Re: Amendment to HB 529

Attached is a proposed amendment to HB 529. The purpose of the amendment is to clarify in the proposed legislation the standards of people who are qualified to do fish health inspections in the state. It is my concern that all fish health inspections be held to the same standard and that there not be two standards imposed in the state, (1) the Department of Fish and Game and, (2) all other people involved in the fisheries.

The language I have proposed as an amendment to the bill will clarify the issue that all fish health inspections that the department determines necessary are performed by a competently certified person. It leaves the discretion of whether to have a fish health inspection or not with the department, but that once the department decides to form an inspection or require one that the qualifications of the person doing this inspection is set out in statute.

AMENDMENT TO HB 529

The following language is proposed as an amendment to Section 3 of HB 529.

Sec. 16.05.86E. FISH HEALTH INSPECTIONS. All fish health inspections the department determines necessary shall be performed by a professional fish health specialist certified by the American Fisheries Society, Fish Health Section.

Justification: The proposed amendment makes it clear that all fish health inspections will be based on the same standards and performed by a competently certified person.
