eligible children

Caretaker relative of child over 18 but under 21 and not in school

Individuals who would be eligible for AFDC except for child care costs

Individuals who meet categorical criteria and whose incomes, less medical bills, are below 133% of the need standard (medically needy)

* In addition to these categorical criteria, persons must be financially needy.

Currently Covered Services

Hospital-Inpatient & Outpatient

Skilled Nursing Facility (SNF)

Intermediate Care Facility (ICF)

Intermediate Care Facility for Mentally Retarded persons and persons with related conditions (ICF/MR)

Laboratory and X-ray Services

Physician Services

Visual Care Services, dispensing and ophthalmic materials

Medical Transportation

Psychiatric Facility Services

Home Health Care Services

Early Periodic Screening, Diagnosis, and Treatment of Individuals under 21 years of age (EPSDT)
- a. dental services
- b. prosthetic devices and medical supplies
- c. physical therapy

Community Mental Health Clinics

Family Planning Services

Outpatient Surgical Care Centers

Rural Health Clinics

* Accessible through General Relief-Medical

Services Added By HCS CSSSSB 227

Podiatrist Services

Chiropractic Services

Private Duty Nursing

Personal Care Services

* Physical Therapy

* Occupational Therapy

* Prescribed Drugs

Dentures

* Prosthetic Devices and Medical supplies

Other Diagnostic, Screening, Preventive & Rehabilitative Services

Services to Individuals over 65 year of age in Institutions for Mental Diseases

Services to Individuals over 65 years of age in Institutions for tuberculosis

Other Practitioner Services
- a. private psychologist
- b. nurse practitioner
- c. physician assistant

Clinic Services-other than Community Mental Health Clinics

Services by Christian Science Nurses

Services by Christian Science Sanatoria

*Section 1. AS 18 is amended by adding a new chapter to read:

CHAPTER 27. STATE HEALTH INSURANCE.

Sec. 18.27.010. STATE COMPREHENSIVE HEALTH PLAN

(a) The state comprehensive health plan shall be established by the Commissioner of Administration as provided in AS 18.27.030. The Commissioner shall provide for the underwriting and administration of the state plan through competitive bid. The state plan shall be made available to the public no later than July 1, 1981.

(b) A resident of the state is entitled to enroll in the state plan if:

(1) The resident is not eligible for Medicare or covered under a state or federal health program;

(2) The resident is not covered by a group health insurance plan.

Sec. 18.27.020. STATE HEALTH PREMIUM PLAN (a) A resident of the state is entitled to participate in the state health premium plan if:

(1) The resident is enrolled in the state comprehensive health plan or an individual health insurance policy which is certified by the director of the division of insurance as meeting or exceeding the benefit standards of the state plan; and

(2) the resident is not enrolled in a group health insurance policy or covered under a state or federal health program;

(3) the resident qualifies for a supplement under the formula in subsection (b) of this section.

(b) The amount of the supplement is equal to 80 percent of the monthly premium less 8 percent of the monthly premium for every $100 of the insured's adjusted gross income, as defined in regulation, over $1000 per month. The premium cost of the state plan is the maximum amount of monthly premium which may be used in the calculation of the supplement. The $1000 per month of adjusted gross income used in the calculation shall be adjusted periodically by the commissioner by regulation to correspond with the change in the consumer price index.

Sec. 18.27.030. The commissioner shall:

(a) hold statewide public hearings to determine the major medical insurance needs of Alaskans;

(b) determine the number and characteristics of persons currently not covered by a group health plan or federal or state health program, and estimate the number of persons eligible to participate in the state health premium plan;

(c) conduct an actuarial study to determine the cost of providing insurance covering the services in subsection (a), for the group in subsection (b);

(d) present state health insurance plan to the legislature by January 1, 1981 including:

(1) services to be covered in the state health insurance plan;

(2) the cost of the services to be provided;

(3) the estimated number of Alaskans eligible to purchase the plan and the estimated number of Alaskans eligible to participate in the state health plan; and

(4) the estimated cost of the state health premium plan;

(5) a plan of operation for the state health premium plan which provides for:

(i) eligibility determination;

(ii) prompt payment of premium supplement entitlements to eligible residents or to their insurer;

(iii) reasonable protection against fraud; and

(iv) public awareness of the benefits provided under this chapter.

(6) recommendations for amendments of this chapter;

AS 13.27.040 DEFINITIONS. In this chapter

(1) "commissioner" means the commissioner of administration;
(2) "state plan" means the state comprehensive health plan established under AS18.27.010;

Health Care Survey: Doctors and Medicaid

A survey of 113 Anchorage doctors was conducted in order to determine the percentage of Anchorage physicians presently accepting Medicaid recipients as patients. The surveyors, posing as prospective patients, called each physician's office in an attempt to schedule an appointment. After it had been determined if the physician had any openings available, the method of payment was discussed. The conversation was specifically structured this way, in order to provide an indication of the extent to which the method of payment altered accessibility to health care.

The results of the survey are delineated in the accompanying chart. The percentage break-down is as follows: Pediatrics 40% of the doctors will accept Medicaid coupons, 60% will not; OB/GYN 6% will accept, 94% will not; Family Practice 27% will accept, 73% will not; internal 52% will accept, 48% will not; cardiology 100% will not accept; radiology 100% will accept. The chart clarifies the results, for example, cardiologists are not accepting Medicaid coupons, but they will accept as little as $1.00 per month as payment.

The survey clearly shows the existence of a problem for Medicaid recipients seeking medical care. The brunt of the problem falls on women and children, not only because fewer pediatricians, obstetricians and gynecologists accept Medicaid patients, but also because most Medicaid patients are women and children. For example, in November 1979, 8,418 adults were eligible for Medicaid in Alaska; 6,193 of the total were women. The total number of Medicaid eligible children was 9,998.

There are no existing public facilities in Anchorage which provide prenatal care. There are no OB/GYN's in Anchorage who accept new Medicaid recipients needing gynecological care as patients; only one Anchorage OB/GYN will accept new Medicaid patients for obstetrical care. It has been suggested that those women in need of, and without access to, OB and/or GYN care elicit the assistance of a family practitioner. Presently 73% of the family practitioners will not accept coupons as the method of payment.

It has further been suggested that poor people use the emergency room as a recourse to health care. This is a non-solution; the function of an emergency room is crisis-oriented, it is not designed to provide on-going care. At Providence Hospital, business personnel estimate that up to 30% of the patients using the emergency room are Medicaid recipients. Reportedly, the number of recipients using the emergency room has incrementally increased as the number of doctors willing to accept coupons has decreased.

Physicians who have elected to exclude patients from health care base their refusal on claims that they receive unsatisfactory payment for their services from Medicaid and that the reimbursements they do receive are untimely. It is also felt that the state requires excessive amount of paperwork before reimbursements approved. Doctors further claim that they owe no ethical obligation to the poor.

Although the state has encountered numerous difficulties in making timely Medicaid payments, the recent implementation of a new computer system has succeeded in processing the vast majority of all pending claims.

Poor people, still waiting in long lines at the welfare office to procure Medicaid coupons, continue to lack accessible health care. As one recipient complained to a staff person at the welfare office, coupons in hand, "What am I supposed to do with these, if no doctors in town will take them?"

Availability of Health Care to Medicaid Recipients: Jan./Feb. 1980 Telephone Survey

I Will accept all forms of payment including medicaid	II Will not accept new medicaid patients/info on established caseload n/a	III Will not accept new medicaid patients; but carries an established medicaid caseload	IV Not accepting any new patients

Health Care Legislation

HCS CS SS SB 227

HCS CS SS SB 227 "An Act relating to the health of residents of the state" is an omnibus health bill extending health coverage to several new groups of people and expanding the scope of coverage available.

* HIGH RISK INSURANCE POOL

People who have high risk medical conditions often are considered "uninsurable" and cannot purchase comprehensive health insurance. Section one of the bill establishes a high risk insurance pool to be administered by the largest carrier in the state. Premiums would be limited to reasonable levels and the carrier would be allowed to pass excess claims losses from this coverage on to the state through the tax system.

* ALCOHOLISM COVERAGE FOR STATE EMPLOYEES

Model benefits for coverage of alcoholism, including inpatient detoxification, inpatient treatment and outpatient treatment are added to the state employees health insurance plan. While the original bill mandated these benefits for all health insurance policies, the HESS Committee substitute bill would field test these new benefits on state employees.

* MEDICAID BY INSURANCE POLICIES OR HEALTH SERVICE CONTRACTS

Section eight of the bill directs the commissioner of Health and Social Services to provide Medicaid coverage through the purchase of private health insurance policies or health service contracts on behalf of Medicaid recipients, when this is found to be cost effective.

* RELIEF FOR MEDICAID PROVIDERS

The bill requires that the state pay interest at the rate of one percent per month to Medicaid providers on bills that are more than one month overdue, and two percent per month on bills that are more than three months overdue. It also allows the state to make an interim payment to large volume Medicaid providers prior to billing and processing of the claims.

* EXPANSION OF SERVICES AND ELIGIBLE PEOPLE COVERED UNDER MEDICAID

Sections nine and ten of the bill expand the state's Medicaid program to include all groups and all services for which federal funding is available. New additions include such eligible and services as unborn children, unemployed fathers, prescription drugs, adult dental care and physical therapy.

* COVERAGE FOR THE MEDICALLY NEEDY

Section eleven of the bill creates a new program of medical assistance for medically needy people under the state's General Relief-Medical program. The income threshold for eligibility is set at 150% of the poverty guideline for Alaska. People whose income exceeds that amount can still become eligible for assistance after they spend their "excess" income on medical bills.

* FISCAL IMPACT

The fiscal note for all these programs includes approximately $8 million from the General fund, $23 thousand from other state funds and $8 million in federal funds for FY81.

THELMA
BUCHHOLDT
Alaska State Legislature
House of Representatives
Juneau, Alaska 99811

May 22, 1980

To: Representatives Gardiner, Meekins, McKinnon, Parker

From: Representative Thelma Buchholdt

Re: HCS CS SS SB 227 - Health Legislation

HCS CS SS SB 227, "An Act relating to the health of residents of the state," was passed out of the House HESS Committee on Wednesday, May 21. I am supplying you with a copy of the bill summary and the accompanying fiscal note. I am also enclosing a copy of the work draft that was passed out of Committee. I expect that the final version of the bill will be printed this afternoon.

Very briefly, Section 1 of the bill establishes a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state. This section of the bill is designed to pick up high-risk persons and other uninsurables in the state for whom health coverage is now unavailable.

Sections 4 through 7 of the bill comprise the original CS SS SB 227, sponsored by Senators Coletta, Hohman and Stimson, and require state employee health insurance to include coverage for alcoholism and drug dependence.

Section 8 of the bill requires the Commisssioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when cost effective. The bill authorizes the Department to make interim peyments to providers who serve a large volume of state medical assistance clients. The bill also requires the state to pay interest to providers on overdue medical assistance bills.

Sections 9 and 10 of the bill expand the state's Medicaid program to include all services and eligibles qualifying for federal financial participation.

Finally, in Section 11, a medically needy program is established under the state General Relief program with an income standard set at 150% of the poverty guideline. Persons whose income exceeds the standard become eligible when they spend their excess income on medical bills.

The fiscal note for the bill includes approximately $ 8 million from the state's General Funds, $ 22,800 from other state funds and approximately $ 8 million in federal funds.

HCS CSSS SB 227 (HESS)

BILL SUMMARY

(revised 5/21/80)

The basic concept of the first section of the bill is to establish a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state, regardless of underwriting risk. This section is modeled after Connecticut law.

AS21.50.010 Each carrier in the state which offers individual health coverage is required to make an individual comprehensive health care plan available to each resident of the state who is not eligible for Medicare. Each carrier in the state which offers group health coverage is required to make a group comprehensive health care plan available to every resident employer of three or more employees. The required coverage may be provided by a carrier or through the reinsurance association, but in the former case the premium charged may not exceed the applicable association premium. The bill does not preclude a carrier from carrying other kinds of health insurance nor does it require a carrier to provide coverage to a person or group who already has coverage.

AS21.50.020 The required comprehensive health plans must cover the services itemized. A choice of $100, $500, or $1000 deductible is provided, and the maximum co-payment is set at 20%. The sum of co-payment and deductibles may not exceed $1000 for an individual or $2000 for a family before benefits

are paid at 100%. The maximum lifetime benefits limit may not be less than $1,000,000. Pre-existing conditions may only be excluded if the condition was treated or medical advice was sought within six months prior to the effective date of coverage, but in any case may not be excluded from coverage for more than twelve months. The plans need not cover occupational injuries, cosmetic treatment, custodial care, services which are not medically necessary, services which are covered under an automobile liability policy, or other specified expenses. Group comprehensive health care plans must also cover dependents.

AS21.50.030 The Health Reinsurance Association is established consisting of all licensed health insurance carriers in the state. The board of governors and a plan of operation which addresses itemized issues are both subject to approval by the director. The authority to issue health insurance, to establish rates, to administer reinsurance, to pool risks, and other general powers are granted the association.

Each asscaition member must designate the classes of r. which it elects to have written by or reinsured by the a 'ation. Individual lives may not be selected out of a group for reinsurance. Premium rates may not be excessive, inadequate, or unfairly discriminatory, nor may they exceed 125% of rates for standard risk groups. All rates are promulgated through the assocaition by an actuarial committee.

Losses of the assocaition are assessed to members. Members in turn may credit the assessed claims losses, but not

assissed administrative losses, against their premium or income tax. If the assessment exceeds their tax liability, the Commissioner of Revenue reimburses the carrier for the excess loss. Periodic audits are required.

AS21.50.040 Hospital or medical service corporations (such as Blue Cross) are given the option of participating in the Health Reinsurance Association or of setting up their own parallel residual market association under the same guidelines and standards.

AS21.50.050 The regulatory and oversight powers and administrative duties of the director of insurance are enumerated.

AS21.50.100 Definitions

Sections 2 and 3 are technical amendments to other chapters of the insurance code to bring them in conformity with Section 1.

Sections 4 through 7 of the bill amending AS39.30 comprise the original CSSSSB 227 and require state employee health insurance to include coverage alcoholism and drug dependence. Minimum benefits in the state employees plan are defined to include inpatient detoxification, inpatient treatment and outpatient treatment. Coverage may not exclude dependents or pre-existing alcoholism conditions.

Section 8 of the bill amending AS47.05 requires the Commissioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when this would be cost effective. In a spearate section, the department is authorized to make interim apyments to providers who serve a large volume of state medical assistance clients. And finally, the bill requires the state to pay interest to providers on overdue medical assistance bills at the rate of one percent per month after 30 days and two percent per month after 90 days.

Sections 9 and 10 expand the state's Medicaid program to include all services and eligibles qualifying for federal financial participation.

Section 11 creates a medically needy program under the state General Relief program with an income standard at 150% of the poverty guideline. Persons whose income exceeds the standard become eligible when they spend their excess income on medical bills.

payments from public assistance, social security, unemployment and workmen's compensation, strike benefits from union funds, veterans benefits, training stipends, alimony, child support and military family allotments or other regular support from an absent family member or someone not living in the household; government employee pensions, private pensions and regular insurance or annuity payments; and income from dividends, interest, rents, royalties or income from estates and trusts. For eligibility purposes, income does not refer to the following money receipts, any assets drawn down as withdrawals from a bank, sale of property, house or car, tax refunds, gifts, one-time insurance payments or compensation for injury; also to be disregarded is non-cash income, such as the bonus value of food and fuel produced and consumed on farms and the imputed value of rent from owner-occupied farm or non-farm housing.

(2) *A Farm Residence.* Is defined as any dwelling on a place of 10 acres or more with $50 or more annual sales of farm products raised there; or any place less than 10 acres having product sales of $250 or more.

Poverty Income Guidelines for All States Except Alaska and Hawaii

	Non-farm family	Farm family
Size of family unit:		
1	$3,400	$2,910
2	4,500	3,840
3	5,600	4,770
4	6,700	5,700
5	7,800	6,630
6	8,900	7,560

For family units with more than 6 members, add $1,100 for each additional member in a non-farm family and $930 for each additional member in a farm family.

Poverty Guidelines for Alaska

	Non-farm family	Farm family
Size of family unit:		
1	$4,270	$3,650
2	5,640	4,810
3	7,010	5,970
4	8,380	7,130

Poverty Guidelines for Alaska—Continued

	Non-farm family	Farm family
5	9,750	8,29[illegible]
6	11,120	9,45[illegible]

For each family unit with more than 6 members, add $1,370 for each additional member in a non-farm family and $1,160 for each additional member in a farm family.

Poverty Guidelines for Hawaii

	Non-farm family	Farm family
Size of family unit:		
1	$2,930	$2,[illegible]
2	5,190	4,[illegible]
3	6,450	5,[illegible]
4	7,710	6,[illegible]
5	8,970	7,[illegible]
6	10,230	8,[illegible]

For family units with more than 6 members, add $1,260 for each additional member in a non-farm family and $1,070 for each additional member in a farm family.

[44 FR 26476, May 7, 1979]

Subpart 1060.3—Limitation on Benefits to Those Voluntarily Poor (CSA Instruction 6004-2)

§ 1060.3-1 Applicability of this subpart.

This subpart applies to all agencies receiving funds under Titles I-D, II and III-B of the Economic Opportunity Act for programs administered by OEO in which income criteria are used as admission standards (with the exception of Head Start and Upward Bound programs).

(Sec. 602, 78 Stat. 503; 42 U.S.C. 2942)

[34 FR 2419, Feb. 20, 1969]

§ 1060.3-2 Policy.

(a) Section 611 of the Economic Opportunity Act provides as follows:

The Director shall take such action as may be necessary to assure that, in determining a person's eligibility for benefits under this Act on account of his poverty such person will not be deemed to meet the poverty criteria if his lack of income results from his refusal, without good cause, to seek or accept employment commensurate with his health, age, education, and ability.

MEDICAID OPTIONAL SERVICES--INCLUDING THOSE NOT CURRENTLY COVERED BY THE ALASKA MEDICAID PROGRAM

The following is a list of all optional services under the Medicaid program. Optional services may be selected by the individual states for inclusion in their Medicaid program if a state decides to make those services available to all categories eligible for the basic Medicaid coverage. A brief description of each option is provided below followed by a comparison of optional services that are offered in Alaska, Idaho, Oregon and Washington, the four states comprising federal Region X. Those services covered in Alaska are indicated.

(1) Podiatrist services. Manipulation of the feet and treatment of corns, bunions, callouses, etc., by a licensed podiatrist.

(2) Optometric services. Covered under Alaska Medicaid.

(3) Chiropractic services. Treatment by a licensed chiropractor limited to manual manipulation of the spine.

(4) Other practitioner services. Naturopaths, homeopaths, herbalists, faith healers.

(5) Private duty nursing. Care by a registered nurse or licensed practical nurse under a physician's supervision in home, hospital or nursing facility when a person requires exceptional individual and continuous care.

(6) Clinic services. Under the Alaska Medicaid program this is currently limited to state-operated and state-funded community mental health clinics. This option could also include such other services as health care clinics, alcoholism treatment centers, ambulatory surgical centers, and rural health care clinics. Rural health clinics are now a mandatory service pursuant to Public Law 95-210.

(7) Physical therapy. Physician-prescribed services provided by a licensed or certified physical therapist (depending upon state licensing procedures).

(8) Occupational therapy. Physician-prescribed services provided by a licensed or certified occupational therapist (depending upon state licensing procedures).

(9) Services for speech, hearing, and language disorders. Included under the Alaska Medicaid program.

(10) Prescribed drugs. Covered by state-only General Relief Medical. Alaska is one of only two states without Medicaid coverage for this option.

(11) Dentures. Replacement of a full or partial set of teeth.

(12) Prosthetic devices. Physician-prescribed replacement corrective or supportive devices that artificially replace a missing part of the body, to prevent deformity or malfunction, to support a weak or deformed portion of the body.

(13) Eyeglasses. Covered by Alaska Medicaid.

(14) Other diagnostic, screening, preventive and rehabilitative services. Identification of illness, injury or other health deviation; preventive and rehabilitative services to restore patient to functional level.

(15) Services to individuals over 65 years of age in institutions for tuberculosis. Facility providing services could be ICF, SNF or inpatient hospital.

(16) Services to individuals over 65 years of age in institutions for mental diseases. (a) Inpatient psychiatric care for persons over 65 is covered under the Alaska Medicaid program. (b) ICF and SNF care for persons over 65 with mental diseases is not covered in Alaska. Under this provision, it would be possible to provide nursing care for persons with mental disabilities who may not otherwise qualify for nursing care due to a lack of physical health problems requiring nursing home care.

(17) Intermediate care facilities (ICF). Covered under the Alaska Medicaid program.

(18) Inpatient psychiatric services for persons under 22 years of age. Covered by the Alaska Medicaid program.

(19) Transportation. Covered under the Alaska Medicaid program.

(20) Services by Christian Science nurses.

(21) Services by Christian Science Sanatoria.

(22) Skilled nursing facility care (SNF) for persons under 21 years of age. Covered by the Alaska Medicaid program.

(23) Emergency hospital services. Covered under the Alaska Medicaid program.

(24) Dental services. Adult dental services are not covered by Medicaid in Alaska.

(25) Personal care services. Physician-ordered services provided to a person in their home by a non-relative and supervised by a registered nurse.

(26) Intermediate care for the mentally retarded and persons with related conditions (ICF/MR). Covered under the Medicaid program in Alaska.

STATE OF ALASKA
JAY S. HAMMOND, GOVERNOR
DEPT. OF HEALTH AND SOCIAL SERVICES
OFFICE OF THE COMMISSIONER
POUCH H 01 – JUNEAU 99811

April 9, 1980

Ms. Thelma Buchholdt
Chairperson, House HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Document# 68-80

Dear Ms. Buchholdt:

At the recent teleconference on House Bill 977, your Committee requested further information regarding the definition of the "other diagnostic, preventative, and rehabilitative services" option to the Medicaid program. The definition included in federal Medicaid regulations for this option is as follows:

§440.130 Diagnostic, screening, preventive, and rehabilitative services.

(a) "Diagnostic services," except as otherwise provided under this subpart, includes any medical procedures or supplies recommended by a physician or other licensed practitioner of the healing arts, within the scope of his practice under State law, to enable him to identify the existence, nature, or extent of illness, injury, or other health deviation in a recipient.

(b) "Screening services" means the use of standardized tests given under medical direction in the mass examination of a designated population to detect the existence of one or more particular diseases or health deviations or to identify for more definitive studies individuals suspected of having certain diseases.

(c) "Preventive services" means services provided by a physician or other licensed practitioner of the healing arts within the scope of his practice under State law to--

(1) Prevent disease, disability, and other health conditions or their progression;

(2) Prolong life; and

(3) Promote physical and mental health and efficiency.

(d) "Rehabilitative services," except as otherwise provided under this subpart, includes any medical or remedial services recommended by a physician or other licensed practitioner of the healing arts, within the scope of his practice under State law, for maximum reduction of physical or mental disability and restoration of a recipient to his best possible functional level.

As you can see the federal definition is quite general. The Medicaid program allows state flexibility to define optional services for operational purposes. Seven states currently have selected to include this service option in their Medicaid programs. These states have defined this option as follows:

1. California - Rehabilitation center outpatient services. Included are physical, occupational, and speech therapy and audiology. One visit in a six-month period is allowed, without prior authorization, for evaluation purposes and preparation of an extended treatment plan. The treatment plan must be signed by a physician. Subsequent visits are subject to prior authorization. A maximum of 30 visits may be authorized at any one time. Authorizations are valid for up to 120 days.

2. Idaho - The following are the core medical rehabilitative services provided on a statewide basis through facilities comparable to adult/child development centers: medical/social and psychological evaluations, speech and hearing evaluations, psychological therapy, patient centered psychological consultation, speech therapy, and patient centered psychological consultation, speech therapy, and patient centered development deficiency services related to particular diseases or health deviations.

3. Nevada - Limited to inhalation therapy prescribed by a physician and provided by a Certified Respiratory Therapist subject to the same limits that apply for Medicare. Prior authorization by the Medical Care Section is required.

4. North Carolina - Limited to diagnostic, preventive, and rehabilitative services when provided by mental health centers.

5. Oklahoma - Limited to blood. For inpatients, payment is made to blood banks for blood and blood fractions when the cost of blood is not included in the hospital per diem cost. For outpatients, payment is made for blood and blood fractions on behalf of an eligible recipient who is suffering from a congenital or acquired disease of the blood which requires the use of blood or blood fractions. Specifically eliminated is gammaglobulin, both the pooled and specific types. Payment may be made to physicians, clinics, out-patient hospitals or blood banks. Blood claims are screened through the computer stream against eligibility files to assure that no payment is made beyond the scope of the program.

6. Wisconsin - Includes psychotherapy provided or supervised by a psychiatrist or psychologist in the provider's office, the outpatient office of a hospital, an outpatient facility, a nursing home, a licensed child-caring institution, a school, or the recipient's home or foster home. A diagnostic examination and a physician's written prescription for therapy must be furnished before therapy is begun (a prescription is not needed for emergency treatment but must be obtained within 48 hours). Prior authorization is required for all therapy.

7. Washington - Diagnostic services - covered as needed and approved. Preventive services - (a) Rabies shots; (b) Fluoride painting; and (c) Immunizations when not otherwise available. Rehabilitative services - (a) Physical medicine and rehabilitation as requested and approved; (b) Alcohol detoxification limited to 3 days in certified facilities which may be within the physical location of a general hospital - however, narcotic detoxification is not covered; (c) Chemotherapy and consultation for drug addiction are provided in clinics approved to provide to services; and (d) Adult Day Health Care as provided and periodically reviewed.

I hope this clarifies your concerns. Alaska, if it choses to add this option, could define the option in a similar ways to those noted above, subject to federal approval in order to be eligible for federal financial participation.

If you have additional questions on this matter, please do not hesitate to contact the department at 465-3030.

Sincerely,

Deborah E. Behr

Re: CSSSSB 227

Section One of CSSSSB 227,which creates a Health Reinsurance Association of all carriers in the state, is based on Connecticut's Health Care Act of 1975. Travelers Insurance Company is the administering carrier for Connecticut's Health Reinsurance Association.

According to Tim Lyons of Travelers Insurance Company in Connecticut, the law serves a positive public purpose and does not impose an unreasonable burden on the carriers. The law offers comprehensive health insurance coverage to any resident of the state and any employer group. In addition to providing coverage for high health risk peop who are uninsurable under standard policies, the state comprehensive health care plan provides coverage to people who are temporarily lacking coverage, such as a person who is in between jobs and temporarily not eligible for group coverage, and provides many young, low-risk people an attractive health coverage plan at very modest premiums as well. Except for a

few carriers who choose to write their own comprehensive health insurance plans, the carriers act as agents to sell the comprehensive health plans written by the Health Reinsurance Association.

Mr. Lyons found no legal or administrative problems with the law, though he feels that it would be preferable to have all carriers in one residual market rather than one for insurance carriers and another for hospital/medical service corporations (Blue Cross and Blue Shield, predominately). He felt that one association would provide a more equitable sharing of the costs of high risk coverage among all carriers and would avoid duplication of administrative overhead.

Blue Cross of Connecticut does not participate in the Health Reinsurance Assocaition, but instead chooses to operate a separate residual market mechanism and offer a competing comprehensive health plan as mandated by the law. Blue Cross' comprehensive health plan is offered at two-thirds the premium cost and has five times the enrollment of the comprehensive plan offered by the Health Reinsurance Association. Blue Cross prefers to operate a separate program because as a non-profit hospital/medical service corporation, they run their business a little differently than insurance companies do. Joe Kaluzynski, Director of Market Research and Product Development for Blue Cross, saw no administrative problems or other defects in the law.

Neither Mr. Kaluzynski nor Mr. Lyons saw any potential problems generated by the fact that most carriers operating in Alaska are not located here. Only one carrier in each association, the administering carrier, needs to have regular contact with the State or its residents.

A COMPARISON OF BENEFITS UNDER HB 977 AND THREE OTHER COMPREHENSIVE HEALTH PLANS

BRIEF SUMMARY OF CSSSSB 227

" AN ACT RELATING TO INSURANCE FOR ALCOHOLISM AND DRUG DEPENDENCE"

THIS BILL MAKES IT REQUIRED FOR GROUP INSURANCE POLICIES TO PROVIDE COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. THE MINIMUM REQUIREMENTS FOR THIS COVERAGE ARE DESCRIBED IN THE BILL AND INCLUDE:

1. 14 DAYS OF INPATIENT DETOXIFICATION CARE PER YEAR
2. 30 DAYS OF INPATIENT TREATMENT PER YEAR
3. 30 VISITS OF OUTPATIENT TREATMENT PER YEAR

ALL OF THE ABOVE MINIMUM REQUIREMENTS AS OUTLINED IN THE BILL ARE TO BE ADMINISTERED IN A/OF BY A

1. STATE APPROVED TREATMENT FACILITY
2. LICENSED HOSPITAL
3. LICENSED PHYSICIAN
4. STATE CERTIFIED PROFESSIONAL SUBSTANCE ABUSE COUNSELOR

THE INSURANCE AS REQUIRED BY THIS BILL WOULD INCLUDE BENEFITS FOR DEPENDENTS REGARDLESS OF AGE, SEX OR STATE OF ILLNESS.

HOSPITAL MEDICAL SERVICE CORPORATIONS IE. BLUE CROSS (THE LARGEST INSURANCE COMPANY WITH ALASKA) ARE REQUIRED BY THIS BILL TO INCLUDE ALCOHOLISM AND DRUG DEPENDENCE INSURANCE.

THIS BILL INSURES THAT ALL PERSONS COVERED BY A GROUP INSURANCE POLICY ARE COVERED FOR ALCOHOLISM AND DRUG DEPENDENCE WHETHER OR NOT SPECIFIED IN THE POLICY. (THE REASONING FOR THIS IS THAT SOME POLICIES ORIGINATE OUT OF STATE THERFORE THE POLICY MIGHT NOT SPECIFY ALCOHOLISM AND DRUG DEPENDENCE COVERAGE, SO THIS WOULD CHANGE THE LAW MAKING IT AUTOMATIC FOR ALASKAN EMPLOYEES COVERED BY INSURANCE.)

CSSSSB 227 PROVIDES FOR AN EFFECTIVE DATE OF NOVEMBER 1,1979 IN ORDER FOR INSURANCE COMPANIES TO COMPLY WITH THE NEW LEGISLATION.

SECTION ANALYSIS SS for SB 227 FROM THE DIVISION OF INSURANCE

Sec 1 AS 21.42

Requires that all group health insurance policies issued by insurance companies and all service or indemnity type contracts issued by non-profit corporations such as Blue Cross, provide as a minimum, specified coverages related to alcoholism and drug dependence.

COVERAGES are:

A. not less than 14 days detoxification benefit at a rate equal to other benefits provided in the policy.
B. not less than 30 days inpatient treatment benefit
C. not less than 30 visits to specified outpatient treatment facilities.

Alcoholism and drug dependence coverage is to be provided for all persons covered under the group policy without regard to age, sex, state of illness, or pre-existing condition.

Section 1 also provides key definitions of alcoholism and drug dependence.

Section 2 Amends AS 21.87.347 to provide that Hospital Medical Service Corporations ie. Blue Cross, are also subject to the provisions of AS 21.42 as created by this bill.

Section 3 Specifies that coverage for alcoholism and drug dependence shall automatically apply to all persons covered by a group policy issued for delivery, delivered or renewed in this state after the effective date of the act; whether the policy wording specifically provides coverage or not.

Section 4 Provides for an effective date of November 1, 1979 in order for insurance companies to amend policies and adjust rates prior to the effective date.

Robertson, Montagle,

STATEMENT
of the
HEALTH INSURANCE ASSOCIATION OF AMERICA
CONCERNING PROPOSED
ALASKA COMPREHENSIVE HEALTH CARE PLAN
(House CS for CS for SS for S.B. 227)

The Health Insurance Association of America (HIAA) is a trade association of 311 insurance companies which write about 85% of the health insurance written by insurance companies in the United States.

Section 1 of the proposed House Committee Substitute for this bill, now being considered by the House Health, Education and Social Services Committee, would establish a comprehensive health care plan, and would require health insurers to participate in it. Our comments will be primarily directed to Section 1.

GENERAL PLAN OF SECTION 1

The basic idea of Section 1 is to establish a pool to make three specified plans of major medical insurance available to Alaska residents, under age 65, who are uninsurable or are otherwise high risks for such coverage when furnished by individual insurers. Pooling of high-risk insureds makes the financial resources of all health insurers available to cover the large claim payments that must be made.

Because major medical insurance, with its broad coverage and high maximum benefits, is costly anyway -- and even more so for high-risk insureds -- Section 1 also limits the premium rates that can be charged for the three major medical plans to amounts that are less than are needed to pay claims and administer the program, and the State eventually pays the difference by means of a tax offset. [A State subsidy is available to certain small employers to help them pay for one of the three plans of major medical insurance for their employees.]

All health insurers (including self-insurers) would be required to be members of the Association which operates the pooled business, and to share in the losses, with one exception. Blue Cross - Blue Shield could establish its own separate pool, or could provide the three plans without participating in a pool.

Section 1 is an altered version of an existing Connecticut law, and the subsidy for small employers is an idea adapted from an existing Hawaii law.

GENERAL COMMENTS

Going to the Connecticut law for guidance results in a much better plan than in H.B. 977. The Connecticut law, unlike the Minnesota law on which H

is based, has not been a subject of great controversy or Constitutional challenge. It is, on the whole, a very workable law for that State. To be sure, it needs some alterations based on experience with it, and some additional ones if it is to be adapted for Alaska.

Before getting to that, it seems to us that the Alaska legislature should be asking, and getting answers to, some important questions:

(1) Is there a need for such a program in Alaska?
(2) How many Alaska residents can we expect to benefit from it?
(3) How much will it cost?
(4) Are the anticipated costs worth paying in view of the anticipated benefits?
(5) Would such a program work in Alaska?

These same questions should be asked and answered about any proposed health insurance program, whether it be patterned after the Connecticut law or the Minnesota law, or whether it is something untried elsewhere.

What you need, we think, is to have a thorough study made by a firm of consulting actuaries that has sufficient knowledge about State health insurance plans and access to sufficient Alaska claims data. This would be advisable for any State contemplating a program, and particularly so for Alaska which is so different from other States. Among other things are Alaska's vast area, small population, comparatively younger (and probably healthier) residents, and a large proportion of residents already covered by government health care plans.

Lacking such a study, we can only make some guesses.

Let's go to question (2), and see what we can guess from experience elsewhere about how many Alaskans who are high risks for major medical insurance might become insured under such a program. The answer to this will have some bearing on the answers to questions (1) and (4).

In Connecticut, the two pools (one "pool" operated by Blue Cross - Blue Shield, the other by insurance companies) together cover 9,680 people, which is about 35 ten-thousandths (.0035) of the under-age-65, civilian, noninstitutionalized population of about 2,746,000 people. But a large majority of the people covered by the pools consists of standard risks, who could get coverage without the program. This is primarily because Blue Cross - Blue Shield puts all of its non-group insureds, both standard and high-risk individuals, into its pool. So the Connecticut figures are not much help to us.

In Minnesota, the Association (pool) has 1,465 policies in force for people under age 65. While the records do not indicate numbers of people covered, the great bulk of the policies cover only one person each. We estimate that the pool covers

1,758 people, which is about 5 ten-thousandths (.0005) of the under-age-65, civilian, noninstitutionalized population of about 3,493,000 people. This enrollment was achieved only after a major, intensive publicity effort participated in by the Association and hospitals and other health care providers. Unlike Connecticut, only high-risk individuals are included in this figure.

Applying these Minnesota results to the estimated 395,000 under-age-65, civilian, noninstitutionalized Alaska population, we would ~~expect an Alaska~~ 2 rejections pool for high-risk individuals to cover somewhat under 200 Alaska residents. Some downward adjustment should be made for Alaska's comparatively younger and (at least partly for that reason) healthier population, and for the comparatively larger proportion of native Alaskans covered under government health care programs.

It should be kept in mind that a wide range of major medical insurance plans (including high-maximum plans) is already available from insurers to groups, and to standard and many substandard risk individuals, at premium rates that are lower than those to be charged by the pool. And Medicare, Medicaid, the Alaska catastrophic illness program, and other government programs provide coverage for many Alaskans.

The small number of people who can be expected to come into the pool is determined by a number of factors, including the small number of uninsurables, the inability of many to pay the costs of major medical insurance, the number of people already covered under major medical plans, and the number of people covered under other government programs.

COST OF PROGRAM

The Alaska Insurance Department has already given you an estimate of their anticipated costs, initially $250,000 per year we understand.

In Section 1, proposed AS Sec. 21.50.090 provides for the State to aid small employers in paying premiums for health insurance coverage for employees and their dependents. We do not have any estimate of what this may cost the State, but think that the costs may be quite substantial.

In addition, there would be a cost to the State due to the tax offset (or payment by the State to the carrier) for losses due to costs of the program which exceed the premiums on business written by the pool. The Minnesota program lost ~~$1,000,000~~ $500 in 1979, using the same limitation on premium rates that is in the proposed Alaska program. With only 10% or 11% as many insureds, but with considerable higher per person administrative costs, losses under the Alaska program might initially be $200,000, perhaps somewhat less but possibly considerably more -- the latter if a home office type operation must be established in Alaska, since no major health insurance writer has its home office in Alaska. Without a proper actuarial study, we cannot predict the range of this cost.

In addition, insurers will incur some costs for compliance with the law. The amount is unknown, but it will eventually be paid by Alaska policyholders and insureds.

COSTS TO EMPLOYERS

Proposed AS Sec. 21.50.080 would require all group "health policies" delivered or renewed in Alaska to contain the provisions called for in proposed AS Sec. 21.50.030(b). Those provisions deal principally with: (1) continuation of coverage under the group policy in specified circumstances for employees and/or dependents whose coverage would otherwise terminate; and (2) including a conversion to an individual policy, with benefits and terms at least as good as a comprehensive plan, when coverage under the group plan terminates.

Both proposed sections need careful redrafting in order not to interfere more than is intended with eligibility provisions of group policies, and to limit the conversion privilege so that it applies to the proper kinds of group policies and does not allow duplicate conversions.

After redrafting, the provisions should be considered in an actuarial study to determine the costs they will add to group plans, so that the Committee may consider whether it is avisable to add such cost burdens to employers who furnish health insurance coverage to employees under group policies or contracts.

PREMIUM RATES

An actuarial study is needed to determine the approximate premium rates that the pool will charge initially for coverage. This is essential if you are to make an informed, intelligent decision on the kinds of benefits and the amounts of benefits, including the deductibles, to be provided in the three plans. Section 1 of the proposed amendment already makes some changes in benefits from those provided under the Connecticut law. I do not know what reasons were involved in making the changes, but they have a significant effect on premium rates.

The decrease in the low option deductible to $100 from $200 will increase the premium rate for that plan by roughly 10%. The increase in the high option deductible to $1,000 from $750 will decrease the premium rate for that plan by roughly 7-1/2%. Removing Connecticut's $250 limit (and applying no limit) to the normal maternity benefit will increase the premium rate of all three plans for women of child-bearing age, by roughly 5% to 10%.

It seems to me that we should be looking for ways to lower premium rates, by decreasing some benefits, rather than for ways to increase them. We do not want to price the plans so high that even fewer people will be able to afford them.

Health insurance premium rates are already higher for Alaska residents because of the higher health care costs in Alaska. And health care costs are rising at a rapid rate generally. We know, for example, that the insurance company pool in Connecticut is about to raise its rates by 20%. We know that health care costs in Anchorage are about 35% higher than in Hartford, Connecticut.

When a small sampling of Connecticut rates for just two age groups is roughly adjusted to account for the changes inthe plans and to guess at what the pool rates might today be for Anchorage residents, and some of them indicate an annual rate, for one adult, of as much as $1,100, $1,300, or $1,500, I worry. And whatever the rates are now, they may have to be 15% or more higher by the time the program can be put into effect. per year?

After you have a proper actuarial study, you should consider what benefits the three plans should offer.

OTHER CONSIDERATIONS

1. The size of Alaska, and the distribution of its population over so large an area, create some problems, but they can be dealt with. Costs of the program will be higher, and communications (including the enrolling of individuals and payment of claims) will take somewhat longer than would be the case with Minnesota or Connecticut.

2. Because, unlike Connecticut and Minnesota, Alaska does not have within its boundaries the home office of a large insurer capable of administering the program, the Committee should investigate the practicality of having the program administered from outside the State, and the availability of insurers willing to participate as administrator and as board members of the Association.

3. The small size of the anticipated enrollment in the program does not obviate the need for a pool. It does, however, make it impractical to have more than one pool, even at the beginning of the program. The two pools under the present Connecticut law is somewhat of an historical accident, and isnot practical in the long run even with the larger enrollment in that State. The National Blue Cross-Blue Shield organization dropped its insistence on a separate pool about two years ago, and we think it is unlikely that another State will take a two pool approach.

Section 1 of the proposed amendment should be revised throughout to provide for one pool, all "health" insurers should be required to participate in it.

4. Section 1 of the proposed amendment should be amended to exempt the Association, and business written directly by insurers but reinsured in the Association, from the premium tax. This will help alleviate somewhat the higher premiums that Alaska residents will have to pay for the coverage (because of higher costs in Alaska) thus encouraging more people to participate in the plan. It will solve the problem of dealing with the premium tax differential between domestic and foreign insurance companies and service plans, and with the different manner in which the tax is computed for Blue Cross-Blue Shield business.

Because the program is certain to produce losses which the State will pay for (i.e., claims and other costs will exceed premiums), the State will wind up paying its own premium tax on this business anyway, so the premium tax exemption we suggest should not result in additional costs to the State.

5. Departures from the Connecticut law, other than those already mentioned, should be individually considered and, where appropriate, their effects on costs should be determined. Some examples are: applying the medical social services benefit to claims not involving terminal illness (proposed AS Sec. 21.50.020(a)(7); addition of a coverage for transportation other than local ambulance transportation (proposed AS Sec. 21.50.020(c)(3), omission of a coordination of benefits provision from group comprehensive plans (Conn. Ins. Law Sec. 38-374(c)); addition of household members other than spouse or child to persons who are to be covered as dependents (proposed AS Sec. 21.50.030 and .200) limiting the rate to be charged for coverage to 125% of small group rates, while Connecticut permits 125% (compare proposed AS Sec. 21.50.050(e)(4) with Connecticut insurance law Sec. 38-376(c)(3)).

6. A number of drafting corrections should be made. Examples: requiring all dependents to be covered under a group comprehensive plan, instead of just making them eligible for coverage (proposed AS Sec. 21.50.030(a)); clarying the fact that insurers may also offer other group and individual comprehensive health insurance plans to cover Alaska residents; rewriting Section 5 of the proposed substitute bill so that it clearly does not apply to plans other than the State employees' plan.

CONCLUSIONS

The proposed committee substitute bill is not, particularly as to the provisions of Section 1, ready for final action by the Committee. An actuarial study should be made to determine costs and feasibility of the program for Alaska. After such a study, the Committee will have more of the information needed to decide whether to adopt such a program and, if so, what provisions should be included in it.

HCS CSSS SB 227 REVISED 5/16/80

BILL SUMMARY

The basic concept of the first section of the bill is to establish a carrier reinsurance pool which would make health insurance available at a reasonable premium to every resident and every employer group in the state, regardless of underwriting risk. This section is modeled after Connecticut law.

AS21.50.010 Each carrier in the state which offers individual health coverage is required to make an individual comprehensive health care plan available to each resident of the state who is not eligible for Medicare. Each carrier in the state which offers group health coverage is required to make a group comprehensive health care plan available to every resident employer of three or more employees. Every self-insured employer group is required to make an individual comprehensive health care plan available as a conversion privilege to each group member. The required coverage may be provided by a carrier or through the reinsurance association, but in the former case the premium charged may not exceed the applicable association premium. The bill does not preclude a carrier from carrying other kinds of health insurance nor does it require a carrier to provide coverage to a person or group who already has coverage.

AS21.50.020 The required comprehensive health plans must cover the services itemized. A choice of $100, $500, or $1000

deductible is provided, and the maximum co-payment is set at 20%. The sum of co-payment and deductibles may not exceed $1000 for an individual or $2000 for a family before benefits are paid at 100%. The maximum lifetime benefits limit may not be less than $1,000,000. Pre-existing conditions may only be excluded if the condition was treated or medical advice was sought within six months prior to the effective date of coverage, but in any case may not be excluded from coverage for more than twelve months. The plans need not cover occupational injuries, cosmetic treatment, custodial care, services which are not medically necessary services which are covered under an automobile liability policy, or other specified expenses. Group comprehensive health care palns must also cover dependents.

AS21.50.030 The Health Reinsurance Association is established consisting of all licensed health insurance carriers in the state. The board of governors and a plan of operation which addresses itemized issues are both subject to approval by the director. The authority to issue health insurance, to establish rates, to administer reinsurance, to pool risks, and other general powers are granted the association.

Each association member must designate the classes of risk which it elects to have written by or reinsured by the association. Individual lives may not be selected out of a group for reinsurance. Premium rates may not be excessive, inadequate, or unfairly discriminatory, nor may they exceed 125% of rates for standard risk groups. All rates are promulgated through the association by an actuarial committee.

Losses of the association are assessed to members. Members in turn may credit the assessed claims losses, but not assessed administrative losses, against their premium or income tax. If the assessment exceeds their tax liability, the Commissioner of Revenue reimburses the carrier for the excess loss. Periodic audits are required.

AS21.50.040 Hospital or medical service corporations (such as Blue Cross) are given the option of participating in the Health Reinsurance Association or of setting up their own parallel residual market association under the same guidelines and standards.

AS21.50.050 The regulatory and oversight powers and administrative duties of the director of insurance are enumerated.

AS21.50.200. Definitions.

Sections 2 and 3 are technical amendments to other chapters of the insurance code to bring them in conformity with Section 1.

Sections 4 through 7 of the bill amending AS39.30 comprise the original SSSSB 227 and require group health insurance to include coverage for alcoholism and drug dependence. Minimum benefits in the state employees plan are defined to include inpatient detoxification, inpatient treatment and outpatient treatment. Coverage may not exclude dependents or pre-existing alcoholism conditions.

Section 8 of the bill amending AS47.05 requires the Commissioner of Health and Social Services to provide services under medical assistance programs through health insurance policies or health service contracts when this would be cost effective. In a separate section the department is authorized to make interim payments to providers who serve a large volume of state medical assistance clients. And finally, the bill requires the state to pay interest to providers on overdue medical assistance bills at the rate of one percent per month after 30 days, and two percent per month after 90 days.

Section 9 and 10 expand the state's Medicaid program to include all services qualifying for federal financial participation.

Section 11 creates a medically needy program under the state General Relief program with an income standard at 150% of the poverty guideline. Persons whose income exceeds the standard become eligible when they spend their excess income on medical bills.

CURRENT STATUTE

Chapter 07. Medical Assistance for Needy Persons.

Section
10. Purpose
20. Eligible persons
30. Medical services to be provided
40. State plan for provision of medical assistance
50. Implementation of the medical assistance program
60. Receipt of federal money
70. Reimbursement for cost settled providers
80. Definitions

Sec. 47.07.010. Purpose. It is declared as a matter of public concern that the needy persons of this state receive uniform and high quality medical care, regardless of race, age, national origin, or economic standing. Accordingly, this chapter authorizes the Department of Health and Social Services to apply for participation in the national medical assistance program as provided for under title XIX of the federal Social Security Act. (§ 1 ch 182 SLA 1972)

Sec. 47.07.020. Eligible persons. (a) All residents of the state for whom the Social Security Act requires medicaid coverage are eligible to receive medical assistance under title XIX of that Act (42 U.S.C. 1396 et seq.).

(b) In addition to the persons specified in (a) of this section, the following optional groups of persons for whom the state may claim federal financial participation are eligible for medical assistance:

(1) persons eligible for but not receiving assistance under any plan of the state approved under part A of title IV (aid to families with dependent children), or title XVI (supplemental security income), of the Social Security Act;

(2) persons in a general hospital, skilled nursing facility or intermediate care facility, who, if they left the facility, would be eligible for assistance under one of the federal programs specified in (1) of this subsection;

(3) persons under 21 years of age under supervision of the department for whom maintenance is being paid in whole or in part from public funds and who are in foster homes or private child-care institutions; and

(4) aged, blind, or disabled persons, who, because they do not meet income and resources requirements, do not receive supplemental security income under title XVI of the Social Security Act, and who do not receive a mandatory state supplement, but who are eligible, or would be eligible if they were not in a general hospital or skilled nursing facility or intermediate care facility to receive an optional state supplementary payment;

(5) persons under 21 years of age in an institution designated as an intermediate care facility for the mentally retarded who are financially eligible as determined by the standards of the Federal Aid to Families with Dependent Children program;

House CS for CSSSSB227 (HESS) Revisions

* Sec. 7. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act allows optional medical coverage qualifying for federal financial participation are eligible for medical assistance.

(6) persons in a medical or intermediate care facility whose income while in the facility does not exceed 300 per cent of the supplemental security income benefit rate under title XVI of the Social Security Act but who would not be eligible for an optional state supplementary payment if they left the hospital or other facility.

(7) persons under 21 years of age receiving active treatment in a psychiatric hospital who are financially eligible as determined by the standards of part A of title IV (aid to families with dependent children) of the Social Security Act.

(c) Receipt of medical assistance under this chapter is considered to be an additional benefit to these individuals and does not affect other assistance payments, federal or state, for which the recipient is eligible.

(d) No additional groups may be added unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 105 SLA 1974; am § 1 ch 117 SLA 1975; am § 1 ch 221 SLA 1976; am § 1 ch 11 SLA 1978)

Effect of amendments. — The 1975 amendment added paragraph (5) of subsection (b).

The 1976 amendment added paragraph (6) of subsection (b).

The 1978 amendment added paragraph (7) of subsection (b).

Legislative history reports. — For report on ch. 182, SLA 1972 (FCCS HCS CSSB 56), see 1972 House Journal, p. 1684. For report on ch. 105, SLA 1974 (CSSB 465), see 1974 Senate Journal, p. 525 and 1974 House Journal, p. 763.

Sec. 47.07.030. Medical services to be provided. Medical services to be offered to eligible persons include inpatient hospital, outpatient hospital, rural health clinic, outpatient surgical care centers, laboratory and X-ray, refractions and eye examinations by ophthalmologists or optometrists, eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist, inpatient psychiatric hospital for persons age 65 or older and persons under age 21, skilled and intermediate nursing home, physician, home health care services, early periodic screening diagnosis and treatment of persons under 21 years of age, clinic services, treatment of speech, hearing and language disorders, and reasonable transportation to and from the point of medical care. No additional services may be provided unless approved by the legislature. (§ 1 ch 182 SLA 1972; am § 1 ch 35 SLA 1973; am § 2 ch 105 SLA 1974; am § 1 ch 12 SLA 1976; am § 2 ch 221 SLA 1976; am § 1 ch 82 SLA 1978)

* Sec. 10. AS 47.07.020(d) is repealed.

* Sec. 8. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include services eligible for federal financial participation under Title XIX of the federal Social Services Act.

May 7, 1980

Representative Thelma Buchholdt, Chairman
Health, Education & Social Services Committee
House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

As I understand the House Committee substitute for the committee substitute for sponsor substitute for S.B. 227, the intent of this bill is to require an insurer or hospital/medical service corporation to make available in Alaska a health care plan with the comprehensive benefits outlined in this bill. An insurer would, however, be able to offer other contracts having different benefits to meet the requested coverages desired by employers and individuals in this state. This bill in no way mandates minimum coverages for all health care contracts.

In Section 21.50.020, I have several comments to make concerning some of the minimum benefits. Subsection (a)(3) concerns outpatient mental health benefits. I would hope that a maximum benefit level would be specified and that a maximum benefit would be described in this law for inpatient treatment for mental health as well. Both limits are needed to curb excessive utilization and high costs for the coverage.

Subsection (a)(6) includes home health benefits in the minimum benefits. In (6)(A) the number of visits per year is too high when you consider the limited availability of home health care in Alaska. A subscriber will be paying for a benefit which is usually not available in this state. Paragraph (6)(B) extends home health care to the terminally ill. This is usually defined as hospice services and is normally combined with the medical social services mentioned in (7). Hospice services are not available in Alaska to the best of my knowledge. This will add premium cost for services which may not be attainable.

Subsection (a)(7) adds medical social services, which are defined as being available to the patient or to his/her family. This creates a totally new category of care which may or may not be medically necessary. It is a benefit which is usually a part of home health care for the terminally ill. As a separate benefit it can be abused and can create unnecessary utilization. This benefit should be deleted.

Representative Thelma Buchholdt, Chairman May 7, 1980

Subsection (a)(16) needs to be combined with subsection (c)(3) in order to detail a benefit for medically necessary transportation which requires pre-authorization for travel and other safeguards to eliminate abuse of this benefit. I would suggest that the contract language in your benefit booklet for coverage of state employees might serve as a model. (See enclosed booklet, pages 10-12.) The existing language would seem to approve payment of air ambulance rather than payment of commercial airline transportation.

Subsection (a)(17) must be deleted. This section allows changes in benefits which can adversely affect contracts in effect when these benefits are added. It is not necessary to the bill.

The minimum benefits section does not mention pregnancy benefits. While P.L. 95-555 controls the pregnancy benefits for groups of more than 15 employees, it does not govern smaller work forces or individual contracts. Our particular concern is in individual contracts since our experience shows that these contracts are usually purchased by persons past the age of childbirth and complete coverage of pregnancy like any other illness creates an increased premium for an unusable benefit.

On page 6, subsection (b)(5)(A) speaks of exclusion for a pre-existing condition which "first manifests itself within a period of six months immediately before the effective date of coverage." While I understand the reason for this language and approve of the intent, in actuality this creates endless hassle about what is a first manifestation and whether a person prudently sought care. It makes administration difficult. I suggest you should change the language to a limitation similar to that applying to coverage for state employees. (See enclosed booklet, page 7.)

In Section 21.50.030 the state requires that a person leaving a group will have a continuation of that same coverage for 39 weeks. That will negate the ability of an insurer to set minimum group sizes and to eliminate coverage for a group which gets to be too small. With nine months continuation, you negate the factor of size in small group business.

More important, the experience of the person on continuation coverage will have to be applied to the original group. If, for instance, John Smith quits work because his wife, a covered dependent, suffers a stroke, the claims paid for Mr. and Mrs. John Smith during the continuation coverage will be credited to Mr. Smith's previous employer. That experience will affect the rates which will be charged upon renewal of the group contract. Mr. Smith is no longer an employee, but the company incurs higher cost because of his medical bills and, in theory, subsidizes the continuation program. That is a cost that should <u>not</u> be borne by business, but with continuation coverage it <u>is</u> borne by each employer.

Representative Thelma Buchholdt, Chairman May 7, 1980

The logistics of self-payments for continuation coverage from the terminated employee to the company and then to the insurer will also impact the administrative workload of the employer. Direct pay to the insurer cannot be handled because of the many different benefit plans which would be involved. Continuation coverage will be a big burden on businesses and an additional cost to them.

This bill specifies that all conversion insurance have the minimum comprehensive benefits outlined in this bill. That level of benefits is too extensive. It will intensify the adverse selection because only someone with a medical problem will purchase the conversion policy. The cost will be excessive and the healthy will "go bare" rather than pay a high premium.

In Sections 21.50.050 and 21.50.060 this bill recognizes the differences between commercial insurers and hospital/medical service corporations by providing an option for the latter in lieu of membership in the Health Reinsurance Association. The differences between for-profit and not-for-profit entities and the different methods used in claims payment, contractual agreements, and service to subscribers makes lumping the Blues and commercial insurers together unwise. This bill separates them while assuring that each provides his share of coverage to the poor risk market. This is a good feature of this piece of legislation.

However, in subsection (m) of Section 21.50.050 you allow a tax offset for those insurers who join the Health Reinsurance Association. The bill needs to be amended to add that offset in Section 21.50.060 (b) and (c) or the offset, of and in itself, destroys the viability of the option features of this bill.

Section 3 of this bill is the original committee's substitute for Senate Bill 227. The features of that alcoholism and drug dependence coverage differ from coverage provided under the minimum benefits for alcoholism and drug dependence. That difference may need to be resolved.

This bill will create additional requirements for insurers and for medical/hospital service corporations doing business in the state of Alaska. These requirements will increase costs.

This bill makes health care insurance available to any Alaskan. That insurance may not be affordable. The minimum benefits, patterned after Connecticut law, may be readily available in that state. Some of those benefits are not easily available in Alaska and the cost for them may be prohibitive. This bill could offer Alaskans a promise of help and, in reality, afford them no relief at all.

Sincerely,

Joan H. Gaumer, Director
Government Relations

JHG:eb

Enclosure: State of Alaska Group Health Care & Life Insurance Benefits (dated July 1, 1979)

cc: Wes Coyner

January 9, 1980

Thelma Buchholdt
Pouch V
Juneau, Alaska 99811

Dear Thelma:

The following is an assessment of possible legislation in the area of state-subsidized health insurance. Two alternatives are discussed: the first calls for universal and comprehensive coverage, the second provides for a substantial improvement in health care services, but is not a comprehensive program. I would like to emphasize at the outset that the work done on this subject was done purely on my own time and does not, in any way, represent the opinions of the Alaska Public Interest Research Group.

Some form of state-subsidy in the area of health insurance has become necessary, in large part due to a nationwide problem with the availability of health care services. As medical costs spiral ever-upwards, more and more individuals are unable to procure adequate medical care. In Alaska, the problem is magnified by a limited number of physicians and substantially higher medical costs. In addition, numerous difficulties with Alaska's Medicaid system have limited the availability of health care even to those persons qualifying for state medical assistance.

Although various forms of government-subsidized health insurance have been proposed on a national level, cost considerations and intensive lobbying against such insurance by the medical and insurance communities have served to delay adoption of a national insurance plan. Subsidized health insurance on a state level was first proposed by you in 1977, however, at that time it was felt that the costs involved were prohibitive.

Since 1977, state oil revenues have accumulated in the treasury to the extent that the State of Alaska currently has a large amount of surplus revenue. Since the primary reason in the past for not funding some type of health insurance has been cost, and the state currently possesses the moneys to fund such a program, the time is now ripe to correct some of the glaring deficiencies in the area of health care.

The first approach to a solution of this problem involves universal and comprehensive state-subsidized health insurance. Adopting such coverage would be the most equitable manner of making health services available to Alaska's residents. However, this program would be extremely expensive (probably upwards of $100 million), and could probably expect to meet with a great deal of resistance. The resistance would come not only from the extremely well-organized medical and insurance lobbies, but also from opponents of increased government services and proponents of income tax repeal. I doubt whether it is feasible to get a program of this type approved, however, you are much more aware of the political climate than am I.

The second approach, therefore, is a piecemeal solution to the health care problem. It addresses specific problems which exist in the area of health care services. It combines minimum standard benefits requirements, insurance availability to Medicaid-medically needy qualified individuals, mandatory employer sponsored coverage, and reinsurance pools.

Minimum standard benefits: There is no regulation of the levels of service covered by providers of health insurance in Alaska. Many policies are not adequate to protect those covered from financial hardship. Individuals purchasing insurance outside of a "group policy" are subject to broad exclusions for pre-existing conditions, even though such a condition may have occured twenty years in the past (e.g. a previous back injury will give rise to an exclusion for any disease, defect or injury to the back even if totally unrelated). Many policies limit reimbursements to "reasonable charges" as defined by the insurance company, regardless of actual charges and the policy holder must pay the difference. This is especially a problem in Alaska where the "reasonable charge" determination is made in insurance company headquarters located outside the state.

In response to such problems, several states have adopted minimum standard benefits for health care plans. (see enclosed legislation). In addition, the National Association of Insurance Commissioners (NAIC) has developed model state health insurance legislation for minimum standard benefits (see 13 FORUM 680 (1978)). The standards set out the minimum acceptable level of service for health insurace policies in effect in the state.

Alaska should adopt minimum standard benefits requirements.

Insurance for Medicaid/medically needy: The Medicaid problem, in particular, must be addressed this session. Doctors are unhappy with the state's Medicaid program because they are not being paid. Recipients of state medical assistance are unhappy with the state's Medicaid program because doctors will not treat them because the doctors are not being paid. Both groups are clamoring for reform.

As an alternative to medical assistnace by direct payments to providers, the state of Oregon has adopted a program (see enclosed legislation), where medical assistance funds are used to pay health insurance premiums. Thus, the state provides health insurance for defined groups of people ~~(and [redacted] the marginally employed)~~ who have no practical access to private health care coverage.

At the same time, the state should opt in to the federal "medically needy" Medicaid program. This program would extend state medical assistance to those persons whose income exceeds the income standards of current assistance programs, but who have incurred medical expenses which equal or exceed the difference between the person's monthly income and the income standard applicable under the current program. In other words, the state would provide medical assistance to persons who otherwise would not have been eligible because they make too much money. The purpose of the "medically needy" program is to allow lower-middle-income person who can not afford to shoulder the full cost of medical care the opportunity to receive needed medical assistance. Under such a program, these individuals would "spend down" to the income limits, and the state would pick up the rest. This proposal is divisible from the rest of the insurance program discussed here and should be adopted even if no other aspect of my suggestions is appropriate for legislative action.

Alaska should utilize Medicaid funds to make health insurance available to qualified individuals:

Mandatory employer coverage: Hawaii has pioneered the area of requiring certain employers to carry health insurance on all employees. The specifics of their legislation are contained in Sharman Haley's report "Third Party Health Coverage in Alaska" and I therefore will not discuss the details here. Mandating employer sponsored coverage will dose a large gap in Alaskan health care, will not involve a great deal of expense on the part of the state and will not substantially increase state bureaucracy.

Alaska should require employers to provide health insurance meeting minimum standard benefits to employees.

Reinsurance pools: At the present time in Alaska, high-risk individuals can not purchase health insurance at any price. To combat this problem and also to protect insurance companies from having to bear too great a burden in insuring such individuals, several states have developed mandatory reinsurance pools to ensure health care coverage for high-risk persons. (see enclosed legislation). This is a relatively inexpensive program to implement.

Alaska should require insurance companies to form reinsurance pools to protect high-risk individuals.

By combining the above four programs, the state would ensure that some form of health insurance is available to nearly all Alaskan citizens. The only persons left substantially unprotected are the self-employed. Although a provision could be made whereby these people could have optional health insurance with a state subsidy, this type of program would be extremely expensive. Self-employed and self-insured persons benefit from the above described program through the minimum standard benefits requirement.

I hope my review of this issue has been of some use to you, it certainly has been of great interest to me. If there is anything further I can do, please let me know (preferably after February 28 and the traumas of the bar exam are over).

Enjoy the session!

Sincerely,

Laurie Otto

SUMMARY OF 1976 COMPREHENSIVE HEALTH INSURANCE ACT
Chapter 296, Minnesota Laws of 1976
Amended by Chapter 409, Minnesota Laws of 1977

Objectives

The 1976 law consists of three articles: Article I (a) establishes minimal standards for health insurance policies and (b) creates the Comprehensive Health Association which administers a "state insurance pool" for persons who are unable to buy insurance because of existing health problems. The objective of this article is to upgrade health insurance policies and to increase the availability of health insurance.

Article II establishes a hospital rate review system. This provision requires licensed hospitals to be subject to rate review by an approved voluntary, peer review organization. The Department of Health is authorized to "publicly review and comment" on the rates charged by hospitals. The objective of this article is to reduce rates charged by hospitals by monitoring those charges via a rate review system.

Article III provides financial assistance to persons who incur high medical expenses. The Catastrophic Health Expense Program is designed to protect households from being bankrupted by medical care expenses.

Summary

Article I - Minnesota Comprehensive Health Insurance Act of 1976

Part A - Minimum benefits for health insurance coverage

Duties of Insurance Companies

All health insurers doing business in the State of Minnesota are required to offer a "qualified" health policy to applicants for insurance. The article defines three levels of "qualified" plans--number one (low), number two (standard), and number three (high). The minimum benefits of a number three plan "shall be equal to at least 80 percent of the cost of covered services in excess of an annual deductible which does not exceed $150." The coverage shall also include a limitation of $3000 per person on total annual out-of-pocket expenses for covered services. The maximum lifetime benefit cannot be less than $250,000. The article also itemizes the services to be covered by the "qualified" plan. The three levels of "qualified" plans vary only in the amount of deductible required: number three - $150; number two - $500; and number one - $1000. A health maintenance plan is defined as a number three qualified plan. Insurers are not prohibited from developing and selling an "unqualified" plan, however, the insurance companies must "affirmatively" offer coverage for major medical expenses to an applicant for a new "unqualified" plan. This major medical coverage shall be payable, subject to any copayment, up to a maximum lifetime limit of $250,000 for out-of-pocket expenses incurred within a calendar year, exceeding $5000.

Any insurance company issuing a Medicare supplement plan shall offer a "qualified" Medicare supplement plan to each eligible applicant. A plan is deemed "qualified" if it provides coverage of 50 percent of the deductible and copayment required under Medicare and 80 percent of the charges for "qualified plan" covered services which are not paid by Medicare. This plan includes a $1000 per person limit on annual out-of-pocket expenses.

* Note: As of July 1, 1979, covered services must include a second opinion on surgical procedures expected to cost a total of $500 or more.

Duties of Employers

Each employer who makes available to his employees a health insurance plan must offer at least a number two plan. The employer does not necessarily have to finance the qualified plan. It can be financed from funds contributed solely by the employer or solely by the employees; or a combination thereof. For the purposes of this article, an employer is defined as employing ten or more residents of the state. The employer may supplement the existing health plan in order to meet the number two plan requirement.

The penalty for noncompliance is the exclusion of the employer's costs for health benefits as a state income deduction. A non-profit employer would lose its tax exempt status if the requirement is not met.

Any employer with 100 or more employees must offer a dual option to obtain either an accident and health insurance policy or a health maintenance organization contract, if one is available.

Conversion Privileges

The law requires group accident and health insurance policies and health maintenance organization contracts to include the right to convert to an individual coverage "qualified" plan without the addition of underwriting restrictions. The person leaving the group has 30 days in which to exercise his right to convert.

Each health insurance plan must also include a provision allowing, upon the death of an insurance holder, other individuals covered under the plan to continue coverage.

Part B - Comprehensive Health Insurance Plan

Article I also creates the Comprehensive Health Association which must offer policies which provide the benefits of a number one qualified plan, a number two qualified plan, and a qualified Medicare supplement plan to individuals who cannot otherwise obtain standard insurance coverage becuase of health problems. The Association is comprised of all insurers, self insurers, fraternals, and health maintenance organizations doing business in Minnesota. These policies are referred to as the Comprehensive Health Insurance Plan or State Plan.

Comprehensive Health Insurance Plan

The Comprehensive Health Association is responsible for selecting a writing carrier to administer the Comprehensive Health Insurance Plan. The Association may select separate writing carriers for each type of "qualified" plan.

The state plan is open for enrollment at all times. An eligible person may apply to the Association or to the writing carrier. For the first 18 months of the plan's operation, premiums were determined by averaging the premium rates charged by the five largest insurers in each plan category. Subsequent premium determination will be based on actuarial experience. Not more than 12.5% of the premiums may be expended by the writing carrier for administration costs.

Each member of the Association is responsible for sharing the losses due to claim expenses of the state plan. Members shall share those costs on a pro-rated basis, determined as a ratio of premiums received by a member to the total amount of total premiums received by the Association members.

If there are any net gains from the operation of the state plan, it shall be used to offset future losses or reduce premiums.

Public Education

The Association is responsible for disseminating information to the public regarding the availability of the state plan.

Referral Fee

The writing carrier shall pay an agent's referral fee of $25 to each agent who refers an applicant to the state plan. This fee is included in the 12.5% administration expense limit.

Pre-Existing Condition Clause

An enrollee of the state plan is not covered for any pre-existing condition during the first six months of coverage if the condition was diagnosed or treated within 90 days prior to the filing of an application.

Reinsurance

A member of the Association may elect to reinsure the risks involved with being required to offer (a) individual qualified plans, (b) group conversions, (c) group qualified plans with fewer than 50 members, or (d) major medical coverage. The member would be reinsured through the Association. The Association administers the policies that are reinsured by a member. Any income in excess of the costs incurred for providing the reinsurance service shall be used to offset losses in the state plan or reduce the premiums.

Article II - Hospital Administration Act

Article II establishes a system by which hospital rates are reviewed. A licensed hospital may agree to submit its financial reports and rate schedules to a voluntary, non-profit rate review organization

for review. If the hospital does not report to this rate review organization, it will be subject to review by the Department of Health, the administrative agency for this act.

The Department of Health shall prescribe standards for purposes of approving a rate review organization. The Department is authorized to collect financial information which includes (a) a balance sheet, (b) a statement of income and expenses, (c) a copy of the most recent Medicare cost report, and (d) a schedule of rates. The Department also has the right to inspect hospital records and audits. Any modifications to a hospital's rate schedule must be reported to the Department of Health 60 days in advance of their effective date. If a hospital is subject to review by the Department of Health, the Department may conduct a public hearing on any rate increases which they consider excessive and may publicly comment on any increase.

Insurance Rates

This article also requires actuarial justification of any premium increase for a nongroup policy at the time of filing the insurance plan with the Commissioner of Insurance.

Another provision directs the Commissioner of Insurance to disapprove a filed health plan "if the proposed premium rate is excessive because the insurer has failed to exercise reasonable cost control."

Article III - Catastrophic Health Expense Protection Act

This program offers financial relief to households which incur large medical expenses. The state will pay for 90% of "qualified" expenses, for which no third party is liable, in excess of a threshold figure which is calculated by an income-related formula. "Qualified" expenses are those charges for covered services itemized as minimum benefits in the Comprehensive Health Insurance Act (Article I).

The above mentioned formula is as follows: (a) calculate 40% of household income up to $15,000, plus 50% of household income up to $25,000, plus 60% of household income in excess of $25,000; or, (b) $2,500, whichever is greater. If, for example, the household income is $10,000 the threshold figure is $4000. In this case the state would pay 90% of "qualified" expenses in excess of $4000.

Nursing Home Provision

The 1977 Legislature amended the Catastrophic Act to provide assistance to persons under the age of 65 who have resided in a nursing home for more than three years. The state will pay for all nursing home expenses which exceed 20% of household income.

Reasonableness of Rates

The Commissioner of Public Welfare is granted the authority to determine the reasonableness of provider charges. The Commissioner may also determine the "medical necessity" of a health service. In order to carry out that authority, the Commissioner may contract with a professional standard review organization to make these determinations.

Experience

Article I - Comprehensive Health Insurance Plan

The state plan went into effect on January 1, 1977. As of June 30, 1978, the plan had 1,074 policies in force. The total premiums earned for the first 18 months of the plan's operation was $441,107.73. As indicated earlier, the premium rate for this time period was based on the average of premiums charged by the five largest insurers in each category. The total claims paid for this period is $392,412.93. A reserve for incurred but not reported claims has been set at $220,000.

The 1978 State Legislature appropriated $200,000 to reimburse the Comprehensive Health Association for the first $200,000 of claims expenses incurred after June 30, 1978 which are in excess of earned premiums. The premium will be determined by generally accepted actuarial principles subsequent to June 30, 1978 except that the new premium rate cannot exceed 125% of the average premium charged by the five largest insurers in each policy category. This premium limit was enacted by the 1978 Legislature.

Article II - Hospital Administration Act

All licensed hospitals have opted to be subject to review by a voluntary, non-profit rate review organization. This is the peer review organization of the Minnesota Hospital Association. It is estimated that if the hospitals comply to the proposed budgets developed through rate review the increase in hospital charges will be between 10% to 11% compared to an historical increase of nearly 14% per year.

Article III - Catastrophic Health Expense Protection Act

This Article went into effect July 1, 1977. Eighteen million dollars was appropriated for the biennium 1978-1979 for the medical care portion of the program. $900,000 was appropriated for the nursing home section. To date there have been 148 approved applications for the medical care program for an expenditure of $441,299. For fiscal year 1978, twelve applications were approved for the nursing home expense program, totaling $55,323.65.

September, 1977

THE POLITICAL PLANNING OF A STATE HEALTH INSURANCE PROGRAM

By Senator Donald D. H. Ching
Majority Leader
Hawaii State Senate

The concept of prepaid health care based on mandatory employment-related coverage was a brand new idea when first introduced in the Hawaii Legislature in 1971. It became law three years later as Act 210 of the 1974 legislative session.

Enactment of our Prepaid Health Care Law climaxed several years of lively discussion in the Legislature, and for many of us who supported it, Act 210 marked yet another milestone in the growing body of progressive legislation placed in our statutes since our Islands became a sovereign state in 1959.

Measured against the national background, the law represented a significant achievement in terms of social progress. Yet, while there was much discussion between introduction and enactment, the proposal was not widely viewed as politically controversial by the public at large. As a matter of fact, in my nearly 20 years of experience in our Legislature, I have seen a lot more heat generated over issues of considerably lesser public import.

To be sure, there was resistance and opposition from the traditional opponents of so-called "social legislation." But there was not the hue and cry that one might expect, considering the novelty of the concept.

This is not to say that the spectrum of political thought in Hawaii does not cover any ground to the right of center. Let me assure you we do have traditional conservative views held by many in our State, and I, for one, believe this is a healthy condition. But to the credit of those who did not adhere to the concept, their opposition was not based on the emotionalism that too often attends and distorts vital public issues of the day.

I believe the law was generally accepted by the public because of the kind of political climate we have in Hawaii and because the law was viewed as a logical extension of the kinds of programs that were already in effect at the time.

Let me briefly describe our Prepaid Health Care Law, then attempt to present an account of its chronological place in the context of Hawaii's legislative history.

The Act requires virtually every employer in the State to provide regular employees a health insurance program and to contribute at least one-half the premium cost for the employees' coverage. The major categories of employees excluded are insurance and real estate salesmen paid entirely by commissions and individuals under 21 working under a parental relationship.

The employee's contribution is limited to no more than 1.5 per cent of his monthly salary. A "regular" employee is defined as one who works at least 20 hours a week, excepting seasonal hires in Hawaii's pineapple industry.

Health plans negotiated under collective bargaining agreements are exempt because such negotiated benefits are, for the most part, more liberal in coverage or employer contributions than required under the Act.

An employer can elect to provide a plan which obligates the insurer to either reimburse the expenses of health care or to directly furnish the required health care benefits. The level of benefits provided must be equal to or medically reasonably substitutable for those benefits provided by prepaid health care plans of each type -- direct or reimbursed -- which has the largest number of subscribers in the State. In Hawaii, the standards are thus based on the Kaiser Health Foundation's Plan I, in the case of direct services, and the Hawaii Medical Service Association's (Blue Shield) Plan IV, in the case of reimbursed expenses. Both the Kaiser and HMSA plans are basic, comprehensive medical plans emphasizing ambulatory care.

Plans offered by other insurers may be provided, upon review and approval of a seven-member advisory council comprised of consumer, employer, medical profession, and health plan representatives.

What kind of coverage is required by our law? Every qualifying plan must include the following:

-- 120 days of hospital benefits, plus outpatient services.

-- surgical benefits, including anesthesiologist services.

-- medical services, including home, office, hospital visits, and intensive medical care.

-- laboratory, x-ray, and radio-therapeutic services necessary for diagnosis and treatment.

-- maternity benefits, provided an employee has been covered for nine months prior to childbirth.

-- and, under an amendment added last year, substance abuse benefits for alcoholism and drug addiction, including outpatient services and detoxification and acute care benefits.

The foregoing summarizes the basic provisions of our law.

How, then, did we come to enact what some may view as an extremely liberal mandatory health insurance program?

First, it should be noted that we have a substantial body of progressive and advanced social legislation in Hawaii. This is true of our labor laws, our educational system, our public welfare program, and in our judicial system. For instance, our minimum wage law, wage and hour law, workers' compensation, temporary disability insurance, and unemployment insurance programs all have standards comparable to the highest in the Nation. In addition, we also have a public defender program and a criminal injuries compensation law. We also have a no-fault insurance law and a medical malpractice law, the latter amended this year to remove the mandatory feature and to permit doctors the option of forming cooperative indemnity plans to protect themselves against liability judgments.

Our public assistance program is so liberal it is causing us severe financial strains -- but that's another story, and I won't digress into it, except to note that we eagerly look forward to federal reform initiatives promised by the Carter Administration.

The political foundation for eventual enactment of our prepaid health care law was further set during the mid-sixties in a program popularly labeled "The New Hawaii," adopted jointly by the legislative majorities and the Administration.

During this period, dramatic changes were advanced in terms of Hawaii's social, economic, and political conditions. Basically, the stated objective was to enact laws and programs to insure equal treatment and equal opportunities for all citizens. If this sounds simplistic, it should be borne in mind that Hawaii was pretty much the political domain of the sugar and pineapple plantation interests up until the end of World War II and that when, for the first time in our history, we elected a Democratic Governor and Democratic majorities in both houses of the State Legislature in 1962, there were not a few who thought the revolution was at hand.

But the changes we sought were achieved in orderly, not revolutionary, fashion. And there was early ferment for novel and innovative legislation to extend equal opportunity in basic human concerns to all segments of our society.

It appeared logical to move toward some form of mandatory prepaid health care law. The question then was how best to extend coverage to the uninsured working men and women

of Hawaii and thereby provide them "equal treatment" as a matter of social equity. Moreover, how could this be best achieved without any substantial added costs to the State, bearing in mind that our centralized system imposes unusually heavy financial burdens on the State?

To determine cost factors and the numbers and classes of employees in the uncovered "gap group," a study was commissioned through the Legislative Reference Bureau, the Legislature's principal research arm. Dr. Stefan A. Riesenfeld, former University of California law professor and a widely recognized authority on social legislation, now counsel to the U.S. State Department, was selected to do the research. Professor Riesenfeld had prepared an earlier report for the Legislature on temporary disability insurance, which study was extremely valuable to us in enacting our TDI law in 1969.

The Riesenfeld report, published in 1971, was a thorough and comprehensive study. Acknowledging the difficulty of precisely quantifying need, the report generally concluded that, among the State's employed, 11.7 per cent did not have hospital coverage, 13.5 per cent lacked surgical coverage, and 17.2 per cent did not have regular medical insurance.

The existence of a significant number of otherwise uncovered potential beneficiaries of the proposed legislation formed the primary policy consideration of the program. Other factors considered included the rising costs of health care and the need to assue the most practical method of ensuring the financial availability of health care for Hawaii's working men and women. Thus, the overall health of our population was the over-riding concern; without ensuring the

ready accessibility of health care, how could optimum health care be maintained?

Data compiled and analyzed in the report were very thorough. Sources outside the State included the Health Insurance Association of America, the Health Insurance Institute, the Bureau of Labor Statistics, the Social Security Administration, and the Bureau of the Census. Information from State agencies included data from the State Statistician and the Departments of Taxation, Planning and Economic Development, Social Services and Housing, and Labor and Industrial Relations. Data was also gathered from labor unions, the Hawaii Employers Council, the HMSA, Kaiser Foundation, and through questionnaires mailed to all employers covered by the Hawaii Employment Security Law.

Data used included statistics relative to the following:

-- Population by age levels, civilian and military. The latter distinction was important because of the sizeable permanent military presence in Hawaii.

-- Labor force, public and private.

-- Population entited to Medicare.

-- Extent of prepaid health plan coverage for hospital, surgical, and medical benefits, both for subscribers and dependents.

-- Size and type of business of private employers.

-- Medical assistance recipients and expenditures.

As indicated by the sources of data, the full range of interest groups became involved in the process, whether employer or employee oriented.

During our legislative committee hearings, testimony was presented by representatives of the insurance industry, the health professions, the University of Hawaii Schools of Public Health and Social Work, the Comprehensive Health Planning Council, and a wide range of individual citizens.

There was very little question as to whether the plan proposed would be comprehensive or catastrophic in its approach. The Riesenfeld report recommended the comprehensive coverage plan and specifically recommended the adoption of prevailing coverages in the State, which then became the legal minimum. This reflected the health care habits and patterns of the State and set a floor without unduly disrupting the existing schedules of coverage.

The decision to make coverage mandatory was central to the legislation proposed. Before enactment of Act 210, voluntary participation was, in effect, the public policy of the State.

As to the question of affordability, the only new cost factors imposed upon the State weere founded upon the administrative requirements of the law and anticipated premium supplementation.

Administration of the new program proved to be quite easy, as it was smoothly meshed in as a responsibility of the Disability Compensation Division of the State's Department of Labor and Industrial Relations. Thus, three important employee benefits programs were placed under one umbrella: the well-established Worker's Compensation Law; the TDI law passed in 1969; and the 1974 Prepaid Health Care Act. (Incidentally,

you may have noticed that what used to be known as Workmen's Compensation is now referred to as Workers' Compensation in our State, reflecting the many similar amendments we have adopted consonant to our accepted policy on equal rights.)

Much to our pleasant surprise, the administrative expenses of Act 210 have been comparatively low. Initially, we authorized 11 new positions in the Disability Compensation Division, with an appropriation of $250,000 in General Funds to cover salaries and other expenses. Much to the division's credit, Act 210 was implemented with substantially the existing staff. The first appropriation thus lapsed, and it was renewed this year at the same annual level on the expectation that additional personnel will be recruited during the next biennium.

A feature of Act 210 is a provision for premium supplementation financed by the State to cover employer premium requirements caused by limits imposed on employee contributions. This feature subsidizing employer contributions was included to provide a cost protection for marginal small businesses. Initially, $375,000 was set aside in a trust fund for premium supplementation. Again, to our pleasant surprise, there has been little need to supplement premiums. It's estimated that, to date, only some $20,000 to $30,000 has been tapped from the trust fund in subsidies. Meanwhile, the fund is held in an interest-earning status.

What are the numbers that actually surfaced as a consequence of Act 210? The division reports that about 18,500 employers have thus far been registered. However, the extent

of newly covered workers has been difficult to establish because many of the registered employers had voluntary programs in effect before Act 210. Dr. Riesenfeld has estamated some 40,000 employees were not covered at the time he conducted his study. The Disability Compensation Division is of the opinion that actually more than 40,000 received new benefits becaus[illegible]e requirement that employers cover at least half [illegible]r the premium costs.

Of the 18,500 employers, all but some 1,000 have elected plans offered by the State's two major insurers -- HMSA and Kaiser. The approximately 1,000 employers who have opted for plans offered by other insurers are the major source of additional workload upon the division. Each submittal in this category must be reviewed by the advisory council.

The advisory council provision serves another purpose. During the course of legislative hearings on the act, public health advocates had expressed concern that the required benefits might be too rigid and unresponsive to changes in health care over the years. The Prepaid Health Care Advisory Council provisions were thus added to establish an appropriate agent to review medical equivalency of benefits.

To conclude, in light of Hawaii's experience, I believe any national health insurance plan should take into consideration the course that we have opted for. I am confident the standards we have set would meet any that a federal law would impose. As a means of encouraging other states to follow suit, or to adopt a true state plan such as Rhode Island's,

I suggest federal legislation provide support grants to at least cover administrative costs and any necessary premium supplementation expenses.

Finally, let me summarize the conditions that led to the successful adoption and implementation of Hawaii's Prepaid Health Care Act:

1 -- A political climate sympathetic to social needs.

2 -- Timeliness in terms of progressive improvements to the general body of social legislation already on the books.

3 -- A comprehensive study of a state's needs, to arm proponents with the information necessary to justify the proposed legislation.

4 -- Open discussion involving all interested elements within the public.

5 -- The last may be an element not very common to other jurisdictions, but I believe it was an important consideration in our own deliberations. This is the fact, well established in our study, that the majority of employees insured under voluntary plans or through government-employee programs were covered under plans offered by two major insurers in the State. Having a clear pattern to follow in prevailing benefits, it was easier to overcome resistance against extending similar benefits to all the State's working men and women.

I hope our experience and the foregoing thoughts presented for your discussion prove helpful to you in your own endeavors to develop plans for extending health care benefits to all others who need such coverage in our Nation.

Mahalo.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF DEPUTY COMMISSIONER

ROOM 214 MacKAY BUILDING
338 DENALI STREET
ANCHORAGE 99501

REPORT AND RECORD OF CONFERENCE

Region X - Department of Health, Education and Welfare

Federal Office Complex Seattle, Washington

Tuesday, October 30, 1979

Present: Mike Street; Ed Ross; Jim Van Hoomison; Boyd Kelley, Health Care Finance Administration; Bill Knestes, Indian Health Service; Mr. Moerlin, Health Research; Frederick McGinnis, Alaska Department of Health and Social Services.

Tentative agenda for the conference was distributed and accepted as the working program for the conference this date as follows:

Tentative Agenda

I. Review developments to date on Model Health Plan for Alaska

II. Review of discussions: Center for Health Services Research, University of Washington, on October 29, 1979. Discussion of report on that conference.

III. Federal questions: Region X and Washington, D.C.

A. Waiver possibility: Title XIX, Medicaid funding, for Experimental Program in a State.

B. Technical Assistance Potential--

Region X
Washington, D.C.

C. Grant Fund Assistance: H.E.W.

IV. Conferees: Recommended: H.E.W., Washington, D.C. Week of November 1 - 7, 1979.

V. Other

Full discussions were held on a part of the outline of topics and points raised in the discussions of October 29, 1979, with representatives of the Center for Health Services Research, School of Public Health and Community Medicine, University of Washington, as follows:

A complete discussion transpired with regard to:

Alaska Medicaid Program and costs;
Alaska General Relief Medical Program and costs;
Indian Health Service Delivery System in Alaska/ Medicaid Reimbursement policies;
Alaska Catastrophic Illness Program;
Alaska Military Health Programs;
Private insurance coverages in Alaska;
Other related topics bearing on current status of Alaska health programs.

McGinnis indicated his views of some of the important next steps in developing the anticipated program:

(1) Developing a Planning Task Force;
(2) Providing an Advisory Body;
(3) Creation of small staff and Director;
(4) Developing of Data Gathering and Research Projects:

*Survey/Gathering of published data from all sources bearing on related areas of concern;

*Determination of current total costs in current plan of health services delivery:

Department of Health & Social Services;
Indian Health Services;
Military forces;
Veterans Administration;
Native Health Corporations;
Private insurance premiums and payments on plans;
Labor insurance plans;
Private insurance plans;
Other identifiable costs;
Federal Government/other.

*Determination of gaps in data needed;

*Provide for research needed to meet data needs on expenditures of health funds in Alaska;

*Provide for research to determine number of citizens without adequate health services; estimate costs of providing needed services under agreed-upon options available.

*Synthesis and interpretation of all data on hand and provided through special research tasks;

*Other research components determined necessary as planning gets underway and new needs develop.

(5) Determination of human/personnel and financial resources available from all sources to finance the project of planning:

*Within Health and Social Services Department/ State of Alaska;

1979 Fiscal Year:

Divisions related to health; State Health Planning Agency; Governor's Policy/ Planning Budget; Governor's Contingency Fund.

*Center for Health Services Research University of Washington

*Institute of Social/Government Research University of Alaska

*Possible Demonstration Grants/ Department of Health, Education and Welfare

*Alaska Legislative Appropriation

1980 Fiscal (Supplemental) Year
1981 Fiscal Year

*Private Foundation Grant(s) and other private sources

*Other sources

(6) Preparation of Budget identifying available manpower and funds for 1980 fiscal year and 1981 fiscal year.

(7) Other tasks to be developed and assigned as necessary as project develops.

(8) Determination of technical assistance needs in economics, statistics, planning, accounting, legal and other assistance, and provision for securing needed assistance, including professional services contracts as deemed necessary.

The basic information shared with the Alaska State Health Coordinating Council and Governor Hammond in memoranda of August 3, 1978 and September 18, 1979 was discussed. The conferees had copies earlier of the information in the SHCC memorandum.

In general, the Region X conferees felt that the project was worthy of development and the following points were discussed:

1. The need to determine and state exactly the goals sought in the project. This will be especially important in presenting the project to H.E.W.

2. Recommendations were made to try to contact two officials of HEW in Washington on the forthcoming visit November 1 - 6, if possible; if not possible on this visit to Washington, then in the near future:

   Mr. Ron Carlson, Park Law Building, Rockville, Maryland,

   and

   Mr. Dale Serwer, Baltimore, Maryland.

   Discussions with those men should include funding possibilities and also what they would like to see Alaska demonstrate.

3. Oregon has submitted a "Concept Paper" to Region X expressing the need and desire of that state to reorganize their health funding and programming. Mike Street will attempt to get a copy and will mail to McGinnis when received. (Note: If not received in two weeks, then Alaska should contact Oregon to secure a copy of the concept paper.)

4. It was generally agreed that assistance from the University of Washington Center for Health Services Research would likely be available through a contract with that Center for specific component(s) of the project. Desirability of competetive bidding of any contracts was discussed.

5. The working group formed for the project should give priority to writing of clear specifications of "scope of work" needed and such should be presented to all chosen to present proposals.

6. Mike Street indicated that Region X would determine the best single contact person to represent Region X in keeping in touch with progress on the project. A prospectus should be prepared on the exact services needed from contractors when that information is needed.

General summary comments were made as the conference adjourned with the understanding that the State and Region X would keep in contact on the project.

TELEPHONE NO: 465-3030

FROM: Helen D. Beirne, Commissioner
Dept. Health & Social Services

SUBJECT: MODEL HEALTH DELIVERY PROGRAM FOR ALASKA

You will recall that recently Deputy Commissioner McGinnis and I met with you in order to brief you as to developments to that time on the discussions regarding a model health delivery program for Alaska. We appreciate the time that you gave us to discuss the matter.

A memorandum was developed on September 18, 1979, from me to Governor Hammond. A copy of that summary memorandum is attached in order to share with you the latest developments in the Department's thinking regarding the proposed program.

At a meeting on September 19 in Governor Hammond's office, attended by Deputy Commissioner McGinnis, Jerry Reinwand, Karen Corey, Fran Ulmer and myself, the attached memorandum, having been read by the parties, was discussed.

At the conclusion of the conference, Governor Hammond did indicate to all of us that he had signed his approval to the recommendation made at the end of the memorandum. It will be the Department's plan to proceed with further exploration of the concept and we will plan to keep you informed, as well as others in the Governor's Office. Any comments or recommendations you may have with regard to this proposed program would be welcomed by the Department.

Attachment: Memo, 9/18/79, as indicated

of ALASKA

MEMORANDUM

TO: Helen D. Beirne, Commissioner
Dept. Health & Social Services

DATE: November 5, 1979

FILE NO:

TELEPHONE NO:

FROM: Frederick McGinnis
Deputy Commissioner
Dept. Health & Social Services

SUBJECT: Briefing Memorandum re Conference in Washington, D.C. with Lt. Gov. Terry Miller; Administrative Assistant to the Lt. Gov. Pete Rouse; and William Fullerton of the Firm of Health Policies Alternatives, Inc.

As you may remember, Lt. Gov. Terry Miller mentioned earlier his discussions in Washington, D.C. on a prior visit with Mr. William Fullerton of Health Policies Alternatives, Inc., with regard to Alaska's interest in developing a model health financing plan. You may recall also that Lt. Gov. Miller raised the question informally at a meeting with me and with Pete Rouse in the Governor's Office in Anchorage with regard to whether it might be possible to advance one part of our proposed programming for model programs to improve the catastrophic illness insurance program earlier.

In order to keep you abreast of later developments, at the request of Lt. Gov. Miller I met with him, Mr. Rouse and Mr. William Fullerton in Washington at the place of the Federal Health Policies Conference on Friday afternoon, November 2, at 2 PM. At that meeting, Alaska's plan to do a major study on alternatives in health financing programs was discussed.

No commitments were made to Mr. Fullerton and the following points were made by Lt. Gov. Miller.

1. The Lt. Gov. will discuss with Governor Hammond the possibility of a liberalized catastrophic illness program to assist people of middle to lower incomes who are above the poverty level income and therefore not eligible for relief programs (Medicaid, General Relief Medical).

2. Lt. Gov. Miller felt that the initiative for the short-range program, as well as the long-range program, should rest with the State Department of Health and Social Services.

3. Lt. Gov. Miller will brief Governor Hammond on his interest in improving the catastrophic illness assistance to a newly-defined group of Alaskans. It was understood that Deputy Commissioner McGinnis would brief Commissioner Beirne on these discussions in order that she may be fully aware at each step of the discussions.

4. Lt. Gov. Miller suggested that it might be well if the Governor's Office sponsored a small working party named by the Governor, including the Department of Health and Social Services as lead agency, the Department of Labor, the Department of Commerce (Insurance Division), and the Department of Law for legal counsel, to give guidance to developing some plan for the Governor to present to the Legislature at the forthcoming session.

Mr. McGinnis suggested that if the Fullerton firm should become involved in helping to do any of the research on the short-term or long-range project, it would be necessary for a Request for Proposal to be developed and that equal access to all information concerning Alaska's plan be made to at least three firms who may be interested in providing the professional assistance. It was also indicated that financial resources would have to be found for the additional research in order for either the short-term catastrophic illness program, as well as the longer range, fully innovated program anticipated.

It was indicated that Deputy Commissioner McGinnis would meet again with Mr. Fullerton on Monday afternoon, November 5, which conference did take place, and Mr. Fullerton made available certain materials from his firm as to their experience, which will be made available to you by mail.

Attached is a list of items that I believe the State Health Planning and Development Agency should begin assembling, with at least six copies of all the materials, as soon as possible in order that these materials may be made available to any firm considered as professional consultants to this short-range program, as well as the long-range problem.

I will be glad upon return to Alaska to comment further if you wish on the matters summarized ever so briefly in this briefing memorandum.

FMcG/mag
Attachment, as indicated above

ITEMS THAT THE STATE HEALTH PLANNING AND DEVELOPMENT AGENCY SHOULD ASSEMBLE IN CONNECTION WITH MODEL HEALTH DELIVERY PROJECT

1. General demographic information on the Alaskan population--income, age cohorts, cost of living, rates of inflation, family formation, birth rates, etc.

2. Medicaid Plan--plus all recent statistical data: eligibility, benfits by claim expenditures, administrative costs, etc.

3. Description of existing catastrophic plan, plus all recent statistical information on eligibles, payments and benefits.

4. Statistics on existing health insurance coverage--by plan, numbers of insured (any evidence of overlap?), government employee plan (federal, state and local), benefits covered, major medical or catastrophic provisions).

5. State Health Plan (under health planning law, plus statistical information on kinds, numbers and locations of all classes of health care providers.

6. Alaska Medicaid laws and regulations.

7. General Relief Medical laws and regulations.

8. Catastrophic Illness laws and regulations.

9. Department of Health and Social Services and Indian Health Services Memorandum of Agreement on Medicaid.

10. Any other related information deemed by SHPDA to be important to understand the clear status of health programs in Alaska today.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF DEPUTY COMMISSIONER

ROOM 214 MacKAY BUILDING
338 DENALI STREET
ANCHORAGE 99501

REPORT AND RECORD OF CONFERENCE

Center for Health Services Research
School of Public Health and Community Medicine

University of Washington Seattle

Monday, October 29, 1979

Present: Mr. Marc E. Provence, M.P.H. (HMO)
Ms. Shirley McEvoy, Research Assistant
Frederick McGinnis, Deputy Commissioner

The meeting between the above listed individuals began at 10:30 a.m. and concluded during early afternoon.

Mr. McGinnis outlined developments to date on the Alaska Model Health Program and reviewed earlier meetings with groups including the meeting with Dr. Stephen H. Shortell, Director of the Center, Ira Moscovic, Andy Dolan and Laura Beth Lawson last year, when the idea of a revised health plan for Alaska was first being discussed.

Copies of the Department memorandum dated August 2, 1978 to the Alaska State Health Coordinating Council and September 18, 1979 to Governor Jay S. Hammond were discussed as background papers to indicate the present thinking of Department leadership.

A complete discussion transpired with regard to:

Alaska Medicaid Program and costs;
Alaska General Relief Medical Program and costs;
Indian Health Service Delivery System in Alaska/ Medicaid Reimbursement policies;
Alaska Catastrophic Illness Program;
Alaska Military Health Programs;
Private insurance coverages in Alaska;
Other related topics bearing on current status of Alaska health programs.

McGinnis indicated his views of some of the important next steps in developing the anticipated program:

(1) Developing a Planning Task Force;
(2) Providing an Advisory Body;
(3) Creation of small staff and Director;
(4) Development of Data Gathering and Research Projects:

*Survey/Gathering of published data from all sources bearing on related areas of concern;

*Determination of current total costs in current Plan of health services delivery:

Department of Health & Social Services;
Indian Health Services;
Military forces;
Veterans Administration;
Native Health Corporations;
Private insurance premiums & payments on plans;
Labor insurance plans;
Private insurance plans;
Other identifiable costs;
Federal government/other.

*Determination of gaps in data needed;

*Provide for research needed to meet data needs on expenditures of health funds in Alaska;

*Provide for research to determine number of citizens without adequate health services; estimate costs of providing needed services under agreed upon options available;

*Synthesis and interpretation of all data on hand and provided through special research tasks;

*Other research components determined necessary as planning gets underway and new needs develop.

(5) Determination of human/personnel and financial resources available from all sources to finance the project of planning:

*Within Health and Social Services Department/ State of Alaska;

1979 Fiscal Year:

Divisions related to health;
State Health Planning Agency;
Governor's Policy/Planning Budget;
Governor's Contingency Fund.

*Center for Health Services Research
University of Washington

*Institute of Social/Government Research
University of Alaska

*Possible Demonstration Grants/
Department of Health, Education & Welfare

*Alaska Legislative Appropriation
1980 Fiscal (Supplemental Year)
1981 Fiscal Year

*Private Foundation Grant(s) and other private sources

*Other sources

(6) Preparation of budget identifying available manpower and funds for 1980 fiscal year and 1981 fiscal year.

(7) Other tasks to be developed and assigned as necessary as project develops.

(8) Determination of technical assistance needs in economics, statistics, planning, accounting, legal and other assistance and provision for securing needed assistance, including professional services contracts as deemed necessary.

Earlier, Dr. Shortell had indicated to the State of Alaska that possible assistance which might be arranged through the Center for Health Research included:

Informal counsel and assistance;
Guidance reviews;
Contracts for defined components of work;
Assistance in planning evaluation;
Systems design, policy formulation.

Mr. Provence and Ms. McEvoy restated some of the above listed points during the meeting, emphasizing the possibility of specific contracts for specific components of the necessary work. It was indicated that beyond the expertise available in the Center for Health Services Research the Center has access to many sources of expertise within the University of Washington which could be called on for participation.

It was agreed at the conclusion of the meeting that:

* Discussions would be held with Dr. Shortell, Director, on his return to Seattle and a report made of today's discussion.

* A careful review of the two memoranda referred to herein earlier and the concepts contained therein would be discussed in staff.

* Following the above steps they will prepare a letter to the Department with their observations and comments. Included in the comments will be a review and listings of the Center's potential involvement in the project and the bases (financial, personnel and otherwise) of such participation.

Following the outline of the conclusions and summaries listed above, the meeting was adjourned.

SUBJECT: Model Health Delivery System for Alaska

FROM: Helen D. Beirne, Commissioner
Dept. Health & Social Services

Helen D. Beirne

As you will note from the enclosed material, the Department of Health and Social Services is moving rapidly ahead on a comprehensive study of a model health delivery system for Alaska. The Department's coordinator of this study is Deputy Commissioner Frederick McGinnis. As you are aware, Dr. McGinnis, who is at present located in Anchorage with a logistic responsibility for the Southcentral area, has had significant experience in the field of health and social services. His interest in the present topic dates back to when he served as the Commissioner of the Department of Health and Social Services for a period of four years. It could be stated that he has a greater depth of knowledge in this particular area than any other person in the state.

Deputy Commissioner McGinnis and I have met with Governor Hammond on two occasions and have received his concurrence that we should proceed on this matter as rapidly and thoroughly as possible with frequent informational and directional contacts with the Governor's Office.

In this packet you will find Dr. McGinnis' briefing memorandum regarding his conference in Washington, D.C., with Lieutenant Governor Terry Miller, which is their second meeting since the Governor's concurrence with the project. Also included are reports and records of the conferences he has recently attended to supplement our knowledge of model health delivery systems, to test the interest of those agencies with whom we must coordinate, and to determine from where assistance for such a program may come.

These reports, and those to follow, will express to you the Department's intense and dedicated interest in establishing a health delivery system for Alaska that will address the health and medical needs of all Alaskans in the most cost effective manner possible.

From this date on, and to expedite this study, Deputy Commissioner McGinnis will be copying you simultaneously with the Commissioner's Office as we move to a resolution of one of the state's most pressing problems in conjunction with the Governor's Office.

SUBJECT: Model Health Delivery Program for Alaska

From time to time discussions have taken place within the Department and with others with regard to a "Model Health Delivery System" for the State of Alaska. For a number of years, delays have been encountered in active planning for an improved delivery system for Alaska because of the prospect of the National Health Insurance program being enacted by the Federal Congress. While numerous discussion continues to go forward with regard to a National Health Insurance program, it now appears that the enactment of and the implementation of such a plan are receding farther and farther into the future.

The question continues to be raised as to whether Alaska should consider the possibility of a Model Health Delivery System geared to the needs of our state. If such a system could be developed and become operative sometime before any National Health Insurance program is in place, it could serve as a prototype for the nation.

There are several reasons why Alaska should consider developing, as rapidly as good planning will permit, a Model Health Delivery Plan for all the citizens of our state. With our extremely small population and with the numerous extensive health delivery plans in place already, it would seem that Alaska could adjust its present program and add thereto in order to create a truly comprehensive and effective health delivery system. It will take bold, creative and extensive work to develop such a system for Alaska.

There are numerous parties at interest in such a proposed plan. In addition to the State of Alaska (executive and legislative branches), the Federal Department of Health, Education and Welfare and its several divisions have strong interests. The private physicians and hospitals of the state, which together become the strongest foundation stones of health delivery systems, would have substantial interests.

The Indian Health Service and the Alaska Native Health Corporations have strong interests, as would the insurance industry serving Alaska. Additional exploration will reveal other important interests to be considered, including the planning arm of our Department, the Office of Planning & Research of the Governor's Office, local, regional health planning agencies and the State Health Coordinating Council. As plans develop, all such segments with interest in such a program will need to be involved in the

planning, goal and objective setting, and implementation phases of any new program.

Apart from social and health policies concerned and apart from the different funding mechanisms and health providers, there is a national, as well as Alaskan, growing concern over the spiraling medical care costs. According to the U. S. Department of Labor, Bureau of Labor Statistics, the medical care costs in Anchorage, Alaska, in 1977 were 60% over the U. S. urban average costs. Los Angeles, California medical care costs were only 25% above the U. S. urban average costs.

A variety of studies has indicated that hospital charges and doctors' fees have been rising at higher rates throughout the nation than the Consumer Price Index has been accelerating.

Any new system planned should address (1) improved social policy, (2) improved health policy, (3) strong interest in prevention, (4) a more equitable access to health services, and (5) cost containment and cost effectiveness.

All of the above considerations, and others, have initiated certain discussions with regard to the prospects of the State of Alaska designing a new system and plan for the delivery of health services.

A careful analysis of a part of public spending for health in Alaska on the federal and state levels easily identifies approximately 183 million dollars being spent in FY 1980 for health programs (excluding capital expenditures) through our Department and the Indian Health Service alone. Other expenditures related to military personnel would be on top of that. In addition, special federal grants to the Native health corporations and other organizations in Alaska probably would bring the total into the 200 million annual range during FY 1980. Those figures exclude also the health care coverage of State, federal and local government employees covered under health insurance programs. Such costs represent an outlay of public funds on behalf of those employees of government at all levels in Alaska. Excluded also are industry, business and private insurance programs. In 1977, at least $84,822,000 in health care and accident insurance premiums were paid.

A considerable amount of research will need to be done before Alaska can develop a definitive statement as to the total actual expenditures for health services in the State. Such research should be undertaken and facts developed as completely and as accurately as possible as to the status of spending at the present time. Any proposal for a revised program of health delivery in the state should be based upon sound statistical and fiscal data and should be able to demonstrate an improvement over the present

system. Any proposal would need to be acceptable to private providers.

The following contacts have been made and conferences on the concepts presented herein have been held as follows:

I. Washington, D.C.

Dr. George Lythcott of the Health Services Administration. Dr. Emory joined the discussions.

Mr. Isadore Seeman of the Office of Health, Policy, Research & Statistics of the U. S. Public Health Service

Mr. Ronald Carlson of the Health Care Finance Administration.

V. State of Hawaii - Honolulu

Department of Labor
Department of Public Assistance
Department of Health

The purpose of this memorandum is to bring you up to date with the Department's present thinking and the explorations which have been going forward recently.

While your representatives at several meetings indicated that the concept should be explored further, the Department requests your formal approval to proceed further in development of the plan. Our plan would be to keep you advised at each phase and to seek your concurrence in any major commitments which would be needed as the study phase develops.

It is anticipated that the following steps will be taken in the near future by the Department, provided your approval to proceed is given at this time:

1. A survey of present planning and research funds available within the State of Alaska to assist in this planning effort. Included in the survey of financial resources will be the Office of Health Planning and Development of our Department, the budgets of the health divisions of our Department (Mental Health, Public Health, Alcoholism & Drug Abuse). Explorations may go forward with regard to resources which may be available from private foundations and the federal government.

2. A clarification of assistance that may be available through the University of Washington's Center for Health Services Research, Department of Health Services, under their contract with the federal government to assist states in Region X with health planning. In addition, explorations should be made with the University of Alaska's Institute of Social, Government and Economic Research as to any assistance they may be able to give the project.

3. If financial resources can be made available, the setting of criteria for and the naming of a project director for the plan. The project director and/or staff probably should be located within the Department's Office of Health Planning and Development, but given the specific task of working on this specific project.

4. Based on budget considerations and availability of funds, a small but competent staff should be identified

either to do the research or to contract for the research necessary to develop the data needed to carry forward the plan envisioned.

5. Preliminary conversations and/or discussions should be held with other parties at interest within Alaska, including:

   - Indian Health Service
   - Alaska Hospital Association
   - Alaska Medical Association
   - Alaska Legislature
   - Insurance industry
   - Governor's Planning Office
   - Consumer representatives

6. In due course, a broad-based advisory panel should be named to advise the project director and staff. Consideration will be given to whether or not the State Health Coordinating Council might serve as the advisory group to the project with possible provision for additional technical expertise if needed.

7. A proposed schedule of activities with time frames and objectives should be developed in order to plan realistically for the project.

Additional information will be provided to you if requests on any of the topics presented in this briefing memorandum.

RECOMMENDATION:

It is recommended that your approval be given to explore further the concept of a revised, improved and comprehensive health delivery system for Alaska with the goals of better services and cost efficiencies.

Bill/Resolution No. House CS for CS for Sponsor Substitute for Senate Bill No. 227 (HESS)

Title An Act relating to the health of residents of the State.

Requested by The Hess Committee Date May 2, 1980

For Full Fiscal Year

II. FISCAL DETAIL

Agency Affected Department of Health and Social Sevices

Program Category Affected Health/Social and Economic Assistance

BRU, Program, or Subprogram(s) Affected Medicaid/Eligibility Determination/PAA

(Note: If more than one budget component is affected, separate line-item amounts and funding for each component in the analysis section.)

EXPENDITURES (Thousands of Dollars)

	FY 80	FY 81	FY 82	FY 83	FY 84	FY 85
100 PERSONAL SERVICES		448.3				
200 TRAVEL		17.0				
300 CONTRACTUAL		175.5				
400 COMMODITIES		8.5				
500 EQUIPMENT		17.5				
600 LAND & STRUCTURES		-0-				
700 GRANTS, CLAIMS, ETC.		23,527.7				
TOTAL		24,194.5				

FUNDING (Thousands of Dollars)

GENERAL FUND		8,477.5				
FEDERAL FUNDS		15,717.0				
OTHER (Specify Fund Source)		-0-				

POSITIONS

FULL TIME		17				
PART TIME		-0-				
TEMPORARY		-0-				

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Medical benefits would be provided to approximately 3,065 new cases under the Medicaid program. Administration of program benefits would require 15 field staff positions and 2 central office positions, office space, and additional computer time to be divided between the Eligibility Determination and Public Assistance Administration BRUs. Funding is 50% federal except for the Indian Health Care program which is funded at 100% federal funds. Since the bill proposes to add new coverage groups and new categories of coverage to Medicaid, there will be a reduction in General Relief Medical program expenditures as indicated on page 2. Thus, the actual increase in state General fund revenues needed for this increased Medicaid coverage is 8,477.5 - 4,471.8 = 4,005.7.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Funding necessary to make interest payments to providers for Medicaid and General Relief Medical clean claims not processed within 30 days of receipt by the Department. Federal law requires states to process 90% of Medicaid clean claims within 30 days of receipt, however no prevision is made under federal law for funds to be used to make interest payments. Thus, all interest payments must be made using state funds only.

[illegible] Legislative Finance Prepared by: David E. Davidson Date: May 2, 1980

METHOD USED TO DEVELOP FISCAL NOTE FOR HCS for CS for SSSB 227(Fin.)

SB 227* proposes to add new coverage and new eligible categories to the Medicaid and General Relief Medical (GRM) programs administered by the Department of Health & Social Services through the Division of Public Assistance. The bill would add services and eligible beneficiaries not presently covered by a medical assistance program administered by the Department. In order to attempt to gauge the effect of SB227, it was necessary to do some projections based on the present Alaska Medicaid and GRM programs and the Medicaid programs in other similar states. In developing a fiscal note for SB 320, the Department acquired financial reports from five western states having medically needy programs. The financial reports covered the federal fiscal years 1977 and 1978 for Hawaii, Montana, North Dakota, Utah, and Washington. This information also was used to develop the fiscal note for SB 227.

The fiscal note is divided into four pages to allow for separate considerations of adding new services and eligible groups to Medicaid on the GRM program by the effect that addition to Medicaid, the creation of a medically needy program, and the payment of interest on past due medical claims.

The first page of the fiscal note covers the addition of new eligible groups and service categories under the Medicaid program. The basic Medicaid request for FY 81 minus the 100% federally-funded Indian Health Care Improvement Act coverage ($40,720,600) was used as a base. To that was added 17.1% additional funds for those new service categories that are not presently covered under the Alaska Medicaid program. This brings the total to $47,683,800. The 17.1% figure is derived from the average percentage in the five other states for those categories of service that are not covered under the Alaska Medicaid program that would be added by this bill. This subtotal was then multiplied by 1.5, the factor by which I believe the overall cost of the Medicaid program would increase ($71,525,700). Alaska has a lower percent of the total population participating in the Medicaid program than in other states, particularly in the groups of individuals under 21 and intact families.

To double check these perceptions, and to arrive at a more precise budget projection, the fiscal note was developed by budget components. It was projected that the Medicaid components would be affected in the following ways: hospital increase by 1.33, physicians increase by 1.33, other services increase by 1.33, EPSDT increase by 2.0, nursing homes remain constant, and Indian health increase by 2.0. The effect on the GRM budget, reflected by page two of the fiscal note, would be as follows: hospital reduced by .33, physicians reduced by .33, other services reduced by .50, and nursing homes and catastrophic illness remaining constant. These changes by specific component produced the total used for the fiscal note of $71,487,900 for Medicaid in FY 81.

The high amount of federal funds shown in the fiscal note is the result of a large increase predicted in the Indian health component which is 100% federal funding. This increase would not be a function of people receiving new services but the result of a funding change--the Alaska Area Native Health Service (AANHS) would be able to receive more federal

* In all cases, Senate Bill 227 means House CS for CS for SSSB227 (Finance)

Medicaid money for services that they are already providing to persons eligible for AAHHS, but who are not Medicaid eligible now simply because Alaska's Medicaid program does not provide coverage for intact families.

The third page of the fiscal note covers the effect of adding a medically needy program in Alaska. It is based on the projections done in developing the fiscal note for the Senate HESS Committee for SB 320. For purposes of SB 227, the amount in that fiscal note was doubled to reflect the fact that SB227would require medically needy coverage for not only adult cases but also for families and individuals under age 21, and would establish a higher cut-off point for eligibility.

The fourth page provides an analysis of the costs of providing interest payments on past due clean claims submitted to the Department. While SB 227does not say specifically that the provision would apply only to the Medicaid and GRH programs, that assumption has been made for purposes of the fiscal note. The amount projected is approximately one-half percent of the total Medicaid and GRH budgets, minus the Indian health component since that is merely a transfer of federal funds and not an actual payment for services rendered. The figure is based on the assumption that the Department will be able to continue to make improvements in its claims processing system, eventually obviating the need for any interest payments to be made. Of course, if the claims processing system would revert back to its previous condition, the amount of this fiscal note would be considerably greater.

The summary sheet totals the costs for the Department for SB 227. Since the fiscal notes were prepared based on the House Hers version of the bill, the budgets reflect costs for a full fiscal year implementation. The current House Finance version begins implementation at a later date on January 1, 1981. Therefore, we have reduced the costs by 50% to reflect only 6 months implementation for that fiscal year.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Approximately 8,900 State employees are currently covered under the State Group Health Care Plan.

2. The cost to implement the provisions of this bill will be $2.64 per employee per month.

3. Estimate that the cost to provide continued coverage will increase 20% each year for the immediate future. However, an effective alcoholism/drug dependency program should help to reduce overall health care claim experience in the future.

4. Cost for coverage of political subdivisions (approximately 50 subdivisions) participating in group insurance not included; recommend that the Alaska Municipal League, 201 Franklin St., Juneau, AK 586-1325, be contacted for input.

HOUSE CS FOR CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 227 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the health of residents of the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 50. COMPREHENSIVE HEALTH CARE PLANS.

Sec. 21.50.010. RESIDUAL MARKET HEALTH INSURANCE POOL. (a) The carrier which writes the largest premium volume of health insurance in the state as determined by the director shall, as a condition of transacting health insurance, establish and operate a residual market health insurance pool. Individual, group, and Medicare supplemental comprehensive health care plans as described in AS 21.50.020 shall be available through the residual market health insurance pool to every eligible individual or employer resident in the state. Applicants shall have a choice of the low option, the middle option, or the high option deductible established under AS 21.50.020.

(b) The administering carrier shall submit to the director for approval a plan of operation for the residual market health insurance pool which assures the fair, reasonable, and equitable operation of the pool. The plan shall establish procedures for administration, accounting, record keeping, and reporting for the pool, amendment of the plan, and advertising of the coverage provided. If the carrier fails to submit a plan within six months after the effective date of regulations implementing this Act, the director may adopt a plan to carry out the provisions of this section.

20A

(c) Rates for comprehensive health coverage issued through the residual market health insurance pool may not be excessive, inadequate, or unfairly discriminatory. The rate for a given classification or group in the pool may not be more than 125 percent of the rate for a classification or group of at least 25 persons with similar characteristics at standard risk, for equivalent coverage not written through the pool. All policy forms and rates shall be filed with the director and may be disapproved within 30 days from the filing.

(d) Following the close of a fiscal year, the administering carrier shall determine the net premiums, administrative expenses, and incurred losses for the year from the operation of the residual market health insurance pool. Net gains, if any, shall be held at interest to offset future pool losses or allocated to reduce future pool premiums. Net losses may be credited against the carrier's income tax payable under AS 43.20 or its premium tax payable under this title. If the administering carrier's total assessment exceeds its tax liability for the year, the commissioner of revenue shall directly reimburse the carrier in the amount of the excess.

Sec. 21.50.020. COMPREHENSIVE HEALTH CARE PLANS. (a) Each of the three types of comprehensive health care plans (individual, group, and Medicare supplemental) shall provide minimum standard major medical benefits required by regulation:

(b) A comprehensive health care plan shall provide for a choice of deductibles. The low option deductible is $100 per person, the middle option deductible is $500 per person, and the high option deductible is $1,000 per person. The $100 maximum, the $500 maximum and the $1,000 maximum established under this subsection shall be adjusted yearly by the director by regulation to correspond with the change in the medical care component of the consumer price index. The base year for the

computation is the first full year of operation of the plan.

(c) The sum of the deductible and copayments required in a calendar year under an option may not exceed a maximum limit of $1,000 per covered individual or $2,000 per covered family. The $1,000 and $2,000 maximums shall be adjusted yearly by the director to correspond with the change in the medical care component of the consumer price index.

(d) A comprehensive health care plan may limit lifetime benefits to a maximum of not less than $1,000,000 per insured person.

(e) The director shall adopt regulations establishing subrogation rights and coordination of benefits.

Sec. 21.50.030. ELIGIBILITY. (a) An individual comprehensive health care plan is open to enrollment by a resident of the state who is under 65 and can provide evidence, with respect to major medical coverage, of rejection, requirement of restrictive riders, a rate up, or a preexisting conditions limitation by a carrier within six months before the application for enrollment in an individual comprehensive health care plan, the effect of which is to substantially reduce coverage from that available to a person considered standard risk.

(b) A group comprehensive health care plan is available to a resident employer of three or more employees whom the employer seeks to enroll in a group plan, who can provide evidence, with respect to major medical coverage, of rejection, requirement of restrictive riders, a rate up, or a preexisting conditions limitation by a carrier within six months before the application for a group comprehensive health care plan, the effect of which is to substantially reduce coverage from that available to a group considered standard risk or a group of 25 members.

(c) A Medicare supplemental comprehensive health care plan is open to enrollment by a resident of the state who is enrolled in Medicare Parts A and B and who can provide evidence, with respect to major medi-

cal coverage, of rejection, requirement of restrictive riders a rate up, or a preexisting conditions limitation by ~~a~~ two carriers within six months before the application for enrollment in an individual comprehensive health care plan, the effect of which is to substantially reduce coverage from that available to a person considered a standard risk.

(d) An individual may not purchase or renew coverage under a comprehensive health care plan established under this chapter after ceasing to be a resident of the state.

Sec. 21.50.040. ADDITIONAL CRITERIA FOR ELIGIBILITY. The director may adopt by regulation supplemental or alternative eligibility criteria which reflect the inability of an applicant to obtain coverage substantially similar to that which may be obtained by an applicant who is considered a standard risk or by a group with 25 members.

Sec. 21.50.050. POWERS OF DIRECTOR. The director may

(1) formulate general policies to advance the purposes of AS 21.50.010 - 21.50.040 and may adopt regulations under AS 21.06.090 to carry out the provisions of AS 21.50.010 - 21.50.040;

(2) adopt by regulation reasonable limits on administrative expenses of the administering carrier which may be paid from comprehensive health care plan premiums, and minimum standards for the proportion of comprehensive health care plan premiums to be paid out in claims;

(3) examine and investigate the operation of the residual market health insurance pool and shall have reasonable access to the books, records, files, papers, and documents of the administering carrier that relate to the operaton of the pool;

(4) examine directors, officers, agents, brokers, or employees of the administering carrier for the purpose of determining if coverage is being adequately and fairly provided through the pool;

(5) contract with the federal government or with another unit

of government to ensure coordination of the comprehensive health care plan with other governmental assistance programs;

(6) undertake directly or through studies or demonstration programs to develop awareness of the benefits of AS 21.50.010 - 21.50.-040 so that residents of the state may avail themselves of the health care benefits provided by these sections.

Sec. 21.50.100. DEFINITIONS. In this chapter,

(1) "administering carrier" means the carrier with the largest premium volume of health insurance in the state which is obligated under AS 21.50.010 to establish and operate a residual market health insurance pool;

(2) "carrier" means an insurer, hospital service corporation, or medical service corporation;

(3) "comprehensive health care plan" means health insurance which provides the benefits required under AS 21.50.020;

(4) "director" means the director of the division of insurance in the Department of Commerce and Economic Development;

(5) "family" means the primary insured and the covered dependents of the primary insured;

(6) "health insurance"

(A) means hospital and medical expenses incurred policies written on a direct basis, nonprofit service plan contracts, and self-insured or self-funded employee health benefit plans;

(B) does not include accident only policies, disability income policies or casualty insurance coverages subject to regulation under AS 21.39;

(7) "Medicare supplement plan" means a health insurance plan which provides benefits which complement or supplement the benefits provided by Medicare;

(8) "Medicare supplemental comprehensive health care plan" means a plan which, in conjunction with Medicare Parts A and B coverage, provides the benefits required under AS 21.50.020;

(9) "resident employer"

(A) means a person, partnership, association, trust, estate, corporation, whether foreign or domestic or the legal representative, trustee in bankruptcy or receiver or trustee of one of these, or the legal representative of a deceased person, including the state and a municipality of the state which has in its employ one or more individuals during a calendar year;

(B) refers only to an employer with a majority of employees employed in the state.

* Sec. 2. AS 21.27.410(a) is amended by adding a new paragraph to read:

(10) if an agent, solicitor, or broker transacting health insurance in the state fails to refer an applicant for health insurance whom the agent, solicitor, or broker has reason to believe may be eligible for a comprehensive health plan through the residual market health insurance pool to the administering carrier.

* Sec. 3. AS 21.87.340 is amended by adding a new paragraph to read:

(17) AS 21.50.

* Sec. 4. The director of the division of insurance, Department of Commerce and Economic Development, shall adopt regulations implementing sec. 1 of this Act by January 1, 1981.

* Sec. 5. AS 39.30.090(1) is amended to read:

(1) A group insurance policy shall provide one or more of the following benefits: life insurance, accidental death and dismemberment insurance, weekly indemnity insurance, hospital expense insurance, surgical expense insurance, dental expense insurance, audio-visual insurance, alcoholism and drug dependency insurance, or other medical

care insurance.

* Sec. 6. AS 39.30 is amended by adding a new section to read:

Sec. 39.30.092. COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) The group insurance policy required by AS 39.30.090(1)

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state-approved treatment facility or licensed hospital; payment of institutional and professional benefits shall be equal to and payable as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction;

(B) inpatient treatment coverage benefits for not less than 30 days of benefit each calendar year in a state-approved treatment program; payment of institutional and professional benefits shall be at the same level as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a licensed physician, state-approved treatment program, or state-certified professional substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 percent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting or named condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) The provisions of this section apply to group health insurance contracts and group service or indemnity type contracts issued to provide coverage for employees of the state and may apply to contracts for the benefit of employees of other participating governmental units only if the governing body of the governmental unit elects to have the provisions apply.

(c) In (a) of this section,

(1) "alcoholism" means an illness or condition characterized by the habitual lack of self control in the use of alcoholic beverages, or use of alcoholic beverages to the extent that health is substantially impaired or endangered, or social or economic function is substantially disrupted;

(2) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance, but excluding nicotine, caffeine and alcohol;

(3) "state" means any state in the United States and includes the District of Columbia.

* Sec. 7. AS 39.30.100 is amended to read:

Sec. 39.30.100 DEFINITIONS. In AS 39.30.090 - 39.30.100 [AS 39.30.090]

(1) "eligible employee" means

(A) an employee who has served in permanent full-time or part-time employment with the same governmental unit for 30 days or more, except an emergency or temporary employee, and

20A

(B) an elected or appointed official of a governmental unit, effective upon taking the oath of office;

(2) "governmental unit" means the state, a borough, municipal corporation, or other political subdivision of the state, and the North Pacific Fishery Management Council;

(3) "insurance", "insurance carrier" and "insurance policy" include health care services, health care service contractors and contracts.

* Sec. 8. The provisions of secs. 5 - 7 of this Act apply to group policies or contracts which provide coverage under AS 39.30.090 - 39.30.100 and which are delivered, issued for delivery, or renewed in this state after the effective date of this Act. A policy or contract providing coverage for eligible employees in this state delivered, issued for delivery, or renewed after the effective date of this Act provides the minimum coverage required by this Act even if the language of the policy or contract does not so specifically provide.

* Sec. 9. AS 47.05 is amended by adding new sections to read:

Sec. 47.05.070. MEDICAL ASSISTANCE BY INSURANCE OR SERVICE CONTRACTS. (a) The commissioner shall use available medical assistance funds to purchase and pay premiums on policies of insurance or pay the expenses on health maintenance organization service contracts or medical or hospital service contracts that provide one or more of the medical services available under state medical assistance programs.

(b) The policy of insurance or the contract must by its terms guarantee

(1) to provide the medical services allowed under state law;

(2) to provide medical services under policies of insurance or contracts in compliance with applicable laws and regulations;

(3) to provide the statistical data, records, and reports

relating to the provision, administration, and costs of providing medical services as required by the commissioner.

Sec. 47.05.080. CONTRACTS WITH DIRECT PROVIDERS OF CARE AND SERVICE. (a) The commissioner may enter into nonexclusive contracts under which funds available for medical assistance may be administered and disbursed by the contractor to direct providers of medical and remedial care and services available under medical assistance for services rendered and supplies furnished by them.

(b) A contract under this section shall

(1) oblige the contractor to make payments under the contract promptly and not later than 30 days after receipt of the proper evidence of the claim; and

(2) provide data, records, and reports required by the commissioner.

Sec. 47.05.090. IMPLEMENTATION. The commissioner shall implement the provisions of AS 47.05.070 - 47.05.090 when the commissioner determines that comparable benefits are available at equal or less cost than direct payments by the department to the providers of medical assistance.

Sec. 47.05.100. INTERIM PAYMENT. The department may make an interim payment before receipt of billing for service to providers who serve a large volume of state medical assistance clients under regulations of the department.

Sec. 47.05.110. INTEREST ON LATE PAYMENTS. When presented by a provider of medical services with a clean claim, the state shall pay

(1) interest at the rate of one percent per month when payment is delayed more than 30 days after presentation of the clean claim;

(2) interest at the rate of two percent per month when

20A

payment is delayed more than 90 days after presentation of the clean claim; and

(3) a full months interest entitlement if the claim is not paid by the 15th day of a calendar month.

Sec. 47.05.120. DEFINITIONS. In AS 47.05.070 - 47.05.120

(1) "clean claim" means a claim for payment which can be processed without obtaining additional information from the provider of the service or from a third party; it includes a claim with errors originating in the department's claims processing system, but does not include claims from a provider who is under investigation for fraud or abuse, or a claim under review for medical necessity;

(2) "commissioner" means the commissioner of health and social services;

(3) "department" means the Department of Health and Social Services;

(4) "medical assistance" means Medicaid (AS 47.07), general relief medical (AS 47.25.120), catastrophic illness (AS 47.08), and crippled children's and maternal and child health programs (AS 18.05.-010).

* Sec. 10. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act allows optional medical coverage qualifying for federal financial participation are eligible for medical assistance.

* Sec. 11. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include services eligible for federal financial participation under Title XIX of the federal Social Services Act.

* Sec. 12. AS 47.25.120 is amended to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. Financial assistance may be given under AS 47.25.120 - 47.25.300 [, SO FAR AS PRACTICABLE UNDER THE CONDITIONS IN THIS STATE,] to

(1) a needy person who is eligible under the regulations of the department; and

(2) a medically needy person whose income is less than the medically needy income standard or who has incurred medical expenses which equal or exceed the difference between the person's monthly income and the medically needy income standard; the medically needy income standard is 150 percent of the current Federal Community Services Administration poverty income guidelines for Alaska (45 C.F.R., sec. 1060.2).

* Sec. 13. AS 47.07.020(d) is repealed.

* Sec. 14. Sections 2 - 8 and 10 - 13 of this Act take effect January 1, 1981.

* Sec. 15. Sections 1, 9, 14, and 15 of this Act take effect July 1, 1980.

HONOLULU, HAWAII 96809

March 24, 1980

Representative Thelma Buchholdt
State Representative
District 9 (Spenard)
Chair, House HESS Committee
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Buchholdt:

This is to acknowledge receipt of your letter of March 18, 1980, inviting me to testify on proposed legislation similar to Hawaii's "Prepaid Health Care Act." Because the subject matter is not related at all with the state department which I am presently serving, I originally could not justify my going to Juneau as official State of Hawaii business. However, my Director and the Governor both feel that if my presence would assist Alaska in enacting progressive health care legislation, I would be given leave to go to Juneau with Hawaii's experience in this field.

I have spoken with Ms. Sorice of your office and am making plans to arrive in Juneau on Sunday, March 30, 1980, and will be available to testify on March 31 and April 1, 1980, if necessary.

I am looking forward to being of any assistance that I can possibly render in your efforts to enact such a bill. I think it has been of much benefit to the people of the State of Hawaii.

May I give you a short biographical sketch so that you may use this in further evaluation of my testimony next week:

1. Member of the Hawaii Legislature from 1959-1978 (8 years-House of Representatives; 12 years-Senate).

2. Attorney-at-Law.

3. Former Vice-President of the Bank of Hawaii (1963-1979).

4. Presently Deputy Director of the Dep rtment of Regulatory Agencies, State of Hawaii.

5. Member of the Board of Directors-Hawaii Medical Service Association (Blue Shield and Blue Cross Plan) (1965 to present), presently serving as its President.

I have never been to the great State of Alaska, and I am looking forward to my first visit.

Very truly yours,

Donald Ching

Donald D. H. Ching
Deputy Director

cc: Ms. Jan Sorice

by Tom Fink

THE ACME of legislation so far this session which interferes with our democratic way of life has been the introduction of House Bill 977. This bill is entitled "an act relating to the health of residents of the state". HB977 was introduced shortly before another similar bill was passed by the State House, Committee Substitute for House Bill 60.

The biggest trepidation many of us have in regard to the state's huge monetary wealth is that money will be used to interfere with our free and democratic society. It is for that reason that many of us suggested that the state use the surplus to pay off our debt and to build capital improvements which improve our economic viability and our conveniences of living.

We've all heard of national health insurance. The first part of HB 977 is state health insurance. The bill provides an employer must cover all employees with a certain type of insurance policy. An employee can only pay a limited amount for that policy so that the employer must pay the difference. Since the coverage is broad, the employer's cost is very substantial. Under certain circumstances an employer can obtain some reimbursement from the state.

IN THE NEXT section of the bill a state medical insurance corporation is set up in which all of the private carriers selling insurance in the state must become a part. Anyone who cannot buy standard coverage of the quality required may purchase insurance from this corporation. Any losses this corporation suffers must be paid for by the private carriers. The end result of this legislation is that the private carriers of medical insurance will be crowded out of the market and the state will be the sole insurer of health insurance. At that time the cost to the state treasury will be enormous.

CSHB60 is primarily a capital appropriations bill. Twenty pages of the 39-page bill and about $250 million is for the construction of all sorts of facilities throughout the state. Some of them are boondoggles, but by and large the facilities will contribute to the future economic viability of the state.

The other 18 pages of the bill, however, appropriates about $27 million for projects such as the following:

— $54,600 Anchorage current event society.

— $12,000 Anchorage Child Abuse Board for Advertising.

— $305,000 Anchorage operation of treatment alternative to street crime program.

— $87,000 Tyonek Village documentary film.

— $75,000 Alaska Federation for Community Self-Reliance grant.

— $180,000 Alaska Conservation Foundation.

— $35,000 Anchorage grant to task force on smoking and health.

— $453,000 Anchorage — Alaska Public Advocacy Corporation.

— $75,000 Alaska Public Interest Research Group.

— $48,000 Anchorage — Citizen Participation Project.

— $317,500 Anchorage — Alaska Center for Policy Studies.

These expenditures are the type that are only made when the state has money burning a hole in it's pocket. Many of these appropriations are to accomplish goals that are not proper for a government. Many of the appropriations are made to new organizations set up to employ friend of those in government. Many of them will result in substantial intrusions upon our democratic society.

IN ADDITION we have legislation pending to subsidize the cost of fuel and electricity so that there will be one price anywhere in the state regardless of the quantity used or the remoteness of the area from the product. We will have legislation also to establish one price for transportation of anyone or a commodity north of Seattle. Even if you happen to be in favor of this state subsidization, you must realize the result will be the state control of all those services and commodities. The legislature only pays the cost of a program for so long before it takes it over and establishes the manner of it's operation, the number of employees, the pay, and the profit margin.

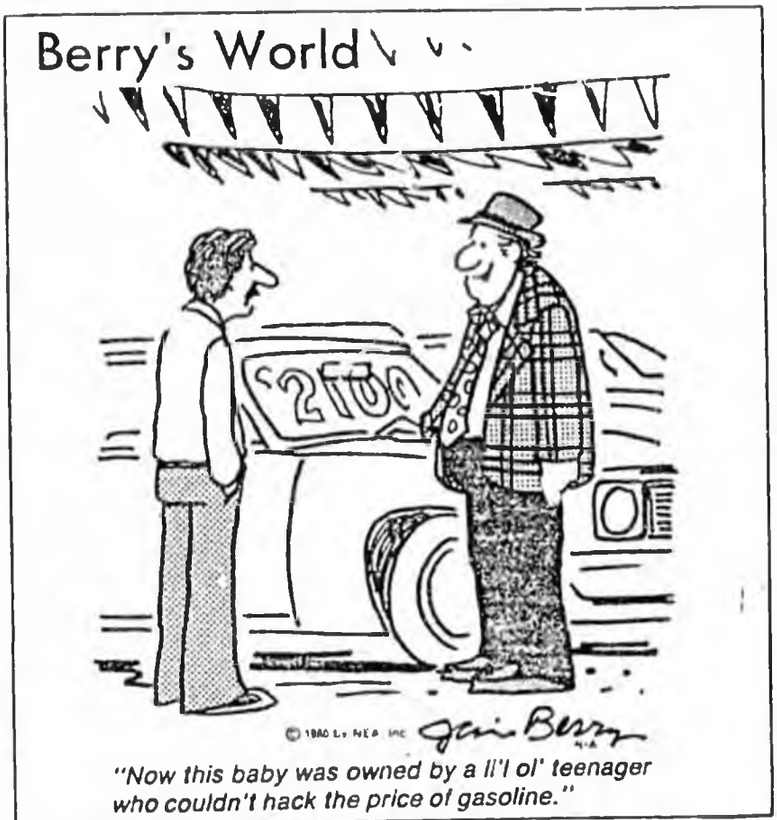
We already, of course, have set up a Renewable Resource Corporation with many millions of dollars and a Fish and Agricultural Bank which recently announced it is opening up six branches in the state. These institutions are totally state owned.

There really are only two answers to stop government expenditures for improper purposes this session. First of all the governor could and should veto by line item such expenditures. However, the probability is the governor will go to the Free Conference Committee and tell them if they add $50 million for his pet projects, he will agree not to veto any part of it.

THE SPEAKER of the House recently in a speech asked the public to quit putting pressure on the legislature to spend more money because they are unable to withstand the pressure. The Speaker knows or should know that this pressure will always exist as long as the government has a surplus. The Speaker is one of the people in the leadership who has to have the fortitude to say "no". It is the problem of which he complains that convinces most of us that we must spend the state's money on debt reduction and capital improvements so that the money isn't there for all these foolish operational programs.

Unless the leadership is going to assume the fortitude to say "no", I suggest the legislature gets about it's business and ends the sessions. Repeal taxes, make money available at reasonable rates for credit within the state, pass the operational budget, and adopt a large capital improvement budget.

The pressure to spend on all sorts of foolish programs will get stronger rather than weaker with every passing day.



"Now this baby was owned by a li'l ol' teenager who couldn't hack the price of gasoline."

generally prevailed.

Yet, always there is the hope of government for all. And so, on April 20, will try again. Five yea three general junta took President Oswaldo Lope was charged with takin bribe from United Brands United Fruit. The junta is tarily relinquishing powe the heady prospect of a open election with a mod curate vote count.

But it is difficult not to Nicaragua, where leftists ists combined to get Anastasio Somoza, now be sliding into Cuban-sty nism. Although the El Sa has ordered the expropr agricultural properties acres the radicals are and shooting continues. ago a cache of bodies ered in a Guatemala ca parent work of right squads.

Why can't Central make democracy work?

First, there is the self, mostly Indian, poli but gyrating between asms and black despair reach out and touch though they were angel dicious cynicism neces ble self-government.

The Health-Care Merry-Go-Round

by George Silver

The health insurance plan offered by Senator Long (left) has the best chance of getting through Congress this session.

FOR ALMOST 60 years now, a political event has unfolded each spring, a ritualized controversy over the value and scope of a national health program. While it is usually billed as "national health insurance," the underlying argument has little to do with health, and only a bit more to do with real insurance.

In the past 20 years, because the Democratic party has adopted national health insurance as a plank in its political platform, the spring ritual has become curiously formalized. The President issues a "health message" around February; White House aides and agency (usually HEW) experts prepare a legislative proposal that goes to the appropriate committee (or committees) in March or April. Then hearings are held, the witnesses for and against heard. The media join the fray with articles, learned discourse on local and national TV, and books. The administration announces the imminence of a legislative health program; Congress denounces the proposal and offers its own alternatives. In fact, a particularly novel aspect of this seasonal rite has been the lush proliferation of congressional counter-proposals, making the health insurance field look more like a war of all against all than an intra-party squabble. The rapid and uncontrollable escalation of the costs of medical care has convinced everyone that some sort of bill should be passed; but the profusion of bills has made consensus even harder to reach. Thus, after a great deal of noise about the need for sweeping reform, one bill cancels out another, and, in the end, only a small, tentative step is taken. And the 1978-80 congressional term looks like a textbook case of the usual formula.

While the ritual has remained more or less the same, the substance of the debate has grown ever more complicated. Seventy years ago national health insurance meant little more than being able to pay a doctor for care. Today we have solved the basic problems of acute and epidemic disease, infant mortality, and the like—except for minority groups and the poor—and we are more concerned with a *program* of care, a guarantee of *systematic* care. We have learned that our piecemeal system doesn't work, doesn't help the people it was presumably targeted for—the needy—and works against the others because it inflates and distorts, and deprives everyone when it doesn't work for the targeted population.

With this new element added, nobody can agree on exactly what national health care means. The variety of proposals is staggering and self-defeating. Once the principal obstacles to national health insurance were such antagonists as physicians, entrepreneurs in pharmacy manufacture or equipment, industry and insurance companies; now there is a plethora of protagonists with such conflicting proposals that the result is the same as if they were antagonists too. There are public and private advocates; professional anti-professionals recommending "health" insurance (as against medical-care insurance) with emphasis on preventive services, lifestyle change, and self-help; syndicalists with a platform of worker-management control; populists with a platform of community control.

The academic world has not been idle either, and there are contrasting economic recipes: tax revenue funding as against employer-employee funding; co-insurance and co-payment advocates as against those who argue for no payment at the time of service; and the anti-insurance cohorts who recommend a heavy personal financial commitment by the patient before *any* government support in order to check the heedless and prodigal use of, and demand for, medical services. Political scientists argue the benefits of a regulatory approach or a public utilities model, while management experts (the new mandarins) propose complex, computerized schemes for controls that would limit costs, adjust distribution, and assure quality.

Congress watchers point to the American Medical Association's multimillion-dollar political contributions and Washington "information office" as the chief villain and architect of the anti-national health program campaign. Certainly political contributions play an important role and have a strong impact on legislators and legislation. But it would be a mistake to give this factor too important a role in frustrating the legislative possibilities over the years. That block has been effective in over 10 administrations. Can the AMA be held solely and totally accountable? On the U.S. political scene representative government requires shifting minority allegiances to [illegible]

position by reciprocal trade-offs: Lesser issues buy votes on larger issues. Health insurance just may not represent a big enough issue for most congressmen to stake out a major position on the agenda.

In any case, it's not the AMA that's responsible for the bewildering variety of health bills now facing Congress; it would rather that none be promoted. Personal experience may shed some light on a more deserving culprit. From 1965 to 1968 I served as the deputy assistant secretary for Health. My boss was the first assistant secretary ever appointed to that job. Another first was the assistant secretary for planning and evaluation, brought over from the Department of Defense to introduce managerial skills and planning expertise into the hodgepodge of the HEW bureaucracy. Planning had one deputy also, for health program evaluation. All in all, there were about a dozen health professionals charged with the responsibility for developing programs agreed upon by the secretary of HEW and proposed by the President. There were also one or two assistants in the White House with such interest. At HEW, we occupied a few rooms on one side of the fifth floor of the old HEW building at Fourth and Constitution.

Congress was similarly endowed: The House and Senate each had one health staff member attached to the relevant committee. Wilbur Mills, then chairman of the House Ways and Means Committee, had a knowledgeable staff man, too, but he liked to keep a strong grip on health financing matters himself.

Today, nearly 250 people are preoccupied with the ramifications of health program development and health planning and evaluation in HEW. There is a huge new building down the street on Independence Avenue to house them. There are over 100 professional staff people in six congressional committees to deal with health legislation. Each congressman on a committee that touches health matters has a specialized staff assistant for health.

In the 1960s the dozen of us managed to get more than 40 health bills through the Congress: powerful instruments like Medicare, Medicaid, and a health manpower development act. Today's hosts have had to postpone even housekeeping measures like salary appropriations from one session to the next because they couldn't muster a majority vote on any health issue.

The problems of bureaucratic overkill and legislative free-for-all are not, of course, confined to health care; most social programs suffer from the same confused welter. The same may be said for the general American resistance to radical reform of any kind. Our taste for "creeping incrementalism" has led to a passion for tinkering and crude adjustment; whether in health care, the tax code, or welfare reform, reconstruction and systematic change have been neglected and delayed, so that social change proceeds at a snail's pace.

THE PRESENT congressional season features an apparent showdown in health-care legislation: Both President Carter and his nemesis, Senator Kennedy, have submitted major health-care bills. But the likelihood is that the prize will elude both. The best we can probably look forward to in this session of the Congress is Senator Russell Long's Catastrophic Health Insurance Protection Bill, possibly to be known as the National Health Insurance Act, even though it will not be, in scope or coverage, what the national health insurance struggle is about.

Kennedy's ambitious health care bill provides free medical care to everyone.

The Kennedy bill provides for everyone in the U.S. to have a credit card entitling him or her to medical care in the home, doctor's office, or hospital without added charge; old people would have their prescribed medicines paid for as well. There is no limit on use (except for psychiatric services) and preventive services are paid for. Funds will come from some employee contributions, larger employer contributions, tax funds for the poor, and contributions from the elderly (who will pay a part themselves as they do today under Medicare). The self-employed will pay, if they choose, a special health insurance premium geared to their income. The monies will go to privately controlled insurance funds, which will dole them out and monitor their use; the program will be planned and supervised by a variety of groups at the local, state, and national levels. There is a special fund set aside to develop and allocate resources (and redistribute them where necessary). And there is a ceiling, unfixed as yet, on expenditures. All this is to become operative in 1983.

The Carter plan is not so ambitious. It puts a ceiling on the total any person would have to spend for health care ("catastrophic" health insurance coverage); prescribes free care for pregnant women and infants under one year of age; recommends fee schedules for private health insurance for which the employer will pay at least three-quarters of the premium; and draws up fee schedules for public medical care to which doctors must adhere. Probably the largest jump in governmental responsibility is in federalizing medical care for the poor. Where now the states set income levels for Medicaid, the new law would set a new federal poverty level and immediately raise by more than 50 percent the number eligible. The Carter plan envisions phasing in of its objectives: After phase one has been implemented, there will be a review of the whole and consideration of what additional steps might be taken next.

Senator Kennedy's proposal, despite its grand intentions, is seriously defective. The surrender to the private insurance industry is curious, for Senator Kennedy has been the principal antagonist of the industry and has criticized it for stoking inflation in collaboration with health-care providers. While a ceiling on expenditures is proposed, and physician income may well be curtailed in this way, *non-physician* income is untouched. Since 60 percent of hospital costs are personnel costs and hospital costs are 40 percent of overall medical-care expenditures, there is a large loophole for sharply rising costs to escape the ceiling. What measures will be taken if institutions exceed budget? Will they file for bankruptcy? More serious is the vast increase in personnel proposed, layered on top of an existing regulatory bureaucracy. By now we must have learned that large bureaucracies cannot provide human services with efficiency.

President Carter's plan has highly visible flaws and no appeal to the articulate constituencies (like labor) that seek national health insurance legislation which will benefit *them*, immediately. It is *targeted* for specific groups, a shibboleth of his economic advisors, and offers little universal benefit. The failures of implementation of existing reform legislation bode ill for that part of the effort. It prescribes a reliance on unsupervised private insurance far greater than does Senator Kennedy's proposal. The whole effort is more pious and prayerful than useful. Costs would continue to mount, most of the poorly served would remain so, specialism would increase, and enrichment of the medical profession would continue to be guaranteed. No ceiling on expenditures means no ceiling on costs or income.

Sadly enough, in extending the Medicaid principle and reinforcing it, the Carter plan continues the "two-tier" sys-

tem of medical care that has been the curse of the present system: poor medical care for poor people, better medical care for the better off.

Senator Long's plan, the leading contender for passage in this Congress, if any bill is to pass, is relatively simple and ineffectual in altering the circumstances that contribute to present dissatisfactions. It will most certainly augment inflation. The plan advocates a catastrophic protection clause: After a family spends $2,000, government insurance would pay the remainder of any medical bills that year. It encourages hospital care and offers incentives to doctors and hospitals to raise fees ("get over that barrier" of $2,000 as quickly as possible to make the family eligible). President Carter's endorsement of this proposal as part of his phase one is equally inflationary.

But if history is our guide, Long's plan has the inside track. First of all, it will change nothing, a considerable advantage. Second, national legislation usually waits for state models to provide guidelines as well as to test the water of public acceptance. The states serve as "laboratories" for national experimentation, to use Brandeis's phrase. We have had state experiments in the health field before passage of other national health legislation; and in the past five years we have had state catastrophic health insurance laws (Rhode Island and Hawaii, for example). But we have never had a state compulsory health insurance law, despite some efforts on occasion in California, New York, Massachusetts, Michigan, and Pennsylvania. The generally successful experience with state catastrophic health insurance laws makes the probability of Long's plan becoming law more likely.

Political wisdom might dictate to Senator Kennedy (or Governor Brown, and other potential presidential candidates practicing in the bullpen) a powerful effort to obtain a model state program of compulsory health care. Who controls the politics of Massachusetts anyway?

TODAY'S PROPOSALS for national health insurance offer little cause for optimism that real change will take place in the system. The one thing that none of the plans promise—neither Carter's nor Kennedy's nor Long's—is equity. A concern with equity makes us ask the question: Do we want the poor and minorities to have the same medical care as the rich and the white? Do we want a health-care system that says that we are all entitled to care, as we need it, when we need it? Or one that says, if we can find it, or get it, an insurance company will pay for it?

It may be that, given the alignment of forces, this is the time to suggest a state health insurance program that undertakes radical reform, but in a smaller arena, say child health care, to test the feasibility, cost, and organizational considerations. We should seek equal access and high-quality cost control in this smaller arena by cooperative effort in which the federal government waives rigid regulations for the use of federal funds and the states incorporate these sums into a statewide health service financial budget. Applying such a program to child health care would naturally include an emphasis on preventive services, which are especially cheap for children: The most comprehensive program, instituted in Holland, costs roughly 9¢ per child per day. Since the Dutch standard of living and wage scale aren't too different from ours, it's likely that such a preventive system will cost no more here.

Carter's plan has visible flaws and is more pious and prayerful than useful.

If such a program worked for children, the lessons ultimately could be applied to adults and to the nation as a whole. There is already fairly widespread acceptance of the rough outline of an effective and economical national system. It will be prepaid; that is, people will pay little or nothing at the time of care to overcome costly and cumbersome bookkeeping, financial barriers to prompt use of services, and the quirky variations in charges that make budgeting impossible. Doctors will be part of a group organization, making all kinds of specialized care readily available to patients. The doctors will be salaried, eliminating the competitive aspects of present practice that encourage overuse of technology and referrals.

Primary care will be a team process, with family doctors and nurse practitioners or medical assistants liberally distributed in small clusters throughout the neighborhoods of the communities for easy access by patients. The teams will be part of groups, which in turn will be part of hospital units serving designated populations. Very complicated, delicate, and expensive hospital procedures will be restricted to a few regional hospitals, and effective transport and emergency vehicles will tie this network of care together.

From an organizational standpoint, regional commissions, possibly elected units like regional school boards, will deal with budgets, distributional problems, and manpower. Local committees, also possibly elected, will serve as channels of communication between the patients and the professionals: Grievances can be mediated this way, and local supervision can provide information on the operation of the groups and teams.

The entire program will be highly localized in order to keep huge bureaucracies from developing and becoming the self-serving megastructures that are the bane of modern life. If the regional commissions actually carry out their supervisory functions, this allocation of funds to local communities to plan imaginative and locally satisfactory approaches to medical care will ensure a useful national health program.

It will follow that while the monies for the service will be in the hands of local boards for disbursement, the source of the funds still will have to be federal and state taxes. The actual way in which the tax structure will have to be changed to accommodate a valid national health-care system remains unclear.

It's easy for someone outside the system to spin out an ideal plan, particularly if that someone won't have to take the responsibility for what happens if it should become operative. Nonetheless, the political possibilities are there and the potential examples abound. Ten million Americans belong to prepaid group practice systems. There are school systems with comprehensive preventive programs for children. Nearly 30 percent of the doctors in the United States are on salary now. Many neighborhood hospitals, like neighborhood schools, serve the local population exclusively. What is missing is a national commitment, national standards, assent to equity.

The agonizing over a national health program is only another example of the struggle Americans have had in this century to come to terms with the contradictions of their political heritage: individual responsibility and freedom to succeed and achieve, and to fail and suffer, on the one hand; on the other, government responsibility for the good and welfare of all. Our political tradition is cautious, too, not wanting to take too big a bite at one time. It makes sense to try the new remedy in a few states before you prescribe it for 215 million people. But you must try it, then, or be reconciled never to have a remedy at all!

Dr. Silver is a professor of public health at the Yale School of Medicine. His most recent book is Child Health: America's Future.

Alaska State Legislature

House of Representatives

Committee on

Health, Education & Social Services

Pouch V
State Capitol
Juneau, Alaska 99811

March 28, 1980

To: Members of the House HESS Committee

From: Representative Thelma Buchholdt, Chair
House HESS Committee

Subject: HB977

Coming up for hearing in Committee on Monday, March 31 and Tuesday and Wednesday, April 1 and 2, will be a major bill to extend health coverage in this state. Enclosed is background material on the legislation. Briefly, it includes:

I. Summary of Proposed Health Legislation

This is a detailed explanation of the provisions of the bill. Section one requires employers to sponsor prepaid group health care plans for their employers. Section two requires insurance carriers to form a joint underwriting association and issue coverage for high risk "uninsurable" clients. It also establishes state standards for "qualified" health policies and requires carriers to offer qualified olicies to their clients. The remaining several sections expand s ate medical assistance programs and address provider payment problems.

II. An Analysis of the Extent of Health Care Coverage and Gaps in Coverage

This is an excerpt from Third Party Health Coverage in Alaska published by Legislative Affairs Agency Research Division in April, 1978. The author estimates that between 20 and 25 percent of the non-Native non-military population state-wide currently lack third party health coverage. An addendum h been included estimating that roughly 200 high risk clients uld enroll for the pooled risk coverage.

III. An Analysis of the Social Impact of the Proposed Health Legislation

This section considers the bill's impact on the public, on employers and employees, and on insurance carriers. It is estimated that the legislation would expand health coverage in the state to cover more than 95 percent of the population. Mandatory employer sponsored covera in which the premiums

are shared by the employer and the employee would raise labor costs to the employer and would lower the take-home pay of the employee. The premium cost of the required coverage is estimated at $30 to $50 per month for a single employee and $75 to $110 per month for an employee with dependents. The impact on insurance carriers would depend on how closely the bill's requirements match current practice and how large the volume of health insurance business the carrier has in Alaska.

IV. The Experience in Other States

This section includes two speeches presented at the "Health Care Financing Options for Colorado" conference, September, 1979. The first speech is by George Yuen, Director of Health, State of Hawaii, and describes the operation of Hawaii's Prepaid Health Care Act mandating employer sponsored coverage. The second speech is by Brian Oberg, Administrative Assistant to the Health and Welfare Committee, Minnesota House of Representatives. It describes the operation of Minnesota's Comprehensive Health Insurance Act which sets minimum standards for health insurance policies and establishes a mandatory assocaition of insurance carriers to underwrite health insurance for people who, because of existing health conditions, are unable to buy standard coverage. Both states have been very pleased with the results of their legislation and have experienced very few problems with it.

V. Legal Issues

A law suit has been brought against the Minnesota law challenging its constitutionality. While it is too early to predict the final outcome, the State of Minnesota is confident that the law will survive this test. This section includes a speech by John Igrassia, Supervisor of the Life and Health Section of the Minnesota Division of Insurance, discussing some of the legal issues in the case.

PROJECT HEALTH

The Multnomah County Medical Society supports the concept and goals of "Project Health" in principal, as they act to care for the medically indigent in our community. The Society encourages individual physicians to give consideration to participation in this project.

POSITION: Board of Trustees 2/27/74 - Executive Committee

PROJECT HEALTH I

The Multnomah County Medical Society recommends that, in the interest of quality patient care, physicians participating in the 'Project Health' pilot program should continue to bill their usual fees for professional services. When 'Project Health' funds are exhausted, the Multnomah County Medical Society urges its members to continue to provide care for these patients.

The Society also asks the 'Project Health' staff to provide an accounting of those patients who received care, showing the number of patients receiving care, the amounts billed, and the amounts paid.

POLICY: Board of Trustees 3/27/74 - Executive Committee

HOUSE MESS

FROM BERNEICE BAR, 4220 B. ST., SUITE 201, ANCHORAGE 99503
PHONE 279-9431

I HAVE NOT YET RECEIVED THE INFORMATION WHICH I REQUESTED ABOUT THE REHABILITATION SERVICES MENTIONED ON P. 33 LINE 8, OF HB 977. YOU MENTIONED WHEN I INQUIRED LAST WEEK THAT YOU WOULD BE MAILING IT.

Sent 4-11

YOUR PROMPT ATTENTION TO THIS MATTER WOULD REALLY BE APPRECIATED.
THANKS.

LIMITS ON EMPLOYEE SHARE OF PREMIUM COST

Hourly Wage	Gross Monthly Wage (172 hrs.)	Maximum employee share (HB 977) 1.5%	2%	3%
$3.60	$619	$9.29	12.38	18.57
4.00	688	10.32	13.76	20.64
6.00	1032	15.48	20.64	30.96
8.00	1376	20.64	27.52	41.28
10.00	1720	25.80	34.40	51.60
15.00	2580	38.70	51.60	77.40
20.00	3440	51.60	68.80	103.20

ESTIMATED PREMIUM COSTS FOR NUMBER TWO QUALIFIED PLANS[1]

Individual Plans - Employee Only	Minnesota Rate November 1979 (Quarterly)	Area Differential[2]	Est. Rate in Alaska (Quarterly)	Est. Rate in Alaska (Monthly)
low: Blue Cross/Blue Shield, Male age 20-24	$31.47	+12%	$35.25	$11.75
high: State Farm, Male or Female age 60-64	214.40	+ 7%	229.41	76.47
Average of 5 carriers[3], Male age 35-39	55.42	+11%	61.52	20.51
Average of 5 carriers[3], Female age 35-39	87.13	+11%	96.71	32.24
Individual Plans - Employee and Dependents				
low: Blue Cross/Blue Shield, M 20-24 + F 20-24 + children	$128.27	+13%	144.95	$48.32
high: State Farm, M 60-64 + F 60-64 + children	487.68	+ 7%	521.82	$173.94
Average of 5 carriers[3], M 35-39 + F 30-34 + children	185.80	+11%	206.24	$68.75

Group plan premiums are roughly 8% less than individual plan premiums.

1 The Minnesota minimum standards for a number two qualified plan are the same as those specified in HB 977 except that the requirements for coverage for well baby care, physical exams, and multi phasic screening have not yet taken effect in Minnesota, and Minnesota does not cover medically necessary transportation (other than an ambulance) or treatment for alcoholism or chemical dependence.

2 Derived from the area schedule of premiums of the CARE group insurance trust for all Alaska and for Anoka, Dakota, Hennepin, Ramsey, and Washington counties in Minnesota.

3 Blue Cross/Blue Shield, Prudential, State Farm, National Farmers Union, and Massachusetts Mutual. This is a straight average and not a weighted average. Since Blue Cross/Blue Shield has by far the lowest rates and covers 96% of the people covered by these five Minnesota carriers, the straight average used here is substantially higher than the weighted average would be.

A COMPARISON OF BENEFITS UNDER HB 977
AND THREE OTHER COMPREHENSIVE HEALTH PLANS

Benefit	State Employees Blue Cross Plan	Alaska #2 Qualified Plan (HB 977)	Minnesota #2 Qualified Plan	Connecticut Middle Option Plan
deductible	$50/person; $150/family	$500/person; $1500/family	$500/person	$500/person
co-payment	10%	20%	20%	20%

Section 18.12.040, on Page 3. This section discusses the commencement of coverage. It will mean a change in the usual probationary periods that have been set up by employers for their employees. The four week phase-in into the health care plan does not jibe with the usual two month, or sometimes three month, probation period for employees joining a company and may create a problem for an employer. We would need, here at Blue Cross, to adjust for our Alaskan employees the standard probationary period of our company. This would create a problem for our company as it would for any other company who has employees both in Alaska and in other states.

Section 18.12.070, Pages 4 and 5. This section of the legislation enables a person who has coverage as a dependent under some other health care plan to waive his coverage through his employer. That will create a complication in administration for employers. Looking at it from the point of view of insurance coverage, it will also create the possibility of selection of coverage, where the person knowing himself/herself to be in poor health will accept coverage under both types of employment and the healthy individual will not. That will result in the utilization being increased and therefore the cost to the employer for premium also will rise.

4B/11
js

Section 21.50.010(d) on Page 13. In this section of the bill an "unqualified policy" is used as terminology. There is no definition in this bill of an unqualified policy. This bill also uses the term "nonqualified plan" and there is confusion between "unqualified policy" and "nonqualified plan."

js
4B/12

Section 21.50.030(1), on Pages 14 and 15. The definition of minimum benefits needs some major corrections. All benefits offered in a state health plan should be determined to be medically necessary. A definition of medically necessary should be included in the definition section of this legislation. The reference throughout this subsection to services by varying health care practitioners never refers to them as licensed health care practitioners which I think should be inserted into the bill. The bill does not require that the service [redacted] be provided by a practitioner [redacted] within the scope of his practice. Tightening up the language will eliminate payment of claims for procedures that were provided by a practitioner whose scope of practice does not include that procedure and would eliminate payment for procedures which are not necessary to the life or health of the patient. In Subsection (D), services of a nursing home are included as a benefit. Nursing homes should be identified either as licensed or Medicare-approved.

Subsection (E) defines services of a home health agency. In the delineation of services by a home health agency I would urge you to list those services which will be covered for a patient served in his home. In other insurance contracts home health services often lists the practitioners whose services will be accepted as well as the paraprofessionals that will be included in this service. This bill, as it is now written, could result in a tremendous increase in home health costs and therefore an increase in premium price over a more restricted benefit.

Subsection (L) of this bill deals with oral surgery. While the root canal and oral surgery definitions are well worded, the wording of the language dealing with periodontal work would be very hard to administer. It would be difficult to explain to a patient that his periodontal services will be paid for if only periodontal work is done, but will not be paid for if, at the same time as having the periodontal surgery, there is some extraction or repair of teeth.

In subsection (N) the provision of payment for transportation must be more succinctly defined. As written,it is very broad and will be very expensive and administration will be difficult.

js
4B/13

Section 21.50.030(2) on Page 15. Subsection 2 deals with the exclusions for services or articles which will not be covered in the insurance. In (b) of that section, the phrase "birth defect" is used. I would suggest that a definition of birth defect be included in the definition section.

I would urge you to add a 5th exclusion to this section for services of custodial care. I would urge you to add a definition of custodial care which might read "Any portion of a service, procedure or supply rendered to manage a patient's illness, disease or injury after he or she has reached a point in recovery where such management, can no longer be expected to improve the condition."

Subsection (3) of this minimum benefit section lists benefits with specialized co-insurance, premium deductibles, and limitations. A definition of "well baby care" is needed. The inclusion of routine physicals and annual physicals should be limited more than the present language. Annual physicals, technically, are not prescribed by a physician. To control overutilization of this benefit, you may want to look at some of the recent changes announced by the American Cancer Society where they are recommending that cancer check-ups for persons between ages 20 and 40 be limited to one every three years. They are talking in terms of mammography for breast cancer detection yearly only for women over 50 and they are reducing the recommended number of chest x-rays as well as the recommended number of Pap smears from one a year to one every three years. This seems to be the trend in the detection of illness area and the language used in this bill should perhaps refer either to limitations of this sort or to dollar limitations in order to control utilization of a procedure that may not be cost effective.

Multiphasic screening should also be limited either by a dollar limitation or by a limitation on the number of procedures per year which will be paid for by the insurance.

All these changes have been suggested to eliminate the probability of excessive use, to eliminate inappropriate utilization, and to control costs to those necessary for the good health of Alaskans.

js
4B/14

Section 21.50.040 on Page 16. This section, which deals with Medicare Supplement Plans, does not seem to recognize that Medicare Supplement is also available to the disabled person under age 65 who is a Medicare recipient. The language of this section needs to take into account the fact that there are persons under 65 who are disabled who do purchase Medicare Supplement policies.

It is our concern that the benefits in this section for the Medicare Supplement Plan are so extensive that the costs will become too high for the average person to purchase a Medicare Supplement policy. The benefits which the State of Alaska would include in a Medicare Supplement Plan (which are not now included in Medicare-approved services) are prescription drugs, prostheses, durable medical equipment, oral surgery, and transportation. Two of the services, those of physical therapists and alcoholism treatment, are now limited by Medicare and an appreciable portion of the costs for services of this sort would then be born by the Supplement Plan. Since there is also a limitation of a $1,000 per person out-of-pocket for these covered services, it is expected that the utilization of these benefits would be extremely heavy and would therefore make the cost of the Medicare Supplement Program extremely high.

At the time that Congress was debating Medicare coverage, prescription drugs, transportation, and custodial care in nursing homes were all subjects which were debated and which were dropped out of Medicare coverage because the Federal Government did not feel that it had sufficient revenues to pay for these coverages. While the addition of these benefits would be of interest to many senior citizens in Alaska, the cost of providing these services may result in pricing the Medicare Supplement contract out of the reach of anyone on a retirement income.

js
4B/15

Section 21.50.080, Subsection 6(c), Page 21. This section specifies a 12-1/2 percent limit for retention costs and agent fees for the writing carrier of the State Plan. I know of no information which would indicate that this is a reasonable percentage. I would suggest that the Division of Insurance determine a reasonable limit and adopt it in regulations after sufficient experience indicates what that limitation should be.

In Section 6(e) the wording should be amended on lines 23 and 25 of Page 21 so that the losses which the members of the association will share will be losses due to administrative as well as claims expenses. I would suggest that on lines 23 and 25 that the words "and administrative" be inserted between the word "claims" and "expenses".

Section 21.50.080(6)(f) concerns the assessment of losses and they are offset either by income tax or premium tax payable in the State of Alaska. This offset will of course result in a loss of state revenue. It is the opinion of those persons at Blue Cross who have studied this legislation that the write-off should be eliminated and instead that rates for the state plan should be adjusted to assure revenue sufficient to refund the assessments paid by members of the association. This would eliminate the loss of revenue to the state and would place all members in an equal status regardless of whether they are accident and health insurers or nonprofit health service plans.

If an offset is included in this legislation then the second sentence of paragraph (f) should be amended in order to assure that the report to the legislature is placed within a workable time frame. It is my understanding that premium tax payments are made on a calendar year basis. They must be reported to the state during February of any year and are payable by March 31 of that year. A report concerning the losses from premium tax which is due before the end of January would not be feasible in my estimation.

js
4B/16

Section 21.50.100, Page 23. This section specifies the method by which the state plan is administered, however, there is no definition of a source of monies from which claims will be paid if those claims are in excess of the premium paid into the plan. There is no money available to continue payment of claims until the assessment against losses is paid as this legislation is now written.

Section 21.50.130, Pages 26 and 27. In this section a "individual coverage qualified plan" is referred to. I can find no definition of what an individual coverage qualified plan is.

Subsection (b) of this section is unclear. Blue Cross assumes that this subsection refers to a widow/widower of a person who has a conversion policy but we are not certain of this interpretation. If this section refers to the right of the widow/widower of a group member, then the language is obtuse and administration of that provision will be difficult.

js
14B/17

Section 21.50.200 on Pages 27 and 28. One of the definitions in this section is the definition of "dependent". You have specified that this includes "A household member who is financially dependent on the primary insured". That addition to the usual "family" dependents which can be identified by a legal action (marriage, divorce or adoption) or by birth will create administrative headaches and excessive additions or deletions on dependent lists. This definition of dependent would be open to abuse. It is conceivable that "dependents" could be changed readily creating administrative problems and claims payment problems and that dependents, in some cases, might be added solely for the ability to provide them with health care coverage through the policy being paid for by the primary insured's employer. That portion of the definition of dependent should be deleted from this bill.

js
4B/18

METHOD USED TO DEVELOP FISCAL NOTE FOR HB 977

House Bill 977 proposes to add new coverage and new eligible categories to the Medicaid and General Relief Medical (GRM) programs administered by the Department of Health & Social Services through the Division of Public Assistance. The bill would add services and eligible beneficiaries not presently covered by a medical assistance program administered by the Department. In order to attempt to gauge the effect of HB 977, it was necessary to do some projections based on the present Alaska Medicaid and GRM programs and the Medicaid programs in other similar states. In developing a fiscal note for SB 320, the Department acquired financial reports from five western states having medically needy programs. The financial reports covered the federal fiscal years 1977 and 1978 for Hawaii, Montana, North Dakota, Utah, and Washington. This information also was used to develop the fiscal note for HB 977.

The fiscal note is divided into four pages to allow for separate considerations of adding new services and eligible groups to Medicaid on the GRM program by the effect that addition to Medicaid, the creation of a medically needy program, and the payment of interest on past due medical claims.

The first page of the fiscal note covers the addition of new eligible groups and service categories under the Medicaid program. The basic Medicaid request for FY 81 minus the 100% federally-funded Indian Health Care Improvement Act coverage ($40,720,600) was used as a base. To that was added 17.1% additional funds for those new service categories that are not presently covered under the Alaska Medicaid program. This brings the total to $47,683,800. The 17.1% figure is derived from the average percentage in the five other states for those categories of service that are not covered under the Alaska Medicaid program that would be added by this bill. This subtotal was then multiplied by 1.5, the factor by which I believe the overall cost of the Medicaid program would increase ($71,525,700). Alaska has a lower percent of the total population participating in the Medicaid program than in other states, particularly in the groups of individuals under 21 and intact families.

To double check these perceptions, and to arrive at a more precise budget projection, the fiscal note was developed by budget components. It was projected that the Medicaid components would be affected in the following ways: hospital increase by 1.33, physicians increase by 1.33, other services increase by 1.33, EPSDT increase by 2.0, nursing homes remain constant, and Indian health increase by 2.0. The effect on the GRM budget, reflected by page two of the fiscal note, would be as follows: hospital reduced by .33, physicians reduced by .33, other services reduced by .50, and nursing homes and catastrophic illness remaining constant. These changes by specific component produced the total used for the fiscal note of $71,487,900 for Medicaid in FY 81.

The high amount of federal funds shown in the fiscal note is the result of a large increase predicted in the Indian health component which is 100% federal funding. This increase would not be a function of people receiving new services but the result of a funding change--the Alaska Area Native Health Service (AANHS) would be able to receive more federal

Medicaid money for services that they are already providing to persons eligible for AANHS, but who are not Medicaid eligible now simply because Alaska's Medicaid program does not provide coverage for intact families.

The third page of the fiscal note covers the effect of adding a medically needy program in Alaska. It is based on the projections done in developing the fiscal note for the Senate HESS Committee for SB 320. For purposes of HB 977, the amount in that fiscal note was doubled to reflect the fact that HB 977 would require medically needy coverage for not only adult cases but also for families and individuals under age 21, and would establish a higher cut-off point for eligibility.

The fourth page provides an analysis of the costs of providing interest payments on past due clean claims submitted to the Department. While HB 977 does not say specifically that the provision would apply only to the Medicaid and GRM programs, that assumption has been made for purposes of the fiscal note. The amount projected is approximately one-half percent of the total Medicaid and GRM budgets, minus the Indian health component since that is merely a transfer of federal funds and not an actual payment for services rendered. The figure is based on the assumption that the Department will be able to continue to make improvements in its claims processing system, eventually obviating the need for any interest payments to be made. Of course, if the claims processing system would revert back to its previous condition, the amount of this fiscal note would be considerably greater.

THIRD PARTY HEALTH COVERAGE IN ALASKA

Prepared by

LEGISLATIVE AFFAIRS AGENCY

Research Division

April 1978

Foreword

This study was prepared by Sharman Haley of the Legislative Affairs Agency staff at the request of Representative Thelma Buchholdt. The issue of access to health care in Alaska is a matter of general concern to many other policymakers as well, and we are therefore making the report available, with Ms. Buchholdt's permission, in this more convenient format.

Interested readers are invited to share with us any comments they may have on the report or its subject matter.

SUMMARY

With the costs of health care continuing to rise, third party health coverage is becoming increasingly crucial for the protection of people's health and financial security. A variety of state and federal health programs and private health insurance policies provide piecemeal third party coverage for Alaska's civilian population. It is estimated that 20 to 25 percent of Alaska's non-Native, non-military-dependent civilian population are without third party health coverage of any kind. The comprehensiveness of coverage or level of coverage provided the covered population is not known; in some cases the coverage may be inadequate to protect people from financial hardship or inappropriate levels of medical care. There are a variety of approaches the legislature may consider to improve or extend third party health coverage in Alaska. These options include: state subsidized health insurance, state mandated employer subsidized health insurance, state regulation of health insurance carriers, and expansion of the state's Medicaid program. While plugging these coverage gaps would not cure all the ills of the health care system, it would be a step.

I. INTRODUCTION

With the dramatic increases in health care costs in the last decade or two, routine medical care has become for many an unaffordable luxury. A serious illness or accident for them would be a financial catastrophy. More and more people are relying on health insurance and other kinds of third party health coverage to finance the major part of their unpredictable health expenses. To an ever growing extent people are demanding third party coverage for routine health expenses as well. Third party health coverage has become an integral and crucial part of the health care system.

Because public and private third party payers foot the bill for two-thirds of the nation's personal health care expenditures, their policies profoundly affect the nature and terms of the health care itself. For example, many insurance policies will pay for hospital care, but not nursing care; so patients are hospitalized in many cases where nursing care would be sufficient, and less costly. Similarly, many people will not see a doctor until health conditions become acute, because preventive care is not customarily covered. The policies of third party payers also affect providers in terms of the rates they charge, the quality of care they provide, and the services they can afford to develop.

As third party health financing becomes paramount to ensure financial access to health care, the gaps in third party coverage become more glaring. The following chapters of this report address themselves to

these gaps in third party coverage. Sections II and III describe all the major public programs and private plans which currently provide third party health coverage in Alaska. Section IV analyzes available data on the extent of existing coverage and identifies some of the gaps both in terms of the covered population and services covered. Section V outlines a smorgasbord of legislative remedies to plug some of these gaps. The concluding chapter indicates other areas which may be of concern to the legislature.

II. A DESCRIPTION OF HEALTH COVERAGE FROM PUBLIC SOURCES

As this report is concerned primarily with comprehensive health care, only the public programs which cover a broad range of health services and serve a significant portion of the population are described here. There are a number of programs which cover only specific health services, such as family planning or treatment of occupational injuries, or serve only a narrowly defined segment of the population, such as crippled children, which are not described here.

Alaska Area Native Health Service

The Alaska Area Native Health Service (AANHS) is a regional administrative unit of the Indian Health Service, which is a branch of the U. S. Public Health Service. It serves an estimated 65,000 eligible Alaska Natives, spouses, and dependents.

Primary care is provided in villages by 216 community health aides, each selected by the village council and paid under contract with AANHS. These aides are responsible for giving first aid in emergencies, examining the ill, reporting their symptoms to the physician, carrying out the treatment recommended, instructing the family in giving nursing care, and conducting on-going health education in the villages. Routine primary care is also delivered in the villages by itinerant doctors, nurses, dentists, and other health professionals.

If the injury or illness is serious enough to require inpatient care or more specialized diagnosis and treatment, the patient is referred to the nearest of the seven field hospitals. This secondary level of

care includes routine hospital admissions for common illnesses or injuries, for minor surgical conditions, or for pregnancy. The field hospital staff also provides primary care for their immediate community.

Serious or life-threatening illnesses or injuries are referred to Alaska Native Medical Center in Anchorage for treatment under the immediate direction of a specialist. Major surgery and complex diagnostic procedures are performed at the Medical Center. The Alaska Native Medical Center also provides primary health care for the Anchorage area AANHS eligibles and secondary health care for the Anchorage Service Unit.

In areas where direct health care by AANHS is not available, or for services which AANHS is unable to provide, health care is purchased under contract from private physicians, dentists, optometrists, hospitals, and pharmacies by AANHS on behalf of Native patients. Highly specialized treatments, such as heart surgery or kidney transplants, are referred out-of-state. In areas of the state where private health services exist, contractual care is an important component of the AANHS delivery system.

Despite the comprehensive design, there are gaps in this delivery system. Budgeted funds for contractual services are limited, and frequently become depleted long before the next allocation. If it is not an emergency condition, the patient must wait, or else pay for the treatment himself. If it is an emergency condition, transportation is usually arranged to another delivery point.

U. S. Public Health Service

The Bureau of Medical Services, a division of the U. S. Public Health Service akin to Indian Health Services, provides direct comprehensive health care for the Coast Guard and merchant seamen, and provides occupational health care and safety services for all federal employees. Federal health care responsibility for seamen derives from a 1798 act of Congress providing for the "relief of sick and disabled seamen".

In Alaska this care is delivered by the Alaska Area Native Health Service under contract with the BMS. In addition to an estimated 24,000 Coast Guard personnel and dependents, and bonafide merchant seamen, many fishermen are eligible for Public Health Services. Fishermen and other boaters qualify if they are owners or principal operators of a documented vessel. A documented vessel is a seaworthy power boat registered with the Coast Guard which could be utilized by the Coast Guard in case of a national emergency. There are an estimated 3,750 documented vessels in Alaska, including fishing boats and pleasure boats. There may be more than one principal operator of a boat. Dependents are not covered.

Uniformed Services Health Benefits Program

The military provides comprehensive health care to enlisted personnel through military medical facilities and staff. They also provide comprehensive health care to retirees and military dependents through the Uniformed Services Health Benefits Program (USHBP). USHBP provides health services to military dependents in two ways: through military medical facilities and staff on a space-available basis, and through the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) when necessary medical services are not available through

military facilities. CHAMPUS is a supplementary health insurance plan purchased from a private carrier. CHAMPUS will reimburse 75 - 80 percent of allowable charges for necessary medical care. A $50 deductible is also collected on outpatient services. The CHAMPUS carrier in 1975 estimated that 55,000 dependents and retirees were covered in Alaska.

Medicare

Medicare is a federal health insurance program for people 65 and over, and certain disabled people under 65. It is financed by a combination of employee contributions, employer contributions, monthly premiums and federal funds, and is administered by the Social Security Administration.

Part A of Medicare is hospital insurance which is provided at no premium charge to those who have worked long enough under social security, and provided to others over 65 for a monthly premium of $54. Medicare Part A only helps pay for medically necessary covered services up to a specified number of inpatient days or home health visits. The Medicare patient must pay a deductible and a scheduled percentage of the covered costs, as well as the costs of uncovered services and services beyond the limits of Medicare coverage. The Part A hospital insurance helps pay for inpatient hospital care, inpatient care in a skilled nursing facility when it is medically necessary following a hospital stay, and certain prescribed services from a home health agency following a hospital stay. Medicare does not pay for custodial or long-term care.

Part B of Medicare is medical insurance. Anyone eligible for Part A hospital insurance is eligible for Part B medical insurance at a monthly premium of $7.70. Medicare medical insurance can help pay for doctors' services, outpatient hospital care, outpatient physical therapy

and speech pathology, and many other health services and supplies which are not covered by Part A hospital insurance. The medical insurance enrollee must pay the first $60 worth of covered services each year. After that the medical insurance pays 80 percent of "reasonable charges" for covered services and supplies. "Reasonable charges" are computed each year by Aetna (the Medicare carrier in Alaska) based on billings the previous year. The actual charges by the provider may exceed the "reasonable charges" covered by Medicare, and the patient must pay the difference, as well as paying the uncovered 20 percent of the "reasonable charges". Among the services not covered by Part B medical insurance are: routine physical exams, prescription drugs, eye glasses, hearing aids, dentures, dental care, and chiropractic services.

Though people over 65 must have accumulated sufficient work under the social security system to automatically be eligible for hospital insurance, the 1966 law "grandfathered in" all the social security ineligibles at that time. It is estimated that now 99 percent of the non-Native population in Alaska over 65 are enrolled in Medicare.

Medicaid

Medicaid is a medical assistance program funded jointly by the state and federal governments. In Alaska it is open to public assistance clients and eligibles, and certain other needy people in nursing homes, or inpatient psychiatric hospitals. Medicaid clients receive care from participating private providers, who then bill the Medicaid program. Alaska's Medicaid program covers all the federally mandated services: inpatient and outpatient hospital services, physicians services, x-ray and lab services, skilled nursing home services, home health

services, family planning services, transportation, and early and periodic screening, diagnosis and treatment (EPSDT) for eligible people under the age of 21. In addition, the state program covers a few optional services: inpatient psychiatric care for those over 65 or under 22, intermediate nursing home care, eye glasses, treatment for speech, hearing and language disorders, and approved outpatient mental health care. The state Medicaid program does not cover the following services for which federal match is available: prescription drugs, dental care or dentures for those over 21, prosthetic devices for those over 21, physical therapy, chiropractor's services, or preventive care for those over 21.

In FY 1976, 22,952 Alaskans, or 5 percent of the civilian population, were enrolled in the categorical public assistance programs (Old Age Assistance, Aid to the Blind, Aid to the Disabled, Aid to Families with Dependent Children, and Supplemental Security Income) and eligible for Medicaid.

To be eligible for public assistance, and therefore Medicaid, a person must not only meet income criteria, but categorical criteria of need, such as over 65, blindness, mental or physical disability, under 18 and deprived of the care of one or both parents, or a person related to and caring for eligible dependent children. Many Alaskans, such as low income families with both parents present, meet the income criteria for public assistance but do not meet the categorical criteria, and are therefore not eligible for Medicaid.

Because Natives receive much of their medical care from the U. S. Public Health Service, Native eligibles account for only one-third of Medicaid expenditures even though nearly two-thirds of the Medicaid

eligibles are Native. This may change with the implementation of the Indian Health Care Improvement Act of 1976. This federal law requires that medical care provided to Native Medicaid eligibles by the U. S. Public Health Service be billed to the state Medicaid program, with the state receiving 100 percent reimbursement from the federal government for Medicaid expenditures in behalf of Natives. This new billing procedure has not yet been implemented in Alaska.

General Relief Medical

The state-funded General Relief Medical program covers needy people and services not covered under Medicaid, as funding permits. People who meet the income criteria for Medicaid but do not meet the program criteria and have no prior health resource (such as Indian Health or health insurance) are eligible for all General Relief Medical covered services. Any Medicaid eligible is also eligible for those General Relief Medical services not covered under Medicaid. The GRM program covers the same services as Medicaid (inpatient and outpatient hospital care, physicans services, x-ray and laboratory services, nursing home care, home health care, mental health care, eyeglasses, treatment for speech, hearing, and language disorders, and transportation) plus many more not covered by Medicaid, such as drugs, physical therapy, prosthetic devices, hearing aids, chiropractors, podiatrists, emergency dental care, wheelchairs and other equipment. Nearly all services except hospital and physican care must be pre-authorized by the state program administration, and most services are subject to strict limitations. Medically justified services will be refused when funds are not available. The budget is established by the legislature.

The General Relief Medical program ensures that all Alaskans under the income limits for public assistance have some health care resource. For a single adult paying over $35 rent per month, that income limit is $334 per month; for a couple it is $490. For a family the formula is based on adjusted net income; the first $30 of earned income, one-third of every dollar of earned income after that, and reasonable work-related expenses are deducted from the net income to maintain an incentive for cash assistance recipients to work. Therefore, there is no simple dollar figure for General Relief Medical eligibility for a family. While the estimated 22,950* Alaskans below the federal poverty level might meet the income criteria for General Relief Medical, it should be noted that many of these are Alaska Natives or Medicaid eligibles, and so have a prior health resource. In FY 77, $3.7 million was expended in the GRM program, and $4 million was budgeted for FY 78.

Catastrophic Illness Program

The state Catastrophic Illness Committee administers a program that provides financial aid for persons of all income levels who have suffered a catastrophic illness--an illness that incurs high medical expenses. Total medical bills related to the illness must exceed $1000 in a 12 month period after all sources of third party payment, such as state and federal medical assistance programs, private and military health insurance, and awards in legal actions, have been exhausted. The Committee

meets twice a month to determine the eligibility of applicants and the amount of medical assistance to be awarded, using a formula based on annual income, number of dependents, amount of assets, and the assumption that the applicant's share will be paid to the provider on a payment schedule covering a period of at least three years.

In its second year of operation, the program has granted aid to over 80 persons with the number of applicants steadily increasing as the program becomes better known. The largest portion of applicants are those in lower income brackets who do not qualify for other forms of aid. While applicants would have to be refused aid if funds were depleted, it is anticipated that the $450,000 appropriation for FY 78 will be adequate to meet this year's needs.

III. A DESCRIPTION OF HEALTH COVERAGE FROM PRIVATE SOURCES

Private Health Insurance

Health insurance pays benefits on an indemnity basis. When covered health expenses are incurred, the subscriber submits a claim to the insurance carrier. Benefits are normally paid to the subscriber. Normally, benefits are calculated on the basis of "reasonable charges" for each service or a schedule of maximum fees, rather than actual charges, and the subscriber must pay the difference if actual charges are higher.

Hospital expense coverage is the core of health insurance, because hospital care is the largest single medical expense. Hospital costs have risen faster in the last ten years than any other item in the consumer price index, and they continue to rise. Similarly, surgery has become a highly technological and expensive component of medical care, and the expansion of surgical expense coverage has followed closely the expansion of hospital expense coverage. Regular medical expense coverage is the third component of what is known as "Basic Protection", and covers physicians' services, and other medical services such as x-rays and lab tests. Basic protection policies are designed to cover one or more of these key medical services and the bulk of unpredictable medical expenses. Basic protection policies typically have limits on the number of days, dollars or visits covered, as well as a schedule of maximum benefits for services.

Major medical is the other main category of health insurance, and is designed to protect the subscriber from very large, unpredictable

medical expenses. It covers virtually any kind of health care prescribed by a physician. The maximum benefits under major medical is characteristically high, and the subscriber is typically required to pay a deductible and co-insurance as a disincentive for unnecessary utilization of medical care. Major medical insurance can either be designed to supplement a basic protection policy, or to incorporate basic protection and provide comprehensive coverage.

Blue Cross

Blue Cross is not an insurance company, but a hospital/medical service corporation, along with Fairbanks Physicians' Service and Delta Dental. As well as being non-profit, a hospital/medical service corporation differs from an insurance company in that it contracts with health care providers to deliver services to subscribers. The providers bill the corporation directly for the services provided, according to a fee schedule established in the contract. The subscribers pay a flat monthly premium for the coverage.

Blue Cross is specifically a hospital service corporation and maintains contracts with all the general hospitals in the state (not military or PHS hospitals). Fairbanks Physicians' Service is a medical service corporation and contracts with local physicians for services. Delta Dental is a dental service corporation and contracts with local dentists.

Blue Cross, however, covers more than just hospital expenses. Blue Cross provides major medical coverage, and subscribers are required to pay deductibles and co-payments, just like an insurance policy. Covered

expenditures delivered by providers not under contract with the service corporation are handled like insurance claims, on an indemnity basis. Benefits are based on "reasonable charges" and the subscribers must pay the difference if actual charges exceed "reasonable charges".

Pre-paid hospital/medical service plans are typically less expensive than health insurance through private carriers for several reasons: 1) they are non profit corporations, and any money in excess of their benefit payments and operating expenses usually goes toward equipment purchases for participating providers; 2) through their contracts with providers they are able to exert some cost and quality control pressure on providers, however, the effectiveness of this is mitigated by the extensive use of cost-plus contracts; and 3) though they do advertise, they do not deal through insurance agents and do not pay commissions. The end result is that an estimated 90 percent of subscriber premiums to an established hospital medical service plan are paid out in benefits, while only 50 to 80 percent of subscriber premiums to a private insurance carrier are paid out in benefits.*

Health Maintenance Organizations

Health maintenance organizations (HMOs) provide a full range of health care services to enrollees either directly through plan-owned facilities and plan-employed providers, or by contract with private facilities and providers. Enrollees pay a flat monthly rate for compre-

---

* Source: Don Koch, Alaska Department of Commerce and Economic Development, Division of Insurance.

hensive health care, with no deductibles or co-payments. HMOs have proven to be the most cost effective form of comprehensive health care services, because they are the only form of health care delivery which has built-in cost controls and an orientation toward preventive health care. HMOs have demonstrated significantly lower hospital utilization rates than any other kind of health care plan. Hospitalization continues to be the largest and fastest growing component of health care expenses nationwide.

The federal government has taken a great deal of interest in HMOs. There is a federal loan program for planning and establishing qualified HMOs, there is a federal law requiring large employers in HMO service areas to offer HMO coverage as an alternative to health insurance benefits, and DHEW is currently organizing a conference of labor and industry leaders to promote the HMO concept.

Alaska has one HMO in the planning stage, the Greater Anchorage Health Plan.

Teamsters

In most union health plans, employer contributions for health benefits are paid into a trust fund, and the trustees of the fund purchase group insurance for eligible union members. The Alaska Teamster-Employer Welfare Trust is unlike other union health trusts in that it is a self-insurer. In other words, the Teamster trustees do not purchase health coverage from a private health insurance carrier; they are their own carrier, and pay health insurance benefits to qualifying Teamsters directly from their own trust fund. In addition to a health insurance plan, the Alaska Teamster-Employer Welfare Trust offers an alternate

HMO-type plan called the Alaska Health Plan. The Alaska Health Plan is not officially an HMO under federal law because it does not offer open enrollment and does not provide the full range of services required of a qualified HMO. However, its operation is similar to an HMO. The Alaska Health Plan contracts with the Alaska Clinic and the Alaska Hospital and Medical Center to provide preventive, curative, and rehabilitative health services to plan members. The relationship between the Teamsters and the Alaska Hospital is more than just contractual, however, as Teamsters financed the hospital and serve on the board. The Teamster Alaska Dental Plan is also on an HMO model, but it differs from the health plan in that the Alaska Dental Clinic is directly owned and the dentists are directly employed by the Teamsters.

There are an estimated 28,000 Teamsters Local 959 members in Alaska, though they are not all eligible for health benefits. Eligibility is determined by the number of hours worked, and with the high post-pipeline unemployment, some Teamsters have exhausted their health benefits.

IV. AN ANALYSIS OF THE EXTENT OF HEALTH CARE COVERAGE AND GAPS IN COVERAGE

The Covered Population

Nationally, 178 million people - more than 8 out of 10 persons in the civilian non-institutional population - had some form of private health insurance in 1975, according to the Health Insurance Institute. The same survey reported 250 thousand people in Alaska, (two thirds of the civilian population) had private coverage.

The major public programs, U.S. Public Health Service, Medicaid and Medicare, provide health coverage to an estimated 20% of Alaska's civilian population. It is not known to what extent public coverage duplicates private coverage state-wide. However, random sample surveys were conducted in 1974-75 in both Anchorage and Kodiak Island Borough with questions regarding health coverage. The Anchorage survey reported that 79.9% of the sample had third party health coverage of some sort, and 20.1% had none. In Kodiak Island Borough 92.6% of the respondents reported third party health coverage, while only 7.4% reported none. This high percentage of health coverage in Kodiak Island is largely due to the high proportions of Indian Health Service eligibles (over 40%) and military personnel and dependents (over 25%). Those 7.4% without coverage constituted over 20% of the non-Native non-military or military dependent population.

The 20.1% of the Anchorage sample without health coverage constituted over 25% of the non-Native non-military or military dependent population in Anchorage.

If we can assume that a similar percentage (20-25%) of the non-Native non-military population state-wide currently are without third party health coverage from any source, 56 to 71 thousand Alaskans totally lack third party health coverage.

The biggest hole in this coverage patchwork is moderate and low income people who are self-employed or marginally employed, or non-union employees of an employer who doesn't provide health benefits. These people are above the income eligibility standards for Medicaid or General Relief Medical, yet their cash income is not adequate to afford either the expense of private health insurance, nor the expense of many medical services on a fee-for-service basis. This group includes farmers, shop owners, small contractors, temporary and part-time employees, casual laborers, subsistence providers and the unemployed. It also includes a large number of non-union workers, particularly those working for small employers, such as child care workers, waitresses, clerks, clerical workers, delivery truck drivers, gas station attendants and construction workers in home building. And of course the dependents of these bread-winners normally lack coverage as well.

In Alaska there are many seasonally employed people as well who have health coverage only part of the year while they are employed, such as loggers and cannery workers. Most construction workers (outside of home building) are unionized and have "hour banks" for health benefits such that if they work enough hours over the summers their accrued health benefits will last through to the next season. However, when there is not enough work to go around, many people are not able to accumulate enough health coverage to last the winter.

Services Covered

Health plans vary widely in the services covered and the levels of coverage provided. The foregoing analysis distinguished between people who have any sort of third party health coverage, and those who have no coverage at all. We have not yet considered whether those with some coverage have coverage that is adequate to protect them from financial hardship. Some policies, for instance, are specialized and cover only hospital expenses, or only surgical expenses. Many policies do not cover particular services such as prescription drugs, office visits, or nursing care outside of a hospital.

In the Anchorage survey, while 20% of the respondents lacked hospital coverage, 24% of the respondents lacked surgical coverage, 46% lacked coverage for visits to the doctor's office, 60% lacked dental coverage, and 70% lacked mental health coverage.

Many policies have limits on coverage that are exhausted by severe illnesses, or require co-payments which can add up to substantial sums. Many policies limit their payments to "reasonable charges" as defined by the insurance company, regardless of the actual charges, and the consumer must pay the difference.

It is not difficult for a consumer even with some health insurance to incur heavy financial losses due to health care expenditures. The following statistics suggest that insurance companies in fact are not paying the bulk of health care expenses.

While the private health insurance industry claims to serve over 80% of the nation's civilian non-institutionalized population, in 1976 they paid only 26% of personal health care expenditures nationally.

Government programs paid another 40%, and consumers paid 32% directly. The remaining 1% of personal health care expenditures was paid by philanthropic organizations.[1]

1 "National Health Expenditures, fiscal year 1976", Social Security Bulletin, April 1977, page 8.

V. POSSIBLE LEGISLATIVE ACTION TO EXTEND COVERAGE

There are several measures which have been conceived to fill some of the gaps in health care coverage. Maine, Connecticut, Rhode Island, Minnesota, and Alaska have all enacted some form of state assistance for catastrophic illnesses. Connecticut and Minnesota have also made some cautious steps toward more comprehensive coverage with legislation that regulates health insurance carriers, mandating minimum benefit standards, controlling premium rates, and mandating pooled coverage for high risk subscribers. Hawaii has taken the boldest step toward expanding health coverage by mandating that all employers subsidize health coverage for their employees. These states are pioneers. Their state health insurance programs are new, and are being watched with interest by other states.

No state has instituted a universal or a state subsidized comprehensive health insurance program. While universal coverage is the goal for proponents of government sponsored health coverage, no one has been able to develop an acceptable scheme of financing universal coverage, either at the state or national level. If universal coverage is not yet a viable option for states, we are left with a patchwork approach to health coverage, covering only the holes we can reach. The following is an inventory of some of the "patches" available to state legislatures, in order of decreasing cost to the state.

Universal Coverage

Uniform and universal coverage for all residents is the fairest and most expensive approach to state sponsored health insurance. If group coverage comparable to the plan for state employees was purchased by the state for all state residents without federal health coverage, it would cost about 87 million dollars. Such broad coverage is certainly unnecessary because it duplicates and discourages coverage from other sources. It could also cause a substantial migration of people seeking free health coverage into Alaska. No state has tried such a plan.

Coverage for the Uncovered

State sponsored health insurance for all residents without coverage from other sources would avoid the problem of duplicating coverage, but it would still discourage private coverage and cause in-migration. Groups and individuals would drop their private coverage because they know the state would pick them up. In the long run, the program would approach universal coverage. Using estimates of the currently uncovered population, the cost for such state purchased coverage could be anywhere from $27 million to $40 million dollars in 1977. No state has tried such a plan.

Coverage for Non-Wage Earners and the Marginally Employed

State sponsored health insurance for defined groups of people who have no practical access to private health care coverage is the most limited approach to state sponsored health insurance. Under this ap-

Universal Coverage

Uniform and universal coverage for all residents is the fairest and most expensive approach to state sponsored health insurance. If group coverage comparable to the plan for state employees was purchased by the state for all state residents without federal health coverage, it would cost about 87 million dollars. Such broad coverage is certainly unnecessary because it duplicates and discourages coverage from other sources. It could also cause a substantial migration of people seeking free health coverage into Alaska. No state has tried such a plan.

Coverage for the Uncovered

State sponsored health insurance for all residents without coverage from other sources would avoid the problem of duplicating coverage, but it would still discourage private coverage and cause in-migration. Groups and individuals would drop their private coverage because they know the state would pick them up. In the long run, the program would approach universal coverage. Using estimates of the currently uncovered population, the cost for such state purchased coverage could be anywhere from $27 million to $40 million dollars in 1977. No state has tried such a plan.

Coverage for Non-Wage Earners and the Marginally Employed

State sponsored health insurance for defined groups of people who have no practical access to private health care coverage is the most limited approach to state sponsored health insurance. Under this ap-

proach state subsidies could be targeted for those who need them most. The main target groups to be considered would be the unemployed, part time, employed, and the low income self-employed--people without access to group coverage, or the financial resources to pay for private insurance. This plan avoids some of the problems of the broader coverage as discussed above, because it is not likely that significant numbers of people would leave their jobs to get state subsidized health insurance, nor is it likely the unemployed people from out-of-state could afford to move to Alaska just to get coverage. This approach would dovetail well with mandatory employer coverage as discussed later.

The cost to the state of subsidizing health care premiums for these groups would be substantial, but it could be contained in at least two dimensions: the eligible population could be limited by definition, and the state's rate of subsidy could be set at any desired level. To discourage in-migration, the state subsidy could vary according to length of residency, with first year residents getting little or no subsidy, and long term residents getting a more substantial subsidy. Or the state subsidies could vary according to the income of the subscriber with a higher subsidy for low income people and a lower subsidy for higher income people.

A sliding scale of premium subsidization would provide a continuum of access to health care insurance up and down the income scale, avoiding the injustices of an arbitrary threshold. However, it would also require an extensive investigation into each subscriber's income to determine which rate they are eligible for, much like the eligibility determination for welfare. Eligibility would constitute the larges. administrative task under this plan.

The total premium costs for group coverage for the unemployed, self-employed and the non-labor force population without coverage from public sources would be an estimated $25 million. If the state opted for less than 100% subsidization, some members of the target groups would not enroll. The resulting savings to the state would not be as large as one might expect, however, because with any voluntary plan in which subscribers bear some costs, the premiums would be higher than with a universal plan. This is due to the fact that subscribers would be self selecting toward higher use of medical care. In other words, people who do not expect to use much medical care would be less likely to purchase the insurance, while people who expect high medical expenses would be very likely to purchase the insurance. Also, many low income people who have immediate needs and expenses are less likely to purchase insurance, because the benefits of medical insurance are deferred and uncertain. Low enrollment on the whole would save the state money, but it would also contradict the purpose of state subsidized health insurance, namely to make health care available to more people. No state has ever instituted a direct health insurance subsidy program.

Income Tax Credit

A state income tax credit for health insurance would be an indirect way for the state to subsidize health insurance, and avoids many of the administrative problems associated with direct subsidy programs. The Alaska tax forms would provide a line for the taxpayer to enter the appropriate credit against their Alaska state taxes. The credit would be equally available to all state residents filing income tax returns,

including employers. Yet at the same time, if it were a fixed dollar amount, it would be a relatively greater benefit to low income people than to higher income people. If a fixed dollar tax credit were offered, the state would probably want to require evidence that the health insurance purchased meets minimum state standards. This would ensure that state dollars would subsidize only health coverage of acceptable quality, and no one could collect the credit for just token coverage costing less than the credited amount.

If the credit were computed as a percentage of the premium cost, with an upper limit provided, no minimum benefit level would need to be established, because the state would be contributing only a token amount to token coverage, and a more substantial amount to more substantial coverage.

This alternative would not reach low income people who do not file tax returns, nor those who cannot afford even a percentage of the premiums for health insurance. It would be extremely difficult to estimate how many people would respond to such an incentive program. A higher credit could predictably get more response. The current state employee health plan has an annual premium well over $800. If an $800 tax credit were offered currently covered taxpayers, the initial costs would be an estimated $68 million, and would rise as more people responded to the incentive. If a $250 credit were offered, the initial cost to the state would be around $21 million.

Medicaid Medically Needy Program

"Medically needy" is an optional Medicaid program with federal matching dollars. Currently Medicaid provides medical care to anyone eligible for public assistance grants under categorical programs: Aid to families with Dependent Children, Old Age Assistance, Aid to the Blind, and Aid to the Disabled. These public assistance programs have program criteria (blindness, age, disability, dependent children) as well as income criteria for eligibility. There are many Alaskans who meet these categorical criteria, but have incomes a few dollars above the income threshold for public assistance eligibility. These Alaskans are able to meet their daily living expenses out of their own incomes, but medical expenses put a severe strain on their budgets, and often deplete their resources to the point that they must again resort to public assistance grants and Medicaid.

Under the medically needy option, people who meet program criteria but have incomes within a limited range above the income threshold for public assistance grants, are also eligible for Medicaid. Twenty nine states, two territories, and the District of Columbia currently participate in the medically needy option. Medically needy includes a "spend down" provision. This means that people categorically eligible but financially ineligible can become eligible for medical assistance if their income above the medically needy threshold is spent on medical bills. The difference between the person's income and the medically needy threshold is essentially an income-related deductible which must be met to be eligible for Medicaid. The medically needy program and the spend down provision soften the line between people eligible for both

public assistance grants and Medicaid, and those ineligible for either due to a few dollars more income. It also serves as an emergency medical resource for low income people with categorical eligibility who cannot afford adequate health insurance.

Originally, the Alaska Medicaid program was limited to the federally mandated target groups and benefits. The primary reason for this was that 65% of Medicaid eligibles have another medical resource--the Alaska Native Health Service--which is 100% federally funded. Medicaid is funded jointly by the state and federal governments. The state has kept its 100% state funded General Relief-Medical program which can pay for medically necessary services not provided by Medicaid, or ANHS, subject to state administrative controls.

Since the Indian Healthcare Improvement Act of 1976, the federal government must reimburse the State for Medicaid expenditures on behalf of Natives. This act has not yet been implemented in Alaska, but when it is implemented, it will significantly reduce the fiscal liability of the State for Medicaid. A program expansion such as Medically needy would then become much more feasible. Some of the medical assistance now provided under the state's General Relief-Medical program could be paid for jointly by the state and federal governments under the Medicaid medically needy program. HEW Region X estimated that, based on Washington State experience, a medically needy program would expand the current Medicaid budget by 10-13%.

Unlike other Medicaid eligibles, for "spend downers" (those who must spend their excess income on medical bills to become eligible for Medicaid under the medically needy option) there is a dual liability for

medical bills - the person is responsible for medical bills until the deductible is met, then Medicaid takes over. This dual liability causes administrative problems. It is difficult to determine exactly when the deductible has been met and when eligibility commenced, which bills the patient is liable for, and which Medicaid is liable for. The only states that have developed an efficient system of administering the spend down program are out of compliance with federal regulations.

Mandatory Employer Coverage

Of the various approaches open to the Legislature for extending health care coverage, the program with the least impact on the state budget for the greatest increase in coverage would be mandating employer sponsored coverage available to all employees. Such legislation would stipulate minimum benefit standards for employee group plans and would set minimum rates for employer contributions to the premium costs. To make such a program more palatable the legislation could also provide that the state subsidize premiums when necessary in small, marginal businesses.

Hawaii for example requires that employers pay at least 50% of the premium. Employers with fewer than eight employees whose share of the premiums would exceed 1.5% of their payroll, are entitled to state subsidies in the amount that the excess over 1.5% of the payroll exceeds 5% of the employers income from the business. Though several employers applied for state subsidies under the Hawaii legislation, none were found to be eligible according to these criteria.

Mandating employer coverage however has potential side effects. Mandatory group health plans would be similar to raising the minimum wage - it would be more expensive for employers to employ people, so fewer people would be hired. Though the resulting unemployment would probably not be significant among skilled and experienced workers, teenage workers would certainly be hit hardest. On the positive side, mandating employer coverage would be most beneficial to women and minorities who often work in the non-union low paid jobs without fringe benefits such as health insurance.

High Risk Reinsurance Pools

Many people are unable to purchase full health insurance coverage because existing health conditions (a weak heart, chronic illness, etc.) make them a bad insurance risk. To fill this gap in health insurance availability, two states, Minnesota and Connecticut, have established mandatory carrier reinsurance pools. All health insurance carriers in each state are mandated to offer a health insurance package to high risk subscribers at a reasonable premium. Such coverage is reinsured by the carriers association, in which membership is mandatory, so that the risk is pooled among all carriers in the state.

Because premiums are limited to affordable levels, the high risk coverage does not necessarily pay for itself. Any deficit must either be absorbed by the insurance carriers, or by the state. Connecticut and Minnesota both have established such reinsurance pools with virtually no administrative or premium expenses for the state.

Minimum Benefits Standards

Legislation establishing minimum standards for health benefits is a form of consumer protection. It is designed to insure that purchasers of state approved plans have the recommended range of coverage to protect them from financial hardship due to large medical expenses. The legislation can either mandate that all plans sold in the state meet minimum standards, or that all carriers offer a state qualified plan. Another variation is mandating that all employment related group health plans meet minimum benefit standards.

Such standard setting legislation would be an extension of existing state regulatory powers. The impact of such regulation on the state's major carriers would probably be minimal, but some small carriers may decide to drop their health insurance business rather than comply with such regulations. The more stringent regulation, setting minimum benefit standards for all health insurance plans, may also make it more difficult for low income people to afford health insurance, because low priced, low benefit insurance would be prohibited.

The Ninth Legislature considered minimum benefit legislation in their second session. House Bill 792 would have required that health insurance policies written in the state cover less costly alternatives to hospitalization, such as nursing care and home health care.

VI. CONCLUSION

The possible legislative approaches outlined in this report are only partial. They are not solutions to the problems of the health care system in this country. The health care system has many other major problems not addressed in this report, such as: cost control, quality control, appropriate levels of care, unnecessary treatment, and access to providers. The remedies discussed in this report don't even resolve the issue that they address: that of financial access to health care. It is not likely that all these problems of the health care system can be resolved on a state by state level.

However, states can take significant steps in each of these areas, and in doing so contribute to the body of knowledge and experience on which a national solution may be built. The intent of this report is to provide the legislature with the information they need to consider whether or not state intervention to improve third party coverage in Alaska is desirable, and what, if any, the next step will be.

There are three general philosophies of state intervention in service delivery. One assumes that the private sector is capable of meeting the demand for services, and that the state need only subsidize the purchase of services to ensure the satisfactory delivery of services to the desired target group. The second assumes that additional state intervention is necessary, in the form of regulation to ensure quality or accountability, or centralized planning to ensure coordination of service delivery, or technical or financial assistance to aid the private provider, to ensure that the private sector will deliver services

to the desired target group to the satisfaction of the state. The third philosophy assumes that it is to the state's and the public's advantage, for whatever reason, to deliver the desired services directly.

The first four remedies discussed in this report, three levels of state sponsored coverage and the income tax credit, would subsidize consumers to purchase health coverage from private providers. They reflect the first philosophy, that the private sector is capable of satisfactorally meeting the expanded demand. The last four approaches, Medicaid medically needy, mandatory employer coverage, high risk pools, and benefits regulation, embody the second philosophy, that intervention on a policy level is required. The Catastrophic Illness Program, already enacted by the state, reflects the third philosophy of direct state service delivery. The state is directly providing a form of catastrophic health insurance to all state residents.

Any of these alternatives that significantly expand health care coverage would increase the demand for health care, and as a result, health care costs would tend to rise. It would therefore be prudent to accompany any legislation substantially expanding coverage with legislation instituting cost controls on the health care industry. Though cost control legislation is not within the scope of the analysis presented here, it also deserves consideration.

The alternatives discussed in this report are not exclusive or exhaustive. Many of the ideas can be re-combined with each other or with other ideas not explored in this report. State intervention in third party coverage is a subject for pioneering.

The carriers which might find compliance with HB 977 most difficult perhaps are those who write only accident or illness indemnity policies with fixed reimbursement rates (for example, $50 per day for every day in the hospital). These companies are not set up to handle claims based on expenses incurred as required of a qualified plan under HB 977. The largest carrier of this type in Alaska has a premium volume of $723,000. It is not known how many other carriers of this type there are, nor what their premium volume might be. While it is perhaps undesirable to adversely affect any Alaska business with this legislation, it is notable that those for whom compliance with HB 977 would be most difficult are precisely those carriers who specialize in limited types of accident and health coverage which afford the least financial and medical protection to consumers.

PROFILE OF ALASKA CARRIERS 1978

Of the more than

300 carriers licensed to write accident and health insurance in Alaska, only

204 carriers reported any group or individual accident and health policy premium volume;

21 carriers reported over $500,000 in accident and health individaul and group premiums;

36 carriers reported $50,000 to $499,000 in accident and health individual and group premiums;

68 carriers reported 5000 to 49,000 in accident and health individual and group premiums; and

79 carriers reported less than $5,000 in accident and health individual and group premiums.

Hospital medical services corporations reported the following premium volumes:

Blue Cross of Washington and Alaska	$31,260,000
Deltal Dental Plan of Alaska	741,000
Physicians Services of Fairbanks	214,000
National Hospital Association	32,000

Chair, House HESS Committee
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska

Dear Representative Buchholdt:

It's been one full week since I have returned to my desk after my visit to Juneau and the "Lower 48". Our Legislature is in the midst of winding up for a possible adjournment this Friday. Therefore, I have been running from one conference committee meeting to another, especially since my Director is in Denver, Colorado, on official business.

I want to thank you and all of your associates for making my visit to Juneau very enjoyable and interesting. I have already discussed with Mrs. Ching plans to travel up the inland sea on a cruise, if not this summer, possibly next. I do not know whether the cruise will go as far north as Juneau, but I would like to show your capital to her.

I hope my visit was of some help to you and your proposed legislation I commend you for your efforts in trying to make Alaska a better community for Americans to live in. My best wishes to you and your associates in the successful conclusion of your efforts in regards to the Prepaid Health Care Insurance. Please call on me if I can be of any further assistance to you.

My best regards to all of your staff and associates.

Aloha,

Donald Ching

Juneau, Alaska 99801

Dear Representative Buchholdt:

Thank you for the hospitality you and your staff extended to me during my recent visit to your beautiful state. It was a wonderful experience for me, one that I shall never forget.

I'm enclosing a copy of the statement I presented to the Pennsylvania House Insurance Committee last year. The presentation summarizes our experience and my thoughts on mandatory insurance coverage for treatment of drug and alcohol abuse.

I shall be happy to respond to any questions or to send you additional information on our insurance statutes or on the Minnesota Comprehensive Health Association.

Sincerely,

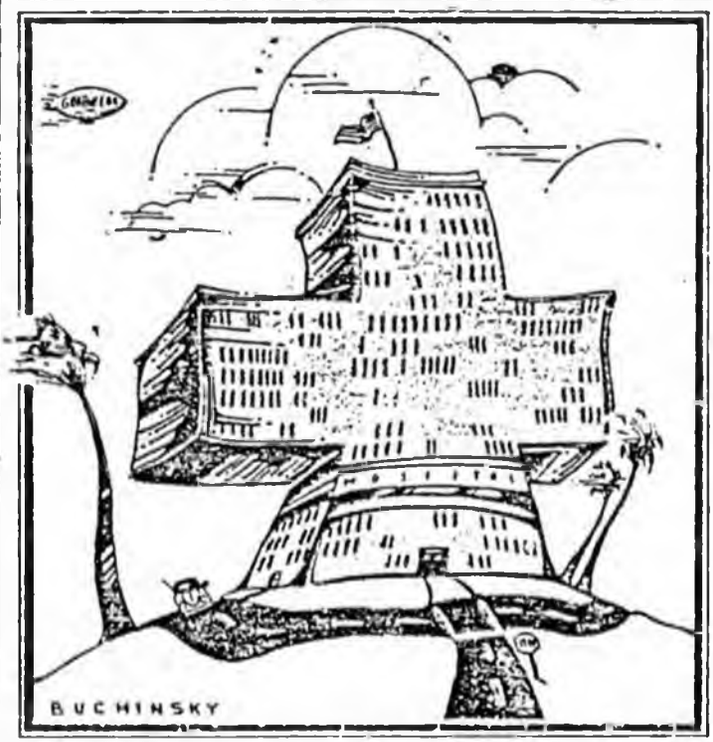
Mother's Healer

YOUR HEALTH AT TOO HIGH A PREMIUM

by Hugh Drummond, M.D.



SOME FORM OF national health insurance seems inevitable. It has been an almost sacred tenet of American liberalism since the New Deal. The Great American Center has shifted its hemorrhoidal bottom in this direction, and even organized medicine has begun to calculate the finger-lickin' goodies involved in a $60 billion-plus federal program.

Insurance is, of course, the American way of dealing with life's terror. No institution better describes a population trying to save its ass. It is a vestige of the medieval myth that moats and castle walls could keep out the plague. Insurance buildings are designed to convey immortality; steel and granite, sheathed in glass, they are meant to look like the executives who minister to them—vigorous, phallic, Apollonian. If God should break his contract with Noah, those buildings will endure the flood to pay the claims of a well-covered, if dead, constituency.

So it is inevitable that as we grow more anxious we will develop a form of universal health insurance, propped up by the federal government and its corporate underpinnings. About the only people left who are opposed to it are a few herbalists and that peculiar gaggle of paranoids on the Left and the Right, who cannot believe that anything compassionate or rational can emerge from the heart of this nation.

I have great respect for paranoia. So let me count myself among the crazies this time and suggest that, like the massive public housing projects that were another vision of American liberalism, national health insurance as currently conceived will someday be subjected to euthanasia.

Health insurance is really not health insurance at all, but sickness insurance. The major premise behind it is that we are all terrified by cancer and heart disease, which can be treated by such techniques as transplants, by-pass procedures and radiotherapy. These are enormously expensive technologies that the government will be expected to underwrite.

Overlooked are the pervasive diseases of the young and poor, such as lead poisoning, which affects a quarter of the kids in low-income neighborhoods, and malnutrition, which affects even more. Insurance doesn't touch these problems because their control has to do with social and environmental conditions. You can't fight hunger with pocketa-pocketa machines in medical centers.

In fact, when you get right down to it, you can't stop cancer and heart disease that way either. They are just as much social and environmental diseases as they are medical ones.

Since 1900, the ratio of cancer deaths to all deaths has increased five times; the same is true for heart disease. Together they will kill more than half of us. It is calculated by the American Heart Association and the Department of Health, Education and Welfare (HEW) that in a life of 65 years, we lose 1,300 days for being 25 per cent overweight, 1,800 days for living in a city and 3,300 days for smoking a pack a day. Yet we have virtually no information on the relative impact of bad housing, polluted air and water, Muzak and Twinkies. If we did, we would know we were losing the battle.

To really stop cancer we would need to control all industrial pollutants, such as asbestos, vinyl chloride and sulphur dioxide. The huge numbers of synthetic additives poured into our bodies every day would have to be eliminated. If we wanted to control heart disease we might have to do something about unemployment, which has been documented to increase nor-epinephrine and cholesterol excretion to murderous levels. We might also have to eat less, drink less, smoke less and drive less. If a serious effort were made in this country to prevent cancer, strokes and heart disease, the economy would collapse—a fact not lost on the pilots of the empire, many of them now supporting some form of national health insurance.

There have been amazingly few studies on the actual "outcome" of medical care in this country, but when they have been done the results are invariably depressing. A Johns Hopkins University doctor found that only 27 per cent of emergency room patients at Baltimore City Hospital received effective medical care. When the doctor's superiors insisted that the results would be radically different at a more "prestigious" hospital, namely Johns Hopkins, the doctor checked out the patients there who had gastrointestinal symptoms. He found that only 28 per cent of these Johns Hopkins patients received quality treatment. In other words, more insurance will help more people get lousy care.

With Medicaid and Medicare, the forerunners of national health insurance, the more we spent the less we got. In the first year of the programs, doctors' fees rose two and a half times as fast as the cost of living. In the last two years from September 1974 to September 1976, physicians' fees rose 23.3 per cent, while the Consumer Price Index increased by only 13.7 per cent. According to a report released in February by the Health Research Group, Medicare and Medicaid pay out more than $6 billion yearly in doctors' charges. Hospital costs have climbed even faster—a four-and-a-half-fold increase since the programs started. Where did all the extra money go?

Not to new services; there were hardly any of those. A lot of doctors got richer. There was expensive and "interesting" medical technology to utilize, such as the hyperbaric chamber at Mount Sinai, which is operated on an average of only once or twice a day. The money

it on buying and running it uld finance 20,000 outpatient isits a year, or a huge lead poisoning program in East Harlem. But that's not as much fun. Unfortunately, there is no assurance that similarly wasteful health care programs will not be funded by massive national health insurance.

Upper-level hospital personnel increased their salaries as the federal programs took hold. Hundreds of thousands of dollars were spent in efforts to prevent hospital employees from organizing unions. Much of the extra money went for outrageously expensive drugs and supplies. As long as the government was willing to underwrite the cost, the hospitals and doctors didn't care. Most of them welcomed the bucks the federal bonanza brought, no longer convinced that their salaries would decrease under the "socialized medicine" of Medicare and Medicaid.

And for the people the programs were supposed to serve? More people had access to bad health care. But one-third of Americans living below the poverty level remained untouched by Medicare and Medicaid. There was still no medical care for the poor. Enter national health insurance.

With national insurance, the $140 billion-a-year health industry could *really* rake it in. There would be the kind of guaranteed security the defense industry enjoyed during the height of the Cold War. Just think—no more people skipping out on their bills. The whole country as paying customers, and for each person, another prescription filled out, another piece of hardware needed, another disposable whatnot disposed of.

Under national health insurance, the poor still will not have quality medical attention. The health care system is not radically changed under the program, only subsidized fully. There will be no improved doctor-patient relationships, no health clinics that are community controlled. National health insurance does not mean better hospitals, with staffs responsive to the special problems of poor people. No fundamental change for the rich either. As usual, they will buy their way to priority.

We can also look forward to the government entering into some sort of alliance with private insurance companies, as it has with Medicare and Medicaid. Blue Cross is the leading contender for the job of administering a national health insurance system. That's the same Blue Cross that has allowed runaway hospital fees to multiply in the last ten years, while the average length of hospital stay has *decreased*. You might be interested in knowing that Blue Cross is controlled by the hospitals themselves. The hospitals created it during the Depression to ensure that their bills were paid, and you can be sure that with national insurance, hospital bills—no matter how ridiculously high—will be found "reasonable" by Blue Cross.

> "With national health insurance, the $140-billion-a-year health industry could really rake it in—as the defense industry did during the Cold War."

My real anxiety about national health insurance isn't only economic; it is philosophical. There is something wrong with a social policy that irrevocably consigns to a single profession something so subtle and profound as human health. For all the wonders of Western medical science, it has no understanding of and little interest in the meaning of health. It is possible that when you set out to "conquer disease," no less than when you set out to "conquer space," you can't win. Western medicine tries to throttle its patients into well-being. It relies on the military model of technology, the invention of hammers and the subsequent search for heads to bang with them. It has only given us a new ecology of disease with the smell of progress.

I am not suggesting that we dismantle all the cobalt units, computer assisted tomographs and heart-lung machines. But national health insurance will retard a more pluralistic approach to health, which might include self-help programs, herbal remedies and even faith healing. Is it antiscientific to permit the existence of activities that may have centuries of traditional practice and pure empiricism behind them? They may be conceptualized in less mechanistic terms than we have been trained to believe truthful. However, dying empires have always insisted that their vision of the truth is eternal when their artifacts barely survive.

Do I have the courage of my own convictions? Of course not. If I awake tonight with a right lower quadrant pain, shall I not call one of my surgical confreres rather than a Navajo healer? Would I deny that preference to anyone else? No. But neither would I deny the preference of someone for a Navajo healer. Yet with national health insurance, like all the other medical programs, Navajo healers will not be licensed to accept government money. National health insurance grants access to one kind of health care, and if a bill is passed, the "right" to medical care established will be a right to bad medicine.

Think of China for a moment. It has brought health to 800 million people, who were as mutilated, starved, infected and demoralized as any who have ever lived. And in that nation, where pragmatism is almost religious, where waste is murder, they brought health to the people with as much respect for the ancient and the traditional as for the modern and innovative.

Needless to say, there were other changes.

MEMO

TO: REP. TERRY GARDINER
FROM: JAMES LOVE
RE: HEALTH CARE
DATE: FEB. 20, 1980

A number of legislators have expressed an interest in health care legislation, but there is currently no program slated for consideration this year. What started out as a priority for 1980 has been pushed back a year, in the minds of several legislators.

While a year's delay is comforting for many reasons, there are equally compelling reasons for action this year. First, the legislature can accomplish a number of important objectives this year which will significantly expand health care services to many low-income and unemployed Abaskans, without attempting to design a comprehensive state insurance plan. The preliminary research on these proposals is in hand now. Specific proposals could be ready for introduction within two weeks, and floor action could be scheduled within four to six weeks.

This is an election year, and political consequences are important. But although some may see health care as a risky proposition, it has always recieved good marks from the public in opinion surveys. A state with a large supplus could do worse than spend some of it on the health of it's citizens.

Senate passage of any good legislation is always problematical, but we may have a few drawing cards. For example, the House and Senate are deadlocked on the State Medical Board, over the provision which requires doctors to treat Medicaid patients. The impact of this is twofold. The doctors are put in the position of arguing that health care for the poor is a government, rather than a private sector, responsibility. The doctors are also going to put pressure on the Senate for continuation of the Medical Board. The House can trade the Medicaid provision for movement on other health care bills.

Moreover, Hackney is pushing a health bill - something called "medic-alert" - which will provide for in-home care for the elderly. (this according to news reports). It may provide a vehicle for tacking on the House health package, which will include the elderly care, plus expanded care for many other Alaskans. This would get us to a vote on the Senate floor, in an election year, where Colletta, Bradley, Hackney, Sumner and others are running for re-election.

Several people are ready for action this year. Thelma is anxious to work on health care bills, willing to introduce a package through her committee, and willing to lend significant staff time to the effort. McKinnon is personally interested, and he chairs the Finance Subcommittee on health. Parker is interested and I imagine a number of other key House members would weigh in. Thelma and Joe, with some help from Parker, could provide the lead. In some ways both have held back, waiting for you to make your move.

AkPIRG will make health care a major priority this year if the pieces can be pulled together. We have one person already working full-time on the problems faced by Medicaid patients, and she could spend time lining up support for a health package.

The key consideration, in my thinking, concerns our ability to get solid back-up research for a legislative package - on a tight time table. Thelma will ask Jan to work on this, and Parker will ask Jim Erickson, but neither individual has prior experiance in the health care field. Duncan Read, who already has requests from Parker and others, has assigned Kreinheder to look at several of the proposals that should go this year, such as the Hawaii mandatory employer coverage. However, while Duncan's staff is certainly competent, they are also sorely overextended, and will not be able to provide the day by day, blow by blow, back-up needed to prepare a bill for passage within the short time frame needed for action this year.

According to Duncan, this could be remedied somewhat if he recieved requests from several legislators to work on health care problems. With enough interest, he could approach his governing council and ask that one staff be assigned full time to the health care area. Of course this would require that the other research topics be assigned a lower priority, and this by itself may not be desired.

The one person who knows more about this area than anyone else is Sharman. Her two memorandums to Thelma in 1977 and 1978 are still the basic research on the issue. She is working as a waitress for the federal cafeteria. She is interested in consulting on health care legislation. I imagine that she would need about two months work to justify quitting her present job. She would be available within five working days.

John Crandall tells me that the House will take up a supplemental this week or next which could provide funding for additional committee staff or consultants. Thelma, I am told, would prefer to have a contract with the Alaska Center for Policy Studies, or AkPIRG, than to expand her committee staff. This woild also solve the timing problem a bit, because either the Center, or AkPIRG could start work immediately on assurances from you or thelma that funding would be forthcomming.

The Alaska Center for Policy Studies, as I may have told you, is a non-profit corporation which undertakes public policy studies. It currently has two contracts with the legislature, including contracts with Rogers' Susitna Alternatives Committee and McKinnon's Leasing Policy Committee. The board of the Center includes Joe Josephson, Chairman, Vic Fischer, Vice-Chairman, and Hugh Fleischer, Sec/Treas. Other board members include Matt Berman, Pat Dobey, and Peter Gruenstein.

Assuming that we can agree to proceed, we could begin work on the following proposals:

1. Mandatory Employer Coverage. Hawaii now requires every employer to provide health insurance. This would expand coverage to many non-union workers, particularly those in low-paying service industries, who now lack coverage. Large employers, or those who have been organized by unions, should not be a source of opposition to this bill. Hawaii provides a special program for small employers which subsidizes the cost of insurance if it exceeds certain criteria.

2. Minimum Benefit Standards. The State would be given the authority to regulate the level of service covered by health insurance policies. Several states already do this, and in addition, the National Association of Insurance Commissioners (NAIC) has developed model state health insurance legislation for setting minimum health benefit standards.

3. Medicaid Medically Needy Program. This is an optional medicaid program which extends medicaid assistance to needy people who are a bit over current income guidlines. Twenty-nine states, two territories, and the District of Columbia participate in this program. Alaska does not.

4. Amend Medicaid Statutes. Provide Oregon option to use medicaid funds to purchase health insurance; provide for funding of interest payment penalties when the state is delinquent on its bills; and add additional services to the medicaid program, such as dental care.

5. Reinsurance Pools. Several states have developed mandatory reinsurance pools to ensure health care coverage availablity to high risk persons at reasonable rates. There will be little cost to the state to implement this.

6. Expand State Direct Service Programs. Additional funding could be made available to health clinics throughout Alaska to provide care to Alaskans on a sliding fee basis, according to income. The federal government already subsidizes physicians in areas like Juneau and Palmer, where the availability of services is a problem. This would also be a big help to communities that have doctors, if there was a problem of access, such as a refusal by doctors to accept medicaid coupons.

While these programs do not close all gaps, or address all health care issues, such as cost containment, they will extend services to many Alaskans, at a reasonable cost. Nothing is particularly novel, and experiance from other states is available. It can be pulled together as a House health package within the time frame detailed below.

Feb. 22 decision to proceed

29 detailed drafting request to LA legal

March 7 bills ready for introduction

17 hearings begin in HESS

31 legislation ready for floor action

With a combination of focus, coordination, and concentration, we can put together an excellent package this session. It would affect people's lives directly and immediately.

MEMORANDUM

May 27, 1977

SUBJECT: State Health Insurance (W.O. #4206)

TO: The Honorable Thelma Buchholdt

FROM: Sharman Haley SH
Research Analyst

Carter's National Health Insurance Proposal

The Carter Administration has not developed a comprehensive health insurance proposal. An advisory committee was recently established to evaluate the alternative approaches to national health insurance, and they are currently taking testimony in several cities across the country.

During the campaign, Carter promised national health insurance with the following provisions:

1. universal and mandatory coverage, implemented in stages based on priorities of need and financial feasibility;
2. comprehensive and uniform benefits with emphasis on preventive medicine;
3. financing by payroll taxes and general tax revenues;
4. cost and quality controls, uniform standards and set rates;
5. maximum personal interrelationship between patient and physician consumer choice of provider, and basic concern for the dignity of the person, unrelated to wealth or income;
6. incentives for improved delivery of services, for increased productivity, for redistribution of health personnel, and

resources for the development of alternative delivery systems;

7. consumer representation in development and administration.

Carter estimated the cost of implementing this program at $10 billion of new federal expenditures. It is not clear what his reasoning was to arrive at such a low figure, since he has not proposed a plan that can be costed out. One comprehensive mandatory plan that has been cost estimated is the Health Security Act, and the estimate of new federal expenditures for that pla is $80 billion.

There were 23 different national health insurance proposals before Congress last year, but none are moving now.

State Approaches

Two national organizations have developed model state health insurance legislation. The Conference of Insurance Legislators proposes a comprehensive health care program with universal voluntary coverage, regulated by the state, but administered by private carriers and financed by consumers. The National Association of Insurance Commissioners proposes a catastrophic health care program financed by the state. We have requested copies of these two models.

There are five states that have passed and implemented state health insurance. In Rhode Island, Maine, and Minnesota, the state provides financial assistance for catastrophic health expenses. In Hawaii, Connecticut and Minnesota, again, the state regulates private comprehensive health coverage to insure quality and availability and to control costs. No state directly subsidizes comprehensive health insurance for its residents, because it appears to be prohibitively expensive.

Hawaii: Every employer in Hawaii is required to offer a qualified health care plan to his/her employees and to pay at least half the premium. Qualified plans must meet state minimum standards. Small employers with fewer than eight employees whose share of the premiums would exceed 1.5% of their payroll, when that excess is greater than 5% of the employer's income from the business are entitled to a state subsidy for the remainder of the premium. This statute took effect in 1975, and though several employers applied for state assistance, none were found to be eligible.

Connecticut: The Connecticut comprehensive health care plans statute insures the universal availability of comprehensive health care insurance contracts meeting state minimum standards, at standardized premiums. The Health Reinsurance Association is created with mandatory membership of all carriers in the state to pool risk for the mandated coverage. The premium rates vary by sex and age, and for group contracts by geographical area, as well. Sample quarterly premium rates are in Table I.

Table I - Sample Quarterly Premium Rates for Connecticut Comprehensive Health Care Plans

Individual/ /Group*	30-year old Female	60-year old Male
Deductible		
$200	$114.57/ /$103.11	$243.15/ /$218.82
$500	$ 85.92/ /$ 77.34	$182.37/ /$164.13
$750	$ 74.46/ /$ 67.02	$158.04/ /$142.23

* Rate for Hartford, New Haven and Fairfield region.

Minnesota: The Minnesota statute requires all health insurance carriers to offer health coverage which meets minimum state standards, and requires employee health benefits to meet minimum standards. It also established a state comprehensive health plan available to any resident who is rejected, restricted, or limited in their health coverage from the private sector. This state plan is offered by all carriers and reinsured by an association of carriers, in which membership is mandatory, to pool the profits and losses of high risk coverage.

This comprehensive health insurance statute in Minnesota took effect in January of this year. There are now 12 law suits pending challenging the law. Interstate employers complain that when Minnesota law requires a high standard of health benefits for employees, the employer must offer the same high benefits to its employees in other states. Thus, the law has impact beyond the borders of the state and may be unconstitutional.

Minnesota also has a Catastrophic Health Expense Protection Act under which the state pays 90 percent of a resident's health care expenses after the resident's out-of-pocket expenses exceed (a) 40 percent of his/her household income under $15,000, 50 percent of his/her household income between $15,000 and $25,000, plus 60 percent of his/her household income in excess of $25,000; or (b) $2,500; whichever is greater. This statute does not take effect until July 1 this year, so its fiscal impact is not known. On the basis of very crude estimates, it was budgeted for $18 million over the two year budget period, plus $50,000 for administration.

Rhode Island: Rhode Island's catastrophic health insurance statute has been in effect for three years. For the 85 percent of Rhode Island's residents who have private health coverage which meets minimum standards,

the state will pay costs of health care beyond the limits or coverage of the private insurance and above $500 or 10 percent of the resident's income. For the other 15 percent who do not have private insurance, the state will pay costs over $5,000 or 50 percent of the resident's income. The program is not well known yet. Of the 300 to 400 applications to the state for payment of health bills received each year, only half are found to be eligible. The annual state expenditure for the coverage is running $1,500,000 per year.

A health resources development fund is established not only to pay catastrophic costs but to make grants, loans, or contracts for the improvement of health facilities, services or education.

The statute also authorizes state regulation regarding consumer protection, quality of health coverage, universal availability, and rates.

Maine: The Maine catastrophic illness statute provides that the state will pay all remaining eligible health care expenses when the resident's out-of-pocket expenses reach 20 percent of the resident's net income, plus $1,000. For residents whose net worth exceeds $20,000 and such net worth includes cashable assets, 10 percent of such cashable assets are added to the out-of-pocket expenses threshold.

Considerations for Alaska

Although Alaska has a Catastrophic Illness Committee, it has not been given clear guidelines nor adequate funding.

The state approaches which have been tested elsewhere which you may want to consider for Alaska include:

1. state minimum standards for comprehensive health plans offered by private carriers;
2. mandatory availability of such plans to all state residents regardless of age or physical condition;
3. mandatory membership of all health insurance carriers in a reinsurance association to pool risk;
4. regulation of premium rates and provider reimbursements;
5. comprehensive health benefits mandated for all employees, with at least 50 percent of the premiums paid by employers;

All of the above provisions combined would still leave some people without comprehensive coverage. Self-employed, part-time or non-working people with adequate incomes would have a choice whether or not to purchase coverage, and some would choose not to. Self-employed, part-time, unemployed and non-working people with low incomes, however, could not afford to purchase private health insurance. People in this category might include farmers, homesteaders, miners, independent truckers, fishermen, small family business people, widows, retired people not eligible for Medicare, lots of low paid part-time workers (mostly women) and, of course, all their dependents. In addition, there are large numbers of seasonally employed people in Alaska who would only have coverage part of the year, such as loggers, cannery workers, and tourist industry employees. Public Health Services, Medicaid, and Medicare provide coverage for large sectors of low income Alaskans, plus General Relief-Medical and other state programs provide piecemeal health services for eligibles, but we are still far from comprehensive coverage for all.

The only way for the state to insure universal coverage is to subsidize it to the tune of millions of dollars.

Before we can proceed to draft a state comprehensive health insurance plan for Alaska, some policy decisions must be made:

1. Coverage - is enrollment voluntary or mandatory, and for whom is the coverage targeted?
2. Benefits - which expenses will be covered?
3. Financing - what portion will the state or employers pay? How much in premiums, deductibles, or co-payments must the consumer pay?
4. Cost and Quality Control - how will rates or standards of care be set?
5. Administration - what is the role of private carriers? What is the role of the state?

There will be a seminar on state health insurance plans on Friday, July 29, in Washington, D. C., sponsored by the Georgetown University Health Policy Center. There will be four forums: (1) political planning for enactment of state health insurance; (2) administrative aspects; (3) benefit coverage and eligibility; and (4) the cost of state health insurance, and looking ahead to national health insurance. Reservations or inquiries should be directed to: Jordan Braveman, Director of Policy Analysis, Georgetown University Health Policy Center, 3520 Prospect Street, N.W., Washington, D. C. 20057. He can also be reached by phone at (202) 625-3092.

We will be happy to meet with you at your earliest convenience to discuss these questions.

March 24, 1980

Representative Thelma Buchholdt
State Representative
District 9 (Spenard)
Chair, House HESS Committee
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Buchholdt:

This is to acknowledge receipt of your letter of March 18, 1980, inviting me to testify on proposed legislation similar to Hawaii's "Prepaid Health Care Act." Because the subject matter is not related at all with the state department which I am presently serving, I originally could not justify my going to Juneau as official State of Hawaii business. However, my Director and the Governor both feel that if my presence would assist Alaska in enacting progressive health care legislation, I would be given leave to go to Juneau with Hawaii's experience in this field.

I have spoken with Ms. Sorice of your office and am making plans to arrive in Juneau on Sunday, March 30, 1980, and will be available to testify on March 31 and April 1, 1980, if necessary.

I am looking forward to being of any assistance that I can possibly render in your efforts to enact such a bill. I think it has been of much benefit to the people of the State of Hawaii.

May I give you a short biographical sketch so that you may use this in further evaluation of my testimony next week:

1. Member of the Hawaii Legislature from 1959-1978 (8 years-House of Representatives; 12 years-Senate).

2. Attorney-at-Law.

3. Former Vice-President of the Bank of Hawaii (1963-1979).

4. Presently Deputy Director of the Department of Regulatory Agencies, State of Hawaii.

5. Member of the Board of Directors-Hawaii Medical Service Association (Blue Shield and Blue Cross Plan) (1965 to present), presently serving as its President.

I have never been to the great State of Alaska, and I am looking forward to my first visit.

Very truly yours,

Donald Ching

Donald D. H. Ching
Deputy Director

Subject: Policy Options in Proposed Health Legislation

The health bill which is presently being drafted at Representative Buchholdt's request is largely modeled after Hawaii and Minnesota laws. These laws do not necessarily conform in detail to the situation in Alaska nor the interests of the Alaska sponsors. This memo calls to your attention various points in the model legislation which you may wish to consider modifying for Alaska. Certain policy considerations in the proposed Medicaid amendments and medically needy program are also discussed.

Health Insurance Minimum Standards and Risk Pooling

The Comprehensive Health Insurance Act adapted from Minnesota law and published in 1980 Suggested Legislation Vol. 39, by the Council of State Governments, is the model for the minimum benefits and risk pooling portions of the proposed legislation. One section in the model bill requires health insurance carriers to offer certain kinds of conversion privilages. For example, when an individual drops out of a group plan (such as with the termination of employment) the carrier must offer an individual plan to continue coverage without the addition of underwriting restrictions. Also, when the primary insured dies, the carrier must allow other individuals covered under the plan to continue coverage. This issue was not addressed in our drafting request. You may wish to consider including language on conversion privilages in the bill.

The model legislation also contains a provision known as "dual option" which requires major employers of 100 or more employees who offer health benefits to their employees, to offer both insurance or membership in a health maintenance organization where both are available. This in part is a policy to promote HMOs. This provision was not included in the drafting request. Since Anchorage may have an HMO in the near future, you may wish to consider a similar provision in the legislation for Alaska.

The model legislation sets out standards for three types of qualified plans. You should be aware that the legislation does not require that only qualified plans can be sold; it merely requires of all carriers that qualified plans be offered to each eligible customer.

The model legislation sets numerous specific dollar amounts. Presumably these amounts will have to be periodically updated for inflation or changes in standards. You may wish to consider adding the provision that the specified amounts are applicable for the first year and subsequently the commissioner may revise and update all the dollar amounts by regualtion.

The model legislation initially sets premiums for the high risk coverage at the average premium level among the five largest carriers in the state for comparable standard risk coverage, and provides that in subsequent years the premiums are to be set such that the plan pays for itself according to actuarial principles. In Minnesota's experience however, the claims in the first 18 months were so high that they feared premiums would have to be raised 100% to cover the claims. To keep the premiums at an affordable level, the legislature amended the statute to limit the premiums to 125% of the standard risk premiums, and provided that assessments made against the carriers by the carriers association to cover the losses due to claims, could offset any income or premium taxes owed to the state by that carrier. Thus the state was made responsible for the losses incurred by the plan. You may wish to consider these amendments for the Alaska legislation as well.

The model act defines dependent as spouse, unmarried child under the age of 19, dependent child under the age of 25 who is a student and

is financially dependent on the parent, or a dependent child of any age who is disabled. You may wish to consider the addition of any household member who is financially dependent on the head of household, in order to include other relatives or non-relatives who may be members of that family unit.

The model legislation, in its itemization of minimum services covered and not covered, states that transportation costs other than ambulance are not covered. This is not well suited to Alaska, since medically necessary travel is frequent and expensive in most parts of the state.

The model legislation includes well baby care, routine physicals, and multi-phasic screening. It should be understood that since these are routine, predictable expenses, they do not fall within the central prupose of insurance -- that is, to insure against risk. Requiring coverage of basic medical care such as these in a consumer-paid plan does no service whatsoever to the consumer, since he or she will pay the full cost of routine care through higher premiums anyway. Requiring coverage of them in an employer-paid plan does offer an advantage to the consumer, of course, because it shifts the costs of these medical services from the consumer to the employer. Arguably there is a public purpose served in this requirement even for consumer-paid coverage -- namely to promote the utilization of these services in the interests of preventive medicine. Since the services have already been paid for, the consumer may as well utilize them. There are experts who claim, however, that routine physical exams, other than pap smears, blood pressure checks, or other procedures tailored to the health risks of the individual patient, are not cost effective; that overall they do not save more expense through the early detection of disease than they consume.*

Mandatory Employer Sponsored Coverage

The Hawaii Prepaid Health Care Act is the model for the mandatory employer sponsored coverage portions of the proposed legislation. The Hawaii

* One school of thought maintains that a more effective approach to preventive medicine would be promoting health education, self-awareness and self-responsibility for maintaining health among consumers. This would also promote early detection and reporting of symptoms when they do occur.

act excludes seasonal employees, in particular the pineapple pickers. The only explanation for this offered by the Hawaii program administrator was that the plantation owners had the political clout to get their employees exempted. Seasonal employees are a large component of Alaska's labor force, and often lack health coverage. You may wish to consider including seasonal employees in the Alaska legislation, or perhaps some form of hour bank for seasonal and temporary employees similar to the union health plans in the construction trades.

The model legislation mandates coverage of the employee only, and coverage of dependants is optional (unless the plan is of lower standard than the largest plan and is approved by the commissioner). You may wish to consider making coverage of dependents mandatory in employer-sponsored plans.

The Hawaii model sets up a separate fund for premium supplementation for qualifying employers. Several sections of the bill are devoted to defining the fund and how it is to be managed. Since the fund is not going to be self-supporting and will require annual appropriations anyway, there is little apparent advantage in terms of management or oversight in establishing a separate fund. You may wish to consider making premium supplementation part of the general fund.

The Hawaii model appears to make employee participation, including payment fo the employee share of the premium, mandatory. The advantage in this is that more people will have coverage and employers cannot pressure employees to decline such coverage. The disadvantage is that employees may be required to contribute to the premium and have no choice whether or not to participate. You may wish to consider making participation voluntary on the part of the employee.

Linkage Between Hawaii and Minnesota Models

The Hawaii and the Minnesota models take two different approaches toward defining the minimum benefit standards for qualified health coverage plans. The Hawaii law is setting standards for mandatory employer coverage. In addition to meeting the very general benefit guidelines itemized in the

law, a qualified plan must meet one of two alternative benefit standards: (1) the benefits must meet or exceed the benefits of the largest plan in the state (in Alaska this would be either the Alaska State employees plan or possible the Teamsters plan); or (2) the benefits must provide a level of coverage deemed satisfactory by the Commissioner. If these benefit plans are mre limited than the largest plan, the employer must pay half the premium for dependents as well as the primary insured. The bill also establishes a prepaid health care council to advise the Commissioner on benefit levels. The law is administered by the Department of Labor.

The Minnesota law is setting standards for state qualified plans which all carriers are required to offer. The law specifies the scope of required benefits as well as minimum or maximum limits, copayments, and deductibles for three levels of qualified plans. The law is administered by the Division of Insurance.

While there is no direct conflict between these two laws which are proposed for Alaska, there is some duplication. Since the Alaska Department of Labor has no expertise in the arena of health insurance benefits, you may wish to consider centralizing all responsibility for benefit standards under the Division of Insurance, and leave only the employer compliance responsibilities with the Department of Labor. You should be aware that the Alaska Division of Insurance is already seeking authority to regulate minimum standards for insurance of all kinds in HB882 and SB513.

Consideration should also be given to the question of what standards employer coverage should meet and how they should be set. The Minnesota model specifies the standards for three levels of qualified coverage in law, and requires that employers who offer health coverage provide at least a number two qualifie plan. The Hawaii model only provides general guidelines of minimum services to be covered, and leaves the other details up to the Commissioner, or else ties the standard to the benefits provided by the largest plan in the state. The state employees plan and the Teamsters plan are both more comprehensive than the minimum standards for the number two qualified plan, but of course would also be more expensive. The Minnesota approach is much simper than the Hawaii approach and gives the legislature

greater control over the minimum standards. The standard required for employer plans does not necessarily have to be the same standard required for a qualified plan offered to individual consumers, particularly in the area of routine care for the reasons discussed in an earlier section.

Medicaid Medically Needy

Federal financial participation requirements in the Medicaid medically needy program set the maximum income threshold for medically needy program eligibility at 133% of the Aid to Families with Dependent Children income standard for a household of equivalent size. The minimum income threshold is set equal to the Adult Public Assistance standard or the AFDC standard, whichever is higher, for a household of equivilent size. Since in Alaska the AFDC standard is so much lower than the APA standard, $350 for an AFDC family of two compared to $608 for two APA elibibles, the federally mandated minimum medically needy income threshold for a family of two, $608, is higher than the federally mandated maximum income threshold of: $466.55 ($350 x 1.33). These are clearly impossible criteria. The federal policy manual appears to resolve the contradiction in favor of the lower standard. The result is that for adult elibibles the Medically needy income threshold is not much higher, and for a two person household is actually lower, than the income standard for the regular Adult Public Assistnace program. (See attachment) This inconsistency could be left as is, or resolved in one of two ways: (1) the AFDC standard (which is lower than AFDC standards in many other states and a virtually impossible budget for a family in Alaska) could be raised; or (2) the medically needy income threshold could be set higher than 133% of the AFDC standard and the program could by financed entirely by the state.

Medicaid Optional Services

The Medicaid optional services included in the drafting request were the nine uncovered services most often requested by Medicaid clients and most recommended by social workers, as reported in OPTING: A Study of Medicaid Client Need. A copy of Table 2 from this report is attached. A complete listing of Medicaid optional services is attached should you wish to consider other optional services.

MEMORANDUM

March 18, 1980

TO: Representative Bill Parker
Attn: Mr. Jim Erickson

FROM: Jack Kreinheder, Issues Analyst JK

RE: State Health Care Programs
Research Request No. 61

You have asked that we: (1) provide any available studies on Medicaid, state health insurance, and th State's health care program in general; and (2) determine whether the State could provide medical care for low-income groups in medically underserved areas of the state. The enclosed materials represent all the relevant materials we were able to locate, with the exception of past copies of the State Health Plan and the Medicaid Annual Status Report. These reports were not included because of their bulk and uncertain value to you; should you wish to review these documents, please let us know.

Our major findings with regard to direct State delivery of medical services are the following:

1. There appear to be no legal reasons why the State could not hire doctors to treat low-income groups or any other class of people; however, four major practical difficulties with such an approach were raised during the course of our research. The first problem is that everyone we contacted believed the medical community would oppose the competition which direct State participation in the delivery of medical services would represent. Secon., the State would need to purchase malpractice insurance for doctors in its employment, thus incurring substantial costs. Third, if the legislature approved funding for such a program, and later discontinued it, or if State physicians' services were to be provided on a temporary basis, the problem of "medical abandonment" could result in lawsuits against the State unless adequate arrangements were made for the further treatment of patients handled under the program. Fourth, it appears that medical services provided by State physicians would not be eligible for federal Medicaid funds

except on a temporary or special situation basis; therefore, the State would have to bear the full cost of the program unless State-provided services were demonstrated to qualify for a waiver from the usual federal Medicaid requirements.

2. Withdrawal from the Medicaid program is not, however, a prerequisite to the establishment of a State physician program. My understanding of the alternative health care system you are considering is that the State would not necessarily provide all the medical services now administered by private physicians under the Medicaid program, but would instead make State doctors available in areas which are medically under-served either because of the lack of physicians, the lack of specific medical services, or because of the refusal of available physicians to accept Medicaid patients. It is clear that the State could continue to receive federal Medicaid funds for medical services provided by private physicians; and, in addition, it appears that funds could also be received for State-provided services if a federal waiver from certain regulations could be obtained. The State currently receives over $22 million per year in federal Medicaid funds.

3. It may be possible to improve medical care for low-income persons by means other than, or in addition to, direct State health care delivery, and without opting out of the Medicaid program The principal problem with the Medicaid program, from the recipient's point of view, appears to be that many doctors in Alaska refuse to accept Medicaid patients. This reluctance to take Medicaid patients is, in turn, largely attributable to the extensive paper-work requirements and the extremely slow payment process of the current Medicaid system in Alaska. However, these problems are not inherent in the federal Medicaid system, and it appears that more rapid and efficient reimbursement of medical providers could substantially improve low-income access to medical care by encouraging more doctors to participate in the program. Of course, there may be other problems with the Medicaid program which might make withdrawal from the system desirable.

4. The expanded use of fiscal intermediaries may be one option for making more doctors available to low-income persons. Delta Dental Plan of Alaska is currently the only organization of this type in Alaska and handles only dental services, but all parties involved--the Department of Health and Social Services, the participating dentists, and the Medicaid recipients--seem to be very satisfied with the program. About 96 percent of the dentists in Alaska are members of Delta Dental and 95 percent of these participate in Medicaid. The fact that reimbursement to dentists by

Delta Dental for Medicaid cases usually occurs within two weeks, as compared to up to several months for other Medicaid claims handled by the State, is the main reason for the almost universal acceptance of Medicaid cases by Alaska dentists.

In an administrative review of the Alaska Medicaid program completed in 1979, HEW officials recommended that the Division of Public Assistance contract with a fiscal intermediary for Medicaid processing. The Division is planning to solicit within the next six months requests for proposals for the processing of all Medicaid claims by a fiscal intermediary, although H&SS may still elect to process claims in-house. Robert Ogden, Chief of Medical Assistance for the Division, stated that a fiscal intermediary handling all Medicaid claims could probably process claims as rapidly as Delta Dental currently does for dental claims, thus improving the prospects for physicians accepting Medicaid patients. However, the choice between the use of a fiscal intermediary and processing the Medicaid claims in-house will depend on administrative decisions made within the department.

Each of the four points summarized above will now be discussed in more detail.

State Medical Care

According to the sources we contacted, the basic answer to your second question is yes, the State could hire doctors to treat low-income groups. Eligibility could be determined in a number of ways and would not need to parallel the federal Medicaid system. Placement of the State-employed doctors throughout the state could be based on whatever criteria were deemed appropriate by the State.

The State already provides direct delivery of medical services to a limited degree. Nurses employed by the Division of Public Health administer the Early Periodic Screening, Diagnosis, and Treatment Program (EPSDT) for children throughout the state. The program is small in comparison to other medical services, but it does provide a precedent on the State level for direct delivery of services.

Political resistance by the medical community was cited by several persons with whom we spoke as the greatest obstacle to the direct employment of doctors by the State. Our contacts believed that many doctors would view such an action as State competition with the private sector,

and as "socialization" of the medical profession. The apparent acceptance by the medical community of the EPSDT program suggests that opposition to the State physician approach would not be as strong if the approach were used only in a few selected areas or were clearly temporary in nature. For example, if the State adopted a procedure similar to that which was employed by the federal Department of Health, Education, and Welfare (HEW) to identify and designate the low-income population of Anchorage as a Critical Health Manpower Shortage Area (see Attachment A), doctors might be more willing to accept the State delivery approach than if it were part of a comprehensive, state-wide system.

Under the HEW system, which is authorized by section 332 of the Public Health Service Act, an area or population group of an area may be designated as a Health Manpower Shortage Area if the population-to-primary care physician ratio exceeds a certain level. An area is also given a degree-of-shortage classification based on this ratio. The population-to-physician ratio takes account of physician accessibility, rather than simply dividing the population by the number of physicians. For example, in Anchorage, the ratio of Medicaid eligible persons to all primary care practioners is estimated at 161:1, but when HEW adjusted for the fact that most of these physicians do not accept Medicaid patients, the final population-to-primary care physician ratio was determined to be 3,041:1.

This ratio qualified the low-income population of Anchorage as a degree-of-shortage group 4, which makes the area eligible to: (1) apply for placement of National Health Service Corps (NHSC) physicians; (2) be an eligible service area for purposes of repayment of health professions student loans and for the NHSC scholarship program; and (3) apply for grant funds under various sections of the Public Health Act.

A similar approach to improving medical care for medically underserved areas or population groups could be utilized by the State. Designation under the program might qualify an area for the placement of State-hired physicians, for grants to improve health care delivery, or perhaps for a special streamlined medicaid process which would encourage doctors to accept Medicaid patients. The latter option might be effective in a case like Anchorage's, in which the number of practicing physicians in an area is sufficient to meet the medical needs of the population, but the physicians will not accept Medicaid patients because of dissatisfaction with the reimbursement system.

Attachment B, which is a letter to Representative Martin from Commissioner Beirne, suggests other questions which should be considered if the State elects to provide medical care directly and/or withdraw from the Medicaid program. As Duncan Read indicated in his earlier memo, Dr. Frederick McGinnis, Deputy Commissioner of H&SS, has proposed a major study of health care financing options which would address questions relating to

State provision of health care, such as who would be eligible for the program, and what services should be provided. Dr. McGinnis has apparently expanded the scope of the proposed study and is attempting to obtain about $170,000 for the project. If the study is conducted, the results would be submitted to the 1981 legislature.

If the State physician health delivery system is to be pursued, the problems of malpractice insurance and medical abandonment must be considered. Neither of these problems would prevent the State from hiring doctors, but their cost and legal implications may have some bearing on the issue. The State currently carries a small amount of malpractice insurance for doctors employed in administrative capacities, apparently in the event that they are called upon in an emergency situation. To fully insure doctors employed by the State who regularly provided medical services would require a substantial expenditure. The magnitude of the insurance cost would depend on the number of doctors employed the service provided, and the scope of the program, but the cost could be significant.

Medical abandonment appears to be a relatively easy problem to avoid, but it could present legal problems if it is not considered in the design of any State-provided medical care program. Under state and federal law, physicians are responsible for arranging for continued medical care for their patients if, for any reason, they discontinue their treatment. A doctor not fulfilling this responsibility may be sued by a patient. The two ways in which the issue of medical abandonment could arise are: (1) if the legislature suddenly discontinued funding for the program, and (2) if the program were discontinued in an area because it was determined that the private physicians in the area could now adequately serve the population. In both instances, the problem of medical abandonment could be avoided by ensuring that adequate arrangements were made for the continuing treatment of patients after the State ceased providing service directly.

A final point to be considered regarding direct State delivery of medical care is the Medicaid funding question. I contacted officials with the Northwest regional office of the HEW Medicaid Bureau in Seattle to determine if federal Medicaid funding could be provided for medical services delivered by State-employed physicians. A firm answer could not be secured within the time frame of this project, but it appears that a waiver from certain federal regulations pertaining to reimbursement procedures and other matters would be required for federal funding to be given for State-provided services. The necessary conditions for such a waiver are also unclear at this time, but HEW officials indicated that the designation of an area or population group having a severe shortage of medical care might meet the waiver requirements.

You have indicated an interest in the possibility of the State withdrawing entirely from the Medicaid program, and the question of Medicaid support for State-provided services may therefore not be a major concern. However, the State currently receives over $22 million each year in federal Medicaid funds. It may, therefore, be desirable to retain these funds if a State medical care program could meet, or be exempted from, the necessary federal regulations without compromising the program. Please let us know if you would like a more concrete response to the Medicaid funding question. A written request to HEW would be required and their response could take two weeks or more, but we would be glad to pursue this issue if you would like.

Medicaid Issues

Although we were not asked to specifically address the Medicaid program in this memorandum, we obtained information on Medicaid during our research which may be of value to you in considering health care options. The greatest problem with the current Medicaid program in Alaska is that the claims processing system is inefficient, requires excessive paperwork, and results in long delays in provider reimbursement. It is the paperwork and the payment delays which have been the primary cause of Alaska physicians refusing to accept Medicaid patients. Attachments C and D provide a physician's perspective on the problems of the Medicaid system. In many cities, most notably Anchorage, the number of physicians seems to be adequate, but a Medicaid patient cannot see a doctor because the majority of physicians refuse to take Medicaid cases. It therefore appears that a more efficient and rapid claims processing system could do much to alleviate the difficulty of obtaining medical care for low-income Alaskans.

The current program of Medicaid dental services lends strong support to this premise. Medicaid claims for dental care do not go through the State system used for other medical services, but instead are handled by the Delta Dental Plan of Alaska, which acts as a fiscal intermediary between the providers and the State. The pertinent statistics regarding Medicaid participation by dentists were cited in the findings section, but the importance of Delta Dental in this discussion is that the vast majority of the state's dentists accept Medicaid patients. The two-week Medicaid reimbursement time which Delta Dental provides for dentists is the primary reason for the high degree of cooperation by Alaska dentists with the Medicaid program.

The obvious question, then, is if Delta Dental is so efficient, why doesn't the State use Delta or another fiscal intermediary to process all its Medicaid claims. There are a number of reasons why fiscal intermediaries do not represent an easy solution to the Medicaid and low-income health care problems.

The first is that Delta Dental does not appear eager, and may not have the capability to take on the processing of medical claims. Attachment D is a letter from the Pediatricians' Association to Representative Martin suggesting that the State contract with Delta Dental for payment of Medicaid claims for pediatric services. However, I spoke with Denise Knapp, Executive Director of Delta Dental, and she indicated that Delta has not agreed to process pediatric claims and is still only discussing the idea. Robert Ogden, Chief of Medical Assistance for H&SS, stated that while he has been very pleased with Delta's performance, he is not sure if Delta could handle the large volume of Medicaid claims for medical services, and knows of no other in-state firms who could.

A second possible problem with the expanded use of fiscal intermediaries is cost. Each claim processed by Delta Dental costs the State an average of more than $14, while the medical claims processed under the current system cost only about $1.45 each. However, Mr. Ogden was quick to point out that the current system does not meet federal requirements, and meeting these requirements is likely to increase the cost of processing claims whether a fiscal intermediary is used or not. In addition, Delta's cost is much higher than would be that of a fiscal intermediary handling all medical claims, because the fixed costs of the Delta claims processing system are spread over a relatively small number of claims (8,000 per year). A fiscal intermediary handling all Medicaid claims for medical services would process about 144,000 claims per year; cost per claim would therefore be much lower, perhaps in the $2.50 range, according to Mr. Ogden.

HEW has mandated that the Division of Public Assistance implement a new claims processing system by September, 1980. In an administrative review completed a year ago, HEW officials recommended that the Division contract with a fiscal intermediary for the processing of all Medicaid claims. (See Attachment E, Chapter 7, for more detail on this recommendation.) However, it is still uncertain whether this recommendation will be followed. The Division plans to solicit requests for proposals (RFP) for claims processing within the next six months. At least six to eight firms are expected to bid on the contract, but it appears that the decision to use a fiscal intermediary or to process Medicaid claims in-house will be more dependent on administrative decisions within H&SS than on the results of the RFP process.

We hope the information we have provided is useful to you. This memorandum is a brief treatment of a complex subject, so please let us know if you would like additional research, or if we may be of further assistance in any other way.

THIRD PARTY HEALTH COVERAGE IN ALASKA

Prepared by

LEGISLATIVE AFFAIRS AGENCY

Research Division

April 1978

IV. AN ANALYSIS OF THE EXTENT OF HEALTH CARE COVERAGE AND GAPS IN COVERAGE

The Covered Population

Nationally, 178 million people - more than 8 out of 10 persons in the civilian non-institutional population - had some form of private health insurance in 1975, according to the Health Insurance Institute. The same survey reported 250 thousand people in Alaska, (two thirds of the civilian population) had private coverage.

The major public programs, U.S. Public Health Service, Medicaid and Medicare, provide health coverage to an estimated 20% of Alaska's civilian population. It is not known to what extent public coverage duplicates private coverage state-wide. However, random sample surveys were conducted in 1974-75 in both Anchorage and Kodiak Island Borough with questions regarding health coverage. The Anchorage survey reported that 79.9% of the sample had third party health coverage of some sort, and 20.1% had none. In Kodiak Island Borough 92.6% of the respondents reported third party health coverage, while only 7.4% reported none. This high percentage of health coverage in Kodiak Island is largely due to the high proportions of Indian Health Service eligibles (over 40%) and military personnel and dependents (over 25%). Those 7.4% without coverage constituted over 20% of the non-Native non-military or military dependent population.

The 20.1% of the Anchorage sample without health coverage constituted over 25% of the non-Native non-military or military dependent population in Anchorage.

If we can assume that a similar percentage (20-25%) of the non-Native non-military population state-wide currently are without third party health coverage from any source, 56 to 71 thousand Alaskans totally lack third party health coverage.

The biggest hole in this coverage patchwork is moderate and low income people who are self-employed or marginally employed, or non-union employees of an employer who doesn't provide health benefits. These people are above the income eligibility standards for Medicaid or General Relief Medical, yet their cash income is not adequate to afford either the expense of private health insurance, nor the expense of many medical services on a fee-for-service basis. This group includes farmers, shop owners, small contractors, temporary and part-time employees, casual laborers, subsistence providers and the unemployed. It also includes a large number of non-union workers, particularly those working for small employers, such as child care workers, waitresses, clerks, clerical workers, delivery truck drivers, gas station attendants and construction workers in home building. And of course the dependents of these bread-winners normally lack coverage as well.

In Alaska there are many seasonally employed people as well who have health coverage only part of the year while they are employed, such as loggers and cannery workers. Most construction workers (outside of home building) are unionized and have "hour banks" for health benefits such that if they work enough hours over the summers their accrued health benefits will last through to the next season. However, when there is not enough work to go around, many people are not able to accumulate enough health coverage to last the winter.

Services Covered

Health plans vary widely in the services covered and the levels of coverage provided. The foregoing analysis distinguished between people who have any sort of third party health coverage, and those who have no coverage at all. We have not yet considered whether those with some coverage have coverage that is adequate to protect them from financial hardship. Some policies, for instance, are specialized and cover only hospital expenses, or only surgical expenses. Many policies do not cover particular services such as prescription drugs, office visits, or nursing care outside of a hospital.

In the Anchorage survey, while 20% of the respondents lacked hospital coverage, 24% of the respondents lacked surgical coverage, 46% lacked coverage for visits to the doctor's office, 60% lacked dental coverage, and 70% lacked mental health coverage.

Many policies have limits on coverage that are exhausted by severe illnesses, or require co-payments which can add up to substantial sums. Many policies limit their payments to "reasonable charges" as defined by the insurance company, regardless of the actual charges, and the consumer must pay the difference.

It is not difficult for a consumer even with some health insurance to incur heavy financial losses due to health care expenditures. The following statistics suggest that insurance companies in fact are not paying the bulk of health care expenses.

While the private health insurance industry claims to serve over 80% of the nation's civilian non-institutionalized population, in 1976 they paid only 26% of personal health care expenditures nationally.

Government programs paid another 40%, and consumers paid 32% directly. The remaining 1% of personal health care expenditures was paid by philanthropic organizations.[1]

HEALTH INSURANCE BILL TO BE HEARD ON TELECONFERENCE NETWORK

The House Health, Education and Social Services Committee, chaired by Rep. Thelma Buchholdt, will hold three teleconferenced hearings on HB 977, " An Act relating to the health of residents of the state".

The first hearing will be teleconferenced to all sites on Tuesday, April 8th at 1:30 p.m., Juneau time, and will include testimony from all interested persons.

The second hearing, also on the 8th, will be held at 7:00 p.m., Juneau time. The committee will be taking testimony from insurance carriers and will include all teleconferencing sites.

The third hearing will be teleconferenced to all sites on Thursday, April 10th at 7:00 p.m..

Persons interested in testifying or observing at these hearings should contact the local Legislative Information Office in the following communities: Anchorage, Bethel, Fairbanks, Dillingham, Kotzebue, Nome, Kodiak, Soldotna, Ketchikan and Sitka. Further information may be obtained from the Committee Chair (465-3797) or the Teleconference Coordinator (465-4980)

MEMO

To: Those interested in health care coverage
Re: Health care
Date: March 1980
From: Susan Johnson

Below is an outline of the legislation we discussed at the meeting held February 29, 1980 at the Federal Building, for you to review. The legislation is presently being drafted by Thelma Buchholdt's (hESS) Committee. The components are as follows:

1/ Mandatory Reinsurance: Several states have developed mandatory reinsurance pools to ensure health care coverage availability to high risk persons at reasonable rates. Many people are unable to purchase full health insurance coverage because existing health conditions make them a bad insurance risk. This component of the bill would mandate all health insurance carriers in each state to offer a health insurance package to high risk subscribers at a reasonable premium. Such coverage is reinsured by the carriers association, in which membership is mandatory, so the risk is pooled among all carriers in the state.

2/ Minimum Benefits Standards: The state would be given the authority to regulate the level of service covered by health insurance policies. Several states have already implemented this and the National Association of Insurance Commissioners (NAIC) had developed model state health insurance legislation for setting minimum health benefit standards. This would address, for example, persons who are excluded from coverage because of pre-existing conditions.

3/ Amend Medicaid Statutes: This would provide the Oregon option to use Medicaid funds to purchase health insurance; provide for the funding of interest payment penalties when the state is delinquent on its bills, and to add additional services to the Medicaid program, such as prescription drugs, dental care, etc.

4/ Medicaid Medically Needy: This program would extend state medical assistance to those persons whose income exceeds the income standards of current assistance programs, but who have incurred medical expenses which equal or exceed the difference between the person's monthly income and the income standard applicable under the current program. In other words, the state would provide medical assistance to persons who otherwise would not have been eligible because they make too much money. The purpose of the "medically-needy" program is to allow lower-middle income persons who can not afford to shoulder the full cost of medical care the opportunity to receive needed medical assistance. Under such a program, these individuals would "spend down" to the income limits, and the state would pick up the rest.

5/ Mandatory Employer Coverage: Hawaii requires every employer to provide health insurance. This would expand coverage to many non-union workers, especially those in low-paying service industries, who now lack coverage. Hawaii offers this to employees who work a minimum of 20 hours. Small employers may apply for state subsidation, if the cost of insurance exceeds certain criteria.

Finally, AkPIRG supports appropriations for expended direct services by the state and local government and non-profit providers. For example, two GYN's will be added to the Neighborhood Health Center in Anchorage. Any suggestions are welcomed concerning other areas that could use additional funding.

I will contact you again when the bill has a number. Feel free to call should you have any questions.

Again, thank you for attending the meeting.

Sincerely,

To: Billy Berrier, Director
Legal Services Division
Legislative Affiars Agency

From: Representative Thelma Buchholdt
Health, Education and Social Services Committee Chair

Subject: Request for bill drafting

Please have one of your staff prepare for introduction one bill which will include the following elements:

Medicaid Amendments. This bill would add the Medically Needy program and several optional services to the state's participation in the federal Medicaid program. The bill would also allow the use of medicaid funds for the purchase of private health insurance as provided in Oregon law (ORS 414.115). The following Medicaid options would be included: prescription drugs, adult dental care, dentures, adult prosthetic devices, physical therapy and related services, chiropractors' services, podiatrists' services and private duty nursing.

Mandatory Employer-sponsored Health Insurance. This bill would require employers in the state to subsidize group health insurance plans for their employees. The bill would be modeled after the Hawaii Prepaid Health Care Act.

Health Insurance Regulation. This bill would give the state authority to regulate the level of service covered by health insurance policies sold in the state. The bill would also mandate coverage of high-risk clients and pooling of risk among all carriers. The bill would be modeled after relevant portions of the Comprehensive Health Insurance Act in 1980 Suggested State Legislation, Vol. 39, by The Council of State Governments.

TABLE 2

Average Ranking of Selected Medicaid Options by Type of Public Assistance Client

Rank	Recipients of Adult Public Assistance	Recipients of Aid to Families with Dependent Children
1st	Prescribed Drugs	Prescribed Drugs
2nd	Adult Dental Services	Adult Dental Services
3rd	Dentures	Physical Therapy and Related Services
4th	Physical Therapy and Related Services	Dentures
5th	Hearing Aids [1]	Chiropractor's Services
6th	Prosthetic Devices	Hearing Aids [1]
7th	Chiropractor's Services	Prosthetic Devices
8th	Private Duty Nursing	Private Duty Nursing
9th	Podiatrist's Services	Podiatrist's Services
10th	Care for Patients 65 or Over in Tuberculosis Institutions	Care for Patients 65 or Over in Tuberculosis Institutions

[1] *Hearing aids, at the time the survey was conducted, were not included in the coverage program offered to all Medicaid clients. An interpretation of Medicaid law and regulation by federal officials allowed hearing aids to be covered as part of the treatment of speech, hearing, and language disorders option. This policy change was implemented by the Division of Public Assistance in November.*

The bill would be modeled after relevant portions of the Comprehensive Health Insurance Act in 1980 Suggested State Legislation, Vol. 39, by The Council of State Governments.

My assistant Jan Sorice will be in charge of this project and any further direction to the drafters will be provided by her. She may be reached at 465-3797.

This bill is to be introduced by the House Health, Education and Social Services Committee by request of Representative Thelma Buchholdt.

By federal statute, the maximum limit for income eligibility under Medicaid medically needy is 133 1/3% of the state AFDC standard for an equivalent family size (except that for a single person, the two-person family income standard is used). The following chart indicates what the Medicaid medically needy income limit would be for certain family sizes and types (where two income limits are listed, the difference is based on whether or not the adult-only household has rent, mortgage or other payments greater than $35 per month).

Household	AFDC	GRM	APA	MN (133 1/3%)
1 Person	$150	$235/ $300	$335/ $414	$466.55
2 Adults		$335/ $400	$502/ $608	$466.55
1 Adult, 1 Child	$350	$300		$466.55
1 Adult, 3 Children	$450	$400		$600

MEDICAID OPTIONAL SERVICES--INCLUDING THOSE NOT CURRENTLY COVERED BY THE ALASKA MEDICAID PROGRAM

The following is a list of all optional services under the Medicaid program. Optional services may be selected by the individual states for inclusion in their Medicaid program if a state decides to make those services available to all categories eligible for the basic Medicaid coverage. A brief description of each option is provided below followed by a comparison of optional services that are offered in Alaska, Idaho, Oregon and Washington, the four states comprising federal Region X. Those services covered in Alaska are indicated.

(1) Podiatrist services. Manipulation of the feet and treatment of corns, bunions, callouses, etc., by a licensed podiatrist.

(2) Optometric services. Covered under Alaska Medicaid.

(3) Chiropractic services. Treatment by a licensed chiropractor limited to manual manipulation of the spine.

(4) Other practitioner services. Naturopaths, homeopaths, herbalists, faith healers.

(5) Private duty nursing. Care by a registered nurse or licensed practical nurse under a physician's supervision in home, hospital or nursing facility when a person requires exceptional individual and continuous care.

(6) Clinic services. Under the Alaska Medicaid program this is currently limited to state-operated and state-funded community mental health clinics. This option could also include such other services as health care clinics, alcoholism treatment centers, ambulatory surgical centers, and rural health care clinics. Rural health clinics are now a mandatory service pursuant to Public Law 95-210.

(7) Physical therapy. Physician-prescribed services provided by a licensed or certified physical therapist (depending upon state licensing procedures).

(8) Occupational therapy. Physician-prescribed services provided by a licensed or certified occupational therapist (depending upon state licensing procedures).

(9) Services for speech, hearing, and language disorders. Included under the Alaska Medicaid program.

(10) Prescribed drugs. Covered by state-only General Relief Medical. Alaska is one of only two states without Medicaid coverage for this option.

(11) Dentures. Replacement of a full or partial set of teeth.

(12) Prosthetic devices. Physician-prescribed replacement, corrective or supportive devices that artificially replace a missing part of the body, to prevent deformity or malfunction, to support a weak or deformed portion of the body.

(13) Eyeglasses. Covered by Alaska Medicaid.

(14) Other diagnostic, screening, preventive and rehabilitative services. Identification of illness, injury or other health deviation; preventive and rehabilitative services to restore patient to functional level.

(15) Services to individuals over 65 years of age in institutions for tuberculosis. Facility providing services could be ICF, SNF or inpatient hospital.

(16) Services to individuals over 65 years of age in institutions for mental diseases. (a) Inpatient psychiatric care for persons over 65 is covered under the Alaska Medicaid program. (b) ICF and SNF care for persons over 65 with mental diseases is not covered in Alaska. Under this provision, it would be possible to provide nursing care for persons with mental disabilities who may not otherwise qualify for nursing care due to a lack of physical health problems requiring nursing home care.

(17) Intermediate care facilities (ICF). Covered under the Alaska Medicaid program.

(18) Inpatient psychiatric services for persons under 22 years of age. Covered by the Alaska Medicaid program.

(19) Transportation. Covered under the Alaska Medicaid program.

(20) Services by Christian Science nurses.

(21) Services by Christian Science Sanatoria.

(22) Skilled nursing facility care (SNF) for persons under 21 years of age. Covered by the Alaska Medicaid program.

(23) Emergency hospital services. Covered under the Alaska Medicaid program.

(24) Dental services. Adult dental services are not covered by Medicaid in Alaska.

(25) Personal care services. Physician-ordered services provided to a person in their home by a non-relative and supervised by a registered nurse.

(26) Intermediate care for the mentally retarded and persons with related conditions (ICF/MR). Covered under the Medicaid program in Alaska.

INSURANCE AND SERVICE CONTRACTS

414.115 Medical assistance by insurance or service contracts. In lieu of providing one or more of the medical and remedial care and services available under medical assistance by direct payments to providers thereof and in lieu of providing such medical and remedial care and services made available pursuant to ORS 414.065, the Adult and Family Services Division shall use available medical assistance funds to purchase and pay premiums on policies of insurance, or enter into and pay the expenses on health care service contracts, or medical or hospital service contracts that provide one or more of the medical and remedial care and services available under medical assistance for the benefit of the categorically needy or the medically needy, or both. The policy of insurance or the contract by its terms, or the insurer or contractor by written acknowledgment to the division must guarantee:

(1) To provide medical and remedial care and services of the type, to the extent and according to standards prescribed under ORS 414.065;

(2) To pay providers of medical and remedial care and services the amount due, based on the number of days of care and the fees, charges and costs established under ORS 414.065, except as to medical or hospital service contracts issued by a hospital association which employs a method of accounting or payment on other than a fee-for-service basis;

(3) To provide medical and remedial care and services under policies of insurance or contracts in compliance with all laws, rules and regulations applicable thereto; and

(4) To provide such statistical data, records and reports relating to the provision, administration and costs of providing medical and remedial care and services to the division as may be required by the division for its records, reports and audits.
[1967 c.502 §9; 1975 c.401 §1]

414.125 Rates on insurance or service contracts; requirements for insurer or contractor. (1) Any payment of available medical assistance funds for policies of insurance or service contracts shall be according to such uniform area-wide rates as the Adult and Family Services Division shall have established and which it may revise from time to time as may be necessary or practical, except that, in the case of a research and demonstra-

tion project entered into under ORS 411.135 special rates may be established.

(2) No premium or other periodic charge on any policy of insurance, health care service contract, or medical or hospital service contract shall be paid from available medical assistance funds unless the insurer or contractor issuing such policy or contract is by law authorized to transact business as an insurance company, health care service contractor or hospital association in this state.
[1967 c.502 §10; 1975 c.509 §6]

414.135 Contracts with direct providers of care and services. The Adult and Family Services Division may enter into nonexclusive contracts under which funds available for medical assistance may be administered and disbursed by the contractor to direct providers of medical and remedial care and services available under medical assistance in consideration of services rendered and supplies furnished by them in accordance with the provisions of this chapter. Payment shall be made according to the rules of the division pursuant to the number of days and the fees, charges and costs established under ORS 414.065. The contractor must guarantee the division by written acknowledgment:

(1) To make all payments under this chapter promptly but not later than 30 days after receipt of the proper evidence establishing the validity of the provider's claim.

(2) To provide such data, records and reports to the division as may be required by the division.
[1967 c.502 §11]

414.145 Implementation of ORS 414.115 to 414.135. The provisions of ORS 414.115, 414.125 or 414.135 shall be implemented [illegible] Department that such implementation will provide comparable benefits at equal or less cost than provision thereof by direct payments by the Adult and Family Services Division to the providers of medical assistance.
[1967 c.502 §11a; 1975 c.401 §3]

MEDICAL ADVISORY COMMITTEE

414.205 Medical advisory committee. (1) A medical advisory committee is established, consisting of not more than 15 members to be appointed by the Governor from among persons in the health professions, providers of medical and remedial care and services and the general public. In making his appointment, the Governor shall consult with appropriate professional and other interested organizations.

(2) Members shall serve at the pleasure of the Governor.

(3) Members of the advisory committee shall receive no compensation for their services, but subject to any applicable state law, shall be allowed actual and necessary travel expenses incurred in the performance of their duties from the Public Welfare Account.
[1967 c.502 §18]

414.210 [1957 c.692 §1; repealed by 1963 c.631 §2]

414.215 Duties of committee. The medical advisory committee shall advise the Adult and Family Services Division on:

(1) Health and medical care and services to be provided pursuant to this chapter.

(2) Matters referred to it for study by the division.
[1967 c.502 §19]

414.220 [1957 c.692 §2; repealed by 1963 c.631 §2]

414.225 Division to consult with and assist committee. (1) The Adult and Family Services Division shall consult with the medical advisory committee concerning the determinations required under ORS 414.065.

(2) The division shall provide secretarial services to the medical advisory committee.
[1967 c.502 §20]

414.230 [1957 c.692 §5; repealed by 1963 c.631 §2]

414.240 [1957 c.692 §3; repealed by 1963 c.631 §2]

414.250 [1957 c.692 §4; repealed by 1963 c.631 §2]

414.260 [1957 c.692 §6; repealed by 1963 c.631 §2]

414.270 [1957 c.692 §7(1); repealed by 1963 c.631 §2]

[illegible]

414.300 [1957 c.692 §5; repealed by 1963 c.631 §2]

MISCELLANEOUS

414.305 Payment of cost of medical care for institutionalized persons. (1) The Adult and Family Services Division is hereby authorized to pay the cost of care for patients within Mental Health Division institutions under the medical assistance program established by this chapter.

(2) All moneys received by the Mental Health Division from the Adult and Family

ALASKA PUBLIC INTEREST RESEARCH GROUP
Post Office Box 1093/Anchorage, Alaska 99510/(907) 278-3661

March 1980 NEWSLETTER Vol. 6, No. 2

New Date for Annual Meeting

The annual meeting will be held on *April 1, 1980* at the Pioneer Schoolhouse at 3rd and Eagle. The time of the meeting is set for 7:00 p.m. The primary business of the meeting will be the election of new members to the Board of Directors. Ballots and numbered envelopes are included in this newsletter; each number coincides with a member's name. Please return your ballot in the designated envelope so we can ensure that each member votes only once. Ballots will be counted the night of the meeting. If you can't attend the meeting to voice your concerns about the direction taken by AkPIRG during the past year, *mail your ballot* anyway. The election of an informed and dynamic Board of Directors is crucial to the well-being of AkPIRG.

Mike Ireton: Volunteer of the Year

Mike Ireton has been selected as Outstanding Volunteer for the year 1979 and will be honored at the University Affiliates Volunteer of the Year Award Presentation on March 21. Mike has put in an incredible number of hours working for AkPIRG and the entire staff and Board of Directors thank him warmly.

Thanks also to *all* AkPIRG volunteers for the generous donation of their time and energies. Volunteers are always needed and appreciated; if anyone is interested in participating as a volunteer, please call 278-3661.

The Alaska Public Interest Research Group newsletter is available to any AkPIRG member. The subscription price is included in the membership dues: $10 for individuals, $25 for institutions or businesses, and $5 for persons on limited incomes. The Alaska Public Interest Research Group is a non-profit citizens group, tax exempt under 501(c)(3) of the Internal Revenue Code.

AkPIRG offices are located at 513 West Seventh Avenue, Anchorage, Alaska. The mailing address is P.O. Box 1093, Anchorage, AK 99510. The phone number is 278-3661.

Comments on the newsletter, or any other aspect of AkPIRG activities are appreciated.

Editor: Laurie H. Otto.

Oil Rig Discrimination

A legislative investigation of charges of discrimination against women in oil rig hiring practices was initiated March 5 by Speaker of the House Terry Gardiner. The need for an investigation was brought to light by OIL WATCH, a recently formed citizens-group which monitors all aspects of oil development in Alaska. The investigation will be conducted by the Commerce Committee, which is chaired by Fred Brown, D-Fairbanks.

In mid-November, Jim Bounds, member of Hotel, Restaurant, and Construction Camp Employees Union Local 878, came to OIL WATCH and told them that he had evidence that Amoco Production Company and Union Oil were responsible for discrimination against women. Bounds said that women in the culinary workers' union who had faithfully paid their union dues were waiting in the hiring halls, but not being dispatched for jobs for which they were qualified. Many of these women were on the union's "A" list, the top list of those waiting for jobs, while men lower on the lists or even outside the union were being dispatched instead, sometimes secretly.

The union is under contract to Universal Services Incorporated International (USI) to supply the labor promised by USI in its own contract with Amoco and Union Oil to do culinary work on their platforms in Cook Inlet. When Bounds asked officials in his union why no women were being dispatched, he was told that the contractor, USI, had warned the union not to send women out on dispatch on penalty of losing the USI contract. USI would apparently go with non-union labor if it had to, just to avoid sending women out to the platforms. The union officials explained that they had been told by USI people that a similar threat was in turn coming down on USI from Amoco and Union Oil. Apparently, the oil companies had told USI not to send women out to their platforms, or else USI would lose *its* contract with the companies. So, to hold onto its contract with Amoco and Union Oil, USI had decided to comply with these companies' requests not to send women out to the platforms in filling culinary jobs.

Mr. Bounds' evidence was primarily a series of taped telephone conversations between himself and officers of Amoco, Union Oil, and the field supervisor of their catering subcontractor, USI. An excerpt from the transcript of one of the tapes is presented below. The excerpt is from a conversation between Jim Bounds and Bob Gurnand, who is a field supervisor in the Kenai area for USI.

Jim Bounds: Here's what it boils down to: in other words, the oil companies come to the catering companies and say, "We don't want no women out there on them jobs," right?

Bob Gurnand: That's—well, more or less.

Jim Bounds: Then the catering companies go to the union and the catering companies tell the unions that, "We absolutely don't want no women out there on them jobs, and if you want

(continued on page 4)

Health Care Survey: Doctors and Medicaid

A survey of 113 Anchorage doctors was conducted in order to determine the percentage of Anchorage physicians presently accepting Medicaid recipients as patients. The surveyors, posing as prospective patients, called each physician's office in an attempt to schedule an appointment. *After* it had been determined if the physician had any openings available, the method of payment was discussed. The conversation ws specifically structured this way, in order to provide an indication of the extent to which the method of payment altered accessibility to health care.

The results of the survey are delineated in the accompanying chart. The percentage break-down is as follows: Pediatrics 40% of the doctors will accept Medicaid coupons, 60% will not; OB/GYN 6% will accept, 94% will not; Family Practice 27% will accept, 73% will not; internal 52% will accept, 48% will not; cardiology 100% will not accept; radiology 100% will accept. The chart clarifies the results, for example, cardiologists are not accepting Medicaid coupons, but they will accept as little as $1.00 per month as payment.

The survey clearly shows the existence of a problem for Medicaid recipients seeking medical care. The brunt of the problem falls on women and children, not only because fewer pediatricians, obstetricians and gynecologists accept Medicaid patients, but also because *most* Medicaid patients *are* women and children. For example, in November 1979, 8,418 adults were eligible for Medicaid in Alaska; 6,193 of the total were women. The total number of Medicaid eligible children was 9,998.

There are *no* existing public facilities in Anchorage which provide prenatal care. There are *no* OB/GYN's in Anchorage who accept new Medicaid recipients needing gynecological care as patients; only one Anchorage OB/GYN will accept new Medicaid patients for obstetrical care. It has been suggested that those women in need of, and without access to, OB and/or GYN care elicit the assistance of a family practitioner. Presently 73% of the family practitioners will not accept coupons as the method of payment.

It has further been suggested that poor people use the emergency room as a recourse to health care. This is a non-solution; the function of an emergency room is crisis-oriented, it is not designed to provide on-going care. At Providence Hospital, business personnel estimate that up to 30% of the patients using the emergency room are Medicaid recipients. Reportedly, the number of recipients using the emergency room has incrementally increased as the number of doctors willing to accept coupons has decreased.

Physicians who have elected to exclude patients from health care base their refusal on claims that they receive unsatisfactory payment for their services from Medicaid and that the reimbursements they do receive are untimely. It is also felt that the state requires an excessive amount of paperwork before reimbursements are approved. Doctors further claim that they owe no ethical obligation to the poor.

Although the state has encountered numerous difficulties in making timely Medicaid payments, the recent implementation of a new computer system has succeeded in processing the vast majority of all pending claims.

Poor people, still waiting in long lines at the welfare office to procure Medicaid coupons, continue to lack accessible health care. As one recipient complained to a staff person at the welfare office, coupons in hand, "What am I supposed to do with these, if no doctors in town will take them?"

Availability of Health Care to Medicaid Recipients: Jan./Feb. 1980 Telephone Survey

I Will accept all forms of payment including medicaid	II Will *not* accept new medicaid patients/info on established caseload n/a	III Will *not* accept *new* medicaid patients; but carries an established medicaid caseload	IV Not accepting any new patients

Oil Rig *(cont. from page 1)*

the contract, you don't send no women out there," right?

Bob Gurnand: Well, that's just what the Union Oil Company man told me. He said if I send a woman out there, he's going to send her right back to us, and we lose the contract. And the union up there knows too, goddamnit.

After reviewing Jim Bounds' tapes, members of OIL WATCH interviewed and took sworn affidavits from other members of Local 878. One individual, Ruth Callan, gave particularly compelling testimony. Ms. Callan has lived in Alaska for thirty-three years and has been an officer of the Hotel, Restaurant and Construction Camp Employees Union, Local 878, since 1955. She served as a member of Local 878's Elective Board for ten years, including one term as President. For the past twenty years she has been a delegate to the Central Labor Council. She currently serves as Vice-President of the State Labor Council.

Ms. Callan has served as both head business agent and Secretary-Treasurer of Local 878. She stated in a sworn affidavit:

> While I was Secretary-Treasurer of Local #878, Bob Ryan, the head of USI in Alaska, told me that USI would lose its contract with the oil companies if women were sent out to the rigs. He said that one reason for this was the lack of "facilities" for women, meaning the lack of separate bunking and bathroom facilities.

It is interesting to note that both Bob Gurnand and Ruth Callan, in her affidavit, mentioned the dispatch of Dorothy Jackson, and the oil company's subsequent refusal to accept a woman dispatch on its rig. Ruth Callan stated:

> In May of 1979, USI called the Local for a bull cook which they needed by 5:00 p.m. I was told that if a woman answered the call that I should tell her that she would have to bunk and sleep with the men and use their same latrine facilities. This was intended to discourage a woman from accepting the dispatch. They didn't figure on Dorothy Jackson though. She said she didn't care, she was broke. I notified USI. Bob Ryan told me not to dispatch her because she was a woman. I replied that I was not going to refuse her a dispatch because she was a female. Bob Ryan told me that he would have to find some way to keep her off the rig. When Dorothy Jackson got to USI she was told that the dispatch was cancelled because the USI employee who had been scheduled to take R&R had changed his mind. Bob Ryan called me and said that I had cost some other union member his job because I had dispatched a woman. He told me that if the union dispatched women, the oil companies would end their USI contract and hire some non-union outfit that hired only men.

Bob Gurnand's version goes as follows:

> **Gurnand:** Well, I'll tell you here a while back I got into a situation with Union Oil Company, and I called Anchorage for a bull cook. So they put it on the open call in the union hall, and a woman took it. So they called me back and told me that a woman had taken the dispatch and I said "...Don't send her down there," I said, "...because they won't let her out there." So this was explained to the gal that took the dispatch, that there wasn't separate facilities and all this stuff for her, you know, and she was going to—she insisted on taking the dispatch and coming. So the Anchorage office called me back and they wanted me to call out there and explain the situation to the Union Oil Company people. I called out there, and you know what they told me?
>
> **Bounds:** No
>
> **Gurnand:** He said, "You send a woman out there, you lose the catering contract, and we'll go to a non-union contractor."

Union Oil Company dismissed Bounds' evidence by saying the whole thing was ridiculous. Union did confirm, however, that only one of the fourteen platforms in Cook Inlet had any women on it working in culinary positions. They asserted that women didn't want jobs on the platforms, since the conditions were "...awfully rough on a gal, and most gals prefer to work elsewhere."

Amoco has not responded to Bounds' charges; however, they also confirmed that only one of fourteen platforms has a woman currently working on it in a culinary position. Amoco asserted that to build separate facilities for women would be to discrimate against men.

The Alaska State Commission on Human Rights was asked to investigate this matter. The Director of the Commission, Neil Thomas, declined to initiate an investigation. Although Mr. Thomas acknowledes that this matter comes under the jurisdiction of the Commission, he has advised OIL WATCH that the Commission's present level of funding and its current caseload prevent him from investigating a matter which, under more favorable conditions, he would undertake.

The National Labor Relations Board was also asked to investigate, but the Board has the authorization to investigate only union matters—not oil companies or their sub-contractors.

The legislative investigation is expected to bring forward witnesses and victims of discrimination who have until now been unsure of where to go. OIL WATCH is continuing its independent investigation and will be aiding the committee in its legislative inquest.

Alaska Legislative Information

The following teleconferences have been scheduled to allow constituents the chance to discuss the issues with their legislators. For more information contact your local Legislative Affairs office. The phone number in Anchorage is 278-3668.

March 10: Anderson, Hohman at 7:00 p.m., Dillingham, 842-5319.

March 11: Interior Delegation at 7:00 p.m., Fairbanks 452-4448.

March 12: District 12 at 7:00 p.m., 1024 6th St. Anchorage.

March 13: District 10 at 7:00 p.m., 1024 6th St. Anchorage.

March 17: Hohman at 2:30 p.m., Bethel, 543-3541.

March 18: Interior Delegation at 7:00 p.m., Fairbanks, 452-4448.

March 19: Carney at 6:00 p.m., Mat-Su Office, 376-3704. Mulcahey, Zharoff at 7:00 p.m., Kodiak, 486-4881.

March 24: District 13 at 7:00 p.m., Kenai, 264-9364.

March 25: Interior Delegation at 7:00 p.m., Fairbanks, 452-4448. District 8 at 8:00 p.m., Mt. View Library.

March 26: District 7 at 5:00 p.m., 1024 6th St. Anchorage. Munson at 7:30 p.m., 1024 6th St., Anchorage.

March 27: District 8 at 7:00 p.m., Eagle River Library.

Individual memberships play an important role in maintaining the vitality of AkPIRG. Membership renewals allow AkPIRG to continue its effective and responsive representation of the interests of Alaska's citizens. During this coming month AkPIRG will attempt to contact those persons whose memberships have lapsed. Please renew! For all members who have moved, please let us know your current address, so we can keep you informed of AkPIRG's ongoing activities.

Thursday March 20, 1980

TO: Reps. Buchholdt, McKinnon, and Parker

FROM: Sharman Haley
Alaska Public Interest Research Group

The proposed health legislation which is being prepared for introduction next week is scheduled for hearing in the House Health, Education and Social Services Committee the first week of April. A major portion of this bill is based on the Minnesota Comprehensive Health Insurance Act of 1976. In this act Minnesota pioneered the creation of a mandatory insurance carriers association to underwrite coverage for high risk "uninsurable" clients, as well as state regulation of minimum standards for health insurance policies. You may wish to bring someone from the State of Minnesota to testify on the proposed Alaska legislation from the perspective of the experience in Minnesota.

In the course of my research on the proposed legislation I have spoken at length with John Igrassia, Supervisor of the Life and Health Section of the Division of Insurance in Minnesota, and would recommend him as a good source of expert testimony on this subject. He has worked in his present capacity since the inception of the Minnesota legislation and is quite familiar with all its provisions, its administrative implementation, it's political fortune, and the legal challenges to it. Mr. Igrassia is proud of Minnesota's innovation in the area of health insurance and has testified in at least two other states who are considering similar legislation. He indicated that he would probably be able to come to Alaska in the time frame we are contemplating.

Travel and per diem expenses to bring Mr. Igrassia to Juneau would amount to less than $800. If you would like to extend an invitation to him to come, he may be reached at (612) 296-6929 in St Paul, Minnesota. I do not have a mailing address for him.

Doctors vs. Medicaid

Thousands Caught In Crossfire

By Carol Perkins

©Copyright 1980, The Seattle Post-Intelligencer

Significant numbers of doctors, extremely unhappy with the state Medicaid program, are refusing to treat welfare patients, doctors told The Post-Intelligencer.

Some experts fear that a monumental health-care crisis is imminent because thousands of welfare patients are caught in a crossfire between doctors and the state Department of Social and Health Services over what are reasonable fees and necessary services.

Medicaid is the $350,000 joint federal and state health care program for the poor. Administered by the state, it serves 260,000 persons.

One such patient is Lenore Erdmann, who has a jaw and gum disease that is so excruciating that she goes for days without eating — sipping only a mixture of vinegar and honey to numb the pain.

A $4,000 operation could relieve the 55 - year - old Holly Park woman's agony. But her only income is a $253 monthly public assistance check.

But for nine years, the state has refused to pay for her requested oral surgery. And doctors are not lining up to perform the operation for free.

At the heart of the Medicaid issue is economics and professional dignity, doctors say. Under a new fee schedule, many are receiving less for treating welfare patients than they did last year.

The boycott of patients is scattered — but is growing in momentum. Many community health clinics report they are beginning to feel the crunch as more Medicaid patients are turned down by private physicians.

Some doctors are treating Medic-

U.S. Looking At

Rights Restored To Kim

By Henry Scott Stokes
The New York Times

SEOUL, South Korea — The government's recent action in restoring civil rights to Kim Dae-jung transformed politics here at a stroke.

The action foreshadows a busy summer and autumn as Kim re-engages himself in a bid for the presidency, taking up where he left off in 1971. That year he took 45 percent of the poll in a contest with President Park Chung-hee.

Inevitably, people ask how the decision to let Kim re- enter the political arena was made when the army, the effective controller of South Korea under martial law, was known to detest the aspiring democrat, accusing him of supposed Marxist associations 30 years ago.

The decision was reached, according to reliable informants, through a long process of consultation led by Lt. Gen. Chon Doo-hwan, head of the Army Security Command, an army unit in Seoul, who along with a group of younger officers around him effectively controls the country.

On Dec. 12 these young officers displaced an older group led by the martial law commander, Chung Seung-hwa, in a midnight raid directed by Chon, who seized his commander and several other top generals and forced nearly 40 senior officers to step down. Chung was stripped of his four stars and has been convicted on charges of aiding Park's assassin, Kim Jae-kyu, former director of the Korean Central Intelligence Agency.

The supremacy of the 49-year-old Chon is therefore clear, and yet there are limits to his authority.

For instance, the economy, which was in dire trouble for a time after Chon's midnight action is run primarily by Deputy Prime Minister Lee Hahn-been. Lee visited the United States in February in an attempt to rebuild overseas bankers' trust in South Korea and its extraordinary economy, which since the early 1960's has been the most rapidly growing of its size in the world.

Above Lee, who is head of the central unit in the bureaucracy, the Economic Planning Board, is Prime Minister Shin Hyon-hwak,

Thousands of Patients Caught in Crossfire

From Page A-1

aid patients for emergencies only, while others are taking no new patients. Other doctors continue to treat Medicaid patients, but don't do the paperwork in hopes of putting economic pressure on the state, which receives matching funds from the federal government for the program.

"Everyone is a loser," says Dr. W. Maurice Lawson, Washington State Medical Association president. Because the state refuses to pay customary fees, the losses have to be absorbed by physicians, private pay patients and insurance companies.

The state medical association's judicial committee ruled that the boycott is not unethical unless doctors refuse to serve an entire class of patients.

However, many doctors feel they have a right to restrict the amount of charity work they do, and consider their Medicaid losses as charity.

Doctors are dissatisfied with Medicaid for many reasons:

- They contend fee schedules are grossly below customary fees, ranging from only 35 to 70 percent of their normal charges.
- Doctors maintain that Medicaid limits on types of service, prevent them from giving welfare patients adequate care. They note that preventive measures aren't usually covered.
- Doctors are angered by bureaucratic red tape. Washington Anesthesiologists' Association says that 14 percent of their patients are on Medicaid, but account for 40 percent of their office paperwork. Medical office managers report that it sometimes takes from two months to two years to be reimbursed for Medicaid claims.
- Doctors resent what they call "harrassment" by the state. They are angered because DSHS demands prior authorization for many medical procedures, and because the state audits their medical records, which they maintain violates their patients' rights to privacy.

Dr. Ted Haley, who is a Tacoma representative, says that a widespread Medicaid boycott by doctors next spring is a distinct possibility.

"We'll talk to DSHS, the legislature, the governor, but if we don't get relief, a boycott of the system — not the patient — may be the only alternative."

However, Sen. William "Big Daddy Day," senate social and health srvices chairman, who also is a Spokane chiropractor, asserts that doctors shold bite the bullet. "Hell, they've beenrecipients of state aid when they were in medical school, they can pay it back now by taking more charity cases."

This kind of response is what makes many doctors squeamish about stomping their feet too loudly in Olympia.

"Politically, doctors are the least able to defend themselves, " says Dr. Peter West, a Seattle family practioner. "They aren't seen as a group that is suffering a lot.

"The public is going to be quick to say, 'Those unfeeling bastards don't care about the poor.'"

"But doctors can't tell their secretaries and suppliers to accept 70 percent of usual wages and costs, but that is exactly what the state is doing to us," West says.

Entire clinics are refusing to accept Medicaid patients, except in emergency situations.

"It costs more for us to do the Medicaid paperwork than we get back from the state," says Roberto Robles, Swedish Hospital anesthesiologist.

All 17 of the anesthesiologists at Swedish Hospital are boycotting Medicaid, except in emergency cases, Robles says.

Bruce Ferguson, DSHS Medicaid director, acknowledges there are inequities in parts of the fee schedule and that the doctors have good reason to be upset. "We're working on the problem, but we've only got so much money, and as it is it looks like we're going to be overspent by $20 to $30 million dollars this bieninium."

He maintains that the extensive paperwork and audits "are necessary because we are spending public money."

Both physicians and patients are scrutinized for fraud violations. Last year ony only seven health care specialists were convicted of violations.

Jim Benz, regional federal Medicaid director, says Washington state does "a good job" policing the program, and says that "to my knowledge there are none of the Medicaid mills or kickbacks that are rampant in some areas of the country."

Dr. Fred Quarnstrom, who says he was one of the largest Medicaid dental providers in the state in 1978, no longer takes new welfare patients.

The Beacon Hill dentist says that he could no longer afford to keep up with the losses he was encountering. People think doctors get rich on Medicaid — I guess if you hired dozens of assistants and did hundreds of dentures a day you could make a living at it."

Dr. Larry Iversen, a Bremerton orthopedic surgeon, says, "If a doctor has a large welfare practice, he is scrutitinized and hassled by the state. If he doesn't take any Medicaid patients, he's accused of not being a humanitarian."

Elise Chayet of Evergreen Legal Services, reports a considerable increase in Medicaid clients who can't find doctors or are appealing state's refusal to put them on Medicaid or pay for certain medical expenses.

Community health care clinics are seeing an increase in Medicaid patients unable to get help from private doctors, and the increase is putting a strain on clinic budgets.

Caroline MacColl, King County Visiting Nurse Service director, says the agency stopped accepting new Medicaid patients for a two - month period in 1978. Even though the state finally raised the service's reimbursemnts, the agency will still lose $30,000 a year because of the "Medicaid gap," she says. Social workers are upset because patients are caught in the middle of the battle.

"It's an inhumane system," says Maria Crocker of Country Doctor clinic. "It's terrible when a sick person has to go through the yellow pages looking for a doctor and getting turned down time after time."

State Sen. James McDermott, a Seattle psychiatrist, says, "There is no final solution. All that can be done is to set a health care system in motion and keep adjusting it until it is humane and equitable."

DSHS chief Ferguson agrees, emphasizing that the issue is "cosmic in proportion."

But while health care experts hashes out the issue, patients like Lenore Erdmann continue to suffer

Erdmann, who has applied to Medicaid four times in the past nine years for oral surgery, says, "I don't understand why I have to wait so long when I'm in so much pain. I just keep praying, they'll take me this time."

Juneau, Alaska 99811

March 18, 1980

Donald D.H. Ching
Deputy Director
Department of Regulatory Agencies
P.O. Box 541
Honolulu, Hawaii 96809

Dear Mr. Ching:

The Alaska House of Representatives is currently considering legislation similar to Hawaii's "Prepaid Health Care Act." As you are an acknowledged expert on this legislation, your testimony would provide needed insight into the benefits of mandatory employment related health coverage.

I would therefore like to invite you to Alaska on March 31 and April 1 to testify on this bill. The legislation is presently being drafted, we will forward you a copy of the bill as soon as it is available. Please contact Jan Sorice of my office at 907-465-3777 if you need further information.

Sincerely,

Thelma

Thelma Buchholdt
State Representative
District 9 (Spenard);
Chair, House HESS Com[illegible]

Third-Party Health Coverage:

A third-party payer includes any organization, public or private, that pays or insures health or medical expenses on behalf of beneficiaries or recipients (e.g. Blue Cross and Shield, commercial insurance companies, Medicare and Medicaid). The individual generally pays a premium for such coverage in all private and some public programs. The organization then pays bills on his behalf; such payments are called third party payments and are distinguished by the separation between the individual receiving the service (the first party), the individual or institution providing it (the second party) and the organization paying for it (the third party).

It is difficult to identify the extent of third party coverage for Alaskans; to identify those that may not be protected by any program or those that may not have coverage adequate to fulfill their needs. Perhaps the most appropriate method of identifying those Alaskans without coverage or without adequate coverage are: 1) through a survey of individuals regarding health coverage, and/or 2) from a search of hospital and other health care billings that were paid "out of pocket" by the individual.

A random survey prepared in 1974/75 by Comprehensive Health Planning of Anchorage reported that 79.9% of the sample had third party coverage of some sort, and 20.1% had no such coverage. The same survey conducted through the Regional Medical Program among residents of the Kodiak Island Borough resulted in 92.6% of the respondents reporting that they had third party coverage, while 7.4% had none. These figures change significantly when applied to the non-Native, non-military population alone. In this perspective, over 25% of the Anchorage sample and over 20% of the Kodiak Island non-Native, non-military sample responded as having no health coverage. If these percentages (20%-25%) can be applied statewide, it would result in an estimate of 56,000 to 71,000 Alaskans lacking any third party health coverage.

A detailed search of hospital bills and other major medical bills that were paid "out of pocket" by the individual may result in significant information regarding not only those without coverage but also those finding that their coverage was not adequate to fulfill their needs. A general indication of the number of discharges from hospitals that result in payment by the individual can be obtained by information collected in the annual hospital survey. The percent of hospital bills paid by the individual varied considerably from one hospital to another. The Alaska Hospital and South Peninsula Hospital reported the highest percentages; 26% of the discharges making "out of pocket" payments. Further screening of this type of information is necessary.

**Includes all sources of payment except Medicare and Medicaid.

***Includes Workmen's Comp., CHAMPUS, Other Commercial Ins., Prepaid Group Health Plan, Medical Foundation and Other.

*Workmen's Compensation and Other.

**Reporting period is as follows: Bartlett Memorial: FY 1978; Kodiak Island: May 15 - Dec. 31, 1978; PHS-ANH Bethel, Barrow, and Tanana: FY 1977.

***Providence Hospital includes both outpatient and inpatient data.

Source: Office of Information Systems, Alaska Dept. of Health & Social Services, 1979 Annual Hospital Questionnaire.
AANHS, IHS, U.S. DHEW, Leading Health Problems of the Alaska Natives, FY 1977.

If the estimates of Alaskans protected by each type of third party coverage or non-fee services are added together, the total comes to 458,305 or more than the current estimate of the resident population (411,211 in 1977). This highlights the fact that there is considerable double coverage within the state such as individuals and their dependents covered by Blue Cross who are also eligible for the CHAMPUS program, Alaska Natives eligible for services by Alaska Area Native Health Services who are also covered by private health insurance, and families with more than one member subscribing to coverage that protects all dependents.

This is certainly NOT to say that all Alaskans are protected by some type of health coverage. Unfortunately, information regarding the number of persons covered by each program will not produce an estimate of who is without coverage. To accomplish this it would be necessary to identify all those with more than one type of coverage (both subscribers/enrollees and dependents).

ESTIMATED ALASKAN POPULATION
PROTECTED BY SPECIFIC HEALTH COVERAGE PROGRAMS

Private Health Insurance & Blue Cross	263,000
Teamster Employee Welfare Trust/Alaska Health Plan	25,200
Alaska Area Indian Health Services	
Alaska Natives	65,857
CHAMPUS & USHBP	
Active Military	24,984
Military Dependents & Retirees	55,000
Medicare Enrollees	9,818
Medicaid Participants (Not all eligibles)	11,815
General Relief Medical Program Participants	2,631
Catastrophic Relief Health Insurance Program	*
Veterans Administration	**

*Catastrophic Health Insurance Program is available to all Alaskans meeting criteria identified later in this chapter.

**The V.A. pays for health care that is related to prior military service.

Private Health Insurance: The major source of third party coverage is through private health insurance and the Blue Cross Plan. Although Blue Cross is considered a hospital/medical service corporation rather than a health insurance company, it is included in these discussions and in the data from the National Health Insurance Institute.

There is considerable variation in the services covered by different types of health insurance policies. Types of coverage include hospital expense, surgical expense, regular medical expense and major medical expense.

The National Health Insurance Institute estimates that 263,000 Alaskans under 65 years of age were covered by some type of health insurance as of December 31, 1976. The number by type of coverage is indicated below.

Figure V-32

PRIVATE HEALTH INSURANCE AND BLUE CROSS

NUMBER OF PERSONS IN ALASKA UNDER AGE 65 PROTECTED BY HOSPITAL SURGICAL, REGULAR MEDICAL AND MAJOR MEDICAL EXPENSE COVERAGE

December 31, 1976

Hospital Expense	263,000
Surgical Expense	246,000
Regular Medical Expense	248,000
Major Medical Expense	146,000

Note: The data refer to the net total of people protected, i.e. duplication among persons protected by more than one kind of insuring organization or more than one insurance company policy providing the same type of coverage has been eliminated. The estimated distribution by states reflects coverage by residence rather than employment. "Major Medical Expense" data refer to people covered by insurance companies only.

Sources: Health Insurance Association of America, Blue Cross Association, National Association of Blue Shield Plans, and the U.S. Department of Health, Education and Welfare.

The total dollar figure in premiums written for Alaskans was over $84 million during 1977. The amount of premiums written compared to losses incurred are summarized below. The total dollar figures of direct premiums written during 1977 by the twenty leading vendors in Alaska are identified in the following Figure V-34. These figures are accessed through the individual insurance companies' annual reports and aggregated by the Division of Insurance.

Medicare: Medicare is a health insurance program administered by the federal government for the aged (Title 18 of the Social Security Act of 1965). Medicare coverage was extended in 1974 to also include disabled persons and persons with chronic kidney disease. Part A, Medicare coverage provides insurance for hospital care, post-hospital extended care and home health benefits. Part B, available on a voluntary basis with the payment of monthly premiums, provides medical insurance that covers not only care by physicians but also hospital outpatient services, physical therapy, diagnostic x-rays, ambulance services, etc.

By 1972, more than 95% of the U.S. population aged 65 and older was covered by Part A of Medicare. However, because of Medicare's deductibles and co-insurance provisions, and because of gaps in Medicare coverage, more than half of the Americans over 65 are buying private insurance to supplement Medicare. Medicare paid less than 35% of the total health bill to those over 65 during 1975.

Medicare expenditures for Alaska totaled over $7 million in 1976. Total Medicare expenditures rose by 54.9% between 1974 and 1976 for Alaska compared to 46.5% nationally. The Hospital Insurance Component (Part A) rose by 54.7% in Alaska and 45.1% nationally. The Supplementary Medical Insurance component (Part B) rose by a full 55.3% for Alaska compared to 50.1% nationally. During 1976, 9,818 Alaskans were enrolled in the Medicare program; including 8,653 persons age 65 and over, 1,165 disability beneficiaries, and 31 individuals with chronic kidney disease.

Medicaid and General Relief Medical: Persons eligible for the cash assistance payments (public assistance) under the categorical assistance programs (Old Age Assistance, Aid to the Blind, Aid to the Disabled, and Aid to Families with Dependent Children) are eligible for Medicaid coverage of health care costs. Additional eligibility criteria for Medicaid exists for persons in nursing facilities and children in foster care or juvenile care situations. Medicaid is a state administered medical assistance program funded by both federal and state sources.

General Relief Medical coverage is available for persons having no prior medical care resources and who meet financial eligibility requirements for the assistance programs listed above but do not meet other qualifications for Medicaid coverage (under 65, both parents in the home are physically able to work, not blind or disabled under federal definition). General Relief Medical (GRM) provides coverage for some medical services and supplies not covered under Medicaid such as prescription drugs, prosthetic devices and medical equipment. GRM is administered by the state and totally state funded.

During fiscal year 1977, 11,815 persons received Medicaid services in Alaska and 2,631 received services under the General Relief Medical program. The total funds expended and the services covered are identified in Figures V-36, V-37 and V-38.

Medicaid expenditures have grown tremendously as a result of population growth, inflation, increased availability of services, rising cost of services and increased utilization of federal revenues for medical programs. The following figures show that Medicaid expenditures have grown by over 300% between 1973 and 1977.

Figure V-36

FISCAL YEAR	MEDICAID EXPENDITURES	GR MED EXPENDITURES	ADMINISTRATION AND SUPPORT
1973	$ 4,447,219	$ 3,675,277	$ 481,890
1974	7,876,759	2,607,112	631,129
1975	9,309,702	2,358,080	722,778
1976	14,328,201	2,881,213	1,085,086

Catastrophic Illness Coverage: The State of Alaska initiated the Catastrophic Illness Program in July 1976 to assist individuals that have suffered an illness that results in high medical expenses. The program applies to medical bills related to catastrophic illnesses of more than $1,000 in a period not to exceed 12 months after all sources of third party payment has been exhausted. An applicant must be a resident of the state of Alaska at the time of the application and must have been a resident at the time of the catastrophic illness.

The Catastrophic Illness Committee, which administers the Program, determines the eligibility of applications and the amount of medical assistance to be awarded. The committee applies a formula for determining the amount of payment based upon family income and assets, and the amount of medical expenses incurred. The total budget for the Catastrophic Illness Program for FY 1979 is $514,000. The number of applications for catastrophic illness coverage which can be approved is therefore restricted by the appropriate budget. The program granted financial aid to over 80 persons during FY 78 and the number of applicants is increasing steadily.

Violent Crime Compensation: "Alaska Statute 18.67, establishing a Violent Crimes Compensation Board, was adopted by the State Legislature in 1972. Its purpose was to alleviate the financial hardships caused by crime related medical expenses or loss of income sustained by innocent victims of violent crimes in Alaska. Additionally, it provides for the payment of pecuniary loss to dependents of deceased victims to mitigate the loss of a loved one." The maximum award allowable per victim per incident is $25,000; except in the case of the death of a victim who has numerous eligible dependents, for which the maximum allowable is $40,000. The growth in the awareness of Violent Crimes Compensation has resulted in an increase in the number of applications received. The following chart documents the applications received and awards granted since 1973.

Figure V-39

APPLICATIONS AND AWARDS

	FY73	FY74	FY75	FY76	FY77	FY78
Applications Received	15	50	71	68	93	100

*The Legislature approved a supplemental appropriation of $75,000.00 for awards for FY78. $94,379.30 of the F /78 award money was spent on prior year claims.

Administrative costs for Violent Crimes Compensation for FY 78 were as follows:

Staff salaries (2 persons) and benefits	$57,315.37
Travel includes board member travel and per diem	5,195.44
Attorney fees, office expenses, equipment, etc	11,372.97
Total Costs	$73,883.78

spouse and such children whose coverage under the policy terminates at the same time, or (ii.) to a child solely with respect to himself upon termination of his coverage by reason of ceasing to be a qualified family member under the group policy, if a conversion privilege is not otherwise provided above with respect to such termination.

(17) If the benefit levels required in paragraphs (10) and (11) exceed the benefit levels provided under the group policy, the conversion policy may offer benefits which are substantially similar to those provided under the group policy in lieu of those required in paragraphs (10) and (11).

(18) The insurer may elect to provide group insurance coverage in lieu of the issuance of a converted individual policy.

(19) A notification of the conversion privilege shall be included in each certificate of coverage.

(20) A converted policy which is delivered outside [state] must be on a form which could be delivered in such other jurisdiction as a converted policy had the group policy been issued in that jurisdiction.

Section 3. [*Severability.*] [Insert severability clause.]

Section 4. [*Repeal.*] [Insert repealer clause.]

Section 5. [*Effective Date.*] [Insert effective date.]

Comprehensive Health Insurance Act

This draft statute requires that employers in the state must include qualified catastrophic health insurance protection and minimum types of benefits for routine care in any policy provided to their employees pursuant to the individual's employment. This includes policies which are paid for partly or fully by the employee as well as those which are completely employer-paid. If only nonqualified plans are offered to employees, the employer may not deduct for tax purposes the cost of the insurance to him. In order to qualify, a plan must meet specified benefit levels and have no more than a maximum allowable deductible. This draft act also includes as Sections 18 and 19 a state catastrophic medical insurance plan under which the state will pay the medical expenses of those persons who incur uninsured medical expenses exceeding specified portions of their income.

This medical insurance plan is implemented by requiring in the statute that all insurers writing health insurance in the state must offer a qualified plan to their customers. A compulsory association of all insurers in the state is also to be formed under the act for the purpose of offering a qualified plan of insurance to those individuals whom the insurers have individually refused to insure. For those individuals who may be leaving employment at which they were enrolled in a qualified plan, the act provides mandatory conversion privileges enabling the individual to continue his insurance.

As the above indicates, this draft act is broad in scope and is directed toward multiple purposes. Among the related but separate purposes of the legislation are ensuring minimum standards for group health plans, creating an association of insurers as a resort for those individuals who could not otherwise obtain effective coverage, and providing catastrophic medical expense protection for all through employers and private insurers where possible and through the state welfare system where necessary.

This draft legislation is based on a 1976 Minnesota statute.

Suggested Legislation

(Title, enacting clause, etc.)

Section 1. [*Short Title.*] This act may be cited as the [state] Comprehensive Health Insurance Act.

Section 2. [*Definitions.*] As used in this act:

(1) "Employer" means any person, partnership, association, trust, estate, or corporation, which employs 10 or more individuals who are residents of this state.

(2) "Health maintenance organization" means a nonprofit corporation licensed and operated as provided in [appropriate state statute].

(3) "Qualified plan" means those health benefit plans which have been certified by the commissioner as providing the minimum benefits required by Section 6 of this act or the actuarial equivalent of those benefits.

(4) "Qualified Medicare supplement plan" means those health benefit plans which have been certified by the commissioner as providing the minimum benefits required by Section 7 of this act or the actuarial equivalent of those benefits.

(5) "Commissioner" means the [commissioner of insurance].

(6) "Dependent" means a spouse or unmarried child under the age of 19 years, a dependent child who is a student under the age of 25 and financially dependent upon the parent, or a dependent child of any age who is disabled.

(7) "Employee" means any [state] resident who has entered into the employment of or works under contract or service or apprenticeship with any employer. "Employee" does not include a person who has been employed for less than [30] days by his present employer, nor one who is employed less than an average of [30] hours per week by his present employer.

(8) "Plan of health coverage" means any plan or combination of plans of coverage, including combinations of self-insurance, individual accident and health insurance policies, group accident and health insurance policies, coverage under a nonprofit health service plan, or coverage under a health maintenance organization subscriber contract.

(9) "Insurer" means those companies operating pursuant to [appropriate state statute] and offering or selling policies or contracts of accident and health insurance. "Insurer" does not include health maintenance organizations.

(10) "Accident and health insurance policy" or "policy" means insurance or nonprofit health service plan contracts providing benefits for hospital, surgical, and medical care. "Policy" does not include coverage which is (i) limited to disability or income protection coverage, (ii) automobile medical payment coverage, (iii) supplemental to liability insurance, (iv) sold by fraternals and provides payments on a per diem, daily indemnity or nonexpense-incurred basis, or (v) credit accident and health insurance issued pursuant to [appropriate state statute].

(11) "Health benefits" means benefits offered to employees on an indemnity or prepaid basis which pay the costs of or provide medical, surgical, or hospital care.

(12) "Eligible person" means an individual who is a resident of [state] and meets the enrollment requirements of Section 14 of this act. For purposes of Sections 18, 19, and 20 only, "eligible person" means any person who while a resident of [state] has been found by the [commissioner of public welfare] to have incurred an obligation to pay qualified expenses for himself and any dependents in any [12] consecutive months exceeding (i) [40] percent of his household income up to $[15,000], plus [50] percent of his household income between $[15,000 and $25,000], plus [60] percent of his household income in excess of $[25,000], or (ii) $[2,500], whichever is greater.

(13) "Comprehensive health association" or "association" means the association created by Section 10 of this act.

(14) "Medicare" means Part A and Part B of the United States Social Security Act, Title XVIII, as amended, 42 U.S.C. Sections 1394, et seq.

(15) "Medicare supplement plan" means any plan of insurance protection which provides benefits for the costs of medical, surgical, or hospital care and which is marketed as providing benefits which complement or supplement the benefits provided by Medicare.

(16) "State plan premium" means the premium determined pursuant to Section 8 of this act.

(17) "Writing carrier" means the insurer or insurers and health maintenance organization or organizations selected by the association and approved by the commissioner to administer the comprehensive health insurance plan.

(18) "Fraternal beneficiary association" or "fraternal" means a corporation, society, order, or voluntary association without capital stock which sells health and accident insurance in accordance with [appropriate state statute].

(19) "Comprehensive health insurance plan" or "state plan" means policies of insurance and contracts of health maintenance organization coverage offered by the association through the writing carrier.

(20) "Self-insurer" means an employer who directly provides a plan of health coverage to his employees and administers the plan of health coverage himself or through an insurer. "Self-insurer" does not include an employer engaged in the business of providing health care services to the public who provide health care services directly to his employees at no charge to them.

(21) "Self-insurance" means a plan of health coverage offered by a self-insurer.

(22) "Qualified expense" means any charge incurred subsequent to [insert date] for a health service which is included in the list of covered services described in Section 6(a), and for which no third party is liable.

(23) "Household income" means the gross income of an eligible person and all his dependents for the calendar year preceding the year in which an application is filed pursuant to Section 18.

(24) "Gross income" means income as defined in [appropriate state tax statute].

(25) "Third party" means any person other than the eligible person or his dependents.

Section 3. [*Duties of Employer.*]

(a) Each employer who provides or makes available to his employees a plan of health coverage shall make available to his employees employed in this state a plan or combination of plans which have been certified by the commissioner as a number two qualified plan. If the plan of health coverage does not meet the requirements of Section 6 for a number two qualified plan, the employer shall make available a supplemental plan of health benefits which, when combined with the existing plan of health benefits, constitutes a number two coverage plan. The plan or combinations of plans may be financed from funds contributed solely by the employer or solely by the employees or any combination thereof. The plans may consist of self-insurance, health maintenance contracts, group policies, or individual policies or any combination thereof.

(b) In the event that an employer fails to make available at least a number two qualified plan health benefits to his employees employed in this state, none of the employer's costs for health benefits shall qualify as an income tax deduction pursuant to [appropriate state tax statute]. In the case of an employer who meets the requirements of [state statute defining tax exempt organizations], if the employer fails to make available at least a number two qualified plan to his employees, the employer shall lose his status as an exempt organization.

Section 4. [*Duties of Insurers.*]

(a) For each type of qualified plan described in Section 6, an insurer or fraternal issuing individual policies of accident and health insurance in this state, other than group conversion policies, shall develop and file with the commissioner an individual policy which meets the minimum standards of that type of qualified plan. An insurer or fraternal issuing individual policies of accident and health insurance in this state shall offer each type of qualified plan to each person who applies and is eligible for accident and health insurance from that insurer or fraternal.

(b) An insurer or fraternal issuing Medicare supplement plans in this state shall develop and file with the commissioner a Medicare supplement policy which meets the minimum standards of a qualified Medicare supplement plan. An insurer or fraternal issuing Medicare supplement plans in this state shall offer a qualified Medicare supplement plan to each person who is eligible for coverage and who applies for a Medicare supplement plan.

(c) For each type of qualified plan described in Section 6, an insurer or fraternal issuing group policies of accident and health insurance in this state shall develop and file with the commissioner a group policy which provides for each member of the group the minimum benefits required by that type of qualified plan. An insurer or fraternal issuing group policies of accident and health insurance in this state shall offer each type of qualified plan to each eligible applicant for group accident and health insurance.

(d) Each insurer and fraternal shall include coverage of major medical costs in every unqualified policy of accident and health insurance, unless the applicant for a new or renewal policy declines the coverage in writing. The coverage shall provide that when a covered individual incurs out-of-pocket expenses of $[5,000] or more within a calendar year for services covered in Section 6(a), benefits shall be payable, subject to any copayment authorized by the commissioner, up to a maximum lifetime limit of $[250,000].

(e) No policy of accident and health insurance may be issued or renewed in this state [180] days after [insert date] by an insurer or a fraternal which has not complied with the requirements of this section.

(f) An insurer or fraternal may fulfill its obligations under this section by issuing the required coverages in their own name and reinsuring the risk and administration of the coverages with the association in accordance with paragraphs (5) and (6) of Section 10(g).

(g) Nothing in this section shall require an insurer or fraternal to offer or issue a policy to any person who does not meet the underwriting or membership requirements of the insurer or fraternal.

Section 5. [*Certification of Qualified Plans.*] Upon application by an insurer, fraternal, or employer for certification of a plan of health coverage as a qualified plan or a qualified Medicare supplement plan for the purposes of Sections 1 to 17, the commissioner shall make a determination within [90] days as to whether the plan is qualified. All plans of health coverage shall be labeled as "qualified" or "nonqualified" on the front of the policy or evidence of insurance. All qualified plans shall indicate whether they are number one, two, or three coverage plans.

Section 6. [*Minimum Benefits of Qualified Plan.*]

(a) A plan of health coverage shall be certified as a number three qualified plan if it otherwise meets the requirements established by [appropriate state statute] and the other laws of this state and whether or not the policy is issued in this state and meets or exceeds the following minimum standards:

(1) The minimum benefits for a covered individual shall, subject to the other provisions of this subsection, be equal to at least [80] percent of the cost of covered services in excess of an annual deductible which does not exceed $[150] per person. The coverage shall include a limitation of $[3,000] per person on total annual out-of-pocket expenses for services covered under this subsection. The coverage may be subject to a maximum lifetime benefit of not less than $[250,000]. Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

(i) Hospital services.

(ii) Professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction.

(iii) Drugs requiring a physician's prescription.

(iv) Services of a nursing home for not more than [120] days in a year if the services commence within [14] days following confinement of at least

[three] days in a hospital for the same condition.

(v) Service of a home health agency up to a maximum of [180] visits per year.

(vi) Use of radium or other radioactive materials.

(vii) Oxygen.

(viii) Anesthetics.

(ix) Prostheses.

(x) Rental or purchase, as appropriate, of durable medical equipment.

(xi) Diagnostic X-rays and laboratory tests.

(xii) Oral surgery for partially or completely unerupted impacted teeth, a tooth root without the extraction of the entire tooth, or the gums and tissues of the mouth when not performed in connection with the extraction or repair of teeth.

(xiii) Services of a physical therapist.

(2) Covered expenses for the services and articles specified in this subsection do not include the following:

(i) Any charge for any care for any injury or disease either arising out of an injury in the course of employment and subject to a worker's compensation or similar law, for which benefits are payable without regard to fault under coverage statutorily required to be contained in any motor vehicle or other liability insurance policy or equivalent self-insurance, or for which benefits are payable under another policy of accident and health insurance or Medicare.

(ii) Any charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect.

(iii) Any charge for travel other than travel by ambulance to the nearest health care institution qualified to treat the illness or injury.

(iv) Any charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician.

(v) That part of any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceeds the prevailing charge in the locality where the service is provided.

(vi) Any charge for services or articles the provision of which is not within the scope of authorized practice of the institution or individual rendering the services or article.

(3) Effective [insert date], the minimum benefits for a qualified plan shall include, in addition to those benefits specified in subsection (a)(1), benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations:

(i) Well baby care.

(ii) Physicians' services for routine checkups and annual physicals when prescribed by a physician.

(iii) Multiphasic screening and other diagnostic testing. The commissioner by rule shall prescribe reasonable limits on the reimbursement required for these services.

(b) A plan of health coverage shall be certified as a number two qualified plan if it meets the requirements established by the laws of this state and provides for payment of [80] percent of the covered expenses required by this section in excess of a deductible which does not exceed $[500] per person.

(c) A plan of health coverage shall be certified as a number one qualified plan if it meets the requirements established by the laws of this state and provides for payment of [80] percent of the covered expenses required by this section in excess of a deductible which does not exceed $[1,000] per person.

(d) A health maintenance organization which provides the services required by [appropriate state statute] shall be deemed to be providing a number three qualified plan.

Section 7. [*Qualified Medicare Supplement Plan.*] Any plan which provides benefits to persons over the age of 65 years may be certified as a qualified Medicare supplement plan if the plan is designed to supplement Medicare and provides coverage of [50] percent of the deductible and copayment required under Medicare and [80] percent of the charges for covered services described in Section 6(a), which charges are not paid by Medicare. The coverage shall include a limitation of $[1,000] per person on total annual out-of-pocket expenses for the covered services. The coverage may be subject to a maximum lifetime benefit of not less than $[100,000].

Section 8. [*State Plan Premium.*]

(a) For the first year of operation of the comprehensive health insurance plan, the association shall establish the following premiums to be charged for membership in the comprehensive health insurance plan:

(1) The premium for the number one qualified plan shall be the average of rates charged by the [five] insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in the state.

(2) The premium for the number two qualified plan shall be the average of rates charged by the [five] insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in the state.

(3) The premium for a qualified Medicare supplement plan shall be the average of rates charged by the [five] insurers with the largest number of individuals enrolled in a qualified Medicare supplement plan.

(4) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

(b) For the second and subsequent years, the schedule of premiums for membership in the comprehensive health insurance plan shall be designed to be self-supporting and based on generally accepted actuarial principles.

Section 9. [*Duties of Commissioner.*] The commissioner may:

(1) Formulate general policies to advance the purposes of Sections 1 to 17; the commissioner may also adopt, promulgate, repeal, and amend rules pursuant to the rulemaking provisions of [state administrative procedure act] to carry out the provisions of Sections 1 to 17.

(2) Supervise the creation of a comprehensive health association within the limits described in Section 10.

(3) Approve the selection of the writing carrier by the association and approve the association's contract with the writing carrier including the state plan coverage and premiums to be charged.

(4) Appoint advisory committees.

(5) Conduct periodic audits to assure the general accuracy of the financial data submitted by the writing carrier and the association.

(6) Contract with the federal government or any other unit of government to ensure coordination of the state plan with other governmnental assistance programs.

(7) Undertake directly or through contracts with other persons studies or demonstration programs to develop awareness of the benefits of Sections 1 to 17, so that the residents of this state may best avail themselves of the health care benefits provided by these sections.

(8) Contract with insurers and others for administrative services.

Section 10. [*Comprehensive Health Association.*]

(a) There is established a comprehensive health association with membership consisting of all insurers, self-insurers, fraternals, and health maintenance organizations licensed or authorized to do business in this state.

(b) The board of directors of the association shall be made up of [seven] individuals selected by participating members, subject to approval by the commissioner. To select the initial board of directors, and to initially organize the association, the commissioner shall give notice to all members of the time and place of the organizational meeting. In determining voting rights at the organizational meeting, each member shall be entitled to vote in person or by proxy. The vote shall be a weighted vote based upon the member's cost of self-insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of residents in the previous calendar year, as determined by the commissioner. If the board of directors is not selected within [60] days after notice of the organizational meeting, the commissioner may appoint the initial board. In approving or selecting members of the board, the commissioner shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the moneys of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

(c) All members shall maintain their membership in the association as a condition of doing business in this state. The association shall submit bylaws and operating rules to the commissioner for approval.

(d) All meetings of the association, its board, and any committees of the association shall comply with the provisions of [state open meetings act].

(e) All members shall enter into a contract with the association according to terms specified in Section 11. The contract of reinsurance shall be executed for a period of one year and shall be renewed annually thereafter. A company which ceases to do business within the state shall remain liable under the contract for the reinsurance contracted for during that calendar year.

(f) In the performance of their duties as members of the association, the members shall be exempt from the provisions of [state antitrust statute].

(g) The association may:

(1) Exercise the powers granted to insurers under the laws of this state.

(2) Sue or be sued.

(3) Enter into contracts with insurers, similar associations in other states, or other persons for the performance of administrative functions including the functions provided for in paragraphs (5) and (6) of this subsection.

(4) Establish administrative and accounting procedures for the operation of the association.

(5) Provide for the reinsuring of risks incurred as a result of issuing the coverages required by Sections 4 and 16 by members of the association. Each member which elects to reinsure its required risks shall determine the categories of coverage it elects to reinsure in the association. The categories of coverage are: (i) individual qualified plans, excluding group conversions; (ii) group conversions; (iii) group qualified plans with fewer than [50] employees or members; and (iv) major medical coverage. A separate election may be made for each category of coverage. If a member elects to reinsure the risks of a category of coverage, it must reinsure the risk of the coverage of every life covered under every policy issued in that category. Members electing to administer the risks which are reinsured in the association shall comply with the benefit determination guidelines and accounting procedures established by the association. The fee charged by the association for the reinsurance of risks shall not be less than [110] percent of the total anticipated expenses incurred by the association for the reinsurance.

(6) Provide for the administration by the association of policies which are reinsured pursuant to paragraph 5 of this subsection. Each member electing to reinsure one or more categories of coverage in the association may elect to have the association administer the categories of coverage on the member's behalf. If a member elects to have the association administer the categories of coverage, it must do so for every life covered under every policy issued in that category. The fee for the administration shall not be less than [110] percent of the total anticipated expenses incurred by the association for the administration.

(a) Upon certification as an eligible person in the manner provided by Section 14, an eligible person may enroll in the comprehensive health insurance plan by payment of the state plan premium to the writing carrier.

(b) Any employer which has in its employ one or more eligible persons enrolled in the comprehensive health insurance plan may make all or any portion of the state plan premium payment to the state plan directly to the writing carrier.

(c) Not less than [87½] percent of the state plan premium paid to the writing carrier shall be used to pay claims, and not more than [12½] percent shall be used for the payment of agent referral fees as authorized in Section 15(c) and for payment of the writing carrier's direct and indirect expenses, as specified in Section 13(g).

(d) Any income in excess of the costs incurred by the association in providing reinsurance or administrative services shall be held at interest and used by the association to offset losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

(e) Each member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan pursuant to the terms of the individual reinsurance contracts executed by the association with each member in accordance with Section 10(e). Deviations in the claim experience of the state plan from the premium payments allocated to the payment of benefits shall be the liability of the association members. Association members shall share in the excess costs of the state plan in an amount equal to the ratio of the member's total cost of self-insurance, accident and health insurance premium, subscriber contract charges, or health maintenance organization contract charges received from or on behalf of [state] residents as divided into the total cost of self-insurance, accident and health insurance premium, subscriber contract charges, and health maintenance organization contract charges received by all association members from or on behalf of [state] residents, as determined by the commissioner. The reinsurance contract shall provide for a retroactive determination of each member's liability and payment due within [30] days after each renewal date of the reinsurance contract. Failure by a member to tender to the association the assessed reinsurance payment within [30] days of notification by the association shall be grounds for termination of the member's membership. Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Section 12. [*Minimum Benefits of Comprehensive Health Insurance Plan.*] The association through its comprehensive health insurance plan shall offer policies which provide the benefits of a number one qualified plan, a number two qualified plan, and a qualified Medicare supplement plan. They shall offer health maintenance organization contracts in those areas of the state where a health maintenance organization has agreed to make the coverage available and has been selected as a writing carrier.

Section 13. [*Administration of Plan.*]

(a) Any member of the association may submit to the commissioner the policies of accident and health insurance or the health maintenance organization contracts which are being proposed to serve in the comprehensive health insurance plan. The time and manner of the submission shall be prescribed by rule of the commissioner.

(b) Upon the commissioner's approval of the policy forms and contracts submitted pursuant to Section 10, the association shall select policies and contracts submitted by a member or members of the association to be the comprehensive health insurance plan. This selection shall be based upon criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified Medicare supplement plan, and the health maintenance organization contract.

(c) The writing carrier shall perform all administrative and claims payment functions required by this section. The writing carrier shall provide these services for a period of [three] years, unless a request to terminate is approved by the commissioner. The commissioner shall approve or deny a request to terminate within [90] days of its receipt. A failure to make a final decision on a request to terminate within the specified period shall be deemed to be an approval. [Six] months prior to the expiration of each [three]-year period, the association shall invite submissions of policy forms from members of the association, including the writing carrier. The association shall follow the provisions of subsection (b) in selecting a writing carrier for the subsequent three-year period.

(d) The writing carrier shall provide to all eligible persons enrolled in the plan an individual certificate, setting forth a statement as to the insurance protection to which he is entitled, with whom claims are to be filed and to whom benefits are payable. The certificate shall indicate that coverage was obtained through the association.

(e) The writing carrier shall submit to the association and the commissioner on a monthly basis a report on the operation of the state plan. Specific information to be contained in this report shall be determined by the association prior to the effective date of the state plan.

(f) All claims shall be paid by the writing carrier pursuant to the provisions of Sections 1 to 17 and shall indicate that the claim was paid by the state plan. Each claim payment shall include information specifying the procedure to be followed in the event of a dispute over the amount of payment.

(g) The writing carrier shall be reimbursed from the state plan premiums received for its direct and indirect expenses. Direct and indirect expenses

shall include, but need not be limited to, a pro rata reimbursement for that portion of the writing carrier's administrative, printing, claims administration, management and building overhead expenses which are assignable to the maintenance and administration of the state plan. The association shall approve cost accounting methods to substantiate the writing carrier's cost reports consistent with generally accepted accounting principles. Direct and indirect expenses shall not include costs directly related to the original submission of policy forms prior to selection as the writing carrier.

(f) The writing carrier shall at all times when carrying out its duties under Sections 1 to 17 be considered an agent of the association and the commissioner with civil liability subject to the provisions of [appropriate state tort liability statute].

(i) Premiums received by the writing carrier for the comprehensive health insurance plan are specifically exempted from the provisions of Section 15 .

Section 14. [*Enrollment by Eligible Person.*]

(a) The comprehensive health insurance plan shall be open for enrollment by eligible persons. An eligible person may enroll by submission of a certificate of eligibility to the writing carrier. The certificate shall provide the following:

(1) Name, address, age, and length of time at residence of the applicant.

(2) Name, address, and age of spouse and children, if any, if they are to be insured.

(3) Evidence of rejection, or a requirement of restrictive riders, or a preexisting conditions limitation on a qualified plan, the effect of which is to substantially reduce coverage from that received by a person considered a standard risk, by at least [two] association members within [six] months of the date of the certificate.

(4) A designation of the coverage desired.

(b) Within [30] days of receipt of the certificate described in Section 14(a), the writing carrier shall either reject the application for failing to comply with the requirements in Section 14(a) or forward the eligible person a notice of acceptance and billing information. Insurance shall be effective immediately upon receipt of the first month's state plan premium, and shall be retroactive to the date of application, if the applicant otherwise complies with the requirements of Sections 1 to 17. An eligible person may not purchase more than one policy from the state plan.

(c) No person who obtains coverage pursuant to this section shall be covered for any preexisting condition during the first [six] months of coverage under the state plan if the person was diagnosed or treated for that condition during the [90] days immediately preceding the filing of an application.

Section 15. [*Solicitation of Eligible Persons.*]

(a) The association pursuant to a plan approved by the commissioner shall disseminate appropriate information to the residents of this state regarding the existence of the comprehensive health insurance plan and the means of enrollment. Means of communication may include use of the press, radio, and television, as well as publication in appropriate state offices and publications.

(b) The association shall devise and implement means of maintaining public awareness of the provisions of Sections 1 to 17 and shall administer these sections in a manner which facilitates public participation in the state plan.

(c) The writing carrier shall pay an agent's referral fee of $[25] to each insurance agent who refers an applicant to the state plan, if the application is accepted. Selling or marketing of qualified state plans shall not be limited to the writing carrier or its agents. The referral fees shall be paid by the writing carrier from money received as premiums for the state plan.

(d) Every insurer which rejects or applies underwriting restrictions to an applicant for accident and health insurance shall notify the applicant of the existence of the state plan, the requirements for being accepted in it, and the procedure for applying to it.

Section 16. [*Conversion Privileges.*] Every program of self-insurance, policy of group accident and health insurance or contract of coverage by a health maintenance organization written or renewed in this state shall include the right to convert to an individual coverage qualified plan without the addition of underwriting restrictions regardless of the reason for leaving the group. The person leaving the group may exercise his right to conversion within [30] days of leaving the group. Plans of health coverage shall also include a provision which, upon the death of the individual in whose name the contract was issued, permits every other individual then covered under the contract to elect, within the period specified in the contract, to continue his coverage under the same or a different contract without the addition of underwriting restrictions until he would have ceased to have been entitled to coverage had the individual in whose name the contract was issued lived.

Section 17. [*Dual Option.*]

(a) An employer who employs in this state, on the average during a calendar quarter, [100] employees or more, other than employees engaged in seasonal employment, and who offers a health benefits plan to employees, whether purchased from an insurer or a health maintenance organization, or provided on a self-insured basis, shall, upon the next renewal of the health benefits plan contract, offer his employees a dual option to obtain health benefits through either an accident and health insurance policy or a health maintenance organization contract if one is available. An option need not be provided if fewer than [25] employees select that option.

(b) An employer may make the dual offers through an insurer, a health maintenance organization or on a self-insured basis. If an offer is made on a self-insured basis, the accident and health insurance type of coverage or

health maintenance organization type of coverage shall meet the requirements of the laws of this state as to the services covered or benefits provided, but need not otherwise be approved by the commissioner or the board of health.

(c) No insurer shall make acceptance of its offer to provide insurance coverage contingent on acceptance by the employer of health maintenance organization coverage by a particular health maintenance organization. No health maintenance organization shall make acceptance of its offer to provide health maintenance organization coverage contingent on acceptance by the employer of insurance coverage by a particular insurer. No offer to provide the accident and health insurance policy and the health maintenance organization contract shall combine the two in a single price package.

(d) The [board of health], in consultation with the commissioner, shall adopt rules to implement the provisions of this section.

Section 18. [*Application for Assistance.*]

(a) Any person who believes that they are or will become an eligible person may submit an application for state assistance to the [commissioner of public welfare]. The application shall include a listing of expenses incurred prior to the date of the application and shall designate the date on which the [12]-month period for computing expenses began.

(b) If the [commissioner of public welfare] determines that an applicant is an eligible person, he shall pay [90] percent of all qualified expenses of the eligible person and his dependents in excess of: (1) [40] percent of his household income under $[15,000], plus [50] percent of his household income between $[15,000] and $[25,000], plus [60] percent of his household income in excess of $[25,000]; or (2) $[2,500], whichever is greater for the [12]-month period in which the applicant becomes an eligible person. If the [commissioner of public welfare] determines that the charge for a health service is excessive, he may limit his payment to the usual and customary charge for that service. If the [commissioner of public welfare] determines that a health service provided to an eligible person was not medically necessary, he may refuse to pay for the service. To the extent feasible, the [commissioner of public welfare] shall contract with a review organization in making any determinations as to whether or not a charge is excessive. To the extent feasible, the [commissioner of public welfare] shall contract with a review organization in making any determination as to whether or not a service was medically necessary. If the [commissioner of public welfare], in accordance with this section, refuses to pay all or a part of the charge for a health service, the unpaid portion of the charge shall be deemed to be an unconscionable fee, against the public policy of this state, and unenforceable in any action brought for the recovery of moneys owed.

Section 19. [*Duties of Commissioner.*]

(a) The [commissioner of public welfare] shall:

(1) Promulgate reasonable rules to implement Sections 18 to 20.

(2) Establish application forms and procedures for the use of persons seeking to be declared eligible persons.

(3) Investigate applications to determine whether or not the applicant is a qualified person and investigate claims from providers of health services to determine whether or not to pay them.

(b) The [commissioner of public welfare] may:

(1) Enter into contracts with the United States or any state agency, instrumentality or political subdivision for the purpose of coordinating the program established by this act, with other programs which provide or pay for the delivery of health services.

(2) Enter into contracts with third parties to perform some or all of the duties imposed on the [commissioner of public welfare] by Sections 18 and 19.

Section 20. [*Appeals.*] The final decision of the [commissioner of public welfare] in denying an application for status as an eligible person or denying all or part of the charges for a health service may be appealed by any interested party pursuant to [state administrative procedure act].

Section 21. [*Severability.*] [Insert severability clause.]

Section 22. [*Repeal.*] [Insert repealer clause.]

Section 23. [*Effective Date.*] [Insert effective date.]

A Study of Medicaid Client Need

PREPARED BY

LEGISLATIVE AFFAIRS AGENCY
DIVISION OF RESEARCH

FEBRUARY, 1977

Foreword

In the fall of 1972, Alaska entered the national Medicaid program, providing certain of its citizens thereby a limited spectrum of medical care services.

Since this modest beginning, the legislature has increased Medicaid coverage by the addition of a few services above those which the state is required to cover in order to participate in the federal program. These optional services allowed the state to earn addition "matching" federal funds, some of which were a direct one-for-one offset to medical care expenditures that the state itself had been previously paying for in their entirety. Other program additions resulted in increased state expenditures, but provided a more complete medical coverage package.

In order to maximize the benefits from the additional expenditures, optional service additions must undergo careful scrutiny to insure that the options chosen return the greatest level of benefits in terms of meeting the health needs of the approximately seven percent of Alaska's population served by the Medicaid program. During 1976, a number of legislators indicated their desire to have better information upon which to base their decisions concerning the addition (or deletion) of various possible optional services. In order to meet this need, Miss Deborah Behr of the Research Division staff began, in June of 1976, an extensive effort directed at reviewing public assistance eligibility supervisors' perceptions of client requirements, analyzing written denials of additional client service requests, and obtaining information from various states regarding their experience with selected options. The present study is the result of this effort.

A Study of Medicaid Client Need

PART I. OVERVIEW OF THE MEDICAID PROGRAM

INTRODUCTION TO THE PROGRAM

Medicaid is a program funded jointly by the federal and state governments which aids certain needy Alaskans in providing payments for them to receive medical services. It helps assure that medical services are available to those needy eligible persons when they are ill or injured. It also assists in guaranteeing that the highest quality care of the kind required by the patient's condition is available, by mandating certain medical reviews of patient care and treatment. Medicaid also attempts to make services available by utilizing the present system of private practitioners, facilities, and institutions to provide the care required at the lowest possible cost to the taxpayer.

STATE PLAN FOR MEDICAID

The Medicaid program in Alaska is administered by a single state agency, the Department of Health and Social Services, which is required to submit a state plan to the Secretary of the federal Department of Health, Education, and Welfare for his review and approval.

The state plan is essentially a contract between the state department and the federal Department of Health, Education, and Welfare specifying conditions to be met in order to qualify for federal financial participation. Some topics included in it are:

1. eligibility determination
2. recipient eligibility
3. eligibility verification
4. medical services
5. health care
6. quality control
7. fair hearings
8. methods of administration
9. utilization review
10. fraud

Many of these items are required be included in the plan (mandatory), but others the state may decide whether or not to include (optional). The optional portions allow the state to shape a medical assistance program to the needs and financial resources of its citizens.

DIFFERENCES BETWEEN MEDICAID AND MEDICARE

Medicaid is often confused with the Medicare program in the state. Medicaid is a medical assistance program for certain needy low-income people. In Alaska, Medicaid is administered by the Division of Public Assistance, an agency of the Alaska Department of Health and Social Services. It is authorized under Title XIX of the federal Social Security Act and AS 47.07.010-.080 of the Alaska statutes. States can design their own programs within set federal guidelines to meet the needs and resources of its citizens. Medicaid programs can and do vary from state to state.

In comparison, Medicare is a medical insurance program for those people, rich or poor, covered by Social Security. It is administered by the Social Security Administration of the federal government. The program is the same in all fifty states. Almost everyone over 65 and some younger persons who have been receiving Social Security disability payments for at least two years qualify for the program.

BRIEF HISTORY OF MEDICAID PROGRAM IN ALASKA

On July 6, 1972, Alaska became the 49th state to provide the Medicaid program for its residents. The state had, since the mid-60's, provided for such services under the General Relief - Medical program. Costs had risen from $1.8 million to $8.7 million in FY 72. This dramatic increase was due to many factors, the major ones being:

1. The number of eligibles had increased, but the rate of expenditure was increasing at even a faster pace.

2. The scope of the program had been liberalized and expanded with a related increase in utilization of services.

3. Medical care costs were rising at a rate disproportionate to that of other costs of living.

In light of this situation, the administration and the legislature came to basic conclusions that the General Relief - Medical program, which was supported 100% with state monies, had need of administrative controls to review services and, hopefully, reduce health care expenditures. There was a general consensus that either the General Relief - Medical program had to be upgraded or research should be done to investigate the possibility of the implementation of the Medicaid program. In April, 1972, the Department of Health and Social Services contracted with Touche Ross and Company, a public accounting firm, to develop a cost benefit study of the Medicaid program. Budgets were developed and testimony was made to the legislature that session. On June 17, 1972, the enabling bill for the Medicaid program passed the legislature and was later signed into law with an effective date of July 6, 1972. (The history of the program can be traced on Table 1: Medicaid History Timeline.)

TABLE 1

State of Alaska
Medicaid History Timeline

Date	Occurrence
April 10, 19 2	Touche Ross & Company begin Medicaid System Design
April 18-June 9, 1972	Departmental Presentation to Legislature
May 10, 1972	Department of Health and Social Services' Steering Committee Established
June 17, 1972	Enabling Bill Passes Legislature
July 6, 1972	Medicaid Becomes Law
September 1, 1972	Medicaid Implemented
September 28, 1972	State Plan Submitted to Federal Department of Health, Education and Welfare
April 4, 1973	Effective date of Intermediate Nursing Home Care Option
May 16, 1974	Effective date of Inpatient Psychiatric Hospital Option for Eligible Persons 65 or Over and Under 22
May 16, 1974	Effective Date of Miscellaneous Minor Eligibility Groups (Primarily needy children under 21 in foster care under supervision by Department of Health and Social Services)
July 13, 1974	Effective date of 60 day limit on filing Medicaid claims
April 15, 1975	New Division of Public Assistance Formed
September 2, 1975	Effective date of Intermediate Nursing Home Care for Mentally Retarded Under 21 who Meet AFDC Need Standards Option
March 12, 1976	Effective date of Eye Glasses and Optometrist Service Options
June 21, 1976	Effective Date of New Nursing Home Group of Eligibles
July 1, 1976	Effective Date of Limited Clinic Services Option (Primarily Community Mental Health Centers and State Operated Mental Centers)
July 1, 1976	Effective date of Treatment of Speech, Hearing, and Language Disorders Option

The Department of Health and Social Services worked during the interim period to provide the necessary procedures and organization to make Medicaid an administrative reality in Alaska. A new Division of Medical Assistance in the Department of Health and Social Services was formed to administer the new program, as well as the remnants of the General Relief - Medical program. On September 1, 1972, the Medicaid program was actually implemented. (The Division continued to administer the program until April, 1975, when the new Division of Public Assistance was formed. This new division combined the eligibility determination, income maintenance, and medical assistance functions into one organizational grouping in the state.) Later that month, the official state plan was submitted to the federal Department of Health, Education and Welfare for its approval.

With the approval of the state plan, Alaska realized the benefits due to implementation of the Medicaid program:

1. Federal matching funds for medical expenditures became 50%, thereby allowing the continuation of the level of medical services without further increase in state general fund expenditure.

2. Federal match for categorical assistance programs under the Social Security Act increased from 30% to 50%.

3. Administrative controls, seen as necessary, were implemented to fulfill Medicaid requirements in order to receive federal financial participation.

When the legislature approved the Medicaid program, it included a restriction in statute mandating that all new services or eligibility group additions must receive its approval. At time of passage, the enabling legislation included those services and eligibility groups mandated by the federal government in order to receive federal financial participation. Since that time, the legislature has added few additional services or eligible groups.

The legislature added the first additional service option in 1973. At that time, intermediate nursing home care was selected. This option permitted the coverage of a lower and less expensive level of nursing home care. This addition allowed many Medicaid recipients in skilled nursing, who did not require that level of treatment, to be properly placed in intermediate nursing care thus "saving" state general fund dollars.

In 1974, the inpatient psychiatric hospital services option was added for eligible persons 65 years of age or over and 21 or under. This allowed the state to claim federal reimbursement for some persons at Alaska Psychiatric Institute, who were eligible for Medicaid coverage and were at that time receiving their care 100% from state monies. Also, other small groups of new eligibles were added at that time. Primarily they consisted of certain needy foster care children under 21 supervised by the Department of Health and Social Services. Prior to

that time these children had, in most cases, received coverage for their health care through the General Relief-Medical program. Also, legislation was passed requiring that medical assistance claims be submitted promptly, no later than six months after date of service or third party payment was received. This permitted more administrative control of expenditures and allowed for greater accuracy in budget projections.

The option to include a new group of needy eligibles under 21 who were in intermediate nursing homes for the mentally retarded became effective in 1975. This permitted a group of children at Harborview Memorial Hospital, Alaska Psychiatric Institute, and Hope Park to receive Medicaid coverage and, hence, additional federal dollars could be earned for their care.

In 1976 the legislature chose to add four new items to the program. A new group of needy persons became eligible for Medicaid coverage for their nursing home care due to an addition of an option. Also, that session, prescription eyeglasses and optometrist's services were added to the program. The legislature also approved the addition of limited clinic services which allowed state operated mental health centers and state approved community outpatient mental health centers receiving grants under A.S. 47.30.520 - 47.30.620 to be covered. This permitted federal funds to be earned in these state general fund supported projects. Also, at that time, the coverage of treatment of speech, hearing, and language disorders was added to the Medicaid program.

The legislature has shown interest in examining and evaluating the available Medicaid options, as seen by the recent history of the program in the state. Many of these options, especially in the case of coverage of nursing home care for certain needy eligible persons, actually "saved" state money. By adding them to the Medicaid program, federal funds could be realized for some of those services, which were being paid at that time 100% from state general funds. Also, by increasing the scope of the service package, a more consistent medical treatment program could be offered to these needy persons. For example, prior to the 1976 addition, eyeglasses were not generally available to all Medicaid eligibles who needed them. Only Medicaid eligible children who had been seen in early screening programs and referred for eyeglasses could be reasonably assured of coverage under the program for their lenses. Needy adults, such as those in nursing homes, had no such guarantee.

Alaska was one of the last states to join the Medicaid program and has been cautious in increasing the scope of the program in the state. In comparison with many other states in the program, Alaska's program is limited, with few service and eligibility group options beyond those basic services and groups required to maintain compliance with the program. This paper will later examine the current scope of the program and the options available under it that the legislature may be called upon to evaluate in 1977 and thereafter.

PART II. CURRENT STATUS OF MEDICAID PROGRAM IN ALASKA

ELIGIBILITY OF CLIENTS

The Alaska Medicaid program provides coverage for certain needy persons receiving or eligible to receive public assistance under:

Federal Supplemental Security Income (SSI),

Alaska Old Age Assistance (OAA),

Alaska Aid to the Blind (AB),

Alaska Aid to the Disabled for Persons who Meet Federal Criteria for Disability (AD), or

Aid to Families with Dependent Children (AFDC),

and certain others (mostly children)

Alaska does not cover the medically needy under its Medicaid program.

In general to be eligible for Medicaid in Alaska, an individual must:

(1) Be physically present in Alaska at time of application and citizen of U.S. or lawfully admitted alien;

(2) Not be in a public institution such as a jail (a person may however be in chronic disease facility such as a nursing home);

(3) Not have more than $1,500 in non-exempt personal property; this excludes a home (there is no lien requirement), personal belongings, in certain cases, a necessary automobile and some types of income producing property;.

(4) Not have transferred property to qualify for assistance;

(5) Meet program requirements such as blind, disabled, aged over 65, or dependent child

The Division of Public Assistance examines the financial and living situation to determine if a person is eligible. As a basic rule, if a family of four meets general program requirements, has monthly net income of no more than $400 earned (excluding reasonable work related expenses) and unearned income, the family would qualify for assistance under Aid to Families With Dependent Children program. There is no geographical differential on the total amounts allowed. The amounts vary for the adult programs (OAA, AB, AD) but generally, if household expenses (excluding fuel) are over $35 a month and the net income is no more than $334 a month of earned (excluding reasonable work-related expenses) and unearned income, a single person family would qualify if other program requirements are met. The $334 figure can vary annually

in accordance with cost of living adjustments required in AS 47.25.640; 47.25.430; 47.25.810. Eligibility for categorical assistance programs automatically makes one eligible for Medicaid.

SERVICES COVERED UNDER MEDICAID

The State of Alaska covers basically two types of services: mandatory, which the states are required to provide, and optional, which the state may provide and receive federal reimbursement. Alaska provides all mandatory services, but optional services are limited.

Mandatory Services

Alaska must provide the following services: 1) inpatient hospital services; 2) outpatient hospital services; 3) physician's services; 4) x-ray and laboratory services; 5) skilled nursing home services; 6) home health services; 7) early and periodic screening, diagnosis, and treatment of children under 21; and 8) family planning services. Alaska also is required to cover transportation necessary to receive medical service, if unavailable from any other source, but it is not listed as a federal requirement.

Optional Services

In addition to the mandatory services, Alaska provides and receives federal reimbursement for the following services:

(1) Inpatient psychiatric hospital services for individuals age 65 or older or under age 22
(2) Intermediate care facility services
(3) Skilled nursing for those persons under 21 years of age
(4) Emergency hospital services
(5) Eyeglasses prescribed by a physician skilled in diseases of the eye or by an optometrist
(6) Services for individuals with speech, hearing, and language disorders
(7) Services through state approved out-patient community mental health clinics which receive grants under AS 47.30.520-47.30.620 and state-operated mental health clinics
(8) Optometrist's services and limited dental and prosthetic devices as required under EPSDT regulations

Other services that the state could choose to provide for certain of its needy individuals, but which has not yet opted for, include:

(1) Prescribed drugs
(2) Dental Services (for persons over 21 not covered under the early screening program)
(3) Dentures
(4) Prosthetic devices (for persons over 21 not covered under the early screening program)

(5) Private duty nursing
(6) Physical therapy and related services
(7) Chiropractor's services and other practitioners
(8) Podiatrist's services
(9) Care for patients aged 65 or older in Institutions for Tuberculosis
(10) Other diagnostic services, screening, preventive services, rehabilitative services

Parts III through V of this report deal later with these optional services in more depth, examining the need and aspects to consider in the evaluation of these alternatives to the program.

FINANCIAL PARTICIPATION BY FEDERAL GOVERNMENT

The federal government financially participates in the Medicaid program by means of matching state dollars for allowable administrative and medical expenditures. Services to eligible clients receive 50% reimbursement, except for family planning supplies and services which are matched at 90% level. Administrative costs are generally matched at 50%. Professional medical review staff are reimbursed at 75% level. (Certain other administrative services receive special match rates, such as 100% for certification and survey of nursing homes. These special rates are itemized in federal law and regulation.)

At the present time there is no "ceiling" or set limit for Alaska on the amount of federal funds available for reimbursement. There has, in recent years, been much discussion on the federal level to restrict such reimbursement, as was indicated in President Ford's budget address in January, 1976. At that time, he mentioned the possibility of placing the Medicaid program in a block grant package with other federally assisted health care programs. By this method, a dollar limit would have been set on the available federal funds for those purposes. Generally, though, the prospects for major funding modifications in the Medicaid program appear slim, although tighter management and administrative mechanisms to control fraud and quality of services seems to be a continued interest.

NEW DEVELOPMENTS IN MEDICAID

In the fall of 1976 the federal government placed additional responsibilities on the Medicaid program, through the passage of Public Law 94-437. That bill, known as the Indian Health Care Improvement Act, mandated closer coordination of Medicaid and Indian health services and required that all services for Medicaid eligible Alaska Natives in Indian health facilities be billed to Medicaid. The federal government would then reimburse the state's Medicaid program at 100% for such services. Additional administrative functions would receive normal federal reimbursement rates. The services eligible for reimbursement under Public Law 94-437 are only those included in the approved Medicaid state plan and provided to Medicaid eligible Alaskan Natives.

Total ramifications of the bill are yet unknown. Federal officials report though that Alaska is far ahead of other affected states in implementing the new law. For example, seven of Alaska's nine Indian Health Service hospitals currently meet statutory requirements for participation in Medicaid without further action. State officials note though that unless there is a major shift in procedures for handling people covered under Indian Health Improvement Act, field office work will increase greatly (e.g., issuing medical coupons, arranging necessary transportation, answering client and provider questions). These state officials voiced concern that estimates of the number of new Alaska Native clients attracted to apply for Medicaid coverage are unknown. The attachment of a dollar figure to the cost of medical services for these persons would be just a rough estimation.

PART III. GENERAL INFORMATION REGARDING OPTIONAL SERVICES

CONTROLS THAT STATES MAY IMPOSE ON MEDICAID OPTIONAL SERVICES

Since the addition of optional services is at the discretion of the state, the federal government allows great flexibility for states to determine the scope of the option that they wish to provide for their Medicaid clients. Generally, federal law and regulation define the basic objectives and requirements of the options, all of which must be met in order to obtain federal financial participation. Some of the requirements address equal offering of services to all eligibles, the qualifications of persons providing the services, and degree of supervision required for paraprofessionals. Within those broad parameters states can shape optional services to fit their unique needs and resources.

Alaska can limit optional services by (1) qualifying coverage, (2) requiring prior authorization, (3) limiting usage frequency, (4) requiring clients to share in cost of services, or (5) limiting the amount of provider reimbursement:

(1) *Qualifying Coverage*

Medicaid law and regulation permit the limiting of coverage of optional services. For example, dentures can be selected as a separate service without having to cover other prosthetic devices such as hearing aids, crutches, etc, or without having to cover other dental services. The Medicaid program does require that the option limitations be applied equally to all eligible clients. (There are certain exceptions to this policy. Some options are defined in federal law to include only specific age groups such as persons under 21 or over 65.) The state, for example, cannot as a general rule limit eligibility for optional service to only those persons receiving aid under a particular program such as Old Age Assistance. If a state chooses an optional service, it must be covered for all groups (except as noted in federal law or regulation) or federal reimbursement will be jeopardized.

(2) *Requiring Prior Authorization*

States can control inappropriate overutilization of optional services by requiring the client to receive approval from the Medicaid agency prior to obtaining certain medical care. Preauthorization is usually based on medical need for services and appropriateness of the care requested to the condition being treated. The Division of Public Assistance has, since the beginning of Medicaid, required preauthorization of all nursing home placements. This mechanism serves to reduce unnecessary placements, place clients at appropriate levels of care, and suggest alternative, and usually cheaper, methods of treatment.

(3) *Limiting Usage Frequency*

Optional services can also be limited by restricting client use. This is generally done by limiting the number of treatments or services paid by Medicaid in a specific time period. For example, Maryland limits adults to one eye examination and one pair of eyeglasses every two years. Arkansas limits Medicaid clients to three prescriptions per month. These restrictions must be applied though uniformly to all clients receiving assistance. Limitations of the amount of services should take into account unusual emergency situations. States cannot impose barriers to needed minimum levels of health care, or risk federal sanction.

(4) *Requiring Clients to Share in Cost of Services*

Some states require Medicaid clients to participate in sharing the costs of certain optional services. Federal regulation sets certain maximum allowable limits on the amount of payment that clients can be required to cover. Those regulations also specify the mechanisms that states can use to allow clients to share in the cost of certain services. Fees are generally limited to small amounts such as $.50 per prescription drug and $2.00 per pair of eyeglasses. Originally, this procedure was instituted to control overutilization of services and not to generate funds. California, along with some other states which elected this option, has found that the cost of administration of this mechanism generally did not offset the revenues gained. The charges did not significantly affect client use of services, and the states found that the collecting and controlling of such small fees were bothersome to both client and provider.

(5) *Limiting the Amount of Provider Reimbursement*

Costs of optional services can also be reduced by limiting the amount of provider reimbursement. Often this comes in the form of reducing reimbursement by a set percentage or by "freezing" payment levels at the current standards. (Medicaid pays "reasonable" rates to its providers. The costs allowable under its definitions often differ greatly from those accepted by Blue Cross and other insurance companies. Fees paid under Medicaid are often lower than fees paid by the general public for the same services.) The state of Michigan, for example, recently implemented an 11% reduction in normal fees paid to practitioners, dentists, laboratories, and other providers. Often such changes receive strong provider reaction and sometimes jeopardize the continued participation of those providers in the program. Federal officials also note the potential use of low bid health providers. For example, the state could solicit bids for a contract to supply Medicaid clients with specific services, such as eyeglasses. The state could select the most advantageous bid and award the contract without jeopardizing federal reimbursement.

OTHER ISSUES TO CONSIDER IN EVALUATING MEDICAID OPTIONAL SERVICES

Although this study focuses primarily on client need, there are other factors that must be considered in evaluating the merits of any given Medicaid option. Three of these major considerations are: availability of funds, costs versus benefits of options, and ease of administration.

The availability of funds plays a major role in the scope of services that a state believes it can provide for its citizens. The high cost of medical care demands an in-depth analysis of cost before any new service is added. Although this study does not discuss this financial issue, it is a major part of any decision to modify the program. Legislators who have a well defined proposal for additional option(s) may request the Research Division of the Legislative Affairs Agency to prepare an analysis of its costs, both direct and administrative.

The costs versus benefits of an option can be an important consideration in deciding whether or not the state should participate in it. For example, certain Medicaid options sometimes "save" state money, if that service is currently paid entirely from state funds or if it allows a client to receive less specialized and less expensive type of service that are more appropriate to this medical condition or problem. In 1976, the Alaska State Legislature added coverage of new limited group of needy eligibles who currently reside in nursing homes. The care for those persons at that time was paid for 100% from state general funds through the General Relief-Medical program. By adding that option, the state was able to claim 50% federal reimbursement for their care. Also, in 1973, the state added the intermediate nursing home care option. By covering this lower and less expensive level of nursing home care, many Medicaid recipients in skilled nursing, who did not require that level of treatment, could be placed in intermediate nursing care. The cost per day for each patient was reduced considerably.

The ease of administration is important also in evaluating the merits of certain options. The drug option, for example, requires that strict payment procedures regarding maximum allowable charges be in place. These are spelled out in some detail in the federal regulations, and the state must meet those requirements or risk loss of federal participation. Federal officials note that many of these cost containment mechanisms would normally be in place in any efficiently administered pharmaceuticals program, regardless of source of funding for it. The transfer of a program from state-only funding to federal assistance should cause minimal additional administrative expenses if adequate cost containment measures are in place in the existing program.

IV. MEDICAID CLIENT NEEDS

QUESTIONNAIRE OF PUBLIC ASSISTANCE SUPERVISORS

In Fall, 1976, a questionnaire was prepared to poll public assistance supervisors (eligibility work supervisors) on their estimation of client need for certain services based on their actual experience in the field. The questionnaire, prior to mailing, was reviewed by both the Division of Public Assistance and Department of Health and Social Services Commissioner's Office. The questionnaires were mailed to nineteen supervisors, many of whom had worked with public assistance clients for a significant period of time. (That sample of supervisors was chosen under the guidance of the Division of Public Assistance's Chief of Field Operations.) Approximately one month after mailing, a follow-up questionnaire was sent.

Fourteen, or 75%, of the supervisors polled responded to the questionnaire. All areas of the State were represented, including Anchorage, Fairbanks, Fort Yukon, Juneau, Kenai, Ketchikan, Nome, and Sitka. Each supervisor was asked specific questions concerning his or her evaluations of client need for Medicaid options not yet selected by the State.

QUESTION #1: In your experience, what optional services currently not covered under Medicaid do you feel your Medicaid eligible clients need most?

Table 2 shows the rank order obtained from the supervisor's responses to question #1. Interestingly, the top four items for each category (Adult Public Assistance and Aid to Families with Dependent Children program recipients) were the same. The ranking for dentures option differed slightly, being seen more necessary for older persons receiving Adult Public Assistance than the younger Aid to Families with Dependent Children recipients.

Since the Medicaid program requires that services included in the State Plan be offered equally to all eligible persons (except for certain specialized programs such as early childhood screening) the similar ranking of need options for both Adult Public Assistance and Aid to Families with Dependent Children Program is particularly meaningful. If it were called upon to evaluate new options, the legislature could be reasonably sure that any of the top four options (prescribed drugs, adult dental services, dentures, and physical therapy and related services) would be "needed" by both categories of clients.

QUESTION #2: On the average, how many Medicaid clients a month ask you if they can receive certain services?

Table 3 shows the responses by the supervisors concerning the requests of Medicaid eligibles for additional services. The responses to question #2 did not match the pattern formed from the supervisor's responses

TABLE 2

Average Ranking of Selected Medicaid
Options by Type of Public Assistance Client

Rank	Recipients of Adult Public Assistance	Recipients of Aid to Families with Dependent Children
1st	Prescribed Drugs	Prescribed Drugs
2nd	Adult Dental Services	Adult Dental Services
3rd	Dentures	Physical Therapy and Related Services
4th	Physical Therapy and Related Services	Dentures
5th	Hearing Aids [1]	Chiropractor's Services
6th	Prosthetic Devices	Hearing Aids [1]
7th	Chiropractor's Services	Prosthetic Devices
8th	Private Duty Nursing	Private Duty Nursing
9th	Podiatrist's Services	Podiatrist's Services
10th	Care for Patients 65 or Over in Tuberculosis Institutions	Care for Patients 65 or Over in Tuberculosis Institutions

[1] *Hearing aids, at the time the survey was conducted, were not included in the coverage program offered to all Medicaid clients. An interpretation of Medicaid law and regulation by federal officials allowed hearing aids to be covered as part of the treatment of speech, hearing, and language disorders option. This policy change was implemented by the Division of Public Assistance in November.*

to question #1. For example, the Medicaid prescribed drug option which was ranked as needed first for both program categories, received less than 50% of the requests made for adult dental services, which was ranked as needed second by the supervisors. This could be anticipated for Medicaid clients who do not have prior health resources equal or better in coverage to General Relief-Medical automatically receive their drugs through GRM. One Juneau public assistance supervisor noted that for these persons, eligibility for prescription drugs under GRM is automatically determined at the time that Medicaid eligibility is confirmed. Therefore, few Medicaid clients would ask for prescription drugs, since coverage is established at the time they enter the Medicaid program.

Aid to Families with Dependent Children recipients requested fewer services than did the Adult Public Assistance recipients. This was expected, for the recipients of AFDC tend to be young and thus often have less need for diverse health services. Also, many AFDC recipients are eligible for a wider range of treatment service through the Early Periodic, Diagnosis and Treatment Program (EPSDT), a child check-up program. For example, dental care is available to public assistance recipients under 21 as a referral through EPSDT, but currently persons over 21 who are mostly on Adult Public Assistance programs cannot routinely receive preventative dental care under any of the state medical assistance programs.

Many of the Medicaid options available under the federal program do not match with Alaska's availability of services. In rural Alaska, it would be difficult to obtain chiropractor's or podiatrist's services close to home. Also, the option of care for patients 65 or over in tuberculosis institutions is not really relevant to Alaska, since there are no tuberculosis sanatoriums in the State. Care for such conditions would have to be provided in nursing homes, hospitals, and physicians' offices, all of which are currently covered under Medicaid.

The low number of requests in all categories may be due to lack of client awareness that these additional services sometimes can be covered under the state funded medical assistance program, General Relief-Medical. Because of limited funds under that program, the Division of Public Assistance has not actively conducted an outreach program to inform clients of eligibility requirements and services covered. Also, many clients may be reluctant to ask for services, which they feel they stand a likelihood of being rejected. Dentures are a good example of this. Because of funding limitations, dentures can only be covered in extreme hardship situations. Clients often are informed of this policy from their dentists, public health nurses, or social workers, before a formal request is made to the Division of Public Assistance.

SURVEY OF "DENIALS" OF SERVICE RECORDS

The needs of clients were also analyzed through a survey of all denials of requests for additional services for Medicaid clients. Medicaid clients sometimes require services that are not included in the Medicaid

TABLE 3

Total Average Number of Medicaid-Eligibles Requesting Optional Services Monthly by Program Category

Option	Recipients of Adult Public Assistance	Recipients of Aid to Families with Dependent Children	Total
Adult Dental Services	81.5	88.0	169.5
Dentures	60.5	21.0	81.5
Prescribed Drugs	38.0	39.0	77.0
Physical Therapy and Related Services	20.5	23.0	43.5
Hearing Aids [1]	27.0	16.0	43.0
Prosthetic Devices	25.5	12.0	37.5
Chiropractor's Services	15.5	15.0	30.5
Private Duty Nursing	13.5	5.5	19.0
Podiatrist's Services	4.0	1 5	5.5
Care for Patients 65 or Over in Tuberculosis Institutions	1.0	0.0	1.0
Total	287.0	221.0	508.0

[1] *Hearing aids, at the time of the survey, were not included in the coverage program offered to all Medicaid clients. An interpretation by federal officials of the treatment of speech, hearing, and language disorders options allowed hearing aids to be covered as part of a treament plan. This policy change was implemented in November.*

TABLE 4

Denials of Optional Services for Medicaid-Eligibles
(September 1, 1972 to July 31, 1976) [1]

1.	Dental Services	140 [2]
2.	Therapy	63
3.	Dentures	44 [2]
4.	Prosthetic Devices	37
5.	Prescription Drugs	28
6.	Hearing Aids	15 [3]
7.	Chiropractor's Services	3
8.	Podiatrist's Services	2
9.	Private Duty Nursing	1
10.	Tuberculosis Institution for 65 or Over	0

[1] *The figure includes only denials of requests submitted in writing to the Division of Public Assistance, Central Office. That Division also handles numbers of informal telephone requests, which are not included in these figures.*

[2] *The figure excludes Delta Dental Corporation denials. Delta Dental Corporation currently reviews and evaluates all public assistance clients requests for care. These records were not readily available in Juneau for the study period. In FY76, Delta Dental denied 454 Medicaid adults for dental services and 20 Medicaid adults for dentures.*

[3] *Hearing aids were added to the Medicaid program as of November, 1976. An interpretation by federal officials of the treatment of speech, hearing, and language disorders option added last session allowed hearing aids to be covered as part of the treatment plan.*

program. If the client has no other prior health care resource equal or better in coverage to that of General Relief-Medical (GRM) Program, that client may be able to receive those services through GRM. Since GRM is funded entirely by state general funds, monies are strictly controlled and extremely limited. In order to insure the equitable use of the funds, many services require pre-authorization by the Central Office of the Division of Public Assistance before they can be provided and paid for by the General Relief-Medical Program.

Requests for service can come in two forms: letters and phone calls. The Division of Public Assistance maintains files of only written requests for service. During the month of July, 1976, a tabulation of those records was performed. Table 4 shows the number of denials of optional services which were requested by Medicaid clients during the period September 1, 1972 to July 31, 1976.

Note that the top four options that eligibility work supervisors felt their clients needed appeared within the top five items requested for those clients. Thus, the public assistance supervisors confirm the client perceived need for dental services, therapy, dentures, and prescription drugs. The survey also revealed a client perceived need for prosthetic devices (such as artificial limbs, crutches, canes, etc.).

These tabulations of requests for service represent only written requests. Because of the "emergency" nature of some services and the ease of telephoning for approval, many denials of services are not represented in the written files. Also, many clients will not request a service which they know is unavailable or which they stand a likelihood of being denied. Clearly, then, these figures substantially under-represent client need.

RESULTS OF STUDY

1. Basically State of Alaska eligibility work supervisors feel that their Medicaid-eligible clients most need:

1. Prescription Drugs
2. Adult Dental Services
3. Dentures*
4. Physical Therapy and Related Services*

* *The rank order of these services varies by program which client is receiving aid. The adult public assistance clients are seen to need dentures much more frequently than do clients of Aid to Families with Dependent Children.*

2. The top four services that eligibility work supervisors feel that their Medicaid-eligible clients ask for most frequently are:

1. Adult Dental Services
2. Dentures
3. Prescription Drugs
4. Physical Therapy and Related Services

3. Records of "denials" of requests for services to be provided from the General Relief-Medical Program to Medicaid recipients indicate that the following services are requested and denied most frequently:

1. Dental Services
2. Therapy
3. Dentures
4. Prosthetic Devices

4. The records for the number of client requests generally underestimate client need because only written records are available and because many public assistance clients will not request a service which they know is unavailable or which they stand a likelihood of being denied.

PART V. ANALYSIS OF OTHER STATES' EXPERIENCE WITH SELECTED OPTIONS

OVERVIEW OF STATES PARTICIPATING IN SELECTED OPTIONS

The survey of denials of requests for services and tabulation of the responses to the questionnaire sent to the public assistance supervisors point to four service options which clients are perceived as needing most. These are: prescription drugs, adult dental services, dentures, and physical therapy and related services.

These optional services have been elected by many other states. For example--

- 96% of all states and United States protectorates have Prescription Drug Option *
- 64% of all states and United States protectorates have Dental Services Option *
- 60% of all states and United States protectorates have Physical Therapy and Related Services Option *

**Only states participating in Medicaid program are included in total figures. Data are as of June 1, 1976 and were obtained from United States Department of Health, Education and Welfare. (Data are unavailable on the number of states offering denture service to their eligibles.)*

Many states added these services in the mid-1960's when Medicaid first began. However, it was found that some states eliminated or restricted some of these options during the period January 1, 1975 to July 1, 1976. With the skyrocketing cost of medical care and the increasing demand upon state dollars, we decided to review the options that were selected as needed by public assistance supervisors and contact those states that had recently modified them.

QUESTIONNAIRE OF STATES MODIFYING SERVICES

In early December, the Research Division of the Legislative Affairs Agency prepared a questionnaire to ask the views of state Medicaid program administrators regarding the options they had recently restricted. Fourteen states that had recently modified optional services included in this survey were contacted. Eleven states (or 79%) responded to the questionnaire. Since existing federal reports do not pinpoint the number of states modifying their denture coverage, that option was not included in the discussion.

State Experience With Prescription Drug Option

Of the 51 states providing prescription drugs, 11 states (or 22%) reduced their coverage during the period of January 1, 1975 - July 1, 1976. Seven of those states responded to the questionnaire. The majority of those states reduced coverage of drugs in order to reduce expenditure of state dollars. They noted that it created a hardship, but most clients felt coverage of only certain drugs was better than no coverage at all of them. Basically, controls were maintained by limiting the number of monthly prescriptions any one client could obtain and by limiting the types of drugs covered.

It is interesting to note that one state, Oklahoma, added the drug option during this period. In responding to the questionnaire, the director of the Oklahoma program stated that the option was added at the direction of their legislature. Certain administrative restrictions were imposed when the option was added. Prescriptions were limited to three per client per month and the different categories of drugs were also restricted. The director noted that public reaction to the addition of services has been generally favorable.

State Experience With Dental Services Option

13% of the states which chose the dental services option eliminated it during the period January 1, 1975 to July 1, 1976. (Recently two states, Massachusetts and New Jersey, have reinstated coverage of this option). Five of the seven states eliminating this option responded to the survey.

Generally, these five states found that the adult dental services option was needed by clients and was easy to administer. Restrictions on the option were basically due to lack of state funds. In one instance, New Hampshire, the legislature set a priority list of services that were to be provided. Since adult dental services received a low priority and funds were limited, the option was dropped. The dropping of the option generated considerable negative client reaction, as evidenced primarily by an increased number of client administrative appeals on this issue.

State Experience With Physical Therapy and Related Services Option

Michigan was the only one of 32 states which included physical therapy and related services in their programs and chose to modify that option during the period January 1, 1975 to July 1, 1976. The Michigan Medicaid program responded to the questionnaire and noted its experience with the option. The respondent found that the option was needed by clients; however, the cut, an elimination of physical therapy in long term care institutions, was made in response to lack of sufficient funding. To date, this change in the program has not been rescinded.

RESULTS

1. At least 60% of all states participating in the Medicaid program also cover some form of prescription drugs, dental services, and physical therapy and related services options for their clients. These services were among the top four requested by Alaska public assistance clients and seen as needed most for them according to a survey of Alaska public assistance supervisors. (Nationwide data on the numbers of states covering dentures in their programs are not available.)

2. Two of the top four services seen as needed for public assistance clients, prescription drugs and dental services, were also the top two services restricted or eliminated by other states during the period January 1, 1975 - July 1, 1976. (See Part IV for survey results.)

3. Most states modified the options to reduce expenditure of state funds. They did not drop or restrict them because of lack of client need or complexities in administration.

4. Restrictions of service options were generally done in four ways: limiting coverage of service, limiting client access, reducing provider fee payments, and charging clients small fees.

5. Reduction of fees generally brought strong reaction by the provider sector.

6. The states believe that limiting coverage to certain number of services allowable per month and restricting coverage of type of service allowable under the option was generally more acceptable than totally eliminating it.

7. In most cases, states modifying these options chose to restrict prescription drug coverage but they chose to eliminate dental services (except as was required under the early screening program).

8. In some cases states reinstated changes in options a short time after they were made. This was generally due to the strong reaction received from the groups affected.

PART VI. CONCLUSIONS TO THE STUDY

From the responses to the questionnaire sent to public assistance supervisors concerning client need, the survey of denial records of requests for additional services, and the responses from other states regarding their experience with the program, the following conclusions can be drawn:

1. Of Medicaid optional services available that Alaska does not currently provide under its program, public assistance clients appear to need most(in descending order of need):

   (1) Prescription Drugs
   (2) Dental Services
   (3) Dentures*
   (4) Physical Therapy and Related Services*

   * *The rank order of these services varies by program under which client is receiving aid. The adult public assistance clients are seen to need dentures as a higher priority than do clients of Aid to Families with Dependent Children.*

2. Three of the optional services listed in Item #1 are included by over 60% of the states participating in Medicaid. Prescription drugs, for example, are included in 95% of all state programs. (Data on coverage of dentures are generally unavailable on nationwide basis.)

3. Two of the options that clients "need" most--prescription drugs and dental services--topped the list of options that states reduced or eliminated during the period January 1, 1975 - July 1, 1976. These modifications were done as cost containment measures and not as a response to lack of client need or to complexities of administering the options.

4. Alaska could be reasonably assured that services listed in Item #1 would be needed and used by clients. The choice to include them appears to be a decision based primarily on the state's availability of state funds. The state could choose to cover an option, but restrict that option in many ways to meet funding limitations.

GLOSSARY OF TERMS

AB - See Aid to the Blind.

AD - See Aid to Disabled.

ADC - See Aid to Families with Dependent Children.

AFDC - See Aid to Families with Dependent Children.

APA - See Adult Public Assistance.

APD - See Aid to Disabled. Stands for Aid to Permanently Disabled.

Adult Public Assistance - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education, and Welfare. Designed to provide a state-legislated level of cash assistance to aged, blind, and disabled persons who meet certain income and resource requirements, and who are predominately eligible for Supplemental Security Income (SSI) payments. State administrative costs as well as actual cost payments are 100% state only costs.

Aid to the Blind - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education, and Welfare. Designed to provide a state legislated level of cash assistance to those eligible blind persons who meet certain income and resource requirements, and who are predominately eligible for SSI payments. It is considered an "Adult Public Assistance" program.

Aid to Disabled - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education and Welfare. Designed to provide a state legislated level of cash assistance to those eligible disabled persons who meet certain income and resource requirements and who are predominately eligible for SSI payments. It is considered an "Adult Public Assistance" program.

Aid to Families with Dependent Children - A federal program administered by the state through an approved state plan filed with the U.S. Department of Health, Education, and Welfare. Designed to provide a state-legislated level of cash assistance to dependent children who have been deprived of one or both parents, and who meet certain income and resource requirements. Both administration costs and the actual cash payments provided to recipients are shared equally (50%) by the state and federal government.

Categorical Assistance - Aid, in form of income maintenance, to certain needy persons who receive assistance under Old Age Assistance, Aid to the Blind, Aid to the Disabled, Supplemental Security Income, and Aid to Families of Dependent Children programs.

Compliance - In a federal program, the act of performing certain set program functions in accordance with those requirements outlined in the state plan, federal law, and regulation. Generally, meeting all federal program requirements is necessary to receive federal financial participation in the program.

DHSS - See Department of Health and Social Services.

Department of Health and Social Services - A department of the executive branch designated to be single state agency to administer the Medicaid program for the state of Alaska.

EPSDT - See Early and Periodic Screening, Diagnosis and Treatment.

Early and Periodic Screening, Diagnosis and Treatment - A mandatory service under Medicaid which provides for special check-ups at set intervals for certain needy children, in order to find and treat health problems before they become serious. Coverage includes only those Medicaid eligibles under 21 years of age.

Eligible - A person qualified to receive assistance funded under particular program. Eligibility criteria can vary, so that eligibility must be established on program by program basis.

FFP - See Federal Financial Participation.

Federal Financial Participation - The means by which the federal government asssists in supporting certain specific program. The federal government generally provides aid by two methods: 1) matching dollars by set percentage or 2) formula money grants.

GRM - See General Relief-Medical.

General Relief-Medical - A state emergency medical program designed to respond to immediate medical needs of Alaskan families in time of extreme financial crisis. All assistance rendered under this program is in the form of vendor payments to medical providers. State administrative costs as well as actual cash payments to vendors are 100% state-only costs.

Intermediate Nursing Care - An optional service available to be provided under Medicaid program. Denotes a less intensive and less expensive level of around-the-clock nursing care, in comparison to skilled nursing.

Mandatory Coverage - A portion of the Medicaid program that is required to be covered by each and every state in the program, in order for the state to be entitled to federal financial participation. Mandatory coverage items concern persons eligible to receive services and the services provided to those persons. States can still administratively "control" mandatory services and not jeopardize federal financial participation by controlling the amount of service available to client, amount of financial participation (deductible required to be paid by client) in order for the client to receive such services, and other mechanisms.

Medicaid - A federal assistance program established by Title XIX of the Social Security Act and administered by the state through an approved state plan filed with U.S. Department of Health, Education, and Welfare. Designed to provide medical coverage for recipients of Aid to Families With Dependent Children; Supplemental Security Income, elderly and blind recipients of Adult Public Assistance and those disabled persons who meet federal definitions of disability; and certain other groups. State administrative costs are shared equally (50%) by the state and federal governments, except for professional medical support personnel who are funded at 75% federal reimbursement. Actual medical vendor payments are shared equally (50%) by the state and federal government, except for family planning which is funded at 90% federal reimbursement.

Medically Needy - An optional group of eligibles for whom federal reimbursement for necessary medical care may be covered under the Medicaid program. Generally includes individuals who have insufficient income and resources to meet the costs of necessary medical or remedial care and services. Presently Alaska does not include the medically needy under its Medicaid program.

Medicare - An insurance program administered solely by the federal government to provide payments for necessary medical care for those people, rich or poor, who receive Social Security payments.

OAA - See Old Age Assistance.

Old Age Assistance - A cash supplemental program administered by the state in cooperation with the U.S. Department of Health, Education, and Welfare. Designed to provide a state legislated level of cash assistance to those eligible persons 65 and over who meet certain income and resource requirements and who are predominately eligible for Supplemental Security Income payments. It is considered an "Adult Public Assistance" program.

Option - A portion of the Medicaid program that is discretionary on the part of the state. Options generally deal with persons eligible for coverage or medical services available for those eligible persons. Options are set out in federal law and regulations and are generally eligible for federal financial participation. Since the choice of options is up to each state, options can generally be designed to fit the state's unique needs and available resources, but each option chosen must meet certain broad federal program requirements.

Public Assistance - A division of Department of Health and Social Services, responsible for administration of the Medicaid, General Relief-Medical, and Income Maintenance programs. This division determines the eligibility of state's residents for such services by carefully reviewing the person's income, resources, and other factors according to state and federal standards.

Quality Control - An office of the Department of Health and Social Services which is assigned the responsibility to verify that

randomly selected cases are eligible to receive services in month that service was rendered. The verification consists of check of files, client contact, and collateral sources.

Recipient - A person receiving income maintenance or assistance services funded under a particular program.

SSA - See Social Security Administration.

SSI - See Supplemental Security Income.

Skilled Nursing Care - A mandatory service required to be provided under the Medicaid program. Denotes highly professional round-the-clock nursing care and monitoring. Generally more expensive and more specialized care than intermediate care.

Social Security Administration - An agency of the federal Department of Health, Education and Welfare assigned the responsibility to administer Social Security, Medicare, and Supplemental Security Income programs.

State Plan - A contract between the single state agency to administer the Medicaid program and the federal Department of Health, Education and Welfare, specifying conditions to be met in order to be eligible for federal financial participation.

Supplemental Security Income - An assistance program funded and administered by federal government which provides payments to certain needy persons who are aged, blind, or disabled and meet program and financial requirements. Payments are uniform nationwide and are based on need.

Title XIX - A portion of the federal Social Security Act which outlines the Medicaid program.

Title XVIII - A portion of federal Social Security Act which outlines the Medicare program.

Utilization Review - Random records check of sample institutional Medicaid billing to insure that services rendered match with those billed to the program. Verifies that institutional records are complete, accurate, and up-to-date. Examines for overuse or misuse of treatment and professional resources and the patient's duration of stay relating to those resources.

THE POLITICAL PLANNING OF A STATE HEALTH INSURANCE PROGRAM

By Senator Donald D. H. Ching
Majority Leader
Hawaii State Senate

The concept of prepaid health care based on mandatory employment-related coverage was a brand new idea when first introduced in the Hawaii Legislature in 1971. It became law three years later as Act 210 of the 1974 legislative session.

Enactment of our Prepaid Health Care Law climaxed several years of lively discussion in the Legislature, and for many of us who supported it, Act 210 marked yet another milestone in the growing body of progressive legislation placed in our statutes since our Islands became a sovereign state in 1959.

Measured against the national background, the law represented a significant achievement in terms of social progress. Yet, while there was much discussion between introduction and enactment, the proposal was not widely viewed as politically controversial by the public at large. As a matter of fact, in my nearly 20 years of experience in our Legislature, I have seen a lot more heat generated over issues of considerably lesser public import.

To be sure, there was resistance and opposition from the traditional opponents of so-called "social legislation." But there was not the hue and cry that one might expect, considering the novelty of the concept.

This is not to say that the spectrum of political thought in Hawaii does not cover any ground to the right of center. Let me assure you we do have traditional conservative views held by many in our State, and I, for one, believe this is a healthy condition. But to the credit of those who did not adhere to the concept, their opposition was not based on the emotionalism that too often attends and distorts vital public issues of the day.

I believe the law was generally accepted by the public because of the kind of political climate we have in Hawaii and because the law was viewed as a logical extension of the kinds of programs that were already in effect at the time.

Let me briefly describe our Prepaid Health Care Law, then attempt to present an account of its chronological place in the context of Hawaii's legislative history.

The Act requires virtually every employer in the State to provide regular employees a health insurance program and to contribute at least one-half the premium cost for the employees' coverage. The major categories of employees excluded are insurance and real estate salesmen paid entirely by commissions and individuals under 21 working under a parental relationship.

The employee's contribution is limited to no more than 1.5 per cent of his monthly salary. A "regular" employee is defined as one who works at least 20 hours a week, excepting seasonal hires in Hawaii's pineapple industry.

Health plans negotiated under collective bargaining agreements are exempt because such negotiated benefits are, for the most part, more liberal in coverage or employer contributions than required under the Act.

An employer can elect to provide a plan which obligates the insurer to either reimburse the expenses of health care or to directly furnish the required health care benefits. The level of benefits provided must be equal to or medically reasonably substitutable for those benefits provided by prepaid health care plans of each type -- direct or reimbursed -- which has the largest number of subscribers in the State. In Hawaii, the standards are thus based on the Kaiser Health Foundation's Plan I, in the case of direct services, and the Hawaii Medical Service Association's (Blue Shield) Plan IV, in the case of reimbursed expenses. Both the Kaiser and HMSA plans are basic, comprehensive medical plans emphasizing ambulatory care.

Plans offered by other insurers may be provided, upon review and approval of a seven-member advisory council comprised of consumer, employer, medical profession, and health plan representatives.

What kind of coverage is required by our law? Every qualifying plan must include the following:

-- 120 days of hospital benefits, plus outpatient services.

-- surgical benefits, including anesthesiologist services.

-- medical services, including home, office, hospital visits, and intensive medical care.

-- laboratory, x-ray, and radio-therapeutic services necessary for diagnosis and treatment.

-- maternity benefits, provided an employee has been covered for nine months prior to childbirth.

-- and, under an amendment added last year, substance abuse benefits for alcoholism and drug addiction, including outpatient services and detoxification and acute care benefits.

The foregoing summarizes the basic provisions of our law.

How, then, did we come to enact what some may view as an extremely liberal mandatory health insurance program?

First, it should be noted that we have a substantial body of progressive and advanced social legislation in Hawaii. This is true of our labor laws, our educational system, our public welfare program, and in our judicial system. For instance, our minimum wage law, wage and hour law, workers' compensation, temporary disability insurance, and unemployment insurance programs all have standards comparable to the highest in the Nation. In addition, we also have a public defender program and a criminal injuries compensation law. We also have a no-fault insurance law and a medical malpractice law, the latter amended this year to remove the mandatory feature and to permit doctors the option of forming cooperative indemnity plans to protect themselves against liability judgments.

Our public assistance program is so liberal it is causing us severe financial strains -- but that's another story, and I won't digress into it, except to note that we eagerly look forward to federal reform initiatives promised by the Carter Administration.

The political foundation for eventual enactment of our prepaid health care law was further set during the mid-sixties in a program popularly labeled "The New Hawaii," adopted jointly by the legislative majorities and the Administration.

During this period, dramatic changes were advanced in terms of Hawaii's social, economic, and political conditions. Basically, the stated objective was to enact laws and programs to insure equal treatment and equal opportunities for all citizens. If this sounds simplistic, it should be borne in mind that Hawaii was pretty much the political domain of the sugar and pineapple plantation interests up until the end of World War II and that when, for the first time in our history, we elected a Democratic Governor and Democratic majorities in both houses of the State Legislature in 1962, there were not a few who thought the revolution was at hand.

But the changes we sought were achieved in orderly, not revolutionary, fashion. And there was early ferment for novel and innovative legislation to extend equal opportunity in basic human concerns to all segments of our society.

It appeared logical to move toward some form of mandatory prepaid health care law. The question then was how best to extend coverage to the uninsured working men and women

of Hawaii and thereby provide them "equal treatment" as a matter of social equity. Moreover, how could this be best achieved without any substantial added costs to the State, bearing in mind that our centralized system imposes unusually heavy financial burdens on the State?

To determine cost factors and the numbers and classes of employees in the uncovered "gap group. a study was commissioned through the Legislative Reference Bureau, the Legislature's principal research arm. Dr. Stefan A. Riesenfeld, former University of California law professor and a widely recognized authority on social legislation, now counsel to the U.S. State Department, was selected to do the research. Professor Riesenfeld had prepared an earlier report for the Legislature on temporary disability insurance, which study was extremely valuable to us in enacting our TDI law in 1969.

The Riesenfeld report, published in 1971, was a thorough and comprehensive study. Acknowledging the difficulty of precisely quantifying need, the report generally concluded that, among the State's employed, 11.7 per cent did not have hospital coverage, 13.5 per cent lacked surgical coverage, and 17.2 per cent did not have regular medical insurance.

The existence of a significant number of otherwise uncovered potential beneficiaries of the proposed legislation formed the primary policy consideration of the program. Other factors considered included the rising costs of health care and the need to assue the most practical method of ensuring the financial availability of health care for Hawaii's working men and women. Thus, the overall health of our population was the over-riding concern; without ensuring the

ready accessibility of health care, how could optimum health care be maintained?

Data compiled and analyzed in the report were very thorough. Sources outside the State included the Health Insurance Association of America, the Health Insurance Institute, the Bureau of Labor Statistics, the Social Security Administration Bureau of the Census. Information from State agencies included data from the State Statistician and the Departments of Taxation, Planning and Economic Development, Social Services and Housing, and Labor and Industrial Relations. Data was also gathered from labor unions, the Hawaii Employers Council, the HMSA, Kaiser Foundation, and through questionnaires mailed to all employers covered by the Hawaii Employment Security Law.

Data used included statistics relative to the following:

-- Population by age levels, civilian and military. The latter distinction was important because of the sizeable permanent military presence in Hawaii.

-- Labor force, public and private.

-- Population entited to Medicare.

-- Extent of prepaid health plan coverage for hospital, surgical, and medical benefits, both for subscribers and dependents.

-- Size and type of business of private employers.

-- Medical assistance recipients and expenditures.

As indicated by the sources of data, the full range of interest groups became involved in the process, whether employer or employee oriented.

During our legislative committee hearings, testimony was presented by representatives of the insurance industry, the health professions, the University of Hawaii Schools of Public Health and Social Work, the Comprehensive Health Planning Council, and a wide range of individual citizens.

There was very little question as to whether the plan proposed would be comprehensive or catastrophic in its approach. The Riesenfeld report recommended the comprehensive coverage plan and specifically recommended the adoption of prevailing coverages in the State, which then became the legal minimum. This reflected the health care habits and patterns of the State and set a floor without unduly disrupting the existing schedules of coverage.

The decision to make coverage mandatory was central to the legislation proposed. Before enactment of Act 210, voluntary participation was, in effect, the public policy of the State.

As to the question of affordability, the only new cost factors imposed upon the State weere founded upon the administrative requirements of the law and anticipated premium supplementation.

Administration of the new program proved to be quite easy, as it was smoothly meshed in as a responsibility of the Disability Compensation Division of the State's Department of Labor and Industrial Relations. Thus, three important employee benefits programs were placed under one umbrella: the well-established Worker's Compensation Law; the TDI law passed in 1969; and the 1974 Prepaid Health Care Act. (Incidentally,

you may have noticed that what used to be known as Workmen's Compensation is now referred to as Workers' Compensation in our State, reflecting the many similar amendments we have adopted consonant to our accepted policy on equal rights.)

Much to our pleasant surprise, the administrative expenses of Act 210 have been comparatively low. Initially, we authorized 11 new positions in the Disability Compensation Division, with an appropriation of $250,000 in General Funds to cover salaries and other expenses. Much to the division's credit, Act 210 was implemented with substantially the existing staff. The first appropriation thus lapsed, and it was renewed this year at the same annual level on the expectation that additional personnel will be recruited during the next biennium.

A feature of Act 210 is a provision for premium supplementation financed by the State to cover employer premium requirements caused by limits imposed on employee contributions. This feature subsidizing employer contributions was included to provide a cost protection for marginal small businesses. Initially, $375,000 was set aside in a trust fund for premium supplementation. Again, to our pleasant surprise, there has been little need to supplement premiums. It's estimated that, to date, only some $20,000 to $30,000 has been tapped from the trust fund in subsidies. Meanwhile, the fund is held in an interest-earning status.

What are the numbers that actually surfaced as a consequence of Act 210? The division reports that about 18,500 employers have thus far been registered. However, the extent

of newly covered workers has been difficult to establish because many of the registered employers had voluntary programs in effect before Act 210. Dr. Riesenfeld has estimated some 40,000 employees were not covered at the time he conducted his study. The Disability Compensation Division is of the opinion that actually more than 40,000 received new benefits because of the requirement that employers cover at least half of the premium costs.

Of the 18,500 employers, all but some 1,000 have elected plans offered by the State's two major insurers -- HMSA and Kaiser. The approximately 1,000 employers who have opted for plans offered by other insurers are the major source of additional workload upon the division. Each submittal in this category must be reviewed by the advisory council.

The advisory council provision serves another purpose. During the course of legislative hearings on the act, public health advocates had expressed concern that the required benefits might be too rigid and unresponsive to changes in health care over the years. The Prepaid Health Care Advisory Council provisions were thus added to establish an appropriate agent to review medical equivalency of benefits.

To conclude, in light of Hawaii's experience, I believe any national health insurance plan should take into consideration the course that we have opted for. I am confident the standards we have set would meet any that a federal law would impose. As a means of encouraging other states to follow suit, or to adopt a true state plan such as Rhode Island's,

I suggest federal legislation provide support grants to at least cover administrative costs and any necessary premium supplementation expenses.

Finally, let me summarize the conditions that led to the successful adoption and implementation of Hawaii's Prepaid Health Care Act:

1 -- A political climate sympathetic to social needs.

2 -- Timeliness in terms of progressive improvements to the general body of social legislation already on the books.

3 -- A comprehensive study of a state's needs, to arm proponents with the information necessary to justify the proposed legislation.

4 -- Open discussion involving all interested elements within the public.

5 -- The last may be an element not very common to other jurisdictions, but I believe it was an important consideration in our own deliberations. This is the fact, well established in our study, that the majority of employees insured under voluntary plans or through government-employee programs were covered under plans offered by two major insurers in the State. Having a clear pattern to follow in prevailing benefits, it was easier to overcome resistance against extending similar benefits to all the State's working men and women.

I hope our experience and the foregoing thoughts presented for your discussion prove helpful to you in your own endeavors to develop plans for extending health care benefits to all others who need such coverage in our Nation.

Mahalo.

STATE HEALTH INSURE. #4

SECTION BY SECTION COMPARISON OF HB 977 AND SIMILAR LEGISLATION FROM OTHER JURISDICTIONS

SECTION 1	
18.12.010: requires employers to provide qualified coverage for regular employees and their dependents.	Based on Hawaii law except that minimum standard of coverage is based on prevailing coverage and dependents are not covered.
18.12.020: allows employers to select type of plan and contractor.	Based on Hawaii law.
large employers must provide employees with a "dual option" or choice of plan type to enroll in.	Based on Minnesota law.
18.12.030 - 18.12.130: details of employer coverage.	Same as Hawaii law.
18.12.140: premium supplementation.	Based on Hawaii law except that Hawaii sets up a separate fund.
18.12.150 - 18.12.200: existing plans, termination of chapter, and definitions.	Same as Hawaii law.
SECTION 2	
21.50.010: duties of insurers.	Same as Minnesota law.
21.50.020: certification of qualified plans.	Same as Minnesota law.
21.50.030: minimum benefits of qualified plan.	Based on Minnesota law except that Alaska law covers medically necessary transportation and alcoholism treatment, and Minnesota law delays the effective date of coverage for preventative care services.
21.50.040 - 21.50.150: details of state plan and administration.	Same as Minnesota law.
SECTION 3	
47.05.070 - 47.05.100: medical assistance by insurance or service contracts.	Same as Oregon law.

47.05.110: cash advances.	No model.
47.05.120: interest on late payments.	No model.
SECTION 4	
Extends Medicaid to all optional eligible groups.	No model.
SECTION 5	
Expands Medicaid coverage to optional services.	No model.
SECTION 6	
General Relief-Medically Needy program.	No model.
SECTION 7	
Expands AFDC and Medicaid coverage to unborn children.	No model.
SECTION 8	
Repeals AS 47.07.020(d).	Companion to SECTION 4.
SECTION 9	
Adjustment of Employer sponsored plans.	Same as Hawaii law.

March 24, 1980

Representative Thelma Buchholdt
State Representative
District 9 (Spenard)
Chair, House HFSS Committee
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Buchholdt:

This is to acknowledge receipt of your letter of March 18, 1980, inviting me to testify on proposed legislation similar to Hawaii's "Prepaid Health Care Act." Because the subject matter is not related at all with the state department which I am presently serving, I originally could not justify my going to Juneau as official State of Hawaii business. However, my Director and the Governor both feel that if my presence would assist Alaska in enacting progressive health care legislation, I would be given leave to go to Juneau with Hawaii's experience in this field.

I have spoken with Ms. Sorice of your office and am making plans to arrive in Juneau on Sunday, March 30, 1980, and will be available to testify on March 31 and April 1, 1980, if necessary.

I am looking forward to being of any assistance that I can possibly render in your efforts to enact such a bill. I think it has been of much benefit to the people of the State of Hawaii.

May I give you a short biographical sketch so that you may use this in further evaluation of my testimony next week:

1. Member of the Hawaii Legislature from 1959-1978 (8 years-House of Representatives; 12 years-Senate).

2. Attorney-at-Law.

3. Former Vice-President of the Bank of Hawaii (1963-1979).

4. Presently Deputy Director of the Department of Regulatory Agencies, State of Hawaii.

5. Member of the Board of Directors-Hawaii Medical Service Association (Blue Shield and Blue Cross Plan) (1965 to present), presently serving as its President.

I have never been to the great State of Alaska, and I am looking forward to my first visit.

Very truly yours,

Donald Ching

Donald D. H. Ching
Deputy Director

Ms. Jan Sorice
Health, Education & Social Services
State of Alaska
Room 108 State Capitol
Juneau, Alaska 99801

Dear Ms. Sorice:

This will confirm our telephone conversation today. You advised you are sending a copy of the proposed health legislation for my review prior to presenting testimony relative to Minnesota's experience with similar legislation known as the Minnesota Comprehensive Health Act of 1976.

My testimony will be heard between 1:30 p.m. and 3:30 p.m. on Monday, March 31. I shall report to your office at 10 a.m. for a final briefing prior to my testimony.

Enclosed is a copy of travel plans from Minneapolis to Juneau. You have graciously arranged for lodging March 29 through March 31 at the Baranof Hotel.

I look forward to meeting you, the interested members of your legislature, and visiting your capital city.

Sincerely,

John T. Ingrassia

Honorable Thelma Bucholdt
Alaska State House of Representatives
Pouch V
Juneau, AK 99811

Dear Thelma:

I have enclosed a copy of Women for Political Action's position on health issues before your committee.

We furnished a statement to Susan Johnson at AKPIRG for use as a teleconference hearing on April 1, 1980 in Anchorage.

Very truly yours,

Linda O'Bannon

Linda O'Bannon
Chair, WPA Legislative
Committee
3281 Montpelier Ct.
Anchorage, AK 99503

LO/vlm

March 26, 1980

Women for Political Action, an Anchorage based organization, affiliated with the National Women's Political Caucus recognizes the difficulty that many low income persons in Alaska have in locating and procuring adequate medical care and services. Many of the Alaskans who are not receiving adequate medical care are women and children, who traditionally in our society have been without political power and who are often at the lower end of the economic scale.

Women for Political Action endorses the efforts of those legislators who are attempting to find the solution to the problem of inadequate medical care for low income Alaskans. In a State fortunate enough to be able to consider repeal of state income taxes and payments to its citizens from the permanent fund, it seems reasonable for that state to establish aid and support programs designed to promote adequate medical care of all of its citizens.

AMENDMENTS

p.5 line 3:(2) protected by health insurance or a prepaid health care plan established under a law of the United States other than as a beneficiary of a residual health care plan:

This amendment is mainly for clarification for the Native groups of the state; it ensures that they are eligible for the benefits of the legislation and that they are not excluded because of Indian Health Services.

p. 15, line 11: (O) substance abuse

This includes drug and alcohol abuse

p. 34 line 12: Sec. 8. AS 47.07.020 (d) is repealed

p. 30, line 7: Sec. 47.05.070. MEDICAL ASSISTANCE BY INSURANCE OR SERVICE CONTRACTS. (a) A person eligible for medical assistance may elect to obtain policies of insurance or health care service contracts in lieu of receiving medical assistance by direct payments to providers and upon such election, the commissioner shall use available medical assistance funds to purchase and pay premiums on policies of insurance or pay the expenses on health care service contracts or medical or hospital service contracts that provide one or more of the medical and remedial care and services available under state medical assistance programs.

This amendment lets the client choose between a health insurance policy or health care service contract and medical assistance by direct payments.

GEORGE R. ARIYOSHI
GOVERNOR

March 24, 1980

Representative Thelma Buchholdt
State Representative
District 9 (Spenard)
Chair, House HESS Committee
Alaska State Legislature
Pouch V, State Capitol
Juneau, Alaska 99811

Dear Representative Buchholdt:

This is to acknowledge receipt of your letter of March 18, 1980, inviting me to testify on proposed legislation similar to Hawaii's "Prepaid Health Care Act." Because the subject matter is not related at all with the state department which I am presently serving, I originally could not justify my going to Juneau as official State of Hawaii business. However, my Director and the Governor both feel that if my presence would assist Alaska in enacting progressive health care legislation, I would be given leave to go to Juneau with Hawaii's experience in this field.

I have spoken with Ms. Sorice of your office and am making plans to arrive in Juneau on Sunday, March 30, 1980, and will be available to testify on March 31 and April 1, 1980, if necessary.

I am looking forward to being of any assistance that I can possibly render in your efforts to enact such a bill. I think it has been of much benefit to the people of the State of Hawaii.

May I give you a short biographical sketch so that you may use this in further evaluation of my testimony next week:

1. Member of the Hawaii Legislature from 1959-1978 (8 years-House of Representatives, 2 years-Senate).

2. Attorney-at-Law.

3. Former Vice-President of the Bank of Hawaii '1963-1979).

4. Presently Deputy Director of the Department of Regulatory Agencies, State of Hawaii.

5. Member of the Board of Directors-Hawaii Medical Service Association (Blue Shield and Blue Cross Plan) (1965 to present), presently serving as its President.

I have never been to the great State of Alaska, and I am looking forward to my first visit.

Very truly yours,

Donald D. H. Ching
Deputy Director

HAWAII'S PREPAID HEALTH CARE ACT

George Yuen

Director of Health, State of Hawaii

HAWAII'S PREPAID HEALTH CARE ACT

George Yuen

Director of Health, State of Hawaii

September 24, 1979

First of all, let me say that I am very happy to be in the backyard of the Denver Broncos and the Nuggets. As you know, Hawaii does not have a professional football team and neither do we have a professional basketball team so that, as a matter of practice, we adopt certain professional teams on the mainland and consider them as our "home team," so to speak. So I can say that we have alot of Bronco and Nugget fans in Hawaii. By the way, most of the games are televised live in Hawaii so we are in pretty close touch with what is going on.

Secondly, whenever I speak away from home, I really can't resist the urge to extend greetings to you from Hawaii, the youngest and healthiest state in the country. I say "healthiest" because, according to the latest U.S. census, the average citizen in Hawaii lives three years longer than the average resident on the mainland. Also we show the lowest incidence of killer diseases such as heart disease, cancer and stroke, and also the lowest rate per unit population of death due to accidents. Environmentally, we take pride in having the cleanest air and the cleanest water in the country, although some of you from the other states may dispute that, especially those of you from Colorado.

Coming back to the Hawaii plan--five years ago, Hawaii became the first state in the country to mandate employers to provide comprehensive health insurance for every full-time employee. Although our law is not perfect, we in Hawaii are very proud of this innovative legislation which is being reviewed by a number of states and by the federal government as possible model legislation. We view this law as yet another milestone in a very impressive record of progressive legislation enacted since Hawaii become a state in 1959. In this respect Hawaii is, in reality, a very unique laboratory for the nation.

Normally, in a presentation of this kind, one begins with a historical review and gradually leads up to the description of the plan itself. What I am going to do today is to give you a description of the plan first, followed by a little history, a discussion of our experience, and a listing of our recommendations after we have observed the plan in operation for five years. The plan became effective January 1, 1975.

I. WHAT ARE SOME OF THE BASIC PRINCIPLES OF HAWAII'S PREPAID HEALTH CARE ACT OF 1974?

1. Every regular full-time employee in private employment is protected by a prepaid plan providing for hospital, surgical, and medical coverage. Coverage for dependents of employees is not mandatory under the law. However, most employers in Hawaii do provide full or partial coverage for dependents. Normally, the employer chooses the health plan, unless collective bargaining is involved. We have found that benefits established under collective bargaining are usually equal to or superior to those specified in the Act.

2. The level of benefits provided must be equal to those of the most prevalent plan in Hawaii and must include certain benefits specified in the Act. Therefore, coverage of outpatient care as well as surgery and hospitalization

plus catastrophic coverage provided by the most prevalent plan is required of all carriers.

As a result, at least the following benefits are mandated:

a. hospitalization (full service, 120 days per year);

b. surgery and anesthesia;

c. medical services (home, office, and hospital);

d. diagnostic laboratory and X-ray services and radiotherapy;

e. maternity services; and

f. substance abuse services (including outpatient and inpatient services), mandated by a 1976 amendment to the Act.

In summary, a basic benefit package covering outpatient care as well as surgery and hospitalization plus catastrophic coverage ($50,000 - $250,000) is now required of all insurance carriers. In addition, I am proud and happy to point out that, entirely on a voluntary basis, and this is not required in the law, most of the carriers in Hawaii now provide for abortions and some coverage for mental health conditions.

3. Costs are shared by the employer and the employee. The employer pays at least half the cost of the coverage. The employee's share, in any event, is limited to 1.5% of his wages; we have calculated for employees receiving a minimum wage, this represents about $7 a month. The employee's share, in any event, is limited to 1.5% of his wages. We have found that many employers pay the entire cost of the premium as a fringe benefit.

4. Coverage can be arranged with any existing carrier who offers an approved plan. This includes Kaiser Health Maintenance Organization, Hawaii

Medical Services Association (HMSA), a nonprofit association offering both fee-for-service and health maintenance programs, and also commercial insurance companies like Aetna and Travelers and so forth, that may also participate in this plan.

5. Generally, the free choice of a physician by the employee is protected. At the same time the employer or often the employee can choose a health maintenance plan which will probably mean less out-of-pocket expenses for the employee.

6. Finally, an employer who fails to provide the required health coverage is liable for any costs incurred by his employees during the period when he failed to provide coverage and, in addition to that, fines are also assessed for noncompliance.

II. HOW IS THE ACT ADMINISTERED?

The Hawaii Prepaid Health Care Act is administered by the Disability Compensation Division of the Hawaii Department of Labor and Industrial Relations, with the assistance and support of an appointed citizen group. The name of this group is the Prepaid Health Care Advisory Council. The function of this council is to review all plans submitted by carriers for medical equivalency of benefits. All plans meeting the standards of our Act are approved.

Because this division already monitors temporary disability insurance, worker's compensation and unemployment compensation, only about a dozen employees were needed to monitor compliance with the new Act. The major carriers remain the primary fiscal agents.

III. HOW HAS THE LAW WORKED OVER THE FIRST FIVE YEARS?

A recent federally funded study of the impact of the law concluded that:

1. The law has not resulted in any identifiable strains on the health care system.
2. It has not caused recogn zable economic problems for employers.
3. It has not resulted in major dislocations among employers.
4. It has expanded health insurance coverage both in terms of the number of persons covered and the type of benefits received.
5. It has guaranteed an open competitive environment between the traditional fee-for-service system and prepaid health maintenance plan or the HMO.
6. It has made it possible for about 98% of the people to receive insurance coverage.

Good as it is, Hawaii's Prepaid Health Care Plan is not without shortcomings. I will go into that later, but I would first like to discuss the major factors which enabled Hawaii to pass and successfully implement the first mandatory comprehensive health insurance plan in the nation.

IV. WHY WAS HAWAII ABLE TO PASS THIS INNOVATIVE LEGISLATION?

1. Historically, plantation medicine played a major role in defining employer responsibility. At the same time, it supported the development of group or individual practice. Subsequently, large multi-specialty clinics were established stressing ambulatory care over hospitalization. About one-third of physicians in Hawaii are associated with these multi-specialty clinics. By comparison, about 12% of the physicians in the other states throughout the country are so associated. So that's a comparison of 33% to 12%.

2. Since attaining statehood in 1959, Hawaii has consistently shown a willingness to enact relatively liberal social legislation -- e.g. minimum wages, wage and hour requirements, worker's compensation, unemployment insurance, and temporary disability income. All of these were generously defined in terms of coverage, benefits, or requirements to protect workers.

3. In addition, the first years of Hawaii's statehood coincided with a period of economic growth and prosperity. As a result, costs of social benefits had not been of primary or overriding concern.

4. When the idea of a Prepaid Health Care Law was aggressively proposed, the Hawaii legislature in 1968 requested that its legislative reference bureau research the subject and prepare a comprehensive report on the subject. The report, prepared between 1969-1971, reviewed the various current approaches to compulsory or universal health insurance and noted the extent and scope of existing prepaid health care coverage. The study found that, of the total resident population, 88% of the people of Hawaii had hospital insurance, 12% did not, and 83% had medical insurance either under an insurance plan or a government-sponsored program, or 17% did not.

5. Perhaps most important, however, to the passage of the Act was the fact that the Prepaid Health Care Act only required what most employers--and virtually all of the major employers--were already doing. With close to 90% of the population covered, no major interest-group saw the proposed legislation as a significant threat.

Support for the proposal came from various health-related organizations such as the Hawaii Tuberculosis and Respiratory Disease Association, the State Advisory Council for Comprehensive Health Planning, and the Regional Medical Program. No labor unions opposed it and, in fact, one labor union, the ILWU, actually supported it.

The strongest objections, mentioned many times in opposing testimony during the period of legislative debate in 1971-74, was the idea that it would be inappropriate or unnecessary for Hawaii to enact such a plan because federal action on the subject of national health insurance was imminent. Events have since shown that fear to have been unfounded.

The Hawaii Medical Association recommended that "any action on the Hawaii Prepayment Act be deferred until such time as this national program comes into being." That's a medical profession. This objection was met by adding a provision in the Hawaii law mandating its termination on "the effective date of federal legislation that provides for mandatory prepaid health care for the people of Hawaii." So we have that proviso in the law.

The Health Insurance Association of America also opposed the bill, feeling that it was not necessary and that it would impose a financial burden on the people.

In general, opposition was regarded as being more a matter of preference, a matter of philosophy, or approach, than a matter of vital interest.

Other factors which, to account for the successful implementation of the Act, include:

1. The statutory requirements were based on a well developed existing administrative structure. The law is administered by the State Department of Labor and Industrial Relations in tandem with Worker's Compensation and Temporary Disability Insurance requirements. In turn, the benefit requirements are met through health insurance carriers.

2. Premium supplements from the state are available to employers who can show economic hardship as a result of the requirements for health insurance coverage. In other words, if an employer can show that his costs of coverage exceed 1.5% of his employees' salaries and that it exceeds 5% of his own income, he may apply for supplemental assistance from a fund which was appropriated by the legislature. I might say at this time that our data has shown that the number of applications for supplemental assistance has been very, very low. The legislature appropriated over $300,000 for that purpose and, during the first year of the application of the law, we spent less than $25,000 out of that amount for supplemental assistance. So the need for employers for help has been practically nil.

3. Hawaii's health care delivery financing systems have effective incentives and controls limiting hospitalization. This, in turn, helps keep costs down. Hawaii's hospital-use rate, adjusted for population differences, is about 45% of the rate throughout continental U.S. This does not appear to be due to significant differences in disease patterns (except possibly for terminal diseases among the elderly) but more to what doctors do in treating disease. Because of the high incidence of group practice, doctors in Hawaii tend to restrict hospital use to just serious illnesses. They tend to avoid hospitalization for conditions which can otherwise be handled on an ambulatory basis. Many of these doctors who participated in group practice have established very

well-equipped clinics. By group practice we mean 6 or more doctors being associated and practicing in a clinic. We have many of these well-equipped clinics and they have the benefit of peer consultation and so forth. This practice is further supported by reimbursement by all health insurance carriers for out-of-hospital treatment as well as inhospital care.

The net result is comparatively comprehensive and economical care for the residents of our state.

As I mentioned previously, Hawaii's Prepaid Health Care Act is not perfect.

V. WHAT ARE SOME OF ITS SHORTCOMINGS?

1. Coverage is not truly universal. In 1977, only 72% of the civilian population was covered by employer-subsidized premiums. A liberal Medicaid policy covers another 11%, about 7% are covered by Medicare and 8% by CHAMPUS. In short, an estimated 2% of the state's civilian population, or about 15,000 individuals, do not have adequate health insurance coverage. Among these are unpaid family workers (people who work in a family business), seasonal or part-time employees (these are employees who work less than 20 hours a week), temporarily unemployed persons, new employees (the law provides that you must be on the job for at least 4 weeks before you can qualify for coverage--some of these new employees are not covered), some immigrants are not covered, persons with marginal incomes but with assets too great to qualify for Medicaid, and some dependents of some employees are not covered. Naturally we are concerned about this so-called "gap group."

2. There are some gaps in coverage, especially dental care and mental health services which are not mandated, although limited mental health coverage became part of the package for certain of the large carriers.

3. The law lacks an implicit requirement for coverage of workers' dependents.

4. The uniform cost of the premium for all employees results in a regressive burden of costs, as the percentage of wages paid to health care decreases as wages increase. The co-payment aspect (about 20% of cost) of the fee-for-service often becomes burdensome for the working poor.

A major problem Hawaii faces is not with the implementation of the law itself, but rather a threat at the national level.

Through District Court action, Standard Oil Company of California successfully challenged the right of Hawaii to enact and enforce such a law, contending that through the Employee Retirement Security Act of 1974, Congress had pre-empted all state initiatives regarding employee benefits. Hawaii contends that this was not the intention of Congress, and that such legislation will deny states the right to try novel social and economic experiments without risk to the rest of the country. As the plantiff's contention was confirmed by a Supreme Court ruling rendered in November 1977, Hawaii is seeking remedial legislation through Congress.

This year marks the 10th anniversary of Hawaii's first steps toward a mandatory Prepaid Health Care Act, and the fifth year of its actual operation. We have found that this law, which formalized a health care delivery and financing system characterized by effective incentives and controls limiting hospitalization, works to provide about 98% of Hawaii's residents with comprehensive health care coverage. Hawaii has a health insurance system that is affordable, comprehensive, and virtually universal.

The relatively simple and cost-effective administration of the law by the Department of Labor, and the full cooperation of the insurance carriers to keep costs to a minimum, further contribute to its successful implementation.

Our present concerns are to extend this coverage to 100% of our residents and to assure that the high quality of health care in our state is not lowered or pre-empted by national legislation.

Looking into the future, we would like to see coverage extended to dental health, possibly the provision of hearing and visual aids and prosthetics, and definitely to a broad spectrum of mental health care. Cost of these services, together with catastrophic coverage and coverage for "gap" groups (especially immigrants), should be borne by the federal government within the framework of a national health insurance plan.

It is my belief that Hawaii's Prepaid Health Care Plan can serve as a model for a national health insurance plan, as we have testified in Washington several times, and we feel that it is also applicable to individual state plans. Today, mandatory health care is an integral part of life in Hawaii. It has been accomplished with a minimum of effort and cost to the taxpayers. It is our hope that we can convey to you a balanced accounting so that Hawaii's Prepaid Health Care Act and its operation can be readily understood and realistically assessed.

In closing, I would like to quote from a recent study on the matter:

> "Whether the experience of Hawaii should inspire emulation -- by other states of the United States -- is a policy matter. It is not our intention

> or appropriate function to advocate one form of legislation or another. But, we believe, it is clear that wider recognition of Hawaii's achievements in health care organization and financing is appropriate. Hawaii's experience gives some dimension as to what can be done."

It has been a pleasure for me to be here today to share our experience with you. I hope I have given you some idea as to what we are doing in Hawaii. Most importantly, I hope the State of Colorado will move forward vigorously and with vision to adopt a plan which will provide high quality health care for all the people, a plan that would entail minimum cost, and a plan which would be accepted by all. And in your move to achieve this, I hope we can be of some help to you. Thank you.

MINNESOTA HEALTH INSURANCE ACT

Brian Osberg

Administrative Assistant to the Minnesota House and Welfare Committee

September 24, 1979

Good afternoon. I have been asked to brief you on the workings of the 1976 Minnesota Law which has improved the availability and quality of health insurance coverage that has established a financial assistance program for families who incur high medical expenses. Respective articles of this law are referred to as the Comprehensive Health Insurance Act and the Catastrophic Health Defense Protection Act.

It is my understanding that the State of Colorado is currently evaluating alternative methods of financing medical expenses incurred by its indigent population. As I describe the Minnesota program, I will note its viability in terms of being a suitable alternative. It must be kept in mind, however, that the Minnesota Law was not enacted with the intent of providing medical assistance to the poor. Minnesota has a very extensive medical care system for the indigent. The State's Medicaid program covers the medical care system for the indigent. The State's Medicaid program covers the medically needy as well as categorical program recipients. Plus, we have a medical care program for the indigents who are not otherwise eligible for medical assitance. It is what we call the General Systems Medical Care Program, financed by the State and local counties. What the Minnesota Legislature recognized and sought to correct was the poor standard of existing health insurance policies, the unavailability of coverage for the high risk population and the exhaustion of resources of families who were unfortunate enough to incur high medical expenses. Our programs are primarily geared to middle class and working populations; however, I believe that they could be adapted to serve the poor and the near-poor.

The 1976 law consists of three articles:

- Article I establishes minimal standards for health insurance policies and creates an insurance pool for persons unable to buy coverage, because of an existing health condition.
- Article III provides for financial relief to households which incur high medical expenses; i.e. our catastrophic program.

Concerning Article I, I plan to concentrate my remarks on the insurance pool; however, I do want to briefly review the changes in our health insurance laws, as well. The objective of this article is to:

1. upgrade health insurance policies, and
2. increase the availability of insurance coverage.

Concerning the first objective, we established minimal insurance standards and in establishing those standards, the article outlines the duties of the insurors and the employers. All health insurance companies doing business in the State of Minnesota are required to offer what the law defines as a qualified health insurance plan. The qualified plan must pay at least 80% of the cost of covered services in excess of an annual deductible. These covered services, or minimal benefits as it is sometimes called, are itemized in the statute. This does not prohibit insurors from developing and selling an unqualified plan; however, they must offer a qualified plan so that the enrollee has the opportunity to purchase a comprehensive policy. Employers who make available to their employees the health insurance plan, must offer a qualified plan to those employees. This does not necessarily mean they have to finance the plan, however; it can be financed from funds contributed solely by the employer or solely by the employees, or a combination thereof.
Again, I do not want to dwell on that portion of the law. If you have any questions conerning the health insurance statute, I will be glad to answer them.

The second aspect of Article I is the creation of a Comprehensive Health Association, for purposes of operating a Health Insurance Plan, or what we call a State Pool, to those who are uninsurable. This association, which is made up of all health insurors doing business in our State, is responsible for selecting a writing carrier to administer this Plan. The writing carrier is Northwestern National Life at the present time. In accordance to administrative rules, any person who has been turned down by two private insurors, or who has a presumptive condition, such as kidney disease, is elegible for enrollment in the Plan.

The Insurance Plan was intended to be self-supporting. The premium for the first 18 months of the Plan's operation was set equal to the average premium charged for equivalent policies offered by the five largest insurors in each planned category. In other words, for a group plan, we took the five largest insurors in Minnesota doing group plans and averaged their premium. This average then became the charge for the premium during the first 18 months of the operation of the pool. After that time, it was to be based on actuarial experience, to be self-supporting, but that did not work out as well as planned. The rate of claim expense was so high that the Association feared an increase of 100% in the premium rate would be necessary. With the possibility of a forbidding premium increase staring the Legislature in the face, they placed a cap of 125% on the average premiums charged in order to make the plan affordable. We replaced that cap in a rider in an appropriations bill. We have now put it in statute; however, this has caused some problems, which I will explain later. With that, in 1978 the Legislature appropriated $200,000 to the Association to pay for any claims over the premiums generated. In other words, we are going to subsidize them to a point, realizing that if we are going to put a cap on, we certainly could not allow the Association to bear all the losses of the plan. However, a long-term solution on the financial stability of the Plan was necessary. During the last Legislative

session, the Legislature decided that the State should assume the financial responsibility of the Plan. The 125% cap on those premiums remained intact, and any losses incurred due to the operation of the plan would now be assumed by the State.

At the present time, we have only 1,500 policies in force in this uninsurable pool, a figure much lower than what we projected. It is either a problem of marketing or we simply overestimated the number of people who needed such protection. I think we overestimated the number of uninsurable or high-risk people in need of this kind of protection. We also have trouble marketing the plan but I don't believe that is the major problem at this point.

The question at hand, however, is whether or not the State should expand the population of this pool to include low-income individuals. This would probably involve a premium subsidy program, based on the ability to pay. The advantages would be twofold:

1. We could improve the experience of the plan due to the inclusion of a healthier population. This would especially be true if we included other poor-risk groups, such as small contracts, self-employers, and others who have difficulty in getting access to health insurance coverage.

2. We would provide protection to a population that has fallen through the assistance crack. I am referring to families who make between $5,000 and $10,000 a year, for example; too rich to receive public assistance in our State, too poor to afford health insurance coverage.

In our incremental approach to protect Minnesotoans from high medical costs, the low-income or working poor as we call them, will be the next group to receive consideration. Thus, I believe that medical expense protection

can be provided to the near-poor through an insurance pool with an appropriate premium subsidy program. I do not believe that it is the answer for the indigent who are categorized as medically needy, though it may be feasible. It would depend on the nature of the subsidy program and the extent of the use of deductibles and co-payments of the Plan. I will be happy to share my thoughts on the effectiveness of the creating of a health insurance plan for uninsurables, or the working poor. For a closer look at this section of the law I would refer you to a publication by John Stone, entitled appropriately, THE MINNESOTA COMPREHENSIVE HEALTH INSURANCE ACT OF 1976.

Some final thoughts on the first Article of this Law. We received some resistance from the insurance industry, as expected, though most of the Minnesota-based companies are now in support, or at least not in opposition. There has been litigation initiated by some foreign insurors, challenging certain portions of the Act. I expect that the State will win that lawsuit; however, a separate challenge involving self-insurors seeking preemption from ORISA does not look as hopeful. That lawsuit should be decided soon. It will be very interesting, not only for the State of Minnesota, but across the country, in terms of establishing such plans.

If the State of Colorado decides to develop an insurance plan to increase access to coverage, it should include all poor-risk population groups; the near-poor, high-risk, self-employed and possibly small contract groups. You should not do what we did in terms of financial responsibility; i.e., do not make insurance companies—in other words, the members of the Association or whatever group you establish--responsible for losses of the pool; the State should take on that burden. The reasons for this approach are:

1. to keep the premium rate affordable,
2. the State can change or adapt that program to meet other population groups,

3. to avoid constitutional questions which have been raised in Minnesota.

I want to touch briefly on Article II of the law which is called the Hospital Rate Review Program. When you talk about increasing the access to insurance protection and mandating certain benefits, you have to talk about cost, which is the purpose of this Article. Article II establishes a system of reviewing hospital acute care rates, by a non-profit rate review organization, with direction and supervision given by the State Health Department. We have been quite encouraged by the results of this process. If the hospitals comply to their approved budgets, acute care rates will rise only 9 to 10%, compared to 14% a few years ago. I understand that the State of Colorado has considered abandoning their rate review or rate setting system. I'm not advocating rate setting, but I do want to press the need for some kind of cost containment efforts, particularly when you talk about increasing your programs to include the medically indigent.

Cost containment is essential as a State begins to commit its natural resources to the payment of medical services for the poor. We have begun to look at ways of instituting market forces into the health care system as a way of creating competition on a price basis. For example, the development and promotion of HMOs and other alternative health care plans have begun. Many believe that this is preferable to governmental regulation when addressing the cost problem. Minnesota has Interstudy which has been supporting HMOs, and other market forces in the health system in lieu of governmental regulation. We are looking at these options very seriously this year.

Moving on to Article III, or the Catastrophic Program. As I indicated earlier, this Act provides financial relief to individuals who incur catastrophic medical expenses. Under the program as initially enacted, in 1976, the State pays 90% of qualified expenses for which no third-party is liable

in excess of a threshold figure, which is calculated by an income-related formula. These qualified expenses are those minimal benefits listed in Article I, of our law. Let me give you an example of how this works. If the household income of a particular family is $20,000, the State will pay 90% of out-of-pocket medical expenses exceeding $8,500 (that $8,500 is calculated in our income-related formula). If the family has incurred out-of-pocket expenses of $100,000, the State will pay $82,350, with the remainder being the responsibility of the family. That is how the program worked when the law was passed in 1976. The income-related formula, for purposes of calculating the threshhold figure, was as small as 40% of the first $15,000 of household income, 50% of the next $10,000, and 60% of any income over $25,000, with a minimum of $2,500; in other words, a family had to incur, not necessarily pay, but incur $2,500 before the State comes in. Due to the low rate of the utilization of the program, those percentage figures have been reduced, and the $2,500 minimum has been removed.

What is important to note and remember here is that our program has two criteria:

1. the household income of the family, and

2. the amount of out-of-pocket medical expenses incurred by the family.

This income formula can be adjusted depending on the level of financial commitment that the State is going to make. Unlike other states' catastrophic programs, specifically Rhode Island, we do not include the amount of health insurance carried by the family, as a criterion. We considered this, however, it appeared to us to be discriminatory.

The catastrophic program has unlimited success, to say the least. The Legislature appropriated $8,000,000 for fiscal year 1978, of which only $252,000 was expended. In my opinion, there are four reasons for the low utilization.

- First, the threshold figures in the formula were simply too high. As I said, they are being adjusted down; for example, instead of 40% of the first $15,000, next year they will be 30% of the first $15,000 of income, and the year after, it will be 20%. This was put into one of our riders in the appropriations bill, but it was not codified, so in another two years, we could revert back, but I doubt that. I expect that in the next two years, we will codify those percentage reductions.
- Second, we have mandated a limitation of $3,000 on out-of-pocket expenses for qualified health insurance policies issued in Minnesota, thus, diminishing the need for catastrophic coverage. We do not even allow for an actuarial equivalency to our catastrophic coverage that we require in our health insurance policies provided in Minnesota. Thus, it is very important; if nobody has to pay more than $3,000 out-of-pocket during a one-year period, they are not going to reach the threshold figure in our catastrophic program. So, the people who have access to qualified health plans, which is a great majority in Minnesota, will simply not benefit from the catastrophic program, due to the high-threshold figures, and due to the structure of the formula itself.
- Third, the program is administered by a county welfare agency which is probably not the preferable office, since the people seeking assistance are not on welfare, and a stigma seems to exist that catastrophic insurance is then a welfare program.
- Fourth, the Minnesota Department of Public Welfare restrictively interpreted the array of services covered in the catastrophic program. This has not been resolved, but I expect some alterations to the State Department rule on the services covered.

In spite of the changes in threshold figures and services covered, I

do not expect a major increase in the program's expenditures. Though the Legislature appropriated $6,000,000 for the current fiscal year, again I do not think we are going to spend that much money. We are closely watching Rhode Island's program and watching our experience and maybe in our third and fourth year we may indeed see the kinds of increases that Rhode Island has had in their program.

In an analysis prepared by our Department of Public Welfare, it was found that during the first 14 months of the program, there were only 149 eligible cases. Two-thirds of those cases were between the ages of 45 and 65, and one-half of the patients were suffering from either cancer or heart disease. We also found that almost one-half of the patients had no health insurance coverage of any type. It was feared that this program would be relied upon as an alternative to health insurance. We see no evidence at all of that occurring; that is, we do not see people abandoning their insurance policy in order to take the risk and then rely on catastrophic as a last resort. It is also interesting to note that 75% of the cases involved families of household incomes of less than $10,000. In other words, this program, without our intention necessarily, is being utilized primarily by the working poor or near-poor. This is explained by the fact that most of the cases were chronic in nature and these people may be limited in generating the high income.

Before I get into some final comments in this program, as a viable approach to providing medical assistance to the poor, I want to review another section of the Catastrophic Law which I suggest you do not consider. This section is the payment of nursing-home expenses for persons under the age of 65, who have resided in a nursing home for more than 24 months. This was a provision tailored for a very, very persistent lobbyist or citizen in the State Legislature. Initally, it was for anybody under the age of 65 who has been in a nursing home for more than three years, then the program would come in. This program is known as CHEP II, and is a separate

program from our other Catastrophic Program. It covers all nursing-home expenses in excess of 20% of household income, for a person who has resided in a nursing home for more than two years. The inclusion of nursing-home care under the regular Catastrophic Program was heavily debated; senior citizen groups lobbied hard for this provision; however, the cost of such inclusion was prohibitive. I would strongly urge any State considering the Catastrophic Program, to have only one system. It should be up to the State to determine whether or not they have the resources and priority to include long-term care in a Catastrophic Program. Avoid the separate system.

Let me conclude my remarks by commenting on the Catastrophic Program as a viable alternative. I would highly suggest that if the State of Colorado chooses to go this route, that you determine in advance the population group you want to assist and then develop the income formula, accordingly. We did not necessarily do that. The advantage of this system is that it can be adapted to serve the population you want to serve.

The nature of a Catastrophic Program suggests that it is a plan of last resort. It does not apply until all other insurance coverage is exhausted and, further, it requires the payment of a deductible. For that reason, a Catastrophic Health Expense Program would fall short of meeting the medical needs of the indigent. This type of program is designed to prevent a family from spending down to welfare or from going bankrupt due to high medical expenses. One of the disadvantages of instituting such a system for the medically indigent is the fact that it is 100% State-financed. There is no federal participation, such as we have in the Medical Assistance Program. However, I would encourage you to negotiate at the federal level, with the possibility of receiving some medical assistance monies since it can be argued that a Catastrophic Program assists the family before they spend down their assets to become eligible for MA (Medical Assistance) thus

saving federal funds. We made that argument and had a very good reception from the Federal Government. Our Department of Public Welfare did not follow up on that and at the present time I do not know the status of trying to ascertain some federal monies, due to keeping some people off the medical assistance role.

In our Catastrophic Program we have put in some requirements allowing the Commission of the Department of Public Welfare to question the necessity of some medical services. It is also to question the reason for the charge being made, or a reasononable charge of the provider. We gave the Department the option to have a contract with the PSRO to determine medical necessity if they so wish, and I believe they are doing that. I believe that is important in the Catastrophic Program, since it assures some safeguards, similar to our medical assistance program, of making sure that the charges are reasonable and that services are indeed necessary.

In conclusion, I would submit that the need for a Catastrophic Program is dependent in large part on two factors:

1. The prevalence of catastrophic coverage in available health insurance policies and
2. The comprehensiveness of government medical assistance programs.

I offer the assistance of my office to the State of Colorado, if they so choose, to develop a similar program. I will be happy to answer any questions.

Thank you.

"AN OVERVIEW OF

THE MINNESOTA COMPREHENSIVE HEALTH ACT OF 1976, AS AMENDED"

Presentation Prepared

for

North Dakota Legislative Council

Health Care Committee

-

John T. Ingrassia
Supervisor
Life and Health Section
Insurance Division
State of Minnesota

-

February 20, 1980 - 11:00 a.m.

Bismarck, North Dakota

"AN OVERVIEW OF

THE MINNESOTA COMPREHENSIVE HEALTH ACT OF 1976, AS AMENDED"

It has been my privilege to be deeply involved in a health and welfare plan which has demonstrated that a state has the foresight and ability to provide benefits from such a plan to the residents within its jurisdiction.

It is further a privilege for me to represent the State of Minnesota and its Commissioner of Insurance, Michael D. Markman, as your guest at this meeting.

I am pleased that the Health Care Committee has shown an interest in the Minnesota experience and state honestly that it is flattering to our legislature and to the hundreds of people both from State Government and industry who have cooperated to bring the purposes of the Act to fruition.

As a result of the mandate, the Minnesota Comprehensive Health Association was established, the primary purpose for which was to make comprehensive health coverage available to those Minnesota residents who cannot obtain such coverage from the private health insurance market at standard rates. Such persons who do not have access to comprehensive health coverage face the possible harms of:

1) forgoing necessary medical attention in order to meet everyday living expenses;

2) losing opportunities for gainful employment because of an inability to pay for necessary medical care; and

3) living with the anxiety of lacking means to pay for medical care in the event of serious illness or accident.

The Minnesota Legislature was made aware of these problems and reacted accordingly. The health coverage made available by the Association is known as the State Plan. It is comprehensive major medical coverage with a choice of deductibles $500 or $1,000, 80% co-insurance feature and a $3,000 annual out-of-pocket limitation.

-more-

State plan eligibility standards require that an applicant demonstrate Minnesota residency and a denial of coverage or coverage subject to a restrictive rider from two insurers within the previous six months. An experiment to provide coverage to individuals suffering from one or more conditions included in a list of "presumptive conditions" was supported by the industry generally and proved popular with agents in particular because of convenience. The conditions are of such a serious nature that, without doubt, an applicant with such a condition would be rejected for coverage. Unfortunately, the mandatory eligibility requirements were reestablished by amendment pending promulgation of rules pertaining to eligibility.

The Association is managed by a Board of seven directors, representative of the membership. The current Board is composed of five representatives of commercial insurance companies, one representative of a non-profit health service plan corporation, and one representative of a health maintenance organization. The directors are elected by the members of the Association based on a weighted vote, in proportion to their volume of accident and health insurance business, HMO business, or self-insurance business in the State of Minnesota.

The day-to-day administration of the State Plan is performed by Northwestern National Life Insurance Company as the writing carrier acting as agent of the Association and the Commissioner. The Association operates under close supervision of the Commissioner, pursuant to the Act and Rules promulgated by the Commissioner.

Claims expenses exceeding premiums collected, operating and administrative expenses of the Association were until May 31, 1979, shared by members of the Association in an amount equal to the ratio of each member's total accident and health insurance premiums (or subscriber contract charges or plan costs) received from Minnesota residents divided by the total accident and health insurance premium received by all insurers, HMO's and self-insurers from Minnesota residents. Assessments are levied by the Board of Directors of the Association subject to approval by the Commissioner.

-more-

Currently only "contributing members" are responsible for Association assessments attributable to losses on and after May 31, 1979. A contributing member is one which pays premium tax. Such members may offset any assessments against all premium and income taxes payable to the State of Minnesota. This most recent example of our legislature providing public funding for the Association was preceded by an appropriation for the biennium ended June 30, 1979, in the amount of $200,000.00 for reimbursement to the Association for claims expenses incurred after June 30, 1978 in excess of State Plan premium collected.

The present public funding is subject to a "sunset" provision which ends July 1, 1981. During this time, the effect of the offset is to be reported to several committees of the legislature. Considering the past support demonstrated by the legislature, including a large state subsidy to reduce losses in 1978 and 1979, proponents of the State Plan predict that the offset provision will be renewed or another form of public funding will be enacted.

It has been recommended by the magistrate who presided at the trial in U. S. District Court, Insurers' Action Council Et Al Vs. Berton W. Heaton Et Al, that the Court enter judgment and adjudicating and declaring the Minnesota Comprehensive Health Act unconstitutional. The magistrate found that the assessments violate the Equal Protection Clause of the Fourteenth Amendment to the U. S. Constitution.

The Association not only denies that classification of "contributing members" constitutes invidious discrimination but maintains the classification is rationally related to a legitimate state interest.

The magistrate found that the eligibility requirements of the Act, including the discretion granted the Commissioner to determine additional, consistent requirements for coverage unde the State Plan, constitute an unlawful delegation of legislative authority and are vague.

-more-

The Association has requested the Court to reject the magistrate's recommendations and find that the Act is not in violation of the Equal Protection Clause nor in violation of proscriptions against vagueness or unlawful delegation of legislative authority on the basis of the record and the law. The magistrate is charged with committing innumerable errors of fact and law as well as many irrelevant and immaterial references. It is the conclusion of the Association that the magistrate has failed completely to understand the basic issues of the lawsuit.

United Cerebral Palsy, Minnesota Epilepsey League and Minnesota Association of Retarded Citizens intervened as defendants in support of the Act. Appearing as amici curiae are Minnesota Public Interest Research Group; the Minnesota Catholic Conference; Senior Citizens Coalition of Greater St. Paul, Inc.; Metropolitan Senior Federation, Inc.; and Senior Citizens Legislative Council of St. Paul.

The Health Insurance Association of America participated as amicus curiae in opposition to the Act.

In addition to the creation of the Minnesota Comprehensive Health Association, the Act provided for establishment and administration of certin plans of health insurance to make minimum benefits available to all persons in Minnesota. The objective is to improve health care by making comprehensive accident and health insurance easily available to all persons in Minnesota willing to pay the premium. The Act mandated that every company offering or providing hospital, surgical, and medical care coverage in Minnesota must offer a plan that contains certain minimum levels of coverage and to discourage sale of coverages which are so limited as to be of little value to most consumers.

The Act requires that all insurers and fraternals who sell broad coverage individual hospital, surgical, and medical care policies in Minnesota, in addition to other policies, offer their customers a so-called "qualified" plan containing the list of

comprehensive hospital, surgical and medical care benefits set forth in the Act or the actuarial equivalent of those benefits. To be eligible to purchase a qualified plan, a person must meet the insurer's underwriting requirements and, of course, pay the premium established by the insurer for such a plan. Insurers selling group plans must offer "qualified" group plans.

Insurers are not prohibited in any way from selling or even recommending unqualified policies. However, it is required that persons applying for or renewing an unqualified plan be offered a major medical rider or policy at a premium established by the insurer. Again, underwriting standards may apply.

The Act further requires that insurers which sell Medicare Supplement policies to persons over age 65 offer, as an alternative to unqualified Medicare Supplement policies, a qualified Medicare Supplement Plan.

The Act further requires that every group health care policy issued to employers include the right of an individual leaving the group, or the dependents of a deceased group member, to convert to an individual qualified plan without the imposition of meeting insurability requirements. However, the premium is payable by the insured and not by the group policyholder.

These requirements are, in the opinion of the magistrate, unconstitutional. The magistrate believes that the mandatory offer provisions violate due process, that the major medical offer provision violates the Contract Clause, and that the extra-territorial application to conversion requirement violates the Commerce Clause.

Changed to 4/25/80

Oral arguments are to be heard by Judge Edward Devitt on February 29. It is anticipated that the decision will be appealed by the aggrieved party.

The Association is still breathing and appears to be serving its intended purpose. As of December 31, 1979, 1,608 policies were in force. Approximately 60 applica-

tions are processed montly. For each dollar of premium received the plan is paying two dollars in benefits. This steady but unspectacular growth contrasts sharply with the testimony of the plaintiffs who projected that the State Plan enrollees would number 4,000 by the end of its first year of operation. The State Plan opened for business on January 2, 1977. Opening day was the culmination of a cooperative effort among members of the legislature, its staff, the unselfish participation by dozens of industry people, consumers and State personnel.

In May of 1976 call was made for volunteers to serve on proposed advisory committees which would review and study the Act in order to recommend positive programs for consideration by the Commissioner as to implementation and administration of the requirements contained in the Act. The response to the call for help resulted in the formation of five advisory committees in the area of legal, forms, administration, actuarial and public information.

Prototype forms were developed which could be immediately certified by the Commissionner as qualified plans. Included in the prototypes are group, individual, major medical and Medicare Supplement. The plans were available to any interested company for use as their own with the company's own rate structure.

The actuarial committee developed rate schedules for the State Plan and developed an actuaial equivalence table which was subsequently incorporated into the rules.

The public information committe prepared and distributed informational brochures and conducted seminars throught the state to advise the public and the industry agency force of the State Plan.

To the volunteers who staffed the committees and who continue to serve unselfishly to sustain the Association and the State Plan, the people of Minnesota are grateful. All of us in Minnesota benefit from the operation of the Act. The fruits of the

program vary but certainly they contribute meaningfully to the way we live in Minnesota and to the concern we have for each other.

I shall be happy to respond to any question or to comment further on the implementation of the Act.

III. An Analysis of the Social Impact of the Proposed Legislation

With hospital care averaging $369 per patient day for acute impatient care, plus an array of high priced medical technology and drugs for out patient care, and physicians fees on top of that, any accident or illness requiring more than nominal medical attention can mean serious financial hardship or catastrophe for the average family. As the cost of medical care continues to rise faster than any component of the consumer price index, some form of health insurance, pre-paid health care, or other third-party health coverage becomes more and more essential to people's health, welfare, and economic security.

The 56 to 71 thousand Alaskans who currently lack health coverage are likely to be unemployed, marginally employed, self-employed, or those employed by a small business, plus their dependents. The proposed legislation would automatically extend coverage to all those in regular employment and their dependents. The expansion of Medicaid coverage and the General Relief - medically needy program in the bill would fill another coverage gap.

The income threshhold for the medically needy program is set at 150% of the poverty guidelines for Alaska. For 1979, the poverty guidelines were as follows:

Non-farm poverty income guidelines

Family size	Annual	Monthly	150%
1	$4,270	356	534
2	5,640	470	705
3	7,010	584	876
4	8,380	698	1047
5	9,750	813	1219
6	11,120	927	1390

A person or family which is over income becomes eligible for medical assistance under this program if their income in excess of the threshhold is spent on medical bills. Essentially, this provides a form of catastophic coverage for all families, as well as a form of basic coverage for low-income families. The program would probably cover a large proportion of Alaska's unemployed and marginally employed people who lack health coverage from other sources.

The bill also would make coverage available to approximately 200 people who are presently denied private insurance due to high-risk health conditions. Thus, the most significant group of people who would still lack health coverage are likely to be middle-income self-employed people who do not choose to purchase health insurance, new employees who are not covered for their first month, and some seasonal employees who do not qualify for the medically needy program during their off-season because their assets (other than income) exceed the assets limits set in regulation. These groups are not likely to be large, however. Under the

proposed legislation, probably fewer than five percent of the population would be without coverage.

Impact of the Mandatory Health Benefits on Employers and Employees

Most large employers provide health insurance for their employees anyway, so the largest impact will probably be on small employers and low-budget non-profit organizations. Mandating employer-sponsored health benefits would have essentially the same economic impact as raising the minimum wage -- it would make it more expensive for employers to hire people, so fewer people would be hired. Though the resulting unemployment would not be significant among skilled and experienced workers, unskilled and teenage workers would be hardest hit. On the other hand, teenagers will often be covered as dependents under their parent's policy and therefore exempt from coverage by their own employer. Similarly, spouses, welfare recipients, and moonlighters may have coverage from another source and therefore be exempt. The fact that employers are not required to provide coverage to people such as these who have coverage from another source may offer a small financial incentive to the employer to hire them. If the employee group is enrolled in a plan which charges a higher premium rate for employees with dependents than for single employees, the employer may have some financial incentive to discriminate against people with dependents.

A number two qualified plan would cost about $30 to $50 per month for a single employee, and $75 to $110 per month for

an employee with dependents. The bill requires that the employer pay at least half the premium cost. A small employer whose liability would exceed 1.5 percent of their total payroll plus five percent of the employer's gross income from the business would be entitled to premium supplementation from the State. The employee's share is also limited to 1.5%* of his or her wages, or about $8.85 per month for a minimum wage employee; the employer is liable for the difference.

From the employees' point of view, the share they must pay toward the premium cost of the mandatory coverage, however small, will lower their take-home pay. Although it would insure them against financial catastophe due to medical expenses, in most cases it would provide no tangible benefits. With a deductible as high as $500 per person, most people won't incur any claims.

Impact on Insurance Carriers

The impact on carriers of the minimum benefits regulation will depend on two factors: how closely the bill tracks with current practice, and how large the volume of business is that the carrier conducts in Alaska. Smaller carriers may find that the required changes in their policies and practices would

---

* This limit may not be appropriate for Alaska. It is taken from Hawaii where health insurance costs are about two-thirds of what they are in Alaska.

be more trouble and expense than they are worth for the small volume of busniess the carrier does in Alaska, and they may choose to stop writing health and accident insurance in Alaska rather than comply with the law.

Addendum Concerning High Risk "Uninsurables"

A number of insurances carriers in Minnesota who were opposed to the joint underwriting of high risk coverage in that state testified to a projection of 4,000 enrollees in the State Plan, which provides health coverage for "uninsurable" individuals, within the first year of operation. This incidence would be one per thousand population. In fact, actual enrollment over the first three years of operation has been less than half of that projection, though it is still growing.

Alaska has a young, healthy population compared to most other states, and therefore might expect a lower incidence of high-risk health conditions than Minnesota. Therefore, one high-risk "uninsurable" individual per two thousand population, or 200 people statewide, is a high estimate of what State Plan enrollment in Alaska might be.

In Minnesota, the ratio of claims to premiums under the State Plan has been running two to one, with an estimated loss of $800,000 for 1979. As Alaska has approximately one-tenth the population of Minnesota, a rough estimate of the loss Alaska might incur from the State Plan would be $80,000 per year.

Amended MINNESOTA statute

Subd. 7. The commissioner may rescind approval of a demonstration project if the commissioner makes any of the findings listed in section 62D.15, subdivision 1, with respect to the project for which it has not been granted a specific exemption, or if the commissioner finds that the project's operation is contrary to the information contained in the approved application.

[*1979 c 268 s 1*]

CHAPTER 62E. HEALTH CARE

Sec.		Sec.	
62E.02	Definitions	62E.10	Comprehensive health association
62E.035	Self insurer identification and reporting	62E.11	Operation of comprehensive plan
62E.04	Duties of insurers	62E.13	Administration of plan
62E.06	Minimum benefits of qualified plan	62E.14	Enrollment by an eligible person
62E.08	State plan premium		

62E.02 Definitions.

[*For text of subds 1 to 9, see M.S.1978*]

Subd. 10. "Insurer" means those companies operating pursuant to chapters 62A or 62C and offering, selling, issuing, or renewing policies or contracts of accident and health insurance. "Insurer" does not include health maintenance organizations.

[*For text of subds 11 to 22, see M.S.1978*]

Subd. 23. "Contributing member" means those companies operating pursuant to chapter 62A, paying premium taxes pursuant to section 60A.15, and offering, selling, issuing, or renewing policies or contracts of accident and health insurance.

[*1979 c 272 s 1,2*]

62E.035 Self insurer identification and reporting.

The commissioner shall require self insurers to report annually that they are engaged in self insurance business. These reports shall be for the previous calendar year and shall include the self insurer's total cost of self insurance and other information the commissioner may by rule require relating to the self insurer's plan of health coverage. Upon request of the commissioner, the commissioner of revenue shall cooperate with the commissioner in the identification of self insurers, and shall modify forms and promulgate rules as may be necessary to identify self insurers. In adopting the forms and rules promulgated pursuant to this section the commissioner of revenue shall consult with the commissioner.

[*1979 c 272 s 3*]

62E.04 Duties of insurers.

[*For text of subds 1 to 3, see M.S.1978*]

Subd. 4. **Major medical coverage.** Each insurer and fraternal shall affirmatively offer coverage of major medical expenses to every applicant who applies to the insurer or fraternal for a new unqualified policy at the time of application and annually to every holder of an unqualified policy of accident and health insurance renewed by the insurer or fraternal. The coverage shall provide that when a covered individual incurs out-of-pocket expenses of $5,000 or more within a calendar year for services covered in section 62E.06, subdivision 1, benefits shall be payable, subject to any copayment authorized by the commissioner, up to a maximum lifetime limit of $250,000. The offer of coverage of major medical expenses may consist of the offer of a rider on an existing unqualified policy or a new policy which is a qualified plan.

[For text of subds 5 to 7, see M.S.1978]

Subd. 8. **Reduction of benefits because of other services.** No policy of accident and health insurance shall contain any provision denying or reducing benefits because services are rendered to an insured or dependent who is eligible for or receiving benefits pursuant to chapters 256B and 256D, or sections 62E.51 to 62E.55 or 252.27; 260.251, subdivision 1a; 261.27; 393.07, subdivision 1 or 2.

[1979 c 174 s 3; 1979 c 272 s 4]

62E.06 Minimum benefits of qualified plan.

Subdivision 1. **Number three plan.** A plan of health coverage shall be certified as a number three qualified plan if it otherwise meets the requirements established by chapters 62A and 62C, and the other laws of this state, whether or not the policy is issued in Minnesota, and meets or exceeds the following minimum standards:

(a) The minimum benefits for a covered individual shall, subject to the other provisions of this subdivision, be equal to at least 80 percent of the cost of covered services in excess of an annual deductible which does not exceed $150 per person. The coverage shall include a limitation of $3,000 per person on total annual out-of-pocket expenses for services covered under this subdivision. The coverage shall be subject to a maximum lifetime benefit of not less than $250,000.

The $3,000 limitation on total annual out-of-pocket expenses and the $250,000 maximum lifetime benefit shall not be subject to change or substitution by use of an actuarily equivalent benefit.

(b) Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

(1) Hospital services;

(2) Professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction;

(3) Drugs requiring a physician's prescription;

(4) Services of a nursing home for not more than 120 days in a year if the services would qualify as reimbursable services under medicare;

(5) Services of a home health agency if the services would qualify as reimbursable services under medicare;

(6) Use of radium or other radioactive materials;

(7) Oxygen;

(8) Anesthetics;

(9) Prostheses other than dental;

(10) Rental or purchase, as appropriate, of durable medical equipment other than eyeglasses and hearing aids;

(11) Diagnostic X-rays and laboratory tests;

(12) Oral surgery for partially or completely unerupted impacted teeth, a tooth root without the extraction of the entire tooth, or the gums and tissues of the mouth when not performed in connection with the extraction or repair of teeth;

(13) Services of a physical therapist; and

(14) Transportation provided by licensed ambulance service to the nearest facility qualified to treat the condition; or a reasonable mileage rate for transportation to a kidney dialysis center for treatment.

(c) Covered expenses for the services and articles specified in this subdivision do not include the following:

(1) Any charge for care for injury or disease either (i) arising out of an injury in the course of employment and subject to a workers' compensation or similar law, (ii) for which benefits are payable without regard to fault under coverage statutorily required to be contained in any motor vehicle, or other liability insurance policy or equivalent self-

insurance, or (iii) for which benefits are payable under another policy of accident and health insurance, medicare or any other governmental program except as otherwise provided by law;

(2) Any charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect;

(3) Care which is primarily for custodial or domiciliary purposes which would not qualify as eligible services under medicare;

(4) Any charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician, provided, however, that if the institution does not have semi-private rooms, its most common semi-private room charge shall be considered to be 90 percent of its lowest private room charge;

(5) That part of any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceeds the prevailing charge in the locality where the service is provided; and

(6) Any charge for services or articles the provision of which is not within the scope of authorized practice of the institution or individual rendering the services or articles.

(d) The minimum benefits for a qualified plan shall include, in addition to those benefits specified in clauses (a) and (e), benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations:

(1) Well baby care, effective July 1, 1980;

(2) Physicians' services for routine check-ups and annual physicals when prescribed by a physician, effective July 1, 1982;

(3) Multiphasic screening and other diagnostic testing, effective July 1, 1982. The commissioner by rule shall prescribe reasonable limits on the reimbursement required for services listed in this clause.

(e) Effective July 1, 1979, the minimum benefits of a qualified plan shall include, in addition to those benefits specified in clause (a), a second opinion from a physician on all surgical procedures expected to cost a total of $500 or more in physician, laboratory and hospital fees, provided that the coverage need not include the repetition of any diagnostic tests.

[*1979 c 272 s 5*]

62E.08 State plan premium.

Subdivision 1. The association shall establish the following maximum premiums to be charged for membership in the comprehensive health insurance plan:

(a) The premium for the number one qualified plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in Minnesota;

(b) The premium for the number two qualified plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in Minnesota;

(c) The premium for a qualified medicare supplement plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals enrolled in a qualified medicare supplement plan; and

(d) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

The five insurers whose rates are used to establish the premium for each type of coverage offered by the association shall be determined by the commissioner on the ba-

sis of information provided by all insurers annually at the commissioner's request, concerning the number of individual qualified plans and qualified medicare supplement plans or actuarially equivalent plans offered by the insurer and rates charged by the insurer for each type of plan offered by the insurer. In determining the insurers whose rates shall be used in establishing the premium, the commissioner shall utilize generally accepted actuarial principles and structurally compatible rates. Subject to this subdivision, the commissioner shall include any insurer operating pursuant to chapter 62C in establishing the premium. In establishing premiums pursuant to this section, the association shall utilize generally accepted actuarial principles.

Subd. 2. Subject to subdivision 1, the schedule of premiums for coverage under the comprehensive health insurance plan shall be designed to be self-supporting and based on generally accepted actuarial principles.

[*1979 c 272 s 6*]

62E.10 Comprehensive health association.

Subdivision 1. **Creation; tax exemption.** There is established a comprehensive health association to promote the public health and welfare of the state of Minnesota with membership consisting of all insurers, self insurers, fraternals and health maintenance organizations licensed or authorized to do business in this state. The comprehensive health association shall be exempt from taxation under the laws of this state and all property owned by the association shall be exempt from taxation.

Subd. 2. **Board of directors; organization.** The board of directors of the association shall be made up of seven individuals selected by participating members, subject to approval by the commissioner. In determining voting rights at members' meetings, each member shall be entitled to vote in person or proxy. The vote shall be a weighted vote based upon the member's cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of Minnesota residents in the previous calendar year, as determined by the commissioner. In approving members of the board, the commissioner shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the moneys of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

Subd. 3. **Mandatory membership.** All members shall maintain their membership in the association as a condition of doing accident and health insurance, self-insurance, or health maintenance organization business in this state. The association shall submit its articles, bylaws and operating rules to the commissioner for approval; provided that the adoption and amendment of articles, bylaws and operating rules by the association and the approval by the commissioner thereof shall be exempt from the provisions of sections 15.041 to 15.052.

Subd. 4. **Open meetings.** All meetings of the association, its board, and any committees of the association shall comply with the provisions of section 471.705.

Subd. 5. [Repealed, 1979 c 272 s 11]

Subd. 6. **Antitrust exemption.** In the performance of their duties as members of the association, the members shall be exempt from the provisions of sections 325.8011 to 325.8028.

Subd. 7. **General powers.** The association may:

(a) Exercise the powers granted to insurers under the laws of this state;

(b) Sue or be sued;

(c) Enter into contracts with insurers, similar associations in other states or with other persons for the performance of administrative functions including the functions provided for in clauses (e) and (f);

(d) Establish administrative and accounting procedures for the operation of the association;

(e) Provide for the reinsuring of risks incurred as a result of issuing the coverages required by sections 62E.04 and 62E.16 by members of the association. Each member which elects to reinsure its required risks shall determine the categories of coverage it elects to reinsure in the association. The categories of coverage are:

(1) Individual qualified plans, excluding group conversions;

(2) Group conversions;

(3) Group qualified plans with fewer than 50 employees or members; and

(4) Major medical coverage.

A separate election may be made for each category of coverage. If a member elects to reinsure the risks of a category of coverage, it must reinsure the risk of the coverage of every life covered under every policy issued in that category. A member electing to reinsure risks of a category of coverage shall enter into a contract with the association establishing a reinsurance plan for the risks. This contract may include provision for the pooling of members' risks reinsured through the association and it may provide for assessment of each member reinsuring risks for losses and operating and administrative expenses incurred, or estimated to be incurred in the operation of the reinsurance plan. This reinsurance plan shall be approved by the commissioner before it is effective. Members electing to administer the risks which are reinsured in the association shall comply with the benefit determination guidelines and accounting procedures established by the association. The fee charged by the association for the reinsurance of risks shall not be less than 110 percent of the total anticipated expenses incurred by the association for the reinsurance; and

(f) Provide for the administration by the association of policies which are reinsured pursuant to clause (e). Each member electing to reinsure one or more categories of coverage in the association may elect to have the association administer the categories of coverage on the member's behalf. If a member elects to have the association administer the categories of coverage, it must do so for every life covered under every policy issued in that category. The fee for the administration shall not be less than 110 percent of the total anticipated expenses incurred by the association for the administration.

Subd. 8. **Department of state exemption.** The association shall be exempt from the provisions of chapter 15.

[*1979 c 272 s 7*]

62E.11 Operation of comprehensive plan.

Subdivision 1. Upon certification as an eligible person in the manner provided by section 62E.14, an eligible person may enroll in the comprehensive health insurance plan by payment of the state plan premium to the writing carrier.

Subd. 2. Any employer which has in its employ one or more eligible persons enrolled in the comprehensive health insurance plan may make all or any portion of the state plan premium payment to the state plan directly to the writing carrier.

Subd. 3. Not less than 87-1/2 percent of the state plan premium paid to the writing carrier shall be used to pay claims, and not more than 12-1/2 percent shall be used for the payment of agent referral fees as authorized in section 62E.15, subdivision 3 and for payment of the writing carrier's direct and indirect expenses, as specified in section 62E.13, subdivision 7.

Subd. 4. Any income in excess of the costs incurred by the association in providing reinsurance or administrative services pursuant to section 62E.07, clauses (e) and (f) shall be held at interest and used by the association to offset losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Subd. 5. Each contributing member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan for plans issued or approved for issuance by the association, and shall share in the operating and administrative expenses incurred or estimated to be incurred by the association incident to the conduct of its affairs. Claims expenses of the state plan which exceed the premium payments allocated to the payment of benefits shall be the liability of the contributing members. Contributing members shall share in the claims expense of the state plan and operating and administrative expenses of the association in an amount equal to the ratio of the contrib-

uting member's total accident and health insurance premium, received from or on behalf of Minnesota residents as divided by the total accident and health insurance premium, received by all contributing members from or on behalf of Minnesota residents, as determined by the commissioner.

Subd. 6. The association shall make an annual determination of each contributing member's liability, if any, and may make an annual fiscal year end assessment if necessary. The association may also, subject to the approval of the commissioner, provide for interim assessments against the contributing members as may be necessary to assure the financial capability of the association in meeting the incurred or estimated claims expenses of the state plan and operating and administrative expenses of the association until the association's next annual fiscal year end assessment. Payment of an assessment shall be due within 30 days of receipt by a contributing member of a written notice of a fiscal year end or interim assessment. Failure by a contributing member to tender to the association the assessment within 30 days shall be grounds for termination of the contributing member's membership. A contributing member which ceases to do accident and health insurance business within the state shall remain liable for assessments through the calendar year during which accident and health insurance business ceased. The association may decline to levy an assessment against a contributing member if the assessment, as determined herein, would not exceed ten dollars.

Subd. 7. Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Subd. 8. Any annual fiscal year end or interim assessment levied against a contributing member may be offset, in an amount equal to the assessment paid to the association, against the income tax or the premium tax payable by that contributing member pursuant to section 60A.15 for the year in which the annual fiscal year end or interim assessment is levied. The commissioner of revenue shall annually, on or before January 15, report to the chairmen of the senate finance, house appropriations, senate commerce and house financial institutions and insurance committees as to the total amount of income tax or premium tax offset claimed by contributing members during the preceding calendar year.

[*1979 c 272 s 8*]

NOTE: The provisions of subdivision 8 shall expire July 1, 1981. See Laws 1979, Chapter 272, Section 12.

62E.13 Administration of plan.

[*For text of subd 1, see M.S.1978*]

Subd. 2. The association may select policies and contracts, or parts thereof, submitted by a member or members of the association, or by the association or others, to develop specifications for bids from any members which wish to be selected as a writing carrier to administer the state plan. The selection of the writing carrier shall be based upon criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified medicare supplement plan, and the health maintenance organization contract.

[*For text of subds 3 to 9, see M.S.1978*]

[*1979 c 272 s 9*]

62E.14 Enrollment by an eligible person.

Subdivision 1. **Certificate, contents.** The comprehensive health insurance plan shall be open for enrollment by eligible persons. An eligible person shall enroll by submission of a certificate of eligibility to the writing carrier. The certificate shall provide the following:

(a) Name, address, age, and length of time at residence of the applicant;

(b) Name, address, and age of spouse and children if any, if they are to be insured;

(c) Evidence of rejection, a requirement of restrictive riders, a rate up, or a pre-existing conditions limitation on a qualified plan, the effect of which is to substantially reduce coverage from that received by a person considered a standard risk, by at least two association members within six months of the date of the certificate, or other eligibility requirements adopted by rule by the commissioner which are not inconsistent with this chapter and which evidence that a person is unable to obtain coverage substantially similar to that which may be obtained by a person who is considered a standard risk; and

(d) A designation of the coverage desired.

An eligible person may not purchase more than one policy from the state plan. Upon ceasing to be a resident of Minnesota a person is no longer eligible to purchase or renew coverage under the state plan.

1979 Amendments to MINNESOTA

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:

Section 1. Minnesota Statutes 1978, Section 176.521, Subdivision 2, is amended to read:

Subd. 2. **APPROVAL.** Settlements shall be approved only where the terms conform with this chapter.

The division and the workers' compensation court of appeals shall exercise discretion in approving or disapproving a proposed settlement.

The parties to the agreement of settlement have the burden of proving that the settlement is reasonable, fair, and in conformity with this chapter. A settlement agreement where both the employee or his dependent and the employer or insurer and intervenors in the matter are represented by an attorney shall be presumed to be reasonable, fair, and in conformity with chapter 176.

Sec. 2. Minnesota Statutes 1978, Section 79.21, is amended to read:

79.21 **RATES TO BE UNIFORM; EXCEPTIONS.** No insurer shall write insurance at a rate other than that made and put into force by the bureau and approved as adequate and reasonable by the commissioner. The bureau may reduce or increase a rate by the application to individual risks of the system of merit or experience rating which has been approved by the commissioner. This reduction or increase shall be set forth in the policy or by indorsement thereon. Upon written request an insurer shall furnish a written explanation to the insured of how and why the individual rate was adjusted by application of a system of merit or experience rating. This explanation shall be mailed to the insured within 30 days of the request.

Approved May 30, 1979

CHAPTER 272—S.F.No.1191

An act relating to insurance; providing for changes in the operation and funding of the comprehensive health association, requiring identification of certain insurers, setting premium standards, changing the effective dates of certain mandated benefits, amending Minnesota Statutes 1978, Sections 62E.02, Subdivision 10, and by adding a subdivision; 62E.06, Subdivision 4; 62E.06, Subdivision 1; 62E.08; 62E.10; 62E.11; 62E.13, Subdivision 2; 62E.14, Subdivision 1, and Chapter 62E, by adding a section; repealing Minnesota Statutes 1978, Section 62E.10, Subdivision 5.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA

Section 1. Minnesota Statutes 1978, Section 62E.02, Subdivision 10, is amended to read:

Changes or additions indicated by underline deletions by strikeout

Subd. 10. "Insurer" means those companies operating pursuant to chapters 62A or 62C and offering or , selling, issuing, or renewing policies or contracts of accident and health insurance. "Insurer" does not include health maintenance organizations.

Sec. 2. Minnesota Statutes 1978, Section 62E.02, is amended by adding a subdivision to read:

Subd. 23. "Contributing member" means those companies operating pursuant to chapter 62A, paying premium taxes pursuant to section 60A.15, and offering, selling, issuing, or renewing policies or contracts of accident and health insurance.

Sec. 3. Minnesota Statutes 1978, Chapter 62E, is amended by adding a section to read:

[62E.035] **SELF INSURER IDENTIFICATION AND REPORTING.** The commissioner shall require self insurers to report annually that they are engaged in self insurance business. These reports shall be for the previous calendar year and shall include the self insurer's total cost of self insurance and other information the commissioner may by rule require relating to the self insurer's plan of health coverage. Upon request of the commissioner, the commissioner of revenue shall cooperate with the commissioner in the identification of self insurers and shall modify forms and promulgate rules as may be necessary to identify self insurers. In adopting the forms and rules promulgated pursuant to this section the commissioner of revenue shall consult with the commissioner.

Sec. 4. Minnesota Statutes 1978, Section 62E.04, Subdivision 4, is amended to read:

Subd. 4. **MAJOR MEDICAL COVERAGE.** Each insurer and fraternal shall affirmatively offer coverage of major medical expenses to every applicant who applies to the insurer or fraternal for a new unqualified policy at the time of application and annually to every holder of an unqualified policy of accident and health insurance issued by the insurer or fraternal. The coverage shall provide that when a covered individual incurs out-of-pocket expenses of $5,000 or more within a calendar year for services covered in section 62E.06, subdivision 1, benefits shall be payable, subject to any copayment authorized by the commissioner, up to a maximum lifetime limit of $250,000. The offer of coverage of major medical expenses may consist of the offer of a rider on an existing unqualified policy or a new policy which is a qualified plan.

Sec. 5. Minnesota Statutes 1978, Section 62E.06, Subdivision 1, is amended to read:

62E.06 **MINIMUM BENEFITS OF QUALIFIED PLAN.** Subdivision 1. **NUMBER THREE PLAN.** A plan of health coverage shall be certified as a number three qualified plan if it otherwise meets the requirements established by chapters 62A and 62C, and the other laws of this state, whether or not the policy is issued in Minnesota, and meets or exceeds the following minimum standards:

(a) The minimum benefits for a covered individual shall, subject to the other provisions of this subdivision, be equal to at least 80 percent of the cost of covered services in excess of an annual deductible which does not exceed $150 per person. The

coverage shall include a limitation of $3,000 per person on total annual out-of-pocket expenses for services covered under this subdivision. The coverage shall be subject to a maximum lifetime benefit of not less than $250,000.

The $3,000 limitation on total annual out-of-pocket expenses and the $250,000 maximum lifetime benefit shall not be subject to change or substitution by use of an actuarily equivalent benefit.

(b) Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

(1) Hospital services;

(2) Professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction;

(3) Drugs requiring a physician's prescription;

(4) Services of a nursing home for not more than 120 days in a year if the services would qualify as reimbursable services under medicare;

(5) Services of a home health agency if the services would qualify as reimbursable services under medicare;

(6) Use of radium or other radioactive materials;

(7) Oxygen;

(8) Anesthetics;

(9) Prostheses other than dental;

(10) Rental or purchase, as appropriate, of durable medical equipment other than eyeglasses and hearing aids;

(11) Diagnostic X-rays and laboratory tests;

(12) Oral surgery for partially or completely unerupted impacted teeth, a tooth root without the extraction of the entire tooth, or the gums and tissues of the mouth when not performed in connection with the extraction or repair of teeth;

(13) Services of a physical therapist; and

(14) Transportation provided by licensed ambulance service to the nearest facility qualified to treat the condition; or a reasonable mileage rate for transportation to a kidney dialysis center for treatment.

Changes or additions indicated by underline deletions by strikeout

(c) Covered expenses for the services and articles specified in this subdivision do not include the following:

(1) Any charge for care for injury or disease either (i) arising out of an injury in the course of employment and subject to a workers' compensation or similar law, (ii) for which benefits are payable without regard to fault under coverage statutorily required to be contained in any motor vehicle, or other liability insurance policy or equivalent self-insurance, or (iii) for which benefits are payable under another policy of accident and health insurance, medicare or any other governmental program except as otherwise provided by law;

(2) Any charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect;

(3) Care which is primarily for custodial or domiciliary purposes which would not qualify as eligible services under medicare;

(4) Any charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician, provided, however, that if the institution does not have semi-private rooms, its most common semi-private room charge shall be considered to be 90 percent of its lowest private room charge;

(5) That part of any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceeds the prevailing charge in the locality where the service is provided; and

(6) Any charge for services or articles the provision of which is not within the scope of authorized practice of the institution or individual rendering the services or articles.

(d) ~~Effective July 1, 1980,~~ The minimum benefits for a qualified plan shall include, in addition to those benefits specified in clauses (a) and (c), benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations:

(1) Well baby care, effective July 1, 1980;

(2) Physicians' services for routine check-ups and annual physicals when prescribed by a physician, effective July 1, 1982;

(3) Multiphasic screening and other diagnostic testing, effective July 1, 1982. The commissioner by rule shall prescribe reasonable limits on the reimbursement required for services listed in this clause.

(e) Effective July 1, 1979, the minimum benefits of a qualified plan shall include, in addition to those benefits specified in clause (a), a second opinion from a physician on all surgical procedures expected to cost a total of $500 or more in physician, laboratory and hospital fees, provided that the coverage need not include the repetition of any diagnostic

tests.

Sec. 6. Minnesota Statutes 1978, Section 62E.08, is amended to read:

62E.08 **STATE PLAN PREMIUM.** Subdivision 1. ~~For the first eighteen months of operation of the comprehensive health insurance plan~~ The association shall establish the following maximum premiums to be charged for membership in the comprehensive health insurance plan:

(a) The premium for the number one qualified plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in Minnesota;

(b) The premium for the number two qualified plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in Minnesota;

(c) The premium for a qualified medicare supplement plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals enrolled in a qualified medicare supplement plan; and

(d) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

The five insurers whose rates are used to establish the premium for each type of coverage offered by the association shall be determined by the commissioner on the basis of information provided by all insurers annually at the commissioner's request, concerning the number of individual qualified plans and qualified medicare supplement plans or actuarially equivalent plans offered by the insurer and rates charged by the insurer for each type of plan offered by the insurer. In determining the insurers whose rates shall be used in establishing the premium, the commissioner shall utilize generally accepted actuarial principles and structurally compatible rates. Subject to this subdivision, the commissioner shall include any insurer operating pursuant to chapter 67C in establishing the premium. In establishing premiums pursuant to this section, the association shall utilize generally accepted actuarial principles.

Subd. 2. ~~For subsequent enrollees or renewals of membership~~ Subject to subdivision 1 of this section, the schedule of premiums for membership in coverage under the comprehensive health insurance plan shall be designed to be self-supporting and based on generally accepted actuarial principles.

Sec. 7. Minnesota Statutes 1978, Section 62E.10, is amended to read:

62E.10 **COMPREHENSIVE HEALTH ASSOCIATION.** Subdivision 1. **CREATION; TAX EXEMPTION.** There is established a comprehensive health association to promote the public health and welfare of the state of Minnesota with membership consisting of all insurers, self insurers, fraternals and health maintenance organizations licensed or authorized to do business in this state. The comprehensive

health association shall be exempt from taxation under the laws of this state and all property owned by the association shall be exempt from taxation.

Subd. 2. **BOARD OF DIRECTORS; ORGANIZATION.** The board of directors of the association shall be made up of seven individuals selected by participating members, subject to approval by the commissioner. ~~To select the initial board of directors, and to initially organize the association, the commissioner shall give notice to all members of the time and place of the organizational meeting.~~ In determining voting rights at ~~the organizational meeting~~ members' meetings, each member shall be entitled to vote in person or proxy. The vote shall be a weighted vote based upon the member's cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of Minnesota residents in the previous calendar year, as determined by the commissioner. ~~If the board of directors is not selected within 60 days after notice of the organizational meeting, the commissioner may appoint the initial board.~~ In approving ~~or selecting~~ members of the board, the commissioner shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the moneys of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

Subd. 3. **MANDATORY MEMBERSHIP.** All members shall maintain their membership in the association as a condition of doing accident and health insurance, self-insurance, or health maintenance organization business in this state. The association shall submit its articles, bylaws and operating rules to the commissioner for approval; provided that the adoption and amendment of articles, bylaws and operating rules by the association and the approval by the commissioner thereof shall be exempt from the provisions of sections 15.041 to 15.052.

Subd. 4. **OPEN MEETINGS.** All meetings of the association, its board, and any committees of the association shall comply with the provisions of section 471.705.

Subd. 5. All members shall enter into a contract with the association according to terms specified in section 11. The contract of reinsurance shall be executed on or before January 1, 1977, for a period of one year and shall be renewed annually thereafter. A company which ceases to do business within the state shall remain liable under the contract for the reinsurance contracted for during that calendar year.

Subd. 6. **ANTITRUST EXEMPTION.** In the performance of their duties as members of the association, the members shall be exempt from the provisions of sections 325.8011 to 325.8028.

Subd. 7. **GENERAL POWERS.** The association may:

(a) Exercise the powers granted to insurers under the laws of this state;

(b) Sue or be sued;

(c) Enter into contracts with insurers, similar associations in other states or with other persons for the performance of administrative functions including the functions provided for in clauses (e) and (f);

(d) Establish administrative and accounting procedures for the operation of the association;

(e) Provide for the reinsuring of risks incurred as a result of issuing the coverages required by sections 62E.04 and 62E.16 by members of the association. Each member which elects to reinsure its required risks shall determine the categories of coverage it elects to reinsure in the association. The categories of coverage are:

(1) Individual qualified plans, excluding group conversions;

(2) Group conversions;

(3) Group qualified plans with fewer than 50 employees or members; and

(4) Major medical coverage.

A separate election may be made for each category of coverage. If a member elects to reinsure the risks of a category of coverage, it must reinsure the risk of the coverage of every life covered under every policy issued in that category. A member electing to reinsure risks of a category of coverage shall enter into a contract with the association establishing a reinsurance plan for the risks. This contract may include provision for the pooling of members' risks reinsured through the association and it may provide for assessment of each member reinsuring risks for losses and operating and administrative expenses incurred, or estimated to be incurred in the operation of the reinsurance plan. This reinsurance plan shall be approved by the commissioner before it is effective. Members electing to administer the risks which are reinsured in the association shall comply with the benefit determination guidelines and accounting procedures established by the association. The fee charged by the association for the reinsurance of risks shall not be less than 110 percent of the total anticipated expenses incurred by the association for the reinsurance; and

(f) Provide for the administration by the association of policies which are reinsured pursuant to clause (e). Each member electing to reinsure one or more categories of coverage in the association may elect to have the association administer the categories of coverage on the member's behalf. If a member elects to have the association administer the categories of coverage, it must do so for every life covered under every policy issued in that category. The fee for the administration shall not be less than 110 percent of the total anticipated expenses incurred by the association for the administration.

Subd. 8. **DEPARTMENT OF STATE EXEMPTION.** The association shall be exempt from the provisions of chapter 15.

62E.11 **OPERATION OF COMPREHENSIVE PLAN.** Subdivision 1. Upon certification as an eligible person in the manner provided by section 62E.14, an eligible person may enroll in the comprehensive health insurance plan by payment of the state plan premium to the writing carrier.

Subd. 2. Any employer which has in its employ one or more eligible persons enrolled in the comprehensive health insurance plan may make all or any portion of the state plan premium payment to the state plan directly to the writing carrier.

Subd. 3. Not less than 87-1/2 percent of the state plan premium paid to the writing carrier shall be used to pay claims, and not more than 12-1/2 percent shall be used for the payment of agent referral fees as authorized in section 62E.15, subdivision 3 and for payment of the writing carrier's direct and indirect expenses, as specified in section 62E.13, subdivision 7.

Subd. 4. Any income in excess of the costs incurred by the association in providing reinsurance or administrative services pursuant to section 62E.07, clauses (e) and (f) shall be held at interest and used by the association to offset losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Subd. 5. Each contributing member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan health insurance plan for plans issued or approved for issuance by the association, and shall share in the operating and administrative expenses incurred or estimated to be incurred by the association incident to the conduct of its affairs, pursuant to the terms of the individual reinsurance contracts executed by the association with each member in accordance with section 62E.10, subdivision 5. Deviations in the claim experience of the state plan from Claims expenses of the state plan which exceed the premium payments allocated to the payment of benefits shall be the liability of the association contributing members. Association Contributing members shall share in the claims expense of the state plan and operating and administrative expenses of the association in an amount equal to the ratio of the contributing member's total cost of self insurance, accident and health insurance premiums, subscriber contract charges, or health maintenance organization contract charges received from or on behalf of Minnesota residents as divided into by the total cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance organization contract charges received by all association contributing members from or on behalf of Minnesota residents, as determined by the commissioner.

Subd. 6. The reinsurance contract shall provide for The association shall make an annual determination and assessment of each contributing member's liability, if any, and may make an annual fiscal year end assessment if necessary. Payment of the assessment shall be due within 30 days after the end of the association's fiscal year. The association may also, subject to the approval of the commissioner, the reinsurance contract may provide for interim assessments against the contributing members as may be necessary to assure the financial capability of the association in meeting the incurred or estimated claims expenses of the state plan and operating and administrative expenses of the association until the association's next annual fiscal year end assessment. Payment of an

assessment shall be due within 30 days of receipt by a contributing member of a written notice of a fiscal year end or interim assessment. Failure by a contributing member to tender to the association the ~~assessed reinsurance payment~~ assessment within 30 days ~~of notification by the association~~ shall be grounds for termination of the contributing member's membership. A contributing member which ceases to do accident and health insurance business within the state shall remain liable for assessments through the calendar year during which accident and health insurance business ceased. The association may decline to levy an assessment against a contributing member if the assessment, as determined herein, would not exceed ten dollars.

Subd. 7. Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Subd. 8. Any annual fiscal year end or interim assessment levied against a contributing member may be offset, in an amount equal to the assessment paid to the association, against the income tax or the premium tax payable by that contributing member pursuant to section 60A.15 for the year in which the annual fiscal year end or interim assessment is levied. The commissioner of revenue shall annually, on or before January 15, report to the chairmen of the senate finance, house appropriations, senate commerce and house financial institutions and insurance committees as to the total amount of income tax or premium tax offset claimed by contributing members during the preceding calendar year.

Sec. 9. Minnesota Statutes 1978, Section 62E.13, Subdivision 2, is amended to read:

Subd. 2. ~~Upon the commissioner's approval of the policy forms and contracts submitted pursuant to chapter 62A,~~ The association may select policies and contracts, or parts thereof, submitted by a member or members of the association ~~to be the comprehensive health insurance plan~~ , or by the association or others, to develop specifications for bids from any members which wish to be selected as a writing carrier to administer the state plan. ~~This~~ The selection of the writing carrier shall be based upon criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified medicare supplement plan, and the health maintenance organization contract.

Sec. 10. Minnesota Statutes 1978, Section 62E.14, Subdivision 1, is amended to read:

62E.14 **ENROLLMENT BY AN ELIGIBLE PERSON.** Subdivision 1. **CERTIFICATE, CONTENTS.** The comprehensive health insurance plan shall be open for enrollment by eligible persons. An eligible person ~~may~~ shall enroll by submission of a certificate of eligibility to the writing carrier. The certificate ~~may~~ shall provide the following:

(a) Name, address, age, and length of time at residence of the applicant;

(b) Name, address, and age of spouse and children if any, if they are to be insured;

(c) Evidence of rejection, ~~or~~ a requirement of restrictive riders, a rate up, or a pre-existing conditions limitation on a qualified plan, the effect of which is to substantially reduce coverage from that received by a person considered a standard risk, by at least two association members within six months of the date of the certificate , or other eligibility requirements adopted by rule by the commissioner which are not inconsistent with this chapter and which evidence that a person is unable to obtain coverage substantially similar to that which may be obtained by a person who is considered a standard risk ; and

(d) A designation of the coverage desired.

An eligible person may not purchase more than one policy from the state plan. Upon ceasing to be a resident of Minnesota a person is no longer eligible to purchase or renew coverage under the state plan.

Sec. 11. **REPEALER.** Minnesota Statutes 1978, Section 62E.10, Subdivision 5, is repealed.

Sec. 12. **EFFECTIVE DATE.** This act is effective the day following its final enactment. The provisions of section 62E.11, subdivision 8, shall expire on July 1, 1981.

Approved May 30, 1979.

CHAPTER 273—S.F.No.1218

An act relating to Polk and Norman Counties; permitting the imposition of a tax on removing gravel; providing for its administration; providing a penalty.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:

Section 1. Every person engaged in the business of removing gravel from gravel pits or deposits of gravel in Polk or Norman County shall pay to the county an occupation tax in an amount the board of county commissioners determines necessary for the purposes set forth in section 5, but not more than ten cents on each cubic yard of gravel removed.

Sec. 2. Every person engaged in the removal of gravel shall at the times herein provided, file with the county auditor, under oath, a correct report in the form and containing the information he requires, covering each year. A report shall be filed on December 1, 1979, covering the period between the effective date of the act and December 1, 1979 and thereafter on December 1 of each year, covering the preceding year's operation. The operator shall compute the amount of the tax due on the basis of the information contained in the report. The tax computed in the report shall be due and payable to the county treasurer prior to the last business day of December.

MINNESOTA

62A.041 MATERNITY BENEFITS; UNMARRIED WOMEN. Each group policy of accident and health insurance issued or renewed after June 4, 1971, shall provide the same coverage for maternity benefits to unmarried women and minor female dependents that it provides to married women including the wives of employees choosing dependent family coverage. If an insured is a parent or an acknowledged or adjudicated parent of a dependent illegitimate child each group policy issued or renewed after July 1, 1976, shall provide the same coverage for that child as that provided for the child of an employee choosing dependent family coverage if the insured elects dependent family coverage.

Each individual policy of accident and health insurance shall provide the same coverage for maternity benefits to unmarried women and minor female dependents as that provided for married women. If the insured is a parent or an acknowledged or adjudicated parent of a dependent illegitimate child, each individual policy issued or renewed after July 1, 1976, shall also provide the same coverage for that child as that provided for the child of an insured choosing dependent family coverage if the insured elects dependent family coverage.

For the purposes of this section, the term "maternity benefits" shall not include elective, induced abortion whether performed in a hospital, other abortion facility, or the office of a physician.

[*1971 c 680 s 1; 1973 c 651 s 1; 1976 c 121 s 3*]

62A.042 FAMILY COVERAGE; COVERAGE OF NEWBORN INFANTS. Subdivision 1. **Individual family policies; renewals.** No policy of individual accident and sickness insurance which provides for insurance for more than one person under section 62A.03, subdivision 1, clause (3), shall be renewed to insure any person in this state or be delivered or issued for delivery to any person in this state unless such policy includes as insured members of the family any newborn infants immediately from the moment of birth and thereafter which insurance shall provide coverage for illness, injury, congenital malformation or premature birth.

Subd. 2. **Group policies; renewals.** No group accident and sickness insurance policy which provides for coverage of family members or other dependents of an employee or other member of the covered group shall be renewed to cover members of a group located in this state or delivered or issued for delivery in this state unless such policy includes as insured family members or dependents any newborn infants immediately from the moment of birth and thereafter which insurance shall provide coverage for illness, injury, congenital malformation or premature birth.

[*1973 c 303 s 1*]

62A.043 DENTAL PROCEDURES. Subdivision 1. The provisions of this section shall apply to all individual or group policies or subscriber contracts providing payment for care in this state, which policies or contracts are issued or renewed after August 1, 1976 by an accident and health insurance company regulated under this chapter, or a nonprofit health service plan corporation regulated under chapter 62C.

Subd. 2. Any policy or contract referred to in subdivision 1 which provides coverage for services which can be lawfully performed within the scope of the license of a duly licensed dentist or podiatrist, shall provide benefits for such services whether performed by a duly licensed physician, dentist or podiatrist.

[*1973 c 430 s 1; 1976 c 207 s 1*]

62A.044 PAYMENTS TO GOVERNMENTAL INSTITUTIONS. No group or individual policy of accident and sickness insurance issued or renewed after May 22, 1973 pursuant to this chapter, and no group or individual service plan or subscriber contract issued or renewed after May 22, 1973 pursuant to chapter 62C, shall contain any provision denying or prohibiting payments for services rendered by a hospital or medical institution owned or operated by the federal, state, or local government or practitioners therein in any instance wherein charges for such services are imposed against the policy holder or subscriber. The unit of government operating the institution may maintain an action for recovery of such charges.

[*1973 c 471 s 1*]

62A.045 PAYMENTS TO WELFARE RECIPIENTS. No policy of accident and sickness insurance issued or renewed after August 1, 1975, shall contain any provision denying or reducing benefits because services are rendered to an insured or dependent

who is eligible for or receiving medical assistance pursuant to chapter 256B.

[*1975 c 247 s 1*]

62A.05 CONSTRUCTION OF PROVISIONS. Subdivision 1. No policy provision which is not subject to section 62A.04 shall make a policy, or any portion thereof, less favorable in any respect to the insured or the beneficiary than the provisions thereof which are subject to sections 62A.01 to 62A.09 hereof.

Subd. 2. A policy delivered or issued for delivery to any person in this state in violation of sections 62A.01 to 62A.09 hereof, shall be held valid but shall be construed as provided in sections 62A.01 to 62A.09 hereof. When any provision in a policy subject to sections 62A.01 to 62A.09 hereof, is in conflict with any provision of sections 62A.01 to 62A.09 hereof, the rights, duties and obligations of the insurer, the insured and the beneficiary shall be governed by the provisions of sections 62A.01 to 62A.09 hereof.

[*1967 c 395 art 3 s 5*]

62A.06 STATEMENTS IN APPLICATION. Subdivision 1. **Inclusion in policy.** The insured shall not be bound by any statement made in an application for a policy unless a copy of such application is attached to or endorsed on the policy when issued as a part thereof. If any such policy delivered or issued for delivery to any person in this state shall be reinstated or renewed, and the insured or the beneficiary or assignee of such policy shall make written request to the insurer for a copy of the application, if any, for such reinstatement or renewal, the insurer shall within 15 days after the receipt of such request at its home office or any branch office of the insurer, deliver or mail to the person making such request, a copy of such application. If such copy shall not be so delivered or mailed, the insurer shall be precluded from introducing such application as evidence in any action or proceeding based upon or involving such policy or its reinstatement or renewal.

Subd. 2. **Alterations.** No alteration of any written application for any such policy shall be made by any person other than the applicant without his written consent, except that insertions may be made by the insurer, for administrative purposes only, in such manner as to indicate clearly that such insertions are not to be ascribed to the applicant.

Subd. 3. **Effect of applicant's statement.** The falsity of any statement in the application for any policy covered by sections 62A.01 to 62A.09 hereof, may not bar the right to recovery thereunder unless such false statement materially affected either the acceptance of the risk or the hazard assumed by the insurer.

[*1967 c 395 art 3 s 6*]

62A.07 RIGHTS OF INSURER, WHEN NOT WAIVED. The acknowledgment by an insurer of the receipt of notice given under any policy covered by sections 62A.01 to 62A.09 hereof, or the furnishing of forms for filing proofs of loss, or the acceptance of such proofs, or the investigation of any claim thereunder shall not operate as a waiver of any of the rights of the insurer in defense of any claim arising under such policy.

[*1967 c 395 art 3 s 7*]

62A.08 COVERAGE OF POLICY, CONTINUANCE IN FORCE. If any such policy contains a provision establishing, as an age limit or otherwise, a date after which the coverage provided by the policy will not be effective, and if such date falls within a period for which premium is accepted by the insurer or if the insurer accepts a premium after such date, the coverage provided by the policy will continue in force subject to any right of cancellation until the end of the period for which premium has been accepted. In the event the age of the insured has been misstated and if, according to the correct age of the insured, the coverage provided by the policy would not have become effective, or would have ceased prior to the acceptance of such premium or premiums, then the liability of the insurer shall be limited to the refund, upon request, of all premiums paid for the period not covered by the policy.

[*1967 c 395 art 3 s 8*]

62A.081 PAYMENTS TO FACILITIES OPERATED BY STATE OR LOCAL GOVERNMENT. Every group or individual policy of accident and sickness insurance issued or renewed after July 1, 1973 regulated by this chapter, and every group or in-

dividual service plan or subscriber contract issued or renewed after July 1, 1973 regulated by chapter 62C, providing care or payment for care in this state, shall provide payments for services rendered by a hospital or medical facility owned or operated by, or on behalf of, the state or any unit of local government, or practitioners therein, on the same basis as are made for like care in other facilities. The unit of government concerned may maintain an action for recovery of such payments.

[*1973 c 765 s 24*]

62A.09 LIMITATION. Nothing in sections 62A.01 to 62A.08 shall apply to or affect:

(1) any policy of workers' compensation insurance or any policy of casualty or fire and allied lines insurance with or without supplementary coverage therein; or

(2) any policy or contract of reinsurance; or

(3) any blanket or group policy of insurance; or

(4) life insurance, endowment or annuity contracts, or contracts supplemental thereto which contain only such provisions relating to accident and sickness insurance as (a) provide additional benefits in case of death or dismemberment or loss of sight by accident, or as (b) operate to safeguard such contracts against lapse or to give a special surrender value or special benefit or an annuity in the event that the insured or annuitant shall become totally and permanently disabled, as defined by the contract or supplemental contract.

[*1967 c 395 art 3 s 9; 1975 c 359 s 23*]

62A.10 GROUP INSURANCE. Subdivision 1. **Requirements.** Group accident and health insurance is hereby declared to be that form of accident and health insurance covering not less than two employees nor less than ten members, and which may include the employee's or member's dependents, consisting of husband, wife, children, and actual dependents residing in the household, written under a master policy issued to any governmental corporation, unit, agency, or department thereof, or to any corporation, copartnership, individual, employer, or to any association having a constitution or bylaws and formed in good faith for purposes other than that of obtaining insurance under the provisions of this chapter, where officers, members, employees, or classes or divisions thereof, may be insured for their individual benefit.

Any insurer authorized to write accident and health insurance in this state shall have power to issue group accident and health policies.

Subd. 2. **Policy forms.** No policy of group accident and health insurance may be issued or delivered in this state unless the same has been approved by the commissioner in accordance with section 62A.02, subdivisions 1 to 6. These forms shall contain the standard provisions relating and applicable to health and accident insurance and shall conform with the other requirements of law relating to the contents and terms of policies of accident and sickness insurance in so far as they may be applicable to group accident and health insurance, and also the following provisions:

(1) **Entire contract.** A provision that the policy and the application of the employer, or executive officer or trustee of any association, and the individual applications, if any, of the employees or members insured, shall constitute the entire contract between the parties, and that all statements made by the employer or any executive officer or trustee in behalf of the group to be insured, shall, in the absence of fraud, be deemed representations and not warranties, and that no such statement shall be used in defense to a claim under the policy, unless it is contained in the written application;

(2) **Master policy-certificates.** A provision that the insurer will issue a master policy to the employer, or to the executive officer or trustee of the association; and the insurer shall also issue to the employer or to the executive officer or trustee of the association, for delivery to the employee or member who is insured under the policy, an individual certificate setting forth a statement as to the insurance protection to which he is entitled and to whom payable, together with a statement as to when and where the master policy, or a copy thereof, may be seen for inspection by the individual insured; this individual certificate may contain the names of, and insure the dependents of, the employee or member, as provided for herein;

(3) **New insureds.** A provision that to the group or class thereof originally insured may be added, from time to time, all new employees of the employer or

members of the association eligible to and applying for insurance in that group or class and covered or to be covered by the master policy.

[*1967 c 395 art 3 s 10; 1973 c 303 s 2*]

62A.11 BLANKET ACCIDENT AND SICKNESS INSURANCE. Subdivision 1. **Requirements.** Blanket accident and sickness insurance is hereby declared to be that form of accident and sickness insurance covering special groups of persons as enumerated in one of the following paragraphs:

(1) Under a policy issued to any common carrier, which shall be deemed the policyholder, covering a group defined as all or any class of persons who may become passengers on such common carrier.

(2) Under a policy issued to an employer, who shall be deemed the policyholder, covering all employees or any group of employees defined by reference to exceptional hazards incident to such employment.

(3) Under a policy issued to a college, school, or other institution of learning or to the head or principal thereof, who or which shall be deemed the policyholder, covering students or teachers.

(4) Under a policy issued in the name of any volunteer fire department, first aid, or other such volunteer group, which shall be deemed the policyholder, covering all of the members of such department or group.

(5) Under a policy issued to a sports team or to a camp, which team or camp or sponsor thereof shall be deemed the policyholder, covering members or campers.

(6) Under a policy issued to any other substantially similar group which, in the discretion of the commissioner, may be subject to the issuance of a blanket accident and sickness policy.

Subd. 2. **Authority.** Any insurer authorized to write accident and sickness insurance in this state shall have the power to issue blanket accident and sickness policies.

Subd. 3. **Policy forms.** No policy of blanket accident and sickness insurance may be issued or delivered in this state unless a copy of the form thereof has been approved by the commissioner and it contains in substance such of the provisions required for individual policies as may be applicable to blanket accident and sickness insurance and the following provisions:

(1) A provision that the policy and the application of the policyholder shall constitute the entire contract between the parties, and that, in the absence of fraud, all statements made by the policyholder shall be deemed representations and not warranties, and that no statement made for the purpose of affecting insurance shall avoid such insurance or reduce benefits unless contained in a written instrument signed by the policyholder, a copy of which has been furnished to such policyholder.

(2) A provision that to the group or class originally insured shall be added from time to time all new persons eligible for coverage.

Subd. 4. **Application; certificate.** An individual application shall not be required from a person covered under a blanket accident and sickness policy, nor shall it be necessary for the insurer to furnish each person a certificate.

Subd. 5. **Benefits.** All benefits under any blanket accident and sickness policy shall be payable to the person insured, or to his designated beneficiary, or beneficiaries, or to his estate, except that if the person insured be a minor, such benefits may be made payable to his parent, guardian, or other person actually supporting him. Provided further, however, that the policy may provide that all or any portion of any indemnities provided by any such policy on account of hospital, nursing, medical or surgical services may, at the insurer's option, be paid directly to the hospital or person rendering such services; but the policy may not require that the services be rendered by a particular hospital or person. Payment so made shall discharge the insurer's obligation with respect to the amount of insurance so paid.

Subd. 6. **Legal liability.** Nothing contained in this section shall be deemed to affect the legal liability of policyholders for the death of, or injury to, any such member of such group.

[*1967 c 395 art 3 s 11*]

62A.12 TRANSITION PROVISION AS TO INDIVIDUAL POLICIES, RIDERS OR ENDORSEMENTS. A policy, rider or endorsement, which could have been lawfully used or delivered or issued for delivery to any person in this state immediately before April 18, 1957, may be used or delivered or issued for delivery to any such person until January 1, 1959, without being subject to the provisions of sections 62A.03, 62A.04, or 62A.05.

[*1967 c 395 art 3 s 12*]

62A.13 COMMERCIAL TRAVELER INSURANCE COMPANIES. Any domestic assessment, health or accident association now licensed to do business in this state, which confines its membership to commercial travelers, professional men, and others whose occupation is of such character as to be ordinarily classified as no more hazardous than commercial travelers, and which does not pay any other commissions or compensations, other than prizes to members of nominal value in proportion to the membership fees charged for securing new members, may issue certificates of membership, which, with the application of the member and the bylaws of the association, shall constitute the contract between the association and the member. A printed copy of the bylaws and a copy of the application shall be attached to the membership certificate when issued, and a copy of any amendment to the bylaws shall be mailed to the members following their adoption. Certified copies of certificate, bylaws and amendments shall be filed with the commissioner of insurance and subject to his approval. The bylaws shall conform to the requirements of this chapter, so far as applicable, and wherever the word "policy" appears in this chapter, it shall, for the purpose of this section, be construed to mean the contract as herein defined.

[*1967 c 395 art 3 s 13*]

62A.14 HANDICAPPED CHILDREN. Subdivision 1. **Individual family policies.** An individual hospital or medical expense insurance policy delivered or issued for delivery in this state more than 120 days after May 16, 1969, which provides that coverage of a dependent child shall terminate upon attainment of the limiting age for dependent children specified in the policy shall also provide in substance that attainment of such limiting age shall not operate to terminate the coverage of such child while the child is and continues to be both (a) incapable of self-sustaining employment by reason of mental retardation or physical handicap and (b) chiefly dependent upon the policyholder for support and maintenance, provided proof of such incapacity and dependency is furnished to the insurer by the policyholder within 31 days of the child's attainment of the limiting age and subsequently as may be required by the insurer but not more frequently than annually after the two year period following the child's attainment of the limiting age.

Subd. 2. **Group policies.** A group hospital or medical expense insurance policy delivered or issued for delivery in this state more than 120 days after May 16, 1969, which provides that coverage of a dependent child of an employee or other member of the covered group shall terminate upon attainment of the limiting age for dependent children specified in the policy shall also provide in substance that attainment of such limiting age shall not operate to terminate the coverage of such child while the child is and continues to be both (a) incapable of self-sustaining employment by reason of mental retardation or physical handicap and (b) chiefly dependent upon the employee or member for support and maintenance, provided proof of such incapacity and dependency is furnished to the insurer by the employee or member within 31 days of the child's attainment of the limiting age and subsequently as may be required by the insurer but not more frequently than annually after the two year period following the child's attainment of the limiting age.

[*1969 c 436 s 1*]

62A.145 SURVIVORS OF DECEASED EMPLOYEE; DEFINITIONS. Subdivision 1. For the purposes of this section and section 62A.146, the terms defined in this section shall have the meanings here given them.

Subd. 2. "Covered employee" means any person who, at the time of his death, was employed by any employer providing, offering or contributing to group insurance coverage for that employee who was so enrolled for the coverage.

Subd. 3. Group insurance" means any policy or contract of accident and health protection, regardless of by whom underwritten, paid for in full or in part by an employer, which provides benefits, including cash payments for reimbursement of expen-

ses and the provision of usual and needed health care and medical services as the result of any injury, sickness, disability or disease suffered by a group of employees, or any one of them, and the dependents of such employees.

Subd. 4. "Employer" means any natural person, company, corporation, partnership, association or firm which employs any employee.

Subd. 5. "Survivor" means any person who would be entitled to and be dependent upon economic support by an employee if that employee were alive; including any spouse and/or child or children as defined by the group insurance policy.

[*1973 c 339 s 1*]

62A.146 GROUP INSURANCE; CONTINUATION OF BENEFITS TO SURVIVORS. Every employer providing a policy or plan of accident and health protection and benefits for his employees, or any of them, and the dependents of such employees shall not, except upon the written consent of the survivor or survivors of any deceased covered employee, terminate, suspend or otherwise restrict the participation in or the receipt of benefits otherwise payable under such policy or plan of group insurance to such survivor or survivors within one year of the covered employee's death. Provided, however, that any survivor or survivors, in order to have the coverage and benefits extended for such one year period, as herein provided, may be required to pay the entire cost of such protection. Failure of the survivor to make premium payments in advance to the employer shall be a basis in itself for the termination of the coverage without the written consent heretofore required for such termination, but in event of termination by reason of the survivor's failure to make required premium payments, if any, written notice of such cancellation must be sent by the policyholder by mail to said survivor's last known address at least 15 days prior to such cancellation.

[*1973 c 339 s 2*]

62A.147 DISABLED EMPLOYEES' BENEFITS; DEFINITIONS. Subdivision 1. For the purposes of this section and section 62A.148, the terms defined in this section shall have the meanings here given them.

Subd. 2. "Covered employee" means any person who, at the time he suffered an injury resulting in total disability or became totally disabled by reason of illness, was employed by and receiving a salary, commission, hourly wage, or other remuneration for his services by any employer providing, offering or contributing to group insurance coverage for that employee who was so enrolled for the coverage.

Subd. 3. "Total disability" means (a) the inability of an injured or ill employee to engage in or perform the duties of his regular occupation or employment within the first two years of such disability and (b) after the first two years of such disability, the inability of the employee to engage in any paid employment or work for which he may, by his education and training, including rehabilitative training, be or reasonably become qualified.

Subd. 4. "Group insurance" means any policy or contract of accident and health protection, regardless of by whom underwritten, which provides benefits, including cash payments for reimbursement of expenses or the provision of usual needed health care and medical services as the result of any injury, sickness, disability or disease suffered by a group of employees, or any one of them, and which protection is paid for or otherwise provided in full or in part by an employer.

Subd. 5. "Employer" means any natural person, company, corporation, partnership, association, firm, or franchise which employs any employee.

Subd. 6. "Insurer" means any person, company, corporation including a nonprofit corporation, partnership, association, firm or franchise which underwrites or is by contract or other agreement obligated to provide accident and health protection benefits to any group of employees of any employer.

[*1973 c 340 s 1*]

62A.148 GROUP INSURANCE; PROVISION OF BENEFITS FOR DISABLED EMPLOYEES. No employer or insurer of that employer shall terminate, suspend or otherwise restrict the participation in or the receipt of benefits otherwise payable under any program or policy of group insurance to any covered employee who becomes totally disabled while employed by the employer solely on account of absence caused by such total disability. If the employee is required to pay all or any part of the pre-

mium for the extension of coverage, payment shall be made to the employer, by the employee.

[*1973 c 340 s 2*]

62A.149 BENEFITS FOR ALCOHOLICS AND DRUG DEPENDENTS. Subdivision 1. The provisions of this section shall apply to all group policies of accident and health insurance and group subscriber contracts offered by nonprofit health service plan corporations regulated under chapter 62C, and to a plan or policy that is individually underwritten or provided for a specific individual and the members of his family as a nongroup policy unless the individual elects in writing to refuse benefits under this subdivision in exchange for an appropriate reduction in premiums or subscriber charges under the policy or plan, when the policies or subscriber contracts are issued or delivered in Minnesota or provide benefits to Minnesota residents enrolled thereunder.

Every insurance policy or subscriber contract included within the provisions of this subdivision, upon issuance or renewal, shall provide for payment of benefits for the treatment of alcoholism, chemical dependency or drug addiction to any Minnesota resident entitled to coverage thereunder on the same basis as coverage for other benefits when treatment is rendered in

(1) a licensed hospital,

(2) a residential treatment program as licensed by the state of Minnesota pursuant to diagnosis or recommendation by a doctor of medicine,

(3) a non-residential treatment program approved or licensed by the state of Minnesota.

Subd. 2. Coverage under subdivision 1, clauses (1) and (2) shall be for at least 20 percent of the total patient days allowed by the policy and in no event shall coverage be for less than 28 days in each 12 month benefit year. Coverage under subdivision 1, clause (3), shall be for at least 130 hours of treatment in a 12 month benefit year.

[*1973 c 585 s 1,2; 1976 c 262 s 1; 1978 c 793 s 60*]

62A.15 CHIROPRATIC SERVICES IN ACCIDENT AND HEALTH AND NONPROFIT HEALTH SERVICE POLICIES. Subdivision 1. **Applicability.** The provisions of this section shall apply to all group policies or subscriber contracts providing payment for care in this state, which are issued or renewed after August 1, 1973, and after August 1, 1976, for optometric services, by accident and health insurance companies regulated under this chapter, and nonprofit health service plan corporations regulated under chapter 62C.

Subd. 2. **Chiropractic services.** All benefits provided by any policy or contract referred to in subdivision 1, relating to expenses incurred for medical treatment or services of a physician shall also include chiropractic treatment and services of a chiropractor to the extent that the chiropractic services and treatment are within the scope of chiropractic licensure.

Subd. 3. **Optometric services.** All benefits provided by any policy or contract referred to in subdivision 1, relating to expenses incurred for medical treatment or services of a physician shall also include optometric treatment and services of an optometrist to the extent that the optometric services and treatment are within the scope of optometric licensure. This subdivision is intended to provide equal payment of benefits for optometric treatment and services and is not intended to change or add to the benefits provided for in such policies or contracts.

Subd. 4. **Denial of benefits.** No carrier referred to in subdivision 1 shall, in the payment of claims to employees in this state, deny benefits payable for services covered by the policy or contract if the services are lawfully performed by a duly licensed chiropractor.

[*1973 c 252 s 1; 1976 c 192 s 1,2; 1976 c 242 s 1*]

62A.151 HEALTH INSURANCE BENEFITS FOR EMOTIONALLY HANDICAPPED CHILDREN. No policy or plan of health, medical, hospitalization, or accident and sickness insurance regulated under this chapter, or nonprofit health service plan corporation regulated under chapter 62C, or health maintenance organization regulated under chapter 62D which provides coverage of or reimbursement for inpatient hospital and medical expenses shall be delivered, issued, executed or renewed in this state, or approved for issuance or renewal in this state by the commissioner of insur-

ance, after July 1, 1975 unless the policy or plan includes and provides health service benefits to any subscriber or other person covered thereunder, on the same basis as other benefits, for the treatment of emotionally handicapped children in a residential treatment facility licensed by the commissioner of public welfare. For purposes of this section "emotionally handicapped child" shall have the meaning set forth by the commissioner of public welfare in the rules and regulations relating to residential treatment facilities. The restrictions and requirements of this section shall not apply to any plan or policy which is individually underwritten or provided for a specific individual and the members of his family as a nongroup policy. The mandatory coverage under this section shall be on the same basis as inpatient hospital medical coverage provided under the policy or plan.

[*1975 c 40 s 1*]

62A.152 BENEFITS FOR AMBULATORY MENTAL HEALTH SERVICES. Subdivision 1. The provisions of this section shall apply to all group policies or subscriber contracts which are issued or renewed within this state after August 1, 1975 by accident and health insurance companies regulated under this chapter, and nonprofit health service plan corporations regulated under chapter 62C.

Subd. 2. All group policies and all group subscriber contracts providing benefits for mental or nervous disorder treatments in a hospital shall also provide coverage, to at least the extent of 90 percent of the first $600 of the cost of the usual and customary charges incurred over a 12-month period, for mental or nervous disorder consultation, diagnosis and treatment services delivered while the insured person is not a bed patient in a hospital, if such services are furnished by (1) a licensed or accredited hospital, (2) a community mental health center or mental health clinic approved or licensed by the commissioner of public welfare or other authorized state agency, or (3) by a consulting psychologist licensed under the provisions of sections 148.87 to 148.99, or by a psychiatrist licensed under chapter 147.

[*1975 c 89 s 1*]

62A.153 FREE STANDING AMBULATORY SURGICAL CENTERS. No policy or plan of health, medical, hospitalization, or accident and sickness insurance regulated under this chapter, or subscriber contract provided by a nonprofit health service plan corporation regulated under chapter 62C shall be issued, renewed, continued, delivered, issued for delivery or executed in this state, or approved for issuance or renewal in this state by the commissioner of insurance unless the policy, plan or contract specifically provides coverage for a health care treatment or service rendered by a free standing ambulatory surgical center or facilities offering ambulatory medical service 24 hours a day seven days a week, which are not part of a hospital, but have been reviewed and approved by the state commissioner of health to provide the treatment or service, on the same basis as coverage provided for the same health care treatment or service rendered by a hospital.

[*1976 c 45 s 1; 1977 c 305 s 45*]

62A.16 GROUP HOSPITAL AND MEDICAL COVERAGE AND HEALTH CARE PLANS, APPLICABILITY. The provisions of sections 62A.16 and 62A.17 shall apply to all group insurance policies or group subscriber contracts providing coverage for hospital or medical expenses incurred by a Minnesota resident employed within this state. Sections 62A.16 and 62A.17 shall also apply to health care plans established by employers in this state through health maintenance organizations certified under chapter 62D.

[*1974 c 101 s 1; 1976 c 142 s 1*]

62A.17 TERMINATION OF EMPLOYMENT. Subdivision 1. **Continuation of coverage.** Every group insurance policy, group subscriber contract and health care plan included within the provisions of section 62A.16, except policies, contracts or health care plans covering employees of an agency of the federal government, shall contain a provision which permits every eligible employee whose employment is terminated, if the policy, contract or health care plan remains in force for active employees of the employer, to elect to continue the coverage for himself and his dependents.

Subd. 2. **Responsibility of employee.** Every eligible employee electing to continue coverage shall pay his former employer, on a monthly basis, the cost of the continued coverage. If the policy, contract or health care plan is administered by a trust every eligible employee electing to continue coverage shall pay the trust the cost

of continued coverage according to the eligibility rules established by the trust. The employee shall be eligible to continue the coverage until he becomes re-employed and eligible for health care coverage under a group policy, contract or plan sponsored by the same or another employer, or for a period of six months after the termination of employment, whichever is shorter.

Subd. 3. **Eligibility for continued coverage.** An employee shall be eligible to make the election for himself and his dependents provided for in subdivision 1 if:

(a) In the period preceding the termination of his employment, he and his dependents were covered through his employment by a group insurance policy, subscriber's contract or health care plan included within the provisions of section 62A.16;

(b) The termination of employment was for reasons other than the discontinuance of the business, bankruptcy, the employee's disability or retirement.

Subd. 4. **Responsibility of employer.** After timely receipt of the monthly payment from an eligible employee, if the employer, or the trustee if the policy, contract or health care plan is administered by a trust, fails to make the payment to the insurer, the nonprofit health service plan corporation or the health maintenance organization, with the result that the employee's coverage is terminated, the employer or the trust shall become liable for the employee's coverage to the same extent as the insurer, the nonprofit health service plan corporation or the health maintenance organization, would be if the coverage were still in effect.

Subd. 5. **Notice of options.** Upon the termination of employment of an eligible employee, the employer shall inform the employee within ten days after termination of:

(a) his right to elect to continue the coverage;

(b) the amount he must pay monthly to the employer to retain the coverage;

(c) the manner in which and the office of the employer to which the payment to the employer must be made; and

(d) the time by which the payments to the employer must be made to retain coverage.

If the policy, contract or health care plan is administered by a trust, the terminating employer is relieved of the obligation imposed by clauses (a) to (d). The trust shall inform the employee of the information required by clauses (a) to (d).

Notice may be in writing and sent by first class mail to the employee's last known address which the employee has provided the employer or trust. If the employer or trust fails to so notify the employee who is properly enrolled in the program, the employee shall have the option to retain coverage provided he makes this election within 60 days of the date his employment is terminated by making the proper payment to the employer or trust to provide continuous coverage.

A notice in substantially the following form shall be sufficient. As a terminated employee the law authorizes you to maintain your group medical insurance for a period of up to six months. To do so you must notify your former employer within ten days of this notice that you intend to retain such coverage and must make a monthly payment of $..... to ..... at ..... by the .... of each month.

Subd. 6. **Conversion to individual policy.** A group insurance policy that provides post termination coverage as required by this section shall also include a provision allowing a covered employee or surviving spouse or dependent at the expiration of the post termination coverage provided by subdivision 2 to obtain from the insurer offering the group policy or group subscriber contract, at the employee's, spouse's or dependent's option and expense, without further evidence of insurability and without interruption of coverage, an individual policy of insurance or an individual subscriber contract providing at least the minimum benefits of a qualified plan as prescribed by section 62E.0 d the option of a number three qualified plan, a number two qualified plan, and mber one qualified plan as provided by section 62E.06, subdivisions 1 to 3. A policy providing reduced benefits at a reduced premium rate may be accepted by the employee, the spouse or a dependent in lieu of the optional coverage otherwise required by this subdivision.

The individual policy shall be renewable at the option of the individual as long as the individual is not covered under another qualified plan as defined in section 62E.02, subdivision 4, up to age 65 or to the day before the date of eligibility for coverage under Title XVIII of the Social Security Act, as amended. Any revisions in the table of

rate for the individual policy shall apply to the covered person's original age at entry, and shall apply equally to all similar policies issued by the insurer.

[*1974 c 101 s 2; 1975 c 100 s 1-3; 1976 c 142 s 2,3; 1977 c 409 s 2*]

62A.18 PROHIBITION AGAINST DISABILITY OFFSETS. No individual or group policy of accident and health insurance issued, amended, renewed, or delivered in this state on or after January 1, 1976 shall contain any provision offsetting, or in any other manner reducing, any benefit under the policy by the amount of, or in proportion to, any increase in disability benefits received or receivable under the federal Social Security Act, the Railroad Retirement Act, any Veteran's Disability Compensation and Survivor Benefits Act, Workers' Compensation, or any similar federal or state law, as amended subsequent to the date of commencement of such benefit.

[*1975 c 323 s 1*]

62A.21 CONVERSION PRIVILEGES FOR INSURED FORMER SPOUSES. Subdivision 1. No policy of accident and health insurance providing coverage of hospital or medical expense on either an expense incurred basis or other than an expense incurred basis, which in addition to covering the insured also provides coverage to the spouse of the insured shall contain a provision for termination of coverage for a spouse covered under the policy solely as a result of a break in the marital relationship except by reason of an entry of a valid decree of dissolution of marriage.

Subd. 2. Every policy described in subdivision 1 which contains a provision for termination of coverage of the spouse upon dissolution of marriage shall contain a provision to the effect that upon the entry of a valid decree of dissolution of marriage between the insured parties the spouse shall be entitled to have issued to him or her, without evidence of insurability, upon application made to the company within 31 days following the entry of the decree, and upon the payment of the appropriate premium, an individual policy of accident and health insurance. The policy shall provide the coverage then being issued by the insurer which is most nearly similar to, but not greater than, the terminated coverages. Any and all probationary or waiting periods set forth in the policy shall be considered as being met to the extent coverage was in force under the prior policy.

Subd. 3. This section applies to every policy of accident and health insurance which is delivered, issued for delivery, renewed or amended on or after the effective date of this section.

[*1977 c 186 s 1*]

MINNESOTA

Subd. 6. Each health maintenance organization for which a demonstration project is approved shall annually file a report with the commissioner summarizing the project's experience at the same time it files its annual report required by section 62D.08. The report shall be on a form developed by the commissioner and shall be separate from the annual report required by section 62D.08.

Subd. 7. The commissioner may rescind approval of a demonstration project if the commissioner makes any of the findings listed in section 62D.15, subdivision 1, with respect to the project for which it has not been granted a specific exemption, or if the commissioner finds that the project's operation is contrary to the information contained in the approved application.

Added by Laws 1979, c. 268, § 1, eff. May 31, 1979.

COMPREHENSIVE HEALTH INSURANCE

62E.01 Citation

Sections 62E.01 to 62E.17 may be cited as the Minnesota comprehensive health insurance act of 1976.

Laws 1976, c. 296, art. 1, § 1, eff. July 1, 1976.

Title of Act:

An Act relating to health care; providing for establishment and administration of certain plans of health insurance to make minimum health care benefits available to all persons in the state; creating a comprehensive health care association; requiring review of hosp[illegible] and insurance premium rates; providing protection against catastrophic health care expenses; regulating coverage of dental services by health maintenance organizations; appropriating money; amending Minnesota Statutes 1971, Sections 62A.02, Subdivisions 1 and 3; 62C.15, Subdivision 2; and 62D.12, by adding a subdivision. Laws 1976, c. 296

Index to Notes

In general 2
Validity 1

1. Validity

This act does not deny due process by being unreasonable or arbitrary exercise of state's power to regulate business of insurance, nor is it unconstitutionally vague. Insurers' Action Council, Inc. v. Heaton, D.C.1976, 423 F.Supp. 921.

This act does not impair contractual obligations insofar as it was applicable to existing guaranteed renewable policies. Id.

[illegible]

2. In general

Provisions of § 62E.03 relating to employer's obligation to offer specified forms of group insurance to his employees were not preempted by Employee Retirement Income Security Act of 1974. Insurers' Action Council, Inc. v. Heaton, D.C.1976, 423 F.Supp. 921.

62E.02 Definitions

Subdivision 1. For the purposes of sections 62E.01 to 62E.17, the terms and phrases defined in this section have the meanings given them.

Subd. 2. "Employer" means any person, partnership, association, trust, estate or corporation, including the state of Minnesota or any agency, instrumentality or governmental subdivision thereof, which employs ten or more individuals who are residents of this state.

Subd. 3. "Health maintenance organization" means a nonprofit corporation licensed and operated as provided in chapter 62D.

Subd. 4. "Qualified plan" means those health benefit plans which have been certified by the commissioner as providing the minimum benefits required by section 62E.06 or the actuarial equivalent of those benefits.

Subd. 5. "Qualified medicare supplement plan" means those health benefit plans which have been certified by the commissioner as providing the minimum benefits required by section 62E.07 or the actuarial equivalent of those benefits.

Subd. 6. "Commissioner" means the commissioner of insurance.

Subd. 7. "Dependent" means a spouse or unmarried child under the age of 19 years, a dependent child who is a student under the age of 25 and financially dependent upon the parent, or a dependent child of any age who is disabled.

Subd. 8. "Employee" means any Minnesota resident who has entered into the employment of or works under contract or service or apprenticeship with any employer. "Employee" does not include a person who has been employed for less than 30 days by his present employer, nor one who is employed less than 30 hours per week by his present employer, nor an independent contractor.

Subd. 9. "Plan of health coverage" means any plan or combination of plans of coverage, including combinations of self insurance, individual accident and health insurance policies, group accident and health insurance policies, coverage under a nonprofit health service plan, or coverage under a health maintenance organization subscriber contract.

Subd. 10. "Insurer" means those companies operating pursuant to chapters 62A or 62C and offering or, selling, issuing, or renewing policies or contracts of accident and health insurance. "Insurer" does not include health maintenance organizations.

Subd. 11. "Accident and health insurance policy" or "policy" means insurance or nonprofit health service plan contracts providing benefits for hospital, surgical and medical care. "Policy" does not include coverage which is (1) limited to disability or income protection coverage, (2) automobile medical payment coverage, (3) supplemental to liability insurance, (4) designed solely to provide payments on a per diem, fixed indemnity or non-expense incurred basis, (5) credit accident and health insurance issued pursuant to chapter 62B, (6) designed solely to provide dental or vision care, (7) blanket accident and sickness insurance as defined in section 62A.11, or (8) accident only coverage issued by licensed and tested insurance agents or solicitors which provides reasonable benefits in relation to the cost of covered services. The provisions of clause (4) shall not apply to hospital indemnity coverage which is sold by an insurer to an applicant who is not then currently covered by a qualified plan.

Subd. 12. "Health benefits" means benefits offered to employees on an indemnity or prepaid basis which pay the costs of or provide medical, surgical or hospital care.

Subd. 13. "Eligible person" means an individual who is a resident of Minnesota and meets the enrollment requirements of section 62E.14.

Subd. 14. "Minnesota comprehensive health association" or "association" means the association created by section 62E.10.

Subd. 15. "Medicare" means part A and part B of the United States Social Security Act, Title XVIII, as amended, 42 U.S.C. Sections 1394, et seq.

Subd. 16. "Medicare supplement plan" means any plan of insurance protection which provides benefits for the costs of medical, surgical or hospital care and which is marketed as providing benefits which complement or supplement the benefits provided by medicare.

Subd. 17. "State plan premium" means the premium determined pursuant to section 62E.08.

Subd. 18. "Writing carrier" means the insurer or insurers and health maintenance organization or organizations selected by the association and approved by the commissioner to administer the comprehensive health insurance plan.

Subd. 19. "Fraternal beneficiary association" or "fraternal" means a corporation, society, order, or voluntary association without capital stock which sells health and accident insurance in accordance with chapter 64A.

Subd. 20. "Comprehensive health insurance plan" or "state plan" means policies of insurance and contracts of health maintenance organization coverage offered by the association through the writing carrier.

Subd. 21. "Self insurer" means an employer or an employee welfare benefit fund or plan which directly or indirectly provides a plan of health coverage to its employees and administers the plan of health coverage itself or through an insurer, trust or agent except to the extent of accident and health insurance premium, subscriber contract charges or health maintenance organization contract charges. "Self insurer" does not include an employer engaged in the business of providing health care services to the public which provides health care services directly to its employees at no charge to them.

Subd. 22. "Self insurance" means a plan of health coverage offered by a self insurer.

Subd. 23. "Contributing member" means those companies operating pursuant to chapter 62A, paying premium taxes pursuant to section 60A.15, and offering, selling, issuing, or renewing policies or contracts of accident and health insurance.

Laws 1976, c. 296, art. 1, § 2, eff. July 1, 1976. Amended by Laws 1977, c. 409, §§ 4 to 7, eff. June 3, 1977; Laws 1979, c. 272, §§ 1, 2, eff. May 31, 1979.

1977 Amendment. Added "including the state of Minnesota or any agency, instrumentality or governmental subdivision thereof" to subd. 2. Deleted "on average of" as descriptive of 30 hours as it appears in subd. 8, and added "nor an independent contractor" at the end of that subdivision.

Revised subds. 11 and 21 which formerly read:

"Subd. 11. 'Accident and health insurance policy' or 'policy' means insurance or nonprofit health service plan contracts providing benefits for hospital, surgical and medical care. 'Policy' does not include coverage which is (1) limited to disability or income protection coverage, (2) automobile medical payment coverage, (3) supplemental to liability insurance, (4) sold by fraternals and provides payments on a per diem, daily indemnity or non-expense incurred basis, or (5) credit accident and health insurance issued pursuant to Minnesota Statutes, Chapter 62H.

"Subd. 21. 'Self insurer' means an employer who directly provides a plan of health coverage to his employees and administers the plan of health coverage himself or through an insurer. 'Self insurer' does not include an employer engaged in the business of providing health care services to the public who provides health care services directly to his employees at no charge to them."

1979 Amendment. Added "issuing or renewing" to subd. 10. Added subd. 23.

62E.03 Duties of the employer

Subdivision 1. Each employer who provides or makes available to his employees a plan of health coverage shall make available to his employees employed in this state a plan or combination of plans which have been certified by the commissioner as a number two qualified plan. If the plan of health coverage does not meet the requirements of section 62E.06 for a number two qualified plan, the employer shall make available a supplemental plan of health benefits which, when combined with the existing plan of health benefits, constitutes a number two coverage plan. The plan or combinations of plans may be financed from funds contributed solely by the employer or solely by the employees or any combination thereof. The plans may consist of self insurance, health maintenance contracts, group policies or individual policies or any combination thereof.

Master and Servant ⇐10.
C.J.S. Master and Servant § 14.

1. In general

Provisions of this section relating to employer's obligation to offer specified forms of group insurance to his employees were not preempted by Employee Retirement Income Security Act of 1974. Insurers' Action Council, Inc. v. Heaton, D.C.1978, 423 F.Supp. 921.

62E.035 Self insurer identification and reporting

The commissioner shall require self insurers to report annually that they are engaged in self insurance business. These reports shall be for the previous calendar year and shall include the self insurer's total cost of self insurance and other information the commissioner may by rule require relating to the self insurer's plan of health coverage. Upon request of the commissioner, the commissioner of revenue shall cooperate with the commissioner in the identification of self insurers, and shall modify forms and promulgate rules as may be necessary to identify self insurers. In adopting the forms and rules promulgated pursuant to this section the commissioner of revenue shall consult with the commissioner.

62E.04 Duties of insurers

Subdivision 1. Individual policies. For each type of qualified plan described in section 62E.06, an insurer or fraternal issuing individual policies of accident and health insurance in this state, other than group conversion policies, shall develop and file with the commissioner an individual policy which meets the minimum standards of that type of qualified plan. An insurer or fraternal issuing individual policies of accident and health insurance in this state shall offer each type of qualified plan to each person who applies and is eligible for accident and health insurance from that insurer or fraternal.

Subd. 2. Medicare supplement plan. An insurer or fraternal issuing medicare supplement plans in this state shall develop and file with the commissioner a medicare supplement policy which meets the minimum standards of a qualified medicare supplement plan. An insurer or fraternal issuing medicare supplement plans in this state shall offer a qualified medicare supplement plan to each person who is eligible for coverage and who applies for a medicare supplement plan.

Subd. 3. Group policies. For each [illegible] section 62A.21, an insurer or fraternal issuing group policies of accident and health insurance in this state shall develop and file with the commissioner a group policy which provides for each member of the group the minimum benefits required by that type of qualified plan. An insurer or fraternal issuing group policies of accident and health insurance in this state shall offer each type of qualified plan to each eligible applicant for group accident and health insurance.

Subd. 4. Major medical coverage. Each insurer and fraternal shall affirmatively offer coverage of major medical expenses to every applicant who applies to the insurer or fraternal for a new unqualified policy at the time of application and annually to every holder of an unqualified policy of accident and health insurance renewed by the insurer or fraternal. The coverage shall provide that when a covered individual in rs out-of-pocket expenses of $5,000 or more within a calendar year for services covered in section 62E.06, subdivision 1, benefits shall be payable, subject to any copayment authorized by the commissioner, up to a maximum lifetime limit of $250,000. The offer of coverage of major medical expenses may consist of the offer of a rider on an existing unqualified policy or a new policy which is a qualified plan.

Subd. 5. Effect of non-compliance. No policy of accident and health insurance may be issued or renewed in this state 180 days after July 1, 1976, by an insurer or a fraternal which has not complied with the requirements of this section.

Subd. 6. Reinsurance allowed. An insurer or fraternal may fulfill its obligations under this section by issuing the required coverages in their own name and reinsuring the risk and administration of the coverages with the association in accordance with section 62E.10, subdivision 7, clauses (e) and (f).

Subd. 7. Underwriting standards may apply. Nothing in this section shall require an insurer or fraternal to offer or issue a policy to any person who does not meet the underwriting or membership requirements of the insurer or fraternal.

Subd. 8. Reduction of benefits because of other services. No policy of accident and health insurance shall contain any provision denying or reducing benefits because services are rendered to an insured or dependent who is eligible for or receiving benefits pursuant to chapters 256B and 256D, or sections 62E.51 to 62E.55 or 252.27; 260.251, subdivision 1a; 261.27; 393.07, subdivision 1 or 2.

Laws 1976, c. 296, art 1, § 4, eff. July 1, 1976. Amended by Laws 1977, c. 409, §§ 9, 10, eff. June 3, 1977; Laws 1979, c. 174, § 3, eff. May 23, 1979; Laws 1979, c. 272, § 4, eff. May 31, 1979.

1977 Amendment. Revised Subd. 4 which formerly read:

"Each insurer and fraternal shall include coverage of major medical costs in every unqualified policy of accident and health insurance, unless the applicant for a new or renewal policy declines the coverage in writing. The coverage shall provide that when a covered individual incurs out-of-pocket expenses of $5,000 or more within a calendar year for services covered in section 62E.06, subdivision 1, benefits shall be payable, subject to any copayment authorized by the commissioner, up to a maximum lifetime limit of $250,000."

Added subd. 8.

1979 Amendments. Laws 1979, c. 174, deleted "issued or renewed after August 1, 1977" following "insurance" and added the alternative cites at the end of subd. 8.

Laws 1979, c. 174, § 6, provides:

"This act is effective the day following its final enactment [eff. May 23, 1979] and applies to any policy or plan of private health care coverage issued or renewed on or after that date."

Laws 1979, c. 272, added "who applies to the issurer or fraternal" and "renewed by the insurer or fraternal" to the first sentence of subd. 4, and the last sentence of that subdivision.

62E.05 Certification of qualified plans

Upon application by an insurer, fraternal, or employer for certification of a plan of health coverage as a qualified plan or a qualified medicare supplement plan for the purposes of sections 62E.01 to 62E.17, the commissioner shall make a determination within 60 days as to whether the plan is qualified. All plans of health coverage shall be labelled as "qualified" or "nonqualified". All plans of health coverage shall be labelled as "qualified" or "nonqualified" on the front of the policy or evidence of insurance. All qualified plans shall indicate whether they are number one, two, or three coverage plans.

62E.06 Minimum benefits of qualified plan

Subdivision 1. Number three plan. A plan of health coverage shall be certified as a number three qualified plan if it otherwise meets the requirements established by chapters 62A and 62C, and the other laws of this state, whether or not the policy is issued in Minnesota, and meets or exceeds the following minimum standards:

(a) The minimum benefits for a covered individual shall, subject to the other provisions of this subdivision, be equal to at least 80 percent of the cost of covered services in excess of an annual deductible which does not exceed $150 per person. The coverage shall include a limitation of $3,000 per person on total annual out-of-pocket expenses for services covered under this subdivision. The coverage shall be subject to a maximum lifetime benefit of not less than $250,000.

The $3,000 limitation on total annual out-of-pocket expenses and the $250,000 maximum lifetime benefit shall not be subject to change of substitution by use of an actuarily equivalent benefit.

(b) Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

(1) Hospital services;

(2) Professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction;

(3) Drugs requiring a physician's prescription;

(4) Services of a nursing home for not more than 120 days in a year if the services would qualify as reimbursable services under medicare;

(5) Services of a home health agency if the services would qualify as reimbursable services under medicare;

(6) Use of radium or other radioactive materials;

(7) Oxygen;

(8) Anesthetics;

(9) Prostheses other than dental;

(10) Rental or purchase, as appropriate, of durable medical equipment other than eyeglasses and hearing aids;

(11) Diagnostic X-rays and laboratory tests;

(12) Oral surgery for partially or completely unerupted impacted teeth, a tooth root without the extraction of the entire tooth, or the gums and tissues of the mouth when not performed in connection with the extraction or repair of teeth;

(13) Services of a physical therapist; and

(14) Transportation provided by licensed ambulance service to the nearest facility qualified to treat the condition; or a reasonable mileage rate for transportation to a kidney dialysis center for treatment.

(c) Covered expenses for the services and articles specified in this subdivision do not include the following:

(1) Any charge for care for injury or disease either (i) arising out of or [illegible] coverage currently required to be contained in any motor vehicle, or other liability insurance policy or equivalent self-insurance, or (ii) for which benefits are payable under another policy of accident and health insurance, medicare or any other governmental program except as otherwise provided by law;

(2) any charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect;

(3) Care which is primarily for custodial or domiciliary purposes which would not qualify as eligible services under medicare;

(4) Any charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician, provided, however, that if the institution does not have semi-private rooms, its most common semi-private room charge shall be considered to be 90 percent of its lowest private room charge;

(5) That part of any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnal which exceeds the prevailing charge in the locality where the service is provided; and

(6) Any charge for services or articles the provision of which is not within the scope of authorized practice of the institution or individual rendering the services or articles.

(d) The minimum benefits for a qualified plan shall include, in addition to those benefits specified in clauses (a) and (c), benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations:

(1) Well baby care, effective July 1, 1980;

(2) Physicians' services for routine check-ups and annual physicals when prescribed by a physician, effective July 1, 1982;

(3) Multiphasic screening and other diagnostic testing, effective July 1, 1982. The commissioner by rule shall prescribe reasonable limits on the reimbursement required for services listed in this clause.

(e) Effective July 1, 1979, the minimum benefits of a qualified plan shall include, in addition to those benefits specified in clause (a), a second opinion from a physician on all surgical procedures expected to cost a total of $500 or more in physician, laboratory and hospital fees, provided that the coverage need not include the repetition of any diagnostic tests.

Subd. 2. Number two plan. A plan of health coverage shall be certified as a number two qualified plan if it meets the requirements established by subdivision 1 except that the deductible shall not exceed $500 per person.

Subd. 3. Number one plan. A plan of health coverage shall be certified as a number one qualified plan if it meets the requirements established by subdivision 1 except that the deductible shall not exceed $1,000 per person.

Subd. 4. Health maintenance plans. A health maintenance organization which provides the services required by chapter 621 shall be deemed to be providing a number three qualified plan.

Laws 1975, c. 359, § 23; Laws 1976, c. 206, art. 1, § 6, eff. July 1, 1976; Laws 1977, c. 409, § 11, eff. June 3, 1977; Laws 1979, c. 272, § 5, eff. May 31, 1979.

1977 Amendment. Revised this section which formerly provided:

"Subdivision 1. A plan of health coverage shall be certified as a number three qualified plan if it otherwise meets the requirements established by Minnesota Statutes, Chapter 62A and Chapter 62C, and the other laws of this state, whether or not the policy is issued in Minnesota, and meets or exceeds the following minimum standards:

"(a) The minimum benefits for a covered individual shall, subject to the other provisions of this subdivision, be equal to at least 80 percent of the cost of covered services in excess of an annual deductible which does not exceed $100 per person. The coverage shall be subject to a maximum lifetime benefit of not less than $250,000. Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

"(1) Hospital services;

"(2) Professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction;

"(3) Drugs requiring a physician's prescription;

"(4) Services of a nursing home for not more than 120 days in a year if the services commence within 14 days following confinement of at least three days in a hospital for the same condition;

"(5) Service of a home health agency up to a maximum of 180 visits per year;

62E.08 State plan premium

Subdivision 1. The association [illegible] premiums to be charged for memb[illegible] nance plan:

(a) [illegible] insurance in force in Minnesota;

(b) The premium for the number [illegible] equal to 125 percent of the average o[illegible] the largest number of individuals in [illegible] of insurance in force in Minnesota;

(c) The premium for a qualified m[illegible] maximum of 125 percent of the avera[illegible]

"(b) Covered expenses for the services and articles specified in this subdivision do not include the following:

"(1) Any charge for any care for any injury or disease either (i) arising out of an injury in the course of employment and subject to a workmen's compensation or similar law, (ii) for which benefits are payable without regard to fault under coverage statutorily required to be contained in any motor vehicle, or other liability insurance policy or equivalent self-insurance, or (iii) for which benefits are payable under another policy of accident and health insurance or medicare;

"(2) Any charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect;

"(3) Any charge for travel other than travel by ambulance to the nearest health care institution qualified to treat the illness or injury;

"(4) Any charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician;

"(5) That part of any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceeds the prevailing charge in the locality where the service is provided; and

"(6) Any charge for services or articles the provision of which is not within the scope of authorized practice of the institution or individual rendering the services or articles.

"(c) Effective January 1, 1980, the minimum benefits for a qualified plan shall include, in addition to those benefits specified in clause (a), benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations;

"(1) Well baby care;

"(2) Physicians' services for routine check-ups and annual physicals when prescribed by a physician; and

"(3) Multiphasic screening and other diagnostic testing. The commissioner by rule shall prescribe reasonable limits on the reimbursement required for services listed in this clause.

"Subd. 2. A plan of health coverage shall be certified as a number two qualified plan if it meets the requirements established by the laws of this state and provides for payment of 80 percent of the covered expenses required by this section in excess of a deductible which does not exceed $500 per person.

"Subd. 3. A plan of health coverage shall be certified as a number one qualified plan if it meets the requirements established by the laws of this state and provides for payment of 80 percent of the covered expenses required by this section in excess of a deductible which does not exceed $1,000 per person.

"Subd. 4. A health maintenance organization which provides the services required by Minnesota Statutes, Chapter 62B shall be deemed to be providing a number three qualified plan."

1979 Amendment Added to subd. 1(b)(14): "or a reasonable mileage rate for transportation to a kidney dialysis center for treatment". Deleted as the beginning words in subd. 1(d); effective July 1, 1980. Inserted the following effective dates in subd. 1(d): in clause (d)(1), July 1, 1980; in clause (d)(2), July 1, 1982; in clause (d)(3), July 1, 1982.

62E.07 Qualified medicare supplement plan

Any plan which provides benefits to persons over the age of 65 years may be certified as a qualified medicare supplement plan if the plan is designed to supplement medicare and provides coverage of 50 percent of the deductible and copayment required under medicare and 80 percent of the charges for covered services described in section 62E.06, subdivision 1, which charges are not paid by medicare. The coverage shall include a limitation of $1,000 per person on total annual out-of-pocket expenses for the covered services. The coverage may be subject to a maximum lifetime benefit of not less than $100,000.

Laws 1976, c. 206, art. 1, § 7, eff. July 1, 1976.

62E.08 State plan premium

Subdivision 1. The association shall establish the following maximum premiums to be charged for membership in the comprehensive health insurance plan:

(a) The premium for the number one qualified plan shall be up to a maximum of 150 percent of the average of rates charged by the five insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in Minnesota;

(b) The premium for the number two qualified plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in Minnesota;

(c) The premium for a qualified medicare supplement plan shall be up to a maximum of 125 percent of the average of rates charged by the five insurers

with the largest number of individuals enrolled in a qualified medicare supplement plan; and

(d) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

The five insurers whose rates are used to establish the premium for each type of coverage offered by the association shall be determined by the commissioner on the basis of information provided by all insurers annually at the commissioner's request, concerning the number of individual qualified plans and qualified medicare supplement plans or actuarially equivalent plans offered by the insurer and rates charged by the insurer for each type of plan offered by the insurer. In determining the insurers whose rates shall be used in establishing the premium, the commissioner shall utilize generally accepted actuarial principles and structurally compatible rates. Subject to this subdivision, the commissioner shall include any insurer operating pursuant to chapter 62C in establishing the premium. In establishing premiums pursuant to this section, the association shall utilize generally accepted actuarial principles.

Subd. 2. Subject to subdivision 1 of this section, the schedule of premiums for coverage under the comprehensive health insurance plan shall be designed to be self-supporting and based on generally accepted actuarial principles.

Laws 1976, c. 206, art. 1, § 8, eff. July 1, 1976. Amended by Laws 1977, c. 469, § 12, eff. June 3, 1977; Laws 1979, c. 272, § 6, eff. May 31, 1979.

1977 Amendment. Substituted 18 months for a year at the beginning of the section, modified subd. 2 accordingly.

1979 Amendment. Revised this section which formerly read:

"Subdivision 1. For the first eighteen months of operation of the comprehensive health insurance plan the association shall establish the following premiums to be charged for membership in the comprehensive health insurance plan:

"(a) The premium for the number one qualified plan shall be the average of rates charged by the five insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in Minnesota;

"(b) The premium for the number two qualified plan shall be the average of rates charged by the five insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in Minnesota;

"(c) The premium for a qualified medicare supplement plan shall be the average of rates charged by the five insurers with the largest number of individuals enrolled in a qualified medicare supplement plan; and

"(d) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

"Subd. 2. For subsequent enrollees or renewals of membership, the schedule of premiums for membership in the comprehensive health insurance plan shall be designed to be self-supporting and based on generally accepted actuarial principles."

1977 Amendment. Deleted the following from the end of clause (a) and added clause (i): "the commissioner may also adopt, promulgate, repeal, and amend rules pursuant to the rule making provisions of Minnesota Statutes, Chapter 15, to carry out the provisions of sections 62E.01 to 62E.17;"

62E.10 Comprehensive health association

Subdivision 1. Creation; tax exemption. There is established a comprehensive health association to promote the public health and welfare of the state of Minnesota with membership consisting of all insurers, self insurers, fraternals and health maintenance organizations licensed or authorized to do business in this state. The comprehensive health association shall be exempt from taxation under the laws of this state and all property owned by the association shall be exempt from taxation.

Subd. 2. Board of directors; organization. The board of directors of the association shall be made up of seven individuals selected by participating members, subject to approval by the commissioner. In determining voting rights at members' meetings, each member shall be entitled to vote in person or proxy. The vote shall be a weighted vote based upon the member's cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of Minnesota residents in the previous calendar year, as determined by the commissioner. In approving members of the board, the commissioner shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the moneys of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

Subd. 3. Mandatory membership. All members shall maintain their membership in the association as a condition of doing accident and health insurance, self-insurance, or health maintenance organization business in this state. The association shall submit its articles, bylaws and operating rules to the commissioner for approval; provided that the adoption and amendment of articles, bylaws and operating rules by the association and the approval by the commissioner thereof shall be exempt from the provisions of sections 15.041 to 15.052.

Subd. 4. Open meeting. All meetings of the association, its board, and any committees of the association shall comply with the provisions of section 471.705.

Subd. 5. Repealed by Laws 1979, c. 272, § 11, eff. May 31, 1979.

Subd. 6. Antitrust exemption. In the performance of their duties as members of the association, the members shall be exempt from the provisions of sections 325.8011 to 325.8028.

Subd. 7. General powers. The association may:

(a) Exercise the powers granted to insurers under the laws of this state;

(b) Sue or be sued;

(c) Enter into contracts with insurers, medical associations or other persons for the performance of medical review and for performing the functions provided for in clauses (e) and (f);

(d) Establish administrative and accounting procedures for the operation of the association;

(e) Provide for the reinsuring of risks incurred as a result of issuing the coverages required by sections 62E.04 and 62E.16 by members of the associa-

tion. Each member which elects to reinsure its required risks shall determine the categories of coverage it elects to reinsure in the association. The categories of coverage are:

(1) Individual qualified plans, excluding group conversions;

(2) Group conversions;

(3) Group qualified plans with fewer than 50 employees or members; and

(4) Major medical coverage.

A separate election may be made for each category of coverage. If a member elects to reinsure the risks of a category of coverage, it must reinsure the risk of the coverage of every life covered under every policy issued in that category. A member electing to reinsure risks of a category of coverage shall enter into a contract with the association establishing a reinsurance plan for the risks. This contract may include provision for the pooling of members' risks reinsured through the association and it may provide for assessment of each member reinsuring risks for losses and operating and administrative expenses incurred, or estimated to be incurred in the operation of the reinsurance plan. This reinsurance plan shall be approved by the commissioner before it is effective. Members electing to administer the risks which are reinsured in the association shall comply with the benefit determination guidelines and accounting procedures established by the association. The fee charged by the association for the reinsurance of risks shall not be less than 110 percent of the total anticipated expenses incurred by the association for the reinsurance; and

(f) Provide for the administration by the association of policies which are reinsured pursuant to clause (e). Each member electing to reinsure one or more categories of coverage in the association may elect to have the association administer the categories of coverage on the member's behalf. If a member elects to have the association administer the categories of coverage, it must do so for every life covered under every policy issued in that category. The fee for the administration shall not be less than 110 percent of the total anticipated expenses incurred by the association for the administration.

Subd. 8. Department of state exemption. The association shall be exempt from the provisions of chapter 15.

Laws 1976, c. 296, art. 1, § 10, eff. July 1, 1976. Amended by Laws 1977, c. 409, §§ 14 to 16, eff. June 3, 1977; Laws 1979, c. 272, § 7, eff. May 31, 1979.

1977 Amendment. Added "to promote the public health and welfare of the state of Minnesota" to the first sentence of subd. 1 as well as the last sentence of that subdivision. Added "accident and health insurance, self-insurance, or health maintenance organization" to subd. 3. Added the sentences to subd. 10(e)(4) relating to the reinsurance contracts.

1979 Amendment. Revised the terms of subds. 2 and 3 and added subd. 8. Revised subds. 2 and 3 and repealed subd. 5 read as follows:

"Subd. 2. The board of directors of the association shall be made up of seven individuals selected by participating members, subject to approval by the commissioner. To select the initial board of directors, and to initially organize the association, the commissioner shall give notice to all members of the time and place of the organizational meeting. In determining voting rights at the organizational meeting each member shall be entitled to vote in person or by proxy. The vote shall be a weighted vote based upon the member's cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of Minnesota residents in the previous calendar year, as determined by the commissioner. If the board of directors is not selected within 60 days after notice of the organizational meeting, the commissioner may appoint the initial board. In approving or selecting members of the board, the commissioner shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the moneys of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

"Subd. 3. All members shall maintain their membership in the association as a condition of doing accident and health insurance, self-insurance, or health maintenance organization business in this state. The association shall submit bylaws and operating rules to the commissioner for approval.

"Subd. 5. All members shall enter into a contract with the association according to terms specified in section [illegible]. The contract of reinsurance shall be executed on or before January 1, 1977, for a period of one year and shall be renewed annually thereafter. A company which ceases to do business within the state shall remain liable under the contract for the reinsurance contracted for during that calendar year."

62E.11 Operation of comprehensive plan

Subdivision 1. Upon certification as an eligible person in the manner provided by section 62E.14, an eligible person may enroll in the comprehensive health insurance plan by payment of the state plan premium to the writing carrier.

Subd. 2. Any employer which has in its employ one or more eligible persons enrolled in the comprehensive health insurance plan may make all or any portion of the state plan premium payment to the state plan directly to the writing carrier.

Subd. 3. Not less than 87½ percent of the state plan premium paid to the writing carrier shall be used to pay claims, and not more than 12½ percent shall be used for the payment of agent referral fees as authorized in section 62E.15, subdivision 3 and for payment of the writing carrier's direct and indirect expenses, as specified in section 62E.13, subdivision 7.

Subd. 4. Any income in excess of the costs incurred by the association in providing reinsurance or administrative services pursuant to section 62E.07, clauses (e) and (f) shall be held at interest and used by the association to offset losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Subd. 5. Each contributing member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan for plans issued or approved for issuance by the association, and shall share in the operating and administrative expenses incurred or estimated to be incurred by the association incident to the conduct of its affairs. Claims expenses of the state plan which exceed the premium payments allocated to the payment of benefits shall be the liability of the contributing members. Contributing members shall share in the claims expense of the state plan and operating and administrative expenses of the association in an amount equal to the ratio of the contributing member's total accident and health insurance premium, received from or on behalf of Minnesota residents as divided by the total accident and health insurance premium, received by all contributing members from or on behalf of Minnesota residents, as determined by the commissioner.

Subd. 6. The association shall make an annual determination of each contributing member's liability, if any, and may make an annual fiscal year end assessment if necessary. The association may also, subject to the approval of the commissioner, provide for interim assessments against the contributing members as may be necessary to assure the financial capability of the association in meeting the incurred or estimated claims expenses of the state plan and operating and administrative expenses of the association until the association's next annual fiscal year end assessment. Payment of an assessment shall be due within 30 days of receipt by a contributing member of a written notice of a fiscal year end or interim assessment. Failure by a contributing member to tender to the association the assessment within 30 days shall be grounds for termination of the contributing member's membership. A contributing member which ceases to do accident and health insurance business within the state shall remain liable for assessments through the calendar year during which accident and health insurance business ceased. The association may decline to levy an assessment against a contributing member if the assessment, as determined herein, would not exceed ten dollars.

Subd. 7. Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Subd. 8. Any annual fiscal year end or interim assessment levied against a contributing member may be offset, in an amount equal to the assessment paid to the association, against the income tax or the premium tax payable by that contributing member pursuant to section 60A.15 for the year in which the annual fiscal year end or interim assessment is levied. The commissioner of revenue shall annually, on or before January 15, report to the chairmen of the senate finance, house appropriations, senate commerce and house financial

institutions and insurance committees as to the total amount of income tax or premium tax offset claimed by contributing members during the preceding calendar year.

Laws 1976, c. 296, art. 1, § 11, eff. Jan 1, 1977. Amended by Laws 1977, c. 409, § 17, eff. June 3, 1977; Laws 1979, c. 272, § 8, eff. May 31, 1979.

1977 Amendment. Revised subd. 5 which formerly read:

"Each member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan pursuant to the terms of the individual reinsurance contracts executed by the association with each member in accordance with section 62E.10, subdivision 5. Deviations in the claim experience of the state plan from the premium payments allocated to the payment of benefits shall be the liability of the association members. Association members shall share in the excess costs of the state plan in an amount equal to the ratio of the member's total cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance organization contract charges received from or on behalf of Minnesota residents as divided into the total cost of self insurance, accident and health insurance premium, subscriber contract charges, and health maintenance organization contract charges received by all association members from or on behalf of Minnesota residents, as determined by the commissioner. The reinsurance contract shall provide for a retroactive determination of each member's liability and payment due within 30 days after each renewal date of the reinsurance contract. Failure by a member to tender to the association the assessed reinsurance payment within 30 days of notification by the association shall be grounds for termination of the member's membership.

"Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums."

1979 Amendment. Revised subd. 5 to appear as subds. 5 to 7 and added the provisions of subd. 8. Subd. 5 formerly read:

"Each member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan for plans issued or approved for issuance by the association, and shall share in the operating and administrative expenses incurred or estimated to be incurred by the association incident to the conduct of its affairs, pursuant to the terms of the individual reinsurance contracts executed by the association with each member in accordance with section 62E.10, subdivision 5. Deviations in the claim experience of the state plan from the premium payments allocated to the payment of benefits shall be the liability of the association members. Association members shall share in the claims expense of the state plan and operating and administrative expenses of the association in an amount equal to the ratio of the member's total cost of self insurance, accident and health insurance premium, subscriber contract charges, or health maintenance organization contract charges received from or on behalf of Minnesota residents as divided into the total cost of self insurance, accident and health insurance premium, subscriber contract charges, and health maintenance organization contract charges received by all association members from or on behalf of Minnesota residents, as determined by the commissioner. The reinsurance contract shall provide for an annual determination and assessment of each member's liability, if any. Payment of the assessment shall be due within 30 days after the end of the association's fiscal year. Subject to the approval of the commissioner, the reinsurance contract may provide for interim assessments as may be necessary to assure the financial capability of the association in meeting the incurred or estimated claims expenses of the state plan and operating and administrative expenses of the association until the association's next annual fiscal year end assessment. Failure by a member to tender to the association the assessed reinsurance payment within 30 days of notification by the association shall be grounds for termination of the member's membership.

"Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums."

Laws 1979, c. 272, § 12, provided in part that the provisions of section 62E.11, subd. 8, shall expire on July 1, 1981.

erence to "Section 62A.10" at the begi
ning of subd. 2, as well as "may" fo

prehensive health insurance plan. The time and manner of the submission shall be prescribed by rule of the commissioner.

Subd. 2. The association may select policies and contracts, or parts thereof, submitted by a member or members of the association, or by the association or others, to develop specifications for bids from any members which wish to be selected as a writing carrier to administer the state plan. The selection of the writing carrier shall be based upon criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified medicare supplement plan, and the health maintenance organization contract.

Subd. 3. The writing carrier shall perform all administrative and claims payment functions required by this section. The writing carrier shall provide these services for a period of three years, unless a request to terminate is approved by the commissioner. The commissioner shall approve or deny a request to terminate within 90 days of its receipt. A failure to make a final decision on a request to terminate within the specified period shall be deemed to be an approval. Six months prior to the expiration of each three year period, the association shall invite submissions of policy forms from members of the association, including the writing carrier. The association shall follow the provisions of subdivision 2 in selecting a writing carrier for the subsequent three year period.

Subd. 4. The writing carrier shall provide to all eligible persons enrolled in the plan an individual policy or certificate, setting forth a statement as to the insurance protection to which he is entitled, with whom claims are to be filed and to whom benefits are payable. The policy or certificate shall indicate that coverage was obtained through the association.

Subd. 5. The writing carrier shall submit to the association and the commissioner on a monthly basis a report on the operation of the state plan. Specific information to be contained in this report shall be determined by the association prior to the effective date of the state plan.

Subd. 6. All claims shall be paid by the writing carrier pursuant to the provisions of sections 62E.01 to 62E.17, and shall indicate that the claim was paid by the state plan. Each claim payment shall include information specifying the procedure to be followed in the event of a dispute over the amount of payment.

Subd. 7. The writing carrier shall be reimbursed from the state plan premiums received for its direct and indirect expenses. Direct and indirect expenses shall include, but need not be limited to, a pro rata reimbursement for that portion of the writing carrier's administrative, printing, claims administration, management and building overhead expenses which are assignable to the maintenance and administration of the state plan. The association shall approve cost accounting methods to substantiate the writing carrier's cost reports consistent with generally accepted accounting principles. Direct and indirect expenses shall not include costs directly related to the original submission of policy forms prior to selection as the writing carrier.

Subd. 8. The writing carrier shall at all times when carrying out its duties under sections 62E.01 to 62E.17 be considered an agent of the association and the commissioner with civil liability subject to the provisions of section 3.751.

Subd. 9. [illegible]

Laws 1976, c. 338, art. 1, § 3, eff. July 1, 1976. Amended by Laws 1977, c. 109, §§ 18, 19, eff. June 3, 1977; Laws 1979, c. 272, § 9, eff. May 31, 1979.

1977 Amendment. Substituted the reference to "Chapter 62A" for the reference to "Section 62A.10" at the beginning of subd. 2, as well as "may" for "shall" following the citation. Inserted "policy" as used in conjunction with "certificate" in subd. 4.

1979 Amendment. Revised subd. 2 which formerly read:

"Upon the commissioner's approval of the policy forms and contracts submitted pursuant to chapter 62A, the association may select policies and contracts submitted by a member or members of the association to be the comprehensive health insurance plan. This selection shall be based upon criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified medicare supplement plan, and the health maintenance organization contract."

Insurance ⇐31.1.
C.J.S. Insurance § 91 et seq.

62E.14 Enrollment by an eligible person

Subdivision 1. Certificate, contents. The comprehensive health insurance plan shall be open for enrollment by eligible persons. An eligible person shall enroll by submission of a certificate of eligibility to the writing carrier. The certificate shall provide the following:

(a) Name, address, age, and length of time at residence of the applicant;

(b) Name, address, and age of spouse and children if any, if they are to be insured;

(c) Evidence of rejection, a requirement of restrictive riders, a rate up, or a pre-existing conditions limitation on a qualified plan, the effect of which is to substantially reduce coverage from that received by a person considered a standard risk, by at least two association members within six months of the date of the certificate, or other eligibility requirements adopted by rule by the commissioner which are not inconsistent with this chapter and which evidence that a person is unable to obtain coverage substantially similar to that which may be obtained by a person who is considered a standard risk; and

(d) A designation of the coverage desired.

An eligible person may not purchase more than one policy from the state plan. Upon ceasing to be a resident of Minnesota a person is no longer eligible to purchase or renew coverage under the state plan.

Subd. 2. Writing carrier's response. Within 30 days of receipt of the certificate described in subdivision 1, the writing carrier shall either reject the application for failing to comply with the requirements in subdivision 1 or forward the eligible person a notice of acceptance and billing information. Insurance shall be effective immediately upon receipt of the first month's state plan premium, and shall be retroactive to the date of the application, if the applicant otherwise complies with the requirements of sections 62E.01 to 62E.17.

Subd. 3. Pre-existing conditions. No person who obtains coverage pursuant to this section shall be covered for any pre-existing condition during the first six months of coverage under the state plan if the person was diagnosed or treated for that condition during the 90 days immediately preceding the filing of an application.

Laws 1976, c. 296, art. 1, § 14, eff. Jan. 1, 1977. Amended by Laws 1977, c. 409, § 20, eff. June 3, 1977; Laws 1979, c. 272, § 10, eff. May 31, 1979.

1977 Amendment. Substituted "may" for "shall" with regard to the content of the certificate.

1979 Amendment. Revised subd. 1 which formerly read:

"The comprehensive health insurance plan shall be open for enrollment by eligible persons. An eligible person may enroll by submission of a certificate of eligibility to the writing carrier. The certificate may provide the following:

"(a) Name, address, age, and length of time at residence of the applicant;

"(b) Name, address, and age of spouse and children if any, if they are to be insured;

"(c) Evidence of rejection, or a requirement of restrictive riders, or a pre-existing conditions limitation on a qualified plan, the effect of which is to substantially reduce coverage from that received by a person considered a standard risk, by at least two association members within six months of the date of the certificate; and

"(d) A designation of the coverage desired.

"An eligible person may not purchase more than one policy from the state plan."

62E.15 Solicitation of eligible persons

Subdivision 1. The association pursuant to a plan approved by the commissioner shall disseminate appropriate information to the residents of this state regarding the existence of the comprehensive health insurance plan and the means of enrollment. Means of communication may include use of the press, radio and television, as well as publication in appropriate state offices and publications.

Subd. 2. The association shall devise and implement means of maintaining public awareness of the provisions of sections 62E.01 to 62E.17 and shall administer these sections in a manner which facilitates public participation in the state plan.

Subd. 3. The writing carrier shall pay an agent's referral fee of $25 to each insurance agent who refers an applicant to the state plan, if the application is accepted. Selling or marketing of qualified state plans shall not be limited to the writing carrier or its agents. The referral fees shall be paid by the writing carrier from money received as premiums for the state plan.

Subd. 4. Every insurer which rejects or applies underwriting restrictions to an applicant for accident and health insurance shall notify the applicant of the existence of the state plan, the requirements for being accepted in it, and the procedure for applying to it.

Laws 1976, c. 296, art. 1, § 15, eff. July 1, 1976.

62E.16 Conversion privileges

Every program of self insurance, policy of group accident and health insurance or contract of coverage by a health maintenance organization written or renewed in this state, shall include, in addition to the provisions required by section 62A.17, the right to convert to an individual coverage qualified plan without the addition of underwriting restrictions if the individual insured leaves the group regardless of the reason for leaving the group, or upon cancellation or termination of the coverage for the group except where uninterrupted and continuous group coverage is otherwise provided to the group. The person may exercise his right to conversion within 30 days of leaving the group or within 30 days following his receipt of due notice of cancellation or termination of coverage of the group and upon payment of premiums from the date of termination or cancellation. Due notice of cancellation or termination of coverage for a group shall be provided to each employee having coverage in the group by the insurer, self insurer or health maintenance organization cancelling or terminating the coverage except where reasonable evidence indicates that uninterrupted and continuous group coverage is otherwise provided to the group. Every employer having a policy of group accident and health insurance, group subscriber or contract of coverage by a health maintenance organization shall, upon request, provide the insurer or health maintenance organization a list of the names and addresses of covered employees. Plans of health coverage shall also include a provision which, upon the death of the individual in whose name the contract was issued, permits every other individual then covered under the contract to elect, within the period specified in the contract, to continue his coverage under the same or a different contract without the addition of underwriting restrictions until he would have ceased to have been entitled to coverage had the individual in whose name the contract was issued lived. An individual conversion contract issued by a health maintenance organization shall not be deemed to be an individual enrollment contract for the purposes of section 62D.10.

Laws 1976, c. 296, art. 1, § 16, eff. Jan. 1, 1977. Amended by Laws 1977, c. 305, § 1.

1977 Amendment. Inserted, in the first sentence, following "restrictions", the words "if the individual leaves the group" and added the alternative and exception at the end of the first sentence; and rewrote the second sentence which previously read: "The person leaving the group may exercise his right to conversion within 30 days of leaving the group."

Insurance ⇐178.3(4).
C.J.S. Insurance § 329 et seq.

62E.17 Dual option

Subdivision 1. An employer who employs in this state, on the average during a calendar quarter, 100 employees or more, other than employees engaged in seasonal employment as defined in section 268.07, subdivision 5, and who offers a health benefits plan to employees, whether (i) purchased from an insurer or a health maintenance organization, or (ii) provided on a self insured basis, shall, upon the next renewal of the health benefits plan contract, offer his employees a dual option to obtain health benefits through either an accident and health insurance policy or a health maintenance organization contract if one is available. An option need not be provided if less than 25 employees select that option.

Subd. 2. An employer may make the dual offers through an insurer, a health maintenance organization or on a self insured basis. If an offer is made on a self insured basis, the accident and health insurance type of coverage or health maintenance organization type of coverage shall meet the requirements of the laws of this state as to the services covered or benefits provided, but need not otherwise be approved by the commissioner or the commissioner of health.

Subd. 3. No insurer shall make acceptance of its offer to provide insurance coverage contingent on acceptance by the employer of health maintenance organization coverage by a particular health maintenance organization. No health maintenance organization shall make acceptance of its offer to provide health maintenance organization coverage contingent on acceptance by the employer of insurance coverage by a particular insurer. No offer to provide the accident and health insurance policy and the health maintenance organization contract shall combine the two in a single price package.

Subd. 4. The commissioner of health, in consultation with the commissioner, shall adopt rules to implement the provisions of this section.
Laws 1976, c. 296, art. 1 § 17, eff. Jan. 1, 1977. Amended by Laws 1977, c. 305, § 45, eff. May 28, 1977.

1977 Amendment. Laws 1977, c. 305, § 45, directed that changes in names with relation to officials involved in state health functions be made generally throughout the statutes.

(2) qualified nursing home expenses for himself and any dependents in any 12 consecutive months exceeding 20 percent of his household income.

Subd. 3. "Qualified expense" means any charge incurred subsequent to July 1, 1977 for a health service which is included in the list of covered services described in 62F.06, subdivision 1, and for which no third party is liable.

Subd. 3a. "Qualified nursing home expense" includes any charge incurred for nursing home services after 36 months of continuous care provided to a person 64 years of age or younger in long-term care facilities.

Subd. 4. "Dependent" means a spouse or unmarried child under the age of 19 years, a child who is a student under the age of 25 and financially dependent upon the parent, or a child of any age who is disabled and dependent upon the parent.

Subd. 5. "Household income" means the gross income of an eligible person and all his dependents 23 years of age or older for the calendar year preceding the year in which an application is filed pursuant to section 62E.53.

Subd. 6. "Gross income" means income as defined in section 290A.03, subdivision 3.

Subd. 7. "Commissioner" means the commissioner of public welfare.

Subd. 8. "Third party" means any person other than the eligible person or his dependents.

Laws 1976, c. 296, art. 3, § 2, eff. July 1, 1977. Amended by Laws 1977, c. 448, §§ 1 to 3.

1977 Amendment. Laws 1977, c. 448, added subd. 2(2) and subd. 3a, and inserted "23 years of age or older" in subd. 5.

62E.53 Application for assistance

Subdivision 1. Any person who believes that he is or will become an eligible person may submit an application for state assistance to the commissioner. The application shall include a listing of expenses incurred prior to the date of the application and shall designate the date on which the 12 month period for computing expenses began.

Subd. 2. If the commissioner determines that an applicant is an eligible person, he shall pay

(1) 90 percent of all qualified expenses of the eligible person and his dependents in excess of:

(a) 40 percent of his household income under $15,000, plus 50 percent of his household income between $15,000 and $25,000, plus 60 percent of his household income in excess of $25,000; or

(b) $2,500;

whichever is greater for the 12 month period in which the applicant becomes an eligible person and

(2) all qualified nursing home expenses of the eligible person and his dependents in excess of 20 percent of his household income. Provided, however, that the payment of qualified nursing home expenses shall not be made until the end of the fiscal year. If the appropriation for the payment of qualified nursing home expenses is inadequate to pay all qualified nursing home expenses, the commissioner shall prorate the payments among all eligible persons in proportion to their share of the total of the qualified nursing home expenses of all eligible persons.

Subd. 3. The commissioner shall by rule establish procedures for determining whether and to what extent qualified expenses are reasonable charges. Unless otherwise provided for by rule, charges shall be reviewed for reasonableness by the same procedures used to review and limit reimbursement under the provisions of chapter 256B. If the commissioner determines that the charge for a health service is excessive, he may limit his payment to the reasonable charge for that service. If the commissioner determines that a health service provided to an eligible person was not medically necessary, he may refuse to pay for the service. The commissioner may contract with a review organization as defined in section 145.61, in making any determinations

as to whether or not a charge is excessive and in making any determination as to whether or not a service was medically necessary. If the commissioner in accordance with this section refuses to pay all or a part of the charge for a health service, the unpaid portion of the charge shall be deemed to be an unconscionable fee, against the public policy of this state, and unenforceable in any action brought for the recovery of moneys owed.

Laws 1976, c. 296, art. 3, § 3, eff. July 1, 1977. Amended by Laws 1977, c. 409, § 21, eff. June 3, 1977; Laws 1977, c. 448, § 4.

1977 Amendments. Laws 1977, c. 409 revised subd. 2 which now appears as subds. 2 and 3. Subd. 2 formerly read:

"If the commissioner determines that an applicant is an eligible person, he shall pay 50 percent of all qualified expenses of the eligible person and his dependents in excess of:

(a) 40 percent of his household income under $15,000, plus 50 percent of his household income between $15,000 and $25,000, plus 60 percent of his household income in excess of $25,000; or

"(b) $2,500;

whichever is greater for the 12 month period in which the applicant becomes an eligible person. If the commissioner determines that the charge for a health service is excessive, he may limit his payment to the usual and customary charge for that service. If the commissioner determines that a health service provided to an eligible person was not medically necessary, he may refuse to pay for the service. To the extent feasible, the commissioner shall contract with a review organization as defined in Minnesota Statutes, Section 145.61, in making any determinations as to whether or not a charge is excessive. To the extent feasible, the commissioner shall contract with a review organization as defined in Minnesota Statutes, Section 145.61, in making any determination as to whether or not a service was medically necessary. If the commissioner in accordance with this section refuses to pay all or a part of the charge for a health service, the unpaid portion of the charge shall be deemed to be an unconscionable fee, against the public policy of this state, and unenforceable in any action brought for the recovery of moneys owed."

Laws 1977, c. 448, added subd. 2(2).

62E.531 Third party liability

Subdivision 1. When the commissioner pays for or becomes liable for payments for health services under the provisions of sections 62E.51 to 62E.55, the department of public welfare shall have a lien for payments and liabilities for the services upon any and all causes of action which accrue to the person to whom the services were furnished, or to his legal representatives, as a result of injuries which directly or indirectly led to the incurring of qualified expenses.

The department may perfect and enforce its lien by following the procedures set forth in sections 514.69, 514.70, and 514.71, except that it shall have one year from the date when the last item of health service was furnished in which to file its verified lien statement. The statement shall be filed with the appropriate clerk of court in the county in which the recipient of the services resides or in the county in which the action was filed.

Subd. 2. Where a third party may be liable in whole or in part for payment for health services, the commissioner may consider the charges for the health services to be qualified expenses if the eligible person assigns any rights accruing by virtue of any third party liability to the commissioner to the extent necessary to reimburse the state for any payments made under the provisions of this section.

Subd. 3. Upon furnishing assistance under the provisions of sections 62E.51 to 62E.55, the department of public welfare shall be subrogated, to the extent of its payments for health services, to any rights the eligible person or his dependents may have under the terms of any plan of health coverage as the result of injury, sickness or death for which assistance was provided. The right of subrogation shall not be asserted against the proceeds of the recovery of subscription charges or premiums of the plan of health coverage.

The attorney general, or the appropriate county attorney, acting upon direction from the attorney general, may institute or join a civil action against the issuer of the plan of health coverage to recover under this subdivision.

Added by Laws 1977, c. 409, § 22, eff. June 3, 1977.

62E.54 Duties of commissioner

Subdivision 1. The commissioner shall:

(a) Promulgate reasonable rules, including emergency rules, to implement sections 62E.51 to 62E.55.

(b) Establish application forms and procedures for the use of persons seeking to be declared an eligible person; and

(c) Investigate applications to determine whether or not the applicant is a qualified person and investigate claims from providers of health services to determine whether or not to pay them.

Subd. 2. The commissioner may:

(a) Enter into contracts with the United States or any state agency, instrumentality or political subdivision for the purpose of coordinating the program established by sections 62E.51 to 62E.55, with other programs which provide or pay for the delivery of health services;

(b) Enter into contracts with third parties to perform some or all of the duties imposed on the commissioner by sections 62E.53 and 62E.54.

Laws 1976, c. 296, art. 3, § 4, eff. July 1, 1977. Amended by Laws 1977, c. 409, § 23, eff. June 3, 1977.

1977 Amendment. Added "including emergency rules" to subd. 1(a).

62E.55 Appeals

The final decision of the commissioner denying an application for status as an eligible person or denying all or part of the charges for a health service may be appealed by any interested party pursuant to chapter 15.

Laws 1976, c. 296, art. 3, § 5, eff. July 1, 1977.

INSURANCE AND SERVICE CONTRACTS

414.115 Medical assistance by insurance or service contracts. In lieu of providing one or more of the medical and remedial care and services available under medical assistance by direct payments to providers thereof and in lieu of providing such medical and remedial care and services made available pursuant to ORS 414.065, the Adult and Family Services Division shall use available medical assistance funds to purchase and pay premiums on policies of insurance, or enter into and pay the expenses on health care service contracts, or medical or hospital service contracts that provide one or more of the medical and remedial care and services available under medical assistance for the benefit of the categorically needy or the medically needy, or both. The policy of insurance or the contract by its terms, or the insurer or contractor by written acknowledgment to the division must guarantee:

(1) To provide medical and remedial care and services of the type, to the extent and according to standards prescribed under ORS 414.065;

(2) To pay providers of medical and remedial care and services the amount due, based on the number of days of care and the fees, charges and costs established under ORS 414.065, except as to medical or hospital service contracts issued by a hospital association which employs a method of accounting or payment on other than a fee-for-service basis;

(3) To provide medical and remedial care and services under policies of insurance or contracts in compliance with all laws, rules and regulations applicable thereto; and

(4) To provide such statistical data, records and reports relating to the provision, administration and costs of providing medical and remedial care and services to the division as may be required by the division for its records, reports and audits.
[1967 c.502 §9; 1975 c.401 §1]

414.125 Rates on insurance or service contracts; requirements for insurer or contractor. (1) Any payment of available medical assistance funds for policies of insurance or service contracts shall be according to such uniform area-wide rates as the Adult and Family Services Division shall have established and which it may revise from time to time as may be necessary or practical, except that, in the case of a research and demonstra-

tion project entered into under ORS 411.135 special rates may be established.

(2) No premium or other periodic charge on any policy of insurance, health care service contract, or medical or hospital service contract shall be paid from available medical assistance funds unless the insurer or contractor issuing such policy or contract is by law authorized to transact business as an insurance company, health care service contractor or hospital association in this state.
[1967 c.502 §10; 1975 c.509 §6]

414.135 Contracts with direct providers of care and services. The Adult and Family Services Division may enter into nonexclusive contracts under which funds available for medical assistance may be administered and disbursed by the contractor to direct providers of medical and remedial care and services available under medical assistance in consideration of services rendered and supplies furnished by them in accordance with the provisions of this chapter. Payment shall be made according to the rules of the division pursuant to the number of days and the fees, charges and costs established under ORS 414.065. The contractor must guarantee the division by written acknowledgment:

(1) To make all payments under this chapter promptly but not later than 30 days after receipt of the proper evidence establishing the validity of the provider's claim.

(2) To provide such data, records and reports to the division as may be required by the division.
[1967 c.502 §11]

414.145 Implementation of ORS 414.115 to 414.135. The provisions of ORS 414.115, 414.125 or 414.135 shall be implemented whenever it appears to the Executive Department that such implementation will provide comparable benefits at equal or less cost than provision thereof by direct payments by the Adult and Family Services Division to the providers of medical assistance.
[1967 c.502 §11a; 1975 c.401 §3]

MEDICAL ADVISORY COMMITTEE

414.205 Medical advisory committee. (1) A medical advisory committee is established, consisting of not more than 15 members to be appointed by the Governor from among persons in the health professions, providers of medical and remedial care and services and the general public. In making his appointment, the Governor shall consult with appropriate professional and other interested organizations.

(2) Members shall serve at the pleasure of the Governor.

(3) Members of the advisory committee shall receive no compensation for their services, but subject to any applicable state law, shall be allowed actual and necessary travel expenses incurred in the performance of their duties from the Public Welfare Account.
[1967 c.502 §18]

414.210 [1957 c.692 §1; repealed by 1963 c.631 §2]

414.215 Duties of committee. The medical advisory committee shall advise the Adult and Family Services Division on:

(1) Health and medical care and services to be provided pursuant to this chapter.

(2) Matters referred to it for study by the division.
[1967 c.502 §19]

414.220 [1957 c.692 §2; repealed by 1963 c.631 §2]

414.225 Division to consult with and assist committee. (1) The Adult and Family Services Division shall consult with the medical advisory committee concerning the determinations required under ORS 414.065.

(2) The division shall provide secretarial services to the medical advisory committee.
[1967 c.502 §20]

414.230 [1957 c.692 §5; repealed by 1963 c.631 §2]

414.240 [1957 c.692 §3; repealed by 1963 c.631 §2]

414.250 [1957 c.692 §4; repealed by 1963 c.631 §2]

414.260 [1957 c.692 §6; repealed by 1963 c.631 §2]

414.270 [1957 c.692 §7(1); repealed by 1963 c.631 §2]

[illegible]

414.300 [1957 c.692 §8; repealed by 1963 c.631 §2]

MISCELLANEOUS

414.305 Payment of cost of medical care for institutionalized persons. (1) The Adult and Family Services Division is hereby authorized to pay the cost of care for patients within Mental Health Division institutions under the medical assistance program established by this chapter.

(2) All moneys received by the Mental Health Division from the Adult and Family

spouse and such children whose coverage under the policy terminates at the same time, or (iii) to a child solely with respect to himself upon termination of his coverage by reason of ceasing to be a qualified family member under the group policy, if a conversion privilege is not otherwise provided above with respect to such termination.

(17) If the benefit levels required in paragraphs (10) and (11) exceed the benefit levels provided under the group policy, the conversion policy may offer benefits which are substantially similar to those provided under the group policy in lieu of those required in paragraphs (10) and (11).

(18) The insurer may elect to provide group insurance coverage in lieu of the issuance of a converted individual policy.

(19) A notification of the conversion privilege shall be included in each certificate of coverage.

(20) A converted policy which is delivered outside [state] must be on a form which could be delivered in such other jurisdiction as a converted policy had the group policy been issued in that jurisdiction.

Section 3. [*Severability.*] [Insert severability clause.]

Section 4. [*Repeal.*] [Insert repealer clause.]

Section 5. [*Effective Date.*] [Insert effective date.]

1980 Suggested State Legislation
Vol. 39, The Council of State Governments

Comprehensive Health Insurance Act

This draft statute requires that employers in the state must include qualified catastrophic health insurance protection and minimum types of benefits for routine care in any policy provided to their employees pursuant to the individual's employment. This includes policies which are paid for partly or fully by the employee as well as those which are completely employer-paid. If only nonqualified plans are offered to employees, the employer may not deduct for tax purposes the cost of the insurance to him. In order to qualify, a plan must meet specified benefit levels and have no more than a maximum allowable deductible. This draft act also includes as Sections 18 and 19 a state catastrophic medical insurance plan under which the state will pay the medical expenses of those persons who incur uninsured medical expenses exceeding specified portions of their income.

This medical insurance plan is implemented by requiring in the statute that all insurers writing health insurance in the state must offer a qualified plan to their customers. A compulsory association of all insurers in the state is also to be formed under the act for the purpose of offering a qualified plan of insurance to those individuals whom the insurers have individually refused to insure. For those individuals who may be leaving employment at which they were enrolled in a qualified plan, the act provides mandatory conversion privileges enabling the individual to continue his insurance.

As the above indicates, this draft act is broad in scope and is directed toward multiple purposes. Among the related but separate purposes of the legislation are ensuring minimum standards for group health plans, creating an association of insurers as a resort for those individuals who could not otherwise obtain effective coverage, and providing catastrophic medical expense protection for all through employers and private insurers where possible and through the state welfare system where necessary.

This draft legislation is based on a 1976 Minnesota statute.

Suggested Legislation

(Title, enacting clause, etc.)

Section 1. *Short Title.*] This act may be cited as the [state] Comprehensive Health Insurance Act.

Section 2. [*Definitions.*] As used in this act:

(1) "Employer" means any person, partnership, association, trust, estate, or corporation, which employs 10 or more individuals who are residents of this state.

(2) "Health maintenance organization" means a nonprofit corporation licensed and operated as provided in [appropriate state statute].

(3) "Qualified plan" means those health benefit plans which have been certified by the commissioner as providing the minimum benefits required by Section 6 of this act or the actuarial equivalent of those benefits.

(4) "Qualified Medicare supplement plan" means those health benefit plans which have been certified by the commissioner as providing the minimum benefits required by Section 7 of this act or the actuarial equivalent of those benefits.

(5) "Commissioner" means the [commissioner of insurance].

(6) "Dependent" means a spouse or unmarried child under the age of 19 years, a dependent child who is a student under the age of 25 and financially dependent upon the parent, or a dependent child of any age who is disabled. or a household member who is financially dependent

(7) "Employee" means any [state] resident who has entered into the employment of or works under contract or service or apprenticeship with any employer. "Employee" does not include a person who has been employed for less than [30] days by his present employer, nor one who is employed less than an average of [30] hours per week by his present employer.

(8) 'Plan of health coverage" means any plan or combination of plans of coverage, including combinations of self-insurance, individual accident and health insurance policies, group accident and health insurance policies, coverage under a nonprofit health service plan, or coverage under a health maintenance organization subscriber contract.

(9) "Insurer" means those companies operating pursuant to [appropriate state statute] and offering or selling policies or contracts of accident and health insurance. "Insurer" does not include health maintenance organizations.

(10) "Accident and health insurance policy" or "policy" means insurance or nonprofit health service plan contracts providing benefits for hospital, surgical, and medical care. "Policy" does not include coverage which is (i) limited to disability or income protection coverage, (ii) automobile medical payment coverage, (iii) supplemental to liability insurance, (iv) sold by fraternals and provides payments on a per diem, daily indemnity or nonexpense-incurred basis, or (v) credit accident and health insurance issued pursuant to [appropriate state statute].

(11) "Health benefits" means benefits offered to employees on an indemnity or prepaid basis which pay the costs of or provide medical, surgical, or hospital care.

(12) "Eligible person" means an individual who is a resident of [state] and meets the enrollment requirements of Section 14 of this act. For purposes of Sections 18, 19, and 20 only, "eligible person" means any person who while a resident of [state] has been found by the [commissioner of public welfare] to have incurred an obligation to pay qualified expenses for himself and any dependents in any [12] consecutive months exceeding: (i) [40] percent of his household income up to $[15,000], plus [50] percent of his household income between $[15,000 and $25,000], plus [60] percent of his household income in excess of $[25,000], or (ii) $[2,500], whichever is greater.

(13) "Comprehensive health association" or "association" means the association created by Section 10 of this act.

(14) "Medicare" means Part A and Part B of the United States Social Security Act, Title XVIII, as amended, 42 U.S.C. Sections 1394, et seq.

(15) "Medicare supplement plan" means any plan of insurance protection which provides benefits for the costs of medical, surgical, or hospital care and which is marketed as providing benefits which complement or supplement the benefits provided by Medicare.

(16) "State plan premium" means the premium determined pursuant to Section 8 of this act.

(17) "Writing carrier" means the insurer or insurers and health maintenance organization or organizations selected by the association and approved by the commissioner to administer the comprehensive health insurance plan.

(18) "Fraternal beneficiary association" or "fraternal" means a corporation, society, order, or voluntary association without capital stock which sells health and accident insurance in accordance with [appropriate state statute].

(19) "Comprehensive health insurance plan" or "state plan" means policies of insurance and contracts of health maintenance organization coverage offered by the association through the writing carrier.

(20) "Self-insurer" means an employer who directly provides a plan of health coverage to his employees and administers the plan of health coverage himself or through an insurer. "Self-insurer" does not include an employer engaged in the business of providing health care services to the public who provides health care services directly to his employees at no charge to them.

(21) "Self-insurance" means a plan of health coverage offered by a self-insurer.

(22) "Qualified expense" means any charge incurred subsequent to [insert date] for a health service which is included in the list of covered services described in Section 6(a), and for which no third party is liable.

(23) "Household income" means the gross income of an eligible person and all his dependents for the calendar year preceding the year in which an application is filed pursuant to Section 18.

(24) "Gross income" means income as defined in [appropriate state tax statute].

(25) "Third party" means any person other than the eligible person or his dependents.

Section 3. [*Duties of Employer.*]

(a) Each employer who provides or makes available to his employees a plan of health coverage shall make available to his employees employed in this state a plan or combination of plans which have been certified by the commissioner as a number two qualified plan. If the plan of health coverage does not meet the requirements of Section 6 for a number two qualified plan, the employer shall make available a supplemental plan of health benefits which, when combined with the existing plan of health benefits, constitutes a number two coverage plan. The plan or combinations of plans may be financed from funds contributed solely by the employer or solely by the employees or any combination thereof. The plans may consist of self-insurance, health maintenance contracts, group policies, or individual policies or any combination thereof.

(b) In the event that an employer fails to make available at least a number two qualified plan of health benefits to his employees employed in this state, none of the employer's costs for health benefits shall qualify as an income tax deduction pursuant to [appropriate state tax statute]. In the case of an employer who meets the requirements of [state statute defining tax exempt organizations], if the employer fails to make available at least a number two qualified plan to his employees, the employer shall lose his status as an exempt organization.

Section 4. [*Duties of Insurers.*]

(a) For each type of qualified plan described in Section 6, an insurer or fraternal issuing individual policies of accident and health insurance in this state, other than group conversion policies, shall develop and file with the commissioner an individual policy which meets the minimum standards of that type of qualified plan. An insurer or fraternal issuing individual policies of accident and health insurance in this state shall offer each type of qualified plan to each person who applies and is eligible for accident and health insurance from that insurer or fraternal.

(b) An insurer or fraternal issuing Medicare supplement plans in this state shall develop and file with the commissioner a Medicare supplement policy which meets the minimum standards of a qualified Medicare supplement plan. An insurer or fraternal issuing Medicare supplement plans in this state shall offer a qualified Medicare supplement plan to each person who is eligible for coverage and who applies for a Medicare supplement plan.

(c) For each type of qualified plan described in Section 6, an insurer or fraternal issuing group policies of accident and health insurance in this state shall develop and file with the commissioner a group policy which provides for each member of the group the minimum benefits required by that type of qualified plan. An insurer or fraternal issuing group policies of accident and health insurance in this state shall offer each type of qualified plan to each eligible applicant for group accident and health insurance.

(d) Each insurer and fraternal shall include coverage of major medical costs in every unqualified policy of accident and health insurance, unless the applicant for a new or renewal policy declines the coverage in writing. The coverage shall provide that when a covered individual incurs out-of-pocket expenses of $[5,000] or more within a calendar year for services covered in Section 6(a), benefits shall be payable, subject to any copayment authorized by the commissioner, up to a maximum lifetime limit of $[250,000].

(e) No policy of accident and health insurance may be issued or renewed in this state [180] days after [insert date] by an insurer or a fraternal which has not complied with the requirements of this section.

(f) An insurer or fraternal may fulfill its obligations under this section by issuing the required coverages in their own name and reinsuring the risk and administration of the coverages with the association in accordance with paragraphs (5) and (6) of Section 10(g).

(g) Nothing in this section shall require an insurer or fraternal to offer or issue a policy to any person who does not meet the underwriting or membership requirements of the insurer or fraternal.

Section 5. [*Certification of Qualified Plans.*] Upon application by an insurer, fraternal, or employer for certification of a plan of health coverage as a qualified plan or a qualified Medicare supplement plan for the purposes of Sections 1 to 17, the commissioner shall make a determination within [90] days as to whether the plan is qualified. All plans of health coverage shall be labeled as "qualified" or "nonqualified" on the front of the policy or evidence of insurance. All qualified plans shall indicate whether they are number one, two, or three coverage plans.

Section 6. [*Minimum Benefits of Qualified Plan.*]

(a) A plan of health coverage shall be certified as a number three qualified plan if it otherwise meets the requirements established by [appropriate state statute] and the other laws of this state and whether or not the policy is issued in this state and meets or exceeds the following minimum standards:

(1) The minimum benefits for a covered individual shall, subject to the other provisions of this subsection, be equal to at least [80] percent of the cost of covered services in excess of an annual deductible which does not exceed $[150] per person. The coverage shall include a limitation of $[3,000] per person on total annual out-of-pocket expenses for services covered under this subsection. The coverage may be subject to a maximum lifetime benefit of not less than $[250,000]. Covered expenses shall be the usual and customary charges for the following services and articles when prescribed by a physician:

(i) Hospital services.

(ii) Professional services for the diagnosis or treatment of injuries, illnesses, or conditions, other than outpatient mental or dental, which are rendered by a physician or at his direction.

(iii) Drugs requiring a physician's prescription.

(iv) Services of a nursing home for not more than [120] days in a year if the services commence within [14] days following confinement of at least

[three] days in a hospital for the same condition.

(v) Service of a home health agency up to a maximum of [180] visits per year.

(vi) Use of radium or other radioactive materials.

(vii) Oxygen.

(viii) Anesthetics.

(ix) Prostheses.

(x) Rental or purchase, as appropriate, of durable medical equipment.

(xi) Diagnostic X-rays and laboratory tests.

(xii) Oral surgery for partially or completely unerupted impacted teeth, a tooth root without the extraction of the entire tooth, or the gums and tissues of the mouth when not performed in connection with the extraction or repair of teeth.

(xiii) Services of a physical therapist.

(2) Covered expenses for the services and articles specified in this subsection do not include the following:

(i) Any charge for any care for any injury or disease either arising out of an injury in the course of employment and subject to a worker's compensation or similar law, for which benefits are payable without regard to fault under coverage statutorily required to be contained in any motor vehicle or other liability insurance policy or equivalent self-insurance, or for which benefits are payable under another policy of accident and health insurance or Medicare.

(ii) Any charge for treatment for cosmetic purposes other than surgery for the repair of an injury or birth defect.

(iii) Any charge for travel other than travel by ambulance to the nearest health care institution qualified to treat the illness or injury.

(iv) Any charge for confinement in a private room to the extent it is in excess of the institution's charge for its most common semi-private room, unless a private room is prescribed as medically necessary by a physician.

(v) That part of any charge for services or articles rendered or prescribed by a physician, dentist, or other health care personnel which exceeds the prevailing charge in the locality where the service is provided.

(vi) Any charge for services or articles the provision of which is not within the scope of authorized practice of the institution or individual rendering the services or articles.

(3) Effective [insert date], the minimum benefits for a qualified plan shall include, in addition to those benefits specified in subsection (a)(1), benefits for the following services subject to applicable deductibles, coinsurance provisions, and maximum lifetime benefit limitations:

(i) Well baby care.

(ii) Physicians' services for routine checkups and annual physicals when prescribed by a physician.

(iii) Multiphasic screening and other diagnostic testing. The commissioner by rule shall prescribe reasonable limits on the reimbursement required for these services.

(b) A plan of health coverage shall be certified as a number two qualified plan if it meets the requirements established by the laws of this state and provides for payment of [80] percent of the covered expenses required by this section in excess of a deductible which does not exceed $[500] per person.

(c) A plan of health coverage shall be certified as a number one qualified plan if it meets the requirements established by the laws of this state and provides for payment of [80] percent of the covered expenses required by this section in excess of a deductible which does not exceed $[1,000] per person.

(d) A health maintenance organization which provides the services required by [appropriate state statute] shall be deemed to be providing a number three qualified plan.

Section 7. [*Qualified Medicare Supplement Plan.*] Any plan which provides benefits to persons over the age of 65 years may be certified as a qualified Medicare supplement plan if the plan is designed to supplement Medicare and provides coverage of [50] percent of the deductible and copayment required under Medicare and [80] percent of the charges for covered services described in Section 6(a), which charges are not paid by Medicare. The coverage shall include a limitation of $[1,000] per person on total annual out-of-pocket expenses for the covered services. The coverage may be subject to a maximum lifetime benefit of not less than $[100,000].

Section 8. [*State Plan Premium.*]

(a) For the first year of operation of the comprehensive health insurance plan, the association shall establish the following premiums to be charged for membership in the comprehensive health insurance plan:

(1) The premium for the number one qualified plan shall be the average of rates charged by the [five] insurers with the largest number of individuals in a number one individual qualified plan of insurance in force in the state.

(2) The premium for the number two qualified plan shall be the average of rates charged by the [five] insurers with the largest number of individuals in a number two individual qualified plan of insurance in force in the state.

(3) The premium for a qualified Medicare supplement plan shall be the average of rates charged by the [five] insurers with the largest number of individuals enrolled in a qualified Medicare supplement plan.

(4) The charge for health maintenance organization coverage shall be based on generally accepted actuarial principles.

(b) For the second and subsequent years, the schedule of premiums for membership in the comprehensive health insurance plan shall be designed to be self-supporting and based on generally accepted actuarial principles.

Section 9. [*Duties of Commissioner.*] The commissioner may:

(1) Formulate general policies to advance the purposes of Sections 1 to 17; the commissioner may also adopt, promulgate, repeal, and amend rules pursuant to the rulemaking provisions of [state administrative procedure act] to carry out the provisions of Sections 1 to 17.

(2) Supervise the creation of a comprehensive health association within the limits described in Section 10.

(3) Approve the selection of the writing carrier by the association and approve the association's contract with the writing carrier including the state plan coverage and premiums to be charged.

(4) Appoint advisory committees.

(5) Conduct periodic audits to assure the general accuracy of the financial data submitted by the writing carrier and the association.

(6) Contract with the federal government or any other unit of government to ensure coordination of the state plan with other governmental assistance programs.

(7) Undertake directly or through contracts with other persons studies or demonstration programs to develop awareness of the benefits of Sections 1 to 17, so that the residents of this state may best avail themselves of the health care benefits provided by these sections.

(8) Contract with insurers and others for administrative services.

Section 10. [*Comprehensive Health Association.*]

(a) There is established a comprehensive health association with membership consisting of all insurers, self-insurers, fraternals, and health maintenance organizations licensed or authorized to do business in this state.

(b) The board of directors of the association shall be made up of [seven] individuals selected by participating members, subject to approval by the commissioner. To select the initial board of directors, and to initially organize the association, the commissioner shall give notice to all members of the time and place of the organizational meeting. In determining voting rights at the organizational meeting, each member shall be entitled to vote in person or by proxy. The vote shall be a weighted vote based upon the member's cost of self-insurance, accident and health insurance premium, subscriber contract charges, or health maintenance contract payment derived from or on behalf of residents in the previous calendar year, as determined by the commissioner. If the board of directors is not selected within [60] days after notice of the organizational meeting, the commissioner may appoint the initial board. In approving or selecting members of the board, the commissioner shall consider, among other things, whether all types of members are fairly represented. Members of the board may be reimbursed from the moneys of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services. The costs of conducting meetings of the association and its board of directors shall be borne by members of the association.

(c) All members shall maintain their membership in the association as a condition of doing business in this state. The association shall submit bylaws and operating rules to the commissioner for approval.

(d) All meetings of the association, its board, and any committees of the association shall comply with the provisions of [state open meetings act].

(e) All members shall enter into a contract with the association according to terms specified in Section 11. The contract of reinsurance shall be executed for a period of one year and shall be renewed annually thereafter. A company which ceases to do business within the state shall remain liable under the contract for the reinsurance contracted for during that calendar year.

(f) In the performance of their duties as members of the association, the members shall be exempt from the provisions of [state antitrust statute].

(g) The association may:

(1) Exercise the powers granted to insurers under the laws of this state.

(2) Sue or be sued.

(3) Enter into contracts with insurers, similar associations in other states, or other persons for the performance of administrative functions including the functions provided for in paragraphs (5) and (6) of this subsection.

(4) Establish administrative and accounting procedures for the operation of the association.

(5) Provide for the reinsuring of risks incurred as a result of issuing the coverages required by Sections 4 and 16 by members of the association. Each member which elects to reinsure its required risks shall determine the categories of coverage it elects to reinsure in the association. The categories of coverage are: (i) individual qualified plans, excluding group conversions; (ii) group conversions; (iii) group qualified plans with fewer than [50] employees or members; and (iv) major medical coverage. A separate election may be made for each category of coverage. If a member elects to reinsure the risks of a category of coverage, it must reinsure the risk of the coverage of every life covered under every policy issued in that category. Members electing to administer the risks which are reinsured in the association shall comply with the benefit determination guidelines and accounting procedures established by the association. The fee charged by the association for the reinsurance of risks shall not be less than [110] percent of the total anticipated expenses incurred by the association for the reinsurance.

(6) Provide for the administration by the association of policies which are reinsured pursuant to paragraph 5 of this subsection. Each member electing to reinsure one or more categories of coverage in the association may elect to have the association administer the categories of coverage on the member's behalf. If a member elects to have the association administer the categories of coverage, it must do so for every life covered under every policy issued in that category. The fee for the administration shall not be less than [110] percent of the total anticipated expenses incurred by the association for the administration.

(a) Upon certification as an eligible person in the manner provided by Section 14, an eligible person may enroll in the comprehensive health insurance plan by payment of the state plan premium to the writing carrier.

(b) Any employer which has in its employ one or more eligible persons enrolled in the comprehensive health insurance plan may make all or any portion of the state plan premium payment to the state plan directly to the writing carrier.

(c) Not less than [87½] percent of the state plan premium paid to the writing carrier shall be used to pay claims, and not more than [12½] percent shall be used for the payment of agent referral fees as authorized in Section 15(c) and for payment of the writing carrier's direct and indirect expenses, as specified in Section 13(g).

(d) Any income in excess of the costs incurred by the association in providing reinsurance or administrative services shall be held at interest and used by the association to offset losses due to claims expenses of the state plan or allocated to reduce state plan premiums

(e) Each member of the association shall share the losses due to claims expenses of the comprehensive health insurance plan pursuant to the terms of the individual reinsurance contracts executed by the association with each member in accordance with Section 10(e). Deviations in the claim experience of the state plan from the premium payments allocated to the payment of benefits shall be the liability of the association members. Association members shall share in the excess costs of the state plan in an amount equal to the ratio of the member's total cost of self-insurance, accident and health insurance premium, subscriber contract charges, or health maintenance organization contract charges received from or on behalf of [state] residents as divided into the total cost of self-insurance, accident and health insurance premium, subscriber contract charges, and health maintenance organization contract charges received by all association members from or on behalf of [state] residents, as determined by the commissioner. The reinsurance contract shall provide for a retroactive determination of each member's liability and payment due within [30] days after each renewal date of the reinsurance contract. Failure by a member to tender to the association the assessed reinsurance payment within [30] days of notification by the association shall be grounds for termination of the member's membership. Net gains, if any, from the operation of the state plan shall be held at interest and used by the association to offset future losses due to claims expenses of the state plan or allocated to reduce state plan premiums.

Section 12. [*Minimum Benefits of Comprehensive Health Insurance Plan.*] The association through its comprehensive health insurance plan shall offer policies which provide the benefits of a number one qualified plan, a number two qualified plan, and a qualified Medicare supplement plan. They shall offer health maintenance organization contracts in those areas of the state where a health maintenance organization has agreed to make the coverage available and has been selected as a writing carrier.

Section 13. [*Administration of Plan.*]

(a) Any member of the association may submit to the commissioner the policies of accident and health insurance or the health maintenance organization contracts which are being proposed to serve in the comprehensive health insurance plan. The time and manner of the submission shall be prescribed by rule of the commissioner.

(b) Upon the commissioner's approval of the policy forms and contracts submitted pursuant to Section 10, the association shall select policies and contracts submitted by a member or members of the association to be the comprehensive health insurance plan. This selection shall be based upon criteria including the member's proven ability to handle large group accident and health insurance cases, efficient claim paying capacity, and the estimate of total charges for administering the plan. The association may select separate writing carriers for the two types of qualified plans, the qualified Medicare supplement plan, and the health maintenance organization contract.

(c) The writing carrier shall perform all administrative and claims payment functions required by this section. The writing carrier shall provide these services for a period of [three] years, unless a request to terminate is approved by the commissioner. The commissioner shall approve or deny a request to terminate within [90] days of its receipt. A failure to make a final decision on a request to terminate within the specified period shall be deemed to be an approval. [Six] months prior to the expiration of each [three]-year period, the association shall invite submissions of policy forms from members of the association, including the writing carrier. The association shall follow the provisions of subsection (b) in selecting a writing carrier for the subsequent three-year period.

(d) The writing carrier shall provide to all eligible persons enrolled in the plan an individual certificate, setting forth a statement as to the insurance protection to which he is entitled, with whom claims are to be filed and to whom benefits are payable. The certificate shall indicate that coverage was obtained through the association.

(e) The writing carrier shall submit to the association and the commissioner on a monthly basis a report on the operation of the state plan. Specific information to be contained in this report shall be determined by the association prior to the effective date of the state plan.

(f) All claims shall be paid by the writing carrier pursuant to the provisions of Sections 1 to 17 and shall indicate that the claim was paid by the state plan. Each claim payment shall include information specifying the procedure to be followed in the event of a dispute over the amount of payment.

(g) The writing carrier shall be reimbursed from the state plan premiums received for its direct and indirect expenses. Direct and indirect expenses

hall include, but need not be limited to, a pro rata reimbursement for that portion of the writing carrier's administrative, printing, claims administration, management and building overhead expenses which are assignable to the maintenance and administration of the state plan. The association shall approve cost accounting methods to substantiate the writing carrier's cost reports consistent with generally accepted accounting principles. Direct and indirect expenses shall not include costs directly related to the original submission of policy forms prior to selection as the writing carrier.

(h) The writing carrier shall at all times when carrying out its duties under Sections 1 to 17 be considered an agent of the association and the commissioner with civil liability subject to the provisions of [appropriate state tort liability statute].

(i) Premiums received by the writing carrier for the comprehensive health insurance plan are specifically exempted from the provisions of Section 15 .

Section 14. [*Enrollment by Eligible Person.*]

(a) The comprehensive health insurance plan shall be open for enrollment by eligible persons. An eligible person may enroll by submission of a certificate of eligibility to the writing carrier. The certificate shall provide the following:

(1) Name, address, age, and length of time at residence of the applicant.

(2) Name, address, and age of spouse and children, if any, if they are to be insured.

(3) Evidence of rejection, or a requirement of restrictive riders, or a preexisting conditions limitation on a qualified plan, the effect of which is to substantially reduce coverage from that received by a person considered a standard risk, by at least [two] association members within [six] months of the date of the certificate.

(4) A designation of the coverage desired.

(b) Within [30] days of receipt of the certificate described in Section 14(a), the writing carrier shall either reject the application for failing to comply with the requirements in Section 14(a) or forward the eligible person a notice of acceptance and billing information. Insurance shall be effective immediately upon receipt of the first month's state plan premium, and shall be retroactive to the date of application, if the applicant otherwise complies with the requirements of Sections 1 to 17. An eligible person may not purchase more than one policy from the state plan.

(c) No person who obtains coverage pursuant to this section shall be covered for any preexisting condition during the first [six] months of coverage under the state plan if the person was diagnosed or treated for that condition during the [90] days immediately preceding the filing of an application.

Section 15. [*Solicitation of Eligible Persons.*]

(a) The association pursuant to a plan approved by the commissioner shall disseminate appropriate information to the residents of this state regarding the existence of the comprehensive health insurance plan and the means of enrollment. Means of communication may include use of the press, radio, and television, as well as publication in appropriate state offices and publications.

(b) The association shall devise and implement means of maintaining public awareness of the provisions of Sections 1 to 17 and shall administer these sections in a manner which facilitates public participation in the state plan.

(c) The writing carrier shall pay an agent's referral fee of $[25] to each insurance agent who refers an applicant to the state plan, if the application is accepted. Selling or marketing of qualified state plans shall not be limited to the writing carrier or its agents. The referral fees shall be paid by the writing carrier from money received as premiums for the state plan.

(d) Every insurer which rejects or applies underwriting restrictions to an applicant for accident and health insurance shall notify the applicant of the existence of the state plan, the requirements for being accepted in it, and the procedure for applying to it.

Section 16. [*Conversion Privileges.*] Every program of self-insurance, policy of group accident and health insurance or contract of coverage by a health maintenance organization written or renewed in this state shall include the right to convert to an individual coverage qualified plan without the addition of underwriting restrictions regardless of the reason for leaving the group. The person leaving the group may exercise his right to conversion within [30] days of leaving the group. Plans of health coverage shall also include a provision which, upon the death of the individual in whose name the contract was issued, permits every other individual then covered under the contract to elect, within the period specified in the contract, to continue his coverage under the same or a different contract without the addition of underwriting restrictions until he would have ceased to have been entitled to coverage had the individual in whose name the contract was issued lived.

Section 17. [*Dual Option.*]

(a) An employer who employs in this state, on the average during a calendar quarter, [100] employees or more, other than employees engaged in seasonal employment, and who offers a health benefits plan to employees, whether purchased from an insurer or a health maintenance organization, or provided on a self-insured basis, shall, upon the next renewal of the health benefits plan contract, offer his employees a dual option to obtain health benefits through either an accident and health insurance policy or a health maintenance organization contract if one is available. An option need not be provided if fewer than [25] employees select that option.

(b) An employer may make the dual offers through an insurer, a health maintenance organization or on a self-insured basis. If an offer is made on a self-insured basis, the accident and health insurance type of coverage or

health maintenance organization type of coverage shall meet the requirements of the laws of this state as to the services covered or benefits provided, but need not otherwise be approved by the commissioner or the board of health.

(c) No insurer shall make acceptance of its offer to provide insurance coverage contingent on acceptance by the employer of health maintenance organization coverage by a particular health maintenance organization. No health maintenance organization shall make acceptance of its offer to provide health maintenance organization coverage contingent on acceptance by the employer of insurance coverage by a particular insurer. No offer to provide the accident and health insurance policy and the health maintenance organization contract shall combine the two in a single price package.

(d) The [board of health], in consultation with the commissioner, shall adopt rules to implement the provisions of this section.

Section 18. [*Application for Assistance.*]

(a) Any person who believes that they are or will become an eligible person may submit an application for state assistance to the [commissioner of public welfare]. The application shall include a listing of expenses incurred prior to the date of the application and shall designate the date on which the [12]-month period for computing expenses began.

(b) If the [commissioner of public welfare] determines that an applicant is an eligible person, he shall pay [90] percent of all qualified expenses of the eligible person and his dependents in excess of: (1) [40] percent of his household income under $[15,000], plus [50] percent of his household income between $[15,000] and $[25,000], plus [60] percent of his household income in excess of $[25,000]; or (2) $[2,500], whichever is greater for the [12]-month period in which the applicant becomes an eligible person. If the [commissioner of public welfare] determines that the charge for a health service is excessive, he may limit his payment to the usual and customary charge for that service. If the [commissioner of public welfare] determines that a health service provided to an eligible person was not medically necessary, he may refuse to pay for the service. To the extent feasible, the [commissioner of public welfare] shall contract with a review organization in making any determinations as to whether or not a charge is excessive. To the extent feasible, the [commissioner of public welfare] shall contract with a review organization in making any determination as to whether or not a service was medically necessary. If the [commissioner of public welfare], in accordance with this section, refuses to pay all or a part of the charge for a health service, the unpaid portion of the charge shall be deemed to be an unconscionable fee, against the public policy of this state, and unenforceable in any action brought for the recovery of moneys owed.

Section 19. [*Duties of Commissioner.*]

(a) The [commissioner of public welfare] shall:

(1) Promulgate reasonable rules to implement Sections 18 to 20.

(2) Establish application forms and procedures for the use of persons seeking to be declared eligible persons.

(3) Investigate applications to determine whether or not the applicant is a qualified person and investigate claims from providers of health services to determine whether or not to pay them.

(b) The [commissioner of public welfare] may:

(1) Enter into contracts with the United States or any state agency, instrumentality or political subdivision for the purpose of coordinating the program established by this act, with other programs which provide or pay for the delivery of health services.

(2) Enter into contracts with third parties to perform some or all of the duties imposed on the [commissioner of public welfare] by Sections 18 and 19.

Section 20. [*Appeals.*] The final decision of the [commissioner of public welfare] in denying an application for status as an eligible person or denying all or part of the charges for a health service may be appealed by any interested party pursuant to [state administrative procedure act].

Section 21. [*Severability.*] [Insert severability clause.]

Section 22. [*Repeal.*] [Insert repealer clause.]

Section 23. [*Effective Date.*] [Insert effective date.]

HAWAII

PART VI. ENFORCEMENT

[§392-91] **Enforcement by the director.** The director shall enforce the provisions of this chapter. The director may appoint such assistants and such clerical, stenographic and other help as may be necessary for the proper enforcement of this chapter subject to any civil service act relating to state employees. The salaries of all the foregoing appointees and employees shall be as fixed by law.

The director may adopt, amend, or repeal such rules and regulations as he deems necessary or suitable for the proper enforcement of this chapter. [L 1969, c 148, pt of §1]

PART VII. MISCELLANEOUS PROVISIONS

[§392-101] **Limitation of fees.** Any individual claiming benefits in any proceeding before the department or the referee may be represented by counsel or other duly authorized agent; but no such counsel or agent shall either charge or receive for such services more than an amount approved by the department or referee, and such amount shall in no case exceed ten per cent of the total amount of benefits received as a result of such proceeding. Any person who violates this section shall, for each such offense, be fined not less than $50 nor more than $500 or imprisoned not more than six months, or both. [L 1971, c 109, §1(m)]

[PART V. TERMINATION OF CHAPTER]
[393-51 TERMINATION OF CHAPTER]

PART I. SHORT TITLE; PURPOSE; DEFINITIONS

[§393-1] Short title. This chapter shall be known as the Hawaii Prepaid Health Care Act. [L 1974, c 210, pt of §1]

[§393-2] Findings and purpose. The cost of medical care in case of sudden need may consume all or an excessive part of a person's resources. Prepaid health care plans offer a certain measure of protection against such emergencies. It is the purpose of this chapter in view of the spiraling cost of comprehensive medical care to provide this type of protection for the employees in this State. Although a large segment of the labor force in the State already enjoys coverage of this type either by virtue of collective bargaining agreements, employer-sponsored plans, or individual initiative, there is a need to extend that protection to workers who at present do not possess any or possess only inadequate prepayment coverage.

This chapter shall not be construed to interfere with or diminish any protection already provided pursuant to collective bargaining agreements or employer-sponsored plans that is more favorable to the employees benefited thereby than the protection provided by this chapter or at least equivalent thereto. [L 1974, c 210, pt of §1]

[§393-3] Definitions generally. As used in this chapter, unless the context clearly requires otherwise:

(1) "Department" means the department of labor and industrial relations.

(2) "Director" means the director of labor and industrial relations.

(3) "Employer" means any individual or type of organization, including any partnership, association, trust, estate, joint stock company, insurance company, or corporation, whether domestic or foreign, a debtor in possession or receiver or trustee in bankruptcy, or the legal representative of a deceased person, who has one or more regular employees in his employment. "Employer" does not include:

(A) The State, any of its political subdivisions, or any instrumentality of the State or its political subdivisions;

(B) The United States government or any instrumentality of the United States;

(C) Any other state or political subdivision thereof or instrumentality of such state or political subdivision;

(D) Any foreign government or instrumentality wholly owned by a foreign government, if (i) the service performed in its employ is of a character similar to that performed in foreign countries by employees of the United States government or of an instrumentality thereof, and (ii) the United States Secretary of State has certified or certifies to the United States Secretary of the Treasury that the foreign government, with respect to whose instrumentality exemption is claimed, grants an equivalent exemption with respect to similar service performed in the foreign country by employees of the United States government and of instrumentalities thereof.

(4) "Employment" means service, including service in interstate commerce, performed for wages under any contract of hire, written or oral, expressed or implied, with an employer, except as otherwise provided in sections 393-4 and 393-5.

(5) "Premium" means the amount payable to a prepaid health care plan contractor as consideration for his obligations under a prepaid health care plan.

(6) "Prepaid health care plan" means any agreement by which any prepaid health care plan contractor undertakes in consideration of a stipulated premium:

(A) Either to furnish health care, including hospitalization, surgery, medical or nursing care, drugs or other restorative appliances, subject to, if at all, only a nominal per service charge; or

(B) To defray or reimburse, in whole or in part, the expenses of health care.

(7) "Prepaid health care plan contractor" means:

(A) Any medical group or organization which undertakes under a prepaid health care plan to provide health care; or

(B) Any nonprofit organization which undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care; or

(C) Any insurer who undertakes under a prepaid health care plan to defray or reimburse in whole or in part the expenses of health care.

(8) "Regular employee" means a person employed in the employment of any one employer for at least twenty hours per week but does not include a person employed in seasonal employment. "Seasonal employment" for the purposes of this paragraph means employment in a seasonal pursuit as defined in section 387-1 by a seasonal employer during a seasonal period or seasonal periods for the employee in the seasonal pursuit or employment by an employer engaged in the cultivating, harvesting, processing, canning, and warehousing of pineapple during its seasonal periods. The director by rule and regulation may determine the kind of employment that constitutes

seasonal employment.

(9) "Wages" means all cash remuneration for services from whatever source, including commissions, bonuses, and tips and gratuities paid directly to any individual by a customer of his employer.

If the employee does not account to his employer for the tips and gratuities received and is engaged in an occupation in which he customarily and regularly receives more than $20 a month in tips, the combined amount received by him from his employer and from tips shall be deemed to be at least equal to the wage required by chapter 387 or a greater sum as determined by regulation of the director.

"Wages" does not include the amount of any payment specified in section 383-11 or 392-22 or chapter 386. [L 1974, c 210, pt of §1]

[§393-4] Place of performance. "Employment" includes an individual's entire service, performed within or both within and without this State if:

(1) The service is localized in this State; or

(2) The service is not localized in any state but some of the service is performed in this State and

(A) The individual's base of operation, or, if there is no base of operation, the place from which such service is directed or controlled, is in the State; or

(B) The individual's base of operation or place from which the service is directed or controlled is not in any state in which some part of the service is performed but the individual's residence is in this State. [L 1974, c 210, pt of §1]

[§393-5] Excluded services. "Employment" as defined in section 393-3 does not include the following services:

(1) Service performed by an individual in the employ of an employer who, by the laws of the United States, is responsible for care and cost in connection with such service.

(2) Service performed by an individual in the employ of his spouse, son, or daughter, and service performed by an individual under the age of twenty-one in the employ of his father or mother.

(3) Service performed in the employ of a voluntary employee's beneficiary association providing for the payment of life, sick, accident, or other benefits to the members of the association or their dependents or their designated beneficiaries, if

(A) Admission to membership in the association is limited to individuals who are officers or employees of the United States government, and

(B) No part of the net earnings of the association inures (other than through such payments) to the benefits of any private shareholder or individual.

(4) Service performed by an individual for an employer as an insurance agent or as an insurance solicitor, if all such service

performed by the individual for the employer is performed for remuneration solely by way of commission.

(5) Service performed by an individual for an employer as a real estate salesman or as a real estate broker, if all such service performed by the individual for the employer is performed for remuneration solely by way of commission.

(6) Service performed by an individual who, pursuant to the Federal Economic Opportunity Act of 1964, is not subject to the provisions of law relating to federal employment, including unemployment compensation. [L 1974, c 210, pt of §1]

[§393-6] Principal and secondary employer defined; coercion, interference, etc. prohibited. If an individual is concurrently a regular employee of two or more employers as defined in this chapter, the principal employer shall be the employer who pays him the most wages; provided that if one of the employers, who does not pay the most wages, employs the regular employee for at least thirty-five hours per week, the employee shall determine which of the employers shall be his principal employer. His other employers are secondary employers. An employer so designated as the principal employer shall remain as such principal employer for one year or until change of employment, whichever is earlier.

If an individual is concurrently a regular employee of a public entity which is not an employer as defined in section 393-3 and of an employer as defined in section 393-3 the latter shall be deemed to be a secondary employer.

An employer who, directly or indirectly, interferes with or coerces or attempts to coerce an employee in making a determination under this section shall be subject to the penalty provided under subsection 393-33(b). [L 1974, c 210, pt of § 1; am L 1975, c 51, §1]

[§393-7] Required health care benefits. (a) A prepaid health care plan shall qualify as a plan providing the mandatory health care benefits required under this chapter if it provides for health care benefits equal to, or medically reasonably substitutable for, the benefits provided by prepaid health plans of the same type, as specified in section 393-12(a)(1) or (2), which have the largest numbers of subscribers in the State. This applies to the types and quantity of benefits as well as to limitations on reimbursability, including deductibles, and to required amounts of co-insurance.

The director, after advice by the prepaid health care advisory council, shall determine whether benefits provided in a plan, other than the plan of the respective type having the largest numbers of subscribers in the State, comply with the standards specified in this subsection.

(b) A prepaid group health care plan shall also qualify for the mandatory health care benefits required under this chapter if it is demonstrated by the health care plan contractor offering such coverage to the satisfaction of the director after advice by the prepaid health care advisory council that the plan provides for sound basic hospital,

surgical, medical, and other health care benefits at a premium commensurate with the benefits included taking proper account of the limitations, co-insurance features, and deductibles specified in such plan. Coverage under a plan which provides aggregate benefits that are more limited than those provided by plans qualifying under subsection (a) shall be in compliance with section 393-11 only if the employer contributes at least half of the cost of the coverage of dependents under such plan.

(c) Subject to the provisions of subsections (a) and (b) without limiting the development of medically more desirable combinations and the inclusion of new types of benefits, a prepaid health care plan qualifying under this chapter shall include at least the following benefit types:

(1) Hospital benefits:

(A) In-patient care for a period of at least one hundred twenty days of confinement in each calendar year covering:

(i) Room accommodations;

(ii) Regular and special diets;

(iii) General nursing services;

(iv) Use of operating room, surgical supplies, anesthesia services, and supplies;

(v) Drugs, dressings, oxygen, antibiotics, and blood transfusion services.

(B) Out-patient care:

(i) Covering use of out-patient hospital;

(ii) Facilities for surgical procedures or medical care of an emergency and urgent nature.

(2) Surgical benefits:

(A) Surgical services performed by a licensed physician, as determined by plans meeting the standards of subsections (a) and (b);

(B) After-care visits for a reasonable period;

(C) Anesthesiologist services.

(3) Medical benefits:

(A) Necessary home, office, and hospital visits by a licensed physician;

(B) Intensive medical care while hospitalized;

(C) Medical or surgical consultations while confined.

(4) Diagnostic laboratory services, x-ray films, and radio-therapeutic services, necessary for diagnosis or treatment of injuries or diseases.

(5) Maternity benefits, at least if the employee has been covered by the prepaid health care plan for nine consecutive months prior to the delivery.

(d) The prepaid health care advisory council shall be appointed by the director and shall include representatives of the medical and public health professions, representatives of consumer interests, and persons experienced in prepaid health care protection. The membership of the council shall not exceed seven individuals. [L 1974, c 210, pt of §1]

[§393-11] Coverage of regular e

PART II. MANDATORY COVERAGE

[§393-11] Coverage of regular employees by group prepaid health care plan. Every employer who pays to a regular employee monthly wages in an amount of at least 86.67 times the minimum hourly wage, specified in chapter 387, as rounded off by regulation of the director, shall provide coverage of such employee by a prepaid group health care plan qualifying under section 393-7 with a prepaid health care plan contractor in accordance with the provisions of this chapter. [L 1974, c 210, pt of §1]

[§393-12] Choice of plan type and of contractor. (a) Every employer required to provide coverage for his employees by a prepaid group health care plan under this chapter shall elect whether coverage shall be provided by:

(1) A plan which obligates the prepaid health care plan contractor to furnish the required health care benefits; or

(2) A plan which obligates the prepaid health care plan contractor to defray or reimburse the expenses of health care.

His election is binding for one year.

(b) Whether the employer elects a plan type described in subsection (a)(1) or in subsection (a)(2), the employer may elect the particular contractor but the employee shall not be obligated to contribute a greater amount to the premium than he would have to contribute had the employer elected coverage with the contractor providing the prevailing coverage of the respective type in the State.

Subject to the provision of section 393-20, the employer shall provide coverage with the prepaid health care plan contractor selected pursuant to this subsection for all his employees in the State electing this type of coverage who are covered by the provisions of this chapter, except for employees covered by the health care provisions of an applicable collective bargaining agreement as provided in section 393-19(b) first sentence. [L 1974, c 210, pt of §1]

[§393-13] Liability for payment of premium; withholding. Unless an applicable collective bargaining agreement specifies differently every employer shall contribute at least one-half of the premium for the coverage required by this chapter and the employee shall contribute the balance; provided that in no case shall the employee contribute more than 1.5 per cent of his wages; and provided that if the amount of the employee's contribution is less than one-half of the premium, the employer shall be liable for the whole remaining portion of the premium.

The employer shall withhold the employee's share from his wages with respect to pay periods as specified by the director. [L 1974, c 210, pt of §1]

[§393-14] Commencement of coverage. The employer shall provide the coverage required by this chapter for any regular employee, who has been in his employ for four consecutive weeks, at the earliest time thereafter at which coverage may be provided with the prepaid

health care plan contractor selected pursuant to this chapter. [L 1974, c 210, pt of §1]

[§393-15] **Continuation of coverage in case of inability to earn wages.** If an employee is hospitalized or otherwise prevented by sickness from working, the employer shall enable the employee to continue his coverage by contributing to the premium the amounts paid by the employer toward such premium prior to the employee's sickness for the period that such employee is hospitalized or prevented by sickness from working. This obligation shall not exceed a period of three months following the month during which the employee became hospitalized or disabled from working, or the period for which the employer has undertaken the payment of his regular wages in such case, whichever is longer. [L 1974, c 210, pt of §1]

[§393-16] **Liability of secondary employer.** An employer who has been notified by an employee, in the form prescribed by the director, that he is not the principal employer as defined in section 393-6 shall be relieved of the duty of providing the coverage required by this chapter until he is notified by the employee pursuant to section 393-18 that he has become the principal employer. He shall notify the director, in the form prescribed by the director, that he is relieved from the duty of providing coverage or of any change in that status. [L 1974, c 210, pt of §1]

[§393-17] **Exemption of certain employees.** (a) In addition to the exemption specified in section 393-16, an employer shall be relieved of his duty under section 393-11 with respect to any employee who has notified him, in the form specified by the director, that the employee is:

(1) Protected by health insurance or any prepaid health care plan established under any law of the United States;

(2) Covered as a dependent under a prepaid health care plan, entitling him to the health benefits required by this chapter;

(3) A recipient of public assistance or covered by a prepaid health care plan established under the laws of the State governing medical assistance.

(b) Employers receiving notice of a claim of exemption under this section shall notify the director of such claim in the form prescribed by the director. [L 1974, c 210, pt of §1]

[§393-18] **Termination of exemption.** (a) If an exemption which has been claimed by an employee pursuant to section 393-17 terminates because of any change in the circumstances entitling the employee to claim such exemption, the employee shall promptly notify the principal employer of the termination of the exemption and the employer thereupon shall provide coverage as required by this chapter.

(b) If because of a change in the employment situation of an employee or a redetermination by an employee as provided in section 393-6, a principal employer becomes a secondary employer or a secondary employer becomes the principal employer, the employee shall promptly notify the employers affected of such change and the new

principal employer shall provide coverage as required by this chapter. [L 1974, c 210, pt of §1]

[§393-19] **Freedom of collective bargaining.** (a) In addition to the policy stated in section 393-2, nothing in this chapter shall be construed to limit the freedom of employees to bargain collectively for different prepaid health care plan coverage or for a different allocation of the costs thereof. A collective bargaining agreement may provide that the employer himself undertakes to provide the health care specified in the agreement.

(b) If the employees rendering particular types of services are not covered by the health care provisions of the applicable collective bargaining agreements to which their employer is a party, the provisions of this chapter shall be applicable with respect to them. An employer or group of employers shall be deemed to have complied with the provisions of this chapter if they undertake to provide health care services pursuant to a collective bargaining agreement and the services are available to all other employees not covered by such agreement. [L 1974, c 210, pt of §1]

[§393-20] **Adjustment of employer-sponsored plans.** Where employees subject to the coverage of this chapter are included in the coverage provisions of an employer-sponsored prepaid health care plan covering similar employees employed outside the State and the majority of such employees are not subject to this chapter, the benefits applicable to the employees covered by this chapter shall be adjusted within one year after the effective date of this chapter so as to meet the requirements of this chapter. [L 1974, c 210, pt of §1]

[§393-21] **Individual waivers prohibited; additional withholding for dependents.** An employee may not waive individually all or part of the required health care benefits or agree to pay a greater share of the premium for such benefits than is required by this chapter.

Subject to section 393-7(b), an employee may consent to pay a greater share of his wages and to a withholding of such share by the employer for the purpose of providing prepaid health care benefits of his dependents under the plan providing such benefits for himself. [L 1974, c 210, pt of §1]

[§393-22] **Exemption of followers of certain teachings or beliefs.** This chapter shall not apply to any individual who pursuant to the teachings, faith, or belief of any group, depends for healing upon prayer or other spiritual means. [L 1974, c 210, pt of §1]

[§393-23] **Joint provision of coverage.** Employers may form associations for the purpose of jointly providing prepaid health care protection under this chapter for their employees with the contractors authorized to provide such coverage in the State. [L 1974, c 210, pt of §1]

PART III. ADMINISTRATION AND ENFORCEMENT

[§393-31] **Enforcement by the director.** Except as otherwise provided in section 393-7 the director shall administer and enforce this chapter. The director may appoint such assistants and such clerical, stenographic, and other help as may be necessary for the proper administration and enforcement of this chapter subject to any civil service act relating to state employees. [L 1974, c 210, pt of §1]

[§393-32] **Rule making and other powers of the director.** The director may adopt, amend, or repeal, pursuant to chapter 91, such rules and regulations as he deems necessary or suitable for the proper administration and enforcement of this chapter.

The director may round off the amounts specified in this chapter for the purpose of eliminating payments from the premium supplementation fund in other than even dollar amounts or other purposes.

The director may prescribe the filing of reports by prepaid health care plan contractors and prescribe the form and content of requests by employers for premium supplementation and the period for the payment thereof. [L 1974, c 210, pt of §1]

[§393-33] **Penalties.** (a) If an employer fails to comply with section 393-11, 393-12, 393-13, or 393-15 he shall pay a penalty of not less than $25 or of $1 for each employee for every day during which such failure continues, whichever sum is greater. The penalty shall be assessed under rules and regulations promulgated pursuant to chapter 91 and shall be collected by the director and paid into the special fund for premium supplementation established by section 393-41. The director may, for good cause shown, remit all or any part of the penalty.

(b) Any employer employee, or prepaid health care plan contractor who wilfully fails to comply with any other provision of this chapter or any rule or regulation thereunder may be fined not more than $200 for each such violation. [L 1974, c 210, pt of §1]

PART IV. PREMIUM SUPPLEMENTATION

[§393-41] **Establishment of special premium supplementation fund.** There is established in the treasury of the State, separate and apart from all public moneys or funds of the State, a special fund for premium supplementation which shall be administered exclusively for the purposes of this chapter. All premium supplementations payable under this part shall be paid from the fund. The fund shall consist of (1) all money appropriated by the State for the purposes of premium supplementation under this part and (2) all fines and penalties collected pursuant to this chapter. [L 1974, c 210, pt of §1]

[§393-42] **Management of the fund.** The director of finance shall be the treasurer and custodian of the premium supplementation fund and shall administer the fund in accordance with the directions of the director of labor and industrial relations. All moneys in the fund shall be held in trust for the purposes of this part only and shall not be expended, released, or appropriated or otherwise disposed of for any other purpose. Moneys in the fund may be deposited in any depositary bank in which general funds of the State may be deposited but such moneys shall not be commingled with other state funds and shall be maintained in separate accounts on the books of the depositary bank. Such moneys shall be secured by the depositary bank to the same extent and in the same manner as required by the general depositary law of the State; and collateral pledged for this purpose shall be kept separate and distinct from any other collateral pledged to secure other funds of the State. The director of finance shall be liable for the performance of his duties under this section as provided in chapter 37. [L 1974, c 210, pt of §1]

[§393-43] **Disbursements from the fund.** Expenditures of moneys in the premium supplementation fund shall not be subject to any provisions of law requiring specific appropriations or other formal release by the state officers of money in their custody. All payments from the fund shall be made upon warrants drawn upon the director of finance by the comptroller of the State supported by vouchers approved by the director. [L 1974, c 210, pt of §1]

[§393-44] **Investment of moneys.** With the approval of the department the director of finance may, from time to time, invest such moneys in the premium supplementation fund as are in excess of the amount deemed necessary for the payment of benefits for a reasonable future period. Such moneys may be invested in bonds of any political or municipal corporation or subdivision of the State, or any of the outstanding bonds of the State, or invested in bonds or interest-bearing notes or obligations of the State (including state director of finance's warrant notes issued pursuant to chapter 40), or of the United States, or those for which the faith and credit of the United States are pledged for the payment of principal and interest, or in federal land bank bonds or joint stock farm loan bonds. The investments shall at all times be so made that all the assets of the fund shall always be readily convertible into cash when needed for the payment of benefits. The director of finance shall dispose of securities or other properties belonging to the fund only under the direction of the director of labor and industrial relations. [L 1974, c 210, pt of §1]

[§393-45] **Entitlement to premium supplementation.** (a) An employer who employs less than eight employees entitled to coverage under this chapter and who provides coverage to such employees pursuant to section 393-7(a) shall be entitled to premium supplementation from the fund if the employer's share of the cost of providing such

coverage as determined by sections 393-13 and 393-15 exceeds 1.5 per cent of the total wages payable to such employees and if the amount of such excess is greater than five per cent of the employer's income before taxes directly attributable to the business in which such employees are employed.

(b) The amount of the supplementation shall be that part of the employer's share of the premium cost which exceeds the limits specified in subsection (a). [L 1974, c 210, pt of §1]

[§393-46] Income directly attributable to the business. (a) "Income directly attributable to the business" means gross profits from the business minus deductions for:

(1) Compensation of officers;
(2) Salaries and wages, except wages paid by an individual proprietor to himself;
(3) Repairs;
(4) Taxes on business and business property;
(5) Business advertising;
(6) Amounts contributed to employee benefit plans;
(7) Interest on business indebtedness;
(8) Rent on business property; and
(9) Other expenses necessary for the current conduct of business.

(b) Deductions shall not include:

(1) Bad debts;
(2) Contributions or gifts, other than those listed under subsection (a)(6);
(3) Amortization and depreciation; or
(4) Losses by fire, storm, casualty, or theft.

(c) The director may promulgate rules and regulations necessary to define income directly attributable to business for the purpose of section 393-45. [L 1974, c 210, pt of §1]

[§393-47] Claim of premium supplementation. An employer entitled to premium supplementation shall file a claim therefor in the manner provided by regulation of the director. The employer shall have the burden of proof of establishing his entitlement. [L 1974, c 210, pt of §1]

[PART V. TERMINATION OF CHAPTER]

[§393-51 Termination of chapter.] This chapter shall terminate upon the effective date of federal legislation that provides for voluntary prepaid health care for the people of Hawaii in manner at least as favorable as the health care provided by this chapter, or upon the effective date of federal legislation that provides for mandatory prepaid health care for the people of Hawaii. [L 1974, c 210, pt of §2]

§ 38-370b. Notice of cancellation of professional liability policy

Any insurance company doing business in this state shall provide a ninety-day notice to the insured of cancellation of or refusal to renew any professional liability policy.

§ 38-370c. Mandatory provisions for professional liability insurance policies issued on a claims-made basis

Every professional liability insurance policy issued on a claims-made basis delivered, issued for delivery or renewed in this state on or after October 1, 1978 shall contain (1) a provision for the purchase of prior acts coverage and (2) a contractual right of the insured to purchase at any time during the policy period or not later than thirty days after termination of such policy period coverage for all claims occurring during an insured policy period when made.

(1978, P.A. 78-91.)

CHAPTER 692

COMPREHENSIVE HEALTH CARE PLANS [NEW]

Sec.

38-371. Definitions.
38-372. Applicability of chapter. Individual and group comprehensive health care plans.
38-373. Minimum standard benefits of comprehensive health care plans. Optional and excludible benefits. Carrier subrogation rights.
38-374. Additional requirements and eligibility under group comprehensive health care plans. Insurance commissioner's authority to coordinate benefits.
38-375. Additional requirements for individual comprehensive health care plans. Carrier obligations concerning termination of coverage.
38-376. Health Reinsurance Association. Classes of risk. Audits. Insurance commissioner's powers.
38-377. Hospital and medical service corporations. Residual market mechanism. Insurance commissioner's powers concerning such mechanisms.
38-378. Insurance commissioners' powers concerning comprehensive health care plans. Notification to purchasers of policy or contract terms.
38-379. Application to new or renewed group health policies and contracts. Other regulations.
38-380. Commission on hospitals and health care.
38-381. Commissioner of social services. Contract authority concerning medicaid programs.

§ 38-371. Definitions

For purposes of this chapter, the following terms shall have the following meanings:

(a) "Health insurance" means hospital and medical expenses incurred policies written on a direct basis, nonprofit service plan contracts and self-insured or self-funded employee health benefit plans. The term "health insurance" for purposes of this chapter shall not include accident only policies, disability income policies or coverages which are subject to regulation under chapters 682a and 690.

(b) "Carrier" means an insurer, hospital service corporation or medical service corporation or fraternal benefit society.

(c) "Insurer" means an insurance company licensed to transact accident and health insurance business in this state.

(d) "Self-insurer" means an employer or an employee welfare benefit fund or plan which provides payment for or reimbursement of the whole or any part of the cost of covered hospital or medical expenses for covered individuals. For purposes of this chapter, "self-insurer" shall not include any such employee welfare benefit fund or plan established prior to April 1, 1976, by any organization which is exempt from federal income taxes under the provisions of Section 501 of the United States Internal Revenue Code and amendments thereto and legal interpretations thereof, except any such organization described in Subsection (c)(15) of said Section 501.

(e) "Commissioner" means the insurance commissioner within the department of business regulation of the state of Connecticut.

(f) "Physician" means a doctor of medicine, osteopathy, chiropractic, naturopathy, podiatry, a qualified psychologist and, for purposes of oral surgery only, a doctor of dental surgery or a doctor of medical dentistry, and subject to the provisions of section 20-138d, optometrists duly licensed under the provisions of chapter 380.

(g) "Qualified psychologist" means a person who is duly licensed or certified as a clinical psychologist and has a doctoral degree in and at least two years of supervised experience in clinical psychology in a licensed hospital or mental health center.

(h) "Skilled nursing facility" shall have the same meaning as "skilled nursing facility" as defined in Section 1395x, Chapter 7 of Title 42, United States Code.

(i) "Hospital" shall have the same meaning as "hospital" as defined in Section 1395x, Chapter 7 of Title 42, United States Code.

(j) "Home health agency" shall have the same meaning as "home health agency" as defined in Section 1395x, Chapter 7 of Title 42, United States Code.

(k) "Copayment" means the portion of a charge that is covered by a plan and not payable by the plan and which is thus the obligation of the covered individual to pay.

(l) "Resident employer" means any person, partnership, association, trust, estate, corporation, whether foreign or domestic, or the legal representative, trustee in bankruptcy or receiver or trustee, thereof, or the legal representative of a deceased person, including the state of Connecticut and each municipality thereof, which has in its employ one or more individuals during any calendar year, commencing January 1, 1976. For purposes of this chapter, the term "resident employer" shall refer only to an employer with a majority of employees employed within the state of Connecticut.

(m) "Eligible employee" means, with respect to any employer, an employee who either is considered a fulltime employee, or who is expected to work at least twenty hours a week for at least twenty-six weeks during the next twelve months or who has actually worked at least twenty hours a week for at least twenty-six weeks in any continuous twelve month period.

(n) "Alcoholism treatment facility" shall have the same meaning as in section 38-262b.

(o) "Totally disabled" means with respect to an employee, the inability of the employee because of an injury or disease to perform the duties of any occupation for which he is suited by reason of education, training or experience, and, with respect to a dependent, the inability of the dependent because of an injury or disease to engage in substantially all of the normal activities of persons of like age and sex in good health.

(p) "Deductible" means the amount of covered expenses which must be accumulated during each calendar year before benefits become payable as additional covered expenses incurred.

(q) For purposes of this chapter, "disease or injury" shall include pregnancy and resulting childbirth or miscarriage.

(r) "Complications of pregnancy" means (1) conditions requiring hospital stays, when the pregnancy is not terminated, whose diagnoses are distinct from pregnancy but are adversely affected by pregnancy or are caused by pregnancy, such as acute nephritis, nephrosis, cardiac decompensation, missed abortion and similar medical and surgical conditions of comparable severity, and shall not include false labor, occasional spotting, physician-prescribed rest during the period of pregnancy, morning sickness, hyperemesis gravidarum, pre-eclampsia and similar conditions associated with management of a difficult pregnancy not constituting a nosologically distinct complication of pregnancy; and (2) non-elective cesarean section, ectopic pregnancy which is terminated, and spontaneous termination of pregnancy, which occurs during a period of gestation in which a viable birth is not possible.
(1975, P.A. 75-616, § 1, eff. April 1, 1976; 1976, P.A. 76-399, § 2, eff. June 9, 1976; 1977, P.A. 77-614, § 163, eff. Jan. 1, 1979.)

1976 Amendment

Introductory paragraph: 1976, P.A. 76-399, § 2, substituted "sections 38-371 to 38-381" for "this act".

Subsection (a): 1976, P.A. 76-399, § 2, substituted, in the second sentence, "sections 38-371 to 38-381" for "this act".

Subsection (d): 1976, P.A. 76-399, § 2, amended the second sentence by substituting "sections 38-371 to 38-381" for "this act"; and by substituting "June 9, 1976" for "the effective date of this act".

Subsection (f): 1976, P.A. 76-399, § 2, substituted, in the second sentence, "sections 38-371 to 38-381" for "this act".

Subsections (o) to (r): Added by 1976, P.A. 76-399, § 2.

1977 Amendment

1977, P.A. 77-614, § 163, eff. Jan. 1, 1979, provides for insertion of the words "within the department of business regulation" following "insurance commissioner".

Words and Phrases (Perm.Ed.)

§ 38-372. Applicability of chapter. Individual and group comprehensive health care plans

(a)(1) Every carrier offering individual health insurance in this state shall, as a condition of transacting such health insurance, make an individual comprehensive health care plan, described in section 38-375, available to every resident of this state who is not eligible for Medicare. An individual shall have a choice of the low option or middle option or high option deductible described in subsection (b) of section 38-373. Individual comprehensive health care plans may be made available through participation in the Health Reinsurance Association in accordance with section 38-376, or a residual market association, in accordance with section 38-377. The premium charged for such a plan which is not insured by or through the Health Reinsurance Association or any other residual market association may not exceed the premium which would be applicable through participation in such associations. The premium charged for such a plan insured by or through the Health Reinsurance Association shall be precisely the premium established for that particular classification under the Health Reinsurance Association.

(2) Every self-insurer whose plan covers three or more employees shall make an individual comprehensive health care plan, described in section 38-375, available under a conversion privilege to every person covered by the plan who is a resident of this state, who is not eligible for Medicare and whose coverage under the self-insured plan ceases as a result of layoff, death or termination of employment. An individual shall have the choice of the low option or middle option or high option deductible described in subsection

(b) of section 38-373. The individual comprehensive health care plans may be provided through a carrier or through participation in the Health Reinsurance Association in accordance with section 38-376. The premium charged for such a plan which is not insured by or through the Health Reinsurance Association may not exceed the premium established for that particular classification under the Health Reinsurance Association. The premium charged for such a plan which is insured by or through the Health Reinsurance Association shall be precisely the premium established for that particular classification under the Health Reinsurance Association.

(b) Every carrier offering group health insurance in this state shall, as a condition of transacting such health insurance, make a group comprehensive health care plan, as described in section 38-374, available to every resident employer of three or more eligible employees. An employer shall have the choice of the low option or middle option or high option deductible described in subsection (b) of section 38-373. Group comprehensive health care plans may be made available to resident employers of between three and twenty-five eligible employees through participation in the Health Reinsurance Association, in accordance with section 38-376 or the residual market association, in accordance with section 38-377. The premium charged for such a plan on groups of between three and twenty-five eligible employees which is not insured by or through the Health Reinsurance Association or a residual market association may not exceed the premium which would be applicable through participation in such associations. The premium charged for such a plan which is insured by or through the Health Reinsurance Association must be precisely the premium established for that particular classification under the Health Reinsurance Association.

(c) Except as provided in subdivision (c) of section 38-378, nothing in sections 38-371 to 38-381 shall preclude the right of carriers to transact other kinds of insurance for which they are authorized, nor preclude the right of carriers to transact any other lawful kind of health insurance.

(d) Nothing in sections 38-371 to 38-381 shall require a carrier to make available coverage under a group or individual comprehensive health care plan to any person or group who is already covered under such a plan.

C.J.S. Insurance §§ 753 et seq., 893, 896.

§ 38-373. Minimum standard benefits of comprehensive health care plans. Optional and excludible benefits. Carrier subrogation rights

All individual and all group comprehensive health care plans shall include minimum standard benefits as described in this section.

(a) Except as provided in subsections (b) and (c), minimum standard benefits shall be benefits, including coverage for catastrophic illness, with a lifetime maximum of one million dollars per individual, for reasonable charges or, when applicable, the allowance agreed upon between a provider and a carrier for charges actually incurred, for the following health care services, rendered to an individual covered by such plan for the diagnosis or treatment of nonoccupational disease or injury: (1) Hospital services; (2) professional services which are rendered by a physician or, at his direction, by a registered nurse, other than services for mental or dental conditions; (3) the diagnosis or treatment of mental conditions, as defined by the commissioner, rendered during the year by one or more physicians on other than an inpatient basis or, at their direction, by their staffs of registered nurses, up to a yearly maximum benefit of one thousand dollars; (4) legend drugs requiring a physician's prescription; (5) services of a skilled nursing fa-

cility for not more than one hundred twenty days in a calendar year, provided such services commence within fourteen days following a confinement of at least three consecutive days in a hospital for the same condition; (6) home health agency services, as defined by the commissioner, up to a maximum of one hundred eighty visits in a calendar year, provided such services commence within seven days following confinement in a hospital or skilled nursing facility of at least three consecutive days for the same condition, provided further, in the case of an individual diagnosed by a physician as terminally ill with a prognosis of six months or less to live, such home health agency services may commence irrespective of whether such covered person was so confined or, if such covered person was so confined, irrespective of such seven-day period, and the yearly benefit for medical social services, as hereinafter defined, shall not exceed two hundred dollars. "Medical social services" means services rendered, under the direction of a physician by a qualified social worker holding a master's degree from an accredited school of social work, including but not limited to (a) assessment of the social, psychological and family problems related to or arising out of such covered person's illness and treatment; (b) appropriate action and utilization of community resources to assist in resolving such problems; (c) participation in the development of treatment for such covered person; (7) use of radium or other radioactive materials; (8) oxygen; (9) anesthetics; (10) non-dental prosthesis; (11) rental of durable medical equipment which has no personal use in the absence of the condition for which prescribed; (12) diagnostic x-rays and laboratory tests as defined by the commissioner; (13) oral surgery for: (A) Excision of partially or completely unerupted impacted teeth, or (B) excision of a tooth root without the extraction of the entire tooth; (14) services of a licensed physical therapist, rendered under the direction of a physician; (15) transportation by a local professional ambulance to the nearest health care institution qualified to treat the illness or injury; (16) certain other services which are medically necessary in the treatment or diagnosis of an illness or injury as may be designated or approved by the insurance commissioner within the department of business regulation; (17) confinement in a facility established primarily for the treatment of alcoholism and licensed for such care by the state, or in a part of a hospital used primarily for such treatment, shall be a covered expense for a period of at least forty-five days within any calendar year.

(b) Minimum standard benefits may include one or more of the following provisions: (1) Subject to the provisions of subdivision (3) such plan may require deductibles. The "low option deductible" shall be two hundred dollars per person, the "middle option deductible" shall be five hundred dollars per person, and the "high option deductible" shall be seven hundred fifty dollars per person. The amount of the deductible may not be greater when a service is rendered on an outpatient basis than when that service is offered on an inpatient basis. Expenses incurred during the last three months of a calendar year and actually applied to an individual's deductible for that year shall be applied to that individual's deductible in the following calendar year. The two hundred dollar maximum, the five hundred dollar maximum and the seven hundred fifty dollar maximum may be adjusted yearly to correspond with the change in the medical care component of the consumer price index, as adjusted by the commissioner. The base year for such computation shall be the first full year of operation of such plan. (2) Subject to the provisions of subdivision (3), such plan shall require a maximum copayment of twenty per cent for charges for all types of health care in excess of the deductible and fifty per cent for services listed in subdivision (3) of subsection (a) in excess of the deductible. (3) The sum of the deductible and copayments required in any calendar year under any option may not exceed a maximum limit of one thousand dollars per covered individual, or two thousand dollars per covered family; provided, covered expenses incurred after the applicable maximum limit has been

reached shall be paid at the rate of one hundred per cent, except that expenses incurred for treatment of mental and nervous conditions may be paid at the rate of fifty per cent as specified in subdivision (3) of subsection (a). The one thousand dollar and two thousand dollar maximums shall be adjusted yearly to correspond with the change in the medical care component of the consumer price index as adjusted by the commissioner. (4) The plan shall limit benefits with respect to each pregnancy, other than a pregnancy involving complications of pregnancy, to a maximum of two hundred fifty dollars. (5) The plan may limit lifetime benefits to a maximum of not less than one million dollars per covered individual. (6) No pre-existing condition exclusion shall exclude coverage of any pre-existing condition unless: (A) The condition first manifested itself within the period of six months immediately prior to the effective date of coverage in such a manner as would cause a reasonably prudent person to seek diagnosis, care or treatment; (B) medical advice or treatment was recommended or received within the period of six months immediately prior to the effective date of coverage, or (C) the condition is pregnancy existing on the effective date of coverage. No policy shall exclude coverage for a loss due to pre-existing conditions for a period greater than twelve months following the effective date of coverage. Any individual comprehensive health care plan issued as a result of conversion from group health insurance or from a self insured group shall credit the time covered under such group health insurance toward any such exclusion.

(c) Plans providing minimum standard benefits need not provide benefits for the following: (1) Any charge for any care for any injury or disease either (A) arising out of and in the course of an employment subject to a workmen's compensation or similar law or (B) to the extent benefits are payable without regard to fault under a coverage statutorily required to be contained in any motor vehicle or other liability insurance policy or equivalent self-insurance; (2) any charge for treatment for cosmetic purposes other than surgery for the prompt repair of an accidental injury sustained while covered; (3) any charge for travel, other than transportation by local professional ambulance to the nearest health care institution qualified to treat the illness or injury; (4) any charge for private room accommodations to the extent it is in excess of the institution's most common charge for a semiprivate room; (5) any charge by health care institutions to the extent that it is determined by the carrier that the charge exceeds the rates approved by the commission on hospital and health care; (6) any charge for services or articles to the extent that it exceeds the reasonable charge in the locality for the service; (7) any charge for services or articles which are determined not to be medically necessary; (8) any charge for services or articles the provisions of which is not within the scope of the license or certificate of the institution or individual rendering such services or articles; (9) any charge for services or articles furnished, paid for or reimbursed directly by or under any law of a government, except as otherwise provided herein; (10) any charge for services or articles for custodial care or designed primarily to assist an individual in meeting his activities of daily living; (11) any charge for services which would not have been made if no insurance existed or for which the covered individual is not legally obligated to pay; (12) any charge for eyeglasses, contact lenses or hearing aids or the fitting thereof; (13) any charge for dental care not specifically covered by this chapter; and (14) any charge for services of a registered nurse who ordinarily resides in the covered individual's home, or who is a member of the covered individual's family or the family of the covered individual's spouse.

(d) Whenever a covered individual who receives benefits for an injury has a right of recovery against any person or organization, a carrier that has paid such benefits to or for the insured person shall be subrogated to all such rights of recovery to the extent of its payments.

(e) The minimum standard benefits of any individual or group comprehensive health care plan may be satisfied by catastrophic coverage offered in conjunction with basic hospital or medical-surgical plans on an expense incurred or service basis as approved by the commissioner as providing at least equivalent benefits.

(1975, P.A. 75-610, § 3, eff. April 1, 1976; 1976, P.A. 76-399, § 3, eff. June 9, 1976; 1977, P.A. 77-614, § 163, eff. Jan. 1, 1979; 1978, P.A. 78-76, § 4.)

1976 Amendment

Subsection (a): 1976, P.A. 76-399, § 3, added subd. (17).

Subsection (b): 1976, P.A. 76-399, § 3, redesignated former subds. (4) and (5) as subds. (5) and (6); inserted subd. (4); and added to subd. (6), par. (C).

Subsection (c): 1976, P.A. 76-399, § 3, substituted, in subd. (13), "sections 38-371 to 38-381" for "this act" following "not specifically covered by".

1977 Amendment

1977, P.A. 77-614, § 163, eff. Jan. 1, 1979, provides for insertion of the words "within the department of business regulation" following "insurance commissioner".

1978 Amendment

1978, P.A. 78-76, § 4, amended subsec. (a)(6) by adding the proviso following "days for the same condition", and by adding a second sentence defining "Medical social services".

C.J.S. Insurance § 893 et seq.

§ 38-374. Additional requirements and eligibility under group comprehensive health care plans. Insurance commissioner's authority to coordinate benefits

A group comprehensive health care plan shall contain the minimum standard benefits prescribed in section 38-373, including the choice of the low option, middle option or high option deductible, and shall also conform in substance to the requirements of this section.

(a) The plan shall be one under which the individuals eligible to be covered include: (1) Each eligible employee; (2) the spouse of each eligible employee; and (3) dependent unmarried children, who are under the age of nineteen or are full-time students under the age of twenty-three at an accredited institution of higher learning.

(b) The plan shall provide the option to continue coverage under each of the following circumstances until eligible for other group insurance: (1) Upon layoff or leave of absence, or termination of employment, other than as a result of death of the employee, continuation of coverage for such employee and his covered dependents to the end of the thirty-ninth week following the day on which the employee lost eligibility to participate in the group; (2) upon the death of the employee, continuation of coverage for the covered dependents of such employee to the end of the thirty-ninth week following the day on which the employee lost eligibility to participate in the group; (3) during an employee's absence due to illness or injury, continuation of coverage for such employee and his covered dependents during continuance of such illness or injury or for up to twelve months from the beginning of such absence; (4) upon termination of the group plan, coverage for covered individuals who were totally disabled on the date of termination, shall be continued without premium payment during the continuance of such disability for a period of twelve calendar months following the calendar month in which the plan was terminated, provided claim is submitted therefor within one year of the termination of the plan; (5) the coverage of any covered individual shall terminate: (A) As to a child, at the end of the month following the month in which the child marries, ceases to be dependent on the employee or attains the age of nineteen, whichever occurs first, except that if the child is a fulltime student at an accredited institution, the coverage may be continued while the child remains unmarried and a fulltime student, but not beyond the month following the month in which the child attains the age of twenty-three. If on the date

specified for termination of coverage on a dependent child, the child is unmarried and incapable of self-sustaining employment by reason of mental retardation or physical handicap and chiefly dependent upon the employee for support and maintenance, the coverage on such child shall continue while the plan remains in force and the child remains in such condition, provided proof of such handicap is received by the carrier within thirty-one days of the date on which the child's coverage would have terminated in the absence of such incapacity. The carrier may require subsequent proof of the child's continued incapacity and dependency but not more often than once a year thereafter; (B) as to the employee's spouse, at the end of the month following the month in which a divorce, annulment or legal separation is obtained; and (C) as to the employee or dependent as of midnight of the day preceding such person's eligibility for benefits under Title XVIII of the Social Security Act; (6) any continuation of coverage required by this section except subdivision (4) of subsection (b) may be subject to the requirement, on the part of the individual whose coverage is to be continued, that such individual contribute that portion of the premium he would have been required to contribute had the employee remained an active covered employee, except that the individual may be required to pay the entire premium at the group rate if coverage is continued in accordance with subdivision (1) of subsection (b) above, provided the employer shall not be legally obligated by this act to pay such premium if not paid timely by the employee.

(c) The commissioner shall promulgate regulations concerning coordination of benefits between the plan and other health insurance plans.

(d) The plan shall make available to Connecticut residents, in addition to any other conversion privilege available, a conversion privilege under which coverage shall be available immediately upon termination of coverage under the group plan. The terms and benefits offered under the conversion benefits shall be at least equal to the terms and benefits of an individual comprehensive health care plan.

(1975, P.A. 75-610, § 4, eff. April 1, 1976; 1976, P.A. 76-399, § 1, eff. June 9, 1976.)

1976 Amendment

Introductory paragraph: 1976, P.A. 76-399, § 1, substituted "section 38-373" for "section 3 of this act".

Subsection (b): 1976, P.A. 76-399, § 1, substituted "thirty-ninth week following the day on which the employee lost eligibility to participate in the group" for "ninetieth day following the day on which such layoff, leave of absence or termination commenced" in subd. (1) and for "ninetieth day following the day on which death occurred" in subd. (2).

Insurance ⇐467.5.

C.J.S. Insurance § 893 et seq.

§ 38-375. Additional requirements for individual comprehensive health care plans. Carrier obligations concerning termination of coverage

An individual comprehensive health care plan shall contain the minimum standard benefits prescribed in section 38-373, including the choice of the low option, middle option or high option deductible, and shall also conform in substance to the requirements of this section. Each individual comprehensive health care plan shall contain provisions:

(1) Which obligate the carrier to continue the contract until the earlier of

(A) the date on which the individual in whose name the contract was issued first becomes eligible for coverage under Title XVIII of the Social Security Act or under a group comprehensive health care plan or,

(B) the plan anniversary date at least sixty days prior to which the carrier has mailed to the individual at his last address shown on the carrier's records written notice of its decision not to continue coverage on a class basis only.

The carrier may reserve the right to adjust premiums by classes in accordance with its experience for policies or contracts not written by or through the Health Reinsurance Association, provided such premium may not exceed the premium established for that particular class by the Health Reinsurance Association;

(2) which, upon the death of the individual in whose name the contract was issued, permits every other individual then covered under the contract to elect, within such period as shall be specified in the contract, to continue the same coverage until such time as he would have ceased to be entitled to coverage had the individual in whose name the contract was issued lived; and

(3) under which the benefits payable shall be excess to all other sources of health insurance benefits, including benefits provided pursuant to any state or federal law other than Medicaid.

Insurance ⇐467.4.

C.J.S. Insurance §§ 893, 896.

§ 38-376. Health Reinsurance Association. Classes of risk. Audits. Insurance commissioner's powers

There is hereby created a nonprofit legal entity to be known as the Health Reinsurance Association. All insurers and self insurers doing business in the state, as a condition to their authority to transact the applicable kinds of health insurance defined in section 38-371, shall be members of the association. The association shall perform its functions under a plan of operation established and approved under subdivision (a), and shall exercise its powers through a board of directors established under this section.

(a)(1) The board of directors of the association shall be made up of seven individuals selected by participating members, subject to approval by the commissioner. To select the initial board of directors, and to initially organize the association, the commissioner shall give notice to all members of the time and place of the organizational meeting. In determining voting rights at the organizational meeting each member shall be entitled to vote in person or proxy. The vote shall be a weighted vote based upon the net health insurance premium derived from this state in the previous calendar year. If the board of directors is not selected within sixty days after notice of the organizational meeting, the commissioner may appoint the initial board. In approving or selecting members of the board, the commissioner may consider, among other things, whether all members are fairly represented. Members of the board may be reimbursed from the monies of the association for expenses incurred by them as members, but shall not otherwise be compensated by the association for their services.

(2) The board shall submit to the commissioner, a plan of operation for the association necessary or suitable to assure the fair, reasonable and equitable administration of the association. The plan of operation shall become effective upon approval in writing by the commissioner consistent with the date on which the coverage under this act must be made available. The commissioner shall, after notice and hearing, approve the plan of operation provided such plan is determined to be suitable to assure the fair, reasonable and equitable administration of the association, and provides for the sharing of association gains or losses on an equitable proportionate basis. If the board fails to submit a suitable plan of operation within one hundred eighty days after its appointment, or if at any time thereafter the board fails to submit suitable amendments to the plan, the commissioner shall, after notice and hearing, adopt and promulgate such reasonable rules as are necessary or advisable to effectuate the provisions of this section. Such rules shall continue in force until modified by the commissioner or superseded by a plan submitted by the board and approved by the commissioner. The plan of operation shall, in addition to requirements enumerated in sections 38-371 to 38-381:

(A) Establish procedures for the handling and accounting of assets and monies of the association;

(B) establish regular times and places for meetings of the board of directors;

(C) establish procedures for records to be kept of all financial transactions, and for the annual fiscal reporting to the commissioner;

(D) establish procedures whereby selections for the board of directors shall be made and submitted to the commissioner;

(E) establish procedures to amend, subject to the approval of the commissioner, the plan of operations;

(F) establish procedures for the selection of an administering carrier and set forth the powers and duties of the administering carrier;

(G) contain additional provisions necessary or proper for the execution of the powers and duties of the association; and

(H) establish procedures for the advertisement on behalf of all participating carriers of the general availability of the comprehensive coverage under sections 38-371 to 38-381.

(b) The association shall have the general powers and authority granted under the laws of this state to carriers to transact the kinds of insurance defined under section 38-371, and in addition thereto, the specific authority to:

(1) Enter into contracts necessary or proper to carry out the provisions and purposes of sections 38-371 to 38-381;

(2) sue or be sued, including taking any legal actions necessary or proper for recovery of any assessments for, on behalf of, or against participating members;

(3) take such legal action necessary to avoid the payment of improper claims against the association or the coverage provided by or through the association;

(4) establish, with respect to health insurance provided by or on behalf of the association, appropriate rates, scales of rates, rate classifications and rating adjustments, such rates not to be unreasonable in relation to the coverage provided and the operational expenses of the association;

(5) Administer any type of reinsurance program, for or on behalf of participating members;

(6) Pool risks among participating members;

(7) Issue policies of insurance on an indemnity or provision of service basis providing the coverage required by sections 38-371 to 38-381 in its own name or on behalf of participating members;

(8) Administer separate pools, separate accounts or other plans as deemed appropriate for separate members or groups of members;

(9) Operate and administer any combination of plans, pools, reinsurance arrangements or other mechanisms as deemed appropriate to best accomplish the fair and equitable operation of the association;

(10) Set limits on the amounts of reinsurance which may be ceded to the association by its members; and

(11) Appoint from among participating members appropriate legal, actuarial and other committees as necessary to provide technical assistance in the operation of the association, policy and other contract design, and any other function within the authority of the association.

(c) Every member shall participate in the association in accordance with the provisions of this subdivision.

(1) A participating member shall determine the particular risks it elects to have written by or through the association. A member shall designate which of the following classes of risks it shall underwrite in the state, from which classes of risk it may elect to reinsure selected risks:

(A) Individual, excluding group conversion;

(B) Individual, including group conversion; and

(C) groups of between three and twenty-five employees or members.

(2) No member or employer shall be permitted to select out individual lives from an employer group to be insured by or through the association. Members electing to administer risks which are insured by or through the association shall comply with the benefit determination guidelines and the accounting procedures established by the association. A risk insured by or through the association cannot be withdrawn by the participating member except in accordance with the rules established by the association.

(3) Rates for coverage issued by or through the association shall not be excessive, inadequate or unfairly discriminatory. Separate scales of premium rates based on age shall apply for individual risks and group risks. Group rates may be adjusted for area variations in provider costs but individual rates shall not be adjusted for area variations in provider costs. Premium rates shall take into consideration the substantial extra morbidity and administrative expenses for association risks, reimbursement or reasonable expenses incurred for the writing of association risks and the level of rates charged by insurers for groups of such lives. In no event shall the rate for a given classification or group be less than one hundred twenty-five per cent nor more than one hundred fifty per cent of the average group rate charged for that classification or group with similar characteristics under a policy covering ten lives. All rates shall be promulgated by the association through an actuarial committee consisting of five persons who are members of the American Academy of Actuaries, and shall be filed with the commissioner and may be disapproved within sixty days from the filing thereof if excessive, inadequate, or unfairly discriminatory.

(d)(1) Following the close of each fiscal year, the administering carrier shall determine the net premiums, reinsurance premiums less administrative expense allowance, the expense of administration pertaining to the reinsurance operations of the association and the incurred losses for the year. Any net loss shall be assessed to all participating members in proportion to their respective shares of the total health insurance premiums earned in this state during the calendar year or with paid losses in the year, coinciding with or ending during the fiscal year of the association or on any other equitable basis as may be provided in the plan of operations. For self insured members of the association, health insurance premiums earned shall be established by dividing the amount of paid health losses for the applicable period by eighty-five per cent. Net gains, if any, shall be held at interest to offset future losses or allocated to reduce future premiums.

(2) Any net loss to the association represented by the excess of its actual expenses of administering policies issued by the association over the applicable expense allowance shall be separately assessed to those participating members who do not elect to administer their plans. All assessments shall be on an equitable formula established by the board.

(3) The association shall conduct periodic audits to assure the general accuracy of the financial data submitted to the association and the association shall have an annual audit of its operations by an independent certified public accountant. The annual audit shall be filed with the commissioner for his review and the association shall be subject to the provisions of section 38-7.

(e) All policy forms issued by or through the association shall conform in substances to prototype forms developed by the association, shall in all

other respects conform to the requirements of this act, and shall be approved by the commissioner. The commissioner may disapprove any such form if it contains a provision or provisions which are unfair or deceptive or which encourage misrepresentation of the policy.

(f) The association shall not issue nor reissue comprehensive health care plan coverage with respect to any person who is already covered under an individual or group comprehensive health care plan, or who is eligible for Medicare or who is not a resident of this state.

(g) Benefits payable under a comprehensive health care plan insured by or reinsured through the association shall be paid net of all other health insurance benefits paid or payable through any other source, and net of all health insurance coverages provided by or pursuant to any other state or federal law including Title XVIII of the Social Security Act, Medicare, but excluding Medicaid.

(h) There shall be no liability on the part of and no cause of action of any nature shall arise against any carrier or its agents or its employees, the Health Reinsurance Association or its agents or its employees or the residual market mechanism established under the provisions of section 38-377 or its agents or its employees, or the commissioner or his representatives for any action taken by them in the performance of their duties under sections 38-371 to 38-381. This provision shall not apply to the obligations of a carrier, a self-insurer, the Health Reinsurance Association or the residual market mechanism for payment of benefits provided under a comprehensive health care plan.

(1975, P.A. 75-616, § 6, eff. April 1, 1976.)

Insurance ⇐467.4.

C.J.S. Insurance §§ 893, 896.

§ 38-377. Hospital and medical service corporations. Residual market mechanism. Insurance commissioner's powers concerning such mechanisms

(a) Hospital and medical service corporations may elect to meet the obligations of section 38-372 by participating in the Health Reinsurance Association established in section 38-376, as a full member thereof, or by making comprehensive health care plans available directly through a subscriber contract or combination of contracts or by forming a separate residual market mechanism substantially similar to the association established in section 38-376.

(b) In the event that hospital and medical service corporations choose to form a separate residual market mechanism, the commissioner shall have the same regulatory powers over that residual market mechanism as he has over the Health Reinsurance Association, and such residual market mechanism shall have the same powers and duties as the association. Rating classifications under a residual market mechanism established under this section need not be the same as classifications established under the association, but any rates established by the residual market mechanism shall be approved by the commissioner. The commissioner shall promulgate regulations to carry out the requirements of this section.

(c) If the hospital and medical service corporations do not elect to participate in the Health Reinsurance Association, such hospital and medical service corporations shall be required to make an individual comprehensive health care plan available to every resident of this state who is not eligible for Medicare and whose coverage under a group or individual contract issued by such hospital or medical service corporation has terminated. Such coverage may be made available through a separate residual market mechanism established under this section.

(1975, P.A. 75-616, § 7, eff. April 1, 1976; 1976, P.A. 76-435, § 23, eff. June 9, 1976.)

1976 Amendment
Subsection (c): 1976, P.A. 76-435, § 28. substituted, in the first sentence, "or individual" for "on" following "whose coverage under a group".

§ 38-378. Insurance commissioner's powers concerning comprehensive health care plans. Notification to purchasers of policy or contract terms

In order to provide reasonable standardization of terms and coverages of individual accident and sickness insurance policies and contracts, to facilitate public understanding and comparison, to eliminate provisions which may be misleading or unreasonably confusing in connection with either the purchase of such coverage or with the settlement of claims and to provide for full disclosure in the sale of such coverages:

(a) The commissioner shall issue regulations to establish specific standards for policy provisions used in individual health insurance policies or contracts, but not including group conversion policies or contracts, which shall be in addition to and in accordance with chapter 681 and other applicable laws of this state which may cover the terms of renewability, initial and subsequent conditions of eligibility, nonduplication of coverage provisions, coverage of dependents, termination of insurance, probationary periods, limitations, exceptions, reductions, elimination periods, requirements for replacements, recurrent conditions, pre-existing conditions, and the definition of the terms hospital, accident, sickness, injury, physician, accidental means, total disability, permanent disability, partial disability, nervous disorders, guaranteed renewable, and noncancellable.

(b) The commissioner shall adopt regulations, in accordance with chapter 54, that specify prohibited policy provisions not otherwise specifically authorized by statute which in the opinion of the commissioner are unjust, unfair or unfairly discriminatory to the policyholder, any person insured under the policy, or any beneficiary.

(c) The commissioner shall adopt regulations, in accordance with chapter 54, to establish minimum standards for benefits under each of the following categories of coverage in individual policies, other than conversion policies issued pursuant to a contractual conversion privilege under a group policy: Basic hospital expense coverage, basic medical-surgical expense coverage, hospital confinement indemnity coverage, major medical expense coverage, disability income protection coverage, accident only coverage and specified accident coverage. Specified disease policies, riders and benefits shall be prohibited whether issued on a group or individual basis.

(d) Nothing in this section shall prevent the issuance of any policy which combines two or more of the categories of coverage enumerated in subsection (c), except that specified accident coverage shall not be combined with any other category of coverage. The commissioner shall prescribe the method of identification of policies based upon coverage provided.

(e) No policy shall be delivered or issued for delivery in this state which does not meet the prescribed minimum standards for the categories of coverage listed in subsection (c), provided nothing in this section shall preclude the issuance or delivery of any policy which does not meet such prescribed minimum standards of coverage so long as such policy is clearly identified as not meeting such prescribed standards.

(f) No such policy or contract shall be delivered in this state unless: (1) An outline of coverage described herein accompanies the policy or (2) the outline of coverage described in this section is delivered to the applicant at the time application is made and acknowledgement of receipt of certificate of delivery of such outline is provided the carrier with the application. In the event the policy or contract is issued on a basis other than that applied for, the outline of coverage properly describing the policy shall accompany the policy when it is delivered. The outline of coverage shall include:

(A) A statement identifying the applicable category or categories of coverage provided by the policy in accordance with this section; (B) a description of the principal benefits and coverage provided in the policy; (C) a statement of the exceptions, reductions and limitations contained in the policy or contract; (D) a statement of the renewal provisions including any reservation by the carrier of a right to change premiums; and (E) a statement that the outline is a summary of the policy issued or applied for and that the policy should be consulted to determine governing contractual provisions.

(g) Notwithstanding the provisions of chapter 681, if a carrier elects to use a simplified application form, with or without any questions as to the applicant's health at the time of application, but without any questions concerning the insured's health history or medical treatment history, the policy shall cover loss developing after twelve months from any pre-existing condition not specifically excluded from coverage by the terms of the policy and, except as so provided, the policy shall not include wording that would permit a defense based upon pre-existing conditions.

(h) Regulations promulgated pursuant to this section shall specify an effective date applicable to policy and benefit riders delivered or issued for delivery in this state on and after such effective date which shall not be less than one hundred eighty days after the date of adoption or promulgation. (1975, P.A. 75-616, § 8, eff. April 1, 1976; 1976, P.A. 76-309, § 4, eff. June 9, 1976.)

1976 Amendment
Subsection (c): 1976, P.A. 76-309, § 4, amended the second sentence by inserting ", riders and benefits" following "Specified disease policies", and by adding "whether issued on a group or individual basis" at the end.

§ 38-379. Application to new or renewed group health policies and contracts. Other regulations

(a) In order to assure reasonable continuation of coverage and extension of benefits to the citizens of this state, all group health policies or contracts delivered or issued for delivery or renewal in this state on or after April 1, 1976 shall, subject to the provisions of subsection (c), contain those provisions described in subsections (b) and (d) of section 38-374.

(b) The commissioner shall, within one hundred eighty days after April 1, 1976, adopt regulations in accordance with the provisions of chapter 54, covering group coverage discontinuance and replacement.

(c) Nothing in this section shall alter or impair existing group policies or contracts which have been established pursuant to an agreement which resulted from collective bargaining, and the provisions required by this section shall become effective upon the next regular renewal and completion of such collective bargaining agreement.
(1975, P.A. 75-616, § 9, eff. April 1, 1976.)

§ 38-380. Commission on hospitals and health care

In addition to the powers and duties already granted to it by law, the commission on hospitals and health care shall, within one year of April 1, 1976, adopt regulations designed to allow state professional standard review organizations established under U.S. Public Law 92-603 to extend their review of certain inpatient services to services received by all patients. Such regulations shall be adopted in accordance with the provisions of chapter 54.[1]
(1975, P.A. 75-616, § 10, eff. April 1, 1976; 1977, P.A. 77-118.)

[1] Section 4-166 et seq.

1977 Amendment
1977, P.A. 77-118 substituted "allow" for "require" following "adopt regulations designed to", and substituted the reference to U.S. Public Law "92-603" for "92-408".

§ 38-381. Commissioner of income maintenance. Contract authority concerning medicaid programs

The commissioner of income maintenance may enter into contractual agreements with any carrier or with the Health Reinsurance Association or a residual market mechanism to obtain appropriate administrative services, insurance benefits or any other insurance related services in connection with the state's medicaid program. All terms and provisions of any such contracts shall be mutually acceptable to the parties involved.

(1975, P.A. 75-616, § 11, eff. April 1, 1976; 1977, P.A. 77-614, §§ 521, 608, eff. Jan. 1, 1979; 1977, P.A. 77-614, § 587, eff. June 2, 1977; 1978, P.A. 78-303, § 85, eff. June 6, 1978.)

1977 Amendments

1977, P.A. 77-614, § 608, eff. Jan. 1, 1979, provided for change of term from "welfare commissioner" to "commissioner of income maintenance".

1977, P.A. 77-614, § 587, eff. June 2, 1977 as amended by 1978, P.A. 78-303, § 85, eff. June 6, 1978, authorized technical, grammatical, and punctuation changes with reference to 1977, P.A. 77-614 and the public acts of 1977 and 1978. For text of these provisions, see notes under § 2-56.

FISCAL NOTE

PERSONAL SERVICES

The law in Connecticut on which this bill is based was implemented with no additional staff. Most of the substantive work was performed by the industry. One new position with clerical support may be justified, however, for drafting the regulations, reviewing the organization of the Health Reinsurance Association and approving the rates and policy forms developed by the carriers for the comprehensive health plan.

Market Analyst III Range 18A 12 months	$29,580
Clerk Typist III Range 8A half-time, 12 months	8,162
	$37,742
benefits (.188)	7,095
FICA (.0613 x 8162 + 1588)	2,088
health insurance (127 x 1.5 x 12)	2,286
	$49,211

TRAVEL

Travel to Connecticut and Minnesota and to Health Reinsurance Association board meetings	$5,000

CONTRACTUAL

Rent 2 positions x 150 sq. ft. x $1.70 x 12 mo.	$6,120
Phone (80 install + 600 local + 3,000 long distance)	3,680
Postage	1,000
Printing	1,000
Equipment Rental (typewriter)	2,500
Consulting	10,000
Other	600
	$24,900

COMMODITIES (1.5 x 500) $750

EQUIPMENT

desks, chairs, bookcase, filing cabinet, caculator, etc.	$ 4,000

PREMIUM TAX OFFSET

Estimate #1:

Loss experience under Minnesota Comprehensive Health Plan for 1979: $800,000

Alaska population/Minnesota population = 400,000/4,000,000 = .1
Alaska rates/Minnesota rates ≈ 1.12

$800,000 x .1 x 1.12 = $89,600

Estimate #2:

Total comprehensive Health Plan Premiums in Connecticut for 1979: $2,785,367
Total HRA Assessment since April 1, 1976: $80,000

Alaska population/Connecticut population = 400,000/3,000,000 = .133
Alaska rates/ Connecticut rates ≈ 1.12
Loss factor 1: (135% - 125%)/135% = .074
Loss factor 2: (150% - 125%)/150% = .166

(a) $2,785,367 x .133 x 1.12 x .074 + ($80,000/4) = $50,703

(b) $2,785,367 x .133 x 1.12 x .166 + ($80,000/4) = $88,875

While estimate 2(a) is the best estimate from available information, rounding the higher estimates up to $90,000 is the safest estimate.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

* overestimates costs for numerous reasons:

1. assumes full scale operation (only attained in Connecticut after 4 years) in first year
2. includes $20,000 per year of assessments as losses which were primarily administrative costs and therefore could not be passed on to the state under the Alaska bill
3. generous estimates and margins used throughout.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

100 Personal Services

1. There will be a substantial increase in the filing of health insurance made in Alaska and in the kind of review given. A review of rates being charged by the carriers is necessary, not only upon initial use, but also for renewal. Heretofore, the division's role has been to approve or disapprove filings, in addition, we will now be required to determine that plans of health coverage written by the combination of catastrophic with basic hospital and medical-surgical plans provide at least equivalent benefits as outlined in Section 21.50.020. Also, Section 1 of the Act calls for a substantial number of regulations to be promulgated with some regulations needing to be repromulgated on a yearly basis.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. Assumes annual inflation rate of 10%. Personal Services based on Hawaii Program.

2. Commodities for FY '81 are 5.0 for inital set up of forms etc. Afterward, it will drop to 3.0 plus inflation.

3. Annual operating cost,excluding grants and claims are:

FY '81	FY '82	FY '83	FY '84	FY '85
447.2	433.0	447.9	464.4	482.4

Grants and claims are impossible to estimate. This bill provides for a premium supplementation fund. Currently, ALASKA has 10,424 employers; 72% or 7,463 of these employers would be eligible based on number employed. Without cost containment for coverage, premium costs cannot be estimated.

IV. DATE 4/14/80 PREPARED BY James Souby
AGENCY Labor
PHONE 465-2720

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/79)

Positions required would be: one - Market Analyst III, two - Market Analyst II, and one - Clerk/Typist III. In addition, the availability of qualified personnel in Alaska is limited. These persons would be in the Market Surveillance Section.

2. Section 21.50.090 of this Act calls for the Division of Insurance to administer a premium supplementation program for employers having ten or less regular employees who meet certain criteria as outlined. The administration of a program of this nature is quite foreign to the Division of Insurance. In function, it is more indigenous to the operation of the Department of Revenue. Primarily, the division will have to develop a quasi-tax return to determine the amount of supplementation and also to provide reasonable audit control. The Department of Revenue has assisted us in analyzing this portion of the fiscal note.

   Department of Revenue has indicated that the most expedient way to administer this program is by use of the Federal Tax Return and utilizing primarily "desk audits." If the Federal Tax Return cannot be utilized for legal reasons, the Division of Insurance would, in effect, be required to adopt regulations which would define all items of income and deductible expense in order to effectuate the premium supplementation guidelines. The audit functions would then move from a "desk audit" approach to almost entirely a "field audit" approach requiring definitive audit of the employer's books. If this were to be the case, the following number of positions would need to be doubled. Positions required would be: one - Revenue Auditor III, four - Revenue Auditor II, ten - Tax Examiners, and one - Clerk/Typist III. Anchorage will be the location for these positions. These persons will be in the Financial Examination Section. The availability of qualified personnel to fill these positions is limited.

200 Travel

1. The establishment of the Health Reinsurance Association will require travel and, to a large degree, outside in order to participate in the periodic meetings of the board. The travel outside is due to the fact that the carriers forming the membership are located there.

   The implementation phase for this Act will require outside travel to both Connecticut and Minnesota in order to expedite the formation of the Health Reinsurance Association, and to aid in the development of actuarial equivalence standards.

   Travel will also be required to perform audits of carriers to verify compliance with the rate standards established by this Act.

2. Travel for the audit of the premium supplementation program will be necessary. The travel will be limited and primarily in-state. The travel item associated is the best possible scenario with the assumption of the primary use of "desk audits." This item would have to increase significantly in the case of the worst scenario of "field audits."

300 Contractual

1. It is anticipated that a substantial amount of contract services will be required in order for the division to develop actuarial equivalence standards, basis for approval or disapproval of rates for coverage written by or thorugh the Health Reinsurance Association, and perhaps to assist in the development of the proto-type forms the association will be utilizing.

2. The premium supplementation program will require the rental of office space in Anchorage, allowance for telephone charges, and a substantial printing allowance for the application forms.

   In addition, due to the foreign nature of such a function to the division, contractual services, provided perhaps by the Department of Revenue, will be necessary to establish the parameters and methods of operation for this group of employees.

400 Commodities

Sufficient commodities will be required for the 20 new positions.

500 Equipment

Sufficient office equipment will be required for the 20 new positions. In addition to what normal equipment is necessary, additional storage equipment will be necessary plus equipment that will assure a reasonable level of security in view of the documents to be on hand (e.g., Federal Tax Return).

700 Grants, Claims, Etc.

The fiscal item in this category is comprised entirely of the expected expenditures for the amounts paid to employers pursuant to the premium supplementation program as called for in Section 21.50.090.

A number of assumptions had to be made in arriving at the numbers displayed due to the lack of proper data in a number of areas. The assumptions were chosen, for the most part, to establish the worst possible scenario in order to set the upper bounds of anticipated cost. The assumptions made follow:

1. Employers income, as defined in Section 21.50.200(10), is -0-. This assumption will tend to overstate the result.

2. All effected employers will have coverage and will apply for the premium supplementation. This assumption will tend to overstate the result.

3. All employees have covered dependents. This assumption will tend to overstate the result.

4. All employers contribute 100% of the premium for the health plan. This assumption will tend to overstate the result.

5. The Department of Labor statistics relating to nongovernmental employer units, employees, and wages do not include employers with exactly ten employees. Therefore, the analysis only included employers with nine or less employees. This assumption will tend to understate the result.

6. The employer demographics will not change in the future. The result of the assumption is not determinable as it relates to the complexity of the Alaskan economic situation.

7. The premium rates utilized were 125% of the State of Alaska's rates. This results in an assumtion of a rate of $150/month/employee (125% times $120). The development was accomplished by using employer size breakdowns of 0-3, 4-6, and 7-9 employees separately. In all breakdowns, the $150 rate will be less than that for which the coverage will be able to be purchased. This assumption will tend to understate the result.

There will not be a fiscal impact until FY 82 because the Act would not be effective until January 1, 1981 and employers would file for supplementation of premium paid during calendar year 1981 in the first half of 1982.

Reduction of Unrestricted Tax Receipt #019

Section 21.50.050(m) allows a carrier to offset any assessments paid to the Health Reinsurance Association against its income tax under AS 43.20 or its Alaska state premium tax. In addition, it calls for the Commissioner of Revenue to directly reimburse the carrier for assessments paid in excess of the taxes. This item only includes the loss in the premium taxes.

The assumptions made in developing these numbers will produce the worst result. It was assumed that all premium taxes would be offset by the assessments paid. The basis for the amounts were the premium taxes actually paid by carriers for calendar year 1979.

There will not be a fiscal impact unitl FY '82 because effective the date of this Act is January 1, 1981 and the carriers would not be able to apply the offset for calendar year 1981 premium taxes until 1982.

Offset - Premium Tax

100 Personal Services

There will be a substantial increase in the filing of health insurance contracts and forms made in Alaska as new contracts are generated to comply with the requirement to offer such. In addition, the division will newly be required to conduct rate review on a heretofore uncontrolled line of business. This review will have to be made annually in view of the requirement to upgrade minimum benefit standards as appropriate due to inflation or changes in the prevailing standards in the industry.

The conduct of audits is a time consuming function which is appropriate but necessitate adequate staffing. The section calls for regulations with the need to be repromulgated on a yearly basis. Positions required would be: one - Market Analyst III, two - Market Analyst II, and one - Clerk Typist III. These persons would be in the Market Surveillance Sector.

200 Travel

The establishment of the Health Reinsurance Association will require travel and, to a large degree, outside in order to participate in the periodic meetings of the Board. The travel outside is due to the fact that the carriers forming the membership are located there.

The implementation phase for this Act will require outside travel in order to expedite the formation of the Health Reinsurance Association, and to aid in the development of the prototype.

Travel will also be required to perform audits of carriers to verify compliance with the rate standards established by this Act.

300 Contractual

It is anticipated that a substantial amount of contract services will be required in order for the division to develop basis for approval or disapproval of rates for coverage written by or through the Health Reinsurance Association, and perhaps to assist in the development of the proto-type forms the association will be utilizing.

400 Commodities

Sufficient commodities will be required for the 4 new positions.

500 Equipment

Sufficient office equipment will be required for the 4 new positions.

Reduction of Unrestricted Tax Receipt #019

Section 21.50.040(d) allows a carrier to offset any assessments paid to the Health Reinsurance Association against its income tax under AS 43.20 or its Alaska state premium tax. In addition, it calls for the Commissioner of Revenue to directly reimburse the carrier for assessments paid in excess of the taxes. This item only includes the loss in the premium taxes.

The assumptions made in developing these numbers represent a worst possible scenario. It was assumed that all premium taxes would be offset by the assessments paid. The basis for the amounts were the premium taxes actually paid by carriers for calendar year 1979.

FISCAL NOTE

I. REQUEST
Bill/Resolution No. HB 977
Title An Act relating to the health of residents of the state
Requested by Health, Education & Social Services Committee Date 4/14/80

II. FISCAL DETAIL

FUNDING (Thousands of Dollars)

GENERAL FUND		x	x	x	x	x
FEDERAL FUNDS						
OTHER (Specify Fund Source)						

POSITIONS

FULL TIME		9	9	9	9	9
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
1. Assumes annual inflation rate of 10%. Personal Services based on Hawaii Program.

2. Commodities for FY '81 are 5.0 for inital set up of forms etc. Afterwards it will drop to 3.0 plus inflation.

3. Annual operating cost,excluding grants and claims are:

FY '81	FY '82	FY '83	FY. '84	FY '85
447.2	433.0	447.9	464.4	482.4

Grants and claims are impossible to estimate. This bill provides for a premium supplementation fund. Currently, ALASKA has 10,424 employers; 72% or 7,463 of these employers would be eligible based on number employed. Without cost containment for coverage, premium costs cannot be estimated.

Childs Booklet

CHILDREN'S CODE

BETSY MCQUIRE: Former Director of the Office of Child Advocacy. Ms. McGuire informed us that a task force was appointed in 1975 as a result of two conferences. Had support of the Governor's office. Task force was funded by the Legislative Council. Introduced in 1976, passed in 1977. A change was made in the language, instead of Dependent children, they are "children in need of aid."

MILES: Asked if we had a Children's Code now.

MCGUIRE: Said we have a change in the law, but the Legislative Affairs agency has not followed up. They would like to see the childrens' code under a separate chapter. One title.

CHAT: Asked if it was under the same title?

MCGUIRE: No.

ELIZABETH MUKTARIAN: Division of Social Services.

Spoke on implementing the Children's Code. Stressed the need of solid justification before removal of children from the home.

RICK ROBERTSON: Mentioned that Title 9, which deals with divorce and Title 20, which deals with adoption should be under the same title as the children's code. He stated that the change in the law was very fundamental. He went on to give us examples of how the law works: 1. Adudicary - demonstrates court's power - to prove that the child is in need of aid. 2. Disposition - Court. Showing best interests of the child.

Betsy Changes in laws – Under Separate Chapters Legis. Affairs not followed up. 1 title.

Chet: Same title?

Betsy No

Elizabeth Mactaren – Div S.S. implementing C.C.
Analysis of C.C. Solid justification for removal from home.

Chet: Adm. introduce proposal to accomplish this?

Barnes:

Rick Robertson – AG's

Title 9 — Divorce
" 20 — Adoption
RS. 47.10 - modern day statutory embodiment
Change was fundamental
1977 - parental Conduct. Vague.
Prof Stanford
① adjudicary - demonstrate Courts powers - showing child is in need of aid
② disposition - Court. Best interest of child.

Chat: Guardianship?

Robertson: Minors? Social workers usually one of concern.

Munson: Is there a way to get a guardian ad litem

Robertson - yes. Usually lawyers. Represent best interests.

SB-34
Parent orientated statute.
Clear & convincing evidence.

Mike Bad Environment?

Robertson - abused. physically, emotionally etc.

Hurlbert: True on poverty level?

Robertson if contested case, obviously parent care. To provide for certain needs.

Jurisdictional evidence:

Thelma parents rights hard to terminate.

Robertson when parents recognize the problem, it's a lot easier.

Most cases alcohol related.

Prior to 1977 – if went into court – have to provide actual notice to parent.

Statute says let them know – often hard to find parent.

Chair Guardianship proceedings?

Robertson File Petition, Incompatitated.

AS. 13.26

Munson – Is it necessary for consolidation

Robertson – not very high priority. Supreme Ct hasn't had chance to interpret. Worthy of further study

Mills Codification better for Children?

Robertson – I don't change language of Statute. Easier to read.
Specific change in language of Statutes.

McGuire Revision in Adoption did not get out of Committee.

Chair Committee project.

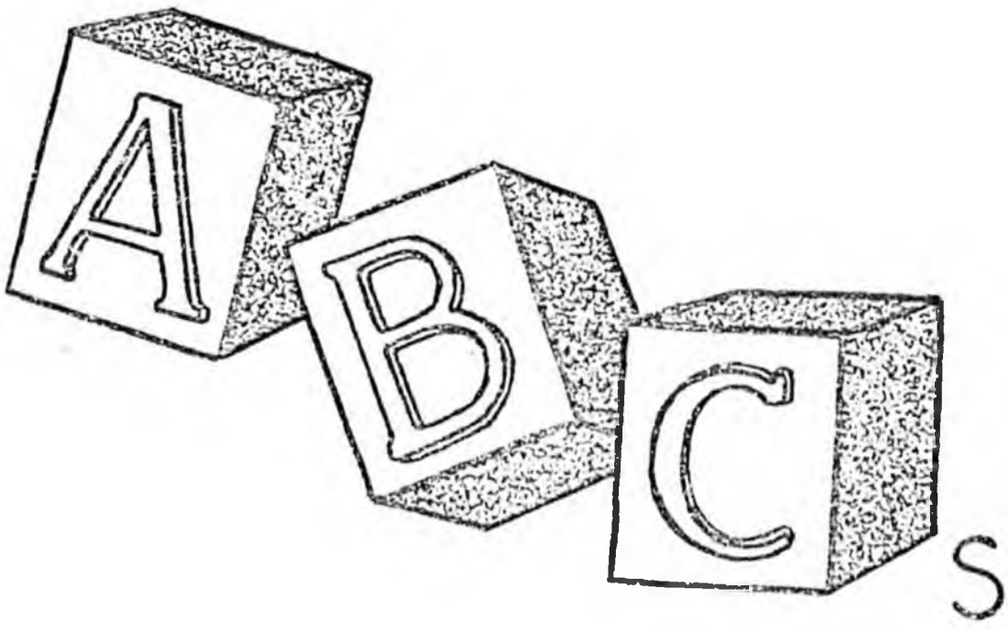
THE



S

OF THE COLORADO CHILDRENS CODE

FOREWORD

This booklet is de nswer some of the more common questions about the Childr s Code. The answers are not legal opinions and should not be relied on as such. Rather, they are the most usual interpretations given to the sections of the Code they cover. Some variation may be found in different judicial districts. Where a legal opinion is needed, an attorney should be consulted.

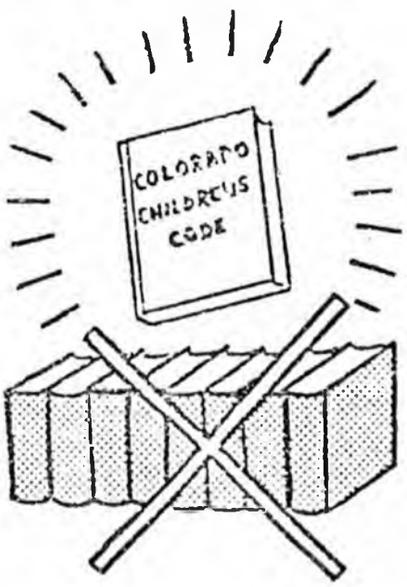
THE A B C's OF THE
COLORADO CHILDREN'S CODE

* * * *

Q. What is the Colorado Children's Code?

A. It is a single chapter of the Colorado Revised Statutes which includes all Colorado laws relating to children.



Q. Is the Children's Code a completely new law?

A. Not really. Parts of it are new but much is a regrouping in a single chapter laws formerly found in many of the 155 chapters of the Colorado Revised Statutes. For example, before the Children's Code, parts of children's laws were found in Chapter 3, Administrative Code, Chapter 4, Adoptions, Chapter 22, Children, Chapter 37, Courts, Chapter 39, Criminal Procedure, Chapter 40, Crimes, Chapter 105, Penal and Correctional Institutions, and Chapter 119, Public Welfare. Many of these laws remain unchanged but have been brought together in one place under the title Colorado Children's Code.

Q. Why was the Children's Code adopted?

A. To up-date Colorado's juvenile laws and to set up standard court procedures, something not covered by the old law.

Q. How does the present Children's Code differ from the former laws?

A. Here are some comparisons:

Definition	Old Law	New Law
Delinquency:	Child 10 to 18 who has: violated state or federal law or municipal ordinance, who is habitually truant from school or who is beyond control of parent. Exceptions: One over 16 charged with a capital offense shall be treated as an adult offender.	Child 10 to 18 who has violated a state or federal law, or municipal ordinance if penalty is a jail sentence. Exceptions: One over 14 charged with capital offense shall be treated as an adult offender.
Child in Need of Supervision:	No provision.	Child under 18 who indulges in anti-social although non-criminal conduct; i.e., who is truant, runaway, or beyond parental control.
Dependent or Neglected Child:	Child under 18 who is abandoned, homeless, neglected, who fails to receive proper parental care or who is dependent on charity for support.	Child under 18 whose parents abuse or neglect him. Note: New law eliminates poverty or dependence on welfare as a ground for declaring a child dependent or neglected.
Procedures		
Petition:	No provision as to contents.	Must state the specific offense.
Hearing:	No provision.	Allegations of petition must be proved beyond reasonable doubt. Child entitled to counsel and hearing must be recorded. Child has right to appeal from Court's judgment.
Disposition:	If child is found delinquent, may be left with parents under probation or may be placed in foster home, training school, or state reformatory.	Same disposition but child may not be committed to state reformatory.
Transfer Hearing:	No provision.	If child is over 14 and accused of serious offense (felony), court may transfer to adult criminal court.
Records:	No limitations on use.	Police must keep record of child in separate file. No release to public; may not be sent to FBI.

Q. Was a change in the law necessary?

A. Yes. Many recent U. S. Supreme Court decisions, especially those relating to the 5th and 14th Amendments, have radically changed court procedures for both adults and juveniles. Recently, the Colorado Supreme Court, in response to such changes, adopted a whole new "Code of Criminal Procedure." The Children's Code is, in a more limited way, an up-to-date code of juvenile procedures.

Q. Is the Colorado Children's Code radically different from Children's laws in other states?

A. Colorado has always been a leader in Children's laws. Denver, with Chicago, pioneered the juvenile court movement. Hence, children's laws of many states have followed Colorado.

Where changed, the Children's Code follows closely the Standard Juvenile Court Act developed by the National Council on Crime and Delinquency, the U. S. Children's Bureau, and the National Council of Juvenile Court Judges. This model law served as a basis for new juvenile codes for such states as New York, Illinois, Maryland, Oregon, and Utah. South Dakota has since adopted a Children's Code almost identical to Colorado's. Oklahoma also updated its children's laws along the same lines.

Q. How does the present Children's Code differ from the former laws?

A. Here are some comparisons:

Definition	Old Law	New Law
Delinquency:	Child 10 to 18 who has: violated state or federal law or municipal ordinance, who is habitually truant from school or who is beyond control of parent. Exceptions: One over 16 charged with a capital offense shall be treated as an adult offender.	Child 10 to 18 who has violated a state or federal law, or municipal ordinance if penalty is a jail sentence. Exceptions: One over 14 charged with capital offense shall be treated as an adult offender.
Child in Need of Supervision:	No provision.	Child under 18 who indulges in anti-social although non-criminal conduct; i.e., who is truant, runaway, or beyond parental control.
Dependent or Neglected Child:	Child under 18 who is abandoned, homeless, neglected, who fails to receive proper parental care or who is dependent on charity for support.	Child under 18 whose parents abuse or neglect him. Note: New law eliminates poverty or dependence on welfare as a ground for declaring a child dependent or neglected.
Procedures		
Petition:	No provision as to contents.	Must state the specific offense.
Hearing:	No provision.	Allegations of petition must be proved beyond reasonable doubt. Child entitled to counsel and hearing must be recorded. Child has right to appeal from Court's judgment.
Disposition:	If child is found delinquent, may be left with parents under probation or may be placed in foster home, training school, or state reformatory.	Same disposition but child may not be committed to state reformatory.
Transfer Hearing:	No provision.	If child is over 14 and accused of serious offense (felony), court may transfer to adult criminal court.
Records:	No limitations on use.	Police must keep record of child in separate file. No release to public; may not be sent to FBI.

	Old Law	New Law
Expungement:	No provision.	If adjudicated delinquent, two years after closing of case, if there has been no further misconduct, child may apply for and the court may expunge the juvenile record.
Publicity:	Name and picture of youth accused of delinquency may not be published without leave of court.	Same provision.

Q. May the police arrest a child accused of a delinquent act?

A. Any form of police detention is called "custody." A child may be taken into custody without court order:

For any violation of law committed in presence of the police, or where there is good reason to think the child committed such offense.

When he is lost, abandoned; when he is a runaway or when he is a danger to himself or others.

Q. When is a child considered to be "in custody"?

A. Only when suspicion focuses on him as an offender and he is questioned, not about an offense in general, but about his involvement and he is no longer free to leave. A runaway child or one who endangers himself or others may likewise be detained "in custody".

Q. May the police take a child into a police car or to headquarters to question him?

A. Yes. In most cases it is needlessly embarrassing to a child to be questioned in a public place. It may be necessary to consult the police files to determine whether the juvenile court has issued a "Request to take into Custody." Finally, since parents should be notified of the

police contact with their child and may be asked to take him home, the police department, a sub-station, or a juvenile detention center, if there is such, are appropriate places to hold the child until the parents arrive.

Q. May the police question a child without his parents being present?

A. Certainly. As a practical matter, if the police did not question a child thought to have committed some unlawful act, or who is on the street at late or unusual hours, or is behaving in a way which might be dangerous to himself or others, they could never learn his name, his address, or who his parents are, receive an explanation of his conduct, or otherwise determine whether there is cause to take the child into custody, make an official report, or refer the matter to a juvenile court.

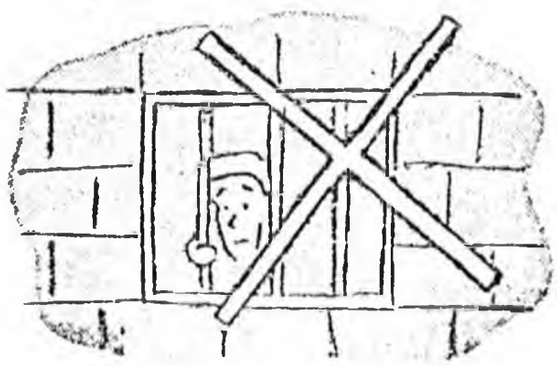
No statement of a child may be used in evidence against him unless a parent or guardian was present and the child and parent were advised of their right to remain silent, that any statement made might be used against the child, and of the right to legal counsel.

Q. What if the child refuses to give the police officer any information?

A. In most communities, ordinances require a person, including a juvenile, to give information to a police officer. Refusal to do so would be a violation of an ordinance, committed in the presence of an officer, warranting taking the child into custody. He is not obliged, however, to make self-incriminating statements.

Q. If a child is taken into custody, what happens then?

A. The Children's Code provides that the child's parents must be notified as soon as possible, and he should be released to them unless his safety, or that of others, indicates he should be detained. A child under 14 may not be placed in jail. If over 14, he may be kept in a juvenile detention center or in a jail, if separated from adult inmates.



Q. If a child is taken into custody, must he post a bail bond for his release?

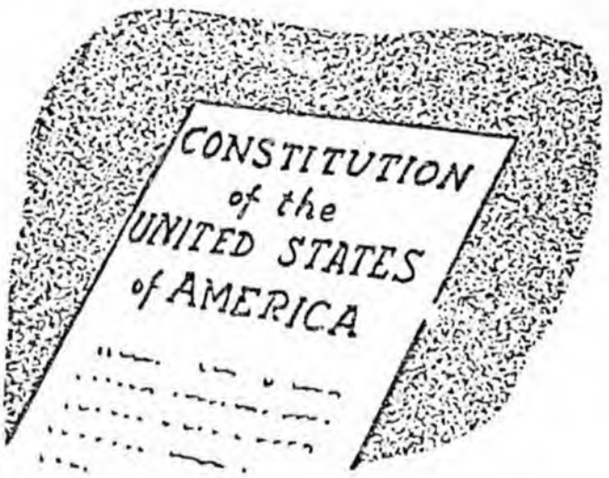
A. Usually, no. The Code provides a child should be released to his parents if they give a written promise to appear in court with the child if and when notified to do so. Such a promise subjects parents to court action if they fail to appear when notified.

Q. Do the limits on arrest and questioning of a juvenile hampter the police in their work?

A. Yes; any restrictions of this kind probably make police work more difficult.

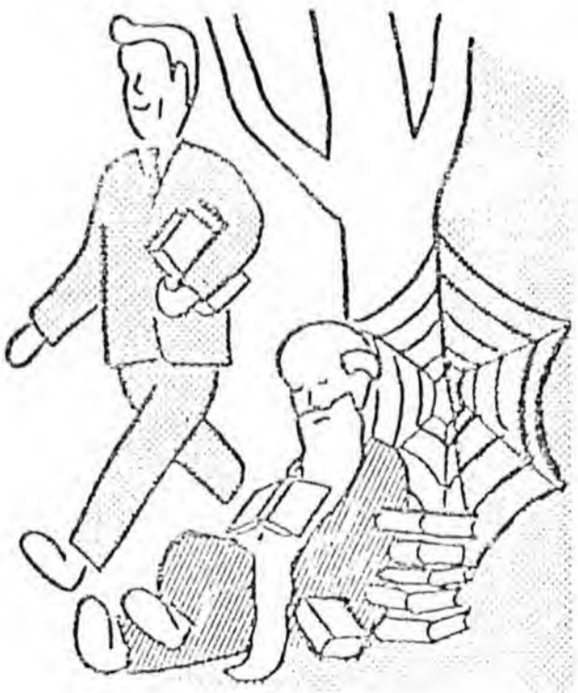
Q. Why should the Children's Code limit the police?

A. It is the United States and Colorado Constitutions which impose these limits, which provide for privilege against self-incrimination, right to counsel, and to release on reasonable bail, presumption of innocence, require proof beyond reasonable doubt, and similar protections guaranteed alike to adults and juveniles. The Children's Code merely sets up procedures which apply these principles and insure that these rights are protected.



Q. Why has the Children's Code been criticized by some?

A. The Children's Code, like many new laws, is not always well or fully understood by all. Yet it imposes limits on the police, the district attorneys and the courts in the handling of juvenile cases, especially in the areas of greater personal safeguards for children. Hence, it has been subject to criticism by many who would rather not change a previously



traditional procedure. Further, such safeguards for the rights and liberties of children and their parents does make more work for the police, prosecution and court, but are essential if we are to maintain constitutional government.

Q. Is the Children's Code concerned only with delinquency?

A. By no means. In addition to delinquency, the Code provides for handling children in need of supervision, protection for those neglected and abused, and for the battered child, i.e., the infant who receives severe, non-accidental injuries not adequately accounted for by parents; for termination of parental rights where appropriate; for hospitalization and treatment of the mentally ill child; for paternity proceedings; for orders to compel payment of support; for court orders to protect a child from mistreatment or other improper conduct by others; for the relinquishment of children where the parent wishes to give up the child; for the adoptive placement of relinquished or other children available for adoption; and for the prosecution and punishment of those who abuse or mistreat children or contribute to their delinquency.

Q. Early complaints by law enforcement stated the Children's Code was not workable. Have changes been made in the law?

A. Yes. In 1968 the legislature changed from 16 to 14 the age at which a child, accused of a capital offense (murder or other offense punishable by death or life imprisonment) may be charged as an adult criminal.

Another change lowered the age at which a child, accused of a [illegible] crime (felony) may be transferred to the adult criminal court.

Still another change now permits a police officer to take a child into custody if there is probable cause to believe he committed a delinquent act.

In 1969 the legislature made other significant changes:

Child abuse cases may be proved by a preponderance of evidence rather than beyond reasonable doubt.

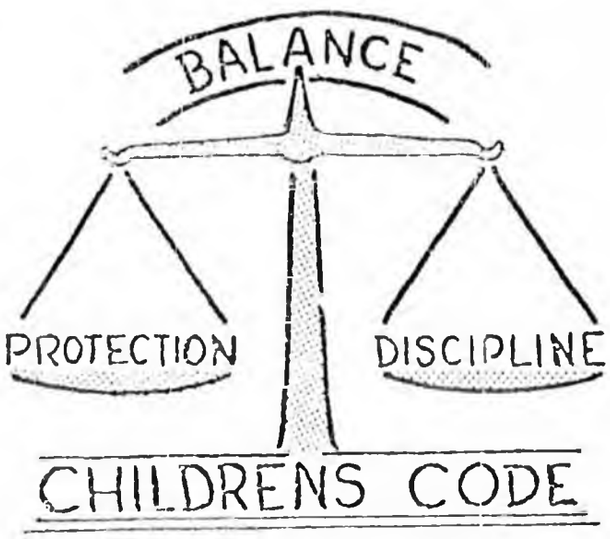
If an infant or small child receives unexplained injuries, it is not necessary to prove these were the result of abuse or neglect by the parent or guardian. Such neglect or abuse is presumed from the injury, although the parent may rebut this presumption by showing otherwise.

Adoptive procedure was simplified.

A separate juvenile section was created at Colorado State Reformatory for boys over 16 who run away from or otherwise cannot be handled adequately at Lookout Mountain School for Boys.

Q. Why a special set of laws for children?

A. Without the Children's Code children who broke a public law would be held to the same degree of responsibility as adults. It affords children protection against abuse and neglect and makes the compulsory school law enforceable. It provides adoption procedures, and empowers the court to enter pro[illegible]orders for children, to det[illegible]aternity, and institute actio[illegible]or support of children. In short, the law recognizes that children have their own special



basic rights which the Children's Code defines and safeguards. The law also holds the child accountable for his own conduct according to his age, maturity and the kind of home in which he lives.

Q. If I know of a case of child abuse or neglect, should I report it and, if so, where?

A. Such a case should be reported immediately to the police or sheriff's office, depending upon where you live, since such conduct may be both a civil and criminal matter. You may also report the incident to your local Welfare Department or to the Juvenile Court. If you request, your name will not be used unless you should be needed as a witness.

Q. Where may one apply to adopt a child?

A. Adoptive placements are made to a licensed child placement agency. These include your local Department of Welfare and, among private agencies, Catholic Charities, Family and Children's Service, Jewish Family and Children's Service and Lutheran Service Society.

Q. May a step parent adopt his step child?

A. Yes, with consent of the spouse and the other natural parent. Such adoptive petitions are filed with the Juvenile Court.

Q. How does the Children's Code affect the Department of Welfare and private social work agencies?

A. The Code gives such agencies the responsibility for most non-institutional placements for children and casework services to families. They also establish and supervise family and group foster homes, provide protective services to children, investigate child abuse complaints, counsel with parents who wish to relinquish children, make adoptive studies and

adoptive placements and furnish the multitude of social services today's complex society demands.

Q. How can we prevent or reduce juvenile crime and child abuse?

A. By good example; by observing all laws and encouraging others to do so.

By supporting, with respect, better pay and full cooperation, your local police and law enforcement officers; when in referring to a police officer, by eliminating such names as "cop" and "fuzz".

By setting firm limits of conduct for your children; requiring regular school attendance and reasonable effort and by knowing your children's companions and whereabouts.

By insisting that schools devise courses for those students who do not fit into the regular school program and by substantial reduction in the dropout rate.

By assisting the communities in securing better treatment facilities for delinquent children.

SECOND REGULAR SESSION

SENATE BILL NO. 511

77TH GENERAL ASSEMBLY

INTRODUCED BY SENATOR SCHNEIDER.

Pre-filed December 20, 1973, and 1,000 copies ordered printed.

VINITA E. RAMSEY, Secretary.

AN ACT

To provide for the State of Missouri to enter into an Interstate Compact on the Placement of Children with other states and setting forth in full the terms of such Compact.

Be it enacted by the General Assembly of the State of Missouri, as follows:

Section 1. The Interstate Compact on the Placement of Children is hereby enacted into law and entered into with all other jurisdictions legally joining therein, in form substantially as follows:

ARTICLE I.

It is the purpose and policy of the party states to cooperate with each other in the interstate placement of children to the end that:

(a) Each child requiring placement shall receive the maximum opportunity to be placed in a suitable environment and with persons or institutions having appropriate qualifi-

cations and facilities to provide a necessary and desirable degree and type of care.

(b) The appropriate authorities in a state where a child is to be placed may have full opportunity to ascertain the circumstances of the proposed placement, thereby promoting full compliance with applicable requirements for the protection of the child.

(c) The proper authorities of the state from which the placement is made may obtain the most complete information on the basis of which to evaluate a projected placement before it is made.

(d) Appropriate jurisdictional arrangements for the care of children will be promoted.

ARTICLE II.

As used in this compact:

(a) "Child" means a person who, by reason of minority, is legally subject to parental, guardianship or similar control.

(b) "Sending agency" means a party state, officer or employee thereof; a subdivision of a party state, or officer or employee thereof; a court of a party state; a person, corporation, association, charitable agency or other entity which sends, brings, or causes to be sent or brought any child to another party state.

(c) "Receiving state" means the state to which a child is sent, brought, or caused to be sent or brought, whether by public authorities or private persons or agencies, and whether for placement with state or local public authorities or for placement with private agencies or persons.

(d) "Placement" means the arrangement for the care of a child in a family free or boarding home or in a child-caring agency or institution but does not include any institution caring for the mentally ill, mentally defective or epileptic

or any institution primarily educational in character, and any hospital or other medical facility.

ARTICLE III.

(a) No sending agency shall send, bring, or cause to be sent or brought into any other party state any child for placement in foster care or as a preliminary to a possible adoption unless the sending agency shall comply with each and every requirement set forth in this article and with the applicable laws of the receiving state governing the placement of children therein.

(b) Prior to sending, bringing or causing any child to be sent or brought into a receiving state for placement in foster care or as a preliminary to a possible adoption, the sending agency shall furnish the appropriate public authorities in the receiving state written notice of the intention to send, bring, or place the child in the receiving state. The notice shall contain:

1. The name, date and place of birth of the child.

2. The identity and address or addresses of the parents or legal guardian.

3. The name and address of the person, agency or institution to or with which the sending agency proposes to send, bring, or place the child.

4. A full statement of the reasons for such proposed action and evidence of the authority pursuant to which the placement is proposed to be made.

(c) Any public officer or agency in a receiving state which is in receipt of a notice pursuant to paragraph (b) of this article may request of the sending agency, or any other appropriate officer or agency of or in the sending agency's state, and shall be entitled to receive therefrom, such supporting or additional information as it may deem necessary under the circumstances to carry out the purpose and policy of this compact.

(d) The child shall not be sent, brought, or caused to be sent or brought into the receiving state until the appropriate public authorities in the receiving state shall notify the sending agency, in writing, to the effect that the proposed placement does not appear to be contrary to the interests of the child.

ARTICLE IV.

The sending, bringing, or causing to be sent or brought into any receiving state of a child in violation of the terms of this compact shall constitute a violation of the laws respecting the placement of children of both the state in which the sending agency is located or from which it sends or brings the child and of the receiving state. Such violation may be punished or subjected to penalty in either jurisdiction in accordance with its laws. In addition to liability for any such punishment or penalty, any such violation shall constitute full and sufficient grounds for the suspension or revocation of any license, permit, or other legal authorization held by the sending agency which empowers or allows it to place, or care for children.

ARTICLE V.

(a) The sending agency shall retain jurisdiction over the child sufficient to determine all matters in relation to the custody, supervision, care, treatment and disposition of the child which it would have had if the child had remained in the sending agency's state, until the child is adopted, reaches majority, becomes self-supporting or is discharged with the concurrence of the appropriate authority in the receiving state. Such jurisdiction shall also include the power to effect or cause the return of the child or its transfer to another location and custody pursuant to law. The sending agency shall continue to have financial responsibility for support and maintenance of the child during the period of the place-

ment. Nothing contained herein shall defeat a claim of jurisdiction by a receiving state sufficient to deal with an act of delinquency or crime committed th ~ein.

(b) When the sending agency is a public agency, it may enter into an agreement with an authorized public or private agency in the receiving state providing for the performance of one or more services in respect of such case by the latter as agent for the sending agency.

(c) Nothing in this compact shall be construed to prevent a private charitable agency authorized to place children in the receiving state from performing services or acting as agent in that state for a private charitable agency of the sending state; nor to prevent the agency in the receiving state from discharging financial responsibility for the support and maintenance of a child who has been placed on behalf of the sending agency without relieving the responsibility set forth in paragraph (a) hereof.

ARTICLE VI.

A chi' ' adjudicated delinquent may 'e placed in an institution in another party jurisdiction pursuant to this compact but no such placement shall be made unless the child is given a court hearing on notice to the parent or guardian with opportunity to be heard, prior to his being sent to such other party jurisdiction for institutional care and the court finds that:

1. Equivalent facilities for the child are not available in the sending agency's jurisdiction; and

2. Institutional care in the other jurisdiction is in ~e best interest of the child and will not produce undue hard' ship.

ARTICLE VII.

The executive head of each jurisdiction party to this compact shall designate an officer who shall be general co-

ordinator of activities under this compact in his jurisdiction and who, acting jointly with like officers of other party jurisdictions, shall have powers to promulgate rules and regulations to carry out more effectively the terms and provisions of this compact.

ARTICLE VIII.

This compact shall not apply to:

(a) The sending or bringing of a child into a receiving state by his parent, step-parent, grandparent, adult brother or sister, adult uncle or aunt, or his gua lian and leaving the child with any such relative or non-agency guardian in the receiving state.

(b) Any placement, sending or bringing of a child into a receiving state pursuant to any other interstate compact to which both the state from which the child is sent or brought and the receiving state are party, or to any other agreement between said states which has the force of law.

ARTICLE IX.

This compact shall be open to joinder by any state, territory or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and with the consent of Congress, the Government of Canada or any province thereof. It shall become effective with respect to any such jurisdiction when such jurisdiction has enacted the same into law. Withdrawal from this compact shall be by the enactment of a statute repealing the same, but shall not take effect until two years after the effective date of such statute and until written notice of the withdrawal has bee. given by the withdrawing state to the Governor of each other arty jurisdiction. Withdrawal of a party state shall not affect the rights, duties and obligations under this compact of any sending agency therein with respect to a placement made prior to the effective date of withdrawal.

ARTICLE X.

The provisions of this compact shall be liberally construed to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any party state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state party thereto, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters.

Section 2. The financial responsibility for any child placed pursuant to the Provisions of the Interstate Compact on the Placement of Children shall be determined in accordance with the provisions of Article V thereof, in the first instance. However, in the event of partial or complete default of performance thereunder, the provisions of state laws fixing responsibility for the support of children also may be invoked.

Section 3. The "appropriate public authorities" as used in Article III of the Interstate Compact on the Placement of Children shall, with reference to this state, mean Division of Welfare, and said Division of Welfare shall receive and act with reference to notices required by said Article III.

Section 4. As used in paragraph (a) of Article V "appropriate authority in the receiving state" shall mean the Division of Welfare.

Section 5. Any court having jurisdiction to place delinquent children may place such a child in an institution of

or in another state pursuant to Article VI of the Interstate Compact on the Placement of Children and shall retain jurisdiction as provided in Article V thereof.

Section 6. As used in Article VII of the Interstate Compact on the Placement of Children the term "executive head" means the Governor. The Governor is hereby authorized to appoint a compact administrator in accordance with the terms of said Article VII.

Section 7. No placement made into this state from a jurisdiction not party to the Interstate Compact on the Placement of Children shall be lawful unless the person or agency making the placement complies with and follows the procedures and requirements of Article III of that compact as though the state or jurisdiction from which the child is sent or brought were party thereto. This section shall not apply to any placement which would not be subject to the terms of the Interstate Compact on the Placement of Children if both this state and the other state or jurisdiction from which the child is sent or brought were parties thereto.

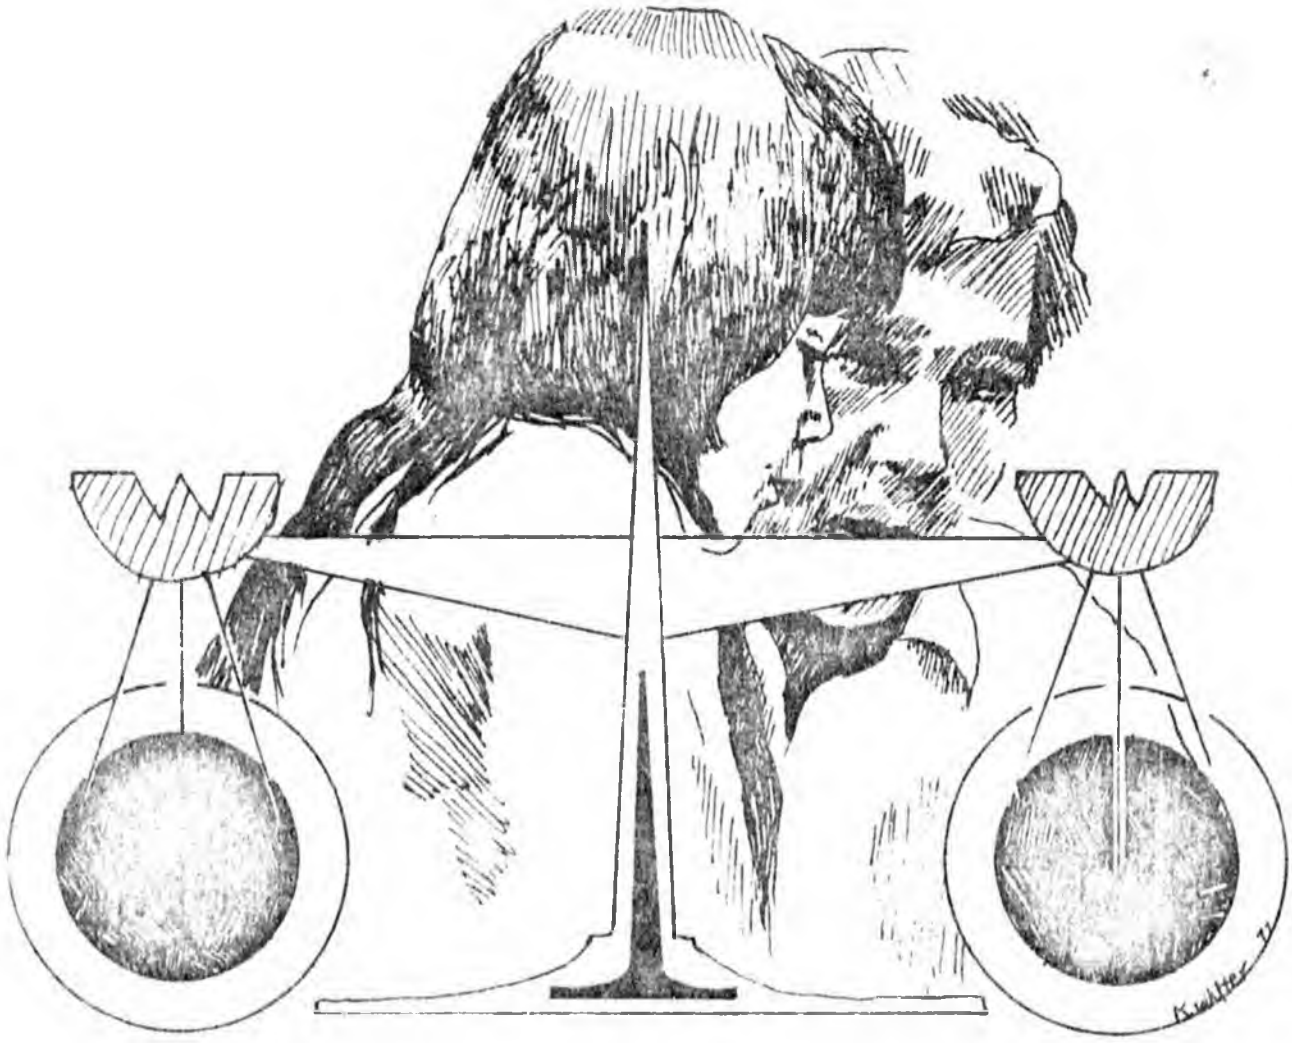
Department of Health and Social Services



ANALYSIS of 1977 CHILDRENS CODE

K. McRobertson AG

DIVISION OF SOCIAL SERVICES

CHILDREN'S CODE ANALYSIS

AUGUST, 1977

THIS REPORT WAS PREPARED BY

NINA KINNEY AND ELIZABETH MUKTARIAN

INTRODUCTION

This report has been prepared by the Division of Social Services to assist you in understanding the changes in Alaskan statutes relating to children which are effective on August 26, 1977.

This report has been organized in the following manner. On the right hand pages are the new statutes. Deletions in the previous statutes are included in parentheses in the appropriate sections on the right hand side. Likewise, additions to the statutes are underlined in the new statutes.

On the left hand page, you will find two types of notations. First, whenever a section of the old statute has been repealed and re-enacted, opposite that new section you will find the section which has been repealed.

The significant changes in the new statute are outlined in black boxes on the left hand page.

It must be recognized that the Children's Code, as any set of statutes, will require a period of adjustment after implementation. However, after you have worked under these new statutes you may find areas you consider to be problematic. We suggest that Division of Social Services staff communicate such areas to their Regional Manager who will forward their concerns to the Director's Office. Some areas may require policy decisions within the Division. For other areas it may be necessary to consult the Attorney General's Office for further interpretation.

We hope that this report, by contrasting old and new sections, will help to clarify the significant areas of change in Alaska's Children's Code. We wish to thank Elizabeth Arnold, Assistant Attorney General for her assistance in reviewing the draft of this report, and to acknowledge the Legislative Affairs Agency for their preparation of the typescript of the statute.

Sec. 1. AS 09.55.205 Enumerates criteria to be utilized by a court in determining the "best interests of the child" in awarding custody of children; in addition it specifies what is in the best interests of the child.

Sec. 09.55.205. Judgments for custody. In an action for divorce or for legal separation the court may, during the pendency of the action, or at the final hearing or at any time thereafter during the minority of any child of the marriage, make an order for the custody of or visitation with the minor child which may seem necessary or proper and may at any time modify or vacate the order. Appointment of a guardian ad litem or attorney for the child shall be made under the terms of AS 09.65.130. In awarding custody the court is to be guided by the following considerations:

(1) by what appears to be for the best interests of the child and if the child is of a sufficient age and intelligence to form a preference, the court may consider that preference in determining the question;

(2) as between parents adversely claiming the custody neither parent is entitled to it as of right. (§ 1 ch 160 SLA 1968; am § 1 ch 167 SLA 1975)

"An Act relating to children's laws and related judicial proceedings; changing the court's responsibilities and authority under Children's Rules 11(a), 12(a) and (b), 14, 15, 21 and 28, and Rule of Civil Procedure 17(b)."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 09.55.205 is repealed and re-enacted to read:

Sec. 09.55.205. JUDGMENTS FOR CUSTODY. In an action for divorce or for legal separation the court may, if it has jurisdiction under AS 25.30.020, and is an appropriate forum under AS 25.30.050 and 25.30.060, during the pendency of the action, or at the final hearing or at any time thereafter during the minority of any child of the marriage, make an order for the custody of or visitation with the minor child which may seem necessary or proper and may at any time modify or vacate the order. Any appointment of a guardian ad litem for a child shall be made under the terms of AS 09.65.130. The court shall determine custody in accordance with the best interests of the child. Neither parent is entitled to preference as a matter of right in awarding custody of the child. In determining the best interests of the child the court shall consider all relevant factors including:

(1) the physical, emotional, mental, religious and social needs of the child;

(2) the capability and desire of each parent to meet these needs;

Sec. 2. AS 09.65.130 deals with representation of a child. The changes clarify the responsibilities of a guardian ad litem and attorney for a child, and provides for the appointment of both and procedures for both.

The new subsection (c) clarifies that the guardian ad litem is to represent the best interests of the child, not his preferences. It also delineates the limits of the guardian ad litem's authority.

(3) the child's preference;

(4) the love and affection existing between the child and each parent;

(5) the length of time the child has lived in a stable, satisfactory environment and the desirability of maintaining continuity;

(6) the desire and ability of each parent to allow an open and loving frequent relationship between the child and his other parent.

* Sec. 2. AS 09.65.130(a) is amended to read:

(a) The court may, upon the motion of either party or upon its own motion, appoint an attorney [OR GUARDIAN AD LITEM] to represent the [INTERESTS OF A] minor [OR DEPENDENT CHILD] with respect to his custody, support, and visitation or in any other legal proceeding involving his welfare. When custody, support, or visitation are at issue in a divorce, it is the responsibility of the parties or their counsel to notify the court that those matters are at issue. Upon notification, the court shall determine whether the child should have legal <u>representation</u> [ASSISTANCE] or other services and shall make a finding on the record before trial. The court shall enter an order for costs, fees, and disbursements in favor of the child's attorney [OR GUARDIAN AD LITEM] and may further order that other services be provided for the protection of the child.

* Sec. 3. AS 09.65.130 is amended by adding a new subsection to read:

(c) Instead of, or in addition to, appointment of an attorney under (a) of this section, the court may, upon the motion of either party or upon its own motion, appoint an attorney or other person to serve as guardian ad litem to represent the best interests of a minor in any legal proceedings involving his welfare. The court shall appoint a guardian ad litem when, in the opinion of the court, representation of the child's best interests, to be distinguished from his preferences,

The guardian ad litem should, when reasonable, be appointed from among persons in the community where the child's parents or the person having legal custody or guardianship of the child's person reside.

Sec 4. AS 30.15.050 deals with consent to adoption. This does not change the requirement; it was added for clarification.

Sec. 5. AS 25.20.010 changes the age of majority from 19 to 18 years. Those statutes which specifically provide an age requirement of 19, such as drinking, jury duty, and selling/serving liquor remain unchanged.

would serve the welfare of the child. The person appointed under (a) of this section may also be appointed as guardian ad litem under this subsection. The court in its order appointing a guardian ad litem shall limit the duration of the appointment of the guardian ad litem to the pendency of the legal proceedings affecting the child's interests, and shall outline the guardian ad litem's responsibilities and limit his authority to those matters related to his effective representation of the child's best interests in the pending legal proceeding. The court shall make every reasonable effort to appoint a guardian ad litem from among persons in the community where the child's parents or the person having legal custody or guardianship of the child's person reside. When custody, support, or visitation are at issue in a divorce, it is the responsibility of the parties or their counsel to notify the court that these matters are at issue. Upon notification, the court shall determine if the child's best interests need representation or if the child needs other services and shall make a finding on the record before trial. The court shall enter an order for costs, fees, and disbursements in favor of the child's guardian ad litem and may further order that other services be provided for the protection of the child.

* Sec. 4. AS 20.15.050(a)(1) and (5) are amended to read:

(1) <u>for purposes of this section,</u> a parent who has abandoned a child <u>for not less than six months</u> [WITHOUT AFFORDING MEANS OF IDENTIFICATION, OR WHO HAS ABANDONED A CHILD AS DETERMINED UNDER AS 47.10.080(c)(3)(B)];

(5) a parent whose parental rights have been terminated by order of the court under <u>AS 47.10.080(c)(3)</u> [SEC. 180 OF THIS CHAPTER];

* Sec. 5. AS 25.20.010 is amended to read:

Sec. 25.20.010. AGE OF MAJORITY. A person is considered to have arrived at majority at the age of <u>18</u> [19] years, and thereafter has

Sec. 6. AS 25.20.060 provides for resolution of a child custody controversy between claimants not parties to an action for divorce or legal separation. The significance of this amendment is that it clarifies that it applies to persons who are not married or to custodians who are not related.

Sec. 47.10.010. Jurisdiction. (a) Proceedings relating to a minor under 18 years of age residing or found in the state are governed by this chapter, except as otherwise provided in this chapter, when the minor

(1) violates a law of the state, or an ordinance or regulation of a political subdivision of the state;

(2) by reason of being wayward or habitually disobedient is uncontrolled by his parent, guardian or custodian;

(3) is habitually truant from school or home, or habitually so conducts himself as to injure or endanger the morals or health of himself or others;

(4) is abandoned by his parent, guardian or custodian;

(5) lacks proper parental care by reason of the faults, habit or neglect of his parent, guardian or custodian;

(6) associates with vagrant, vicious or immoral people, or engages in an occupation or is in a situation dangerous to life or limb or injurious to the health, morals, or welfare of himself or others;

(7) is an orphan who has no relatives willing and able to assume custody and care;

(8) has been released by his parent or parents, or guardian, to the department for adoptive purposes; or

(9) is in need of special care or training not otherwise provided.

Sec. 7. AS 47.10.010(a) is a crucial section for Division of Social Services' staff. It includes major statutory changes. The whole concept of status offenders is removed except for runaway children. In addition, it eliminates the categories "child in need of supervision" (CHINS) and "dependent child" and in substitution grants the court jurisdiction over a child to be a "child in need of aid" (CINA), and significantly changes the types of situations which could result in such a finding. The criteria is much more specific and focuses on actual or imminent harm to the child rather than on conduct of the parent or guardian unless it endangers the child. Note that "caring" (Sec. 7., (2), (A)), means more than physical care. See Sec. 28, (9).

control of his own actions and business and has all the rights and is subject to all the liabilities of citizens of full age, except as otherwise provided by statute.

* Sec. 6. AS 25.20 is amended by adding a new section to read:

Sec. 25.20.060. CUSTODY OF THE CHILD. If there is a dispute over child custody, either parent may petition the superior court for resolution of the matter under this section unless an action between the parents is pending under AS 09.55. The court shall award custody on the basis of the best interests of the child. In determining the best interests of the child, the court shall consider all relevant factors including those factors enumerated in AS 09.55.205. Neither parent, regardless of the question of the child's legitimacy, is entitled to preference in the awarding of custody.

* Sec. 7. AS 47.10.010(a) is repealed and re-enacted to read:

(a) Proceedings relating to a minor under 18 years of age residing or found in the state are governed by this chapter, except as otherwise provided in this chapter, when the court finds the minor

(1) to be a delinquent minor as a result of violating a criminal law of the state or of a municipality of the state; or

(2) to be a child in need of aid as a result of

(A) the child being habitually absent from his home or refusing to accept available care, or having no parent, guardian, custodian or relative caring or willing to care for him, including physical abandonment by

(i) both parents,

(ii) the surviving parent, or

(iii) one parent if the other parent's rights and responsibilities have been terminated under sec. 80 of this chapter or voluntarily relinquished;

Sec. 8. AS 47.10.010(b) deals with jurisdiction. This amendment provides that a child shall be prosecuted as an adult for misdemeanor fish and game and parks and recreational facilities violations.

(B) the child being in need of medical treatment to cure, alleviate, or prevent his suffering substantial physical harm, or mental harm as evidenced by failure to thrive, severe anxiety, depression, withdrawal, or untoward aggressive behavior or hostility toward others, and his parents are unwilling to provide the medical treatment;

(C) the child having suffered substantial physical harm or if there is an imminent and substantial risk that the child will suffer such harm as a result of the actions done by or conditions created by his parent, guardian or custodian or the failure of his parent, guardian or custodian adequately to supervise him;

(D) the child having been sexually abused either by his parent, guardian or custodian, or as a result of conditions created by his parent, guardian or custodian, or by the failure of his parent, guardian or custodian adequately to supervise him;

(E) the child committing delinquent acts as a result of pressure, guidance, or approval from his parents, guardian or custodian.

* Sec. 8. AS 47.10.010(b) is amended to read:

(b) When a minor is accused of violating a traffic statute or regulation, [OR] a traffic ordinance or regulation of an incorporated municipality, a fish and game statute or regulation under AS.16 or a parks and recreational facilities statute or regulation under AS 41.20, excepting a statute the violation of which is a felony, the procedure prescribed in secs. 20 - 90 of this chapter may not be followed, except that a parent, guardian or legal custodian shall be present at all proceedings. The minor accused of a traffic offense, a fish and game statute or regulation under AS 16 or parks and recreational facilities violation under AS 41.20 shall be charged, prosecuted, and sentenced in

Sec. 9. AS 47.01.030(b) requires notice to be given to each parent in any children's proceeding. It requires efforts to notify absent parents regardless of the length of absence. Proof of notice must be filed before the petition is heard. If proof of notice cannot be given, you ust give proof that you tried to give notice.

Sec. 9. AS 47.10.030(b) If the person summoned is not the parent or guardian of the minor, the court shall also give the parent or guardian notice of the place an' time of the hearing. The court may also subpoena the parent of the minor, or any other person whose testimony may be necessary at the hearing. A summons, subpoena or other process may be served by a person authorized by law to make the service. Where personal service cannot be made, th court may direct that service of process be made by registered mail.

Sec. 10. AS 47.10.040 The significant change is that the arbitrary 14 year age requirement is removed.

the district court in the same manner as an adult.

* Sec. 9. AS 47.10.030(b) is repealed and re-enacted to read:

(b) In all cases under this chapter the minor, each parent of the minor and the guardian of the minor shall be given notice adequate to give actual notice of the proceedings and the possibility of termination of parental rights and responsibilities, taking into account education and language differences which are known or reasonably ascertainable by the petitioner or the department. The notice of the hearing shall contain all names by which the minor has been identified. Notice shall be given in the manner appropriate under rules of civil procedure for the service of process in a civil action under Alaska law or in any manner the court by order directs. Proof of the giving of the notice shall be filed with the court before the petition is heard. The court may also subpoena the parent of the minor, or any other person whose testimony may be necessary at the hearing. A subpoena or other process may be served by a person authorized by law to make the service, and where personal service cannot be made, the court may direct that service of process be in a manner appropriate under rules of civil procedure for the service of process in a civil action under Alaska law or in any manner the court directs.

* Sec. 10. AS 47.10.040 is amended to read:

Sec. 47.10.040. RELEASE OF MINOR. A minor who is taken into custody may, in the discretion of the court and upon the written promise of the parent, guardian or custodian to bring the minor before the court at a time specified by the court, be released to the care and custody of the parent, guardian or custodian. The minor, if not released, shall be detained as provided by sec. 140 of this chapter. The court may determine whether the father or mother or another person shall have the custody and control of the minor for the duration of the proceedings. If

Sec. 11 & 12. AS 47.10.050 This section asserts very positively a minor's right to counsel. While a minor can waive counsel voluntarily and knowingly, he/she must consult an attorney prior to the waiver of counsel in all cases which would be felonies if committed by an adult. The intention of this section is to assure that juveniles are not intimidated by the legal proceedings and to ensure their rights are not violated.

Sec. 13. AS 47.10.060(d) The only change is in age from 21 to 20.

the minor is of sufficient age and intelligence to state his desires, the court shall give consideration to his desires [OVER 14 YEARS OF AGE, HIS DESIRES IN THE MATTER SHALL BE GIVEN CONSIDERATION BY THE COURT].

* Sec. 11. AS 47.10.050 is amended to read:

Sec. 47.10.050. APPOINTMENT OF GUARDIAN AD LITEM OR ATTORNEY. (a) Whenever in the course of proceedings instituted under this chapter it appears to the court that the welfare of a minor will be promoted by the appointment of an attorney to represent the minor or an attorney or other person to serve as guardian ad litem [A GUARDIAN AD LITEM OR ATTORNEY], the court may make the appointment. Appointment of a guardian ad litem or attorney shall be made under the terms of AS 09.65.130.

* Sec. 12. AS 47.10.050 is amended by adding a new subsection to read:

(b) In all proceedings initiated under a petition for delinquency, a minor shall have the right to be represented by counsel and if indigent have counsel appointed for him by the court. The court shall appoint counsel in such cases unless it makes a finding on the record that the minor has made a voluntary, knowing, and intelligent waiver of the right to counsel and a parent or guardian with whom the child resides or resided before the filing of the petition concurs with the waiver. In cases where it has been alleged that the minor has committed an act which would be a felony if he were an adult, waiver of counsel shall not be accepted unless the court is satisfied that the minor has consulted with an attorney before his waiver of counsel.

* Sec. 13. AS 47.10.060(d) and (e) are amended to read:

(d) A minor is unamenable to treatment under this chapter if he probably cannot be rehabilitated by treatment under this chapter before he reaches 20 [21] years of age. In determining whether a minor is unamenable to treatment, the court may consider the seriousness of the

Sec. 13 AS 47.10.060(e) The change was to make this section consistent with another section.

Sec. 14. AS 47.10.080(b) deals with limits of custody for delinquents. It eliminates indeterminate custody; custody is limited to two years. The provisions are similar to those for CINA which are explained opposite Sec. 47.10.060(c).

Sec. 14.

Sec. 47.10.080

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Social Services for an indeterminate period of time not to extend past a specified date or in any event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; the department shall place the minor in the juvenile facility which the department considers appropriate and which may include a juvenile correctional school, detention home, or detention facility; the minor may be released from placement or detention and placed on probation on order of the court and may also be released by the department, in its discretion, under § 200 of this chapter; or

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation may be for an indeterminate period of time, not to extend past a specified date and in no event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment.

offense the minor is alleged to have committed, the minor's history of delinquency, the probable cause of the minor's delinquent behavior, and the facilities available to the division of youth and adult authority for treating the minor.

(e) If a person who has been tried as an adult under this section has completed his sentence and five years have elapsed, he may petition (or the Department of Health and Social Services may petition for him) the superior court to seal the records of all criminal proceedings against him and all punishments assessed against him, except for traffic offenses, while he was a minor. If the superior court finds that the punishment assessed against the person has had its intended rehabilitative effect, the superior court shall order the record of proceedings and the record of punishments sealed. Sealing the records restores civil rights removed because of a conviction. No person may [EVER] use records so sealed for any purpose except that the court may order their use for good cause shown or may order their use by an officer of the court in making a presentencing report for the court.

* Sec. 14. AS 47.10.080(a) is amended to read:

(a) The court, at the conclusion of the hearing, or thereafter as the circumstances of the case may require, shall find and enter a judgment that the minor is or is not a delinquent [,] or a child in need of aid [SUPERVISION, OR DEPENDENT MINOR].

* Sec. 15. AS 47.10.080(b) is repealed and re-enacted to read:

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Social Services for a period of time not to exceed two years or in any event extend past the day the minor becomes 19, except that the department may petition for and the court may grant in a hearing (A) two-year extensions of commitment which do not extend beyond the child's 19th

birthday if the extension is in the best interests of the minor and the public; and (B) an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it; the department shall place the minor in the juvenile facility which the department considers appropriate and which may include a juvenile correctional school, detention home, or detention facility; the minor may be released from placement or detention and placed on probation on order of the court and may also be released by the department, in its discretion, under sec. 200 of this chapter;

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation may be for a period of time, not to exceed two years and in no event extend past the day the minor becomes 19, except that the department may petition for and the court may grant in a hearing:

(A) two-year extensions of supervision which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and

(B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it;

(3) order the minor committed to the department and placed on probation, to be supervised by the department, and release him to his parents, guardian, other suitable person, or suitable nondetention setting such as a family home, group care facility, or child care facility, whichever the department considers appropriate to implement the treatment plan of the predisposition report; if the court orders the minor placed on probation, it may specify the terms and conditions of

Sec. 16. AS 47.10.080(c) eliminates indeterminate custody and limits an order of custody to two years. Provisions are made for two year extensions of custody to be decided by the court in a hearing if the extension is in the best interests of the minor and the public up to the child's 19th birthday. It also makes provisions for one year supervision past age 19 with the consent of the child. The Department must give the child, parents, or guardian and attorneys reasonable notice of transfer of placement.

Sec. 16
AS 47.10.080

(c) If the court finds that the minor is dependent, it shall

(1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;

(2) order the minor released to his parents, guardian, or some other suitable person, and, in appropriate cases, order the parents, guardian, or other person to provide medical or other care and treatment; if the court releases the minor it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor reaches majority, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; or

(3) by order, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, if one of the following conditions exists:

(A) Each parent, or the surviving parent, or one parent if the other has been deprived of custody and visitation rights wishes to relinquish the child to the department or to a legally appointed guardian of the person of the child for adoptive purposes, and the relinquishment is in writing, signed and acknowledged before the court or duly authorized representative of the department and filed with the court;

(B) the child has been abandoned for a period of not less than six months by

(i) both parents, or

(ii) the surviving parent, or

(iii) one parent if the other has been deprived of custody and visitation rights;

(C) each parent, the surviving parent, or one parent if the other has been deprived of custody and visitation rights has been judicially determined to be of unsound mind and the disability has not been removed and the parent has been hospitalized for reasons of mental illness diagnosed as permanent or of long duration; or

(D) each parent, or the surviving parent, or one parent if the other has been judicially deprived of custody and visitation rights, has demonstrated by his conduct, proven by clear and convincing proof amounting to more than a preponderance of the evidence that he is unfit to continue to exercise his parental rights and responsibilities.

probation; the department may transfer the minor, in his best interests, from one of the probationary placement settings listed in this paragraph to another, and the minor, his parents or guardian and attorney are entitled to reasonable notice of the transfer; the probation may be for a period of time, not to exceed two years and in no event extend past the day the minor becomes 19, except that the department may petition for and the court may grant in a hearing:

(A) two-year extensions of commitment which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and

(B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it; or

(4) order the minor to make suitable restitution in lieu of or in addition to the court's order under (1), (2) or (3) of this subsection.

* Sec. 16. AS 47.10.080(c) is repealed and re-enacted to read:

(c) If the court finds that the minor is a child in need of aid, it shall

(1) order the minor committed to the department for placement in an appropriate setting for a period of time not to exceed two years or in any event past the date the minor becomes 19 years of age, except that the department may petition for and the court may grant in a hearing (A) two-year extensions of commitment which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and (B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it; the department may transfer the minor, in his best interests, from one placement

A fourth option is added. The court may dispense with the Department's supervision and return the child to his/her family.

(3) In cases where parental rights have been terminated, the Department or guardian must report annually to the court on efforts being made to find a permanent placement for the child. In addition, for parental rights to be terminated a child has to have been adjudicated CINA and parental fault must be clear and convincing that the child is a CINA. It must be shown that the parental conduct is going to continue. This is directly tied to 10 (a) (2).

setting to another, and the minor, his parents or guardian and attorney are entitled to reasonable notice of the transfer;

(2) order the minor released to his parents, guardian, or some other suitable person, and, in appropriate cases, order the parents guardian, or other person to provide medical or other care and treatment; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor, but the court may dispense with the department's supervision if the court finds that the adult to whom the minor is released will adequately care for the minor without supervision; the department's supervision may not exceed two years or in any event extend past the date the minor reaches age 19, except that the department may petition for and the court may grant in a hearing:

(A) two-year extensions of supervision which do not extend beyond the child's 19th birthday if the extension is in the best interests of the minor and the public; and

(B) an additional one-year period of supervision past age 19 if the continued supervision is in the best interests of the person and the person consents to it; or

(3) by order, upon a showing in the adjudication by clear and convincing evidence that there is a child in need of aid under sec. 10(a)(2) of this chapter as a result of parental conduct and upon a showing in the disposition by clear and convincing evidence that the parental conduct is likely to continue to exist if there is no termination of parental rights, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, and the department or guardian shall report annually to the court on efforts being made to find a permanent placement for the child.

Sec. 18. AS 47.10.080(f) adds the provision that the minor and the custodian are entitled to request a review and that reasonable notice in advance of the review will be granted to all parties.

* Sec. 17. AS 47.10.080(e) is amended to read:

(e) If the court finds that the minor is not delinquent or [,] a child in need of aid [SUPERVISION, OR DEPENDENT], it shall immediately order his release from the department's [ITS] custody and his return to his parents, guardian, or custodian, and dismiss [CLOSE] the case.

* Sec. 18. AS 47.10.080(f) is amended to read:

(f) A minor found to be delinquent or [,] a child in need of aid [SUPERVISION, OR DEPENDENT] is a ward of the state as long as he is committed to the department or the department has the power to supervise his actions. The court shall review an order made under (b) or (c)(1) or (2) [OR (j)] of this section annually, and may review the order more frequently to determine if continued placement, probation, or supervision, as it is being provided, is in the best interest of the minor and the public [, AND TO DETERMINE IF THE MINOR IS BEING TREATED FAIRLY]. The department, the minor, [OR] the minor's parents, [OR] guardian, or custodian are [IS] entitled, when good cause is shown, to a review on application. If the application is granted, the court shall afford these parties and their counsel reasonable notice in advance of the review and hold a hearing where these parties and their counsel shall be afforded an opportunity to be heard. The minor shall be afforded the opportunity to be present at the review.

* Sec 19. AS 47.10.085 is amended to read:

Sec. 47.10.085. CHILD IN NEED OF AID [DEPENDENT MINOR]; RELIGIOUS TREATMENT. In a case in which the minor's status as a child in need of aid [DEPENDENT MINOR] is sought to be based on his need for medical care, the court may, upon consideration of the health of the minor and the fact, if it is a fact, that the minor is being provided treatment by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited

See explanation of Sec. 14. AS 47.10.080 on limits of custody.

practitioner of the church or denomination, dismiss the proceedings and thereby close the matter. This may be done, in the interests of justice and religious freedom, on the court's own motion or upon the application of a party to the proceedings, at any stage of the proceedings after information is given to the court under sec. 20(a) of this chapter.

* Sec. 20. AS 47.10.090(b) is amended to read:

(b) The name or picture of a minor under the jurisdiction of the court may not be made public in connection with the minor's status as a delinquent [OR DEPENDENT] child or a child in need of aid unless authorized by order of the court, except that the name of a minor who is found for the second time to have violated a law, which if committed by an adult would be a felony, shall be made public unless the court, for good cause, in certain individual cases, enters an order prohibiting the disclosure.

* Sec. 21. AS 47.10.100(a) and (c) are amended to read:

(a) The court retains jurisdiction over the case and may at any time stay execution, modify, set aside, revoke, or enlarge a judgment or order, or grant a new hearing, in the exercise of its power of protection over the minor and for his best interest, for a period of time not to exceed two years or in any event extend past the day the minor becomes 19 [UNTIL HE BECOMES 19 YEARS OF AGE], unless sooner discharged by the court, except that the department may apply for and the court may grant an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it [PETITION THE COURT FOR CONTINUED SUPERVISION FOR AN ADDITIONAL ONE-YEAR PERIOD FOR MINORS WHO HAVE NOT RESPONDED TO TREATMENT]. An application for any of these purposes may be made by the parent, guardian, or custodian acting in behalf of the minor, or the court may, on its own motion, and after reasonable notice to interested

Refer to Sec. 10. AS 47.10.040.

parties and the appropriate department, take action which it considers appropriate.

(c) If a minor is adjudicated a delinquent or [,] a child in need of aid [SUPERVISION, OR A DEPENDENT] before his 18th birthday, the court may retain jurisdiction over him after his 18th birthday for the purpose of supervising his rehabilitation, but the court's jurisdiction over him under this chapter never extends beyond his 19th birthday, except that the department may apply for and the court may grant an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it [PETITION THE COURT FOR CONTINUED SUPERVISION FOR AN ADDITIONAL ONE-YEAR PERIOD FOR MINORS WHO HAVE NOT RESPONDED TO TREATMENT]. The department may retain jurisdiction over a child between his 18th and 19th birthdays for the purpose of supervising his rehabilitation, if he has been placed under the supervision [IS COMMITTED TO THE CUSTODY] of the department before his 18th birthday, except that the department may apply for and the court may grant an additional one-year period of supervision past age 19 if continued supervision is in the best interests of the person and the person consents to it [PETITION THE COURT FOR CONTINUED SUPERVISION FOR AN ADDITIONAL ONE-YEAR PERIOD FOR MINORS WHO HAVE NOT RESPONDED TO TREATMENT].

* Sec. 22. AS 47.10.110 is amended to read:

Sec. 47.10.110. APPOINTMENT OF GUARDIAN OR CUSTODIAN. When, in the course of a proceeding under this chapter, it appears to the court that the welfare of a minor will be promoted by the appointment of a guardian or custodian of his person, the court may make the appointment. The court shall have a summons issued and served upon the parents of the minor, if they can be found, in a manner and within a time before the hearing which the court considers reasonable. The court may determine

whether the father, mother, or the Department of Health and Social Services shall have the custody and control of the minor. If the minor is of sufficient age and intelligence to state his desires, the court shall consider his desires [OVER 14 YEARS OF AGE, HIS DESIRES IN THE MATTER SHALL BE GIVEN CONSIDERATION BY THE COURT].

* Sec. 23. AS 47.10.120(a) is amended to read:

(a) When a child in need of aid [DEPENDENT MINOR] is committed under this chapter the court may, after giving the parent a reasonable opportunity to be heard, adjudge that the parent shall pay in a manner which the court directs a sum which will cover in full or in part the support of the child in need of aid [DEPENDENT MINOR]. When a delinquent minor is committed under this chapter the court shall order that the parent of the minor pay in a manner which the court directs a sum which will cover in full or in part the support of the delinquent minor.

* Sec. 24. AS 47.10.142(c) and (d) are amended to read:

(c) When a child is taken into custody under (a) or (b) of this section, the department shall immediately, and in no event more than 12 hours later unless prevented by lack of communication facilities, notify the parents or the person or persons having custody of the child and the court of the action and file with the court a petition alleging that the child is a child in need of aid [DEPENDENCY]

(d) The court shall immediately, and in no event more than 48 hours after being notified unless prevented by lack of transportation, hold a hearing at which the minor, if his health permits, and his parents or guardian, if they can be found, shall be permitted to be present. The court shall determine whether probable cause exists for believing the minor to be a child in need of aid [DEPENDENT MINOR], as defined in sec. 290(8) [290(3)] of this chapter. The court shall inform the minor, and his parents or guardian if they can be found, of the

Sec. 26. AS 47.10.081(b) requires the department to submit a predisposition report to the court prior to the disposition hearing and specifies what shall be included in the report.

Sec. 26. AS 47.10.081(c) The predisposition report will be made available by the court to the child, his parents, the attorneys representing the parties and the guardian ad litem not less than 10 days before the disposition hearing. Because of this 10 day requirement the adjudication and disposition hearings will always be separate proceedings.

reasons given as constituting probable cause and the reasons given as authorizing his temporary placement.

* Sec. 25. AS 47.10.150(1) is amended to read:

(1) purchase, lease or construct buildings or other facilities for the care, detention, rehabilitation and education of <u>children in need of aid</u> [DEPENDENT] or delinquent minors;

* Sec. 26. AS 47.10 is amended by adding new sections to read:

Sec. 47.10.081. PREDISPOSITION HEARING REPORTS. (a) Before the disposition hearing of a delinquent minor the department shall submit a predisposition report with a recommended plan of treatment to aid the court in its selection of a disposition, and any further information which the court may request.

(b) Before the disposition hearing of a child in need of aid the department shall submit a predisposition report to aid the court in its selection of a disposition. This report shall include, but is not limited to, the following:

(1) a statement of changes in the child's or parent's behavior, which will aid the court in determining that supervision of the family or placement is no longer necessary;

(2) if removal from the home is recommended, a description of the reasons the child cannot be protected or rehabilitated adequately in the home, including a description of any previous efforts to work with the parents and the child in the home and the parents' attitude toward placement of the child;

(3) a description of the potential harm to the child which may result from removal from the home and any efforts which can be made to minimize such harm; and

(4) any further information which the court may request.

(c) The court shall inform the child, his parents and the attor-

Sec. 26. AS 47.10.082 requires that dispositions be made in the best interests of the child and the public. The court also must consider the state's ability to take custody. The state must show that it has the ability to do more than warehouse the child.

Sec. 26. AS 47.10.083 This is a significant change. It requires the court at the annual review hearing to order return of the child to the home unless the court finds by a preponderance of the evidence that the reason for original removal from the home continues to exist; specifies the information to be provided in the review hearing. The burden is on the state to show why it should retain custody.

Sec. 26. AS 47.10.084 attempts to define the responsibilities of legal custodians and parents. (a) and (c) need to be read together, and (b) if a guardian is ever involved. These are terms which have been used and never clearly defined.

neys representing the parties and the guardian ad litem that the pre-disposition report will be available to them not less than 10 days before the disposition hearing.

(d) For purposes of this section "parents" means the natural or adoptive parents, and any legal guardian, relative, or other adult person with whom the minor has resided and who has acted as a parent in providing for the minor for a continuous period of time before this action.

Sec. 47.10.082. BEST INTERESTS OF THE CHILD. In making its dispositional order under sec. 80(b) of this chapter the court shall consider the best interests of the child and the public, and in making its dispositional order under sec. 80(c) of this chapter the court shall consider the best interests of the child; in either case the court shall consider also the ability of the state to take custody and to care for the child to protect his best interests under secs. 10 - 142 of this chapter.

Sec. 47.10.083. REVIEW HEARING INFORMATION. In the case of a child in need of aid, the child shall be returned home at the review hearing under sec. 80(f) of this chapter unless the court finds by a preponderance of the evidence that the basis upon which the child was adjudicated under sec. 10(a)(2) of this chapter continues to exist. If the child is not returned home, the court shall establish on the record:

(1) why the child was removed from the home;

(2) what services have been provided to or offered to the parents to facilitate reunion;

(3) what services were utilized by the parents to facilitate reunion;

(4) the visitation history between the parents and the child;

(5) whether additional services are needed to facilitate the

return of the child to his parents;

(6) when return of the child can be expected.

Sec. 47.10.084. LEGAL CUSTODY, GUARDIANSHIP, AND RESIDUAL PARENTAL RIGHTS AND RESPONSIBILITIES. (a) When a child is committed under sec. 80(b)(1) or (c)(1) of this chapter to the department or released under sec. 80(b)(2) or (3) or (c)(2) of this chapter to his parents, guardian, or other suitable person, a relationship of legal custody exists. This relationship imposes on the department and its authorized agents or the parents, guardian, or other suitable person the responsibility of physical care and control of the child, the determination of where and with whom the child shall live, the right and duty to protect, train and discipline the child, and the duty of providing the child with food, shelter, education, and medical care. These obligations are subject to any residual parental rights and responsibilities and rights and responsibilities of a guardian if one has been appointed. When parental rights have been terminated, or there are no living parents and no guardian has been appointed, the responsibilities of legal custody include those in (b) and (c) of this section. The department or person having legal custody of the child may delegate any of the responsibilities under this section, except authority to consent to marriage, adoption, and military enlistment may not be delegated. For purposes of this chapter a person in charge of a placement setting is an agent of the department.

(b) When a guardian is appointed for the child, the court shall specify in its order the rights and responsibilities of the guardian. The guardian shall be removed only by court order. The rights and responsibilities may include, but are not limited to, having the right and responsibility of reasonable visitation, consenting to marriage, consenting to military enlistment, consenting to major medical treat-

Sec. 27
AS 47.10.290 (2)

(2) "delinquent minor" is a minor whom the court determines is within the provisions of § 10 (a) (1) of this chapter;

This makes caring a broader more significant term than just meeting physical needs.

Sec. 28
AS 47.10.290.

(3) "dependent minor" is a minor whom the court determines is within the provisions of § 10 (a) (4), (5), (6), (7), (8), or (9) of this chapter;

(7) "child in need of supervision" is a minor whom the court determines is within the provisions of § 10 (a) (2), (3) or (6). (§ 1 art I ch 145 SLA 1957; am § 5 ch 110 SLA 1967; am §§ 5, 6 ch 27 SLA 1970)

Sec. 29
AS. 47.10.080.

(j) If the court finds the minor is a child in need of supervision it shall make any of the following orders of disposition for his supervision, care and rehabilitation:

(1) any order which is authorized under (c) of this section; or

(2) order the minor placed on probation under those conditions and limitations that the court may prescribe.

ment, obtaining representation for the child in legal actions, and making decisions of legal or financial significance concerning the child.

(c) When there has been transfer of legal custody or appointment of a guardian and parental rights have not been terminated by court decree, the parents shall have residual rights and responsibilities. These residual rights and responsibilities of the parent include, but are not limited to, the right and responsibility of reasonable visitation, consent to adoption, consent to marriage, consent to military enlistment, consent to major medical treatment except in cases of emergency or cases falling under AS 09.65.100, and the responsibility for support, except if by court order any residual right and responsibility has been delegated to a guardian under (b) of this section.

* Sec. 27. AS 47.10.290(2) is repealed and re-enacted to read:

(2) "delinquent minor" means a minor found to be within the jurisdiction of the court under sec. 10(a)(1) of this chapter;

* Sec. 28. AS 47.10.290 is amended by adding new paragraphs to read:

(8) "child in need of aid" means a minor found to be within the jurisdiction of the court under sec. 10(a)(2) of this chapter;

(9) "caring" under sec. 10(a)(2)(A) means to provide for the physical, emotional, mental, and social needs of the child.

* Sec. 29. AS 47.10.080(j) and 47.10.290(3) and (7) are repealed.

* Sec. 30. Section 3 of this Act has the effect of limiting the discretionary authority of the court to appoint a guardian ad litem under Rule 17(b), Alaska Rules of Civil Procedure, and Rules 11(a) and 15, Alaska Rules of Children's Procedure, by requiring as a condition of appointment that the court find that the best interests of the child need articulation. Further, this Act requires limitation of the duration of the appointment, limits the scope of the guardian ad litem's authority, and establishes the geographical

Sec. 34 explains how to deal with custody and the effective date of this act.

area from which the guardian ad litem may be selected.

* Sec. 31. Section 18 of this Act has the effect of adding to the court's responsibilities when holding a review under Rule 28, Alaska Rules of Children's Procedure, by requiring the court to hold a hearing upon a showing of good cause, give notice, and afford an opportunity to be heard.

* Sec. 32. Section 7 of this Act has the effect of changing Children's Rule 12 by deleting any references to "truant from school", "endanger(ing) the morals or health", "being wayward or habitually disobedient", or "uncontrolled", and has the effect of substituting the words "child in need of aid" for the terms "child in need of supervision" and "dependent" where those two terms appear in the Rules of Children's Procedure.

* Sec. 33. Section 12 of this Act has the effect of adding to the court's responsibilities under Rules 14 and 15, Alaska Rules of Children's Procedure, by requiring the court to appoint counsel for an indigent minor unless the minor has made a voluntary, knowing and intelligent waiver, and in certain cases of delinquency where there has been waiver of counsel to appoint counsel for the minor unless the court is satisfied that the minor consulted with an attorney before his waiver of counsel.

* Sec. 34. The portions of AS 47.10.080(b) and (c) in secs. 15 and 16 of this Act which specify the length of commitment to the department or probation or supervision by the department are applicable to those minors affected under former AS 47.10.080(b), (c) and (j) before the effective date of this Act so that the commitment, probation or supervision of minors by the department before the effective date of this Act shall continue, but may not exceed two years from the effective date of this Act unless two-year extensions have been granted by the court under this Act. The commitment, probation or supervision of minors with pending judicial actions under AS 47.10.010(a) on the effective date of this Act may not exceed two years unless two-year extensions have been granted by the court under this Act.

#

SIGNIFICANT ADDITIONAL

STATUTORY AMENDMENTS AFFECTING CHILDREN

It is the intent of these amendments to provide for placement of children in surroundings which are socially and culturally desirable and with persons who are able to meet their special needs. Placement of children with blood relatives will work to prevent loss of identity and self-esteem, and provide for increased family and cultural stability, security and solidarity.

(a) Subject to (e) and (f) of this section, the [THE] Department of Health and Social Services shall arrange for the care of every child committed to its custody by placing him in a foster home or in the care of an agency or institution providing care for children inside or outside the state. The department may place a child in a suitable family home, with or without compensation, and may place a child released to it, in writing verified by the parent, or guardian or other person having legal custody, for adoptive purposes, in a home for adoption in accordance with existing law.

"AS 47.10.230 is amended by adding new subsections to read:

(e) A child may not be placed in a foster home or in the care of an agency or institution providing care for children if a blood relative exists who requests custody of the child. However, the department may retain custody of the child and provide for its placement in the same manner as for other children if it makes a determination, supported by clear and convincing evidence, that the custody of the child by the blood relative will result in physical or emotional damage. In making that determination, poverty, including inadequate or crowded housing, on the part of the blood relative is not considered prima facie evidence that physical or emotional damage to the child will occur. This determination may be appealed to the superior court to hear the matter de novo.

(f) If a blood relative of the child specified under (e) of this section exists and agrees that the child should be placed elsewhere, before placement elsewhere the department shall fully communicate the nature of the placement proceedings to the relative. Communication under this section shall be made in the relative's native language, if necessary. Nothing in this section or in (e) of this section applies to child placement for adoptive purposes.

MEMEORANDUM April 12, 1977

SUBJECT: Committee Substitute for HB 204 - Changes in Original Bill
TO: Representative Terry Gardiner, Chairman House Judiciary Committee
FROM: Andrew Brown

1. Sections 4 & 5 of HB 204 were deleted pursuant to Committee direction, because they relate to criminal laws on excusable homicide and delinquency which will be dealt with in the criminal law revision.

2. Subsection (4) in Section 6 of the bill and sections 7 - 15 have been deleted from HB 204 and introduced in a new separate bill HB 419. These sections deal with adoption, adoption assistance and voluntary relinquishment of parental rights. There is now a sponser substitute for HB 419 which allows for voluntary termination of parental rights either through the court or a representative of the Department of Health and Social Services or a licensed placement agency. This is the only change in HB 419.

3. The placement of the words "the child" in Section 20 of the original bill in line 13 pg 10 has been moved over to the beginning of each phrase in paragraphs (A) - (E). This should make reading of AS 47.10.010(a)(2) easier.

4. Section 20 of the original HB 204 is further changed by defining "mental harm" in line 24 pg 10. The new language reads in (a)(2)(B) "... prevent his suffering substantial physcial harm, or mental harm as evidenced by failure to thrive, severe anxiety, depression, withdrawal, or untoward aggressive behavior or hositility toward others, and his parents are unwilling to provide the medical treatemnt." This new language should remove any vagu ness problems with the use of the term "mental harm".

5. Another change in Section 20 of the original bill is the addition of the word "either" in line 2 pg 11 after the word "abused". This is to make clear that the sexual abuse covered in (D) can be the result of three different situations.

6. In line 19 pg 22 of the original bill the three days has been changed to 10 days.

These were the only changes requested by the Judiciary Committee in its March 26th hearing at which I testified on HB 204.

CHILDREN IN MASSACHUSETTS --- AT THE TOP OF THE LIST

THE GOVERNOR'S RECOMMENDATIONS FOR THE

1974 - 75 CHILDREN'S BUDGET

FACT SHEET

A Major Commitment to Children

The 1974-75 Children's Budget will be submitted by Governor Sargent on January 23rd. The budget includes:

1. a recommendation that 20.4 million new dollars be committed to programs and services to children;

2. the funding of thirty-nine area citizen Councils for Children in the amount of $150,000 for each Council to develop or continue new community-based services for special needs children and to provide each Council with some staff support.

These funding recommendations place children as the single highest priority for service expansion in the 1974-75 budget. It also represents the highest single increase in the appropriation for new programs in human services in recent years.

A Major Accomplishment for Children's Advocacy Groups

The funds and programs recommended in this budget stem from documented reports and studies from a number of citizen commissions and task forces including the Governor's Advisory Committee on Child Development, the Governor's Commission on Child Abuse, and the Governor's Commission on Adoption and Foster Care. It also represents the culmination of untiring efforts of literally dozens of child advocacy groups over the past years. Finally, the budget reflects the effectiveness of the Office for Children as a coordinating agency and as a voice for children within the governmental process.

A Major Commitment to Local Decision-Making --- The Children's Councils

The Office for Children's most important legislative mandate is to assure parents a decisive role in the planning, operation, and evaluation of programs which aid families in the care of children. In its first year, the Office has helped organize the thirty-nine area Councils for Children to enable the Office to develop and coordinate children's services according to priorities set at the local level. Council for Children members -- parent-consumers and providers representing every children's age group and service need -- have played a significant role in:

1. determining how interdepartmental Project for Children monies are spent in their area;

2. developing, with the Office, area information, referral and advocacy programs for individual children in need of services;

3. setting priorities for the 1975-76 Children's Budget by systematically feeding their local priorities into central Office for Children.

BUDGET DETAILS

The 1974-75 Children's Budget is a $20.4 million package of items representing new and improved services for children. These items are part of the state budget which the Governor is submitting to the Legislature for the upcoming fiscal year. They represent services provided by the Office for Children and the Departments of Mental Health, Public Health, Public Welfare and Youth Services.

New Area Programs -- $4,231,750 increase over 74

Office for Children - $3.131.750

The Office for Children budget includes thirty-nine area allocations which total $5.85 million and will allow the Office for Children, upon the recommendation of Councils for Children, to continue programs begun this year and to develop new community based programs for special needs children. The new monies requested will also provide staff support for these volunteer citizen's Councils.

Department of Mental Health - $1,100,000

For the first time, the Department of Mental Health budget commits $1.1 million for developing local services for children recommended by Mental Health and Retardation Area Boards.

New and Expanded Day Care Services -- $5,334,540 increase over 74

Department of Public Welfare - $1,750,000

New funds have been earmarked to increase by about 600 across the state the number of children served in day care programs funded through the Department of Public Welfare. Since this money would be matched by federal funds under Title IV-A of the Social Security Act, children eligible for these services would be those of families on public assistance.

Department of Public Welfare - $1,984,790

Expansion in state funds available for day care under the donated funds program would provide day care for an additional 600 children.

Department of Public Welfare - $1,000,000

A new pilot program, funded through the Welfare Department, would for the first time provide day care to children of working families on a sliding fee scale basis.

Office for Children - $100,000

A small number of staff would be added to the Office for Children licensing unit in order to license and provide technical assistance to the growing number of day care centers and family day care programs.

Department of Public Health - $371,000

Three new day care centers for physically handicapped children would be created in parts of the state like Western Massachusetts and the Fall River/New Bedford area, where such programs presently do not exist. With the creation of these programs, a total of 200 physically handicapped pre-schoolers would be served in six centers across the sta .

Department of Public Health - $74,960

The Baylies Nursery Program in Canton, one of the three existing centers for physically handicapped pre-school children, is unique in that it also includes non-handicapped children. Begun as a pilot program, this nursery would gain permanent status in the new budget as part of the Massachusetts Hospital School.

Department of Mental Health - $53,790

By upgrading the salary status of aides in clinical nurseries for retarded children, the budget would guarantee each of the 112 programs across the state two trained staff persons for every twelve children, many of whom are multiply-handicapped.

Community-Based Care - $8,367,965 increase over 74

Department of Public Welfare - $2,200,000

Proposed new rates for foster care are significantly higher than the current rate of $22 - $25 per week, or $35 - $50 for the care of children with special needs.

New Proposed Rates

For children age 0 - 5	$22 per week
For children age 6 - 10	$32 per week
For children age 11+	$42 per week
With special needs	$60 per week

Department of Public Welfare - $452,000

Increased funds would cover a number of new foster care services, including liability insurance for foster families. The funds would also create a pilot specialized foster care program, providing foster homes for the first time for 56 children across the state.

Department of Public Welfare - $18,825

The Massachusetts Adoption Resource Exchange, which has had considerable success in finding homes for "hard-to-place" children, would gain staff who would publicize the need for adoptive homes.

Office for Children - $58,159

A new Family Resource Exchange, modeled after the Massachusetts Adoption Resource Exchange and administered by the Office for Children, would pool state and private agency publicity and recruitment efforts, and would increase the number of available foster homes.

Department of Public Welfare - $100,000

A new specialized foster home coordination unit would be created to train foster parents in caring for children with special needs, including retarded, physically handicapped, and emotionally disturbed children.

Department of Mental Health - $243,316

A 1973 agreement between the Departments of Mental Health and Public Welfare and the Office for Children paved the way for providing community care for 125 mentally retarded children now in state institutions. Funds in the new budget would provide these children with developmental day services in the community, where they will live in foster homes or small group residences.

Department of Public Welfare - $500,000

The Division of Family and Children's Services would for the first time provide families above IV-A income limits with counseling and homemaker services to help prevent the need for placing children in foster care. The Governor's Commission on Adoption and Foster Care strongly recommended the increased availability of these supportive services as a means of preventing the breakup of families.

Department of Public Welfare - $1,115,505

Protective services for abused and neglected children would be expanded by an increase in the donated funds program.

Department of Public Welfare - $84,601

Funds in the new budget would provide additional child welfare workers needed to cover anticipated new foster care cases.

Department of Public Welfare - $660,000

Increases in the donated funds program would allow additional children to benefit from community-based drug rehabilitation services and developmental services for the retarded.

Department of Mental Health - $245,559

A new program aimed at providing early screening and supportive services for retarded infants up to age 3 would be created in the Department of Mental Health. Teams consisting of a variety of specialists headed by a social worker would provide services and training to children and parents in their homes.

Department of Youth Services - $1,920,000
Increase in purchase of service account will cover cost increases and provide selective expansion of programs in the Department of Youth Services.

Department of Youth Services - $125,000
Funds to staff a new fiscal control system planned by the Department of Youth Services are aimed at putting the agency on a firm financial footing.

Department of Mental Health - $500,000
The 20-acre campus of the former Northampton School for Girls is the site of a planned interdepartmental children's center serving Western Massachusetts. This new center would provide a wide variety of day and short-term residential services for children with special needs. The Office for Children and the Department of Mental Health would jointly coordinate the development of these privately-run programs according to recommendations made by a broadly-based task force made up of both parents and professionals in the area.

Department of Public Health - $15,000
Recent legislation authorized the creation of a state-wide screening program to detect deafness in children thought to be at risk. The fiscal year 1975 budget would allocate additional funds to carry out this program in the Department of Public Health, beginning in 1974.

Office for Children - $130,000
The Office for Children would purchase inter-regional programs of state-wide significance for children with special needs not being served by state agency programs.

Residential Programs -- $2,468,000 increase over 74

Department of Public Welfare - $500,000
Funds in the new budget would cover rate increases in group homes and institutional programs for children separated from their families.

Department of Public Welfare - $288,000
Additional money is earmarked in the budget to provide foster parents with an increased allowance for clothing and hospital care to keep up with today's costs.

Department of Public Health - $265,000

The new Canton Nursery Program for multiply-handicapped children up to age 5 would become a permanent Public Health Department program in the upcoming fiscal year. Begun this spring with funding from the Office for Children, the program includes a month's stay for child and parent at the Massachusetts Hospital School, an evaluation of the child's immediate and long-term rehabilitative needs, training of parents to fulfill these needs at home, and follow-up services after the child leaves. The goal of the Canton program, which serves up to 100 children per year from all over the state, is to enable multiply-handicapped children to avoid institutionalization.

Department of Public Health - $395,000

Increases in the Massachusetts Hospital School budget would increase from 175 to 200 the number of children served at any one time, would supply new equipment for the brace shop, and expand other services. The School provides an extensive variety of medical, therapeutic, and educational services for physically handicapped Massachusetts children of all ages.

Department of Mental Health - $1, 020,000

Funds totalling $3 million are being requested by the Governor for needed improvements in the state's schools. Slightly over $1 million of this amount will go toward additional direct services and improved living conditions for children in the state schools.

TOTAL CHILDREN'S BUDGET - $20,402,255*

*The total of $20,402,255 requested is exclusive of additional funds provided to implement Chapter 766, the Special Education Act, which takes effect on September 1, 1974.

CRITERIA FOR EVALUATING NATIONAL CHILD DEVELOPMENT LEGISLATION

prepared by the

National Association of State Directors of Child Development

I. Type of Service. We believe that national child development legislation, if it is to be most effective, should provide for the following direct and support services for children. In some instances, services for the child are delivered to the parent or parents.

A. Direct services

1. Child care
2. Health care
3. Nutrition
4. Education
5. Legal services and child advocacy
6. Social services
7. Mental Health services

B. Support services

1. Transportation
2. Training
3. Facilities
4. Research and Development
5. Planning, Coordination and Technical Assistance
6. Monitoring and Evaluation

II. Eligibility. We believe that eligibility guidelines written into child development legislation should:

A. focus primarily on the prenatal through five year old period

B. provide programs for children above five years of age with special need; not now being met

C. provide for the unmet needs of all children regardless of economic level, race or creed

III. Administration and Funding. The following conditions should, in our opinion, be written into national child development legislation.

A. Funds should flow to the States

B. States should provide a comprehensive state plan for child development which would:

1. contain an assessment of needs and resources
2. address federal priorities if state assessment indicates that federal priorities are not being met
3. address the question of interagency coordination
4. include a process for the involvement of local private and public agencies and parents.

C. In the absence of state action, local governmental units may submit plans

D. All state agency plans for receipt of funds for child development services must tie into the state comprehensive plan for child development.

COUNCILS FOR CHILDREN

State Government and Community Decision-Making

OFFICE FOR CHILDREN
120 Boylston Street
Boston, Mass. 02116

January, 1974

Of all the components that make up the Office for Children, the key ingredient to its uniqueness, and ultimately its effectiveness, is its community base. The formation of 39 Councils for Children, each representing a cross-section of children's interests in every area in the state, has been the Office's first priority. With roughly two dozen community organizers, drawn from the various "children's constituencies" the Office hopes to attract, the effort to bring together coalitions of parents, teenagers, and children's service professionals began in early 1973. These staff community representatives began by contacting every identifiable group related to children and drawing them together as an organizing committee. A publicity campaign, complete with leaflets, mailings, newspaper and radio announcements, and posters, summoned to a public organizing meeting a diverse range of people whose common denominator is their active concern for children and their determination to have a say in the state's policies affecting kids.

The general recruitment meeting, at which Office for Children director David Liederman explained the goals of the Office for Children and the possibilities open to a vocal Council for Children, is followed in each area by an election of the Council's first executive board. Aside from the Office's stipulation that at least half of the board be consumers (persons with no financial interest in providing children's services) and that the board be a representative group elected in an open process, Council members are free to design a board structure in whatever way they believe is most representative of children's interests --- geographically and in terms of children's ages, special needs, types of services required, and sometimes ethnic background. The elections themselves are frequently colorful events. Parents, teachers, social workers, welfare mothers, day care advocates, nurses, foster parents, teenagers, local government officials, and other people representing children's concerns converge to mark their ballots for candidates for their Council's decision-making board.

The Councils for Children are now in various stages of formation. Some held board elections as early as last spring. In other parts of the state, community representatives have just begun the process of informing their cities and towns and neighborhoods about the Office for Children and the prospects of forming a Council. The Councils already organized vary widely: some are already sophisticated, vocal and energetic, others are feeling their way along. Some have experienced the growing pains that come when factions that have traditionally competed for limited social service resources fall into competing for control of an organization; others have felt the excitement of building a unique coalition of diverse members feeling their own strength and working for a common goal.

There is such a thing as the politics of children's services; this has existed since the first orphanages and child welfare organizations. The creation of an Office for Children was really an acknowledgement of the political realities involved in making children's services high among the state's priorities. Together, the Office for Children and the Councils are working as children's advocates both within and outside government. How successfully they will each function still remains to be seen.

For the Office for Children, the development of the Councils is both exciting and bewildering. Thousands of parents and professionals mobilized around children's issues could form an army -- or a monster (depending on where you are coming from!). And existing state government institutions -- the large service-providing agencies with whom the Office for Children works regularly on a whole array of issues -- have never felt comfortable with either an army or a monster. Whatever from the Councils finally take, however, there are already some early signs that they are putting behind children's issues some new weight that an Office for Children, operating within the constraints of the bureaucracy, could never muster on its own.

THE MAKING OF A TYPICAL COUNCIL FOR CHILDREN -- HIGHLIGHTS

The Organizing Process

The Greater Springfield Council for Children, serving Springfield and the outlying communities of Agawam, Hampden, East Longmeadow, Longmeadow, West Springfield and Wilbraham, formed during the spring of 1973. The recruitment process was led by an Office for Children community representative, a young black woman who had been the former assistant director of the community Head-start program. The area's Community Coordinated Child Care (4-C) Committee, advocates of early childhood education, served as the nucleus of an organizing committee that began to reach out and include parents and professionals concerned with physically handicapped, emotionally disturbed, mentally retarded, learning disabled, and perceptually handicapped children of all ages, needs, and abilities. The group grew to include a total of almost 300 men, women, and young people interested in developing the delivery of social, medical, educational, developmental, health, and mental health services benefiting children and teenagers in the Springfield area.

The election of the board, in which 96 candidates competed for 35 seats, was held on June 27. No sooner had the winners been announced in the next morning's newspaper, than the Council experienced its first controversy -- a losing candidate challenged the election, claiming that the rules had not been adequately explained. The challenger failed to convince either the Council's organizing committee or the Office for Children that the election had proceeded improperly, however, and the elections results stood.

Since the summer, the Council has taken up several specific projects, some required by the legislation that created the Office for Children, others stemming from issues of concern to Springfield area residents.

Proposal Review

Every Council for Children is responsible for designing its own procedures for reviewing and approving the program proposals for funding through the Office for Children. The proposal review committee of the Greater Springfield Council carefully reviews the written proposals submitted to the Council by area agencies applying for Office for Children funding. If the proposed program is consistent with the Council's priorities for expanded services for children with special

needs, the program is then submitted to the Council board for approval.

The Springfield proposal review committee has already established a reputation for its tough review procedures and for examining potential programs with a fine toothed comb. The committee has upheld the Council's belief that its purpose is not to simply fund every good program that comes along, but to stretch the Council's slim resources -- $85,000 this fiscal year -- by coordinating as much as possible existing funding in the community. For example, the YWCA submitted to the Council a request for funds to buy equipment for the youth program. The Council arranged between the agency and a nearby community center talks which led to the sharing not only of equipment but also program personnel, and thus serving more children. Thus the Council for Children was able to satisfy the agency's need for supplies not through the expenditure of funds but by helping groups talk to one another -- and the Council views this role as coordinator as important as any other.

The Council has reserved for funding only those programs which provide unique services which could not be funded by any other agency and which are community priorities. One such program deals with infant care, and is operated by an agency already experienced in providing day care for preschoolers. Such a service was determined to be a priority because of an almost total lack of facilities for caring for infants, and because of the relatively high cost of providing such care with a high child/staff ratio. Funds to begin the project had already been committed by the state Department of Public Welfare, by the Junior League, and by a private agency that provides services for pregnant teenagers. The Council saw an opportunity for the Office to participate in a joint community effort to provide a badly needed service, and agreed to become a sponsor of the program. The center now provides care for up to 16 infants, children of low-income parents who would not otherwise be able to properly care for them while working during the day.

A second program which the Council approved for funding through the Office for Children is a community center whose existence had been threatened by cutbacks in the Model Cities program. The center, located in the city's Hill Area which is a priority in terms of service needs for children, has been offering a variety of day and after-school programs for children from pre-school age all the way through their teens. The Model Cities cutbacks had particularly affected those children who are bussed to schools in distant neighborhoods. The center had been providing these children with transportation from school to the center, but the cutbacks discontinued this service along with some other programs the center offered. Council for Children approval of only $1600, supplementing funds from other sources, insures the survival of the community center.

Monitoring and Evaluation

This Council committee, although its task seems perfunctory, has already been responsible for upgrading the quality of service delivery to children in the Springfield area. The committee works closely with the proposal review committee and examines programs approved for funding by the Council. In a couple of cases the committee had found weaknesses which made the program inconsistent with the Office for Children or Council requirements, and its evaluation brought about constructive changes -- such as increased involvement of parents, for instance -- in the program. The committee has now set up a liaison person in contact with each program funded by the Council, and is establishing a system for monitoring all day care programs funded by the Department of Public Welfare.

Child Abuse

The Council established a committee to tackle the very difficult problem of child abuse and neglect in the Springfield area. Composed of both parents and protective service agency representatives, the committee has had an active role finding speedy placement of children at risk in services suited to their special needs and those of their families. A program for abused and neglected children is funded by the Council and serves up to 12 infants with the most urgent service needs. Because the demand for services surpassed the capacity of this program, the committee worked to establish a day program to serve additional children. The committee's most challenging but potentially most far-reaching project is a joint effort with the Office for Children aimed at pooling the efforts, resources, and information of agencies capable of responding to child abuse. These agencies, the Council for Children, and the Office for Children's information and referral staff have made initial plans for a system in which doctors, hospitals, agencies, and others who know of abused or neglected children would report cases to a single telephone number where trained personnel would quickly and reliably assign responsibility to the appropriate agency for efficient response. A cross-reference system would immediately identify children who have been served previously by different medical or social service agencies, and would alert a responding agency to any history of child abuse in the family.

Lead Paint Poisoning

A Council for Children committee, headed by a concerned parent, has been formed to try to break the "vicious bureaucratic circle" the Council feels has stifled the action needed to prevent lead paint poisoning in Springfield, particularly in public housing. Armed with statistics collected by a pediatrician who sits on the Council, the committee is working with representatives of state and city agencies to collectively establish roles and responsibilities with regard to public information and preventive testing.

Chapter 766

A new state Special Education Law requiring local school systems to provide special education for all children who need it will be implemented next September. This controversial but progressive and potentially far-reaching legislation poses many challenges for schools, service providers, and children's advocates. A Council for Children committee, including a number of parents of children with learning disabilities, has formed to work out the role the Council will play in the next year with regard to Chapter 766. Chaired by a parent of a child in a residential school, the committee is studying the regulations for the law's implementation in an effort to plan Council strategy for insuring that adequate programs are developed and that all Springfield special needs children will benefit from the services to which they are entitled.

Other Council Committees:

A legislation committee is concerned with bills pending state legislation related to children.

A publicity and public relations committee is responsible for informing members about Council activities and children's issues through a newsletter, and informing the Springfield community through the media.

A foster care and adoption committee is concerned with recruitment of parents and reforming the foster care and adoption system.

A standards and regulations committee plan to act as a liaison between the Office for Children licensing staff and the community, and will work to interpret new regulations to service providers and parents.

In the Matter of E. M. D., a Minor Child.
No. 1524.

Supreme Court of Alaska.
Nov. 15, 1971.

The Superior Court, Third Judicial District, Harold J. Butcher, J., found minor to be a child in need of supervision and ordered institutionalization of minor, and appeal was taken. The Supreme Court, Rabinowitz, J., held that Superior Court exceeded its authority in ordering the institutionalization of minor who was found to be a child in need of supervision and since child was not found to be a delinquent minor no legal basis existed for her incarceration.

Dispositive provisions of Superior Court's judgment set aside and matter remanded.

1. Infants ⇐16.2, 16.3
A child can be declared a dependent minor, a child in need of supervision, or a delinquent minor. AS 47.10.080(b) (1), 47.10.290(2, 7).

2. Infants ⇐16.12
Superior Court exceeded its authority in ordering the institutionalization of minor who was found to be a child in need of supervision and since child was not found to be a delinquent minor no legal basis existed for her incarceration. AS 47.10.080(b) (1), 47.10.290(2, 7).

3. Infants ⇐16.12
Only instance authorizing institutionalization or incarceration of minor is when child has violated laws of state or any of its political subdivisions and in turn has been adjudged a delinquent minor. AS 47.10.080 (b) (1).

4. Infants ⇐16.4
Notions of benevolent protective policies for children cannot be used to validate departures from positive law relating to adjudicative and dispositive phases of children's proceedings. AS 47.10.010(a) (2, 3, 6), 47.10.080(b) (1), (c) (1), (j), 47.10.290 (2, 7); Rules of Children's Procedure, rule 12(b).

5. Infants ⇐16.12
Department of Health and Welfare does not possess authority to institutionalize any minor, including one who has been declared a child in need of supervision and who has been committed to its custody, and statute prescribes conditions of confinement after a court has lawfully determined that a child should be confined in an institution. AS 22.20.022, 47.10.080(c) (1), (j), 47.10.190.

6. Infants ⇐16.14
Right of appeal existed from dispositive order that minor, who had been adjudged a child in need of supervision, should be institutionalized. AS 22.05.010, 47.10.080(i), 47.10.290(7); Supreme Court Rules, rules 6, 23.

Herbert D. Soll, Public Defender, Bruce A. Bookman, Asst. Public Defender, Anchorage, for the minor child.

John E. Havelock, Atty. Gen., Juneau, Seaborn J. Buckalew, Jr., Dist. Atty., Robert L. Eastaugh, Asst. Dist. Atty., Anchorage, for State of Alaska.

Before BONEY, C. J., and DIMOND, RABINOWITZ, CONNOR, and ERWIN, JJ.

OPINION

RABINOWITZ, Justice.

In this appeal we are called upon to decide whether a minor who has been adjudged a child in need of supervision can be institutionalized under our children's code.

[1] Both Alaska's statutes relating to children's proceedings and the rules of procedure governing such proceedings establish three distinct categories of children. Thus, a child can be declared a dependent minor, a child in need of supervision, or a delinquent minor. AS 47.10.290(7) defines a "child in need of supervision" as a minor whom the court determines is within the provisions of AS 47.10.010(a) (2), (3),

... Those provisions include a minor

... by reason of being wayward or ... ally disobedient is uncontrolled by ... parent, guardian, or custodian;

... is habitually truant from school or ... me, or habitually so conducts himself ... to injure or endanger the morals or health of himself or others;

• • •

... associates with vagrant, vicious or immoral people, or engages in an occupation or is in a situation dangerous to life or limb or injurious to the health, morals, or welfare of himself or others.[1]

Regarding the dispositive phase of children's proceedings, Alaska's children's code provides that if the court determines the minor is a child in need of supervision, it shall make any of the following orders of disposition regarding the minor's supervision, care, and rehabilitation:

(1) any order which is authorized under (c) of this section; or

(2) order the minor placed on probation under those conditions and limitations that the court may prescribe.[2]

Under section (c) of AS 47.10.080, the court is empowered to order the minor committed to the Department of Health and Welfare or order the minor released to his parents, guardian, or some other suitable person.[3]

In the case at bar, the superior court found that E. M. D., a 14-year-old runaway girl, was a child in need of supervision. The court's findings were made after several hearings before a master and the superior court, and were based largely upon the master's findings of fact and recommendations. In the dispositive portion of the trial court's judgment, it was ordered that E. M. D. be

> committed to the custody of the Department of Health and Welfare for an indeterminate period * * *.

The court further ordered that E. M. D. be placed by the Department in a correctional or detention facility as defined in AS 47.10.080(b) (1), to be held in that facility until released therefrom upon a showing by an officer of the Division of Corrections that the minor has completed a program of rehabilitation and has been amenable thereto, and that the Court has been advised in writing that such release is contemplated.

[2] In this appeal it is argued that the superior court exceeded its authority in ordering the institutionalization of E. M. D. who was found to be a child in need of supervision. We are in agreement with the minor's contentions. As mentioned at the outset, Alaska's pertinent statutory provisions and procedural rules distinguish between categories of children for purposes of administering our children's laws. Of controlling significance here is that each class or category man... distinct differences regarding the p... sible content of any dispositional o... e trial court can enter.

[3] Study of our children's laws leads to the conclusion that the legislature has authorized institutionalization only where the child is found to be a delinquent minor. The term "delinquent minor" is defined as a

1 *Compare* R. 12(b), Rules of Children's Procedure.

2 AS 47.10.080(j).

3 AS 47.10.080(c) reads in part as follows:

> (1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;
>
> (2) order the minor released to his parents, guardian, or some other suitable person; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment. • • •

491 Digest

child who has violated a law of the state, or an ordinance or regulation of a political subdivision of the state.[4] As to the appropriate disposition once the child has been determined to be a delinquent minor, the legislature has in part provided that the court shall order the minor committed to the Department of Health and Welfare for an indeterminate period and

> may direct the minor's placement in a juvenile correctional school, detention home, or detention facility designated by the department. * * *[5]

Thus the only instance under our children's laws authorizing institutionalization or incarceration is when the child has violated the laws of the state, or any of its political subdivisions, and in turn has been adjudged a delinquent minor. Since the runaway child in the case at bar was found to be a child in need of supervision, not a delinquent minor, no legal basis existed for her incarceration.[6]

[4] In reaching this conclusion, we have rejected the state's contention that the trial court's order of incarceration is sustainable in light of the legislature's broad policy declaration to the effect that protection of children is the paramount purpose governing its enactment of laws pertaining to children's courts and institutions.[7] In another context we recently held that the benevolent social theory supposedly underlying children's court acts does not furnish justification for dispensing with constitutional safeguards.[8] As to the case at bar, it is equally appropriate to note that notions of benevolent protective policies cannot be used to validate departures from positive law relating to the adjudicative and dispositive phases of children's proceedings.

[5] We also reject the suggestion that the Department of Health and Welfare possesses the authority to institutionalize any minor, including one who has been declared a child in need of supervision, who has been committed to its custody. We find it unreasonable to construe our children's statutes in a manner which would result in the grant to the Department of Health and Welfare of broader powers of commitment than possessed by the trial court.[9] In our view the statute relied upon by the state for this construction prescribes conditions of confinement after the court has lawfully determined that a child should be confined in an institution.[10]

4. AS 47.10.290(2).

5. AS 47.10.080(b) (1).

6. Cf. Fish v. Horn, 14 N.Y.2d 905, 252 N.Y.S.2d 313, 200 N.E.2e 857 (1964).

7. AS 47.10.280 provides:

> The purpose of this chapter is to secure for each minor the care and guidance which is as nearly as possible equivalent to that which should be given him by his parents. The principle is recognized that minors under the jurisdiction of the court are wards of the state, subject to its discipline and entitled to its protection and that the state may act to safeguard them from neglect or injury and to enforce the legal obligation due to them and from them.

8. RLR v. State, 487 P.2d 27, 30-31 (Alaska 1971).

9. The state argues that even if the trial court lacks power to institutionalize a child in need of supervision, it can order the child committed to the Department of Health and Welfare which in turn can place the child in a detention facility. The argument is that under AS 47.10.080(c) (1) a minor can be committed to the Department of Health and Welfare. The state argues that AS 47.10.190 permits the department to institutionalize any minor committed to them. AS 47.10.190 reads as follows:

> When the court commits a minor to the custody of the department, the department shall arrange to place the juvenile in a detention home, facility another suitable place which the department designates for that purpose. A juvenile detained in a jail or similar institution at the request of the department shall be held in custody in a room or other place apart and separate from adults.

10. We note with approval the state's candor in briefing the issues in this case. The state, in its brief, initially conceded that if this court looks only to the express language of AS 47.10.080(j) and 47.10.080 (c), a strong argument can be made that the judgment entered below exceeded the

[6] One additional aspect of this appeal should be discussed for we think it appropriate that an explanation be given as to why this matter has been treated as an appeal rather than coming before us for review. Counsel for the minor sought to invoke our discretionary review jurisdiction in the belief that appeal was unavailable for two reasons. First, he cites In re White, 445 P.2d 813, 815 (Alaska 1968) (Rabinowitz, J., concurring). There this court interpreted AS 22.20.022, which allows peremptory disqualification of a superior court judge in a civil or criminal action. A majority of the court in *White* said:

> While juvenile proceedings have some of the characteristics of both civil and criminal actions, we hold that they are basically different from both, and that the words 'civil or criminal' as used in AS 22.20.022 must be strictly construed. The trial judge was correct in holding that peremptory challenge procedure applied only to civil and criminal actions and not to juvenile proceedings.

Counsel for the minor reads *White* as requiring the filing of a petition for review because the final judgment rule embodied in Supreme Court Rule 6 applies only to civil or criminal actions.[11] Such an expansive reading of *White*, assuming without deciding its continued validity in light of several of our recent decisions which vindicated certain constitutional and procedural rights of children in children's proceedings,[12] would result in precluding any review of children's decisions. For the rules which delineate this court's review jurisdiction limit such jurisdiction to "any order or decision of the superior court, not otherwise appealable under Rule 6, in any action or proceeding, civil or criminal. * * *"[13] Adoption of counsel's interpretation of *White* would also conflict with AS 22.05.010 which places final appellate jurisdiction in all cases in the supreme court.[14] We think *White* should be limited to its interpretation of the peremptory disqualification statute. On the other hand, we hold that the right to appeal from the type of disposition order which was entered in this children's proceeding has been clearly established by the legislature. In this regard, AS 47.10.080(i) provides:

> A minor, his parents or guardian acting on his behalf, or the department may appeal a judgment or order, or the stay, modification, setting aside, revocation, or enlargement of a judgment or order issued by the court under this chapter.

The dispositive provisions of the superior court's judgment are set aside and the matter is remanded for such further disposition proceedings as are necessary and the entry of an appropriate disposition order.

court's disposition jurisdiction. The final portion of the state's brief concludes on the following note:

> Nevertheless, it is the belief of the Department of Law that the judgment ordering petitioner detained exceeded the authority of the court below. This belief is founded on the State's concern that courts should comply with their granted powers even where, as here, the factual circumstances cry out for a disposition beyond the fingertips of the lower court.

11. In regard to what may be appealed, Supreme Ct.R. 6 states:

> An appeal may be taken to this court from a final judgment entered by the superior court or a judge thereof in any action or proceeding, civil or criminal, except that the state shall have a right to appeal in criminal cases only to test the sufficiency of the indictment or information.

12. Doe v. State, 487 P.2d 47 (Alaska 1971); R.L.R. v. State, 487 P.2d 27 (Alaska 1971).

13. Supreme Ct.R. 23.

14. For a discussion of another facet of this court's final appellate jurisdiction *see* State v. Browder, 486 P.2d 925, 929–933 (Alaska 1971).

POSITION PAPER/Department of Health and Social Services

Position Paper

on

Senate Bill No. 106

"An Act relating to children's laws and related judicial proceedings; changing the court's responsibilities and authority under Children's Rules 11(a), 12(a) and (b), 14, 15, 21, and 28, and Rule of Civil Procedure 17(b)."

This Bill constitutes recommendations of the Children's Code Revision Task Force made as the result of meetings held between August 1975 and December 1976. A section by section analysis prepared by the Attorney for the Task Force, is attached.

The changes proposed in the Bill are, in our judgement, appropriate both in the interest of children and their families and in the interest of clarifying intent, roles and responsibilities.

The Department supports the Bill.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Section 13 of the Bill, requiring the Department to disseminate information throughout the State about the availability of adoptable children and financial assistance to eligible adopting famlies, constitutes the most significant new cost item in the Bill. Funds will be required for printed material, radio and TV announcements and newspaper ads.

But such provision involves only persons whose presence is not desired by child.—The area of discretion in the rule, where the court may refuse to open the hearing, involves persons whose presence is not desired by the child. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

It is an abuse of discretion for the court to refuse admittance to individuals whose presence is favored by the child, except in special circumstances such as the unavailability of a courtroom sufficiently large to hold all the individuals whose presence is sought. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

If the child or his guardian ad litem wants the press, friends, or others to be free to attend, then the hearing must be open to them. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

As children are guaranteed the right to a public trial by the Alaska Constitution. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

Due process requires that children have the right to a public trial by jury where they are charged with acts which would be a crime if committed by an adult. John Doe v. State, Sup. Ct. Op. No. 707 (File No. 1240), 487 P.2d 47 (1971).

The fundamental constitutional right of public trial by jury must be afforded children in delinquency adjudication proceedings, in spite of the possible interference with the benevolent motives of the children's court system which have, in the past, justified denial of those rights. John Doe v. State, Sup. Ct. Op. No. 707 (File No. 1240), 487 P.2d 47 (1971).

The reasons for the constitutional guarantees of public trial apply as much to juvenile delinquency proceedings as to adult criminal proceedings. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

Delinquency must be proved beyond a reasonable doubt under the due process clause of the 14th amendment. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

Sec. 47.10.080. Judgments and orders.

(b) If the court finds that the minor is delinquent, it shall

(1) order the minor committed to the Department of Health and Social Services for an indeterminate period of time not to extend past a specified date or in any event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; the department shall place the minor in the juvenile facility which the department considers appropriate and which may include a juvenile correctional school, detention home, or detention facility; the minor may be released from placement or detention and placed on probation on order of the court and may also be released by the department, in its discretion, under § 200 of this chapter; or

(2) order the minor placed on probation, to be supervised by the department, and release him to his parents, guardian, or a suitable person; if the court orders the minor placed on probation, it may specify the terms and conditions of probation; the probation may be for an indeterminate period of time, not to extend past a specified date and in no event past the day the minor becomes 19, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment.

(c) If the court finds that the minor is dependent, it shall

(1) order the minor committed to the department for an indeterminate period of time not to exceed the date the minor becomes 19 years of age, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment;

(2) order the minor released to his parents, guardian, or some other suitable person, and, in appropriate cases, order the parents, guardian, or other person to provide medical or other care and treatment; if the court releases the minor, it shall direct the department to supervise the care and treatment given to the minor; the department's supervision may not extend past the date the minor reaches majority, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment; or

(3) by order, terminate parental rights and responsibilities of one or both parents and commit the child to the department or to a legally appointed guardian of the person of the child, if one of the following conditions exists:

(A) Each parent, or the surviving parent, or one parent if the other has been deprived of custody and visitation rights wishes to relinquish the child to the department or to a legally appointed guardian of the person of the child for adoptive purposes, and the relinquishment is in writing, signed and acknowledged before the court or duly authorized representative of the department and filed with the court;

(B) the child has been abandoned for a period of not less than six months by

(i) both parents, or

(ii) the surviving parent, or

(iii) one parent if the other has been deprived of custody and visitation rights;

(C) each parent, the surviving parent, or one parent if the other has been deprived of custody and visitation rights has been judicially determined to be of unsound mind and the disability has not been removed and the parent has been hospitalized for reasons of mental illness diagnosed as permanent or of long duration; or

(D) each parent, or the surviving parent, or one parent if the other has been judicially deprived of custody and visitation rights, has demonstrated by his conduct, proven by clear and convincing proof amounting to more than a preponderance of the evidence that he is unfit to continue to exercise his parental rights and responsibilities.

(f) A minor found to be delinquent, a child in need of super-

vision, or dependent is a ward of the state as long as he is committed to the department or the department has the power to supervise his actions. The court shall review an order made under (b) or (c)(1) or (2) or (j) of this section annually, and may review the order more frequently to determine if continued placement, probation, or supervision is in the best interest of the minor and the public, and to determine if the minor is being treated fairly. The department or the minor's parents or guardian is entitled to a review on application. The minor shall be afforded the opportunity to be present at the review.

(k) In making its order under (c) of this section, the court shall consider the fact, if it is a fact, that the minor was being provided treatment by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited practitioner of the church or denomination. (am §§ 6, 7 ch 1 SLA 1972; am §§ 1, 2 ch 125 SLA 1974)

Effect of amendments.

The 1972 amendment, in subsection (c)(2), inserted "and, in appropriate cases, order the parents, guardian, or other person to provide medical or other care and treatment," and substituted "reaches majority" for "becomes 19 years of age." The amendment also added subsection (k).

The 1974 amendment, in paragraph (1) of subsection (b), substituted "the department shall place the minor in the juvenile facility which the department considers appropriate and which may include" for "and may direct the minor's placement in," deleted "designated by the department" following "detention facility," and added "and may also be released by the department, in its discretion, pursuant to § 200 of this chapter." The amendment also, in subsection (f), substituted "state" for "court" in the first sentence and rewrote the fourth sentence.

As the rest of the section was not affected by the amendments, it is not set out.

Notions of benevolent protective policies cannot be used to validate departures from positive law relating to the adjudicative and dispositive phases of children's proceedings. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Nor to justify dispensing with constitutional safeguards. — The benevolent social theory supposedly underlying children's court acts does not furnish justification for dispensing with constitutional safeguards. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The right of confrontation is paramount to the state's policy of protecting a juvenile offender. Davis v. State, U.S. , 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

But state's interest in secrecy of juvenile adjudications need not always fall before confrontation right. —See Gonzale v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Prosecution witness impeachable by cross-examination for bias from probationary status as juvenile delinquent. — The confrontation clause requires that a defendant in a criminal case be allowed to impeach the credibility of a prosecution witness by cross-examination directed at possible bias deriving from the witness' probationary status as juvenile delinquent although such an impeachment would conflict with a state's asserted interest in preserving the confidentiality of juvenile adjudications of delinquency. Davis v. State, U.S. , 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

Whatever temporary embarrassment might result to a prosecution witness or his family by disclosure of his juvenile record — if the prosecution insisted on using him to make its case — is outweighed by petitioner's right to probe into the influence of possible bias on the testimony of a crucial identification witness. Davis

v. State, U.S. , 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

The state cannot, consistent with right of confrontation, require the defendant to bear the full burden of vindicating the state's interest in the secrecy of juvenile criminal records. Davis v. State, U.S. , 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974).

The United States supreme court has held that the constitutional right of confrontation required that defense counsel be allowed to investigate the potential bias of a crucial prosecution witness, even where that potential bias arose out of a juvenile adjudication and its resultant probationary status. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

The United States supreme court concluded that Alaska's interest in protecting the anonymity of the juvenile offender was outweighed by the more critical need to afford a criminal defendant reasonable inquiry into the motives of prosecution witnesses. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Conflict between section and decision in Davis v. State is superficial. — The conflict between this section and the supreme court's decision in Davis v. State, U.S. , 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974), is only superficial. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Since disclosure required because of probationary status, not juvenile adjudication.—The constitutional requirement of disclosure in the facts in Davis v. State, U.S. , 94 S. Ct. 1105, 39 L. Ed. 2d 347 (1974), is created not by the juvenile adjudication itself but by the probationary status of the juvenile at the time of Davis' trial, with its potential for motivating false testimony. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Where the witness was not on juvenile probation, it cannot be seriously argued that the fact of previous juvenile convictions, standing alone, provided any inference of potential bias. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

State adjudications directed solely at credibility do not conflict with confrontation right.—Juvenile adjudications which are stale by Alaska's standards and directed solely at general credibility rather than bias are generally not sufficiently probative to create a genui conflict with the defendant's right of confrontation. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Where the attempted impeachment was of general credibility by proof of prior "convictions," the probative value of this type of evidence is considerably less than that which suggests false or distorted testimony because of bias, and the need to confront a witness with such evidence is correspondingly less. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

As a general rule, the trial courts could properly refuse evidence of stale convictions or juvenile adjudications where these were offered for the purpose of discrediting the witness generally rather than to show some specific potential for bias or prejudice toward the defendant. Thomas v. State, Sup. Ct. Op. No. 1040 (File Nos. 1888, 1854), 522 P.2d 528 (1974).

Subsection (g) provides in part that a juvenile offender may not be considered a criminal by reason of the adjudication, nor may the adjudication be afterward deemed a conviction. Gonzales v. State, Sup. Ct. Op. No. 1030 (File No. 2002), 521 P.2d 512 (1974).

Three distinct categories of children established. — Alaska's statutes relating to children's proceedings and the rules of procedure governing such proceedings establish three distinct categories of children. Thus, a child can be declared a dependent minor, a child in need of supervision, or a delinquent minor. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

And each category mandates differences regarding content of dispositional orders. — Alaska's pertinent statutory provisions and procedural rules distinguish between categories of children for purposes of administering Alaska children's laws. Of controlling significance is that each class or category mandates distinct differences regarding the permissible content of any dispositional order the trial court

can enter. In r

can enter. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The age limitation of 19 years in subsection (b)(1) as to the length of time the juvenile court can order commitment to the Department of Health and Social Services reflects a 1970 legislative decision intended to reduce the age of majority in a great number of matters concerning minors and is considered controlling over AS 47.10.060(d) which was not similarly changed apparently through oversight. In re P.H., Sup. Ct. Op. No. 857 (File No. 1538), 504 P.2d 837 (1972).

Section is maximum sentencing statute.—Statutes requiring release upon a specified birthday are, in effect, maximum sentencing statutes. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

Sentence reduction to 19 years of age not retroactive.—There is nothing in the amendatory legislation to this section that indicates an intention that the sentence reduction should operate retrospectively. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

The word "or" between subsections (b)(1) and (b)(2) implies that the court must choose between commitment to the Department of Health and Social Services and probation, and may not delegate the choice to the Department of Health and Social Services. This is a correct textual analysis, especially in light of the provision in subsection (b)(1) for subsequent court order for probation following placement or detention. The legislature has clearly indicated its intent to place this choice in the hands of the court. R.L.R. v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

Abandonment defined. — Abandonment consists of conduct on the part of the parent which implies a conscious disregard of the obligations owed by a parent to the child, leading to the destruction of the parent-child relationship. D.M. v. State, Sup. Ct. Op. No. 962 (File No. 1843), 515 P.2d 1234 (1973).

Abandonment to be determined objectively.—Whether or not there has been an abandonment within the meaning of this section is to be determined objectively, taking into account not only the verbal expressions of the natural parents, but their conduct as parents as well. D.M. v. State, Sup. Ct. Op. No. 962 (File No. 1843), 515 P.2d 1234 (1973).

The subjective intent standard often focuses too much attention on the parent's wishful thoughts and hopes for the child and too little on the more important element of how well the parents have discharged their parental responsibility. D.M. v. State, Sup. Ct. Op. No. 962 (File No. 1843), 515 P.2d 1234 (1973).

The child's best interests are properly a consideration in determining whether a parent has abandoned the child. D.M. v. State, Sup. Ct. Op. No. 962 (File No. 1843), 515 P.2d 1234 (1973).

A minor who has been adjudged a child in need of supervision cannot be institutionalized under the Children's Code. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Where a runaway child found to be a child in need of supervision, not a delinquent minor, no legal basis exists for his incarceration. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The only instance under Alaska children's laws authorizing institutionalization or incarceration is when the child has violated the laws of the state, or any of its political subdivisions, and in turn has been adjudged a delinquent minor. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The legislature has authorized institutionalization only where the child is found to be a delinquent minor. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Power of court under subsection (c). — Under subsection (c) of this section, the court is empowered to order the minor committed to the Department of Health and Social Services or order the minor released to his parents, guardian, or some other suitable person. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

The Department of Health and Social Services does not possess the authority to institutionalize any minor, including one who has been de-

cared a child in need of supervision, who has been committed to its custody. It is unreasonable to construe Alaska children's statutes in a manner which would result in the grant to the Department of Health and Social Services of broader powers of commitment than possessed by the trial court. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Peremptory challenge procedure inapplicable to juvenile proceedings.— While juvenile proceedings have some of the characteristics of both civil and criminal actions, they are basically different from both, and the words "civil or criminal" as used in AS 22.20.022 must be strictly construed. The trial judge was correct in holding that peremptory challenge procedure applied only to civil and criminal actions and not to juvenile proceedings. In Re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

A child adjudicated delinquent for selling LSD may be incarcerated, possibly even in a city jail, until age 19, which may be many years. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

When sentence determined. — The sentence which may be imposed upon a convicted adult is determined as of the time of the final judgment of conviction, or as of the time of commission of the offense. These rules have been applied to juvenile sentencing. Davenport v. McGinnis, Sup. Ct. Op. No. 1049 (File No. 1942), 522 P.2d 1140 (1974).

Appellate jurisdiction.—AS 22.05.010 places final appellate jurisdiction in all cases in the supreme court. In re A Minor Child, Sup. Ct. Op. No. 737 (File No. 1524), 490 P.2d 658 (1971).

Quoted in Davis v. State, Sup. Ct. Op. No. 816 (File Nos. 1428, 1436), 499 P.2d 1025 (1972).

Stated in In re G.K., Sup. Ct. Op. No. 796 (File Nos. 1627, 1654, 1674), 497 P.2d 914 (1972).

Cited in Elliason v. State, Sup. Ct. Op. No. 898 (File No. 1750), 511 P.2d 1066 (1973).

Sec. 47.10.085. Dependent minor; religious treatment. In a case in which the minor's status as a dependent minor is sought to be based on his need for medical care, the court may, upon consideration of the health of the minor and the fact, if it is a fact, that the minor is being provided treatment by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited practitioner of the church or denomination, dismiss the proceedings and thereby close the matter. This may be done, in the interests of justice and religious freedom, on the court's own motion or upon the application of a party to the proceedings, at any stage of the proceedings after information is given to the court under § 20(a) of this chapter. (§ 8 ch 1 SLA 1972)

Sec. 47.10.090. Records. (a) The court shall make and keep records of all cases brought before it. The court's official records may be inspected only with the court's permission and only by persons having a legitimate interest in them. All information and social records pertaining to a minor and prepared in the discharge of his official duty by an employee of the court or by a federal, state or city agency are privileged and may not be disclosed directly or indirectly to anyone without the court's permission. However, a state or city law-enforcement agency shall disclose information regarding a case which is needed by the person or agency charged with

tinued supervisic
have not respon

making a preliminary investigation for the information of the court. Within 30 days of the date on which a minor reaches his 18th birthday or, if the court retains jurisdiction of a minor past his 18th birthday, within 30 days of the date on which the court relinquishes jurisdiction over the minor, the court shall order sealed all the court's official records, information and social records pertaining to that minor, as well as records of all criminal proceedings against him and punishments assessed against him, except for traffic offenses. No person may use records so sealed for any purpose except that the court may order their use for good cause shown or may order their use by an officer of court in making a presentencing report for the court.

(b) The name or picture of a minor under the jurisdiction of the court may not be made public by a newspaper, radio, or television station in connection with the minor's status as a delinquent or dependent child, except as authorized by order of the court.

(c) A person who violates a provision of this section is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $500 or by imprisonment for not more than one year, or by both. (§ 10(3)(4) art I ch 145 SLA 1957; am § 1 ch 124 SLA 1972)

Effect of amendment. — The 1972 amendment substituted "may not be disclosed" for "shall not be disclosed" in the third sentence of subsection (a), substituted "a case" for "the case" in the fourth sentence of that subdivision, added the fifth and sixth sentences therein, and designated the last sentence of subsection (b) as subsection (c). In subsection (c), the amendment substituted "a provision of this section" for "this provision."

Waiver of provisions of section. — In the case of use of restraints more severe than placement in adjustment rooms (solitary confinement), the approval of the director of McLaughlin Youth Center must be obtained and a report made to the child's attorney and the family court. The provisions of this section are waived for this purpose. T.M. v. Director of McLaughlin Youth Center, Superior Court, No. 72-449 (1973).

Stated in RLR v. State, Sup. Ct. Op. No 706 (File No. 1156), 487 P.2d 27 (1971).

Sec. 47.10.095. Arrest of a minor. The arrest of a minor other than for a traffic offense is not considered an arrest for any purpose except for the purpose of the disposition of a proceeding arising out of that arrest. (§ 2 ch 124 SLA 1972)

Sec. 47.10.100. Retention of jurisdiction over minor.

(c) If a minor is adjudicated a delinquent, a child in need of supervision, or a dependent before his 18th birthday, the court may retain jurisdiction over him after his 18th birthday for the purpose of supervising his rehabilitation, but the court's jurisdiction over him under this chapter never extends beyond his 19th birthday, except that the department may petition the court for continued supervision for an additional one-year period for minors who have not responded to treatment. The department may retain ju-

WORK PLAN

Legislative Council Task Force

Children's Law Revision

I. PURPOSE

The purpose of the Task Force is to study the Alaska Statutes dealing with children and to propose revision of the statutes which the Task Force finds in need of change. This study and revision is viewed by the Task Force as the first step in developing a children's code for Alaska.

II. GOALS AND OBJECTIVES

During the period before the legislature reconvenes, the Task Force plans to determine the areas of Alaska law dealing with children which are most in need of review, look critically at Alaska's approach to the treatment of children in these areas, comparing Alaska's approach to that of other states, and to submit legislation to the Council revising the statutes which the Task Force determines to be in need of revision.

III. ASSUMPTIONS

A. Responsibilities. The Legislative Council will provide an attorney who will spend approximately one-third of his/her time on the work of the Task Force, travel expenses and per diem for the attorney, office space for the attorney and researcher, and clerical support for the project. The Office of Child Advocacy is funding a full time research person for the interim period, and travel expenses and per diem for the researcher. The Office of the Governor is providing funds for travel expenses and per diem for the members of the Task Force.

B. Task Force Structure. The Task Force will meet five times during the interim period. The meetings are scheduled for August 14, September 17, October 15, November 19 and December 17. At the September meeting the Task Force will break

down into smaller groups. Each group will deal with one of the priority areas which the Task Force has decided to address. The small groups will study the problem areas in depth and report their findings to the Task Force. The Task Force will then decide whether to adopt the reports of the small groups and to recommend legislation to the Legislative Council.

IV. TASKS

At the August 14, 1975 meeting the Task Force decided to look into the following areas during the interim period:

(1) update the draft of the Child Law Compilation prepared by the Legislative Affairs Agency in October 1974;

(2) role of the guardian ad litem in the Alaska Court System;

(3) the treatment of children classified as dependent, neglected, delinquent and in need of supervision in the Alaska Statutes;

(4) the treatment of emotionally disturbed children;

(5) the protection of the property rights of orphaned children in the state, particularly the rights of children under the Alaska Native Claims Settlement Act;

(6) the scope of the term "care of the child" under AS 47.10.230;

(7) the adequacy of the statutes dealing with child abuse in the state;

(8) the treatment of status offenders.

Staff research for the first three areas is scheduled for completion by the September meeting of the Task Force. The remaining research is scheduled for completion by the October meeting. After each meeting a report on the work progress will be prepared for submission to the Legislative Council.

CHILDREN'S CODE REVISION TASK FORCE SUMMARY
OF MEETING SEPTEMBER 17, 1975

Andy Brown, research staff for the task force, reviewed his progress in researching issues dealing with the guardian ad litem in Alaska. The task force then discussed various problems with the present system of providing guardians ad litem for children. The problems discussed included:

1/ attorneys appointed are often not interested or knowledgeable in issues involving children;

2/ the length of time a guardian ad litem is responsible for the child after disposition of the case;

3/ the availability of persons in the bush areas to act as guardians ad litem; and

4/ the duties and powers of guardians ad litem are vague.

Later a working group of the task force formulated the following proposals regarding the guardian ad litem for consideration by the whole task force:

1/ that the present discretionary appointment by the court of guardians ad litem continue to remain in effect;

2/ that the scope of the guardian ad litem's duties be clearly delineated and include

a/ investigation of the legal and factual issues of a particular child's case and report these to the court;

b/ the power as guardian ad litem exist no longer than the particular matter is before the court, in other words from the time of the filing of a petition, which will involve a child's present or future care, custody or control, until the court's disposition of that matter; and

c/ the power of a guardian ad litem is to be distinguished from a guardian of a person in that the former involves only the representation of a child's best interests before a court, while the latter involves the right and power to make decisions concerning a child's physical and emotional welfare, such as food, clothing, housing, schooling, recreation, health, and finances;

3/ AS 09.65.130, AS 20.15.100(j), and AS 47.10.05 be amended to read "guardian ad litem who may also be an attorney" rather than "guardian ad litem or attorney"; and

4/ the term "law guardian" be used instead of the Latin terminology "guardian ad litem".

The staff then reviewed its research into the matters of dependent children, delinquent children and children in need of supervision. The following issues were discussed by the task force:

1/ the mandatory termination at certain intervals of state intervention unless the state can make a positive showing that state involvement is still necessary;

2/ mandatory annual review of a child's disposition;

3/ long range foster care so that foster families can get medical care and state aid;

4/ removing status offenders from the court system entirely;

5/ the problem of getting psychiatric care for children without institutionalizing them; and

6/ the lack of diagnostic services for children and their families.

A working group of the task force met in the afternoon and agreed that the following be researched and submitted to the whole task force:

1/ eliminate the category of children in need of supervision;

2/ remove the "fault" approach from consideration of dependent children;

3/ devising a way that children and their parents may be ordered by the court to receive diagnostic treatment and services;

4/ define "intake services" with greater specificity; and

5/ define "juvenile detention home," "institution," and "juvenile correctional school" with more specificity.

SUBJECT: Response to Issues Brought Up at Joint Senate HESS and House Judiciary Committee Meeting on SB 106 - HB 204

TO: Members of Senate HESS and House Judiciary Committees

FROM: Andrew M. Brown
Attorney for Children's Code Revision
Task Force

Following are comments touching upon the various issues raised by witnesses testifying on SB 106 - HB 204. I hope these comments clarify any uncertainties concerning this legislation.

1. Issue - Statement by Sam Granato, Director of Social Services, concerning the little possibility of state intervention into home life based upon only unsanitary home environment.

Response - Section 20 of the bill redrafts AS 47.10.010(a) because the present law does allow the very distinct possibility of unwarranted intervention in family affairs. Precisely because of the present .010(a)(1) - (9)'s vague standards, the task force has tightened and clarified the scope of the children's court jurisdiction. Under the present "lacks proper parental care by reason of the faults, habit, or neglect of his parent, guardian, or custodian" in .010(a)(5) the Department of Health and Social Services could interfere in family affairs without any showing of actual or imminent harm to the child.

2. Issue - Comments by Rudy Johnson on amending Section 1.

Response - His first amendment concerns deleting "as a matter of right" in lines 21 - 22, page 1. This phrase insures that neither parent has greater rights over the other at the outset of a custody hearing, and the phrase should be kept. Mr. Johnson's second suggestion concerned a sixth standard for the court's consideration of child custody. He desires that the court look at the attitudes of the parents toward each other and how that might affect the relationship between the child and the parent who does not

have custody. Since divorce concerns parental separation based usually on incompatibility, there will often be rancor between the parents and it is inevitable that this rancor may affect the child/non-custodial parent relationship. Whether this added factor will help the court in deciding the child's best interests, I cannot say.

3. Issue - Comment by Sister Mary Clare on her not liking the necessity of the mother relinquishing her parental rights before a judge under Section 18 of this bill.

Response - Under present law in AS 20.15.180 a parent can relinquish his or her rights to a child either in the presence of an agency representative or in court. However, the present law does not set out any standard to insure that the relinquishing parent will be told the full consequences of his or her act. While Sister Mary Clare's agency may do an adequate job explaining the meaning of relinquishment, there is no guarantee that other private or governmental agency personnel will sufficiently explain relinquishment. Since relinquishment is a major irreversible step (excepting the 10 day period after the court's order under 25.20.035(f) in Section 18 of the bill) the task force feels it is imperative that a neutral judge explain the meaning and be sure it is understood. This protects both the relinquishing parent and the child. It should also be noted that the present relinquishment law has a loophole which Section 18 of the bill closes. Under present law, no provision is made as to who is to have custody of the child upon relinquishment; however, Section 18 clearly states the three alternatives the court has in placing the child.

3. Issue - Sister Mary Clare's comment on the court should not interfere with private placements.

Response - There is confusion between the issues of placement of the child and relinquishment. Since relinquishment is a major decision, it is necessary that a disinterested forum insure that the proper decision is made. Once that is done and relinquishment takes place, a placement of the child can be done. If the court gives custody of the child to a licensed private placement agency, then it can place the child. The privacy of the placement will be maintained, but with insurance through court oversight, if necessary, that there will not be placement based on financial reward.

4. Issue - Comment by Sister Mary Clare opposing notice by publication of adoptions.

Response - Again, there is confusion over this issue. Notice by publication would not be mandatory in any case.

It would be discretionary upon the court to decide if it is warranted. Section 9 of the bill retains the present law on notice being given under the rules of civil procedure. Under Rule of Civil Procedure 4(e), the court can direct the manner of notice if personal service is not effective. In most instances publication is a last resort only after personal service and certified mail to the last known address do not work. The present Children's Rule 10(g) mandates notice by publication only after it is shown by an "affidavit of due and diligent inquiry that personal service ... cannot be effected." Since the present law in AS 20.15.100(b) on no notice by publication is ineffective due to the 1974 adoption bill, under which .100(b) was enacted, did not state its effect on court rules as required by Legislative Rule 40(e), and since recent federal and state court decisions uphold the rights of one being adequately notified of court hearings concerning his interests, the discretionary power by the court to order publication when it believes it necessary is a reasonable last resort alternative. The cases which point out the importance of notice are: Stanley v. Illinois, 405 U.S.645 (1972), a child custody case; Mullane v. Central Hanover Bank and Trust Company, 339 U.S. 306 (1950), a case clearly enunciating the importance of notice in any court case; and Aguchak v. Montgomery Ward, 520 P.2d. 1352 (1974), an Alaskan case spelling out the importance of notice.

5. Issue - Comment by Ms. Susan Burke of the Court System on the possible costs of appointment of guardian ad litems under Sections 3, 10, and 24 of this bill.

Response - It is extremely difficult to gauge the fiscal impact of the court's appointment of guardian ad litems, because it is a discretionary power of the court and it is hard to predict when either party may request such an appointment or when a particular judge will on his own make such an appointment. Also, the amount of work the guardian ad litem does and his or her status as an attorney, child specialist, or layperson will affect the bill he or she submits to the court.

6. Issue - Query by Senator Hackney on the effect the jurisdictional statute in Section 20 will have on a child treated pursuant to a parent's religious convictions.

Response - Present law in AS 47.10.085 adequately provides for cases wherein the child may need medical care and he is being treated by spiritual means. This law is not being changed, except the reference to "dependent minor" is changed to "child in need of aid."

7. Issue - Comment by Assistant Attorney General Arnold that Section 22 of the bill on notice of the hearing will require notice to absent parents where no termination of parental rights is contemplated and that this will unduly delay the proceeding.

Response - Children's Court Rule 10 requires notice to the child, parents or guardian, custodian, and guardian ad litem, if one is appointed, upon filing of a petition for adjudication. Section 22 only brings the present law in AS 47.10.030(b) into conformity with this rule, and clarifies that each parent is to receive the notice of the proceeding. When the results of attempting either personal service or service by certified mail are not known within a couple days, a formal children's proceeding can be delayed without harmful results, because under AS 47.10.142 on emergency custody the court must hold an emergency custody hearing within 48 hours to determine if probable cause exists for believing the child is a child in need of aid. This probable cause hearing would allow temporary placement of the child until a full hearing on the allegations is held. In the meantime there can be reasonable attempts to deliver notice to each parent and still allow the Department of Health and Social Services to have temporary protective custody of the child.

8. Issue - Comment by Assistant Attorney General Arnold on having the section on involuntary termination of parental rights under AS 25.20, rather than in AS 47.10.080(c)(3).

Response - Since involuntary termination of parental rights is tied to the jurisdictional basis of the Children's Court in AS 47.10.010(a)(2), (Section 20 of this bill), it would be confusing to take what is now in Section 29 of the bill under .080(c)(3), and move it to another area. The Children's Court can terminate the parent-child relationship in a child in need of aid case only upon grounds proven under the jurisdictional section. All the procedural and substantive protections for both the child and parents come under AS 47.10, and moving the most drastic type of sanction to an unrelated chapter does not make sense.

AMB:hjd

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 22, 1977

The Honorable Glenn Hackney
Senator
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

My staff and representatives of various state agencies have reviewed the final draft of the legislation developed by the Children's Code Revision Task Force, jointly supported by the Legislative Council and the Office of the Governor. This product is now before the Legislature as SB 106 and HB 204. Although I had hoped that a joint review and submission between the Governor's Office and Legislative Council would occur, I am pleased to see the product before the Legislature and the Administration for consideration at this time.

The bills address the long recognized need for a codification of child-related law. Clarification of existing laws, emphasis on the child's welfare and needs and correction of some inconsistencies in statutes are just a few of the positive aspects of the legislation. In general, the purpose and direction of the bills are sound and I support them.

In reviewing the comments from state agencies, constituents interested in the bill, and others directly involved in the procedures related to the functions covered by this legislation, the Governor's Office has received very few negative comments. However, I feel that some concerns which have been articulated need to be brought to your attention as they may require amending the bills. I would like to address those concerns briefly.

1. Adoption procedures: Some parents experienced in the adoptive process and some individuals with court responsibilities related to the adoptive process object to section 7, page 4 of the bill (reference to AS 20.15.060) and question the necessity for or wisdom of the appearance of a consenting parent in court. This particular section addresses the procedures involved when a parent knows the persons adopting the child, has arrived at the

decision to consent to that adoption and has, in fact, consented. The situation of relinquishing a child for adoption is, to say the least, an emotional experience. Court formalities and surroundings may have subtle and inhibiting effects on persons involved in the proceedings. The surroundings may induce sorrow, regret and guilt regarding the adoption decision, however rational that decision might have been. The court appearance seems unnecessary for the consenting parent and may cause tension and anxiety on the part of the adoptive parents. Apparently most hearings now occur after the child has already become used to and familiar with the adoptive parents. The aura of uncertainty connected with parental presence at the hearings seems inconsistent with the need to proceed with as little trauma and as much consideration for the child, as well as the adults.

Additionally, many of the proceedings in rural Alaska now typically involve written interrogatories and informal, less threatening procedures to allow consenting and adopting parents to execute the arrangements for the permanent adoption of the child. If the intent is to give opportunity for the consenting parent to be sure that he or she is considering all alternatives and has had time to deliberate on the decision, perhaps a stipulation for a "cooling off period" or deliberation time could be instituted with a copy of necessary information provided to the parent with the consent papers. At any rate, the vexing situation of court appearance and the necessitated travel perhaps should be avoided. Additionally, the cost of travel expenses would often not be affordable by the consenting parent or the adoptive parent and the implication is that the State might be responsible for these costs.

The section on relinquishment of parental rights and adoption raises another question. Interpretation of the proceedings under this bill indicates that a parent wishing to give up a child for adoption must file a petition and appear in court in every case, a costly and cumbersome proceeding that does not fulfill the need for privacy and consideration to the parent and the child. In rural Alaska particularly, this means the mother might not be able to return to her home village from the hospital following the birth of a child that has been voluntarily relinquished for adoption.

2. Publication of Notice: Some feel that publication of notice brings few or no results, and that this requirement can serve little purpose for the child's benefit. It fosters undue public awareness of what should essentially be as private and personal an action as possible. The ideal step

would be to eliminate the procedure and rely on the other means of notice. According to some, the notice requirement guarantees fullest possible protection of the rights of the missing or unknown parent prior to adoption of the child. However, if the records indicate not one instance of the procedure resulting in the finding of such a parent and the reunion of a child with a natural parent, it seems both unnecessary and undesirable to require this procedure.

According to AS 20.15.080 (a), the titles of cases are designated only by the proposed name of the child after adoption approval and the birth date. Therefore, publication of notice to missing or unknown parents seems perfunctory, for in most cases it is quite obvious that the recognition of a possible offspring would occur only if the natural mother's name were attached to the notice for identification. Such publications would do little to promote positive concern for the child or the mother, and probably would have little effect on any potential for a reunion of a missing or unknown parent with the child.

3. Extension of Supervision: The questions regarding the extension of supervision beyond age 18 have been for the most part centered around the curiosity of recommending extension of supervision while at the same time adopting age 18 as the age of majority. Selecting age 18 as the age of majority seems to make good sense and develops a greater consistency with other age provisions in statutes, but the extension beyond the age of majority for _ venile supervision does not seem reasonable in that light Additionally, provisions which would allow for ext sion with the consent of the person involved seem not only unrealistic but would be unlikely to produce any positive benefits on behalf of either the individual or the society.

Aside from these suggestions and any recommendations for minor drafting changes, I urge your support of SB 106 and HB 204.

Sincerely,

Jay S. Hammond
Governor

MEMORANDUM April 7, 1977

SUBJECT: SB 54 and SSHB 419
TO: Representative Terry Gardiner, Chairman House Judiciary Committee
FROM: Andrew Brown

SB 54 is on adoption assistance and Sections 6 - 10 of SSHB 419 are also on adoption assistance. The Senate bill is an administration one, while the House bill is based on the Children's Code Revision TaskmForce's proposals. While both bills would result in expanded coverage of adoption assistance, the House bill would allow broader applicability, and also mandate that information about adoption assistance would be disseminated in rural areas.

While the Task Force would prefer so see its version enacted, if it appears that SSHB 419 is not going to pass the House soon, then I think it would be best to either amend SB 54 so that it reflects some of the aspects in SSHB 419 or just pass out SB 54 as is. Therefore, an expansion of the adoption assistance program which is desired by the administration, the Task Force and others would become a reality.

You might want to take this this up at the Judiciary Committee meeting on April 11, 1977 when you will be discussing HB 204 on Children's Laws.

HB

Delete

Sec. 47.30.665 Prayer Treatment. (Page 3, Line 16)

Adopted

Delete

In Sec. 47.30.670 Standards for Voluntary Admission (Page 3, Line 23-24)

"14 years of age or older"

Delete a d Substitute

For Sec. 47.30.690 Voluntary Adminssion of Minors (Page 4, Line 24)

(a) A minor under the age of 14 may be admitted for 30 days evaluation, diagnosis and treatment at the designated facility if his parent or guardian signs the admission papers and if

(1) he is suffering from mental illness;

(2) as a result of this mental illness he is likely to cause serious harm to himself or others; serious harm to self may include inability to provide for basic needs

for food, clothing, shelter, or personal safety in the case of persons who are gravely disabled as a result of mental illness;

(3) there is no less restrictive alternative available for his treatment; and

(4) there is reason to believe that the patient's mental condition could be improved by the course of treatment.

(b) The district official must be notified of the admission on the first working day and must monitor appropriateness of admission and continued hospitalization during the 30 day period.

(c) The minor may be released at any time during the 30 day period by the facility if the professional person in charge of the treatment facility or his designated mental health professional determines the minor would no longer benefit from continued hospitalization and the patient is not dangerous. The minor's parents or his guardian must be notified by the facility as to the contemplated release and, unless they start proceedings for involuntary commitment, the minor will be released.

Delete and Substitute

For Sec. 47.30.695 Notice of Request ....(Page 4, Line 28)

(a) The minor or his parent or guardian may request and obtain immediate release or the minor at any time during the 30 day evaluation period if the minor is not dangerous.

HB 2 (Continued)

Add

Sec. 47.30.696 Judicial Review After 30 Day Admission of Minor

(a) Prior to the expiration of the 25th day of the initial 30 day evaluation and treatment period, a petition for Court approved admission to a treatment facility must be filed in Superiod Court if the professional person in charge of the treatment facility or his designated mental health professional, deems necessary continued treatment at the facility. the petition must be signed by a physician and a mental professional who have examined the minor. The peition must:

1. Allege that the minor, by reason of mental illness, is likely to cause serious harm to himself or others;

2. Allege the facts and specific behavior of the minor which supports the findings of mental illness and that he is likely to cause serious harm or is in need of care and treatment;

3. Allege that the evaluation staff has found that there are no less restrictive alternatives available that would adequately protect the minor or others or would provide the necessary care and treatment, or if a less restrictive form of treatment is sought, specify the treatment and the basis for supporting it;

4. Allege that there is reason to believe the minor's mental condition could be improved by the course of treatment sought;

5. Allege that a specified treatment facility appropriate to the minor's condition has agreed to accept the minor or that the minor is to be sent to a state operated facility.

6. List the prospective witnesses who will testify in support of Court approved admission.

(b) Upon the filing of the petition, the Court shall appoint an attorney and/or a guardian ad litem to represent the interest of the minor.

(c) Copies of the petition for court approved admission shall be served on the parents or guardian of the minor or their attorney if they are represented, and the minor's attorney/guardian ad litem. The petition shall be filed with the Clerk of the Court, and a date for a hearing shall be set, by the end of the next judicial day, for no later than five judicial days from the date of filing of the petition. The Clerk shall notify the minor's parents or guardian ad litem and the petitioner, of the hearing date at least three days in advance of the hearing.

(d) At the hearing the minor has the rights specified in this chapter, considering his age. In addition, he has the right to be present at the hearing unless the court finds that the minor's presence would be harmful to the minor.

(e) At the conclusion of the hearing, the court may commit the minor for treatment

Delete and Substitute

For Article 8 Involuntary Admission for Treatment (Page 5, Line 3)

Section 47.30.700. COMMITMENT STANDARD. A person may be involuntarily committed to a treatment facility under the procedures set out in this chapter only if

(1) he is suffering from mental illness;

(2) as a result of this mental illness he likely to cause serious harm to himself or others; serious harm to self may include complete neglect of basic needs for food, clothing, shelter, or personal safety in the case of persons who are gravely disabled as a result of mental illness;

(3) there is no less restrictive alternative available for his treatment;

(4) there is reason to believe that the patient's mental condition could be improved by the course of treatment sought, if the person is dangerous only to himself.

Add

Sec. 47.30.701 Non-Emergency Detention for Evaluation Involving District Office or Official.

(a) A person seeking the commitment of another to a treatment facility may initiate the proceedings by executing a petition for evaluation and presenting it to a district office or official. The petition must allege:

(1) the facts and specific behavior of the respondent showing that the conditions established in Sec. 47.30.700 (commitment standard) of this chapter are met; and

(2) the names, addresses and phone numbers of all persons known to the petitioner who have knowledge of the facts through personal observation.

(b) A district official who receives a properly executed petition for evaluation shall investigate of cause to be investigated and evaluated the specific facts alleged and the reliability and credibility of the person providing the information. If after investigation the district official determines that there is good reason to believe that the allegations are true and the respondent does not agree to come voluntarily to a facility for evaluation, the district official may obtain from the court and cause to be served on the respondent and his guardian, if there is one, a summons requiring the respondent to appear at a specified evaluation facility for an evaluation period of not more than 72 hours. If there is no evaluation facility in the respondent's community, the district office shall determine whether the respondent should be transported to the nearest available evaluation facility at no cost to him. The summons shall then specify, as the place for the respondent to appear, the place of transport. The evaluation facility or personnel shall be given a copy of the petition and summons.

(c) The summons shall contain the following information:

(1) date and time within which the respondent must appear, not less than 24 hours after service of the summons;

(2) address of the evaluation facility, other place of evaluation, or place of transport to which the respondent is to report;

(3) name, business address and phone number of the district official issuing the summons;

(4) a statement that if the respondent fails to appear at the appointed place or before the date and time stated in the summons, he may be involuntarily taken into custody and transported to the appointed place;

(5) a copy of the petition for evaluation and a notice of rights regarding commitment procedures as set out i sec. 71 of this chapter; and

(6) the name of an attorney appointed by the court to represent the respondent.

(d) No summons may be served when more than seven days have passed since its issuance. No petition for evaluation may be used as the basis for issuance of a second summons after the first has expired unless subsequent investigation by the district official revelas at the gounds for evaluation still exist.

(e) If the person summoned fails to appear on or before the date and time specified, the evaluation facility shall immediately notify the district official, who shall cause the person to be taken into custody and transported to the evaluation facility. A peace officer may take the respondent into custody and convey him to an evaluation facility at the request of the district official.

HB 2 (Continued)

Add

Sec. 47.30.702 Non-Emergency Detention for Evaluation When No District Office or Official in Geographical Area. A person seeking the commitment of another to a treatment facility in a geographical area when there is no district office or official may execute a petion for evaluation containing the allegations in Sec. 47.30.701(a) and present it to a court. The court shall cause the allegations of the petition to be investigated. If the court determines there is good reason to believe that the allegations are true, it shall issue a summons containing the information set out in Sec. 47.30.701 (c), with the exception of (c)(3). No summons may be served when more than seven days have passed since its issuance. If the person summoned fails to appear at the designated evaluation facility on or before the date and time specified, the evaluation facility shall immediately notify the court, who may cause the person to be taken into custody and transported to the evaluation facility by a peace officer.

Amend

Sec. 47.30.705 Emergency Detention for Evaluation. (Page 6, Line 3)

Add

(a) If, upon investigation under Sec. 47.30.702(b) (non-emergency detention for evaluation), of this chapter, the official determines that the respondent is likely to

cause serious harm to himself or others if allowed to respond to a summons rather than beging taken into custody immediately, the official may cause the person to be taken into emergency custody in an evaluation facility for not more than 72 hours. A peace officer may assit the district official provided in Sec. 47.30.701(e) (non-emergency detention involving district officials) of this chapter.

Add

(b If there is no evaluation facility in the respondent's community or the evaluation personnel are not presently there and the respondent needs to be detained for the arrival of evaluation personnel or transportation under Sec. 47.30.701 (b) (non-emergency detention involving district official) of this chapter, the emergency custody under (a) and (b) of this section may include detention as long as the first available transportation out of the community for the respondent, or into the community for evaluation personnel, is utilized. Under no circumstances may the respondent be held in a jail or correctional facility if there is any other possible place of detention providing adequate security. In no event may a person be detained after the emergency has passed or longer than seven days, whichever limit is reached first. While detained, the respondent shall be given care and treatment that is appropriate and available in the community.

the court finds

after hearing, finds that there is such incapacity and that there is in fact a substantial likelihood that the respondent's presence at the hearing would be severly injurious to his mental or physical health;

Add

Section 47.30.740 Procedure for 90-Day Commitment Following 14-Day Commitment. (Page 12, Line 14)

(f) The respondent has the right to be free of the effects of medication at the hearing by discontinuance of medication no later than 48 hours before the hearing unless, in the opinion of the prescribing physician, the medication is necessary (1) to prevent bodily harm to the respondent or others, or (2) to prevent deterioration of the respondent's mental condition such that subsequent treatment might not enable him to recover, or (3) to allow the respondent to prepare and participate in the proceedings.

Change

(f) (Line 14) to (g) and (g) (Line 18) to (h)

Amend

Sec. 47.30.775 Commitment of Minors (Page 14, Line 13)
A minor who refuses voluntary admission may not be involuntarily admitted to a treatment facility, regardless of his parent's or guardian's consent, without adherence to the procedures set out in Secs. 700-820 of this chapter for adult detention and commitment. However, all notices required to

be served on the respondent ins Secs. 700-820 of this chapter shall also be served on the parent or guardian of respondents who are minors, and parents or guardians of minor respondents shall be notified that they may appear as parties in any commitment proceeding concerning the minor and that as parties they are entitled to retain their own attorney or have one appointed for them by the court. A minor has the same rights to waiver and informed consent as an adult under this chapter; however, he shall be represented by counsel in waiver and consent proceedings.

Add

Section 47.30.801 RECORDS AND PROCEEDINGS. A verbatim transcript may be made of all court hearings conducted under this chapter and a copy shall be provided to the respondent upon request for purposes of appellate or other court review of the proceedings.

Add

To Section 47.30.915 Definitions. (Page 30, Line 11)

(16) "district official" means a mental health professional.

2/9/79

RECOMMENDED CHANGES FOR HOUSE BILL 2

Division of Mental Health & Developmental Disabilities

PAGE 4, LINE 25

Substitute: A minor under 14 years of age may be admitted voluntarily if his parent who has legal custody of the minor or the minor's guardian signs the voluntary admission papers and the professional person in charge of the treatment facility or his designated mental health professional agrees that he is suffering from a mental illness. Any statement or conduct by a minor under the age of 14 indicating that the minor does not agree to admission to the facility should be noted on the application for admission.

PAGE 4, LINE 28

Substitute: Section 47.30.095 NOTICE OF REQUEST FOR RELEASE OF MINORS UNDER 14 YEARS OF AGE FROM VOLUNTARY DETENTION AND COMMITMENT.

(a) The minor or the minor's parent who has custody of the minor or the minor's guardian may request release of the minor at any time.

(b) Upon receipt of a request for release, the professional person in charge of the treatment facility or his designee shall immediately notify the parent who has custody of the minor or the minor's guardian. If the professional person in charge of the treatment facility or a designated mental health professional, who shall evaluate the minor in writing, or the parent who has custody of the minor or the minor's guardian does not petition for involuntary commitment within 48 hours of receipt of the request for release made by the minor or

the minor's parent who has custody of the minor or the minor's guardian, the minor shall be released.

(c) If a minor is admitted to an inpatient treatment facility while under 14 years of age, and if upon reaching age 14 is in need of further inpatient care and treatment, the professional person in charge of the facility shall request the minor to execute an application for voluntary admission. If the application is not executed by the time the minor's 14th birthday, the minor shall be discharged unless a petition is filed for involutnary commitment or protective placement by the end of the next day in which the court transacts business.

Purpose: More clearly defines the minor's ability to seek discharge from the facility. Clarifies the process by which the minor obtains discharge including time frames.

PAGE 5 LINE 4

Add: Section 47.30___ STANDARD. A person may be involuntarily committed to a treatment facility under the procedures of AS 47.30 only if the person evidences:

(1) a substantial probability of physical harm to himself or herself as evidenced by recent threats of or attempts at suicide or serious bodily harm;

(2) a substantial probability of physical harm to other persons as manifested by evidence of recent homicide or other violent behavior on his or her party or by evidence that others are placed in

reasonable fear of violent behavior and serious physical harm to them, as evidence by a recent overt act, attempt to threat to do such physical harm on his or her part; or

(3) a very substnatial probability of grave disability due to mental illness, as manifested by evidence of a pattern of recent acts or omissions. Such acts or omissions may include complete neglect of basic needs for food, clothing, shelter or personal safety. The probability of physical impairment or injury may not be deemed very substantial under this subdivision if reasonable provision for the individual's protection is available in the community;

(4) there is no less restrictive alternative available for his or her treatment.

Purpose: Although the standards for commitment are stated elsewhere in the bill, we feel that a clear exposition of these standards in a single place, although redundant, would greatly assist the physicians, mental health professionals and citizens having to interpret this terribly complex legislation and help the Department interpret these standards to the persons who will be judged by these standards. The less obscure our laws are to the average citizen, the more useful they become.

Section 47.30.__ NON-EMERGENCY DETENTION FOR EVALUATION INVOLVING DESIGNATED EXAMINER.

(a) A person seeking the commitment of another to a treatment facility may initiate the proceedings by executing a petition for evaluation

and presenting it to a designated examiner. The petition must allege:

(1) the facts and specific behavior of the respondent as evidence by standards set forth in AS 47.30;

(2) the names, addresses and phone numbers of all persons known to the petitioner who have knowledge of the facts through personal observation.

(b) A designated examiner who receives a properly executed petition for evaluation shall investigate or cause to be investigated and evaluated the specific facts alleged and the reliability and credibility of the person providing the information. If, after investigation, the designated examiner determines that there is good reason to believe that the allegations are true and the respondent does not agree to come voluntarily to a facility for evaluation, the designated examiner may obtain from the court and cause to be served on the respondent and his guardian, if there is one, a summons requiring the respondent to appear at a designated evaluation facility for an evaluation period of not more than 72 hours. If there is no evaluation facility in the respondent's community, the court shall determine whether evaluation personnel shall be brought into the community or whether the respondent should be transported to the nearest available evaluation facility at no cost to him. The summons shall then specify, as the place for the respondent to appear, the place of evaluation by evaluation personnel or the place of transport. The evaluation facility or personnel shall be given a copy of the petition and summons.

(c) The summons shall contain the following information:

(1) date and time within which the respondent must appear, not less than 24 hours after service of the summons;

(2) address of the evaluation facility, other place of evaluation, or place of transport to which the respondent is to report;

(3) name, business address and phone number of the designated examiner issuing the summons;

(4) a statement that if the respondent fails to appear at the appointed place or before the date and time stated in the summons, he may be involuntarily taken into custody and transported to the appointed place;

(5) a copy of the petition for evaluation and a notice of rights regarding commitment procedures as set out in AS 47.30.___ of this chapter; and

(6) the name of an attorney appointed by the court to represent the respondent if the respondent cannot afford or has no knowledge of any other attorney.

(d) No summons may be served when more than seven days have passed since its issuance. No petition for evaluation may be used as the

basis for issuance of a second summons after the first has expired unless subsequent investigation by the designated examiner reveals that the grounds for evaluation still exists.

(c) If the person summoned fails to appear on or before the date and time specified, the evaluation facility shall immediately notify the designated examiner, who shall cause the person to be taken into custody and transported to the evaluation facility. A peace officer may take the respondent into custody and convey him to an evaluation facility at the request of the designated examiner.

Section 47.30.052 NON-EMERGENCY DETENTION FOR EVALUATION WHEN NO DESIGNATED EXAMINER IN GEOGRAPHICAL AREA. A person seeking the commitment of another to a treatment facility in a geographical area when there is no designated examiner may execute a petition for evaluation as set forth in AS 47.30.___ and present it to the court. The court shall cause the allegation of the petition to be investigated. If the court detemrines there is good reason to believe that the allegations are ture, it shall issue a summons containing the information set out in AS 47.30.___ (3), with the exception of (c) (3). No summons may be served when more than seven days have passed since its issuance. If the person fails to appear at the designated evaluation facility on or before the date and time specified, the evaluation facility shall immediately notify the court, who may cause the person to be taken into custody and transported to the evaluation facility by a peace officer.

Purpose: This added section establishes early contact with the person responsible for delivery of treatment and allows for early evaluation of the circumstances surrounding the need for treatment. It allows the person to voluntarily

seek help from a qualified professional. It clearly sets out the procedures and evidence necessary. It relieves peace officers and courts of initial diagnosis and allows for trained professionals to evaluate the circumstances. In perhaps 50 percent of cases, it should relieve the necessity for involuntary commitment.

Since the community mental health centers' professional staff often function in this role as informally arranged by local communities, this section simply codifies the procedure and makes it more likely to be utilized.

PAGE 5, LINES 4-22

Delete: Lines 4-22.

Purpose: This provision provides that a judge may issue an ex parte order orally or in writing and may direct a peace officer take the allegedly mentally ill person into custody and deliver the person to the "nearest" designated appropriate facility for examination and treatment. A probable cause hearing is to follow within 72 hours. The Department's concern is not that an order of this type abrogates a person's due process rights but rather that there be sufficient staff in the courts and other involved agencies to allow for implementation of such a provision. It would be possible for a person to be picked up and sent to the Alaska Psychiatric Institute from a rural area in Alaska without a local mental health professional or paraprofessional being involved in an investigation or determination as to whether there is a less restrictive alternative nearer to the patient's residence. The Alaska Psychiatric Institute is at present the only designated facility in Alaska. The entry into the system is the most critical period both from a legal stand point as well as from a treatment point of view.

Early intervention by trained personnel cannot only avoid unnecessary hospitalization but also can prevent unnecessary court proceedings. This procedure is similar to that in use by the juvenile justice system in their use of the intake officer appointed by the court to investigate the police report or petition prior to or in lieu of adjudication by the court.

The present law allows for the initiation of an emergency involuntary commitment only after a licensed physician signs a certificate stating that the person is in need of emergency hospitalization. The only mental health or professional person to look at the person is removed in this bill. It goes further to state that regardless of whether or not the patient is in need of hospitalization, the admitting facility must receive the patient.

This section violates the intent of the rest of the bill. It deprives the patient of an early treatment opportunity and gives powers to the police that are ripe for misuse.

PAGE 5, LINE 4

Substitute: INITIATION OF INVOLUNTARY COMMITMENT PROCEDURES.

(a) Upon petition of any adult person, a judge may appoint a designated examiner to determine if the allegations of the petition are factual; evaluate whether there is probable cause to believe the person is gravely disabled or is mentally ill and that condition causes the person to present a likelihood of serious harm to himself or others; and recommend disposition of the petition. Upon the findings of the designated examiner, the court may issue an ex parte order orally, or in writing, within 48 hours of the

petition. The court shall appoint an attorney to represent the respondent, and may direct that a peace officer take the person into custody and deliver him to the nearest designated appropriate facility for evaluation. The ex parte order shall be provided to the respondent and made a part of the respondent's clinical record.

(b) The petition required in (a) of this section shall allege that the respondent is reasonably believed to present the conditions of AS 47.30.___(Standards) and shall specify the factual information on which that belief is based including the names and addresses of all persons known to the petitioner who have knowledge of those facts through personal observation.

Purpose: Introduces designated examiner into procedure.

PAGE 5, LINE 7

Substitute: (a) a peace officer who has probable cause to believe that a person who is gravely disabled or a mentally ill person who is likely to cause serious harm to himself or others of such an immediate nature that considerations of safety do not allow preliminary intervention by a "designated examiner", may cause the person to be taken into custody and delivered to an evaluation facility. Upon arrival at the evaluation facility, the peace officer shall complete a petition for evaluation and be interviewed by a mental health professional or a physician at the facility. A copy of the petition shall be given to the respondent and to his guardian, if any.

(b) The designated examiner or physician shall examine the person immediately upon arrival at the evaluation facility to determine if there is probable cause to involuntarily detain the person pursuant to AS 47.30.___ Involuntary Commitment Procedures.

(c) If there is no evaluation facility in the respondent's community or the evaluation personnel are not presently htere and the respondent needs to be detained for the arrival of personnel or transportation under AS 47.30.___, the emergency custody under AS 47.30.___ may include detention as long as the first available transportation is utilized. The respondent may not be held in a jail or correctional facility if there is any other possible place of detention providing adequate security. A person may be detained until the emergency has passed or for seven days, whichever limit is reached first. While detained, the respondent shall be given care and treatment that is appropriate and available in the community.

Purpose: Again, the intermediate step of local evaluation is interposed to further avoid court action or an unnecessary trip to Alaska Psychiatric Institute. Often untrained personnel, when encountering bizarre behavior, immediately consider that behavior a safety problem. Often police frighten mentally ill persons. Experience with emergency psychiatric teams responding to report of a person in need of assistance are able to either resolve the person's conflict situation causing the acting out behavior or often can talk persons who need hospitalization into going voluntarily.

PAGE 6, LINE 9

Substitute: "mental health professional and the physician who perform"

Purpose: Consistency of language.

PAGE 6, LINE 13

Substitute: "the physician may hospitalize"

Purpose: Only physicians have admitting privilege to hospitals.

PAGE 6, LINE 15

Substitute: "the head of the facility or his designee"

Purpose: Should be accomplished by administrator, mental health professional or physician. Gives more administrative flexibility.

PAGE 7, LINE 2

Change notation of standards to reflect revised standards section.

PAGE 8, LINE 17

Substitute: "a mental health professional and physician"

Purpose: Consistency.

PAGE 9, LINE 6

Substitute: "to a designated treatment facility."

Purpose: Consistency of language.

PAGE 9, LINE 7

Delete: "or less restrictive alternative for a period of not exceed 14 days"

Purpose: Redundant.

PAGE 13, LINE 5-6

Substitute: "by the program of the respondent"

Purpose: Original intent was to allow less restrictive programs to accept or reject patient not vice versa.

PAGE 14, LINE 16

Add: "parent who has custody of the minor"

Purpose: Consistency.

PAGE 14, LINE 17

Add: "parents who have custody of the minor"

Purpose: Consistency.

PAGE 15, LINE 13

Add: "custody by a peace officer and"

Purpose: Makes it clear mental health professionals do not have police powers.

PAGE 19, LINE 17

Delete: "or mental health professional"

Purpose: Mental health professionals cannot legally practice medicine.

PAGE 27, LINE 14

Substitute: "within one year"

Purpose: 4 years seems an unnecessarily long period to store personal effects and unclaimed funds.

PAGE 31, LINE 1

Add: "designated examiner" - a mental health professional or physician designated by the Department of Health and Social Services with the concurrence of the court to examine, evaluate and recommend disposition of persons alleged to be mentally ill or having impaired judgment.

PAGE 31, LINE 8-9

Delete: who conduct evaluations in places in which no staffed evaluation facility exists.

Purpose: With addition of definition of designated examiner, this definition becomes a general definition.

PAGE 31, LINE 27

Delete: "and substantial"

Purpose: Almost impossible to judge what substantial bodily harm is--a hangnail or loss of a limb. Both can kill.

PAGE 32, LINE 1

Delete: "and substantial"

Purpose: Consistency.

PAGE 32, LINE 10-11

Add: "social worker with a Masters of Social Work degree"

Purpose: More specifically defines professional social worker.

PAGE 32, LINE 20-21

Delete: "state, municipal, or other local health officer, public health nurse"

Purpose: Defining these groups as peace officers is inconsistent with the retirement programs and other Alaska Statutes.

Addendum

PAGE 2, LINES 19, 20, & 21

Substitute: Unites States Agency.

Purpose: Gives a wider range of potential treatment facilities with which to enter into contracts.

Referred: Health,Education & Social Services and Finance

IN THE HOUSE

BY CHATTERTON,MALONE AND PHILLIPS

HOUSE BILL NO. 66

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act providing an exemption for senior citizens from payment for land leased from the state."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.05 is amended by adding a new section to read:

Sec. 38.05.098. SENIOR CITIZENS EXEMPTION. (a) The real property occupied as a permanent place of abode by a resident 65 years of age or over and leased by that resident from the state in accordance with AS 38.05.070 - 38.05.105 is exempt from the payment of an annual lease rent. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No exemption may be granted for any portion of the lease is used by the leaseholder for any purpose other than his permanent place of abode.

(b) No exemption may be granted except upon written application for the exemption on a form provided by the director of land and water management. The leaseholder must file the application not later than 60 days before the anniversary date of the lease, and shall file a separate application for each lease year for which the exemption is sought. If an application is filed within the required time and is approved by the director, he shall allow a rental exemption for the lease year commencing on the anniversary date in accordance with the provisions of this section. The director may at any time require proof in the form he considers necessary of the right to an exemption claimed under this

section.

(c) The legislature shall annually appropriate from the general fund to any trust fund the sums necessary to reimburse the trust fund for amounts lost to it by the operation of (a) of this section.

SECTIONAL SYNOPSIS FOR THE RULES COMMITTEE SUBSTITUTE FOR HB 472:

AN ACT RELATING TO MENTALLY ILL ~~AND DEVELOPMENTALLY DISABLED PERSONS~~

Sec. 47.30.655. page 1 thru line 1 of page 2:

This states the purpose of this act and lists principles of mental health care.

Sec. 47.30.660. page 2, lines 2 thru 29, and page 3, lines 1 thru 15:

This section lists the powers and duties of the Department of Health & Social Services.

Sec. 47.30.665. page 3, lines 16 thru 21:

This section allows prayer as a method of treatment.

Sec. 47.30.670. page 3, lines 23 thru 26:

This section allows a person age 14 or older to be voluntarily admitted to a treatment facility if he voluntarily signs the admission papers.

Sec. 47.30.675. page 3, lines 27 thru 29, and page 4, lines 1 thru 8:

This section requires a person applying for voluntary admission to be notified of his rights which includes notification that if he is mentally ill and wishes to leave the facility, the facility can initiate involuntary commitment proceedings against him. Rights must be explained in a language the applicant understands.

Sec. 47.30.680. page 4, lines 9 thru 12:

This section allows a person no longer in need of treatment to be released from a facility.

Sec. 47.30.685. page 4, lines 13 thru 23:

This section requires a voluntary patient, 14 or older, to submit a written notice of intent to leave to the facility. Evaluation must be immediately after the notice is given, put into writing, and the the patient must either be released immediately, or given written notice that involuntary commitment proceedings will commence. The facility can keep the patient no more than 48 hours after notice to leave is given.

Sec. 47.30.690. page 4, lines 24 thru 27:

This section allows a person under age 14 to be voluntarily admitted to a facility if his parents or guardian signs admission papers and the facility agrees that person is in need of treatment.

Sec. 47.30.695. page 4, lines 28 thru 29, and page 5, lines 1 thru 2:

This section allows the parent or guardian of any person under 14 to request and obtain release of that person at any time.

Sec. 47.30.700. page 5, lines 4 thru 22:

This section allows a judge to issue an ex parte order if there is probable cause that a person is gravely disabled or a harm to himself or others. The court may direct a peace officer to take a person to a facility for emergency evaluation or treatment.

Sec. 47.30.705. page 5, lines 23 thru 29, and page 6, lines 1 thru 3:

This section allows a peace officer to take a person who is a serious harm to himself or others to a treatment or evaluation facility. The peace officer must complete an application for examination of the person and be interviewed by a mental health professional.

Sec. 47.30.710. page 6, lines 4 thru 18:

This section states that any person taken into custody under either section 700 or 705 shall be examined and evaluated by both a mental health professional and a physician within 24 hours after arrival at the facility. A person may then be hospitalized on an emergency basis.

Sec. 47.30.715. page 6, lines 19 thru 28:

This section says that when a facility receives an order for evaluation, it must accept the person for an evaluation period with a maximum of 72 hours. At that time the facility shall notify the court and the court shall set a date, time and place for a probable cause hearing. The facility, the patient, his attorney, evaluation personnel, and the prosecuting attorney shall be notified of the hearing arrangements.

Sec. 47.30.720. page 6, line 29, and page 7, lines 1 thru 6:

This section allows a person to be released if he is not a harm to himself or others and that is determined by a mental health professional during the 72-hour evaluation period. If hearing arrangements have started, the court must be notified of the patient's release.

Sec. 47.30.725. page 7, lines 7 thru 29, and page 8, lines 1 thru 11:

This section establishes a person's rights during commitment proceedings.

Sec. 47.30.730. page 8, lines 12 thru 29, and page 9, line 1 thru 9:

This section explains the proceedure for a 14-day commitment.

Sec. 47.30.735. page 9, line 10 thru 29, and page 10, line 1 thru 11:

This section explains the 14-day commitment court hearing.

Sec. 47.30.740. page 10, line 12 thru 29, and page 11, line 1 thru 7:

This section sets up the procedure for a 90-day commitment following a 14-day commitment.

Sec. 47.30.745. page 11, line 8 thru 29, and page 12, line 1 thru 21:

This section lists 90-day commitment hearing rights.

Sec. 47.30.750. page 12, line 22 thru 24:

This section refers to the conduct of the hearing.

Sec. 47.30.755. page 12, line 25 thru 29, and page 13, line 1 thru 5:

This section says the court or jury must find clear and convincing evidence that the allegations in sec. 740 are true and can then commit a person to a facility for no more than 90 days. The court may order a less restrictive alternative treatment not to exceed 90 days.

Sec. 47.30.760. page 13, line 6 thru 19:

This section states where, or which treatment facility will be used.

Sec. 47.30.765. page 13, line 20 thru 22:

This section allows a person the right to appeal any order of involuntary commitment.

Sec 47.30.770. page 13, line 23 thru 29, and page 14, line 1 thru 11:

This section sets the procedure for a 120-day involuntary commitment. It further states that no order of commitment may exceed 120 days.

Sec. 47.30.775. page 14, line 12 thru 22:

This section explains involuntary commitment of minors. It is the same as for adults except that all notices required to be served in secs. 700-820 shall also be served on the parents or guardian.

Sec. 47.30.780. page 14, line 23 thru 28:

This section allows a person committed to be released any time during commitment if a professional discovers he is no longer a serious harm to himself or others.

Sec. 47.30.785. page 14, line 29, and page 15, line 1 thru 6:

This section allows an involuntary patient to get appropriate authorization to be absent from a facility if the absence is in his best interests and he is not likely to cause harm to himself or others.

Sec. 47.30.790. page 15, line 7 thru 13:

This section allows a facility to return a person to treatment if that person 's absence is not authorized or is excessive.

Sec. 47.30.795. page 15, line 14 thru 29, and page 16, line 1 thru 18:

This section allows out-patient care to be substituted for involuntary in-patient care and sets up to criteria for it.

Sec. 47.30.800. page 16, line 19 thru 29, and page 17, line 1 thru 5:

This section allows involuntary out-patient care to be changed to involuntary in-patient care.

Sec. 47.30.805. page 17, line 6 thru 26:

This section states how time periods for commitment are determined.

Sec. 47.30.810. page 17, line 27 and 28:

This gives a person the right to a writ of habeas corpus.

Sec. 47.30.815. page 17, line 29, and page 18, line 1 thru 15:

This section limits the liability of persons'actions regarding commitment proceedings and established a penalty for those not having good cause.

Sec. 47.30.820. page 18, line 16 thru 23:

This section says the terms of this chapter are not retroactive, but will apply to all persons committed 90 days after October 1, 1978 (the effective date of the bill).

Sec. 47.30.825. page 18, line 25 thru 29, and page 19, line 1 thru 29, and page 20, line 1 thru 29, and page 21, line 1 thru 15:

This section gives patient rights including knowledge of medication given, access to records, restricted use of a "quiet room" or other physical restraints, the right to refuse medication or electro-convulsive therapy, and to refuse psychosurgery or lobotomy. In addition, no psychosurgery or lobotomy may be performed without a court order after a hearing. This section also provides a discharge plan for a patient when he leaves a facility.

Sec. 47.30.830. page 21, line 16 thru 29, and page 22, line 1 thru 3:

This section prohibits experimental treatments.

Sec. 47.30.835. page 22, line 4 thru 9:

This section guarantees a person's civil rights when undergoing evaluation or treatment.

Sec. 47.30.840. page 22, line 10 thru 29, and page 23, line 1 thru 5:

This section gives persons undergoing evaluation or treatment the right to privacy and personal possessions.

Sec. 47.30.845. page 23, line 6 thru 26:

This section states that all records nd information obtained during evaluation, examination or treatment shall be kept confidential.

Sec. 47.30.850. page 23, line 27 thru 29, and page 24, line 1 thru 4:

This section allows all court records to be destroyed after a person has been discharged from a facility.

Sec. 47.30.855. page 24, line 5 thru 9:

This section states that the rights set out in secs. 825-855 shall be posted in all treatment facilities and patients not understanding English shall have their rights explained to them in a language they understand.

Sec. 47.30.860. page 24, line 10 thru 14:

This section says that all notices and documents required in this chapter shall be explained in a language the person understands.

Sec. 47.30.865. page 24, line 15 thru 29:

This section states that the fact that a person has been evaluated or treated for mental illness is not a basis for discrimination.

Sec. 47.30.870. page 25, line 2 thru 18:

This section allows the department to arrange and pay for a person's transportation to be evaluated, involuntarily committed, or to attend a judicial hearing. It further allows a friend or relative to travel with the patient when necessary, and the department may pay for that person's travel also.

Sec. 47.30.875. page 25, line 19 thru 29, and page 26, line 1 thru 19:

This section describes the treatment of nonresident patients.

Sec. 47.30.880. page 26, line 20 thru 25:

This section ratifies the "Interstate Compact on Mental Health".

Sec. 47.30.885. page 26, line 26 thru 29, and page 27, line 1:

This section mentions patient's rights outside the state.

Sec. 47.30.890. page 27, line 2 thru 9:

This section secures clothing, money, and a place to live for those released from a treatment facility.

Sec. 47.30.895. page 27, line 10 thru 23:

This section explains what to do with personal effects and unclaimed funds if a patient dies before discharged from a facility.

Sec. 47.30.900. page 27, line 24 thru 29, and page 28, line 1 thru 6:

This section says that when a patient leaves a facility without authority or dies, the department must make inquiries to find that person's legal heirs or representatives. Any money or articles of personal property must be turned over to the proper person. Claims to the money or property may be presented.

Sec. 47.30.905. page 28. line 7 thru 24:

This section tells who pays the fees and expenses for judicial proceedings.

Sec. 47.30.910. page 28, line 25 thru 29, and page 29, line 1 thru 29, and page 30, line 1 thru 25:

This section explains who is liable for expenses in a treatment facility. If a person is voluntarily committed, his monthly charge is based on his ability to pay, as determined by the department. After a voluntary patient has been in a facility for 12 months, his monthly fee is $50.00. If a person is involuntarily committed, his monthly fee is $50.00.

Sec. 47.30.915. page 30, line 26 thru 29, page 31, line 1 thru 29, page 32, line 1 thru 29, page 33, line 1 thru 12:

This is the definition section for chapter 30.

Sec. 47.30.010. page 34, line 1 thru 16:

This section states that persons with handicaps have the same legal rights as all other persons.

Sec. 47.80.020. page 34, line 17 thru 24:

This section says the Department of Health & Social Services shall protect and advocate the rights of persons with handicaps.

Sec. 47.80.030. page 34, line 27 thru 29, and page 35, line 1 thru 6:

This section establishes the Governor's Council for the Handicapped and Gifted.

Sec. 47.80. 040. page 35, line 7 thru 27:

This section sets out the composition of the council.

Sec. 47.80. 050. page 35, line 28 & 29, and page 36, line 1 thru 10:

This section sets out the terms of office for members of the council.

Sec. 47.80.060. page 36, line 11 thru 13:

This section says council members receive no salary, but do get per diem and travel money.

Sec. 47.80. 070. page 36, line 14 thru 21:

This section allows for officers and staff for the council.

Sec. 47.80.080. page 36, line 22 thru 28:

This section sets out the bylaws of the council.

Sec. 47.80.090. page 36, line 1, and page 37, line 1 thru 29, and page 38, line 1 thru 24:

This section states the responsibilities of the council.

Sec. 47.80.100. page 38, line 26 thru 29, and page 39, line 1 thru 13:

This section allows for programs for the handicapped with the Departments of Health & Social Services and Education and other appropriate departments and for those departments to plan, develop, and implement a comprehensive system of services.

Sec. 47.80.110. page 39, line 14 thru 19:

This section sets out program principles.

Sec. 47.80.120. page 39, line 20 thru 29, and page 40, line 1 thru 4:

This section requires habilitation plans for those receiving services.

Sec. 47.80.130. page 40, line 5 thru 29, and page 41, line 1 thru 4:

This section gives the specific duties and powers of the department.

Sec. 47.80.140. page 41, line 5 thru 23:

This section states that residential facilities must get certificates of need and be licensed.

Sec. 47.80. 150. page 41, line 24 thru 29, and page 42, line 1 thru 29, and page 43, line 1 thru 10:

This section is about liability for expense of services. Those with handicaps pay for services according to their ability to pay, and those developmentally disabled pay a maximum of $30.00 per month.

Sec. 47.80.160. page 43, line 11 thru 26:

This section allows the department to arrange and pay for the travel of persons traveling to a facility. It allows a person to accompany the patient when it is in the best interests of the patient and the individual is indigent.

Sec. 47.80.170. page 43, line 27 thru 29, and page 44, line 1 thru 5:

This section says that when a person is discharged from a facility the department is responsible that the person has suitable clothes, transportation, a place to stay, and some money.

Sec. 47.80.900. page 44, line 7 thru 29, and page 45, line 1 thru 22:

This is the definition section for chapter 80.

*Sec. 4. of the bill, page 45, line 23 thru 29, and page 46, line 1 thru 7:

This section turns all records of the Alaska Developmental Disabilities Planning Council, and the Special Education Advisory Council to the Governor's Council for the Handicapped and Gifted.

*Sec. 5. of the bill, page 46, line 8:

This section repeals AS 47.30.010 thru .340. which is the old mental health commitment procedure act, and repeals AS 18.05.031. which allows the Department of Health & Social Services to be the sole advocate of the mental retarded.

*Sec. 6. of the bill, page 46, line 9:

The effective date is October 1, 1978.

SUBJECT: Health Providers Inventory Report

TO: The Honorable Charlie Parr

FROM: Sharman Haley
Research Analyst

Enclosed please find the final report of the Health Providers Inventory Project. In our opinion the data gathered in the course of this project make a significant contribution to the health planning information available in this state and provide a basis for further useful analysis.

We will be distributing additional copies of this report to interested legislators and agencies shortly after the legislative session. In the meantime a limited number of copies are available on request from our office.

PREFACE

It is my pleasure to submit the final report on the Health Care Provider's Project. The project represents many hours of many people's time and those people should be recognized.

Debbie Behr, Research Analyst for Legislative Affairs, designed and worked on the project. Sharman Haley, Research Analyst, Legislative Affairs, provided technical assistance, moral support, and the computer program and print-out for the project. Susan Kilka was the graphic artist responsible for the map. Charlie Par[illegible] was the person requesting the project. Without him it might not have happened.

Each person involved with project did a fine job and should be proud of it. I want to thank everyone for their time, hard work, and most of all, patience and understanding.

Rochelle Plotnick
May, 1978

PROJECT HISTORY

During the 1977 legislative session, Representative Charlie Parr, chairman of the Health, Education and Social Services Committee, submitted a work order to Legislative Affairs Agency for an interim project regarding distribution and accessibility of Alaskan health care providers and facilities. Debbie Behr received the work order and began to draft a research design for the study.

An early decision was made as to which facilities and professionals would be included. Representative Parr was given a list of many possibilities and made his choices from it. The professions chosen were: 1) doctors; 2) registered nurses; 3) licensed practical nurses; 4) physician assistants; 5) dentists; 6) community health aides; 7) state public health nurses; 8) psychiatrists; 9) audiologists; 10) opticians 11) optometrists; 12) pharmacists. The facilities chosen were: 1) hospitals; 2) state public health centers; 3) community mental health centers; 4) diagnostic facilities; 5) Public Health Service - village built clinics; 6) communicative disorders clinics; 7) long-term care facilities.

The project design included a computer file which would hold all the data obtained - location, specialty, special resources, number of staff, etc. It would be capable of producing a print-out listing the facilities and professions and allow specific information to be stored and pulled from the file when needed. There was no provision for updating the computer file at that time.

The final product of the project was to be a map displaying location and concentration of facilities and professions by the use of colors, symbols or pins.

By August 1977, the project was well under way. Nearly half the facilities and professions had been coded and keypunched. Those remain- to be coded and keypunched were: pharmacists, physician assistants, audiologists, dentists, state public health centers, diagnostic facilities, Public Health Service - village built clinics and communicative disorders clinics. Debbie Behr went on leave at the end of August. In late September Rochelle (MacKinnon) Plotnick contracted with Legislative Affairs Agency to complete the project. Plotnick began coding the remaining categories where Behr had stopped. Data were difficult to obtain in several of the uncoded categories, such as audiologists and physician assistants. Also, some of the categories were not well defined, such as "diagnostic facility". Despite the difficulties, all the information had been gathered and coded by December 23. What remained was the keypunching of about 500 computer cards, the writing of a computer program and getting a print-out, the production of a map, and writing the report. All has now been completed, with this report being the final phase of the project.

The following sections of this report will explain the data, and tell <u>how</u> and from <u>where</u> they were obtained. Instructions for future use of the data base are included, as well as recommendation for the future of the project. Data sources are included in the "codes" section under chart "J: source of information".

METHODOLOGY

The main theme of this project was "obtain and incorporate"--which means that information was gathered and included in a data base. Take one category for example. A list of licensed pharmacists in Alaska was obtained from the Department of Commerce & Economic Development, Division of Occupational Licensing. The following information was then coded on a coding sheet for each pharmacist, and keypunched: project code; provide identification number; village code; type of profession; whether currently practicing; type of practice; whether itinerant; geographic region; speciality; whether medicaid clients accepted; and data source and date. Information which was not available or not applicable to pharmacists was coded "unknown". Since there were 157 pharmacists, there were 157 coding sheets, each filled out as described above. Thus, pharmacists were incorporated in the data base, to be included in the computer print-out when all categories were complete.

Not all categories had the same amount of information available as this illustrative case. Sometimes there was more, sometimes less. But this will be covered more explicitly with the description of each one.

RESULTS

In this section each category will be discussed. Their order of placement for discussion is based on the overlays on which they appear on the map: overlays one, two, and three respectively. This discussion will serve as a brief description for both the map and the computer print-out. Additional information is obtainable in the notebooks containing the coding sheets and their sources, the coding explanation book, or other references listed. This report will either give basic information or tell where to go for it. It should be kept in mind that change occurs constantly so this survey is already dated. New facilities are opening frequently and additional people are being licensed. Some licensed professionals are not practicing.

MAP EXPLANATION

Three shapes are used on the map: squares, circles and triangles. Small sizes represent one professional or one facility. Large sizes represent ten. A large size with a white dot placed in it represents 100. As each profession and facility is described from overlay 1, 2, and 3, its color will be given. A key with all this information is located on the upper right hand corner of the map. Also, a red disk accompanies the map. This disk serves as a distance guide for air travel. Its radius equals one hour's flying time, or 100 miles, in a "180" airplane.

OVERLAY 1

Public Health Service - Village Built Clinics

Public Health - Village Built Clinics are village built and owned clinic facilities leased to the Alaska Area Native Health Service. Primary health care is regularly provided in the clinic by community health aides. Care is also provided by the Alaska Area Native Health Service and state health professionals on an itinerant basis. There are 116 village built clinics in Alaska, located in rural areas. In some instances they are the only health facilities in an area. They are represented on the map by purple squares. Information was obtained from Alaska Area Native Health Service, Area General Services Branch.

Community Health Aides

Community Health Aides are Alaskans trained to provide primary health care in rural areas. Their responsibilities include examining patients with simple problems, determining appropriate treatment, making referrals, providing primary treatment, arranging transportation, and working with other health professionals visiting the village. Community Health Aides are permanent residents of the village in which they work, and must be acceptable to most of the people in their community. Their salary comes from either a regional health corporation, or another Native organization which obtains funds through contracting with the Alaska Area Native Health Service. The three health aid training agencies in the state are the AANHS in Anchorage, the Yukon-Kuskokwim Health

Corporation in Bethel, and the Norton Sound Health Corporation in Nome. At the time of this survey there were 216 Community Health Aides listed, according to the AANHS. Some of these are either full or part time, or alternates. They are shown on the map as brown dots. In some cases there is no PHS clinic for an aide to use, so the aide must work in people's homes. In approximately 25 villages the health aide is the ONLY health professional in the village.

State Public Health Centers

The 28 State Public Health Centers in Alaska are staffed by State Public Health Nurses who offer a wide range of services. The centers provide immunizations, vaccines, TB tests, VD screening and treatment, women's health screening (breast exams, pap smears, pregnancy tests), contraceptives, maternity care, and child health care and nutrition. They are represented on the map by brown squares. The data on them were obtained from the State Department of Health and Social Services (DH&SS).

Licensed Practical Nurses

According to the State Department of Commerce & Economic Development, Division of Occupational Licensing, there are 655 licensed practical nurses in Alaska. Data on whether or not they are practicing were unobtainable. An LPN must graduate from an accredited practical nursing program, complete the tenth grade or its equivalent, be at least 18, and pass a written exam issued by the State Board of Nursing. Most LPN's work in institutions since they are required to be supervised by a Registered Nurse. They are shown as green dots on the map. Practical nurses are exempt from state licensure if employed by the United States Government pursuant to AS 08.68.400(1).

Registered Nurses

At the time of the survey, the State Division of Occupational Licensing reported 2,283 Registered Nurses licensed and residing in Alaska. Data on those currently practicing were not available. To qualify as an RN one must complete high school or the equivalent, graduate from an accredited professional nursing school, and pass an exam issued by the State Board of Nursing. Their training is more technical than for LPN's, including anatomy, physiology, and more specialized courses. The map shows RN's with red dots. Registered Nurses are exempt from state licensure if employed by the United States Government pursuant to AS 08.68.400(1).

Physician Assistants

According to the Alaska Academy of Physician Assistants there are 66 Physician Assistants in Alaska. The Alaska State Medical Board is writing currently proposed licensing regulations for the PA's in the state. Pursuant to AS 08.64.107, the regulations will include educational qualifications, registration procedures, the scope of activities authorized and the responsibilities of the supervising or training physician. Until the regulations are promulgated, no mandatory registration for PA's exists. When they are promulgated, the Division of Occupational Licensing will have a listing of the PA's in Alaska. The 66 Physician Assistants listed in the project are represented by blue triangles.

OVERLAY II

Hospitals

From information supplied by the Division of Certification and Licensing, DHSS, 26 hospitals in Alaska were accounted for. Of these, seven are United State Public Health Service, and two are military. Seven of these facilities also serve as nursing homes, but were not with the nursing homes to avoid duplication. Hospitals are represented by red squares on the map.

Nursing Homes

Excluding the seven hospitals mentioned in the preceeding paragraph, there are four nursing homes in Alaska: Anchorage has two; Seward and Fairbanks have one each. Nursing homes are shown on the map as blue squares. This information was obtained from Certification and Licensing, Department of Health and Social Services.

Laboratories

There are approximately 24 labs in the state. Those located within hospitals were not included, to avoid duplication. Data were obtained from the Division of Public Health, DHSS. Labs are represented by orange triangles on the map.

Diagnostic Facilities
